

Combating Violence and Delinquency: The National Juvenile Justice Action Plan

Report

Coordinating Council on Juvenile Justice and Delinquency Prevention Members

Practitioner Members

Lisa M. Beecher
Detective
Portland Police Department

The Honorable James L. Burgess
Presiding Judge
18th Judicial District of Kansas

John Cahill
Program Coordinator
Clark County Family and Youth Services Department

John A. (Jack) Calhoun
Executive Director
National Crime Prevention Council

Nancy G. Guerra, Ed.D.
Associate Professor of Psychology
University of Illinois at Chicago

Michael J. Mahoney
President
John Howard Association

The Honorable Gordon A. Martin, Jr.
Associate Justice
Massachusetts Trial Court
Roxbury District Court

Mary Ann Murphy
Manager
Regional Center for Child Abuse and Neglect
Deaconess Medical Center

Rose W. Washington
Executive Director
Berkshire Farms Center

U.S. Department of Justice

The Honorable Janet Reno, *Chair*
Attorney General

Office of Juvenile Justice and Delinquency Prevention

Shay Bilchik, *Vice Chair*
Administrator

Immigration and Naturalization Service

Doris Meissner
Commissioner

U.S. Department of Health and Human Services

The Honorable Donna E. Shalala, Ph.D.
Secretary

U.S. Department of Labor

The Honorable Robert B. Reich
Secretary

U.S. Department of Education

The Honorable Richard W. Riley
Secretary

U.S. Department of Housing and Urban Development

The Honorable Henry G. Cisneros
Secretary

Office of National Drug Control Policy

Lee P. Brown, Ph.D.
Director

Corporation for National Service

Eli J. Segal
Chief Executive Officer

The Coordinating Council on Juvenile Justice and Delinquency Prevention was established in 1974 as an independent organization in the executive branch of the Federal Government. The primary function of the Council is to make recommendations to the President and the Congress on coordination of overall policy and development of objectives and priorities for all Federal juvenile delinquency programs and activities. Members of the Coordinating Council are listed above. The nine practitioner members in the field of juvenile justice are appointed, without regard to political affiliation, by the Speaker of the House of Representatives, the Majority Leader of the Senate, and the President of the United States.

**Combating Violence and Delinquency:
The National Juvenile
Justice Action Plan**

Report

**Coordinating Council on
Juvenile Justice and Delinquency Prevention**

March 1996

Foreword

Every day, crime shatters the peace in our Nation's neighborhoods. Violent crime and the fear it engenders cripple our society, threaten personal freedom, and fray the ties that are essential for healthy communities. No corner of America is safe from increasing levels of criminal violence, including violence committed by and against juveniles. Parents are afraid to let their children walk to school alone. Children hesitate to play in neighborhood playgrounds. The elderly lock themselves in their homes, and innocent Americans of all ages find their lives changed by the fear of crime.

The Coordinating Council on Juvenile Justice and Delinquency Prevention's *National Juvenile Justice Action Plan (Action Plan)* presents innovative and effective strategies designed to reduce violence and victimization. Through these efforts, communities and citizens are working to bring about positive change. They are establishing neighborhood watches and citizen patrols and working with law enforcement and other agencies to close down drug houses. They are cleaning up playgrounds and parks and creating drug- and weapon-free school zones. They are forming community planning teams to identify risk factors for delinquency, assess resources and needs, and provide programs designed to prevent juvenile involvement in delinquency and crime. They are creating opportunities for youth to take part in community-building activities. In concert with community oriented policing and strict accountability for offenders, these local prevention efforts are our Nation's most effective long-term weapons against crime and violence.

Although the public is deeply concerned about juvenile violence and victimization, many Americans do not know how they can help. Because the effects of juvenile violence are felt by entire communities, the search for solutions must be a communitywide effort, and every citizen needs to be involved.

The *Action Plan* describes how communities can generate solutions and how individuals and groups can prevent or reduce violence in their own block, public housing unit, or neighborhood. Cooperative partnerships among justice, health, child welfare, education, and social service systems can lay the foundation for measurable successes. Working together, individuals, groups, and communities can make real and sustained changes. The *Action Plan* also provides important information about Federal training, technical assistance, grants, research, evaluation, and other resources that support these efforts.

The Coordinating Council recognizes that much work needs to be done. However, by continuing to build partnerships throughout our government and communities, we can promote early intervention and prevention of youth violence. The solutions are within reach. The power to change America is within ourselves. Together, we can redeem the promise that every young life holds.

Attorney General Janet Reno
Chair
Coordinating Council on Juvenile Justice
and Delinquency Prevention

Acknowledgments

The problem of violent crime committed by and against juveniles is a national crisis. The work of the Coordinating Council on Juvenile Justice and Delinquency Prevention in developing the *Action Plan* represents an extraordinary accomplishment. The *Action Plan* frames the fight against juvenile violence through eight objectives that can be supported by activity at the Federal, State, local, community, and individual levels—and bases its recommended actions on research and program evaluations that give us reason to believe that we can be successful. The *Action Plan* also provides an annotated bibliography and technical assistance resources that can assist in ensuring that success.

While all of the members of the Coordinating Council participated in the development of the *Action Plan*, a Coordinating Council Working Group that includes the practitioner members and staff from both the member and other participating Federal agencies helped make this a document truly reflective of the needs of the field. The individuals and groups, listed in Appendix B, spent countless hours reviewing, refining, and finalizing the *Action Plan*. I thank them for their significant contribution. Special thanks are due to the Department of Justice's youth violence working group and to the bureaus of the Office of Justice Programs.

There are several members of the staff of the Office of Juvenile Justice and Delinquency Prevention (OJJDP) without whom this *Action Plan* could not have been produced. Gina E. Wood, Director of Concentration of Federal Efforts, guided this project with patience and vision to its conclusion. OJJDP Deputy Administrator John J. Wilson helped refine the document into its present clear statement. Sarah Ingersoll, Special Assistant to the OJJDP Administrator, served as the *Action Plan's* primary author. OJJDP's Juvenile Justice Resource Center provided invaluable support in developing the *Action Plan*.

The *Action Plan* was designed to provide a framework and strategy for action to address the problem of juvenile violence facing communities, their youth, and the juvenile justice system. I believe it has accomplished this goal. I look forward to implementing the action steps and seeing the emergence of a stronger juvenile justice system and a safer America.

Shay Bilchik
Vice Chair
Coordinating Council on Juvenile Justice
and Delinquency Prevention

Introduction

An Urgent Call to Action

In the 1990's, pervasive problems with juvenile violence threaten the safety and security of communities across the country, and projections for the future are cause for nationwide alarm. Demographic experts predict that juvenile arrests for violent crimes will more than double by the year 2010,¹ given population growth projections and trends in juvenile arrests over the past decade. (See figure 1.) It is clear that our children—and the juvenile justice system—need immediate help.

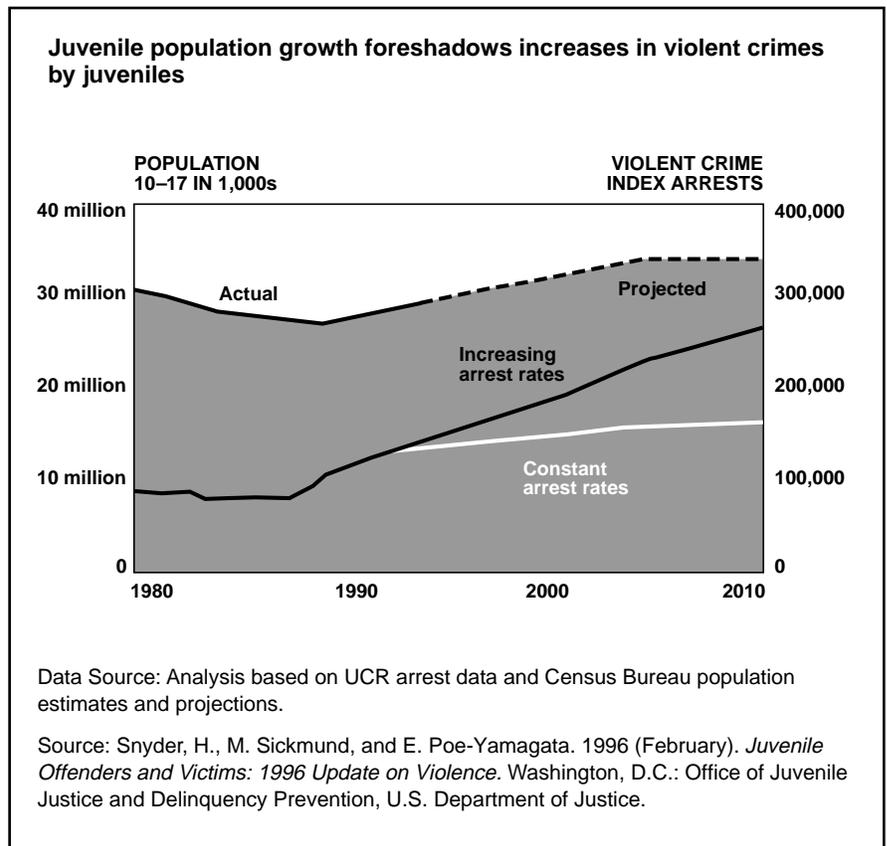

There is, however, reason for hope. Projections and trends are not destiny. We can successfully intervene to reverse these trends based on identified positive and negative characteristics—protective and risk factors—that are present or lacking in communities, families, schools, peer groups, and individuals. These factors either equip a child with the capacity to become a healthy, productive individual or expose that child to potential involvement in crime and violence. Of equal importance, communities are learning that they can make dramatic changes in delinquency levels by taking steps that successfully reduce the risk factors and strengthen the protective factors in children's lives.

In partnership with State and Federal agencies, communities are beginning to mobilize to combat juvenile delinquency through prevention, early intervention, and community-building strategies that address local needs. They are reducing serious and violent juvenile delinquency by using multi-agency, coordinated approaches

and innovative programs and services in the juvenile justice system.

In support of these efforts, the Coordinating Council on Juvenile Justice and Delinquency Prevention offers *The National Juvenile Justice Action Plan*. This plan for local, State, and Federal action is

Figure 1: Juvenile population and arrest rates

an eight-point statement of objectives and strategies that are designed to strengthen State and local initiatives to reduce juvenile violence and to increase the capacity of the juvenile justice system to respond to, and prevent, delinquency.

A Cooperative Effort

To combat juvenile violence, all citizens must recognize that they can make a difference in their communities, both through individual action and by joining with others in comprehensive, collaborative initiatives. While the *Action Plan* recognizes the critical Federal role of providing support and a national perspective, State, local, and individual commitment is the key ingredient if community efforts are to succeed. All individuals can play crucial roles in protecting and nurturing children in their communities.

Efforts to reduce juvenile violence can be as basic as parents setting clear expectations and standards for children's behavior or as far-reaching as a local government forming an anti-violence task force or implementing community oriented policing. Another effective strategy involves setting up local resource centers that offer positive educational, social, and cultural activities to provide youth with alternatives to crime. Many national organizations are committed to supporting the implementation of community-based initiatives to reduce juvenile violence and can provide information about local projects across the country. (National organizations that provide technical assistance are listed in Appendix C.)

The annotated bibliography (Appendix F) lists a range of publications that address juvenile violence. The *Comprehensive Strategy for Serious, Violent, and Chronic Juvenile Offenders*² and its companion piece, the *Guide for Implementing the Comprehensive Strategy for Serious, Violent, and Chronic Juvenile Offenders*,³ published in 1995 by the Office of Juvenile Justice and Delinquency Prevention (OJJDP), are valuable resources for community planning and action. The *Action Plan* supports implementation of the *Comprehensive Strategy* and the *Guide's* framework for establishing a continuum of programs and services designed to reverse the increasing trends of juvenile violence and delinquency.

To support implementation of State, local, and community activities, the *Action Plan* provides:

- A statement of resources that Federal member agencies of the Coordinating Council will commit to the eight priority objectives, including training and technical assistance, financial assistance, research, legislation, evaluation, and information dissemination.
- A summary of research that supports the plan's objectives, which State and local communities can use to guide their policy, planning, and communication activities.
- Model program examples that can be adapted to meet local needs.
- A list of technical assistance providers, with addresses and phone numbers, and an annotated bibliography.

Objectives of The National Juvenile Justice Action Plan

The *Action Plan* is a blueprint for community action designed to address and reduce the impact of juvenile violence and delinquency. It is founded on the premise that no single individual, organization, or agency can address the causes of juvenile violence in isolation. Working together, however, State and local leaders, representatives of public and private groups, and individual community members—including youth—can base their actions on what works and direct their energies to meeting the eight *Action Plan* objectives. The following objectives, all of equal importance, can be achieved by communities that address public safety concerns while making a commitment to services for children:

Objective 1. Provide immediate intervention and appropriate sanctions and treatment for delinquent juveniles.

Objective 2. Prosecute certain serious, violent, and chronic juvenile offenders in criminal court.⁴

Objective 3. Reduce youth involvement with guns, drugs, and gangs.

Objective 4. Provide opportunities for children and youth.

Objective 5. Break the cycle of violence by addressing youth victimization, abuse, and neglect.

Objective 6. Strengthen and mobilize communities.

Objective 7. Support the development of innovative approaches to research and evaluation.

Objective 8. Implement an aggressive public outreach campaign on effective strategies to combat juvenile violence.

These objectives are supported by research underscoring their importance for strengthening the juvenile justice system and addressing the crisis of youth violence. Each section of the *Action Plan* addresses one of these objectives and includes a set of actions based on research, evaluated programs, and successful strategies.

A Safer Tomorrow Through Action Today

The sobering projections about the future of juvenile violence underscore the need for strong, immediate, well-planned, and decisive action to intervene early with efforts to prevent younger children from following in the self-destructive footsteps of many of their older brothers and sisters. At the same time, it is imperative that we effectively respond to that small percentage of juvenile offenders who repeatedly victimize the community and who account for the vast majority of serious and violent delinquent acts. We must take immediate steps to improve the capacity of the juvenile justice system to respond to juvenile offenders. If we fail to respond to their needs, the potential costs to society in human

lives and productivity will be an onerous and tragic burden to future generations.

In taking action, States and localities have a variety of choices that are both critical and difficult. Funds must be allocated for juvenile justice program options, ranging from secure facilities to day treatment, probation placements, and improvements in research and data collection and dissemination of information about juvenile violence issues. Also, funding must be made available for a broad spectrum of effective youth development and delinquency prevention programs, including afterschool programs, childcare for low-income working families, community policing efforts, summer recreation and job opportunities for low-income youth, and Head Start.

In addition to funding programs, there are many actions that States and local communities can take that build on their commitment to the safety, health, development, and well-being of children. By starting new initiatives, implementing the objectives, accessing the resources, and engaging in the activities of the *Action Plan*, leaders at the Federal, State, and local levels working together can make a difference.

4. The classification of juveniles as serious, violent, and chronic offenders is an important legal distinction. In some jurisdictions, identification of a juvenile as a serious, violent, and chronic offender determines how the juvenile is processed in the system—for example, whether a juvenile is subject to established minimum periods of secure confinement or subject to criminal court jurisdiction. Additionally, the consequences of being placed in one of these categories are critical to the allocation of scarce treatment resources. Generally, such determinations are made at the State and local levels.

Definitions used in different research and statistics-gathering efforts often vary. OJJDP has developed the following definitions of serious, violent, and chronic juvenile offenders for purposes of general guidance.

- *Juvenile* refers to a person under the age established by a State to determine when an individual is no longer subject to original juvenile court jurisdiction for (any) criminal misconduct. While this upper age is 17 in a majority of jurisdictions, it ranges from 15 to 17 years of age.

- *Serious* juvenile offenders are those adjudicated delinquent for committing any felony offense, including larceny or theft, burglary or breaking and entering, extortion, arson, and drug trafficking or other controlled dangerous substance violation.

- *Violent* juvenile offenders are those serious juvenile offenders adjudicated delinquent for one of the following felony offenses—homicide, rape or other felony sex offense, mayhem, kidnaping, robbery, or aggravated assault.

- *Chronic* juvenile offenders are juveniles adjudicated delinquent for committing three or more delinquent offenses.

These definitions include juveniles convicted in criminal court for particular offense types.

1. Provide Immediate Intervention and Appropriate Sanctions and Treatment for Delinquent Juveniles

Overview

The increased volume and changing composition of juvenile delinquency caseloads have overloaded the juvenile justice system. Slightly more than half of the juveniles in detention and 62 percent of juveniles in long-term placements in the United States in 1989 were housed in facilities where juvenile populations exceeded design capacities.¹

To accurately assess the juvenile justice system and its role in delinquency prevention, it is imperative to take into account the nature and volume of cases coming before the juvenile court. In 1992, an estimated 1 million juveniles in the United States were charged with approximately 1.5 million delinquent acts, a 26-percent increase from the volume of cases reported in 1987. In addition, a disproportionate increase occurred in violent offenses (56 percent) and in weapons offenses (86 percent) among young people.²

Statistics also indicate that violent juvenile female offending is rising and that the increase is greater proportionately than that of males. Between 1988 and 1992, the number of females under age 18 arrested for all violent crimes increased 63 percent, whereas the number of males under age 18 arrested for violent crimes increased 45 percent.

Most arrested juveniles, whether male or female, have not committed serious or violent crimes, but rather property crimes or status offenses. Even violent juvenile offenders rarely commit crimes exclusively against persons. They are likely to also engage in significant property or drug-related crimes.

As figure 2 indicates, juveniles are responsible for a far greater share of all property crime arrests (33 percent) than either violent crime arrests (18 percent) or drug arrests (8 percent).³ In 1992, the highest percentage of juvenile arrests, compared to adults, was for arson (49 percent), vandalism (45 percent), and motor vehicle theft (44 percent). The juvenile property crime arrest rate in 1992 was five times greater than the juvenile violent crime arrest rate.⁴

In addition to handling increased delinquency cases, juvenile courts have jurisdiction over status offenses—acts that would not be considered crimes if committed by an adult. Compared to delinquency cases, the number of status offense cases is modest. In 1992, an estimated 97,000 status offense cases were formally adjudicated, an increase of 18 percent from 1988, with the largest increases in runaway (31 percent) and truancy (21 percent) cases.

The juvenile justice system must be equipped to address the full range of juvenile problem behaviors. Often the presenting offense is merely the “tip of the iceberg,” and good case management and needs assessments can help to identify and address individual service needs.

However, the juvenile justice system is often so overwhelmed that juvenile offenders receive no meaningful interventions or consequences, even for relatively serious offenses. This neglect serves neither rehabilitation nor accountability goals, and young people need to know that if they break the law, they will be held accountable. Clearly, a revitalized juvenile justice system that ensures immediate and appropriate accountability and sanctions is a key to reversing trends in juvenile violence.

This section of the *Action Plan* discusses the causes of increased juvenile violence and delinquency and sets forth the “balanced and restorative justice” model as a philosophical underpinning for the juvenile justice system’s handling of juvenile offenders. The keys to this model are individual assessment and case management, a system of graduated sanctions, and an emphasis on aftercare services. This section also supports the rights of victims, including the right to receive information about juvenile offenders. It also provides examples

Figure 2: Juvenile arrest offenses in 1992

Juveniles accounted for a much larger proportion of all property crime arrests (33%) than violent crime (18%) or drug arrests (8%) in 1992

- More than one-fourth of all persons arrested in 1992 for robbery were below age 18, well above the juvenile proportion of arrests for murder (15%), aggravated assault (15%), and forcible rape (16%).
- Juveniles were involved in 1% of all arrests for driving under the influence and prostitution, but more than 40% of all arrests for arson, vandalism, and motor vehicle theft.

Note: Running away and curfew violations are not presented in this figure because, by definition, only juveniles can be arrested for these offenses.

Data Source: FBI. 1994. *Crime in the United States 1993; Uniform Crime Reports*.

of programs that support the balanced and restorative justice model, and a summary of issues surrounding disproportionate minority confinement and gender-specific services.

Current Status and Analysis of the Problem

A separate juvenile justice system, which originated in the United States in 1899 and quickly spread to all the States and Territories, has not been able to respond effectively to the increases in juvenile violence this society currently faces. In fairness, however, it has never been given sufficient resources to operate effectively to meet this challenge.

At the turn of the century, the juvenile justice system operated in a world very different from the one we live in today. Then, more Americans lived in rural areas and small communities, juvenile offenses were generally less severe, and victims would be more likely to know the consequences for individuals who had harmed them. Today, the juvenile justice system is unable to devote sufficient resources to dealing with status offenders and minor delinquency because of the growing number of serious and violent juvenile offenders. These offenders require a greatly enhanced response, and greater coordination among the system's components. Use of the balanced and restorative justice model of accountability, multidisciplinary assessment teams, and a system of graduated sanctions can help to provide the response and coordination that are required to effectively address juvenile violence and delinquency.

Causes of Delinquency

What causes juvenile delinquency? Before formulating proposed remedies to a juvenile justice system in need of support, the causes and correlates of juvenile delinquency need to be examined to ensure that those factors are targeted.

There is no single cause of delinquency and violence. Delinquents, especially chronic delinquents, exhibit a variety of social and psychological deficits in their backgrounds. These deficits, often referred to as risk factors, stem from breakdowns in five influential domains in juveniles' lives: neighborhood, family, school, peers, and individual characteristics.⁵

Risk factors, such as community disorganization, availability of drugs and firearms, and persistent poverty, make children more prone to involvement in delinquent behavior than if those factors were not present. Additionally, when a child's family life is filled with violence, problem behaviors, poor parental monitoring, and inconsistent disciplinary practices or maltreatment, a child's risk of delinquency increases. Although a variety of other risk factors exists, research shows those listed in figure 3 to be linked to delinquency and violence. Youth exhibiting combinations of these deficits in multiple domains of their lives are at highest risk of delinquency.

In sum, delinquency and violence have multiple causes, which often occur simultaneously, exacerbating one another and making them more difficult to ameliorate. Identifying those factors most prevalent in a community is the essential first

step toward developing effective programs to prevent or control delinquent behavior.

The second step requires identifying programs that help youth, families, and communities protect themselves from these risks. (See Objective 4 for a discussion of protective factors.) Recent research sheds considerable light on the issue of "what works" in the prevention and control of delinquency.⁶ Based on thorough analyses of the research literature and programs identified in a nationwide search, the Office of Juvenile Justice and Delinquency Prevention's (OJJDP's) *Guide for Implementing the Comprehensive Strategy for Serious, Violent, and Chronic Juvenile Offenders (Guide)*, provides examples of effective prevention programs and concludes:

The most effective programs are those that address key areas of risk in the youth's life, those that seek to strengthen the personal and institutional factors that contribute to healthy adolescent development, those that provide adequate support and supervision, and those that offer youth a long-term stake in the community.⁷

Effective and Promising Strategies and Programs

Balanced and Restorative Justice

A strong juvenile justice system must build upon the research and evaluations of promising and effective programs, and must work to reduce risk factors and enhance

protective factors to successfully address serious, violent, and chronic delinquency. The establishment of such a system can be guided by the conceptual framework of balanced and restorative justice.

The balanced and restorative justice approach to juvenile justice consists of three related objectives: community protection, accountability, and competency development. (See figure 4 for a graphic depiction of the balanced and restorative justice model.)

Accountability refers to the requirement that juvenile offenders receive sanctions for their offenses and that they make amends to the victim and the community for harm caused. Competency development suggests that youth who enter the juvenile justice system should exit more capable of being productive, responsible citizens. Community protection requires that the juvenile justice system ensure public safety.

Operating in the "best interest of the child," the American juvenile justice system has traditionally focused on the individual juvenile offender's extenuating circumstances and treatment needs. Delinquency case reviews are generally conducted behind closed doors to safeguard the confidentiality of children, distancing or excluding victims from the proceedings. In contrast to the adversarial criminal court, the juvenile court has not relied as much on victims' impact statements in sentencing. Further, it has often been assumed that victims would prefer not to meet their offenders face to face.

In recent years, the juvenile justice system has embraced community service and restitution programs,

which emphasize the need to hold juveniles accountable for their actions through repayment of their debts to society and their victims. The balanced and restorative justice approach calls for active participation by the juvenile justice system, the juvenile offender, and community organizations.

Many Native American and Alaska Native communities rely on dual systems of justice, one based on a common law model of justice and another based on indigenous concepts of law and justice. In handling juvenile offenders, these indigenous justice systems have common inherent features based on restorative, reparative, and distributive justice

principles. Victim and offender, surrounded by their extended family members, confront each other to resolve conflict in an environment that is emotionally and physically safe. This holistic approach promotes problemsolving in a non-adversarial environment and addresses the healing needs of the victim, the offender, and their families.

Although forcing victims to meet with juvenile offenders is inappropriate, many victims agree to participate in mediation programs. The mediation process personalizes the crime and forces offenders to face the harm they have caused.

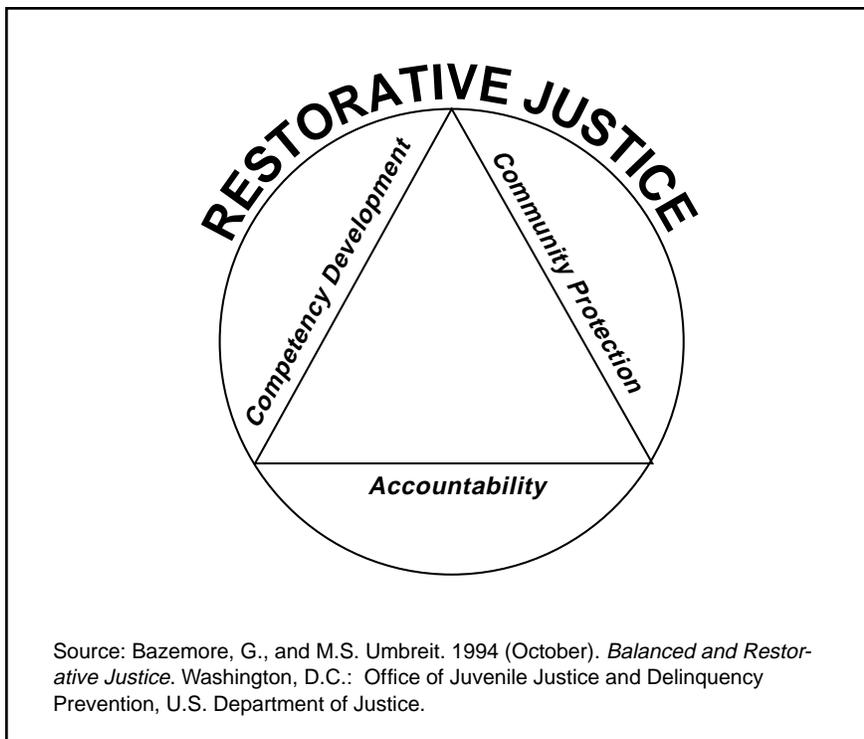

Responding to Victims' Concerns

As a civilized society, we need to feel safe in the company of people who walk our streets and attend our schools. Even if we improve the juvenile justice system so that it is capable of providing treatment, skills training, and rehabilitation, mechanisms must be in place to provide information about juvenile offenders and support the rights of victims. Simultaneously, however, we need to ensure that reasonable confidentiality protections are afforded to juvenile offenders.

The *Action Plan* endorses the presence of victims in the courtroom, particularly in felony cases. Victims of juvenile offenders should be given the opportunity to address the court and be notified of the disposition, parole status, and release of perpetrators. It also supports programs that help young offenders understand the long-term effects of their behavior and learn how to control anger and resolve conflicts without violence. It is in agreement with a number of the recommendations of the American Correctional Association's Victims Committee relating to juvenile offenders and will support Federal activity that assists in their implementation.⁸ These recommendations include:

- The rights of victims of juvenile offenders should be recognized, including notification; restitution; return of property; victim impact statements; protection from intimidation, harassment, and harm; and information and referral services.
- Victims must have access to information about their offenders' status.

Figure 4: The balanced and restorative justice model

- Any treatment and/or education programs for juvenile offenders must include a victim awareness component.
- Juvenile justice, victim service, and allied professionals should collaborate on efforts to incorporate the balanced approach of restorative justice in their agency and system philosophies, policies, programs, and services.
- Juvenile justice personnel—including administrators, managers, and line staff—need victim sensitivity training and must adopt protocols, programs, and policies to respond to victimization incidents.
- Crime data and statistics must be categorized and analyzed according to the age of the offender, the classification of the crime, and the type of victim.
- Existing victim service and awareness programs within the juvenile justice system must be evaluated, with the data utilized to enhance, expand, and replicate effective programs nationwide.
- Victim services personnel need training in the juvenile justice system, and juvenile justice practitioners need victim services training.

Texas has provided victim access to juvenile court hearings. Specifically, the court may not prohibit a victim from attending a hearing unless the victim is to testify in the hearing and the court determines that the victim's testimony would be materially affected if the victim hears other testimony at trial.

The California Youth Authority's Impact of Crime on Victims classes provide a model approach to both

rehabilitating offenders and involving victims in the juvenile justice system. As part of the recovery process, victims tell offenders about the impact of crime on their own lives, their families, and the communities in which they live. This approach has been adopted by a number of corrections, probation, and parole agencies for use with both adult and juvenile offenders.

Risk Classification, Needs Assessment, and Case Management

Risk classification and needs assessment. Risk classification and needs assessment are central to an effective juvenile justice system and critical to ensuring the three goals of the balanced and restorative justice model. A National Council on Crime and Delinquency study of 14 States found that an average of 31 percent of incarcerated juveniles could be safely placed in less secure community-based settings.⁹ This finding should have a significant impact on how States approach the problem of facility overcrowding. Because estimates of the annual cost of incarcerating a youth fall between \$34,000 and \$64,000,¹⁰ reducing unnecessary training school placements would reduce overcrowding and produce considerable savings that could be used to develop and implement effective graduated sanctions programs designed to address the needs of each juvenile requiring intervention services.

Communities developing a graduated sanctions system need tools to determine which and how many youth should be placed at each security level and in an appropriate program in the continuum of services. An effective juvenile justice system uses risk classification instruments and needs

assessments to appropriately place juvenile offenders.¹¹ The placement is determined by clearly designed, objective criteria that focus on the seriousness of the delinquent act, the potential risk for reoffending based on the presence of risk factors, and the risk to public safety. Objective risk classification can also be useful in addressing bias in placement decisionmaking, thereby reducing disproportionate incarceration rates for minority populations.

Needs assessments help to ensure selection of the most appropriate program within the determined security level. The needs assessment may identify chronic or multiple needs that warrant placement in specialized programs (for example, programs for sex offenders or violent offenders, or a rigorous wilderness program). Needs assessments can also be used in case planning to identify appropriate youth service needs.

Case management and assessment teams. An effective case management system is also crucial to a strong juvenile justice system. Continuous case management results in greater service coordination and accountability. The case manager follows each youth from the point of intake through initial needs assessment, probation, incarceration, and aftercare to monitor progress and adjust the treatment plan appropriately. Whenever possible, it is best for the youth to be in community-based programs, allowing caseworkers to develop community support networks and to involve the family.

The assessment team approach is an innovative method for integrating the risk classification and needs assessment process of the juvenile

justice system, the goal of appropriate treatment, and the need to maximize the use of scarce system resources. The assessment team can serve as a central information or data gathering point within a jurisdiction for all agencies with juvenile service responsibility.

Effective rehabilitation requires maximum use of a broad range of community resources, including health and mental health care, social services, recreation, education, and employment and training services. Each member of an assessment team should be knowledgeable about individual differences that can stem from race, gender, culture, and ethnicity. Central to the assessment team approach is its ability to refer each juvenile, even the most serious offender, to programs and services that address identified needs and integrate the family into the treatment plan. This approach is designed to prevent a youth's further involvement in the system by inducing law-abiding behavior as early as possible through a combination of appropriate intervention and treatments.

Family Assessment Service Teams (FAST), a part of the Norfolk (VA) Police Assisted Community Enforcement effort, use an interagency approach to coordinate resources and improve the effectiveness of juvenile services, such as early intervention and prevention and family counseling and followup.

Statistics show that crime has dropped markedly in neighborhoods targeted by the FAST program. According to one 1993 report, crime decreased by 29 percent in the target areas, police reported fewer service calls, and there was a significant drop in street drug trafficking and gunfire.

Participants also believed the program had reduced fear of crime in target neighborhoods.¹²

If implemented properly, the assessment team concept has the potential to facilitate the delivery of the right "front end" services to the right juveniles in a timely manner. If team approaches are institutionalized and centrally located in assessment centers that either provide comprehensive services or make referrals to community services, the juvenile justice system would have an important tool to achieve the goal of effective and coordinated service delivery.

Graduated Sanctions

For interventions to be maximally effective, they should be swift, certain, and consistent. An effective system of graduated sanctions must also incorporate increasingly severe sanctions when a juvenile fails to respond to initial interventions. As the severity of sanctions increases, so must the intensity of treatment. At each level, offenders must be aware that continued violations of the law will subject them to more severe sanctions and may ultimately result in secure confinement, ranging from a community-based intensive treatment facility to a training school, camp, or ranch.

Effective and fair graduated sanctions that hold juvenile offenders accountable can discourage them from continued involvement in delinquency and crime. In addition, an OJJDP-funded study of existing graduated sanctions systems found that they appear to be more effective and less costly than juvenile incarceration.¹³ The *Guide* includes descriptions of promising and proven programs at each graduated sanctions level. The graduated sanctions system set out in the *Comprehensive Strategy for Serious,*

Violent, and Chronic Juvenile Offenders includes the following components:

- Immediate intervention for first-time delinquent offenders (misdemeanors and nonviolent felonies) and many nonviolent repeat offenders.
- Intermediate sanctions for many first-time serious and repeat offenders and some violent offenders.
- Secure corrections for many serious, violent, and chronic offenders.

Immediate intervention. First-time delinquent offenders (charged with misdemeanors and nonviolent felonies) and many nonviolent repeat offenders should be placed in programs designed to reduce the probability of their committing more serious or violent offenses. Nonresidential community-based programs, including prevention programs serving at-risk youth, may be appropriate for many of these offenders. These programs are small and open, located in or near juveniles' homes, and involve participants in program planning, operation, and evaluation. They also foster family participation in treatment and facilitate the establishment of law-abiding patterns of behavior.

Intermediate sanctions. Offenders for whom immediate intervention is inappropriate (first-time serious or violent offenders) or offenders who reoffend despite immediate intervention (for example, repeat property offenders or drug-involved juveniles) are appropriate subjects for intermediate sanctions. These sanctions may be residential or nonresidential. For many serious and violent offenders, placement in an

intensive supervision or other intensive service program may be appropriate.

In a South Carolina study of 39,250 males born between 1964 and 1971 who had official delinquency records, researchers identified offenders who had been incarcerated or placed on probation as adults. They found that those who had been institutionalized as juveniles were substantially more likely to reoffend as adults. The authors concluded that their findings “effectively underscore the need to bolster programming for early effective intervention in order to prevent the recurrence of delinquent behavior.”¹⁴

OJJDP’s Intensive Supervision of Probationers (ISP) Program Model is a highly structured, continuously monitored, and individualized plan that consists of five phases with decreasing levels of restrictiveness:

- Short-term placement in community confinement.
- Day treatment.
- Outreach and tracking.
- Routine supervision.
- Discharge and followup.

The Bethesda Day Treatment Center Program in West Milton, PA, is a model day treatment program.¹⁵ Initiated with OJJDP formula grant funds, the program is currently funded through county service contracts. The Center’s services include intensive supervision, counseling, and coordination of a range of services necessary for youth to develop skills to function effectively in the community. Client-focused services include intake, casework, service and treatment planning, individual counseling, intensive supervision,

and study skills. Group-focused services include group counseling, life and job skills training, cultural enrichment, and physical education. Family-focused services include counseling, home visits, parent counseling, and intervention.

The program provides delinquent and dependent youth, ages 10 to 17, with as many as 55 hours of services a week without removing them from their homes. A unique program feature requires work experience for all working-age clients, with 75 percent of their paychecks directed toward payment of fines, court costs, and restitution. This intensive treatment program has shown promising results. A preliminary study revealed recidivism rates far lower than State and national norms.

Secure corrections. The criminal behavior of many serious, violent, and chronic juvenile offenders requires the imposition of secure sanctions to hold them accountable and to provide a structured treatment environment. Large, congregate-care juvenile facilities, such as training schools, camps, and ranches, however, have not been effective at rehabilitating juvenile offenders. The continued use of large facilities will remain a necessary alternative for juveniles who require enhanced security to protect the public. Even so, small, community-based facilities providing intensive treatment services and special programming in a secure environment offer the best hope for successful treatment of juveniles who require a structured setting.¹⁶ These services include individual and group counseling, educational and training programs, medical services, and intensive staff supervision. Proximity to the community permits direct, regular family involvement with the treatment process, independent living, and a phased reentry into the community.

Since closing its traditional training schools in 1972, Massachusetts has relied on a sophisticated network of small, secure programs for violent youth coupled with a broad range of highly structured, community-based programs for most committed youth. Secure facilities are reserved for the most serious offenders. A study of the State’s community-based juvenile system revealed recidivism rates equal to or lower than those of other jurisdictions. In addition, Massachusetts has saved an estimated \$11 million a year by relying on community-based sanctions.¹⁷

Juveniles whose presence in the community would constitute a threat to public safety or juveniles who have failed to respond to community-based corrections may require extended correctional placement in training schools, camps, ranches, or other secure facilities that are not community based. These facilities should be accredited by the American Correctional Association and offer comprehensive treatment programs that focus on reversing criminal behavior patterns through education, health, skills development, victim impact awareness, teen parenting, and vocational or employment training and experience. In addition, some serious, violent, and chronic juvenile offenders who have been waived or transferred to and convicted in the criminal justice system prior to the age at which they are no longer subject to the original (or extended) jurisdiction of the criminal justice system may be appropriate candidates for placement in juvenile correctional facilities as part of their criminal court sentence, where State statute permits.

The Florida Environmental Institute (FEI), also known as “The Last Chance Ranch,” targets the State’s

most serious and violent juvenile offenders. Located in a remote area of the Florida Everglades, FEI offers both a residential phase and a nonresidential aftercare program. Two-thirds of its referrals are adjudicated delinquents from the criminal justice system. Yet, because of its strong emphasis on education, hard work, social bonding, and aftercare, recidivism rates of juveniles who have gone through the program are substantially less than rates of traditional training school programs: 30 percent instead of 50–70 percent.¹⁸

Intensive aftercare. Standard parole practices, particularly those that focus on social control, have not been effective in normalizing high-risk juvenile parolees' behavior over the long term. If youth successfully complete treatment programs, they should not be abruptly returned to the environment where the misconduct occurred without appropriate supervision and transitional support. Consequently, intensive aftercare programs that provide high levels of social control and treatment services have gained substantial support.

OJJDP has supported the development of an intensive aftercare program, currently being demonstrated in four jurisdictions, that incorporates five principles:

1. Prepare youth for progressive responsibility and freedom in the community.
2. Facilitate youth–community interaction and involvement.
3. Work with both the offender and targeted community support systems, such as families, peers, schools, and employers, to facilitate the youth's constructive

interaction with these groups and gradual community adjustment.

4. Develop needed resources and community support.
5. Monitor and ensure successful reintegration into the community.¹⁹

Cooperation between schools and the juvenile justice system. Two key ingredients for implementing a system of graduated sanctions are (1) strengthening cooperation and communication between school districts and probation departments, and (2) providing schools with alternative strategies for dealing with students who exhibit behavioral problems or students who are suspended or have been expelled from school.

The Allentown, PA, school district developed the Student Assistance Program (SAP) to address the increased number of dropouts, violent incidents, behavioral problems, and drug abuse problems among its students. SAP incorporates three main objectives:

- Educating school personnel about the duties, functions, and limitations of the juvenile justice system.
- Providing liaisons among the juvenile's family, the probation department, the school district, and the police department so that the educational interests and needs of the student can be met.
- Involving probation officers in the program.

School-based probation officers are the key to SAP's effectiveness. They act as student advocates and coordinators to refer targeted students

to resources in the school and the community. Probation officers also visit classrooms to talk to students and faculty members about the juvenile justice system and to clarify the program.

The development of excellent working relationships among education, juvenile justice, law enforcement, other social agencies, and families has been one of the program's most important accomplishments. School-based probation officers are now considered a vital element in the schools' overall operation. Since implementation, the program has served from 91 to 104 students annually. In addition, the Pennsylvania Commission on Crime and Delinquency has allocated more than \$2 million to replicate the SAP model in other Pennsylvania jurisdictions. To date, 29 Pennsylvania counties are implementing SAP programs.²⁰

Disproportionate minority confinement and issues confronting juvenile female offenders. Another key component of graduated sanctions is a focus on alleviating disproportionate minority confinement and gender bias in the juvenile justice system. Persons of color, particularly African-American and Latino-American males, are disproportionately represented at every stage of the juvenile justice system. Research shows that disproportionate minority confinement tends to result, in part, from a number of discrete decisions made throughout the system, from the point of arrest through intake and sentencing.²¹ The Juvenile Justice and Delinquency Prevention Act of 1974, as amended in 1988,²² requires States to make efforts to reduce the proportion of minority juveniles detained or confined in secure

detention or correctional facilities, jails, and lockups if such proportion exceeds the proportion of representation in the general population. Response to this overrepresentation, as well as to demographic shifts, requires additional or redirected resources, staff training, recruitment, language and cultural programs, and materials and documents translated into languages other than English for juvenile offenders, their families, and crime victims.

Similarly, the 1992 Amendments to the Juvenile Justice and Delinquency Prevention Act addressed the issue of gender bias, requiring States to plan for an analysis of the need, types, and delivery of gender-specific services. Delinquency by female offenders has risen dramatically in the past decade, accounting for 23 percent of juvenile arrests as of 1991. Recent data indicate that because of the relatively small number of adjudicated female juvenile offenders, little attention has been focused on their special needs.²³ A comparative study of 348 violent adolescent females and a similar number of males revealed that, although half the male offenders were admitted to rehabilitation programs or alternative programs, only 29.5 percent of female offenders received some alternative treatment.²⁴

According to data provided by 85 State corrections institutions, female offenders face many special problems, including the perpetuation of a cycle of generational sexual abuse, teenage pregnancy, early parenthood, and emotional dysfunction. Other research²⁵ supports the conclusion that girls become self-destructive more often than boys when acting out problems. Young females who run

away, for example, more often become involved in prostitution or turn to other unhealthy, exploitative, or abusive environments for shelter or survival.

Front-end assessment through the assessment-team approach may help to address some of the race and gender issues in the juvenile justice system and ensure that judgments about treatment and rehabilitation respond to the individual needs of each youth.

Federal Action Steps

Assist in the Development of Model State and Local Programs Through Training and Technical Assistance

OJJDP will provide training and technical assistance to jurisdictions in developing a balanced and restorative justice model.

The Office of Justice Programs (OJP), through its Office for Victims of Crime (OVC) and National Institute of Justice (NIJ), will underscore the importance of accountability for juvenile offenders by recognizing the rights and concerns of victims and by emphasizing community service restitution programs. This will include support for and strengthening of indigenous tribal justice systems that apply reparative and restorative justice principles.

Ensure That the Rights of Victims of Juvenile Offenders Are Recognized

OVC will provide funding for crucial victim services and for training of a broad range of professionals who work with crime victims and will develop projects to enhance victims' rights and services. In addition, OVC will fund workshops

to increase the number of trainers qualified to train others in assisting victims of juvenile offenders.

Provide Communities With Guidance for Implementing a Comprehensive Strategy That Reflects Delinquency Prevention and Effective Graduated Sanctions

OJJDP will widely disseminate the *Guide for Implementing the Comprehensive Strategy for Serious, Violent, and Chronic Juvenile Offenders* to practitioners, educators, community activists, policymakers, city managers, governors, State attorneys general, and others to aid in establishing effective prevention programs and improving State and local juvenile justice systems.

OJJDP will also provide communities interested in implementing a continuum-of-care model with a range of training and technical assistance through a series of regional conferences, satellite video teleconferences, a CD-ROM package, and focus groups to determine community needs for building capacity to implement the Comprehensive Strategy.

OJP will support demonstration programs that provide a continuum of treatment services and sanctions. These programs might include weekend detention, inpatient treatment for drug abuse, electronic monitoring, and community-based residential facilities.

Provide Model Protocols for Intake, Assessment, and Aftercare

OJJDP will support programming to develop and demonstrate methodologies to improve the front end of the juvenile justice system through refined assessment protocols and interdisciplinary case

management teams. The *Guide* provides sample forms and guidance for developing a risk classification process for making placement, detention, probation and parole, and institutional custody decisions. The *Guide* also provides information on placement projections, client needs assessments, continuous case management, and management information systems. Programming, training, and technical assistance will be provided to assist communities in strengthening their assessment processes and the delivery of aftercare services.

OJJDP will continue to support the 3-year multisite implementation and evaluation of its Intensive Community-Based Juvenile Aftercare Program (IAP). The overall aim of IAP is to identify and help high-risk juvenile offenders make a gradual transition from secure confinement into the community. This program is being implemented in Denver, CO; Las Vegas, NV; Camden and Newark, NJ; and Norfolk, VA. OJJDP will also continue to support aftercare training and technical assistance to these sites and to other jurisdictions across the country.

In addition, OJJDP will continue to support the Serious Habitual Offender Comprehensive Action Program (SHOCAP). This information and case management program seeks to improve efficiency in handling serious habitual juvenile offenders by providing relevant case information for more informed decisionmaking by juvenile-serving agencies and organizations. The SHOCAP identification and intervention process is included in OJJDP's Police Operations Leading to Improved Children and Youth Services (POLICY) training courses provided to local law enforcement representatives and interagency teams.

Provide Research on the Effectiveness of Intermediate Sanctions

In a collaborative effort, NIJ, OJJDP, the OJP Corrections Program Office, and the Bureau of Justice Assistance (BJA) will provide funding to develop boot camp programs and research the effectiveness of high-intensity, short-term programs, such as boot camps, wilderness programs, and other intermediate sanctions that combine vocational education, discipline, and life skills. This intra-agency research will assess the rationale underlying boot camp programs and examine boot camps nationwide.

Address and Support Efforts To Reduce Disproportionate Minority Confinement in Secure Facilities

As a condition of full participation in the Juvenile Justice and Delinquency Prevention Act Formula Grants Program, States must gather and analyze data to determine whether disproportionate minority confinement exists and, if so, to plan, implement, and evaluate programs designed to address the problem. Program planning should be accompanied by training, education on the issue, policy revision, and legislation.

OJJDP will continue to provide training and technical assistance to State and local governments, community-based organizations, national organizations, and others on all aspects of this statutory core requirement.

OJJDP will disseminate a planning manual to assist States in addressing disproportionate minority confinement. This manual will include sections on data collection and analysis, corrective action planning,

program implementation, monitoring, and evaluation. This information will assist communities in effectively responding to demographic shifts that are leading to increased confinement of Latino-American and African-American offenders.

Highlight and Address Issues Confronting Female Juvenile Offenders

OJJDP will provide training and technical assistance to States that have demonstrated a commitment to addressing gender bias and lack of gender-specific programming within the juvenile system.

OJJDP will also support innovative community-based programs that provide comprehensive, gender-specific prevention, intervention, treatment, and rehabilitative care. OJJDP's Program To Promote Alternative Programs for Juvenile Female Offenders will include case management and followup for at-risk and delinquent females as both a freestanding program and as a component of its overarching demonstration program, SafeFutures.

In addition, OJJDP will develop and disseminate a report synthesizing current literature and best practices that address the problems of at-risk young females and juvenile female offenders. The report will contain information on trends and risk factors for female delinquency as they relate to behavior, family and community experience, the amelioration of those risks, and best practices for prevention, intervention, and treatment models. OJJDP will hold a national conference to share information in the report with policymakers, researchers, practitioners, judges, lawyers, and the media.

Suggestions for State and Local Action

- Include key elected and justice agency officials, grassroots community leaders, crime victims, and diverse groups in community planning and implementation of a comprehensive multidisciplinary strategy to address juvenile delinquency.
- Develop local prevention policy boards to assess risk factors for delinquency in the community, review current juvenile justice laws, and identify priorities.
- Incorporate key concepts of the balanced and restorative justice model and indigenous justice models, particularly those addressing youth accountability, competency development, and public safety.
- Develop and implement a range of graduated sanctions that combine accountability with treatment and provide increasingly intensive treatment and rehabilitation services for delinquent juveniles.
- Develop or improve nonsecure and secure community-based correctional facilities for juvenile offenders who must be removed from their homes.
- Establish a comprehensive system of youth service agencies to reduce fragmentation in service delivery and to provide a full continuum of service options. The work of justice personnel must be coordinated with that of community members and other youth-serving agencies to maximize the timely identification of delinquents and to identify the earliest point of intervention.
- Provide victim and community restitution opportunities for youth to help enhance public safety and improve the quality of life.
- Work with victims' rights organizations to ensure both juvenile accountability to victims and a strengthened community commitment to rehabilitation.
- Develop ways to provide for the involvement of crime victims in juvenile offender programming.
- Develop legislation, policies, and procedures to ensure that crime victims have rights in the juvenile justice system.
- Develop assessment centers to coordinate community resources and improve services to juveniles and their families.
- Use risk classification tools based on offense severity and risk of future offending to determine appropriate security levels for youth entering the system and to estimate program facility needs.
- Establish a process for ongoing assessment of disproportionate minority confinement and implement strategies focused on system improvement and program development (prevention, early intervention, treatment, and aftercare services). If disproportionate minority confinement exists, actively seek technical and evaluation assistance to identify the causes and implement corrective action.
- Address the issues of gender bias and lack of gender-specific programming within the juvenile system and actively participate in Federal training and technical assistance programs.

- Develop prevention and intervention strategies for juvenile sex offenders.
- Expand and provide services to meet the physical and mental health needs of juvenile delinquents.

2. Prosecute Certain Serious, Violent, and Chronic Juvenile Offenders in Criminal Court

Overview

Juvenile violent crime is increasing at an alarming rate. Between 1983 and 1992, juvenile arrest rates for Violent Crime Index offenses increased nearly 60 percent, while adult rates increased by 47 percent. (See figure 5.)

In 1994, the Federal Interdepartmental Working Group on Violence concluded that we as a Nation have

failed the juvenile justice system, which, in turn, is failing us.¹ Without adequate resources to handle the growth of youth violence, the system has been unable to successfully fulfill its role in securing community safety. Our failure to support the juvenile justice system and to increase the system's capacity to succeed has created an immediate need to target certain serious, violent, and chronic juvenile offenders for prosecution in

the criminal justice system. While many types of juvenile offenders can be treated in the juvenile justice system, the Coordinating Council recognizes that prosecution in criminal court is a necessary option in State and Federal juvenile justice systems for those juveniles whose offenses are particularly serious or violent or who are not amenable to rehabilitation in the juvenile justice system.

It is important to note, however, that the vast majority of juvenile cases can be appropriately handled in the juvenile justice system. For example, in 1992, 70 percent of juveniles referred to juvenile court were handled informally or not adjudicated, while most adjudicated delinquents received dispositions of formal probation. (See figure 6.)

The juvenile justice system is in the midst of a revolutionary period of change. A slow trend during the past decade to remove more serious, violent, and chronic juvenile offenders from the juvenile justice system and turn them over to criminal courts has escalated. A recent national survey of State corrections agencies showed a 39-percent increase in the number of juveniles transferred to, convicted in, or sentenced in criminal courts between 1988 and 1990—from 5,797 to 8,067.² In 1992, 38 States reported 5,212 new court commitments of juveniles to State prisons.³

Figure 5: Violent crime arrest rates in 1983 and 1992

Violent crime arrests per 100,000 population

Data Source: FBI. 1994. Age-specific arrest rates and race-specific arrest rates for selected offenses 1965–1992. FBI. 1984–1993. *Crime in the United States* series.

Source: Snyder, H., and M. Sickmund. 1995 (August). *Juvenile Offenders and Victims: A National Report*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice.

Figure 6: Delinquency dispositions in 1992

Most adjudicated delinquency cases received dispositions or placement outside the home in 1992

- Of every 1,000 delinquency cases handled in 1992, 166 resulted in formal probation, and 83 resulted in residential placement following adjudication.
- Many delinquency cases that were handled formally in 1992 did not result in juvenile court adjudication. However, many of these cases still resulted in the juvenile agreeing to informal services or sanctions, including out-of-home placement, informal probation, and other dispositions.
- Although juvenile courts handled about half of all delinquency cases without the filing of a formal petition, more than half of these cases received some form of court sanction, including probation or other dispositions such as restitution, community service, or referral to another agency.

Data Source: Butts, J., et al. 1995. *Juvenile Court Statistics 1992*.

Source: Snyder, H., and M. Sickmund. 1995 (August). *Juvenile Offenders and Victims: A National Report*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice.

The behavior of a relatively small percentage of juvenile offenders has had a devastating impact on the public's sense of security, on victims, and on the families of victims. Research shows that, although these serious, violent, and chronic offenders comprise only 6 to 8 percent of the total juvenile offender population, they account for a disproportionately large number of offenses. These juveniles are involved in a wide range of offense types and are likely to commit both serious offenses and violent crimes.

(See figure 7 for trends in juvenile arrests for specific violent crimes.) Because of its frequency and seriousness, the violent behavior of this group of offenders must be controlled to ensure public safety and security.⁴

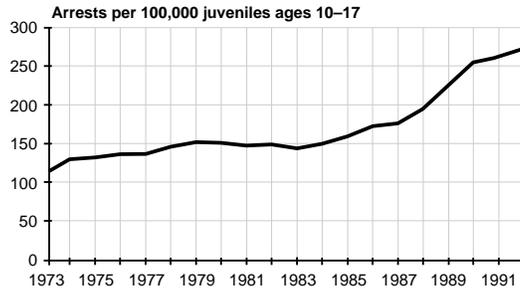

Transferring targeted juvenile offenders who commit the most serious and violent crimes to criminal court enables the juvenile justice system to focus its efforts and resources on the much larger group of

at-risk youth and less serious and violent offenders who can benefit from a wide range of effective delinquency prevention and intervention strategies. However, in their efforts to ensure that certain juvenile offenders are transferred to the criminal justice system because of the seriousness of their offenses, the Federal Government and the States must be sure that only those youth who truly require this alternative under the laws of their particular jurisdiction are

Figure 7: Juvenile arrest rates for specific violent crimes

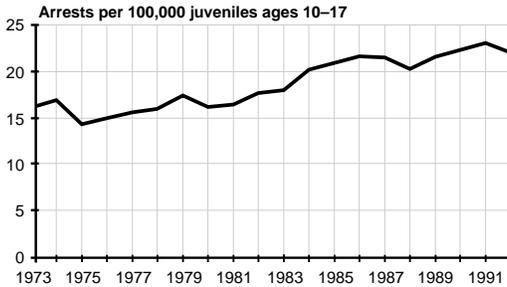

Aggravated Assault

The juvenile arrest rate for aggravated assault remained relatively constant from the mid-1970's through the mid-1980's before increasing sharply through 1992.

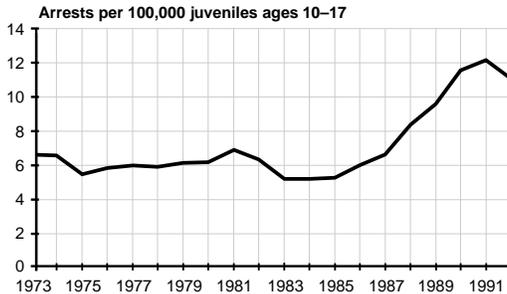

Forcible Rape

Unlike the Violent Crime Index trend, the juvenile arrest rate for forcible rape has increased gradually since the mid-1970's.

Murder/Nonnegligent Manslaughter

The juvenile arrest rate for murder varied little from 1973 to 1987, but increased 84 percent from 1987 to 1991, before it dropped in 1992 for the first time in 8 years.

Data Source: FBI. 1994. Age-specific arrest rates and race-specific arrest rates for selected offenses 1965–1992. FBI. 1984–1993. *Crime in the United States* series.

Source: Snyder, H., and M. Sickmund. 1995 (August). *Juvenile Offenders and Victims: A National Report*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice.

placed in the criminal justice system. We must also remain vigilant about the juvenile's right to counsel and about the potentially harmful impact of placing juveniles in adult jails, lockups, and correctional facilities, including problems associated with overcrowding, abuse, youth suicide, and the risk of transforming treatable juveniles into hardened criminals.⁵ Most of all, the continuing need for transfer of juveniles to criminal courts should strengthen our resolve to intervene at the earliest possible time to decrease the risk of future criminal behavior.

This section of the *Action Plan* describes the three primary mechanisms for transferring targeted juveniles to criminal court and summarizes current State legislation pertaining to juvenile transfer. It also addresses the trend toward increased transfer and describes innovative and alternative approaches to responding to serious, violent, and chronic offenders, and providing the treatment they need. This section includes proposed action steps assisting Federal and State jurisdictions in focusing on these offenders in order to secure the greater public safety. The *Action Plan* also encourages further study of the effectiveness and impact of transfers on both juvenile offenders and the justice system.

Current Status and Analysis of the Problem

Transfer Cases

A number of studies that have examined the offense characteristics of juveniles transferred to criminal court show that the presenting offense for most transferred juveniles is a property offense.⁶ This trend, however, appears to be changing.

Other research has focused on seriousness and chronicity. One study found that juveniles transferred by judicial waiver in Virginia tended to be older, more serious offenders, with prior records and commitment histories, except in metropolitan areas of the State.⁷ Another study found that juvenile robbery offenders transferred to criminal court in Philadelphia were more likely to have used guns in their offenses than those who were not transferred.⁸

Transfer Mechanisms

The three legal mechanisms for transferring juvenile cases to criminal court are judicial waiver, prosecutorial discretion, and statutory exclusion. The use of all three mechanisms is being expanded as the problem of youth violence and the fear surrounding it increase.

Judicial waiver. Most States have established mechanisms to waive jurisdiction over a case to criminal court, generally after consideration of a motion made by the prosecutor.⁹ Juvenile court judges in all States except Nebraska, New York, and New Mexico have the authority to waive jurisdiction over a case to criminal court. An estimated 11,700 juvenile delinquency cases were referred to criminal court by judicial waiver in 1992, a 68-percent increase from 1987.¹⁰

Prosecutorial discretion (“concurrent jurisdiction”). Twelve States authorize prosecutors to file certain categories of juvenile cases directly in criminal court (direct file). This discretion is generally constrained by the age of the alleged offender and the type of offense. Although national statistics are unavailable on juvenile cases transferred to the criminal court as a result of prosecutorial discretion, one

expert estimated that there were 2,000 prosecutorial direct files nationwide in 1978.¹¹ By 1993, Florida prosecutors alone had filed criminal charges in 7,000 cases involving offenders under age 18.¹²

In addition to a national increase, there are indications that instances of prosecutorial discretion now outnumber judicial waivers in States allowing such transfers. In Florida, which has both judicial waiver and direct file provisions, two cases were filed directly in criminal court for every one case transferred by judicial waiver in 1981. By 1992, there were more than six direct filings for every case of judicial waiver.¹³

Statutory exclusion. Although not typically considered transfers, large numbers of youth age 17 and younger are tried as adults in the 11 States where the upper age of original juvenile court jurisdiction is less than 18 years. This type of statutory exclusion accounts for the largest number of youth under age 18 being tried in criminal court. Nationwide, an estimated 176,000 cases involving youth under age 18 were tried in criminal courts in 1991 because the offenders were considered adults under State law.¹⁴ Another statutory exclusion mechanism is to provide for statutory waiver or transfer of certain juveniles to criminal court for specific offenses—generally older or repeat offenders for violent offenses. In such cases, the prosecutor must file a case in criminal court for the particular offense.

State Trends

Since 1978, at least 41 States have enacted legislation to expand the use of transfer mechanisms. In 1994, at least 13 States enacted measures establishing or expanding statutory transfers of juveniles to criminal

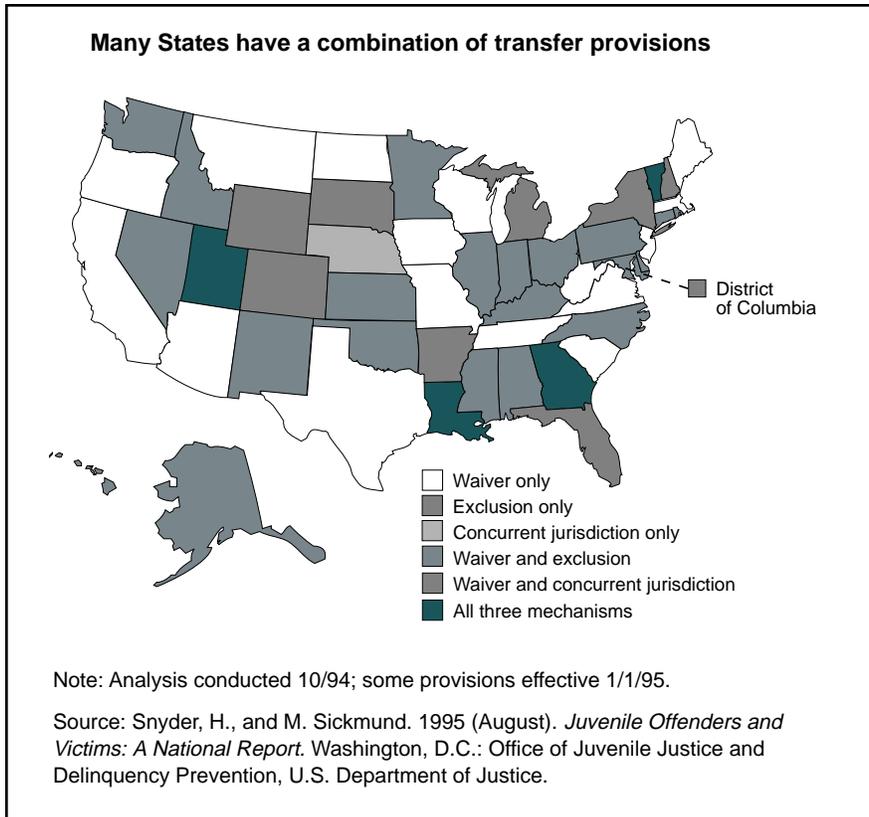

court by expanding offense categories or reducing age eligibility for certain offense types.

In any particular State, one, two, or all three transfer mechanisms may be in place.¹⁵ (See figure 8.) By 1993, 28 States had at least two of the three mechanisms for transferring juveniles to criminal court for prosecution. Three States had statutory provisions for all three methods, and at least 18 States were considering additional legislation in 1994.

While every State provides one or more mechanisms that allow juveniles charged with serious and violent criminal behavior to be tried in criminal court, the waiver and direct file criteria vary from State to State. Age 14 is the most common minimum age at which transfer can take place. The crimes that are most commonly authorized for transfer are aggravated felonies—usually serious, violent, repeat offenses.¹⁶ Several States also have provisions for transferring “excluded” or “direct filed” cases from criminal court to juvenile court under certain circumstances. This is sometimes referred to as “reverse waiver” or “transfer back.” A summary of some recent actions of State legislatures follows:

- Only one State, Wyoming, lowered the upper age—from 18 to 17—of its juvenile court jurisdiction during the past 20 years, joining the other 39 States that had established age 17 as the upper age limit for original juvenile court jurisdiction. In 1995, however, two of these States, Wisconsin and New Hampshire, enacted legislation to lower the upper age of juvenile court jurisdiction to 16, effective January 1, 1996.

Figure 8: State transfer provisions

is clearly the most rigid method of determining how a juvenile offender will be processed, and most determinations are based on serious offenses and age limits. Several States also exclude juveniles charged with felonies from juvenile court if they have prior felony adjudications or convictions. Prosecutorial discretion, or direct file authority, is also typically limited by age and offense criteria.

The judicial waiver process typically focuses on age, offense, offense history, and the juvenile's amenability to treatment. A judicial waiver, therefore, should be predicated on an assessment of the youth's history of prior delinquency, counseling, attempts at rehabilitation, school record, and other relevant factors. The decision of the court must be in writing, exercised in open court, and predicated on an adversarial hearing with full due process, including an opportunity for presentation of evidence by the defense and the right to cross-examine witnesses.

- North Carolina lowered the age of juveniles who can be tried as adults to 13; Oklahoma can now prosecute as adults juveniles age 13 and older accused of murder; and Tennessee removed the age limit for trying juveniles accused of certain serious and violent offenses as adults.¹⁷
- Five States have recently enacted or expanded concurrent jurisdiction legislation, bringing the total of States having such legislation to 12. In Michigan and Florida, prosecutors may now elect the court of original jurisdiction for certain classes of adolescent offenders.
- Eighteen States now have excluded-offense provisions (statutory waiver or transfer)

for serious or violent crimes. For example, New York's juvenile offender law gives the criminal court original jurisdiction over juveniles ages 13 to 15 charged with murder, and those 14 or 15 years of age charged with Class A or B felonies, as defined by New York's Criminal Code. The State's 1978 juvenile offender law also provides for the "reverse waiver" of these juveniles from the criminal court to the juvenile court.

Depending on the decision point (judge, prosecutor, or legislator), various transfer criteria are to be carefully considered, such as the type of offense, age of offender, offense history, and receptiveness to rehabilitation. Statutory exclusion

Based on these varying requirements, each transfer mechanism is generally applied according to the age of the youth and the seriousness of the offense. For older offenders, when the offense is more serious or when the juvenile is a repeat offender, the tendency is to move away from judicial discretion and toward prosecutorial discretion and statutory exclusion.

Sentencing and Dispositional Outcomes and Effectiveness

Criminal court handling of serious, violent, and chronic juvenile offenders raises many philosophical, legal, program, policy, and research questions. Unfortunately, in recent years, an inadequate amount of research has been conducted on

the impact of criminal court processing on reducing violent juvenile offending.

Some studies have shown relatively lenient treatment of juvenile offenders transferred to criminal court by judicial waiver, concurrent jurisdiction, and/or excluded offense.¹⁸ These studies are primarily based on data collected from the late 1970's and the 1980's. However, three more recent studies are available.

A Cook County, IL, study examined juveniles transferred to criminal court for drug and weapons violations under several Illinois excluded-offense statutes during 1991–92. The study found that most of the transferred juveniles were not viewed by criminal court judges as serious offenders. More than half received probation, supervision, or conditional discharge. Twelve percent, most of whom judges ruled eligible for boot camps, were sentenced to incarceration in Illinois prisons. Among the remainder, 18 percent were found not guilty.¹⁹

At least one study using more recent data shows a trend in transfers reflecting changes in the profile of offenders and case dispositions. A 1994 followup study by the Virginia Commission on Youth showed increased incarceration of transferred juveniles between 1988 and 1990 compared with those retained in the juvenile justice system. Among the more than 1,000 juveniles transferred between 1988 and 1990, 63 percent were sentenced to prison, 15 percent were sent to a local jail, and 22 percent received no incarceration. Those sentenced to prison served an average of 17 months, compared with less than 8 months served by those adjudicated in juvenile

court and committed to juvenile institutions.²⁰

A 1981 Ohio study of juveniles transferred to criminal court under judicial waiver found that most were involved in property offenses, and less than 40 percent were involved in violent offenses. In contrast, a study conducted a decade later found that almost two-thirds of the transfers were for violent offenses.²¹

The relative merits of juvenile versus criminal justice system handling of serious, violent, and chronic juvenile offenders are difficult to determine conclusively.²² Few comparative studies have been made, and those that exist are outdated. None has focused on innovative sentencing options, such as “blending” of juvenile and criminal justice system handling. A 1980 study demonstrated the importance of examining the seriousness of offense and age of the offender in these studies in order to obtain a clear picture of what is happening in the juvenile and criminal justice systems.²³ This study confirmed that these are critical control factors in determining future case study outcomes.

Likewise, it is difficult to develop updated policy when the majority of the studies were generated in the 1980's, and it is impossible to determine from the existing research the impact of either criminal or juvenile system handling on subsequent offenses. While much activity is taking place in State legislatures to address mechanisms for the prosecution of juveniles in criminal court, very little evaluative research exists to guide such legislative change. The extent to which these transfer options are being used and the effectiveness of the various policy options are not yet known.

The need for such information is substantial. Unless we fully understand how that body of law shapes the processing of cases as they move—or fail to move—through the juvenile and criminal justice systems, the efficacy of various provisions of State law will remain unknown. Without empirical assessments of the application and impact of various recent adjustments to juvenile law, those who favor or oppose such changes can do little more than speculate or make rough projections based on personal experience or limited research.²⁴

The Climate That Drives Waivers

The trend toward treating more juveniles as criminal offenders is a reaction to a number of factors. First, it is a response to the increasing incidence and seriousness of juvenile violence and an overcrowded and overburdened juvenile justice system. Second, it is based on a concern that the juvenile justice system does not dispense sufficiently tough sanctions to provide accountability to victims and society. Third, because frequently there is no reliable system for the retention of records and identification of offenders, it is perceived that the juvenile justice system is not able to track and suppress a blossoming criminal career.

Lack of capacity. As discussed in the first section of the *Action Plan*, juvenile justice practitioners are confronted daily with moving juvenile offenders through the juvenile system. Overwhelmed by burdensome caseloads, they are often unable to assess the individual treatment needs of each juvenile, provide appropriate and sustained services, or ensure adequate supervision to effectively monitor the youth's behavior and compliance

with a dispositional order. The lack of system capacity and graduated sanction programs are central deficiencies in the juvenile justice system that may tilt the frustrated decisionmaker (prosecutor, judge, or legislator) toward the decision to transfer increasing numbers of offenders. As noted in the Interdepartmental Working Group on Violence's *Violence: Report to the President and Domestic Policy Council* and in Objective 1 of this *Action Plan*, the already strained juvenile justice system lacks sufficient resources to accurately and reliably identify serious, violent, and chronic offenders and to intervene effectively with them.

Confidentiality. Currently, in keeping with long-held confidentiality rules, most juvenile courts do not provide victims with formal notification about offenders or the disposition of cases. Often, the only way the victim can receive such information is by attending the hearing, where statute permits. In addition, the media historically have had little access to information that they could use to demonstrate the lack of resources and programs facing individual offenders and the system. In more than 20 States, juvenile codes do not allow the names or pictures of juveniles involved in delinquency proceedings to be released to the media.²⁵ However, recent court decisions have "opened the doors" of some delinquency proceedings, expanding public and media access.²⁶ In addition, the National Council of Juvenile and Family Court Judges has declared that:

Traditional notions of secrecy and confidentiality should be reexamined and relaxed to promote public confidence in the court's work. The public has a right to know how courts deal

with children and families. The court should be opened to the media, interested professionals and students and, when appropriate, the public, in order to hold itself accountable, educate others, and encourage greater community participation.²⁷

Confidentiality within the system of youth services also hinders the effectiveness of the juvenile justice system. Courts, schools, mental health and health facilities, law enforcement, and other social service agencies unintentionally impede effective rehabilitation of youth by restricting the exchange of appropriate and critical information about their individual histories. In the majority of cases, the resistance to sharing information is not based on laws or regulations but on institutional reluctance to violate privacy interests. Overly restrictive confidentiality rules and practices substantially weaken the juvenile justice system as a viable arena for trying serious and violent juvenile offender cases. Until we know the history and service needs of juveniles who enter the system, we can neither provide adequate services nor fully protect the public.

Lack of records or record availability. A State may manage its juvenile recordkeeping systems through a variety of methods. All are variations on the theme of "nondisclosure," a concept that means the records are not ordinarily available outside the court. The disclosure rules for each State vary, but the elements of the formula are generic. The parties before the juvenile court are entitled to the contents of the juvenile record file. Unfortunately, however, most States do not permit additional disclosure without specific authorization of the court or some other statute. Thus, while several States

are now either considering or revising juvenile codes in response to growing public concern over juvenile crime and increasing demands by victims, it is likely that offender history information will remain unavailable to other agencies and individuals with an interest in a particular juvenile. Moreover, under varying conditions, every State permits requests to expunge or destroy juvenile records.

Many State and local jurisdictions do not maintain accurate or complete records of juvenile offenders or do not share these records with other jurisdictions and State repositories. This is primarily due to confidentiality concerns and the limited automation of juvenile records. As a result, it is sometimes impossible to determine whether a juvenile who gets into trouble is a first offender, a repeat offender, or a chronic offender. Ideally, when a juvenile first comes in contact with the juvenile justice system, appropriate records are established and maintained and all relevant agencies can share information to ensure positive identification. This record sharing also makes possible a proper treatment and rehabilitation plan designed to prevent the juvenile from coming into further contact with the juvenile justice system. Records of adjudications should be compiled and made available for subsequent proceedings in the juvenile and criminal justice systems, even after the juvenile reaches the age of full criminal responsibility, and the length of time records are held should depend on the seriousness of prior offenses.

Making juvenile records electronically accessible requires more than collecting and automating record data. Some States require electronic information systems, and others

may need a change in their laws. A number of institutional components are involved, and assurances of appropriate confidentiality must be carefully considered and provided.

Problems with record maintenance may contribute to prosecutors seeking to transfer juvenile cases, particularly violent offenses. Otherwise, when the juvenile reaches age 18, or a statutorily provided time period, there may be no record of his or her delinquent history. For example, citizens, crime victims, school personnel, and law enforcement professionals express a legitimate concern about not having access to the history of juveniles adjudicated for sexual assault (even those who were treated) who are now free to apply for a job working with children or other vulnerable populations.

Length and termination of sentences. Another factor that drives the increased number of transferred juveniles is concern that placement in programs is often delayed because of waiting lists, and release is too often determined by a slot-driven system in which the critical factor is the need for a bed for the next offender. Furthermore, the juvenile justice system generally loses jurisdiction over a juvenile offender when the youth reaches a certain age, whether or not treatment is completed or the juvenile remains a threat to the public safety. This loss of jurisdiction may also contribute to the transfer of serious, violent, and chronic juvenile offenders to the criminal justice system in order to ensure that public safety is not threatened with the release of a violent offender who has reached the upper age of dispositional jurisdiction, which generally ranges from 18 to 21.

Issues of Juveniles in Federal Custody

Relatively few juveniles are in the Federal juvenile and criminal justice systems. The Federal Bureau of Prisons reports that, as of March 17, 1995, it had custody of 270 offenders who were 17 years or younger at the time they committed their offenses. Of this total, 130 were held as criminal offenders in adult institutions, and 140 were housed in contract juvenile facilities.

Federal prosecutions of juveniles, whether as delinquents or as criminal offenders, account for less than 1 percent of all Federal prosecutions. Apart from prosecutions of juveniles on Native American reservations and military bases, the Federal Government typically prosecutes only those juveniles who are members of large-scale narcotics-trafficking organizations or violent criminal organizations, such as gangs. In other instances, juveniles are prosecuted in Federal court for violent acts that have some Federal nexus, such as civil rights violations, carjacking, or bank robbery.

Even though the Major Crimes Act asserts Federal jurisdiction over certain offenses committed by Native Americans on their lands, tribes and tribal courts have expressed concern over the handling of serious crimes being committed by Native American youth in their communities. While tribes exercise concurrent jurisdiction over these crimes, they lack many of the resources needed to handle these cases properly. Specifically, they lack secure placement options, treatment resources, and sentencing capabilities. The Indian Civil Rights Act²⁸ prevents tribal courts from sentencing any person convicted

of a serious or violent offense to more than 1 year in jail and a fine of greater than \$5,000.

Similarly, the prosecution of juvenile Federal offenders in cases involving Native American youth, and the impact on tribes and tribal courts when Federal prosecution is declined, need to be explored. Virtually no studies have been conducted on their impact on Federal and tribal criminal justice systems.

Effective and Promising Strategies and Programs

Information Sharing

A number of States have recently passed laws authorizing or requiring information on alleged violent delinquents or adjudicated juvenile offenders to be shared with schools, child welfare agencies, or other social service providers. This information sharing provides all systems involved with a better understanding of the youth with whom they are working and the best way to work with that individual. It is also an important consideration for protecting the rights of victims of juvenile offenders. The Office of Juvenile Justice and Delinquency Prevention (OJJDP) is currently working with the Department of Education to develop a fact sheet on sharing school information with the juvenile justice system so that at-risk and delinquent youth can be identified and services provided prior to their involvement in serious and violent crime.

The Illinois juvenile court model for interagency information sharing, passed by the General Assembly in 1992, supports law enforcement,

State attorneys, probation departments, juvenile courts, social service providers, and schools in the early identification and treatment of habitual juvenile offenders. This 1992 amendment to the Illinois Juvenile Court Act of 1987 authorizes an interagency committee to gather and disseminate comprehensive data to agencies in the juvenile justice system to produce more informed system decisions. This is being accomplished, in part, through the establishment of a statewide Serious Habitual Offender Comprehensive Action Program (SHOCAP). Developed by OJJDP, the SHOCAP multidisciplinary interagency case management and information-sharing system establishes an interdisciplinary committee. The committee develops criteria to identify juveniles who are serious habitual offenders and adopts a written interagency information-sharing agreement.

The Florida model for interagency information sharing authorizes the juvenile court to maintain records of all cases brought before it. The model also provides that the court shall preserve records pertaining to juveniles charged with committing delinquent acts or violations of the law until they reach age 24, or age 26 in the case of serious or habitual delinquents. Florida has recently developed a statewide SHOCAP in 15 sites and will be adding another 10 sites in 1996.

Youthful-Offender Laws, Blended Sentencing, and Intermediate Facilities

Some States are improving the response of their juvenile justice systems to serious, violent, and chronic juvenile offenders by developing intermediate (third system) facilities or blended sentencing

models. Other States have created separate youthful-offender institutions for juveniles adjudicated delinquent for serious or violent crimes or convicted and sentenced criminally under youthful-offender statutes. These typically permit the juvenile court to treat older, more aggressive juvenile offenders as youthful offenders, rather than as delinquents, by placing them in specialized youthful-offender facilities. Conversely, some statutes permit criminal courts to treat juvenile criminal offenders, and sometimes younger adults who have committed less serious crimes, as youthful offenders. California, Montana, and New York have long had such statutes.

Colorado's Youthful Offender System, created in 1993, is designed to break down gang affiliation and youth violence by concentrating on treatment, discipline, and intensive reintegration services through a low staff-to-offender ratio. In Wisconsin's program, the State mandates that some youthful offenders stay in the program for 5 years. If they have committed felonies that would have been punishable by life imprisonment, juveniles must stay in the program until they are 25 years old.²⁹

In some jurisdictions, either through legislation or agency procedures, judges and correctional officials have available a range of both juvenile and adult correctional sanctions for serious, violent, and chronic juvenile offenders who have been adjudicated delinquent and/or convicted criminally. This blending of sanctions may be strictly age based (for example, on reaching a certain age, the delinquent offender is transferred to adult prison under a criminal conviction).

In 1995, Minnesota enacted a blended sentencing law that creates a new category called "extended sentence jurisdiction juveniles" for serious and repeat offenders over age 14. When found guilty of a crime, these juveniles receive both a juvenile disposition and a suspended criminal sentence. If they fail to conform to the requirements of the juvenile disposition, juveniles can receive the criminal sentence that, in most cases, would result in confinement in an adult jail or prison. The law extends the continuing jurisdiction of the juvenile justice system to age 21.

Florida has led the way in an unusual blending of traditional features of the juvenile and criminal justice systems through a three-tiered approach that gives prosecutors expanded discretionary power in making jurisdictional decisions as the age of defendants and the severity of offenses increase.³⁰ In criminal court, the judge has a variety of sentencing options, including sentencing the offender as an adult or as a juvenile. The criminal court judge retains jurisdiction over an individual sentenced as a juvenile to monitor the sentence and, if there is a violation of the court order, to resentence the offender as an adult. Thus, Florida's law grants its criminal court judges broader dispositional power than that of juvenile court judges, creating a "last chance" provision.

Related statutory provisions in some States target serious, violent, or chronic juvenile offenders by creating an official record that will follow the offender into the criminal system and/or by authorizing enhanced commitments by the juvenile court. Colorado, Massachusetts, Pennsylvania, and Texas have enacted enhanced commitments.

The Texas law, for example, gives the juvenile court authority to provide determinate juvenile sentences of up to 40 years in prison for 12 violent felony offenses, with the sentence to begin with treatment in the juvenile correctional system to age 18, at which time transfer to an adult facility following a court review is authorized. Such transfer is automatic at age 21. Juveniles subject to this Texas law have a right to all the due process and procedural rights of accused criminal offenders, including jury trial and bail.

The distinction in appropriate dispositional alternatives between younger adult and older juvenile offenders is not always clear. Justice system practitioners have strong and differing opinions about what should be done to address these individuals. Consequently, blended sentencing and extended jurisdiction statutory schemes are gaining favor in an increasing number of States. In order to address public safety needs, States should continue to experiment with the development, implementation, and evaluation of these types of dispositional options. At the same time, however, we must also invest in the juvenile justice system so that it can meet the treatment needs of juvenile offenders.

The *Action Plan* suggests providing increased flexibility for the transfer of appropriate juveniles to criminal court until the juvenile justice system has the capacity to provide adequate program services to serious, violent, and chronic juvenile offenders and to ensure public safety. Specifically, it proposes a two-tiered system of extended jurisdiction in the juvenile court for

serious, violent, and chronic offenders and consideration of innovative blended sentencing options for juvenile offenders under criminal court jurisdiction.

The two-tiered system would provide for the transfer of serious, violent, and chronic juvenile offenders contingent upon age, presenting offense, and offense history, allowing greater prosecutorial discretion for the older, more serious offender. State laws should consider appropriate discretionary powers for prosecutors to proceed to criminal court as the ages of juvenile offenders and the severity of the offense increase, thereby allowing for individualized case review and decisionmaking. Extended jurisdiction of the juvenile court can be predicated upon a judge's determination that a juvenile is a serious, violent, or chronic offender based upon the current offense and the juvenile's prior history in the justice system. The court could be authorized to use this extended jurisdiction to keep an adjudicated delinquent in the system beyond age 21 if there were a reasonable expectation of successful treatment.

The use of innovative blended sentencing options can function as a supplement to the provision of extended jurisdiction by authorizing the criminal or juvenile court judge to utilize or, when appropriate, to combine juvenile and adult responses into a continuum of sanctions appropriate to the offense history and age of the juvenile. The *Action Plan* advocates a clear judicial role in either the decision to proceed against a juvenile as a criminal offender or at the dispositional stage through discretion in sentencing options, as outlined

above. However, while not advocating for statutory exclusion or lowering the age for criminal court jurisdiction, the *Action Plan* recognizes that, in some instances, State law may use more than one transfer mechanism and expressly provide for the imposition only of criminal sanctions for specific classes of offenses at specific ages.

If the graduated sanctions model recommended in the *Action Plan* is fully implemented in a jurisdiction with adequate programming and resources, then the numbers of juveniles being transferred into the criminal court or classified for extended jurisdiction should decrease. In the interim, however, a more flexible mechanism is needed that ensures public safety and provides appropriate sanctions for serious, violent, and chronic juvenile offenders. With flexibility in court sentencing, the criminal court judge can access juvenile court programming as a "last chance" option for these offenders, while also enhancing the supervision of the court and heightening the motivation of the offender, who is accountable to the criminal court and faces a potential prison sentence upon violation of sentencing conditions.

Federal Prosecution of Juveniles

At the Federal level, the *Action Plan* suggests examining the advisability of amending the Federal Juvenile Delinquency Code to remove procedural barriers to the transfer of juveniles under Federal jurisdiction for criminal prosecution, including adding prosecutorial transfer authority (direct file) for certain serious and violent offenses.

Federal Action Steps

Promote Innovative Options for the Appropriate Maintenance and Sharing of Juvenile Records

OJJDP and the Department of Education (ED) will continue to review Federal Educational Records Privacy Act (FERPA) regulations to clarify and enhance the ability of schools to share information with other agencies responsible for handling juvenile offenders.

OJJDP and ED will also develop technical assistance mechanisms to build the capacity of law enforcement and educational institutions to share juvenile records.

Improve Targeting, Apprehension, Prosecution, Treatment, and Correctional Facilities and Programs for Serious, Violent, and Chronic Juvenile Offenders

The Department of Justice (DOJ) will provide funding through its Correctional Facilities/Violent Offender Incarceration Grants for construction of, or planning for, prison facilities for criminal offenders and for boot camp programs for adult or juvenile offenders (to make available secure space in prisons or juvenile correctional facilities for violent offenders).

OJJDP will increase its focus on programs to identify and target these offenders, such as SHOCAP; arrest and prosecute them, as appropriate; and provide treatment programs for serious, violent, and chronic juvenile offenders within the juvenile justice system. These programs combine accountability and sanctions with increasingly

intensive community-based intervention, treatment, and rehabilitation services correlated with the seriousness or nature of particular offenses.

Assist States and Local Governments To Identify Juvenile Offenders

DOJ supports improved juvenile records that are accurate and accessible, where appropriate, in both the juvenile and criminal justice systems.

The Bureau of Justice Statistics (BJS) and OJJDP have produced publications to assist State recordkeepers in understanding the technical, legal, and policy issues relating to juvenile records. Statistical and legislative solutions from States were compiled.

Based on this information, BJS will continue to address the issue within the context of its ongoing program to assist States in upgrading criminal records. Specifically, BJS will:

- Sponsor a national conference to address issues associated with the use of, and access to, juvenile records in the criminal justice system.
- Sponsor a study to analyze legal and policy issues associated with the collection, use, and exchange of juvenile delinquency records, including the relationship between juvenile and criminal records.
- Convene a national conference to discuss issues involved in linking juvenile and adult records.

OJJDP's Systems and Statistics Development (SSD) Program—which collects, analyzes, and

disseminates national statistics on juvenile victims and offenders and documents the system's response—will continue to raise the level of attention to juvenile record issues. SSD's actions are helping States recognize the entire range of issues associated with juvenile records: fingerprinting and other forms of biometric identification of juveniles, classification of juvenile offenses as compared with adult crimes, automation of juvenile records, expunging or sealing of records, and types of records to be made available in national criminal history recordkeeping systems.

The National Institute of Justice (NIJ) will sponsor research to examine the use of juvenile record information in the adjudication and sentencing of criminal offenders. The study will consist of two phases. Phase one will be a national assessment of legislation and practice to determine the extent to which States are authorized to consider juvenile record information in criminal prosecutions. Phase two will examine how juvenile record information is used in Sedgwick County (Wichita), KS, and in Montgomery County, MD.

OJJDP and ED will develop a fact sheet on sharing school information with the juvenile justice system.

Examine Transfer Statistics and the Impact of Innovative Sentencing Options

In order to assist in developing this information, OJJDP will carry out the following studies:

- A statistical assessment of national transfer trends in the context of State legislative requirements.

- A comparison between juvenile and criminal justice system management of juvenile offenders.

These studies will control for presenting offense, offense history, and age of offender in order to provide accurate data.

Develop and Support Innovative Options for the Handling of Serious, Violent, and Chronic Juvenile Offenders

OJJDP will survey innovative system practices in managing serious, violent, and chronic juvenile offenders in both the juvenile and criminal justice systems.

Review Procedural Barriers to Prosecuting Violent Federal Juvenile Offenders as Criminal Offenders

DOJ will facilitate prosecuting certain serious, violent, and chronic juvenile offenders as criminals in Federal court by proposing that Congress amend the Federal juvenile delinquency statute to accomplish the following:

- Remove unnecessary procedural barriers for prosecuting and transferring violent juvenile felony offenders as criminals in the Federal system.
- Authorize juveniles prosecuted as criminal felons to be detained and incarcerated separately in adult facilities through a reasonable process and on a case-by-case basis.
- Permit expanded use of fingerprinting and recordkeeping and expanded access to those prints and records for juveniles adjudicated delinquent.

- Address the Federal system's lack of victim rights, including notification; restitution; return of property; victim impact statements; protection from intimidation, harassment, and harm; and information and referral services for those juveniles under Federal delinquency jurisdiction.
- Permit use of supervised release for juveniles adjudicated delinquent after their release from terms of confinement.

Provide Training and Technical Assistance to Federal, State, and Local Prosecutors and Judges Handling Juvenile Cases

The DOJ Criminal Division, in conjunction with the Executive Office for U.S. Attorneys, will disseminate to all U.S. Attorneys' Offices a manual outlining the issues in federally prosecuting juvenile offenders. The manual will cite relevant case law and include form indictments and pleadings to aid Assistant U.S. Attorneys. In addition, a publication examining these issues, entitled *Federal Prosecution of Gangs and Juveniles*, is available from DOJ's Office of Legal Education.³¹

Through the Anti-Violent Crime Initiative, the Criminal Division will encourage Federal prosecutors to continue working with their State and local counterparts to develop strategies to reduce youth violence. For example, all U.S. Attorneys have met with their violent-crime workgroups to implement the Youth Handgun Safety Act in their districts. As part of that effort, they have focused on identifying the sources of firearms possessed by juveniles and getting guns out of schools as part of a larger strategy to address violent crime.

OJJDP will continue to support a prosecutor training center developed by the National District Attorneys Association. This project provides workshops on juvenile justice-related executive policy, leadership, and management for chief prosecutors and juvenile unit chiefs and provides background information to prosecutors on juvenile justice issues and programs.

Suggestions for State and Local Action

- Review mechanisms for prosecuting, adjudicating, and sentencing juveniles in the criminal justice system.
- Assess the impact of proposed transfer mechanisms before they are enacted into law.
- Establish and maintain a well-structured system of graduated sanctions for juvenile offenders.
- Establish automated record-keeping systems in all local juvenile courts. Collect and centralize juvenile records at the State level. Forward records of adjudication for serious delinquency to the Federal Bureau of Investigation to facilitate information sharing and accurate criminal history records.
- Assist schools and juvenile justice system practitioners to obtain court orders allowing information sharing on juveniles in the justice system, where such orders are necessary to authorize information sharing.
- Adopt policies and standards for prosecuting serious, violent, and chronic juvenile offenders in criminal court.

- Develop innovative and/or alternative sanctions such as community-based corrections options.
- Fingerprint and photograph youth charged with delinquent acts in the juvenile justice system.
- Request technical assistance and training through OJJDP to institute needed system changes.
- Work with the media (print and broadcast) to promote greater public understanding of the scope and complexity of the transfer issue.

3. Reduce Youth Involvement With Guns, Drugs, and Gangs

Overview

The involvement of judges, prosecutors, social service providers, law enforcement officers, crime victims, community-based organizations, and others is critical to improving the juvenile justice system and reducing youth violence. The *Action Plan* supports interagency law enforcement teams, or task forces, that coordinate the investigative efforts and suppression tactics of Federal, State, and local law enforcement agencies in weapons, drug, and gang arrests.

In many communities, law enforcement has taken the lead in implementing innovative juvenile crime prevention and intervention efforts as part of an overall community oriented policing approach. Successful public safety and prevention strategies provide comprehensive, targeted community services and support to youth to keep them from becoming the next generation of offenders. Youth-focused community oriented policing that is effectively linked to the juvenile justice system can significantly contribute to the reduction of crime, restoration of order, and eradication of fear in local communities.

This section addresses four primary problem areas in which law enforcement plays a critical leading role: juvenile gun violence; the combination of youth, guns, and drugs; the link between drugs and delinquency; and youth gangs.

Examples of programs illustrate effective ways of finding solutions to each of these problems in local communities. The *Action Plan* supports strong measures to prevent juveniles from using guns illegally and to remove guns from schools through youth-focused community oriented policing, reducing the availability of firearms to youth, strengthening anti-drug and anti-gang measures, and building healthy communities through expanded youth opportunities.

The *Action Plan* also supports the development of model juvenile handgun legislation to facilitate law enforcement activities. Further, it encourages the efforts of school officials to remove guns from schools, and supports the dissemination of information on promising juvenile gun violence reduction programs, and the provision of technical assistance to achieve those goals.

Current Status and Analysis of the Problem

Juvenile Gun Violence

A trend analysis of juvenile homicide offenses shows that since the mid-1970's, the number of homicides in which no firearm was involved has remained fairly constant. However, homicides by juveniles involving a firearm have increased nearly threefold. In addition, during this same period,

the number of juvenile arrests for weapons violations increased 117 percent. When guns are the weapon of choice, juvenile violence becomes deadly.¹ (See figure 9 for an illustration of the increasing incidence of gun homicides committed by juveniles.)

Because recent crime statistics—excluding homicides—gathered by the Federal Bureau of Investigation do not show all chargeable offenses involved in a particular incident, there is no reliable way to determine how many crimes involved a weapon, what was the nature of any injury, or whether the crime involved illicit drugs. Therefore, it is difficult to determine the precise role that guns and illegal drugs have played in the recent increase in violent juvenile crime. Although there are gaps, the data make a compelling case that the role of guns in juvenile-related homicides is increasing at an unprecedented level.

During the period 1976 to 1991, firearms were used by 65 percent of juvenile homicide offenders (44 percent used handguns). Firearms were used in nearly 8 out of 10 juvenile homicides in 1991, compared with 6 out of 10 in 1976.²

Young black males have the most elevated homicide victimization rate of any race or gender group. Homicides involving firearms have been the leading cause of death for black males ages 15 to 19 since

Figure 9: Juvenile gun homicides

Gun homicides by juveniles have nearly tripled since 1983, while homicides involving other weapons have actually declined

- From 1983 through 1991, the proportion of homicides in which the juvenile used a gun increased from 55% to 78%.

Data Source: FBI. 1993. Supplementary homicide reports 1976–1991 [machine-readable data files].

Source: Snyder, H., and M. Sickmund. 1995 (August). *Juvenile Offenders and Victims: A National Report*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice.

1969, and the rates more than doubled in the decade from 1979 (40 deaths per 100,000) to 1989 (85 deaths per 100,000).³ Teenage boys in all racial and ethnic groups are more likely to die from gunshot wounds than from all natural causes combined.⁴

Between 1979 and 1991, the rate of suicide among youth ages 15 to 19 increased 31 percent. In 1991, 1,899 youth ages 15 to 19 committed suicide, a rate of 11 per 100,000 youth in this age group. Firearms were used in 6 out of 10 suicides among youth ages 15 to 19 in 1989.⁵

In 1990, the Centers for Disease Control and Prevention surveyed a nationally representative sample of

9th- to 12th-grade students about the number of times they had carried a weapon such as a gun, knife, or club during the prior 30 days. One in 20 students indicated he or she had carried a firearm, usually a handgun. A number of additional surveys confirm an increased propensity among young people to carry guns.⁶ The increased availability of guns and access to guns by youth have had devastating consequences on schools and communities. In many schools, learning is no longer the top priority; survival concerns lead many students to avoid school entirely or carry weapons for protection. Educators must divert attention from academics to monitor and control student

aggression. In neighborhoods, people are apprehensive about going outside their homes, and fights that once involved fists have become deadly exchanges.

Youth, Guns, and Drugs

The Office of Juvenile Justice and Delinquency Prevention (OJJDP) is currently supporting research on the causes and correlates of delinquency and has found a strong relationship among illegal gun possession by juveniles, delinquency, and drug use. Nearly 3 in 4 juveniles who illegally possessed guns committed some type of street crime; 1 in 4 committed a gun-related crime; and 4 out of 10 used drugs.⁷

Drug activity appears to exacerbate juvenile violence in two ways. First, firearms are more prevalent around drug activity.⁸ In 1984, the United States saw a dramatic increase in juvenile gun homicide, coinciding with the introduction of crack cocaine into urban communities. Studies show that as the use of guns by drug-involved youth increases, other young people obtain guns for their own protection. This cycle of fear or “diffusion” theory⁹ is supported by recent research on the “ecology of danger.”¹⁰ A 1993 Louis Harris poll showed that 35 percent of children ages 6 to 12 fear their lives will be cut short by gun violence,¹¹ and a longitudinal study of 1,500 Pittsburgh, PA, boys revealed that their frequency of carrying a concealed weapon increased when they began selling drugs.¹²

The second way drugs and juvenile gun violence appear related is through the impact of drugs on a young person’s perceptions. Adolescence is a time of taking risks and seeking stimulation, and juvenile delinquents report a certain level of excitement as well

as fear of apprehension in the commission of a crime. Many youth revel at the thrill of roller coasters, some ignore cautions about “safe sex,” and others seek an “ultimate high” from illicit drugs or possession of a deadly weapon.

Drugs and Delinquency

Although researchers have not established a definite causal link between drug use and delinquency, they have confirmed a delinquency–illegal drug use correlation. In the 1987 Survey of Children in Custody, 81 percent of wards in State-operated institutions responded affirmatively when questioned about lifetime use of drugs.¹³ Nearly half (48 percent) admitted to being under the influence of drugs or alcohol while committing the offense for which they were institutionalized. Although there is some variance across offense categories, the percentage of institutionalized wards who reported being under the influence of drugs or alcohol at the time of the offense ranged from 34 percent in the case of rape offenses to 51 percent for robberies and 59 percent for drug possession.

Although the link between drug use by juveniles involved in serious delinquency and by those not attending school is well documented, drug use by another segment of the youth population not considered to be at risk—students who have progressed to their senior year in high school—also continues to be the focus of serious concern. According to the results of a 1994 national household survey, monthly marijuana use among 12- to 17-year-olds nearly doubled from 1992 to 1994—from 4.0 percent of students surveyed to 7.3 percent—following a steady decline in drug use from 1979 to 1992. The survey also

reported that 2 million youth rate themselves as heavy alcohol drinkers, with over 1 billion cans of beer being consumed annually by junior and senior high school students alone.¹⁴

Youth Gangs

Today, youth gangs exist in nearly every State. One expert estimates that more than 3,875 youth gangs with a total of more than 200,000 gang members are established in the 79 largest U.S. cities.¹⁵ Gang activity has extended beyond the inner city of major population centers into smaller communities and suburbs. Today’s gangs are best characterized by their diversity in ethnic composition, geographical location, organization, and the nature and extent of members’ involvement in delinquent and/or criminal activities.¹⁶ In the 79 U.S. cities with populations over 200,000, 91 percent reported having a gang problem that had spread from the streets into areas traditionally considered safe havens, such as schools.¹⁷ In the Chicago metropolitan area, all public and some parochial high schools, including many in suburban Cook County, reported evidence of gang activity.¹⁸

Researchers have identified a number of factors that put youth at risk of gang involvement: poverty, school failure, substance abuse, family dysfunction, and domestic and societal violence.¹⁹ Easy access to illicit drugs and the perceived financial rewards of drug dealing pose attractive alternatives for youth with inadequate education and limited employment opportunities, leading them into high-risk behaviors and potential gang involvement. Gang recruits often have a poor self-image, low self-esteem, and little adult participation in their lives. Some of them are

children of gang members and are choosing a familiar lifestyle. Many are seeking the recognition they fail to receive from home or school. Even parents with strong parenting skills cannot ensure that their children will not become involved in gangs, particularly in low-income, problem-ridden neighborhoods.

Youth gang research has focused extensively on the gang–drug nexus. Recent research, however, suggests that there is also a significant connection among gang involvement, gang violence, and firearms. In one study based on responses from 835 male inmates in 6 juvenile correctional facilities in 4 States, researchers found that movement from nongang membership to gang membership brought increases in most forms of gun-involved conduct. Forty-five percent described gun theft as a regular gang activity. Sixty-eight percent said their gang regularly bought and sold guns, and 61 percent described “driving around shooting at people you don’t like” as a regular gang activity.²⁰

Additionally, experts report that gangs appear to be increasing their organizational sophistication and their propensity for individual and collective violence.²¹ These structural and behavioral changes are often, but not universally, attributed to the impact of the drug trade and the availability of firearms. Another study indicates that gang homicide settings differ from nongang homicide settings in that they are more likely to involve public areas, automobiles, and firearms, among other elements.²² The researchers further speculate that location, automobile involvement, and gun presence suggest potential points of intervention.

Effective and Promising Strategies and Programs

Getting Guns Out of the Hands of Juveniles

Research suggests that to reduce the environment of fear and achieve the greatest reduction in the number of weapon-carrying youth, efforts must be directed at frequent weapon carriers.²³ Youth gun-reduction and fear-reduction strategies should reinforce one another. One expert suggests a “market disruption” approach, such as that used to fight street drug markets.²⁴ Police have been successful in reducing drug trafficking in communities by using community allies to report new dealing sites, making buyers feel vulnerable by publicizing reverse sting operations in which police pose as dealers and arrest buyers, and interfering with business by loitering around dealer sites. Community support and youth involvement in planning and implementation are critical to the effectiveness of such an operation.

The Kansas City (MO) Gun Experiment is an example of a successful effort. The Department of Justice (DOJ), the U.S. Attorney’s Office, and the Kansas City Police Department worked together to form a working group consisting of law enforcement, human service agencies, and community organizations to focus police efforts in high-crime neighborhoods by routinely stopping traffic violators, youth in violation of curfews, and individuals involved in other infractions of the law. During these routine stops,

police look for any infractions that give them legal authority to search a car or pedestrian for illegal guns. Special gun-intercept teams have proven to be 10 times more cost effective than regular police patrols.²⁵

Targeted on an 80-block neighborhood with a homicide rate 20 times the national average, the Kansas City program reduced crime by at least 50 percent during a 6-month period. In addition, the program did not displace crime to other locations—gun crimes did not increase significantly in any of the surrounding seven patrol beats. Despite the fact that previous police campaigns had drawn protests of discrimination, the gun-intercept program did not experience such protests. Police had involved community and religious leaders in initial planning, and neighborhoods had actively sought greater police activity. Results of a recent program evaluation funded by the National Institute of Justice (NIJ) indicate that this strategy appears very promising: gun crimes in the target neighborhoods declined 49 percent and drive-by shootings and homicides also dropped significantly.²⁶

The Bureau of Alcohol, Tobacco, and Firearms’ (ATF’s) Achilles Program coordinates ATF’s resources with State and local law enforcement to combat armed, violent gangs and armed narcotics traffickers in 21 of the Nation’s communities with the highest levels of firearms-related violence. This initiative focuses on the enforcement of tough Federal firearms laws that require minimum/mandatory sentencing with no chance of parole for convicted offenders. The Achilles Program targets gangs that lure juveniles into a life of crime. Be-

cause firearms, unlike narcotics or other forms of contraband, are not easily disposable, they often provide a history of the criminal and can link the individual to other crimes and provide valuable intelligence about the offender’s criminal associates. Consequently, firearms can be an Achilles’ heel for gangs and violent criminals.²⁷

Focusing on Gang Prevention, Intervention, and Suppression Strategies

A combination of prevention, intervention, and suppression strategies has been implemented in communities across the United States to address the problem of gangs. It is imperative that any program, whether prevention, intervention, suppression, or any combination of these, be based in sound theory and work closely with the juvenile justice system. Specifically, policies and programs must be based on appropriate targeting of both institutions and youth, as well as their relation to each other at a specific time and place. For example, it is important to focus on youth entering or leaving a gang and on the developmental stage of the gang problem.²⁸

In the late 1980’s and early 1990’s, OJJDP supported the completion of two phases of a National Youth Gang Suppression and Intervention Program. This program has provided an assessment of youth gang research, including definitions, the nature and causes of the youth gang phenomenon, and the effectiveness of the program strategies used by various agencies and organizations in the community.²⁹ The need for conclusive evaluations of these strategies was emphasized, but the following common

elements appear to be associated with the sustained reduction of gang problems:

- Leaders must recognize that gangs are present in the community and that suppression strategies must be complemented by prevention and intervention strategies.
- Community leaders must reach a consensus on the nature of the problem and the critical points for intervention.
- The combined leadership of the justice system and community-based organizations must focus on the mobilization of political and community resources to address gang problems.
- Leaders must create a mechanism or structure to coordinate communitywide efforts.
- A team comprising representatives from law enforcement, prosecutors, judges, probation, corrections, schools, community-based organizations, grassroots agencies, and other groups must prepare a set of policies and practices for the design and mobilization of community efforts.

OJJDP's Comprehensive Community-Wide Approach to Gang Prevention, Intervention, and Suppression (Gang Suppression and Intervention) Program provides policies and practices and a detailed analysis of how various components of a community can, in partnership, approach chronic and emerging gang problems.

OJJDP is in the process of completing the final phases (implementation and testing) of this program through A Comprehensive Response to America's Gang Problem

(Comprehensive Response Initiative). Five jurisdictions have been awarded funds to begin a 3-year effort to implement the comprehensive model developed under the Gang Suppression and Intervention Program. These demonstration sites, which are experiencing an emerging or chronic gang problem, are Mesa and Tucson, AZ; Riverside, CA; Bloomington, IL; and San Antonio, TX.

Other components of the Comprehensive Response Initiative are:

- The National Youth Gang Center, operated by the Institute for Intergovernmental Research located in Tallahassee, FL, which is designed to assist State and local jurisdictions in the collection, analysis, and exchange of gang-related statistics, legislation, research, and promising program strategies.
- An independent evaluation of the Gang Suppression and Intervention Program to determine how the five demonstration sites, confronted by chronic or emerging gang problems, can effectively plan and implement a comprehensive anti-gang violence model program and to test the efficacy of such a model.
- Training and technical assistance in areas such as community mobilization, youth gang problem assessment, program strategy design, and data collection and analysis to support communities in their planning and implementation efforts.
- Targeted dissemination and acquisition of youth gang-related resources, including publications, manuals, and research findings through OJJDP's Juvenile Justice Clearinghouse.

These components represent a comprehensive Federal effort to prevent, intervene, and suppress youth gang violence and to help communities learn what programs and strategies are effective.

With support from OJJDP, the Boys and Girls Clubs of America has successfully expanded its Targeted Outreach Program through its local clubs. This program, designed to serve at-risk youth, is currently used as a strategy for youth gang prevention and to intervene with gang members in the early stages of gang involvement. This program has been implemented in over 200 clubs, reaching tens of thousands of young people. The clubs offer positive activities as alternatives to the lure of gangs. The organization's national office provides training and technical assistance to local clubs that are potential expansion sites. A 1992 evaluation of this program found that 90 percent of the youth served by the program attended the club once a week or more and that 48 percent showed improvement in school behavior. Over one-third reported improved grades and an additional one-third reported increased attendance.³⁰

ATF continues to support gang prevention efforts nationwide through the Gang Resistance Education and Training (GREAT) Program. GREAT is an educational, school-based gang prevention program that was originally developed in response to an escalating youth gang problem in metropolitan Phoenix, AZ. Representatives from ATF, area law enforcement agencies, and local educators designed GREAT to help children set goals, make sound judgments, learn how to resolve conflicts without violence, and understand how gangs and youth violence negatively affect the quality of their lives. The GREAT

curriculum provides teenagers with critical skills and information to resist gang involvement and learn to become responsible members of society. GREAT also offers optional curriculums for grades three to six, as well as a followup summer recreation program.

To date, 1,300 officers from more than 530 agencies representing 45 States, the District of Columbia, and military bases overseas, have been trained to present the core curriculum in elementary, junior high, and middle school classrooms. Since the program's inception in 1992, more than 2 million children have received GREAT program training.

Nuestro Centro (Our Center) Gang, Drug, and Dropout Intervention Program in Dallas, TX, inaugurated in 1991 with OJJDP funds, took a grassroots preventive approach to the problem of juvenile violence. Citizens and community leaders in a predominantly minority neighborhood decided to take back their streets by converting an abandoned fire station into a community-run youth center. Participants in the afterschool program are unemployed and undereducated youth affected by drug abuse, gangs, school problems, family problems, physical and sexual abuse, and delinquency. Through the dedicated work of counselors and volunteers, most of whom live in the neighborhood, the program has shown significant success in deterring gang violence and drug use, with 95 percent of participants surveyed involved in educational activities, including school, general equivalency diploma (GED) preparation, and vocational training.³¹

A joint effort between the Chicago Police Department and the Chicago Housing Authority Police Depart-

ment provides another promising model that specifically targets public housing. Funded by the Bureau of Justice Assistance (BJA), the Building Interdiction Team Effort (BITE) secures the perimeters of buildings, challenges suspicious persons, patrols and searches common areas and vacant apartments, and conducts searches of occupied units with tenant consent. This concentrated effort on the part of police is sending a clear message to the gangs that these buildings contain family homes and are neither havens for criminal activity nor turf to be claimed. Preliminary results indicate that the program has improved overall safety and reduced drug trafficking in one housing development and drug-related violence in another.³²

The San Diego Urban Street Gang Drug Trafficking Enforcement Demonstration Project, funded by BJA, is another example of a successful approach. It targets young adult (ages 18 to 25) gang leaders identified by law enforcement as being involved in drug trafficking and gang-perpetrated violence and whose apprehension and prosecution would significantly alleviate or prevent an increase in drug trafficking, related violence, and economic disruption of the community. During the first 2 years, over 160 hardcore gang members were arrested and successfully prosecuted through these operations. Using enhanced prosecution strategies, targeted gang members received lengthy prison terms, which reduced gang violence in San Diego.³³

Enhancing Youth-Focused Community Oriented Policing

Research from the Center for the Study and Prevention of Violence suggests that violence may be a response to young people's percep-

tion that the authorities cannot protect them or maintain order in their neighborhoods.³⁴ Other researchers believe that the fundamental challenge with youth and firearms is to convince youth that they can survive in their neighborhoods without being armed.³⁵ Successfully reducing firearm possession means reducing both perceived environmental dangers and actual opportunities for weapon-associated violence.³⁶ Because the fear of assault is often stated as the reason youth carry firearms, programs should be implemented that address the risk of victimization, improve school safety, and foster a secure community environment.³⁷

Law enforcement agencies increasingly emphasize that juvenile delinquency prevention and intervention are key elements of community oriented policing. However, many law enforcement agencies and community organizations lack the information and resources to intervene effectively in situations involving youthful offenders. Public safety and prevention strategies can provide comprehensive, targeted, community services and support to at-risk youth. The *Action Plan* supports youth-focused community oriented policing and believes it has the potential to contribute significantly to the reduction of crime, disorder, and fear.

In 1992, the New Haven (CT) Police Department and the Yale Child Study Center initiated the Child Development-Community Policing Program. Although not specifically dedicated to gun, gang, or drug reduction, this police department uses officers to work with children and their families to prevent violent juvenile crime and to help them cope with the stress caused by living with violence. A key element of

the program is to increase police officers' level of confidence and competence in working with youth who have been victims of or witnesses to violence, recognizing a child's emotional needs, and understanding family dynamics. This approach is also intended to enable clinicians to intervene at the time of crisis and have a better understanding of the risk factors and problems that lead to violence and crime.

Other youth-focused community oriented policing strategies and programs that have demonstrated promise and/or effectiveness include:

- Reintegrative Policing Strategies, in which law enforcement officers help juveniles make the transition into the community following secure confinement.
- Police Athletic Leagues (PAL), in which police provide a wide array of youth activities and programs that serve as alternatives to gang involvement, drug use, and other delinquency.
- Futures Programs in Philadelphia, PA, and other jurisdictions, in which police officers serve as mentors and role models, focusing on the academic achievement of at-risk students.
- Kids and Kops Day, part of the Santa Ana (CA) Police Department's youth-related activities, in which police officers spend a day with at-risk youth attending recreational and cultural events and participating in community activities.
- Multidisciplinary team building, such as the Family Assessment Services Teams of the Norfolk (VA) Police Assisted Community Enforcement project, which addresses the needs of multiproblem families in targeted

neighborhoods and serves as a vehicle for information sharing and problemsolving at the neighborhood level. The program led to a drop in violent crime in the targeted neighborhoods.

Promoting Maturity and Respect for Life

Developmental issues associated with a lack of maturity can contribute to youth violence. Young people seldom understand the full impact of their behavior.³⁸ This lack of awareness of consequences coupled with a tendency to respond with violence can be a lethal combination. Prevention strategies that help youth to understand the impact of and take responsibility for their actions and that demonstrate ways to handle problems without resorting to violence can be highly effective.³⁹ Such programs should be available to high-risk youth between the fifth and sixth grades, when violence-prone attitudes appear to increase and become entrenched.

Research has shown that in addition to the environment of fear in which many youth live, the culture of the illicit gun trade has popularized firearms and made backing down from arguments and "losing face" difficult for young people.⁴⁰ Self-defense, the need to show off, or the need to ensure respect and acquiescence from others can also contribute to youth gun violence.⁴¹ Other studies indicate that youth who respond aggressively to shame, who find guns exciting, who feel comfortable with aggression, and who believe that guns bring power and safety are most likely to engage in gun violence.⁴² Thus, prevention programs that promote self-esteem, respect for others, cultural pride, and nonviolent conflict resolution can be an

effective antidote to the culture of violence.⁴³ Adult programs focusing on parenting skills can complement youth gun violence prevention programs. Classes on gun violence and its impact on victims should be provided in juvenile justice programs, schools, and community settings.

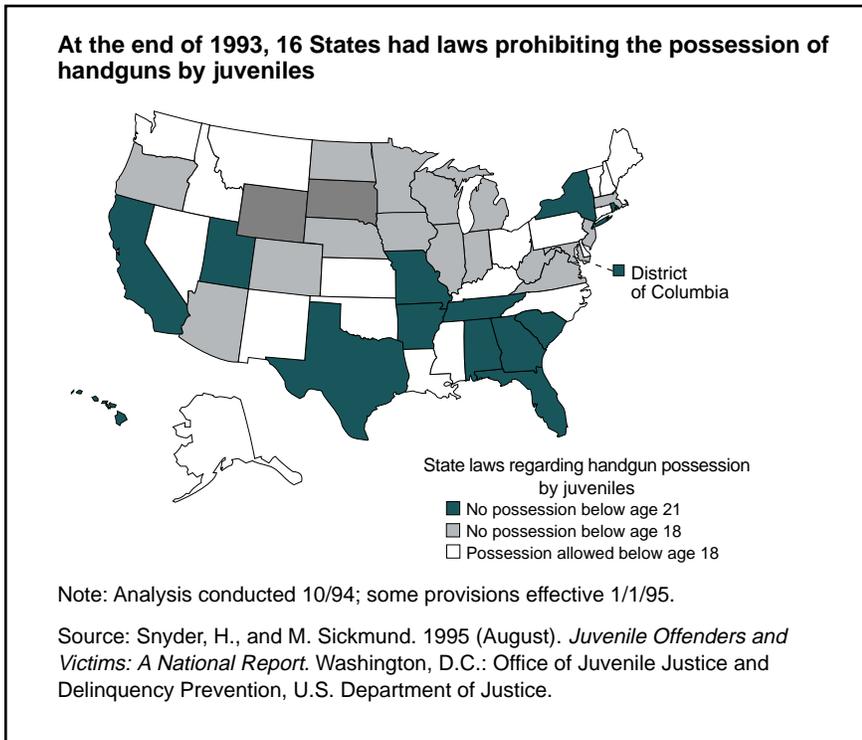

Reducing Firearms Availability, Strengthening Regulations, and Applying Technological Innovations

Safer gun design, regulation, product liability, increased sales tax, firearm registration and licensure, background checks, and ammunition modification are ways to reduce the dangers and availability of guns.⁴⁴ Stricter legislation and assault weapon and illegal handgun bans are approaches almost unanimously suggested by researchers as ways to limit the accessibility of guns to youth.⁴⁵ The National Rifle Association also favors regulations relating to the access and misuse of firearms by minors, particularly at the State level.⁴⁶ Figure 10 highlights the 16 States that prohibited the possession of handguns by juveniles in 1993. In addition to these States, all but three of the States and Territories have code provisions relating to juvenile possession of firearms.

An evaluation of the effectiveness of local gun laws and policies shows that mandatory sentencing laws for felonies involving a firearm have prevented gun-related violent crime.⁴⁷ Restrictive handgun laws also show indications of effectiveness.⁴⁸ Other types of laws have not been evaluated adequately to determine their effectiveness.

Technological changes are an important approach to reducing both youth gun violence and the extensive use of guns against their owners. Low prices⁴⁹ and

Figure 10: State juvenile handgun prohibitions

innovations in firearm and ammunition manufacturing⁵⁰ further increase the lethal nature of youth gun violence. Firearm design requirements are both technological and legal interventions that can decrease accessibility of deadly weapons by young people.

Preventing and Treating Drug Abuse

Additional support for drug and alcohol prevention and treatment is also an effective anti-violence strategy.⁵¹ Reducing the illicit drug trade would reduce drug-related violence as well as drug-induced violence. In addition, researchers have shown that a reduction in the number of juveniles selling drugs is likely to reduce the carrying of concealed weapons, particularly guns.⁵²

The 1995 *National Drug Control Strategy*⁵³ empowers communities to respond to their own drug problem through initiatives such as community policing and the Safe and Drug-Free School and Communities Program. The *Strategy* seeks to reduce chronic, hardcore drug use through treatment, including the support of drug courts, substance abuse treatment in detention and secure confinement facilities, and a Substance Abuse Performance Partnership, which coordinates the activities of national substance abuse prevention organizations. Finally, it places critical emphasis on source countries, focusing on programs to achieve democratic institution building, dismantling narcotics trafficking organizations, and interdicting drugs.

OJJDP supports the implementation of the Congress of National Black Churches' National Anti-Drug/Violence Campaign's (NADVC's) Technical Assistance and Training Program. This program implements national training and technical assistance designed to increase public awareness and mobilize residents to address the problems of drug abuse and related crimes in targeted communities throughout the United States. It also works to summon, focus, and coordinate church, public, and community leadership to launch local anti-drug campaigns. This campaign is being implemented in 37 cities involving 1,760 clergy and affecting about 500,000 members. NADVC has helped the sites leverage over \$13.4 million in direct funding to local site anti-drug, anti-violence initiatives.

Through its Community Anti-Drug Abuse Technical Assistance Voucher Project, OJJDP assists the National Center for Neighborhood Enterprise (NCNE) to extend its outreach to community-based grassroots organizations that are working to solve the problem of juvenile drug abuse. The project has three goals:

- To allow various neighborhood groups to inexpensively purchase needed services through the use of technical assistance vouchers disbursed by NCNE.
- To demonstrate the cost-effective use of vouchers to help neighborhood groups secure technical assistance for anti-drug abuse projects to serve high-risk youth.
- To extend OJJDP technical assistance to groups that are traditionally excluded because they lack the administrative sophistication, technical and grantsmanship skills, and

resources to participate in traditional competitive grant programs.

NCNE provides support to community groups in developing and implementing a strategy under DOJ's Operation Weed and Seed program; functions as a clearinghouse for information on community anti-drug prevention initiatives; and reviews technical assistance applications to select up to 25 eligible community-based, anti-drug programs for award vouchers. Vouchers, which range in value from \$1,000 to \$10,000, can be used for planning, proposal writing, program promotion, legal assistance, financial management, and other activities.

Selection of voucher awardees and amounts is determined by the degree to which applicants meet the following criteria: not previously funded by NCNE; lack of access to traditional funding sources; need for technical assistance and training; small budget; comprehensiveness of youth anti-drug programs; and clarity and feasibility of strategies presented in the application to NCNE.

Building Community and Increasing Opportunity

Youth gun and drug violence researchers agree that the strategies suggested above should be accomplished by a broad coalition of individuals and organizations.⁵⁴ Crime control professionals, public health and other health professionals, victims' families, educators, lawmakers and criminologists, gun control groups, community-based organizations, the elderly, the armed services, the Federal Communications Commission, and the U.S. Civil Rights Commission can

all participate in advocating for the freedom of our youth from gun, gang, and drug violence.

Youth who embrace the culture of violence are most likely to be those who feel that they have no stake in society and no trust in the adults who are supposed to provide them with safety and guidance. Communities must address the culture of violence and lack of opportunity and alternatives, reaching out to youth who feel disenfranchised from the adult world and providing them with positive opportunities.⁵⁵ An effective strategy is one that includes young people as a resource and provides legitimate activities and opportunities for them.⁵⁶

Research has shown that high levels of poverty, high rates of single-parent households, educational failure, and a widespread sense of economic hopelessness exacerbate the cycle of fear or diffusion phenomenon and increase the use of guns by young people.⁵⁷ Youth drug involvement, crime in neighborhoods, and violence portrayed in the media are also factors contributing to the use of guns by young people.⁵⁸ Therefore, the *Action Plan* endorses support and service systems for families and neighborhoods that complement any intervention focused on the individual.

In the past decade, Knoxville, TN, along with many other cities, experienced a growth in crime and drug-related problems in its public housing communities. During this same time, communications and liaison between the police department and the municipal housing authority, the Knoxville Community Development Corporation (KCDC), were unsatisfactory. Many

field officers were unhappy with KCDC because they felt the housing authority was not sufficiently addressing crime. KCDC saw its role as limited to the housing business and felt the police department should be the agency to address all crime-related issues.

Members of the police department and KCDC took action to become involved in a citywide, multiagency committee to look at the city's crime problem. From this group, members of the police department and KCDC developed a strong working relationship and collaborated to examine ways to reduce crime and improve the quality of life in KCDC housing projects.

Significant outcomes in KCDC housing projects have been produced through Operation Safe Home, which is part of the broader collaborative efforts of the U.S. Department of Housing and Urban Development (HUD) and DOJ. Drug dealing has been disrupted. Many drug offenders have been evicted, making housing developments safer. Fences have been installed. Shrubbery has been cut back to reveal criminals' hiding places. Where there was little or poor lighting, new high-pressure sodium lights have been installed, and a general cleanup has taken place. Diversity training is being provided to police department employees to help them gain a better understanding of cultural differences and to facilitate the process of community oriented policing. As a result of the drug abuse prevention education initiatives and the progressive intervention of the collaboration, violent crimes in Knoxville for 1993 were on the decline.⁵⁹

Implementing Comprehensive Curfew Initiatives

Communities are increasingly recognizing the importance of integrating curfew legislation with youth services such as job training and placement opportunities, individual and family counseling programs, and youth development recreational programs, in an effort to further reduce juvenile crime and victimization.

The curfew program in Phoenix, AZ, illustrates one city's multifaceted response to juvenile curfew violations. A review of an ineffective curfew ordinance enacted in 1968 led to the formation of a partnership between the police department and the Parks, Recreation, and Library Department. Curfew violators, detained by police, are supervised by recreation specialists at the city's gymnasiums. They are counseled and engaged in recreational activities until parents arrive. An additional aspect of the Phoenix curfew program involves targeting juvenile curfew violators who are also gang members. They, too, are counseled and exposed to positive alternatives to gang affiliation. Some curfew offenders receive followup care to determine if further support services are needed. These curfew programs have worked because other services, such as recreation and parental counseling, are part of an integrated strategy.

Federal Action Steps

Enhance Law Enforcement's Capacity To Respond to Juvenile Crime and Drug Trafficking

Through its law enforcement and training contract, OJJDP will provide training and technical

assistance to help law enforcement agencies improve their capabilities to respond to serious juvenile crime and contribute more effectively to delinquency prevention.

HUD will support agency efforts to combat drug trafficking in public and Native American housing developments by encouraging housing authorities to address drug-related activities, reimbursing local law enforcement agencies, enhancing security in housing developments, and providing social services to residents.

ATF's Project Uptown will address the problem of armed gangs and armed narcotics trafficking in public housing. The New York City Uptown initiative involves the concentration of enforcement resources by ATF, the New York Housing Authority Police Department, and the Office of the U.S. Attorney in selected public housing developments to reduce gang-related violence.

With experience gained through Project Uptown, ATF, in cooperation with HUD, developed a successful strategy and guidebook entitled *Addressing Violent Crime in Public Housing Developments*,⁶⁰ which it will disseminate to interested individuals.

To enable the criminal justice system to react more effectively to the problem of youth and drugs, NIJ will fund research to assess the magnitude of youth gang involvement in drug trafficking.

Support Interagency Gun and Drug Interdiction and Suppression Strategies

The Coordinating Council will support the Office of National Drug Control Policy (ONDCP) in implementing its National Drug Control Strategy to eradicate drug sources and reduce the demand for drugs.

BJA will establish and fund a national law enforcement organization to provide training and administrative support to the Interstate Firearms Trafficking Compact, composed of 14 States and the District of Columbia, which works to eliminate illegal gun trafficking and to improve the investigation and prosecution of cases involving the criminal use of firearms.

DOJ will support continuation of interagency partnerships that promote comprehensive, community-based gun interdiction strategies and will work with community organizations to ensure that schools, public housing developments, and other high-priority settings are free from gun violence.

ATF will implement the Violence Reduction Alliance (VRA), a comprehensive, nationwide strategy to stop illegal firearms trafficking. VRA will coordinate the resources of Federal, State, and local law enforcement to combat and prosecute violent criminals and also target for prosecution illegal firearms traffickers who supply firearms to violent criminals. Through VRA, ATF will provide support to investigative efforts with Project LEAD, the illegal firearms trafficking data base, and ATF's National Firearms Tracing Center.

BJA will document promising suppression and interdiction strategies to assist other jurisdictions that wish to implement such approaches.

BJA and OJJDP will provide funds to assist State and local jurisdictions to develop and implement new or enhanced strategies to prevent the illegal possession and use of firearms by youth.

Get Guns Out of Schools

The Department of Education (ED) will provide guidance to local schools and law enforcement agencies to implement the Gun-Free Schools Act of 1994, 8 U.S.C. § 14601. The law requires States that receive Federal elementary and secondary education funds to require school districts to expel for at least 1 year any student who brings a gun to school, subject to certain exceptions. The law also requires local education agencies that receive Federal funding to adopt a mandatory policy of referring students who bring firearms or other weapons to school to law enforcement agencies.

ED will work with OJJDP to support alternative education programs to keep youth expelled for weapons violations off the streets.

ATF will continue to trace all firearms recovered from juveniles at school or at the scene of a crime through the juvenile firearms tracing initiative operating at the National Tracing Center. When warranted, ATF will investigate and recommend to the local U.S. Attorney's Office for prosecution those individuals found to be providing firearms illegally to juveniles. ATF will also analyze the juvenile firearms trace data to determine trends in armed juvenile crime and frequent sources of firearms for juveniles. This program will permit Federal law enforcement to more accurately gauge the extent of firearms in schools and to direct limited Federal prosecution resources in the most effective manner.

Support U.S. Attorneys' Efforts To Advance Local Anti-Crime Initiatives

U.S. Attorneys' offices in each Federal Judicial District will work with Federal, State, and local law enforcement agencies to identify, target, and investigate individuals who engage in illegal trafficking, sales, possession, or use of firearms. Prosecution will be vigorously pursued through the Federal and State courts. Each office will implement the following strategies to support State and local efforts to get guns out of the hands of young people:

- Enforce laws and prosecute violators in order to disrupt the illegal gun trade.
- Work with State and local officials to enhance enforcement of laws concerning illegal trafficking in firearms and the use of guns to commit crimes.
- Provide encouragement to State and local agencies to trace guns seized from juveniles through ATF's juvenile firearms tracing program.
- Launch targeted enforcement efforts related to juveniles' involvement in firearms trafficking, sales, possession, or use.
- Actively participate in delinquency prevention efforts through Operation Weed and Seed and other community-based initiatives.
- Use public outreach to promote increased personal responsibility among youth concerning the use of guns.

Target Youth Gang Violence

Federal agencies will increase their efforts to work cooperatively at the national, State, and local levels to

intervene in youth gang activities. The agencies will use their particular areas of expertise in a comprehensive effort to address the pervasive, multifaceted problems of youth gangs and associated violence. DOJ will provide leadership in implementing gang suppression and intervention strategies, coordinating its efforts with the Department of Health and Human Services (HHS), which has traditionally focused on community-based prevention efforts.

In a key element of the DOJ strategy, U.S. Attorneys will work with law enforcement agencies at the Federal, State, and local levels through the operation of task forces to identify, apprehend, and prosecute certain gang-involved juvenile offenders in Federal and State courts.

NIJ will fund research to examine the criminal behavior of gang members, including motivation to join and remain in gangs, the role of gang life in criminal activity, and involvement in the illegal economy. In addition, NIJ will conduct research on the effectiveness of special anti-gang legislation and gang prosecution units.

BJA, OJJDP, and HHS will coordinate, evaluate, and enhance their gang prevention, intervention, and suppression activities. Research will focus on identifying the prevalence and characteristics of violent gangs; examining gang behavior; evaluating prevention and intervention strategies; and analyzing the relationship among gang participation, gang delinquency, and individual violence.

BJA will continue to support the Comprehensive Gang Initiative, which provides funds to eight local

jurisdictions including four sites that participate in the Comprehensive Communities Program.

OJJDP will continue to support the Comprehensive Response Initiative, including the activities of the National Youth Gang Center, the five demonstration sites of the Gang Suppression Intervention Program, the independent evaluation of this demonstration effort, the provision of training and technical assistance to these demonstration sites, and the targeted acquisition and dissemination of youth gang-related resources through the Juvenile Justice Clearinghouse.

OJJDP will expand the implementation of the comprehensive model developed through the Gang Suppression and Intervention Program by up to six additional demonstration sites, as part of OJJDP's Safe-Futures program. These additional demonstration sites will also benefit from the other components of the Comprehensive Response Initiative.

OJJDP will establish a Gang Consortium, as part of OJJDP's Comprehensive Response Initiative, to facilitate and expand ongoing coordination and enhance youth gang prevention, intervention, and suppression policies and activities, including information exchange and technical assistance services of the many Federal agencies with program emphasis on youth gangs and related problems.

OJJDP will continue to support research of various gangs and gang-related issues. OJJDP will also continue to support the expansion of the Boys & Girls Clubs' Targeted Outreach Program to over 30 more

sites, which will serve more than 1,500 additional high-risk and gang-involved youth.

HHS' Family and Youth Services Bureau (FYSB) has awarded six grants to implement action plans developed through the Youth Gang Drug Prevention Program. In FY 1994, FYSB awarded 21 grants under this program to develop 5-year action plans to transform the environment, circumstances, and attitudes that put youth at risk for unhealthy behaviors. The grantees were required to work closely with youth, parents, community-based organizations, police departments, schools, churches, and local businesses to determine the most critical developmental needs of youth, identify gaps in services, and support schools, health systems, and other agencies in collaborative efforts to serve youth.

Advance Youth-Focused Community Oriented Policing

In a joint effort, DOJ's Community Oriented Policing Service Office, the Community Relations Service, and OJJDP will develop a Youth-Focused Community Oriented Policing Initiative designed to assist up to 31 communities in implementing effective community oriented policing strategies that focus on juvenile crime, disorder, and related community problems.

Although each program implemented will focus on a different set of problems within the community, a set of similar activities will be undertaken to:

- Involve the community and youth in problem identification and resolution.

- Enhance law enforcement in the community.
- Increase information sharing among key agencies, organizations, and the community.
- Enhance linkages and cooperation among community agencies and organizations.
- Provide a common framework for decisionmaking and a comprehensive interdisciplinary approach to problemsolving.
- Focus on prevention as well as intervention for delinquent and at-risk youth.

A youth-focused community oriented policing training and technical assistance package based on these principles will be developed.

Provide Information on Curfew Programs for Juveniles

In response to heightened concern among community residents as a result of increased violent juvenile crime and victimization, many jurisdictions have sought various means to protect themselves and the community at large while addressing the need to reduce the incidence of such crime and victimization. One method that has gained widespread use and attention is juvenile curfew ordinances. In order to help jurisdictions better understand curfews and the surrounding controversy, the elements of effective curfew ordinances, and their accompanying enforcement programs, OJJDP is developing a summary document designed to assist jurisdictions interested in establishing a juvenile curfew ordinance and enforcement program.

The document will describe the two-pronged strict scrutiny test some jurisdictions have addressed and satisfied for a curfew law or ordinance to be valid on Constitutional grounds. Up to seven curfew ordinances and their community-based curfew enforcement programs will be highlighted with information on resources, organizations, and jurisdictional contacts provided.

Disseminate Information on Model Youth Handgun Legislation and Strategies for Reducing Gun Violence

Pursuant to the Youth Handgun Safety Act, OJJDP funded the National Criminal Justice Association to survey State handgun laws and ordinances and convene a broad-based group of experts to develop a draft model youth handgun law, with commentary, for the Attorney General's consideration in formulating a proposed Model Code. Following the submission of the Model Code to Congress, DOJ will work with governors, attorneys general, and State legislators to encourage consideration and adoption of youth handgun legislation in all States and U.S. Territories.

To support community efforts to curb youth gun violence, OJJDP will also disseminate a directory of effective anti-gun programs. The directory will contain a summary of current research on youth gun violence, legislation, and contact information for organizations working to address this issue.

In addition, OJJDP will develop a guide to implementing promising strategies to reduce youth gun violence based upon site assessments of innovative programs by the International Association of

Chiefs of Police. Working with ED, OJJDP will broadly disseminate this information to U.S. Attorneys, chiefs of police, education organizations, juvenile justice specialists, and other agencies and individuals.

The National Criminal Justice Reference Service (NCJRS) will provide information on youth violence and guns to agencies, organizations, and individuals. This service will bridge the gap between criminal justice and public health research by synthesizing and integrating existing research and cataloging ongoing projects in these areas. In addition to providing an automated data base of criminal and juvenile justice firearms research, NCJRS provides specialized support services to assist clearinghouse users.

Provide Research on the Efficacy of Drug Abuse Prevention and Treatment Models

NIJ will support a project to develop a comprehensive analysis of drug treatment methods and programs for both juvenile and adult offenders.

Promote the Development of Juvenile Drug Courts

DOJ, through the Office of Justice Programs Drug Court Office, will provide grants to local governments to establish and operate drug court programs, including juvenile drug courts, that provide judicial supervision over nonviolent offenders with substance abuse problems. Drug court programs typically include mandatory, periodic drug testing; substance abuse treatment; diversion, probation, and other types of supervised release; and offender management and aftercare

services. In addition, NIJ will continue to fund research to evaluate the effectiveness of drug court programs.

Support Community Efforts To Prevent Substance Abuse and Help Youth Resist Pressure To Use Drugs

The HHS Center for Substance Abuse Prevention (CSAP) will provide Federal leadership in promoting the development of comprehensive, long-range, multidisciplinary, communitywide programs to address alcohol and other drug use prevention through the Community Partnership demonstration program. This program supports the development of coalitions or partnerships comprising public and private organizations, agencies, and institutions to identify the needs and service gaps in each community, to establish priorities, to coordinate new and established prevention programs in the community, and to help public and private organizations promote and support drug abuse prevention programs.

CSAP will also support the High-Risk Youth Demonstration Program,⁶¹ which seeks to counteract factors that place a child at risk for using alcohol, tobacco, or illegal drugs. Projects funded through this initiative will focus on three specific areas:

- Decreasing the incidence and prevalence of alcohol and other drug use among high-risk youth.
- Identifying and reducing factors in the individual, parents, extended family, school, peer group, and neighborhoods that place youth at risk for using alcohol and other drugs.

- Increasing youth resiliency as a way to counter peer pressure to use alcohol and other drugs.

CSAP will disseminate a directory of Federal programs that make grants to States, communities, and private agencies for drug abuse prevention and intervention activities. The directory describes the Federal grantmaking process, provides a catalog of applicable Federal grants and other funding programs, and includes information on additional Federal and private resources. The appendixes contain the most current State-by-State information on Federal formula grants and housing authority grants and list High-Intensity Drug Trafficking Area program coordinators and State points of contact for drug-related programs.

ONDCP will promote Federal agency partnerships with State, community, and national substance abuse prevention organizations to establish a united front against drug abuse.

Advance Technological Interventions To Reduce Gun Violence

Through its Science and Technology Division, NIJ is working to identify technologies to aid law enforcement in preventing the illegal acquisition and use of firearms. NIJ will continue to fund demonstration projects to assist in designing guns that are harder to conceal and have trigger safeties, fingerprint identification, and loading indicators.

ATF will explore and expand the investigative application of canines in firearms detection. This application was discovered as a result of training methodologies and protocols designed and

developed by ATF for canines in explosives detection. ATF has instituted a program that uses its own canine team to detect explosives or firearms, recover evidence, and present demonstrations. Efforts are also under way to make this program available to State and local law enforcement.

NIJ will support the publication of *Smart Gun Technology Requirements: A Preliminary Report*. The primary purpose of the report is to state the requirements for a smart gun technology that would limit the use of firearms to authorized users. The secondary purpose of the report is technology transfer. For this report, Sandia National Laboratories has collected information from law enforcement agencies, firearm manufacturers, and others. In addition, NIJ will sponsor technology development to create a concealed weapon detection system.

Suggestions for State and Local Action

- Seize firearms from juvenile offenders in school and ensure that firearms information is submitted to ATF for tracing.
- Develop appropriate intervention programs for youth who bring guns to schools.
- Develop a broad-based, multi-disciplinary strategy to inform youth about the dangers of using firearms, prevent them from illegally possessing firearms, and rigorously enforce existing firearms laws as they relate to youth.
- Review existing State firearms statutes in light of the Youth Handgun Safety Act and DOJ's Model Code, and make appropri-

ate revisions to eliminate illegal handgun possession and use by youth.

- Initiate interagency law enforcement efforts to develop comprehensive gun prevention, intervention, and suppression strategies such as gun buy-back programs.
- Involve youth in planning and implementing youth-focused community oriented policing programs.
- Consider using juvenile curfew laws and related programs as one element of a comprehensive approach to reducing juvenile violence and victimization.
- Promote community-based collaborative efforts to assess community gun, gang, and drug problems; develop appropriate suppression, intervention, and prevention strategies; and mobilize community resources.
- Establish juvenile drug courts or sessions as a community resource to address youth substance abuse.
- Establish, support, and enforce drug-free and gun-free zones.
- Teach youth about the dangers of drug and alcohol abuse and help youth develop positive social skills.

4. Provide Opportunities for Children and Youth

Overview

What future do children envision for themselves? What opportunities are presented to them as they grow up? Many children grow up amid poverty, violence, and illness. They see their families, friends, and communities suffering from the effects of alcoholism, unemployment, incarceration, AIDS, or a lack of educational opportunities. Many children, however, are resilient and manage to succeed despite a negative environment. Although not all children are faced with adverse circumstances, our Nation's well-being requires that every child in every community be guaranteed the opportunity to reach his or her full potential.

Providing children with the opportunity to develop positive behaviors is the foundation of most efforts to prevent youth crime and violence. For nearly three decades, educators, policymakers, and criminal justice professionals have sought effective crime prevention strategies. Although some communities are experiencing success, the country is plagued with escalating juvenile violence, which has compelled policymakers to turn their attention from prevention to "get tough" approaches. But we know now what works. Effective strategies include comprehensive approaches that provide opportunities for education, mentoring, conflict resolution training, and safety;

engage youth and their families; and are community-based and integrated.¹

This section of the *Action Plan* emphasizes the importance of enhancing delinquency prevention efforts and coordinating them throughout the community. It focuses on what we know about factors that put youth at risk of becoming delinquent or serious and violent offenders as well as those that protect youth. It encourages communities to take steps to reduce characteristics that contribute to delinquency while strengthening characteristics that nurture youth. This section emphasizes the importance of truancy reduction and safe school programs and illustrates the Coordinating Council's strong support of youth involvement in community crime and violence prevention strategies. The section concludes that positive youth skill building, through mentoring, conflict resolution, and community service, can work to prevent or reduce juvenile delinquency and serious juvenile violence, especially when coordinated with broader communitywide efforts.

Current Status and Analysis of the Problem

Most adolescents are on a healthy path to productive adult lives. There is evidence, however, that

25 percent of adolescents are at significant risk of veering off that path because they frequently engage in behaviors with negative consequences, such as alcohol or other drug abuse, unprotected sexual activity, delinquency, or violence. Another 25 percent of adolescents, who engage in fewer of these behaviors, are at moderate risk.²

A 1992 study conducted by the Carnegie Foundation determined that only 60 percent of an adolescent's nonsleeping time is taken up by school, homework, chores, meals, or employment. Many adolescents spend the remaining 40 percent of their nonsleeping time alone, with peers without adult supervision, or with adults who might negatively influence their behavior.³ A recent study found that 27 percent of eighth graders spent 2 or more hours alone after school and that low-income youth were more likely than others to be home alone for 3 or more hours.⁴ It is not surprising, therefore, that most violent crimes committed by juveniles take place at the close of the school day, when fewer opportunities for constructive activities are available. (See figure 11.)

In recent years, the capacity of America's low-income rural and urban communities to provide critical positive activities or environments has declined. Public schools in many areas have

Figure 11: Violent crime occurrence times

When do juvenile and adult offenders commit violent crimes?

- Violent crimes committed by juveniles peak after the close of the school day and decline throughout the evening hours.
- In contrast with juveniles, the number of violent crimes committed by adults increases from early morning through midnight.
- The time profiles of when juveniles commit violent crimes and when juveniles are the victims of violent crime are similar.

Note: Data are from the State of South Carolina.

Data Source: FBI. 1993. National incident-based reporting system 1991 and 1992 [machine-readable data files].

deteriorated, and the quality of public education has been compromised. City parks and recreation centers are in disrepair, and financial support for youth facilities and programs has decreased,⁵ leaving high-risk environments for youth.

The demand for an immediate solution to this problem, which commands considerable public attention, has been compounded by a historical impatience with prevention strategies in which

results may be long in coming and benefits—that is, crimes not committed—are extremely difficult to measure. The good news, however, is that three decades of seeking effective prevention strategies finally have netted results.

The public health model has been particularly useful in developing a strong scientific process and assessment of prevention activities. (See figure 12 for a public health model for prevention.)

Risk Factors for Delinquency

Some youth lack healthy parental guidance and monitoring. Some youth have cognitive and psychological deficits that make social and academic success difficult. Some attend disorganized and disruptive schools and fail to engage in academic pursuits. Some live in chaotic neighborhoods with few resources or outlets for positive social activities. Some are excluded from prosocial peer groups and have few, if any, wholesome friends.

These risk factors, particularly when several are present, increase the likelihood of delinquency and violence. Conditions such as maltreatment or neglect by family members and others, a community with a large population of delinquent juveniles and gangs, ready access to drugs and guns, and an unsafe school increase the chance that a youth will make unhealthy or unlawful choices.

The study of Causes and Correlates of Delinquency, sponsored by the Office of Juvenile Justice and Delinquency Prevention (OJJDP),⁶ found the influence of peers and parents to be strong risk factors in the causes of delinquency. (See figure 13.)

Protective Factors

Some youth who experience child abuse, neglect, poverty, poor health, or other risk factors do not become juvenile delinquents, school dropouts, or teenage parents. These youth have the benefit of a combination of protective factors that help guide them in making healthy choices.

A resilient temperament and the development of close relationships with parents and other role models who provide encouragement, healthy beliefs, and clear standards of behavior offer protection from

negative environmental influences.⁷ In general, healthy youth have resources in their families and communities that help them control their behavior and provide them with the skills and opportunities to be successful. Often referred to as protective factors, these resources reduce the chance that youth will become involved in serious delinquency.

Prevention strategies seek to reduce existing risk factors and provide protective factors that are missing from a youth's environment. In many ways, prevention strategies attempt to provide for at-risk children what effective parents and communities provide in the natural course of youth development. The most effective prevention strategies

attend to family and community deficits over a sustained period of time.

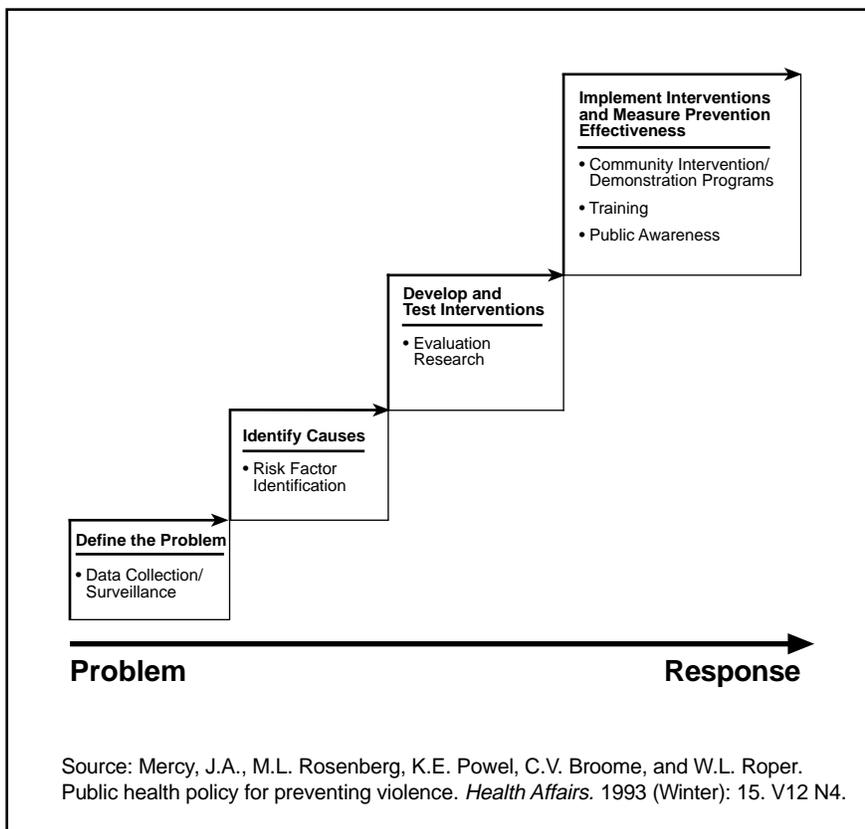

The Social Development Strategy suggests that opportunities, skills, and recognition lead to healthy behaviors. (See figure 14.) The underlying theme of this strategy is to reduce risk factors and increase protective factors in the lives of at-risk children. The identification of risk factors and protective factors has been an important step in prevention, assisting educators and practitioners in developing more effective programs for youth.

Experts studying the impact of cultural influences on youth believe that conditions such as poverty, unemployment, discrimination,

poor health, poor education, and despair lay the foundation for alcohol and other drug-related problems. These conditions must be alleviated. Risk factor research has become more comprehensive and now includes the following domains: individual, family, school, peer group, and community. Protective factor research, however, has primarily identified strategies that focus on the individual. Although it is important to focus on increasing skills or abilities of the individual, it is equally imperative to focus on changing and improving social systems that create these conditions. The following elements increase the likelihood of successful change:

- Protective factors in the family, including having *parents* who demonstrate love and caring for their children, who are involved in their children's activities, and who monitor and supervise their children's behaviors. Other family-oriented protective factors include family stability and adequate financial resources.
- Positive *personal attributes* such as intelligence, a steady disposition, social skills (including the ability to solve problems without resorting to violence), and a conventional belief system.
- *Schools* that positively shape behavior of young children and teenagers due to strong policies on violence and drugs. Teachers who care about students and demonstrate concern for their students' social and academic growth also help to ensure successful development. When youth are prepared for school, succeed in school, and are committed to the education system, they are less likely to become delinquents.

Figure 12: Public health model for prevention

Source: Mercy, J.A., M.L. Rosenberg, K.E. Powel, C.V. Broome, and W.L. Roper. Public health policy for preventing violence. *Health Affairs*. 1993 (Winter): 15. V12 N4.

- **Communities** that provide opportunities and social controls. Communities that exhibit a high level of organization and cooperation, with neighbors working together to meet common objectives, channel youth behavior toward positive outcomes. For example, communities with active PTA's, afterschool activities, churches and religious organizations, and youth social clubs help to protect youth from the temptations and hazards that exist in society.
- **Youth participation** in and acceptance by prosocial peer groups.

Peer influence is particularly important during adolescence.

- **Adult supervision** of and involvement in youth peer group activities, to provide added protection against developing delinquent behavior.

Cumulative Impact of Protective Factors

Healthy growth and development are most likely to occur when protective factors are sustained throughout these areas of influence. A nurturing family, positive friendships, a good education, and career

opportunities combine as important factors to ensure positive outcomes for youth, not only in preventing delinquency but also in preventing substance abuse, violent behavior, teenage pregnancy, and school dropout. Parents should attempt to provide their children with this constellation of protective factors continuously over the course of their development.

Comprehensive Delinquency Prevention

The best delinquency prevention strategies are comprehensive, reducing risk and developing protective factors in each child and in families, schools, communities, and peers. Researchers have found that collective strategies with multiple protective programs, rather than those that address single risk factors, have a sizable impact on reducing delinquency.⁸ Activities that take place under one roof in the community and that reflect the cultural values of participants are more likely to engage the individuals they are meant to serve. This means that to effectively reduce youth violence, strategies must engage the entire spectrum of systems and individuals impacting a young person's life.

Serious delinquency and youth violence are most likely to occur in youth exposed to multiple risk factors, multiple deficits of protective factors, and multiple concurrent problem behaviors. Consequently, prevention strategies need to deal simultaneously with a host of problems and require comprehensive strategies. Moreover, because risk factors and concurrent problem behaviors tend to interact with one another, it is important that prevention strategies deal with all of these factors in an integrated fashion. This recommendation is consistent with what we know about resilient

Figure 13: Influence of parents and peers on delinquency

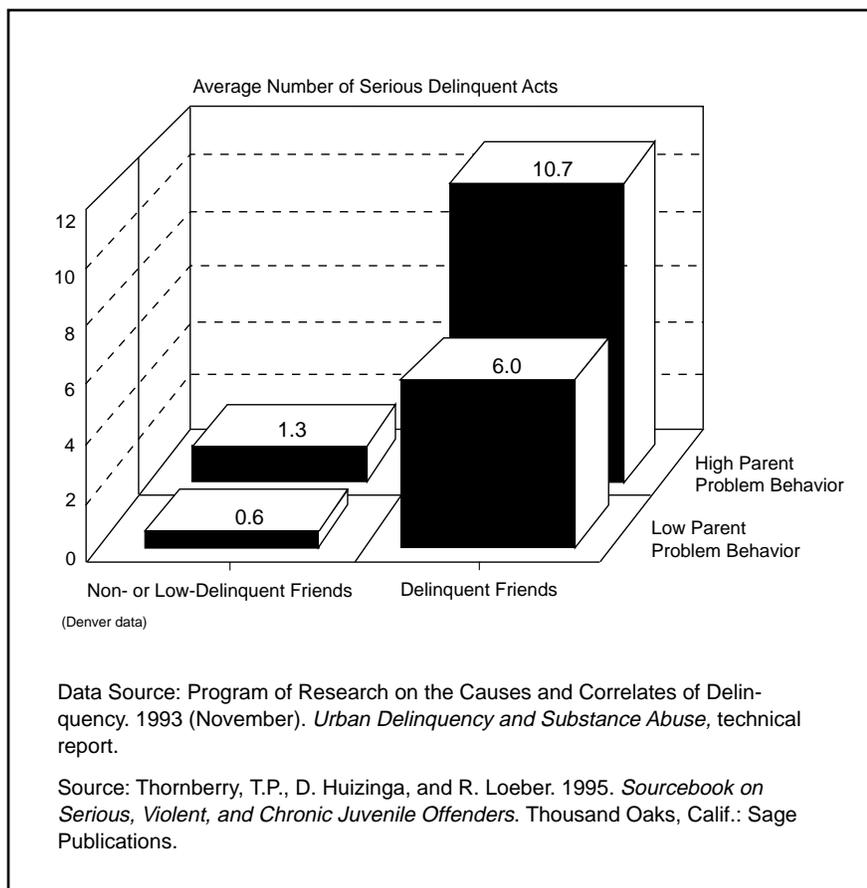

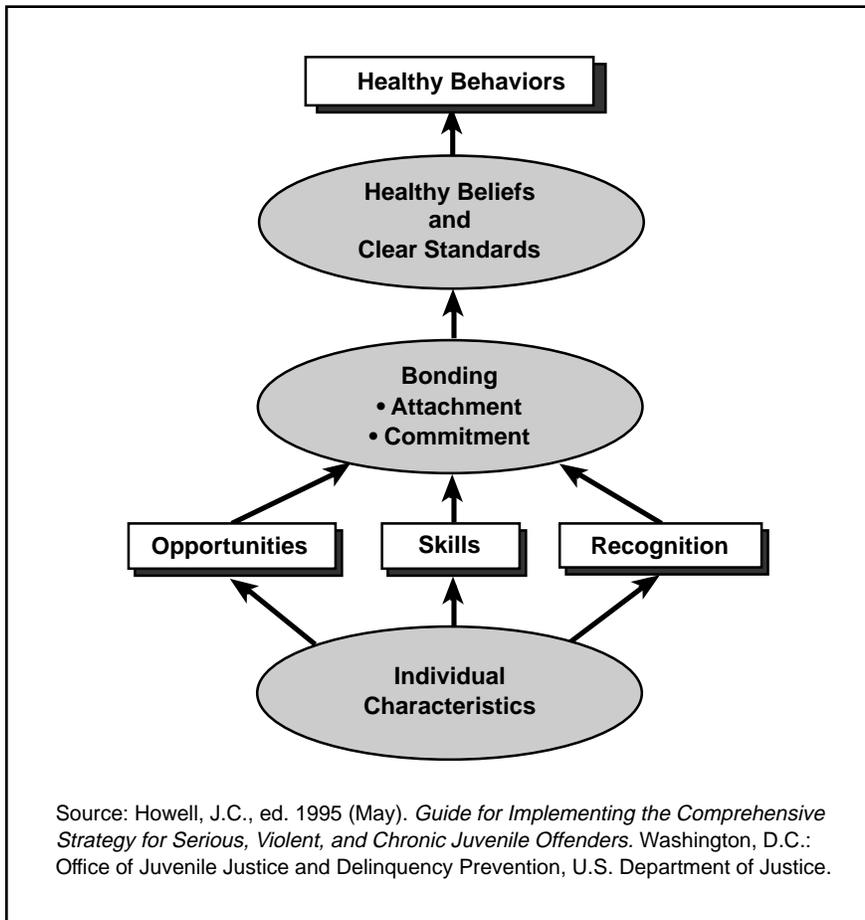

Figure 14: Social development strategy

youth. Even high-risk youth can avoid involvement in delinquency if they experience many protective factors.⁹

Improving education and youth employment opportunities, enhancing social skills, and providing youth with mentors and adult role models are essential components of delinquency prevention. Three decades of research indicate that increased opportunities for success, meaningful activities, positive role models, consistent moral standards, and viable educational and

employment opportunities have a prominent place in the Nation's crime control strategy.

Decades of research also demonstrate that delinquency prevention is cost effective. According to one conservative estimate, the average cost of incarcerating a juvenile for 1 year is close to \$34,000.¹⁰ Others put the figure between \$35,000 and \$64,000.¹¹ In addition, the total cost of a young adult's (ages 18 to 23) serious, violent criminal career is estimated to be \$1.1 million.¹² In contrast, the current cost of Head

Start's intervention program, which is effective in developing school readiness skills among high-risk children and reduction in later delinquency, is \$4,300 per year per child. Similarly, a delinquency prevention program in California produced a direct savings to law enforcement and the juvenile justice system of \$1.40 for every \$1 spent on prevention.¹³

Effective and Promising Strategies and Programs

Delinquency Prevention Works

We know that there are effective programs that reduce delinquency and show promise for stemming the rising tide of delinquency and youth violence. Materials on this research published by OJJDP and others summarize much of the treatment and evaluation literature and identify model programs that are worthy of replication. Among the best of these reports are those of Lipsey,¹⁴ Tolan and Guerra,¹⁵ Howell,¹⁶ Thornberry,¹⁷ and Mendel.¹⁸

Truancy Reduction

Too many of America's young people attend school on an irregular basis, resulting in their failure to gain a solid foundation of basic academic skills. These young people have not yet officially dropped out of school and they are not on an extended absence due to illness. They are truants—at risk of academic failure and dropping out of school at age 16, or earlier, and never obtaining the skills necessary to become contributing members of society. Truancy has been rated among the top 10 problems facing

schools, with the daily absentee rate as high as 30 percent in some cities. As a number of studies have documented,¹⁹ high rates of truancy are linked to high daytime burglary rates and vandalism. Truancy is not a problem restricted to the education and law enforcement communities. It has an even more important impact on the truant's ability to learn, develop interpersonal relationships, and ultimately complete school and gain the knowledge and skills necessary for higher education and/or future employment. In order to comprehensively address the truancy problem, a range of interested parties must join together to coordinate a response. These parties include schools, law enforcement agencies, parents, businesses, judicial and social services agencies, and community and youth organizations.

Communities have a responsibility to provide an appropriate education for all youth in a disciplined, safe, and secure environment. Yet school systems are frequently presented with students who have specific instructional and/or social problems that make it difficult to achieve in the regular school environment with a traditional curriculum. A host of problems from the home and the community emerge in the classroom and require special handling. Teachers may observe signs of hunger, child abuse, neglect, alcohol or other drug abuse, learning disabilities, developmental problems, socialization problems, behavior disorders, gang involvement, and a general lack of school readiness.

In order to provide prevention and early intervention for youth at risk of truancy, as well as youth who are truant, the school system needs

the active support and participation of parents, students, the community, law enforcement, and businesses. A number of jurisdictions across the country have truancy prevention and intervention programs that are collaborative initiatives, and they are listed in the National School Safety Center publication *Increasing Student Attendance*.²⁰ In addition, the National Council of Juvenile and Family Court Judges' (NCJFCJ) report, *A New Approach to Runaway, Truant, Substance Abusing and Beyond Control Children*,²¹ describes innovative processes and approaches that individual communities might adopt to more adequately address this population of youth. NCJFCJ has also updated its *Disposition Resource Manual*²² that informs judges and juvenile court personnel about various programs that hold promise or have proven positive results. Within the *Manual*, several programs are provided that address the problem of truancy.

Truancy reduction programs are having positive effects on both school attendance and juvenile crime. A truancy reduction program in the Oklahoma City public school system reported a steady decline in the dropout rate from 5.9 percent to 4.1 percent during the 1991–92 school year.²³ The Truancy Habits Reduced, Increasing Valuable Education (THRIVE) program is a partnership between the school system and law enforcement to reduce truancy and crime during school hours. Law enforcement officers bring in juveniles who are out of school without an excuse and notify parents who must pick up their children. If parents cannot be located, juveniles are sent to the Oklahoma County Youth Services Agency until they can be picked up.

Another truancy prevention program impacting elementary and middle school attendance and disciplinary referrals is Self Enhancement, Inc. (SEI) of Portland, OR. SEI is a community-based organization that began in 1981 and has served more than 12,000 inner-city school students. The program offers classroom instruction, extracurricular activities, cultural enrichment, career counseling, and summer outreach for 450 high-risk children every year. SEI staff work with participants in their schools, provide tutoring, encourage academic excellence, and respond to crises in the school.

In addition, SEI sponsors field trips, sporting activities, and afterschool supervision. A key component of the program is for staff to work with families and help parents become more active in preventing truancy. In 1994, SEI participants had improved school attendance and disciplinary referrals dropped dramatically. Students in elementary school raised their grades by 47 percent and middle school students by 70 percent.²⁴

Mentoring

Mentoring has been defined as a "sustained, close, developmental relationship between an older, more experienced individual and a younger person, with the goal of building character and competence on the part of the protégé."²⁵ Usually the relationship involves regular contact over a sustained period of time and involves mutual commitment, respect, and loyalty.

Mentoring has proved to be a valuable strategy for helping disadvantaged youth. A mentoring relationship can enrich children's lives, address the isolation of some

youth from adult contact, and provide support and advocacy for at-risk children. Research has indicated that mentoring relationships can have a positive impact on a youth's attitudes toward alcohol, tobacco, and drug use.²⁶ Other studies document the positive effects of cross-cultural mentoring.²⁷

Biggs in Blue is an innovative mentoring program developed by the Big Brothers/Big Sisters of Warren County, NJ, that matches at-risk youth with police officer mentors. They employ prevention and intervention strategies to help youngsters from chaotic home environments cope with peer pressure, succeed in school, receive career guidance, and make sound life choices. Evaluations completed by parents, volunteers, and youth indicate reductions in delinquency and court involvement and improvement in school attendance, behavior, and grades.²⁸

Robert Taylor Homes in Chicago, IL, the largest public housing development in the country, has implemented a Mentoring and Rites of Passage program designed to assist adolescents in their transition to adulthood. Mentors meet with groups of 10 to 15 youths of similar ages at least twice a week and address such areas as self-concept, sexual identity and awareness, communications and decisionmaking, and cultural heritage appreciation. Evaluations of participants are conducted every 6 months to track their interpretation of standard social interactions and situations, self-reported violent behavior and self concept, hospital visits related to violence, and calls to the police about violent events in the housing project.

Conflict Resolution

Conflict resolution encompasses creative problemsolving strategies in which parties in dispute collaborate by expressing their points of view, voicing their interests, and finding mutually acceptable solutions. Conflict resolution programs recognize that conflict is natural and that people can learn new skills to deal with conflict in appropriate, nonviolent ways. The programs appear to be most effective when they are comprehensive and involve multiple components such as moral reasoning, anger control, social skills development, and collaborative problemsolving methods.

William DeJong, a lecturer at the Harvard School of Public Health, reports in the 1994 fall issue of *School Safety*: "The best school-based violence prevention programs seek to do more than reach the individual child. They instead try to change the total school environment, to create a safe community that lives by a credo of nonviolence and multicultural appreciation."²⁹ Effective conflict resolution programs achieve the following goals:

- Enable children to respond nonviolently to conflict, using the conflict resolution strategies of negotiation, mediation, and group problemsolving.
- Develop educators' competence to manage behavior in school without coercion, using a program that teaches students responsibility and self-discipline.
- Mobilize community involvement in violence prevention through education programs and services, such as expanding

the role of youth as effective citizens beyond the school into the community.

Conflict resolution programs in schools generally fall into one of three models: mediation, curriculum integration, or peaceable schools. The peaceable schools model synthesizes the elements of the first two models.

Recognizing the importance of directly involving youth in conflict resolution, many school communities are employing peer mediation as a violence prevention strategy. In these programs, specially trained student mediators work with their peers to find resolutions to conflicts. Mediation programs reduce the use of traditional disciplinary actions such as suspension, detention, and expulsion; encourage effective problemsolving; decrease the need for teacher involvement in student conflicts; and improve school climate.

An example of a mediation program is We Can Work It Out, developed by the National Institute for Citizen Education in the Law and the National Crime Prevention Council. The program promotes mediation, negotiation, or other nonlitigating methods as strategies to settle unresolved confrontations and fighting. The program emphasizes the importance of showing students that many of the problems that are often taken to court might be solved more effectively through cooperative methods, such as peer mediation.

In the curriculum integration approach, teachers deliver daily lessons in conflict resolution, infuse conflict resolution concepts and skills into core curriculum areas,

and model effective conflict resolution in their management of the classroom. Promoting Alternative Thinking Strategies (PATHS) is a curriculum integration approach to conflict resolution for children from kindergarten through sixth grade. It is designed to enhance the social competence and understanding of elementary school children and to facilitate educational processes such as self-control, emotional awareness, and interpersonal problemsolving skills that are integrated into the curriculum. An evaluation of PATHS shows that the program is effective for both low- and high-risk children in increasing management and understanding of emotional experiences.³⁰

Peaceable school programs seek to create schools in which conflict resolution has been integrated at every level. Ultimately, conflict resolution skills are adopted by every member of the school community, creating a school climate that encourages caring, honesty, cooperation, and appreciation for diversity. Peaceable school programs incorporate conflict resolution skills and noncoercive school and classroom management strategies directly into the classroom curriculum. Peaceable schools challenge youth and adults to believe and act on the understanding that a non-violent, diverse society is a realistic goal.

In schools in New York and other cities, the Resolving Conflict Creatively Program (RCCP) is implemented as a peaceable schools model of conflict resolution. The RCCP approach requires schools to participate in the curriculum for a year or more; in schools with a strong core of teachers

who regularly use the curriculum, the student mediation program may be added. The RCCP approach to conflict resolution integrates two primary components: the RCCP elementary and secondary curriculum and the RCCP student mediation program. A third component—the parent training curriculum—introduces RCCP principles into the home to send youth a consistent message from parents and teachers, who thus reinforce each other on this crucial issue.

Safe Schools and Safe Havens

Community schools and family centers provide youth with safe spaces for productive alternatives to occupy out-of-school and weekend time. They also provide a central space for integrating various promising strategies and programs, such as mentoring, conflict resolution, and employment training. These programs generally provide a range of educational, recreational, and cultural activities in a supervised environment with trained staff.

For years Boys and Girls Clubs of America have been engaged in comprehensive strategies to help their members build self-esteem, acquire honest values, and pursue productive futures. These clubs also work specifically to prevent gang involvement. Supported in part by Federal funding, the clubs have developed partnerships with corporations, private foundations, individuals, and government agencies. According to a Columbia University study, Boys and Girls Clubs have been effective in increasing rates of school attendance and improving academic performance. In addition, Clubs in public housing projects have reduced the juvenile crime rate by 13 percent.³¹

Members of the Corporation for National Service's (CNS') AmeriCorps program have established a Safe Corridors program in eight elementary schools in Philadelphia. The program is designed to ensure the safe passage of youth to and from school by using 80 parent volunteers who patrol the streets around the schools in the mornings and afternoons. The volunteers design the program structure, uniforms, and policies, and are responsible for recruiting other parents to carry out the program. The Safe Corridors program has been so successful in increasing safety that the city is offering it as a model for statewide implementation.

In Seattle, WA, AmeriCorps members staff 7 Safe Haven sites that provide an opportunity for 1,000 at-risk youth to participate in workshops, tutoring and mentoring programs, and conflict resolution sessions. The programs are designed to increase self-esteem, provide educational opportunities, and reduce violent behavior.

National and Community Service Opportunities

CNS, established in 1993 to engage citizens of all ages and backgrounds in community service, operates AmeriCorps and Learn and Serve America. AmeriCorps participants provide a year or two of public service in exchange for education awards to finance college or other educational training or to pay back student loans. Volunteers have helped elementary school students improve their reading skills and scores in Kentucky, patrolled recreation areas in New York City, assisted law enforcement and community members in closing crack houses in Kansas City, and helped

residents recover from natural disasters in California and the Midwest.

Through the Learn and Serve America program, school-age youth serve their communities by teaching younger students about violence prevention; designing crime prevention and public safety exhibits for local fairs; helping other youth to combat negative peer pressure; eliminating graffiti in their communities; establishing Junior Neighborhood Watch programs; and helping to identify physical problems in the community, such as broken lighting, overgrown foliage that blocks clear views of public places, and run-down parks.

One example of an effective community-building program is the Teens as Resources Against Drugs (TARAD) project, funded by the Bureau of Justice Assistance. This youth-led prevention program combats delinquency by inspiring teens to fight drug activity in their communities. Teens in New York City, Evansville, IN, and three South Carolina communities led the way in their schools and neighborhoods by creating anti-drug messages on murals; disseminating accurate facts about drugs and teaching their peers healthy life choices; writing, choreographing, and producing plays and puppet shows dramatizing the dangers of drug use; and organizing community events such as fairs and substance-free New Year's Eve parties. The teens report positive attitude changes about drug use among their peers. Another measure of success is that local agencies, groups, and organizations have assumed funding of most of the programs.³²

Federal Action Steps

Launch an Initiative To Address the Problem of Youth Outside the Educational Mainstream

The Department of Justice (DOJ) and the Department of Education (ED) will implement a joint initiative directed at youth who are in danger of leaving or who have left the educational mainstream. The initiative will heighten public awareness of this increasing problem and identify effective and promising programs that are finding solutions. It will provide assistance to selected jurisdictions and sites to develop or enhance programs for youth outside the educational mainstream, including youth who are truant, dropouts, afraid to go to school, suspended, or expelled (for example, for weapon possession), or need to be reintegrated into the mainstream from the juvenile justice system.

To help achieve the goals and objectives of this initiative, 4 regional forums and 10 training and technical assistance programs will be held to address the needs of these youth. One component will be a partnership between schools, law enforcement, and juvenile and family court judges. Collaborative efforts will focus on prevention, early intervention, and supportive services.

Provide Mentoring Opportunities for Youth

OJJDP will provide programmatic support, technical assistance, and training to 41 mentoring programs, funded under the Juvenile Mentoring Program (JUMP).

The Interagency Council on Mentoring, which includes representatives from the Domestic Policy Council; the Departments of Health and Human Services (HHS), Labor (DOL), Defense, Education, and Justice; and the CNS, will continue to identify existing mentoring programs, investigate research issues, and explore opportunities for collaboration. The Council is publishing a report entitled *Making the Most of Mentoring*, which summarizes current mentoring efforts and proposes a three-part mentoring strategy.

Provide Guidance on School-Based Conflict Resolution Programs

OJJDP, in partnership with ED, will publish a guide and provide training seminars to help school administrators, teachers, and other interested parties understand the concept of conflict resolution and its usefulness in preventing violence and teaching positive life skills. The guide will be a tool for schools and communities to use in their strategic planning for implementing effective conflict resolution programs that meet their specific needs. By answering typical questions asked about conflict resolution, the guide will give readers a description of the essential elements of effective school-based conflict resolution programs, as well as information useful for establishing and sustaining conflict resolution programs in their schools. Six case studies incorporating models of peer mediation, curriculum integration, and peaceable schools will be included in the guide. Other helpful features include annotated lists of conflict resolution programs, resources, and trainers with contact information.

Increase School Safety To Improve Opportunities for Learning

Federal reforms such as the reauthorization of the Elementary and Secondary Education Act (ESEA), Educate America: Goals 2000, and School to Work Transition are first steps in addressing the crisis facing our public school system. Title I, Part A of ESEA provides grants to States to support standards-based educational reform and improve the ability of schools to help educationally disadvantaged children. Before these improvements can be effective, however, students must be assured that they can learn in a safe environment.

ED's Safe and Drug-Free Schools Program (SDFSP) was established in 1994 to provide a comprehensive, coordinated approach to prevention of school violence and alcohol, tobacco, and drug use by young people. SDFSP administers State formula grant and discretionary grant programs and also provides technical assistance to schools in the development of comprehensive programs to prevent violence and drug use.

The National Institute of Justice (NIJ) will provide funding to assess the effectiveness of the organizational structure and operation of a variety of these programs nationwide. This assessment will try to determine how school-based drug prevention programs, such as Drug Awareness Resistance Education (DARE), can be tailored to better meet the needs of specific populations. The study will also recommend new structures and operations to improve and expand DARE and other existing drug prevention education programs.

NIJ will also do the following:

- Fund evaluations of school-based programs aimed at reducing youth violence and promoting school safety.
- Support a study of juveniles who have been involved in school violence in an attempt to clarify the dynamics leading to violence. The information gathered from this study will be used to design and implement a school curriculum that better addresses those dynamics.
- Explore risk factors that contribute to delinquency (relationships among school discipline and control practices, behavior problems, in-school victimization, and school location) and school crime. This will be accomplished through analysis of information from interviews of students, teachers, and principals.

HHS has provided funds through the Community Schools/FACES grant programs to support the development or expansion of programs that are designed to improve the academic and social development of at-risk students at selected public schools in eligible communities. Activities in these schools include homework assistance and afterschool activities, such as educational, social, and athletic programs; nutrition services; mentoring programs; family counseling; and parenting programs.

To assist in ensuring the safety of these and other sites, OJJDP will support the National School Safety Center in providing training and information on school safety techniques through the School Administrators for Effective Police,

Prosecution, and Probations Operations Leading to Improved Children and Youth Services (SAFE POLICY) program. This program addresses the problem of increased serious juvenile violence in schools. A team of school personnel develops strategies for sharing information and improving school safety, as well as supervision, control, and delinquency prevention.

Provide Youth With Activities That Encourage Positive Youth Development

To ensure that resource and family centers can implement programs, the Department of Housing and Urban Development's (HUD's) National Youth Sports Grants will provide funds for positive alternative activities for at-risk youth, including sports, recreational, cultural, and educational programs. This grant program is a vehicle for youth to develop leadership skills, gain self-esteem, learn the value of teamwork, and exercise self-empowerment in a positive and drug-free environment.

OJJDP's Pathways to Success will promote business, entrepreneurial, educational, recreational, and job skills, as well as arts programs for afterschool and weekend hours. In addition, OJJDP's grant with the Academy for Educational Development will support the development of a curriculum that trains youth workers to apply a youth development approach.

Provide Training and Opportunities for Youth Employment

HUD will continue to fund the YouthBuild program, which works with AmeriCorps to help disadvantaged young adults who have

dropped out of high school obtain employment and education skills that will help them achieve economic self-sufficiency.

To encourage the involvement, investment, and participation of educators, businesses, students, and parents, DOL's School-to-Work Opportunities Initiative will integrate a career employment, education, and learning program. The program will be geared to all youth to prepare them for the highly technological and rapidly evolving workplace. The link between unemployment and lack of opportunities and delinquency is strong, and a national commitment to this issue is critical. DOL administers the Job Corps to address the multiple barriers to employment faced by disadvantaged youth. Job Corps, which serves about 60,000 youth each year, provides a comprehensive mix of coordinated and integrated services in one facility. These services assist young adults to become more responsible, employable, and productive citizens.

The Department of the Interior and OJJDP will jointly sponsor the Youth Environmental Services (YES) program. The purpose of the YES program is twofold:

- To increase the capacity of States and communities to correct, treat, and rehabilitate adjudicated delinquents.
- To prevent at-risk youth from entering the juvenile justice system by implementing environmental work programs on federally owned land.

In addition, OJJDP will explore opportunities to include high-risk and juvenile court-involved youth in employment and training programs.

Establish and Support Family-Based Community Centers That Integrate Service Delivery Through a Range of Promising Prevention Programs

HHS will continue to fund community-based family resource programs to help States develop and implement, or expand and enhance, comprehensive statewide systems of family resource services. These services will be provided through innovative funding mechanisms and collaboration with existing education, vocation, rehabilitation, health, mental health, employment and training, child welfare, and other social service agencies. The goal will be to reduce barriers to the delivery of high-quality, community-based services for families, with an emphasis on interagency collaboration, service integration, public and private partnerships, interdisciplinary governance of lead agencies, and full partnership between families and professionals.

HUD awards grants to public housing authorities to provide families and youth with better access to education and employment opportunities. The objective is to help these individuals achieve economic self-sufficiency, improve their quality of life and, ultimately, decrease drug and crime problems. In 1995, \$10 million was made available to support the Family Investment Centers and Youth Development initiative sites that are providing youth-related activities and services such as training and assistance in obtaining General Equivalency Diplomas (GED's) and entrepreneurship skills.

NIJ will continue to support an evaluation of the Boys and Girls Clubs program in public housing.

Provide Opportunities for Youth To Serve Their Communities

CNS will continue to establish full- and part-time community service programs such as AmeriCorps and Learn and Serve America, which involve individuals of all ages in violence reduction initiatives and other public service activities. These include school-based initiatives for kindergarten through 12th grade and higher education programs that make service an integral part of college education.

OJJDP will continue to support Teens, Crime, and the Community, a program conducted by the National Crime Prevention Council and the National Institute for Citizen Education in the Law, that seeks to direct the energies of young people toward constructive activities designed to reduce crime and violence.

All Federal agencies administering programs that address the problem of juvenile violence will encourage communities to include youth in the planning and implementation of their programs.

Coordinate Federal Crime Prevention Programs

There is a substantial need to coordinate Federal programs that are designed to prevent and intervene in specific youth problems, improve the environments in which youth live, and foster the overall positive development of youth. The President's Crime Prevention Council, created by the 1994 Violent Crime Control and Law Enforcement Act, has published and disseminated a delinquency prevention catalog that highlights major Federal programs and offers

guidance for communities seeking to plan and implement comprehensive crime prevention strategies. Over the next year, the Prevention Council will work to identify ways to coordinate and integrate existing Federal prevention programs to ensure better collaboration and to maximize their impact on communities.

Suggestions for State and Local Action

- Establish and enhance programs that bring together teachers, school administrators, social service providers, police, juvenile justice practitioners, and citizens.
- Develop partnerships between parks and recreation agencies, libraries, public housing agencies, community centers, and gymnasiums to furnish safe sites for positive activities for youth.
- Advocate volunteerism for mentoring and tutoring programs.
- Develop safe passage community patrols to ensure that youth get to and from school safely.
- Invite parents, law enforcement officers, business leaders, and others into school buildings to provide additional supervision and positive role models.
- Provide students with the skills and knowledge necessary to manage their behavior and resolve conflicts in a nonviolent manner.

- Implement developmentally appropriate conflict resolution programs for students at all grade levels.
- Expand existing programs to include artistic and cultural activities, and implement activities designed to promote the values of individual and civic responsibility.
- Implement national service initiatives at the local level to provide youth with opportunities to serve their communities.
- Review and modify personnel policies in the private sector to encourage employees to serve as community volunteers with youth.
- Increase funding for youth employment and training programs.
- Review allocation of funding to ensure equitable distribution of resources for delinquency prevention programs in schools.

5. Break the Cycle of Violence by Addressing Youth Victimization, Abuse, and Neglect

Overview

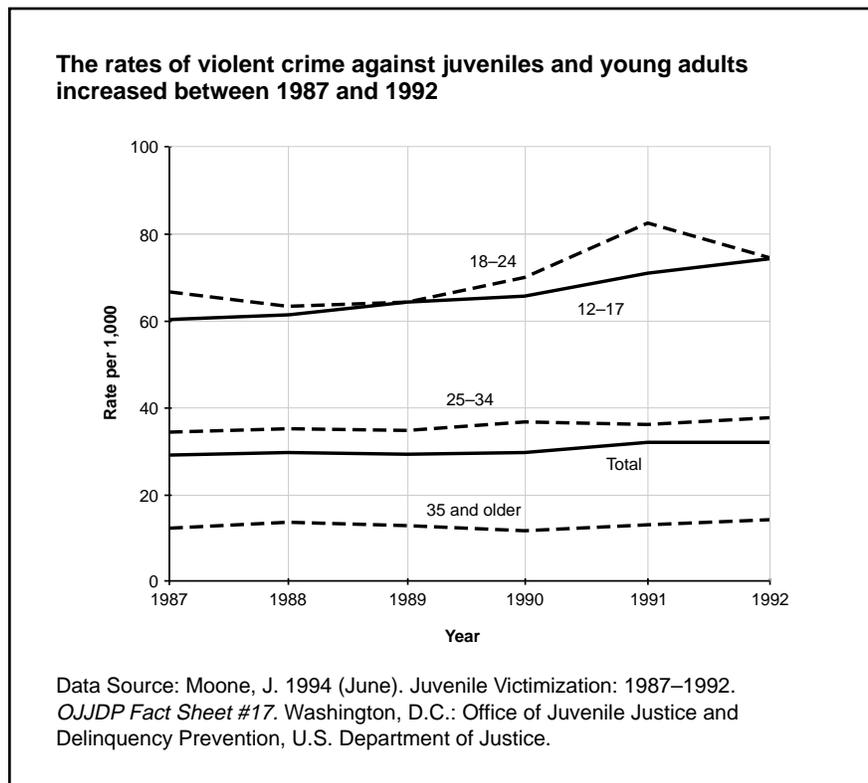

As the most vulnerable members of society, children have the right to be protected from victimization. We as a Nation must act decisively to uphold that right. Although media attention often focuses on youth who commit acts of violence, children are also increasingly becoming victims of violent crime and neglect. (See figure 15.)

This section explains how early experiences of violence not only harm children but also can lead to later violence and delinquency. It describes effective intervention strategies to break that cycle of violence, a strengthened dependency courts system that works more closely with child protective services, and improved delivery of services through unified family courts, administrative reform,

written protocols, and the use of court appointed special advocates (CASA's).

This section also examines how parents who have abused or neglected their children can learn to change their behavior and how authorities can determine when children should be removed from their homes because of the threat of abuse or neglect. Finally, it describes ways to intervene with at-risk families before abuse, neglect, or family dysfunction arise or become entrenched.

Figure 15: Violent crime victimization rates

Current Status and Analysis of the Problem

Each year, abuse and neglect leave 18,000 children permanently—often severely—disabled and inflict lifelong psychological damage on thousands of victims, siblings, and family members.¹ Figure 16 shows that neglect is the most common form of substantiated or indicated maltreatment of children.

Abuse statistics are similarly tragic. Figure 17 illustrates the increase in allegations of child maltreatment from 1980 to 1992. In 1994, public welfare agencies received reports of 3.1 million children being abused or neglected. The increasing trend in child maltreatment reports over the past decade is believed to be the result, at least in part, of a greater willingness to report suspected

Figure 16: Types of child maltreatment

Neglect is the most common form of substantiated or indicated maltreatment

Type of maltreatment	Percent of Victims
Neglect	49%
Physical abuse	23
Sexual abuse	14
Emotional maltreatment	5
Medical neglect	3
Other	9
Unknown	3

Note: Total is greater than 100 percent because victims can be in more than one category when more than one type of abuse or neglect has occurred.

Source: Snyder, H., and M. Sickmund. 1995 (August). *Juvenile Offenders and Victims: A National Report*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice.

permeated by violence. Many children are exposed to chronic violence in their homes and communities. A recent study conducted at Boston City Hospital reported that 10 percent of children seen in its primary care clinic have witnessed a shooting or stabbing before age 6. In a survey of inner-city elementary school children in New Orleans, LA, 80 percent reported witnessing acts of violence, and 60 percent had seen a dead person. Similarly, in a study of 6th, 8th, and 10th graders in New Haven, CT, 40 percent reported having witnessed at least one violent crime in the past year.⁴

The Cycle of Violence

Numerous studies demonstrate the connection between child abuse and neglect and later violent delinquent behavior.⁵ A National Institute of Justice (NIJ)-funded study found that experiencing childhood abuse and neglect increases the likelihood of arrest as a juvenile by 53 percent, of arrest as an adult by 38 percent, and of committing a violent crime by 38 percent.⁶ An Office of Juvenile Justice and Delinquency Prevention (OJJDP) study found that adolescents from families reporting multiple forms of violence are more than twice as likely as their peers from nonviolent homes to report committing violent offenses.⁷ Figure 20 shows that physical abuse and neglect can influence subsequent violent crime.

Due to the disproportionate number of neglect cases in comparison to abuse cases, youth who were neglected as children are almost as likely to be arrested for violent crimes as those who were physically abused. Consistent with this finding, of the maltreated children who were arrested for violent acts, 8 out of 10 were neglected as children.

incidents. Greater public awareness both of child maltreatment as a social problem and the resources available to respond to it are factors that contribute to increased reporting.

The U.S. Advisory Board on Child Abuse and Neglect provides national data on child victimization. (See figure 18.) In 1991, there were an estimated 2.9 million reports of child abuse and neglect involving 1.9 million children.

Each year an estimated 2,000 children—most under age 4—die at the hands of parents or caretakers, about 5 children every day. According to a 1988 Bureau of Justice Statistics study of murder cases, 4 out of 5 children under age 12 who were murdered by a parent or caretaker had been previously abused by the person who killed them.²

An analysis of police data on child victims under the age of 12 (victims not covered in the National Crime Victimization Survey) estimated that as many as 2.2 million violent victimizations—murder, rape, robbery, and assault—of children under the age of 18 occurred in 1992. The analysis also revealed that the perpetrators of violent crime against children under the age of 12 were most likely to be acquaintances of the child (54%) and family members (33%) rather than strangers (13%).³

Two years later, statistics showed similar trends. In 1994, a study revealed that children ages 5 and younger who are victims of violent crime are more likely than older juvenile victims to be victimized by a family member. (See figure 19.)

Even when children are not subjected to violence themselves, they increasingly live in a world

Structural violence—harm inflicted on individuals by social institutions or the social and physical environment—also has a major influence on children. Children living in economically deprived areas are more likely to engage in crime than other children and are more susceptible to violent and other criminal behavior.⁸

Child Protective Services and Dependency Courts

The system of child protective services (CPS) and dependency courts, which addresses family violence

and child abuse and neglect, has reached a crisis point. The complexity, seriousness, and ever-increasing volume of maltreatment cases have undercut CPS' ability to process reports of child abuse and neglect; conduct sound investigations; communicate findings to the court; provide protective supervision; arrange appropriate foster care; monitor placements; and develop thoughtful, timely, and suitable permanency planning. As a result, children frequently languish for years in a series of temporary placements, such as foster homes,

shelters, group homes, and hospitals. In one out of five cases in which maltreatment was indicated or substantiated in 1992, the child was removed from the home. More than 440,000 children were in some type of substitute care at the end of 1992—60 percent more than 10 years earlier. Recent projections estimated that 550,000 children would be in foster care by the end of 1995.⁹

Juvenile and family courts must make critical legal decisions and oversee CPS agency efforts when families refuse to cooperate with protective services or when a child must be removed from the home. However, both judicial and agency caseloads have increased dramatically. One expert has found that in many jurisdictions, the demands made on juvenile courts in neglect and abuse cases far exceed the number of judges and courtrooms to conduct the hearings.¹⁰ It is no exaggeration to refer to this situation as a crisis in many large urban courts.

This crisis arose in part from the increased demands on family courts. In the 1970's, juvenile and family courts were required only to determine whether a child had been abused or neglected and, if so, whether the child should be removed from the home and placed under court or agency supervision. State and Federal legislation, particularly the Adoption Assistance and Child Welfare Act (AACWA) of 1980,¹¹ sharply increased the scope of judicial oversight responsibilities to include ensuring that every abused and neglected child who comes before the court is placed in a safe, permanent, and stable home. The court must remain involved in a case until a child is

Figure 17: Alleged child maltreatment reports

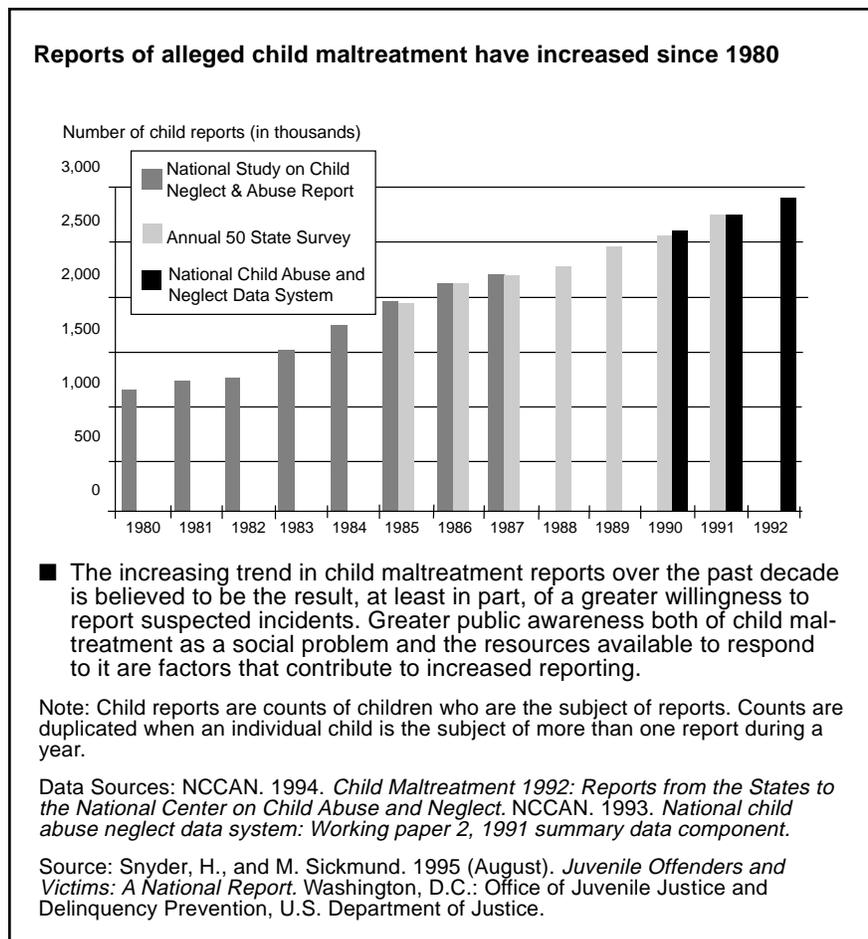

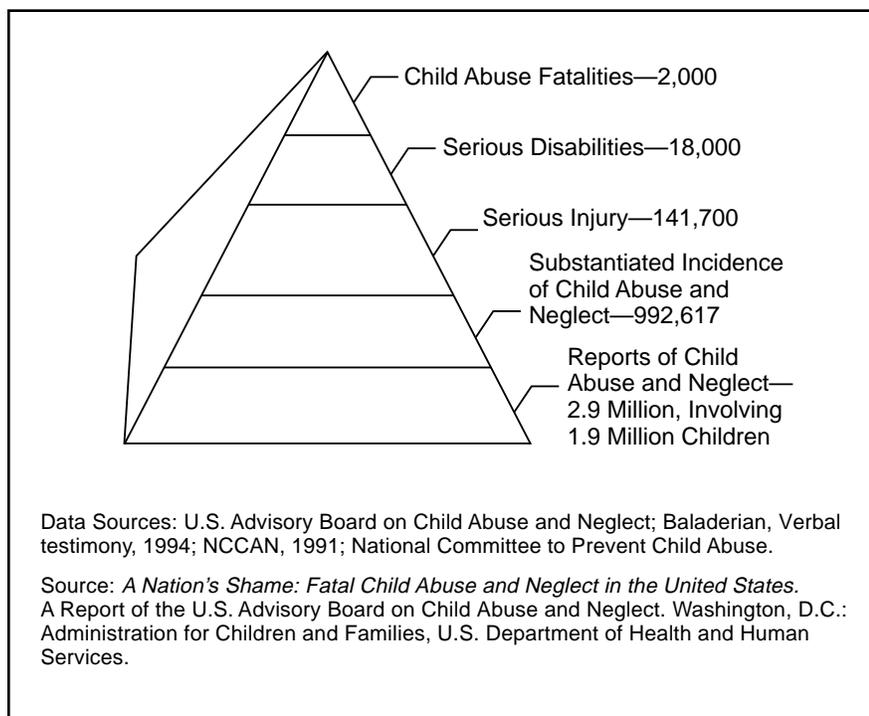

Figure 18: Child abuse and neglect pyramid

returned home safely or placed in a new permanent home. Judicial oversight may extend over a period of years until the case is finally closed. Yet most judges can spend an average of only 10 minutes on each of the 35 to 40 cases on their daily calendars. This time constriction underscores the need for additional resources and assistance, such as trained CASA's for abused children, a strategy that is working effectively in many communities.

Communities need to provide financial resources to improve child protective services and dependency courts, including better management of the system and training for CPS workers, social case workers, judges, and court counselors. A community CASA program is one way to augment the professional staff.

Figure 19: Juvenile victims of violent crime

Child victims of violent crime are more likely than older juvenile victims to be victimized by a family member

Offender type	Victim's age						
	All ages	5 and younger	6-11	12-17	11 and younger	17 and younger	18 and older

Effective and Promising Strategies and Programs

State Court Improvement Program

Since 1980, the responsibilities and caseloads of many juvenile and family courts have sharply increased. These increases are partly due to the judicial oversight functions imposed by AACWA, requiring certain court determinations in foster care and adoption proceedings for children who enter into State care as a result of abuse or neglect. Additionally, the incidence of drug-affected children and families and the reporting of child abuse and neglect have increased steadily in recent years, resulting in higher court caseloads.

The Omnibus Budget Reconciliation Act of 1993 (Public Law 103-66) established a new grant program to help State courts focus on

their role in proceedings relating to foster care and adoption and improve their handling of those proceedings.¹² Forty-eight States, including the District of Columbia, began to implement the program beginning in FY 1995.

The State Court Improvement Program is operated by the Children's Bureau within the Department of Health and Human Services' (HHS') Administration on Children, Youth, and Families. This grant program provides State courts with the opportunity to collaborate with other interested parties to review laws and procedures regarding foster care and adoption proceedings, supporting alternatives and improvements. State courts have the flexibility to design assessments that identify barriers, highlight practices that are not fully successful, evaluate areas they find to be in need of improvement or added attention, and implement reforms that address specific needs.

Unified Family Courts

Despite problems facing child welfare services and dependency courts, many successful systemic improvements are underway. There has been increased coordination of information sharing about family cases among juvenile courts. Some courts emphasize nonadversarial dispute resolution in family conflicts and have developed an array of domestic violence, visitation, divorce education, child advocacy, and litigation resources. The most promising development is the emergence of unified family courts that handle the full range of family-related cases, including delinquency, dependency, status offenses, paternity, custody, support, mental health, adoption, family violence, and divorce. Properly administered, unified family courts such as those in Hawaii, New Jersey, and Rhode Island, can effectively address the needs of children in the context of the family.¹³ A unified family court should have authority equal to the highest trial court of general jurisdiction and be staffed by specialized judges and other professionals.

For unified family courts to be effective, judges must be interested, committed, and qualified. They should receive specialized training and have the authority to develop alternative dispute resolution forums. Judges could further improve the family court system by making more informed and effective decisions regarding children and families through the use of integrated family court management information systems, eliminating the problem of conflicting court orders in children and family cases, and providing the leadership required to develop an integrated service

delivery system. They should also ensure that children and families have complete and open access to the protective and restorative powers of the court.

Children's Advocacy Centers

Children's advocacy centers provide a community-based approach whose goal is to improve management of abuse and neglect cases, increase the rate of prosecutions, and ensure that victims and their families receive coordinated treatment services. Over the past 10 years, nearly 300 communities have established children's advocacy centers. Multidisciplinary teams conduct joint interviews and share in decisionmaking concerning the management and investigation of cases, providing a range of services for victims and their families. Some advocacy centers have special teams that focus on preventing child fatalities arising from abuse and neglect, including providing child abuse prevention education.

Children's advocacy centers provide increased substantiation and prosecution of abuse cases, decreased post-abuse trauma to victims through centralized intake procedures, and enhanced support to victims of abuse and their families. Children's advocacy centers provide two additional long-term benefits: they focus community attention on child abuse prevention and raise community awareness of the problems of child abuse. They also provide locally developed infrastructure that facilitates collaboration among key local government agencies. Communities that have developed such infrastructures increase the efficiency of their systems, improve the quality of care in a cost-effective manner, and address a multitude of local juvenile justice and human services issues with increased cooperation.

Court Appointed Special Advocate Programs

The CASA program is another local approach to improving the lives of abused and neglected children. CASA programs use trained volunteers, sometimes known as guardians *ad litem*, who help stabilize the lives of victimized children. Appointed by the courts and working under court supervision, CASA's serve as advocates for children during court proceedings and help to ensure that a child is quickly placed in a safe, nurturing, and permanent home. They recommend plans that will effectively serve the best interest of the child based on an independent, thoroughly researched investigation of the child's circumstances.

Because CASA's typically handle only one or two cases at a time, they are able to devote significant attention to individual children and obtain a full understanding of each case. They appear at all appropriate court proceedings and monitor court orders, ensuring compliance by all parties. They also bring changes in the child's circumstances to the court's attention. Their work aids overburdened court officials and social workers and enables judges to make more informed decisions.

Nearly 700 communities nationwide have established CASA programs. In 1994, some 37,000 court appointed special advocates represented more than 128,000 abused and neglected children—about 25 percent of such children who came before the courts.¹⁴

One exemplary program is successfully meeting the needs of children who have been removed from their homes due to abuse or neglect and who need safe shelter, counseling,

and other assistance. In Cincinnati, the Hamilton Juvenile Court, the Cincinnati Bar Association, and the Junior League developed ProKids to serve as court appointed special advocates for youth. When ProKids was created in 1981, only 25 programs in the Nation used community volunteers as child advocates for abused and neglected children. By 1994, ProKids had trained more than 450 child advocate volunteers, and 1,200 children have been served by the program.¹⁵

Family Preservation, Family Support, and Independent Living

During the past two decades, the focus on abused children and their families has shifted within the child welfare system. Rather than removing abused children from their homes as the first course of action, efforts are made to preserve families by addressing the problems of abuse and changing behavior within the family. This new approach is based on the following assumptions:

- Children's safety and security is the first priority.
- If their safety can be ensured, children belong with their families.
- Families are the best environment for socialization.
- Being placed in a series of temporary foster homes can seriously impair a child's emotional development.
- Removing a child from an abusive home does not automatically ensure the child's safety.

The shift in emphasis toward family preservation and changing family behavior grew out of research

showing that family bonding is essential for healthy cognitive, emotional, and behavioral development, and that families that receive assistance can most often overcome problems. A 1984 study by the National Center on Child Abuse and Neglect (NCCAN) found that for every 1,000 children placed in out-of-home care, 30 experienced additional abuse. By contrast, among 2,505 children and their families who participated in the Families First family-strengthening program, only one child reported an incident of abuse during the first 12 months of the program.¹⁶

Homebuilders of Tacoma, WA, one of the first local family preservation programs, has operated with impressive results since its establishment in 1974. In the first 12 months after entering the program, 88 percent of the children identified by case workers as candidates for out-of-home placement remain in their homes, and both child and family functioning show significant improvement on standardized measures. A similar program begun in 1987 in the Bronx, NY, to test the Homebuilders treatment model in an urban setting also achieved a high level of success.

Family Ties of New York, another program modeled after the Homebuilders approach, is underwritten by New York City with matching State funds. From 1991 to 1992, 80 percent of juveniles who participated in Family Ties remained out of the juvenile justice system during the 6 months after starting with the program. During a period of a year or more, the success rate for program participants was 82 percent. Recidivism rates were significantly lower for the program group than for a comparison group.¹⁷

Early Family Strengthening and Support

Research has shown that juvenile delinquency prevention strategies are most effective when they are applied early in life—as early as prenatally and perinatally.¹⁸ Waiting until middle or late adolescence, when violent behavior patterns are well established, makes remediation efforts more difficult. By that time, serious delinquents generally exhibit multiple, interwoven, and recurring problem behaviors and a severe deficit in protective factors.

A review of violence research suggests that predatory and psychopathological violence is most effectively treated by early family-focused comprehensive interventions.¹⁹ Reducing multiple risk factors and increasing several protective factors will increase the likelihood that children will develop into productive, competent adults.²⁰ Programs such as Prenatal/Perinatal-Healthy Families, Healthy Babies provide prenatal and perinatal medical care, intensive health education for pregnant women and mothers with young children, and prenatal and infancy home nurse visits. Services such as these have been known to reduce the risks of head injuries, exposure to toxins, maternal substance use, perinatal difficulties, and child abuse—all delinquency-related risk factors—and enhance parenting skills.²¹

The Healthy Start Program in Hawaii seeks to reduce child abuse by offering postnatal counseling to high-risk parents when mothers are still in the hospital. By using 15 effective screening indicators, the program targets parents for early intervention services, which have been accepted by approximately 95 percent of parents. The program

continues until the child is 5 years old, providing a connection to a “medical home” that emphasizes preventive healthcare and home visits by trained health service personnel. The program offers parent training, family counseling, enhancement of parent-child interaction, child development activities, and social service linkage. Early evaluation findings provide evidence that the program is successful in reducing the likelihood of child abuse.²²

The Elmira Home Visitation Program in New York provides a wide range of maternal and child health services to poor, unmarried teenagers during pregnancy and the first 2 years of their children’s lives. The program has demonstrated the following results: 75 percent reduction in State-verified cases of child abuse and neglect, 32 percent fewer emergency room visits during the second year of life, 84 percent increase in unmarried mothers participating in the workforce, and 43 percent fewer subsequent births by unmarried women than by their counterparts assigned to comparable services.²³

The Memphis Home Visitation Program showed the following outcomes among participating African-American mothers: 46 percent less alcohol consumption and 26 percent fewer cigarettes used during pregnancy, 24 percent fewer cases of preeclampsia, and 26 percent fewer second pregnancies. In addition, more mothers breast fed their infants, fewer women reported attitudes that are associated with child abuse, such as lack of empathy for children and belief in physical punishment as a means of disciplining infants and toddlers; and fewer were seen by health care professionals for injuries.²⁴

In Tennessee, lawmakers adopted an “earlier is better” crime prevention plan that provides a range of services to at-risk infants, toddlers, and preschoolers. The State legislature also enacted the Childhood Development Act of 1994, expanding family support and preservation services and requiring development of a statewide early childhood education plan.²⁵

Other early prevention strategies targeting children and their families in the first 5 years of life have shown dramatic results.²⁶ For example, during the preschool years, home visitation programs that provide health and parent education and enhance family social support systems have been shown to be effective. Also, preschool programs and structured educational day care have demonstrated success in reducing risk factors and involvement in delinquency.²⁷

Several other States emphasize early intervention approaches, such as Minnesota and Tennessee. In recent years, Minnesota has used funds earmarked for crime prevention to augment Head Start, learning readiness, and family support programs. In addition, the State legislature has established a Senate Crime Prevention Committee.

Other successful prevention strategies include parent training and multisystemic family therapy. Parent training programs teach skills that can improve parenting practices. Multisystemic family therapy includes parent training within a wider range of interventions for improving family cohesiveness. Both programs have been shown to reduce antisocial behavior and delinquency.²⁸

Victimization Prevention Programs

Prevention strategies should also address victimization among teens. An exemplary victim education program is the Teens, Crime, and the Community school-based curriculum that makes youth aware of crime and the high rate of teen victimization through real-life issues. Formal evaluations have documented that the program has resulted in local youth-led victimization prevention measures and changed students’ attitudes about crime and victimization.²⁹

Federal Action Steps

Improve Juvenile and Family Court Handling of Child Abuse and Neglect Cases

With support from OJJDP, the National Council of Juvenile and Family Court Judges (NCJFCJ) will help replicate in several jurisdictions the successful demonstration juvenile and family court reform project in operation in Hamilton County, OH. NCJFCJ will widely disseminate comprehensive resource guidelines for improving the handling of child abuse and neglect cases, developed on the principles of the demonstration project. The Departments of Justice (DOJ) and HHS will support the implementation of this model in juvenile and family courts across the country.

The National Child Protection Act of 1993, as amended by the 1994 Crime Act, requires the Attorney General and DOJ to develop guidelines for the adoption of appropriate safeguards by care providers and by States for the protection of children, the elderly, and individuals with disabilities from abuse. The Attorney General will consult with

Federal, State, and local officials, including those responsible for criminal history record systems, and representatives of public and private care agencies and health, legal, and social welfare organizations. DOJ will use research by the American Bar Association to draft guidelines.

DOJ will make available a set of protocols to assist decisionmakers in law enforcement, public health, drug treatment, and other relevant areas in making reasonable efforts to enable drug-exposed children to remain safely at home.

NIJ will support a scientific study of the effects of hearsay evidence on juror decisionmaking in child abuse cases.

HHS’ Children’s Bureau operates the State Court Improvement Program, which provides State courts with the opportunity to collaborate with other interested parties to review laws and procedures regarding foster care and adoption proceedings.

Enhance Local Efforts To Investigate and Prosecute Child Abuse and Neglect Cases and Strengthen Child Protective Services

NIJ will fund research to examine the use of parent drug testing to facilitate judicial and social services in the prevention of further maltreatment in child abuse and neglect cases.

NCCAN, established by the Child Abuse Prevention and Treatment Act of 1974, will assist States and communities in child abuse prevention, identification, investigation, and treatment. NCCAN will support State grant programs, research

and demonstration grant projects, clearinghouses, resource centers, and an Interagency Task Force on Child Abuse and Neglect.

OJJDP will provide training in investigative techniques to law enforcement, child protective services, and other justice system agencies involved in investigating missing children cases and child abuse, sexual exploitation, and pornography. Courses will include the most advanced concepts in investigative process and will provide information on interagency development, advanced interviewing techniques, team activity involving investigations, case preparation, and prosecution.

OJJDP will continue to provide local children's advocacy centers with funding, training, and technical assistance through the National Network of Children's Advocacy Centers and with training, consultation, resource materials, and other technical assistance through the four regional children's advocacy centers. OJJDP will also seek to increase the number of children represented by court appointed special advocates through continued support of the development and enhancement of local CASA programs.

Strengthen At-Risk Families and Support Healthy Start Programs for Children

HHS will provide nearly \$1 billion through the Family Preservation and Family Support Services Program to States and a limited group of tribes for family support services and services to families at risk or in crisis. The program offers States an extraordinary opportunity to make sweeping changes in their child welfare systems to assist children at risk for abuse and neglect.

Under Title XX of HHS' Social Security Act (enacted in 1974), the Federal Government provides grants to States for social services aimed at preventing or remedying abuse and neglect while preserving families and preventing inappropriate institutional care. Grants are also set aside for evaluation, research, and training and technical assistance.

HHS' Children's Bureau began to provide grants to State courts in 1995 to improve foster care and adoption proceedings. Without the services these programs provide, most children who are at risk for serious child abuse, family conflict, and mental health problems would be immediately removed from the home.

HHS will provide Maternal and Child Health Improvement Grants to improve the delivery of health care services to mothers and children, particularly those families in low-income and isolated areas. The Department will also continue to support Healthy Start sites to increase awareness of infant mortality and overcome barriers to delivery of child and maternal health care; streamline and coordinate services between public and private agencies; and build partnerships among families, volunteers, companies, and health care and social service providers.

In FY 1995, HHS began to award grants to implement Early Head Start programs that provide intensive and comprehensive child development and family support services to low-income families with children under age 3 and to pregnant women. In addition, HHS will continue to support the Head Start program to provide comprehensive health, educational,

nutritional, social, and other services to bridge the gap between economically disadvantaged children and their peers.

NIJ will provide technical assistance and training to the nationwide Girl Scouts Beyond Bars program. The primary goals of this program are to prevent juvenile delinquency in these at-risk children, improve the parenting skills of incarcerated mothers, and reduce the probability of recidivism.

OJJDP will establish a national family-strengthening training and technical assistance effort. One or more agencies will be funded to provide a range of technical support to help communities establish or strengthen family support programs.

Support Community-Based Services That Reduce Family Violence and Victimization

HHS will continue to fund the Family Violence Prevention and Services Program to assist States and Native-American tribes in the prevention of family violence and the provision of immediate shelter and related assistance for victims of family violence and their dependents. The program also funds discretionary grants to support research into the causes and prevention of family violence, to support the training of family violence personnel and provide technical assistance in the conduct of family violence programs, and to support the operation of a national resource center on family violence.

These funds are also used to provide grant awards to nonprofit private sector organizations in each State to form State Domestic Violence Coalitions that are dedicated

to the prevention of family violence in general and spouse abuse in particular. The Violent Crime Control and Law Enforcement Act of 1994 requires State coalitions to work with local domestic violence programs and providers of direct services through training, planning, disseminating information, and collaborating with other governmental systems that help battered women.

The Bureau of Justice Assistance (BJA) will fund three Violence Against Women demonstration sites to identify mechanisms and procedures to help jurisdictions coordinate criminal justice agencies, victims services, social services, medical services, and others, as appropriate, to ensure that issues and problems about violence are handled effectively. These pilot programs provide BJA with a basis for determining a prototype to enhance and coordinate jurisdictionwide responses to issues concerning violence against women.

The Office for Victims of Crime (OVC) will provide funds to help DOJ implement the recently enacted Violence Against Women Act (VAWA). OVC funding will be allocated for the development of model policies and procedures on implementation and enforcement of the Full Faith and Credit provisions, and to train State and local criminal justice components and advocates.

NIJ will sponsor research on youth victims of domestic abuse in an attempt to provide a better understanding of their needs and how they can be more effectively addressed. NIJ will also support research to clarify understanding of the prevalence of partner violence among young adults.

Provide Training and Technical Assistance To Strengthen Agencies Serving Children and Their Families

HHS will continue to fund national child welfare resource centers focusing on critical topics such as family-centered practice, permanency planning, organizational improvement, youth development, and legal and court issues. These centers provide training and technical assistance to build the capacity of State, local, tribal, and other publicly administered or publicly supported child welfare agencies in the development, expansion, strengthening, and improvement of the quality and effectiveness of services to children and their families.

HHS will continue to provide discretionary child welfare training grants and promote the use of Social Security Act Title IV-E training funds to enhance child welfare practice in ways that make positive differences for children and their families.

HHS will also continue to fund and work with States to strengthen the design and delivery of Independent Living Initiatives to assist children who have reached the age of 16 in making the transition from foster care to independent living. The National Resource Center for Youth Development, funded by HHS, is responsible for identifying and disseminating information to the field on innovative, successful transitional and independent living programs dealing with issues such as effective parenting and adolescent input into program design.

Improve Services to Children Who Are Victims of Abuse and Other Crimes

OJJDP will work with OVC to improve services to children through expansion of resources for

multidisciplinary teams and extension of the teamwork concept used by children's advocacy centers to a wide range of crimes, including family violence. OJJDP will also work with OVC to improve services to children who are victims of crimes under Federal law, including those living on Native-American lands.

OJJDP will support an initiative to provide more conflict resolution programming for young people to equip them with the skills necessary to resolve conflict nonviolently. A training and technical assistance provider will assist interested communities in selecting an appropriate conflict resolution model and in implementing it in schools, youth facilities, recreation centers, and other institutions serving youth.

Suggestions for State and Local Action

- Foster substance abuse treatment approaches designed for parents, including residential treatment programs that allow children to accompany their addicted parents.
- Provide financial and other resources to enable parents to take part in treatment.
- Eliminate punitive policies such as those that require parents to give up parental rights in order to be eligible for treatment.
- Develop a network of State and local victim assistance strategies that serve children and their families.
- Establish victim awareness activities in juvenile corrections facilities to help young offenders understand the impact of their

crimes on others, the roots of their own violent behavior, and ways to become nonabusive spouses and parents.

- Support comprehensive adolescent pregnancy prevention programs.
- Support victim education for teens through community- or school-based programs.
- Advocate for manageable caseloads and properly trained child protective workers.
- Reform juvenile and family court administration to better address needs of victimized children and improve dependency case management.
- Encourage formation of local CASA and other children's advocacy programs.
- Launch local Healthy Start programs.
- Involve young men in parenting programs, especially those placed in juvenile justice facilities and those incarcerated in correctional facilities.
- Establish and maintain an effective and inclusive planning effort focused on family preservation and family support services.
- Provide mental health and treatment services and parenting skills training for confined abusers and/or young offenders who are victims of abuse.

6. Strengthen and Mobilize Communities

Overview

Communities play the primary role in preventing juvenile delinquency and the criminal victimization of juveniles. With Federal and State leadership and support, communities can successfully change local conditions to help youth become law-abiding, productive citizens.

All community members—business leaders, media representatives, teachers, parents and grandparents, young people, policymakers, clergy, elected officials, and law enforcement—are responsible for ensuring the health and well-being of children. When all members of the community work together to achieve common goals, everyone benefits from the strength of a working partnership. (See figure 21.)

Even medium- and small-scale community mobilization efforts can be effective. The Community Responses to Drug Abuse (CRDA) Initiative, a program researched by the National Institute of Justice (NIJ) and designed and implemented by the National Crime Prevention Council (NCPC), found that modest neighborhoods with limited resources can make significant strides in reducing drug activity, protecting youth, and improving the physical environment.¹

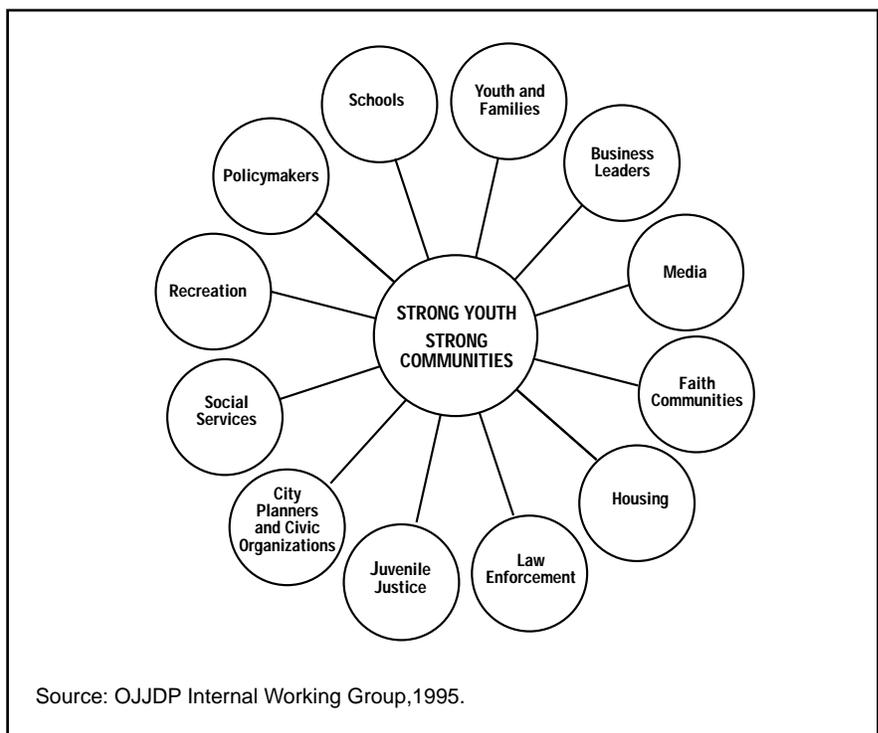

The Subgroup on Violence and Place of the Interdepartmental Working Group on Violence

summarized the advantage of using the community as a frame of reference to solve the problem of violence in the following manner:

Using community as a unit of analysis shifts attention from individual incidents of crime as such (the undifferentiated categories of murder, assault, drug trafficking, etc.), and generalized responses (law enforcement, gun control, drug

interdiction, stiff sentences) to local dynamics, local impact, and local opportunities. [Community analysis] suggests that the fear caused by violence is as much a problem as violence itself; that local responses can successfully fight the drivers of violence (street gun and drug markets). It emphasizes the power and potential of local resources, local alliances, and local experiments in violence prevention.²

Figure 21: Influences on strong youth and strong communities

This section describes why strong communities are critical to reducing delinquency and violence and provides fundamental elements essential to successful community change. It also presents examples of efforts that prove community mobilization strategies work.

Current Status and Analysis of the Problem

Community Deterioration

Earlier sections of this *Action Plan* describe categories of risk factors that research has shown can contribute to juvenile delinquency. They include individual, family, peer, school, and community factors. Community risk factors include the availability of drugs and firearms, community laws and norms favorable to drug use, the nature and extent of crime, media portrayals of violence, neighborhood transition and mobility, reduced interaction among residents causing community disassociation, and economic deprivation.

Community life has changed significantly in recent decades, resulting in a decline in essential youth nurturing, supervision, and guidance. In many instances, the deterioration of the community has isolated parents and their children from the network and support of extended families, and fear of children has replaced fear for children.³

Poverty exacerbates social disorganization and is both a source of stress and a risk factor for communities, individuals, and families. In 1992, 22 percent of youth lived

below the poverty level, a 42-percent increase since 1976. Poverty rates are higher among children under age 6 (25 percent) than among older youth (19 percent). Poverty is also higher among minority youth, particularly African Americans (47 percent) and Hispanics (40 percent), than among white youth (17 percent). Youth growing up in inner cities are most likely to live in poverty.⁴

Historically, government has responded to youth problems by providing services to address the symptoms, often resulting in inefficient use of scarce resources. Children labeled as delinquent enter the correctional system, which has been unable to pay attention to underlying family and other problems. Youth intervention agencies identify some children as abused, neglected, or dependent, remove them from their homes, and place them in foster care, but the agencies fail or are unable to provide preventive family support or mental health services. Some children with mental health needs are placed in secure psychiatric settings with little opportunity for treatment in community-based, family-oriented programs.⁵

This fragmented human services system does not serve anyone effectively—youth, families, or communities. The system is expensive; it often fails to solve youth's problems; and youth are referred from agency to agency with little followup. Comprehensive and targeted collaborative efforts can more effectively assess the needs of at-risk youth, implement promising strategies, and maximize community resources.⁶

Effective and Promising Strategies and Programs

Although evaluation has not yet proved the effectiveness of efforts to produce positive and lasting community change, several community-building strategies appear to be promising. A communitywide approach to reducing violence and delinquency is promising for several reasons. First, it affects the entire social environment by focusing on community norms, values, and policies as well as on conditions that place children at risk for adolescent problems. Second, all members of the community can apply their expertise where it is most effective. Community mobilization holds the promise of investing every local resident in solving what is truly a shared goal—to help young people grow up to maximize their potential and reduce their likelihood of involvement in violence and delinquency. Federal and State governments can assist communities by showing them the most effective ways to tap into fiscal and human resources.

Community planning teams that include a partnership of agency and lay participants can help create a consensus on priorities and services to be provided. They also build support for a comprehensive approach that draws on all sectors of the community for participation, such as the criminal justice and juvenile justice systems; other service systems such as health and mental health, child welfare, education, assisted housing providers, recreation, and law

enforcement; business; media; religious institutions; and grassroots organizations, including parent groups, youth clubs, crime victim groups, and civic and social groups.

The Department of Justice's (DOJ's) Office of Community Oriented Policing Services (COPS) supports the concept of successful community policing through close, mutually beneficial ties between police and community members. COPS uses a long-term problemsolving approach that targets persistent or recurring problems in communities. One of the key COPS components is enhanced communications among police, the community, and other public and social service agencies. The community must be viewed as an active partner with law enforcement in identifying problems and determining appropriate tactics and measures of success.

In the Texas City Action Plan To Prevent Crime (T-CAP),⁷ NCPC worked with seven municipal governments, local leaders, private entities, and citizens to adopt and implement strategies to reduce violence. Through this partnership, the initiative has accomplished the following:

- Violence reduction through environmental design, such as improved street lighting.
- Job creation and training programs.
- Mandated parent education and enhanced childcare.
- Youth recreation and senior citizen safety projects.
- Community oriented policing strategies aimed at community disorder.
- Conflict resolution training.
- Substance abuse reduction programs.
- Improved juvenile justice processes.
- Block teams and jurisdiction-wide teams to address specific problems.

In 1989, the Bureau of Justice Assistance (BJA) provided funding to establish the CRDA National Demonstration Program in 10 sites across the country. The purpose of the program was to help communities develop and implement effective strategies to reduce drug abuse and improve the quality of life in their neighborhoods. A process and impact evaluation funded by NIJ identified a number of positive changes in target areas compared with control areas. The evaluation found that local organizations in these neighborhoods, assisted by NCPC and the National Training and Information Center, could successfully develop and implement a wide variety of anti-drug strategies.

Many of these strategies involved cooperative efforts with law enforcement workers who helped community organizations increase levels of citizen awareness and participation in anti-drug activities. These community interventions also resulted in increased social interaction among residents, favorable attitudes toward the police, and positive perceptions about their neighborhood as a safe place to live. The CRDA program also helped grassroots organizations develop partnerships with criminal justice agencies, fire and housing departments, city councils, school boards, and recreation departments.

One of the key CRDA projects was the Oakland (CA) Community Organization. Residents learned to work in partnership with law enforcement, which resulted in increased funding for the police department's Beat Health Unit. Beat Health has been directly responsible for mobilizing residents to take direct action in drug abuse prevention, organizing a neighborhood cleanup, and closing more than 300 drug houses.⁸

Community Assessment

The public health model of youth violence prevention encourages a partnership of community leaders to determine their community's readiness for a comprehensive risk-focused prevention effort and to identify or create a community prevention board. The board assesses the community's risks and existing resources by collecting data on risk indicators and analyzing existing programs. With this information, the community board prioritizes risk factors, identifies programming gaps, and reviews effective approaches to address high-priority risk factors.

With a complete community assessment, the board can develop a strategic plan to implement and evaluate a comprehensive risk-reduction strategy tailored to the unique risk and resource profile of its community. Such a strategy includes helping communities reduce critical risk factors; helping youth develop protective factors such as healthy beliefs, clear standards for behavior, and skills for economic self-sufficiency; or implementing a combination of both approaches.

The Office of Juvenile Justice and Delinquency Prevention's (OJJDP's) Title V Initiative, Local Incentive Grants for Delinquency Prevention

Programs (Title V Initiative), provides an example of effective resource allocation combined with training. During 1994, the Title V Initiative distributed grants to 49 States and 6 Territories to promote local momentum and attract local financial and human resources. Nearly 2,500 local participants attended OJJDP-sponsored training sessions and learned how to implement an effective prevention planning framework, design new approaches to interagency collaboration, and conduct valuable risk and resource assessments.

The Department of Health and Human Services (HHS) has funded several promising pilot programs based on the public health model through its Maternal and Child Health Block Grants. The Communities That Care process formalizes the public health model into a tool for mobilizing communities to address issues of delinquency, violence, substance abuse, school dropout, and teen pregnancy.

Youth Involvement

Many young people feel a deep sense of alienation and disconnection from their own communities, contributing to a lack of self-esteem. Youth need opportunities to establish their self-worth and receive affirmation of their place and role within the community. Adult leaders often fail to tap into essential youth skills, such as problemsolving and decisionmaking, that can effectively change conditions and attitudes within a community.

Adults must recognize that youth have a stake in their communities and need to be substantially involved in addressing community problems, particularly juvenile violence and victimization.

Youth involvement has two beneficiaries: the community benefits from the high energy and creative talents of young people, and young people benefit from the critical realization that they can make positive differences in their community. Many community programs attribute their success to activities designed to help youth realize that they are valuable to their families and communities and to convey a sense of respect and pride in the positive contributions that youth can make.⁹

Communities should initiate activities and services that help youth resist violence and develop skills to mediate conflicts peacefully. They should take steps to help youth replace their mistrust toward the law and law enforcement with a sense of trust and a willingness to cooperate. The Youth as Resources Program, operated by NCPC, is an example of a program with strong youth and community involvement. Guided by a board of local leaders, including youth, young people take active roles in planning, implementing, and managing community service projects. The program, which began in 3 Indiana cities, has spread to more than 35 sites in 17 States and abroad.¹⁰

Neighborhood-Targeted and Place-Based Strategies

Strategies that benefit communities include those that foster a return to the informal social control once provided by stay-at-home neighbors and senior citizens, who would “watch over” their neighborhoods and their neighbors’ children. Programs that encourage informal community involvement and emphasize community partnerships with law enforcement and social service agencies can strengthen a

community’s ability to serve as its own guardian. A good example is found in community oriented policing strategies, which seek to give law enforcement a highly visible presence in communities and build positive relationships with residents. These community-based programs, which promote police-community partnerships to solve problems that lead to crime, have proven to be successful in fostering this kind of neighborhood responsibility.

Private initiatives funded by foundations have taken the lead in supporting communitywide and neighborhood-based strategies. Over the years, national foundations such as Ford, Rockefeller, McArthur, Robert Wood Johnson, Clark, Casey, and Carnegie have supported these programs. These programs have reached out to the corporate and business sectors that have been supportive in enhancing their success.

The Administration’s Empowerment Zone and Enterprise Community initiative applies the principles of community mobilization to neighborhood economic development strategies. Other examples of place-based violence prevention strategies include the Office of Justice Programs’ (OJP’s) Operation Weed and Seed, the Department of Housing and Urban Development’s (HUD’s) Public Housing Drug Elimination Program, the Center for Substance Abuse Prevention’s (CSAP’s) Community Partnerships, and the Centers for Disease Control and Prevention’s (CDC’s) violence prevention projects.

Operation Weed and Seed “weeds out” violent crime, gang activity, drug use, and drug trafficking in targeted high-crime neighborhoods,

and then “seeds” the area by restoring social and economic revitalization. In many areas, Operation Weed and Seed has reduced crime, fear, and violence, and helped communities develop innovative planning and organizational strategies to address neighborhood problems.

HUD’s Public Housing Drug Elimination Program has encouraged cooperative working relationships among housing authorities, law enforcement, and tenants to enhance local resident control and accountability for buildings, conditions, and responsible tenancy.

Local/Federal Partnerships

Federal agencies can collaborate as partners in local efforts to improve communities. Key to the success of a Federal/local partnership is a willingness to compromise and sustain involvement over time. Agencies must be prepared to allow flexibility and leeway in decision-making and in framing local initiatives.

In the Pulling America’s Communities Together (PACT) program, Federal representatives of the Departments of Education, Housing and Urban Development, Health and Human Services, Justice, and Labor have worked with Atlanta, GA; Denver, CO; the District of Columbia; and the State of Nebraska to coordinate efforts to reduce community violence by building healthier communities. Through NCPC, the National Council on Crime and Delinquency, and Developmental Research and Programs, Inc., BJA and OJJDP have provided technical assistance to the PACT program.

As a result of these partnerships, PACT has stimulated cooperation among many agencies that have no prior history of collaboration, pro-

viding a comprehensive framework for community leaders to address the problem of violence. It has also produced innovative local actions, often beyond traditional jurisdictional boundaries, to prevent and reduce violence.

Training and Resource Utilization

Community leaders need to know how and where to target and generate local resources. They also gain from establishing mechanisms that sustain linkages among local resources. A number of Federal agencies, ranging from HUD’s Office of Public and Indian Housing to CSAP, have developed training programs and clearinghouses to support efforts to identify and sustain resources. AmeriCorps and other service-oriented initiatives provide information about human resource opportunities. OJJDP has established a Juvenile Justice and Delinquency Prevention Training and Technical Assistance Center. These agencies are complemented by a host of private nonprofit agencies that have strong records of success in supporting local mobilization efforts. (See Appendix C.)

OJJDP’s Title V Initiative, described earlier, not only provides a sound strategy for assessing risk and protective factors but is an example of effective resource utilization combined with training. The program encourages communities to pool delinquency prevention resources and systems in several ways. First, by developing comprehensive needs assessments and objectives, grantees enable communities to make more effective use of local prevention funds. Second, grantees must match at least 50 percent of the Federal award with State or local funds or in-kind services, thus stimulating local public and private funding. Third, local leaders must

develop and implement comprehensive, community-based Title V initiatives and gain support from key leaders from the public, non-profit, and private sectors. Finally, the Title V Initiative encourages existing prevention coalitions and programs to expand to delinquency prevention programming, thereby enhancing the effectiveness and scope of community systems.

To support the effective use of Title V Initiative funds, OJJDP makes available a two-phase training program on risk-focused prevention to local leaders and community planning teams. During 1994, nearly 2,500 local participants attended OJJDP training sessions and learned how to implement an effective planning framework, design new approaches to inter-agency collaboration, and conduct valuable risk and resource assessments. These communities are joining forces to aggressively address their juvenile violence and delinquency problems.¹¹

Information Sharing

Newsletters, bulletins, computer linkages, and other vehicles for sharing information can generate action as well as convey critical information. Information sharing can identify programs that are founded on successful strategies. However, rather than reproducing successful programs, communities must adapt the underlying strategies to their own structure and needs. Experience suggests that methods and strategies are more transferable than programs and more portable than institutions. Sharing information about the results of successful strategies is vital not only to publicizing successful models but also to encouraging communities to set realistic program goals and devise useful evaluation mechanisms.

Outcomes: Short- and Long-Term Successes

Tackling the complex problem of juvenile delinquency will not necessarily produce immediate results. Long-term successes are usually built on a layered foundation of many short-term efforts and successes. Short-term objectives, when successfully met, create confidence and generate energy and enthusiasm toward working on the longer term issues. They also help develop skills and capacities that will be valuable in working on more complex long-term goals.

Federal Action Steps

Support Concentrated Strategies To Improve Distressed Neighborhoods and Reduce Violence Citywide

The Federal Government will support community efforts to assess and identify local needs, resources, and priorities in order to identify and respond to the needs of high-risk youth and juvenile offenders. Federal agencies will continue to support community mobilization models such as the Title V Initiative, Comprehensive Communities Program, Project PACT, National Funding Collaborative on Violence Prevention, Operation Weed and Seed, and Hope VI public housing Urban Revitalization Grants.

NIJ will continue to support evaluations of Operation Weed and Seed. The Administration will continue to support Empowerment Zones and Enterprise Communities as an economic model for

concentrating resources on and strategically planning action for distressed urban areas.

CDC, through its Community Demonstration Grants, and OJJDP, through its Title V Initiative grant program, will help communities design and implement multifaceted juvenile delinquency and violence prevention programs.

Link Federal and Private Initiatives at the Community Level

Improving the coordination of comprehensive community-based efforts to prevent crime is critical. OJJDP's SafeFutures program will provide funding to six jurisdictions that create exemplary public-private partnerships in the areas of juvenile justice and delinquency prevention, demonstrate a comprehensive strategy to strengthen the juvenile justice system, and provide a continuum of services and sanctions. It will also establish technology and protocols to replicate its successes in other jurisdictions.

Other Federal agencies, including the Departments of Housing and Urban Development, Health and Human Services, and Education will join with the Corporation for National Service (CNS) and private agencies to provide training and technical assistance to SafeFutures communities.

The President's Crime Prevention Council will provide small grants in support of community efforts to develop comprehensive plans to assess neighborhood-based programs, ensure a continuum of responses to youth problems

(violence, delinquency, drug use, gangs, and teen pregnancy), and coordinate or integrate service delivery and funding.

In support of creating these linkages, OJJDP has disseminated the *Matrix of Community-Based Initiatives* to inform communities about existing sites with successful public and private comprehensive, community-based strategies to prevent violence and strengthen economic development. The report provides a broad narrative description of each major initiative, a local contact, and a contact within the Federal department or the foundation that can provide additional information.¹²

Advance the Public Health Approach to Assessing and Reducing Violence in Communities

OJJDP will continue to widely disseminate its *Guide for Implementing the Comprehensive Strategy for Serious, Violent, and Chronic Juvenile Offenders* and will continue to make available timely research findings and program strategies to help communities understand the issues surrounding youth violence, including the use of firearms, and potential responses to these problems.

CDC will distribute guidelines on violence prevention and intervention to communities to help them develop their own violence prevention programs. As part of this dissemination strategy, CDC will disseminate proceedings from a National Conference on Violence on issues such as domestic violence, suicide, violence in the workplace, and youth violence.

Hold Satellite Video Teleconferences To Share Information on Delinquency Prevention and Juvenile Justice Programs

OJJDP has begun a series of video teleconferences to permit local officials, juvenile justice and delinquency prevention practitioners, and others to share a wide range of promising strategies. The teleconferences provide information about training and technical assistance, discuss principles of prevention and intervention, and address techniques for implementing successful juvenile justice reform.

The first teleconference focused on community planning, mobilization, and coordination of services as a followup to OJJDP's Title V Risk-Focused Prevention Training Program. Subsequent teleconferences concentrate on delinquency reduction topics, including proven programs that address serious, violent, and chronic juvenile offenders; community policing; boot camps; truancy reduction; mentoring; and conflict resolution.

Encourage Youth and Adults To Contribute to the Safety of Their Communities

CNS provides opportunities for youth and adults to become involved in violence reduction activities through programs such as AmeriCorps, Learn and Serve America, and JustServ.

AmeriCorps' VISTA, a CNS program, will continue to assist men and women age 18 and older who commit themselves to helping low-income people with neighborhood safety and revitalization through employment training, housing, literacy, and health education.

The National Senior Service Corps will continue to draw on the skills, talents, and experiences of older Americans to address community needs through the Foster Grandparent Program, the Senior Companion Program, and the Retired and Senior Volunteer Program.

HUD's Heinz Neighborhood Development Program will continue to assist neighborhood groups in organizing and improving their environments.

Improve the Existing Communications Infrastructure and Utilize State-of-the-Art Technology To Share Information

OJJDP is expanding JUVJUST, an electronic list service that will facilitate the sharing of information on juvenile violence reduction. It will supplement efforts such as the Partnerships Against Violence Network (PAVNET), the Juvenile Justice Clearinghouse, OJJDP's online information on reducing youth gun violence, and HHS' PrevLine. PAVNET is a coalition of Federal agencies (Agriculture, Education, Health and Human Services, Housing and Urban Development, Justice, and Labor) that integrates data and resources, removing barriers to information sharing. It provides an online search and retrieval system; a printed directory of programs, technical assistance resources, and funding sources; networking among Federal clearinghouses and resource centers; and an Internet mail group.

OJJDP will also provide local jurisdictions with an interactive CD-ROM program through which they can obtain information about implementing programs and strategies that can be effective in

reducing youth violence. The interactive nature of CD-ROM technology will enable local users to apply the forms and protocols, risk assessment information, and research and guiding principles provided on diskette to strategies that address local needs.

Establish a Center That Coordinates Juvenile Justice and Delinquency Prevention Training and Technical Assistance

OJJDP has established and will continue to support a Training Center to provide an inventory of juvenile justice and delinquency prevention training and technical assistance resources and to establish a resource data base.

OJJDP will also conduct needs assessments that will support new training and technical assistance program development and implement specialized training, including training of trainers.

Promote Federal and Other Joint Funding

DOJ will publicize and promote funding efforts with other Federal agencies and other public-private funding sources and encourage joint funding of efforts to prevent juvenile delinquency.

Suggestions for State and Local Action

- Consider innovative ways to mobilize communities that break out of traditional institutional practices.
- Develop partnerships with community-based organizations, schools, businesses, parents, and others.

- Assess and identify local needs, resources, and priorities to target high-risk youth and juvenile offenders.
- Use the Federal communications infrastructure to gather information about successful prevention and intervention programs that can be adapted to local needs.
- Develop and implement locally based strategies of integrated prevention and graduated sanctions to target youth violence.
- Create a youth commission or task force that involves young people in designing and implementing community activities that affect them.
- Develop a clearinghouse and information hotline and hire a youth services coordinator to evaluate programs and assist youth in finding services in their communities.
- Coordinate activities in local communities by linking law enforcement efforts with economic empowerment, youth development, education reform, and an improved juvenile justice system.
- Assist the private sector and local governments to form partnerships by identifying Federal resources that are committed to promoting public-private partnerships.
- Foster neighborhood crime watches, cleanups, and public awareness events.

- Enforce anti-noise ordinances, housing codes, health and fire codes, anti-nuisance laws, and drug-free rental clauses in residential and business environments.
- Organize a hotline number for reporting criminal activity and information.

7. Support the Development of Innovative Approaches to Research and Evaluation

Overview

Effective public policy, laws, and intervention strategies to prevent and reduce juvenile crime and violence require a solid knowledge base. Building a knowledge base requires a thoughtfully developed, comprehensive portfolio of statistical systems, research programs, and evaluation capabilities. This combination is necessary for the following reasons:

- Statistical systems monitor changes in juvenile crime, violence, and risk factors that have been shown to be related to these phenomena.
- Focused long-term research improves our understanding of the causes and correlates of juvenile crime and strengthens our ability to develop successful prevention, early intervention, and graduated sanctions programs.
- Effective evaluation tools to measure progress—to tell us if we are on the right track—are critical for refining and modifying existing prevention and early intervention strategies as well as graduated sanctions programs.

The Nation's ability to address the problems of juvenile violence and delinquency has been hampered by an incomplete understanding of the nature and extent of these problems. Recent research has greatly increased knowledge about juvenile

crime, its origins, factors that place youth at risk for involvement in criminal activity, and factors that protect youth from turning to violence and delinquency. Research is providing information on violence in some major cities and helping the cities develop a plan to solve this problem. Building on solid research into the causes and correlates of delinquency, we must continue to evaluate strategies and programs to determine what works to prevent juvenile delinquency and crime. Strong evaluation data are essential to create national, State, and community partnerships to effectively prevent and intervene in juvenile delinquency.

Techniques have become increasingly sophisticated for collecting, storing, managing, and analyzing large amounts of data on juvenile delinquency. This information contributes to our understanding of the problems of juvenile violence and delinquency, provides the basis for new research, and aids in evaluating the effectiveness of the programs and strategies contained in the *Action Plan*.

To enhance evaluation and research efforts, we need to improve three critical areas: national statistical information and systems on the nature and extent of juvenile delinquency and violence; longitudinal research to strengthen our understanding of the complex relationships between risk and protective

factors; and rigorous evaluation of programs designed to address juvenile crime and delinquency. In each of these areas, we must develop data collection instruments that are sensitive to ethnicity, culture, and gender and that can better measure the complete context of youth development.

This section addresses each of these critical areas. It presents a clear description of the issues involved in juvenile justice system data collection and the challenges faced by researchers and evaluators. This section also looks ahead to future directions required by effective juvenile justice research, evaluation, and data collection and proposes a series of steps that the juvenile justice system can take to improve the outlook for effective research and evaluation.

Current Status and Limitations of Existing Knowledge Statistical Information and Systems

Statistical information on juvenile justice comes both from the juvenile justice system and from data on delinquent behavior generated by other disciplines. Ideally, data collection systems should complement and enhance each other. For example, analysis of juvenile arrests should reveal information about causes of delinquency and juveniles' entry into detention, their

processing in juvenile court, and their placement in the juvenile correctional system.

Much can be learned from nationwide statistics about juvenile arrest and victimization rates, the number of cases handled annually in juvenile courts, and the number and types of juveniles in custody. This information contributes to the development of national policy on a wide range of issues. However, enhanced analysis of State and local data and research findings can lead to even greater refinements in the approach to juvenile justice and delinquency prevention. State and local jurisdictions are the primary sources of juvenile justice policies and procedures, and improvements in national data are largely dependent on information generated from the State level. An example is data on the deinstitutionalization of status offenders and disproportionate minority confinement. As each State addresses these issues, a national data system tracks progress and gathers and disseminates information that can be helpful to other States and local jurisdictions.

In addition, each component of the juvenile justice system, from law enforcement to corrections, has its own data collection system that provides unique perspectives on the problems of juvenile delinquency and the operation of the juvenile justice system. Each perspective is important to understanding the entire picture of juvenile justice. However, in order to obtain a comprehensive portrait of delinquent behavior, we need a data collection system that tracks the offender from arrest through court proceedings to disposition, identifying successful techniques within programs.

If we clearly understand the goals of a national data collection system, we are better able to assess its effectiveness. For example, the Federal Bureau of Investigation's Uniform Crime Reporting (UCR) system annually collects national data on the number of reported crimes and arrests.¹ UCR uses standardized definitions of crimes and provides information on crime at the State and local levels. Throughout its 60-year history, UCR has gained the cooperation of every State and nearly every local police department. Despite its high quality and comprehensiveness, UCR does not serve as an accurate indicator of the total number of juvenile crimes because it includes only reported crimes. Further, UCR includes incidents of criminal activities and arrests but not court data.

Although the UCR approach is logical from a law enforcement perspective, it does not work as well in other sectors of the juvenile justice system. The juvenile court data collection system, for example, counts case records but not arrests. In most jurisdictions, it is not possible to assess the number and types of cases that the juvenile court handles based on the number and type of juvenile offenses or arrests. The issue is complicated by differences among States in defining "juvenile." Depending on State law, the maximum age that an individual is considered a juvenile ranges from under 16 to under 18 and, for purposes of continuing juvenile court jurisdiction over alleged or adjudicated delinquents, can extend to age 25.

Juvenile court data are more disparate than UCR data. The Office of Juvenile Justice and Delinquency Prevention (OJJDP) funds the National Juvenile Court Data Archive (NJCDA) project, which collects automated data files from many States

and localities and publishes reports from a number of others.² NJCDA illustrates the promises and difficulties of State-level data collection. Although automated information systems provide accurate and complete pictures of juvenile court activities within each State, the level of data collection varies considerably among States. Some States have basic information systems that enable users to make simple comparisons but do not allow for in-depth analysis. Other States have expansive systems that facilitate longitudinal analysis of court careers. Still others have no individual data collection. In order to obtain an accurate nationwide picture of the juvenile justice system, all States and localities need to collect standardized core data.

OJJDP's current data collection on juvenile custody reflects still another system of gathering national information. As with other systems, it has its strengths and weaknesses. The main source of custody data since 1974 has been the Children in Custody (CIC) census, that surveys all facilities that can hold juvenile offenders.³ This census collects information on the population of these facilities on a given day by age, race, and sex. As with other data sets, however, it cannot discern State and local policies that directly affect the numbers. Also, CIC cannot connect with other data sets (given differing definitions and units of measurement) to track offenders individually or generically through the juvenile justice system.

Since 1990, OJJDP has pursued another avenue for collecting custody statistics: the Juveniles Taken Into Custody (JTIC) program that provides the same population detail as CIC but in greater depth.⁴ Under this program, States supply individual data on juveniles in their

custody. By tracking each juvenile through the entire custody experience, JTIC collects both admission and release information, providing length of stay measures for juveniles in custody at both the national and State levels. Unlike CIC, JTIC does not collect information on the conditions of confinement for these juveniles. As with CIC, its ability to link to other parts of the juvenile justice system is limited by the compatibility of individual data systems. Together with CIC, JTIC provides an expansive view of juvenile custody in the Nation.

The other main division in national juvenile delinquency data collection relates to information on delinquent behavior. Data on delinquent behavior are frequently gathered from surveys and self-reported data, or may be drawn from other sources that contribute to our knowledge of delinquency and delinquent behavior. For example, the Department of Labor's (DOL's) National Longitudinal Survey of Youth collects some reports of delinquent behavior and law enforcement contact.⁵ Other surveys supported by the Departments of Health and Human Services (HHS) and Education (ED) collect information on substance abuse and education and include questions about delinquent behavior. Research studies have tracked comprehensive self-report measures of delinquency, but these studies are limited in geographic distribution and time. Unfortunately, such disjointed analyses of the correlates of delinquency provide limited insights into delinquent behavior.

Longitudinal Research

The development of effective delinquency prevention strategies requires that we support research into the factors that place children at risk for delinquent behavior as well as those that protect children.

While the body of research in the field is increasing, three trends have hampered its development and application:

- Inadequate support for research and longitudinal studies.
- Inadequate funding for replication of successful research projects.
- Inadequate planning for research and dissemination of research findings.

These deficiencies must be remedied before we can fully identify and target prevention, intervention, and treatment programs that effectively reduce delinquency as well as make broader social policy decisions and foster systemic change.

Inadequate support for research and longitudinal studies. Historically, there has been a shortage of empirical research on the factors that put youth at risk for involvement in delinquent activity and the protective factors that help at-risk youth avoid delinquency. A recent comprehensive meta-analysis of 30 years of research on risk and protective factors represents a significant advance in this area.⁶ However, more empirical research is essential to developing a full range of programs that will be successful in preventing juvenile delinquency and reducing recidivism.

With the alarming growth in violence among youth gangs, gang-related research has attracted increased attention. Recent gang research has been valuable, but gaps remain in our understanding about why youth join and leave gangs and about the interrelationship between gang participation and other forms of delinquency and violence.⁷

Inadequate funding for replicating successful research projects. One important way to find solutions to juvenile delinquency is to replicate models of programs that work. Once the replication has been evaluated, the researcher understands whether and how a successful strategy drawn from research will be successful in other settings. The final step in the research process is dissemination and technical assistance to those who wish to establish successful programs.

Inadequate planning for research and limited dissemination of research findings. A 5-year plan for research would enable policymakers, practitioners, legislators, and researchers to determine what information is valuable and how limited funding can be used responsibly. This plan would include designing basic research questions, testing theories, and developing successful programs. The final step would be technology transfer and dissemination of the information to the field.

In addition to funding long-term research, research findings need to be translated into effective community strategies. Research findings can be used to develop better information about causes of crime and how to intervene successfully, information that needs to be both accessible and useful to communities. The involvement of nonprofit organizations, service providers, and practitioners in the juvenile justice system is critical to this process.

Evaluation of Programs

Evaluation research can contribute tremendously to the development of effective juvenile justice and delinquency prevention programs. This potential can be fully realized with strong support for a program

evaluation strategy that addresses the following critical needs:

- Develop effective evaluation strategies and capabilities.
- Improve evaluation information.
- Link evaluation to program development and practice.
- Target funds to long-term evaluation.

Develop effective evaluation strategies and capabilities. The current state of evaluation research underscores the need for more sophisticated evaluation methodologies and data collection capabilities to address complex programs. Many prior evaluations of juvenile justice programs have suffered from weak research designs that have lacked sufficient rigor to clearly demonstrate program impacts.⁸ Additionally, many evaluations have focused more on process evaluation issues (exploring what activities were undertaken and why) than on impact evaluation issues (determining program outcomes and impacts).

Prevention programs in particular pose a number of challenges for evaluation. First, preventive efforts focus on reducing or eliminating certain behaviors or conditions in at-risk populations.⁹ Unlike typical program evaluations that measure what happened or what changed as a result of a program, prevention program evaluations must assess what did not happen; for example, a crime that would have been committed by a juvenile but did not occur. Moreover, it must show that the crime would have happened without the prevention program. Second, primary prevention efforts often target large population groups, such as entire schools or

communities, rather than specific individuals. The results of these efforts on the full population can be difficult to measure, especially when multiple interrelated interventions are being conducted simultaneously. Increasingly sophisticated evaluation methods are needed to address these challenges.

Problems in conducting evaluations of prevention, intervention, and treatment programs are compounded by deficiencies in data collection systems nationwide. Impact evaluations of juvenile justice programs rely on an ability to track changes in a variety of community and individual data components related to juvenile offense rates, juvenile justice system processing rates, indicators of risk, and other outcomes. These data components are not always easily accessible, comprehensive, or easily linked to individual participants, and inconsistencies often exist among different data collection systems.

Evaluation challenges posed by prevention and intervention programs are particularly problematic for many local communities that do not have access to sophisticated evaluation tools or data collection systems. There is a great need to build local evaluation capacity both to conduct self-evaluations and to participate more meaningfully in national evaluation efforts.

Improve evaluation information. Although research on the prevention and control of juvenile delinquency and violence has increased substantially over the past 30 years, more knowledge is needed of what works, for whom, and under what conditions.¹⁰ A recent exhaustive review of evaluations of prevention and corrections programs and strategies identified several interventions that consistently demonstrate

positive effects. It also revealed, however, that the uneven quality of evaluation research makes it difficult to determine program effectiveness for many program areas. Most evaluation research could be improved by stronger research design, longer term followup, and better documentation of program implementation.¹¹ We are able, however, to offer communities an array of strategies and programs that have shown promise and some programs that have been carefully evaluated and found to be effective.¹²

Link evaluation to program development and practice. Too often, evaluations are not designed with the user audience in mind; and too often, they are not put to good use by communities that could benefit from their practical information. Consequently, important findings about what does and does not work often fail to reach front-line practitioners who could put this valuable information into action. Intervention efforts should consist of significant long-term investments to be most effective. To ensure the development and testing of new, high-quality, scientifically based prevention strategies, funding partnerships between service agencies and research institutes are needed, in addition to increased investment in well-planned, rigorous evaluations.

Target funds to long-term evaluation. Historically, agencies have tended to provide resources for the delivery of services rather than for an evaluation of the long-term effectiveness of these services. Where evaluations have been funded, often they have been added to programs as short-term efforts, resulting in weak evaluations based on limited data. In addition, the short-term nature of some federally

funded programs has precluded long-term evaluations. Demonstrating the effectiveness of prevention programs (especially early interventions with children, families, and schools) requires collecting impact data over long periods of time—sometimes 5, 10, or more years. Funding agencies and service providers need to build in evaluation at the front end of programs and sustain the evaluation over the full term of the program.

Future Directions in Juvenile Justice Statistics, Research, and Evaluation Statistics

In 1990, as part of a comprehensive effort to define and address gaps in data and data quality, OJJDP funded the Juvenile Justice Statistics and Systems Development (SSD) project to analyze the current state of data about juvenile victimization and delinquency and generate discussion about improvements. In the early phases, the National Center for Juvenile Justice (NCJJ) conducted an inventory of all Federal data systems that focus on juvenile offending and delinquent behavior. From this inventory, NCJJ identified systems that support particular analyses, such as substance abuse, child victimization, health and poverty issues, and delinquent behavior.

With this comprehensive picture of existing data systems, OJJDP and NCJJ are working with other Federal and public- and private-sector experts to identify the most critical information needs on a particular topic and determine the most effective methodology for

collecting those data. In addition, OJJDP will continue to update *Juvenile Offenders and Victims: A National Report*.

Efforts to improve national statistics will involve the active participation of the following interagency collaborations:

- Department of Justice (DOJ) Crime Statistics Working Group.
- Interagency Panel on Improving National Statistics on Children and Families.
- Interagency Working Group on Violence Research.
- National Neighborhood Indicators Project.
- Interagency Forum on Early Childhood Research.

Participants in these projects will identify and pursue opportunities to improve measures and statistics on juvenile victims and offenders. These opportunities may include sharing information or planning and cofunding collaborative initiatives. This collaboration will emphasize juvenile violence and delinquency, the populations involved, and the systems' responses.

The result of these efforts will be a plan that reflects the culmination of development activities by the year 2001. The 5-year plan will propose:

- A portfolio of data collection efforts including their purpose, cosponsors, periodicity, content, and methods with an outline of expected analyses and uses.
- Plans for specific methodological research, with the necessary feasibility and pilot test objectives and plans.

- System development plans associated with the collection of data requested from operational agencies. These could include the development of software to assist in the collection of data or products containing statistical feedback to be sent to the participating agency.
- A publication plan with descriptions of products and services to be made available from a given data collection (or series of collections), lists of intended audiences, methods for evaluating the usefulness of the products, and dissemination strategies.

Research

Federal agencies have implemented several effective and promising research initiatives to promote knowledge of the patterns and trends in juvenile delinquency and violence. These include efforts to build understanding in the following areas:

- Causes and correlates of crime, delinquency, and violence.
- Drug use.
- Youth gangs.
- Juvenile sex offenders.
- Youth development.

Understanding the causes and correlates of violence. In 1986 the Program of Research on the Causes and Correlates of Delinquency (Causes and Correlates), sponsored by OJJDP, began drawing data from three sources: (1) Denver Youth Survey, (2) Pittsburgh Youth Study, and (3) Rochester Youth Development Study. Causes and Correlates studied 4,000 youth over a 5-year period, allowing researchers to identify a pattern of causes and risk factors leading to delinquency,

including data on drugs, guns, peers, school, and family. This longitudinal research with a shared measurement approach is a milestone in delinquency research. Interviews with 60,000 test subjects and caregivers confirmed the direct relation between youth involvement with drugs and delinquency.¹³

Causes and Correlates findings suggest that involvement in violent behavior begins early for many youth, often before the teenage years. By the mid-to-late teenage years, approximately 20 percent of males and 10 to 15 percent of females are involved in violent behavior.¹⁴ Not all youth involved in violence are involved at the same rate. One group of offenders, an estimated 14 to 19 percent, is responsible for approximately 75 percent of offenses. The encouraging news, however, is that 82 percent of juveniles who have nine or more protective factors are able to resist the pressure to become involved in delinquency. This research offers evidence of our ability to solve the problem of juvenile delinquency through prevention programming.¹⁵

HHS' Family and Youth Services Bureau recently conducted a national study of substance use, suicide, and other at-risk behaviors among juveniles with runaway, throwaway, and homeless experiences. Although the results of the study are not yet available, one study goal was to determine the prevalence of substance use, suicide attempts, and other problem behaviors (delinquent activity, victimization, and sexual activities) in this population.

In addition, the National Institute of Justice (NIJ) and OJJDP have supported several studies focusing

on the cycle of violence that establish the relationship between experiences of childhood violence and adolescent delinquent behavior:

- An NIJ-sponsored longitudinal study of childhood victimization followed more than 1,500 cases from childhood through young adulthood. This study found that childhood abuse increases the likelihood of future delinquency and adult criminality by nearly 40 percent.¹⁶ Data from the study subsequently were used to examine the specific criminal consequences of child sexual abuse.¹⁷
- The Rochester Youth Development Study collected extensive data through personal interviews and agency records, finding that a history of maltreatment increases the chances of youth violence by 24 percent. In addition to adolescents who were themselves abused or neglected as children, adolescents growing up in homes where partner violence existed also exhibited higher rates of violence.¹⁸

Understanding the role of drugs in delinquency. Since 1990, NIJ has collected quarterly data and recorded trends in drug use among a group of high-risk male juvenile arrestees or detainees in 12 U.S. cities. Ten of the sites also collect data from female juvenile arrestees and detainees. This Drug Use Forecasting (DUF) program documented a dramatic rise from 1992 to 1993 in the use of marijuana among juvenile arrestees/detainees, underscoring the importance of providing intervention programs for youthful offenders. The program shows that many juveniles who use illegal drugs falter in school attendance and eventually enter the juvenile justice system.¹⁹

From the Causes and Correlates study, OJJDP has also found that the number of violent offenses increased after the onset of drug use. Drug use is closely related to violent crime and juvenile offending.²⁰

Understanding youth gangs. The Family and Youth Services Bureau's Youth Gang Drug Prevention Program supports ongoing gang-related research projects, including:

- Gang Families in a Public Housing Project, which examines the dynamics of family life as they relate to gang membership and the transfer of gang habits and values among family members.
- Factors Related to Gang Membership Resistance, which uses comparison group studies to explore how some at-risk youth avoid gang activity.

The National Youth Gang Center, a key component of OJJDP's Comprehensive Response to America's Gang Problem initiative, maintains and expands critical knowledge about youth gangs and how communities can respond to them effectively. The center collects and analyzes gang-related data; analyzes anti-gang legislation; reviews current anti-gang literature; identifies promising gang prevention program strategies; and coordinates activities of the Gang Consortium, a coalition of representatives of Federal agencies. The center also supports a national baseline study of the locations and characteristics of violent gangs.

Understanding system response to juvenile sex offenders. Recognizing that juvenile sex offenders have become an increasingly visible and particularly problematic offender population, OJJDP has supported

an initiative to describe and assess the ways in which the juvenile justice system and other related systems respond to juvenile sex offenders. This ongoing research initiative, conducted by the National Council on Crime and Delinquency, includes a comprehensive literature review, an indepth assessment of system functioning at 8 sites, and multistate retrospective data tracking of a cohort of 450 juvenile sex offenders from the point of court referral through disposition and treatment.

Understanding the positive and resilient aspects of youth development. The first principle in designing youth development research should be to move away from the “deficit model” that focuses on discrete problem behaviors, such as teen pregnancy, to a more comprehensive approach that describes experiences of youth in high-risk situations, including their capacity for change, resourcefulness, and full potential. Research should describe youth in the context of peer group, family, neighborhood, and community rather than solely in the context of individual behavior. We also need to understand the adaptive and protective behaviors of youth in high-stress environments and pay greater attention to positive developmental outcomes. A research framework that considers the full context of youth development would:

- Identify the developmental needs of youth in general and within the context of distressed environments.
- Focus attention on the interaction of risk factors and protective factors.
- Support studies that identify needs that are being met and

those that are not so that youth programs can include appropriate goals.

- Support longitudinal studies that examine processes of individual development and change as well as change in communities and institutions.
- Specify the most effective combination of community supports and opportunities for youth to develop the skills and strengths they will need to become productive adults.

When developing effective community strategies with measurable results, program designers should pay attention to the circumstances in which youth live and grow, addressing a broad spectrum of areas associated with a healthy community and healthy human development (for example, economic opportunity, safety, health, and education). Research in this area needs to include an understanding of the developmental needs of adolescents in relation to the environment.

The proposed model for inquiry would move beyond measuring individual actions and circumstances to include data that illustrate the importance of positive developmental outcomes among youth. Rather than using research activities to focus simply on individual problem behaviors and the categorical funding streams by which most current programs are supported, this model would focus on the interaction of risk factors and normal processes of human development, positive adaptation, and resilience among youth. Examples of areas for future research include the following:

- Availability of recreational and educational activities and employment opportunities.
- Existence of family and community supports.
- Developmental needs served by gang participation and other high-risk behaviors.
- Cultural and ethnic characteristics as well as intergenerational influences on gang participation and other high-risk behaviors.
- Patterns of drug use and violent delinquency among youth to determine whether they are part of a single syndrome or a developmental stage.
- Correlation among family variables (for example, parental supervision and/or involvement) and high-risk behaviors to determine whether there is a concurrent or predictive relationship.

Dissemination and implementation of research findings. OJJDP published the *Comprehensive Strategy for Serious, Violent, and Chronic Juvenile Offenders (Comprehensive Strategy)* in 1993 and the *Guide for Implementing the Comprehensive Strategy for Serious, Violent, and Chronic Juvenile Offenders (Guide)* in 1995. These documents are the foundation upon which the *Action Plan* rests. The *Comprehensive Strategy* and the *Guide* integrate more than 30 years of research into the causes and correlates of juvenile delinquency and violence, risk and protective factors for delinquency, and the effectiveness of a wide variety of prevention programs and juvenile justice system graduated sanctions. These documents help to translate research into practical information that can be used at the community level.

Evaluation

Several effective and promising strategies have been implemented by Federal agencies over the past several years that have resulted in useful evaluations to drive successful program development. These include:

- Making evaluation funding an integral part of program development.
- Using evaluability assessments and constructing logic models.
- Enhancing local evaluation capacity.
- Linking evaluation findings to program development and practice.

Making evaluation funding an integral part of program development. A number of recent delinquency prevention initiatives have made evaluation an integral part of the program. The Cities in Schools (CIS) program, for example, is a dropout prevention program implemented in 665 sites in 197 communities nationwide and funded by OJJDP in collaboration with ED, HHS, and the Departments of Commerce and Defense. The program's continued operation has been supported by preliminary evaluation results that indicate significant success in keeping at-risk students in school. Eighty percent of students who entered the program during the 1989–90 and 1990–91 school years were still in school in 1993, and 70 percent of students with high absenteeism prior to entering CIS improved their attendance.²¹

Other examples of recent and ongoing demonstration projects with integrated evaluation components include:

- Center for Substance Abuse Prevention's (CSAP's) Community Partnerships, a program that launched a variety of drug-prevention activities tailored to the needs of target communities.
- Bureau of Justice Assistance's (BJA's) Comprehensive Communities program, a strategy to control violent crime through community mobilization.
- Office of Justice Programs' (OJP's) Operation Weed and Seed, a multiagency strategy supporting law enforcement and community revitalization.
- OJJDP's Title V Initiative, Incentive Grants for Local Delinquency Prevention Programs (Title V Initiative), a comprehensive risk-focused approach to developing community-based delinquency prevention strategies.

The results of these evaluations are being used to enhance knowledge of what is effective and to guide ongoing program implementation and replication efforts.

In recent years, several agencies have strengthened their institutional evaluation capabilities and management evaluation systems. In addition, OJJDP has established an evaluation contract capable of planning and performing independent evaluations of a variety of OJJDP projects.

The Center for Substance Abuse Treatment (CSAT) created the National Evaluation Data and Technical Assistance Center (NEDTAC) to serve as a program evaluation system and resource center to support the needs of CSAT staff and grantees and substance abuse treatment evaluators. NEDTAC provides a wide range of technical assistance and data base development services to support grantees in meeting evaluation requirements and utilizing evaluation data. Under its program evaluation system, NEDTAC also conducts special studies to inform policy decisions and program planning.

Using evaluability assessments and constructing logic models.

Evaluability assessments have been gaining increasing popularity as a tool to help ensure that an evaluation will be both technically feasible and capable of answering research questions important to decisionmakers.²² Evaluability assessments address important issues related to a program's measurable goals and objectives, hypothesized causal links between activities and outcomes, and data collection capabilities. Addressing these issues before the evaluation begins strengthens the potential reliability of the evaluation.

Logic models are also useful tools to help program planners create program activities and expected outcomes. The principal purpose of the logic model is to present graphically the logical connections among conditions that contribute to the need for a program in a community, the activities aimed at addressing these conditions, and the outcomes and impacts expected to result

from the activities.²³ These models, which have been required of CSAP grantees in several programs and recently by OJJDP in its SafeFutures program, can also play a key role in conducting evaluability assessments of newly designed programs.

Enhancing local evaluation capacity. Enhancing local capacity is critical to conducting successful, sophisticated evaluations of complex prevention and intervention strategies. In recent years, a number of evaluation manuals have been developed and disseminated to local communities, including:

- *What, Me Evaluate? A Basic Evaluation Guide for Citizen Crime Prevention Programs.* National Crime Prevention Council (1986).
- *Evaluating Drug Control and System Improvement Projects.* NIJ (1991).
- *Handbook for Evaluating Drug and Alcohol Prevention Programs: Staff/Team Evaluation of Prevention Programs (STEPP).* HHS, Public Health Service (1987).
- *Evaluating Juvenile Justice Programs: A Design Monograph for State Planners.* DOJ, OJJDP (1991).
- *Prevention Plus III: Assessing Alcohol and Other Drug Prevention Programs at the School and Community Level.* HHS, Office for Substance Abuse Prevention (1991).
- *Understanding Evaluation: The Way to Better Prevention Programs.* ED (1993).

- *How Good Is Your Drug Abuse Treatment Program? A Guide to Evaluation.* HHS, National Institutes of Health (1995).

These manuals explain key evaluation concepts and list the steps necessary for communities to more easily evaluate their own programs. In addition to disseminating manuals, several agencies, including CSAT and CSAP, have provided community members with substantial training and technical assistance about conducting evaluations and collecting and assessing relevant program data.

Linking evaluation findings to program development and practice. OJJDP's recently published *Guide* is a current example of transferring evaluation findings to program development and practice.²⁴ The *Guide* describes the community planning and organizational steps necessary to design and implement local prevention and graduated sanctions strategies and to link them to provide a complete continuum-of-care system. Findings from available research and evaluation are explained in easily understandable language to support prescribed steps in program implementation, management, and evaluation.

The development of performance standards is another tool used to link evaluation to practice. DOL has been developing performance indicators and standards for youth employment programs. If the objective of a program is youth employment, for example, standards (based on prior research and evaluation) might be set for the percentage of youth placed in jobs and the

average wage earned. Performance standards such as these could help to keep programs accountable while providing objective measures for assessing program effectiveness.

Federal Action Steps

Build Local and Federal Evaluation Capabilities

OJJDP will expand the technical assistance and training role of the evaluation contractor under its umbrella evaluation contract. In addition to conducting evaluations of individual projects, the contractor will be responsible for helping to build local evaluation capacity and strengthening national and local partnerships to evaluate Federal initiatives.

OJJDP will continue to build local capacity in prevention program implementation and evaluation through the Title V Initiative. Local communities will receive training and technical assistance related to implementing risk-focused prevention strategies and assessing risk and resource data. OJJDP will provide local grantees with *Delinquency Prevention Program Community Self-Evaluation Workbooks* to assist them in building self-evaluation capacity.

This workbook will contain a series of forms and instructions to assist local communities to assess and evaluate youth violence reduction and delinquency prevention activities in three key areas: (1) documenting their prevention plans, resource allocation, organizational structure, and decisionmaking processes; (2) monitoring implementation of programs, activities, and services; and (3) tracking changes in the indicators of risk.

The Violent Crime Control and Law Enforcement Act of 1994 (Crime Act) mandates the allocation of 20 percent of every new Crime Act grant program to evaluation. NIJ and OJJDP will continue to include evaluation requirements in their grant solicitations and encourage applicants to initiate partnerships with researchers, evaluators, and management information systems specialists at the outset of their projects.

Develop a 5-Year Plan To Improve National Statistical Data

OJJDP has made a significant investment in improving national statistics on juvenile offenders and victims and the justice system's response to juvenile delinquency and violence. OJJDP's Statistics and Systems Development (SSD) program has examined more than 50 national data collection efforts, identifying many gaps in basic information and specific needs for improvement. The resulting report, *Developing a National Juvenile Justice Statistical Program* (1994), outlines both general strategies for filling critical information gaps and a detailed continuum of options for a comprehensive juvenile custody statistics program.

OJJDP is currently implementing recommendations for improving juvenile custody statistics, starting with an extensive redesign of the Children in Custody census. Other planning work focuses on juvenile probation and transfers of juveniles to criminal court.

In 1996, OJJDP will issue a 5-year plan, *Juvenile Justice Statistics 2001*, a blueprint for achieving long-term gains in our ability to monitor trends in juvenile delinquency, violence, and victimization.

Develop a 5-Year Violence and Delinquency Research Plan

To close the gaps in research on delinquency and crime, the Coordinating Council member agencies will continue to support many of the research efforts discussed earlier and will also introduce new studies of interest.

OJJDP will develop a 5-year research plan to organize and develop new knowledge on violence and delinquency and will confer with experts on the plan.

Implement Additional Long-Term Studies To Increase Understanding of the Causes and Correlates of Youth Crime and Violence

HHS, through the National Institute of Child Health and Human Development (NICHD), will launch a new effort in adolescent health that is its largest and most comprehensive to date. Using longitudinal surveys of over 19,000 middle and high school students and their parents, researchers will collect data about adolescents' health status, health behaviors, family behavior, neighborhood, and community. The goal of the study is to better understand the complex forces (i.e., what they are and how they may be shaped) that promote good health in young people.

NIJ will continue research related to drug use and criminal activities, including the expansion of juvenile research protocols under its multi-year DUF program.

NIJ will also continue to fund the Project on Human Development in Chicago neighborhoods, which is a longitudinal study on child development and risk factors for violence.

OJJDP will conduct additional analyses using data collected under the Program of Research on the Causes and Correlates of Delinquency. These analyses will be used to support further development of OJJDP's Comprehensive Strategy.

OJJDP will continue to support studies on the incidence and characteristics of violence committed by or against juveniles in Los Angeles, CA, and Washington, DC, and will report on studies being completed in Milwaukee, WI, and South Carolina.

OJJDP will fund the Gangs, Groups, Individuals, and Violence Intervention study panel. This panel will assist in the implementation of OJJDP's Comprehensive Strategy by providing up-to-date information about prevention and intervention strategies that work effectively for specific types of individuals, at specific stages of development, and under specific conditions. This study should be completed in 1996.

OJJDP will also consider funding a longitudinal survey of youth to gather self-reported data concerning juvenile crime and violent acts. Other areas of future research interest include: assessment centers; child abuse and neglect and other related issues; youth and guns; developmental pathways of juvenile offenders; family influences, such as absent or teen fathers; and victims and witnesses of violence in the home.

Address Gaps in Youth Gang, Gun, and Drug Research

NIJ and OJJDP will address gaps in research about youth involvement with gangs, guns, drugs, and their interconnections.

OJJDP will examine the interrelationships among gangs, guns, drugs, and violence through research on causes and correlates of delinquency in Rochester, NY; Pittsburgh, PA; and Denver, CO.

OJJDP will continue its research on juvenile gang involvement, collecting information on gang members who commit murder. It will also conduct a national assessment of the scope and seriousness of gang violence.

NIJ will conduct a study about the nature and extent of gang migration to provide data to law enforcement, community members, and policymakers and to enhance the capability of the juvenile justice system to effectively address this problem. The results of gang-related research will be shared among Office of Justice Programs agencies through the Gangs Working Group and among Federal agencies through the National Gang Consortium.

OJJDP will supplement the baseline study on the presence of violent gangs with two studies designed to develop detailed information on various aspects of gangs such as the proportion of violent crime attributed to youth gangs. NIJ has funded several studies (Huff, Klein, and Maxson) that will supplement these efforts and further define the relationships among gang participation and other forms of delinquency and violence.

OJJDP's Field-Initiated Research program will support research ideas generated in the field. Priority research topics may include factors related to joining and leaving gangs, ethnographic studies on the dynamics of gang creation or enlistment, and prevention or

intervention approaches aimed at diverting at-risk youth from becoming gang members.

The Bureau of Alcohol, Tobacco, and Firearms is studying how the disruption of illegal weapons markets impacts juvenile violent crime rates and gun homicides.

NIJ is conducting several firearms studies, including a national survey of high school students, to examine firearm acquisition, ownership, and use as well as victimization experiences; a study on firearm prevalence in and around urban, suburban, and rural high schools; and a study that applies the principles of community oriented policing to the interruption of illicit youth gun markets in Boston, combining prevention strategies with policing strategies used against illegal drug traffickers.

OJJDP will evaluate the effectiveness of a comprehensive strategy to reduce juvenile gun violence in the Atlanta metropolitan region.

HHS will fund, through the Centers for Disease Control and Prevention, a research project to examine the risk factors for gun use and injury among young males in inner cities. The research will examine two aspects. First, it will compare young males whose violence and/or injuries involve guns, and those whose violence and/or injuries involve gangs whose violence does not involve guns. Second, it will determine the characteristics and processes of personal interactions where gun injuries occur compared to nongun injuries. The research will identify modifiable risk factors in the daily routines of youth in areas of concentrated violence, and will contribute to the development of a framework for process analysis of violent events.

NIJ will continue to fund research to measure the incidence of drug use among juveniles using three modes of drug-use detection: self-report, hair analysis, and urinalysis. NIJ will also continue to document the prevalence and use of drugs through 11 of its DUF sites. Also through its DUF program, NIJ will measure firearm access, possession, and use by 6,000 booked juvenile and adult arrestees in 11 sites.

Examine the Impact of Options for Processing Juvenile Offenders

OJJDP will support a study of the processes by which juveniles are transferred to criminal court and the comparative effectiveness of the criminal justice system's handling of serious, violent, and chronic juvenile offenders with juvenile justice system processing. This research is expected to provide legislatures and other policymakers with empirical information about juvenile transfer mechanisms, such as court processing, case dispositions, and outcomes. The comparative effectiveness of different processing options for protecting public safety and reducing subsequent recidivism is of particular interest.

Translate Research Findings Into Programs and Practices

DOJ will continue to support research and evaluation of programs and effective and promising approaches to youth violence. This knowledge will assist in program design and focus, resulting in more effective ways to prevent and stop juvenile offending, and will include:

- Gathering data about the extent and demographics of the problem of youth crime and violence to examine the influence of

factors such as location, age trends, gender, ethnicity, and situational precursors. These data should provide information about specific types of victims (such as the elderly) and offenses (such as domestic violence).

- Supporting further research on the effectiveness of different intervention strategies for different populations, groups, and individuals. This research will promote flexibility in evaluation methodologies ranging from randomized controlled trials to qualitative assessments with the goal of building knowledge of effective practices. Research and evaluation, including data on cost effectiveness, should be built into all prevention and intervention funding.
- Coordinating research funding efforts with other Federal agencies and public and private funding sources and encouraging joint funding of projects. Also, encouraging university partnerships with local community-based organizations and service providers through proposal requests that require such partnerships.
- Summarizing, packaging, and disseminating relevant juvenile justice and delinquency prevention research findings in a user-friendly format to other Federal agencies and State and local juvenile justice practitioners. Identifying and referencing juvenile justice and delinquency prevention research, promising programs, and proven models at each stage of youth development. Providing information about funding availability for juvenile justice and delinquency prevention research from various Federal agencies.

- Reviewing plans for juvenile justice and delinquency prevention research projects and offering recommendations for coordination. Reviewing final reports and findings of relevant research projects.

NIJ will continue to support research to examine the relationship between early childhood abuse and neglect, subsequent violent criminal behavior, and intervention strategies that help prevent progression to this behavior.

NIJ will also fund research to explore the influence of peer groups in the development of career criminals.

OJJDP will convene a study group consisting of experts in the juvenile delinquency field to continue development and refinement of the Comprehensive Strategy.

BJA will continue to collect program and evaluation data and disseminate them through the *What Works* series. NIJ will also continue to evaluate and disseminate information through the Research in Brief series, evaluation bulletins, and other publications.

NIJ and OJJDP will develop additional mechanisms to disseminate research findings and data, such as conferences, meetings, clearing-house services, research reports, and research briefings.

The Coordinating Council and its member agencies will support efforts to translate the findings of evaluation activities into effective programs and practices. OJJDP will continue to update and disseminate the *Guide* as additional evaluation findings are available.

NICHD will continue to support community-based studies to determine the factors influencing risk-taking behavior, including violence

in various minority and ethnic adolescent populations. This knowledge will then be used to develop and test targeted intervention programs.

Integrate Evaluation Into Demonstration Projects

Coordinating Council member agencies will enhance the role of evaluation in Federal juvenile justice and delinquency prevention programs by building Federal and local evaluation capacity.

OJJDP will support a national evaluation concurrent with the funding of six SafeFutures demonstration sites that will test OJJDP's Comprehensive Strategy. The participating SafeFutures communities will be expected to demonstrate a strong capacity for data collection and analysis to support an evaluation component addressing both process and outcome measures. Partnerships between local and national evaluators will be encouraged.

OJJDP will also support the development of a long-term national evaluation strategy for the Title V Initiative to assess the impact of community-based, risk-focused prevention efforts. This strategy will aggregate data from individual communities participating in the Title V Initiative and will integrate preliminary findings from the current implementation evaluation.

The Executive Office for Weed and Seed and BJA will continue to support NIJ's evaluation of the Comprehensive Communities and Weed and Seed programs to assess strategies for crime and drug control. Other agencies will also begin or continue national evaluations of related prevention or intervention programs. For example, HHS will

support a national evaluation of its new Family Preservation and Family Support Services program.

Suggestions for State and Local Action

- Develop linkages with colleges, universities, and nonprofit research centers for the purpose of expanding their research and evaluation capabilities.
- Expand and coordinate management information systems across youth service agencies.
- Work cooperatively with national evaluators to enhance program effectiveness.
- Support research into causes and correlates of juvenile delinquency at the State and local levels.
- Develop new programs based on state-of-the-art research and evaluation.
- Support randomized assignments for assessing program effectiveness.
- Make data available for monitoring changes in risk and protective factors.
- Serve as learning laboratories for the field.

8. Implement an Aggressive Public Outreach Campaign on Effective Strategies To Combat Juvenile Violence

Overview

Public information about juvenile crime presents a paradox. In some ways there is too much information—and in other ways there isn't enough. While the media frequently focus on the increase in youth gangs, drugs, and juvenile violence, few people beyond the juvenile justice field realize that a relatively small number of youth become involved in serious criminal activity. Most people are also unaware that a significant body of research exists on the causes and correlates of juvenile delinquency and crime, serving as a foundation for effective Federal, State, and local programs and strategies.

Researchers have verified that long-term public education campaigns on violence prevention, family education, alcohol and other drug prevention, and gun safety curriculums in school are effective strategies to help prevent delinquency.¹ They also concur that involving youth² and developing community consensus are essential to an effective public education process.³

A well-designed public education campaign can make a positive impact on public opinion, target specific audiences, and be a cost-effective way of providing critical information to a large number of people. For example, it can enhance community understanding about

the nature and value of the juvenile justice system. It can educate all members of the community about effective prevention and intervention strategies. It can help communities identify and access local resources. And it can inform policymakers of tested, proven options for effective juvenile justice at all levels.

This section documents the effectiveness of mass media public education efforts and suggests a range of successful strategies that can bring about measurable change in communities. It also encourages communities to enlist support for juvenile justice and delinquency prevention and intervention efforts by engaging the media as partners. The section concludes with an outline of public information efforts being planned by the Federal Government and coordinated with national organizations to inform communities about what works to reduce juvenile delinquency and violence.

Current Status and Analysis of the Problem

As youth violence has increased, the media have expanded national and local coverage of the problem, often using images that build upon community fear. However, the media frequently overlook the more complicated messages about the causes of violence and approaches

to redress it, including the importance of community involvement in finding solutions.

Public debate over prevention program funding tells the tale: unless the public understands the effective strategies underlying prevention programs, communities will face difficulties getting support and implementing many of these strategies. A dynamic public education campaign can herald the service-oriented efforts of resilient young people who are improving safety in their communities and spotlight policymakers whose decisions result in positive outcomes for youth. Most importantly, it can focus on what works, what does not work, and for whom, when, and why. Translating data and research into straightforward language and providing this information to those who need it is, therefore, an essential component of reducing youth violence and crime.

Government and the media share important roles in this process. In recent years, some media have spearheaded public education campaigns to address various social problems and have disseminated information, for example, on the serious health risks of tobacco use and alcohol overconsumption. Government has sounded the alarm about these and other health-related hazards, pushed for greater media responsibility, and offered guidance on promising strategies to address

the problems. Throughout this process, national organizations that directly serve teachers, police, and local governments have been key partners in getting the message out.

It is imperative that a public information campaign make effective use of innovative media efforts, such as new dissemination techniques and outreach materials, to convey the complicated, but critically important, messages of the causes of youth violence and the effective strategies for violence prevention.

Effective and Promising Strategies and Programs

Effectiveness of Mass Media Public Education Efforts

The effectiveness of mass media campaigns is well documented. The National Highway Traffic Safety Administration linked the sharp decline in drunk driving crashes and deaths over the past two decades to effective behavior modification and explicit changes in community attitudes and values due to public information campaigns.⁴ The positive effects of increasing knowledge about HIV infection and AIDS through entertainment television were demonstrated when the number of calls received by the Centers for Disease Control and Prevention's National AIDS Hotline increased from the Saturday average of 4,900 to nearly 84,000 after the ABC network broadcast a 2-hour entertainment and AIDS outreach special.⁵

These campaigns are among dozens of national media efforts, publicizing a variety of issues, that have increased public awareness and generated positive action. No-

table among these are the campaigns for individual responsibility for forest fire prevention (Only You Can Prevent Forest Fires), safety belt use (Buckle Up for Safety), community crime prevention (Take a Bite Out of Crime), and support for historically black colleges and universities (A Mind Is a Terrible Thing To Waste). Similarly, mass media education campaigns can directly and indirectly generate public support for the actions proposed in this *Action Plan*.

Many national, Federal, State, and local organizations have conducted information campaigns on a wide variety of criminal justice issues. Both the private and non-profit sectors have initiated media campaigns aimed at reducing all types of violence, including domestic and other family violence, child abuse, violence with guns and other weapons, and juvenile violence. Some networks have provided a focus on family violence. The Corporation for Public Broadcasting produced "Act Against Violence" and encouraged local media to get involved. The California Wellness Foundation has contributed millions of dollars to a statewide Campaign to Prevent Handgun Violence Against Kids. The Center for Substance Abuse Prevention, Department of Health and Human Services, National Crime Prevention Council (NCPC), Harvard University School of Public Health, and Children's Defense Fund have also developed media information campaigns on violence.

The National Citizens' Crime Prevention Campaign conducted a large-scale public education effort, symbolized by McGruff®, the "crime dog." Locally, crime prevention practitioners view the McGruff® campaign as an effective

catalyst to generate citizen action, galvanize police-community partnerships, and rally local and State crime prevention efforts. In the past decade, the campaign has received more than \$500 million in funds and in-kind support, distributed hundreds of thousands of timely publications, provided training to crime prevention practitioners, and conducted hands-on demonstration programs to help citizens work with law enforcement and other public and private service providers to build safer, healthier, and more nurturing communities.

An extensive independent evaluation⁶ funded in 1991 by the Department of Justice (DOJ) found that the McGruff® anti-crime campaign can teach an individual about crime prevention for only 2.2 cents in Federal funds, and the campaign spends only 2.9 cents to generate individual action. Additionally, the campaign's public service messages generate \$50 or more in donated print space and air time for every \$1 of Federal funds spent in their development, a remarkable public-private partnership.

National Night Out, supported by the Bureau of Justice Assistance (BJA), provides an example of a well-publicized yearlong campaign to support the development of community-based policing initiatives in thousands of neighborhoods across the United States, its Territories, many Canadian cities, and at U.S. military bases around the world. In 1994, public service ads about this program, involving youth, families, educators, business, law enforcement, and other service providers, encouraged the participation of 27 million people in 8,750 rural, urban, and metropolitan jurisdictions.

Partnerships

One of the important benefits of a successful public education campaign is the opportunity for individuals, groups, public and private agencies, and others to form partnerships to share responsibility in combating juvenile violence and other delinquency problems. Through public service advertising and public outreach to print and electronic media, more community members become aware, and can become essential members, of existing prevention activities. These partnerships, forged through a shared understanding of the strategies and principles underlying local programs, can draw on diverse skills and talents to broaden the scope of efforts to reduce juvenile violent crime.

As community leaders begin to collaborate with State or local level groups and individuals, it is important that they consider the following as partners in a public information campaign strategy:

- Groups that can impact public policy, such as the National Governors' Association, the National Conference of State Legislators, the National Association of Counties, the National League of Cities, and State and local agencies.
- Groups that can bring law enforcement support to juvenile crime and violence prevention as a matter of public safety, such as the National Sheriffs' Association, the International Association of Chiefs of Police, the Crime Prevention Coalition, the Police Executive Research Forum, the National Organization of Black Law Enforcement Executives, the Fraternal Order of Police, the Hispanic

Law Enforcement Officers' Association, and the National Association of State Troopers.

- Professional organizations that have a stake in the effectiveness of the juvenile justice system to reduce juvenile violence and other juvenile crime, including the American Bar Association, the National Association of State Attorneys General, the National Association of District Attorneys, the American Psychological Association, the National Council of Juvenile and Family Court Judges, and the American Medical Association.
- Service providers and private organizations that can contribute ideas, resources, and strategies to anti-crime information campaigns, such as child advocacy groups, religious organizations, entertainment and sports leaders, business and industry, and foundations.

Some groups have accumulated substantial experience in helping local communities with media campaigns and partnerships. NCPC, for example, distributes an action kit, *Partner With the Media To Build Safer Communities*, containing reproducible materials that communities can use to reach the public with their anti-crime, anti-violence messages.

NCPC has partnered with the media in a Turn Off the Violence Campaign, inaugurated in Minneapolis-St. Paul, MN. In this effort, the community engaged the help of local print and electronic media to convince residents that violence is an unacceptable way to resolve conflict. The campaign also encourages media to reevaluate their own violent

entertainment programming. This grassroots partnership, which required limited funding, has spread throughout Minnesota and is being adopted by other States and cities.⁷ These NCPC kits and other assistance are included in a list of annotated resources in Appendix F.

Sharing communications market research and polling information about juvenile delinquency and violence can form the foundation for an effective communication strategy. Again, many organizations have already gathered this information and can be of assistance in formulating sound strategies that respond to public concerns. Collaborating to develop anti-violence messages for use in public service announcements (PSA's) and other mass media is fundamental to a successful campaign.

Getting the Message Out

The goal of public information efforts must be twofold: to change public perception about youth violence and available solutions and to convince adults and youth that their active involvement is essential to success. To achieve these goals, public information campaigns should enable people to reach informed judgments about preventing crime by and against juveniles. The message should reflect an awareness of the increasing cultural diversity in this country, be sensitive to gender-related differences and problems, and appeal to the priorities of key decisionmakers.

Generally, the public information campaign should:

- Provide accurate information about the causes, nature, and extent of juvenile delinquency and victimization problems.

- Provide needed information to convince the audience that juvenile delinquency and victimization are preventable.
- Inspire individuals and communities to address these problems because they have a stake in the outcome.

Ideas for Action

Communities can begin immediately to take short-term concrete steps to get the message out, while larger, overarching public information campaigns get underway. Local action can include:

- Speeches, interviews, and public statements.
- Town hall meetings and focus groups.
- Electronic dissemination of information on juvenile violence and solutions by CD-ROM and online access.
- Teleconferences and audio conferences.
- Meetings with government officials and legislators.
- Articles in journals and news magazines.
- Opinion pieces and letters to the editor.
- Press releases about anti-violence events highlighting juvenile justice activities.
- Outreach to youth through schools and youth organizations to learn their views, discuss alternatives to violence and crime, and enlist their leadership and involvement.

Matching the Message to the Medium and Increasing Local Awareness of Resources

Research and experience have shown that public information campaigns directed at different audiences require differing approaches, strategies, and creative execution. The issue is not simply to target a mix of television, radio, newspaper, magazine, and other communications outlets, but rather to determine what combinations within these media prove most effective. Communities wishing to publicize their delinquency prevention and intervention strategies can consult with media experts to determine which type of medium is best suited to their audience and their activities. Effective communication requires tailoring each message to a specific audience, such as youth victims, minorities, women, or the elderly, and knowing the desired result.

It is essential that juvenile justice practitioners, including court personnel, probation officers, law enforcement officers, and youth service workers, collaborate with local leaders to inform the public about the strategies they are using and their successes. Their experience brings credibility and an immediacy to the concerns being addressed and to the solutions being described.

Communities should also develop localized campaigns that increase residents' awareness of Federal, State, and local resources for juvenile justice and delinquency prevention. Lists of resources can be posted in community gathering places, at agency offices, and in other sites where clients are

most likely to see them. Foreign-language radio PSA's in special programming can also include appropriate information to reach residents who are unable to read or understand English.

Communities that design local targeted public information campaigns should include an evaluation mechanism that will provide important data on the effectiveness of structured, public communications efforts as well as information to help identify ways to increase awareness and the use of resources that can prevent or reduce violence among youth.

Through effective media campaigns, young people can receive public recognition for community service and neighborhood or school improvements. Elderly residents can begin to feel confident again about the safety of going out of their homes. Neighborhood leaders can turn their discouragement about pervasive violence into action toward ridding their streets of the causes of juvenile violence with strategies that work. Parents can learn about the positive effects of local youth programs. And policymakers can support local groups with resources for programs that have documented records of success.

Federal Action Steps

DOJ will convene national organizations in support of a public information campaign that will consist of several components: a series of PSA's to highlight solutions to youth violence, a booklet developed

with the President's Crime Prevention Council on ways to reduce youth violence, a CD-ROM and videotape combining the messages of the PSA's, and a public information campaign on gun violence. These mass media components will be disseminated through intensive outreach to State and local constituencies.

Disseminate Public Service Announcements

DOJ proposes the production of PSA's by a public-private partnership, using donated airtime and print space, when possible. The PSA's are aimed at a variety of audiences and have a three-part message:

- Persuade young people to turn away from violence and dangerous lifestyles.
- Educate parents and other community residents about solutions to youth violence.
- Demonstrate to youth, parents, and youth-serving professionals how they can be part of the solution.

Develop a Document on Ways To Reduce Youth Violence

A user-friendly document will communicate to the public "what works" in prevention and early intervention. This publication, being developed by the President's Crime Prevention Council, will communicate the goals of prevention programs and suggest ways for community leaders, parents, and youth to become involved in prevention efforts. This document will include the objectives set forth in the *Action Plan*.

A response pamphlet will also be available through an 800 telephone number that will be advertised during the PSA's, and by the Juvenile Justice Clearinghouse. Linking the information in this pamphlet online with the Partnerships Against Violence Network (PAVNET) will offer additional distribution opportunities.

Produce a Videotape and CD-ROM on Reducing Youth Violence

The Office of Juvenile Justice and Delinquency Prevention (OJJDP) is producing a CD-ROM demonstrating the tools and implementation strategies of effective youth violence prevention programs.

Additionally, OJJDP will explore the possibility of producing a state-of-the-art videotape with a well-known and admired public figure as narrator. It would combine the messages of all delinquency prevention PSA's into a coordinated and compelling production.

This video will be the visual media equivalent of OJJDP's *Delinquency Prevention Works* and the *Comprehensive Strategy for Serious, Violent, and Chronic Juvenile Offenders*.

Produce a Media Message on Reducing Youth Gun Violence

DOJ will continue to support a public information campaign to specifically address youth gun violence. Although the Department advocates comprehensive gun interdiction strategies, it is clear that youth gun violence raises unique problems requiring additional forms of intervention. The message articulates youth's perspectives on gun violence and also dramatizes for parents the problem of an unsecured gun in the home.

Link Successful Local Initiatives With a National Public Information Campaign

BJA has developed a technical assistance package for public information campaigns that communities can use to showcase local juvenile justice prevention successes and other achievements. The package identifies local programs that have successfully demonstrated and documented delinquency prevention and intervention strategies. Local media can support this public information sharing by contributing space, airtime, and programming.

As the national campaign develops, a working group consisting of media representatives, organizations with experience in mass media campaigns, key constituents, and the philanthropic sector could join forces to maximize the use of existing resources and to strengthen and coordinate the message. Members of this group could include, but would not be limited to, the National Association of Counties, the National Funding Collaborative on Violence Prevention, the Police Executive Research Forum, the Crime Prevention Coalition, the National League of Cities, the National Governors' Association, the National School Board Association, and the International Association of Chiefs of Police.

The working group would have the capacity to engage in a number of activities:

- Share market communications research conducted in the area of youth violence.
- Combine and leverage resources to support public outreach efforts.

- Develop a statement that could be integrated into individual media projects, such as billboards, PSA's, and radio and print announcements.
- Create collaborative projects.
- Access and highlight Federal programs or best practices in the area of youth violence.

Suggestions for State and Local Action

- Engage local media in highlighting positive youth activities.
- Encourage mayors, police chiefs, sheriffs, and others to deliver local anti-violence prevention announcements to local station managers.
- Showcase youth successes in local communities.

- Include PSA's with contact numbers and resource information hotlines after programming on youth violence.
- Develop a local teen talk show hosted and produced by youth.

Coordinating Council on Juvenile Justice and Delinquency Prevention

Background

The Office of Juvenile Justice and Delinquency Prevention (OJJDP) was established by the President and Congress through the Juvenile Justice and Delinquency Prevention (JJDP) Act of 1974, Public Law 93–415, as amended. Located within the Office of Justice Programs of the U.S. Department of Justice, OJJDP’s mission is to provide national leadership in addressing the issues of juvenile delinquency and improving juvenile justice. OJJDP sponsors a broad array of research, program, and training initiatives to improve the juvenile justice system as a whole, as well as to benefit individual youth-serving agencies. OJJDP also provides direction and resources to the juvenile justice community to help prevent and control delinquency throughout the country.

Section 206 of the JJDP Act, as amended, established the Coordinating Council on Juvenile Justice and Delinquency Prevention as an independent organization in the executive branch of the Federal Government. The primary function of the Coordinating Council is to coordinate all Federal programs that address juvenile delinquency, detention or care of unaccompanied juveniles, and missing and exploited children.

The Council is composed of an equal number of Federal and practitioner members. The nine Federal members include the Attorney General; Secretaries of Health and Human Services, Labor, Education, and Housing and Urban Development; the Administrator of the Office of Juvenile Justice and Delinquency Prevention; Director of the Office of National Drug Control Policy; Chief Executive Officer of the Corporation for National Service; Commissioner of the Immigration and Naturalization Service; and any other officers of Federal agencies who hold significant decisionmaking authority as the President may designate. Therefore, the Director of the President’s Crime Prevention Council has been added as an ex-officio member of the Council. The nine non-Federal members are practitioners in the field of juvenile justice who are appointed, without regard to political affiliation, by the Speaker of the House of Representatives, the Majority Leader of the Senate, and the President.

As mandated by the JJDP Act, the Coordinating Council is responsible for the following actions:

- Examining how programs can be coordinated among Federal, State, and local governments to better serve at-risk children and juveniles.
- Making recommendations to the President, Congress, and the OJJDP Administrator on the coordination of overall policy and development of priorities and objectives for all Federal juvenile justice and delinquency prevention programs and activities.
- Ensuring that the practices of Federal agencies are consistent with the mandates of the JJDP Act.
- Reviewing and making recommendations regarding any joint funding proposal undertaken by OJJDP and any other agency represented on the Council.
- Reviewing reasons why Federal agencies take juveniles into custody and making recommendations about how to improve Federal practices and facilities for holding juveniles in custody.
- Making recommendations on the OJJDP Administrator’s long-term plan and the implementation of overall policy and strategy to carry out the plan.

Appendix B

Working Group Participants

The following individuals served on a working group of the Coordinating Council on Juvenile Justice and Delinquency Prevention to develop the *Action Plan*. They discussed issues, contributed information on relevant research, resources, and programs, and reviewed several drafts.

Practitioner Members

Lisa M. Beecher
Detective
Portland Police Department

The Honorable James L. Burgess
Presiding Judge
18th Judicial District of Kansas

John Cahill
Program Coordinator
Clark County Family and Youth
Services Department

John A. (Jack) Calhoun
Executive Director
National Crime Prevention Council

Nancy G. Guerra, Ed.D.
Associate Professor of Psychology
University of Illinois at Chicago

Michael J. Mahoney
President
John Howard Association

**The Honorable
Gordon A. Martin, Jr.**
Associate Justice
Massachusetts Trial Court
Roxbury District Court

Mary Ann Murphy
Manager
Regional Center for Child Abuse
and Neglect
Deaconess Medical Center

Rose W. Washington
Executive Director
Berkshire Farms Center

U.S. Department of Justice

Beth Wilkinson
Principal Deputy Chief for
Terrorism and Violent Crime
Criminal Division

Julie E. Samuels
Director
Office of Policy and Management
Analysis
Criminal Division

Victor Stone
Senior Legal Advisor
Criminal Division

Donna Enos
Acting Assistant Director
Executive Office for United States
Attorneys

Marianne Tomecek
Assistant to the Director
Executive Office of United States
Attorneys

Office of Justice Programs

Laurie Robinson
Assistant Attorney General

Reggie Robinson
Deputy Assistant Attorney General

Ada Melton
Director for the American Indian
and Alaska Native Affairs Desk
Office of the Assistant Attorney
General

Office of Juvenile Justice and Delinquency Prevention

John J. Wilson
Deputy Administrator

Gina E. Wood
Director
Concentration of Federal Efforts
Program

Betty Chemers
Director
Research and Program
Development Division

Ron Laney
Director
Missing and Exploited Children's
Program

Joan Hurley
Assistant Director
Research and Program
Development Division

Katherine Deoudes
Special Assistant to the
Administrator

Eileen M. Garry
Special Assistant to the
Administrator

Sarah Ingersoll
Special Assistant to the
Administrator

Donni LeBoeuf
Senior Program Manager

Robin Delany-Shabazz
Program Manager
Training and Technical Assistance
Division

Jim Burch
Program Manager
Special Emphasis Division

Barbara Allen-Hagen
Program Manager
Research and Program
Development Division

Catherine Doyle

Bureau of Justice Assistance

Steve Rickman
Director
Crime Support Division

Robert Brown
Chief
Crime Prevention Branch

Bureau of Justice Statistics

Jay Hoover
Special Assistant to the Director

Office for Victims of Crime

David Osborne
Special Assistant to the Director

Sharon English
Crime Act Coordinator

National Institute of Justice

Chriss Wetherington
Special Assistant to the Director

Office of Community Oriented Policing Services

Diana Fishbein, Ph.D.
Senior Researcher

Community Relations Service

Gail Padgett
Associate Director
Office of Technical Assistance
and Support

George Henderson
Senior Program Specialist/
Attorney Advisor
Office of Technical Assistance
and Support

Gil Chavez
Southwest Regional Director

Atkins Warren
Central Regional Director

Ada Montare
Mid-Atlantic Conciliation Specialist

Immigration and Naturalization Service

Ruben Cortina
Director
Detention Management Branch

Elizabeth Herskovitz
Detention and Deportation Officer
Detention Management Branch

U.S. Department of Health and Human Services

Peter Edelman
Acting Assistant Secretary
Planning and Evaluation

Carol Williams
Associate Commissioner
Children's Bureau
Administration for Children
and Families

Elaine Johnson
Director
Center for Substance Abuse
Prevention
Substance Abuse and Mental
Health Services Administration

Angela Duran
Special Assistant to the Assistant
Secretary
Office of the Assistant Secretary
for Planning and Evaluation

Emily Novick
Social Science Research Analyst
Office of the Assistant Secretary
for Planning and Evaluation

Mike Ambrose
Senior Program Specialist
Children's Bureau
Administration for Children
and Families

Joe Bock
Family Services Program Specialist
Family and Youth Services Bureau

U.S. Department of Labor

David Lah
Chief, Evaluation Unit
Office of Policy and Research

U.S. Department of Education

William Modzeleski
Director
Safe and Drug-Free Schools

Appendix D

Reports of Selected Commissions and Task Forces

The following reports that include NCJ numbers are available from the National Criminal Justice Reference Service (NCJRS). For further information, see Appendix F or call the Juvenile Justice Clearinghouse (800-638-8736).

American Bar Association. 1993 (July). *America's Children at Risk: A National Agenda for Legal Action*. NCJ 152284.

This report was produced by the American Bar Association Presidential Working Group on the Unmet Legal Needs of Children and Their Families. It recommends reforms in legal representation and advocacy of children and their families. The report proposes improvements for assistance to working parents, housing, education, child welfare, families in the courts, juvenile justice and children in institutions, and child support.

American Correctional Association Victims Committee. 1994 (August). *Report and Recommendations on Victims of Juvenile Crime*. NCJ 159768.

This report offers an assessment of the current status of victims of juvenile offenders. It includes 16 recommendations designed to increase efforts among juvenile justice officials and victim service professionals to meet the needs of the growing victim population.

Carnegie Corporation of New York. 1994 (August). *Starting Points: Meeting the Needs of Our Youngest Children*.

Prepared by the Carnegie Task Force on Meeting the Needs of Young Children, this report

advocates responsible parenthood, the guarantee of quality child-care choices, the availability of good health and protection, and the mobilization of communities to support young children and their families.

Carnegie Council on Adolescent Development. 1994 (April). *A Matter of Time: Risk and Opportunity in the Out-of-School Hours*.

This publication presents the research findings of the Carnegie Council on Adolescent Development's Task Force on Youth Development and Community Programs. The task force conducted an extensive review of existing research and programs, focus group discussions with young adolescents, interviews with youth development leaders from national organizations, an exploratory study of independent youth agencies, 12 commissioned papers, and reports of site visits to programs. It highlights the potential of community organizations to support youth development and provides recommendations for community programs and their key partners in strengthening community programs for youth.

Carnegie Council on Adolescent Development. 1990 (January). *Turning Points: Preparing American Youth for the 21st Century*. NCJ 119895.

This report offers recommendations for transforming the education of young adolescents in middle schools through strategies such as creating smaller learning environments, assigning an adult adviser for each student, educating students about healthy lifestyles, teaching citizenship, grouping students for learning, providing flexible scheduling, giving teachers greater influence in the classroom, developing expert teachers, ensuring access to health services, keeping parents informed, providing opportunities for youth service, and expanding career guidance. The report urges educators, parents, health-care professionals, youth-serving and community organizations, States, and the President to consider the Council's recommendations and to reevaluate education policy for adolescents.

Centers for Disease Control and Prevention. 1994 (June). *Healthy People 2000: National Health Promotion and Disease Prevention Objectives*. Review 1993. Hyattsville, Md.: National Center for Health Statistics, U.S. Department of Health and Human Services. NCJ 152389.

This report describes the major activities of the U.S. Public Health Service in 22 priority areas outlined in *Healthy People 2000: National Health Promotion and Disease Prevention Objectives*,

a framework laid out in 1990 for actions by the public and private sectors to achieve a healthier Nation by the year 2000.

Child Welfare League of America, Inc. 1994. Research agenda for child welfare. *Journal of the Child Welfare League of America* 73(5):303. **NCJ 151423.**

This article describes the creation of the National Council on Research in Child Welfare, which originated as a result of the Child Welfare League of America's national colloquium in February 1990. The colloquium sought to advance knowledge in the child welfare field and developed a research agenda to enhance child welfare practices and public policies targeting children and their families.

Children's Defense Fund. 1994. *Wasting America's Future: The Children's Defense Fund Report on the Costs of Child Poverty*. Boston, Mass.: Beacon Press.

This book examines the negative effects of poverty on a child's health, academic achievement, and future earning potential. It provides an overview of what money can buy for children and families: food, shelter, opportunities to learn, a decent neighborhood, healthcare, recreation, transportation, and economic opportunities. The book argues that an end to poverty is possible and economically feasible (in terms of costs to taxpayers and the Government), especially when poverty's damaging, long-term economic and social effects are considered.

Children's Legislative Agenda 1994: Budget Updates and Issue Briefs. 1994. Washington, D.C.: Child Welfare League of America, Inc. **NCJ 148471.**

This legislative agenda of the Child Welfare League of America outlines and documents essential investments that must be made to protect and care for abused and neglected children and troubled families.

Cocozza, J.J., ed. 1992 (November). *Responding to the Mental Health Needs of Youth in the Juvenile Justice System*. Washington, D.C.: The National Coalition for the Mentally Ill in the Criminal Justice System. **NCJ 151847.**

This monograph was produced as a result of a National Work Session, convened to address mental health services provided to youth in the juvenile justice system at the Federal, State, and local levels. It explores 11 priorities that emerged from the work session to improve services and guide policies.

Committee for Economic Development. Research and Policy Committee. 1989. *Children in Need: Investment Strategies for the Educationally Disadvantaged*.

This report calls for a new partnership among businesses, schools, communities, and individuals to foster the health, education, and well-being of disadvantaged children. To improve the outlook for this burgeoning population, the report recommends that policymakers adopt a three-part strategy: develop prevention and early intervention programs for children from

birth to age 5 and for teenagers at high risk for pregnancy; restructure the public education system; and provide comprehensive educational, employment, health, and social services programs for disadvantaged students and dropouts. The report includes descriptions of existing programs that are implementing promising strategies to address the needs of disadvantaged children.

Contract With America's Children. 1994 (December). Oakland, Calif.: Children Now.

The *Contract With America's Children* was drawn up by Children Now, a national nonpartisan policy and advocacy group for children; the Benton Foundation; and the Coalition for America's Children. Supported by more than 100 national organizations, the contract articulates 10 principles that policymakers should honor as they enact policy reforms. It advocates putting children first and valuing all youth. The contract also addresses health, education, and safety issues; family preservation; working families; job training; community responsibility; and leadership accountability.

Crime Prevention in America: Foundations for Action. 1990. Washington, D.C.: National Crime Prevention Council. **NCJ 142312.**

This publication seeks to inspire community-based action to reduce the crime that plagues the Nation. It includes principles developed by more than 130 national, Federal, and State organizations. Examples used to illustrate these principles were

selected to represent geographically diverse communities, problems, and solutions.

Eron, L.D., J. Gentry, and P. Schlegel, eds. 1994 (February). *Reason to Hope: A Psychological Perspective on Violence and Youth*. 1994. Washington, D.C.: American Psychological Association. **NCJ 158633**.

This is Volume Two of the Commission on Youth and Violence Report, a compilation of papers on violence and youth prepared by psychologists with expertise in youth violence. This work is based on findings from more than 50 years of research, which has shown that human aggression is learned, that learning alternative nonviolent behavior is possible, and that no single factor influences violent behavior. Commission members identified the individual and environmental factors that can be changed to prevent potentially volatile situations from escalating into violent acts. The document offers guidelines for reducing violence in children's lives.

The Forgotten Half: Non-College Youth in America. 1988 (January). Washington, D.C.: The William T. Grant Foundation Commission on Work, Family, and Citizenship. **NCJ 112535**.

This report examines the societal and economic implications for the significant number of youth who do not go to college. It proposes recommendations on continuing education and job training, completing the transition from school to the workforce, and expanding employment and promotional opportunities.

Kids Count Data Book: State Profiles of Child Well-Being. 1994. Baltimore, Md.: The Anne E. Casey Foundation. **NCJ 148416**.

This is a report of a national and State-by-State effort to track the status of youth in the United States and provide benchmarks of child well-being. It includes data on educational, social, economic, and physical characteristics of children.

Murder in America: An IACP Summit Report. 1995 (February). Alexandria, Va.: International Association of Chiefs of Police. **NCJ 156236**.

This is the working draft of the International Association of Chiefs of Police Murder Summit on November 19, 1994. It calls for new or expanded initiatives in the areas of law enforcement; community and government; legislation; and education and training.

National Commission on Children. 1991. *Beyond Rhetoric: A New American Agenda for Children and Families*. Washington, D.C.: U.S. Government Printing Office. **NCJ 142184**.

This report provides a basis for developing national policy on America's children and families. Prepared by the National Commission on Children, a bipartisan group established by public law "to serve as a forum on behalf of the children of the Nation," the report focuses on problems of the Nation's children and their families by examining the relationships among health, education, income security, and other forms of support at each stage of a child's development. It

sets forth recommendations for individual action, public- and private-sector policies, and program development.

National Commission on Children. 1991. *Speaking of Kids: A National Survey of Children and Parents*. Washington, D.C.: U.S. Government Printing Office.

This report is based on the National Commission on Children's national opinion research project. It examines changes in American family life and deals with perceptions of family life, parent-child relationships, time pressures, family structure matters, worries and fears, and support for teenagers. The report concludes with recommendations for supporting and strengthening families, ensuring income security, supporting the transition to adulthood, and creating a good moral climate for children.

National Council of Juvenile and Family Court Judges. 1984 (Summer). The juvenile court and serious offenders: 38 recommendations. *Juvenile and Family Court Journal*. **NCJ 096101**.

This article details recommendations developed and approved by the members of the National Council of Juvenile and Family Court Judges on July 12, 1984, at their annual conference in Colorado. Its recommendations are designed to respond to some of the most controversial and significant issues facing courts and the public with regard to serious juvenile offenders. Recommendations cover disposition policies, causes and prevention of juvenile crime,

dispositional guidelines, transfer to adult criminal court, confidentiality, treatment considerations, specific programs, and resources.

The National Education Goals Report: Building a Nation of Learners. 1994. Washington, D.C.: National Education Goals Panel.

This report consists of three documents. *National Data Volume* and *State Data Volume* include comprehensive sets of measures to describe educational progress at the national and State levels. The central document, *1994 Goals Report*, focuses on 16 indicators to communicate to parents, educators, and policymakers what needs to be done to reach the desired educational goals.

National Governors' Association. *Kids in Trouble: Coordinating Social and Correctional Service Systems for Youth.* Washington, D.C.: Committee on Justice and Public Safety, National Governors' Association. **NCJ 137269.**

This report provides an overview of innovative approaches to program design and coordination of services for delinquent youth. It describes several programs that are considered exemplary and that can be adapted to the needs of all communities.

Office of National Drug Control Policy. 1995 (February). *National Drug Control Strategy 1995: Strengthening Communities' Response to Drugs and Crime.* Washington, D.C.: Office of the President. **NCJ 152700.**

The President's 1995 strategy contains action plans to reduce the demand for illicit drugs;

reduce crime, violence, and drug availability; enhance program flexibility and efficiency; and strengthen interdiction and international efforts by empowering communities, improving prevention and treatment, fighting hardcore drug use, and increasing program efforts in source countries.

The State of America's Children Yearbook. 1994. Washington, D.C.: Children's Defense Fund. **NCJ 156057.**

This annual yearbook includes data on family income, health, children and families in crisis, childcare, early childhood development, housing and homelessness, hunger and nutrition, adolescent pregnancy prevention, youth development, and violence.

An Urgent Call . . . for a National Plan for Children and Their Families. 1993. Washington, D.C.: Child Welfare League of America, Inc.

This report is designed as a blueprint to chart a new course for America's children and families. It includes a vision for children and families and a role for Government; a set of principles to guide Government programs and services for children and their families; and an implementation strategy to ensure timely and beneficial results of a national children's agenda.

U.S. Advisory Board on Child Abuse and Neglect. 1995 (April). *A Nation's Shame: Fatal Child Abuse and Neglect in the United States.* Washington, D.C.: Administration for Children and Families, U.S. Department of Health and Human Services. **NCJ 157013.**

This report contains 26 recommendations of the U.S. Advisory Board on Child Abuse and Neglect, which was asked to recommend a national policy to reduce and prevent child abuse fatalities, changes to achieve an effective Federal role in implementing the policy, and reforms needed to improve data collection about child abuse and neglect fatalities.

Violence and Youth: Psychology's Response. 1993. Washington, D.C.: American Psychological Association. **NCJ 147390.**

Volume One of the Commission on Youth and Violence Report summarizes the proceedings and highlights key findings. The Commission provides specific recommendations for psychological research and broad public policy recommendations to prevent or mitigate the effects of youth violence. It advocates early childhood intervention, school-based educational programs, cultural diversity awareness, positive media involvement, firearms prevention, drug and alcohol prevention, education programs on hate crimes, control of mob violence, and professional involvement of psychologists in youth violence reduction.

Violence: Report to the President and Domestic Policy Council. 1994 (January). Washington, D.C.: Interdepartmental Working Group on Violence. **NCJ 159325.**

This report was prepared by representatives from the U.S. Departments of Agriculture, Education, Health and Human Services, Housing and Urban Development, Justice, and Labor; and the Office of National Drug

Control Policy. It addresses the following violence-related topics: firearms, media, juvenile crime and violence, schools, youth development, family violence, hate violence, ethnic conflict, gangs,

and sexual assault. One subgroup focused on places where violent acts occur, and the Cities Project worked with State and local officials in Atlanta, GA,

Denver, CO, Nebraska, and Washington, D.C., to develop broad-based, coordinated anti-violence initiatives in their communities.

Appendix E

Program Catalogs and Directories

The following reports that include NCJ numbers are available from the National Criminal Justice Reference Service (NCJRS). For further information, see Appendix F or call the Juvenile Justice Clearinghouse (800-638-8736).

ACCESS ERIC. 1993 (May). *ERIC Directory of Education-Related Information Centers*. Washington, D.C.: U.S. Department of Education.

This directory lists more than 400 organizations that provide information relevant to education. Each entry includes contact information, a brief description of the program or organization, audience served, and access procedures. A subject index provides quick reference to specific subjects and relevant resource centers for education-related requests.

American Youth Work Center. 1993 (December). *The North American Directory of Programs for Runaways, Homeless Youth, and Missing Children*. Washington, D.C.: Center for Substance Abuse Prevention, Office of Juvenile Justice and Delinquency Prevention, and Centers for Disease Control and Prevention. **NCJ 146843**.

This directory provides State-by-State profiles of more than 450 programs serving runaways, homeless youth, and missing children. Each profile contains contact information and the number of youth served by each program/agency annually. Additionally, resources are provided for practitioners and professionals who work with youth, including hotline

numbers, Federal contacts, legislative references, State clearinghouses, and selected national resources.

Catalogue of Hope: Crime Prevention Programs for At-Risk Children. 1994 (April). Washington, D.C.: U.S. Senate Judiciary Committee Majority Staff, U.S. Congress. **NCJ 148952**.

The catalog introduces successful programs for at-risk children that have been implemented across the Nation. Programs include alternatives to gangs, drugs, and the streets; the reduction of juvenile recidivism; mentoring and school-based programs; police officers as prevention partners; the prevention and treatment of drug abuse; and family support and preservation. It provides brief descriptions of the programs as well as contact information and objectives to provide outlets for children who are at risk.

Citizen's Alcohol and Other Drug Prevention Directory: Resources for Getting Involved. 1990. Washington, D.C.: Center for Substance Abuse Prevention, U.S. Department of Health and Human Services. **NCJ 127527**.

This directory is an excellent contact resource for citizens who want to get involved with drug prevention efforts. The comprehensive listing of agencies and

organizations that deal with drug prevention, including Federal agencies, provides overviews of initiatives and strategies as well as contact information at the national, State, and local levels.

Clearinghouse on Child Abuse and Neglect Information. 1992. *A Guide to Funding Resources for Child Abuse and Neglect and Family Violence Programs*. Washington, D.C.: U.S. Department of Health and Human Services. **NCJ 140551**.

This is a detailed sourcebook on funding within the Federal Government for projects and programs that address child abuse and neglect, domestic violence, elder abuse and neglect, and other forms of family violence. It provides brief descriptions of each Federal agency; sources of funding; examples of discretionary grants and contracts funded in the past; and some eligibility requirements and agency priorities related to funding activities, programs, and initiatives. It includes additional sources of information publications, information clearinghouses, resource centers, national organizations, computerized data bases, Federal regional contacts, and State contacts.

Communities Creating Change: Exemplary Alcohol and Other Drug Prevention Programs. 1991. Rockville, Md.:

Center for Substance Abuse Prevention, U.S. Department of Health and Human Services. **NCJ 130078.**

This document profiles 10 exemplary alcohol and other drug prevention programs as models that can be replicated or adapted in communities throughout the Nation. Each program listed works with high-risk youth and their parents, teachers, and the greater community. Honorable mention programs are also listed.

Correctional and Juvenile Justice Training Directory of North America 1990. 1990. Richmond, Ky.: Department of Correctional Services Training Resource Center, Eastern Kentucky University. **NCJ 139504.**

This directory provides information and contacts for State correctional training programs as well as Federal, military, Canadian, and English/Welsh training programs.

Costello, L., ed. 1995. *Part of the Solution: Creative Alternatives for Youth.* Washington, D.C.: National Assembly of State Arts Agencies. **NCJ 152982.**

Part of a series, this publication shares the success stories of 11 organizations that use the arts, with assistance from the National Endowment for the Arts, to combat problems of teenage pregnancy, violence, drug abuse, and dropouts. The collection includes contact information for each of the programs studied and profiles additional State and regional projects.

Directory of Criminal Justice Information Sources, 9th Edition 1994. 1994. National Institute of Justice, U.S. Department of Justice. **NCJ 144767.**

This directory contains information on 158 criminal justice organizations that provide information services on a national, regional, and/or statewide basis. Additionally, it lists Criminal Justice Information Exchange (CJIE) members, State criminal justice representatives, and Federal Information Centers.

Directory of Victim Assistance Programs and Resources, 1994 Edition. 1994. Washington, D.C.: National Organization for Victim Assistance. **NCJ 159767.**

This directory lists victim programs and services throughout the United States. Organized by State, city, and program, it is an excellent resource for local assistance services or programs.

Disposition Resource Manual. 1990. Washington, D.C.: National Council of Juvenile and Family Court Judges. **NCJ 137693.**

This manual previews exemplary programs that have shown promising and/or positive results for juveniles. It includes projects that address prevention, diversion, probation, neglect, abuse, custody, family violence, and after-care as well as a State-by-State program index. Each program profile contains information on the client population served, objectives, a program description, information on effectiveness, and contact information.

Federal Agency Juvenile Delinquency Development Statements. 1992 (August). Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 134926.**

This report describes the programs, legislation, policies, and practices of Federal agencies that

supported the goals of the OJJDP Act during FY 1989. This comprehensive overview of Federal initiatives for juvenile justice and delinquency prevention includes information on more than 260 programs directed to the needs of delinquent juveniles.

Federal Interagency Ad Hoc Committee on Health Promotion Through the Schools. 1992. *Healthy Schools: A Directory of Federal Programs and Activities Related to Health Promotion Through the Schools.* Washington, D.C.: U.S. Department of Health and Human Services. **NCJ 143041.**

This directory describes 112 Federal programs and 35 federally supported clearinghouses or information centers that address activities for health promotion in elementary or secondary schools. Each program description includes areas of emphasis, program components and subject matter, youth and adult target groups, a narrative summary, and contact information.

Federal Juvenile Delinquency Programs 1988, 12th Analysis & Evaluation. 1988. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 115786.**

This overview of federally initiated efforts to reduce juvenile delinquency lists programs funded and projects underway, along with funding amounts and objectives for each program.

The Gould-Wysinger Awards: A tradition of excellence. *OJJDP Model Programs 1993.* 1994 (February). Juvenile Justice Bulletin. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 146840.**

The Gould-Wysinger Awards were established by the Office of Juvenile Justice and Delinquency Prevention in 1992 to recognize local achievements in improving the juvenile justice system and helping the Nation's youth. This bulletin annually highlights award-winning programs and includes local contact information.

Help for Children From Infancy to Adulthood: A National Directory of Hotlines, Helplines, Organizations, Agencies, and Other Resources, 4th Edition 1989. 1989. Rocky River Publishers. **NCJ 154577.**

This book provides referral sources and contact information on commissions, agencies, and organizations. Topics include child safety, teens in distress, abused and missing children, children's health, and parenting.

Howell, J.C., ed. 1995 (May). *Guide for Implementing the Comprehensive Strategy for Serious, Violent, and Chronic Juvenile Offenders.* Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 153681.**

This document provides program information to address the rise in violent juvenile crime. It surveys research that addresses community mobilization, needs assessment of communities, and identification of prevention and intervention activities in a graduated sanctions model.

Justice Research and Statistics Association. 1994. *Domestic and Family Violence: Highlighted Programs from the State Annual Reports 1994.* Washington, D.C.: Bureau of Justice Assistance, U.S. Department of Justice. **NCJ 150549.**

This document contains listings by State of domestic and family violence programs funded by the Bureau of Justice Assistance. It is a source for initiating and replicating innovative programs and improving existing programs. It provides contact information, program descriptions, and target populations.

Justice Research and Statistics Association. *State and Local Programs: Focus on What Works.* Volume I. 1994. Washington, D.C.: Bureau of Justice Assistance, U.S. Department of Justice. **NCJ 157143.**

Effective State and local programming policies are cataloged and described in this volume. Programs are listed under four major headings: rural issues and programs; treatment, rehabilitation, and education; the understanding and combating of violence; and the prevention of drug abuse and violent crime.

Juvenile Delinquency Development Statements: A Report on Federal Programs. 1994 (November). Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 150712.**

This report contains the annual statements of 18 Federal agencies that administer juvenile delinquency programs. The statements describe policies, programs, and practices of each agency and detail how these agencies meet the mandates and advance the goals of the Juvenile Justice and Delinquency Prevention Act.

Matrix of Community-Based Initiatives. 1995. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 154816.**

This directory contains two major sections: a matrix that shows the locations of public and private comprehensive community-based violence prevention and economic development initiatives, and program descriptions of private and Federal initiatives. The matrix lists States and jurisdictions where initiatives are located as well as Federal departments and foundations and the initiatives they sponsor, such as Enterprise Communities, Federal Empowerment Zones, PACT sites, and major philanthropic initiatives. Each initiative has a local, interdisciplinary planning board focused on the needs of at-risk children and families. Contact information is provided with each program description.

National Court Appointed Special Advocates Association. 1992. *1992-1993 Directory of Court Appointed Special Advocate Programs.* Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 152326.**

In 1991, more than 28,000 individuals acted as Court Appointed Special Advocates (CASA's) for children who were abused, neglected, or abandoned by their families. This directory lists alphabetically the 520 CASA programs in the 49 participating States.

National Directory of Children, Youth, and Families Services, 9th Edition 1993-94. 1993. National Directory of Children, Youth, and Families Services. **NCJ 143508.**

This three-part directory includes information on human services provided by States, counties, and major cities; "who's who" in Federal children, youth, and families programs, national clearinghouses, resource centers, and

organizations; and buyers' resources for specialized services and products available in the field. Information on how each State renders its services as well as a listing of State hotlines and emergency reporting numbers are also provided.

National Directory of Domestic Violence Programs: A Guide to Community Shelter, Safe Home, and Service Programs. 1994. Washington, D.C.: National Coalition Against Domestic Violence. **NCJ 160049.**

This directory provides a State-by-State listing of programs that serve battered women and their children. Information on 24-hour hotlines, safe houses, counseling, shelters, legal services, and services/counseling programs for batterers is included. Additionally, the directory includes listings of State domestic violence coalitions and national information and resource centers.

National Directory of Juvenile Restitution Programs 1987, Restitution Training and Technical Assistance (RESTTA). 1987. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 105188.**

This directory lists juvenile restitution programs by State and includes information on types of services provided, when they were established, and brief descriptions of programs and goals.

National Juvenile Detention Directory 1992. 1992. Washington, D.C.: American Correctional Association. **NCJ 136153.**

This comprehensive directory provides information relevant to

juvenile detention facilities. It includes contact information for wardens and administrators of juvenile State correctional departments, institutions, programs, and probation and parole/aftercare services.

National Listing of Children's Advocacy Centers 1996. 1996 (January). Alexandria, Va.: National Network of Children's Advocacy Centers.

A useful reference for legal services for children, advocates of children's rights, crisis intervention organizations, counselors, and temporary shelters, this document provides listings by State of Children's Advocacy Centers, accompanied by contact information. (Note: Some listings are tentative sites.)

The National Victims Resource Directory 1994. 1994. Rockville, Md.: Office for Victims of Crime Resource Center. **NCJ 123837.**

This resource directory contains listings for victim-serving agencies, clearinghouses, and resource centers. It describes the functions of each organization listed, the type and degree of support available to victims of crime, State victim compensation boards, victim/witness assistance programs, State domestic violence coalitions, and State chapters of the National Committee to Prevent Child Abuse. Federal clearinghouses and information centers are listed for victim-relevant requests.

National Directory of Juvenile and Adult Correctional Departments, Institutions, Agencies and Paroling Authorities 1994. 1993. Washington, D.C.: American Correctional Association. **NCJ 148411.**

This directory lists contact information for wardens/administrators of more than 4,000 adult and juvenile State correctional departments, institutions, programs, and probation and parole/aftercare services. It includes statistical summaries on capital expenditures and projects, inmate populations, adult programs, and personnel.

Office of National Drug Control Policy. 1991 (April). *Directory of Federal Anti-Drug Grants.* Washington, D.C.: U.S. Government Printing Office. **NCJ 140794.**

This directory outlines national drug control programs funded by the U.S. Departments of Education, Health and Human Services, Housing and Urban Development, Justice, and Labor. Funding opportunities by these departments include demonstration grants, emergency grants, State and local grants, regional centers, and community partnerships for substance abuse prevention and education. Appendixes give information on State contacts for formula grants, drug-free schools, and community grants; block grant contacts; and State liaisons for the Job Training Partnership Act.

Partnerships Against Violence. 1995. Resource Guide Volumes 1 and 2. Washington, D.C.: U.S. Government Printing Office. **NCJ 150044** and **NCJ 150045.**

This guide integrates information on a wide range of programs and resources addressing the issue of violence in the United States. Volume 1, *Promising Programs*, highlights 600 programs developed by Government agencies, private foundations, religious and fraternal associations,

and community organizations. Volume 2, *Information Sources, Funding, and Technical Assistance*, offers sources for direct help, curriculums and teaching materials, and funding. The entries are also available on the Internet (gopher:pavnet.esusda.gov) and on WordPerfect 5.1 and ASCII disks. The Partnerships Against Violence Network (PAVNET) is an automated resource system providing anti-crime information. Accessible through the Internet and in hard copy, PAVNET is a data bank on violence reduction programs and includes promising programs, funding sources, how programs operate, audiences served, evaluation results, and contacts for further information.

PAVNET Online User's Guide. *Research in Action*. 1995 (March). Washington, D.C.: National Institute of Justice, U.S. Department of Justice. **NCJ 152057**.

This publication introduces PAVNET Online to users, providing an overview of information available through PAVNET Online as well as technical information about accessing and using PAVNET Online through the Internet. It includes a glossary of terms and a selected bibliography.

Preventing Violence: Program Ideas and Examples. 1992. Washington, D.C.: National Crime Prevention Council. **NCJ 136251**.

This volume profiles 27 violence prevention programs operating at local or State levels and suggests actions that communities and community members can take to prevent or stop violence. Each program description includes setting, focus, strategies,

signs of success, funding, and challenges. Lists of resource organizations and program contact information are included.

Public Health Service Office of Disease Prevention and Health Promotion. 1994. *Prevention: Federal Programs and Progress '93/'94*. Washington, D.C.: U.S. Department of Health and Human Services.

This biennial report on prevention-related activities of the Federal Government provides a comprehensive listing of U.S. Public Health Service, Administration on Aging, Administration for Children and Families, and Healthcare Financing Administration prevention programs. The report highlights model prevention programs for minorities, gives an overview of the national health status, provides prevention program summaries by agency, and displays the resources spent on prevention by the U.S. Department of Health and Human Services.

Reducing Youth Gun Violence: An Overview of Programs and Initiatives. 1996. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 154303**.

This report provides a summary of Federal and State legislation designed to reduce youth gun violence. It also presents research findings on this issue from the public health, criminology, and sociology fields. It includes descriptions of prevention and intervention programs and directories of youth gun violence programs and national organizations working to prevent gun possession and use by youth.

Reingold, J.R., and B.R. Frank. 1993 (November). *Targeting Youth: The Sourcebook for Federal Policies and Programs*. Flint, Mich.: Charles Stewart Mott Foundation. **NCJ 147546**.

This document lists youth programs administered by Federal Government agencies and includes a description of each agency's funding allocations to States. Clearinghouse information; resource organizations; a selected bibliography; an index of programs by topic; and information on the funding organizations, sponsors, and authors of the sourcebook are also provided.

Smith, A. 1992. *Thirty-Eight Proven Ways You Can Stop Youthful Violence*. Big Brothers/Big Sisters of New York City, NY. **NCJ 139887**.

Based on a survey compiled by Big Brothers/Big Sisters of New York City, this document profiles the programs of 38 organizations that have proven successful in stopping youthful violence. Each organization describes its successes and the programs it would like to expand or implement.

State Drug Resources: 1994 National Directory. 1994. Washington D.C.: Bureau of Justice Statistics, U.S. Department of Justice. **NCJ 147709**.

A comprehensive resource manual, this guide provides contact information for State offices of policy, criminal justice, health, and education. The appendixes list Federal information centers and clearinghouses.

Substance Abuse Residential Treatment Centers for Teens. 1990. Phoenix, Ariz.: Oryx Press. **NCJ 121154**.

This resource offers a State-by-State listing of teen substance abuse treatment facilities and hotlines, treatment methods, addictions/disorders treated, and types of client services offered. Indexes are provided for quick reference to specific types of programs or specific State centers.

Tolan, P., and N. Guerra. 1994 (July). *What Works in Reducing Adolescent Violence: An Empirical Review of the Field*. Boulder, Colo.: The Center for the Study and Prevention of Violence. **NCJ 152910**.

This examination of anti-violence programs explores epidemiological considerations associated with adolescent violence. The study includes a review of risk literature highlighting promising targets for intervention and presents outcomes of evaluation efforts

based on risk factors and strategies employed. The report concludes with recommendations for research as well as program and policy actions designed to improve the effectiveness of anti-violence interventions that will significantly impact the problem of juvenile violence.

Violence in the Schools: How America's School Boards Are Safeguarding Your Children. 1993. Alexandria, Va.: National School Boards Association. **NCJ 157000**.

This audit of the ways school boards address violence in schools is divided into three sections: the problem of juvenile violence and how school boards must keep schools safe; descriptions of the ways schools are addressing the problem of violence; and listings of school districts that responded to the National

School Boards Association survey on school violence. It provides addresses, sizes, and types of districts in which schools are located, categorized by State and district.

What Works: Promising Interventions in Juvenile Justice. 1994 (October). Program Report. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 150858**.

This catalog lists 425 effective prevention, intervention, and treatment programs for youth. Each entry includes contact information, target population, program type, structure, staff, budget, program summary, evaluation, and other information. The catalog also includes a local contact for each program listed.

Appendix F

Annotated Bibliography

This annotated bibliography lists all documents that are referenced in the *Action Plan* and other useful resources. It is organized by section corresponding to the *Action Plan*. Entries are listed in alphabetical order by author's last name; if no author is identified, the publication is listed by title or the organization that published it. Each entry includes a brief annotation.

The National Criminal Justice Reference Service (NCJRS) Research and Information Center offers many publications listed in the *Action Plan*. NCJ (National Criminal Justice) numbers indicate that the document is maintained in the Research and Information Center, which makes many of these publications available on microfiche, through paper reproduction, or interlibrary loan.

Juvenile Justice Clearinghouse

As a service of the U.S. Department of Justice's Office of Juvenile Justice and Delinquency Prevention (OJJDP), the Juvenile Justice Clearinghouse (JJC), a component of NCJRS, welcomes the opportunity to help you obtain publications and information useful to the field of juvenile justice. Through JJC, OJJDP collects and disseminates agency publications, research findings, and program evaluations.

The Juvenile Justice Clearinghouse:

- Acquires more than 1,000 new titles on juvenile justice each year.
- Maintains a toll-free number for information requests.
- Provides onsite reference and library services and prepares specialized responses to information requests.
- Collects, synthesizes, and disseminates information on all areas of juvenile justice.
- Offers electronic access to news and announcements from OJJDP.
- Distributes a variety of OJJDP and other publications.

If you would like more information, call or write:

Juvenile Justice Clearinghouse
1600 Research Boulevard
Rockville, MD 20850
800-638-8736

Electronic Bulletin Board
301-738-8895

JUVJUST: The OJJDP Juvenile Justice Listserv

OJJDP invites you to subscribe electronically to its listserv. OJJDP and NCJRS offer a new service, JUVJUST, an electronic mailing

list that provides subscribers with timely and relevant juvenile justice information directly from OJJDP. Participation in JUVJUST is free, although users must have access to Internet E-mail. Subscribers can receive the service by following these steps:

1. Send an E-mail message to: **listproc@aspensys.com** (please use lowercase letters only).
2. Leave the subject line blank.
3. In the body of the message, type: **subscribe juvjust your name** (For example: **subscribe juvjust john doe**)

National Criminal Justice Reference Service Online

NCJRS Gopher

The NCJRS gopher menus provide OJJDP information and direct links to the NCJRS Bulletin Board and international criminal justice resources. The gopher address is: **ncjrs.aspensys.com:71**

NCJRS World Wide Web (WWW)

This service provides a graphical interface to NCJRS information and international criminal justice resources. The address for the NCJRS WWW is: **http://ncjrs.aspensys.com:81/ncjrshome.html**

NCJRS Anonymous FTP

When you connect to the NCJRS FTP site, you can download full text publications and software. To access FTP:

1. From your system type:
ftp ncjrs.aspensys.com
System displays a login prompt.
2. Type: **anonymous**
System prompts you for your password.
3. Type your E-mail address.
For example: **jdoe@aol.com**
System displays **ftp>**
4. Type: **cd pub/ncjrs** to change the directory.
5. Type: **get README.NCJRS** to download the file that describes all the documents available at the FTP site, or type **ls** to see a list of the files.

E-mail for Information

First-time users can send an E-mail message to automatically receive a reply outlining the services of NCJRS. Send E-mail to:
look@ncjrs.aspensys.com

E-mail for Technical Help

If you need technical assistance or have specific questions, please send an E-mail message to:

Introduction

Allen-Hagen, B., M. Sickmund, and H. Snyder. 1994 (November). *Juveniles and Violence: Juvenile Offending and Victimization*. Fact Sheet #19. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ FS09419**.

This fact sheet presents statistical data and trends about juvenile offenders and juvenile victims of violence. Between 1988 and 1992, juvenile arrests for violent crime, juvenile gun use, weapons arrests, weapons carrying, and gang membership increased dramatically. Data are provided on juvenile victims of violent crime, particularly homicide. The fact sheet also discusses Federal approaches to child maltreatment.

Cities In Schools, Inc., *Seeds of Hope: A Guide for Program Resources*. 1995. Alexandria, Va.

This guide of resources that help those involved in child rearing is organized into four focus areas. The four focuses are Preschool/family, School, Community, and Early Intervention, which support the basic principles of Cities In Schools, Inc. The four principles are as follows: Every child needs and deserves a personal, one-on-one relationship with a caring adult; every child needs

and deserves a safe place to learn and grow; every child needs and deserves a marketable skill to use upon graduation; and every child needs and deserves a chance to give back to peers and community. This edition of the guide also includes a network consultant directory that lists individuals who are willing to share their expertise and experience with others.

Delinquency Prevention Works. 1995 (May). Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 155006**.

This publication provides a synthesis of the most current information on programs and strategies that seek to prevent delinquency. It explains the theory of risk-focused prevention and correlates it to stages of youth development and areas of focus. It references relevant research and evaluation efforts to ground these programs and provide a context for their successful implementation.

Federal Bureau of Investigation. 1994. *Crime in the United States, 1993: Uniform Crime Reports*. Washington, D.C.: U.S. Department of Justice. **NCJ 151712**.

This report presents statistics on FBI Crime Index offenses, including trend data, crimes

cleared, arrests, and law enforcement personnel, based on information provided by State and local law enforcement agencies. Population size is the only correlate of crime used in the report; however, the introduction includes an overview of other crime factors. The report includes numerous tables and figures and a description of the research methodology.

Guide for Implementing the Comprehensive Strategy for Serious, Violent, and Chronic Juvenile Offenders. 1995 (June). OJJDP Update on Programs. Juvenile Justice Bulletin. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 153571**.

This update presents an overview of the *Guide for Implementing the Comprehensive Strategy for Serious, Violent, and Chronic Juvenile Offenders*, which communities nationwide can use as a tool for addressing the problem of juvenile delinquency.

Howell, J.C., ed. 1995 (May). *Guide for Implementing the Comprehensive Strategy for Serious, Violent, and Chronic Juvenile Offenders*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 153681**.

This document provides a guide for communities to address the problem of juvenile delinquency.

It is divided into four major sections. Part I provides a step-by-step process for communities to implement the Comprehensive Strategy that focuses on system-level issues. Part II describes a risk-focused prevention strategy and promising and effective prevention programs for particular age groups. Part III promotes effective interventions for serious, violent, and chronic juvenile offenders by examining relevant research literature, setting forth guidelines for a system of graduated sanctions, and describing promising programs. Part IV examines how juvenile justice practitioners can use assessment and classification tools in prevention and graduated sanctions programs.

Moone, J. 1994 (June). *Juvenile Victimization: 1987–1992*. Fact Sheet #17. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ FS009417**.

This fact sheet notes that from 1987 to 1992, juveniles suffered almost twice the victimization rate of persons aged 25–34, and more than 5 times the victimization rate of persons aged over 35.

Schulman, K., and S.R. Markwood. 1995 (July). *Counties Care for Kids: Programs That Work*. Washington, D.C.: National Association of Counties.

Programs highlighted in this guide provide examples of innovative and collaborative approaches that counties have successfully applied to address the needs of their community's children and families. These programs focus on early intervention and prevention strategies that address the needs of the

whole child and family, rather than provide a fragmented approach to children's services.

Snyder, H. 1994 (May). *Are Juveniles Driving the Violent Crime Trends?* Fact Sheet #16. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ FS009416**.

This fact sheet concludes that juveniles are not driving the violent crime trends, although their responsibility for the growth in violent crime in the United States has increased.

Snyder, H. 1994 (May). *1992 Juvenile Arrests*. Fact Sheet #13. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ FS009413**.

This fact sheet reports that in 1992, law enforcement agencies made 2.3 million arrests of juveniles and that juvenile arrests grew at a greater rate than adult arrests. The document provides detailed statistics.

Snyder, H., and M. Sickmund. 1995 (May). *Juvenile Offenders and Victims: A Focus on Violence*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 153570**.

This statistics summary consolidates the most recent information on violent crimes committed by and against juveniles. It presents complex data on juvenile crime using clear, nontechnical writing and easy-to-understand graphics and tables.

Snyder, H., and M. Sickmund. 1995 (August). *Juvenile Offenders and Victims: A National Report*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 153569**.

This report provides the most current and reliable information available on the extent and nature of juvenile crime and victimization and describes the juvenile justice system's response. It focuses on how the system must react to the law-violating behaviors of youth in a manner that not only protects the community and holds youth accountable, but also enhances the youth's ability to live productively and responsibly in the community.

Wilson, J.J., and J.C. Howell. 1993. *Comprehensive Strategy for Serious, Violent, and Chronic Juvenile Offenders*. Program Summary. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 143453**.

This program summary presents an overview of relevant statistics, research, and program evaluations to support the development of a comprehensive strategy for serious, violent, and chronic juvenile offenders. General principles of the plan include strengthening the family; supporting core social institutions; promoting delinquency prevention; intervening immediately and effectively when delinquent behavior occurs; and identifying and controlling this group of juvenile offenders. The plan recommends the development of a continuum of care for juvenile offenders, with graduated sanctions.

Wilson, J.J., and J.C. Howell. 1993 (August). *Serious, Violent, and Chronic Juvenile Offenders: A Comprehensive Strategy*. Fact Sheet #4. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ FS009304**.

This fact sheet summarizes OJJDP's *Comprehensive Strategy for Serious, Violent, and Chronic Juvenile Offenders*, outlining key principles for preventing and reducing at-risk behavior and delinquency and identifying expected benefits.

Wood, G.E. 1995 (September). *Coordinating Council on Juvenile Justice and Delinquency Prevention*. Fact Sheet #31. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ FS009531.**

This fact sheet details the Coordinating Council's responsibilities and delineates the Council's

activities, special initiatives, and publications. The document describes *The National Juvenile Justice Action Plan*, summarizing critical principles and objectives for preventing delinquency, intervening in early delinquent behavior, and responding effectively to serious, violent, and chronic juvenile offenders.

Section 1: Provide Immediate Intervention and Appropriate Sanctions and Treatment for Delinquent Juveniles

Allen-Hagen, B. 1991 (January). *Public Juvenile Facilities: Children in Custody 1989*. OJJDP Update on Statistics. Juvenile Justice Bulletin. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 127189**.

This update presents the initial findings of 1,100 public facilities surveyed in OJJDP's 1989 Children in Custody census. The national census surveyed more than 3,200 public and private facilities that provide custody for more than 92,000 children who are wards of juvenile courts, juvenile corrections agencies, or private agencies.

Altschuler, D.M. 1994. Tough and smart juvenile incarceration: Reintegrating punishment, deterrence and rehabilitation. *Saint Louis University Public Law Review* 14(1):217-237. **NCJ 158827**.

This article reviews recent policy changes for handling juvenile offenders and recommends a reintegration-oriented institutional corrections model that merges the use of secure confinement and provision of aftercare. The

article concludes that all key agencies responsible for juvenile offenders must take concerted steps to ensure that obstacles to effective juvenile handling are removed and that adequate resources are available in the juvenile justice system.

Altschuler, D.M., and T.L. Armstrong. 1995 (Summer). Aftercare in the juvenile justice system: New trends and programs. *Perspectives* 19(3):24-29, 32-35. **NCJ 157511**.

This article analyzes weaknesses in the aftercare phase of juvenile corrections and outlines the Intensive Juvenile Aftercare Program (IAP) model as implemented in Colorado, Nevada, New Jersey, and Virginia. The article concludes that the IAP model is potentially more effective than past aftercare programs because it directs increased attention to individualized services and treatment.

Altschuler, D.M., and T.L. Armstrong. 1995 (Summer). Managing aftercare services for delinquents. In Glick and Goldstein, eds. *Managing Delinquency Programs That Work* (with permission from the American Correctional Association, Lanham, Md.). **NCJ 154391**.

This book addresses the management and administration of juvenile delinquents, including those incarcerated and placed in

residential facilities and those maintained in community-based programs and services.

Altschuler, D.M., and T.L. Armstrong. 1994 (October). *Intensive Aftercare for High-Risk Juveniles: An Assessment*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 144018**.

This report reviews programs and literature concerning juvenile prerelease, transition, reintegration, and aftercare. It includes information on assessment and classification for risk and need, descriptions of community- and institution-based programs, and an overview of theory-driven interventions.

Altschuler, D.M., and T.L. Armstrong. 1994 (September). *Intensive Aftercare for High-Risk Juveniles: A Community Care Model*. Program Summary. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 147575**.

This summary reports on the interim results of OJJDP's research and development initiative to assess, test, and disseminate information on theory-driven intensive aftercare program models based on risk assessment. Models are for serious, violent, and chronic juvenile offenders who initially require secure confinement.

Altschuler, D.M., and T.L. Armstrong. 1994 (September). *Intensive Aftercare for High-Risk Juveniles: Policies and Procedures*. Program Summary. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 147712**.

This summary describes intensive community-based aftercare program initiatives designed to help public and private corrections agencies develop and implement effective aftercare services for serious, violent, and chronic juvenile offenders who initially require secure confinement.

Altschuler, D.M., and T.L. Armstrong. 1992 (June). *Intensive Aftercare for High-Risk Juvenile Parolees: A Model Program Design*. Baltimore, Md.: Institute for Policy Studies, Johns Hopkins University. **NCJ 139337**.

This document describes the framework for the prototype juvenile aftercare model proposed for field testing, following an assessment of community-based aftercare programs for chronic juvenile offenders released from residential correctional facilities. The proposed model addresses two deficiencies of the current system: that institutional confinement does not adequately prepare youth for return to the community and that lessons learned in secure confinement are not monitored or reinforced outside.

Altschuler, D.M., and T.L. Armstrong. 1991. Intensive aftercare for the high-risk juvenile parolee: Issues and approaches in reintegration and community supervision. In T.L. Armstrong, ed.

Intensive Interventions with High-Risk Youths. Monsey, N.Y.: Willow Tree Press, Inc. **NCJ 129821**.

This chapter summarizes work to date in an intensive, community-based parole program for high-risk juvenile offenders released from secure confinement. It identifies and reviews key topics and issues in juvenile intensive aftercare and describes an aftercare intervention model.

American Correctional Association Victims Committee. 1994 (August). *Report and Recommendations on Victims of Juvenile Crime*. Lanham, Md.: American Correctional Association. **NCJ 159768**.

This report offers an assessment of the current status of victims of juvenile offenders. It includes 16 recommendations designed to increase efforts among juvenile justice officials and victim service professionals to meet the needs of the growing victim population.

Armstrong, T.L., ed. 1991. *Intensive Interventions with High-Risk Youths*. Monsey, N.Y.: Willow Tree Press, Inc. **NCJ 129819**.

This collection of 14 papers on intensive interventions with high-risk youth is an overview and evaluation of juvenile intensive supervision, programming issues, and specialized approaches.

Baggett, G., R. Donough, P. MacRae, and S. Engel. 1990. *Oregon Girls' Advocacy Project: Final Report*. Ashland, Ore.: Juvenile Justice Advisory Committee, Oregon Commission on Children and Youth Services. **NCJ 151815**.

This report presents the results of a year-long study that found that physical and sexual abuse, alcohol and drug abuse,

homelessness, and adolescent pregnancy were the primary problems confronting girls and young women in Oregon. The report concludes with recommendations to the Oregon Commission on Children and Youth Services for addressing these needs.

Barton, W.H., and J.A. Butts. 1991. Intensive supervision alternatives for adjudicated juveniles. In T.L. Armstrong, ed. *Intensive Interventions with High-Risk Youths*. Monsey, N.Y.: Willow Tree Press, Inc. **NCJ 129830**.

This chapter describes a study of three inhome intensive supervision programs in Detroit, MI, that provide alternatives to institutionalization for juvenile offenders.

Barton, W.H., and J.A. Butts. 1990. Accommodating innovation in a juvenile court. *Criminal Justice Policy Review* 4(2):144-158. **NCJ 134134**.

This article examines how the impact of three cost-effective alternatives to juvenile institutionalization in Wayne County, MI, was diluted by the policies of juvenile justice organizations. All used a mix of individual, group, and family counseling; educational and vocational support; recreation; and behavioral supervision.

Bazemore, G. 1991. Work experience and employment programming for serious juvenile offenders: Prospects for a "productive engagement" model of intensive supervision. In T.L. Armstrong, ed. *Intensive Interventions with High-Risk Youths*. Monsey, N.Y.: Willow Tree Press, Inc. **NCJ 129823**.

This chapter describes the “productive engagement” approach to intensive supervision of juvenile offenders. The approach features the systematic use of employment of offenders to achieve public protection and restitution to the victim and community.

Bazemore, G., and M.S. Umbreit. 1994 (October). *Balanced and Restorative Justice*. Program Summary. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 149727**.

This summary describes how the balanced, restorative justice model uses a community-based system to impose restorative sanctions such as community service, victim involvement, mediation, and restitution on youthful offenders. The model seeks to attain a balance between the legitimate needs of the community, the juvenile offender, and the victim, enhancing community protection, competency development, and accountability.

Bureau of Justice Statistics. 1992. *Criminal Victimization in the United States*. Washington, D.C.: U.S. Department of Justice. **NCJ 145125**.

This report provides detailed findings from the 1992 National Crime Victimization Survey, which covers a wide range of crimes, including rape, robbery, assault, personal and household larceny, household burglary, and motor vehicle theft. The report presents 25 data tables on the major variables measured by the survey, including offender, victim, and crime characteristics; substance use by the offender; offender-victim relationship; and the reporting of the crime to

police, the reasons for reporting or not reporting the crime, and police response time.

Bureau of Justice Statistics. 1994. *Sourcebook of Criminal Justice Statistics—1993*. 1994. Washington, D.C.: Bureau of Justice Statistics, U.S. Department of Justice. **NCJ 148211**.

This annual reference publication presents data on juvenile corrections, courts, and delinquency, including statistics and characteristics on juveniles in custody, cases processed, public opinion, and self-reports of crime.

Burke, V.B. 1992 (March). Reauthorization of the Juvenile Justice and Delinquency Prevention Act: Testimony before the House Committee on Education and Labor, Subcommittee on Human Resources, March 16, 1992. **NCJ 136971**.

The director of a community-based center for high-risk teenage girls discusses female service needs in the juvenile justice system. She recommends that girls' special needs be addressed in the reauthorization of the Juvenile Justice and Delinquency Prevention Act.

Butts, J.A., and H. Snyder. 1992 (September). *Restitution and Juvenile Recidivism*. OJJDP Update on Research. Juvenile Justice Bulletin. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 137774**.

Using data provided to the National Juvenile Court Date Archive by State and local agencies on the processing of juvenile court cases, this report explores the relationship between the use of juvenile restitution and recidivism.

Camp, G.M., and C.G. Camp. 1990. *Corrections Yearbook, 1990: Juvenile Corrections*. South Salem, N.Y.: Criminal Justice Institute. **NCJ 127005**.

This report presents information about juvenile correctional populations, institutions, programs, and personnel in 1990. It includes figures, tables, and narrative summaries.

Carey, J.T., and P.D. McAnany. 1984. *Introduction to Juvenile Delinquency: Youth and the Law*. Englewood Cliffs, N.J.: Prentice-Hall, Inc. **NCJ 116445**.

The chapters of this book are organized around four major themes: the interaction between juvenile law and specific popular and theoretical notions about adolescence; the possibilities of a better fit between theories of delinquency and policy/practice; the unintended institutional and personal consequences of society's ambivalent attitudes toward juveniles; and the feasibility of integrating official and unofficial modes of dispute settlement.

Cellini, H.R. 1994 (July). Management and treatment of institutionalized violent juveniles. *Corrections Today* 56(4):98, 100–102. **NCJ 149897**.

This article addresses issues facing security staff, correctional administrators, and mental health staff in terms of crisis intervention and the long-term management of violent juvenile offenders. It offers seven key crisis intervention steps to decrease violence.

Chesney-Lind, M., and R.G. Sheldon. 1992. *Girls: Delinquency and Juvenile Justice*. Pacific Grove, Calif.: Brooks/Cole Publishing Company. **NCJ 137531**.

This analysis of female juvenile delinquency focuses on its nature and causes, details the experiences of female status offenders and delinquents in the juvenile justice system, and presents data supporting the theory that female delinquents and status offenders have different needs from those of male offenders.

Cohen, M.A. 1994. *The Monetary Value of Saving a High-Risk Youth*. Washington, D.C.: The Urban Institute. **NCJ 159769**.

This publication addresses important questions about juvenile programs: What are the benefits, value, and results? The document establishes a new framework for analysis and provides some preliminary estimates of the potential benefits from intervention programs aimed at high-risk youth.

Cronin, R.C., and M. Han. 1994 (October). *Boot Camps for Adult and Juvenile Offenders: Overview and Update*. Washington, D.C.: National Institute of Justice, U.S. Department of Justice. **NCJ 149175**.

This publication draws on published and unpublished documents, a mail survey of State correctional departments in all 50 States and the District of Columbia, and a telephone survey of State juvenile correction agencies to provide an overview of current information about U.S. bootcamp programs (not including work camps) and to describe current research and development activities.

DeComo, R., et al. 1995 (May). *Juveniles Taken Into Custody: Fiscal Year 1992*. Statistics Report. Washington, D.C.: Office of Juvenile Justice and

Delinquency Prevention, U.S. Department of Justice. **NCJ 153851**.

This report presents information on juveniles taken into custody in 40 States and the District of Columbia. It reports on the number and characteristics of such juveniles, the number of juveniles who died in custody and the circumstances of their deaths, and the trends demonstrated by the data. Separate data are presented for juvenile nonoffenders, status offenders, delinquent offenders, and types of facilities, such as secure detention and correctional facilities, jails, and lockups.

Delinquency Prevention Works. 1995 (May). Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 155006**.

See introduction for annotation.

Effective Practices in Juvenile Correctional Education: A Study of the Literature and Research 1980-1992. 1994. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 150066**.

This report provides a comprehensive review of literature and research on topics related to correctional education, such as programs for female offenders, law-related education, special education, and community-based programs.

Empey, L.T. 1982. *American Delinquency: Its Meaning and Construction*. Homewood, Ill.: The Dorsey Press. **NCJ 085102**.

This book examines the causes, extent, nature, and scientific explanations of delinquency in the United States. It concludes with chapters on the traditional

concepts and the contemporary revolution of the juvenile justice system.

Empey, L.T., and S. Lubeck. 1971. *The Silverlake Experiment: Testing Delinquency Theory and Community Intervention*. Chicago, Ill.: Aldine Publishing Company. **NCJ 002850**.

This book presents a comparison of community alternatives for juvenile delinquents and the traditional institutional approach. Presenting a 4-year field experiment in community-based treatment of seriously disturbed delinquent males, it contends that this treatment form may be an effective option.

Ervin, L., and A. Schneider. 1990. Explaining the effects of restitution on offenders: Results from a national experiment in juvenile courts. In B. Galaway and J. Hudson, eds. *Criminal Justice, Restitution, and Reconciliation*. Monsey, N.Y.: Willow Tree Press, Inc. **NCJ 126476**.

This chapter reports on a study to determine if the link between restitution and reduced recidivism can be explained by deterrence theory, self-image theory, or social integration theory; none of the theories was supported by data. Results indicated that both restitution and traditional juvenile programs suppress recidivism, but the impact of restitution is greater than that of traditional dispositions.

Fagan, J. 1991. *The Comparative Impacts of Juvenile and Criminal Court Sanctions on Adolescent Felony Offenders*. Washington, D.C.: National Institute of Justice, U.S. Department of Justice. **NCJ 134377**.

This work compares the severity, certainty, and celerity of sanctions for 15- and 16-year-old

adolescents charged with violent felony offenses in New Jersey's juvenile court with identical offenders in matched New York State communities whose cases were adjudicated in criminal court.

Federal Bureau of Investigation. 1994. *Crime in the United States, 1993: Uniform Crime Reports*. Washington, D.C.: U.S. Department of Justice. **NCJ 151712**.

See introduction for annotation.

Forst, M., J. Fagan, and T.S. Vivona. 1989. Youth in prisons and training schools: Perceptions and consequences of the treatment-custody dichotomy. *Juvenile and Family Court Journal* 40(1):1-14. **NCJ 116269**.

Based on interviews with 59 chronic juvenile offenders placed in State training schools and 81 comparable youth sentenced to adult correctional facilities, this article presents a comparison of offenders' perceptions of their correctional experiences.

Fuller, J.R., and W.M. Norton. 1993. Juvenile diversion: The impact of program philosophy on net widening. *Journal of Crime and Justice* 16(1):29-45. **NCJ 143138**.

This article presents theoretical and empirical findings indicating that juvenile diversion programs based on a crime control philosophy (retribution or deterrence) are less likely than treatment-based diversion programs to engage in net widening.

Galaway, B., and J. Hudson, eds. *Criminal Justice, Restitution, and Reconciliation*. 1990. Monsey, N.Y.: Willow Tree Press, Inc. **NCJ 126460**.

Eighteen papers discuss perspectives on and applications of restitution and victim offender

reconciliation and evaluate restitution and reconciliation programs.

Gemignani, R.J. 1994 (October). *Juvenile Correctional Education: A Time for Change*. OJJDP Update on Research. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 151264**.

This update recommends that teachers in correctional institutions incorporate innovative teaching methods to stimulate incarcerated juveniles to learn, and it includes examples of effective educational practices.

Greenwood, P.W., and S. Turner. 1993 (June). Private presentence reports for serious juvenile offenders: Implementation issues and impacts. *Justice Quarterly* 10(2):229-243. **NCJ 145138**.

This article assesses the efforts of the National Center on Institutions and Alternatives to develop client-specific plans, such as alternative sentencing recommendations for serious juvenile offenders. Data are presented on the Los Angeles Probation Department's recommendations for placing juveniles in California Youth Authority institutions.

Guide to Juvenile Restitution. 1985. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 098466**.

This guide presents recommendations for expanding and improving juvenile restitution programs. It discusses basic program decisions, models, implementation, management information systems, evaluation, and resources.

Habitual Juvenile Offenders: Guidelines for Citizen Action and Public Responses. 1991. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 141235**.

This guide provides community information on obtaining public policy, legislative, and political responses to the problem of habitual juvenile offenders. It includes a sample inter-agency agreement and sample legislation.

Hawkins, J.D., and R.F. Catalano, Jr. 1992. *Communities That Care: Action for Drug Abuse Prevention*. San Francisco, Calif.: Jossey-Bass, Inc. **NCJ 142704**.

This book presents a community mobilization strategy based on the social development model of risk-focused prevention that has been implemented in several communities to combat juvenile delinquency, substance abuse, and violence. Beginning with leader training sessions, each community conducts an assessment of local risk and resiliency factors for youth development and develops appropriate strategies.

Hodges, J., N. Giuliotti, and F.M. Porpotage II. 1994 (October). *Improving Literacy Skills of Juvenile Detainees*. *Juvenile Justice Bulletin*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 150707**.

This bulletin describes programs to teach illiterate youth to read and write using a nontraditional, motivational approach that gives them immediate positive feedback and encourages success. The programs focus on phonics and logically sequenced, multi-sensory lessons.

Howell, J.C., ed. 1995 (May). *Guide for Implementing the Comprehensive Strategy for Serious, Violent, and Chronic Juvenile Offenders*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 153681**.

See introduction for annotation.

Interdepartmental Working Group on Violence. 1994. *Violence: Report to the President and Domestic Policy Council*. Washington, D.C. **NCJ 159325**.

This report was prepared by a working group comprising representatives from the U.S. Departments of Agriculture, Education, Health and Human Services, Housing and Urban Development, Justice, and Labor and the Office of National Drug Control Policy. The group divided into 10 subgroups to address the following violence-related topics: firearms, media, juvenile crime and violence, schools, youth development, family violence, hate violence, ethnic conflict, gangs, and sexual assault. A further subgroup focused on places where violent acts occur, and another, the Cities Project, worked with State and local officials in Atlanta, Denver, Nebraska, and Washington, D.C., to develop broad-based, coordinated anti-violence initiatives in their communities.

Jones, M.A., and D. Steinhart. 1994 (August). *Assessing the Need for Secure Detention: A Planning Approach*. San Francisco, Calif.: National Council on Crime and Delinquency. **NCJ 150738**.

This work discusses the National Council on Crime and Delinquency's six-phase strategic planning process to help jurisdictions evaluate the need for

secure bedspace for juvenile detention and to consider nonsecure alternatives to total confinement.

Kids in Trouble: Coordinating Social and Correctional Service Systems for Youth. 1991. Washington, D.C.: National Governors' Association. **NCJ 137269**.

This document provides an overview of innovative approaches to programs and suggests a need for a broad array of community-based approaches integrating social and correctional services. It is based on a philosophy of a continuum of services that provides both adequate supervision and effective intervention with juvenile offenders.

Krisberg, B. 1992. *Juvenile Justice: Improving the Quality of Care*. San Francisco, Calif.: National Council on Crime and Delinquency. **NCJ 141687**.

This document offers a critical examination of the theory and practice of juvenile justice. Current juvenile policies are evaluated in terms of whether juvenile justice interventions respond to the needs of youth, especially their developmental differences and family and community contexts.

Krisberg, B., and J.F. Austin. 1993. *Reinventing Juvenile Justice*. Newbury Park, Calif.: Sage Publications. **NCJ 143762**.

This book questions the survival of the juvenile court as it currently exists. It explores the social forces that have an impact on children and their families and that may be related to the rise in violent juvenile crime. It discusses the issues of juvenile justice laws and court procedures; influences on probation

petition and detention decisions; and influences of gender and race as related to taking youth into custody.

Krisberg, B., J.F. Austin, and P.A. Steele. 1989. *Unlocking Juvenile Corrections: Evaluating the Massachusetts Department of Youth Services*. Final Report. San Francisco, Calif.: National Council on Crime and Delinquency. **NCJ 123981**.

This report describes the structure of the Massachusetts Department of Youth Services (DYS) and traces the outcomes for 819 youth placed under DYS jurisdiction in the 1980's to determine recidivism and costs of various DYS programs.

Krisberg, B., A. Bakke, D. Neuenfeldt, and P. Steele. 1989. *Selected Program Summaries: Demonstration of Post-Adjudication Non-Residential Intensive Supervision Programs*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 150337**.

This work describes 11 juvenile intensive supervision programs selected for site visits by the National Council on Crime and Delinquency. Visits focused on how each program operated and included interviews with program administrators, line workers, supervisors, and judges.

Krisberg, B., R. DeComo, and N.C. Herrera. 1992. *National Juvenile Custody Trends 1978-1989*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 131649**.

This work provides a summary and analysis of existing national and State data on juveniles in custody from 1978 to 1989. It is

based on information from studies of juveniles in both juvenile facilities and adult jails and prisons.

Krisberg, B., D. Neuenfeldt, R. Wiebush, and O. Rodriguez. 1994. *Juvenile Intensive Supervision: An Assessment*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 150064**.

This assessment report presents an analysis of the literature on juvenile intensive supervision programs (ISP's) and describes the organization and operation of several programs. It also makes recommendations for the development of a national ISP replication model.

Krisberg, B., D. Neuenfeldt, R. Wiebush, and O. Rodriguez. 1994 (October). *Juvenile Intensive Supervision: Planning Guide*. Program Summary. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 150065**.

This summary describes juvenile intensive supervision programs (ISP's), a promising intermediate sanction for first-time serious or violent juvenile offenders who are inappropriate for or fail to respond successfully to immediate intervention; how ISP's also serve as an alternative to secure incarceration for appropriate juvenile offenders; and how ISP interventions address the major causal factors identified in the integrated social control model, which integrates the central components of control, strain, and social learning theories.

Krisberg, B., et al. 1991 (September). *Juveniles Taken Into Custody: Fiscal Year 1990 Report*. Washington, D.C.: Office of Juvenile Justice and Delin-

quency Prevention, U.S. Department of Justice. **NCJ 130758**.

This report provides a summary and analysis of existing national and State statistics that focus on juveniles taken into custody and is based on information from studies of juveniles in both juvenile facilities and adult jails and prisons.

Law-Related Education for Juvenile Justice Settings. 1993. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 147063**.

This document assists juvenile justice practitioners in the implementation of law-related education (LRE) programs and includes information on the benefits of LRE programs their use as prevention and intervention tools, and how to design and implement an LRE curriculum and program.

Lipsey, M.W. 1992. Juvenile delinquency treatment: A meta-analytic inquiry into the variability of effects. In T.D. Cook et al., eds. *Meta-Analysis for Explanation: A Casebook*. New York, N.Y.: Russell Sage Foundation. **NCJ 150406**.

This work presents an overview of a large meta-analytic survey of the delinquency treatment research conducted during the past four decades. It identifies major sources of the variability effects.

Maloney D., D. Romig, and T.L. Armstrong. 1988 (September). Juvenile probation: The balanced approach. *Juvenile and Family Court Journal* 39(3):1-63. **NCJ 112228**.

This article presents the principles, methods, and benefits of the balanced approach to juvenile probation and uses

examples from several jurisdictions to show how this approach works in practice.

McNally, R.B. 1981. Nearly a century later—The child savers—Child advocates and the juvenile justice system (paper prepared for the annual meeting of the Academy of Criminal Justice Services, Philadelphia, Pa., March 11-14, 1981). **NCJ 080064**.

This paper compares the historical development of the juvenile justice reform movement in the late 19th century with the activities of contemporary child advocates. The study finds many similarities between the groups, particularly their reliance on government intervention to solve social problems.

Messmer, H. 1990. Reducing the conflict: An analysis of victim-offender mediation as an interactive process. In B. Galaway and J. Hudson, eds. *Criminal Justice, Restitution, and Reconciliation*. Monsey, N.Y.: Willow Tree Press, Inc. **NCJ 126466**.

This is a case study of the interactive process used in Bielefeld, West Germany, in which three juveniles, led by a social worker, accepted responsibility for a violent attack.

Moone, J. 1993 (April). *Children in Custody 1991: Private Facilities*. Fact Sheet. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ FS009302**.

This fact sheet presents statistics related to facilities, race, gender, reason for custody, and age from the 1991 Children in Custody Census and the 1991 OJJDP survey.

Murray, C., and L. Cox. 1979. *Beyond Probation: Juvenile Corrections and the Chronic Delinquent*. Newbury Park, Calif.: Sage Publications. **NCJ 063396**.

The authors of this book draw on an evaluation of an experimental program in Chicago to argue that jailing chronic juvenile offenders can reduce their incidence of postrelease crime.

National Center for Juvenile Justice. *Desktop Guide to Good Juvenile Probation Practice*. 1991 (March). Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 128218**.

This reference manual describes the role of probation in the juvenile justice system and instructs probation officers in job-related skills and practices. It serves as a reference and resource document for practitioners from intake through supervision.

Palmer, T.B. 1971 (January). California's community treatment program for delinquent adolescents. *Journal of Research on Crime and Delinquency* 8(1):74-92. **NCJ 006165**.

This study suggests that institutionalization of delinquent adolescents has little, if any, effect on their parole performance.

Parent, D., et al. 1994 (August). *Conditions of Confinement: Juvenile Detention and Corrections Facilities: Research Report*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 145793**.

This work reports on conditions of confinement for juveniles throughout the United States and the extent to which those conditions conform to recog-

nized national professional standards, and it provides recommendations for improvement. The findings followed a study of all juvenile detention centers; reception centers; training schools; and ranches, camps, and farms.

Pierce, R. 1989. *Juvenile Justice Reform: State Experiences*. Criminal Justice Paper #4. Denver, Colo.: National Conference of State Legislatures. **NCJ 119948**.

This report examines juvenile justice system challenges facing States, alternatives to large institutions, experiences in several States that have embraced deinstitutionalization, and formal evaluations of reform effectiveness.

Pope, C.E., and W. Feyerherm. 1993. *Minorities and the Juvenile Justice System*. Research Summary. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 145849**.

This document summarizes the findings of OJJDP's study of the disproportionate representation of minorities in the juvenile justice system and offers recommendations for future research.

Pope, C.E., and W. Feyerherm. 1992. *Minorities and the Juvenile Justice System*. Full Report. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 139556**.

This report discusses the role that minority status plays in the processing of offenders through the juvenile justice system. It examines trends in minority juvenile crime and case processing, reviews research literature, analyzes data from two States to determine the extent of disparate

treatment, and offers policy and program recommendations.

Pratt, G. 1994 (December). Community-based comprehensive wrap-around treatment strategies (paper presented at the Arizona Supreme Court Juvenile Justice Research Symposium, Phoenix, Ariz.).

The author discusses violence and mental illness and concludes that successful, long-term juvenile rehabilitation and correction requires that juveniles have good mental health. He recommends psychopharmacological therapies and strategies for juveniles who need mental health treatment for some disorders, such as attention-deficit hyperactivity, bi-polar disorder, depression, anxiety, and schizophrenia.

Reilly, P.P. 1978 (December). What makes adolescent girls flee from their homes? *Clinical Pediatrics* 17(12):886-893. **NCJ 070260**.

Case studies and analysis show how individual psychotherapy and full family involvement can effectively contribute toward helping runaway, troubled, and delinquent girls.

Restitution Experience in Youth Employment: A Monograph and Training Guide to Jobs Components. 1989. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 115404**.

This monograph presents a model curriculum for the development of employment programs within juvenile restitution programs.

Rivers, J., and T. Trotti. 1989. *South Carolina Delinquent Males: A Follow-Up Into Adult Corrections*. Columbia, S.C.: South Carolina Department of Youth Services. **NCJ 122764**.

This study of 39,250 males, born between 1964 and 1971 and having official delinquency records in South Carolina, reviews recidivism in inmates and adult probationers.

Roscoe, M., and R. Morton. 1994 (April). *Disproportionate Minority Confinement*. Fact Sheet #11. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ FS009411**.

This fact sheet discusses the disproportionate representation of minorities in secure juvenile facilities and reviews pilot sites collecting data on the problem, laws and measures to reduce the problem, and technical assistance available to States and communities.

Roy, S. 1990. Offender-oriented restitution bills: Bringing total justice for victims? *Federal Probation* 54(3):30–36. **NCJ 126411**.

This article assesses whether total justice is attainable for victims through juvenile restitutive sentencing in Michigan bills 4240 and 4558.

Schillo, B.A., and W.S. Davidson II. 1994 (Spring). Alternatives to secure detention for juvenile offenders: The case of diversion. *Journal for Juvenile Justice and Detention Services* 9(1):7–16. **NCJ 152100**.

This article examines the use of diversionary practices, such as behavioral contracting and child advocacy, because many research studies show traditional juvenile treatment programs are largely ineffective in reducing juvenile recidivism.

Schlossman, S.L. 1977. *Love and the American Delinquent: The Theory and Practice of "Progressive" Juvenile Justice, 1885–1920*. Chicago, Ill.: University of Chicago Press. **NCJ 044008**.

The author examines the origins and meaning of correctional reform movements in the United States from the perspective of legal, intellectual, and social history.

Schwartz, I.M., ed. 1992. *Juvenile Justice and Public Policy: Toward a National Agenda*. New York: Macmillan. **NCJ 138726**.

In this book, U.S. juvenile justice scholars discuss critical issues facing juvenile justice in the 1990's, including the future of the juvenile court; juvenile gangs; prosecutors in the juvenile justice system; juvenile diversion; inter-agency services; the incarceration of juveniles; and issues of gender, race, and ethnicity.

Sheldon, R.J., and S. Tracey. 1992. Violent female juvenile offender: An ignored minority within the juvenile justice system. *Juvenile and Family Court Journal*. 43(3):33–40. **NCJ 140054**.

A sample of 348 adolescent girls referred to the Clark County, NV, Juvenile Court Services in 1985 and 1988 for violent crimes was compared to a group of adolescent boys charged with similar violent offenses.

Snyder, H. 1994 (May). *Juvenile Violent Crime Arrest Rates 1972–1992*. Fact Sheet #14. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ FS009414**.

The FBI's Violent Crime Index combines four offenses—murder, forcible rape, robbery, and aggravated assault—to provide a

barometer of violence in the United States. This fact sheet reports that juvenile violent crime remained relatively constant from the early 1970's until the late 1980's when the number of juveniles charged with a violent offense increased.

Snyder, H., and M. Sickmund. 1995 (August). *Juvenile Offenders and Victims: A National Report*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 153569**.

See introduction for annotation.

Study of Tribal and Alaska Native Juvenile Justice Systems. 1992 (Summer). Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 148217**.

This report presents an overview of American Indian and Alaska Native juvenile justice systems, including a historical overview, analysis of offenses, and promising approaches.

Thomas, C.W., and S. Bilchik. 1985. Prosecuting juveniles in criminal courts: A legal and empirical analysis. *The Journal of Criminal Law and Criminology* 76(2):439–479. **NCJ 101701**.

This article provides a historical overview of the development of the juvenile court system, discussion of judicial decisions that expanded the due process rights of juveniles, and analysis of significant features of Florida's juvenile law, using empirical data from the Dade County State Attorney's Office. It concludes with a discussion of the implications for the future of juvenile law in Florida and other jurisdictions that enact similar legislation.

Thornberry, T.P., D. Huizinga, and R. Loeber. 1995. The prevention of serious delinquency and violence: Implications from the program of research on the causes and correlates of delinquency. In J.C. Howell et al., eds. *Sourcebook on Serious, Violent, and Chronic Juvenile Offenders*. Thousand Oaks, Calif.: Sage Publications. **NCJ 157405**.

This chapter describes the activities of the Program of Research on the Causes and Correlates of Delinquency, as developed by the Office of Juvenile Justice and Delinquency Prevention. It summarizes key findings about the development of serious delinquency and violence and explores policy implications related to these findings.

Tolan, P., and N. Guerra. 1994 (July). *What Works in Reducing Adolescent Violence: An Empirical Review of the Field*. Boulder, Colo.: The Center for the Study and Prevention of Violence, University of Colorado. **NCJ 152910**.

This article examines anti-violence programs and epidemiological considerations associated with adolescent violence. The study includes a review of risk literature that highlights promising targets for intervention and presents outcomes of evaluation efforts based on risk factors and strategies. It concludes with recommendations for research, as well as program

and policy actions to improve the effectiveness of anti-violence interventions and to affect significantly the problem of juvenile violence.

Vaughn, J.B. 1991. Use of electronic monitoring with juvenile intensive supervision programs. In T.L. Armstrong, ed. *Intensive Interventions With High-Risk Youths*. Monsey, N.Y.: Willow Tree Press, Inc. **NCJ 129825**.

This chapter describes electronic monitoring technology and its use with adult offenders. It presents results from a survey of nine juvenile intensive supervision programs that use the technology.

Victim-Offender Mediation in the Juvenile Justice System. 1990. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 120976**.

This report summarizes survey findings that show how mediation is used in the juvenile justice system. It describes programs, examines their effectiveness, and compares mediation with other approaches.

What Works: Promising Interventions in Juvenile Justice. 1994 (October). Program Report. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 150858**.

This catalog lists 425 effective juvenile delinquency prevention, intervention, and treatment programs across the country. Each entry includes the name

of the program, contact person, address, target population, program type, structure, staff, budget, evaluation, and a program summary.

White, J.L., et al. 1985. *Comparative Dispositions Study: Handling Dangerous Juveniles*. Executive Summary. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 100295**.

This report examines the case dispositions of juveniles and young adults charged with serious and dangerous offenses in juvenile and adult courts. It includes a literature review, a State-by-State analysis of statutes, and interviews and statistical research in nine cities.

Wiebush, R.G. 1993 (January). Juvenile intensive supervision: The impact on felony offenders diverted from institutional placement. *Crime and Delinquency Special Issue* 39(1):68-89. **NCJ 140440**.

This article examines the 18-month recidivism of Lucas County, OH, juvenile felony offenders who were placed in an intensive supervision program in lieu of commitment to an institution.

Wilson, J.J., and J.C. Howell. 1993. *Comprehensive Strategy for Serious, Violent, and Chronic Juvenile Offenders*. Program Summary. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 143453**.

See introduction for annotation.

Section 2: Prosecute Certain Serious, Violent, and Chronic Juvenile Offenders in Criminal Court

Barnes, C.W., and R.S. Franz. 1989 (March). Questionably adult: Determinants and effects of the juvenile waiver decision. *Justice Quarterly* 6(1):117-135. **NCJ 117794.**

This article reviews data collected on all youth considered for transfer to adult court over a 6-year period in a single jurisdiction. Demographic, legal, and organizational factors were considered as variables in the study, which concluded that the seriousness of the offense, number and nature of prior offenses, and prior treatment play a significant role in adult court sentencing.

Barton, W.H., et al. 1989. *Programs for Serious and Violent Juvenile Offenders*. Ann Arbor, Mich.: Center for the Study of Youth Policy, University of Michigan. **NCJ 125572.**

This booklet describes and assesses three alternatives to incarceration for serious and violent offenders in Michigan, Florida, and Utah. Recidivism rates generally compared favorably to traditional and more expensive forms of punishment.

Belair, R. and G. Cooper. 1983. *Privacy and Juvenile Justice Records*. Washington, D.C.: Bureau of Justice Statistics, U.S. Department of Justice. **NCJ 084152.**

This report analyzes issues associated with the collection, use, and exchange of juvenile criminal history records.

Bishop, D.M., and C.E. Frazier. 1991. Transfer of juveniles to criminal court: A case study and analysis of prosecutorial waiver. *Notre Dame Journal of Law, Ethics, and Public Policy* 5(2):281-302. **NCJ 131555.**

This article states that prosecutorial waiver should be abolished, based on its use in Florida, and that a lack of objective and substantive prosecutorial guidelines leads to unpredictable and unjustifiable outcomes.

Bishop, D.M., C.E. Frazier, and J.C. Henretta. 1989 (April). Prosecutorial waiver: Case study of a questionable reform. *Crime and Delinquency* 35(2):179-201. **NCJ 116703.**

This article examines the practice of prosecutorial waiver in Florida, a State that grants prosecutors wide latitude in the transfer of 16- and 17-year-old offenders to criminal court. The authors found that few of the juveniles transferred were the dangerous, repeat offenders for whom waiver is designed.

Bortner, M.A. 1989. Traditional rhetoric, organizational realities: Remand of juveniles to adult court. *Crime and Delinquency* 35:53-73. **NCJ 100644.**

This article presents the case histories of 214 juveniles who were remanded to criminal court. Interviews with key decisionmakers do not support the traditional belief that transfer to criminal court occurs to protect public safety and happens only to the most intractable and dangerous delinquents.

Butts, J.A. 1994 (October). *Offenders in Juvenile Court, 1992*. OJJDP Update on Statistics. Juvenile Justice Bulletin. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 150039.**

This bulletin reports on the findings of the annual *Juvenile Court Statistics, 1992*, which focuses on the disposition of delinquency cases and formally handled status offense cases.

Butts, J.A. 1994 (October). *Offenders in Juvenile Court, 1991*. OJJDP Update on Statistics. Juvenile Justice Bulletin. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 149729.**

This bulletin reports on the findings of the annual *Juvenile Court Statistics, 1991*, which

focuses on the disposition of delinquency cases and petitioned status offense cases.

Butts, J.A. 1994 (July). *Delinquency Cases in Juvenile Court, 1992*. Fact Sheet #18. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ FS009418**.

This fact sheet lists serious offenses in delinquency cases in 1992 with percentage changes from 1991 to 1992, and from 1988 to 1992, and offers statistics on detention, intake, transfer to criminal court, and adjudication and disposition as well as gender, age, and race.

Calhoun, J.A. 1988. *Violence, Youth, and a Way Out*. Washington, D.C.: National Crime Prevention Council. **NCJ 114543**.

This booklet is the testimony before Congress of Jack A. Calhoun, Executive Director of the National Crime Prevention Council, in which he emphasizes a comprehensive approach to youth violence, involving all members of the community, especially youth. He cites isolation—disconnection—as the core of youth violence and other youth problems.

Champion, D.J. 1989 (October). Teenage felons and waiver hearings: Some recent trends, 1980–1988. *Crime and Delinquency* 35(4):577–585. **NCJ 120014**.

This article analyzes recent trends in juvenile waiver hearings in four States. Its findings conclude that hearings are increasingly used so that more serious penalties may be imposed on juvenile offenders charged with serious crimes.

Champion, D.J., and G.L. Mays. 1991. *Transferring Juveniles to Criminal Courts: Trends and Implications for Criminal Justice*. New York, N.Y.: Praeger Publishers. **NCJ 128623**.

This book addresses the phenomenon of transferring juveniles to criminal courts. It describes juvenile courts, juvenile offenders processed by these courts, and outcomes that characterize most transfers.

Clarke, S.H. 1994 (Summer). Increasing imprisonment to prevent violent crime: Is it working? *Popular Government* 16–24. **NCJ 150134**.

This article considers data relevant to whether increased imprisonment reduces violent crime, examines the public's concern about the dangers of crime, and discusses approaches to crime prevention. The author maintains that while incarceration has had some impact, other strategies are needed to prevent violent crime. The article includes the American Psychological Association's list of characteristics common to promising violence prevention programs.

Cronin, R.C., B.B. Bourque, J.M. Mell, F.E. Gragg, and A.A. McGrady. 1988 (January). *Evaluation of the Habitual Serious and Violent Juvenile Offender Program*. Executive Summary. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 105230**.

This summary examines the effectiveness of the Habitual Serious Violent Juvenile Offender Program, designed to target such offenders for intensive, swift prosecution and improved correctional services. The summary provides juvenile justice

professionals with information on how to more effectively prosecute repeat juvenile offenders.

Cronin, R.C., B.B. Bourque, J.M. Mell, F.E. Gragg, and A.A. McGrady. 1988 (January). *Evaluation of the Habitual Serious and Violent Juvenile Offender Program*. Final Report. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 113561**.

This report presents evaluation results for the performance of the Habitual Serious and Violent Juvenile Offender Program—begun in 1984 to improve the processing and disposition of serious juvenile offenders—in Miami, Milwaukee, Seattle, and Washington, D.C.

Eigen, J.P. 1981. The determinants and impact of jurisdictional transfer in Philadelphia. In J.C. Hall et al., eds. *Major Issues in Juvenile Justice Information and Training: Readings in Public Policy*. Columbus, Ohio: Academy for Contemporary Problems. **NCJ 077327**.

This work examines why some juveniles in Philadelphia, PA, who committed homicides and robberies in 1970 and 1973, respectively, were transferred to criminal court. The author contends that the overlap of characteristics shared by those transferred and those retained in the juvenile court system makes certification questionable.

Elliott, D.S. 1994 (February). Serious violent offenders: Onset, developmental course, and termination. The American Society of Criminology 1993 Presidential Address. *Criminology* 32(1):1–21. **NCJ 147913**.

This article considers self-report data from the National Youth Survey by serious and violent offenders and evaluates the utility of self-report studies of serious, violent offending in the general population.

Elliott, D.S., D. Huizinga, and B. Morse. 1986 (December). Self-reported violent offending—A descriptive analysis of juvenile violent offenders and their offending careers. *Journal of Interpersonal Violence* 1(4):472–514. **NCJ 104186.**

This article examines the findings of the National Youth Survey, conducted between 1976 and 1980. One survey finding is that self-reports show higher levels of criminal involvement than do arrest records.

Eron, L.D., J. Gentry, and P. Schlegel, eds. 1994 (February). *Reason to Hope: A Psychological Perspective on Violence and Youth*. 1994. Washington, D.C.: American Psychological Association. **NCJ 158633.**

This is Volume Two of the Commission on Youth and Violence report, containing papers on violence and youth prepared by psychologists with expertise in youth violence. This work is based on findings from over 50 years of research, which have shown that human aggression is learned, that learning alternative nonviolent behavior is possible, and that no single factor influences violent behavior. Commission members identified individual and environmental factors that can be changed to prevent potentially volatile situations from escalating into violent acts. The document offers guidelines for reducing violence in children's lives.

Fagan, J. 1990 (June). Treatment and reintegration of violent juvenile offenders: Experimental results. *Justice Quarterly* 7(2):233–263. **NCJ 128677.**

This study presents the findings of the Violent Juvenile Offender (VJO) Program, which tested an experimental dispositional option in four sites for the treatment and reintegration of violent juvenile offenders. Failure and arrest rates for VJO youth were lower than those for control group youth in two of the sites. The author states that the focus of correctional policy should be reintegration and transition rather than lengthy confinement in State training schools with minimal supervision after release.

Fagan, J. 1990 (March). Social and legal policy dimensions of violent juvenile crime. *Criminal Justice and Behavior* 17(1):93–133. **NCJ 122432.**

This article addresses research showing that effective and proportionate correctional interventions in the juvenile justice system can advance crime control and rehabilitative policies.

Fagan, J., and E.P. Deschenes. 1990 (Summer). Determinants of judicial waiver decisions for violent juvenile offenders. *Journal of Criminal Law and Criminology* 81(2):314–347. **NCJ 125926.**

This article examines judicial transfer decisions for youth charged with violent offenses in four urban juvenile courts. It suggests criteria and procedures for invoking waiver as a juvenile court sanction of last resort.

Fagan, J., M. Forst, and T.S. Vivona. 1987 (April). Racial determinants of the judicial transfer decision: Prosecuting violent youth in criminal

court. *Crime and Delinquency* 33(2):259–286. **NCJ 105135.**

This article examines racial differences in judicial transfer decisions for chronically violent delinquents in four urban juvenile courts. It found that offense characteristics and the defendant's age at time of offense are the strongest contributors to the transfer decision. The results suggest that juvenile court judges have adopted implicit policies reserving transfer for older violent offenders, especially those charged with capital crimes.

Fagan, J., C.J. Rudman, and E. Hartstone. 1984. Intervening with violent juvenile offenders—A community reintegration model. In R. A. Mathias, ed. *Violent Juvenile Offenders—An Anthology*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 095172.**

A community reintegration model for violent juvenile offenders was constructed after a review of treatment programs, pertinent literature, and evaluation findings. The model is supported by the underlying principles of social networking, provision of youth opportunities, social learning, and goal-oriented interventions.

Feld, B.C. 1993 (October). Juvenile (in)justice and the criminal court alternative. *Crime and Delinquency* 39(4):403–424. **NCJ 145063.**

This article asserts that the juvenile court has become a second-class criminal court that punishes delinquent offenders and waives serious offenders to the criminal justice system. The author suggests policy changes and outlines expected results from such changes.

Forst, M., J. Fagan, and T.S. Vivona. 1989. Youth in prisons and training schools: Perceptions and consequences of the treatment-custody dichotomy. *Juvenile and Family Court Journal* 40(1):1-14. **NCJ 116269.**

See section 1 for annotation.

Gillespie, L.K., and M.D. Norman. 1984. Does certification mean prison? Some preliminary findings from Utah. *Juvenile and Family Court Journal* 35(3):23-34. **NCJ 096848.**

This article examines the discretionary practice of the prosecutor employed in making the decision to initiate certification proceedings against a youth. The authors include data and findings from interviews conducted with 23 juvenile court personnel.

Glazer, S. 1994 (February). Juvenile justice: Should violent youths get tougher punishments? *CQ Researcher* 4(8):171-178. **NCJ 150290.**

This article examines the dramatic rise in violent crimes by juveniles, many of whom use guns, and the secrecy in which juvenile proceedings take place. It addresses the role of early intervention for at-risk children as a means of combating juvenile delinquency.

Greenwood, P.W. 1986. Differences in criminal behavior and court responses among juvenile and young adult defendants. In M. Tony and N. Morris, eds. *Crime and Justice: An Annual Review of Research*. Chicago, Ill.: University of Chicago Press. **NCJ 105150.**

This essay reviews recent research in chronic juvenile offenders, criminal careers, and juvenile and criminal court disposition of chronic juvenile

and young adult offenders. An analysis of case disposition patterns in Los Angeles, Las Vegas, and Seattle suggests that these offenders are sentenced to incarceration or State custody at least as frequently as other age groups for some offense categories and that the seriousness of the prior juvenile record affects the severity of sentences.

Greenwood, P.W., and F.E. Zimring. 1985. *One More Chance: The Pursuit of Promising Intervention Strategies for Chronic Juvenile Offenders*. Santa Monica, Calif.: The RAND Corporation. **NCJ 105710.**

This volume examines the correlates of chronic delinquency, legal and ethical constraints on State-imposed interventions, and promising methods of prevention and rehabilitation.

Greenwood, P.W., J. Petersilia, and F.E. Zimring. 1980 (October). *Age, Crime, and Sanctions: The Transition from Juvenile to Adult Court*. Santa Monica, Calif.: The RAND Corporation. **NCJ 074129.**

This report studies the use of juvenile records in adult court proceedings and the relationship between age and sanction severity.

Guide to Juvenile Restitution. 1985. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 098466.**

This document presents recommendations for expanding and improving juvenile restitution programs and discusses basic program decisions, models, implementation, management information systems, evaluation, and resources.

Hamparian, D.M., R. Schuster, J. Davis, and J. White. 1985. *The Young Criminal Years of the Violent Few*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 096010.**

This report tracks the criminal careers from 1978 to mid-1983 of violent juvenile offenders who were previously studied from 1956 to 1960. Among the report's findings are that most violent juveniles engage in adult criminality; a small percentage of chronic offenders is responsible for a disproportionately high number of crimes; frequency of arrest declines with age; and incarceration does not diminish the crime rate, although it may increase the subsequent arrest rate.

Hamparian, D.M. et al. 1978. *The Violent Few: A Study of Dangerous Juvenile Offenders*. Lexington, Mass.: Lexington Books, Calif.: The RAND Corporation. **NCJ 052651.**

This book details the social and criminal characteristics of the juvenile and delinquent careers of 811 violent juveniles in Columbus, OH. It explores the relationships of such characteristics to identifiable violent patterns.

Heuser, J.P. 1985. *Juveniles Arrested for Serious Felony Crimes in Oregon and "Remanded" to Adult Criminal Courts: A Statistical Study*. Salem, Ore.: Crime Analysis Center, Oregon Department of Justice. **NCJ 097782.**

This work examines the computerized criminal history and juvenile court case files for 99 juveniles associated with 114 Part I felony arrests in Oregon during 1980. These offenders

were subsequently remanded to criminal court. The study supports the view that remanded offenders are usually older males with extensive juvenile court histories involving predatory property crime.

Houghtalin, M., and G.L. Mays. 1991. Criminal dispositions of New Mexico juveniles transferred to adult court. *Crime and Delinquency* 37:393-407. **NCJ 130968.**

This article examines the demographic, social, and legal data on 49 cases of juveniles transferred to criminal court in New Mexico. Although the rationale for waiver of jurisdiction is to ensure more severe penalties, much of the research indicates that with the exception of violent offenders, most transferred juveniles receive probation.

Howell, J.C., ed. 1995 (May). *Guide for Implementing the Comprehensive Strategy for Serious, Violent, and Chronic Juvenile Offenders*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 153681.**

See introduction for annotation.

Howell, J.C. 1994 (October). Recent gang research: Program and policy implications. *Crime and Delinquency* 40(4):494-515. **NCJ 151535.**

This article reviews recent gang studies that shed light on the extent of gang involvement in juvenile violence and drug trafficking and on the accuracy of media inferences that gangs and gang violence are increasing.

Howell, J.C., J.D. Hawkins, and J. Wilson, eds. 1995. *Sourcebook on Serious, Violent, and Chronic Offenders*. Thousand Oaks, Calif.: Sage Publication. **NCJ 157405.**

This book presents a balanced, humane, and effective response to serious, violent, and chronic delinquency. It updates and broadens the review of research, statistical trends, and program evaluations regarding juvenile crime and delinquency found in OJJDP's *Comprehensive Strategy for Serious, Violent, and Chronic Juvenile Offenders*. In addition, three chapters contain supplementary contributions to the comprehensive strategy, addressing significant topics relevant to its implementation.

Hunziker, D. 1995 (May). Juvenile crime, grown-up time. *State Legislatures* 21(5):14-19. **NCJ 157944.**

This article analyzes recent trends to waive juveniles to criminal court in response to increased violence, firearm and drug use, and public fear of and frustration about crime.

Interdepartmental Working Group on Violence. 1994. *Violence: Report to the President and Domestic Policy Council*. Washington, D.C. **NCJ 159325.**

See section 1 for annotation.

Jensen, E.L., and L.K. Metsger. 1994 (January). Test of the deterrent effect of legislative waiver on violent juvenile crime. *Crime and Delinquency* 40(1):96-104. **NCJ 146321.**

This article reports on a study of the deterrent effect of Idaho's legislative waiver statute that mandates automatic transfer of some serious juvenile offenders to criminal court. The study concludes that the statute has not deterred juvenile violent crime.

Juvenile and Adult Records: One System, One Record? 1989. Washington, D.C.: Bureau of Justice Statistics, U.S. Department of Justice. **NCJ 114947.**

This publication addresses the status of juvenile records and issues associated with linking juvenile and adult records.

The juvenile court and serious offenders: 38 recommendations. 1984 (Summer). *Juvenile and Family Court Journal*. Reno, Nev.: National Council of Juvenile and Family Court Judges. **NCJ 096101.**

This journal issue examines the range of problems facing the Nation's juvenile courts and includes recommendations made by the National Council of Juvenile and Family Court Judges.

The Juvenile Court's Response to Violent Crime. 1989 (January). OJJDP Update on Statistics. Juvenile Justice Bulletin. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 115338.**

This bulletin examines the action taken by juvenile courts against violent crime in 12 States. Data indicate that half of the offenders referred to court for violent offenses are detained and that courts vary considerably in whether they handle such cases formally or informally and vary in their placement of these youth in residential facilities.

Juvenile Justice: Juveniles Processed in Criminal Court and Case Dispositions. 1995. Washington, D.C.: U.S. Government Accounting Office. **NCJ 160051.**

This report examines issues related to juveniles sent to criminal court versus juvenile court, including the frequency with which juveniles are sent to criminal court; juvenile conviction rates and sentences in criminal court; dispositions of juvenile cases in juvenile court; and conditions of confinement for

juveniles incarcerated in adult correctional facilities. It also provides a summary of State laws governing which juveniles may be sent to criminal court.

Juvenile Records and Recordkeeping Systems. 1988. Washington, D.C.: Bureau of Justice Statistics, U.S. Department of Justice. **NCJ 112815**.

This report summarizes legislation and practices relating to juvenile records and record systems.

Kalminov, S. 1993. Recent issues in transfer of juveniles to trial as adults. *Journal of Juvenile Law* 14:106-117. **NCJ 148847**.

This article discusses how the Federal Juvenile Delinquency Act, 18 U.S.C. section 5032, which outlines the procedure for transfer of defendants from the juvenile to the criminal court system, has been applied in recent cases in selected jurisdictions. The author concludes that section 5032 must be modified to ensure equal treatment of juveniles nationwide.

Lee, L. 1994. Factors determining waiver in juvenile court. *Journal of Criminal Justice* 22(4):329-339. **NCJ 150741**.

This article examines a study of how the juvenile waiver decision was applied in Arizona's Maricopa County Juvenile Court. Results showed that juveniles who were waived in a previous offense were most likely to be waived again in succeeding referrals, regardless of the seriousness of the offense. The author discusses policy implications of the findings.

Martin, G.A., Jr. 1995 (Summer). Open the doors: A judicial call to end confidentiality in delinquency

proceedings. *New England Journal on Criminal and Civil Confinement* 21(2):393-410. **NCJ 158348**.

This article calls for the elimination of confidentiality in juvenile delinquency cases in order to demonstrate accomplishments, rebuild trust, and decrease the fear that the closed system fosters.

Martin, G.A., Jr. 1993 (April). The delinquent and the juvenile court. Is there still a place for rehabilitation? *Lay Panel Magazine V* 28:6-12. **NCJ 143298**.

The author analyzes recent trends in transfer legislation in the historical context of the juvenile justice system in the various States.

McCarthy, F.B. 1994. The serious offender and juvenile court reform: The case for prosecutorial waiver of juvenile court jurisdiction. *St. Louis University Law Journal* 38:629-671. **NCJ 159770**

This article explores the scope of and concerns about the juvenile court's jurisdiction and possible alternatives for system reform. It questions when and how juvenile court jurisdiction would be relinquished. The author suggests that prosecutorial waiver, if properly exercised and subject to a fitting form of review, can be a way of minimizing errors inherent in decisions to prosecute juveniles in criminal court.

Myths and Realities: Meeting the Challenge of Serious, Violent, and Chronic Juvenile Offenders: 1992 Annual Report. 1993. Washington, D.C.: National Coalition of State Juvenile Justice Advisory Groups. **NCJ 141636**.

This report addresses the status of juvenile justice and delinquency prevention in the United

States. It contains recommendations by the Coalition to the President, Congress, and the Administrator of the Office of Juvenile Justice and Delinquency Prevention.

National Directory of Juvenile Restitution Programs. 1987. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 105188**.

This directory lists the names, addresses, and descriptions of 296 juvenile restitution and community service programs throughout the United States.

Nimick, E.H., L. Szymanski, and H. Snyder. 1986. *Juvenile Court Waiver: A Study of Juvenile Court Cases Transferred to Criminal Court*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 107365**.

This study examines the automated court records of 552 juvenile courts in 9 States, yielding 127,162 petitioned delinquency cases for 1982. Of these, 2,335, or 2 percent, were waived to criminal court. Factors involved in the waiver decisions included offense seriousness, community protection, the aggressiveness or premeditation of the offense, prosecutive merit of the complaint, prior record, and likelihood of rehabilitation.

Parent, D., et al. *Conditions of Confinement: Juvenile Detention and Corrections Facilities*. 1994 (August). Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 145793**.

This study, mandated by Congress, assesses conditions of juvenile detention and corrections to determine the extent to which

they conform to recognized professional standards and to make recommendations to remedy identified problems. The report offers 19 recommendations for improvement.

Perkins, C. 1994. *National Corrections Reporting Program—1992*. Washington, D.C.: Bureau of Justice Statistics, U.S. Department of Justice. **NCJ 145862**.

This report contains 1992 data collected by the National Corrections Reporting Program regarding admissions to and releases from prison as well as parole entries and discharges in the participating jurisdictions. The report's first section addresses methodology, including reporting criteria, terms, definitions, offenses, and technical and explanatory notes. The second section presents the collected data in tabular form.

Poulon, T.M., and S. Orchowsky. 1994 (January). Serious juvenile offenders: Predicting the probability of transfer to criminal court. *Crime and Delinquency* 40(1):3–17. **NCJ 146316**.

This study compares a random sample of 364 serious juvenile offenders, who were transferred and convicted in criminal court, with 363 offenders who were eligible for transfer but who were retained within the juvenile justice system. The authors focus on legal and extralegal factors that may be involved in predicting whether a particular case will be transferred.

Privacy and Juvenile Justice Records. 1982. Washington, D.C.: Bureau of Justice Statistics, U.S. Department of Justice. **NCJ 084152**.

This report analyzes issues associated with the collection, use, and exchange of juvenile criminal history records.

Rudman, C., E. Hartstone, J. Fagan, and M. Moore. 1986 (January). Violent youth in adult court: Process and punishment. *Crime and Delinquency* 32(1):75–96. **NCJ 100645**.

This article examines the transfer process, the rate of transfer, case outcomes, sentences, and placements of transferred juveniles in four urban areas.

Quinn, K.M. 1992. Waiver or transfer to adult court. In J. Edgerton, ed. *Handbook of Psychiatric Practice in the Juvenile Court*. Washington, D.C.: American Psychiatric Association. **NCJ 133542**.

This chapter addresses the importance of psychiatric recommendations in determining whether a juvenile remains in juvenile court or is transferred to criminal court. It details important mental health issues that aid judicial decisionmaking.

Sanborn, J.B., Jr. 1994 (April). Certification to criminal court: The important policy questions of how, when, and why. *Crime and Delinquency* 40(2):262–281. **NCJ 147513**.

This article contains the views of 100 juvenile court workers on the transfer of juvenile offenders to criminal court. Participants stated that limited and pure prosecutorial transfer shifts inconsistency and subjectivity from the judge to the prosecutor, while legislative waiver goes to the other extreme of not differentiating among offenders and the types of handling they require.

Schwartz, I.M., and R. Van Vleet. 1992. Public policy and the incarceration of juveniles: Directions for the 1990's. In I.M. Schwartz, ed.

Juvenile Justice and Public Policy: Toward a National Agenda. New York, N.Y.: Lexington Books. **NCJ 138734**.

This work explores the potential for reforming youth detention and training school programs. It discusses barriers to such change and ways to overcome them.

Sickmund, M. 1994 (October). *How Juveniles Get to Criminal Court*. OJJDP Update on Statistics. Juvenile Justice Bulletin. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 150309**.

This bulletin uses data from the National Juvenile Court Data Archive on how juveniles arrived in criminal court in 1992. Cases can be transferred by judicial waiver, prosecutorial discretion, or statutory exclusion from juvenile court jurisdiction. In any State, one or more mechanisms may be in place.

Singer, S.I. 1994. *The Case Processing of Juvenile Offenders in Criminal Court and Legislative Waiver in New York State*. Final Report. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 148013**.

This study of decisions on the status of juveniles in New York's criminal justice system identifies the legal and organizational reasons for bringing juveniles into the adult legal process.

Singer, S.I. 1993 (April). Automatic waiver of juveniles and substantive justice. *Crime and Delinquency* 39(2):253–261. **NCJ 146363**.

This article analyzes the data on 103 juvenile offender arrests that occurred between September 1978 and December 1985 in Buffalo, NY. Findings seem to support those who criticize legislative waiver by showing

that juvenile offenders from single-parent households were more likely to face a grand jury indictment than those from dual-parent families. However, analysis also showed that all juveniles referred to the grand jury had been charged with serious offenses.

Snyder, H., and J. Hutzler. 1981 (September). *The Serious Juvenile Offender: The Scope of the Problem and the Response of Juvenile Courts*. Washington, D.C.: National Institute for Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 084482**.

The authors use data from various sources, including the National Crime Survey and the FBI Uniform Crime Reports, to compare the decrease in serious crime committed by juveniles with a corresponding increase in such crimes by adults. Other findings include higher conviction rates in juvenile courts compared to criminal courts and the provision in nearly every State for transfer to criminal court for serious offenders over 15 years old.

Snyder, H., and M. Sickmund. 1995 (August). *Juvenile Offenders and Victims: A National Report*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 153569**.

See introduction for annotation.

Stevens, J.B. 1994. Federal prosecution of gangs and juveniles. *Criminal Practice Manual*. Washington, D.C.: Office of Legal Education, U.S. Department of Justice. **NCJ 149521**.

This paper describes the role of Federal prosecutors and Federal agencies in prosecuting juvenile gang members and other juvenile delinquents under Federal laws.

Strasburg, P.A. 1978. *Violent Delinquents*. A Report to the Ford Foundation from the Vera Institute of Justice. New York, N.Y.: Simon and Schuster. **NCJ 047560**.

This book reports on the findings of a year-long study on violent offenders. It presents treatment modalities and strategies for preventing juvenile violence. Materials contained in the volume include data collected by the Vera Institute study and information on three model programs.

Targeting Serious Juvenile Offenders Can Make a Difference. 1988 (December). OJJDP Update on Research. Juvenile Justice Bulletin. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 114218**.

This report details the findings from a demonstration program designed to target serious habitual juvenile offenders. The program, sponsored by OJJDP, was conducted in 13 cities across the Nation. Among the program's results were quicker resolution of cases and improved victim/witness support.

Thomas, C.W., and S. Bilchik. 1985. Prosecuting juveniles in criminal courts: A legal and empirical analysis. *The Journal of Criminal Law and Criminology* 76(2):439-479. **NCJ 101701**.

See section 1 for annotation.

Tolan, P., and N. Guerra. 1994 (July). *What Works in Reducing Adolescent Violence: An Empirical Review of the Field*. Boulder, Colo.: Center for the Study and Prevention of Violence, University of Colorado. **NCJ 152910**.

See section 1 for annotation.

Where We Stand: An Action Plan for Dealing with Violent Juvenile Crime. 1994. Reno, Nev.: National Council of Juvenile and Family Court Judges. **NCJ 149454**.

This document states the National Council's position that certain actions should be implemented by State and local governments with financial and technical assistance and research efforts from the Federal and State levels. These actions include ensuring that juvenile courts can hold violent juvenile offenders fully accountable for their crimes; providing adequate resources to the juvenile courts to conduct thorough assessments of juveniles; and developing individualized dispositions for juveniles.

White, J., et al. 1985. *The Comparative Dispositions Study: Handling Dangerous Juveniles*. Executive Summary. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 100295**.

See section 1 for annotation.

White, J., and B. Feld. 1983. *Debate: Should Serious Juvenile Offenders Be Handled by a Separate Juvenile Justice System? Or What Criteria Determine a Juvenile Offender Should Be Transferred Into the Adult Justice System?* Cleveland, Ohio: Federation for Community Planning. **NCJ 091840**.

This pamphlet includes the transcription of the debate held March 8, 1983, between two juvenile justice policymakers. The participants gave opposing views on the merits of having a separate juvenile justice system for serious juvenile offenders and on what criteria should be used to determine if a juvenile should be transferred to the criminal court system.

Wilson, J.J., and J.C. Howell. 1994. Serious and violent juvenile crime: A comprehensive strategy. *Juvenile and Family Court Journal* 45(2):3-14. **NCJ 149485.**

This article presents the program background, principles, rationale, and components for OJJDP's comprehensive strategy for dealing with serious, violent, and chronic juvenile offenders.

Wolfgang, M.E. 1972. *Delinquency in a Birth Cohort*. Chicago, Ill.: University of Chicago Press. **NCJ 008732.**

This book summarizes a study of a group of nearly 10,000 young men in Philadelphia from their 10th to their 18th birthdays. It found that approximately 65 percent had no known contact with the legal system. The other 35

percent were classified as delinquents and divided, for the purposes of the study, into one-time, multiple, and chronic offenders.

Wolfgang, M.E., R.M. Figlio, and T.P. Thornberry. 1987. *From Boy to Man—From Delinquency to Crime*. Chicago, Ill.: University of Chicago Press. **NCJ 109901.**

This book is a followup to the authors' previous work *Delinquency in a Birth Cohort* (1972), which traced the development of male delinquents from 10 to 18 years old in the 1945 Philadelphia birth cohort. In this 1987 publication, a sample of the original subjects is studied to age 30. Their attitudes, values, experiences as crime victims,

self-reported involvement in crime, and other aspects of their lives are examined.

Zimring, F.E. 1991. Treatment of hard cases in American juvenile justice: In defense of discretionary waiver. *Notre Dame Journal of Law, Ethics, and Public Policy* 5(2):267-280. **NCJ 131554.**

The author argues that despite its faults, discretionary juvenile court waiver is superior to alternative methods for handling the most serious juvenile offenders. In the author's opinion, substantive and procedural changes regarding waiver are needed to guide its use, including the recognition of age as a factor in determining appropriate punishment from the criminal court.

Section 3: Reduce Youth Involvement With Guns, Drugs, and Gangs

Abdullah, C.S., and S.R. Joseph. 1994. *Kids and Guns: A Deadly Equation*. Miami, Fla.: Dade County Public Schools. **NCJ 160052**.

This publication presents an educational program and curriculum designed to prevent handgun injuries and deaths among children. Students are instructed how to analyze potentially dangerous situations and to respond to them without violence. The book includes classroom strategies and followup activities.

Achilles Program. 1995 (September). Washington, D.C.: Firearms Enforcement Division, Bureau of Alcohol, Tobacco, and Firearms (ATF), U.S. Department of the Treasury. **NCJ 158834**.

This booklet provides an overview of the Achilles Program, ATF's national firearms strategy that focuses the Bureau's resources in communities with the most serious levels of gun-related violence and uses firearms statutes to incarcerate offenders with lengthy mandatory sentences.

Addressing Violent Crime in Public Housing Developments. 1994.

Washington, D.C.: Bureau of Alcohol, Tobacco, and Firearms, U.S. Department of the Treasury, and U.S. Department of Housing and Urban Development. **NCJ 158835**.

This report discusses strategies to target violent crime in public housing, including community involvement and enforcement. It explains HUD and ATF cooperative training and funding efforts and includes a case study of enforcement efforts in Chicago, IL, public housing.

Adolescent Drug Use Prevention: Common Features of Promising Community Programs. 1992. Washington, D.C.: U.S. General Accounting Office. **NCJ 139051**.

This document analyzes the design, implementation, and results of promising community-based drug abuse prevention programs for adolescents. All programs contain six key features: a comprehensive strategy; an indirect approach to drug use prevention; youth empowerment; youth participation; cultural sensitivity; and highly structured activities.

Advocacy Institute. 1994. *Toward a Gun-Safe Society: Movement Building Strategies*. Washington, D.C.: American Academy of Pediatrics. **NCJ 158057**.

This report was developed by health professionals, children's

advocates, and others to review the gun safety movement. Issues include crime control, prevention of firearm injury, and safety from violence. The report advocates a legislative strategy to define and mobilize the gun safety movement.

Aguilar, T.E., and W.W. Munson. 1992 (Spring). Leisure education and counseling as intervention components in drug and alcohol treatment for adolescents. *Journal of Alcohol and Drug Education* 37(3):23-34. **NCJ 137954**.

Evidence from the social psychology of leisure and recreation suggests a strong association between negative leisure experiences and substance abuse among adolescents. In this article, the authors propose the incorporation of leisure and education counseling in drug treatment programs.

Allen-Hagen, B., M. Sickmund, and H. Snyder. 1994 (November). *Juveniles and Violence: Juvenile Offending and Victimization*. Fact Sheet #19. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ FS009419**.

See introduction for annotation.

American Academy of Pediatrics, Committee on Adolescence. 1992. Firearms and adolescents. *Pediatrics* 89(4):784-787. **NCJ 159315**.

This article identifies major issues about adolescent firearm use. The authors encourage a multifaceted approach to adolescent firearm use that includes more restrictive legislative and regulatory measures; a health care focus on creating gun-safe homes; identification of children at risk and referral to appropriate services; development of community-based coalitions to address the broader needs of public education; school curriculums that provide violence prevention lessons; and increased research on the precursors and correlates of firearm injuries and deaths among children and adolescents.

American Academy of Pediatrics, Committee on Injury and Poison Prevention. 1992. Firearm injuries affecting the pediatric population. *Pediatrics* 89(4):788-790. **NCJ 159316.**

This article proposes prevention strategies in the areas of firearm design, regulation, product liability actions, public and parent education, and legislative measures.

American Academy of Pediatrics. 1989. *Report of a Forum on Firearms and Children*. Elk Grove, Ill. **NCJ 159314.**

This report details the forum's adoption of the long-term goal of banning handguns, assault rifles, and deadly airguns and the short-term goal of developing safer guns. The report also recommends coalitions of public health groups, victims' families, gun control groups, police, and others.

American Psychological Association. 1993. *Violence and Youth: Psychology's Response*. Washington, D.C. **NCJ 147390.**

This report addresses violence committed by juveniles using firearms. It recommends a comprehensive program of psychological services, education, community involvement, alcohol and other drug prevention programs, and additional research to control the juvenile violence problem.

Bahr, S.J., et al. 1993 (June). Family and religious influences on adolescent substance abuse. *Youth and Society* 24(4):443-465. **NCJ 143207.**

This article documents research based on social control and social learning theories and examines whether there are correlations between adolescent substance abuse and family and religious factors.

Becker, T.M., L. Olson, and J. Vick. 1993 (February). Children and firearms: A gunshot injury prevention program in New Mexico. *American Journal of Public Health* 83(2):282-283. **NCJ 159318.**

This article states that health professionals should become involved in gun safety counseling, education programs, and legislative efforts geared toward reducing the number of loaded firearms in the home. Cooperative efforts should also be organized on the State or regional level.

Benson, C. 1990 (August). Gang diversion. *Law and Order* 38(8):66-68. **NCJ 125609.**

This article describes Citizens Helping Austin Neighborhood Gang Environment (CHANGE), a gang-diversion program established in 1989 by the police department and concerned citizens of Austin, TX. The program has successfully involved juveniles, parents, churches, and community-based organizations in an effort to reduce gang violence and graffiti.

Bjerregaard, B., and C. Smith. 1993 (December). Gender differences in gang participation, delinquency, and substance use. *Journal of Quantitative Criminology* 9(4):329-355. **NCJ 147908.**

This paper addresses female gang participation, its causes, and its consequences. Rochester Youth Development Study data are used to compare gang participation and delinquent involvement of female and male adolescents.

Blackman, P.H. 1994. *Children and Guns: The NRA's Perception of the Problem and Its Policy Implications* (paper presented at the American Society of Criminology, Miami, Fla., November 9-12, 1994). **NCJ 159319.**

This paper summarizes the National Rifle Association's (NRA) perception of the issues surrounding children and guns, including regulations governing access and misuse of firearms by minors. The NRA denies a relationship between legal gun ownership and increases in gun-related youth violence.

Blumstein, A. 1994. *Youth Violence, Guns, and the Illicit-Drug Industry*. Pittsburgh, Pa.: Carnegie Mellon University. **NCJ 157411.**

This age-specific analysis shows the increasing incidence of firearm homicides among youth. The author develops a "diffusion" hypothesis to explain the increase. He reasons that as juveniles become involved in the drug trade, they acquire firearms because of the danger of the enterprise. In turn, other youth obtain firearms for their own protection. Increased violence may also be exacerbated by the problems of high levels of poverty, single-parent

households, educational failures, and a widespread sense of economic hopelessness.

Brent, D.A., J.A. Perper, and C. Allman. 1987. Alcohol, firearms, and suicide among youth: Temporal trends in Allegheny County, Pennsylvania. 1960–1983. *Journal of the American Medical Association* 275:3369–3372. **NCJ 159320.**

This article demonstrates that the presence of firearms in the home is associated with the increased risk of adolescent suicides. It concludes that physicians should recommend that firearms be removed from the homes of at-risk adolescents.

Bringing Up a Drug-Free Generation: How Communities Can Support Parents. 1992 (September). Washington, D.C.: National Crime Prevention Council. **NCJ 139327.**

This booklet suggests things that community leaders can do to help parents raise drug-free children and gives examples of ways in which these ideas are already at work around the country.

Bruce, B. 1994 (October). Armed and juvenile. *Police* 18(10):62–64, 112–113. **NCJ 152189.**

This article describes techniques and programs police can use to address the increasing possession and use of firearms by juveniles.

Building Resiliency: What Works; A Community Guide to Preventing Alcohol and Other Drug Abuse Through Positive Youth Development. 1994. Washington, D.C.: National Assembly of National Voluntary Health and Social Welfare Organizations. **NCJ 149115.**

This manual guides professionals and community leaders in the development of commu-

nity-based programs that help prevent juvenile abuse of alcohol and other drugs. It asserts that negative behaviors can be prevented if youth are guided in developing positive behaviors and interests.

Butterfield, G.E., and J.L. Arnette, eds. 1989. *Weapons in Schools.* Malibu, Calif.: National School Safety Center. **NCJ 121807.**

This resource paper describes the nature and extent of problems associated with weapons in schools and discusses strategies for dealing with these problems, such as training educators in weapon identification and detection; providing adequate supervision both in and outside the classroom; teaching prosocial skills within the curriculum; and fostering interpersonal success in conflict resolution. Peer assistance programs, as well as the removal of serious offenders from regular schools to provide them with a more secure educational placement, have contributed to the reduction in school-based intimidation.

Callahan, C.M., and F.P. Rivera. 1992. Urban high school youth and handguns: A school-based survey. *Journal of the American Medical Association* 267(22):3038–3042. **NCJ 143422.**

This study documents self-reported handgun access and ownership among high school students in Seattle, WA. The authors' research determines the prevalence of handgun possession among urban high school youth and investigates associations with socioeconomic status, ethnicity, and deviance. Thirty-four percent of the students

reported easy access to handguns, and 6.4 percent reported having a handgun.

Callahan, C.M., et al. 1993 (July). Youth in detention and handguns. *Journal of Adolescent Health* 14: 350–355. **NCJ 145351.**

This article analyzes a voluntary anonymous survey of 89 males, ages 15–18, who were detained in the King County, WA, Youth Services Center, a short-term detention facility. It provides information about the frequency and association of handgun possession and firearm injuries among these males.

Carrie, D.A. 1993. *Street Gangs.* Portland, Ore.: Pocket Press. **NCJ 149508.**

This booklet is designed for those concerned about the growth of youth gangs and their activities. The author provides recommendations for eliminating gangs from the community through the cooperative efforts of parents, schools, and youth service centers.

Centers for Disease Control and Prevention. 1991. Weapon-carrying among high school students: United States, 1990. *Morbidity and Mortality Weekly Report* 40(40):681–684. **NCJ 144164.**

This study provides information regarding the incidence and prevalence of self-reported weapon-carrying among U.S. high school students during 1990. Nearly 20 percent of the students had carried a weapon at least once during the 30-day period. To achieve the greatest reduction in the number of weapon-carrying youth, the report suggests that efforts be directed at frequent weapon carriers, peers, and families.

Because the fear of assault was often claimed as the reason for carrying a firearm, the report suggests that programs address the actual or perceived risk of victimization.

Christoffel, K.K. 1991. Toward reducing pediatric injuries from firearms: Charting a legislative and regulatory course. *Pediatrics* 88(2):294-305. **NCJ 145350.**

U.S. pediatricians are focusing increasing attention on the problem of injuries from firearms in children and adolescents. They encourage immediate action to reduce the frequency of injuries and deaths caused by firearms.

Conly, C.H. 1993 (August). *Street Gangs: Current Knowledge and Strategies. Issues and Practices.* Washington, D.C.: National Institute of Justice, U.S. Department of Justice. **NCJ 143290.**

This report summarizes research and professional criminal justice perspectives on gangs; describes current gang prevention, intervention, and suppression strategies; and presents recommendations for dealing with street gangs at the community level.

Cook, P.J., et al. 1991 (May-June). Weapons and minority youth violence. *Public Health Reports* 106(3):254-258. **NCJ 145349.**

This paper summarizes the discussion of a committee that analyzed the relationship between weapons and violence among youth, especially minorities, and lists recommended priorities for intervention and research.

Covey, H.E., et al. 1992. *Juvenile Gangs.* Springfield, Ill.: Charles C. Thomas. **NCJ 148515.**

This book investigates the phenomenon of juvenile gangs in contemporary American society and places up-to-date racial data about gangs into a broader historical and comparative context.

Crowe, A.H., and P.J. Schaefer. 1992. *Identifying and Intervening with Drug-Involved Youth, Participant Manual.* Durham, N.C.: American Probation and Parole Association. **NCJ 143309.**

This manual for juvenile justice professionals examines drug-involved youth and their development, needs, and problems and discusses the environmental and social context in which youth live.

Curry, G.D., R.J. Fox, R.A. Ball, and D. Stone. 1992. *National Assessment of Law Enforcement Anti-Gang Information Resources: Final Report.* Washington, D.C.: National Institute of Justice, U.S. Department of Justice. **NCJ 147399.**

This report documents an increase from earlier assessments in the number of city police departments that report gang problems. It recommends that cities pay greater attention to gang-related crime data.

Delinquency Prevention Works. 1995 (May). Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 147392.**

See introduction for annotation.

Dembo, R., et al. 1993 (September). Longitudinal study of the predictors of the adverse effects of alcohol and marijuana/hashish use among a cohort of high-risk youth. *International Journal of the Addictions* 28(11):1045-1084. **NCJ 147392.**

This article reviews data from a study of juvenile detainees in a southeastern State to examine the demographic and life experience factors related to their reported adverse effects of alcohol and other drug use.

Dougherty, D., et al. 1992 (May). Adolescent health: A report to the U.S. Congress. *Journal of School Health* 62(5):167-174. **NCJ 145348.**

This document reports findings from a study conducted by the U.S. Congress Office of Technology Assessment. It includes recommendations regarding adolescents' access to firearms and ways to improve their social environments.

Drug Abuse Among Minority Youth: Methodological Issues and Recent Research Advances. 1993. Rockville, Md.: National Institute on Drug Abuse, U.S. Department of Health and Human Services. **NCJ 145370.**

This compilation of papers attempts to document patterns, causes, and consequences of drug abuse by minority youth. The research suggests that economic situations, unique cultural backgrounds, and social networks may cause drug-using behavior of minority youth to vary significantly from that of nonminority youth.

Drug Recognition Techniques: A Training Program for Juvenile Justice Professionals. 1990. Update on Programs. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 128795.**

This update discusses OJJDP-sponsored training programs that teach juvenile justice professionals how to recognize when youth are under the influence of drugs or alcohol.

Drug Use Among Youth: No Simple Answers to Guide Prevention. 1993. Washington, D.C.: Human Resources Division, U.S. General Accounting Office. **NCJ 149091.**

This publication addresses the prevalence of drug and alcohol use among various groups of juveniles; the relationship between drug and alcohol use; risk factors related to juvenile drug and alcohol use; Federal programs aimed at drug risk factors; and policies that might constitute a reasonable prevention and intervention strategy.

Drug Use Forecasting. 1993 Annual Report on Juvenile Arrestees/Detainees: Drugs and Crime in America's Cities. Research in Brief. Washington, D.C.: National Institute of Justice, U.S. Department of Justice. **NCJ 150709.**

This report, part of a series that explores drug use among youthful offenders in 12 cities, shows an increase in the number of arrestees testing positive for marijuana as well as a rise in multiple drug use. It suggests collaborative efforts that can be made at the Federal and local levels.

Elliott, D.S. 1994. *Youth Violence: An Overview.* Boulder, Colo.: Center for the Study and Prevention of Violence, University of Colorado. **NCJ 152908.**

This document reports that the problem with juvenile violence in the 1990's is its lethality caused by the increased use of handguns. Dropouts, drug dealers, and individuals with prior records of violent behavior are more likely to possess guns than are other adolescents. The vast majority of guns used in crimes are obtained by theft or other illegal means. There is little re-

search on the effectiveness of gun control policies; however, some evidence shows that restrictive handgun laws and mandatory sentences for firearm offenses work.

Esbensen, F., and D. Huizinga. 1993 (November). Gangs, drugs, and delinquency in a survey of urban youth. *Criminology* 31(4):565-589. **NCJ 145959.**

This report is based on an annual survey of male and female juveniles in Denver, CO, during a 4-year span. The survey results provide information on the prevalence, demographic composition, and criminal activities of gangs, as well as insight into the process of juveniles joining gangs.

Esbensen, F., et al. 1993 (May). Gang and non-gang youth: Differences in explanatory factors. *Journal of Contemporary Criminal Justice* 9(2):94-116. **NCJ 145076.**

Using the Denver Youth Survey, a longitudinal study of families, the article examines characteristics of juvenile gang members.

Fagan, J. 1995. *What Do We Know About Gun Use Among Adolescents?* Boulder, Colo.: Center for the Study and Prevention of Violence, University of Colorado. **NCJ 160053.**

Relying on gang literature, homicide data, and his own research on juvenile violence, the author uses a nuclear deterrent strategy to describe the "ecology of danger" that pervades the lives of many young people who carry guns. He asserts that a continuous sense of danger affects the decisionmaking and behavior of young people. Cultural dynamics, influenced by the gun trade, have also popularized guns and

made backing down from arguments and losing face difficult for youth. As a solution to these two dynamics, he proposes interventions focused on individual behavior change and on building an ecology of safety.

Fagan, J. 1992. *Political Economy of Drug Dealing Among Urban Gangs.* New York, N.Y.: Social Science Research Council. **NCJ 149210.**

This study examines past and recent data on gangs and drugs that examine their interrelationship. It also explores the effects of community structural change on neighborhood social processes that foster the emergence of youth gangs.

Farrell, A.D., et al. 1992. Risk factors for drug use in rural adolescents. *Journal of Drug Education* 22(4):313-328. **NCJ 141533.**

A questionnaire that assessed drug use and the presence or absence of 20 risk factors was used to test the relevance of the risk-factor model for predicting drug use among rural adolescents.

Federal Bureau of Investigation. 1994. *Crime in the United States, 1993: Uniform Crime Reports.* Washington, D.C.: U.S. Department of Justice. **NCJ 151712.**

See introduction for annotation.

Female Involvement in Gangs. 1993. Bethesda, Md.: Development Services Group, Inc. **NCJ 148558.**

This booklet summarizes the highlights of presentations at the forum on the Prevention of Adolescent Female Gang Involvement held by the Family and Youth Services Bureau in Bethesda, MD, in March 1993.

Feyerherm, W., C. Pope, and R. Lovell. 1992 (December). *Youth*

Gang Prevention and Early Intervention Programs. Final Research Report. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 145311.**

This OJJDP-sponsored evaluation of youth gang prevention and intervention programs in 33 Boys and Girls Clubs confirms that high-risk youth involvement and regular attendance in the Clubs' activities are effective in improving their behavior and performance at school.

Fingerhut, L.A. 1993 (March). Firearm mortality among children, youth, and young adults 1–34 years of age, trends and current status: United States, 1985–1990. *Advance Data* 231. **NCJ 143308.**

This report revises a National Center for Health Statistics report documenting the level of firearm mortality among individuals ages 1–34 from 1979 to 1988. Newly available intercensal population estimates and 1990 data have allowed the correction of statistics for 1985 to 1988.

Fingerhut, L.A., D.D. Ingram, and J.J. Feldman. 1992. Firearm and nonfirearm homicide among persons 15 through 19 years of age. *Journal of the American Medical Association* 267(22):3048–3053. **NCJ 143423.**

This article reports that the 1989 firearm homicide rate in metropolitan counties was nearly five times the rate in nonmetropolitan counties. Firearm homicide rates were highest in core metropolitan counties (27.7/100,000), compared with nonmetropolitan counties (2.9/100,000). Firearm homicide rates were highest for black males and lowest for white females in all five urbanization strata for 1979 through 1989.

Fingerhut, L.A., D.D. Ingram, and J.J. Feldman. 1992 (June 10). Firearm homicide among black teenage males in metropolitan counties: Comparison of death rates in two periods, 1983 through 1985 and 1987 through 1989. *Journal of the American Medical Association* 267(22):3054–3058. **NCJ 143424.**

This study identified counties that had either significantly high or significantly low firearm homicide rates among black males ages 15 through 19 or that experienced a significant increase in the firearm homicide rate in two periods in the 1980's.

Fingerhut, L.A., J.C. Kleinman, E. Godfrey, and H. Rosenberg. 1991. Firearm mortality among children, youth, and young adults 1–34 years of age, trends and current status: United States 1979–88. *Monthly Vital Statistics Report* 39(11). **NCJ 144116.**

This report emphasizes racial and gender differences in homicide and suicide associated with firearms among males ages 15 to 34.

Firearm Facts: Information on Gun Violence and Its Prevention. 1994. Rockville, Md.: Division of Maternal and Child Health, Public Health Service, U.S. Department of Health and Human Services. **NCJ 149880.**

This report presents information and statistics on the nature, extent, costs, and prevention of firearms-related deaths, particularly among children, in the United States.

Fleisch, B. 1991. *Approaches in the Treatment of Adolescents With Emotional and Substance Abuse Problems.* Rockville, Md.: Center for Substance Abuse Treatment, Substance Abuse and Mental Health Services Administration, U.S. Department of Health and Human Services. **NCJ 145307.**

This report describes 12 programs that offer promising, innovative, or unusual treatment approaches for adolescents with both mental health and substance abuse problems.

Gangs, schools, and community. 1993 (Spring). *School Intervention Report* 6(3). **NCJ 147408.**

This issue focuses on problems surrounding gangs, schools, and communities. It discusses the role of educators in empowering parents to reduce the likelihood that their children will join gangs and to motivate their children to leave gangs they have joined.

Greenbaum, S. 1994 (Spring/Summer). Drugs, delinquency, and other data. *Juvenile Justice* II(1):2–8. **NCJ 148407.**

This article underscores the link between juvenile drug use and delinquency. It summarizes findings of OJJDP's Program of Research on the Causes and Correlates of Delinquency, which conducted longitudinal surveys of high-risk youth in Denver, CO; Pittsburgh, PA; and Rochester, NY.

Greenwood, P.W. 1992 (October). Substance abuse problems among high-risk youth and potential interventions. *Crime and Delinquency* 38(4):444–458. **NCJ 140360.**

Although overall drug use among teenagers has declined significantly during the past decade, adolescents raised in impoverished urban communities continue to be at high risk for involvement in drug use, drug sales, and serious juvenile delinquency. This article highlights findings from longitudinal studies that suggest preventive interventions with these youth must address a wide range of problems and needs.

Greer, C., et al. 1990. Alcohol abuse and the young offender: Alcohol education as an alternative to custodial sentencing. *Journal of Offender Counseling, Services & Rehabilitation* 15(1):131-145. **NCJ 123652.**

This article states that the exact relationship between alcohol abuse and juvenile crime is not clear. The authors believe that alcohol education courses, as developed in England, may be a viable alternative to custodial sentencing for delinquents.

Hard Facts on Handguns. 1994. Huntington, N.Y.: Bureau for At-Risk Youth. **NCJ 150922.**

Although handgun deaths in Australia, Sweden, Great Britain, Canada, Japan, and Switzerland fell below 100 per country for a 1-year period, the United States tallied 10,667 deaths in that same year. This pamphlet presents facts on handgun deaths in various countries, the risks of handguns for juveniles, and steps juveniles should take to reduce their risk of injury or death from a handgun.

Harmon, M.A. 1993 (April). Reducing the risk of drug involvement among early adolescents: An evaluation of Drug Abuse Resistance Education (DARE). *Evaluation Review* 17(2):221-239. **NCJ 141978.**

This study compares 341 5th-grade DARE students to 367 non-DARE students in order to evaluate the effectiveness of the DARE Program in Charleston County, SC.

Harris, L. 1993 (September). *Survey of Experiences, Perceptions, and Apprehensions About Guns Among Young People in America.* Cambridge,

Mass.: Harvard School of Public Health, Harvard University. **NCJ 144016.**

Students in the 6th through 12th grades in a random sample of U.S. public, private, and parochial schools were surveyed to determine their experiences, perceptions, and fears about gun possession.

Hatchell, B.S. 1990. *Rising Above Gangs and Drugs: How to Start a Community Reclamation Project.* Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 133522.**

This manual describes the Community Reclamation Project that targeted four communities in Los Angeles County to develop a gang and drug prevention program. The program established a network of community-based organizations, law enforcement and government agencies, and concerned citizens to combat drug use and gang activity. It also developed a culture-specific strategy integrating child, parent, and teacher training to prevent drug abuse and gang activity among youth.

Henkoff, R. 1992 (August). Kids are killing, dying, bleeding. *Fortune* 126(3):62-69. **NCJ 159324.**

This article examines a non-experimental exploration of juvenile homicide, abuse, and suicide. The author suggests several strategies to reduce juvenile violence, including parenting skills programs, anger management programs, and gun control policies.

Howell, J.C., ed. 1995 (May). *Guide for Implementing the Comprehensive Strategy for Serious, Violent, and Chronic Juvenile Offenders.* Washing-

ton, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 153571.**

See introduction for annotation.

Howell, J.C. 1994 (October). Recent gang research: Program and policy implications. *Crime and Delinquency* 40(4):495-515. **NCJ 151535.**

See section 2 for annotation.

Howell, J.C. 1994 (April). *Gangs.* Fact Sheet #12. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ FS009412.**

This fact sheet addresses the composition of gangs; their involvement with drugs, violence, and weapons; and how OJJDP plans to combat the problem.

Huizinga, D., et al. 1994. *Urban Delinquency and Substance Abuse.* Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 146416.**

There is a strong relationship between the possession of illegal guns and delinquency and drug use. Seventy-four percent of the illegal gun owners commit street crimes, 24 percent commit firearms crimes, and 41 percent use drugs. Boys who own legal guns have much lower rates of delinquency and drug use and are even slightly less delinquent than nonowners of guns. For legal gun owners, socialization appears to take place in the family. For illegal gun owners, it seems to take place on the street.

Humphrey, K.R., and P.R. Baker. 1994 (September). GREAT program: Gang Resistance Education And Training. *FBI Law Enforcement Bulletin* 63(9):1-4. **NCJ 150168.**

This article describes the Phoenix, AZ, Gang Resistance Education and Training (GREAT) Program, a cooperative effort by the police department, area schools, and the Bureau of Alcohol, Tobacco, and Firearms to help juveniles resist peer pressure to join gangs.

Inciardi, J.A., et al. 1993. *Street Kids, Street Drugs, Street Crime: An Examination of Drug Use and Serious Delinquency in Miami*. Belmont, Calif.: Wadsworth Corporation. **NCJ 146902**.

To provide baseline information on serious juvenile delinquency, the authors conducted street interviews with approximately 600 serious delinquents in 20 neighborhoods of the Miami/Dade County metropolitan area.

Innovative Law Enforcement Training Programs: Meeting State and Local Needs. 1991. Juvenile Justice Bulletin. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 131735**.

This bulletin describes several training programs offered by OJJDP to help law enforcement agencies improve juvenile operations and services.

Interdepartmental Working Group on Violence. 1994. *Violence: Report to the President and Domestic Policy Council*. Washington, D.C. **NCJ 159325**.

See section 1 for annotation.

Jacklin, B. 1994 (Spring). Children, adolescents, and firearms. *Options* 2:1-2, 14-15. **NCJ 152931**.

This study uses data sources to examine firearm mortality and morbidity rates in the United States, domestic rates compared to other developed countries, numbers of African-American

male and white male firearm victims, children's accessibility to guns, and psychological trauma and financial costs due to firearm deaths and injuries.

Joe, K. 1993. Issues in accessing and studying ethnic youth gangs. *Gang Journal* 1(2):9-24. **NCJ 147674**.

This article reviews the current state of research on ethnic gangs, emphasizing the nature of such research, the principal methods employed in these studies, and the reasons for the uneven development of an ethnic-specific focus in gang-related research.

Joe, K. 1992 (November). *Chinese Gangs and Tongs: An Exploratory Look at the Connection on the West Coast* (paper presented at the 44th annual meeting of the American Society of Criminology in New Orleans, La., November 4-7, 1992). Honolulu, Ha.: University of Hawaii. **NCJ 149213**.

This document explores whether a relationship exists between Chinese youth gangs in the San Francisco, CA, area and organized crime groups in Chinese communities. Analysis is based on interviews with 73 Chinese gang members.

Joe, K., and M. Chesney-Lind. 1993. Just every mother's angel: An analysis of gender and ethnic variations in youth gang membership. *Gender and Society* 9(4):408-431. **NCJ 149118**.

Based on interviews with 48 male and female youth who belonged to ethnic gangs in Hawaii, this report presents an analysis of the reasons males and females have for joining gangs. The research shows that even though males and females participate in gangs for different reasons, both genders rely on

gangs to fulfill the social role of the group and to solve problems experienced in low-income communities.

Johnson, C., B. Webster, and E. Connors. 1995 (February). *Prosecuting Gangs: A National Assessment*. Research in Brief. Washington, D.C.: National Institute of Justice, U.S. Department of Justice. **NCJ 151785**.

The authors present the findings of a nationwide survey of local prosecutors' approaches to gang prosecution. Also included are a review of State legislation targeted at street gang activity and case studies of prosecution efforts at four sites.

Jones, M.A., and B. Krisberg. 1994. *Images and Reality: Juvenile Crime, Youth Violence, and Public Policy*. San Francisco, Calif.: National Council on Crime and Delinquency. **NCJ 149440**.

The authors indicate that the most important factor concerning youth violence in general and juvenile homicide specifically during the past 10 years is the availability of firearms. Teenage boys in all racial and ethnic groups are more likely to die from gunshot wounds than from all natural causes combined. Both the availability and increasing lethality of firearms contribute to this violence.

Juvenile Alcohol and Other Drug Abuse: A Guide to Federal Initiatives for Prevention, Treatment, and Control. 1992. Washington, D.C.: The Coordinating Council on Juvenile Justice and Delinquency Prevention. **NCJ 138741**.

This work aims to help local communities develop strategies that address the needs of youth involved with illegal drugs and alcohol. The document describes

promising programs, projects, and research; addresses the problem of juvenile alcohol and other drug abuse; and lists sponsoring agencies and clearinghouses for additional information.

Kellerman, A. 1993 (October). Gun ownership as a risk factor for homicide in the home. *New England Journal of Medicine* 329(15):1084–1091. **NCJ 146835.**

This study found that in King County, WA, guns kept at home were involved in the death of a household member 185 times more often than in the death of a stranger. These deaths included suicides, homicides, and unintentional fatal shootings.

Kennedy, D.M. 1994. *Can We Keep Guns Away From Kids?* Cambridge, Mass.: Program in Criminal Justice Policy and Management, John F. Kennedy School of Government, Harvard University. **NCJ 152025.**

This study examines the effectiveness of existing gun control statutes and proposes a comprehensive local strategy that aims to reduce juveniles' access to guns.

Kids and Guns: A National Disgrace. 1993. Washington, D.C.: Educational Fund to End Handgun Violence. **NCJ 152551.**

Between 1985 and 1990, the number of teenagers murdered by firearms doubled, while the number of 15-year-old boys charged with murder increased by 217 percent. This report documents the rising incidence of gun-related violence that affects children, including violence perpetrated by children.

Kingery, P.M., et al. 1992. Violence and illegal drug use among adolescents: Evidence from the U.S.

National Adolescent Student Health Survey. *International Journal of the Addictions* 27(12):1445–1464. **NCJ 147407.**

The National Adolescent Student Health Survey, administered during 1987 and 1988, questioned 3,789 students from 176 public and private schools about violence, drug use, and victimization. This article examines the relationships among these topics, based on survey results.

Klitzner, M., et al. 1993. *Substance Abuse: Early Intervention for Adolescents.* Bethesda, Md.: Pacific Institute for Research and Evaluation. **NCJ 141401.**

This study presents a range of early intervention strategies used in juvenile drug prevention programs. It profiles school, health care, juvenile justice system, and community-based programs and includes survey data.

Knox, G.W. 1992 (November). *Gang Problems Among Asian Students* (paper presented at the 44th annual meeting of the American Society of Criminology in New Orleans, La., November 4–7, 1992). **NCJ 148512.**

This paper studied 361 Asian students to ascertain whether traditional hypotheses of juvenile gang membership are relevant to the gang problems of this population.

Knox, G.W., et al. 1994. *Gangs and Guns: A Task Force Report From the National Gang Crime Research Center.* Chicago, Ill.: National Gang Crime Research Center, Chicago State University. **NCJ 151529.**

Six gang researchers at three universities collaborated on this extensive study of gangs and guns in the Midwest. The study examines eight county jails, a Chicago, IL, public high school

and inner-city program, and a private suburban probation program.

Koop, C.E., and G.D. Lundberg. 1992 (June). Violence in America: A public health emergency. *Journal of the American Medical Association* 267(22):3075–3076. **NCJ 151841.**

This article discusses the need for a public health/medical approach to the problem of violence. It compares the responsibilities associated with owning and using a firearm with those associated with owning and using a motor vehicle. The article concludes with recommendations for national action.

Krisberg, B., R. DeComo, and N.C. Herrera. 1992. *National Juvenile Custody Trends: 1978–1989.* Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 131649.**

See section 1 for annotation.

Lawyers Committee on Violence. 1994. *Gun Violence in New York City: Problems and Solutions.* New York, N.Y.: Lawyers Committee on Violence, Inc. **NCJ 159329.**

This report proposes several alternatives for reducing the number of guns in circulation, including legal penalties, eviction, and increased enforcement.

Lizotte, A.J., J.M. Tesoriero, T.P. Thornberry, and M.D. Krohn. 1994 (March). Patterns of adolescent firearms ownership and use. *Justice Quarterly* 11(1):51–74. **NCJ 150231.**

This study used data from the Rochester Youth Development Study to analyze patterns of adolescent gun possession and use. Ten percent of the 9th- and 10th-grade boys studied had a firearm, and 7.5 percent reported carrying it regularly.

Loftin, C., D. McDowall, B. Wiersman, and T.J. Cottey. 1991. Effects of restrictive licensing of handguns on homicide and suicide in the District of Columbia. *New England Journal of Medicine* 325(23):1615–1620. **NCJ 133649.**

This evaluation of a District of Columbia law banning the purchase, sale, transfer, or possession of handguns by civilians suggests that, on average, 47 deaths have been prevented each year since implementation of the law.

Lowry, R., et al. 1993. Violence-related attitudes and behaviors of high school students—New York City, 1992. *Morbidity and Mortality Weekly Report* 42(40). **NCJ 147422.**

This article reprint reveals that during the 1991–92 school year, 36.1 percent of the 9th- to 12th-grade New York City public school students surveyed reported being threatened with physical harm. Twenty-one percent of students reported carrying a weapon such as a gun, knife, or club during the 30 days preceding the survey, with 7 percent carrying a handgun.

Madlem, M.S. 1993 (Fall). Trends and issues surrounding rural adolescent alcohol and other drug abuse. *School Intervention Report* 7(1):11–18, 20–21. **NCJ 145786.**

Focusing on rural areas, the author notes that alcohol and drug use rates for rural adolescents appear to be matching or even surpassing rates for urban adolescents.

Maxson, C.L., M.A. Gordon, and M.W. Klein. 1985. Differences between gang and nongang homicides. *Criminology* 23(2):209–222. **NCJ 102843.**

This analysis of more than 700 homicides within the jurisdictions of the Los Angeles Sheriff's Department and the Los Angeles Police Department between 1978 and mid-1982 found significant differences between homicides designated gang-related and those that were not gang-related.

McLellan, T., and R. Dembo. 1993. *Screening and Assessment of Alcohol and Other Drug (AOD) Abusing Adolescents*. Rockville, Md.: Center for Substance Abuse Treatment, Substance Abuse and Mental Health Services Administration, U.S. Department of Health and Human Services. **NCJ 152331.**

This Treatment Improvement Protocol is based on three principles: that adolescents deserve effective and appropriate care; that they have a right to privacy and to confidential handling of any information they provide; and that program staff must consider cultural, ethnic, and gender concerns in all aspects of the screening and assessment process.

National Drug Control Strategy. Executive Summary. 1995 (April). Washington, D.C.: Executive Office of the President. **NCJ 152702.**

This summary highlights key points of President Clinton's plan to reduce illicit drug use and drug trafficking in the United States. It presents an overview of the full Strategy, outlines the current drug situation, summarizes the Strategy's four Action Plans, and presents Federal drug control resource priorities for FY 1996.

1994 National Household Survey on Drug Abuse. 1995. Washington, D.C.: U.S. Department of Health and Human Services. **NCJ 152438.**

This annual survey, conducted by HHS' Substance Abuse and Mental Health Services Administration, estimates the prevalence of legal and illegal drug use in the United States and monitors drug use trends. It is based on a representative sample of respondents ages 12 and older, including persons living in households, dormitories, and homeless shelters.

Northrop, D., and K. Hamrick. 1990. *Weapons and Minority Youth Violence* (background paper prepared for the Forum on Youth Violence in Minority Communities: Setting the Agenda for Prevention, in Atlanta, Ga., on December 10–12, 1990). **NCJ 145349.**

This paper reviews existing and potential strategies for reducing the misuse of weapons by American youth. The authors cite three issues that need to be addressed if effective interventions are to be implemented in the area of weapons misuse by minority youth.

Office of National Drug Control Policy. 1995 (February). *National Drug Control Strategy 1995: Strengthening Communities' Response to Drugs and Crime*. Washington, D.C.: Office of the President. **NCJ 152700.**

This document is the latest in a series of annual publications addressing current trends in illicit drug use in the United States. It outlines four areas for action: reducing drug demand; reducing crime, violence, and drug availability; enhancing domestic drug program flexibility and efficiency at the community level; and strengthening interdiction efforts.

Osgood, D.W. 1995 (January). *Drugs, Alcohol, and Adolescent Violence*. Boulder, Colo.: The Center for the Study and Prevention of Violence, Institute for Behavioral Sciences, University of Colorado. **NCJ 154812**.

This study focuses on the connection between drug use and violence among 12 to 18 year olds. The author analyzes previous research on this topic and provides a bibliography and statistical tables.

Pacific Center for Violence Prevention. 1994. *Preventing Youth Violence: Reducing Access to Firearms*. San Francisco, Calif. **NCJ 158365**.

This publication argues that the increasing rate of violent juvenile crime in the last 10 years is parallel to a period of decreased allocation of resources for youth. The public health model states that decreasing handgun availability is the most effective means of decreasing firearm-related injury and death. Low prices, new designs, and ready availability contribute to youth possession of firearms. Two psychosocial factors that contribute to violence are the youth's incompetence (an inability to understand the nature of one's acts) and desensitization to the quality of one's acts through exposure to the media.

Price, J.H., S.M. Desmond, and D. Smith. 1991 (August). A preliminary investigation of inner-city adolescents' perceptions of guns. *Journal of School Health* 61(6):255-259. **NCJ 159333**.

The authors suggest that schools and health educators become more aware and involved in the prevention of gun violence.

Prothrow-Stith, D., and M. Weissman. 1991. *Deadly Consequences: How Violence Is Destroying Our Teenage Population and A Plan To Begin Solving The Problem*. New York, N.Y.: HarperCollins Publishers. **NCJ 130864**.

The authors explore the epidemic of violence that exists in the Nation and is threatening a generation of young men, particularly African-American males living in poverty. They evaluate the societal factors that contribute to the culture of violence. Seeing violence as a public health emergency, they offer concrete strategies to prevent continued deaths and injuries to youth.

Pryor, D.W., and E. McGarrell. 1993 (June). Public perceptions of youth gang crime: An exploratory analysis. *Youth and Society* 24(4):399-418. **NCJ 143206**.

This article investigates community perceptions of the juvenile gang problem in Indianapolis, IN, through a survey of 306 residents conducted in 1984 and 1985. It examines the effects of victimization experiences at the hands of youth gangs as well as the impact of media exposure on community perceptions and opinions.

Pulse Check: National Trends in Drug Abuse. 1995 (Spring). Washington, D.C.: Office of National Drug Control Policy, Executive Office of the President. **NCJ 153826**.

This issue summarizes information gathered during January and February 1995 on the prevalence of drugs throughout the Nation. Sources include ethnographers and epidemiologists working in the drug field, law enforcement officials, and treatment providers.

Quinn, J.F., and B. Downs. 1995 (Spring). Predictors of gang violence: The impact of drugs and guns on police perceptions in nine states. *Journal of Gang Research* 2(3)15-27. **NCJ 155155**.

This article reports on the findings of a survey of nine municipal police departments that explore the effect of structural and behavioral variables on the frequency of two types of gang violence: internecine violence and violence directed at citizens who were not gang-involved.

Reducing the Impact of Drugs on American Society. 1995 (March). Washington, D.C.: Office of National Drug Control Policy, Executive Office of the President. **NCJ 153765**.

This report contains charts that graphically represent the steps involved in the Administration's approach to addressing the problems of illicit drug use and its consequences. The charts demonstrate the scope of the problem and the costs of drug use.

Reducing Youth Gun Violence: An Overview of Programs and Initiatives. 1996. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 154303**.

This report includes a summary that highlights current Federal and State legislation to reduce youth gun violence and describes state-of-the-art prevention and intervention programs as well as Federal and local partnerships in implementing these laws and programs. It provides a directory of programs, organizations, and research aimed at reducing gun violence.

Responding to Drug Use and Violence: Helping People, Families, and Communities: A Directory and Resource Guide of Public- and Private-Sector Grants. 1995 (January). Washington, D.C.: Office of National Drug Control Policy, Executive Office of the President. **NCJ 153429.**

This directory outlines the Federal grant-making process and lists Federal grant programs as well as additional programs and resources.

Robertson, J.G., and J.E. Waters. 1994. Inner city adolescents and drug abuse. In A.R. Roberts, ed. *Critical Issues in Crime and Justice.* Thousand Oaks, Calif.: Sage Publications. **NCJ 149862.**

This chapter examines problems associated with adolescent drug abuse and drug dealing, particularly in poor and minority communities in large urban areas. The authors discuss the relationship between drug abuse and crime.

Roehl, J., G. Capowich, and R. Llaneras. 1991 (May). *National Evaluation of the Systems Approach to Community Crime and Drug Prevention.* (Unpublished.) Arlington, Va.: Institute of Social Analysis. **NCJ 160054.**

This two-volume report evaluates the Systems Approach to Community Crime Prevention implemented in Knoxville, TN; New Haven, CT; Jacksonville, FL; and Tucson, AZ. The authors found that particular elements of each city's approach were successful in reducing rates of drug-related and other crime.

Roth, J.A. 1994 (February). *Firearms and Violence.* Research in Brief. Washington, D.C.: National Institute of Justice, U.S. Department of Justice. **NCJ 145533.**

Most murders involve firearms, and young minority men are at especially high risk of being murdered with a gun. Innovations in laws, law enforcement, public education, and technology show promise of reducing gun murders by making firearms less available to persons likely to use them in violence, less accessible in situations where violence is likely to occur, or less lethal. The research indicates that evaluations are needed to test the effectiveness of these innovations.

Rowe, D.C., and B. Gulley. 1992 (May). Sibling effects on substance use and delinquency. *Criminology* 30(2):217-233. **NCJ 137081.**

The authors of this article examined data from 418 sets of siblings in Arizona to determine the influence of siblings on juvenile delinquency and drug abuse.

Ruttenberg, H. 1994 (May). The limited promise of public health methodologies to prevent youth violence. *The Yale Law Journal* 103:1885. **NCJ 159334.**

This article notes that although the public health approach successfully changed middle-class smoking behavior, it did not seem to change the smoking habits of members of the lower class and may not change the violent behavior of the lower class. Although the public health approach may reduce the lethality of violence, it is questionable whether it will reduce the incidence of violence. Rather, the Nation must collectively strengthen its will to improve the circumstances of children, youth, and young adults.

Sanders, W.B. 1994. *Gangbangs and Drive-bys: Grounded Culture and Juvenile Gang Violence.* Hawthorne,

N.Y.: Aldine de Gruyter Publishing Co. **NCJ 148415.**

This book analyzes typical patterns of gang violence and illustrates how ethnicity can affect gang styles. It also discusses police interaction with gangs.

Schinke, S.P., et al. 1991. *Effects of Boys and Girls Clubs on Alcohol and Other Drug Abuse and Related Problems in Public Housing Projects.* Rockville, Md.: Office of Substance Abuse Prevention, U.S. Department of Health and Human Services. **NCJ 143443.**

This study evaluates the effects of Boys and Girls Clubs on children and adolescents who live in public housing projects. The primary focus is on the effect these clubs have on drug and alcohol use, delinquency, vandalism, and school success.

Schonberg, S.K. 1993. *Guidelines for the Treatment of Alcohol and Other Drug (AOD) Abusing Adolescents.* Rockville, Md.: Substance Abuse and Mental Health Services Administration, U.S. Department of Health and Human Services.

This Treatment Improvement Protocol provides guidelines to be used by programs that design and deliver services to clients, ages 11-21, and by professionals who need to choose among treatment alternatives for troubled young people.

Shapiro, J.P., R.L. Dorman, B.M. Burkey, and C.J. Welker. 1993. *Attitudes Toward Guns and Violence in Third- Through Twelfth-Grade Youth.* Cleveland, Ohio: The Guidance Center. **NCJ 159336.**

This document compares youth attitudes toward firearms used for hunting with those used for violence. It recommends education and intervention for young children.

Sheley, J.F. 1994. Drug activity and firearms possession and use by juveniles. *Journal of Drug Issues* 24(3):363–382. **NCJ 150557.**

Using survey data from juveniles incarcerated in maximum security reformatories, this article analyzes gun use and possession among juveniles involved in the use and distribution of drugs.

Sheley, J.F., and J.D. Wright. 1993 (December). *Gun Acquisition and Possession in Selected Juvenile Samples*. Research in Brief. Washington, D.C.: National Institute of Justice and Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 145326.**

This brief details results about the extent of prior gun possession by incarcerated youth and students. The researchers concluded that the primary challenge is convincing youth they can survive in their neighborhoods without being armed.

Sheley, J.F., and J.D. Wright. 1993 (Autumn). Motivations for gun possession and carrying among serious juvenile offenders. *Behavioral Sciences and the Law* 11(4): 375–388. **NCJ 147139.**

Survey data collected from 835 male juveniles incarcerated in maximum security reformatories were used to analyze motivations behind gun possession and carrying.

Sheley, J.F., J.D. Wright, and Z.T. McGee. 1992 (June). Gun-related violence in and around inner-city schools. *American Journal of Diseases of Children* 46(6):677–768. **NCJ 146005.**

This study focuses on serious juvenile offenders and students from schools in high-risk areas who reported they carried guns for self-protection. The fundamental policy problem involves

convincing youth that they can survive in their neighborhoods unarmed. The authors recommend that efforts to change a culture of violence must be directed toward the family, community, and society.

Sheley, J.F., and J.D. Wright. 1992 (June). Youth, Guns, and Violence in Urban America (paper presented at the National Conference on Prosecution Strategies Against Armed Criminals and Gang Violence: Federal, State, and Local Coordination, June 9–11, 1992, San Diego, Calif.). Washington, D.C.: National Institute of Justice, U.S. Department of Justice. **NCJ 138725.**

Results from a survey of 835 male inmates in 6 juvenile correctional facilities across the country and 753 male students in 10 inner city public high schools near the correctional institutions surveyed were used to study the types, numbers, and logistics of juvenile firearms use.

Sheley, J.F., J.D. Wright, and M.D. Smith. 1993. *Firearms, Violence, and Youth: A Report of Research Findings—Final*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 147858.**

Using data from males in juvenile correctional facilities and inner-city public high schools, this report analyzes where, how, and why juveniles acquire, carry, and use firearms.

Sherman, L.W., J.W. Shaw, and D.P. Rogan. 1995 (January). *The Kansas City Gun Experiment*. Research in Brief. Washington, D.C.: National Institute of Justice, U.S. Department of Justice. **NCJ 150855.**

This brief evaluates a police patrol project designed to reduce gun violence, drive-by shootings, and

homicides in an area where the homicide rate was 20 times higher than the national average. Significant reductions in gun crimes occurred as a result of the directed police patrol.

Sloan, J.H., et al. 1990. Handgun regulations, crime, assaults, and homicide: A tale of two cities. *Gun Control Debate* 1990:195–205. **NCJ 127644.**

The cities of Seattle, WA, and Vancouver, BC, were studied over a 7-year period to understand the relationship between firearm regulations and community rates of homicide. The study suggests that a modest restriction of citizens' access to firearms is associated with lower rates of homicide. Decreased availability of handguns did not result in a direct shift to homicide by other means.

Smith, D., and B. Lautman. 1990. *A Generation Under the Gun: A Statistical Analysis of Youth Firearm Murder in America*. Washington, D.C.: Center to Prevent Handgun Violence. **NCJ 159337.**

The authors' analysis of expository data provides the basis for recommendations for reducing the availability of guns, especially in the home. They also recommend cooperation among parents, educators, lawmakers, and law enforcement officials to educate about the dangers of gun use, reduce the availability of firearms, and punish offenders quickly and severely.

Snyder, H., and M. Sickmund. 1995 (August). *Juvenile Offenders and Victims: A National Report*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 153569.**

See introduction for annotation.

Snyder, H., and M. Sickmund. 1995 (May). *Juvenile Offenders and Victims: A Focus on Violence*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 153570**.

See introduction for annotation.

Spergel, I. 1995 (June). *The Youth Gang Problem: A Community Approach*. New York, N.Y.: Oxford University Press. **NCJ 158897**.

This comprehensive study describes the scope and seriousness of the gang problem, the complex relationship between gang members and drug activity, the structure of gangs and the demographics of gang members, the process of gang life, and other aspects of youth gangs. The book also looks at what has been done and what needs to be done about the problem, including local community mobilization and national policy.

Spergel, I. 1994 (October). *Gang Suppression and Intervention: Community Models*. Research Summary. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 148202**.

Based on the National Youth Gang Suppression and Intervention Program, this research summary presents a set of policies and procedures for the design of community efforts by police, prosecutors, judges, probation and parole officers, schools, community-based agencies, and a range of grassroots agencies. It presents a framework for creating effective approaches for reducing the problem of youth gangs.

Spergel, I., et al. 1994 (October). *Gang Suppression and Intervention: Problem and Response*. Research

Summary. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 149629**.

The National Youth Gang Suppression and Intervention Program conducted a comprehensive national survey of organized agency and community group responses to gang problems. This research summary describes the survey's findings, provides policy and program recommendations, and suggests strategies for cities with chronic and emerging gang problems.

Spergel, I. 1993. *Gang Suppression and Intervention: An Assessment*. Chicago, Ill.: School of Social Service Administration, University of Chicago. **NCJ 146494**.

This report provides an extensive review of the research literature available on the youth gang phenomenon and contains a summary and conclusions regarding the nature of the problem, promising intervention strategies, and possible courses for further research. It suggests that communities need to implement a comprehensive policy to address gang problems.

Spergel, I., et al. 1990 (June). National youth gang suppression and intervention program. *Juvenile Justice Bulletin*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 130917**.

This bulletin describes the National Youth Gang Suppression and Intervention Program, a research and development program established in 1987 by OJJDP to address policy and programs. The program is carrying out a four-stage process of

assessment, model program development, technical assistance, and dissemination.

Stevens, J.B. 1994. Federal prosecution of gangs and juveniles. *Criminal Practice Manual*. Washington, D.C.: Office of Legal Education, U.S. Department of Justice. **NCJ 149521**.

The author describes the role the FBI and other Federal agencies play with local law enforcement agencies in investigating gang activity and drug-related violence and in prosecuting juvenile gang members and other juvenile delinquents under Federal law.

Straight Talk About Risks: A Pre-K-12 Curriculum for Preventing Gun Violence, English-Spanish Bilingual Edition. 1992. Washington, D.C.: Center to Prevent Handgun Violence. **NCJ 143303**.

This curriculum, known as the STAR (Straight Talk About Risks) program, was developed for prekindergarten through 12th-grade levels. It strives to reduce the potential for children and teenagers to be injured or killed by gunfire.

Sugarmann, J., and K. Rand. 1994. Cease fire. *Rolling Stone* 677:30-42. **NCJ 147980**.

This report suggests a regulatory approach to gun control that requires individuals dedicated to reducing firearms violence to reassess their understanding of the issue. Some of the steps include establishment of a long-term public education media campaign to change public perception of gun violence; support for research into firearms violence, causes, effects, and economic costs; and

recruitment of individuals and organizations not traditionally involved in the debate.

Suppression of Drug Abuse in Schools Program: A Resource Guide for Implementing Prevention, Suppression, and Intervention Programs. 1988. San Francisco, Calif.: National Council on Crime and Delinquency. **NCJ 122956.**

This manual presents guidelines for establishing a program to prevent, suppress, and intervene in drug abuse in schools and communities by addressing both the demand and supply sides of the drug problem.

A Survey of Experiences, Perceptions, and Apprehensions About Guns Among Young People in America. 1993. New York, N.Y.: Louis Harris and Associates, Inc. and LH Research, Inc. **NCJ 144016.**

This work presents the results of two national opinion polls of adults' and children's attitudes toward guns and their experiences with them. The polls underscore deep fear and concern about gun violence and Americans' desire to do something about the epidemic.

Survey of experiences, perceptions, and apprehensions about guns among young people in America. 1993 (September). *Youth Record* 5(16):2-8. **NCJ 146058.**

This survey profiles elementary, middle, and high school students' experiences with guns, and their attitudes toward them.

Suter, E.A., W.C. Waters, and G.B. Murray, et al. 1995. Violence in America: Effective solutions. *Journal of the Medical Association of Georgia.* 85:253-263. **NCJ 160056.**

This paper examines the prevalence of guns in the United States, concluding that guns offer a substantial net benefit to society. It argues against more stringent gun controls and bans, recommending enforcement of existing gun laws and existing laws against violent crime.

Tatem-Kelley, B. 1994 (July). *A Comprehensive Strategy to Address America's Gang Problem.* Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 160057.**

This paper summarizes the work of OJJDP's Gang Task Force that reviewed OJJDP-sponsored gang projects, assessed the program development and future research implications of recent gang research, formulated recommendations for future OJJDP gang strategies, examined the history of the amended gang legislation, and conducted interviews with selected Federal program managers about current and planned gang initiatives.

Taylor, C.S. 1993. *Girls, Gangs, Women, and Drugs.* East Lansing, Mich.: Michigan State University Press. **NCJ 147359.**

This book focuses on a large segment of Detroit's African-American female population and shows that girls and young women who have become a force in the drug culture and urban gang life view their involvement as self-empowering.

Teen Gangs. 1993. Northfield, Minn.: Life Skills Education. **NCJ 148091.**

This pamphlet explains the history and current nature of juvenile gangs. It suggests approaches for preventing and

controlling gang activities and examines the harmful impacts upon youth and the community.

Torok, W.C., and K.S. Trump. 1994 (May). Gang intervention: Police and school collaboration. *FBI Law Enforcement Bulletin* 63(5):13-16. **NCJ 149366.**

This article examines the work of the Youth Gang Unit of the Cleveland, OH, public school system. Collaborating with the city police department's Youth/Gang Unit, the school gang unit consists of 4 school security officers and a coordinator and serves 127 schools with more than 73,000 students.

Treanor, W.W., and M. Bijlefeld. 1989. *Kids and Guns: A Child Safety Scandal.* Washington, D.C.: American Youth Work Center and Educational Fund to End Handgun Violence. **NCJ 111607.**

This booklet examines issues surrounding the problem of firearms and child safety, including statistics about the nature and prevalence of the problem and a discussion of prevention strategies.

Tromanhauser, E., and G. Knox. 1992. *Gangs in Juvenile Corrections: Fighting, Drug Abuse, and Other Health Risks.* Chicago, Ill.: National Commission of Correctional Health Care. **NCJ 148540.**

In 1991, data were obtained from a sample of 1,801 juveniles confined in 44 juvenile correctional facilities in 5 States to analyze gang membership.

Urban Street Gang Enforcement Operations Manual. Forthcoming. Washington, D.C.: Bureau of Justice Assistance, U.S. Department of Justice.

This manual outlines effective gang enforcement policies and procedures to control the growing problem of street gangs and gang-related violence in urban and suburban areas.

Van Kammen, W., and R. Loeber. 1994. *Delinquency, Drug Use and the Onset of Adolescent Drug Dealing*. Pittsburgh, Pa.: University of Pittsburgh. **NCJ 159340**.

The authors link youth firearm possession to drug selling, using data from a Pittsburgh youth study. They conclude that a reduction in the number of juveniles selling drugs is likely to reduce the carrying of concealed weapons, particularly guns.

Vrgora, F. 1992. *Gangs: The Death of Our Society*. Rockville, Md.: National Institute of Justice, U.S. Department of Justice. **NCJ 149138**.

This report describes major U.S. gangs and their distinctive features and behavior patterns. It explores signs that indicate to parents a child's involvement in gang activity, and suggests intervention tactics that may be effective.

Webster, D.W., P.S. Gainer, and H.R. Champion. 1993 (November). Weapon-carrying among inner-city junior high school students: Defensive behavior vs. aggressive delinquency. *American Journal of Public Health* 83(11):1604-1608. **NCJ 159341**.

This study assesses associations between beliefs and experiences related to weapon-carrying among youth. Among 7th-grade males, 48 percent had carried knives, and 23 percent had carried guns. Forty-five percent of 8th-grade males carried knives,

and 40 percent carried guns. Key risk factors for knife-carrying were being threatened with a knife, getting into fights, and not believing that having a weapon increases the carrier's risk of injury. Gun-carrying was associated with having been arrested, knowing more victims of violence, starting fights, and being willing to justify shooting someone.

Winfree, L.T., Jr., G.L. Mays, and T. Vigil-Backstrom. 1994 (June). Youth gangs and incarcerated delinquents: Exploring the ties between gang membership, delinquency, and social learning theory. *Justice Quarterly* 11(2):229-256. **NCJ 150588**.

Data collected from incarcerated juveniles in New Mexico in 1991 formed this article's analysis of the conceptual and empirical links among membership in youth gangs, juvenile delinquency, and Akers's social learning theory.

Working with Youth in High-Risk Environments: Experiences in Prevention. 1992. Rockville, Md.: Alcohol, Drug Abuse, and Mental Health Administration, U.S. Department of Health and Human Services. **NCJ 146078**.

This monograph describes drug abuse prevention programs supported by the Office for Substance Abuse Prevention to help youth and their families.

Wright, J.D., et al. 1992 (November-December). Kids, guns, and killing fields. *Society* 30(1):84-89. **NCJ 140211**.

This article analyzes data from youth in maximum security juvenile correctional facilities in 4 States (California, Louisiana, Illinois, and New Jersey) and a

sample of students in 10 inner-city public high schools near the correctional facilities who answered a survey on youth firearm use and behavior.

Youth Gang Drug Prevention Program. 1993. *Female Involvement in Gangs*. Washington, D.C.: Administration for Children, Youth, and Families, U.S. Department of Health and Human Services. **NCJ 148558**.

This report explores issues pertaining to female involvement in gangs. It summarizes the highlights of presentations made at the Prevention of Adolescent Female Gang Involvement Forum, March 24-25, 1993.

Zimmer, K., and S. Fedyniak. 1993 (March). Suburban gangs: a police/school collaborative approach. *Quarterly* 12-13. **NCJ 148932**.

Following two violent incidents in Lakewood, OH, community members and school officials began to address their problem with gangs. Their solution fostered interaction between police and school officials and led to the disruption of gang activity. This article also discusses the denial and overreaction that accompanied this episode.

Zimring, F.E. 1986. Gun control. *Bulletin of the New York Academy of Medicine* 62:615-621. **NCJ 102812**.

This article explores drawbacks to several approaches to gun control. It concludes that local gun control initiatives must have State and Federal support if they are to succeed.

Zimring, F.E. 1993 (Winter). Policy research on firearms and violence. *Health Affairs* 12(4):109-122. **NCJ 148073**.

This author suggests that public health professionals, in collaboration with social scientists and criminologists, can make a significant contribution to research on the nature and extent of firearm control.

Zimring, F.E. 1985. Violence and firearms policy. In L.A. Curtis, ed. *American Violence and Public Policy: An Update of the National Commission*

on the Causes and Prevention of Violence. New Haven, Conn.: Yale University Press. **NCJ 097468**.

This paper describes the status of research and policy on guns and gun violence since the 1968 Violence Commission's report. Using the past 30 years as a guide, the author argues that the future will bring a national handgun strategy composed of three

parts: Federal restrictions on handgun transfers that amount to permissive licensing and registration; wide variation in State and municipal handgun possession and transfer regulation; and increased Federal law enforcement assistance to States and cities attempting to enforce more restrictive laws than the Federal minimum.

Section 4: Provide Opportunities for Children and Youth

Anderson, M.L.C. 1994 (January–February). High juvenile crime rate: A look at mentoring as a preventive strategy. *Criminal Law Bulletin* 30(1):54–75. **NCJ 146970.**

This article considers social science studies of the causes of juvenile crime and possible points of intervention and suggests components of an efficient mentoring program.

Austin, C.P., Sr. 1994 (August). Focusing on schools: The police fight back. *Corrections Today* 56(5):78, 80–82. **NCJ 150243.**

This article describes programs that place law enforcement officers in schools, through national programs such as DARE, to teach students the consequences of irresponsible behavior and the ways students can contribute to society.

Barnes, L. 1992 (Fall–Winter). Police officers at heart of the Bigs in Blue program. Big Brothers/Big Sisters of America. **NCJ 160058.**

This publication describes an innovative mentoring program in Warren County, NJ, that matches at-risk youth with mentors from the police department.

Beach, C. 1983. *Truancy and Student Delinquency: A Pilot Study.*

New York, N.Y.: Office of the Coordinator of Criminal Justice, Office of the Mayor, City of New York. **NCJ 094768.**

This study of absenteeism and delinquency incidents among students in New York City schools underscored the need for students and the community to be involved in designing and implementing student behavior and discipline rules.

Beyond Convictions: Prosecutors as Community Leaders in the War on Drugs. 1993. Alexandria, Va.: American Prosecutors Research Institute. **NCJ 145339.**

This book is based on the conclusion that law enforcement efforts are only part of the solution to drug abuse and that prosecutors can provide anti-drug leadership in education, prevention, and treatment efforts. The chapters include an overview of 36 prosecutorial anti-drug initiatives nationwide as well as information on identifying, developing, and obtaining resources.

Blackman, P.H. 1994. *Children and Guns: The NRA's Perception of the Problem and Its Policy Implications* (paper presented at the American Society of Criminology, Miami, Fla., November 9–12, 1994). **NCJ 159319.**

See section 3 for annotation.

Camp, G.M., and C.G. Camp. 1990. *Corrections Yearbook: Juvenile Corrections.* South Salem, N.Y.: Criminal Justice Institute. **NCJ 127005.**

See section 1 for annotation.

Carnegie Council on Adolescent Development. 1994 (April). *A Matter of Time: Risk and Opportunity in the Out-of-School Hours.* New York, N.Y.: Carnegie Foundation. **NCJ 160059.**

Prepared by the Carnegie Task Force on Meeting the Needs of Young Children, this report advocates responsible parenthood, the guarantee of quality child-care choices, the availability of good health and protection, and the mobilization of communities to support young children and their families.

Carter, S.L. 1994. *Evaluation Report for The New Mexico Center for Dispute Resolution: Mediation in the Schools Program, 1993–1994 School Year.* Albuquerque, N. Mex.: New Mexico Center for Dispute Resolution. **NCJ 160060.**

This report is based on surveys of students, teachers, and administrators of 104 schools in New Mexico. It focuses on dispute resolution program impact on student behavior, school violence, school disciplinary practices, and student awareness of mediation and conflict resolution

concepts and strategies. It includes instruments for use by other programs and researchers.

Cohen, M.A. 1994. *The Monetary Value of Saving a High-Risk Youth*. Washington, D.C.: The Urban Institute. **NCJ 160061**.

See section 1 for annotation.

Cohen, R. 1995. *Students Resolving Conflict: Peer Mediation in Schools*. Glenview, Ill.: GoodYear Books.

This book is a comprehensive, step-by-step technical assistance manual for designing, implementing, and evaluating a peer mediation program. Much of the information is also applicable to other conflict resolution models. The book includes 12 conflict resolution lessons and a wide variety of useful program forms.

Consultation on Afterschool Programs. 1994. Washington, D.C.: Carnegie Council on Adolescent Development. **NCJ 153304**.

This Carnegie Council on Adolescent Development report focuses on central issues in the development, sustainability, and effectiveness of afterschool programs for youth and on identifying strategies to promote effective programs.

Creighton, A., and P. Kivel. 1992. *Helping Teens Stop Violence*. Alameda, Calif.: Hunter House Inc. **NCJ 144309**.

This publication is designed for counselors, educators, and parents who are interested in helping adolescents escape the patterns of social violence caused by long-standing imbalances in society. The manual outlines a class curriculum on family and relationship violence prevention.

Delinquency Prevention Through Targeted Outreach. 1994. New York, N.Y.: Boys and Girls Clubs of America. **NCJ 150338**.

This publication describes Targeted Outreach, a program used by more than 200 Boys and Girls Clubs of America. It is designed to serve youth at risk of becoming delinquent.

Delinquency Prevention Works. 1995 (May). Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 155006**.

See introduction for annotation.

DeJong, W. 1994. *Building the Peace: The Resolving Conflict Creatively Program (RCCP)*. Washington, D.C.: National Institute of Justice, U.S. Department of Justice. **NCJ 149549**.

This publication introduces the basic concepts and strategies of violence prevention in the RCCP program. The author reviews the program philosophy and provides brief summaries of each of the 15 curriculum units. Criminal justice involvement, training, evaluation, and program costs are also examined.

Diebolt, A., and L. Herlache. 1991 (March). *The School Psychologist as a Consultant in Truancy Prevention*. Tempe, Ariz.: Arizona State University. **NCJ 149523**.

This paper discusses factors that must be considered in implementing a truancy prevention program, such as low self-esteem and social skills. It concludes that a multidisciplinary approach to truancy is effective.

Disposition Resource Manual. 1990. Washington, D.C.: National Council of Juvenile and Family Court Judges. **NCJ 137693**.

This manual previews exemplary programs that have shown promising and/or positive results for juveniles. It includes projects that address prevention, diversion, probation, neglect, abuse, custody, family violence, and aftercare as well as a State-by-State program index. Each program profile contains information on the client population served, objectives, a program description, information on effectiveness, and contact information.

Drug Abuse Resistance Education (DARE) Regional Training Center Policy Board's Manual for Training Law Enforcement Officers in the DARE Program. 1991. Los Angeles, Calif.: Los Angeles Unified School District. **NCJ 129758**.

This publication helps mentors/trainers in the DARE program to prepare law enforcement officers to present the DARE curriculum in schools. The manual presents a detailed 9-day agenda for teaching the methodology that has become the hallmark of the DARE curriculum.

Drug Use Among Youth: No Simple Answers to Guide Prevention. 1993. Washington, D.C.: Human Resources Division, U.S. General Accounting Office. **NCJ 149091**.

See section 3 for annotation.

Dryfoos, J.G. 1990. *Adolescents at Risk: Prevalence and Prevention*. London, England: Oxford University Press. **NCJ 130103**.

This study of youth looks at four problem areas: delinquency, pregnancy, substance abuse, and school failure. The author considers how risky behaviors interrelate and which prevention and intervention strategies are effective.

Evans, T.W. 1993. *Mentors: Making a Difference in Our Public Schools*. Princeton, N.J.: Peterson's Guides. **NCJ 160062**.

This publication profiles mentoring efforts by celebrities, business leaders, activists, educators, and other citizens. It includes an extensive list of resources.

Farrington, D.P. 1994. *Delinquency Prevention in the First Few Years of Life* (plenary address given at the Fourth European Conference on Law and Psychology, Barcelona, Spain, April 1994). Cambridge, England: Institute of Criminology, University of Cambridge. **NCJ 152340**.

This book uses findings from random experiments to outline juvenile delinquency prevention methods that can be implemented with youth up to age 6.

Farrington, D.P. 1992. Explaining the beginning, progress, and ending of antisocial behavior from birth to adulthood. In J. McCord, ed. *Fact, Frameworks, and Forecasts: Advances in Criminological Theory*. Brunswick, N.J.: Transaction Publishers, Rutgers State University. **NCJ 136092**.

Based on data of men from a working-class area of London, England, this article explains how early anti-social behavior predicts later criminal behavior and violence. Children who display anti-social behavior have a higher risk of criminal and violent behavior as adults.

Farrington, D.P. 1989 (Summer). Early predictors of adolescent aggression and adult violence. *Violence and Victims* 4(2):79-100. **NCJ 118307**.

This article describes the Cambridge Study in Delinquent

Development, a prospective longitudinal survey of 411 London, England, males between the ages of 8 and 32.

Farrington, D.P., et al. 1988. *Final Report of the Onset Working Group Program on Human Development and Criminal Behavior*. Castine, Maine: Castine Research Corporation. **NCJ 121570**.

This report considers possible interventions that might prevent or reverse deviant behavior. It also examines factors, such as age of onset, that may predict future criminal activity. It concludes that one of the best predictors of a future criminal career is the age at which the first offense occurs.

Forlaw, B., and M. Hessel. 1993. Juvenile crime prevention: Curfews and youth services. *Issues and Options* 1(5):complete issue. **NCJ 152387**.

This publication discusses the role of curfews and youth services programs in preventing juvenile delinquency.

Freedman, M. 1995. *Making the Most of Mentoring*. Unpublished report. Interagency Council on Mentoring. Washington, D.C.: Corporation for National Service. **NCJ 160063**.

This report states that the rising interest in mentoring is a positive phenomenon. Youth need contact with caring adults from the community, through mentoring programs and volunteers who can help reduce the isolation that some youth experience. The paper proposes a three-part strategy that fortifies the mentoring process.

Freedman, M. 1990 (Winter). Partners in growth: Elder mentors and at-risk youth. *School Safety* 1990: 8-10. **NCJ 122434**.

This article researches five 1987 and 1988 exemplary programs in Michigan, Massachusetts, and Maine, in which senior citizens and at-risk youth were paired in intergenerational programs.

Gangs, schools, and community. 1993 (Spring). *School Intervention Report* 6(3):complete issue. **NCJ 147408**.

See section 3 for annotation.

Given the Opportunity: How Three Communities Engaged Teens As Resources in Drug Abuse Prevention. 1992. Washington, D.C.: National Crime Prevention Council. **NCJ 159771**.

This book describes the Teens as Resources Against Drugs project that offers youth the opportunity to identify a local drug prevention problem, design strategies to address it, and obtain funding to underwrite it. Teens in New York City, Evansville (IN), and several communities in South Carolina were successful in making positive changes in their communities.

Goals 2000: A World-Class Education for Every Child. 1994. Washington, D.C.: U.S. Department of Education. **NCJ 160064**.

This document offers general information on the Goals 2000: Educate America Act and provides questions to help educators and parents plan courses of action in their communities. Ten elements of developing a local action plan are described, and suggestions are given for developing partnerships.

Greenberg, M.T., C.A. Kusche, E.T. Cook, and J.P. Quamma. 1995. Promoting emotional competence in school-aged children: The effects of

the PATHS curriculum. *Development and Psychopathology* 7:117-136. **NCJ 160065.**

This study examined the impact of the Promoting Alternative Thinking Strategies (PATHS) curriculum on the emotional development of students in the Seattle, WA, area. Results showed that PATHS was effective in helping youth understand and manage emotional experiences.

Hamburg, B.A. 1990. *Life Skills Training: Preventive Interventions for Young Adolescents*. Washington, D.C.: Carnegie Council on Adolescent Development. **NCJ 126402.**

This publication describes the life skills concept and its core elements. It analyzes established intervention programs for adolescents under the categories of school- and community-based programs and evaluates promising new concepts.

Hawkins, J.D., and R.F. Catalano, Jr. 1993. *Communities That Care: Risk-Focused Prevention Using the Social Development Strategy: An Approach to Reducing Adolescent Problem Behaviors*. Seattle, Wash.: Developmental Research and Programs, Inc. **NCJ 143996.**

This publication presents a community mobilization strategy based on the social development model of risk-focused prevention that has been implemented in several communities to combat juvenile delinquency, substance abuse, and violence. Beginning with key leader training sessions, each community conducts an assessment of local risk and resiliency factors for youth development and develops strategies accordingly.

Hawkins, J.D., and R.F. Catalano, Jr. 1992. *Communities That Care: Action For Drug Abuse Prevention*. San Francisco, Calif.: Jossey-Bass, Inc. **NCJ 142704.**

See section 1 for annotation.

Hawkins, J.D., and J.G. Weis. 1980. *The Social Development Model: An Integrated Approach to Delinquency Prevention*. Seattle, Wash.: Center for Law and Justice, University of Washington. **NCJ 086245.**

This document articulates how existing social institutions can prevent youth crime without recourse to the formal legal authority of the juvenile court. Emphasis is on social development for the juvenile.

Hawkins, J.D., et al. 1986. Childhood predictors of adolescent substance abuse: Toward an empirically grounded theory. In S. Griswold-Ezekoye et al., eds. *Childhood and Chemical Abuse: Prevention and Intervention*. **NCJ 110668.**

This chapter examines etiological research based on the social development approach that identifies family, school, and peer group as three general contexts in which the social bond is formed. It examines the etiology of drug use and abuse among children and adolescents and describes the pathways of youth drug behaviors between initial and regular use.

Heard, C.A. 1992 (Fall). Strategies for determining mentor home placement for juvenile offenders: A community-based model. *Journal for Juvenile Justice and Detention Services* 7(2):1-6. **NCJ 141791.**

This article describes the Allen Superior Court Juvenile Probation Department's innovative

strategies for determining mentor home placement for juvenile offenders and its performance since implementation in 1990.

Heard, C.A. 1990 (December). Preliminary development of the probation mentor home program: A community-based model. *Federal Probation* 54(4):51-56. **NCJ 127692.**

This article profiles the Allen County (Fort Wayne, IN) Juvenile Probation Department's Probation Mentor Home Program for nonviolent youthful offenders and discusses roles and responsibilities of the youth, natural and mentor families, the probation department, the mentor home coordinator, and the mentor home probation officer.

Hebert, E.E. 1993 (November). *Doing Something About Children at Risk*. Research in Action. Washington, D.C.: National Institute of Justice, U.S. Department of Justice. **NCJ 145124.**

This document reports on the Children at Risk (CAR) program in Austin, TX. Program elements include case management, community policing, safe passages, drug-free zones, and individual and family counseling. In addition, the six cities that implemented the CAR program have added unique components in response to local needs and resources.

Howell, J.C., ed. 1995 (May). *Guide for Implementing the Comprehensive Strategy for Serious, Violent, and Chronic Juvenile Offenders*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 153681.**

See introduction for annotation.

Howitt, P.S., and E.A. Moore. 1993. Pay now so you won't pay later: The effectiveness of prevention programming in the fight to reduce delinquency. *Juvenile and Family Court Journal* 44(2):57-67. **NCJ 143665.**

This article provides background on community-based delinquency prevention programs and describes the operations of the Oakland County, MI, Probate Court Youth Assistance casework services program. It includes the findings of the program evaluation.

Huizinga, D., F. Esbensen, and A.W. Weiher. 1991 (Spring). Are there multiple paths to delinquency? *Journal of Criminal Law and Criminology* 82(1):83-118. **NCJ 131770.**

This article uses a typological approach to make a preliminary examination of the existence of multiple paths leading to delinquency. Although criminological research and theory generally proceed with the orientation, if not the assumption, that delinquency is the result of some series of events common to all delinquents, this investigation suggests that youth who become delinquent have diverse backgrounds.

Hunter, R. 1993. *Law-Related Education: A Means of Preventing Violence in Intractable Conflicts*. Menlo Park, Calif.: William and Flora Hewlett Foundation. **NCJ 152390.**

This publication discusses risk factors for juvenile delinquency and the role of law-related education as a means of preventing violence in conflicts.

Implementing Project DARE: Drug Abuse Resistance Education. 1988. Newton, Mass.: Education Development Center Distribution Center. **NCJ 115417.**

Drawing on the findings of demonstration programs in DARE, this brief describes program elements and performance standards and offers step-by-step guidance to help communities develop DARE in their schools.

Jones, M.A., and B. Krisberg. 1994. *Images and Reality: Juvenile Crime, Youth Violence, and Public Policy*. San Francisco, Calif.: National Council on Crime and Delinquency. **NCJ 149440.**

See section 3 for annotation.

Juvenile Delinquency: Children at Risk, Children in Need. 1992. Northfield, Minn.: Life Skills Education. **NCJ 148093.**

This pamphlet examines the nature and causes of juvenile delinquency and suggests actions for adults to help prevent juvenile delinquency.

Kramer, P. 1993. *Dynamics of Relationships: A Guide for Developing Self-Esteem and Social Skills for Teens and Young Adults: Teacher's Manual*. Silver Spring, Md.: Equal Partners. **NCJ 146791.**

This manual describes curriculums designed to take a proactive approach to preventing juvenile delinquency and enabling youth to lead lives free of drugs and violence. These programs teach skills, attitudes, and behavior patterns that will enable youth to have effective relationships.

Kumpfer, K. 1993 (September). *Strengthening America's Families: Promising Parenting Strategies for Delinquency Prevention: User's Guide*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 140781.**

These two volumes assist program planners, policymakers, and service providers in deter-

mining the most effective family-focused and parenting intervention strategies designed to prevent delinquency in high-risk youth. Twenty-six exemplary programs are described according to target population, history, objectives, strategies, staffing, and resources.

Levine, B. 1993 (August 16). Tracking Truants. *Los Angeles Times*, p. E-1. **NCJ 160066.**

This article describes a Los Angeles, CA, anti-truancy program designed by the head of the District Attorney's juvenile division. The program uses deputy district attorneys to keep kids in school and off the streets. The attorney meets with school faculty and parents of students who are regularly absent or tardy.

Lipsey, M.W. 1992. Juvenile delinquency treatment: A meta-analytic inquiry into the variability of effects. In T.D. Cook et al., eds. *Meta-Analysis for Explanation: A Casebook*. New York, N.Y.: Russell Sage Foundation. **NCJ 150406.**

See section 1 for annotation.

Loftin, C., D. McDowall, B. Wierseman, and T.J. Cottey. 1991. Effects of restrictive licensing of handguns on homicide and suicide in the District of Columbia. *New England Journal of Medicine* 325(23):1615-1620. **NCJ 133649.**

See section 3 for annotation.

LoSciuto, L. and T.N. Townsend. 1994. *An Outcome Evaluation of "Across Ages"; An Intergenerational Mentoring Program*. Philadelphia, Pa.: Institute for Survey Research. **NCJ 160067.**

This study reports outcome evaluation results from the first 2 years of an ongoing

intergenerational mentoring program entitled Across Ages. The program, which targets high-risk youth, aims to increase students' self-esteem and sense of connection with parents, schools, and the community and to reduce students' use of alcohol, tobacco, and other drugs.

Mendel, R.A. 1995. *Prevention or Pork? A Hard-Headed Look at Youth-Oriented Anti-Crime Programs*. Washington, D.C.: American Youth Policy Forum. **NCJ 153371**.

This publication summarizes the evidence regarding prevention's proper place in a national crime control strategy. It details a wide variety of programs and strategies that reduce youth criminality and examines whether longer sentences or more prison construction will reduce crime significantly in the absence of effective prevention efforts.

Mentors make opportunities real. 1992 (Spring). *Home Front*. Washington, D.C.: U.S. Department of Housing and Urban Development. **NCJ 160068**.

This article examines the different purposes, benefits, guiding principles, and successes of mentoring programs. It lists resources and contact information.

National agenda for children: On the front lines with Attorney General Janet Reno. 1993 (Fall-Winter). *Juvenile Justice* 1(2):complete issue. **NCJ 145300**.

This journal covers a number of issues in the field of juvenile justice, including Attorney General Janet Reno's call for a National Agenda for Children, the National Youth Service Program proposed by President Clinton,

and innovative approaches to the problem and prevention of juvenile delinquency.

National Center for Education Statistics. *National Education Longitudinal Study of 1988: A Profile of an American Eighth Grader*. 1990. Washington, D.C.: Office of Educational Research and Improvement, U.S. Department of Education. **NCJ 160069**.

This report is a nationally representative sample of eighth-grade students in public and private schools. Data provide measures of student performance and allow analysis of the students' attitudes and activities.

National Center for Health Statistics. 1994. *Healthy People 2000: Public Health Service Action*. Washington, D.C.: Office of the Surgeon General, U.S. Department of Health and Human Services. **NCJ 152389**.

This report describes the major activities of the U.S. Public Health Service in 22 priority areas outlined in *Healthy People 2000: National Health Promotion and Disease Prevention Objectives*. This framework was laid out in 1990 for actions by the public and private sectors to achieve a healthier Nation by the year 2000.

New approach to runaway, truant, substance abusing and beyond control children. 1990. *Juvenile and Family Court Journal* 41(3B):9-49. **NCJ 125922**.

This article discusses mediation and other informal methods of providing assistance to children and their families in confronting and resolving personal and family problems. These methods are offered as alternatives to adjudication and formal court resolution.

OJJDP and Boys and Girls Clubs of America: Public Housing and High-Risk Youth. 1991. Update on Programs. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 128412**.

This update describes successful delinquency prevention initiatives developed and implemented by OJJDP and the Boys and Girls Clubs of America, including Targeted Outreach, SMART Moves, and the Drug Demand Reduction Program.

Olds, D.L., et al. 1993. Effect of prenatal and infancy nurse home visitation on government spending. *Medical Care* 31(2):155-174. **NCJ 159027**.

This article summarizes the findings of a study that shows that frequent home visitation by nurses during pregnancy and the first 2 years of a child's life can significantly reduce many health and social problems commonly associated with childbearing among adolescent, unmarried, and low-income parents.

Pennell, S., C. Curtis, B. McCardell, and P. Kuchinsky. 1981 (July). *Truancy Project Evaluation: Final Report*. San Diego, Calif.: Criminal Justice Unit, San Diego Association of Governments. **NCJ 080659**.

This report of three California school district truancy projects evaluated a twofold approach to truancy: telephoning parents of students who were absent from school and providing counseling and problemsolving services to individual students.

Platt, B. 1988. Retirees serve as mentors to young offenders. *Aging* 357:14-16. **NCJ 125375**.

This article profiles The Work Connection, a subsidiary of the International Union of Electrical Workers, AFL-CIO, that matches retirees as mentors with young adult offenders under an alternative sentencing arrangement. Case narratives are provided.

Prothrow-Stith, D. 1992 (June). Can physicians help curb adolescent violence? *Hospital Practice* 1992: 193–207. **NCJ 138612.**

This article identifies violence by and among adolescents as a significant public health epidemic in which physicians should become involved by diagnosing and treating youth at high risk for violent behavior.

Reducing Youth Violence: Coordinated Federal Efforts and Early Intervention Strategies Could Help. 1992 (March). Washington, D.C.: U.S. General Accounting Office, U.S. Department of Justice. **NCJ 137678.**

This copy of GAO's testimony before Congress discusses the scope of the problem of juvenile violence, characteristics of youth at risk of committing serious crime, promising early prevention strategies, and current Federal funding to prevent juvenile delinquency and violence.

Rosenfeld, R., and S. Decker. 1993. Where public health and law enforcement meet: Monitoring and preventing youth violence. *American Journal of Police* 12(3):11–57. **NCJ 151301.**

This article proposes the use of a complementary approach to violence prevention among juveniles involving both public health and law enforcement.

Roth, J., and J.M. Hendrickson. 1991 (April). Schools and youth organizations: Empowering adolescents to confront high-risk behavior. *Phi Delta Kappa* 72(8):619–622. **NCJ 133992.**

This article argues for collaboration between schools and community-based youth organizations to prevent youth from developing socially dysfunctional behaviors such as substance abuse and irresponsible sexual behavior.

Roundtree, G.A., C.E. Grenier, and V.L. Hoffman. 1993. Parental assessment of behavioral change after children's participation in a delinquency prevention program. *Journal of Offender Rehabilitation* 19(1/2):113–130. **NCJ 141525.**

This article reports on a study that investigates whether a community-based juvenile delinquency prevention program can be effective with multiple-problem, at-risk youth. The study is based on a theoretical model integrating social control with social learning concepts.

School Safety: Promising Initiatives for Addressing School Violence. 1995 (April). Washington, D.C.: U.S. General Accounting Office. **NCJ 160070.**

This report explores promising programs used by four schools to curb violence and identifies key characteristics typically associated with effective school-based violence-prevention programs. It also examines federally sponsored evaluations of violence-prevention programs operating in schools.

Smith, D., and B. Lautman. 1990. *A Generation Under the Gun: A Statistical Analysis of Youth Firearm Murder*

in America. Washington, D.C.: Center to Prevent Handgun Violence. **NCJ 159337.**

See section 3 for annotation.

Smith, M. 1993 (Spring). Mediation in juvenile justice settings. *Journal for Juvenile Justice and Detention Services* 8(1):51–55. **NCJ 143988.**

This article describes how mediation has been used in parent-juvenile conflicts, victim-offender restitution agreements, conflict resolution in juvenile corrections facilities, school-based conflicts, and conflicts between rival juvenile gangs.

Steiner, P. 1994 (February). *Delinquency Prevention.* Fact Sheet #6. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ FS009406.**

This fact sheet examines Title V Initiative, Incentive Grants for Local Delinquency Prevention Programs, as established by Congress in 1992, to amend the Juvenile Justice and Delinquency Prevention Act of 1974. It outlines OJJDP funding guidelines, timetable, and eligibility requirements for Title V Delinquency Prevention Programs. It also details the training and technical assistance available for communities interested in developing a comprehensive delinquency prevention program.

Stephens, R.D., S. Greenbaum, and R.W. Garrison. 1988. *Increasing Student Attendance: NSSC Resource Paper.* Sacramento, Calif.: National School Safety Center, Pepperdine University. **NCJ 136283.**

This book provides recommendations to solve the problems of truancy, student drop-out, and delinquency. Truancy

prevention, intervention, and response strategies are included as well as model legislative programs.

Steward, M., et al. 1994 (August). Violence stoppers. *State Government News* 37(8):28–33. **NCJ 150060.**

This article profiles innovative programs in Missouri, New York, and Washington that help prevent juvenile delinquency and youth violence by pairing juvenile delinquents with college students.

Sugarmann, J., and K. Rand. 1994. Cease fire. *Rolling Stone* 677:30–42. **NCJ 147980.**

See section 3 for annotation.

Summer Jobs for Youth—A Public/Private Campaign—Project Administrator Handbook: A Technical Assistance Guide for Developing Summer Jobs for Youth in the Private Sector. Albany, N.Y.: New York State Division for Youth. **NCJ 095447.**

This technical assistance guide offers suggestions for strengthening youth summer employment opportunities.

Talking With Youth About Prevention: A Teaching Guide for Law Enforcement and Others. 1992. Washington, D.C.: National Crime Prevention Council. **NCJ 142260.**

This comprehensive volume helps law enforcement personnel and others to prepare and deliver presentations to young children and teens about personal security, prevention of alcohol and other drug use, and prevention of many types of crime.

Thornberry, T.P., D. Huizinga, and R. Loeber. 1995. The prevention of serious delinquency and violence:

Implications from the program of research on the causes and correlates of delinquency. In J.C. Howell et al., eds. *Sourcebook on Serious, Violent, and Chronic Juvenile Offenders.* Thousand Oaks, Calif.: Sage Publications. **NCJ 157405.**

See section 1 for annotation.

Tierney, J.P., and A.Y. Branch. 1992. *College Students As Mentors For At-Risk Youth: A Study of Six Campus Partners in Learning Programs.* Philadelphia, Pa.: Public/Private Ventures. **NCJ 144221.**

This publication evaluates college-based mentoring programs over a 4-year period. Questions focus on time and emotional commitment, integration possibilities, characteristic behaviors of successful adult roles, commitment of resources, and shifts in youth and adult attitudes after participation.

Title V Incentive Grants for Local Delinquency Prevention Programs. 1995. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 154020.**

This report to Congress presents Title V funding as a stimulus for local units of government to pool available community services to design and implement comprehensive risk-focused plans that prevent young people from becoming involved in the juvenile justice system.

Tolan, P., and N. Guerra. 1994 (July). *What Works in Reducing Adolescent Violence: An Empirical Review of the Field.* Boulder, Colo.: The Center for the Study and Prevention of Violence, University of Colorado. **NCJ 152910.**

See section 1 for annotation.

Truancy, Chronic Absenteeism and Dropping Out. 1989. York, Pa.: William Gladden Foundation. **NCJ 149422.**

This booklet provides information on the nature and causes of school truancy and offers recommendations and checklists for steps parents and school administrators can take to reduce truancy and student drop-out problems.

Violence as a Public Health Problem: Developing Culturally Appropriate Prevention Strategies for Adolescents and Children. 1992. Washington, D.C.: U.S. Department of Health and Human Services. **NCJ 149671.**

This publication compiles eight papers and working group recommendations from the proceedings of the 1992 Public Health Social Work Maternal and Child Health Institute held in Pittsburgh, PA, April 26–29, 1992.

Weis, J.G., and D. Hawkins. 1981. *Preventing Delinquency.* Seattle, Wash.: Center for Law and Justice, University of Washington. **NCJ 080810.**

This report examines the incidence of juvenile delinquency and presents a history of juvenile delinquency prevention efforts. It provides an experimental test of a comprehensive prevention model and offers research design for evaluating selected delinquency prevention programs.

Weis, J., and J. Sederstrom. 1981. *The Prevention of Serious Delinquency: What To Do?* Seattle, Wash.: Center for the Assessment of Delinquent Behavior and Its Prevention, University of Washington. **NCJ 079691.**

This report suggests that juvenile offenders be categorized as serious and less serious offenders and that prevention strategies be placed within the context of what is known about prevention in general and the correlates and causes of delinquency. It reviews causation theories, explores characteristics of juvenile offenders and their crimes, and develops a set of theoretically grounded intervention strategies.

Yap, K.O., and J. Pollard. 1992 (October). *A Preliminary Evaluation of the Self Enhancement, Inc. (SEI) Program*. Portland, Ore.: Northwest Regional Educational Lab. **NCJ 160071**.

This preliminary anti-truancy program evaluation shows that improved classroom instruction, extracurricular activities, cultural enrichment, career counseling, and summer outreach for high-risk children can improve school attendance and reduce disciplinary referrals.

Zeldin, S., and H. Spivak. 1993. *Violence Prevention and Youth Development: Implications for the Medical Clinician*. Washington, D.C.: Academy for Educational Development, Inc. **NCJ 143940**.

This publication focuses on violence committed by adolescents against other adolescents and examines research on adolescent violence. The authors seek to create a framework for reorienting

policy and program responses to the causes and consequences of violence. It also describes roles for health care providers in preventing violence and promoting healthy adolescent development.

Zimmer, J.A. 1993. *We Can Work It Out: Problem Solving Through Mediation*. National Crime Prevention Council and National Institute for Education in the Law. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 145156**.

This training manual is designed to expand the use of mediation skills in conflict management. It includes 8 lesson plans and 17 scenarios for use in learning and practicing mediation skills.

Section 5: Break the Cycle of Violence by Addressing Youth Victimization, Abuse, and Neglect

Addressing Confidentiality of Records in Searches for Missing Children. 1995 (February). Final Report. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 155183.**

This report is designed to assess and make recommendations about law enforcement access to children's records held by schools, hospitals, child welfare agencies, and shelters. It also includes a State-by-State breakdown of the various legal restraints on and requirements for the release of agency record information in missing children cases.

Bank, L., G.R. Patterson, and J.B. Reid. 1987 (Spring). Delinquency prevention through training parents in family management. *Behavior Analyst* 10(1):75-82. **NCJ 111563.**

This article examines how parental attitudes about and involvement in crime affect the attitudes and behavior of children. Children whose parents are aggressive and who witness or are victims of violence in the home

are likely to become aggressive and violent adolescents and young adults. Programs that prevent parents from becoming involved in crime could prevent their children from becoming criminals.

Barthel, J. 1992. *For Children's Sake: The Promise of Family Preservation.* New York, N.Y.: Edna McConnell Clark Foundation. **NCJ 136387.**

The family preservation movement is based on the premise that children need permanent, safe families. This report examines characteristics of family preservation programs, program evaluation, child welfare legislation efforts, and funding for child welfare services.

Bastian, L.D., and B.M. Taylor. 1994 (December). *Young Black Male Victims.* Crime Data Brief. Washington, D.C.: Bureau of Justice Statistics, U.S. Department of Justice. **NCJ 147004.**

This brief reviews the findings of the National Crime Victimization Survey that show that young African-American males have a significantly higher probability of being victims of violent crime than other members of the population.

Bergquist, C., G. Pope, and K. Corliss. 1995 (June). *Evaluation of Michigan's Families First Program.*

Summary Report. Lansing, Mich.: Michigan Department of Social Services. **NCJ 160072.**

This analysis reports on the effectiveness of the Families' First Program that offers an alternative to out-of-home placement of children. In this program, private contractor social service agencies provide time-limited in-home family services designed to strengthen and preserve the family unit. The evaluation found that the program was well-supported, effective in preserving families, and cost effective when compared with foster care services.

Bridging the Child Welfare and Juvenile Justice Systems. 1995 (June). Juvenile Justice Bulletin. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 152155.**

This bulletin highlights the coordination of Federal efforts focusing on family preservation, early intervention, delinquency prevention, and improvement of the court's response to children's needs.

Cantelon, S.L. 1994 (March). *Family Strengthening for High-Risk Youth.* Fact Sheet #8. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ FS009408.**

This fact sheet summarizes *Strengthening America's Families: Promising Parenting Strategies for Delinquency Prevention*, written in September 1993. (See annotation under K. Kumpfer in this section.)

CASA: Court Appointed Special Advocate for Children . . . A Child's Voice in Court. 1988. Juvenile Justice Bulletin. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 111392**.

This bulletin describes the CASA program of providing volunteers to act as advocates before the court system for allegedly abused, neglected, or abandoned children. CASA volunteers can effectively and inexpensively investigate placement needs for these children and articulate those needs before the court.

Checkoway, B., and J. Finn. 1992. *Young People as Community Builders*. Ann Arbor, Mich.: Center for the Study of Youth Policy, School of Social Work, University of Michigan. **NCJ 146437**.

This report presents the results of a pilot study of community-based youth initiatives. Case studies on each initiative include background information on the initiative, description of activities and achievements, and analysis of factors affecting participation. The report identifies common themes found in these programs.

Child Abuse: Prelude to Delinquency? 1985. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 104275**.

This report examines and synthesizes empirical research on the link between child abuse and juvenile delinquency and offers recommendations for policy and future research.

Child Maltreatment 1992: Reports From the States to the National Center on Child Abuse and Neglect. 1994. McLean, Va.: National Center on Child Abuse and Neglect. **NCJ 149527**.

This report presents data collected from child abuse and neglect reports investigated by State agencies in 1992 and provides trend data for 1990 through 1992. Figures, appended tables, and State-by-State program information are included.

Collier, W.V., and R.H. Hill. 1993 (June). *Family Ties, Intensive Family Preservation Services Program: An Evaluation Report*. New York, N.Y.: Department of Juvenile Justice, City of New York. **NCJ 145613**.

This evaluation reports on the effectiveness of the Family Ties program that is designed to avert juvenile placements and reduce recidivism. The findings show that the program averted from placement 65 percent of the juvenile cases referred by the Family Court, reduced recidivism by 80 percent for the first 12 months, was highly cost-beneficial, and was liked by the youth and parents who entered the program.

Dawson, J., and P. Langan. 1994. *Murder in Families*. Bureau of Justice Statistics Special Report. Washington, D.C.: Bureau of Justice Statistics, U.S. Department of Justice. **NCJ 143498**.

This document provides a survey of homicide cases disposed in courts in 33 large urban

counties in 1988. Findings show that 16 percent of murder victims were members of the defendant's family; 64 percent were murdered by friends or acquaintances; and 20 percent were killed by strangers.

Delany-Shabazz, R. 1995 (June). *VOCA: Helping Victims of Child Abuse*. Fact Sheet #26. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ FS009526**.

This fact sheet highlights the Victims of Child Abuse (VOCA) Act and the development and implementation of regional and local children's advocacy centers.

Delinquency Prevention Works. 1995 (May). Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 155006**.

See introduction for annotation.

Eron, L.D., J. Gentry, and P. Schlegel, eds. 1994. *Reason to Hope: A Psychosocial Perspective on Violence and Youth*. Washington, D.C.: American Psychological Association. **NCJ 158633**.

See section 2 for annotation.

Family Strengthening in Preventing Delinquency: A Literature Review. 1994. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 150222**.

This report examines literature on family structure and its relationship to the development of delinquency in juveniles. It also reviews family strengthening approaches and models and the current status of family strengthening programming.

Farrington, D.P., et al. 1990. Advancing knowledge about the onset of delinquency and crime. In B.B. Lahey and A.E. Kazdin, eds. *Advances in Clinical Child Psychology*. Washington, D.C.: National Institute of Justice, U.S. Department of Justice. **NCJ 146110**.

This chapter shows that the best predictors of adolescent aggression and subsequent violent and criminal behavior were measures of economic deprivation, family criminality, poor child-rearing, school failure, hyperactivity, attention deficit, and anti-social child behavior.

Goldstein, A.P., et al. 1989. *Reducing Delinquency: Intervention in the Community*. Fairview Park, N.Y.: Pergamon Press. **NCJ 128560**.

This book describes the components and administration of Aggression Replacement Training, which is designed to alter the behavior of delinquent juveniles to facilitate their positive functioning in the community.

Hardin, M. 1992. *Judicial Implementation of Permanency Planning Reform: One Court That Works*. Washington, D.C.: American Bar Association. **NCJ 160073**.

This book describes the Hamilton County Juvenile Court in Cincinnati, OH, which is considered a state-of-the-art court for efficient case management, strong administration, sufficient resources, thorough hearings, and a high level of judicial expertise. This book discusses costs, staffing, organization, and the court's hearing process.

Helping Victims and Witnesses in the Juvenile Justice System: A Program Handbook. 1991. Washington, D.C.:

Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 139731**.

This handbook offers guidance in establishing and operating victim/witness assistance programs in the juvenile justice system. It identifies model programs and provides resources for additional information.

Howell, J.C., ed. 1995 (May). *Guide for Implementing the Comprehensive Strategy for Serious Violent, and Chronic Juvenile Offenders*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 153681**.

See introduction for annotation.

Hwalick, M. 1992 (August). *1992 Evaluation of Teens, Crime, and the Community*. Bingham Farms, Mich.: Social Program Evaluators and Consultants, Inc. **NCJ 160074**.

This report describes the Teens, Crime, and the Community (TCC) program, analyzing its effectiveness in preventing juvenile crime.

Jencks, C. 1992. *Rethinking Social Policy: Race, Poverty, and the Underclass*. Cambridge, Mass.: Harvard University Press. **NCJ 160075**.

This book critiques equal opportunity and affirmative action plans; considers ghetto culture, the politics of heredity, and growth of the African-American underclass; and states that the safety net for single mothers undermines traditional social norms about work and marriage and that welfare in its current form is a social policy error.

Johnson, C. 1990. Youth service: Beyond noblesse oblige. *School Safety* 1990 (Winter):12-14. **NCJ 122435**.

This article details expansion of youth involvement in community service activities by describing programs that involve youth from a variety of economic backgrounds. Descriptions and addresses of 3 programs and addresses of 10 resource organizations are included.

Justice Programs on Family Violence. 1995 (June). Unpublished. Washington, D.C.: Family Violence Working Group, Office of Justice Programs, U.S. Department of Justice. **NCJ 160076**.

This unpublished report from the Family Violence Working Group in DOJ's Office of Justice Programs outlines the efforts of the various Federal Family Violence Program offices to identify issues, coordinate planning and funding, and disseminate information about violence against spouses and children.

Kaye, C.B. 1989. Community service—with a smile. *School Safety* 1989 (Spring):4-7. **NCJ 119224**.

This article indicates that a growing number of organizations and school-based youth community service programs is helping students develop individual and social responsibility. It includes examples of programs and guidelines for starting a project.

Klaus, P.A., and M.R. Rand. 1984 (April). *Family Violence*. Special Report. Washington, D.C.: Bureau of Justice Statistics, U.S. Department of Justice. **NCJ 093449**.

This report looks at the findings about family violence from the National Crime Survey and considers the difficulties in estimating the extent of family violence

in the United States. Victims describe experiences with family violence in response to questions not specifically designed to explore the subject.

Kumpfer, K. 1993 (September). *Strengthening America's Families: Promising Parenting Strategies for Delinquency Prevention: User's Guide*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 140781**.

See section 4 for annotation.

Lake, E.S. 1993 (Spring). Exploration of the violent victim experiences of female offenders. *Violence and Victims* 8(1):41-52. **NCJ 145798**.

This article examines violent childhood and adult experiences of 83 female inmates. It explores the possible links between victimization and offenses, and it measures physical abuse by parents, sexual assault by relatives, physical assault by spouse or live-in partner, physical assault by stranger, sexual assault by stranger, and robbery.

Lally, J.R., and M.M. Segal. 1994. Infants, toddlers and violence: Developing a community response. In J.D. Osofsky and E. Fenichel, eds. *Caring for Infants and Toddlers in Violent Environments: Hurt, Healing, and Hope*. Washington, D.C.: National Institute of Justice, U.S. Department of Justice. **NCJ 145969**.

This paper provides guidelines for the development of a child-care program that provides a safe haven for children living in violent communities. Findings are taken from the Family Development Program, sponsored by Syracuse University.

Mendel, R.A. 1995. *Prevention or Pork? A Hard-Headed Look at Youth-Oriented Anti-Crime Programs*.

Washington, D.C.: American Youth Policy Forum. **NCJ 153371**.

See section 4 for annotation.

Moone, J. 1994 (June). *Juvenile Victimization: 1987-1992*. Fact Sheet #17. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ FS009417**.

See introduction for annotation.

A Nation's Shame: Fatal Child Abuse and Neglect in the United States: A Report of the U.S. Advisory Board on Child Abuse and Neglect. 1995. Washington, D.C.: Administration for Children and Families, U.S. Department of Health and Human Services. **NCJ 157013**.

This report contains 26 recommendations of the U.S. Advisory Board on Child Abuse and Neglect, which was asked to recommend a national policy to reduce and prevent child abuse.

National Child Abuse and Neglect Data System. 1993. Working Paper 2: 1991 Summary Data Component. Washington, D.C.: National Center on Child Abuse and Neglect, U.S. Department of Health and Human Services. **NCJ 143998**.

This document details data collected by State child protective services agencies that were recorded on the National Child Abuse and Neglect Data System (NCANDS) Summary Data Component Form for 1991. Collected between August and October 1992, data were used to develop and refine the approach to collecting national information on child maltreatment.

National Commission on Children. 1991. *Beyond Rhetoric: A New American Agenda for Children and Families*. Final Report. Washington, D.C.: U.S. Government Printing Office. **NCJ 132443**.

This report provides a basis for developing national policy on America's children and families. Published by the National Commission on Children, a bipartisan group established by Public Law 100-203 "to serve as a forum on behalf of the children of the Nation," the report focuses on problems of children and their families by examining the relationships among health, education, income security, and other forms of support at each stage of a child's development. It sets forth recommendations for individual action, public- and private-sector policies, and program development.

National Council of Juvenile and Family Court Judges. 1991. *Recommendations for a Model Family Court: A Report from the National Family Court Symposium*. Reno, Nev. **NCJ 137883**.

The Council advocates a justice system capable of addressing problems in dysfunctional families. In this report, it recommends integrating separate court divisions charged with adjudicating these problems into one court division to effect a more efficient and humane court operation.

Nelson, K.E. 1990. Family-based services for juvenile offenders. *Children and Youth Services Review* 12(3):193-212. **NCJ 129914**.

This article examines family characteristics, service characteristics, and treatment outcomes for 159 families referred for status offenses or juvenile delinquency to 8 family-based placement prevention programs. Findings support use of family-based services for juvenile justice problems.

Nelson, K.E., and M.J. Landsman. 1992. Family-based services for juvenile offenders. In K.E. Nelson and M.J. Landsman, eds. *Alternative Models of Family Preservation: Family-Based Services in Context*. Springfield, Ill.: Charles C. Thomas. **NCJ 143831**.

This chapter details research that has indicated that family- and community-based alternatives are essential to the successful treatment of juvenile offenders. Data were examined to evaluate the effectiveness of these forms of treatment.

Olds, D.L., et al. 1993. Effect of prenatal and infancy nurse home visitation on government spending. *Medical Care* 31(2):155-174. **NCJ 159027**.

See section 4 for annotation.

Olds, D.L., et al. Forthcoming. The potential for reducing anti-social behavior with a program of prenatal and early childhood home visitation. Denver, Colo.: Prevention Research Center for Family and Child Health and Home Visitation 2000. **NCJ 160077**.

This unpublished document considers the impact of home visitation on three risk factors for conduct disorder, anti-social behavior, and violence. Home visitation has been documented as reducing maternal substance abuse during pregnancy; reducing child maltreatment; and reducing family size, closely spaced pregnancies, and chronic welfare dependence.

Parent Training and Family Life Catalog. 1994. Studio City, Calif.: Center for the Improvement of Child Caring. **NCJ 151286**.

This catalog highlights a variety of parenting-related publications, training materials, and

other products available from the Center for the Improvement of Child Caring (CICC). It also presents a schedule of CICC-sponsored parenting instructor training workshops.

Preserving families to prevent delinquency. 1992 (April). *OJJDP Model Programs*. Juvenile Justice Bulletin. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 136397**.

This bulletin describes elements of three programs found suitable for State and local replication and inclusion in OJJDP training and technical assistance programs. Programs are Targeted Outreach, Court Appointed Special Advocates (CASA), and Permanent Families for Abused and Neglected Children. The bulletin also specifies criteria used to identify model delinquency prevention programs.

ProKids: Speaking Up for Abused and Neglected Children in Hamilton, Ohio (brochure). 1994. Cincinnati, Ohio: ProKids. **NCJ 160078**.

This brochure describes the ProKids organization, which develops volunteer programs for court appointed special advocates in the Cincinnati area and nationwide.

Rubin, H.T., and V.E. Flango. 1992. *Court Coordination of Family Cases*. Williamsburg, Va.: National Center for State Courts. **NCJ 140642**.

This report analyzes families who come to court for divorce, juvenile delinquency, or child abuse and neglect matters. It reveals that a significant portion of these families had been to court for another family-related matter during the previous 5 years. It indicates the need to establish

single forums for addressing family matters and to coordinate court actions in family cases.

School Crime: A National Crime Victimization Survey Report. 1991 (September). Washington, D.C.: Bureau of Justice Statistics, U.S. Department of Justice. **NCJ 131645**.

This document presents a summary of responses to the National Crime Victimization Survey.

Schwartz, I.M., J.A. Rendon, and C.-M. Hsieh. 1994 (September/October). Is child maltreatment a leading cause of delinquency? *Journal of the Child Welfare League of America* 73(5):639-655. **NCJ 151432**.

Exploring the assumption that child maltreatment is a major cause of juvenile delinquency, the authors conclude that existing research is inconclusive and flawed. To formulate a coherent strategy for solving the juvenile crime problem, quality research is needed, including the use of matched control groups for comparison purposes, control for socioeconomic factors in study samples, and separation of abuse categories and status offenses from other criminal offenses.

Snyder, H. and M. Sickmund. 1995 (August). *Juvenile Offenders and Victims: A National Report*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 153569**.

See introduction for annotation.

Speaking of Kids: A National Survey of Children and Parents. 1991. Washington, D.C.: National Commission on Children. **NCJ 160079**.

This report is based on the National Commission on Children's national opinion research project. The report

examines changes in family life and documents perceptions of family life, parent-child relationships, time pressures, family structure matters, worries and fears, and support for teenagers. It concludes with recommendations for supporting and strengthening families, ensuring income security, supporting the transition to adulthood, and creating a moral climate for children.

Study Findings: Study of National Incidence and Prevalence of Child Abuse and Neglect. 1988. Washington, D.C.: National Center on Child Abuse and Neglect, U.S. Department of Health and Human Services. **NCJ 120295.**

This study shows that the increase in child abuse and neglect reporting between 1980 and 1986 is probably not due to an actual increase in these areas but to greater recognition of the problem by community professionals.

Teenage Victims: A National Crime Survey Report. 1991 (May). Washington, D.C.: Bureau of Justice Statistics, U.S. Department of Justice. **NCJ 128129.**

This report summarizes the National Crime Survey data obtained from household interviews. It estimates that 1.9 million violent victimizations were sustained by 28.1 million teenagers in 1988. It indicates that teenagers are more vulnerable than adults to both violence and property crime.

Thornberry, T.P. 1994 (December). *Violent Families and Youth Violence.* Fact Sheet #21. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ FS009421.**

This fact sheet uses data from the Rochester Youth Development Study to analyze the relationship between juveniles who had been direct victims of child maltreatment and subsequent involvement in violence. Incidence of violence among this group is significantly higher than that of subjects who were not maltreated. Adolescents growing up in homes that have violence between the partners, generalized hostility, or child maltreatment also have higher rates of self-reported violence.

Thornberry, T., D. Huizinga, and R. Loeber. 1995. The prevention of serious delinquency and violence: Implications from the program of research on the causes and correlates of delinquency. In J.C. Howell et al., eds. *Sourcebook on Serious, Violent, and Chronic Juvenile Offenders.* Thousand Oaks, Calif.: Sage Publications. **NCJ 157405.**

See section 1 for annotation.

Toby, J., and A. Scrupski. 1991 (Winter). Community service as alternative discipline. *School Safety* 1991 (Winter):12-15. **NCJ 128474.**

This article concludes that community service is an appropriate intermediate sanction for delinquent behavior in schools, being more severe than afterschool detention or in-school suspension and less severe than long-term suspension or expulsion.

Tolan, P., and N. Guerra. 1994 (July). *What Works in Reducing Adolescent Violence: An Empirical Review of the Field.* Boulder, Colo.: The Center for the Study and Prevention of Violence, University of Colorado. **NCJ 152910.**

See section 1 for annotation.

Using Agency Records To Find Missing Children: A Guide for Law Enforcement. 1996. Program Summary. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 154633.**

This guide contains information and ideas designed to assist law enforcement officers in obtaining and using records from various human service providers in order to locate missing children. It discusses mandated and voluntary access to records from schools, medical care providers, child welfare agencies, and shelters.

When a Child Reports a Crime: Encouraging Children To Report Crime and Responding Appropriately When They Do. 1992 (August). Washington, D.C.: National Crime Prevention Council. **NCJ 139302.**

This handbook seeks to help members of the law enforcement community as well as professionals in other fields who work with young people. It includes sections on citizen reporting obligations, how to encourage appropriate reporting, cultural sensitivity, and how to teach children sound reporting practices.

Widom, C.S. 1995 (March). *Victims of Childhood Sexual Abuse—Later Criminal Consequences.* Research in Brief. Washington, D.C.: National Institute of Justice, U.S. Department of Justice. **NCJ 151525.**

This document examines the criminal consequences in adulthood of childhood sexual abuse. It tracks individuals who experienced sexual abuse, using official records of arrest and juvenile detention to examine their subsequent criminal behavior. The study found that although all

types of abuse and neglect in childhood put people at greater risk for arrest at a later time, victims of sexual abuse are no more likely than other victims to become involved in crime.

Widom, C.S. 1992 (October). *The Cycle of Violence*. Research in Brief. Washington, D.C.: National Institute of Justice, U.S. Department of Justice. **NCJ 136607**.

This document examines the hypothesis of an intergenerational transmission of violence, drawing on data from the disciplines of psychology, sociology, psychiatry, social work, and nursing. Although physical abuse experienced as a child leads significantly to later violent behavior, findings failed to show that every abused or neglected child will become delinquent, criminal, or violent.

Widom, C.S. 1989 (July). Child abuse, neglect, and adult behavior: Research design and findings on criminality, violence, and child abuse. *American Journal of Orthopsychiatry* 59(3):355-367. **NCJ 120866**.

This article compares a large sample of physical and sexual abuse cases with a matched control group. Findings showed that although there were not higher rates of adult arrests for child abuse and neglect, there were more instances of adult criminality and violent offenses when compared with the control group.

Widom, C.S. 1989. Does violence beget violence? A critical examination of the literature. *Psychological Bulletin* 106(1):3-28. **NCJ 142384**.

This article presents a critical examination of several hypotheses regarding the cycle of violence. The author concludes that existing knowledge of the long-term consequences of abusive home environments is limited and makes recommendations for further research.

Wilson, J.J., and J.C. Howell. 1993. *Comprehensive Strategy for Serious, Violent, and Chronic Juvenile Offenders*. Program Summary. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 143453**.

See introduction for annotation.

Wright, K.N., and K.E. Wright. 1994 (May). *Family Life, Delinquency, and Crime: A Policymaker's Guide*. Research Summary. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 140517**.

This summary describes how positive parental involvement deters delinquency, while its absence or negative involvement fosters misconduct. Children who are rejected by their parents, who grow up in homes with considerable conflict, or who are inadequately supervised are at greatest risk of becoming delinquent.

Zingraff, M.T., et al. 1993 (May). Child maltreatment and youthful problem behavior. *Criminology* 31(2):173-202. **NCJ 142584**.

This article describes the research design that examined the correlation between child maltreatment and serious youth problem behavior that attracts the attention of juvenile justice authorities. Overall experience of maltreatment, but not the specific type or frequency, places children at a statistically higher risk of problem behavior.

Section 6: Strengthen and Mobilize Communities

Anderson, E. 1990. *Street Wise: Race, Class, and Change in an Urban Community*. Chicago, Ill.: University of Chicago Press. **NCJ 149158**.

This book is based on fieldwork in two urban communities—one African American and low income, the other racially mixed but middle to upper income. It assesses local street life, cultural influences on behavior, and group relationships. The author found that despite striking differences, African Americans and whites share many community attitudes, especially concerning public safety.

Calhoun, J.A. 1988. *Violence, Youth, and a Way Out*. Washington, D.C.: National Crime Prevention Council. **NCJ 114543**.

See section 2 for annotation.

Changing Perspectives: Youth As Resources. 1990. Washington, D.C.: National Crime Prevention Council. **NCJ 160080**.

This book describes approaches to help communities engage youth as a means to solve community problems. The program is based on delivery of positive services by youth to their peers rather than the delivery of services by adults to youth. Three

cities in Indiana model the concept, and the book includes evaluation results.

Charting Success: A Workbook for Developing Crime Prevention and Other Community Service Projects. 1989. Washington, D.C.: National Crime Prevention Council. **NCJ 139533**.

This manual is designed to aid adolescents and adults in developing projects to reduce crime and the fear of crime; assist crime victims; and make the community a safer, better place to live, work, and attend school. Projects are formulated to encourage youth involvement.

Checkoway, B., and J. Finn. 1992. *Young People as Community Builders*. Ann Arbor, Mich.: Center for the Study of Youth Policy, School of Social Work, University of Michigan. **NCJ 146437**.

See section 5 for annotation.

Cops Helping Kids: Teaching Preschoolers Violence Prevention and Safety. 1994. Washington, D.C.: National Crime Prevention Council. **NCJ 156936**.

This workbook is to help police officers and deputy sheriffs teach violence prevention and personal safety techniques to 4- and 5-year-old children. Many activities use McGruff®, the “crime dog,” and Scruff®, his nephew, to communicate important safety lessons to preschoolers.

Creating a Climate of Hope: Ten Neighborhoods Tackle the Drug Crisis. 1992. Washington, D.C.: National Crime Prevention Council. **NCJ 136253**.

Based on the national demonstration program Community Responses to Drug Abuse, this report details the results of a 30-month project devoted to preventing drug abuse in communities. Law enforcement, parents, schools, and businesses were among those involved in this effort.

Cronin, R.C. 1994 (May). *Innovative Community Partnerships: Working Together for Change*. Program Summary. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 147483**.

This is a review of innovative approaches in community policing that have opened lines of communication between law enforcement and communities. The program summary spotlights coordinated efforts between community policing and human service initiatives in troubled neighborhoods in Dade County, FL; Lansing, MI; and Norfolk, VA. The summary also highlights potential replication issues for other jurisdictions to consider in implementing cooperative, community-based efforts.

DeJong, W. 1994. *Preventing Interpersonal Violence Among Youth: An Introduction to School, Community,*

and Mass Media Strategies. Washington, D.C.: National Institute of Justice, U.S. Department of Justice. **NCJ 150484.**

This report reviews current school, community, and mass media strategies for violence prevention among youth, describes promising programs now in operation, and recommends ways in which police and other criminal justice professionals can become involved.

Finding Funds and Building Support for Community Crime Prevention. 1993 (September). Washington, D.C.: National Crime Prevention Council. **NCJ 160081.**

This booklet helps local jurisdictions secure funding for crime prevention programs through the Edward Byrne Memorial System Improvement and Drug Control Formula Grant Program and through other Federal funding sources, including public housing anti-drug grants, drug-free schools and communities grants, community development block grants, juvenile justice delinquency prevention grants, youth gang drug prevention grants, and anti-child abuse grants.

Garbarino, J., K. Kostelny, and N. Dubrow. 1991. Chicago: The war close to home. In J. Garbarino et al. *No Place To Be a Child: Growing Up in a War Zone.* Lexington, Mass.: Lexington Books. **NCJ 147320.**

This article demonstrates that the escalating level of violence associated with drugs, gangs, and organized crime, particularly in urban areas such as Chicago, IL, is having a profound effect on poor children who live in public housing developments.

Getting Together To Fight Crime: How Working With Others Can Help You Build a Safer and Better Community. 1992. Washington, D.C.: National Crime Prevention Council. **NCJ 133969.**

This how-to booklet for community organization and mobilization helps neighbors rid their communities of problems with gangs, guns, drugs, and violence with the help of law enforcement and other agencies.

Given the Opportunity: How Three Communities Engaged Teens as Resources in Drug Abuse Prevention. 1992 (March). Washington, D.C.: National Crime Prevention Council. **NCJ 159771.**

See section 4 for annotation.

Goldstein, A.P., et al. 1989. *Reducing Delinquency: Intervention in the Community.* Fairview Park, N.Y.: Pergamon Press. **NCJ 128560.**

See section 5 for annotation.

Habitual Juvenile Offenders: Guidelines for Citizen Action and Public Responses. 1991. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 141235.**

This publication provides information and guidelines for action that may be used by the public to obtain public policy, legislative, and political responses to the problem of habitual juvenile offenders. It includes a sample interagency agreement and sample legislation.

Hawkins, J.D., and R.F. Catalano, Jr. 1993. *Communities That Care: Risk-Focused Prevention Using the Social Development Strategy: An Approach to Reducing Adolescent Problem Behaviors.* Seattle, Wash.: Developmental Research and Programs, Inc. **NCJ 143996.**

See section 4 for annotation.

Helping Communities Mobilize Against Crime, Drugs, and Other Problems. 1992 (December). Washington, D.C.: National Crime Prevention Council. **NCJ 142041.**

This booklet provides 21 lessons on community mobilization gathered from the experiences of many communities nationwide. It concludes with how to use the experiences of other communities, how to get started to mobilize a community, and how to sustain the effort and be successful.

How Communities Can Bring Up Youth Free From Fear and Violence. 1995 (July). Washington, D.C.: National Crime Prevention Council. **NCJ 158378.**

This book describes the extent of the violence problem, including the cost to communities; identifies key causes; presents successful strategies; and outlines how many communities have effectively worked to create safer, violence-free environments for youth. It highlights several successful programs that can serve as community models.

Howell, J.C., ed. 1995 (May). *Guide for Implementing the Comprehensive Strategy for Serious, Violent, and Chronic Juvenile Offenders.* Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 153681.**

See introduction for annotation.

Interdepartmental Working Group on Violence. 1994. *Violence: Report to the President and Domestic Policy Council.* Washington, D.C. **NCJ 159325.**

See section 1 for annotation.

Isaacs, M.R. 1992. *Violence: The Impact of Community Violence on African American Children and Families.*

Arlington, Va.: National Center for Education in Maternal and Child Health. **NCJ 148142.**

This book includes summaries of presentations at a 1991 workshop on collaborative approaches to violence prevention and intervention. Topics include a cultural perspective on African-American violence, descriptions and evaluations of anti-violence programs, programs focused on youth and families, the failure of the mental health system in treating African-American youth, and a review of research on the impact of violence on children.

Jencks, C. 1992. *Rethinking Social Policy: Race, Poverty, and the Underclass*. Cambridge, Mass.: Harvard University Press. **NCJ 160075.**

See section 5 for annotation.

Johnson, C. 1990 (Winter). Youth service: Beyond noblesse oblige. *School Safety*. 12–14. **NCJ 122435.**

See section 5 for annotation.

Kaye, C.B. 1989. Community service—with a smile. *School Safety*. 1989 (Spring): 4–7. **NCJ 119224.**

See section 5 for annotation.

Local and Community Strategies To Prevent Crime. 1995. Washington, D.C.: National Crime Prevention Council. **NCJ 159772.**

This book is a comprehensive compendium of effective strategies that have reduced crime in local communities. Organized by type of strategy, the chapters give detailed program information, including local contacts for additional information. The book is valuable for a range of crime-related problems faced by communities of all sizes.

Making Children, Families, and Communities Safer From Violence. 1995 (September). Washington, D.C.: National Crime Prevention Council. **NCJ 159773.**

This book for families—adults and children—outlines ways to make communities safer from violence, particularly gun-related violence. It provides practical information for strengthening communities, including building partnerships between residents and law enforcement, ensuring that services are available for victims of violence, finding alternatives to violence for youth, and learning about firearms and other weapons laws. It concludes with a checklist for violence prevention and a list of resources for community assistance.

Matrix of Community-Based Initiatives. 1996 (March). Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 154816.**

This document presents in graph format a collection of public and private comprehensive community-based violence prevention and economic development initiatives that can assist in delinquency prevention efforts.

Merry, S.E. 1981. *Urban Danger: Life in a Neighborhood of Strangers*. Philadelphia, Pa.: Temple University Press. **NCJ 079698.**

This book presents findings from research that explored the different ways people from various ethnic backgrounds in a high-crime urban environment perceive danger.

National Center for Injury Prevention and Control. 1993. *The Prevention of Youth Violence: A Framework*

for Community Action. Atlanta, Ga.: Centers for Disease Control and Prevention. **NCJ 147035.**

This publication identifies target groups, settings, and strategies for community-based juvenile violence prevention efforts. It offers suggestions for implementation and provides recommendations for evaluation of strategies.

National Crime Prevention Council. 1995 (December). *350 Tested Strategies To Prevent Crime: A Resource for Municipal Agencies and Community Groups*. Washington, D.C.: Bureau of Justice Assistance, U.S. Department of Justice.

This resource describes 350 strategies that have been implemented by communities to prevent crime. The strategies are grouped into topic-specific sections that include community mobilization, youth, economic development, violence, and drugs. Each strategy is explained in detail, defining the problem addressed, the key components and partnerships, potential obstacles, noted successes, and methods for applying the strategy. Local contact information is provided for every strategy.

National Crime Prevention Council. 1994 (September). *Working as Partners With Community Groups*. BJA Community Partnerships Bulletin. Washington, D.C.: Bureau of Justice Assistance, U.S. Department of Justice. **NCJ 148458.**

This bulletin explores how partnerships between law enforcement and community groups can reduce crime, alleviate the fear of crime, and develop a stronger sense of community unity. It addresses approaches for working with diverse groups and overcoming obstacles to cooperation.

National Crime Prevention Council. 1994 (August). *Partnerships To Prevent Youth Violence*. BJA Community Partnerships Bulletin. Washington, D.C.: Bureau of Justice Assistance, U.S. Department of Justice. **NCJ 148459**.

This work identifies alliances that police agencies can form with existing institutions, such as schools, parent groups, neighborhood associations, and service organizations, to direct youth away from violence and crime. These affiliations provide youth with educational, recreational, and anti-crime alternatives.

National Research Council and John F. Kennedy School of Government, Harvard University. 1994. *Violence in Urban America: Mobilizing a Response*. Washington, D.C.: National Academy Press. **NCJ 148221**.

This book resulted from a conference on urban violence that included mayors, Federal agency officials, and experts who analyzed the problem of violence in cities and developed recommendations for effective roles for Federal, State, and local governments as well as for families and communities in addressing local violence problems.

National Service and Public Safety: Partnerships for Safer Communities. 1994 (March). Washington, D.C.: National Crime Prevention Council. **NCJ 146842**.

As a result of the National and Community Service Trust Act of 1993, public safety representatives and the national service movement joined forces to prevent crime and strengthen

communities. Through programs such as Learn and Serve America (for school-age youth) and AmeriCorps (a national service program), neighborhoods have experienced improvements in both physical and social aspects.

Neighborhood-Oriented Policing in Rural Communities: A Program Planning Guide. 1994 (August). Washington, D.C.: Bureau of Justice Assistance, U.S. Department of Justice. **NCJ 143709**.

This monograph targets citizens and law enforcement officials in rural and small-town settings. Community engagement and problemsolving are key to handling public safety concerns, including drug abuse, violence, and disorder.

Not Alone, Not Afraid: United Against Crime. 1993 (April). Washington, D.C.: National Crime Prevention Council. **NCJ 144389**.

This book, in English and Spanish, teaches neighborhood residents how to unite effectively against local criminal activity by improving personal safety, working with other residents, and asking for help from crime prevention and other groups. It emphasizes that crime prevention begins with individual effort.

Payton, B. 1994 (September). *The Challenge: Preventing Youth Violence*. Washington, D.C.: Children's Defense Fund. **NCJ 156579**.

This book outlines anti-violence programs in Oakland, CA; Pine Bluff, AR; and Washington, DC. The programs demonstrate that two key elements—commitment to youth and connections to caring adults—are essential

for success. The programs are divided into the following categories: youth helping youth; support for young women; adult-youth connections; last-chance programs; and peace and healing efforts.

Planning Is a Verb. 1988. Washington, D.C.: National Crime Prevention Council. **NCJ 126221**.

This book examines why planning is vital and suggests some principles and techniques to make planning a dynamic process. It also provides a case study exercise and a resource guide.

A Police Guide to Surveying Citizens and Their Environment. 1993 (October). Washington, D.C.: Bureau of Justice Assistance, U.S. Department of Justice. **NCJ 143711**.

This monograph shows the importance of police surveys conducted in communities. Included is information on selecting a sample group, questioning respondents, interpreting results, and shaping policy through surveys.

The President's Community Enterprise Board. 1994 (January). *Building Communities: Together. Guidebook: Federal Programs*, and companion pieces: *Guidebook: Strategic Planning and Empowerment Zones and Enterprise Communities Application Guide*. Washington, D.C.: U.S. Department of Housing and Urban Development and U.S. Department of Agriculture. **NCJ 160082**.

This list of Federal programs assisting community-based strategic planning for Empowerment Zones and Enterprise Communities provides program descriptions, activities, and agency contacts.

Preventing Violence: Program Ideas and Examples. 1992. Washington, D.C.: National Crime Prevention Council. **NCJ 136251.**

This book on strategies to prevent violence stresses a combination of individual action and local partnerships. It lists a variety of successful local programs that include activities on college campuses, efforts to address gun safety awareness, and anti-child abuse education.

1994 Report to Congress: Title V Incentive Grants for Local Delinquency Prevention Programs. 1995 (March). Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 154020.**

This report discusses the Title V Incentive Grants Program under the Juvenile Justice and Delinquency Prevention Act of 1974. The report summarizes highlights of program activities and accomplishments during the first year of its implementation, OJJDP's efforts to foster inter-agency coordination of delinquency prevention activities, and recommendations for future Title V Program activities.

Rosenbaum, D.P., et al. 1994. *Community Responses to Drug Abuse: A Program Evaluation.* Washington, D.C.: National Institute of Justice, U.S. Department of Justice. **NCJ 145945.**

This evaluation report describes the effectiveness of grassroots organizations in 10 cities in their responses to drug-related problems. It assesses specific strategies used by these cities to reduce drug abuse and fear and to improve the quality of neighborhoods.

Snyder, H., and M. Sickmund. 1995 (August). *Juvenile Offenders and Victims: A National Report.* Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 153569.**

See introduction for annotation.

Spergel, I., et al. 1994 (October). *Gang Suppression and Intervention: Community Models.* Research Summary. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 148202.**

See section 3 for annotation.

Stop the Violence: Start Something. 1991. Washington, D.C.: National Crime Prevention Council. **NCJ 145595.**

This booklet outlines ways to stop local violence. It includes 10 things adults can teach kids about resolving conflict nonviolently, 10 things individuals can do to avoid violent situations, and 10 things neighborhoods can do to achieve a nonviolent environment.

Taking the Offensive To Prevent Crime: How Seven Cities Did It. 1994 (April). Washington, D.C.: National Crime Prevention Council. **NCJ 151532.**

This book describes the partnership of seven Texas mayors who identified and attacked common crime problems. They successfully improved residents' quality of life by implementing crime prevention programs with short- and long-term goals in an 18-month T-CAP (Texas City Action Plan To Prevent Crime) campaign.

Teens, Crime, and the Community. 1994. Washington, D.C.: National Crime Prevention Council. **NCJ 151709.**

This kit contains a variety of reproducible materials for teen-led projects to prevent crime in communities. Materials include fact sheets, brochures, bulletins, and ideas for local projects that have been successful in the national Teens, Crime, and the Community Program created by the National Crime Prevention Council and the National Institute for Citizen Education in the Law.

Toby, J., and A. Scrupski. 1991 (Winter). Community service as alternative discipline. *School Safety* 1991 (Winter):12-15. **NCJ 128474.**

See section 5 for annotation.

Uniting Communities Through Crime Prevention. 1994. Special Focus. Washington, D.C.: National Crime Prevention Council. **NCJ 151380.**

This special focus report details elements of crime prevention programs, community groups that take part in such programs, and characteristics of successful programs. It includes resources for the implementation of crime prevention programs.

Wilson, W.J. 1987. *The Truly Disadvantaged: The Inner City, the Underclass, and Public Policy.* Chicago, Ill.: University of Chicago Press. **NCJ 127579.**

This book examines social change in inner-city neighborhoods, including problems of violent crime, out-of-wedlock births, female-headed families, and welfare dependency. The author concludes that race-specific policies, such as affirmative action, are inadequate to address the problems of the urban underclass. He recommends a comprehensive public policy agenda to improve inner-city quality of life.

Wilson, J.J., and J.C. Howell. 1993. *A Comprehensive Strategy for Serious, Violent, and Chronic Juvenile Offenders*. Program Summary. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 143453**.

See introduction for annotation.

Working Together To Stop the Violence: A Blueprint for Safer Communities. 1994 (June). Washington, D.C.: National Crime Prevention Council. **NCJ 149682**.

This McGruff® anti-violence kit includes a variety of materials for communities to use during local anti-crime campaigns. Resources include reproducible brochures, articles, and posters.

Section 7: Support the Development of Innovative Approaches to Research and Evaluation

Board on Children and Families and Committee on National Statistics, Commission on Behavioral and Social Sciences, National Research Council and Institute of Medicine. 1995. *Integrating Federal Statistics on Children: Report of a Workshop*. Washington, D.C.: National Academy Press. **NCJ 158632**.

This workshop report examines the adequacy of Federal juvenile statistics in the areas of child development in the context of family and community resources, children's transition to school, educational attainment and transition into employment, monitoring changes in health care, and interpersonal violence involving children and families.

Butts, J.A., et al. 1995. *Juvenile Court Statistics 1992*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 154168**.

This report describes delinquency and status offense cases handled by U.S. courts with juvenile jurisdiction between 1988 and 1992. The report focuses on cases involv-

ing juveniles charged with law violations (delinquency or status offenses).

Coldren, J.C., and T. Bynam. 1989. *Evaluating Juvenile Justice Programs: A Design Monograph for State Planners*. Washington, D.C.: Office of Juvenile Justice and Delinquency Prevention, U.S. Department of Justice. **NCJ 135817**.

This monograph explains evaluation strategies to State juvenile justice specialists, State advisory groups, juvenile program administrators, and others interested in learning more about the processes and outcomes produced by Formula Grants projects under the Federal Juvenile Justice and Delinquency Prevention Act.

Conrad, D., and D. Hedin. 1987. *Youth Service: A Guidebook for Developing and Operating Effective Programs*. Washington, D.C.: Independent Sector. **NCJ 139052**.

This manual provides background information and instructions to persons who want to begin, expand, or promote programs of youth community service. The emphasis is on school-based programs.

Conclusion

Reduce Tomorrow's Violence: Take Action Today

In a healthy society, citizens should neither have to fear for the safety of youth nor fear being victimized by them. Today, however, many children are exposed to the threat of violence in their homes, schools, and neighborhoods. At an alarming rate, the entrepreneurial talents and skills of some of our brightest youngsters are employed in the lucrative but lethal trade of distributing illegal substances. They war with each other, deface buildings, terrorize neighborhoods, and engage in other malicious acts. Youthful prostitutes and runaways live in the streets, merchants are robbed at gunpoint, and the elderly are attacked. Easy access to guns has added to the lethality of juvenile violence.

Researcher and child advocate James Garbarino likens American communities plagued by gang

violence to urban war zones where more than one in four children have witnessed a homicide. Garbarino concludes: "Environmental danger of this magnitude is equaled only in the lives of children who live in situations of armed conflict."¹

It is disheartening to see the growing numbers of violent youth who value neither their own lives nor those of their victims. In this *Action Plan*, the Coordinating Council has presented its broad vision for reforming the juvenile justice system and strengthening communities to reduce both the number of juvenile victims and the number of juvenile offenders. The vision is responsive in terms of advocating intensified law enforcement and prosecution of serious, violent, and chronic juvenile offenders and responsible in terms of advancing strategies to bolster the system of support and intervention for those children and youth confronted by violence in their communities, their schools, and their homes.

Although this *Action Plan* cannot include all sources of guidance on the suggested strategies or current research, the Appendixes contain extensive references regarding model programs, program evaluations, delinquency research, and juvenile justice statistics.

Self-assessment or external evaluation is critical to success in this field. The Coordinating Council urges all communities to find a clear way to measure and demonstrate the outcome of the actions they take to address their juvenile violence and delinquency problem.

The Nation can ill afford to make the wrong choices. The *Action Plan* presents examples of community commitment to solutions that work. We have an opportunity to build on these accomplishments and implement them in our own communities.
