## FOREWORD

*Crime in the United States* contains statistical documentation of criminal activity that has taken place in our country during the past year. Its various tables and graphs provide a measurement of crime that has been proven through five decades to be a valuable aid to the law enforcement community. The data represent much more; they depict a national problem shared jointly by every aspect of American society.

The real impact of crime cannot be demonstrated in statistical terms. These pages do not depict, for example, the anger, fear, and frustration suffered by the victims of crime. We cannot see the pain and heartache endured by the families of murder victims, including 78 law enforcement officers feloniously killed in the line of duty. The vast economic burden resulting from criminality, direct losses as well as enormous costs for maintaining a criminal justice apparatus to prevent, detect, and punish those responsible, is not portrayed. From these pages, we cannot discern the long hours, the arduous efforts, and the sacrifices made by our dedicated law enforcement agencies to thwart crime and apprehend lawbreakers.

Crime figures represent a full range of detrimental effects upon our society. Thus, decreases in crime rates are indeed welcomed news. From 1982 to 1984, we experienced such declines. In 1985, however, a reversal of that trend took place. The overall Crime Index increased by 5 percent, and violent crime alone rose by 4 percent. There are few social statements more tragic than these.

Plausible explanations for crime fluctuations are frequently offered, but their accuracy is often questionable and certainly controversial. Law enforcement remains diligent; our citizenry has increasingly taken an active role in the fight against lawlessness. Yet, we see crime rising.

Whatever the reasons for the crime increase last year, the course we must take is clear. It is up to all of law enforcement, the criminal justice community, and of course, each and every citizen to do more. We must take full advantage of every resource available to fight crime; to enact laws that protect the public while ensuring that lawbreakers are brought to justice; to direct our research, our strategies, our funding, our training, and our manpower to their most effective ends, not only to solve crime but also to prevent it.

The Uniform Crime Reporting Program is presently undergoing great changes. The "Blueprint for the Future of the Uniform Crime Reporting Program" is designed to provide a very specific, comprehensive valuation of crime on local, state, and national levels. The better we understand the character and dimensions of lawlessness, the better our chances to control crime and return to the decreases of recent years.

William H. Webster  
Director

## CRIME FACTORS

The presence of crime in our Nation is a matter of serious concern not only to the law enforcement profession, but to society at large. Historically, the causes and origins of crime have been the subjects of investigation by varied disciplines. Many factors affecting the volume and type of crime occurring from place to place have been delineated. Some of these are as follows:

- Population density and degree of urbanization with size of locality and its surrounding area.
- Variations in composition of the population, particularly youth concentration.
- Stability of population with respect to residents' mobility, commuting patterns, and transient factors.
- Modes of transportation and highway system.
- Economic conditions, including median income, destitution, and job availability.
- Cultural conditions, such as educational, recreational, and religious characteristics.
- Family conditions with respect to divorce and family cohesiveness.
- Climate.
- Effective strength of law enforcement agencies.
- Administrative and investigative emphases of law enforcement.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
- Attitudes of citizenry toward crime.
- Crime reporting practices of citizenry.

The Uniform Crime Reports give a nationwide view of crime based on statistics contributed by state and local law enforcement agencies. Population size is the only correlate of crime utilized in this publication. While the other factors listed above are of equal concern, no attempt is made to relate them to the data presented. *The reader is, therefore, cautioned against comparing statistical data of individual reporting units from cities, counties, states, or colleges and universities solely on the basis of their population coverage or student enrollment.*

# SECTION I

## SUMMARY OF THE UNIFORM CRIME REPORTING PROGRAM

The Uniform Crime Reporting (UCR) Program is a nationwide cooperative venture of nearly 16,000 city, county, and state law enforcement agencies which voluntarily report data on crimes brought to their attention. Serving as a national clearinghouse, the FBI has tabulated the data produced by the Program for over 5 decades, and throughout the years, has issued periodic assessments of the nature and type of crime in the Nation. Although its primary objective is to generate a reliable set of criminal statistics for use in law enforcement administration, operation, and management, the Program's data have become one of the leading social indicators in the country. The American public looks to UCR for information on fluctuations in the level of crime, while criminologists, sociologists, legislators, municipal planners, the press, and other students of criminal justice use the statistics for varied research and planning purposes.

### Historical Background

In the 1920s, the International Association of Chiefs of Police (IACP) recognized a need for national crime statistics and formed the Committee on Uniform Crime Records to develop a system of uniform police statistics. After studying state criminal codes and making an evaluation of the recordkeeping practices in use, the Committee in 1929 completed a plan for crime reporting which became the foundation of the UCR Program.

Since offenses known to law enforcement were the most readily available crime information, the Committee elected to survey local agencies to obtain data on crimes brought to their attention. Realizing that not all crimes are reported, the Committee evaluated various offenses on the basis of their seriousness, frequency of occurrence, pervasiveness in all geographic areas of the country, and likelihood of being reported to law enforcement. Using those criteria, seven offenses were chosen to serve as an Index for gauging fluctuations in the overall volume and rate of crime. Known jointly as the Crime Index, these offenses included the violent crimes of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault and the property crimes of burglary, larceny-theft, and motor vehicle theft. By congressional mandate, arson was added as the eighth Index offense in 1979.

During the early planning of the Program, it was recognized that the differences among criminal codes precluded a mere aggregation of state statistics to arrive at a national total. Further, because of the variances in

punishment for the same offenses in different state codes, no distinction between felony and misdemeanor crimes was possible. To avoid these problems and provide nationwide uniformity in crime reporting, standardized offense definitions were formulated. Today, as at the Program's outset, law enforcement agencies submit data in accordance with the UCR standard definitions without regard for local statutes. The definitions used by the Program are set forth in Appendix II of this publication.

In January 1930, 400 cities representing 20 million inhabitants in 43 states began participating in the UCR Program. In that same year, Congress enacted legislation under Title 28, Section 534, of the United States Code authorizing the Attorney General to gather crime information. The Attorney General, in turn, designated the FBI to serve as the national clearinghouse for the data collected. Since that time, data based on uniform classifications and procedures for reporting have been obtained from the Nation's law enforcement agencies.

Throughout its more than 50 years of operation, the Program has remained virtually unchanged in terms of the data collected and disseminated. As time progressed, evaluations of the Program were suggested, and one study was conducted in 1958. By the 1980s, a broad utility had evolved for UCR, and law enforcement had expanded its capabilities to supply information related to crime. When a thorough evaluative study of UCR was again proposed, an immediate review of the Program seemed appropriate.

The Bureau of Justice Statistics (BJS), recognizing its role in the wide spectrum of national criminal justice statistics, agreed to underwrite a comprehensive UCR Program study and redesign effort comprised of three phases. To be conducted by an independent contractor, the first two phases were structured to determine what, if any, changes should be made to the current Program. The third phase would involve implementation of the changes identified. Abt Associates Inc. of Cambridge, Massachusetts, overseen by the FBI, BJS, and a Steering Committee comprised of prestigious individuals representing a myriad of disciplines, commenced the first of the three phases in 1982.

During the first phase, the historical evolution of the Program was examined. All aspects of the Program, including the objectives and intended user audience, data items, reporting mechanisms, quality control, publications and user services, and relationships with other criminal justice data systems, were studied.

Early in 1984, a conference on the future of UCR was held in Elkridge, Maryland. This meeting launched the second phase of the study, which would examine alternative potential futures for UCR and conclude with a set of recommended changes. Attendees at this conference reviewed work conducted during the first phase and discussed the potential changes that should be considered during phase two.

Findings from the evaluation's first phase and input on the alternatives for the future being developed in phase two were also major topics of discussion at the seventh National UCR Conference in July, 1984. Overlapping these two phases was a survey of law enforcement agencies.

Phase two ended in early 1985 with the production of a draft "Blueprint for the Future of the Uniform Crime Reporting Program." The study's Steering Committee reviewed the draft report at a March, 1985, meeting and made various recommendations for revision. The Committee members, however, endorsed the report's concepts.

In April, 1985, the phase two recommendations were presented at the eighth National UCR Conference. While various considerations for the final report were set forth, the overall concept for the revised Program was unanimously approved. The joint IACP/National Sheriffs' Association (NSA) Committee on UCR also issued a resolution endorsing the Blueprint.

The final report, the "Blueprint for the Future of the Uniform Crime Reporting Program," was released in the summer of 1985. It specifically outlines recommendations for an expanded, improved UCR Program to meet informational needs into the next century. With the first two phases now complete, the third and final phase will consist of implementing the adopted improvements. As implementation progresses, the amount of information available will greatly increase, and UCR can better serve its large and varied audience.

#### **Advisory Groups**

Providing vital links between local law enforcement and the FBI in the conduct of the UCR Program are the IACP and the NSA. The IACP's Committee on Uniform Crime Records, as it has since the Program began, represents the thousands of police departments nationwide. The NSA's Committee on Uniform Crime Reporting, established in June, 1966, encourages sheriffs throughout the country to fully participate in the Program. Both committees serve in advisory capacities concerning the UCR Program's operation.

The Association of State Uniform Crime Reporting Programs and committees on UCR within individual state law enforcement associations are also active in promoting interest in the UCR Program. These organizations foster

widespread and more intelligent use of uniform crime statistics and lend assistance to contributors when the need arises.

#### **Methods of Data Collection**

The information compiled by UCR contributors is forwarded to the FBI either directly from the local law enforcement agency or through a state-level UCR Program. Agencies submitting directly to the FBI are provided continuing guidance and support on an individual basis.

State-level UCR Programs are very effective intermediaries between the FBI and its local contributors. Many of the 41 state Programs have mandatory reporting requirements and collect data beyond the national UCR scope to address crime problems germane to their particular locales. In most cases, these agencies are also able to provide more direct and frequent service to participating law enforcement agencies, to make information more readily available for use at the state level, and to contribute to more streamlined operations at the national level.

With the development of a state UCR Program, the FBI ceases direct collection of data from individual law enforcement agencies within the state. Instead, information from local agencies is forwarded to the national Program through the state data collection agency.

The conditions under which these systems are developed ensure consistency and comparability in the data submitted to the national Program, as well as provide for regular and timely reporting of national crime data. These conditions are: (1) The state Program must conform to national Uniform Crime Reports' standards, definitions, and information requirements. The states are not, of course, prohibited from collecting other statistical data beyond the national requirements. (2) The state criminal justice agency must have a proven, effective, statewide Program and have instituted acceptable quality control procedures. (3) Coverage within the state by a state agency must be, at least, equal to that attained by the national Uniform Crime Reports. (4) The state agency must have adequate field staff assigned to conduct audits and to assist contributing agencies in record practices and crime reporting procedures. (5) The state agency must furnish to the FBI all of the detailed data regularly collected by the FBI in the form of duplicate returns, computer printouts, and/or magnetic tapes. (6) The state agency must have the proven capability (tested over a period of time) to supply all the statistical data required in time to meet national Uniform Crime Reports' publication deadlines.

To fulfill its responsibilities in connection with the UCR Program, the FBI continues to edit and review individual

agency reports for both completeness and quality; has direct contact with individual contributors within the state when necessary in connection with crime reporting matters, coordinating such contact with the state agency; and upon request, conducts training programs within the state on law enforcement records and crime reporting procedures. Should circumstances develop whereby the state agency does not comply with the aforementioned requirements, the national Program may reinstitute a direct collection of Uniform Crime Reports from law enforcement agencies within the state.

#### Reporting Procedures

Based on records of all reports of crime received from victims, officers who discover infractions, or other sources, law enforcement agencies across the country tabulate the number of Crime Index or Part I offenses brought to their attention during each month. Specifically, the crimes reported to the FBI are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson.

Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from an agency's count. The number of "actual offenses known" is reported to the FBI regardless of whether anyone is arrested for the crime, stolen property is recovered, or prosecution is undertaken.

Another integral part of the monthly submission is the total number of actual Crime Index offenses cleared. Crimes are "cleared" in one of two ways: (1) at least one person is arrested, charged, and turned over to the court for prosecution; or (2) by exceptional means when some element beyond police control precludes the arrest of an offender. Law enforcement agencies also report the number of Index crime clearances which involve only offenders under the age of 18; the value of property stolen and recovered in connection with the offenses; and detailed information pertaining to criminal homicide and arson.

In addition to its primary collection on Crime Index (Part I) offenses, the UCR Program solicits monthly data on persons arrested for all crimes except traffic violations. The age, sex, race, and ethnic origin of arrestees are reported by crime category, both Part I and Part II. Part II offenses include all crimes not classified as Part I.

Various data on law enforcement officers killed or assaulted are collected on a monthly basis. The number of full-time sworn and civilian personnel are reported annually, as of October 31.

#### Editing Procedures

Each report submitted to the UCR Program is thoroughly examined for arithmetical accuracy and for

deviations which may indicate errors. To identify any unusual fluctuations in an agency's crime counts, monthly reports are compared with previous submissions of the agency and with those for similar agencies. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in the jurisdiction's geopolitical structure.

Data reliability is a high priority of the Program and noted deviations or arithmetical adjustments are brought to the attention of the state UCR Program or the submitting agency through correspondence. A standard procedure of the FBI is to study the monthly reports and to evaluate periodic trends prepared for individual reporting units. Any significant increase or decrease is made the subject of a special inquiry. When it is found that changes in crime reporting procedures or annexations are influencing the level of crime, the figures for specific crime categories, or if necessary, totals are excluded from trend tabulations.

To assist contributors in complying with UCR standards, the national Program provides training seminars and instructional materials in crime reporting procedures. Throughout the country, liaison with state Programs and law enforcement personnel is maintained, and training sessions are held to explain the purpose of the Program, the rules of uniform classification and scoring, and the methods of assembling the information for reporting. When an individual agency has specific problems in compiling its crime statistics and remedial efforts are unsuccessful, FBI Headquarters' personnel may visit the contributor to aid in resolving the difficulties.

The *Uniform Crime Reporting Handbook*, which details procedures for classifying and scoring offenses, is supplied to all contributors as the basic resource document for preparing reports. Since a good records system is essential for accurate crime reporting, the FBI also furnishes the *Manual of Law Enforcement Records*.

To enhance communication among Program participants, the UCR "Newsletter" and State UCR Program "Bulletin" are utilized to address Program policy, as well as to present information and instructional material. These communications are produced as needed.

The final responsibility for data submissions rests with the individual contributing law enforcement agency. Although the Program makes every effort through its editing procedures, training practices, and correspondence to assure the validity of the data it receives, the statistics' accuracy depends primarily on the adherence of each contributor to the established standards of reporting. Deviations from these established standards which cannot be resolved by the national UCR Program may be brought to the attention of the Committee on

Uniform Crime Records of the IACP or the Committee on Uniform Crime Reporting of the NSA.

#### Reporting Area

The presentation of statistics by reporting area facilitates analyzing local crime counts in conjunction with those for areas of similar geographical location or population size. Geographically, the United States is divisible by regions, divisions, and states. As discussed in Appendix III, further breakdowns rely on population figures and proximity to metropolitan areas.

A Metropolitan Statistical Area (MSA) is an integrated economic and social unit with a recognized large population nucleus. Each has a central city of at least 50,000 population or an urbanized area of at least 50,000. The county containing the central city, as well as contiguous counties which meet specified criteria of metropolitan character and integration (designated suburban counties in UCR) are also included. Due to changes in the geographic compositions of MSAs, no year-to-year comparisons of data for those areas should be attempted.

Rural counties and "other cities," most of which are incorporated, are outside MSAs. As a general rule, sheriffs, county police, and state police report crimes committed within the limits of the counties but outside cities, while local police report crimes committed within the city limits.

Certain tables within this publication present statistics relative to "suburban" areas. A suburban area consists of cities with fewer than 50,000 inhabitants together with counties which are within an MSA. In this context, the central city is, of course, excluded. The concept of suburban area is especially important in a study of this nature because of the particular crime conditions which exist in the communities surrounding the Nation's largest cities.

During 1985, law enforcement agencies active in the UCR Program represented approximately 231 million United States inhabitants, or 97 percent of the total population as established by the Bureau of the Census. The coverage amounted to 98 percent of the United States population living in MSAs, 94 percent of the population in "other cities," and 90 percent of the rural population.

Although most law enforcement agencies submit crime reports to the UCR Program, data are sometimes not received for complete annual periods. To be included in this publication's Tables 6, 7, 8, and 9, showing specific jurisdictional statistics, figures for all 12 months of the current year must have been received at the FBI prior to established publication deadlines. Other tabular presentations are aggregated as set forth in Appendix I. Unless consisting of estimates for the total population,

each table in this publication shows the number of agencies reporting and the extent of population coverage.

#### Population Data

Current year population figures for the Nation, states, geographic regions, and divisions are Bureau of the Census provisional estimates as of July 1, 1985. Using these figures along with the 1984 Bureau of the Census provisional estimates for all counties and those cities over 100,000 in population, as well as the 1982 Bureau of Census provisional estimates for other cities, the populations of individual jurisdictions were extrapolated (see Appendix III). The estimated United States population increase in 1985 was approximately 1 percent over the 1984 estimate.

#### Offense Estimation

Tables 1 through 5 of this publication contain statistics for the entire United States. Because not all law enforcement agencies provide data for complete reporting periods, estimated crime counts are included in these presentations. Offense estimation occurs within each of three areas: Metropolitan Statistical Areas, "other cities," and rural counties. Using the known crime experiences of similar areas within a state, the estimates are computed by assigning the same proportional crime volumes to nonreporting agencies.

Unique estimation procedures were used to produce estimated 1985 forcible rape figures for the State of Illinois. In mid-1984, gender-neutral sex offense legislation was passed in that state. As a result, forcible rape figures furnished subsequently for most local law enforcement agencies by the state-level UCR Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Since the data supplied were not comparable with those provided for other agencies across the country, the 1985 forcible rape figures for most Illinois contributors were replaced by estimates using the national ratio of forcible rapes versus the total crimes of violence. Forcible rape totals for affected agencies are not shown in Tables 6, 7, 8, and 9 which present individual city, county, and university/college data.

During 1983, it was determined that the procedures of the Chicago, Illinois, Police Department had not been in accordance with established national UCR standards. Therefore, in both 1983 and 1984, adjustments through estimation were made for earlier years. Crime Index figures for Chicago were deducted from each year's United States total and revised figures were established as if no reports were received. Those crime volumes were then reincorporated to establish new national estimates for the 1983 and 1984 editions of this publication. The 1985 crime counts reported for Chicago, when compared to the 1984 figures, paralleled the national experience except in

the forcible rape category. Although the city's 1984 and 1985 forcible rape figures were not comparable, the discrepancy was not sufficient to affect national trends, and no reestimating of previous years was done for this issue. The 1984 and 1985 editions, therefore, contain consistent annual national Crime Index estimates, while those shown in earlier issues may differ somewhat.

### Crime Trends

Showing fluctuations from year to year, trend statistics offer the data user an added perspective from which to study crime. Percent change tabulations in this publication are computed only for reporting units which have provided comparable data for the periods under consideration. Exclusions from trend computations are made when figures from a reporting agency are not received for comparable time frames or when it is ascertained that unusual fluctuations are due to such variables as improved records procedures, annexations, etc.

Care should be exercised in any direct comparison between data in this publication and those in prior issues of *Crime in the United States*. Valid percent changes for 2, 5, and 10 years are presented in this book's tabular portions.

### Recent Developments

The "Blueprint for the Future of the Uniform Crime Reporting Program," a final report of the UCR study released for public comment in the summer of 1985, was enthusiastically endorsed by the IACP, NSA, and state UCR Programs. Law enforcement agencies, various state leaders, members of academic and research communities, and other public and private groups having an interest in UCR also examined the Blueprint with great interest. Results of their inspections indicate that they found the Blueprint to be a dynamic, comprehensive program capable of more reliably identifying and measuring crime in the United States than ever before. By taking advantage

of modern data processing capabilities, UCR will serve law enforcement agencies with increased diversity.

There are three recommended areas of enhancements to the UCR Program. First, reporting of offenses and arrests will be made by means of an incident-based or unit record system. Secondly, collection of data will be accomplished on two levels. Most law enforcement agencies in level one will report on data elements somewhat expanded over those currently reported. Law enforcement agencies covering populations of over 100,000 and a sampling of smaller agencies will be included in level two, which will collect detailed information on all offenses, victims, and arrestees. The third proposal involves introducing a quality assurance program.

Plans for implementing the Blueprint are now underway. Level I and Level II data elements and subelements are currently being developed under a private contract. The design of a uniform incident-based report form will follow. Once the proposed elements and forms are established and approved, they will be introduced into one of the 41 state UCR Programs to test the new system. State UCR Programs and individual contributing agencies will be able to adopt the Blueprint at their own pace without interrupting participation in the current Program. Implementation will, however, be a lengthy process.

The UCR national Program is prepared to assist state Programs and local contributors with the tools and guidance they may need to implement the redesigned Program. Recognizing the increasing use of automation, for example, the national Program has taken steps to provide law enforcement agencies a method of collecting information pertinent to the automation of records and statistics. Specifically, the national Program is serving as a conduit for the exchange of computer strategy and information. Police agencies having questions involving selection and programming of computers and software packages are being directed to other agencies having compatible systems or similar logistical circumstances.

# CRIME CLOCK 1985

one  
**MOTOR VEHICLE THEFT**  
every 29 seconds

The crime clock should be viewed with care. Being the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

## SECTION II

### CRIME INDEX OFFENSES REPORTED

#### MURDER AND NONNEGIGENT MANSLAUGHTER

##### DEFINITION

Murder and nonnegligent manslaughter, as defined in the Uniform Crime Reporting Program, is the willful (nonnegligent) killing of one human being by another.

The classification of this offense, as for all other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides; and attempts to murder or assaults to murder, which are scored as aggravated assaults.

##### TREND

Year	Number of offenses	Rate per 100,000 inhabitants
1984 .....	18,692	7.9
1985 .....	18,976	7.9
Percent change .....	+ 1.5	—

## Volume

In 1985, according to national estimates, 18,976 persons were murdered. Forty-three percent of the offenses occurred in the South, the Nation's most populous region, while the Western States recorded 21 percent; the Midwestern States, 19 percent; and the Northeastern States, the remainder.

On a monthly basis in 1985, more murders were recorded in December than in any other month, and the lowest totals were registered in April and May.

### Murder by Month, 1981-1985

[Percent of annual total]

Months	1981	1982	1983	1984	1985
January .....	8.8	8.3	8.4	8.3	8.1
February .....	7.8	7.5	7.6	7.5	7.9
March .....	8.4	8.1	8.4	8.1	8.1
April .....	7.9	7.9	8.0	7.9	7.6
May .....	8.4	8.8	8.3	8.0	7.6
June .....	8.4	8.4	7.6	7.8	8.2
July .....	8.8	8.8	8.9	8.6	9.3
August .....	8.7	8.8	8.9	8.8	9.1
September .....	8.3	8.6	8.7	8.7	8.1
October .....	8.0	8.2	8.4	8.8	8.4
November .....	7.9	7.5	7.8	8.6	8.2
December.....	8.6	9.0	9.0	9.0	9.4

## Trend

The number of murders in the United States increased by 2 percent in 1985 as compared to the 1984 total. Similar to the national trend, overall increases of 2 percent were also experienced in the country's cities and suburban and rural counties.

Geographically, only the Northeastern States recorded a decline in the murder volume, one of 2 percent. The murder counts rose 4 percent in the Midwestern States, 3 percent in the Western States, and 1 percent in the Southern States.

The accompanying chart reveals a 16-percent decrease nationally in the murder counts from 1981 to 1985. The 10-year trend, however, showed the 1985 total 1 percent above the 1976 level.

## Rate

The 1985 national murder rate of 8 per 100,000 inhabitants showed no change from 1984. When the number of murder victims was related to the populations on a regional basis, the Southern States averaged 10 murders per 100,000 people; the Western States, 8 per 100,000; and both the Northeastern and Midwestern States, 6 per 100,000. Rate changes from 1984 to 1985 varied regionally. The murder rate in the Northeast was down 3 percent and in the South showed no change. The Midwest and the West recorded increases, 3 and 1 percent, respectively.

Collectively, the Nation's metropolitan areas reported a murder rate of 9 victims per 100,000 inhabitants, while cities outside those areas registered a lower rate of 5 per 100,000. The rural county rate was 6 per 100,000.

## Nature

Contributing agencies provided supplemental information for 17,545 of the estimated 18,976 murders in 1985. Submitted monthly, the data consist of the age, sex, race, and ethnic origin of both victims and offenders; the types of weapons used; the relationships of victims to the offenders; and the circumstances surrounding the murders.

Based on these supplemental data, approximately 74 percent of the murder victims in 1985 were males. Ninety-two percent were persons 18 years of age or older, with 47 percent aged 20 through 34 years. Considering victims for whom race was known, an average of 56 of every 100 were white, 42 were black, and the remainder were persons of other races. Nineteen percent of the victims for whom ethnicity was reported were Hispanic.

An examination of incidents involving one victim and one offender showed that in 1985, 94 percent of the black murder victims were slain by black offenders, and 88 percent of the white murder victims were killed by white offenders. Likewise, males were most often slain by males (83 percent in single victim/single offender situations).

These same data showed, however, that 9 of every 10 female victims were murdered by males.

The most frequently used murder weapons during 1985 were firearms, which accounted for 3 of every 5 offenses. By type, handguns were used in 43 percent of all murders, shotguns in 7 percent, rifles in 5 percent, and other or unknown types of firearms in 4 percent.

Among the remaining weapons, cutting or stabbing instruments were employed in 21 percent of the murders; blunt objects (clubs, hammers, etc.) in 6 percent; and other dangerous weapons such as poison, explosives, etc., in 8 percent. Personal weapons (hands, fists, feet, etc.) were employed in 7 percent.

#### Murder, Type of Weapons Used, 1985

[Percent distribution]

Supporting the philosophy that murder is primarily a societal problem over which law enforcement has little or no control is the fact that nearly 3 of every 5 murders committed in 1985 were perpetrated by relatives (17 percent) or persons acquainted with the victims (41 percent). Among all female murder victims in 1985, 30 percent were slain by husbands or boyfriends. Six percent of the male victims were killed by wives or girlfriends.

Arguments resulted in 39 percent of the murders during the year. Eighteen percent occurred as a result of felonious activities such as robbery, arson, etc., while another 2 percent were suspected to have been the result of some felonious activity. Four percent of the murders were committed during brawls while offenders were under the influence of alcohol or narcotics. The table on the following page shows murder circumstances/motives for the past 5 years.

#### Circumstance by Relationship, 1985

<sup>1</sup>Because of rounding, percentages may not add to totals.

<sup>2</sup>Includes murders committed while offender is under the influence of alcohol and/or narcotics.

**Clearances**

As in previous years, the highest Crime Index clearance rate during 1985 was for murder, 72 percent. City agencies also cleared 72 percent of murders, with cities under 10,000 in population reporting the most successful clearance rate, 80 percent. Seventy-eight percent of murders in rural counties and 68 percent of those in suburban counties were cleared.

Regionally, the murder clearance rate was highest in the Southern States, 77 percent. Following were the

Northeastern States with 70 percent, the Western States with 69 percent, and the Midwestern States with 66 percent.

Persons under 18 years of age were involved in murder less often than in any other offense in 1985. They accounted for 5 percent of the willful killings cleared by law enforcement nationally, as well as in cities and in rural counties. Four percent of the suburban county clearances involved only persons in this young-age group.

**Persons Arrested**

Overall murder arrests decreased 2 percent in 1985 from the 1984 volume. Arrests of persons under age 18 increased 9 percent, while those of persons aged 18 and over fell 3 percent. During the same 2-year period, both male and female arrests were down, 1 and 8 percent, respectively.

Forty-one percent of all murder arrestees in 1985 were under 25 years of age, with 8 percent of the total being 17 or younger. The 18- to 24-year age group showed the greatest involvement in this offense, accounting for 33 percent of the total 1985 murder arrests.

Whites comprised 50 percent of the total arrestees for murder in 1985. Blacks made up 48 percent, and the remainder were of other races. Sixteen percent of the arrestees were of Hispanic ethnicity.

Long-term trends indicate the 1985 murder arrest total was 17 percent below the 1981 level but virtually the same as in 1976.

## FORCIBLE RAPE

### DEFINITION

Forcible rape, as defined in the Program, is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are excluded.

### TREND

Year	Number of offenses	Rate per 100,000 inhabitants
1984 .....	84,233	35.7
1985 .....	87,340	36.6
Percent change .....	+ 3.7	+ 2.5

## Volume

Comprising 7 percent of the violent crime volume and 1 percent of the Crime Index total, forcible rapes reported in 1985 numbered an estimated 87,340 offenses. Of the regions, the South, which is the most populous, accounted for 37 percent of the volume. Following were the West with 24 percent, the Midwest with 23 percent, and the Northeast with 16 percent.

Monthly totals showed the greatest number of forcible rapes were reported during the summer, with July recording the highest frequency. The lowest total was registered in February.

### Forcible Rape by Month, 1981-1985

[Percent of annual total]

Months	1981	1982	1983	1984	1985
January .....	7.2	7.1	7.3	7.1	7.2
February .....	7.2	7.2	6.9	7.1	6.6
March .....	7.9	8.0	7.6	7.6	8.2
April .....	8.0	8.0	7.9	7.7	8.3
May .....	8.6	9.0	8.5	8.6	8.9
June .....	9.5	9.3	8.8	8.9	9.0
July .....	10.1	10.2	9.9	9.9	10.1
August .....	9.7	10.0	10.4	10.2	9.9
September .....	8.7	8.6	9.1	9.1	8.8
October .....	8.3	8.3	8.7	9.0	8.5
November .....	7.6	7.2	7.7	7.2	7.7
December .....	7.2	7.2	7.1	7.5	6.9

## Trend

Compared to the previous year, the 1985 forcible rape volume was 4 percent higher nationwide, in cities, and in suburban counties. The increase in the rural counties was 9 percent. Among all population groupings, only cities under 10,000 showed a decline; locales of that size collectively recorded a less than 1 percent decrease.

All regions' 1985 forcible rape volumes increased over 1984 levels, and the upturns ranged from 1 percent in the West to 7 percent in the South. In the Midwest, forcible rape was up 2 percent and in the Northeast, 3 percent.

National trends for 5 and 10 years show that the forcible rape total has risen 6 percent from 1981 and 53 percent from 1976.

## Rate

Only females can be the victims of forcible rape according to Uniform Crime Reporting definition, and in 1985, an estimated 71 of every 100,000 females in the Nation were reported rape victims. This rate, based on the female population in the United States, was 1 percent higher than in 1984 and 1981, both of which registered rates of 69 per 100,000 females.

Increasing over 1984 levels, the female forcible rape rates for 1985 were 82 victims per 100,000 females in MSAs, 41 per 100,000 females in cities outside metropolitan areas, and 35 per 100,000 females in rural counties.

Geographically, the highest female rape rate was in the Western States, which recorded 85 victims per 100,000 females. Following were the Southern States with a rate of 77, the Midwestern States with 65, and the Northeastern States with 56.

## Nature

Comprising 80 percent of the forcible rape offenses in 1985 were rapes by force. The remainder were attempts or assaults to commit forcible rape. While an upward trend in rapes by force was evident—a 7-percent increase from 1984—the number of attempts to commit rape decreased 3 percent.

## Clearances

Fifty-four percent of the forcible rapes known to law enforcement nationwide in 1985 were cleared by arrest or exceptional means. Rural county law enforcement recorded the highest clearance rate for this offense, 61 percent. Of the forcible rapes reported to suburban county agencies, 55 percent were cleared, while city agencies registered a 53-percent clearance rate.

Clearance rates for the regions ranged from 48 percent in the Western States to 59 percent in the Southern States. In the Northeastern States, the clearance rate for forcible

rape was 57 percent, and in the Midwestern States, it was 49 percent.

Of the total clearances for forcible rape in the country as a whole, 10 percent involved only persons under 18 years of age. The rural and suburban counties also recorded 10 percent involvement of this age group, whereas the Nation's cities reported 9 percent.

#### **Persons Arrested**

From 1984 to 1985, the number of arrests for forcible rape rose 2 percent nationwide, as well as in the cities, and

was up 3 percent in the suburban and rural counties. For the 5-year period, 1981 versus 1985, arrests for this offense rose 11 percent. Adult arrests also rose 11 percent, while arrests of persons under 18 years of age increased 15 percent during the timespan.

Of the forcible rape arrestees in 1985, 45 percent were persons under the age of 25, with 30 percent of the total being in the 18- to 24-year age group. Fifty-two percent of those arrested were white, 46 percent were black, and all other races comprised the remainder. Hispanics accounted for 11 percent of the total arrestees.

## **ROBBERY**

### **DEFINITION**

Robbery is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

### **TREND**

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
1984 .....	485,008	205.4
1985 .....	497,874	208.5
<i>Percent change</i> .....	+ 2.7	+ 1.5

## Volume

The estimated 497,874 robbery offenses in 1985 comprised 4 percent of all Index crimes and 38 percent of the violent crimes. Robbery occurred most frequently in December of 1985, while the lowest volume occurred in April.

Geographically, the Northeastern States registered 29 percent of all reported robberies. The Southern States recorded 28 percent; the Western States, 23 percent; and the Midwestern States, 20 percent.

## Robbery by Month, 1981-1985

[Percent of annual total]

Months	1981	1982	1983	1984	1985
January .....	9.0	9.1	9.5	8.9	8.6
February .....	8.1	8.2	8.1	8.2	7.4
March .....	8.0	8.0	8.3	8.1	7.9
April .....	7.3	7.5	7.6	7.6	7.3
May .....	7.5	7.5	7.4	7.6	7.5
June .....	7.7	7.7	7.4	7.5	7.7
July .....	8.3	8.4	7.9	7.9	8.6
August .....	8.7	8.5	8.6	8.5	8.9
September .....	8.2	8.3	8.4	8.2	8.4
October .....	8.8	8.5	8.8	9.0	9.1
November .....	8.6	8.4	8.8	8.6	8.8
December .....	9.6	9.8	9.2	9.9	9.7

## Trend

Robberies increased 3 percent in volume nationally in 1985 from the 1984 level. Geographically, the number of robberies fell in only one region; the Midwest recorded a

3-percent decrease. Increases in the remaining regions were 8 percent in the South, 4 percent in the West, and 1 percent in the Northeast. Although the Nation's cities and suburban counties showed increases in robberies reported (3 and 5 percent, respectively), the volume was down by 3 percent in the rural counties.

The accompanying chart depicts the trend in the robbery volume, as well as the robbery rate, for the years 1981-1985. In 1985, the number of robbery offenses was 16 percent lower than in 1981 but 16 percent above the 1976 total.

## Rate

Nationally, the robbery rate was 209 per 100,000 inhabitants in 1985, 2 percent higher than the 1984 rate. With 965 robberies per 100,000 people, the highest rate was experienced in cities with populations over 1 million. MSAs recorded a rate of 266 robberies per 100,000 inhabitants, and in cities outside metropolitan areas, the rate was 44. The lowest incidence was in the rural areas where the rate was 15 per 100,000 people.

Robbery occurred most frequently in the Northeastern States where the rate was 291 per 100,000 inhabitants. The rate per 100,000 inhabitants for the Western States was 237; for the Southern States, 173; and for the Midwestern States, 165.

## Nature

Robberies accounted for a total estimated national loss of \$313 million in 1985. The value of property stolen due to robberies averaged \$628 per incident. Average dollar losses ranged from \$347 taken during robberies of gas or service stations to \$3,048 per bank robbery. The impact of this violent crime on its victims cannot be measured in terms of monetary loss alone. While the object of a robbery is to obtain money or property, the crime always involves force or threat of force, and many victims suffer serious personal injury.

As in previous years, robberies on streets or highways accounted for more than half of the offenses in this category. Robberies of commercial and financial establishments accounted for an additional 22 percent, and those occurring at residences, 10 percent. The remainder were miscellaneous types.

## Robbery, Percent Distribution, 1985

[By region]

### Robbery, Percent Distribution, 1985

Miscellaneous .....	11.4	9.2	12.9	14.9	16.1	18.9	17.0

<sup>1</sup>Because of rounding, percentages may not add to totals.

Only bank and residential robberies declined in number from 1984 to 1985, both by 3 percent. Among the other types, convenience store robberies showed the greatest increase, up 11 percent over the previous year.

Forty-two percent of all robberies in 1985 were committed through the use of strong-arm tactics. Firearms were used in 35 percent, knives or cutting instruments in 13 percent, and other weapons in the remainder. A comparison of 1984 and 1985 robbery totals by weapon showed those by firearms and cutting instruments up 2 percent and those by other dangerous weapons up 1 percent. Strong-armed robberies increased 5 percent in volume during the 2-year period.

## Robbery, Type of Weapon Used, 1985

[Percent distribution]

Region	Total all weapons <sup>1</sup>	Armed			Strong-armed
		Fire-arms	Knife or other cutting instruments	Other weapons

Western States ....	100.0	35.1	14.0	8.4	42.5

<sup>1</sup>Because of rounding, percentages may not add to totals.

### **Clearances**

One of every 4 robberies reported to law enforcement in 1985 was cleared. Rural law enforcement agencies registered the highest robbery clearance rate, 41 percent. Suburban county agencies cleared 29 percent and those in cities, 25 percent. Clearance percentages for robbery in the Nation's regions showed the Southern States with 27 percent, the Western States with 26 percent, the Northeastern States with 25 percent, and the Midwestern States with 22 percent.

Nationally, as well as for city and suburban county law enforcement agencies, persons under the age of 18 were the offenders in 12 percent of all 1985 robbery clearances. This age group accounted for 7 percent of the rural county clearances.

### **Persons Arrested**

Robbery arrests rose less than 1 percent nationally during 1985 as compared to the 1984 total. There was virtually no change in the arrest volumes in the Nation's cities and rural counties, but the suburban county total increased 2 percent.

Sixty-five percent of all robbery arrestees in 1985 were under 25 years of age, and 92 percent were males. Sixty-two percent of those arrested were black, 37 percent were white, and the remainder were of other races. Fourteen percent of the robbery arrestees were Hispanic.

Considering the 5-year period, 1981-1985, the number of persons arrested for this offense dropped 13 percent. Adult arrests were down 11 percent during this timespan, while those of persons under age 18 decreased 18 percent.

## AGGRAVATED ASSAULT

### DEFINITION

Aggravated assault is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

### TREND

Year	Number of offenses	Rate per 100,000 inhabitants
1984 .....	685,349	290.2
1985 .....	723,246	302.9
Percent change .....	+ 5.5	+ 4.4

## Volume

Numbering an estimated 723,246 nationally in 1985, aggravated assaults occurred most frequently in the summer months. The distribution of these offenses regionally showed 38 percent of the volume was accounted for by the most populous Southern States, 23 percent by the Western States, 21 percent by the Midwestern States, and the remainder by the Northeastern States.

## Aggravated Assault by Month, 1981-1985

[Percent of annual total]

Months	1981	1982	1983	1984	1985
January.....	7.4	7.3	7.7	7.0	7.0
February.....	7.1	7.1	7.1	7.0	6.8
March.....	8.0	8.1	7.9	7.8	8.2
April.....	8.2	8.3	8.1	7.9	8.2
May.....	8.7	9.0	8.9	8.7	8.8
June.....	9.1	9.2	8.9	9.1	9.0
July.....	9.4	9.7	9.8	9.6	9.5
August.....	9.4	9.0	9.7	9.5	9.5
September.....	8.6	8.7	8.9	8.8	8.9
October.....	8.5	8.5	8.5	8.9	8.8
November.....	7.7	7.4	7.4	7.6	7.9
December.....	7.9	7.7	7.3	8.1	7.4

## Trend

Upward trends in aggravated assault were experienced by law enforcement agencies nationwide and in all regions. The increases over 1984 were 8 percent in the Southern States, 6 percent nationally and in the Western States, 4 percent in the Northeastern States, and 2 percent in the Midwestern States.

Like the Nation, city and suburban county law enforcement agencies recorded 6-percent increases in their aggravated assault counts from 1984 to 1985. In the rural counties, this offense was up 8 percent.

For the 5-year period, 1981-1985, aggravated assaults rose 9 percent.

## Rate

For every 100,000 inhabitants nationwide in 1985, there were 303 reported victims of aggravated assault. Higher than the national average, the rate in metropolitan areas was 342 per 100,000 people. Cities outside metropolitan areas experienced a rate of 249 and rural counties, a rate of 129.

The 1985 aggravated assault rate increased 4 percent over 1984 and 5 percent above the 1981 level.

## Nature

Like the 1984 experience, weapon distribution data for 1985 showed 31 percent of the aggravated assaults reported were committed with blunt objects or other dangerous weapons. Of the other categories, personal weapons such as hands, fists, and feet were used in 25 percent of the offenses; knives or cutting instruments in 23 percent; and firearms in 21 percent.

From 1984 to 1985 aggravated assaults committed with firearms increased 7 percent; those with knives or other cutting instruments, 4 percent; and those with personal weapons, 5 percent. Assaults where blunt objects or other dangerous weapons were used showed the greatest rise, 9 percent.

The following table shows the 1985 regional experience of aggravated assault by type of weapon used.

**Aggravated Assault, Type of Weapon Used, 1985**

[Percent distribution]

Region	Total all weapons <sup>1</sup>	Fire-arms	Knife or other cutting instrument	Other weapons (clubs, blunt objects, etc.)	Personal weapons
Total .....	100.0	21.3	22.7	31.3	24.7
Northeastern States .....	100.0	13.5	24.8	33.2	28.5
Midwestern States .....	100.0	22.2	21.9	32.7	23.2
Southern States .....	100.0	25.4	24.1	29.9	20.6
Western States .....	100.0	19.9	19.3	31.1	29.6

<sup>1</sup>Because of rounding, percentages may not add to totals.

**Clearances**

Law enforcement agencies nationwide cleared 62 percent of the reported cases of aggravated assault during 1985. The highest clearance rate, 70 percent, was in the rural counties. Suburban county law enforcement agencies cleared 63 percent and those in cities, 61 percent.

Regionally, clearance percentages for aggravated assault were 65 percent in the Southern States, 61 percent

in the Northeastern States, 60 percent in the Western States, and 56 percent in the Midwestern States.

Nine percent of the clearances reported nationally and by city and suburban county agencies involved only persons under age 18. Only persons under 18 years of age were identified as the assailants in 6 percent of the rural county aggravated assault clearances.

**Persons Arrested**

The estimated 305,390 persons arrested for aggravated assault in 1985 represented 61 percent of all arrestees for violent crimes. Arrests of males for this offense outnumbered those of females by 6 to 1. Whites comprised 58 percent of the arrestees; blacks, 40 percent; and all other races, the remainder. Eighty-seven percent of the arrestees were non-Hispanic.

The number of persons arrested in 1985 for aggravated assault was 1 percent less than in both 1984 and 1981. Adult arrests during 1985 were down 2 percent from the 1984 total, but arrests of persons under age 18 rose 5 percent. Like overall aggravated assault arrests, the number of male arrestees was down 1 percent, as was the female arrest total for the 2-year period.

## BURGLARY

### DEFINITION

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary in this Program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

### TREND

Year	Number of offenses	Rate per 100,000 inhabitants
1984 .....	2,984,434	1,263.7
1985 .....	3,073,348	1,287.3
Percent change .....	+ 3.0	+ 1.9

## Volume

The 1985 estimated national burglary total was nearly 3.1 million. This offense accounted for 25 percent of all Index crimes reported to law enforcement and 28 percent of all property crimes.

Regionally, the highest burglary volume (37 percent) occurred in the Southern States, the most populous region. Following were the Western States with 26 percent, the Midwestern States with 21 percent, and the Northeastern States with 17 percent.

By month in 1985, burglaries occurred most frequently in August and least often in February.

## Burglary by Month, 1981-1985

October .....	8.3	8.3	8.5	8.8	9.0
November .....	8.1	8.3	8.3	8.4	8.5
December .....	8.5	8.9	8.1	9.0	8.8

## Trend

Burglary counts increased 3 percent in 1985 as compared to the previous year. Paralleling the national experience, the cities and rural counties also registered 3-percent rises, while in suburban counties a 4-percent upswing was recorded.

Regionally, only the South and the West reported increases in burglaries, 8 and 4 percent, respectively. In the Midwest 3 percent fewer such offenses occurred, while in the Northeast there was a less than 1 percent decline.

## Rate

Up 2 percent from 1984 but 22 percent lower than in 1981, the 1985 burglary rate was 1,287 per 100,000 inhabitants nationwide. Metropolitan areas registered a rate of 1,447 for every 100,000 in population, while the cities outside metropolitan areas recorded a rate of 999 per 100,000. The rural counties showed the lowest rate, 625 per 100,000 inhabitants.

Geographically, the burglary rate was 1,654 in the Western States, 1,377 in the Southern States, 1,067 in the Midwestern States, and 1,050 in the Northeastern States. A comparison of 1984 and 1985 rates showed declines of 1 percent in the Northeast and 3 percent in the Midwest. The rate increased in the South by 6 percent and in the West by 2 percent.

## Nature

Two of every 3 burglaries in 1985 were residential in nature. Seventy percent of all burglaries involved forcible entry, 22 percent were unlawful entries (without force), and the remainder were forcible entry attempts.

Burglary victims suffered losses estimated at \$2.9 billion in 1985, and the average dollar loss per burglary was \$953. The average loss for residential offenses was \$974, while for nonresidential property, it was \$913.

Both the residential and nonresidential burglary categories showed 3-percent increases, 1984 versus 1985. Daytime residential and nonresidential burglaries were up 4 percent. Those during the nighttime hours increased 1 percent for nonresidential property but occurred virtually with the same frequency at residences.

## Clearances

Law enforcement agencies across the country cleared 14 percent of the burglaries brought to their attention. By region, the Southern States showed a 16-percent clearance rate; the Northeastern States, 14 percent; the Western States, 13 percent; and the Midwestern States, 12 percent.

1985

BURGLARIES OF UNKNOWN TIME OF OCCURRENCE ARE NOT INCLUDED.

Rural county law enforcement cleared 18 percent of the burglaries in their jurisdictions. Those in the suburban counties recorded a clearance rate of 15 percent, and agencies in cities obtained clearances in 14 percent of these crimes.

Adults were involved in 78 percent of all burglary offenses cleared, and only young people under 18 years of age were offenders in the remaining 22 percent. Similar to the national experience, persons under age 18 accounted for 22 percent of the burglary clearances in cities and in rural counties. They accounted for 23 percent of the suburban county clearances. The highest degree of juvenile involvement in burglary was recorded in the Nation's smallest cities (under 10,000 population) where young persons under 18 years of age comprised 29 percent of the clearances.

#### Persons Arrested

In the UCR Program, several persons may be arrested in connection with the clearance of one crime, or the arrest of one individual may clear numerous offenses. The latter is often true in cases of burglary for which an estimated 443,300 arrests were made in 1985. Arrest trends for 1985 and 1984 show a 2-percent increase in total burglary arrests, with those of persons under 18 years of age up 3 percent and those of adults up 1 percent. In 1985, burglary arrests rose 3 percent in the suburban and rural counties and 1 percent in the cities.

Ninety-three percent of the burglary arrestees during 1985 were males and 73 percent were under 25 years of age. Of the total burglary arrestees, whites accounted for 70 percent, blacks for 29 percent, and other races for the remainder. Eighty-six percent of the persons arrested for burglary were non-Hispanic.

## LARCENY-THEFT

### DEFINITION

Larceny-theft is the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence, or fraud occurs. In the Uniform Crime Reporting Program, this crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft is also excluded from this category inasmuch as it is a separate Crime Index offense.

### TREND

Year	Number of offenses	Rate per 100,000 inhabitants
1984 .....	6,591,874	2,791.3
1985 .....	6,926,380	2,901.2
Percent change .....	+ 5.1	+ 3.9

## Volume

An estimated 6,926,380 larceny-theft offenses occurred nationally during 1985. This high-volume crime made up 56 percent of the Crime Index total and 62 percent of the property crimes. When viewed monthly, larceny-thefts were recorded most often during August and least frequently in February.

Regionally, the volume of larceny-theft was highest in the Southern States, the most populous region, with 35 percent of the total. The Western States registered 25 percent; the Midwestern States, 23 percent; and the Northeastern States, 18 percent.

### Larceny-Theft by Month, 1981-1985

[Percent of annual total]

Months	1981	1982	1983	1984	1985
January .....	7.6	7.1	8.1	7.5	7.4
February .....	7.4	7.1	7.4	7.6	7.0
March .....	8.3	8.0	8.4	8.0	8.2
April .....	8.1	7.9	8.1	8.0	8.1
May .....	8.2	8.3	8.4	8.2	8.4
June .....	8.6	8.9	8.5	8.4	8.5
July .....	9.1	9.2	8.9	9.0	9.3
August .....	9.3	9.4	9.4	9.4	9.5
September .....	8.4	8.6	8.4	8.3	8.4
October .....	8.7	8.7	8.6	8.9	8.9
November .....	8.1	8.2	8.0	8.2	8.2
December .....	8.2	8.5	7.7	8.5	8.1

## Trend

Larceny-theft increased 5 percent nationally in 1985 when compared to the previous year's experience; this same increase was recorded in the cities collectively. Suburban and rural counties also showed upswings, 7 percent and 1 percent, respectively.

Volume increases among the regions ranged from 9 percent in the Southern States to 1 percent in the Midwestern States. The Western States showed a 6-percent upswing in larceny-thefts and the Northeastern States, a 3-percent rise.

The 5- and 10-year volume trends showed a decrease of 4 percent from 1981 but a 10-percent rise over 1976 figures.

## Rate

During 1985, there were 2,901 larceny-thefts per 100,000 United States inhabitants, a 4-percent increase from the 1984 rate. The larceny-theft rate was 3,253 per 100,000 inhabitants of metropolitan areas; 3,067 per 100,000 population in cities outside metropolitan areas; and 906 per 100,000 people in the rural counties.

Regionally, the highest 1985 rate was shown in the Western States with 3,597 larceny offenses per 100,000 population, an increase of 3 percent above the region's 1984 rate. Following was the South whose rate of 2,920 rose 7 percent from the previous year. The Midwestern States' rate of 2,704 was up 1 percent, and the rate in the Northeastern States, 2,437, rose 3 percent.

The 1985 larceny-theft rate decreased 8 percent from the 1981 rate and 1 percent from that of 1976.

## Nature

For reported larceny-theft offenses in 1985, the average value of property stolen was \$393, up from \$376 in 1984. When the average value was applied to the estimated number of larceny-thefts, the loss to victims nationally was \$2.7 billion for the year. This estimated dollar loss is considered conservative since many offenses in the larceny category, particularly if the value of the stolen goods is small, never come to law enforcement attention. Losses in 28 percent of the thefts reported to law enforcement ranged from \$50 to \$200, while in 34 percent, they were over \$200.

During 1985, the average value of goods and property reported stolen as a result of pocket-picking was \$257; purse-snatching, \$206; and shoplifting, \$85. Thefts from buildings resulted in an average loss of \$615; from motor vehicles, \$428; and from coin-operated machines, \$130. Average losses due to thefts of motor vehicle accessories were \$283 and of bicycles, \$159.

# LARCENY ANALYSIS

## 1985

LARCENY-THEFT

Because of rounding, the percentages do not add to 100%.

As in prior years, a large portion of the larcenies (37 percent) was comprised of thefts of motor vehicle parts, accessories, and contents. Other major types of thefts which contributed to the high volume of these crimes were those from buildings, 16 percent; shoplifting, 14 percent; and bicycles, 8 percent. The remainder were distributed among pocket-picking, purse-snatching, thefts from coin-operated machines, and all other types of larceny-thefts. The accompanying table presents the distribution of larceny-theft by type and geographic region.

#### Larceny Analysis by Region, 1985

[Percent distribution]

	United States total <sup>1</sup>	North-eastern States	Mid-western States	Southern States	Western States
Total .....	100.0	100.0	100.0	100.0	100.0
Pocket-picking .....	1.1	3.7	.4	.5	.8
Purse-snatching .....	1.2	2.2	1.0	1.0	.9
Shoplifting .....	14.0	11.0	12.5	14.2	17.0
From motor vehicles (except accessories) .....	19.8	18.9	16.8	18.5	24.5
Motor vehicle accessories.....	16.7	19.2	16.0	18.0	13.8
Bicycles.....	8.2	8.2	8.7	7.5	8.8
From buildings .....	15.6	19.7	18.7	12.6	14.3
From coin-operated machines .....	.9	.6	7	1.1	.8
All others .....	22.6	16.6	25.2	26.6	19.2

<sup>1</sup>Because of rounding, percentages may not add to totals.

#### Clearances

Twenty percent of the larceny-thefts reported nationwide and in cities were cleared during 1985. Law enforcement agencies in cities from 10,000 to 24,999 in population reported the highest clearance rate, 24 percent. Those in suburban and rural counties each recorded a 17-percent rate.

When viewing the regions of the United States, law enforcement agencies in the West cleared 21 percent of the larceny offenses brought to their attention. The clearance rate in the South was 20 percent; in the Midwest, 19 percent; and in the Northeast, 18 percent.

Persons under 18 years of age were involved in 24 percent of the national clearances for larceny-theft. Twenty-five percent of the clearances in cities, 22 percent of those in suburban counties, and 18 percent of those in rural counties were accounted for by persons in this age group.

#### Persons Arrested

The number of larceny-theft arrests was 5 percent higher in 1985 than in 1984. Female arrests for this offense were up 8 percent, and those of males increased 4 percent. During this same period, adult arrests rose 6 percent while those of persons under 18 years of age were up 4 percent. The total number of persons arrested during the 5-year period, 1981-1985, showed a 3-percent increase. Although juvenile arrests were down 4 percent, those of adults were up 7 percent.

Larceny-thefts not only comprised the largest portion of Crime Index offenses reported to law enforcement, they also accounted for 55 percent of the arrests for Index crimes in 1985. Forty-seven percent of the larceny arrests were of persons under 21 years of age, and 33 percent of the arrestees were under 18. Females, who were arrested for this offense more often than for any other in 1985, comprised 31 percent of all larceny-theft arrestees.

Whites accounted for 67 percent of the total larceny-theft arrests and blacks for 31 percent. All other races made up the remainder. Eighty-nine percent of the arrestees were persons of non-Hispanic ethnicity.

## MOTOR VEHICLE THEFT

### DEFINITION

Defined as the theft or attempted theft of a motor vehicle, this offense category includes the stealing of automobiles, trucks, buses, motorcycles, motorscooters, snowmobiles, etc. The definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access.

### TREND

Year	Number of offenses	Rate per 100,000 inhabitants
1984 .....	1,032,165	437.1
1985 .....	1,102,862	462.0
Percent change .....	+ 6.8	+ 5.7

## Volume

Motor vehicle thefts in 1985 numbered an estimated 1,102,862 offenses. This volume comprised 9 percent of all Index crimes and 10 percent of all property crimes. The regional distribution of motor vehicle theft showed 30 percent of the volume was in the most populous Southern States, 25 percent in the Northeastern States, and 23 percent in both the Midwestern and Western States.

Variations in motor vehicle theft figures by month showed that the greatest number occurred in August and October, while the lowest was in February.

## Motor Vehicle Theft by Month, 1981-1985

[Percent of annual total]

Months	1981	1982	1983	1984	1985
January .....	8.2	7.9	8.3	8.0	7.8
February .....	7.7	7.5	7.5	7.7	7.1
March .....	8.2	8.2	8.4	8.0	8.1
April .....	7.9	8.0	8.0	7.8	7.8
May .....	8.2	8.2	8.1	8.0	8.0
June .....	8.3	8.6	8.0	8.0	8.2
July .....	8.8	8.9	8.5	8.8	8.9
August .....	9.1	9.1	9.1	9.1	9.1
September .....	8.4	8.5	8.5	8.7	8.7
October .....	9.0	8.6	8.7	8.9	9.1
November .....	8.2	8.1	8.4	8.5	8.6
December .....	8.0	8.3	8.5	8.6	8.7

## Trend

A 7-percent increase in the number of motor vehicle thefts was recorded in 1985 as compared to the previous year's figures. This upward trend was evident in all population groups except cities with populations over 1 million, which experienced a 4-percent decline. Both the Nation's cities and rural counties reported 6 percent more motor vehicle thefts, while the volume in suburban counties was 12 percent higher.

In the Southern States, the number of these offenses was up 18 percent, and in the Western States it rose 10 percent. Both the Northeastern and Midwestern States registered declines of less than 1 percent.

The accompanying chart shows that the volume of motor vehicle thefts in 1985 increased 1 percent over the

1981 volume. The 1985 total was 14 percent above the 1976 level.

## Rate

The 1985 national motor vehicle theft rate—462 per 100,000 people—was 6 percent higher than the rate in 1984. Although the rate increased 3 percent from 1976, it declined 3 percent when compared to the 1981 experience.

For every 100,000 inhabitants living in MSAs, there were 562 motor vehicle thefts reported in 1985. The rate in cities outside metropolitan areas (other cities) was 195 and in rural counties, 104. As in previous years, the highest rates were in the Nation's most heavily populated municipalities, indicating that this offense is primarily a large-city problem.

Among the regions, the motor vehicle theft rates ranged from 544 per 100,000 people in the Northeastern States to 401 in the Southern States. The Western States' rate was 524 and the Midwestern States' rate, 427. From 1984 to 1985, rate increases of 16 percent in the Southern States and 7 percent in the Western States were registered, while the Northeastern and Midwestern States both showed 1-percent decreases.

In 1985, an estimated average of 1 of every 159 registered motor vehicles was stolen nationwide. Regionally, this rate was greatest in the Northeast where 1 of every 114 motor vehicles registered was stolen. The other three regions reported lesser rates—1 per 147 in the West, 1 per 179 in the Midwest, and 1 per 192 in the South.

## Nature

An estimated national loss of \$5.1 billion in 1985 was due to motor vehicle theft. At the time of theft, the average value per vehicle stolen was \$4,619.

Of all motor vehicles reported stolen during the year, 75 percent were automobiles, 14 percent were trucks or buses, and the remainder were other types.

### **Motor Vehicle Theft, 1985**

[Percent distribution]

Region	Total	Autos	Trucks and buses	Other vehicles
Total.....	100.0	75.4	14.2	10.4
Northeastern States.....	100.0	89.8	5.2	5.0
Midwestern States.....	100.0	79.0	10.2	10.8
Southern States.....	100.0	69.1	18.9	12.0
Western States .....	100.0	66.2	20.3	13.5

#### **Clearances**

The national clearance rate for motor vehicle theft in 1985 was 15 percent. Law enforcement agencies in cities cleared 14 percent of the motor vehicle thefts reported in their locales. Those in the suburban counties cleared 20 percent, and rural agencies cleared 34 percent.

Regional clearance percentages for motor vehicle theft were 9 percent in the Northeastern States, 15 percent in the Midwestern States, 17 percent in the Western States, and 20 percent in the Southern States.

Persons in the under 18 age group accounted for 19 percent of the motor vehicle thefts cleared nationwide.

and in cities. They comprised 21 percent of the clearances in the rural counties and 20 percent of those in the suburban counties.

#### **Persons Arrested**

A large proportion of motor vehicle theft arrests was accounted for by the younger segment of the population. In 1985, 57 percent of all persons arrested for this offense were under 21 years of age, and those under age 18 comprised 38 percent of the total. From 1984, arrests of persons under age 18 were up 18 percent. Arrests of males in this age group also rose 18 percent, while juvenile female arrests increased 21 percent.

Overall motor vehicle theft arrests were up 11 percent and adult arrests were 6 percent higher in 1985 than in the previous year. Arrests of persons of all ages increased 2 percent over the 1981 level but declined 9 percent from 1976.

Of persons arrested for this offense in 1985, 91 percent were males. Sixty-six percent of the arrestees were white, 32 percent were black, and the remainder were of other races. Fifteen percent of the arrestees were Hispanic.

## **ARSON**

### **DEFINITION**

Arson is defined by the Uniform Crime Reporting Program as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded.

## Volume

During 1985, 103,220 arson offenses were reported by 12,789 law enforcement agencies furnishing at least one monthly report throughout the year. Among these agencies, 12,697 provided at least one month of complete, detailed information, including type of structure and estimated monetary value of property damaged. It is data from these latter agencies that are tabulated to produce the type of property, property damage, and clearance tables on the accompanying pages. Further data on arson offenses and trends are shown in Tables 6 through 13 and on arson clearances in Tables 20 through 23. Since only 9,085 agencies covering about 77 percent of the United States population submitted reports for all 12 months of the year, the data user should be aware that, while conservative indicators, the figures do not represent the Nation's total arson experience.

## Trend

According to national trend figures, the number of arson offenses rose 3 percent in 1985 over the 1984 total. The volume was up 2 percent in the Nation's cities, 6 percent in the suburban counties, and 1 percent in the rural counties. Regional trends showed arson increased 6 percent in the West and Northeast and was up 2 percent in the South. The only decline (5 percent) was registered in the Midwest.

By property type, those arsons in which structures were the targets decreased 3 percent nationally. Arsons of mobile property were up 9 percent, and those of all other property rose 7 percent.

Caution is recommended when viewing arson trend information. The percent change figures may have been influenced by improved arson reporting procedures during the collection's relatively limited timespan. It is expected that year-to-year statistical comparability will improve as collection continues.

## Rate

The accompanying table presents arson rates per 100,000 inhabitants. Population coverage for arson data is lower than for the other Crime Index offenses; therefore, these data were tabulated independently. Based only on figures from law enforcement agencies supplying 12 months of statistics for all Index crimes, including arson, the rates ranged from 124 per 100,000 inhabitants in cities with populations over 1 million to 23 per 100,000 rural county inhabitants. The rates for suburban counties and all cities were 40 and 58 per 100,000 inhabitants, respectively. Overall, the 1985 national arson rate was 50 per 100,000 population.

Regionally, the highest arson rate was registered in the Western States with 66 offenses per 100,000 inhabitants. Following were the Northeastern States with a rate of 54

per 100,000, the Southern States with 43 per 100,000, and the Midwestern States with 41 per 100,000.

## Arson Rate, Population Group, 1985

[9,085 agencies; 1985 estimated population 183,921,000;  
Rate per 100,000 inhabitants]

Group	Rate
Total .....	50.3
Total cities .....	58.0
Group I (cities 250,000 and over).....	91.6
(cities 1,000,000 and over).....	123.8
(cities 500,000 to 999,999).....	69.6
(cities 250,000 to 499,999).....	82.0
Group II (cities 100,000 to 249,999).....	68.5
Group III (cities 50,000 to 99,999).....	48.3
Group IV (cities 25,000 to 49,999).....	41.3
Group V (cities 10,000 to 24,999).....	31.6
Group VI (cities under 10,000).....	30.3
Suburban counties.....	40.1
Rural counties .....	22.7
Suburban Area .....	38.0

## Nature

Structures comprised 56 percent of the property targeted by arsonists in 1985. Mobile property (motor vehicles, trailers, airplanes, boats, etc.) accounted for 26 percent, and 18 percent were directed at other types of property (crops, timber, fences, signs, etc.).

## Arson, Type of Property, 1985

[12,697 agencies; 1985 estimated population 198,625,000]

Property classification	Number of offenses	Percent distribution
Total .....	86,455	100.0
Total structure .....	48,263	55.8
Single occupancy residential .....	20,184	23.3
Other residential .....	8,221	9.5
Storage .....	5,159	6.0
Industrial/manufacturing .....	899	1.0
Other commercial .....	6,118	7.1
Community/public .....	5,043	5.8
Other structure .....	2,639	3.1
Total mobile .....	22,324	25.8
Motor vehicles .....	20,487	23.7
Other mobile .....	1,837	2.1
Other .....	15,868	18.4

Fifty-nine percent of the structural arsons in 1985 involved residential property, with 42 percent of such offenses directed at single-occupancy residences. Motor vehicles comprised 92 percent of all mobile property at which arsons were directed. Sixteen percent of all targeted structural property was uninhabited or abandoned at the time the arson occurred.

**Arson, Structures Not in Use, 1985**

[12,697 agencies; 1985 estimated population 198,625,000]

Type of structure	Number of offenses	Percent not in use
Total .....	48,263	16.0
Single occupancy residential .....	20,184	21.3
Other residential .....	8,221	11.3
Storage .....	5,159	17.7
Industrial/manufacturing .....	899	10.6
Other commercial .....	6,118	9.8
Community/public .....	5,043	5.1
Other structure .....	2,639	23.9

The value of property damaged as a result of arsons reported during 1985 totaled \$1.3 billion. That total included over \$400 million in damage caused by a single arson incident at an industrial/manufacturing facility. Although having registered the highest average loss in previous years, the 1985 average for industrial/manufacturing structures (\$517,607) was extremely high, influenced by the substantial damage in the one incident. The overall average for all types of structures, including residential, commercial, storage, and industrial/manufacturing property was \$25,837. Mobile properties averaged \$3,707 per incident, and other targets, \$415.

**Arson, Monetary Value of Property Damaged, 1985**

[12,697 agencies; 1985 estimated population 198,625,000]

Property classification	Number of offenses	Average damage
Total .....	86,455	\$ 15,457 <sup>1</sup>
Total structure .....	48,263	25,837 <sup>1</sup>
Single occupancy residential .....	20,184	13,143
Other residential .....	8,221	11,526
Storage .....	5,159	20,536
Industrial/manufacturing .....	899	517,607 <sup>1</sup>
Other commercial .....	6,118	35,274
Community/public .....	5,043	15,460
Other structure .....	2,639	8,296
Total mobile .....	22,324	3,707
Motor vehicle .....	20,487	3,343
Other mobile .....	1,837	7,777
Other .....	15,868	415

<sup>1</sup>One arson reported in 1985 involved damage to Industrial/manufacturing structures of over \$400 million, inflating the average damage values.

**Clearances**

The national arson clearance rate during 1985 was 17 percent. Rural county agencies showed the highest rate, clearing 23 percent of the arson offenses brought to their attention. Suburban counties cleared 20 percent; and city law enforcement agencies, 15 percent.

Geographically, the Southern States reported a clearance rate of 22 percent; the Midwestern States, 16 percent; the Western States, 15 percent; and the Northeastern States, 13 percent.

Arson clearances demonstrated a higher percentage of juvenile involvement than any other Index crime. Only young people under age 18 were the arrestees in 36 percent of all arson clearances. Persons in this age group accounted for 34 percent of the structural arson clearances, 19 percent of those for mobile property, and 61 percent of arsons of all other property.

By population grouping, juveniles were the offenders in 38 percent of the city arson clearances, 34 percent of those in suburban counties, and 22 percent of those in the rural counties.

The tables on the following page show clearance data only for those 12,697 law enforcement agencies which were able to furnish breakdowns by type for the structural and mobile classifications. As can be seen, the highest clearance rate (34 percent) was recorded for offenses in which community or public structures were involved, while the lowest (10 percent) was registered for motor vehicles.

### Arson Offenses Cleared by Arrest,<sup>1</sup> 1985

[12,697 agencies<sup>2</sup>; 1985 estimated population 198,625,000]

Property classification	Number of offenses	Percent cleared by arrest
Total .....	86,455	18.9
Total structure .....	48,263	22.9
Single occupancy residential .....	20,184	23.4
Other residential .....	8,221	24.3
Storage .....	5,159	18.5
Industrial/manufacturing .....	899	14.8
Other commercial .....	6,118	16.9
Community/public .....	5,043	34.2
Other structure .....	2,639	18.6
Total mobile .....	22,324	10.9
Motor vehicles .....	20,487	10.4
Other mobile .....	1,837	16.4
Other .....	15,868	17.8

<sup>1</sup>Includes offenses cleared by exceptional means.

<sup>2</sup>The number of agencies used in this table is lower than the number used in Tables 20-23. To be included in this table, it was necessary that arson clearances be reported by property classification.

### Arson Offenses Cleared by Arrest<sup>1</sup> of Persons under 18 Years of Age, 1985

[12,697 agencies<sup>2</sup>; 1985 estimated population 198,625,000]

Property classification	Total arsons cleared	Percent under 18
Total .....	16,316	37.1
Total structure .....	11,062	34.7
Single occupancy residential .....	4,722	28.0
Other residential .....	2,001	28.9
Storage .....	954	50.8
Industrial/manufacturing .....	133	30.8
Other commercial .....	1,036	27.8
Community/public .....	1,725	52.2
Other structure .....	491	45.6
Total mobile .....	2,435	19.8
Motor vehicles .....	2,133	18.2
Other mobile .....	302	30.8
Other .....	2,819	61.4

<sup>1</sup>Includes offenses cleared by exceptional means.

<sup>2</sup>The number of agencies used in this table is lower than the number used in Tables 20-23. To be included in this table, it was necessary that arson clearances be reported by property classification.

### Persons Arrested

During 1985, the estimated number of arrests for arson totaled 19,500. Forty-one percent of the arrestees were under 18 years of age and 63 percent were under 25. Males comprised 87 percent of all arson arrestees.

Seventy-six percent of those arrested were white, 23 percent were black, and the remainder were of other races. Hispanics comprised 8 percent of the arrestees.

Trends for 1984 versus 1985 show arson arrests increased 2 percent nationwide. They were up 3 percent in the Nation's cities, 1 percent in the rural counties, and less than 1 percent in the suburban counties.

From 1984 to 1985, arrests of persons under the age of 18 increased 1 percent, and adult arrests increased 4 percent nationwide. During the same period, male arrests for arson were up 1 percent and female arrests, up 9 percent.

The 1985 arson arrest total for all ages decreased 8 percent from the 1981 level but was up 8 percent from the 1976 total.

## CRIME INDEX TABULATIONS

This Section's tabular portions present data on crime in the United States as a whole; geographic divisions; individual states; Metropolitan Statistical Areas; cities, towns, and counties; and college and university campuses. Also furnished in the following tables are national averages for the value of property stolen in connection with Crime Index offenses; further breakdowns by type for the robbery, burglary, larceny-theft, and arson classifications; and data on the type and value of property stolen and recovered.

Information on those offenses reported to law enforcement gives a reliable indication of criminal activity. In reviewing the tables in this report, it must be remembered, however, that many factors can cause the volume and type of crime to vary from place to place. Population, one of these factors, is used in computing crime rates; however, all communities are affected to some degree by seasonal or transient populations. Since counts of current, permanent population are used in their construction, crime rates do not account for short-term

population variability. A discussion of various factors contributing to the amount of crime in a given area is shown on page v of this publication.

National data can serve as a guide for the law enforcement administrator in analyzing the local crime count, as well as the performance of the jurisdiction's law enforcement agency. The analysis, however, should not end with a comparison based on data presented in this publication. It is only through an appraisal of local conditions that a clear picture of the community crime problem or the effectiveness of the law enforcement operation is possible.

### Note

*The collection of statistics on arson as a Crime Index offense began in 1979. However, 1985 annual figures are not available for inclusion in tables presenting statistics for the total United States. Arson totals reported by individual law enforcement agencies are displayed in Tables 6 through 9. Two-year arson trends are shown in Tables 10 through 13.*

## Crime Index Total

Following 3 consecutive years of decline, the Crime Index total rose 5 percent to 12.4 million offenses in 1985. Five- and 10-year percent changes showed the 1985 total was 7 percent below the 1981 level but 10 percent higher than in 1976.

All offenses comprising the Index increased in number from 1984 to 1985. Overall violent crime was up 4 percent with murder rising 2 percent; forcible rape, 4 percent; robbery, 3 percent; and aggravated assault, 6 percent.

The number of property crimes increased 5 percent for the 2-year period. Burglary increased 3 percent; larceny-theft, 5 percent; and motor vehicle theft, 7 percent.

Considering 5- and 10-year time frames, the 1985 violent and property crime totals each showed declines from the 1981 figures, 3 and 8 percent, respectively. Both categories, however, registered increases as compared to 1976. Violent crime was up 32 percent and property crime, 7 percent. National estimates of volume and rate per 100,000 inhabitants for all Crime Index offenses covering the past decade are set forth in the following table. Crime rates relate the incidence of reported crime to population.

Table 1.—Index of Crime, United States, 1976-1985

Population <sup>1</sup>	Crime Index total <sup>2</sup>	Modified Crime Index total <sup>3</sup>	Violent crime <sup>4</sup>	Property crime <sup>4</sup>	Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson <sup>3</sup>

<sup>1</sup>Populations are Bureau of the Census provisional estimates as of July 1, except April 1, 1980, preliminary census counts, and are subject to change.

<sup>2</sup>Because of rounding, the offenses may not add to totals.

<sup>3</sup>Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

<sup>4</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

All rates were calculated on the offenses before rounding.

Table 2, "Index of Crime, United States, 1985," shows current year estimates for MSAs, rural counties, and cities

and towns outside metropolitan areas (other cities). See Appendix III for the definitions of these community types.

<sup>1</sup>Populations are Bureau of the Census provisional estimates as of July 1, 1985, and are subject to change.

<sup>2</sup>Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

<sup>3</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

<sup>4</sup>The percentage representing area actually reporting will not coincide with the ratio between reported and estimated crime totals, since these data represent the sum of the calculations for individual states which have varying populations, portions reporting, and crime rates.

Provided in Table 3, "Index of Crime, Regional Offense and Population Distribution, 1985," are data showing the geographical distribution of estimated Index crimes and population. When utilizing figures presented on a regional basis in this publication, the reader is cautioned to

consider each region's proportion of the total United States population. For example, while the Southern States accounted for the largest volume of Crime Index offenses in 1985, they also represented the greatest regional population.

Table 3.— Index of Crime, Regional Offense and Population Distribution, 1985

<sup>1</sup>Populations are Bureau of the Census provisional estimates as of July 1, 1984 and 1985, and are subject to change.<sup>2</sup>Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.<sup>3</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.<sup>4</sup>The percent changes for forcible rape in Illinois, East North Central States, and Midwest were calculated with Chicago removed. Also, forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with National UCR guidelines. The 1985 forcible rape totals for most agencies in Illinois were, therefore estimated using the national ratio of forcible rapes versus the total crimes of violence. See "Offense Estimation" pages 3 and 4 for details.<sup>5</sup>Includes offenses reported by the Zoological Police.<sup>6</sup>Population and offense data are not included in totals.

Offense totals are based on all reporting agencies and estimates for unreported areas.

<sup>1</sup>Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.<sup>2</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.<sup>3</sup>Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.<sup>4</sup>Includes offenses reported by the Zoological Police.

<sup>5</sup>Also, Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. The 1985 forcible rape totals for most agencies in Illinois were, therefore, estimated using the national ratio of forcible rapes versus the total crimes of violence.

Table 6.—Number of Offenses Known to the Police, Cities and Towns 10,000 and over in Population, 1985

\* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

City by State	Population	Crime Index total	Modified* Crime Index total	Murder and non-negligent man-slaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

<sup>1</sup> Figures are not comparable with previous years.

<sup>2</sup>Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Forcible rapes for Illinois agencies are shown only if the counts were supported by supplemental reports. Leaders (...) indicate zero data.

<sup>3</sup>Forcible rape figures are not comparable with previous years.

<sup>4</sup>Arson data are not comparable with previous years.

Table 7.—Number of Offenses Known to the Police, Universities and Colleges, 1985

\* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data.

<sup>1</sup>The student enrollment figures provided by the U.S. Department of Education are for 1984, the most recent year available.<sup>2</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.<sup>3</sup>Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.<sup>4</sup>Student enrollment figures are not available.<sup>5</sup>Forcible rape figures furnished to the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Forcible rapes for Illinois agencies are shown only if the counts were supported by supplemental reports. Leaders (...) indicate zero data.

NOTE: Caution should be exercised in making any inter-campus comparisons or ranking schools, as university/college crime statistics are affected by a variety of factors. These include: demographic characteristics of the surrounding community, ratio of male to female students, number of on-campus residents, accessibility of outside visitors, size of enrollment, etc.

**Table 8.—Number of Offenses Known to the Police, Suburban Counties, 1985**

[The data shown in this table do not reflect county totals but are the number of offenses reported by the sheriff's office, county police department, or state police.]

\* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

County by State	Crime Index total	Modified* Crime Index total	Murder and non-negligent man-slaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

<sup>1</sup>Forcible rape figures furnished to the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Forcible rapes for Illinois agencies are shown only if the counts were supported by supplemental reports. Leaders (...) indicate zero data.

**Table 9.—Number of Offenses Known to the Police, Rural Counties 25,000 and over in Population, 1985**

[The data shown in this table do not reflect county totals but are the number of offenses reported by the sheriff's office, county police department, or state police.]

\* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

County by State	Crime Index total	Modified* Crime Index total	Murder and non-negligent man-slaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

<sup>1</sup>Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Forcible rapes for Illinois agencies are shown only if the counts were supported by supplemental reports. Leaders (...) indicate zero data.

<sup>2</sup>Aggravated assault figures are not comparable to previous years.

<sup>1</sup>The number of agency reports used in arson trends is less than used in compiling trends for other Crime Index offenses. However, the number of agencies used in the arson column of this table is greater than the number used in the tables on pages 37-39, since it is not necessary to report arsons by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

<sup>2</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

<sup>3</sup>Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

<sup>4</sup>Includes state police agencies with no county breakdown.

<sup>5</sup>Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

<sup>1</sup>The number of agencies used in arson trends are less than used in compiling trends for other Crime Index offenses. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

<sup>2</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

<sup>3</sup>Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

<sup>4</sup>Crime offenses include sheriffs' and county law enforcement agencies. State police offenses are not included.

Table 13.— Crime Trends, Offenses Known Breakdown, Population Group, 1984-1985

[1985 estimated population]

Population group	Forcible rape		Robbery				Aggravated assault				Burglary			Motor vehicle theft			Arson <sup>1</sup>		
	Rape by force	Assault to rape-attempts	Firearm	Knife or cutting instrument	Other weapon	Strong-armed	Firearm	Knife or cutting instrument	Other weapon	Hands, fists, feet, etc.	Forcible entry	Unlawful entry	Attempted forcible entry	Autos	Trucks and buses	Other vehicles	Structure	Mobile	Other

<sup>1</sup>The number of agency reports used in arson trends is less than used in compiling trends for the other Crime Index offenses. However, the number of agencies used in the arson column of this table is greater than the number used in the tables on pages 37-39 since it is not necessary to report arsons by detailed property classification breakdowns to be included in this table.

<sup>2</sup>Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

<sup>1</sup>Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for other seven Crime Index offenses. Independently tabulated arson rates appear on page 37 of this publication.

<sup>2</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

<sup>3</sup>Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

<sup>4</sup>Includes state police agencies with no county breakdown.

<sup>5</sup>Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Population figures were rounded to the nearest thousand. All rates were calculated on the population before rounding.

### SECTION III

## CRIME INDEX OFFENSES CLEARED

For UCR purposes, law enforcement agencies clear or solve an offense when at least one person is arrested, charged with the commission of the offense, and turned over to the court for prosecution. Several crimes may be cleared by the arrest of one person, while the arrest of many persons may clear only one offense. In certain situations, law enforcement agencies may clear a crime by exceptional means. Clearances by exceptional means are recorded in instances when some element beyond law enforcement control precludes the placing of formal charges against the offender. Examples of circumstances allowing such clearances are the death of the offender (suicide, justifiably killed by police or private citizen, etc.); the victim's refusal to prosecute after the offender has been identified; or the denial of extradition because the offender committed another crime and is being prosecuted in a different jurisdiction. In all exceptional clearance cases, law enforcement must have identified the offender, have enough evidence to support arrest, and know the offender's location.

During 1985, law enforcement agencies cleared 21 percent of the Crime Index offenses brought to their attention. The overall clearance rate for violent crime was 48 percent. Reporting agencies recorded a 72-percent clearance rate for murder, 54 percent for forcible rape, 25 percent for robbery, and 62 percent for aggravated

assault. Clearances for crimes against persons (murder, forcible rape, and aggravated assault) are generally higher as more intense investigative efforts are often given these offenses and witnesses are frequently available to identify the perpetrators.

In connection with property crimes, 18 percent of the total offenses in this category were cleared by law enforcement. The clearance rate for burglary was 14 percent; for larceny-theft, 20 percent; for motor vehicle theft, 15 percent; and for arson, 17 percent. When considering the total Modified Crime Index which includes arson, the overall clearance rate remained the same, 21 percent.

Rural county law enforcement agencies showed clearances for 23 percent of the Crime Index offenses brought to their attention. Those in cities cleared 21 percent and in suburban counties, 20 percent.

Geographically, the highest clearance rate for the total Crime Index offenses was registered in the Southern States with 22 percent. Following were the Western States with 21 percent, and the Northeastern and Midwestern States each with 19 percent. In addition to registering the highest Crime Index clearance rate, the Southern States also recorded the most successful violent and property crime clearance percentages, 53 and 19 percent, respectively.

**Percent of Offenses Cleared by Arrest<sup>1</sup>, Region, 1985**

Region	Crime Index total	Modified Crime Index total	Violent crime	Property crime	Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson
United States total .....	20.9	20.9	47.6	17.8	72.0	54.1	25.3	61.6	14.0	19.8	15.4	16.6
Northeastern States .....	19.4	19.3	43.2	15.8	70.2	57.1	24.7	61.4	13.9	18.1	9.0	12.9
Midwestern States .....	19.5	19.4	44.2	17.1	65.7	48.8	21.6	56.4	12.0	19.4	14.7	15.5
Southern States .....	22.4	22.4	52.9	18.7	76.7	59.3	27.3	64.9	15.8	19.9	19.6	22.1

<sup>1</sup>Includes exceptional clearances.

#### Clearances Involving Only Persons under 18 Years of Age

Involvement of juveniles in crime can be measured by the number of crimes in which they have been identified as the offenders. Even though no physical arrest has been made, a clearance by arrest may be recorded for offenders under 18 years of age when they are cited to appear in juvenile court or before other juvenile authorities. Juveniles (persons under 18 years of age) accounted for an estimated 26 percent of the 1985 U. S. population.

Twenty percent of the Crime Index offenses cleared by law enforcement during 1985 involved only young people

under age 18. Persons in this age group accounted for 10 percent of the violent crime clearances and 23 percent of those for property crimes. Murder showed the lowest percentage of juvenile involvement (5 percent), while the highest percentage was shown for arson (36 percent).

Regionally, the Midwest recorded the largest percentage of involvement by the under 18 age group 25 percent. Juveniles were the offenders in 23 percent of the clearances in the Western States, 19 percent of those in the Northeastern States, and 16 percent of those in the Southern States.

<sup>1</sup>Includes offenses cleared by exceptional means.<sup>2</sup>The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. However, the number of agencies used in the arson column for this table is greater than the number used in the clearance tables on page 39, since it is not necessary to report clearances by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.<sup>3</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.<sup>4</sup>Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.<sup>5</sup>Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

<sup>1</sup>Includes offenses cleared by exceptional means.<sup>2</sup>The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. However, the number of agencies used in the arson column for this table is greater than the number used in the clearance table on page 39, since it is not necessary to report clearances by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.<sup>3</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.<sup>4</sup>Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

Table 22.—Offenses Known Breakdown and Percent Cleared by Arrest<sup>1</sup>, Population Group, 1985

[1985 estimated population]

Population group	Forcible rape		Robbery			Aggravated assault			Burglary			Motor vehicle theft			Arson <sup>2</sup>				
	Rape by force	Assault to rape-attempts	Firearm	Knife or cutting instrument	Other weapon	Strong-armed	Firearm	Knife or cutting instrument	Other weapon	Hands, fists, feet, etc.	Forcible entry	Unlawful entry	Attempted forcible entry	Autos	Trucks and buses	Other vehicles	Structure	Mobile	Other

<sup>1</sup>Includes offenses cleared by exceptional means.<sup>2</sup>The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. However, the number of agencies used in the arson column for this table is greater than the number used in the clearance tables on page 39, since it is not necessary to report clearances by detailed property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.<sup>3</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.<sup>4</sup>Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.<sup>5</sup>Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities are also included in other city groups.

## SECTION IV

### PERSONS ARRESTED

Primarily measuring law enforcement's response to crime, arrests also provide useful information on the age, sex, race, and ethnic origin of the perpetrators involved. Arrest practices, policies, and enforcement emphases vary from place to place and even within a community from time to time as, for example, during a local police campaign against residential burglary. Although the arrest volumes for certain unlawful conduct such as drunkenness, disorderly conduct, vagrancy, and related violations may differ among agencies, robbery, burglary, and other serious crime arrests are more likely to result from uniform and consistent practices throughout all jurisdictions. This Program's procedures require that an arrest be counted on each separate occasion a person is taken into custody, notified, or cited. Annual arrest figures do not measure the number of individuals arrested since one person may be arrested several times during the year for the same or different offenses.

In 1985, an estimated 11.9 million arrests for all criminal infractions except traffic violations were recorded nationwide. Relating the arrest volume to the total estimated United States population, the arrest rate was 5,062 per 100,000 inhabitants. Law enforcement agencies in cities with populations over 250,000 showed the highest rate, 7,516 per 100,000. For suburban county agencies overall, the arrest rate was 3,805, and for rural county law enforcement, it was 3,363 per 100,000 inhabitants.

Of the regions, the West recorded the highest arrest rate, 5,902 per 100,000 people, while the lowest rate, 3,996, was registered in the Midwest. Rates in the remaining two regions were 5,191 in the South and 5,110 in the Northeast.

#### Arrest Trends

Compared to the 1984 total, the number of arrests for all offenses except traffic violations increased 3 percent in 1985. During the same time period, adult arrests were up 2 percent, and those of persons under 18 years of age rose 5 percent. Considering the eight Crime Index offenses collectively, arrests of persons of all ages increased 4 percent, adult arrests rose 3 percent, and juvenile arrests were up 5 percent from 1984. A further examination of arrests for the Index showed overall property crime arrests up 5 percent but violent crime arrests down less than 1 percent.

Similar to the national experience, 2-year trends for city agencies showed a 3-percent increase in total arrests, 1985 over 1984. Suburban county arrests were up 4 percent and rural county arrests, 1 percent.

For the 5-year period, 1981-1985, total arrests increased 4 percent. Adult arrests were up 6 percent and those of persons under 18 years of age dropped 7 percent. Five-year trends for the Crime Index revealed a 3-percent decline in total arrests and a 10-percent drop in arrests of persons under 18 years of age. The volume of adult arrests for Index offenses rose 1 percent. During the same years, overall violent and property crime arrests decreased, 4 and 2 percent, respectively.

Increases in arrests of persons of all ages were recorded for the 10 years, 1976-1985. Arrests for all offenses were up 17 percent; Crime Index arrests, 8 percent; violent crime arrests, 16 percent; and property crime arrests, 6 percent.

In 1985, arrests for drug abuse violations rose 13 percent over the 1984 experience and 23 percent above the 1981 level. The types of drugs involved in violations resulting in arrests during 1985 are shown by geographic region in the accompanying table.

#### Arrests for Drug Abuse Violations, 1985

[Percent distribution]

	United States total	North- eastern States	Mid- western States	South- ern States	Western States

<sup>1</sup>Because of rounding, percentages may not add to totals.

#### Age

Of all arrestees nationwide in 1985, 6 percent were under the age of 15, 17 percent were under 18, 31 percent were under 21, and 50 percent were under 25. Fifty-one percent of arrests in the cities, 45 percent of those in the suburban counties, and 42 percent of those in the rural counties were accounted for by arrestees in the under 25 age group.

Age distribution figures for persons arrested for Crime Index offenses showed 31 percent were under the age of 18; 47 percent were under 21; and 62 percent, under 25. The under 25 age group was also responsible for 50 percent of the violent crime arrests and 65 percent of property crime arrests.

## Sex

In 1985, 4 of every 5 arrestees throughout the Nation were males. They also accounted for 79 percent of arrests for Index crimes, 89 percent of those for violent crimes, and 76 percent of those for property crimes. Males were most often arrested for driving under the influence, the offense which accounted for 16 percent of all male arrests.

Larceny-theft was again the crime for which females were most often arrested. This single offense accounted for 81 percent of arrests of women for Index crimes and 20 percent of all female arrests. Of the female larceny-theft arrestees, 56 percent were under 25 years of age.

Runaways .....		161,200	

<sup>1</sup>Arrest totals based on all reporting agencies and estimates for unreported areas.

<sup>2</sup>Because of rounding, items may not add to totals.

<sup>3</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

<sup>4</sup>Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

<sup>5</sup>Includes arson.

Both male and female arrests were on the rise from 1984 to 1985. Arrests of males increased 2 percent, while those of females were up 6 percent. From 1981 to 1985, there was a 2-percent increase in overall male arrests and a 13-percent jump in female arrests. Although arrests of females under age 18 rose 1 percent during the 5-year timespan, arrests of males under age 18 dropped 9 percent.

<sup>1</sup>Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

<sup>2</sup>Because of rounding, the percentages may not add to total.

<sup>3</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

<sup>4</sup>Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

<sup>5</sup>Includes arson.

Excludes central cities. Suburban cities and counties are included in other groups.

## Law Enforcement Code of Ethics

*As a Law Enforcement Officer, my fundamental duty is to serve mankind; to safeguard lives and property; to protect the innocent against deception, the weak against oppression or intimidation, and the peaceful against violence or disorder; and to respect the Constitutional rights of all men to liberty, equality and justice.*

*I will keep my private life unsullied as an example to all; maintain courageous calm in the face of danger, scorn, or ridicule; develop self-restraint; and be constantly mindful of the welfare of others. Honest in thought and deed in both my personal and official life, I will be exemplary in obeying the laws of the land and the regulations of my department. Whatever I see or hear of a confidential nature or that is confided to me in my official capacity will be kept ever secret unless revelation is necessary in the performance of my duty.*

*I will never act officiously or permit personal feelings, prejudices, animosities or friendships to influence my decisions. With no compromise for crime and with relentless prosecution of criminals, I will enforce the law courteously and appropriately without fear or favor, malice or ill will, never employing unnecessary force or violence and never accepting gratuities.*

*I recognize the badge of my office as a symbol of public faith, and I accept it as a public trust to be held so long as I am true to the ethics of the police service. I will constantly strive to achieve these objectives and ideals, dedicating myself before God to my chosen profession . . . law enforcement.*

## SECTION V

### LAW ENFORCEMENT PERSONNEL

The Nation's law enforcement community employed an average of 2.1 full-time officers for every 1,000 inhabitants as of October 31, 1985. Considering full-time civilians, the overall law enforcement employee rate was 2.8 per 1,000 inhabitants according to 12,151 city, county, and state police agencies reporting in 1985. These agencies collectively offered law enforcement service to a population of over 224 million, employing 470,678 officers and 148,956 civilians.

Varying demographic and other jurisdictional characteristics greatly affect the requirements for law enforcement service from one locale to another. The needs of a community having a highly mobile or seasonal population, for example, may be very different from those of a city whose population is relatively stable. Similarly, a small community situated between two large cities may require a greater number of law enforcement personnel than a community of the same size which has no urban centers nearby.

The functions of law enforcement are also significantly diverse throughout the Nation. In certain areas, sheriffs' responsibilities are limited almost exclusively to civil functions and/or the administration of the county jail

facilities. Likewise, the responsibilities of state police and highway patrol agencies vary from one jurisdiction to another.

In view of these differing service requirements and responsibilities, care should be used when attempting any comparison of law enforcement employee rates. The rates presented in the following tables represent national averages; they should be viewed as guides or indicators, not as recommended or desirable police strengths. Adequate manpower for a specific locale can be determined only after careful study and analysis of the various conditions affecting service requirements in that jurisdiction.

City law enforcement employee averages in 1985 ranged from 2.0 per 1,000 inhabitants in those with populations from 25,000 to 49,999 to 3.4 for those with populations of 250,000 or more. Rural and suburban counties averaged full-time law enforcement employee rates of 3.3 and 2.9 per 1,000 population, respectively.

Regionally, the Northeast and the South each recorded employee rates of 2.8. The lower rate of 2.4 employees per 1,000 inhabitants was registered in both the West and Midwest.

**Full-time Law Enforcement Employees<sup>1</sup>, Rate per 1,000 Inhabitants, Region, October 31, 1985**

	Total (9,228 cities; population 150,071,000)	Group I (60 cities, 250,000 and over; population 43,402,000)	Group II (121 cities, 100,000 to 249,999; population 17,526,000)	Group III (286 cities, 50,000 to 99,999; population 19,476,000)	Group IV (617 cities, 25,000 to 49,999; population 21,324,000)	Group V (1,587 cities, 10,000 to 24,999; population 24,916,000)	Group VI (6,557 cities under 10,000; population 23,427,000)
<b>TOTAL:</b> 9,228 cities; population: 150,071,000.....	2.6	3.4	2.4	2.1	2.0	2.1	2.8

<sup>1</sup>Includes civilians.

## Sworn Personnel

Rates based solely on sworn law enforcement personnel (excluding civilians) showed the national average for all cities was 2.1 officers per 1,000 inhabitants. By population grouping, the lowest average rate (1.6) was for cities with populations of 25,000 to 49,999; cities 250,000 or more in population recorded the highest rate, 2.7. Suburban county law enforcement agencies averaged 2.0 officers per 1,000 population, while agencies in rural counties averaged 2.3.

Geographically, the highest rate of officers to population was recorded in the Northeastern States where there were 2.4 officers per 1,000 inhabitants. Following were the Southern States with 2.1, the Midwestern States with 2.0, and the Western States with 1.7.

Nationally, males comprised 93 percent of all sworn employees. Ninety-four percent of the officers in cities

and rural counties were males, while in suburban counties they accounted for 90 percent.

## Civilian Employees

Civilians made up 24 percent of the total United States law enforcement employee force in 1985. They represented 20 percent of the police employees in cities, 30 percent of those in suburban counties, and 31 percent of the rural law enforcement strength.

## Law Enforcement Officers Killed and Assaulted

Seventy-eight law enforcement officers were feloniously slain in the line of duty during 1985, 6 more lives lost than in 1984. The increase in 1985 followed annual declines in both 1983 and 1984.

Extensive data on line-of-duty deaths and assaults on city, county, state, and Federal officers can be found in the Uniform Crime Reporting publication, *Law Enforcement Officers Killed and Assaulted*.

## SECTION VI APPENDIX I TABLE METHODOLOGY

Designed to assist the reader, this appendix explains the construction of many tabular presentations in the book. The following key refers to the columnar headings used throughout the appendix.

**Key:** A) Column 1 shows the table numbers. Included are Tables 1 through 69, *Crime in the United States-1985*.

B) Column 2 indicates the level of submission necessary for an agency's statistics to be included in a table. There are three levels of participation:

1. Agencies having reported data for all 12 months of the year.
2. Agencies having reported data for at least one month but less than 12 months of the year.
3. Nonreporting agencies.

The tabulations presented in the publication employ statistics from one or more of the above-listed participation levels. For example, Table 2 includes all three agency reporting levels, but Table 14 presents only data for agencies having reported the entire year.

C) Column 3 explains how each table was constructed. Data adjustments, if any, are discussed along with various definitions of data aggregation.

D) Column 4 contains general comments regarding the potential use and misuse of the statistics presented.

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
1	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1985 statistics are consistent with Table 2. Pre-1985 crime statistics may have been updated, and hence, may not be consistent with prior publications. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for each year. Population statistics represent July 1 provisional estimations for each year except April 1, 1980. The offense breakdowns are according to UCR crime definitions (App. II). Crime volume statistics are rounded to the nearest 10 for violent crime and the nearest 100 for property crime. Percent changes and rates are computed prior to rounding.	Represents an estimation of national reported crime activity from 1976 to 1985.
2	All law enforcement agencies in the UCR Program (including those submitting less than 12 months for 1985).	Statistics are aggregated from individual state statistics as shown in Table 5. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent July 1, 1985, Bureau of the Census provisional estimates. The tabular breakdowns are in accordance with UCR crime definitions (App. II) and population classifications (App. III).	Represents an estimation of national reported crime activity in 1985.
3	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1985).	Regional offense distributions are computed from volume figures as shown in Table 4. Population distributions are based on July 1, 1985, Bureau of the Census provisional estimates.	Represents the 1985 geographical distribution of estimated Crime Index offenses and population.
4	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1985 statistics are aggregated from individual state statistics as shown in Table 5. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for 1984 and 1985. Population statistics represent July 1 provisional estimates for 1984 and 1985. The offense breakdowns are according to UCR crime definitions (App. II).	Represents an estimation of reported crime activity for Index offenses at the: 1. national level 2. regional level 3. division level 4. state level Any comparison of UCR statistics should take into consideration demographic differences.
5	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1985).	Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent July 1, 1985, Bureau of the Census provisional estimates. Statistics under the heading "Area Actually Reporting" represent reported offense totals for agencies submitting 12 months of offense reports and estimated totals for agencies submitting less than 12 but more than 2 months of offense reports. The statistics under the heading "Estimated Totals" represent the above plus estimated offense totals for agencies having less than 3 months of offense reports. The offense breakdowns are according to UCR definitions (App. II).	Represents an estimation of reported crime activity for Index offenses at the state level. Any comparison of UCR statistics should take into consideration demographic differences.
6	All law enforcement agencies submitting complete reports for 12 months in 1985.	"Cities and Towns" are defined to be agencies in Population Groups I through V (App. III). The populations are July 1, 1985, estimates for each agency.	Represents reported crime activity of individual agencies in cities and towns 10,000 and over in population. Any comparison of UCR statistics should take into consideration demographic differences.
7	All university/college law enforcement agencies submitting complete reports for 12 months in 1985.	The 1984 student enrollment figures, which are provided by the U.S. Department of Education, are the most recent available.	Represents reported crime from those individual university/college law enforcement agencies contributing to the UCR Program. These agencies are listed alphabetically by state. Any comparison of these UCR statistics should take into consideration size of enrollment, number of on-campus residents, plus other demographic differences.
8	All law enforcement agencies submitting complete reports for 12 months in 1985.	"Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III). Population estimates of suburban counties are as of July 1, 1985.	Represents crime reported to individual law enforcement agencies in suburban counties i.e., the individual sheriff's office, county police department, highway patrol, and/or state police. These figures do not represent the county totals since they exclude city crime counts. Any comparison of UCR statistics should take into consideration demographic differences.

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
9	All law enforcement agencies submitting complete reports for 12 months in 1985.	"Rural Counties" are those outside MSAs and whose jurisdictions are not covered by city police agencies (App. III). Population classifications of rural counties are based on July 1, 1985, estimates for individual agencies.	Represents crime reported to individual rural county law enforcement agencies covering populations 25,000 and over, i.e., the individual sheriff's office, county police department, highway patrol, and/or state police. These figures do not represent the county totals since they exclude city crime counts. Any comparison of UCR statistics should take into consideration demographic differences.
10-13	All law enforcement agencies submitting complete reports for at least 6 common months in 1984 and 1985.	The 1985 crime trend statistics are 2-year comparisons based on 1985 reported crime activity. Only common reported months for individual agencies are included in 1985 trend calculations. Population statistics represent July 1, 1985, estimates for individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III). Note that "Suburban and Nonsuburban Cities" are all municipal agencies other than central cities in MSAs.	Slight decrease in national coverage for Table 13 due to editing procedure and lower submission rate.
14-17	All law enforcement agencies submitting complete reports for 12 months in 1985.	The 1985 crime rates are the ratios of the aggregated 1985 crime volumes and the aggregated 1985 populations of the contributing agencies. Population statistics represent July 1, 1985, estimates for individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III). Note that "Suburban and Nonsuburban Cities" are all municipal agencies other than central cities in MSAs.	Slight decrease in national coverage for Table 17 due to editing procedure and lower submission rate.
18, 19	All law enforcement agencies submitting complete reports for at least 6 months in 1985.	Offense total and value lost total are computed for all Index offense categories other than aggravated assault. Percent distribution is derived based on offense total with each Index offense. Trend statistics are derived based on agencies with at least 6 common months complete for 1984 and 1985.	Aggravated assault is excluded from Table 18. For UCR Program purposes, the taking of money or property in connection with an assault is reported as a robbery.
20-23	All law enforcement agencies submitting complete reports for at least 6 months in 1985.	The 1985 clearance rates are based on offense and clearance volume totals of the contributing agencies for 1985. Population statistics represent July 1 estimates for individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III).	
24	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1985).	The arrest totals presented are national estimates based on the arrest statistics of all law enforcement agencies in the UCR Program (including those submitting less than 12 months). The "Total Estimated Arrests" statistic is the sum of estimated arrest volumes for each of the 29 offenses. Each individual arrest total is the sum of the estimated volumes within each of the eight population groups (App. III). Each group's estimate is the reported volume (as shown in Table 26) divided by the percent of total group population reporting (according to July 1, 1985, estimates).	
25, 26	All law enforcement agencies submitting complete reports for 12 months in 1985.	The 1985 arrest rates are the ratios, per 100,000 inhabitants, of the aggregated 1985 reported arrest statistics and population. The population statistics represent the July 1, 1985, estimates for individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications/geographical configuration (App. III).	
27, 28	All law enforcement agencies submitting complete reports for 12 months in 1976 and 1985.	The arrest trends are the percentage differences between 1976 and 1985 arrest volumes aggregated from all common agencies. Population statistics represent July 1, 1985, estimates.	
29, 30	All law enforcement agencies submitting complete reports for 12 months in 1981 and 1985.	The arrest trends are the percentage differences between 1981 and 1985 arrest volumes aggregated from common agencies. Population statistics represent July 1, 1985, estimates.	
31, 32	All law enforcement agencies submitting complete reports for 12 months in 1984 and 1985.	The arrest trends are 2-year comparisons between 1984 and 1985 arrest volumes aggregated from common agencies. Population statistics represent July 1, 1985, estimates.	
33-39	All law enforcement agencies submitting complete reports for 12 months in 1985.		Slight decrease in coverage for Tables 38 and 39 due to editing procedure and lower submission of race and ethnic origin data.

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
40, 41	All city law enforcement agencies submitting complete reports for 12 months in 1984 and 1985.	The 1985 city arrest trends represent the percentage differences between 1984 and 1985 arrest volumes aggregated from common city agencies. "City Agencies" are defined to be all agencies within Population Groups I-VI (App. III). "City Agencies" are defined as agencies within Population Groups I-VI (App. III).	
42-46	All city law enforcement agencies submitting complete reports for 12 months in 1985.		Slight decrease in coverage for Tables 45 and 46 due to editing procedure and lower submission of race and ethnic origin data.
47, 48	All suburban county law enforcement agencies submitting complete reports for 12 months in 1984 and 1985.	The 1985 suburban county arrest trends represent percentage differences between 1984 and 1985 volumes aggregated from contributing agencies. "Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III). "Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III).	
49-53	All suburban county law enforcement agencies submitting complete reports for 12 months in 1985.		Slight decrease in coverage for Tables 52 and 53 due to editing procedure and lower submission rate.
54, 55	All rural county law enforcement agencies submitting complete reports for 12 months in 1984 and 1985.	The 1985 rural county arrest trends represent percentage differences between 1984 and 1985 volumes aggregated from contributing agencies. "Rural Counties" are defined as noncity agencies outside MSAs (App. III). "Rural Counties" are defined as noncity agencies outside MSAs (App. III).	
56-60	All rural county law enforcement agencies submitting complete reports for 12 months in 1985.		Slight decrease in coverage for Tables 59 and 60 due to editing procedure and lower submission of race and ethnic origin data.
61, 62	All suburban area law enforcement agencies submitting complete reports for 12 months in 1984 and 1985.	The 1985 suburban area arrest trends represent percentage differences between 1984 and 1985 arrest volumes aggregated from contributing agencies. "Suburban Area" is defined as cities with fewer than 50,000 inhabitants and all counties within MSAs (App. III). "Suburban Area" is defined as cities with fewer than 50,000 inhabitants and all counties within MSAs (App. III).	
63-67	All suburban area law enforcement agencies submitting complete reports for 12 months in 1985.		Slight decrease in coverage for Tables 66 and 67 due to editing procedure and lower submission of race and ethnic origin data.
68	All law enforcement agencies submitting complete reports for 12 months in 1985.	Arrest totals are aggregated for individual agencies within each state. Population figures represent July 1 provisional estimates for 1985. The tabular breakdowns are according to UCR crime definitions (App. II).	Any comparison of statistics should take into consideration variances in arrest practices, particularly for Part II crimes.
69	All law enforcement agencies submitting complete reports for 12 months in 1985.	Population statistics represent July 1, 1985, estimates for individual agencies. See Appendix III for definitions of the population classifications presented.	Data furnished are based upon individual state age definitions for juveniles.

## APPENDIX II

### OFFENSES IN UNIFORM CRIME REPORTING

Offenses in Uniform Crime Reporting are divided into two groupings, Part I and Part II. Information on the volume of Part I offenses known to law enforcement, those cleared by arrest or exceptional means, and the number of persons arrested is reported monthly. Only arrest data are reported for Part II offenses.

The Part I offenses are as follows:

**Criminal Homicide.**— a. Murder and nonnegligent manslaughter: the willful (nonnegligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, accidental deaths, and justifiable homicides are excluded. Justifiable homicides are limited to: (1) the killing of a felon by a law enforcement officer in the line of duty; and (2) the killing of a felon by a private citizen. b. Manslaughter by negligence: the killing of another person through gross negligence. Traffic fatalities are excluded. While manslaughter by negligence is a Part I crime, it is not included in the Crime Index.

**Forcible rape.**— The carnal knowledge of a female forcibly and against her will. Included are rapes by force and attempts or assaults to rape. Statutory offenses (no force used— victim under age of consent) are excluded.

**Robbery.**— The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

**Aggravated assault.**— An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

**Burglary-breaking or entering.**— The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

**Larceny-theft (except motor vehicle theft).**— The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles or automobile accessories, shoplifting, pocket-picking, or the stealing of any property or article which is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, "con" games, forgery, worthless checks, etc., are excluded.

**Motor vehicle theft.**— The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on the surface and not on rails. Specifically excluded from this category are motorboats, construction equipment, airplanes, and farming equipment.

**Arson.**— Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

The Part II offenses are:

**Other assaults (simple).**— Assaults and attempted assaults where no weapon is used and which do not result in serious or aggravated injury to the victim.

**Forgery and counterfeiting.**— Making, altering, uttering, or possessing, with intent to defraud, anything false in the semblance of that which is true. Attempts are included.

**Fraud.**— Fraudulent conversion and obtaining money or property by false pretenses. Included are confidence games and bad checks, except forgeries and counterfeiting.

**Embezzlement.**— Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

**Stolen property; buying, receiving, possessing.**— Buying, receiving, and possessing stolen property, including attempts.

**Vandalism.**— Willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or persons having custody or control.

**Weapons; carrying, possessing, etc.**— All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Included are attempts.

**Prostitution and commercialized vice.**— Sex offenses of a commercialized nature, such as prostitution, keeping a bawdy house, procuring, or transporting women for immoral purposes. Attempts are included.

**Sex offenses (except forcible rape, prostitution, and commercialized vice).**— Statutory rape and offenses against chastity, common decency, morals, and the like. Attempts are included.

**Drug abuse violations.**— State and local offenses relating to the unlawful possession, sale, use, growing, and manufacturing of narcotic drugs.

**Gambling.**— Promoting, permitting, or engaging in illegal gambling.

**Offenses against the family and children.**— Nonsupport, neglect, desertion, or abuse of family and children.

**Driving under the influence.**— Driving or operating any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

**Liquor laws.**— State or local liquor law violations, except "drunkenness" and "driving under the influence." Federal violations are excluded.

**Drunkenness.**— Offenses relating to drunkenness or intoxication. Excluded is "driving under the influence."

**Disorderly conduct.**— Breach of the peace.

**Vagrancy.**— Vagabondage, begging, loitering, etc.

**All other offenses.**— All violations of state or local laws, except those listed above and traffic offenses.

**Suspicion.**— No specific offense; suspect released without formal charges being placed.

**Curfew and loitering laws.**— (persons under age 18).— Offenses relating to violations of local curfew or loitering ordinances where such laws exist.

**Runaways.**— (persons under age 18).— Limited to juveniles taken into protective custody under provisions of local statutes.

## APPENDIX III

### UNIFORM CRIME REPORTING AREA DEFINITIONS

#### Community Types

Uniform Crime Reporting data are often presented using three community-type aggregations. These are Metropolitan Statistical Areas (MSAs), other cities, and rural counties.

The MSA concept was developed to facilitate the analysis and dissemination of uniform statistical information on metropolitan areas. The primary objective in establishing standard definitions of these areas was to make it possible for Federal agencies to utilize the same boundaries when publishing statistical data. Each MSA is an integrated economic and social unit with a recognized large population nucleus. Detailed criteria followed in establishing and defining MSAs can be found in the U. S. Department of Commerce publication, *Metropolitan Statistical Areas*, 1983 edition.

An MSA includes a central city of at least 50,000 population or an urbanized area of at least 50,000. The county containing the central city and contiguous counties having strong economic and social relationships to the central city and county are also included. Counties in MSAs are designated suburban in UCR. An MSA may cross state lines.

New England MSAs are comprised of cities and towns instead of counties. In this publication's tabular presentations, New England cities and towns are assigned to the proper MSA. However, some counties have both suburban and rural portions. Data for state police and sheriffs in those jurisdictions are included in statistics for the rural area.

MSAs made up approximately 76 percent of the total United States population in 1985. Some presentations in this book refer to "suburban area." A suburban area includes cities with less than 50,000 inhabitants in addition to counties (unincorporated areas) within the MSA. The central cities are, of course, excluded.

"Other cities," most of which are incorporated, are those outside MSAs. They comprised 10 percent of the 1985 population of the United States.

Rural counties, like "other cities," are outside MSAs. Covering areas not under the jurisdiction of city police departments, rural county law enforcement agencies offered service to 14 percent of the national population in 1985.

The following diagram illustrates the aforementioned discussion of the community types.

	MSA	NON-MSA
CITIES	CENTRAL CITIES OVER 50,000	OTHER CITIES
	SUBURBAN CITIES	
COUNTIES (Unincorporated area)	SUBURBAN COUNTIES	RURAL COUNTIES

#### Population Groups

The population group classifications used by the UCR Program are as follows:

Population Group	Political Label	Population Range
I .....	City	250,000 and over
II .....	City	100,000 to 249,999
III .....	City	50,000 to 99,999
IV .....	City	25,000 to 49,999
V .....	City	10,000 to 24,999
VI .....	City	Less than 10,000
VIII (Rural County) .....	County	N/A
IX (Suburban County) ....	County	N/A

The major source of UCR data is the individual law enforcement agency. The number of agencies included in each population group will vary slightly from year to year due to population growth, geopolitical consolidation, municipal incorporation, etc. Population figures for individual jurisdictions are estimated by the UCR Program in noncensus years. To obtain the 1985 figures, for example, state growth rates, as supplied by the Bureau of the Census, were applied to every jurisdiction within each state. The base figures were 1984 Bureau of the Census estimates for all counties and those cities with populations over 100,000 and 1982 census estimates for other cities.

The following table shows the number of UCR contributing agencies within each population group for 1985.

Population Group	Number of Agencies	Population Covered
I .....	60	43,402,000
II .....	126	18,309,000
III .....	306	20,890,000
IV .....	663	22,942,000
V .....	1,666	26,239,000
VI .....	7,721	25,332,000
VIII (Rural County) .....	3,691	33,869,000
IX (Suburban County) ....	1,641	47,756,000
Total .....	15,874	238,740,000 <sup>1</sup>

<sup>1</sup>Because of rounding, the population covered does not add to total.

## Regions and Divisions

As shown in the accompanying map, the United States is comprised of four regions: the Northeastern States, the Midwestern States, the Southern States, and the Western States. These regions are further divided into nine divisions. The following table delineates the regional, divisional, and state configuration of the country.

### NORTHEASTERN STATES

New England	Middle Atlantic
Connecticut	New Jersey
Maine	New York
Massachusetts	Pennsylvania
New Hampshire	
Rhode Island	
Vermont	

### MIDWESTERN STATES

East North Central	West North Central
Illinois	Iowa
Indiana	Kansas
Michigan	Minnesota
Ohio	Missouri
Wisconsin	Nebraska
	North Dakota
	South Dakota

### SOUTHERN STATES

South Atlantic	East South Central
Delaware	Alabama
District of Columbia	Kentucky
Florida	Mississippi
Georgia	Tennessee
Maryland	West South Central
North Carolina	Arkansas
South Carolina	Louisiana
Virginia	Oklahoma
West Virginia	Texas

### WESTERN STATES

Mountain	Pacific
Arizona	Alaska
Colorado	California
Idaho	Hawaii
Montana	Oregon
Nevada	Washington
New Mexico	
Utah	
Wyoming	

### REGIONS and DIVISIONS of the UNITED STATES

**APPENDIX IV**

<sup>1</sup>Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Arson data for individual cities are shown in Table 6.

<sup>2</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

<sup>3</sup>Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

<sup>4</sup>Figures are not comparable with previous years.

<sup>5</sup>Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. The 1985 forcible rape totals for most agencies in Illinois were, therefore, estimated using the national ratio of forcible rapes versus the total crimes of violence. Forcible rapes for Illinois agencies are shown only if the counts were supported by supplemental reports.

## APPENDIX V

### DIRECTORY OF UNIFORM CRIME REPORTING PROGRAMS
