Research/GIS Analyst

**JOY LITZENBERGER**  
Research Analyst

## **ACKNOWLEDGEMENTS**

The Arizona Criminal Justice Commission's Statistical Analysis Center would like to thank all those who contributed to this report.

### **SPECIAL THANKS TO:**

Lynn Allmann, Department of Public Safety

Humberto Cisneros, Administrative Office of the Court

Joyce Dehnert, Department of Public Safety

Elizabeth Eells, Ph.D., Administrative Office of the Court

Daryl Fischer, Ph.D., Department of Corrections

Paul Kent, Phoenix Police Department

Mark J. McDermott, Administrative Office of the Court

Debbie Olsen, Administrative Office of the Court

Jennifer Schuldt, Arizona Tax Research Association

Mary Sullivan, Department of Public Safety

### **Also Thanks to:**

Cara Silvester and Kristen Roof for their work as interns on this project.

## Executive Summary

The *Arizona Criminal Justice Commission (ACJC) White Paper 2003 – Crime and the Criminal Justice System in Arizona* attempts to present a comprehensive statewide report on the occurrence of crime in Arizona, as well as the associated workload of the criminal justice system. One of the most comprehensive resources since the publication of the *1995 White Paper* was the *2002 Crime Trends in Arizona* report. The *2003 White Paper* builds upon the *Crime Trends* report and gives the reader the comprehensive comparison to the changes that have taken place in the criminal justice system since the *1995 White Paper*.

According to the *Arizona Crime Trends: A System Review*, Arizona has gone from third to first in total crime ranking and at the same time, has actually decreased in the total crime rate per capita. Robbery and Auto Theft are the only Part I crimes that have increased. Arizona has the dubious distinction of leading the country in auto theft. Violent Offenses have increased by a small percentage, with reported rape offenses increasing 14.8 percent, while the crime of murder showed a large decrease (11.2 percent). During the same time period, Property Offenses showed a very small increase (1.1 percent).

It is the intent of this study to provide information in a factual and objective manner allowing easy access and individual interpretation. The research examined workloads and budgets at the state, county, and municipal levels of government in Arizona. The criminal justice system in the state of Arizona includes, but is not limited to, all law enforcement agencies, the courts, probation departments, and prisons and jails. The workload for these elements is detailed in the body of this report and it shows that it increased significantly from 1995 to 2002. Workload is measured in various ways by various elements. This report uses the descriptors used by the agencies such as number of arrests, number on probation, and incarceration numbers.

The state of Arizona is second only to Nevada in population growth. The *1995 White Paper* projected continued statewide growth, but the population growth of 29.4 percent from 1995-2002 exceeded all expectations. Projections are for Arizona's population to continue to increase at an above average rate taking it from the 23<sup>rd</sup> most populous state in 2002 to the 15<sup>th</sup> most populous state by 2025. Given the correlation between population growth and crime, the 1.1 percent increase in reported Part I crime between 1995 and 2002 is relatively low when compared to the state's dramatic population increase.

For the most part, the arrest and reported crime data provided has been captured through the Uniform Crime Reports (UCR). Questions could arise regarding the accuracy of this data because of the fact that not 100 percent of all law enforcement agencies in Arizona regularly contribute this information to the Federal Bureau of Investigation. The reliability of this data can be improved with the implementation of better reporting systems and the dedication of personnel and resources to complete these tasks in a timely manner. Agencies working with the different populations will want a more definitive breakdown to examine possible trends.

Data regarding juvenile arrests was also provided by the Administrative Office of the Courts (AOC). Within the area of juvenile arrests, two disturbing trends have been noted. The first is the increased number of juveniles being referred to the juvenile justice system for drug offenses. This trend is consistent with findings from the 2002 Arizona Youth survey indicating increased substance abuse in Arizona. The second disturbing trend is that the percentage of females entering the juvenile justice

system in proportion to males is increasing in all but a few Arizona counties. These two trends identify target populations that will need specialized programming for both the juvenile and criminal justice community, and should be closely monitored during the coming years.

Data concerning arrests for Part I, Part II Drug Offenses, and juvenile referrals illustrate some of the problems currently facing Arizona. Adult arrests for Part I crimes decreased by 14.1 percent over the reporting period, while arrests for Part II Drug Offense crimes increased by 14.2 percent. Further, total juvenile arrests have declined over the reporting period for all segments of reported crimes. This is indicated by the decline of 29.8 percent in arrests for violent crime and a 26.3 percent decrease in juvenile arrests for Property Offense. Juvenile referrals for drug related activity increased by 2.7 percent during the study period. The reader may notice there is a discrepancy between UCR Part II Drug data and data reported from the individual counties as reported to the Administrative Office of the Courts. The reason for that difference was not determined.

The number of adults and juveniles on probation for the state has increased since 1995. In 1996, there were 7,084 juveniles on probation and in 2002 there were 9,568, a 35.1 percent increase. The number of adult probationers increased from 37,276 in 1996 to 49,229 in 2002, an increase of 32.1 percent. One major change in the juvenile system since the *1995 White Paper* was a reduction of 31.6 percent in Status Offense referrals. There were only two counties (Santa Cruz and Yuma) that experienced an increase in the number of status offense referrals in their respective county.

Correctional activity has increased dramatically during the reporting period. In general, commitments for Part I offenses have increased substantially, for all categories including violent crime (41.5 percent), property crime (16.5 percent), and drug-related offenses (21.6 percent). The percentage of female inmates increased 69.5 percent from 1995 to 2002. In addition, the percentage of female inmates increased from 6.6 percent of the overall inmate population to 8.1 percent in FY2002. During the same reporting period, commitments for those ages 16 to 24 increased 35.6 percent. These illustrate that more young people are being sentenced for felonies, and at the same time, females constitute a greater percentage of those commitments. The inmate population age 50 and up made up 6.9 percent of the total population in FY1995 but in FY2002 made up 9.1 percent of the total population. From 1995 to 2002 this segment of the inmate population increased 81.7 percent. Finally, during the same reporting period, budgetary growth for state corrections increased substantially, and the inmate population increased 39.5 percent as well.

The ACJC Statistical Analysis Center (SAC) requested and received a great deal of information from the counties regarding their budgetary information for the period from 1995 through 2002. Much of this information referenced the county General Fund data in addition to specific criminal justice information. The SAC did include Jail Excise Tax information in order to make the process more comparable with the rest of the county information. Significant efforts were made by both ACJC and the county agencies to maintain data consistency. However, despite these efforts, the data reporting procedures, timelines and nomenclature sometimes varied from county to county. Because of the possible differences in reporting and timelines, caution must be used in drawing comparisons between counties based on the reported budget information.

During the eight-year period, overall General Fund budgets increased at both state and county levels of government. The total State General Fund appropriation budget was \$4,461,589,100 in 1995 and \$7,034,601,100 in 2002, a 57.7 percent increase. The state criminal justice proportion of the State General Fund increased from 12.0 percent in 1995 to 12.9 percent in 2002. From 1995 through 2002

County General Funds increased by 42.4 percent and in all counties there were increases in criminal justice budgets. In comparison, the total criminal justice share of the county General Funds increased from 40.2 percent in 1995 to 43.6 percent in 2002. Of the 15 counties there were two counties, Maricopa and Mohave, in which the criminal justice share of the State General Fund showed a slight decrease.

The *2003 White Paper* is a compilation of data collected and provided to the SAC by a number of agencies at both the state and local levels. All agencies that contributed information for the report were extremely courteous and helpful to the extent that they had data available. This is a key element regarding the *White Paper* as it was very apparent that data elements were missing from a number of agencies. Most of this is due to the shortages of personnel and other resources necessary to capture this type of data on a regular basis. Some of the missing data elements are the result of problems detected in data management systems as a result of the survey for this report. Although the data is not available from those agencies, the result has been a catalyst for these agencies to correct previously unseen problems, allowing for improved data collection for future studies.

It is clear that more needs to be done regarding data collection and the subsequent sharing and analysis of that information. This information must be available to the Criminal Justice Commission and other agencies in order to help all criminal justice entities and the public understand the total picture of crime in Arizona and the problems that are faced by each component of the criminal justice system.

The ACJC SAC has a mission to ensure collaboration and sharing of information. To this end, the SAC and the Arizona Criminal Justice Commission are committed to the continuing improvement of all information components of the criminal justice system throughout the state. Constant and consistent improvements to the data gathering capabilities for law enforcement, prosecutorial, judicial, and correctional components of the criminal justice system will help to ensure the completeness of the data elements and the subsequent analysis and dissemination of this comprehensive, systematic information. The reports generated from these studies are vital for policy makers of each fundamental unit of the criminal justice system, and it is this type of information and the forthcoming analysis by which policy makers undertake the most difficult of decisions.

Arizona's criminal justice system will face several challenges in the coming years. It is quite evident, that the continued population increase over the next few years will also place a greater workload on all agencies within criminal justice system. Budget issues will continue to have a bearing on the availability of all services throughout the state. As is evidenced by the dramatic growth of Arizona's population and the resulting requirements for expansion of services in criminal justice, funding for the criminal justice system will continue to be one of the most pressing of issues during the 21<sup>st</sup> Century. Related to the issue of adequate funding, Arizona will have to explore new avenues for implementing more effective and efficient methods of addressing crime while facing rising workloads and increased expectations for service delivery.

# INTRODUCTION

Previous publications by the Statistical Analysis Center (SAC), have noted that Arizona faces numerous challenges in the coming years in maintaining established levels of services, while addressing the critical needs of the criminal justice system and balancing those against public safety. The difficulties facing state and local budgets are not unique to Arizona. Arizona has experienced enormous population growth over the past 10 years placing a burden on all levels of government to fund operations to meet demands. Moreover, the effort to maintain current levels of public safety is further strained by the trend of a growing population at a time when increased security is sought.

In January 2003, the *Arizona Crime Trends* publication was presented to the Governor, the criminal justice community and the public with a compilation of crime related data from national sources and criminal justice agencies throughout Arizona. The *Arizona Crime Trends* gathered data and emerging trends from various components of the criminal justice system in an effort to develop a system perspective. Our current publication, the *2003 White Paper: Crime and the Criminal Justice System in Arizona* will serve as an extension of this previous study by drilling down to the agency level and providing specific information relative to workloads and budgets. The *Arizona Crime Trends* report emphasized crime rates throughout the publication. In contrast, the *2003 White Paper* will present base data as reported by the participating agencies in the study. (ACJC: 2003)

The Arizona Criminal Justice Commission completed a "White Paper" in 1995 that assessed the current condition of the criminal justice system in Arizona. The 1995 version of the "White Paper" grew out of concerns by Commission members that the system was fragmented and had a number of problems, which adversely affected the manner in which justice was delivered to the citizens of Arizona. The intent of the 1995 "White Paper" was to act as a catalyst and primary information source for a symposium sponsored by the Arizona Criminal Justice Commission for elected and appointed public policy makers who control priorities and resource allocations.

Some of the concerns expressed in 1995 that precipitated the publication of the "White Paper" remain driving forces behind the publication of this 2003 "White Paper". Those driving forces include, but are not limited to: population increase; crime, competition for limited resources; disparate and in some cases, detached computer systems, jurisdictions dealing with the same perpetrators independently of each other; and an unclear understanding of what the criminal justice system is and should be. This publication provides data to assist the reader in making informed judgments about the current condition of the criminal justice system in Arizona. Budget crises at the federal, state, and local government levels are requiring a reassessment of each component of the system and the priority of that component when competing for scarce financial and human resources. This paper examines crime and arrest statistics; data relating to workloads; and demographic information such as population changes, at-risk populations, and other similar data. The report includes selected data from law enforcement, prosecution, the courts, corrections, and probation at state, county, and municipal levels. This document also includes available information regarding the funding levels for the various components of the criminal justice system at the state and local levels. The information provided relates to both the amount of funding and the percentage of total governmental expenditures represented by those amounts. To the extent possible, the data also includes the number of personnel available to any particular function of the system.

The "White Paper" is a collection of data and information. It does not attempt to explain the reasons for changes that have occurred. The Statistical Analysis Center sought to represent the findings in a

factual and objective manner noting general observations regarding the collected data. By utilizing detailed information presented herein, criminal justice stakeholders and analysts may conduct comparative analysis as appropriate and as needed for their area of reference. This paper is intended to serve strictly as a resource for policy makers to use as a guide in making decisions about the future of the Arizona Criminal Justice System.

This *White Paper* is also intended to provide a comprehensive view of the many factors that surround and affect the criminal justice system in this state. These factors include, but are not limited to, increases in population, budgets, criminal offense reporting, prosecution, court cases, incarceration rates, probation, and parole. These items are presented in order to help provide a clearer picture of the criminal justice system as it serves the people of Arizona.

## **RESEARCH PURPOSE**

The purpose of this *2003 White Paper: Crime and the Criminal Justice System in Arizona* is to help in answering questions regarding the past performance of the criminal justice system, the direction it is presently taking, and some possible expectations for the future. The *2003 White Paper: Crime and the Criminal Justice System in Arizona* publication was created to accomplish two primary objectives. The first objective was to serve as an extension of the *Arizona Crime Trends* publication by providing data at the agency level. The second objective is to provide the Governor, Legislators, Commission members, criminal justice stakeholders and the citizens of Arizona with a practical and factual report of the current state of agencies within the criminal justice system. It may also be utilized by other interested stakeholders, such as community leaders or individuals in policy-making positions.

## **RESEARCH METHODS**

The Statistical Analysis Center of the Arizona Criminal Justice Commission studied the 1995 version of the "White Paper", and as a result of this analysis, concluded that a replication of the data sources served as a good starting point for the compilation of the needed data for the 2003 report. In order to obtain this information, several detailed questionnaires were developed and sent to law enforcement, prosecution and county budget departments throughout the state. The questionnaires requested information on the size of the population that was served by the agency, geographic size of service areas, levels of reported crime, caseloads, and other related workload measures. The questionnaires also requested information on organizational resources such as budgets and the number of agency personnel.

In addition to data received from the individual agencies via questionnaires, data collected for this edition of the "White Paper" was obtained predominantly from four sources. The Statistical Analysis Center was able to obtain data from these sources electronically which proved to be a distinct advantage over the process used in the data collection for the *1995 White Paper* publication. The first of the four electronic sources is reported crime (index) and arrest data. This information comes from the monthly information sent to the Arizona Department of Public Safety in the form of Uniform Crime Reports (UCR). For this purpose, and for other ongoing projects, the Arizona Statistical Analysis Center received an electronic file containing UCR data stored in the Arizona Department of Public Safety database.

The second major source of data was provided by several divisions of the Administrative Office of the Courts. These electronic data files included detailed court workload and budget data for superior, justice and municipal courts throughout the state. In addition, adult probation and juvenile probation and referral (arrest) data were received in electronic format from the Administrative Office of the Courts.

The third major source of data was provided by the Department of Corrections. They provided inmate population counts for 1995 through 2002. This data is critical since the Department of Corrections is one of the largest criminal justice agencies in the state. The data files were sent electronically and clearly demonstrate the large workload increase since the original White Paper in 1995.

Population data was the final major source for the *2003 White Paper*. Population data was obtained from two sources. The primary source of state census information was the Arizona Department of Economic Security (ADES). Population counts and estimates were provided by ADES for 1995 through 2002. Also, some population estimates by gender were obtained from ADES. The Federal Bureau of the Census American Fact Finder website was used in the section on national population distribution and trends.

Once data was received the final stage of the project entailed a verification of the accuracy of the data to be included in the *2003 White Paper*. The Statistical Analysis Center staff compared all data included in the *2003 White Paper* publication with original survey submissions from individual agencies. In addition, the data was analyzed and assessed for problems and consistency. Logical errors were reported to the submitting agency for review. As part of this process, each agency was sent a copy of the data to be included in the publication and requested to review that data for accuracy and completeness.

## **ORGANIZATION OF THIS REPORT**

As noted previously, it is the intent of this study to provide information in a factual and objective manner allowing easy access and individual interpretation. Text and graphics are used primarily to highlight relevant information in tables and to provide general observations regarding changes over time. The design of the *2003 White Paper* was developed with the intent of allowing for ease of access, duplication, and distribution. For this purpose, the White Paper is available on the Arizona Criminal Justice website and was produced in black and white in order to reduce costs and allow more clarity when duplicated.

The *2003 White Paper* begins with a short discussion regarding the availability and limitations of data sources related to crime in Arizona. This includes a brief summary of the current status of the Uniform Crime Reports coordinated through the Arizona Department of Public Safety and efforts to move toward a more detailed crime reporting process through the National Incident Based Reporting System (NIBRS). In addition, a summary section relating to the data collection of budgetary information was included in order to provide the reader a clear understanding of issues relative to criminal justice budget data.

The paper is subdivided into three sections based on the level of government. The first section provides information regarding state criminal justice agencies. The second section deals with the 15 Arizona counties in alphabetical order. The third section details 26 municipalities with populations greater than 15,000 in 2002.

The *2003 White Paper* also includes information concerning Excise Taxes supporting jails as authorized by A.R.S § 48-4021 in 1989. Coconino, La Paz, Maricopa, Yavapai, and Yuma counties each created jail districts in order to utilize excise taxes to fund jails.

## **CRIME DATA SOURCES**

### **Uniform Crime Report (UCR)**

The primary means by which crime data is collected and made available within Arizona is through the Uniform Crime Report (UCR) data. The Arizona Department of Public Safety has been authorized by the state of Arizona to act as the Central Repository for all criminal history records, including Uniform Crime Reports, for the state. In 1992, A.R.S. §41-1750 D was amended to read, "The chief officers of law enforcement agencies of this state or its political subdivisions shall provide to the central state repository such information as necessary to operate the statewide uniform crime reporting program and to cooperate with the federal government uniform crime reporting program."

Since that time the number of law enforcement agencies participating in the UCR data project *Crime in Arizona* has increased remarkably. In 1995, 94 of the possible 102 law enforcement agencies voluntarily contributed (UCR) data to the Arizona Department of Public Safety. Of the 94 agencies that contributed data, not all of these agencies provided information for all 12 months. For example, in 1995 there were 91 of a possible 102 agencies that contributed UCR data to the Arizona Department of Public Safety with eight agencies sending in no data and three agencies contributing partial data. In all, there were 124 months of data that were not submitted in time to be included in the 1995 DPS publication *Crime in Arizona*. In comparison, the 2002 *Crime in Arizona* reflected the data of 97 law enforcement agencies (of a possible 103) with only 74 months not included for reporting purposes. This increase has resulted in the availability of more complete and accurate data available for analysis. Generally, there is a consistent pattern with certain agencies not submitting, or submitting partial UCR data.

Crime data is collected by DPS from law enforcement agencies across the state, placed in aggregate form, and forwarded to the Federal Bureau of Investigation for inclusion in the yearly UCR Report. This data gives law enforcement agencies, other public bodies, and criminal justice executives a composite picture of criminal activity, arrests, and other important information for Arizona on a yearly basis. In this manner, comparisons may be made regarding crime trends and the impact of criminal activity on the state.

Additionally, it is important to note differences in reporting methodologies between the 2001 *Crime in Arizona* publication and the 2001 *Crime in the United States* publication of the Federal Bureau of Investigation. This primarily pertains to estimates made at the national level by extrapolating data from agencies that contribute incomplete or partial data. Additionally, there are differences in population estimates used by the FBI and the Arizona Department of Public Safety. Therefore, the reader should be cognizant that there will be subtle differences between the numbers contained within these two reports. As noted previously, UCR data provided in this publication was obtained from an electronic submission from the Arizona Department of Public Safety database. Therefore, any updates that occurred following the publication in the *Crime in Arizona* report will result in differences in these reported numbers.

Although the Uniform Crime Reports (UCR) data is the primary means by which data is reported in Arizona, it is not without limitations. First, as noted above, not all jurisdictions submit complete data. Second, only the most serious offense is counted as part of a report or an arrest. Finally, relatively few data elements are included in the report, and thus, greatly reduce the ability of more detailed analysis.

## **National Incident Based Reporting System (NIBRS)**

The National Incident Based Reporting System (NIBRS) is a joint project of the US Bureau of Justice Statistics and the Federal Bureau of Investigation that will enhance the current UCR program by providing more detailed information than was previously collected by UCR. Over the past five years, NIBRS reporting has more than doubled with the number of state certified programs increasing to 18. The Arizona Department of Public Safety is working toward implementing a statewide Incident Based Reporting System (IBRS) repository. IBRS is designed to collect data on each single crime occurrence and on each incident and arrest within that occurrence. One of the significant differences between IBRS and the traditional UCR summary system is the degree of detail in reporting. The UCR summary system collects information on only eight Part I crimes (murder, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson).

IBRS collects information on 22 crime categories made up of 46 specific crime offenses in Group A:

- arson
- assault
- bribery
- burglary/breaking and entering
- counterfeiting/forgery
- destruction damage/vandalism of property
- drug narcotics
- embezzlement
- extortion/blackmail
- fraud
- gambling
- homicide
- kidnapping/abduction
- larceny/theft
- pornography/obscene material
- prostitution
- robbery
- forcible/non-forcible sex offenses
- stolen property
- weapon law violations

In Group B, 11 offenses are collected:

- bad checks
- curfew loitering/vagrancy violations,
- disorderly conduct
- driving under the influence
- drunkenness, nonviolent family offenses
- liquor law violations
- peeping tom, runaway
- trespass of real property
- all other offenses

For Group B offenses, only arrest data are reported. IBRS information will be forwarded to the Federal Bureau of Investigation and added to the National Incident Based Reporting System (NIBRS) database.

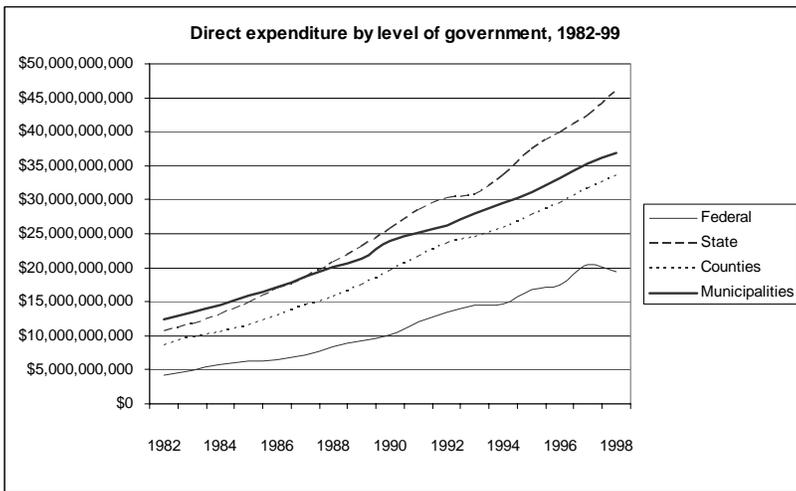

At present, two Arizona law enforcement agencies in addition to DPS are pursuing the initiation of IBRS with grant funding from ACJC. The Phoenix Police Department and the Yavapai County Sheriff's Office have initiated IBRS and have since started testing procedures prior to final implementation. There are other agencies such as the Benson Police Department that have purchased records management systems that have the capability to report crimes in IBRS. Through IBRS, sheriffs, police chiefs, agency directors, commissioners, legislators, municipal planners/administrators, academicians,

penologists, sociologist, and the general public will have access to more detailed crime information than the current UCR Summary System can provide.

# National Justice Expenditures

In February of 2002 the Bureau of Justice Statistics published a Bulletin titled *Justice Expenditure and Employment in the United States, 1999*. This Bulletin was based on a compilation of data from the Census Bureau annual surveys of governmental finances and employment. Among its findings was that in 1999 state governments spent \$57 billion on criminal and civil justice. Of that spending, 60 percent went to corrections. Additionally, it found that state justice expenditure grew approximately nine percent each year between 1982 and 1999.

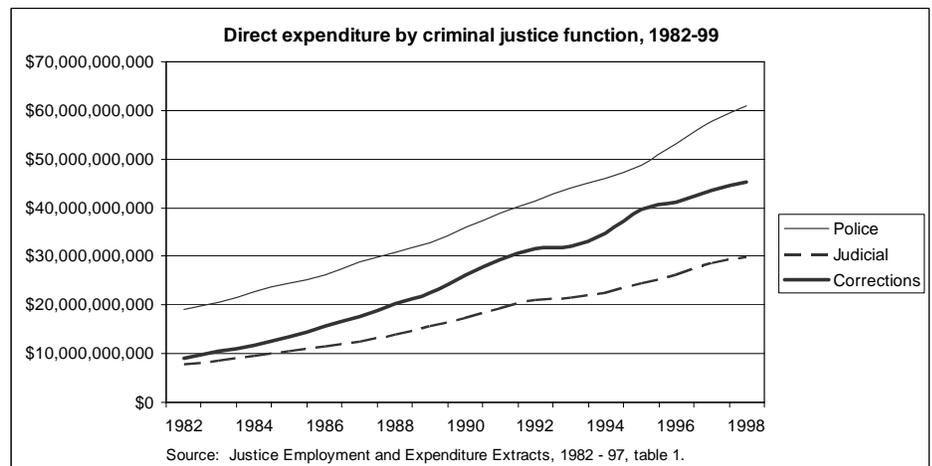

In 1999 the Federal government alone spent \$27 billion dollars on the justice system. This was a 514 percent increase between 1982 and 1999 and represented faster growth than that for state (393 percent) and local governments (257 percent). The Federal government share of justice system expenditures was 12 percent in 1982 compared with 19 percent in 1999.

States spend more on criminal justice than municipalities, counties, or the Federal government. Direct expenditure for each of the major criminal justice functions (police, corrections, judicial) has been increasing. Between 1982 and 1999 the Federal government increased its expenditure on police protection by 485.5 percent, judicial and legal services by 512.6 percent, and corrections by 654.2 percent. The State and local governments had smaller increases in all functions. However, local governments contributed

the most (51 percent) to the criminal and civil justice system — almost \$75 billion. By far the largest component of local expenditure was police protection, at nearly \$46 billion.

The average annual increase in justice spending was highest for corrections, ranging from a 9.4 percent increase per year between 1982 and 1999 by the local governments to an 11.9 percent increase per year by the Federal government. Police protection was the justice function with the lowest annual increase. Among state and local governments, the average annual increase on police protection was only about 7 percent. The Federal government expenditure for police protection increased by about 10 percent annually.

Across the nation, state and local governments spent \$442.14 per capita on justice activities. This ranged from \$227.96 per capita in West Virginia to \$1,212.27 in the District of Columbia. In 1999,

Arizona ranked 10<sup>th</sup> in the nation for per capita justice expenditures. However, Arizona was fourth in employment as a percentage of all government employment and had the third highest per capita justice employment figure in the nation.

## **Justice Employment**

The total number of justice employees grew 72 percent between 1982 and 1999, with the largest growth attributed to state governments (107 percent). Altogether, federal, state, and local governments had 2.2 million justice related employees in 1999. In October 2002, the Bureau of Justice Statistics published a Bulletin called *Census of State and Local Law Enforcement Agencies, 2000*. This document demonstrates that as of June 2000, state and local governments in the United States operated 17,784 full-time law enforcement agencies. At that time, Arizona had 135 state and local law enforcement agencies with 20,595, full time employees of which 11,533 were sworn personnel. Additionally, Arizona stands out with two police departments, Phoenix and Tucson, in the top 50 largest police departments by number of full time, sworn personnel. Phoenix Police Department alone had 2,626 sworn officers and Tucson Police Department had 928.

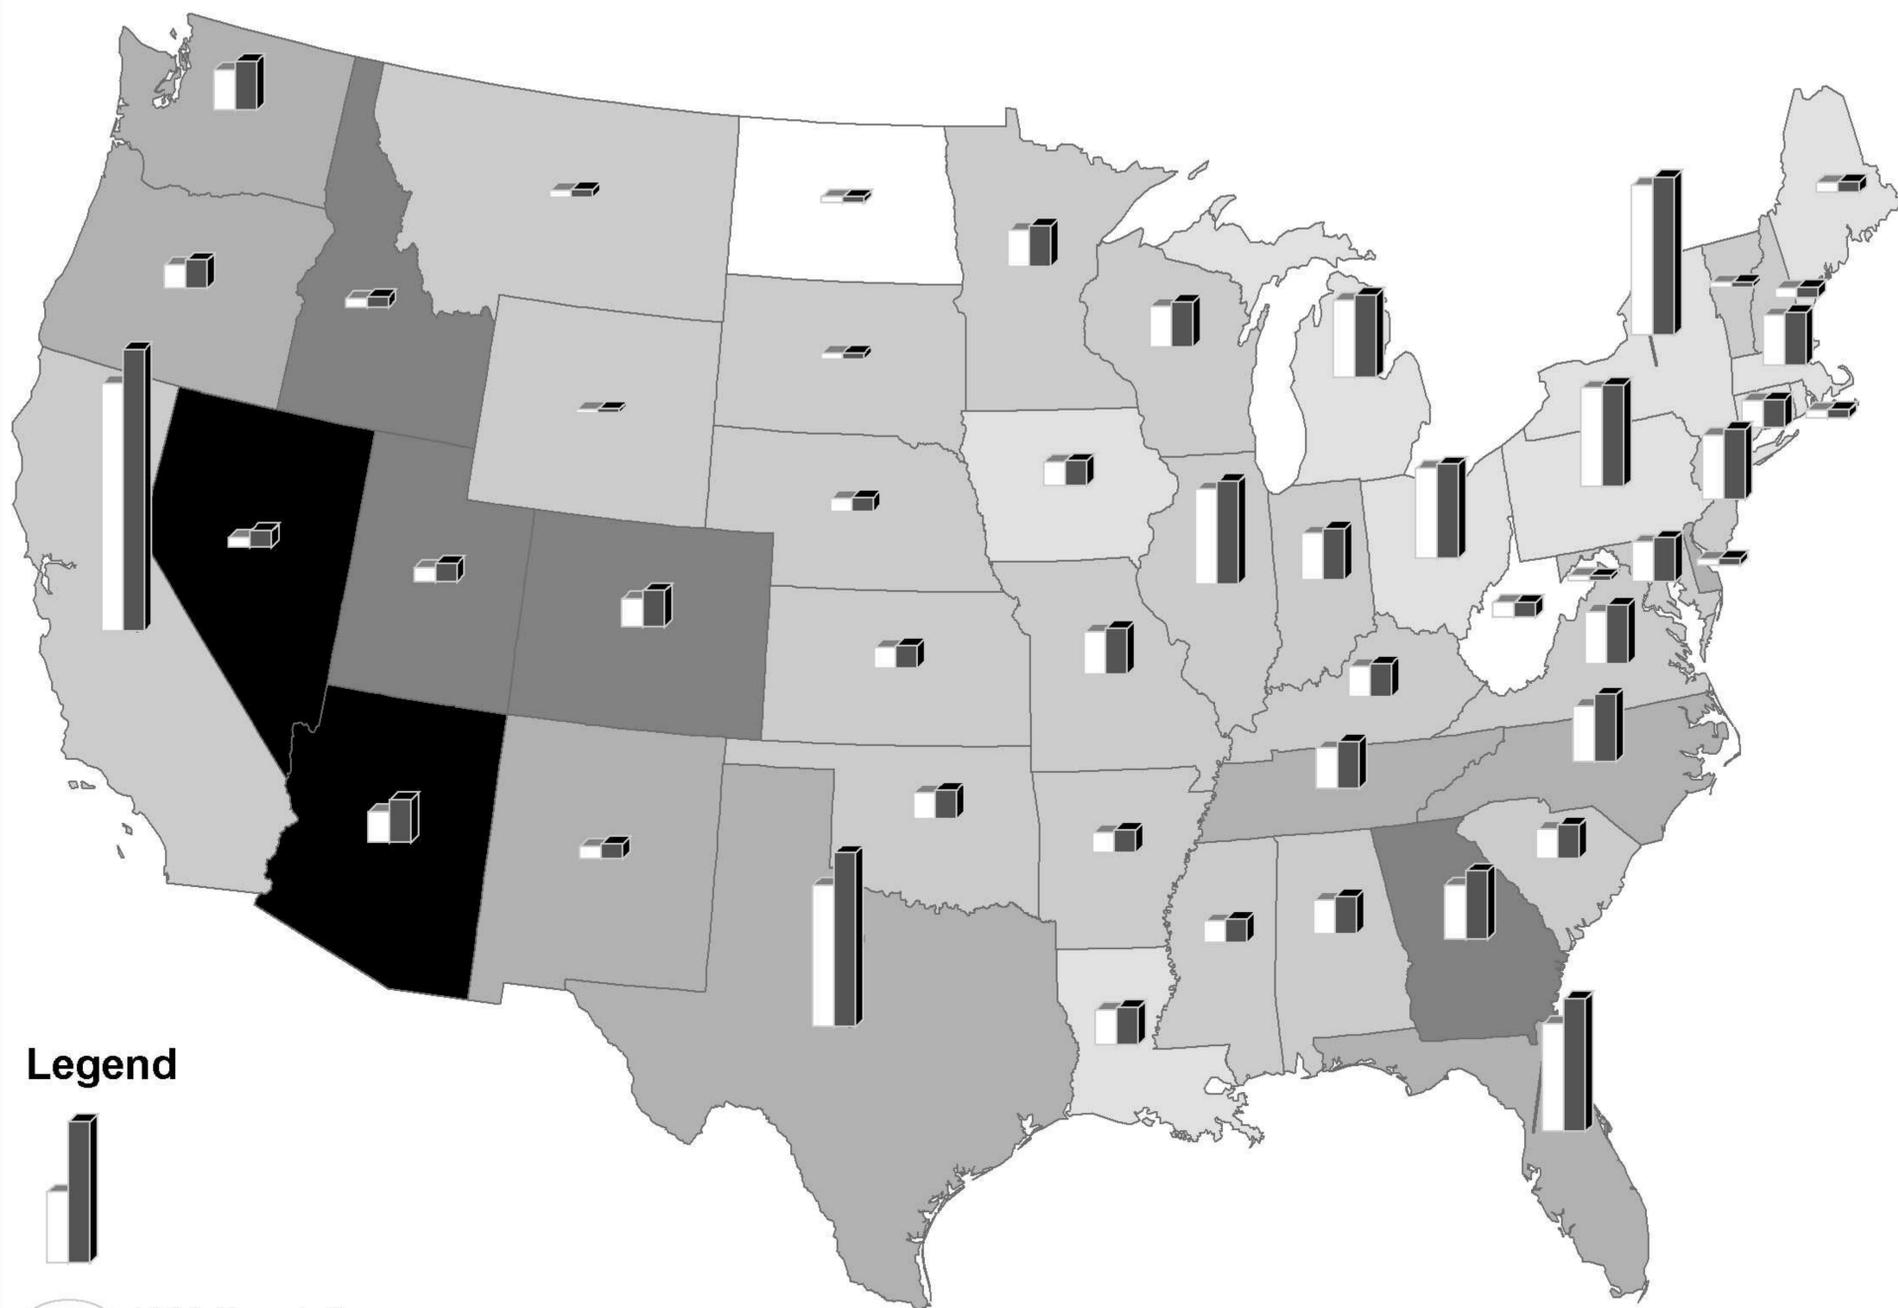

## **A Note on the Impact of Homeland Security**

On April 11, 2002 the White House issued a press release which began, "Immediately following the tragic events of September 11, departments and agencies from across the federal government took steps to strengthen the safety and security of the American people. At the Federal level, a total of \$10.6 billion from the Fiscal Year 2002 Emergency Budget Supplemental was dedicated to homeland security." The press release outlined dozens of law enforcement activities and security measures of all types which have been implemented by the establishment of the Department of Homeland Security, and the passage of the USA Patriot Act, in addition to many other initiatives and programs. The Office of Management and Budget lists the 2003 enacted, non-defense Homeland Security funding as \$28.9 billion with an additional, supplemental \$5.3 billion. The budget for 2004 is expected to reach \$34.6 billion.

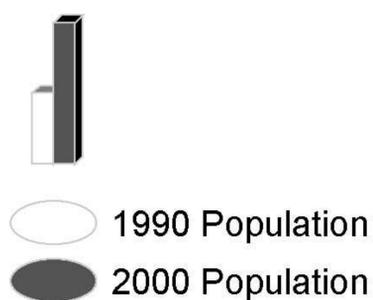

With this many federal programs and this level of funding, we can reasonably expect the local and state criminal justice workloads to increase proportionately. And while federal funding is available, it is reasonable to expect some of the burden of increased national security to fall to the state and local governments. Anecdotal evidence indicates that the impact of newly implemented national security procedures has already increased the presence of law enforcement at Arizona's international border and at Sky Harbor International Airport.

# Population change between 1990 & 2000: US States

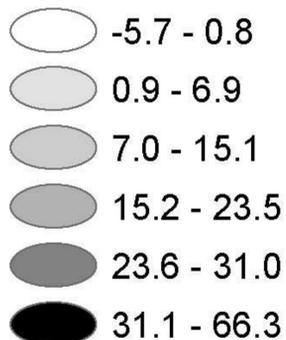

## Legend

## State Population

### Percent change between 1990 & 2000

0 125 250 500 Miles

This map shows two types of population change between the 1990 and 2000 census. Bar charts show the relative size of the 1990 and 2000 population counts for each of the continental states. Additionally, the states are shaded according to the percent change in population between 1990 and 2000. Arizona and Nevada did not experience the largest gains in raw population numbers. However, the population growth in Arizona and Nevada was such that it these states had the largest percentage increase of all states. Nevada experienced a 66.3% increase in population while Arizona was second with a 40% increase in population between 1990 and 2000.

## STATEWIDE DATA

This portion of the *2003 White Paper* will present data regarding population, the levels of reported crime, and number of arrests statewide. In addition, this chapter will provide information on the activities of state criminal justice agencies and the level of resources provided to them. Finally, this chapter will provide total statewide statistics on court activities at the Superior, Justice and Municipal court levels.

### STATEWIDE POPULATION DATA

Table 1-1 below shows Arizona's population has increased every year from 1995 to 2002. The state's 2002 population of 5,472,750 ranks it as the 23rd most populous state in the United States, according to *State Rankings*. During the period 1995 to 2002, Arizona's population increased 29.4 percent. It is projected to be the 15<sup>th</sup> most populated state with an estimated population of 6.4 million residents by 2025.

<b>TABLE 1-1: STATE OF ARIZONA POPULATION 1995-2002</b>

Population information provided by the Arizona Department of Economic Security.

Table 1-2 reflects the number of males and females, ages 16 to 24 in 1990 and 2000 for the state of Arizona. This breakdown represents the segment of the population considered most at-risk within the criminal justice system. From 1990 to 2000, the total number of people ages 16 to 24 increased 33.7 percent. The male population age 18 to 24 increased 35.0 percent, while the female population increased 29.8 percent in the same age category.

<b>TABLE 1-2: STATE AT-RISK POPULATION DATA 1990 - 2000</b>

Total for 18 to 24 years	198,212	187,630	385,842	267,543	243,630	511,173	35.0%	29.8%	32.5%

Population information provided by the 1990 U.S. Census (STF 3) and 2000 U.S. Census (SF 4).

Individuals between the ages of 16 and 24 are considered by many in law enforcement to be the most at-risk age group. The exact ages of those considered at risk vary slightly depending on the study. On a national level, Dr. James Fox in *Trends in Juvenile Violence* in 1996 wrote that, "Males, ages 14-24 are less than eight percent of the population yet commit 48 percent of the murders." He also noted that, "From 1989 to 1994, the arrest rate for Violent Offenses (murder, rape, robbery and aggravated assault) rose over 46 percent among teenagers, but only about 12 percent among adults." (Fox, 1996) In Arizona, youth ages 16 to 24 comprised 12.9 percent of the population in 2000, according to the U.S. Census. In 2000, 37.5 percent of those arrested for Part I Violent

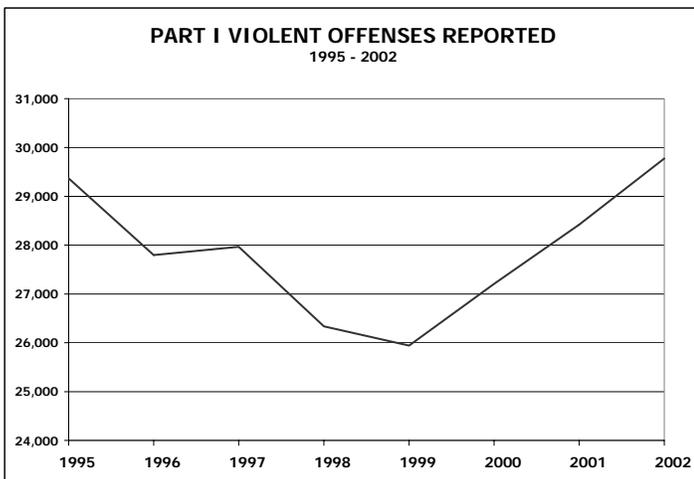

Offenses committed in Arizona were between the ages of 16 and 24. During the same year 39.4 percent of all murders were committed by males ages 16 to 24.

## STATEWIDE REPORTED CRIME DATA

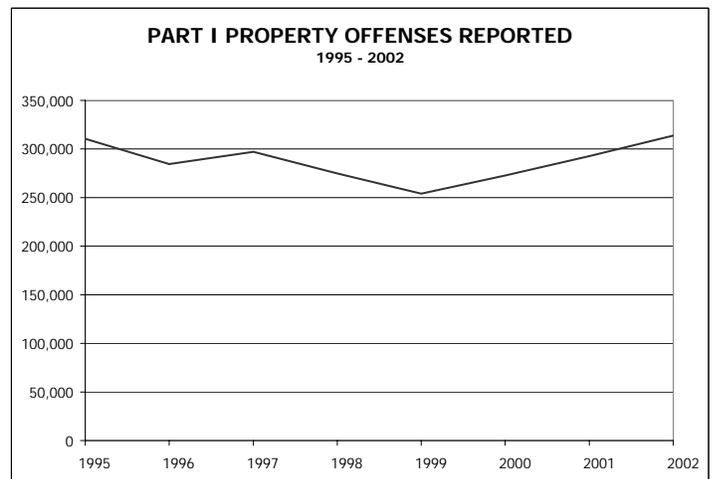

While the population of the state has increased during the last eight years (a 29.4 percent increase), total Part I offenses increased 1.4 percent over the same eight-year period. Table 1-3 shows that total Part I Violent Offenses increased 1.5 percent from 1995 through 2002. In the Violent Offense category the largest percentage increase was in rape, which showed an increase of 15.2 percent. The largest decline was in murder, which went down by 15.8 percent. Robbery increased 10.8 percent, while aggravated assaults decreased 2.6 percent.

Part I total Property Offenses increased 1.3 percent over an eight-year period with vehicle thefts increasing the most at 18.5 percent. Larceny-theft decreased 2.4 percent and the number of burglaries declined 0.4 percent, while the number of arsons reported increased 15.2 percent from 1995 through 2002.

**FIGURE 1-1**

**FIGURE 1-2**

Figures 1-1 and 1-2 display the number of Part I Violent and Property Offenses from 1995 through 2002. Both categories experienced similar increases and decreases, although the changes are more dramatic in the Violent Offenses reported. Both categories had very small increases overall during this time (1.5 percent for Violent Offenses and 1.3 percent for Property Offenses). While the overall

increase was relatively low over the entire eight-year period, Violent Offenses reported increased 14.9 percent from a low of 25,943 in 1999 to a high of 29,805 in 2002. Property Offenses reported displayed a similar trend reaching a low point in 1999 with 254,052 reported and a high point of 314,684 in 2002, an increase of 23.9 percent over the past four years.

## STATEWIDE ARREST DATA

Table 1-4 shows the total number of adult arrests for Part I crimes as reported by agencies for the UCR. The total number of adult arrests for Part I crimes decreased 14.1 percent during the eight-year period, while arrests for Part I Violent Offenses had a slight 1.0 percent increase. The number of adults arrested for aggravated assaults decreased 0.2 percent and arrests for robbery increased 13.6 percent, while forcible rape arrests were down 21.8 percent and murder/non-negligent manslaughter was down 3.8 percent.

Table 1-4 also provides data regarding adult Part I Property Offenses. Total Property Offense arrests were down 17.4 percent from 1995 through 2002. Arrests for vehicle thefts increased 92.2 percent, while all of the other Property Offense categories showed declines. Burglary was down 6.5 percent, larceny-theft was down 26.3 percent and arson was down 34.6 percent.

Part II drug offense arrests increased 27.0 percent for adults in the state. Arrests for sale or manufacturing of drugs by adults declined 4.4 percent, while adult arrests for possession increased 37.2 percent. The total number of adult arrests for all Part II offenses statewide increased 14.2 percent over the eight-year period from 1995 through 2002.

Table 1-5 presents the UCR data detailing the number of juvenile arrests for Part I offense arrests and Part II drug offense arrests as well as summaries for each category. Total Part I juvenile arrests decreased by 26.8 percent during the eight-year period. Arrests of juveniles involved in Violent Offenses decreased 29.8 percent with arrests for murder/non-negligent manslaughter decreasing 55.8 percent, while forcible rape declined 58.5 percent. Robbery saw a decline of 49.7 percent and aggravated assault was down 22.1 percent during the same period.

Total Part I Property Offense arrests of juveniles decreased 26.3 percent from 1995 through 2002. Burglary was down 32.9 percent, while larceny-theft decreased 23.6 percent. During the same eight-year period, motor vehicle theft decreased 31.9 percent and arson fell 46.5 percent.

Total juvenile arrests for Part II Drug Offenses decreased 3.4 percent statewide. Arrests for sale or manufacturing of drugs decreased 32.6 percent during the eight-year period. Arrests for possession of illegal drugs increased 0.9 percent. Total Part II juvenile arrests decreased 22.7 percent during the eight-year period.

## ARIZONA DEPARTMENT OF PUBLIC SAFETY

This section reports on the resources and workload of the Arizona Department of Public Safety as reported by the agency in their survey response.

Table 1-6 presents resource data for the Arizona Department of Public Safety. This data shows that the agency budget increased 60.6 percent from fiscal year 1995 to fiscal year 2002. It is important to note that approximately 30 percent of the FY2002 budget reflects non-appropriated funds. In FY1995, the personnel budget was 57.9 percent of the total agency budget, while in FY2002, the personnel budget consisted of 52.0 percent of the total agency budget. The number of sworn personnel increased 21.9 percent, with sworn line personnel increasing by 23.8 percent.

<b>TABLE 1-6: ARIZONA DEPARTMENT OF PUBLIC SAFETY RESOURCE DATA FY1995-FY2002</b>

Table 1-7 presents workload data for the Arizona Department of Public Safety. Workloads increased in all areas surveyed from FY1995 to FY2002. The largest percentage increase was in calls for service, which increased 257.0 percent. During this time period, traffic related workloads also grew with traffic citations increasing 11.6 percent, DUI arrests increasing 19.5 percent, traffic accidents investigated increasing 55.4 percent and fatal accidents increasing 59.5 percent. Crime lab submissions increased 20.1 percent and criminal cases submitted for prosecution increased 76.1 percent during the eight-year period surveyed.

## STATEWIDE SUPERIOR COURT DATA

Table 1-8 shows data relating to the resources available to the Superior Court. The expenditure data represents actual expenditures of all county Superior Courts as reported to the Administrative Office of the Courts. Primary budget expenditures are county funds appropriated to support the Superior Court in the County. The table shows that the total expenditures for the Superior Courts in the state increased by 49.4 percent from 1995 through 2002. The primary budget grew by 50.4 percent during the eight-year period, while the state programs budget experienced a 30.8 percent reduction.

## STATEWIDE CRIMINAL RELATED ACTIVITY SUPERIOR COURT 1995 - 2002

**FIGURE 1-3**

Figure 1-3 displays, for the period from 1995 through 2002, the total number of criminal cases filed in the 15 Superior Courts, the number of criminal cases disposed, the number of criminal trials, and the number of defendants sent to prison.

Table 1-10 provides data regarding the ultimate disposition of criminal defendants in cases handled by the Superior Courts statewide. A review of the type of dispositions made shows that the category with the largest increase was Suspension/No Supervision Probation category with an increase of 477.5 percent over the eight-year period. The only category to show a decline was "Acquitted" with a decline of 11.5 percent. Categories in addition to the Suspension/No Supervision Probation, which showed triple digit increases, included Monetary Penalty/PWS/Diversion Only, which increased 184.4 percent and Probation, which increased 116.3 percent. Total Disposed cases increased 72.3 percent from 1995 through 2002.

## STATEWIDE JUSTICE COURT DATA

Table 1-11 provides data regarding the activities of Justice Courts statewide. The figures in this table represent the totals from all of the Justice Courts in the state as provided by the Administrative Offices of the Court.

The total number of cases filed in the justice courts statewide increased from 719,184 in 1995 to 876,940 in 2002, an increase of 21.9 percent. Filed Criminal Traffic cases increased by 45.7 percent over the same period, while civil traffic had a 14.1 percent increase.

A review of the disposed cases reveals similar results to those shown by filed cases. Criminal traffic showed a 35.6 percent increase, while civil traffic increased at about half the rate of criminal traffic, or an increase of 15.8 percent. The total court cases disposed increased from 679,441 to 823,155, a 21.2 percent increase from 1995 through 2002.

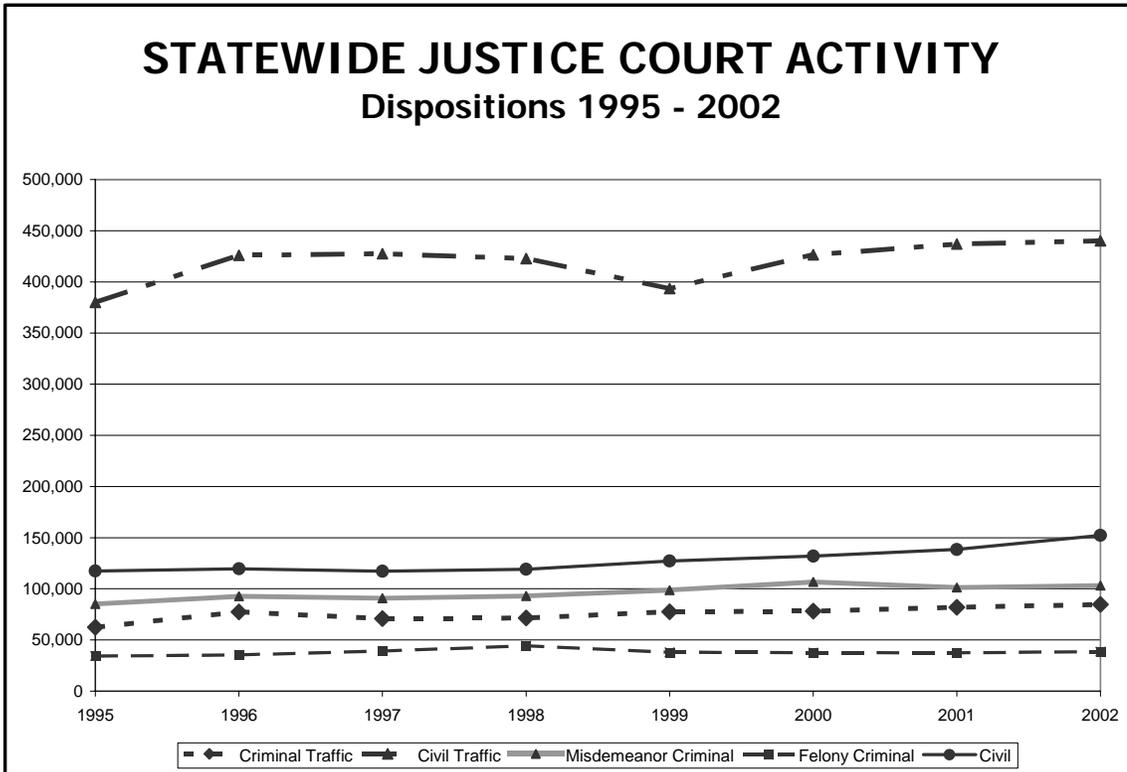

FIGURE 1-4

## STATEWIDE MUNICIPAL COURT ACTIVITY

Table 1-12 provides data regarding the activities of Municipal Courts statewide. The figures in this table represent the totals from all of the Municipal Courts in the state.

The data in Table 1-12 indicates that the workload for the municipal courts has increased with criminal traffic cases filed increasing 27.7 percent from 1995 through 2002. Civil traffic cases filed rose 24.9 percent, and misdemeanor criminal filings decreased 18.9 percent.

Municipal courts had a 33.2 percent increase in the disposal of criminal traffic cases, while experiencing a 30.6 percent increase in civil traffic cases from 1995 through 2002. The courts had a decline in the number of misdemeanor criminal cases disposed from 1995 through 2002. From 1988 through 1994 the courts experienced a 210 percent increase in the disposition of harassment orders and a 162 percent increase in the dispositions of domestic violence cases. Domestic violence orders grew from 11,080 in 1995 to 13,330 in 2002, or 20.3 percent, while Harassment Orders rose from 6,520 in 1995 to 9,629 in 2002, representing an increase of 47.7 percent.

## JUVENILE REFERRAL ACTIVITY

Table 1-13 presents a breakdown of juvenile referral activity by age and gender for the state of Arizona from fiscal year 1996 to fiscal year 2002. Data from fiscal year 1995 are unavailable. Total referrals decreased 10.9 percent. The percentage of females versus males referred increased during this time. In FY1996, 28.8 percent of referred juveniles were female and 71.2 percent were male, whereas in FY2002, 32.1 percent of the referrals were female and 67.9 percent were male. The percentage of younger juvenile referrals increased between FY1996 and FY2002. In FY1996, 9.0 percent of referrals were between 8 and 12 years old, while 91.0 percent were between 13 and 17. Of the referrals in FY2002, 10.0 percent of juvenile referrals were between 8 and 12 years old and 90.0 percent were between 13 and 17.

Data received from AOC

Note: Data was taken from the FY2002 extract of JOLTS. As data was re-run for previous fiscal years, Total Referral numbers may not match the Total Referrals in the "Juveniles Processed" publication for the respective fiscal year.

Table 1-14 shows the juvenile referral activity by offense type for Arizona from FY1996 to FY2002. Data from FY1995 was unavailable. Juvenile referrals for felonies against person decreased 27.3 percent from FY1996 to FY2002. During this seven-year span, referrals for felonies against property dropped 35.3 percent. Total referrals for drug offenses increased 2.7 percent during this time.

## ARIZONA BOARD OF EXECUTIVE CLEMENCY

In 1994, the Board of Pardons and Paroles became the Board of Executive Clemency. Table 1-16 below indicates that the agency budget as well as the personnel budget has decreased since FY1995. Total personnel have steadily decreased from a high of 40 in FY1995 to 22 in FY2002.

<b>TABLE 1-16: ARIZONA BOARD OF EXECUTIVE CLEMENCY RESOURCE DATA FY1995 - FY2002</b>								
	<b>FY1995</b>	<b>FY1996</b>	<b>FY1997</b>	<b>FY1998</b>	<b>FY1999</b>	<b>FY2000</b>	<b>FY2001</b>	<b>FY2002</b>
Agency Budget	\$1,800,000	\$1,700,000	\$1,700,000	\$1,400,000	\$1,700,000	\$1,400,000	\$1,400,000	\$1,400,000
Personnel Budget	\$1,400,000	\$1,300,000	\$1,200,000	\$1,400,000	\$1,300,000	\$1,100,000	\$1,000,000	\$1,000,000
Total Personnel	40	39	37	36	33	26	22	22

Table 1-17 is based on data obtained from the Board of Executive Clemency and provides workload data for Parole; Modification, Rescission and Revocation; and Clemency. From FY1995 to FY2002 parole hearings scheduled decreased 86.8 percent and hearings held dropped 86.7 percent. Of the total number of parole hearings held, the granting of release (compared to denials) decreased from 46.0 percent in 1995 to 33.2 percent in 2002.

Modification hearings decreased 83.3 percent, rescission hearings decreased 93.1 percent and revocation hearings increased 172.2 percent between FY1995 and FY2002. Of 165 modification hearings between FY1995 and FY2002, 155 (93.9 percent) resulted in modifications. During the same period 557 (88.3 percent) of the 631 total rescission hearings resulted in the parole status being rescinded. There were 12,924 revocation hearings between FY1995 and FY2002. Of these, 11,834 (91.6 percent) were revoked.

Most of the 2,160 clemency hearings (86.0 percent) resulted in a no recommendation to the Governor. From 1995 to 2002, a total of 32 pardon recommendations, one reprieve recommendation, and 224 commutation recommendations were sent to the governor.

The Arizona Board of Clemency saw an overall decrease in hearings in each subsequent year from 1995 through 2002. In FY1995, there were 12,112 hearings held dropping to 4,304 in 2002, a decrease of 64.5 percent.

# ARIZONA DEPARTMENT OF CORRECTIONS

This section deals with the resources and workloads of the Arizona Department of Corrections as reported by the agency.

Table 1-18 shows that the annual budget of the Department of Corrections has increased from 1995 through 2002 by 65.6 percent. In the years from 1985 through 1994, the budget for the Department of Corrections increased 121 percent. Total DOC personnel have increased from 7,385 employees in 1995 to 9,244 in 2002. During that same period, corrections service officers have grown from 4,028 in 1995 to 5,252 in 2002, while line officers has risen from 569 in 1995 to 862 in 2002. For the eight years surveyed, the personnel budget has grown from \$222,061,800 in 1995 to \$412,584,000 in 2002, an increase of 85.8 percent.

<b>TABLE 1-18: ARIZONA DEPARTMENT OF CORRECTIONS RESOURCE DATA FY1995-FY2002</b>

Figure 1-5 displays the increase in total inmate population of the Department of Corrections during the eight years surveyed.

**FIGURE 1-5**

Table 1-19 provides a variety of data regarding the make-up of the population of the Arizona prison system, including the total inmate population and inmate population by gender, type of crime and age. The total population of the Department of Corrections has increased from 21,133 in 1995 to 29,273 in 2002, or 38.5 percent. During the previous 10 years from 1985 through 1994 the total

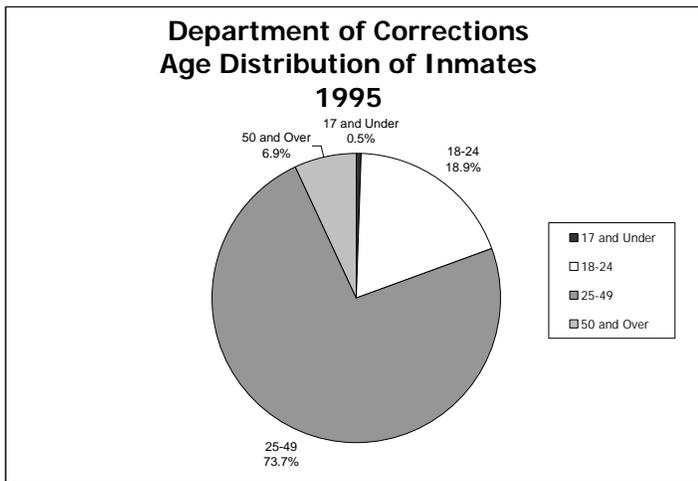

population of the Department of Corrections increased 132 percent. When looking at the data in Table 1-19 the male inmate population rose at a rate of 36.3 percent, while the female population increased 69.5 percent.

From 1995 through 2002, inmates committed to the Department of Corrections for Part I Violent Offenses increased 41.5 percent, while commitments for Part I Property Offenses increased 16.5 percent. Commitments for drug offenses increased 21.6 percent during this period with the percentage of the total population committed for drug offenses decreasing from 21.4 percent in 1995 to 18.8 percent in 2002.

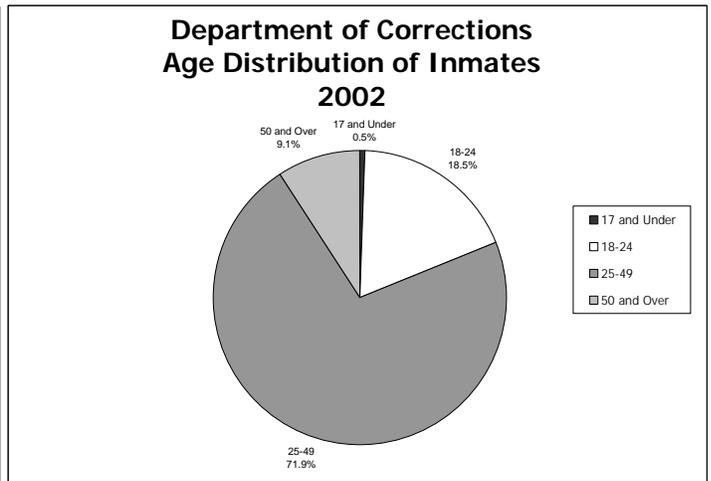

**TABLE 1-19: ARIZONA DEPARTMENT OF CORRECTIONS

% of Total Population	0.5%	0.5%	0.4%	0.5%	0.7%	0.6%	0.5%	0.5%
Inmates Age 18-24	3,988	3,978	4,066	4,329	4,642	4,697	4,935	5,407
% of Total Population	18.9%	17.8%	17.5%	17.3%	17.7%	17.8%	18.1%	18.5%
Inmates Age 25-49	15,576	16,625	17,330	18,621	19,198	19,270	19,727	21,050
% of Total Population	73.7%	74.5%	74.4%	74.2%	73.4%	73.0%	72.4%	71.9%
Inmates Age 50 and up	1,468	1,607	1,780	2,001	2,157	2,283	2,459	2,668
% of Total Population	6.9%	7.2%	7.6%	8.0%	8.2%	8.6%	9.0%	9.1%

Table 1-19 also illustrates that from 1995 through 2002 the percentage of the total inmate population represented by inmates in the 17 years and under age group as well as the 18 to 24 years age group remained relatively constant. However, the actual number of 17 years and under age group and the 18 to 24 years age group experienced increases of 46.5 percent and 35.6 percent respectively. The age group from 25 through 49 showed a decrease as reflected in the percent of the total population from 73.7 percent to 71.9 percent, while the age group of 50 years and older showed an increase from 6.9 percent to 9.1 percent. In each of these categories, there were overall increases experienced in the actual number of inmates with an increase of 35.6 percent in the age group 25 to 49 and an increase of 81.7 in the 50 years and older age group.

**FIGURE 1-6**

**FIGURE 1-7**

Figures 1-6 and 1-7 display the age distribution of inmates incarcerated in the Arizona Department of Corrections in 1995 and in 2002. Table 1-20 provides data regarding the average time served for the DOC inmate population from 1995 through 2002. The data show that the average time served for the male population has increased from 28 months in 1995 to 37 months in 2002, while the average time served for the female inmate population has grown from 21 months in 1995 to 25 months in 2002. The largest percentage increase in time served was with male inmates incarcerated for drug offenses, which showed a 29.6 percent increase.

# ARIZONA DEPARTMENT OF JUVENILE CORRECTIONS

<b>TABLE 1-21: ADJC BUDGET 1995 - 2002</b>								
	<b>FY95</b>	<b>FY96</b>	<b>FY97</b>	<b>FY98</b>	<b>FY99</b>	<b>FY00</b>	<b>FY01</b>	<b>FY02</b>
<b>Agency</b>	\$39,493,700	\$43,512,800	\$50,383,100	\$56,006,500	\$69,263,900	\$68,719,900	\$73,188,100	\$69,366,300
<b>Personnel</b>	\$22,292,200	\$24,666,900	\$29,134,900	\$30,101,200	\$42,519,900	\$45,914,500	\$48,397,600	\$47,954,400
<b>Total FTEs</b>	706.0	798.0	895.5	906.0	1,362.0	1,327.2	1,402.2	1,300.7

Table 1-21 shows that the Arizona Department of Juvenile Corrections (ADJC) budget increased by 75.6 percent between 1995 and 2002. Likewise, the number of ADJC full time equivalent positions (FTEs) nearly doubled between 1995 and 2001 and then decreased by 7 percent in 2002.

**ADJC Secure Population 1997 - 2002**

**Figure 1-8**

Figure 1-8 shows that the ADJC secure population increased during 1997 and 1998. Except for an increase in 2000, the ADJC secure population decreased between 1998 and 2002.

Working with juveniles committed to ADJC poses a formidable challenge to staff, because they are among the most troubled teenagers in Arizona. Many of them have extensive delinquency histories combined with serious emotional problems. Table 1-23 shows the scope of problems they present to ADJC staff. Almost all of them have substance abuse (98 percent) or school behavior problems (97

percent). Practically all of them (94.2 percent) have intellectual deficits. Approximately two-thirds (63 percent) of them come from families with criminal histories.

The average time served by juveniles committed to ADJC has increased. Between 1996 and 2002 the time served by new commitments in secure care increased by 80 percent from an average of 155.4 days to an average of 279.8 days.

ADJC initiated a parole reinforcement program in 2001. The program was designed for juveniles on parole that were having trouble complying with their parole conditions. This secure, community-based program was established to provide intensive assessment services to juveniles who were having trouble complying with their parole plans. During 2002, 48.4 percent of the juveniles returned from parole were placed in the parole reinforcement program, 24.9 percent were returned to parole, 25.6 percent were placed on parole revocation status and 1.1 percent were discharged. On average, juveniles spent 48 days in the parole reinforcement program in 2002, which is considerably less than the 246.6 days that juveniles spent on parole revocations status, thus saving the department valuable bedspace.

**FIGURE 1-9**

The proportion of juveniles released from ADJC sentenced to an Arizona Department of Corrections (ADC) prison decreased from 23.5 percent in 1996 to 19.8 percent in 1999 (see Figure 1-9). This achievement is impressive when one considers that the estimated monetary value of saving one high-risk youth from becoming a career criminal ranges between \$1.7 and \$2.3 million. [Cohen, Mark. *The Monetary Value of Saving a High Risk Youth*, Journal of Quantitative Criminology, 1998.]

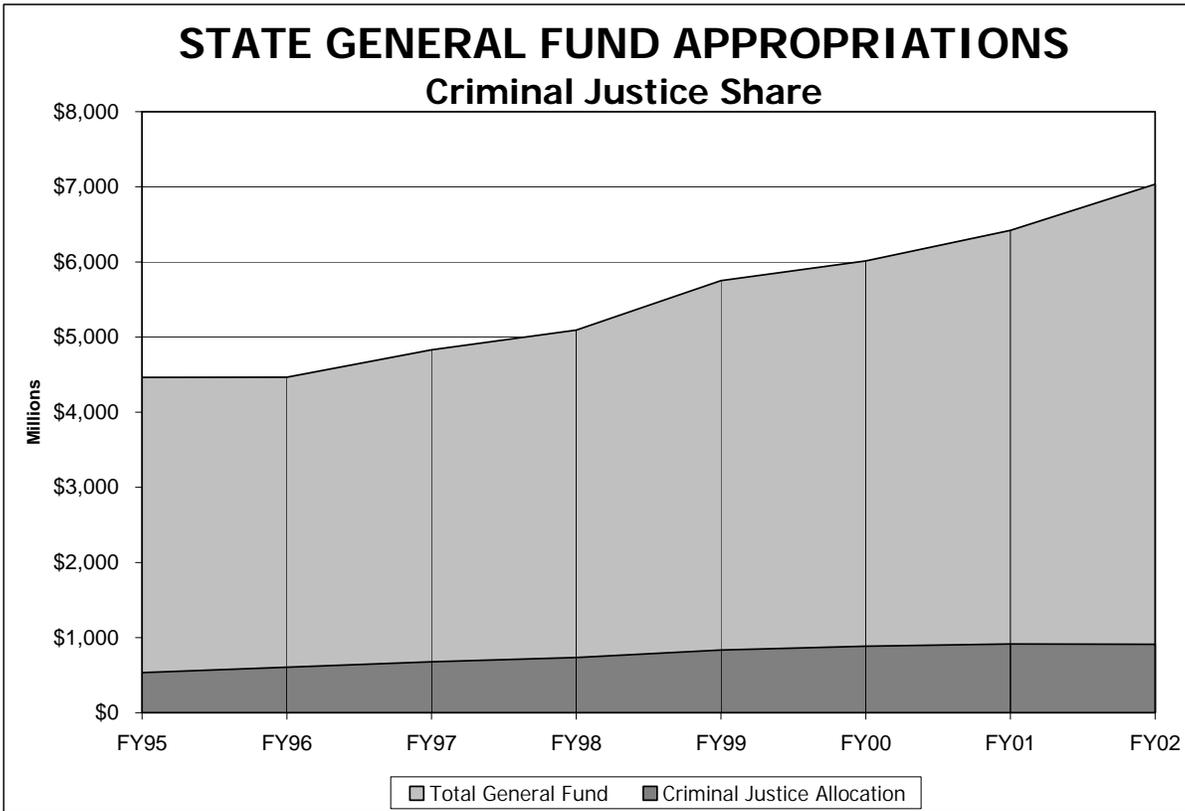

## RESOURCE ALLOCATION TO STATE CRIMINAL JUSTICE AGENCIES

Table 1-24 displays the level of funding provided to major state level criminal justice agencies for the eight years surveyed. These figures represent only General Fund allocations. Many agencies receive significant levels of funding through sources other than the State General Fund. During the period from 1995 through 2002 total state appropriations increased by 57.7 percent. The percentage of the total devoted to criminal justice ranged from 12 percent in 1995 to 13 percent in 2002. The largest percentage appropriated to criminal justice occurred in 2000 at 15 percent. The change in state supported General Fund resources varied amongst the various entities.

	<b>FY1995</b>	<b>FY1996</b>	<b>FY1997</b>	<b>FY1998</b>	<b>FY1999</b>	<b>FY2000</b>	<b>FY2001</b>	<b>FY2002</b>

Administrative Office of the Courts	\$96,209,800	\$105,272,700	\$116,784,200	\$128,811,000	\$140,326,900	\$145,270,200	\$152,681,800	\$153,991,400
Total Criminal Justice	\$533,363,700	\$603,632,000	\$677,424,800	\$735,186,500	\$831,571,400	\$882,489,300	\$913,909,900	\$910,054,800
Percent of total Appropriation for Criminal Justice	12%	14%	14%	14%	14%	15%	14%	13%

The entity with the largest percentage increase over the eight-year period was the Department of Public Safety with a 105.4 percent increase. The only department to show a decrease was the Board of Executive Clemency with a reduction of 23.3 percent over the same period. Other entities showing increases included the Department of Corrections (71.5 percent), the Attorney General's Office (30.0 percent), Department of Juvenile Corrections (82.8 percent) and the Administrative Office of the Courts (60.1 percent).

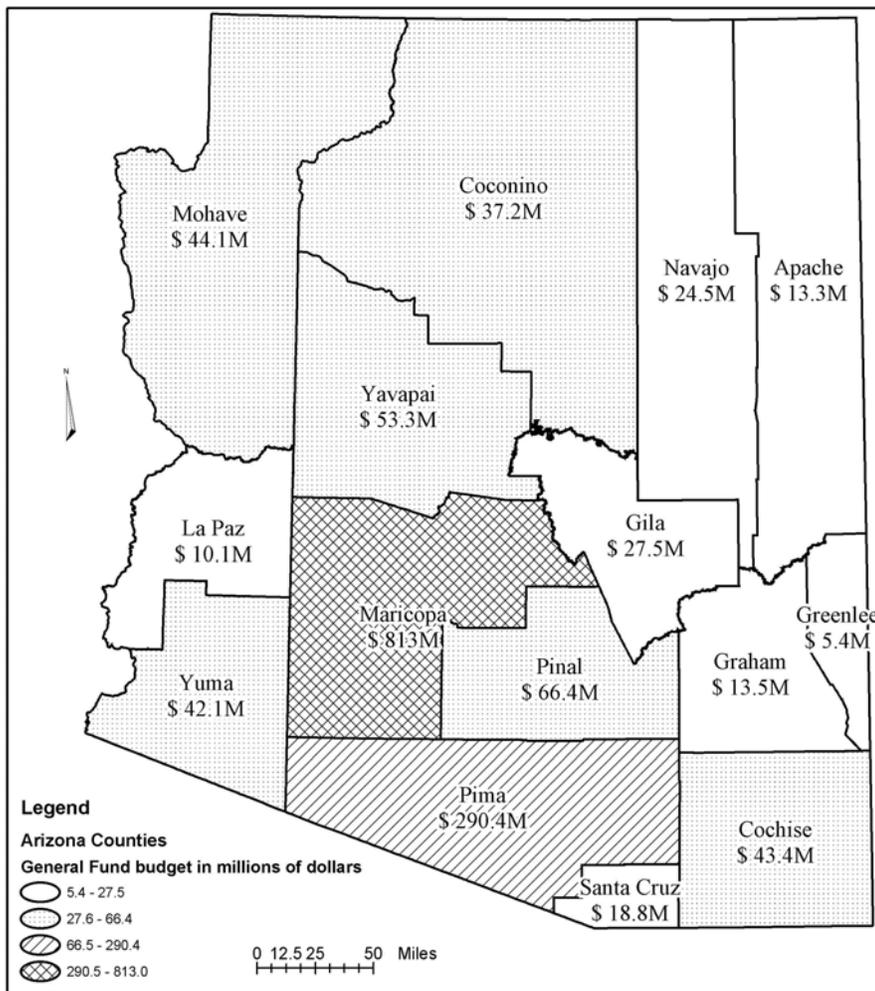

The percentage "share" of total appropriations devoted to criminal justice increased the most between 1995 and 1996. From 1996 through 1999, it remained at 14 percent increasing to 15 percent in 2000 and returning to 14 percent in 2001 before dropping to 13 percent in 2002.

**FIGURE 1-10**

Figure 1-10 provides a picture of the increase in both the total General Fund and that portion of the General Fund which is dedicated to criminal justice. Arizona's General Fund appropriations totaled \$7,034,601,100 in 2002 and 12.9 percent of those funds or \$910,054,800 was dedicated to criminal justice. From 1995 through 2002, the General Fund increased 57.7 percent relative to a 70.6 percent increase in spending on criminal justice.

## County General Fund Budget: 2002

This map shows the 2002 General Fund budgets of Arizona counties in millions of dollars. Darker shading indicates a larger budget. Maricopa county is alone in the highest category with a budget of \$813 million. Pima county occupies the second highest category with a General Fund budget of \$290.4 million. The remaining county budgets range from a low of \$5.4 million in Greenlee county to \$66.4 million in Pinal county.

Figure 1-11 displays total General Fund budgets for 2002 for each county. Table 1-22 presents data regarding the total General Fund budgets for all fifteen counties and the state of Arizona from 1995 to 2002. Total county General Fund budgets increased 42.4 percent from \$1,055,472,011 in 1995 to \$1,502,931,248 in 2002. During this same time period, the state General Fund increased 57.7 percent from \$4,461,589,100 in 1995 to \$7,034,601,100 in 2002. Combined the state General Fund and the county General Funds increased 54.7 percent. Coconino County showed the largest increase in their General Fund budget, increasing 53.6 percent, while Greenlee County showed the smallest increase, of 2.9 percent.

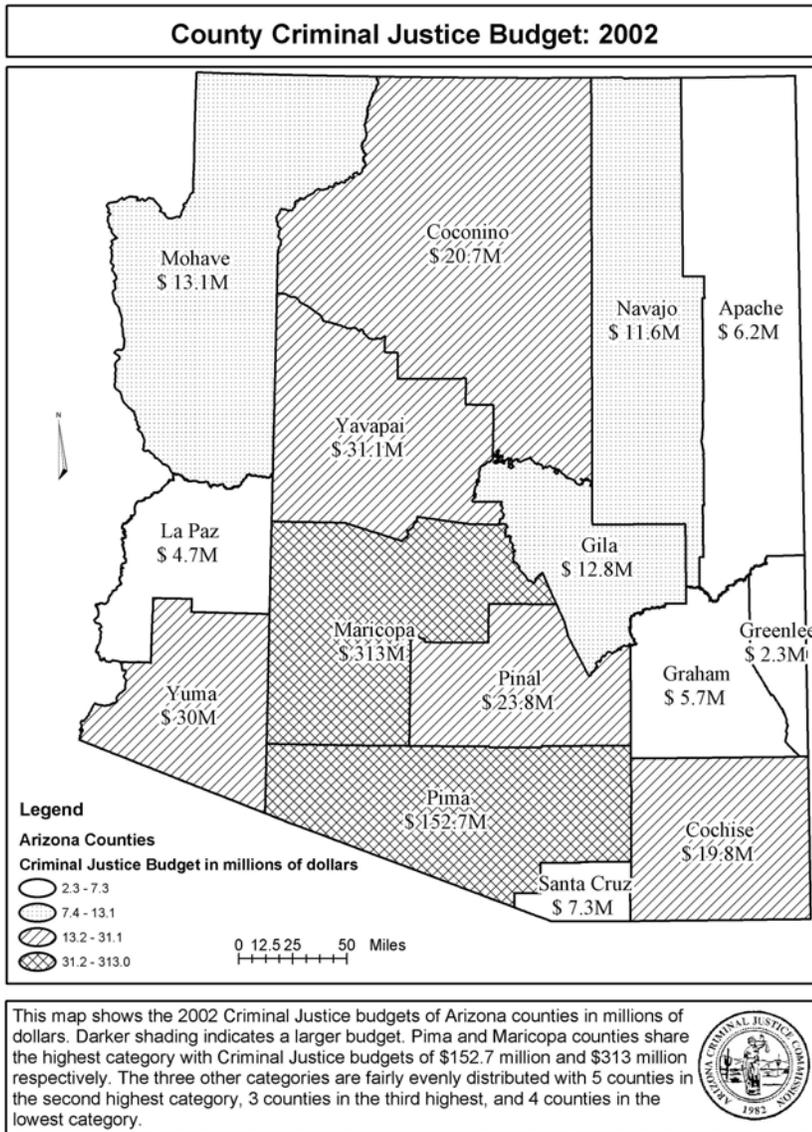

Figure 1-12 displays the total amount of general funds that each county devoted to criminal justice in 2002. Table 1-23 presents information on the total amount spent from each county General Fund on county level criminal justice and the total amount spent on state level criminal justice from the state General Fund from 1995 to 2002. This amount includes jail excise taxes for Coconino, La Paz, Maricopa, Yavapai and Yuma counties. The total amount spent by counties on criminal justice increased from \$423,997,775 in 1995 to \$654,856,855 in 2002, an increase of 54.4 percent. The state General Fund increased the amount spent on state level criminal justice from \$533,363,700 in 1995 to \$910,054,800 in 2002. Mohave County showed the smallest increase in spending on criminal justice, increasing 35.9 percent, while Graham County showed the largest increase at 147.3 percent.

\*Totals include Jail Excise Taxes where applicable.

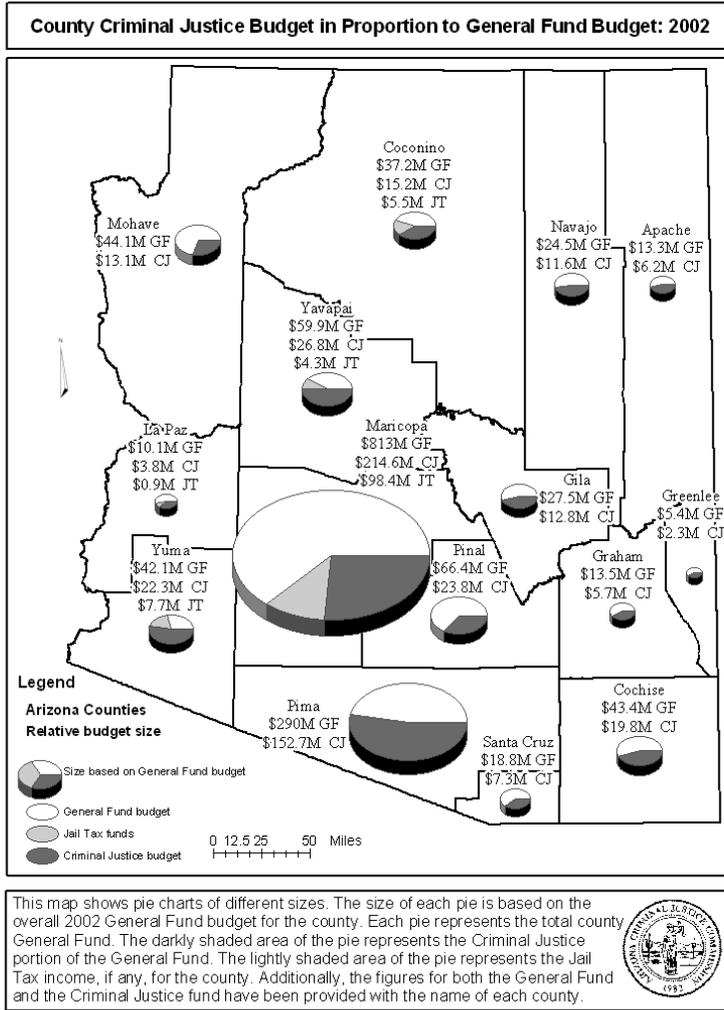

Figure 1-13 provides a graphical representation of the percentages that each county spent on criminal justice from the General Fund in 2002. Table 1-24 shows the percentage each county and the state devoted to criminal justice spending from the General Fund from 1995 to 2002. The counties spent a combined total of 40.2 percent on county level criminal justice in 1995 and 43.6 percent in 2002. The state spent 12.0 percent of the state General Fund on state level criminal justice in 1995 and 12.9 percent in 2002. In 1995, Graham County devoted the lowest percentage at 23.4 percent and Yuma County devoted the highest percentage at 52.3 percent. In 2002, Mohave County spent the lowest percentage of the General Fund on criminal justice spending 29.7 percent and Yuma County spent the highest percentage at 71.3 percent.

## EXCISE TAXES SUPPORTING JAILS

Table 1-28 displays the amount of excise taxes collected by each county for jail districts in Arizona. These districts were created according to A.R.S. § 48-4021 and 4022. This law, created in 1989, made it possible for County Board of Supervisors to pass a resolution placing a jail district excise tax on a ballot for voters in that county.

<b>TABLE 1-28: JAIL TAX COLLECTED IN ARIZONA THROUGH EXCISE TAXES FY1995 - FY2001</b>								
	<b>FY1995</b>	<b>FY1996</b>	<b>FY1997</b>	<b>FY1998</b>	<b>FY1999</b>	<b>FY2000</b>	<b>FY2001</b>	<b>FY2002</b>

<b>Statewide Total</b>		\$2,966,275	\$6,309,651	\$11,055,446	\$46,478,526	\$104,073,982	\$114,823,330	\$116,691,947

Data from FY1995 to FY2001 was provided by the Arizona Department of Revenue.

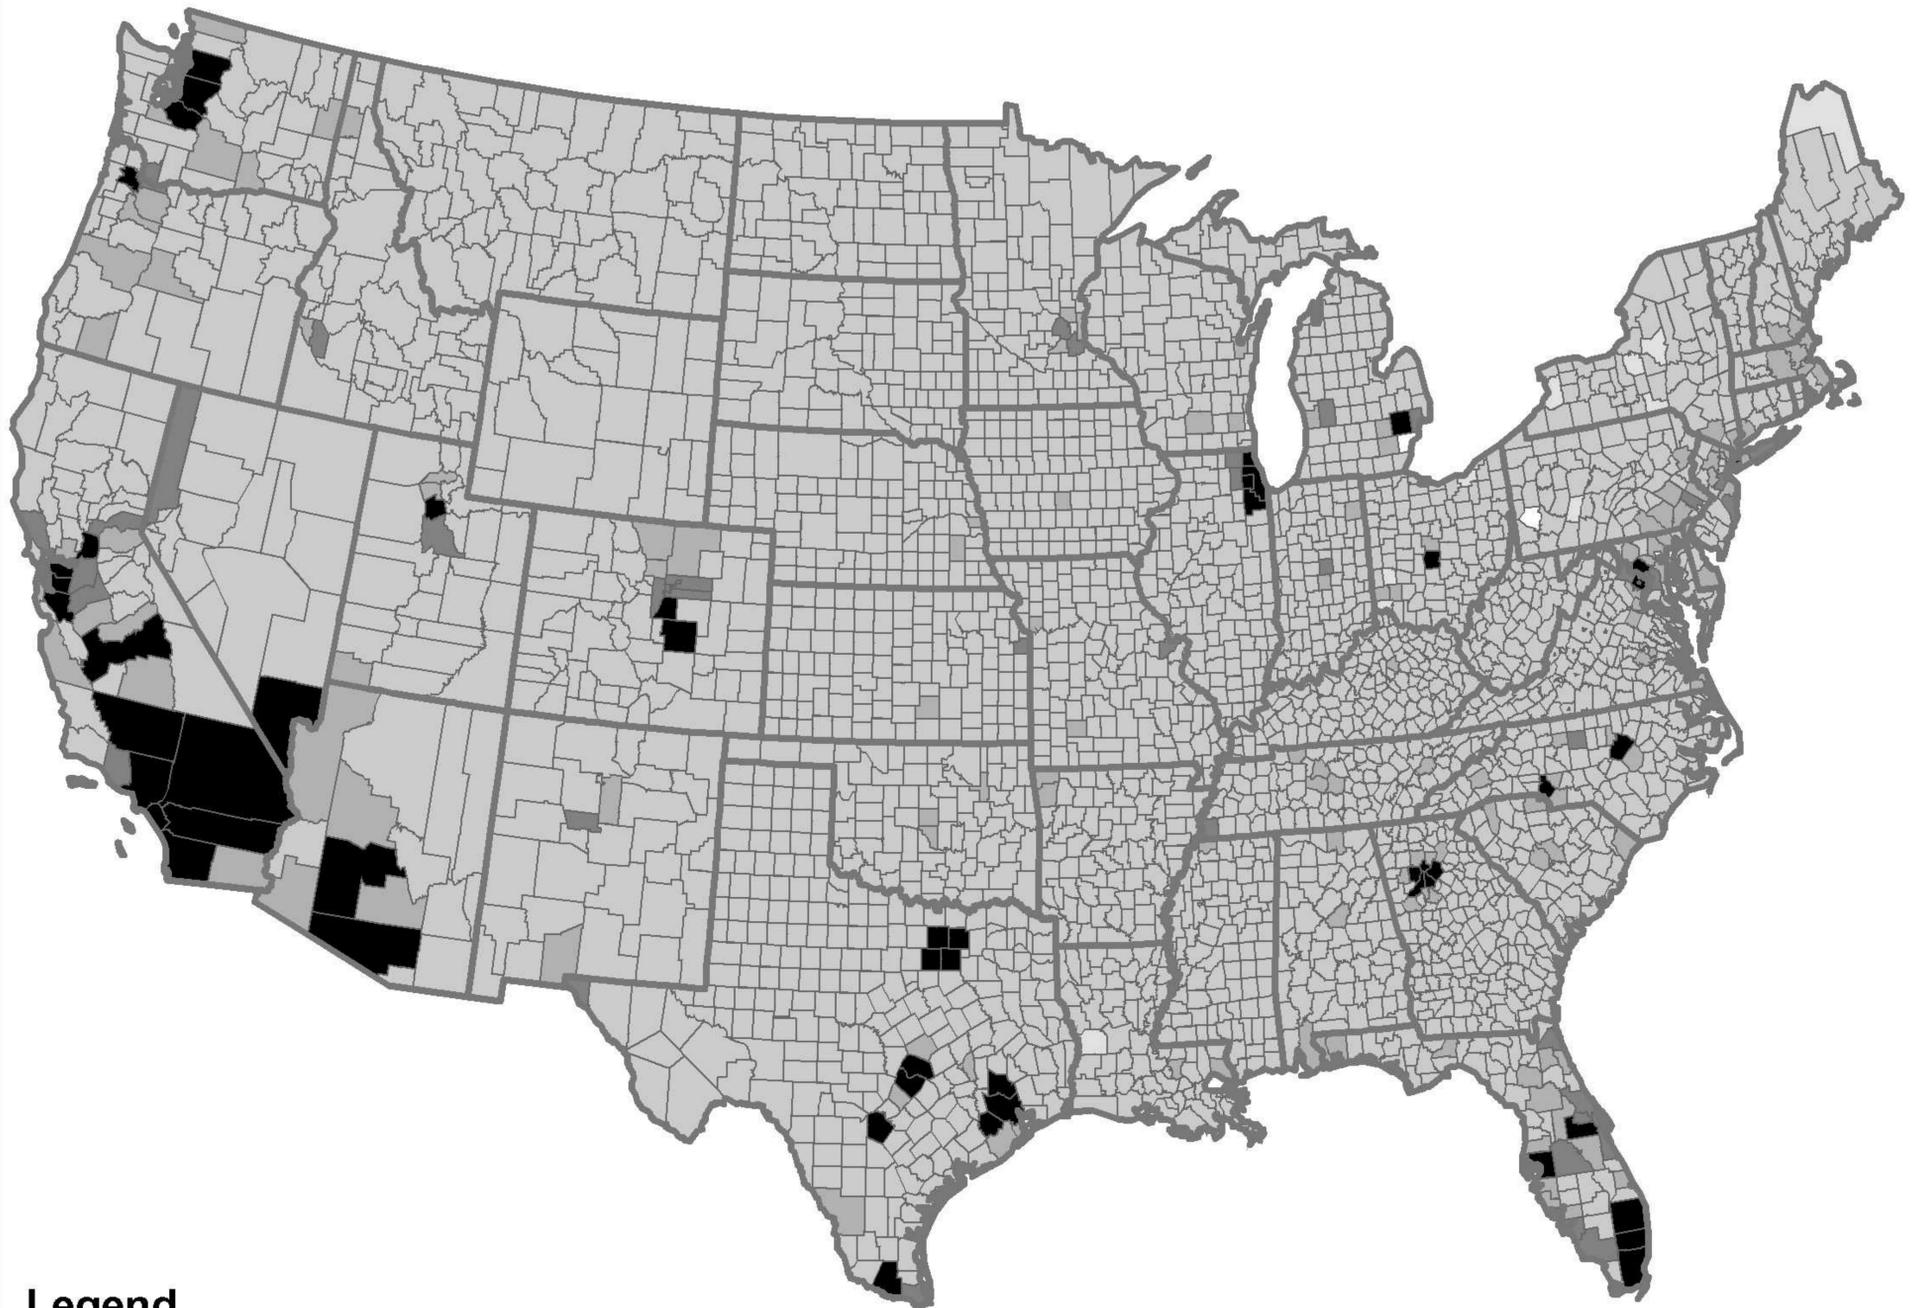

In FY1995, La Paz County created a jail district to raise money for the construction and maintenance of jails. By FY2001, Coconino, Maricopa, Yavapai, and Yuma counties also used this method of funding jail construction and maintenance. FY1996 excise taxes for jail districts totaled in \$2,966,275 statewide. This number increased to \$11,055,446 in FY1998 when Coconino County added the excise tax and \$46,478,526 the next year when Maricopa County took advantage of this statutory provision. By FY2002, over 116 million was made available to the criminal justice system through the excise taxes for jails and represents a 1.6 percent increase from FY2001 to FY2002. As not all counties have created jail districts to collect funds through excise taxes, and those that have do not use the revenue collected for the same purposes, these funds, and other revenue sources, direct comparison of county General Fund data is difficult. In order to mitigate this difficulty and allow for limited comparison of General Fund data, jail excise tax information has been included in the General Fund tables presented in the *2003 White Paper*.

## ***FINDINGS***

- The population of the state of Arizona increased 29.4 percent from 1995 to 2002.
- The at-risk population group (ages 16-24) increased 33.7 percent from 1990 to 2000.
- The total DPS budget increased 105.4 percent from 1995 to 2002.
- The number of calls for service to DPS increased 257.0 percent from 1995 to 2002.
- In the Arizona Superior Courts, expenditures increased 49.4 percent from 1995 to 2002.
- Criminal cases filed in the Arizona Superior Courts increased 46.7 percent from 1995 to 2002, while criminal case dispositions increased 65.4 percent.
- In the Arizona Justice Courts, the total cases filed increased 21.9 percent, while the total number of disposed cases increased 21.2 percent from 1995 to 2002.
- In the Arizona Municipal Courts, criminal traffic cases filed increased 27.7 percent, while criminal traffic cases disposed increased 33.2 percent from 1995 to 2002.
- Total case filings in the Arizona Municipal Courts increased 26.6 percent from 1995 to 2002, while total dispositions increased 36.8 percent.
- Total referrals of juveniles in the state of Arizona decreased 10.9 percent from 1996 to 2002.
- The number of females versus males referred increased from 28.8 percent female and 71.2 percent male in 1996 to 32.1 percent female and 67.9 percent male in 2002.
- The percent of younger juveniles (ages 8-12) increased from 9.0 percent in 1996 to 10.0 percent in 2002.
- Juvenile Status Offenses decreased in 13 of the 15 counties.
- From 1996 to 2002, the number of adult probationers in Arizona increased 32.1 percent and the number of juvenile probationers increased 35.1 percent.
- The Department of Corrections budget increased 65.6 percent from 1995 to 2002 which is 7.6 percent greater than the 57.7 percent increase experienced for all criminal justice state agencies over the same period..
- From 1995 to 2002, the total inmate population in DOC increased 38.5 percent.
- The average time served in DOC increased from 28 months to 37 months for males and from 21 months to 25 months for females from 1995 to 2002.
- Total state criminal justice appropriations to state agencies increased 57.7 percent relative to an overall general fund increase of 70.6 percent from 1995 to 2002.
- In 1995, La Paz County was the only county that had an excise tax devoted to county jail building and maintenance. By 2002, Coconino, La Paz, Maricopa, Yavapai and Yuma utilized this form of funding for jails, bringing in a total of \$116,691,947.

This map shows the absolute change in population experienced by US counties between the 1990 and 2000 census. Change is measured in standard deviations above and below the mean increase of 10,417 persons. The standard deviation was 38,815 persons. Arizona, Southern California, and the Las Vegas, Nevada area show marked increases in population with multiple counties at more than three standard deviations above the mean.

0 125 250 500 Miles

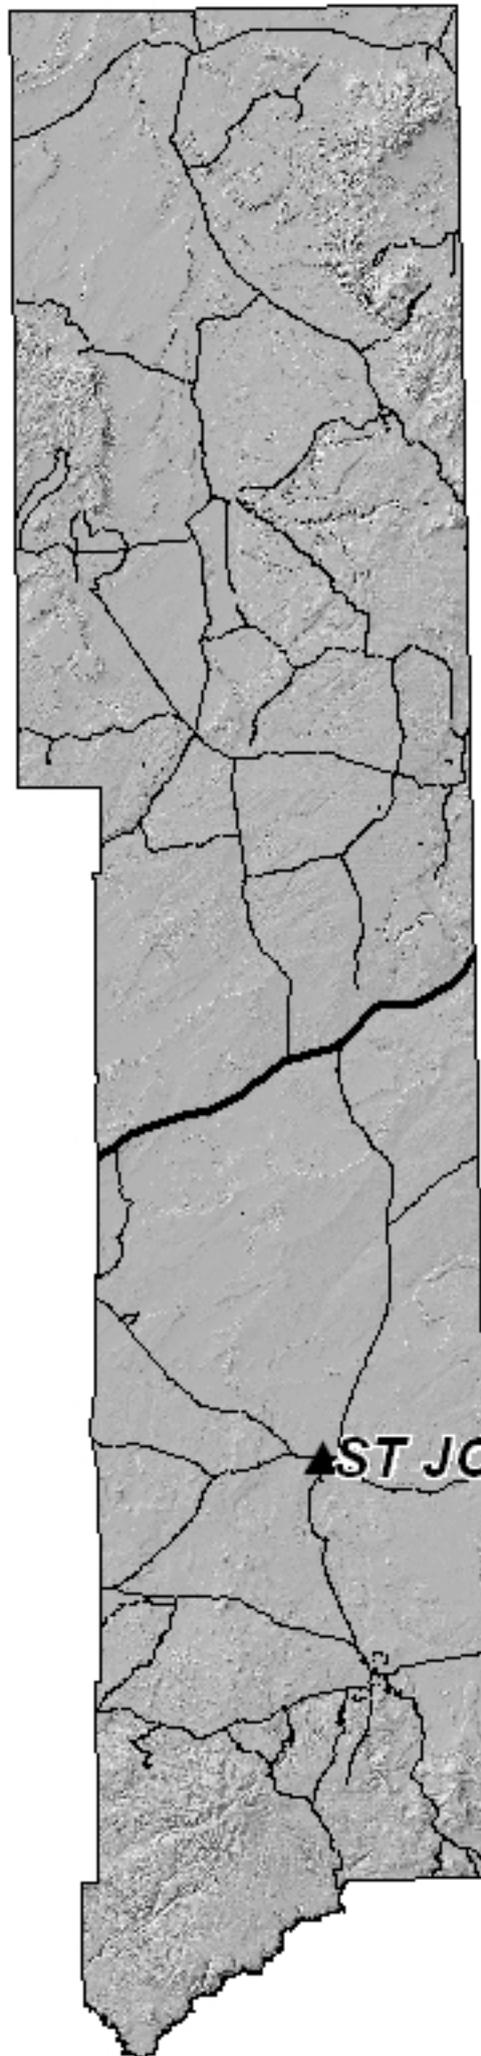

This map shows the percent change in population experienced by US counties between the 1990 and 2000 census. The darker a county appears, the larger the county population change. The Mid West and Appalachian chain counties experienced negative and very low percentage change. At the same time, the South West and South had large percentage increases between 1990 and 2000. In Arizona, no county experienced negative growth and four counties fell into the highest percentage change category.

With 11,216 square miles, Apache County is the 3rd largest county by area in Arizona. Apache County experienced a 9.9 percent growth in population between 1990 and 2000, making it the 10th largest county in the state. Although county population only expanded by 0.3 percent from 2001 to 2002, reported Part I Offenses in the area decreased by 4.5 percent for the same time period. Approximately 46.3 percent of the total county General Fund budget is dedicated to criminal justice functions.

## COUNTY DATA

### APACHE COUNTY DATA

This portion of the *2003 White Paper* will present available data regarding population, the levels of reported crime and numbers of arrests for Apache County. In addition, this chapter will provide information, where available, on the activities of county-level criminal justice agencies and the level of resources provided to them. Finally, this chapter will provide data on the activities of the Apache County Superior Court, and total countywide data on the activities of justice and municipal courts.

#### POPULATION

Table 2-1 shows the actual or estimated population of Apache County from 1995 through 2002. The table shows that the population for the Apache County has grown from 64,300 residents in 1995 to 70,105 in 2002, which represents a 9.0 percent increase over the eight-year period. In 2002, 1.3 percent of the population of the state of Arizona resided in Apache County.

Population information provided by the Arizona Department of Economic Security.

Table 2-2 reflects the number of males and females, ages 16 to 24 in 1990 and 2000 for Apache County. This breakdown represents the segment of the population considered most at-risk within the criminal justice system. From 1990 to 2000, the total number of people ages 16 to 24 decreased 14.1 percent. The male population age 18 to 24 decreased 10.8 percent, while the female population decreased 6.5 percent in the same age category.

## APACHE COUNTY REPORTED CRIME DATA

Table 2-3 shows data regarding the number of Part I crimes reported by law enforcement agencies in Apache County. The data shows that the number of Part I offenses reported in Apache County fluctuated from 1995 to 2002. The number of Part I Violent Offenses increased while the number of Part I property crimes decreased. The number of murders decreased over the eight years reported. The number of robberies decreased, however, the number of aggravated assaults increased from 55 in 1995 to 101 in 2002, an increase of 83.6 percent.

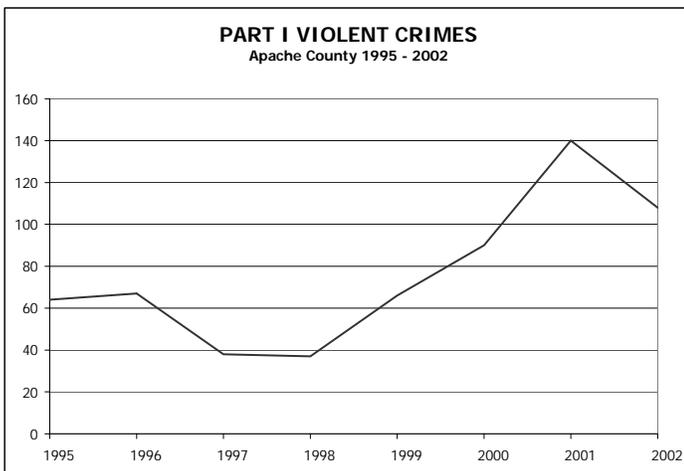

In Part I property crime, burglaries slightly increased during the eight-year period while larceny-thefts decreased. Auto thefts remained consistent throughout the years 1995 to 2002.

In 2002, 0.4 percent of all the Part I Violent Offenses reported in the state of Arizona were reported in Apache County, as were 0.2 percent of all the Part I Property offenses. Figures 2-1 and 2-2 chart Part I offenses over the eight-year period.

**FIGURE 2-1**

**FIGURE 2-2**

## APACHE COUNTY ARREST DATA

Tables 2-4 and 2-5 present data regarding the number of arrests for adults and juveniles as reported by law enforcement agencies in Apache County for the UCR. The number of adults arrested in Apache County for Part I crimes fluctuated during the years 1995 to 2002, with the largest increase in 1999 (47.5 percent). The number of adults arrested for drug offenses experienced a decrease from the years 1995 to 1997, followed by a notable increase of 105.7 percent in 1998. In 1999 there was a decrease of 51.4 percent while increasing to 161 drug offense arrests in 2002. The number of adults arrested for all Part II offenses has increased 24.5 percent since 1995. In 2002, 0.3 percent of all the adults arrested for Part I crimes in Arizona were arrested in Apache County.

Overall, juvenile arrests in Apache County for Part I crimes decreased 37.3 percent in the eight-year period. The number of juvenile arrests for Part I Violent Offenses declined 40.0 percent during that same period. The number of juveniles arrested for aggravated assault has decreased. The number of juveniles arrested for drug offenses over this time period fluctuated from year-to-year. In 2002, 0.5 percent of all juveniles arrested in Arizona for Part I crimes were arrested in Apache County.

## ***RESOURCE ALLOCATION TO APACHE COUNTY CRIMINAL JUSTICE AGENCIES***

Table 2-6 provides information regarding the allocation of General Fund dollars to criminal justice agencies in Apache County. From 1995 to 2002, the Apache County General Fund budget increased 37.5 percent while the total allocation to criminal justice agencies increased 30.7 percent. In 1995, 34.8 percent of the General Fund budget was allocated to criminal justice agencies. The percentages showed growth over the next five years rising to a high of 43.2 percent in 2000, followed by a drop to 42.8 percent in 2002. Over the eight-year period the County Attorney's budget increased 30.7 percent, the Superior Court increased 19.9 percent, and the Public Defender's budget increased 16.3 percent. The largest increase was noted in the Juvenile Court/Probation budget, with an increase of 175.8 percent over the eight-year period. The Adult Probation budget has increased by 33.6 percent from 1995 to 2002.

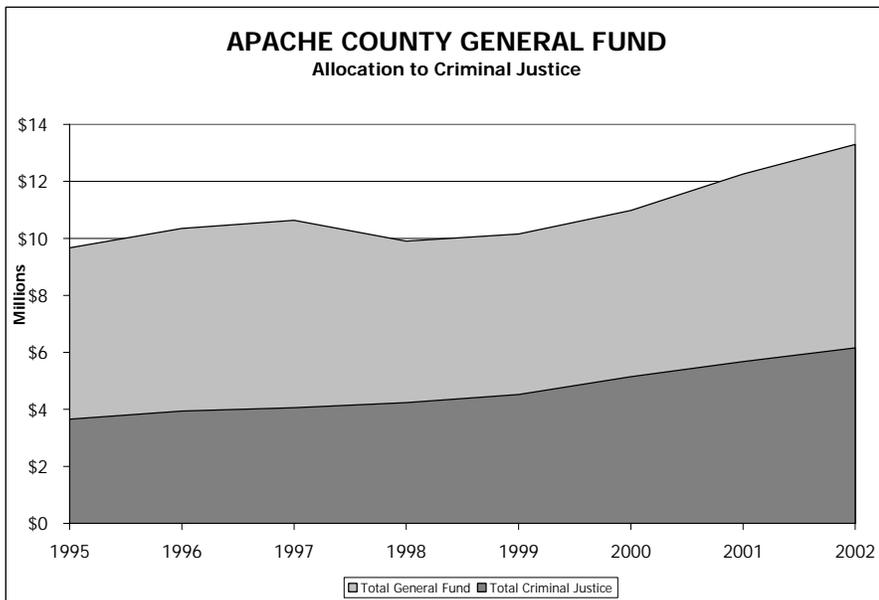

**TABLE 2-6: APACHE COUNTY

% of General Fund Budget	37.8%	38.1%	38.2%	42.8%	44.6%	46.9%	46.3%	46.3%

(1) Total Gen. Fund figures are shown net on budgeted "unanticipated expenditures"

(2) Jail Budget figures are the amounts transferred to the Jail Dist. for Gen. Fund maintenance of effort

Figure 2-3 displays that in 1995, the County Attorney's Office received 6.2 percent of the General Fund budget, while in 2002 the County Attorney Office received 5.9 percent. The Sheriff's Office received 10.0 percent of the General Fund budget in 1995 and 16.5 percent in 2002. Adult Probation received 2.3 percent of the General Fund budget in 1995 as well as in 2002. The Public Defender received 2.8 percent of the general budget fund in 1995 and 2.4 percent in 2002.

**FIGURE 2-3**

## **SHERIFF**

Table 2-7 contains basic data regarding the budget and personnel resources available to the Apache County Sheriff's Office. The table shows that the budget has grown 124.7 percent from 1995 to 2002. Personnel numbers were not available for 1995 to 1998, but from 1999 to 2002 the total number of personnel remained at 80 total personnel including 36 sworn personnel and 20 detention personnel.

Table 2-10 presents selected workload and activity data as reported by the agency. No data are available for the years prior to 1997. Beginning in 1997 total cases submitted for prosecution resulted in an increase from 773 in 1997 to 857 in 2002, or 10.9 percent. The number of adult felony cases submitted for prosecution increased 38.6 percent in the six years from 1997 to 2002. Adult felony prosecutions and juvenile prosecutions varied remarkably during the six-year period from 1997 to 2002. The number of adult felony prosecutions show an increase from 286 in 1997 to 426 in 2002, or 49 percent, while juvenile felony prosecutions decreased from 114 in 1997 to 66 in 2002, or 42.1 percent.

Table 2-11 presents data regarding conviction data for the Apache County Attorney's Office. No data was reported for 1995 and 1996. Beginning in 1997, information on attorney's office convictions was retrievable and shows an increase in total number of cases submitted for prosecution from 773 in 1997 to 857 in 2002, an increase of 10.9 percent. The total number of cases submitted for prosecution peaked in 2000 at 1,022. The total cases resulting in conviction remained consistent during the eight-year period, peaking only slightly in 2000 in alignment with the growth in total number of cases submitted. The data also shows that the majority of the people were convicted through plea bargain rather than by trial.

Table 2-14 provides information regarding the disposition of criminal defendants in Apache County Superior Court. The table shows that the number of defendants sentenced to the Department of Corrections has fluctuated over the eight-year period with the largest increase occurring in 1999. Since 1995, dispositions to the Department of Corrections have grown from 26 to 43 in 2002, or an increase of 65.4 percent. The increase noted in dispositions to the Department of Corrections also appears in many of the other disposition categories with large increases occurring in county jail, probation and DOC, and probation and monetary penalty. The total disposed category increased from 156 in 1995 to 379 in 2002, a 142.9 percent increase.

### **JUVENILE REFERRAL ACTIVITY**

Table 2-17 gives a breakdown of juvenile referral activity in Apache County from FY1996 to FY2002. Data from FY1995 are unavailable. Total referrals from FY1996 to FY2002 decreased 48.3 percent. The percentage of females versus males referred increased during this time. In FY1996, 31.5 percent of referrals were female and 68.5 percent were male, whereas in FY2002 33.0 percent of referrals were female and 67.0 percent were male. The percentage of younger juveniles referred decreased between FY1996 and FY2002. In FY1996, 12.1 percent of those referred were between 8 and 12 and 87.9 percent of those referred were between 13 and 17. In FY2002, 7.6 percent of those referred were between 8 and 12 and 92.4 percent of those referred were between 13 and 17.

<b>Population Growth 2001 – 2002:</b>	2.1%

\*Percent change in Part I arrests reported from previous year

With 6,215 square miles, Cochise County is the 8th largest county by area in Arizona. Cochise County experienced a 29.4 percent growth in population between 1990 and 2000, making it the 8th largest county in the state. The county population and the reported Part I Offenses both expanded by 2.1 percent from 2001 to 2002. Approximately 45.6 percent of the total county General Fund budget is dedicated to criminal justice functions.

## COCHISE COUNTY DATA

This portion of the *2003 White Paper* will present available data regarding population, the levels of reported crime and numbers of arrests for Cochise County. In addition, this chapter will provide information, where available, on the activities of county-level criminal justice agencies and the level of resources provided to them. Finally, this chapter will provide data on the activities of the Cochise County Superior Court, and total countywide data on the activities of justice and municipal courts.

### POPULATION

Table 2-20 shows the actual or estimated population of Cochise County from 1995 through 2002. The table shows that the population for Cochise County has grown from 112,300 residents in 1995 to 124,040 in 2002, which represents a 10.5 percent increase over the eight-year period. In 2002, 2.3 percent of the population of the state of Arizona resided in Cochise County.

% of General Fund Budget	40.1%	42.3%	43.3%	45.0%	44.8%	45.7%	46.0%	45.6%

Notes:

1. Data are from the adopted budget for each fiscal year
2. Jail transportation and search & rescue expenses are included with the Sheriff
3. Law Enforcement includes the Sheriff, Jail, and Jail Medical
4. Total Criminal Justice includes all categories except those in Law Enforcement
5. Percentage is calculated by combining the Law Enforcement and Total Criminal Justice amounts

In 1995, the County Attorney received 3.2 percent of the General Fund budget, while in 2002 the County Attorney Office received only slightly more at 3.4 percent. The Sheriff's Office received 11.2 percent of the General Fund budget in 1995 and 13.9 percent in 2002. Juvenile Court/Probation received 2.8 percent of the General Fund budget in 1995 and 3.9 percent in 2002. The Public Defender received 4.9 percent of the General Fund budget in 1995 and 4.8 percent in 2002. Law Enforcement was allotted the majority of the General Funds in the budget, receiving 18.6 percent in 1995 and 21.6 percent in 2002.

**FIGURE 2-6**

## SHERIFF

Table 2-26 contains basic data regarding the budget and personnel resources available to the Cochise County Sheriff's Office. The table shows that the budget has grown 74.9 percent from 1995 to 2002. From 1995 to 2002 the total number of personnel grew from 175 to 187 or an increase in eight years of 6.9 percent. The number of sworn personnel has grown 13.4 percent from 67 in 1995 to 76 in 2002, while the number of detention personnel has not changed over the same eight-year period.

Table 2-27 presents selected workload and activity information for the Cochise County Sheriff's Office, as provided by the agency. The data shows that total calls for service decreased a 6.9 percent from 1996 to 2002. Data on the number of emergency calls was not available for the years 1995 to 1998, but increased remarkably from 1999 to 2002 with a 322.2 percent increase. The total Part I crimes reported to the agency rose from 1,331 in 2001 to 2,092 in 2002, or an increase of 57.2 percent.

The average daily jail population in 1995 was 162 inmates increasing to 224 in 2002, an increase of 38.3 percent. The average length of stay was not reported during the eight-year period from 1995 to 2002. Maximum jail capacity did not change from 1995 to 2002, remaining at 160 beds.

### ***SUPERIOR COURT***

Table 2-31 contains data regarding expenditures in the Cochise County Superior Court. The data provided by the Administrative Office of the Court shows that total expenditures for the court remained consistent from 1995 to 2002, with only a slight decrease of .6 percent over the same period. The greatest decrease was in the area of state programs, with expenditures declining from \$338,761 in 1995 to \$43,042 in 2002, or a decrease of 87.3 percent.

<b>TABLE 2-31: SUPERIOR COURT EXPENDITURE DATA 1995-2002</b>

Table 2-32 contains data describing the activities of the Cochise County Superior Court. The data shows that the total number of adult criminal cases filed has increased 12.6 percent from 1995 to 2002, while the overall number of county cases filed has decreased 5.8 percent. In 1995, adult criminal cases made up 21.5 percent of the courts caseload, while in 2002 this proportion rose to 25.7 percent. The number of total criminal trials in Cochise County Superior Court has decreased from 40 in 1995 to 28 in 2002 or a drop of 30 percent. The total numbers of disposed cases in the Cochise County Superior Courts have increased from 2,325 in 1995 to 3,714 in 2002, or an increase of 59.7 percent. Over this eight-year period, the number of disposed criminal cases increased from 789 in 1995 to 922 in 2002, or a 16.9 percent increase.

Table 2-33 provides information regarding the disposition of criminal defendants in Cochise County Superior Court. The table shows that the number of defendants sentenced to the Department of Corrections has doubled over the eight-year period with an increase from 124 in 1995 to 248 in 2002. The dramatic increase noted in dispositions to the Department of Corrections also appears in probation and county jail with the number rising from 68 in 1995 to 385 in 2002. The total number of disposed cases nearly doubled during this time period with a rise from 614 in 1995 to 1,039 in 2002.

## MUNICIPAL COURTS

Table 2-35 shows the activity of the Cochise County Municipal Courts. As data are not available for cases involving local non-criminal ordinances and initial appearances for 1995, comparison utilizing 1995 data is not possible. From 1996 to 2002, the number of criminal case filings increased 30.6 percent and the number of criminal case dispositions increased 31.3 percent. During this same time period, local non-criminal ordinance filings increased by 51.7 percent and dispositions increased 44.6 percent. Traffic cases rose in activity from 1996 to 2002 with civil traffic case filings increasing by 42.6 percent and criminal traffic case filings increasing by 12.9 percent. Civil traffic dispositions increased by 41.9 percent and criminal traffic dispositions increased 12.4 percent from 1995 to 2002.

Over this time period, the number of Initial Appearances dropped sharply with 833 hearings reported in 1996 and only 76 held in 2002.

### **JUVENILE REFERRAL ACTIVITY**

Table 2-36 gives a breakdown of juvenile referral activity in Cochise County from FY1996 to FY2002. Data from FY1995 are unavailable. Total referrals from FY1996 to FY2002 decreased 31.1 percent. The percentage of females versus males referred increased during this time. In FY1996, 30.0 percent of referrals were female and 70.0 percent were male, whereas in FY2002 30.4 percent of the referrals were female and 69.6 percent were male. The percentage of younger juveniles referred increased between FY1996 and FY2002. In FY1996, 8.9 percent of those referred were between 8 and 12 and 91.1 percent of those referred were between 13 and 17. In FY2002, 11.4 percent of those referred were between 8 and 12 and 88.6 percent of those referred were between 13 and 17.

Data received from AOC

Note: Data was taken from the FY2002 extract of JOLTS. As data was re-run for previous fiscal years, Total Referral numbers may not match the Total Referrals in the "Juveniles Processed" publication for the respective fiscal year.

Table 2-37 shows the juvenile referral activity in Cochise County from FY1996 to FY2002. Data from FY1995 are unavailable. Juveniles referred for felonies against person increased 16.7 percent from FY1996 to FY2002. Over this same period of time, referrals for felonies against property decreased 45.2 percent, while misdemeanors charges for property crimes decreased 33.5 percent. Total referrals for drug offenses decreased slightly over this time period with a drop of 2.1 percent. There was a large drop in referrals for status offenses with a decrease of 992 in FY1996 to 434 in FY2002.

<b>Population Growth 2001 – 2002:</b>	2.2%

\*Percent change in Part I arrests reported from previous year

With 18,608 square miles, Coconino County is the largest county by area in Arizona. Coconino County experienced a 28.6 percent growth in population between 1990 and 2000, making it the 7th largest county in the state. Although county population only expanded by 2.2 percent from 2001 to 2002, reported Part I Offenses in the area decreased by 7.7 percent for the same time period. Approximately 55.7 percent of the total county General Fund budget is dedicated to criminal justice functions.

## COCONINO COUNTY DATA

This portion of the *2003 White Paper* will present available data regarding population, the levels of reported crime and numbers of arrests for Coconino County. In addition, this chapter will provide information, where available, on the activities of county-level criminal justice agencies and the level of resources provided to them. Finally, this chapter will provide data on the activities of the Coconino County Superior Court, and total countywide data on the activities of justice and municipal courts.

### POPULATION

Table 2-39 shows the actual or estimated population of Coconino County from 1995 through 2002. The table shows that the population for the Coconino County has grown from 109,400 residents in 1995 to 125,420 in 2002, which represents a 14.6 percent increase over the eight-year period. In 2002, 2.3 percent of the population of the state of Arizona resided in Coconino County.

## COCONINO COUNTY REPORTED CRIME DATA

Table 2-41 shows data regarding the number of Part I crimes reported by law enforcement agencies in Coconino County. These are total offenses reported for the entire county. The data shows that the number of Part I offenses reported in Coconino County decreased from 1995 to 1999, followed by an increase over the next three years. The number of Part I Violent Offenses increased from 490 in 1995 to 703 in 2002. This represents a 46.5 percent increase over this time period. The number of murders decreased from nine in 1995 to two in 2002. Robberies increased 35.3 percent from 1995 to 2002. The number of aggravated assaults increased from 398 in 1995 to 548 in 2002 resulting in a 41.5 percentage increase.

In total Part I Property Offenses there was an 11.0 percentage decrease from 1995 to 2002. The only Property Offenses that experienced a decrease was in larceny-theft with a drop of 15.2 percent and arson which decreased 5.4 percent. Burglaries fluctuated from a low of 732 in 1999 to a high of 1,067 in 1996. Also, during the eight-year period auto thefts increased by 27.0 percent.

Table 2-43 demonstrates that juvenile Part I crimes in Coconino County experienced a 9.5 percent decrease over the eight-year period between 1995 and 2002. Only one Violent Offense category saw an increase over this time period. Juveniles arrested for robbery went from five in 1995 to seven in 2002. Similarly, only one Property Offense category reviewed resulted in an increase over this eight-year period of time. The number of juveniles arrested for the charge of larceny-theft rose from 348 in 1995 to 406 in 2002, or a 16.7 percent increase. In 2002, 3.8 percent of all juveniles arrested in Arizona for Part I crimes were arrested in Coconino County.

# SHERIFF

Table 2-45 contains basic data regarding the budget and personnel resources available to the Coconino County Sheriff's Office. The table shows that the budget has grown 229 percent from 1995 to 2002 mostly due to the formation of a Jail District which built a new jail that allowed for three times the inmate population. Personnel numbers were not available for 1995, but from 1996 to 2002 the total number of personnel grew from 128 to 256.5 or an increase in seven years of 100.4 percent. The number of sworn personnel has grown 10.3 percent, while the number of detention personnel has grown 128.9 percent in the same seven-year period. Note that specific monies were received in FY2000 that allowed for the expansion of the jail capacity in Coconino County.

Table 2-46 presents selected workload and activity information for the Coconino County Sheriff's Office, as provided by the agency. In the process of working to provide the ACJC SAC with the information requested for the *2003 White Paper* the Coconino County Sheriff's Office found that there were problems with their computerized case management system. While these issues are being addressed, it was not possible to correct the problems in time for much of their data to be included in the *2003 White Paper*. Although the number of Part I crimes fluctuated over the eight-year period, there was a 10.5 percent increase between 2001 and 2002. As noted previously, the maximum jail capacity for the jail increased from 162 to 350 in 2000 and again in 2001 from 350 to 603.

## COUNTY ATTORNEY

Table 2-47 contains basic data regarding the budget and personnel resources available to the Coconino County Attorney's Office. The table shows that the agency's budget, as reported by the agency, has increased 87.5 percent from 1995 to 2002. In 1995, the total number of personnel was 19. This number rose to 27 in 2002 resulting in a 42.1 percent increase over this period of time.

Table 2-48 presents selected workload and activity data as reported by the agency. There was limited data available for many of the years during the eight-year period. From the available data, total cases submitted showed an increase from 6,748 in 2000 to 7,259 in 2002, or an increase of 7.6 percent. Again, the data are limited for the number of adult felony cases submitted for prosecution, however, it shows a slight decrease of 8.3 percent in the three years from 2000 to 2002.

Data prior to FY2000 are not reported due to data conversion problems when a new case management system was implemented in March 1999. Other statistics omitted in FY2000 through FY2002 are due to the fact that the data are not tracked.

Table 2-49 presents data regarding the number of convictions submitted to, and obtained by, the Coconino County Attorney's Office. No data was reported for the years 1995 to 1999 and limited data are available thereafter. With the conviction data provided there was an increase in total number of cases submitted for prosecution from 6,748 in 2000 to 7,259 in 2002, or a 7.6 percent increase. From FY2000 to FY2002, the total number of cases resulting in convictions increased 1.2 percent from 3,776 to 3,822.

## ***SUPERIOR COURT***

Table 2-50 contains data regarding expenditures in the Coconino County Superior Court. The data provided by the Administrative Office of the Court shows that total expenditures for the court increased from 1995 to 2002, peaking at \$2,311,564 in 1998. This increase demonstrates a 23.7 percent rise over the eight-year period.

<b>TABLE 2-50: SUPERIOR COURT EXPENDITURE DATA 1995-2002</b>

Table 2-51 contains data describing the activities of the Coconino County Superior Court. The data shows that the total number of adult criminal cases filed has decreased 12.9 percent from 1995 to 2002, while the total number of cases filed has declined 9.4 percent. In 1995, adult criminal cases consisted of 32 percent of the court's caseload, while in 2002 comprised of 30.8 percent. The total number of disposed county cases rose remarkably over this time period with 1,817 in 1995 and 3,154 in 2002, or an increase of 73.6 percent.

Table 2-52 provides information regarding the disposition of criminal defendants in Coconino County Superior Court. The table reflects a steady increase of Department of Correction's dispositions since 1997 with the two highest years occurring in 2001 and 2002. There were 315 and 316 defendants respectively, sent to prison for each of these years. Over the eight-year period, the total number of disposed cases rose from 513 in 1995 to 1,488 in 2002.

## JUSTICE OF THE PEACE COURTS

Table 2-53 shows the total activity for all of the Justice of the Peace Courts in Coconino County. The data shows that the total number of cases filed in the Justice of the Peace Courts increased from 1995 to 2002. The number of misdemeanor criminal cases decreased 23.4 percent, while felony cases increased 124.5 percent. The number of domestic violence orders issued more than doubled from 72 in 1995 to 175 in 2002, an increase of 143.1 percent. The number of initial appearances held over this time span decreased from 5,633 in 1995 to 3,820 in 2002, or a 32.2 percent reduction. The number of felony preliminary hearings held decreased remarkably with 98 hearings in 1995 and only 12 hearings in 2002.

## MUNICIPAL COURTS

Table 2-54 show the activity of the Coconino County Municipal Courts. As data are not available for cases involving local non-criminal ordinances and initial appearances for 1995, comparison utilizing 1995 data is not possible. From 1996 to 2002, the number of criminal case filings decreased 10.0 percent, while the number of criminal case dispositions increased 18.2 percent. During this same time period, local non-criminal ordinance filings decreased by 89.2 percent and dispositions decreased 90.3 percent. Traffic filings increased from 1996 to 2002 with civil traffic case filings increasing slightly by 0.1 percent and criminal traffic case filings decreasing by 12.9 percent. Civil traffic dispositions increased by 4.5 percent and criminal traffic dispositions increased 47.3 percent from 1995 to 2002.

### **JUVENILE REFERRAL ACTIVITY**

Table 2-55 gives a breakdown of juvenile referral activity in Coconino County from FY1996 to FY2002. Data from FY1995 are unavailable. Total referrals from FY1996 to FY2002 decreased 25.3 percent. The percentage of females versus males referred decreased during this time. In FY1996, 31.0 percent referrals were female and 69.0 percent were male, whereas in FY2002 30.9 percent of the referrals were female and 69.1 percent were male. The percentage of younger juveniles referred increased between FY1996 and FY2002. In FY1996, 8.5 percent of those referred were between 8 and 12 and 91.5 percent of those referred were between 13 and 17. In FY2002, 9.1 percent of those referred were between 8 and 12 and 90.1 percent of those referred were between 13 and 17.

Data received from AOC

Note: Data was taken from the FY2002 extract of JOLTS. As data was re-run for previous fiscal years, Total Referral numbers may not match the Total Referrals in the "Juveniles Processed" publication for the respective fiscal year.

Table 2-56 shows the juvenile referral activity in Coconino County from FY1996 to FY2002. Data from FY1995 are unavailable. Juveniles referred for felonies against person decreased 31.8 percent from FY1996 to FY2002. During this seven-year span, referrals for felonies against property decreased 53.7 percent, while misdemeanors charges for property crimes decreased 47.6 percent. Total referrals for drug offenses decreased slightly over this time period with a drop of 18.2 percent. There was a large drop in referrals for status offenses with a decrease of 1,021 in FY1996 to 386 in FY2002.

With 4,752 square miles, Gila County is the 11th largest county by area in Arizona. Gila County experienced a 27.0 percent growth in population between 1990 and 2000, making it the 11th largest county in the state. Although county population only expanded by 1.1 percent from 2001 to 2002, reported Part I Offenses in the area increased by 21.1 percent for the same time period. Approximately 46.5 percent of the total county General Fund budget is dedicated to criminal justice functions.

## GILA COUNTY DATA

This portion of the *2003 White Paper* will present available data regarding population, the levels of crime reported and numbers of arrests for Gila County. In addition, this chapter will provide information, where available, on the activities of county-level criminal justice agencies and the level of resources provided to them. Finally, this chapter will provide data on the activities of the Gila County Superior Court, and total countywide data on the activities of justice and municipal courts.

### POPULATION

Table 1 shows the actual or estimated population of Gila County from 1995 through 2002. The table shows that the population for the Gila County has grown from 44,075 residents in 1995 to 53,015 in 2002, which represents a 20.3 percent increase over the eight-year period. In 2002, 1.0 percent of the population of the state of Arizona resided in Gila County.

## GILA COUNTY REPORTED CRIME DATA

Table 2-60 shows data regarding the number of Part I crimes reported by law enforcement agencies in Gila County. These are total offenses reported for the entire county. The data shows that the number of Part I offenses reported in Gila County decreased from 1995 to 1999. From 1999 to 2002, there is a steady increase in total Part I offenses. The total number of Part I Violent Offenses increased 16.7 percent over the past eight years with an increase occurring in the aggravated assault category. In Part I Property Offenses, all categories except larceny-theft showed an increase in crime reported. Larceny theft has decreased 21.7 percent from 1995 to 2002. Since 2000, burglaries have increased by 50.4 percent.

## GILA COUNTY ARREST DATA

Tables 2-61 and 2-62 present data regarding the number of arrests for adults and juveniles as reported to UCR by law enforcement agencies in Gila County. The data shows that the number of adults arrested in Gila County for Part I crimes in 2002 is fairly comparable to the number reported in 1995 with a small increase over that time period (6.1 percent). The number of adults arrested for Violent Offenses experienced a high in 2001 of 124, but dropped to 97 in 2002. From 1995 to 2002, there was a 14.9 percent decrease in arrests for Violent Offenses in Gila County. In contrast, from 1995 to 2002, there was a 15.7 percent increase in arrests for Property Offenses. In 2002, 1.1 percent of all the adults arrested for Part I crimes in Arizona were arrested in Gila County.

In Gila County, there was a 23.8 percent increase in Total Part II crimes from 1995 to 2002. Within Part II crimes, drug offenses experienced substantial increases during this time period. Total Part II drug offenses increased from 76 arrests in 1995 to 137 in 2002, or an increase of 80.3 percent.

In 1995, the County Attorney received 5.5 percent of the General Fund budget, while in 2002 the County Attorney's Office received 8.3 percent. The Sheriff's Office received 16.4 percent of the General Fund budget in 1995 and 17.3 percent in 2002. The Gila County Superior Court received 5.4 percent of the General Fund budget in 1995 and increased to 7.9 percent in 2002.

**FIGURE 2-12**

## SHERIFF

Table 2-64 contains basic data regarding the budget and personnel resources available to the Gila County Sheriff's Office. Over the eight-year time period, the Sheriff's General Fund budget increased 39.9 percent. Total personnel increased from 126 in FY1995 to 134 in FY2002, an increase of 6.3 percent. Over this same period detention personnel increased 13.6 percent.

Table 2-65 presents selected workload data and activity information for the Gila County Sheriff's Office, as provided by the agency. Data are not available for the years 1995 to 1999. The data shows that total calls for service experienced a slight growth from 2000 to 2002, increasing 2.8 percent, while the number of emergency calls increased 71.9 percent. The total Part I crimes reported to the agency has increased during the three-year period of 2000 to 2002 by 48.6 percent.

Workload data for the Gila County Sheriff's Office was not available prior to FY2000. Table 2-65 presents the available workload data. The average daily population in 2000 was 124 inmates decreasing to 112 in 2002 reflecting a 9.7 percent over the three year period. The jail capacity remained the same during the three-year period of 2000 to 2002 with a maximum of 265 beds available.

### **JUVENILE REFERRAL ACTIVITY**

Table 2-74 gives a breakdown of juvenile referral activity in Gila County from FY1996 to FY2002. Data from FY1995 are unavailable. Total referrals from FY1996 to FY2002 decreased 27.0 percent. The percentage of females versus males referred increased during this time. In FY1996, 27.8 percent of referrals were female and 72.2 percent were male, whereas in FY2002 33.9 percent of the referrals were female and 66.1 percent were male. The percentage of younger juveniles referred increased between FY1996 and FY2002. In FY1996, 10.3 percent of those referred were between 8 and 12 and 89.7 percent of those referred were between 13 and 17. In FY2002, 14.9 percent of those referred were between 8 and 12 and 85.1 percent of those referred were between 13 and 17.

Data received from AOC

Note: Data was taken from the FY2002 extract of JOLTS. As data was re-run for previous fiscal years, Total Referral numbers may not match the Total Referrals in the "Juveniles Processed" publication for the respective fiscal year.

Table 2-75 shows the juvenile referral activity in Gila County from FY1996 to FY2002. Data from FY1995 are unavailable. Juveniles referred for felonies against person increased 28.6 percent from FY1996 to FY2002. During this seven-year span, both referrals for felonies against property and misdemeanors against property experienced reductions, with 58.2 percent and 30.8 percent respectively. Total referrals for drug offenses increased 26.0 percent during this time. Referrals for status offenses dropped remarkably (61.9 percent) in Gila County from 1996 to 2002.

\*Percent change in Part I arrests reported from previous year

With 4,630 square miles, Graham County is the 12th largest county by area in Arizona. Graham County experienced a 36.1 percent growth in population between 1990 and 2000, making it the 13th largest county in the state. Although county population only expanded by 0.01 percent from 2001 to 2002, reported Part I Offenses in the area increased by 2.9 percent for the same time period. Approximately 42.1 percent of the total county General Fund budget is dedicated to criminal justice functions.

## GRAHAM COUNTY DATA

This portion of the *2003 White Paper* will present available data regarding population, the levels of reported crime and numbers of arrests for Graham County. In addition, this chapter will provide information, where available, on the activities of county-level criminal justice agencies and the level of resources provided to them. Finally, this chapter will provide data on the activities of the Graham County Superior Court, and total countywide data on the activities of justice and municipal courts.

### POPULATION

Table 2-77 shows the actual or estimated population of Graham County from 1995 through 2002. The table shows that the population for the Graham County has grown from 30,025 residents in 1995 to 34,070 in 2002, which represents a 13.5 percent increase over the eight-year period. In 2002, 0.6 percent of the population of the state of Arizona resided in Graham County.

## SHERIFF

Table 2-83 contains basic data regarding the budget and personnel resources available to the Graham County Sheriff's Office. The table shows that the budget has grown 106.2 percent from 1995 to 2002. Personnel numbers were not available for 1995 or 1996, but from 1997 to 2002 the total number of personnel grew only eight percent from 50 in 1995 to 54 in 2002. The number of sworn personnel has grown 10.5 percent, while the number of detention personnel has nearly doubled in the same six-year period.

Table 2-83 presents selected workload and activity information for the Graham County Sheriff's Office, as provided by the agency. No data are available prior to 1998. The table shows that total calls for service increased 51.1 percent from 1998 to 2002. Data on the number of emergency calls is not available for the eight-year period. The number of arrest warrants rose from 803 served in 1998 to 1,120 in 2002, for an increase of 39.5 percent.

Data on the average daily population for the jail and average length of stay was also not available until 1998. The average daily population in 1998 was 58 inmates increasing to 104 in 2002, or an increase of 79.3 percent. During that same period, the average length of stay decreased from 17 months in 1998 to 11 months in 2002. Jail capacity in Graham County increased from a maximum of 93 beds in 1997 to 108 beds, where it has remained for the past five years.

Table 2-90 provides information regarding the disposition of criminal defendants in Graham County Superior Court. The table shows that the number of defendants sentenced to the Department of Corrections has increased over the eight-year period. Since 1995, dispositions to the Department of Corrections have grown from 47 to a high in 2002 of 74, or an increase of 57.4 percent. The increase noted in dispositions to the Department of Corrections also appears in other disposition categories with large increases occurring in probation and county jail. The total number of disposed cases rose from 212 in 1995 to 372 in 2002, a 75.5 percent increase.

### **JUVENILE REFERRAL ACTIVITY**

Table 2-93 gives a breakdown of juvenile referral activity in Graham County from FY1996 to FY2002. Data from FY1995 are unavailable. Total referrals increased 19.7 percent. The percentage of females versus males referred increased during this time. In FY1996, 29.0 percent of the referrals were female and 71.0 percent were male, whereas in FY2002 31.0 percent the referrals were female and 69.0 percent were male. The percentage of younger juveniles referred increased between FY1996 and FY2002. In FY1996, 11.1 percent of those referred were between 8 and 12 and 88.9 percent of those referred were between 13 and 17. In FY2002, 13.3 percent of those referred were between 8 and 12 and 86.7 percent of those referred were between 13 and 17.

Data received from AOC

Note: Data was taken from the FY2002 extract of JOLTS. As data was re-run for previous fiscal years, Total Referral numbers may not match the Total Referrals in the "Juveniles Processed" publication for the respective fiscal year.

Table 2-94 shows the juvenile referral activity in Graham County from FY1996 to FY2002. Data from FY1995 are unavailable. Juveniles referred for felonies against person decreased 21.1 percent from FY1996 to FY2002. During this seven-year span, referrals for felonies against property decreased 50.0 percent. There was also a decrease in the number of juveniles referred for misdemeanors against property (18.8 percent). Total referrals for drug offenses increased from 37 in FY1996 to 93 in FY2002, or an increase of 151.4 percent. Over this same time period, there was a 14.6 percent decrease in the number of referrals for status offenses.

<b>Population Growth 2001 – 2002:</b>	0.2%

\*Percent change in Part I arrests reported from previous year

With 1,837 square miles, Greenlee County is the 14th largest county by area in Arizona. Greenlee County experienced a 16.6 percent growth in population between 1990 and 2000, making it the 15th largest county in the state. Although county population only expanded by 0.2 percent from 2001 to 2002, reported Part I Offenses in the area increased by 23.3 percent for the same time period. Approximately 42.5 percent of the total county General Fund budget is dedicated to criminal justice functions.

## GREENLEE COUNTY DATA

This portion of the *2003 White Paper* will present available data regarding population, the levels of reported crime and numbers of arrests for Greenlee County. In addition, this chapter will provide information, where available, on the activities of county-level criminal justice agencies and the level of resources provided to them. Finally, this chapter will provide data on the activities of the Greenlee County Superior Court, and total countywide data on the activities of justice and municipal courts.

### POPULATION

Table 2-96 shows the actual or estimated population of Greenlee County from 1995 through 2002. The table shows that the population for the Greenlee County has grown from 8,450 residents in 1995 to 8,605 in 2002, which represents a 1.8 percent increase over the eight-year period. In 2002, 0.2 percent of the population of the state of Arizona resided in Greenlee County.

With 4,518 square miles, La Paz County is the 13th largest county by area in Arizona. La Paz County experienced a 39.2 percent growth in population between 1990 and 2000, making it the 14th largest county in the state. Although county population only expanded by 2.2 percent from 2001 to 2002, reported Part I Offenses in the area increased by 5.2 percent for the same time period. Approximately 46.5 percent of the total county General Fund budget is dedicated to criminal justice functions.

## LA PAZ COUNTY DATA

This portion of the *2003 White Paper* will present available data regarding population, the levels of reported crime and numbers of arrests for La Paz County. In addition, this chapter will provide information, where available, on the activities of county-level criminal justice agencies and the level of resources provided to them. Finally, this chapter will provide data on the activities of the La Paz County Superior Court, and total countywide data on the activities of justice and municipal courts.

### POPULATION

Table 2-115 shows the actual or estimated population of La Paz County from 1995 through 2002. The table shows that the population for the La Paz County has grown from 16,550 residents in 1995 to 20,365 in 2002, which represents a 23.1 percent increase over the eight-year period. In 2002, 0.4 percent of the population of the state of Arizona resided in La Paz County.

## JUVENILE REFERRAL ACTIVITY

Table 2-128 gives a breakdown of juvenile referral activity in La Paz County from FY1996 to FY2002. Data from FY1995 are unavailable. Total referrals from FY1996 to FY2002 decreased 9.7 percent. The percentage of females versus males referred decreased during this time. In FY1996, 20.8 percent of the referrals were female and 79.2 percent were male, whereas in FY2002, 20.6 percent of the referrals were female and 79.4 percent were male. The percentage of younger juveniles referred increased between FY1996 and FY2002. In FY1996, 5.6 percent of those referred were between 8 and 12 and 94.4 percent of those referred were between 13 and 17. In FY2002, 9.1 percent of those referred were between 8 and 12 and 90.9 percent of those referred were between 13 and 17.

<b>Population Growth 1990 – 2000:</b>	40.4%
<b>Population Growth 2001 – 2002:</b>	3.3%

\*Percent change in Part I arrests reported from previous year

With 9,226 square miles, Maricopa County is the 5th largest county by area in Arizona. Maricopa County experienced a 40.4 percent growth in population between 1990 and 2000, making it the largest county in the state. Although county population only expanded by 3.3 percent from 2001 to 2002, reported Part I Offenses in the area increased by 3.0 percent for the same time period. Approximately 38.5 percent of the total county General Fund budget is dedicated to criminal justice functions.

## MARICOPA COUNTY DATA

This portion of the *2003 White Paper* will present available data regarding population, the levels of reported crime and numbers of arrests for Maricopa County. In addition, this chapter will provide information, where available, on the activities of county-level criminal justice agencies and the level of resources provided to them. Finally, this chapter will provide data on the activities of the Maricopa County Superior Court, and total countywide data on the activities of justice and municipal courts.

### POPULATION

Table 2-131 shows the actual or estimated population of Maricopa County from 1995 through 2002. The table shows that the population for the Maricopa County has grown from 2,454,525 residents in 1995 to 3,296,250 in 2002, which represents a 34.3 percent increase over the eight-year period. In 2002, 60.2 percent of the population of the state of Arizona resided in Maricopa County.

## ***RESOURCE ALLOCATION TO MARICOPA COUNTY CRIMINAL JUSTICE AGENCIES***

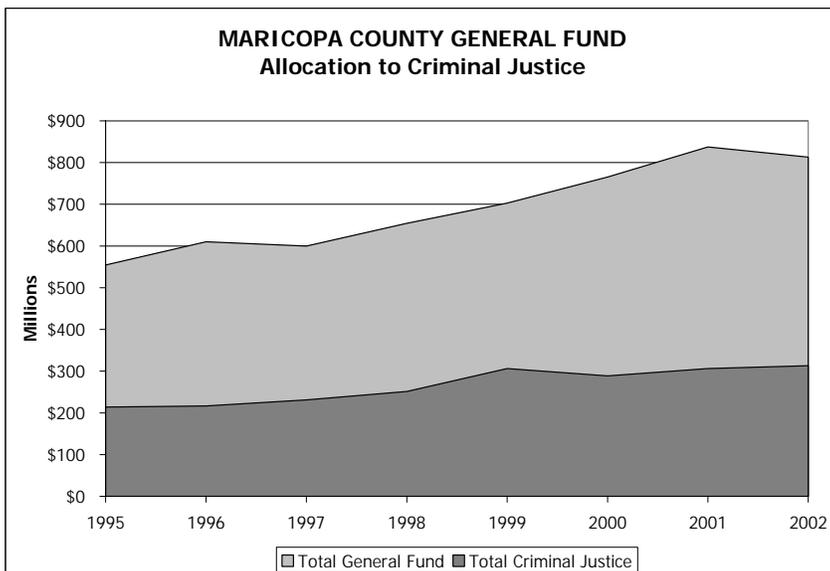

Table 2-136 provides information regarding the allocation of General Fund dollars to criminal justice agencies in Maricopa County. The figures represent General Fund allocations as provided by Maricopa County officials as well as funds from the jail excise tax. From 1995 to 2002, the Maricopa County General Fund budget increased 46.6 percent. Over the eight-year period the County Attorney's budget increased 52.1 percent and the Sheriff's Budget allocations from the General Fund decreased 55.9 percent. The Superior Court increased 66.5 percent, while the Public Defender's office recorded the largest budget increase of 120.9 percent.

### **JUVENILE REFERRAL ACTIVITY**

Table 2-147 gives a breakdown of juvenile referral activity in Maricopa County from FY1996 to FY2002. Data from FY1995 are unavailable. Total referrals from FY1996 to FY2002 decreased 7.3 percent. The percentage of females versus males referred increased during this time. In FY1996, 27.8 percent of referrals were female and 72.2 percent were male, whereas in FY2002 30.6 percent of the referrals were female and 69.4 percent were male. The percentage of younger juveniles referred increased between FY1996 and FY2002. In FY1996, 7.9 percent of those referred were between 8 and 12 and 92.1 percent of those referred were between 13 and 17. In FY2002, 8.5 percent of those referred were between 8 and 12 and 91.5 percent of those referred were between 13 and 17.

<b>Population Growth 1990 – 2000:</b>	52.4%
<b>Population Growth 2001 – 2002:</b>	3.0%

\*Percent change in Part I arrests reported from previous year

With 13,479 square miles, Mohave County is the 2nd largest county by area in Arizona. Mohave County experienced a 52.4 percent growth in population between 1990 and 2000, making it the 6th largest county in the state. Although county population only expanded by 3.0 percent from 2001 to 2002, reported Part I Offenses in the area increased by 5.9 percent for the same time period. Approximately 29.7 percent of the total county General Fund budget is dedicated to criminal justice functions.

## MOHAVE COUNTY DATA

This portion of the *2003 White Paper* will present available data regarding population, the levels of reported crime and number of arrests for Mohave County. In addition, this chapter will provide information, where available, on the activities of county-level criminal justice agencies and the level of resources provided to them. Finally, this chapter will provide data on the activities of the Mohave County Superior Court, and total countywide data on the activities of justice and municipal courts.

### POPULATION

Table 2-150 shows the actual or estimated population of Mohave County from 1995 through 2002. The table shows that the population for the Mohave County has grown from 124,500 residents in 1995 to 166,465 in 2002, which represents a 33.7 percent increase over the eight-year period. In 2002, 3.0 percent of the population of the state of Arizona resided in Mohave County.

## ***MOHAVE COUNTY ARREST DATA***

Tables 2-153 and 2-154 present data regarding the number of arrests for adults and juveniles as reported to UCR by law enforcement agencies in Mohave County. The data shows that the number of adults arrested in Mohave County for Part I crimes decreased two percent from 1995 to 2002. The total number of Violent Offenses increased 0.3 percent during this time, rising from 304 in 1995 to 305 in 2002. Overall, Property Offenses experienced a slight decrease of 2.5 percent from 1995 to 2002. However, several categories within the index of Property Offense changed substantially during this time period. Both arrests for burglaries and motor vehicle theft increased remarkably during this time period, with increases of 60.7 percent and 275.9 percent respectively. In addition, arrests for larceny-theft dropped 16.6 percent from 1995 to 2002. In 2002, 4.5 percent of all Adult Part I arrests were in Mohave County.

### **JUVENILE REFERRAL ACTIVITY**

Table 2-166 gives a breakdown of juvenile referral activity in Mohave County from FY1996 to FY2002. Data from FY1995 are unavailable. Total referrals from FY1996 to FY2002 decreased 0.3 percent. The percentage of females versus males referred increased during this time. In FY1996, 27.4 percent of the referrals were female and 72.6 percent were male, whereas in FY2002, 32.9 percent of the referrals were female and 67.1 percent were male. The percentage of younger juveniles referred decreased between FY1996 and FY2002. In FY1996, 14.2 percent of those referred were between 8 and 12 and 85.8 percent of those referred were between 13 and 17. In FY2002, 11.2 percent of those referred were between 8 and 12 and 88.8 percent of those referred were between 13 and 17.

\*Percent change in Part I arrests reported from previous year

With 9,949 square miles, Navajo County is the 4th largest county by area in Arizona. Navajo County experienced a 22.7 percent growth in population between 1990 and 2000, making it the 9th largest county in the state. Although county population only expanded by 1.8 percent from 2001 to 2002, reported Part I Offenses in the area increased by 6.7 percent for the same time period. Approximately 47.4 percent of the total county General Fund budget is dedicated to criminal justice functions.

## NAVAJO COUNTY DATA

This portion of the *2003 White Paper* will present available data regarding population, the levels of reported crime and number of arrests for Navajo County. In addition, this chapter will provide information, where available, on the activities of county-level criminal justice agencies and the level of resources provided to them. Finally, this chapter will provide data on the activities of the Navajo County Superior Court, and total countywide data on the activities of justice and municipal courts.

### POPULATION

Table 2-169 shows the actual or estimated population of Navajo County from 1995 through 2002. The table shows that the population for Navajo County has grown from 82,425 residents in 1995 to 101,615 in 2002, which represents a 23.3 percent increase over the eight-year period. In 2002, 1.9 percent of the population of the state of Arizona resided in Navajo County.

### **JUVENILE REFERRAL ACTIVITY**

Table 2-185 gives a breakdown of juvenile referral activity in Navajo County from FY1996 to FY2002. Data from FY1995 are unavailable. Total referrals from FY1996 to FY2002 decreased 5.5 percent. The percentage of females versus males referred increased during this time. In FY1996, 30.6 percent of the referrals were female and 69.4 percent referred were male, whereas in FY2002 35.0 percent of the referrals were female and 65.0 percent were male. The percentage of younger juveniles referred decreased between FY1996 and FY2002. In FY1996, 9.0 percent of those referred were between 8 and 12 and 91.0 percent of those referred were between 13 and 17. In FY2002, 7.3 percent of those referred were between 8 and 12 and 92.7 percent of those referred were between 13 and 17.

**Population Growth 1990 – 2000:** 29.6%

**Population Growth 2001 – 2002:** 2.3%

\*Percent change in Part I arrests reported from previous year

With 9,184 square miles, Pima County is the 6th largest county by area in Arizona. Pima County experienced a 29.6 percent growth in population between 1990 and 2000, making it the 2nd largest county in the state. Although county population only expanded by 2.3 percent from 2001 to 2002, reported Part I Offenses in the area decreased by 10.0 percent for the same time period. Approximately 52.6 percent of the total county General Fund budget is dedicated to criminal justice functions.

## PIMA COUNTY DATA

This portion of the *2003 White Paper* will present available data regarding population, the levels of reported crime and numbers of arrests for Pima County. In addition, this chapter will provide information, where available, on the activities of county-level criminal justice agencies and the level of resources provided to them. Finally, this chapter will provide data on the activities of the Pima County Superior Court, and total countywide data on the activities of justice and municipal courts.

### POPULATION

Table 2-188 shows the actual or estimated population of Pima County from 1995 through 2002. The table shows that the population for the Pima County has grown from 758,050 residents in 1995 to 890,545 in 2002, which represents a 17.5 percent increase over the eight-year period. In 2002, 16.3 percent of the population of the state of Arizona resided in Pima County.

***RESOURCE ALLOCATION TO PIMA COUNTY CRIMINAL JUSTICE AGENCIES***

Table 2-193 provides information regarding the allocation of General Fund dollars to criminal justice agencies in Pima County. The figures represent only General Fund allocations as provided by Pima County officials. From 1995 to 2002, the Pima County General Fund budget increased 39.1 percent, while the total allocated to criminal justice agencies increased 50.6 percent. In 1995, 48.6 percent of the General Fund budget was allocated to criminal justice agencies and rose to a high of 52.6 percent in 2002. Over the eight-year period the County Attorney's budget increased 35.7 percent, the Superior Court increased 40.5, and the Public Defender's budget increased 89.9 percent over the same eight-year period. The largest increase was recorded in the Juvenile Court/Probation budget, with an increase of 114.6 percent.

### **JUVENILE REFERRAL ACTIVITY**

Table 2-204 gives a breakdown of juvenile referral activity in Pima County from FY1996 to FY2002. Data from FY1995 are unavailable. Total referrals from FY1996 to FY2002 decreased 13.4 percent. The percentage of females versus males referred increased during this time. In FY1996, 32.9 percent of the referrals were female and 67.1 percent referred were male, whereas in FY2002 35.2 percent of the referrals were female and 64.8 percent were male. The percentage of younger juveniles referred increased between FY1996 and FY2002. In FY1996, 10.4 percent of those referred were between 8 and 12 and 89.6 percent of those referred were between 13 and 17. In FY2002, 10.6 percent of those referred were between 8 and 12 and 89.4 percent of those referred were between 13 and 17.

With 5,371 square miles, Pinal County is the 10th largest county by area in Arizona. Pinal County experienced a 45.1 percent growth in population between 1990 and 2000, making it the 3rd largest county in the state. Although county population only expanded by 3.0 percent from 2001 to 2002, reported Part I Offenses in the area increased by 23.2 percent for the same time period. Approximately 35.9 percent of the total county General Fund budget is dedicated to criminal justice functions.

## PINAL COUNTY DATA

This portion of the *2003 White Paper* will present available data regarding population, the levels of reported crime and numbers of arrests for Pinal County. In addition, this chapter will provide information, where available, on the activities of county-level criminal justice agencies and the level of resources provided to them. Finally, this chapter will provide data on the activities of the Pinal County Superior Court, and total countywide data on the activities of justice and municipal courts.

### POPULATION

Table 2-207 shows the actual or estimated population of Pinal County from 1995 through 2002. The table shows that the population for the Pinal County has grown from 139,050 residents in 1995 to 192,395 in 2002, which represents a 38.4 percent increase over the eight-year period. In 2002, 3.5 percent of the population of the state of Arizona resided in Pinal County.

### **JUVENILE REFERRAL ACTIVITY**

Table 2-223 gives a breakdown of juvenile referral activity in Pinal County from FY1996 to FY2002. Data from FY1995 are unavailable. Total referrals between FY1996 and FY2002 decreased 4.1 percent. The percentage of females versus males referred increased during this time. In FY1996, 23.4 percent of the referrals were female and 76.6 percent were male, whereas in FY2002 29.6 percent of the referrals were female and 70.4 percent were male. The percentage of younger juveniles referred increased between FY1996 and FY2002. In FY1996 10.6 percent of those referred were between 8 and 12 and 89.4 percent of those referred were between 13 and 17. In FY2002, 11.9 percent of those referred were between 8 and 12 and 89.1 percent of those referred were between 13 and 17.

<b>Population Growth 1990 – 2000:</b>	34.0%
<b>Population Growth 2001 – 2002:</b>	1.3%

\*Percent change in Part I arrests reported from previous year

With 1,236 square miles, Santa Cruz County is the 15th largest county by area in Arizona. Santa Cruz County experienced a 34.0 percent growth in population between 1990 and 2000, making it the 12th largest county in the state. Although county population only expanded by 1.3 percent from 2001 to 2002, reported Part I Offenses in the area increased by 12.0 percent for the same time period. Approximately 35.8 percent of the total county General Fund budget is dedicated to criminal justice functions.

## SANTA CRUZ COUNTY DATA

This portion of the *2003 White Paper* will present available data regarding population, the levels of reported crime and numbers of arrests for Santa Cruz County. In addition, this chapter will provide information, where available, on the activities of county-level criminal justice agencies and the level of resources provided to them. Finally, this chapter will provide data on the activities of the Santa Cruz County Superior Court, and total countywide data on the activities of justice and municipal courts.

### POPULATION

Table 2-226 shows the actual or estimated population of Santa Cruz County from 1995 through 2002. The table shows that the population for the Santa Cruz County has grown from 33,875 residents in 1995 to 39,840 in 2002, which represents a 17.6 percent increase over the eight-year period. In 2002, 0.7 percent of the population of the state of Arizona resided in Santa Cruz County.

Table 2-235 contains data describing the activities of the Santa Cruz County Superior Court. The data shows that the total number of adult criminal cases filed has gone from a high of 358 in 1996 to a low of 166 in 2000. In 1995, the total number of adult criminal cases filed was 311 and in 2002 253 were filed. In 1995, adult criminal cases made up 22.5 percent of the courts caseload, but by 2002 went down to 15 percent of the caseload. The number of disposed domestic relations cases went from 48 in 1995 to 250 in 1996, or a growth of 420.8 percent. There were 224 disposed domestic relations cases in 2002. The number of total criminal trials in Santa Cruz County Superior Court went from nine in 1995 to a high of 26 in 1998 before dropping to 14 in 2002.

## MUNICIPAL COURTS

Table 2-238 shows the activity of the Santa Cruz County Municipal Courts. As data are not available for cases involving local non-criminal ordinances and initial appearances for 1995, comparison utilizing 1995 data are not possible. From 1996 to 2002, the number of criminal case filings rose 4.7 percent and the number of criminal case dispositions rose 18.2 percent. During this same time period, local non-criminal ordinance filings increased by 41.1 percent and dispositions increased 33.6 percent. Overall, traffic cases decreased in activity from 1996 to 2002. Civil traffic case filings went down 21.0 percent and criminal traffic case filings went up 36.1 percent. Civil traffic dispositions decreased 13.3 percent and criminal traffic dispositions increased 62.2 percent. The misdemeanor criminal case filings show a different trend. Misdemeanor criminal case filings increased 16.9 percent and dispositions increased 128.7 percent.

## JUVENILE REFERRAL ACTIVITY

Table 2-239 gives a breakdown of juvenile referral activity in Santa Cruz County from 1996 to 2002. Data from 1995 are unavailable. Total juvenile referrals increased 54.5 percent during this seven year span. The percentage of female versus male juveniles referred increased during this time. In 1996 20.0 percent of those referred were female and 80.0 percent of those referred were male; whereas in 2002, 34.7 percent of those referred were female and 65.3 percent of those referred were male. The percentage of younger juveniles referred decreased between 1996 and 2002. In 1996, 11.9 percent of those referred were between 8 and 12 and 88.1 percent of those referred were between 13 and 17; whereas in 2002, 7.0 percent of those referred were between 8 and 12 and 93.0 percent of those referred were between 13 and 17.

<b>Population Growth 1990 – 2000:</b>	47.5%
<b>Population Growth 2001 – 2002:</b>	2.8%

\*Percent change in Part I arrests reported from previous year

With 8,125 square miles, Yavapai County is the 7th largest county by area in Arizona. Yavapai County experienced a 47.5 percent growth in population between 1990 and 2000, making it the 4th largest county in the state. Although county population only expanded by 2.8 percent from 2001 to 2002, reported Part I Offenses in the area increased by 0.9 percent for the same time period. Approximately 58.4 percent of the total county General Fund budget is dedicated to criminal justice functions.

## YAVAPAI COUNTY DATA

This portion of the *2003 White Paper* will present available data regarding population, the levels of reported crime and numbers of arrests for Yavapai County. In addition, this chapter will provide information, where available, on the activities of county-level criminal justice agencies and the level of resources provided to them. Finally, this chapter will provide data on the activities of the Yavapai County Superior Court, and total countywide data on the activities of justice and municipal courts.

### POPULATION

Table 2-242 shows the actual or estimated population of Yavapai County from FY1995 through FY2002. The table shows that the population for the Yavapai County has grown from 129,500 residents in FY1995 to 180,260 in FY2002, a 39.2 percent increase over the eight-year period. In FY2002, 3.3 percent of the population of the state of Arizona resided in Yavapai County.

## ***MUNICIPAL COURTS***

Table 2-257 show the activity of the Yavapai County Municipal Courts. As data are not available for cases involving local non-criminal ordinances and initial appearances for FY1995, comparison utilizing FY1995 data are not possible. From FY1996 to FY2002, the number of criminal case filings decreased 1.9 percent and the number of criminal case dispositions increased 1.6 percent. During this same time period, local non-criminal ordinance filings decreased by 14.2 percent and dispositions decreased 13.6 percent. Overall, traffic case activity remained relatively constant from FY1996 to FY2002 with civil traffic case filings decreasing by 3.4 percent and criminal traffic case filings increasing by 21.4 percent. Civil traffic dispositions increased by 2.3 percent and criminal traffic dispositions increased 6.8 percent from FY1996 to FY2002.

\*Percent change in Part I arrests reported from previous year

With 5,522 square miles, Apache County is the 9th largest county by area in Arizona. Yuma County experienced a 32.1 percent growth in population between 1990 and 2000, making it the 5th largest county in the state. Although county population only expanded by 2.7 percent from 2001 to 2002, reported Part I Offenses in the area increased by 10.6 percent for the same time period. Approximately 71.3 percent of the total county General Fund budget is dedicated to criminal justice functions.

## YUMA COUNTY DATA

This portion of the *2003 White Paper* will present available data regarding population, the levels of reported crime and numbers of arrests for Yuma County. In addition, this chapter will provide information, where available, on the activities of county-level criminal justice agencies and the level of resources provided to them. Finally, this chapter will provide data on the activities of the Yuma County Superior Court, and total countywide data on the activities of justice and municipal courts.

### POPULATION

Table 2-261 shows the actual or estimated population of Yuma County from 1995 through 2002. The table shows that the population for Yuma County has grown from 121,875 residents in 1995 to 169,760 in 2002, which represents a 39.3 percent increase over the eight-year period. In 2002, 3.1 percent of the population of the state of Arizona resided in Yuma County.

Population information provided by the Arizona Department of Economic Security.

Table 2-262 reflects the number of males and females, ages 16 to 24 in 1990 and 2000 for Yuma County. This breakdown represents the segment of the population considered most at-risk within the criminal justice system. From 1990 to 2000, the total number of people ages 16 to 24 increased 32.7 percent. The male population age 18 to 24 increased 31.1 percent, while the female population increased 30.2 percent in the same age category.

Population information provided by the 1990 U.S. Census (STF 3) and 2000 U.S. Census (SF 4).

## YUMA COUNTY REPORTED CRIME DATA

Table 2-263 shows data regarding the number of Part I crimes reported by law enforcement agencies in Yuma County. The following table represents total offenses reported for all of Yuma County. However, there are notable gaps in the data reported by individual agencies limiting the ability for comparisons over time. Data from 1995 to 1999 is not UCR data and shows large fluctuations probably attributed to the lack of data rather than actual changes in crime trends or workloads. From 2000 to 2002, participation in UCR by Yuma County made the data stable, and therefore, provides a more accurate representation of the workload information for those years. From 2000 to 2002, total Part I crimes increased from 5,507 in 2000 to 5,705 in 2002, or an increase of 3.6 percent. Over this same period, Violent Offenses increased from 676 in 1995 to 972 in 2002. Much of this increase can be attributed to a rise in the number of aggravated assaults over this period. Aggravated assaults rose from 561 in 2000 to 881 in 2002, or an increase of 57 percent.

Over this three-year period, Property Offenses went down slightly (2 percent) in Yuma County, but burglary (20 percent) and motor vehicle thefts (18.2 percent) experienced increases from 2000 to 2002.

**YUMA COUNTY ARREST DATA**

Tables 2-264 and 2-265 present data regarding the number of arrests for adults and juveniles as reported to UCR by law enforcement agencies in Yuma County. From 2000 to 2002, total Part I adult arrests increased from 730 in 2000 to 819 in 2002, or an increase of 12.2 percent. During this same period arrests for Violent Offenses increased 43.6 percent. The number of adults arrested for Property Offenses decreased slightly over this period with a drop from 512 in 2000 to 506 in 2002. In 2002, 2.2 percent of all the adults arrested for Part I crimes in Arizona were arrested in Yuma County.

## **RESOURCE ALLOCATION TO YUMA COUNTY CRIMINAL JUSTICE AGENCIES**

Table 2-266 provides information regarding the allocation of General Fund dollars to criminal justice agencies in Yuma County. The figures represent only General Fund allocations as provided by Yuma County officials. From 1995 to 2002, the Yuma County General Fund budget increased 25.3 percent, while the total allocated to criminal justice agencies increased 36.2 percent. Superior Court increased over the eight-year period 12 percent and the County Attorney's budget increased 77.1 percent. From 1997 to 2002 the Public Defenders budget decreased from \$1,900,000 to \$1,520,000, or a 20 percent decrease.

***SHERIFF***

Table 2-267 contains basic data regarding the budget and personnel resources available to the Yuma County Sheriff's Office. The table shows that the budget has grown 126.2 percent from 1995 to 2002. Personnel numbers were not available for 1995, but from 1996 to 2002 the total number of personnel grew from 222 to 317, or an increase in seven years of 42.8 percent. The number of sworn personnel has grown 22.2 percent, while the number of detention personnel has grown 38.8 percent in the same seven-year period.

Table 2-268 presents selected workload and activity information for the Yuma County Sheriff's Office, as provided by the agency. The data shows that total calls for service increased 17.5 percent from 1995 to 2002. Data on the number of emergency calls was not available for the years 1995 and 1996, but increased 13.4 percent from 1997 to 2002.

Data on the average daily population for the jail was not available in 1995. The average daily population in 1996 was 370 inmates increasing to 454 in 2002, or an increase of 22.7 percent. During that same period, the average length of stay decreased from 18 days in 1996 to 15 days in 2002. Maximum jail capacity more than doubled over this time period with an increase of 333 to 675 beds in 1999 and remaining at that capacity to this date.

## JUVENILE REFERRAL ACTIVITY

Table 2-277 gives a breakdown of juvenile referral activity in Yuma County from FY1996 to FY2002. Data from FY1995 are unavailable. Total referrals from FY1996 to FY2002 decreased 18.0 percent. The percentage of females versus males referred increased during this time. In FY1996, 24.0 percent of the referrals were female and 76.0 percent were male, whereas in FY2002 35.8 percent of the referrals were female and 64.2 percent were male. The percentage of younger juveniles referred increased between FY1996 and FY2002. In FY1996, 6.3 percent of those referred were between 8 and 12 and 93.7 percent of those referred were between 13 and 17. In FY2002, 17.3 percent of those referred were between 8 and 12 and 82.7 percent of those referred were between 13 and 17.

## ***FINDINGS***

- The population for Yuma County has grown from 121,875 residents in 1995 to 169,760 in 2002, which represents a 39.3 percent increase over the eight-year period.
- From 1990 to 2000 in Yuma County, the total number of people ages 16 to 24 increased 32.7 percent.
- In 2002, 3.1 percent of the population of the state of Arizona resided in Yuma County.
- The General Fund budget in Yuma County increased 33.9 percent from 1995 to 2002.
- Criminal justice funds from the county General Fund increased 82.8 percent between 1995 and 2002.
- In 1995, 52.3 percent of the county General Fund was devoted to criminal justice. This percentage increased to 71.3 percent in 2002.
- Total Part I crimes reported increased 171.9 percent from 1995 to 2002. Over 67.7 percent of the UCR data is missing for 1995 and 42.2 percent is missing for 1996. Over 37.7 percent of the UCR data is missing for 1997 and 63.4 percent of the UCR data is missing for 1998. Over 21.1 percent of the UCR data is missing for 1999.
- The Yuma County Sheriff's Office budget increased 126.2 percent from 1995 to 2002.
- Total Part II Drug arrests increased 312.0 percent for adults and increased 256.5 percent for juveniles between 1995 and 2002.
- Total arrests for Part I crimes increased 146.7 percent for adults and increased 454.4 percent for juveniles between 1995 and 2002.
- The number of adults arrested for Part I Violent Offenses increased 943.3 percent and the number of juveniles arrested increased 406.3 percent from 1995 to 2002.
- The number of adults arrested for Part I Property Offenses increased 67.5 percent and the number of juveniles arrested increased 466.7 percent between 1995 and 2002.
- The Yuma County Attorney's Office budget increased 77.1 percent from 1995 to 2002.
- Cases filed in the Yuma County Superior Court increased 16.2 percent from 1995 to 2002.
- Cases disposed in the Yuma County Superior Court increased 7.9 percent from 1995 to 2002.

## CITY DATA

### CITY OF APACHE JUNCTION

This portion of the *2003 White Paper* will present available data regarding population, the levels of reported crime and numbers of arrests for the City of Apache Junction. In addition, this chapter will provide information, where available, on the activities of municipal criminal justice agencies and the level of resources provided to them. Finally, the chapter will provide data on the activities of the Apache Junction Municipal Court.

#### **POPULATION**

	1995	1996	1997	1998	1999	2000	2001	2002

## ***FINDINGS***

- Bullhead City is the 17<sup>th</sup> largest city in Arizona.
- Over the eight-year period from 1995 to 2002 Bullhead City was the 13<sup>th</sup> fastest growing city of those studied in Arizona.
- Bullhead City has experienced 31.4 percent increase in population from 26,940 in 1995 to 35,410 in 2002.
- Bullhead City was comprised of 0.6 percent of the total state population in 1995 and 0.6 percent in 2002.
- Total Part II Drug arrests decreased 3.5 percent for adults and decreased 42.5 percent for juveniles between 1995 and 2002.
- Total Part I crimes reported decreased 35.2 percent from 1995 to 2002.
- Total arrests for Part I crimes decreased 30.1 percent for adults and decreased 5.9 percent for juveniles between 1995 and 2002.
- The number of adults arrested for Part I Violent Offenses increased 14.5 percent and the number of juveniles arrested decreased 25.0 percent between 1995 and 2002.
- The number of adults arrested for Part I Property Offenses decreased 37.3 percent and the number of juveniles arrested decreased 3.8 percent between 1995 and 2002.
- The total city budget increased 98.4 percent while the amount allotted to the police department increased 94.7 percent.

# CITY OF CASA GRANDE

This portion of the *2003 White Paper* will present available data regarding population, the levels of reported crime and numbers of arrests for the City of Casa Grande. In addition, this chapter will provide information, where available, on the activities of municipal criminal justice agencies and the level of resources provided to them. Finally, the chapter will provide data on the activities of the Casa Grande Municipal Court.

## POPULATION

## ***FINDINGS***

- The City of Glendale is the fourth largest city in Arizona.
- Over the eight-year period from 1995 to 2002 the City of Glendale was the 12<sup>th</sup> fastest growing city of those studied in Arizona.
- The City of Glendale has experienced 32.1 percent increase in population from 172,155 in 1995 to 227,495 in 2002.
- The City of Glendale was comprised of 4.1 percent of the total state population in 1995 and 4.2 percent in 2002.
- Total Part II Drug arrests decreased 37.3 percent for adults and decreased 67.5 percent for juveniles between 1995 and 2002.
- Total Part I crimes reported decreased 0.1 percent from 1995 to 2002.
- Total arrests for Part I crimes decreased 47.8 percent for adults and decreased 72.0 percent for juveniles between 1995 and 2002.
- The number of adults arrested for Part I Violent Offenses decreased 50.2 percent and the number of juveniles arrested decreased 78.6 percent between 1995 and 2002.
- The number of adults arrested for Part I Property Offenses decreased 47.2 percent and the number of juveniles arrested decreased 70.6 percent between 1995 and 2002.
- The total city budget increased 92.9 percent while the amount allotted to the police department increased 81.8 percent.

# CITY OF GOODYEAR

This portion of the *2003 White Paper* will present available data regarding population, the levels of reported crime and numbers of arrests for the City of Goodyear. In addition, this chapter will provide information, where available, on the activities of municipal criminal justice agencies and the level of resources provided to them. Finally, the chapter will provide data on the activities of the Goodyear Municipal Court.

## POPULATION

	1995	1996	1997	1998	1999	2000	2001	2002
Population	9,595	10,215	12,205	14,305	17,085	19,695	22,820	26,715
% Change	15.4%	6.5%	19.5%	17.2%	19.4%	15.3%	15.9%	17.1%

Population information provided by the Arizona Department of Economic Security.

Table 3-55 shows the actual or estimated population for the City of Goodyear for the eight-year period from 1995 to 2002. The table shows that the population for the City of Goodyear has grown from 9,595 residents in 1995 to 26,715 in 2002, which represents a 178.4 percent increase over the eight-year period.

## REPORTED CRIME DATA

Table 3-56 presents data regarding the number of crimes reported in the City of Goodyear. The data show that the Part I offenses reported have increased since 1995. The total number Part I crimes reported increased 84.9 percent over the eight-year period. Violent offenses reported increased 143.8 percent from 1995 through 2002, while property offenses reported increased 82.0 percent.

## ***FINDINGS***

- Lake Havasu City is the 12<sup>th</sup> largest city in Arizona.
- Over the eight-year period from 1995 to 2002 Lake Havasu City was the 17<sup>th</sup> fastest growing city of those studied in Arizona.
- Lake Havasu City has experienced 27.9 percent increase in population from 36,285 in 1995 to 46,400 in 2002.
- Lake Havasu City was comprised of 0.9 percent of the total state population in 1995 and 0.8 percent in 2002.
- Total Part II Drug arrests decreased 25.0 percent for adults and decreased 41.7 percent for juveniles between 1995 and 2002.
- Total Part I crimes reported decreased 3.7 percent from 1995 to 2002.
- Total arrests for Part I crimes decreased 15.6 percent for adults and decreased 16.7 percent for juveniles between 1995 and 2002.
- The number of adults arrested for Part I Violent Offenses decreased 24.6 percent and the number of juveniles arrested decreased 83.3 percent between 1995 and 2002.
- The number of adults arrested for Part I Property Offenses decreased 13.7 percent and the number of juveniles arrested decreased 9.3 percent between 1995 and 2002.
- The total city budget increased 59.4 percent while the amount allotted to the police department increased 67.1 percent.

# CITY OF MARANA

This portion of the *2003 White Paper* will present available data regarding population, the levels of reported crime and numbers of arrests for the City of Marana. In addition, this chapter will provide information, where available, on the activities of municipal criminal justice agencies and the level of resources provided to them. Finally, the chapter will provide data on the activities of the Marana Municipal Court.

## POPULATION

	1995	1996	1997	1998	1999	2000	2001	2002
Population	5,160	5,960	6,920	9,965	12,350	15,185	15,765	17,770
% Change	44.5%	15.5%	16.1%	44.0%	23.9%	23.0%	3.8%	12.7%

Population information provided by the Arizona Department of Economic Security.

Table 3-81 shows the actual or estimated population for the City of Marana for the eight-year period from 1995 to 2002. The table shows that the population for the City of Marana has grown from 5,160 residents in 1995 to 17,770 in 2002, which represents a 244.4 percent increase over the eight-year period.

## REPORTED CRIME DATA

Table 3-82 presents data regarding the number of crimes reported in the City of Marana. The data show that the Part I offenses reported have increased since 1995. The total number Part I crimes reported increased 35.6 percent over the eight-year period. Violent offenses reported decreased 3.2 percent from 1995 through 2002, while property offenses reported increased 37.0 percent.

## ***FINDINGS***

- The City of Marana is the 27<sup>th</sup> largest city in Arizona.
- Over the eight-year period from 1995 to 2002 the City of Marana was the second fastest growing city of those studied in Arizona.
- The City of Marana has experienced 244.4 percent increase in population from 5,160 in 1995 to 17,770 in 2002.
- The City of Marana was comprised of 0.1 percent of the total state population in 1995 and 0.3 percent in 2002.
- Total Part II Drug arrests decreased 5.5 percent for adults and increased 150.0 percent for juveniles between 1995 and 2002.
- Total Part I crimes reported increased 35.6 percent from 1995 to 2002.
- Total arrests for Part I crimes decreased 29.7 percent for adults and increased 57.9 percent for juveniles between 1995 and 2002.
- The number of adults arrested for Part I Violent Offenses decreased 15.4 percent and the number of juveniles arrested increased 200 percent between 1995 and 2002.
- The number of adults arrested for Part I Property Offenses decreased 31.8 percent and the number of juveniles arrested increased 55.4 percent between 1995 and 2002.
- The total city budget increased 191.6 percent while the amount allotted to the police department increased 52.9 percent.

# CITY OF MESA

This portion of the *2003 White Paper* will present available data regarding population, the levels of reported crime and numbers of arrests for the City of Mesa. In addition, this chapter will provide information, where available, on the activities of municipal criminal justice agencies and the level of resources provided to them. Finally, the chapter will provide data on the activities of the Mesa Municipal Court.

All budget figures should be ADOPTED GENERAL FUND EXPENDITURE figures.

Numbers were obtained from Fiscal Management Bureau.

FY1995 sworn personnel totals are not readily available through Fiscal Management Bureau.

\*\* Authorized positions based on FTE. May not match other published numbers due to inclusion/exclusion of some classifications (i.e. employees on active military duty).

Table 3-126 contains selected workload and activity data for the Phoenix Police Department as provided by the agency. The data show that the number of dispatched and callback calls for service decreased 4.3 percent between 1995 and 2002. During this same time period, traffic citations decreased 16.2 percent, DUI booked and cited cases increased 25.5 percent, and traffic accidents decreased 2.4 percent.

(0) Includes adult and juvenile arrests based on Uniform Crime Reporting (UCR) standards and counts only the first charge.

(1) From Chief's Management Summary. Includes dispatched and callback calls for service, not all incoming calls.

(2) From Chief's Management Summary. Priority 1 calls for service. Priority 1 calls are crimes in progress or just occurred, of a serious nature or with a degree of immediate personal danger or harm. Including, but not limited to, Homicide, Sexual Assault, Shooting, Stabbing, Fights with weapons, Armed Robbery, Burglary, Kidnapping, or Domestic Violence.

(3), (4), (5), (6), (7) From monthly TADS (Traffic Accident Data System) report.

(3) Traffic citations are a count of charges, not citations issued. More than one charge can be issued per citation.

(4) DUI Charges. Counts each charge in an incident. May be more than one charge per arrest. Previous reports contained charge totals.

(5) Total Booked & Cited for DUI counts one per person not one per charge.

(7) Counts for collisions and not fatalities. Multiple fatalities may have occurred at a collision.

(8) Counts for individual cases (people) submitted based on the date of submission.

## ***CITY PROSECUTOR***

Table 3-127 contains basic data regarding the budget and personnel resources available to the Phoenix Prosecutor's Office. The data show that the budget for the Office increased 5.4 percent from 1995 through 2002. The percentage of the city budget allocated to the Prosecutor's Office decreased from 0.7 percent in 1995 to 0.6 percent in 2002. The number of attorneys increased 16.7 percent and the total number of employees increased 18.4 percent during the same period.

## ***FINDINGS***

- The City of Phoenix is the largest city in Arizona.
- Over the eight-year period from 1995 to 2002 the City of Phoenix was the 18<sup>th</sup> fastest growing city of those studied in Arizona.
- The City of Phoenix has experienced 26.1 percent increase in population from 1,082,610 in 1995 to 1,365,675 in 2002.
- The City of Phoenix was comprised of 25.6 percent of the total state population in 1995 and 25.0 percent in 2002.
- Total Part II Drug arrests increased 6.0 percent for adults and decreased 51.3 percent for juveniles between 1995 and 2002.
- Total Part I crimes reported decreased 6.7 percent from 1995 to 2002.
- Total arrests for Part I crimes decreased 28.0 percent for adults and decreased 28.4 percent for juveniles between 1995 and 2002.
- The number of adults arrested for Part I Violent Offenses decreased 8.5 percent and the number of juveniles arrested decreased 40.5 percent between 1995 and 2002.
- The number of adults arrested for Part I Property Offenses decreased 31.3 percent and the number of juveniles arrested decreased 26.5 percent between 1995 and 2002.
- The total city budget increased 73.7 percent while the amount allotted to the police department increased 71.1 percent.

# CITY OF PRESCOTT

This portion of the *2003 White Paper* will present available data regarding population, the levels of reported crime and numbers of arrests for the City of Prescott. In addition, this chapter will provide information, where available, on the activities of municipal criminal justice agencies and the level of resources provided to them. Finally, the chapter will provide data on the activities of the Prescott Municipal Court.

## POPULATION

## ***FINDINGS***

- The City of Tempe is the seventh largest city in Arizona.
- Over the eight-year period from 1995 to 2002 the City of Tempe was the 23<sup>rd</sup> fastest growing city of those studied in Arizona.
- The City of Tempe has experienced 2.5 percent increase in population from 155,610 in 1995 to 159,425 in 2002.
- The City of Tempe was comprised of 3.7 percent of the total state population in 1995 and 2.9 percent in 2002.
- Total Part II Drug arrests increased 4.6 percent for adults and decreased 32.7 percent for juveniles between 1995 and 2002.
- Total Part I crimes reported increased 20.8 percent from 1995 to 2002.
- Total arrests for Part I crimes decreased 9.8 percent for adults and decreased 21.3 percent for juveniles between 1995 and 2002.
- The number of adults arrested for Part I Violent Offenses increased 28.4 percent and the number of juveniles arrested decreased 3.3 percent between 1995 and 2002.
- The number of adults arrested for Part I Property Offenses decreased 15.8 percent and the number of juveniles arrested decreased 23.0 percent between 1995 and 2002.
- The total city budget increased 88.8 percent while the amount allotted to the police department increased 89.5 percent.

# CITY OF TUCSON

This portion of the *2003 White Paper* will present available data regarding population, the levels of reported crime and numbers of arrests for the City of Tucson. In addition, this chapter will provide information, where available, on the activities of municipal criminal justice agencies and the level of resources provided to them. Finally, the chapter will provide data on the activities of the Tucson Municipal Court.

### ***CITY PROSECUTOR***

Table 3-186 contains basic data regarding the budget and personnel resources available to the Yuma Prosecutor's Office. The data show that the budget for the Office decreased 3.2 percent from 2001 through 2002. The percentage of the city budget allocated to the Prosecutor's Office decreased from 0.5 percent in 2001 to 0.4 percent in 2002.

Table 3-187 shows the workload and activity indicators for the Yuma Prosecutor's Office as provided by the agency. The data show that the number of cases submitted for prosecution increased by 39.6 percent from 2001 through 2002 and the total number of complaints increased 29.3 percent during that time.

### ***MUNICIPAL COURT***

Table 3-188 show the activity of the City of Yuma Municipal Court. The table shows that the number of criminal case filings increased 14.1 percent since 1995. During the same period, the total number of cases disposed increased 46.3 percent. Civil traffic cases made up the bulk of the increase in activity with civil traffic case filings increasing by 53.5 percent dispositions increasing 89.1 percent from 1995 to 2002.

## ***FINDINGS***

- The City of Yuma is the 10<sup>th</sup> largest city in Arizona.
- Over the eight-year period from 1995 to 2002 the City of Yuma was the 10<sup>th</sup> fastest growing city of those studied in Arizona.
- The City of Yuma has experienced 34.6 percent increase in population from 60,475 in 1995 to 81,380 in 2002.
- The City of Yuma was comprised of 1.4 percent of the total state population in 1995 and 1.5 percent in 2002.
- Total Part II Drug arrests increased 2.2 percent for adults and decreased 35.8 percent for juveniles between 1996 and 2002.
- Total Part I crimes reported decreased 14.1 percent from 1996 to 2002.
- Total arrests for Part I crimes decreased 44.7 percent for adults and decreased 27.3 percent for juveniles between 1996 and 2002.
- The number of adults arrested for Part I Violent Offenses decreased 19.4 percent and the number of juveniles arrested decreased 15.6 percent between 1996 and 2002.
- The number of adults arrested for Part I Property Offenses decreased 55.1 percent and the number of juveniles arrested decreased 29.3 percent between 1996 and 2002.
- The total city budget increased 36.1 percent while the amount allotted to the police department increased 38.2 percent.

## SUMMARY FINDINGS

This publication is a compilation of data from multiple sources and is intended to provide a comprehensive overview of the criminal justice system in Arizona. While growth is prevalent in many communities around the country, the reader is reminded that Arizona is unique in the tremendous population influx as well as having a 39 percent growth in the number of persons under 18 between 1990 and 2000.. That growth coupled with the vast land mass of the state and the independent nature of its citizens provides unique challenges for policy makers when confronted with criminal justice issues in Arizona. The data presented in this report suggest that there are a number of crime trends evolving throughout the state. These trends need to be analyzed carefully by policy and decision-makers at both the executive and legislative levels in order to develop or modify strategies, and/or policies to deal with crime and the protection of the citizens of Arizona.

Below is a list of some of the key findings of this report.

### Population

- The state's 2002 population of 5,472,750 ranks it as the 23rd most populous state in the United States, according to *State Rankings*.
- During the period 1995 to 2002, Arizona's population increased 29.4 percent. Population increases of this size must result in an impact on all systems of government.
- By 2025, Arizona is projected to be the 15<sup>th</sup> most populous state with a projected population in 2025 of 6.4 million residents.
- From 1990 to 2000, the total number of people ages 16 to 24 increased 33.7 percent. Again, increases in this age group may have a significant impact on the criminal justice system.
- The male population age 18 to 24 increased 35.0 percent, while the female population increased 29.8 percent in the same age category.

### Crime

- Rape had the largest increase of Reported Violent Offense from 1995 to 2002 with a 14.8 percent increase. Due to the severity and impact of this crime, it is bound to have an effect on all components of the criminal justice system, particularly prosecution, courts, and corrections.
- Motor Vehicle Theft had the largest increase in Reported Property Offense from 1995 to 2002 with an 18.2 percent increase. The state of Arizona leads the nation in motor vehicle theft by a very large margin.
- Arrests for vehicle thefts increased 92.2 percent, while all of the other Part I Property Offense categories showed declines.

- Arrests for robbery increased 13.3 percent, while all of the other Part I Violent Offense categories showed declines.
- Adult Part II Drug Offense arrests increased 27 percent from 1995 to 2002.
- Adult arrests for possession of drugs increased 37.2 percent between 1995 to 2002.
- The statewide percentage of the total General Fund budget allocated to the criminal justice system has declined from 19.0 percent 1999 to 16.5 percent in 2002.
- The percentage of parole hearings resulting in denials increased from 54 percent in FY1995 to 70 percent in FY2002.
- There were 12,924 revocation hearings between FY1995 and FY2002 with 11,835 or 91.6 percent resulting in parole being revoked.

## **Funding**

- The State General Fund increased 57.7 percent from 1995 to 2002.
- Criminal Justice funding from the State General Fund increased 70.6 percent from 1995 to 2002.
- The percentage of the State General Fund allotted to state-level criminal justice increased from 12.0 percent in 1995 to 12.6 percent in 2002.

## **Counties**

### ***Population***

- All fifteen counties experienced growth from 1995-2002. Of the 15 counties, Greenlee County showed the least growth at 1.8 percent and Maricopa County showed the most growth at 34.3 percent.
- In 2002, Maricopa County contained 60 percent of the total state population and Pima County contained 16.3 percent for a combined total of 76.3 percent of the state's population.
- From 1990 to 2000, the total number of people ages 16 to 24 increased in every county except Apache County. The increases in this at-risk age group may impact the criminal justice system significantly.
- From 1990 to 2000, thirteen counties experienced population growth of males and females ages 18 to 24. However, in Apache and La Paz counties the population of both genders in this age group decreased.

### ***Crime***

- Part I crimes decreased in 11 of the 15 counties from 1995 to 2002. Cochise, La Paz, Gila and Yuma Counties showed an increase.
- Total juvenile referrals decreased from 1996-2002 for 13 of the 15 Counties. Santa Cruz and Graham Counties showed an increase.
- Female Juvenile offenders from 1996-2002 showed an increase in referrals in all but Coconino, Greenlee and La Paz Counties.
- From 1996 to 2002, females ages 8 to 12 showed an increase in referrals in all but Apache, Mohave, Navajo and Santa Cruz Counties.

### ***Funding***

- The percentage of the county General Funds allotted to criminal justice increased from 40.2 percent in 1995 to 43.6 percent in 2002.
- In 13 counties, the percentage of the county General Fund allotted to criminal justice increased from 1995 to 2002. Maricopa and Mohave Counties decreased slightly.
- The county General Funds increased 42.4 percent from 1995 to 2002.
- The total criminal justice funds from the county General Funds increased 54.4 percent from 1995 to 2002.

## CONCLUSION

The 2003 edition of the "White Paper" contains and presents a large volume of criminal justice and population data. New technology has allowed data sets to be much more complete than were utilized in the earlier study and they present a more thorough and complex picture of the status of the criminal justice system as it exists today. Since the 1995 data collection, collaboration to share information and the ability to electronically disseminate data allowed for more comprehensive and complete data sets.

The value of this report and data will ultimately be determined by the reader. Criminal justice experts, practitioners, scholars, and policy makers have asked for this type of information to have a foundation and basis to discuss issues and to formulate proper responses to the problems that vex the system. Issues of population growth, the lack of corresponding growth in budgets, the rise and fall of index crimes, and their influence upon prosecution, the courts, and corrections all have an enormous impact on the lives of everyday citizens of Arizona. Although these impacts may not be readily evident, they are felt in the attitudes that impact neighborhood life, the workplace, and recreation in every individual's life in our state. The consciousness of the public regarding crime and criminals is reflected in activities in everyday life, and thus has an effect upon the lifestyle of all citizens.

The importance and availability of accurate data is quite apparent to policy makers, elected officials, and other practitioners in the area of criminal justice. Discussions have been occurring for quite some time regarding the need for increased emphasis on resources to address crime and the criminal justice system, but in many instances, these have not been supported by empirical data that clearly illustrates the issues and trends that are affecting the system. These data sets hopefully show the relationship of budgets, the dramatic rise in population, and resources of agencies to control and reduce crime in Arizona. The data presented in this *White Paper* should provide officials and criminal justice personnel in Arizona with current and relevant information related to factors that influence the system.

Information systems within the criminal justice system were of immense value to the study in that they provided vast amounts of information that was previously not available electronically in the 1995 study. However, much remains to be done and therefore, continued improvements of these systems will be required over the coming years. There is also a need to have general agreement on definitions of terminology within information systems as demonstrated by the differing data elements within various components of this report. In many instances, counties did not have the same budgetary categories as other counties, and therefore, great care had to be taken in order to assure continuity and uniformity in the information that was presented.

When compiling the data for this report, the ACJC Statistical Analysis Center had some difficulty retrieving statistical information, particularly data pertaining to the prosecution of criminals within Arizona. One major contributing factor to the collection limitations is that there is no central agency or organization which tracks prosecution information statewide. There are also substantial differences in the terminology associated with key reporting measures for individual counties. An established reporting format for counties to submit prosecution data on a statewide level is also lacking. Finally, there were limitations presented by several of the county attorney offices in regard to the reporting capabilities of their current case management systems. As a result, reliable comparisons between

counties were not possible. It is recommended that future efforts look at standardizing data elements for reporting and analysis purposes.

In Arizona, the Department of Economic Security is the official source for state demographic information. The staff was quite helpful and thorough in filling our requests for data. However, it came to light that current, single-year age and gender projections were not available and are not routinely maintained. The last set of projections was released in 1997 and was based on the 1996 estimates. Additionally, the last available projections were only done by single year for ages 0-19, leaving out the 20-24 age group; crucial to law enforcement and criminal justice agencies is information on the critical, at-risk of offending 16-24 male age group. Yearly population estimates are generated by DES, but they are not broken down by age or gender. In the past, the projection model employed by DES has been used to generate an approximation of the population by age and gender, but only at the county level and this has never been an official product of DES. However, even this kind of unofficial, working estimate was not possible to generate using 2000 as the base year because key county and city migration information from the 2000 Census was not available at the time of publication.

Single-year age and gender population information at various geographic scales is quite useful to a number of agencies including law enforcement, criminal justice planning, health care and education. Given this benefit, the development and routine maintenance of an official DES product that would provide such estimates should be made a priority in Arizona. Without a clearly designated priority for the creation of such a product, limited resources and the volume of demands would leave this priority at-risk especially in a climate of increased need to reduce budgets.

Arizona's criminal justice system will face many challenges in the coming years. The state population increased from 4,228,900 in 1995 to 5,472,750 in 2002. The population increase for the at-risk population (16-24) increased over 30 percent from 1990 to 2000. Projections are that the state will continue to show a population increase above the national average and by 2025 the population will be 6.4 million residents. The criminal justice system workload has shown a dramatic increase since 1995 at the state, county and local levels. One example would be the Superior Courts workload, which disposed of 65.4 percent more criminal cases in 2002 than in 1995. Arizona will need to continue to explore new avenues and continue implementing more effective and efficient methods of addressing crime. It is also imperative that criminal justice agencies continue to coordinate resources and policy in order to reduce crime.

The total number of adults arrested for Part I crimes, as reported to UCR by reporting agencies, decreased 14.1 percent during the eight-year period, while arrests for Part I Violent Offenses had a slight 1.0 percent increase. Total Part I Property Offense adult arrests decreased 17.4 percent from 1995 through 2002. Arrests for vehicle thefts increased 92.2 percent, while all of the other Property Offense categories showed declines. There was an increase of 27.0 percent in arrests for adult Part II Drug Offenses in the state. Arrests for sale or manufacturing of drugs by adults declined 4.4 percent, while adult arrests for possession increased 37.2 percent. The total number of adult arrests for all Part II offenses statewide increased 14.2 percent over the eight-year period from 1995 through 2002.

Total Part I Juvenile Arrests decreased by 26.8 percent from 1995 to 2002. Arrests of juveniles involved in violent crimes decreased 29.8 percent. Total Part I Property Offense arrests of juveniles decreased 26.3 percent from 1995 through 2002. Total juvenile arrests for Part II Drug Offenses

decreased 3.4 percent statewide. Arrests for sale or manufacturing of drugs decreased 32.6 percent during the eight year period. Arrests for possession increased 0.9 percent. Total Part II juvenile arrests decreased 22.7 percent during the eight year period.

While the number of arrests for Part I crimes did not increase substantially, the total population of inmates committed to the Arizona Department of Corrections (ADC) increased from 21,133 in 1995 to 29,273 in 2002, a 38.5 percent increase in eight years. This also shows that 8,140 more inmates are committed to the Department of Corrections in 2002 than were in 1995. The number of inmates in prison for Part I violent crimes increased from 6,757 in 1995 to 9,843 in 2002, a 41.5 percent increase. The number of inmates in prison for Part I property crimes increased from 4,309 in 1995 to 5,019 in 2002, a 16.5 percent increase. The number of inmates in prison for drug crimes increased from 4,533 in 1995 to 5,511 in 2002, a 21.6 percent increase. In 2002, the population of inmates age 18 to 25 committed to ADC was 5,407 compared to 3,988 in 1995, a 35.6 percent increase. The inmates in this age group made up 18.5 percent of the total inmate population in 2002 compared to 18.9 percent of the total inmate population in 1995.

Sheriff Departments in Arizona from 1996 to 2002 experienced a 48.6 percent growth in agency budgets. This growth is reflected in the 6.5 percent increase in the total personnel employed by these departments from 2000 to 2002. During the same time period, the number of sworn personnel increased 11.8 percent. The average daily population in the jails increased from 10,665 in 2000 to 12,335 in 2002, a 15.7 percent increase. This increase is indicative of the overall workload increase for these departments. An aggregate total of workload by category for the Sheriff Departments was not possible in all cases due to the inability of some agencies to provide all of the data requested.

The criminal justice community is facing current financial pressures placing more and more emphasis on grants and soft money. These financial pressures are influenced by several sources including increased workloads, increased security due to terrorism, increasing populations, crime associated with illegal immigration, and increased drug use. Adequate stable funding is always a concern and it is unrealistic in the current budget and economic climate to expect Arizona's General Funds to be able to address all of these competing issues. Priorities will need to be established and it is one of the purposes of the White Paper to provide the data from which to formulate those priorities.

Some progress towards stability has been made since the original White Paper was published in 1995. The Jail Tax Districts approved and created by the voters to collect and use excise taxes to fund the building and maintenance of jails have increased from one county, La Paz, participating in 1995, to five counties currently using this method of funding. These counties, Coconino, La Paz, Maricopa, Yavapai and Yuma have found these taxes to be a stable funding source. However, most have seen a reduction in General Fund moneys after the tax was approved, so while the funding is more stable the actual funding level did not increase substantially. Apache County uses a similar concept by funding its juvenile and adult facilities through property taxes.

Using special taxes is but one example of dedicated funding sources for specific purposes. While the current economic climate of Arizona may not be favorable to finding new funding sources, dedicated funding should be evaluated as a tool for consideration in better economic times. These methods allow for stable funding that supplements the amounts that criminal justice receives from General Funds and helps eliminate the competition for scarce resources.

Another difficulty facing the criminal justice system in Arizona is the lack of integrated information systems that would allow criminal justice agencies to more easily share information and the lack of a coordinated communication system for law enforcement. Deficiencies will be costly to address, and may affect not only the day-to-day ability of officers to perform their job, but also the ability of law enforcement to adequately address issues concerning terrorism and public safety.

The data collection process for this White Paper, with the exception of prosecution data, saw an increase in the ability of agencies to provide data since the original White Paper in 1995 due to improved computer information systems. One of the major instruments of data collection and data sharing for the criminal justice community in Arizona is Uniform Crime Reporting, known as UCR. This data allows for comparison of arrests and crime over time and across agencies. Unfortunately, several agencies have had difficulty providing this vital information to the Department of Public Safety. Since the White Paper published in 1995, more agencies are providing this data, but the agencies that are currently not able to provide the data have also not provided data in the past. This makes it impossible to get a complete count of the number of crimes and arrests reported in Arizona. In order for Arizona to be able to fight crime more effectively, these agencies need to have computer information systems that are capable of producing UCR information. While computer information systems in Arizona's law enforcement agencies have improved dramatically since 1995, there is still much improvement to be made.

And finally, Arizona, along with the rest of the nation, will experience increased demands upon the criminal justice system. This is due to higher levels of security necessary to address the threat of terrorism that was not even considered when the 1995 study was produced. The September 11, 2001 terrorist attack demonstrated the vulnerability of our current systems and presented a demand and necessity for unanticipated funding to address security issues. Security issues will continue to be a major consideration and will continue to have an effect on the criminal justice system and its resources.

Several issues were identified within this report that are systemic in nature and therefore impact the entire criminal justice community. One significant example is the inability to obtain accurate projections by age and gender for males between the ages of 18 and 24. Since the group that is most at-risk for entering the criminal justice system is males between the ages of 16 and 24, the inability to project population growth for this group must be addressed.

Tied to the need for accurate projections is the need for further research into current criminal justice issues. These issues include, but are not limited to, motor vehicle theft, terrorism, budgets, data resources and illegal immigration. Timely and accurate research gives the criminal justice system one more tool with which to effectively fight crime. As this version of the White Paper illustrates, electronic transfer of data between agencies is highly desirable because it creates the ability to more effectively illustrate the present day issues and problems that are faced by the system. Research, information sharing and the collection of meaningful data are seriously limited by outdated computer information systems. Substandard computer information systems limit the ability of criminal justice agencies to communicate information effectively between agencies, including various judicial decisions and criminal history information. This in turn hampers the efficiency and effectiveness of the entire system.

More than ever before the criminal justice system in Arizona has and will be asked to demonstrate effectiveness and quantifiable results. The ability to respond to these types of questions can only

come from having accurate data, reliable and available projection information, up-to-date research, effective integrated information systems and stable funding.

In summary, the expectations from the citizens of the state of Arizona have changed since the 1995 White Paper. The tragic event of September 11, 2001 touched and changed the lives of all Americans. The bar has been raised in terms of what will be expected from the criminal justice system. The citizens of Arizona and the nation will need a criminal justice system that is integrated, collaborative, and able to respond to the challenges it will face. The criminal justice system will need to demonstrate more than ever that it is not only able to respond but that it has increased its level of preparedness and responsiveness to the new challenges it will encounter.
