Acknowledgement of Assistance

All manuscripts utilizing data made available through the Consortium

should acknowledge that fact as well as identify the original collector

of the data. The ICPSR Council urges all users of the ICPSR Data

facilities to follow some adaptation of this statement with the

parentheses indicating items to be filled in appropriately or deleted

by the individual user.

In order to provide funding agencies with essential information

about the use of archival resources and to facilitate the exchange

of information about ICPSR participants' research activities, each

user of the ICPSR data facilities is expected to send two copies

of each completed manuscript or thesis abstract to the Consortium

Please indicate in the cover letter which data were used.

POLICE SERVICES STUDY, PHASE II, 1977: ROCHESTER, ST. LOUIS, AND
ST. PETERSBURG (ICPSR 8605)

SUMMARY: The data for this study were collected in order to examine
the delivery of police services in selected neighborhoods. The
performance of differently organized police agencies were compared as
they delivered services to different sets of comparable neighborhoods.
Variables included in the study are total number of encounters, number
of contacts with other officers, number of contacts with non-police
support units, characteristics surrounding specific encounters, and
citizen satisfaction. CLASS IV

NOTE: The entire dataset consists of 19 files: three are currently
available. There are several aspects of the data which require
mention: (1) Column locations and widths of variables noted in the
data collection coding guides do not describe the data in its present
format. Some of the variables noted in these coding guides have also
been deleted from the data. Users should refer to the SPSS-X control
cards provided or the SPSS-X DISPLAY DICTIONARY program for the current
variable list and column locations. (2) The General Shift Data file
contains a variable named TIMERUN. The values for this variable are
incorrect. Analysis utilizing the variable will probably be
misleading. Users of this file will note that 49 shifts are
represented twice in the data. This occurred because a single observer
was unable to observe a shift in its entirety, thus requiring that the
shift be split between two members of the research team. The split
shift was then coded as two cases in the data. (3) Value labels are
not provided in the data dictionary files for the variables identifying
the observed neighborhoods, because these labels are unique in each
jurisdiction. The variables identifying the neighborhoods contain some
values which are not identified on the list of jurisdictions and
neighborhoods. These values refer to combinations of neighborhoods.
(4) The variable identifying the observed shift contains values which
are not included in the original format of the variable. It is not
known which shifts these values refer to.

Abstract

Citation

Title: Police Services Study, Phase II: May to August, 1977

Principal Investigators: Elinor Ostrom
Roger B. Parks
Gordon Whittaker

Producer: Indiana University

Funding Source: National Science Foundation
Grant #APR74-14059 A03

Sources of Information: The data reside in three files, each containing information from a different source. The General Shift Information file contains data on general shift characteristics gathered by observers. The Police Encounter file describes police encounters observed by the research team during selected shifts. The data in the Citizen Debriefing file was drawn from telephone interviews conducted with citizens who were involved in police-citizen encounters or who requested police services during the observed shifts.

Type of Sample: The sample for this research was based on results from Phase I of the Police Services Study which indicated that most Americans receive police services from large agencies. Rochester, New York; St. Louis, Missouri and Tampa-St.Petersburg, Florida were selected as research sites because the police agencies in these cities ranged from small to large in size. Nonprobability sampling methods were then used to obtain a sample of neighborhoods thought to be consistent with the Phase I results.

Dates of Data Collection: Data were collected during shifts occurring between May and August, 1977.

Summary of Contents

Purpose or Scope of the Study: Data were collected in order to examine the delivery of police services in selected neighborhoods of Rochester, New York; St. Louis, Missouri and Tampa-St. Petersburg, Florida.

Special Characteristics of the Study: Data in these files come from various sources, so they may be analyzed separately. The files may also be linked to provide a richer set of

information for analysis. Files may be merged by concatenating the variables identifying the jurisdiction, neighborhood, shift and sequence of the encounter and utilizing the resulting variable as a key for linking the different files.

Subject Matter: In this study the performance of differently organized police agencies was compared as they delivered services to several different sets of comparable neighborhoods. The General Shift Information file contains data describing the shift (i.e., the eight hour tour of duty to which the officers were assigned),the officers and the events occurring during an observed shift. This file includes such variables as the total number of encounters, a breakdown of dispatched runs by type, the number of contacts with other officers, the number of contacts with non-police support units, officer discretion in taking legal action, and officer attitudes on patrol styles and activities.

The Patrol Encounters file consists of information describing the officers' role in encounters with citizens observed during a shift and their demeanor towards the citizen(s) involved. This file includes such variables as the type of encounter, how the encounter began, whether the citizens involved possessed a weapon, the encounter location, what other agencies were present during the encounter and when they arrived, police actions during the encounter, the role of citizens involved in the encounter, the emotional state of the citizens during the encounter, the demeanor of the officer toward the citizens during the encounter, actions taken by the ctiizens, which services were requested by the citizens,and how the observer affected the encounter.

The Citizen Debriefing file contains data on the citizens involved in observed encounters, their satisfaction with the delivered police services, and neighborhood characteristics. This file includes such variables as the type of incident, estimated property loss, police response time, type of action taken by the police, citizen satisfaction with the handling of the problem by police, reasons for dissatisfaction, the emotional state of the citizen during the encounter, who the officers referred the citizen to for help, the citizen's prior contacts with police, and the citizen's education, age, sex, and total family income.

File Structures: The three files in the data set are rectangularly structured and are stored in character-numeric, fixed formats with logical record length of 80 columns.

File Descriptions:

1. Citizen Debriefing Data (CITDBRF.)--contains raw data from telephone interviews with citizens. There are 152 variables for 1675 cases and 5 records per case.

2. Citizen Debriefing Setup (PII05X.)--contains SPSS-X data
definition cards, including column locations, variable
labels and value labels for the Citizen Debriefing Data
file.

3. General Shift Information (SHIFT2.)--contains raw data from
observations of police officers during selected shifts.
There are 170 variables for 949 cases and 8 records per
case.

4. General Shift Information Setup (PII03X)--contains SPSS-X data
definition cards, including column locations, variable labels
and value labels for the General Shift Information Data
file.

5. Police Encounters Data (POLICE1.)--contains raw data from
observations of police encounters during selected shifts.
There are 594 variables for 5688 cases and 20 records per
case.

6. Police Encounters Setup (PII02X.)--contains SPSS-X data
definition cards, including column locations, variable
labels and value labels for the Police Encounters Data file.
This setup file includes a series of "IF" and "RECODE"
statements which correct errors in the data for several
variables and value labels which are unique to these
variables. These labels have been abbreviated. For the
unabbreviated list see the codebook appendices.

    Condition of the Data: There are several aspects of the data
which require mention.

    (1)Column locations and widths of variables noted in the data
    collection coding guides do not describe the data in its present
    format. Some of the variables noted in these coding guides have
    also been deleted from the data. Please refer to the SPSS-X
    control cards provided or the SPSS-X DISPLAY DICTIONARY
    program for the current variable list and column locations.

    (2)The General Shift Data file contains a variable named TIMERUN.
    The values for this variable are incorrect. Analysis
    utilizing the variable will probably be misleading. Users
    of this file will note that 49 shifts are represented twice
    in the data. This occurred because a single oberver was
    unable to observe a shift in its entirety, thus requiring
    that the shift be split between two members of the research
    team. The split shift was then coded as two cases in the
    data.

    (3)Value labels are not provided in the data dictionary files for
    the variables identifying the observed neighborhoods,

because these labels are unique in each jurisdiction. The variables identifying the neighborhoods contain some values which are not identified on the list of jurisdictions and neighborhoods. These values refer to combinations of neighborhoods.

(4)The variable identifying the observed shift contains values which are not included in the original format of the variable. It is not known which shifts these values refer to.

Special Formats: The data definition cards provided are in SPSS-X format.

Restrictions on Access: Value labels identifying participants in the study, including the observers, have not been provided in order to protect the privacy of these individuals.

CODING

INSTRUCTIONS

Coding Instructions

The ID number will be the three-digit <u>record</u> <u>number</u> in columns 1-3 on each card.

For questions that the respondent replies "don't know," code <u>U</u> in the first block for that item.

Example: Percent of income earned from illegal sources, first on period.

U			

DEFINITION OF TERMS AND CODING INSTRUCTIONS

I. Terms Defined

The following terms refer to our crime-days analysis:

.   SCD - the sum of crime-days is the addition
    of CD-1, 2, 3, 4 and 5.

.   NCD - the number of un-crime days. This is the number
    of days in a period that no crimes of any type were
    committed.

.   OCD - original crime-days. This is the number of days
    in a given period that one or more crimes were committed.
    (OCD is obtained by subtracting the NCD's from the
    total days in the period, or R-days (for Risk days).

.   R-Days - The number of days in a given period (i.e.,
    the time at risk).

.   MCD - The multiple crime-days are the number of CD's
    which duplicate or overlap existing crime-days. MCD
    is obtained by subtracting OCD from SCD. (Note: MCD
    is the sum of the number of multiple crime-days; it
    is not a count of the number of days during the risk
    period that multiple crimes were committed, as there
    were sometimes three or more multiple crime-days
    (MCD's) recorded for a 24 hour period.

II. Instructions for Coding Crime-Days During On Periods,
    or Off Periods

    A. Objective - To determine from the interview schedule
        the number of crime-days in each period. There are
        seven types of crime-days to be coded:

        1. CD-1   Theft
        2. CD-2   Violence
        3. CD-3   Dealing
        4. CD-4   Paper theft
        5. CD-5   Other crime
        6. SCD   Sum of 1-5
        7   NCD   Days without crime or non-crime days

5/25/82
J. C. Ball

Definition of Terms and Coding Instructions - cont'd.

B. Coding Procedure for CD-1 through 6.

1.   . the number of days during which theft
occurred. This is CD-1. · If there was more
than one kind of theft recorded (e.g. "boosting"
and burglary) us Conversion Table to obtain
number of CD's per week and then calculate CD-1
days in entire period. If the second, third or
fourth kind of theft is less than once a week,
ignore it -- unless it is continuous (i.e., he
boosted every day for three months). If con-
tinuous, then add these additional CD's on a
prorata basis (e.g., if principal theft was
boosting and this occurred three days per week,
but subject also had 100 continuous days of
burglary, then add 4/7 of 100 to CD-1 total).

2. In a similar manner, obtain number of crime-days
for violence, or CD-2.

3. Same procedure.

4. Same procedure.

5. Same procedure.

6. To obtain the number of SCD, add CD-1, CD-2,
CD-3, CD-4 and CD-5.

C. Coding Procedure for obtaining the number of non-
crime days, NCD.

. NCD is the number of days in a given period during
which the subject did not commit any crimes.

. Coding. If only one type of crime was recorded,
or if any type of CD occurred for seven days per
week, the coding of NCD is straight-forward. If
the former instance, the one type of CD's are
merely subtracted from R-days to obtain NCD
(example from case 92: R-days for 21 periods is
5,820; all CD's are for theft and CD-1 is 2,597.
NCD = 3,233). In the latter instance, NCD = 0.

Definition of Terms and Coding Instructions - cont'd

. The Coding Problem

When more than one type of crime occurs in a given
period (and none of these are seven days per week),
it is necessary to estimate the crime-days overlap
or duplication in order to determine NCD. This
estimate can usually be made from the Conversion
Table. Thus, if type-1 crime is three days per
week and type-3 crime is three days per week, the
table shows that this is equivalent to 5 OCD with
2 NCD.

Coding Instructions for Non-Narcotic Drug Use

For each period, the number of times a particular drug was used was expressed as a rate (either in terms of times per day, week, month, or year). To determine the number of total times in the period an individual used a particular drug, multiply this rate by the amount of time in the period for which he used it (usually the entire period unless otherwise specified).

For example, an individual used marijuana 3 times per week in a 90-day period. Therefore, for this period, he used marijuana 39 times (round to nearest whole number) as follows:
$(3/7 = .4286) \times 90 = 38.5714$
Code in columns 4-8   00039 (total times used marijuana/hashish)

In the cases where an individual's rate changes over the period, add the times used. For example, an individual used marijuana 15 times per month for one month in a period and twice a day for two months. For the total period he would have used marijuana 135 times as follows:

$(15/30 = .500) \times 30 = 15$ and
$(120/60 = 2) \quad \times 60 = \underline{120}$
$\qquad\qquad\qquad\qquad\quad 135$

Use 7-day weeks, 30-day months, and 365-day years.

Examples of Coding Procedures

Examples

1. Theft from stores committed 5 days per week, no other
    theft. Using crime-day procedure.

    CD's   =   24 mos. in period
                              X   30 days per month
                                 720 days in period
                              X 5/7 (crime days per wk/7 days in
                                        week)

    (5/7 = .7143 X 720 = 514.2857) round to nearest day

    There are 514 CD-1's in this period

2. Use of conversion table.

    Theft from stores   1 day/wk
    Burglary   1 day/wk

    Days per week of CD-1 calculated by using conversion table

                              36 mos. in period
                           X   30
                             1080 days in period
                           X   2/7 (2/7 =.2857 X 1080 = 308.5714)
                              309 CD-1's in this period

Columns 41-58 of each card entitled "Crime-Days at Risk by Periods" refer to the rates in terms of crime-days per year at risk for each type of crime as indicated on the code sheet. To calculate each, the number of days in which one engaged in crime as recorded above was divided by the number of days in the period to obtain the percent of time in which one engaged in crime. Then, this figure was multiplied by 365 (rounded the nearest day).

WORKSHOP DATA INVENTORY FORM

TITLE OF STUDY: Patrol Observation General Shift

DATA FILE NAME: PII03

RESTRICTIONS ON THE USE
   OF THIS DATA: NO

process, see the following Methods Report which is located in the library of
the Workshop in Political Theory and Policy Analysis.

(see Attachment 2)

CORRELATION GUIDE AND

CODING CONVENTIONS FOR PHASE II FORMS

There are several coding conventions that were maintained across all the Phase II Forms (e.g. a code of 10 on one form will mean the same as a code of 10 on another form for certain variables). These are:

Jurisdiction and Neighborhood Numbers

Each Jurisdiction number code stands for a particular Jurisdiction. The neighborhood codes, in conjunction with the Jurisdiction code, will give a particular neighborhood. For instance, there is a neighborhood '01' in Jurisdiction '10' and '20,' so you must check the Jurisdiction number to determine the actual neighborhood.

Shift Numbers

Several of the Phase II Forms have a shift number. These are unique and consistent within a Jurisdiction. As with the neighborhood code, you must use the Jurisdiction code to determine a particular shift.

Problem Types

The problem types on all the Phase II Forms, except Form 01, are consistent across forms. Form 01 has its own set of problem codes which are a subset of the problem types on the other forms.

Officer I.D. Number

The officers were assigned unique numbers within each Jurisdiction. Officer codes are used on forms 02, 03, and 06. Form 06 is the interview of an officer. Thus, using the code on the Encounter Case (Form 02), it is possible to determine several attributes of an officer who participated in an encounter.

Agency and Police Unit Types

These variables were coded the same for all the Phase II Forms.

Observer/Coder

All observers and coders were given a number prior to the field work. All work done by a particular observer or coder is so marked on each form.

Cross References Between Forms

On two of the Phase II forms (05 and 08 - Debriefing and Calls for Service), there are cross references to other forms.

On Form 08 (Calls for Service) there is a reference to an encounter (Form 02) if there was an encounter resulting from that call and the PSS staff was at that encounter. The variables PECJURIS, PECNEIGH, PECSHIFT, and PECSEQ give the case number of the corresponding Form 02 case number (JURIS02, NEIGH02, SHIFT02, and SEQNUM02).

There are similar references on Form 05 (Debriefing). If the PSS staff debriefed a citizen and were also at an encounter in which that citizen participated, a reference is given to the Encounter Case (Form 02). Also, if there is a Calls for Service Case (Form 08) that led to the incident for which the citizen was debriefed, a reference will be given on Form 05 to the Form 08 case. The variables used to reference the Form 08 case are IDF0805, IDJ0805, IDN0805, IDS0805, and IDSQ0805. The variables used to reference the Form 02 case are IDF0205, IDJ0205, IDN0205, IDS0205, and IDSQ0205.

SUBJ: Time Allocations on General Shift   DATE: October 15, 1979
      Form - Recent Corrections and
      Implications

In recent weeks several of us have been reviewing and correcting the
time allocation portion of the General Shift forms. This process was
stimulated by the finding that there were a number of shifts where the
sum of times on the individual Patrol Encounter forms for a shift
was quite different from the time at or enroute to encounters on the
General Shift form. In the review process we found that these
discrepancies had several causes, most of which involved incorrect
coding or mispunched data. These cases, involving such things as
errors in converting to 24-hour clock, mistakes in posting correct
shift number to Encounter forms, etc., have been corrected. In a
few cases where no obvious errors could be found, yet a time
discrepancy remained, time was shifted from routine patrol to time at
or enroute to encounters. But one sourse of discrepancies, while
corrected, requires some caution in analyzing the time allocations.

Once an encounter began, there was no way for a patrol observer to
code that the encounter was interrupted unless the interruption
was itself another encounter. During observer training we instructed
observers to code encounters involving any extended interruption as
two separate encounters, indicating that the second was a follow-up
to an earlier encounter. It appears, however, that some observers
did not follow this procedure in some cases. The problem arises in
those encounters where one or more of the citizens involved is
transported to the station or other processing facility, handled at
that facility by persons other than the observed officer, and
subsequently returned to the presence of the observed officer. In
such situations, officers often took the opportunity to fill out
reports on the encounter. The time involved was sometimes substantial,
ranging from 30 minutes to 2 hours. If the observer completed two
separate encounter forms and recorded the report writing time on the
General Shift form correctly, there was no problem. But if the
observer completed only a single form, indicating the time at the end
of the second face-to-face as the ending time for a single long
encounter, and recorded the report writing time separate from encounter
time on the General Shift form, a time discrepancy occurred. That
is, the sum of times spent on encounters (from the encounter forms)
could exceed the time recorded for encounters on the General Shift
form by the amount of report writing time recorded on the General
Shift form.

Where this discrepancy was large enough to cause the General Shift
encounter time to be smaller than the sum of the times from each
individual encounter, it has been changed by shifting time from
report writing to encounters on the General Shift form. I suspect,
however, that there are other shifts where this occurred, yet the

Police Services Study

GENERAL SHIFT INFORMATION FORM

CODING MANUAL

This coding manual discusses the General Shift Information Form and the proper coding for each item. Refer to this manual if you have a question regarding the correct coding for any item. If you have a question that is not covered in this manual, complete as much of the Form as possible, describe your question in detail on a Trouble Slip, staple the Trouble Slip to the Form, and put it in your Team Leader's Trouble box. Your Team Leader or the Field Director will discuss the proper coding with you, and corrections or additions to the coding manual will be made as needed.

CODING CONVENTION: We have adopted the plus sign (+) as signifying that a particular item was inapplicable. Where the responses are precoded, you can simply circle the plus (+) if the question is inapplicable. If the item requires a "fill-in-the-blanks" type response, leave blank if inapplicable.

ITEM DESCRIPTIONS

1. Form Number. This is a unique, pre-coded number assigned to the General Shift Information Form.

2. Jurisdiction Number. Get correct number for this police department from the Jurisdiction -- District -- Neighborhood Codes list. Use the full jurisdiction number, not the district number.

3. Neighborhood Number. Get correct number for the neighborhood which you are observing on this shift. Use list of Jurisdiction -- District -- Neighborhood Codes.

4. Shift ID Number. Get the correct shift ID number from the Observation Log for the neighborhood you are observing.

5. Sequence Number. In most cases this will be 001. BUT, if you change from observing one officer to observing a different officer during the course of this shift, complete a separate General Shift Information Form for each officer, and code the second officer you rode with as 002 for a sequence number. This could happen, for instance, if the officer you began observing goes to the station to relieve an officer who was dispatching, and you go back out on the street with this officer.

7. Observer. Get your correct observer ID number from list.

8. Observed Officer ID Number. Each officer will be assigned a unique ID number on the Observation Log for this neighborhood. Be sure to get the name of the officer you actually ride with and check against the Log for correct ID number.. If the officer you actually observe is different from the one you were assigned to observe before this ride, check to be sure that the officer has been given an ID number. If not, check with your Team Leader via a Trouble Slip to get a number assigned.

9. Number of Officers. Code the number who are assigned to this unit initially (as you leave the station for example), even if one of the officers leaves at some point during the shift. Assigned to the unit carries with it the expectation that the officer will be riding in the unit for a substantial portion of the shift. Do not code as two officers assigned if one of the two is just being driven out to his/her walking post, for example.

11. Time Shift Begins. Code the official starting time for this shift. Use 24 hour clock.

12. Time you began observing this officer. Code the time that you began riding with this officer. If you meet the officer at or before roll call, do not count that time as time observing began. Rather code the time that you "hit the streets."

13. Time You Finished Observing This Officer. Code the time you stopped riding with this officer, or, if an encounter was continuing at the station (for example) at the end of the shift, and you continued to observe the officer's involvement to the end of the encounter, code the time when the officer leaves or the encounter ends. If your observation of this officer is interrupted, two different codings can be used here. 1) If there is no observation of a different officer that occurs during the time that your observation of this officer was interrupted, code the time at the end of the second (or nth) period of observation of this officer, and note the amount of time for interruption(s) in item 15. 2) If you stop observing this officer and begin to observe another officer, code the time you stopped observing this officer prior to beginning to observe the second officer. Do so even if you return to observing the first officer later in the shift. In this last case, you would code your General Shift information on three separate General Shift Information forms (sequence 001, 002, and 003) with one for the first observation period of first officer, one for the observation of the second officer, and one for the second observation period with the first officer.

14. Time Shift Ends. The official ending time for this shift.

15. Interrupted Observation. The officer you are observing may, for example, get called into the captain's office for an hour-long discussion of past sins. You may be cooling your heels in the hall during this period, unable to observe what's happening. Code the time spent as an interruption. Do not code every time that you cannot physically see the officer as an interruption. If you know enough about what the officer was doing while you could not physically see him/her to categorize the time in one of categories on page 6 of the General Shift form (items 53 to 63), count the time in one of these categories, and not as an interruption.

16. Switching Officers Observed. See item 5. Be sure to complete separate General Shift forms for each officer observed.

OFFICER CHARACTERISTICS (item 18 to 21) Nominally these will be available through the data on the Police Officer Interview that will be keyed by officer ID number. However, to ensure that we have at least this minimum amount of detail on the officer characteristics in case an interview is not completed, this coding is necessary.

ROLL CALL AND ASSIGNMENT Roll call consists of the gathering together of officers before they go out on street assignment for a shift. It need not be a very formal occasion involving inspection, etc. The norm will be for most departments to have some sort of roll call where the sergeant or someone checks to be sure all the assigned officers are present and, perhaps, tells them something about activities from the previous shift, things to watch out for, reads general orders, etc. If you are uncertain whether a particular department has a roll call, check with your Team Leader.

25. Specific, Individual Assignments. This refers, for example, to being told their beat assignments for the shift. In many departments officers are assigned to their beats for a month at a time or longer. This does not qualify as a specific assignment for this shift.

27. Roving or Overlay Assignment. If this unit is assigned to cover more than a single beat area, code as a roving or overlay assignment. If the department does not use beat assignments, code as roving.

EVENTS DURING THE SHIFT Note that these require you to keep careful Field Notes beyond those required for encounters.

29. Other contacts with citizens (not encounters). Use these two entries (police related and personal business) to record the count of contacts with citizens that did not qualify as encounters because they were either too brief or were not related to a public safety matter.

Breakdown of Dispatched Runs. Be sure to keep track of all dispatched runs on your Field Notes while riding.

41. and 42. Security Checks. A security check requires more than the normal surveillance afforded businesses or residences during routine patrol. Typically it will involve the officer getting out of the car and doing some "door shaking" and/or other careful looking about the exterior (or interior) of a building. Do not code it as a security check if the officer just drives by a building and shines the searchlight at the door or windows to see if they are open, locked, etc. If the officer drives slowly around a building, shining the light at all doors/windows, etc., then this would qualify as a security check even though the officer does not get out of the car.

CONTACTS WITH SUPERVISORS, OTHER OFFICERS By supervisors we mean patrol supervisors, not just any officer who outranks the officer you are observing. Patrol supervisors will often be in uniform (perhaps with a different color of shirt from patrolmen).

45. Radio Contacts with Supervisors. Supervisors will frequently use a separate radio frequency (or "channel") from that used by dispatchers. Use this as a clue. Also try to learn the sound of dispatcher(s) voice as soon as possible. If in doubt as to whether a given radio contact was with a supervisor or not, you can ask the officer. Avoid doing this too often.

51. Face-to-Face Contacts with Personnel from Non-Police Support Units. Here, as on the Encounter Coding Form, we are interested in contacts where these personnel occupy their official role. Contacts with such personnel coded in the "Other, Personal Business" category virtually require that the non-police person be "on duty" at the time of the contact. Examples would include stopping at the fire station to BS with firemen, or at the hospital to pass the time of day with nursing personnel, etc. Get correct codes for these Agency Types from list of Agency and Police Unit Types.

PREVENTIVE PATROL OVERLAP -- NOTE The emphasis on the words "on patrol". We want to capture the frequency (in rough categories) that other patrol cars are sighted and where these other cars give the appearance of being on patrol. Do not, for instance, count the number of cars that you see in the station parking lot, nor the number of cars that show up at the scene of a reported nude running in the park.

TIME ALLOCATION As the note says, use the Time Line Sheet to jog your memory (a copy is attached to the back of each General Shift Information form), and approximate as best you can. To check on your approximations, add up the minutes you have allocated to each of the categories in the box at the bottom of the page. This total should be equal to the number of minutes that you observed the officer. Use item 61, Routine Patrol, to adjust times to achieve this equality. This will ensure a conservative estimation of the amount of time spent on other than routine patrol, i.e., code time spent on other items only when you are sure about them.

57. Stationary Traffic Work. This includes operating a radar unit from a parked car as well as directing traffic at a busy intersection, at a sports event, etc. Stationary should be interpreted to mean not rolling in the patrol car other than momentary stops at stop signs, street intersections, etc. If you sit still in the patrol car for more than two minutes at a time (other than at an encounter, report writing, or meals at a drive-in restaurant), it should be included in one of the stationary categories.

59. Stationary Personal Business. Include situations where officers in two different patrol units pull up side-by-side to discuss personal matters (sports, the weather, members of the opposite sex, departmental politics, etc.) as stationary personal business. If they are discussing how to handle a particular case (e.g., what to put in a report about an earlier encounter, or whether to do a report on it), code it as stationary police work (item 58).

59. Stationary Personal Business (continued). Also include instances where the officer gets out of car to go talk to his stock broker, banker, other businessman about the officer's own business. Also stopping to have a beer or other refreshment with a friend or relative unless this is part of the officer's official 10-7 break(s), i.e., where the dispatcher has been notified.

62. Mobile Personal Business. This includes driving over to pick up the officer's laundry, going home to get the officer's hat if he/she forgot it. etc. Code only when you are sure it is a personal errand.
----

65. Percent patrol on own beat/sector. Note that this item requires you to be familiar with the beat/sector boundaries. It says approximate because we do not expect you to quibble over which side of the street you are on, nor to recognize every single time you leave the beat boundary for a block or so. BUT, you should know the territory well enough before you ride to give a reasonable approximation here. Look at maps before you ride, visit the neighborhood prior to riding if at all possible. If no beats, code with reference to whole jurisdiction.

67. Officer Discretion. Note that we want only overt statements by the officer here. Do not code if you think the officer could/should have arrested someone but didn't unless the officer makes a statement to that effect.

72. Officer Reaction -- Behavior Alteration. An overt statement must be made for you to code this and it must refer to the officer doing something differently than normal. If the officer says that you make him/her nervous, but does not refer to changing what they would otherwise do, code in item 73, not in this item.

73. Officer Reaction -- Uneasy, Suspicious. Again, an overt statement by the officer is required.

74. Officer Reaction -- Your Estimation. Remember this item asks for behavior alteration, i.e., do you think the officer did something differently than he/she would have if you had not been there. You should have some clear reasons for responding yes here, not just your general feeling that no one acts the same when someone else is watching them. Explain what differences in behavior you think your presence provoked in item 76, if these differences persisted for a substantial proportion of the shift.

77. Presence causing difficulties/generating conflict. We know that there will be instances where this will occur through no fault of your own. This item will not cause you any grief if you respond yes. We do want to learn from any such instances so that you and other observers can avoid the problem as much as possible. Code yes for cases where other officers argue with the officer you are observing about your presence as well as for cases where citizens object to, or argue with the officer about you being there.

78. Taking Part in Police Work. As with the previous item, a yes response here will not cause you any grief. In some cases it will be impossible for you not to assist the officer you observe without extreme rudeness (or possibly without danger to yourself). Please try to avoid participating wherever this can be done gracefully, telling the officer that you might get into trouble on your job if you help out is one way to do this, another is to emphasize your lack of training in police work, another is to tell the officer how bad your eyesight is, etc. The extent to which our observers did become involved will be an important datum in our final report, however, so do be sure to record such instances here.

OFFICER COMMENTS, ATTITUDES Please note that we want volunteered comments here.

79. to 85. For these items we want the officer's perception of what his/her superiors expect him/her to do, whether the officer thinks these are a good idea or not.

86. to 92. For these we are interested in the officer's views toward the same items, independent of what he/she believes the brass expect.

93. to 107. Satisfaction or dissatisfaction (or both). Again, we want clear volunteered statements regarding any of these, no leading the witness. If the officer makes a major statement or explanation of satisfaction or dissatisfaction (beyond the normal griping that is endemic to police as well as academic work), attach an explanation of the source(s) and target(s) of this satisfaction or dissatisfaction in item 120 below, in addition to coding it here.

120. Use this space (and additional pages if necessary) to record any observations regarding this shift, the officer you observed, the department, the neigh-borhood, or anything else that you learned or observed that would be of importance to the study, and that you would otherwise not have a place to record.

To: In-Depth Interviewers   June 27, 1977

From: EO

Subject: Leader In-Depth Interview

The last of our instruments is in the final stages of typing and reproduction.
Like all other in-depth instruments, you need to know this instrument very
well before you administer it. However, unlike the Police Administrator
interview, it is designed to record only information obtained in an interview
situation itself. If you have read clippings or other materials which you think
are relevant to understanding the statements made to you in this interview, you
should make note of these in the last Narrative Question (Number 127).

The first section of this interview is designed to be administered only to public
officials. Thus, if one is interviewing a mayor, one administers the entire
instrument. Sections II through Section VI are designed for interviews with
both public officials and local leaders who do not hold governmental offices.

This interview has some sections which are pre-coded and have Narrative
Questions assigned in addition. Other sections do not have pre-coding and
responses will be written only in Narrative Questions. Thus, the instrument
is a blend of the format used in the Citizen Organization In-Depth form and
the Police Administrator form.

Section I attempts to explore the role of the respondent in police policies.
The questions in this and other sections are suggestive. You do not need
to ask the questions exactly as phrased. You do need to obtain the information
requested.

You will need to take a map of the jurisdiction with our neighborhoods marked
on it with you when you do leader interviews. For Section II, you need to show
the respondent a copy of this map and find out about the respondent's communication
patterns. If the leader has most of his or her communication within a single
neighborhood, this would be noted in section 9d on page 4A. If the respondent
has considerable communication with respondents in several of our neighborhoods,
you will need to pick one of these neighborhoods as the specific focus of your
interview, for coding the remaining questions in this section (note differences
between the neighborhood selected and other neighborhoods in the Narrative). You
will place the jurisdiction/neighborhood codes for the neighborhood selected for
primary focus in section 9b on page 4A. Other neighborhoods would be coded in
section 9c on page 4A. If the person communicates with citizens located throughout
the jurisdiction, use response code "1" in section 9a. The jurisdiction code
used on the cover sheet will be assigned to this leader for this section.

You must code one of the four responses in section 9a on page 4A.

Page 6 is an example of the two formats used in this instrument. There are
pre-coded categories available only for question 12 and 16. The response to the
other questions should be written in the Narrative Questions assigned to each
question.

At the end of Section V is a pull-out sheet that you can hand to a leader to fill
out while you wait. ____.   Sheet A comes directly from the police officer interview.
You will need to make an oral introduction to this sheet.   This introduction

should be modeled after the following paragraph:

"We are interested in knowing your ratings of your police department. We have a
series of questions on this sheet which we would like to have you read and
fill out. The first series asks you to rate your police department. The
second series asks you to rate how important different aspects of police
services are to you."

If the respondent wishes to qualify any of the ratings made on this sheet, ask
the respondent to write out such qualifications on the reverse side of the sheet.
Narrative Question 126 is reserved for entering any qualifications made or
other comments made related to the Sheet A.

Sheet A will originally be found immediately ahead of page 12. You will hand it
to the respondent just before you ask the questions located on page 12. However,
when the respondents gives you Sheet A back, place it at the end of the form.
They keypunching numbers are organized so that this is the last set of items to be
keypunched for this interview.

WORKSHOP DATA INVENTORY FORM

TITLE OF STUDY: Citizen Debriefing

DATA FILE NAME: PII05

RESTRICTIONS ON THE USE
   OF THIS DATA: NO

PRINCIPAL INVESTIGATORS: Elinor Ostrom, Roger B. Parks and Gordon P. Whitaker

FUNDING SOURCES: National Science Foundation, Grant #APR74-14059 A03

UNIT OF ANALYSIS: Jurisdiction/Neighborhood/shift/citizen

SAMPLING FRAME: Possible subjects for debriefing were chosen from observed
               officer-citizen encounters, observed calls for service and
               (See Attachment 2)

NUMBER OF CASES: 1677

NUMBER OF VARIABLES: 212

DATE OF DATA COLLECTION: 5/77 through 8/77

TYPE OF VARIABLES INCLUDED IN THIS DATA SET:

Nature of Encounter	Citizen Satisfaction
Matched Calls for Service	Neighborhood Characteristics
Matched Encounter	Previous Contacts with Police
Police Action	Citizen Characteristics
Police Demeanor	

RELATED DATA SETS: (For Phase II data sets, see attached sheet)

PUBLISHED ARTICLES, CONFERENCE PAPERS, DISSERTATIONS, AND WORKING
    PAPERS USING THIS DATA SET:

Percy, Stephen (1978) "Response Time and Citizen Evaluation of Police."
    Technical Report T-41. Bloomington, Indiana: Indiana University,
    Workshop in Political Theory and Policy Analysis. (Draft)

(see Attachment 3)

CORRELATION GUIDE AND

CODING CONVENTIONS FOR PHASE II FORMS

There are several coding conventions that were maintained across all the Phase II Forms (e.g. a code of 10 on one form will mean the same as a code of 10 on another form for certain variables). These are:

Jurisdiction and Neighborhood Numbers

Each Jurisdiction number code stands for a particular Jurisdiction. The neighborhood codes, in conjunction with the Jurisdiction code, will give a particular neighborhood. For instance, there is a neighborhood '01' in Jurisdiction '10' and '20,' so you must check the Jurisdiction number to determine the actual neighborhood.

Shift Numbers

Several of the Phase II Forms have a shift number. These are unique and consistent within a Jurisdiction. As with the neighborhood code, you must use the Jurisdiction code to determine a particular shift.

Problem Types

The problem types on all the Phase II Forms, except Form 01, are consistent across forms. Form 01 has its own set of problem codes which are a subset of the problem types on the other forms.

Officer I.D. Number

The officers were assigned unique numbers within each Jurisdiction. Officer codes are used on forms 02, 03, and 06. Form 06 is the interview of an officer. Thus, using the code on the Encounter Case (Form 02), it is possible to determine several attributes of an officer who participated in an encounter.

Agency and Police Unit Types

These variables were coded the same for all the Phase II Forms.

Observer/Coder

All observers and coders were given a number prior to the field
work. All work done by a particular observer or coder is so
marked on each form.

Cross References Between Forms

On two of the Phase II forms (05 and 08 - Debriefing and Calls for
Service), there are cross references to other forms.

On Form 08 (Calls for Service) there is a reference to an
encounter (Form 02) if there was an encounter resulting from that
call and the PSS staff was at that encounter. The variables
PECJURIS, PECNEIGH, PECSHIFT, and PECSEQ give the case number of
the corresponding Form 02 case number (JURIS02, NEIGH02, SHIFT02,
and SEQNUM02).

There are similar references on Form 05 (Debriefing). If the PSS
staff debriefed a citizen and were also at an encounter in which
that citizen participated, a reference is given to the Encounter
Case (Form 02). Also, if there is a Calls for Service Case (Form
08) that led to the incident for which the citizen was debriefed,
a reference will be given on Form 05 to the Form 08 case. The
variables used to reference the Form 08 case are IDF0805, IDJ0805,
IDN0805, IDS0805, and IDSQ0805. The variables used to reference
the Form 02 case are IDF0205, IDJ0205, IDN0205, .IDS0205, and
IDSQ0205.

department complaint logs.

Respondent had to reside in one of the study neighborhoods <u>or</u> the encounter had to occur in one of the study neighborhoods.

The encounter or call had to occur during a shift that was being observed.

Incidents that were possibly traumatic to the respondents were not debriefed. The following is a list of these incidents:

> Homicide, suicide or attempted suicide, or death of a family member
> Rape or attempted rape
> Kidnap
> Child molesting or child abuse
> Riot, terrorisms or prison disorders
> Mental disorders or commitment proceedings
> Missing person
> Juvenile runaway
> Domestic argument - unless the specific name of complainant is known
> An incident that involves a news reporter
> Traffic stops
> Those individuals who are suspected of a crime or arrested in an encounter

If the above incidents were reported by a third party, the respondent was debriefed.

Attachment 3

For more information on the Citizen Debriefing data collection process, see the following Methods Report which is located in the library of the Workshop in Political Theory and Policy Analysis.

My supervisor on this project may call you to verify the completion of this interview.

Would you like a short summary of our report?

Thank you very much for your help!

Debriefing Coding Manual

The Citizen Debriefing Form is designed to obtain information from individuals who have recently had a direct contact with one of the police departments included within our study. Names for debriefing will come from patrol observation and calls for service/ dispatch records coding. The sampling process for selecting names for debriefing is described in the Calls for Service/Dispatch Records Instruction Notebook.

We will not debrief individuals who have been involved in incidents of the following types:

1. homicide, suicide or attempted suicide, or a death of a family member,

2. rape or attempt rape,

3. kidnap,

4. child molesting or child abuse -- unless the potential respondent is clearly a third party (i.e., a neighbor calling to report an incident),

5. riot, terrorisms or prison disorders,

6. mental disorder or commitment proceedings,

7. missing person,

8. juvenile runaway, or

9. domestic argument -- unless specific name of complainant is known -- see discussion later in this manual about special procedures for these incidents.

In addition to the above incidents which will be screened out of the debriefing process (unless certain conditions are met in particular cases), we also will not debrief individuals who are suspected of a crime or arrested in an encounter. We will use the assigned final "role" of a participant in an encounter to judge whether the person would be eligible to be debriefed if we knew their name.

In all cases except those involving a marital dispute, a letter will have been sent to the respondent prior to our first attempt to interview them. A copy of the letter to be used is shown on the next page. Every effort should be made to obtain the full name of the potential respondent and to send the letter to this person. The interviewer should always ask to speak to a particular person unless we were not able to obtain a specific name in the earlier steps of this process. A special procedure for handling the debriefing of individuals involved in a marital dispute is described below.

During the sampling process, some individuals will have been
identified for in-person debriefing on the first attempt. (This will
be a small group located in neighborhoods where the Field Director
and Team Leaders feel that telephone interviews will be unsuccessful
or individuals who do not have a telephone listing.) Most debriefing
interviews will be conducted on the telephone.

Debriefing Log Sheet

Debriefing interviewers will work from and post to a Debriefing
Log Sheet (Form 50). A copy of this form is shown on the next page.

Bottom Portion

The first line of the bottom portion of this form gives several
essential pieces of information. The sequence number will be assigned
by the person doing the sampling. This number will be unique within
each sample area. This sequence number will eventually be posted to
the cover sheet of a completed interview along with other portions
of the case number.

At the time of sampling a decision will also be made as to whether
the initial interview attempt will be by phone or in person. The
appropriate box will be checked. The date on which a letter was sent
will also be recorded. The first attempt to interview should be made
approximately three days after the letter was sent.

Top Portion

You will obtain information about the name, address, and telephone
number of the potential respondent from the top portion stapled to
this form. This top portion will either be the Calls for Service/
Dispatch Records coding form, the Patrol Encounter Name and Address
Form, or both. The example on the next page is the Calls for Service/
Dispatch Records Coding Form. ·The request as originally made by the
caller is written as close to verbatim as possible as is the dispatcher's
response. Study the request and response closely before you begin
each interview. The Problem Type Code assigned by the Calls for Service/
Dispatch Records coder will be posted on the left side of the top portion.
You will eventually need to post this number to the cover page of the
Citizen Debriefing Form when an interview is completed.

Callbacks

If the first attempt to undertake an interview is successful,
proceed with completing the interview, review the form for accuracy
and completeness, code the relevant portions, and post the date of the
completed interview to the Debriefing Log Sheet and to the Cover Sheet
of the Citizen Debriefing Form.

Interviewer Number for Completed Interview __ __ __   Date of Completed Interview

* explain in comments

The first attempt to achieve a telephone interview might not result in an interview for several reasons. The phone may be busy, no one may answer the phone, the respondent may be too busy to respond at the time of the call, or the respondent may refuse to be interviewed. Each of these reasons requires different actions.

If the phone is busy, keep the Debriefing Log Sheet among your currently active forms. Keep calling the number every ten minutes until the line is no longer busy. These return calls should not be counted as callbacks. Keep track of them in pencil on the back of the form for your own information. If you obtain an interview on the first time that someone answers the telephone, code number of callbacks as 0.

If no one answers the phone, post the date and time of your call and your code number to the Log Sheet. Place the Log Sheet in a file for callbacks. The second attempt to undertake an interview should be made at a different time of day. If the first attempt is made in the morning, the second attempt should be made in the afternoon and the third attempt should be made in the evening. All attempts there-after should be spaced apart by at least one day.

The third reason that an interview may not be completed on the first attempt is that the respondent indicates that he or she is too busy to talk right then. Make an appointment with the respondent to undertake the interview at a later time. ALWAYS fill out an appointment card anytime that a specific appointment has been made. A copy of the Appointment Card is shown on the following page:

FORM 63

Police Service Study

APPOINTMENT CARD FOR CITIZEN DEBRIEFING

Date and Time of Appointment_____
                           Date   Time   Interview ID

Name of Respondent_____

Phone #_____ or Address_____

Comments for Interviewer Making Callback_____

_____

_____

It is <u>very</u> important to make appointment cards out to insure that someone

does call the individual at the appointed time. Otherwise, we may

lose the interview entirely. File the Debriefing Log Sheet with the

Appointment Card attached in a special file for Appointments. This file

should be organized by the date on which the appointment is scheduled.

A note should be placed in a prominent place near the debriefing work

area indicating the time of any appointment made for the current day.

This also means that interviewers should check the appointment file

folder each day to determine which interviews must be made during the

day. A list of appointments for the day should be posted in a prominent

place each day.

A fourth reason that an interview may not be completed on the

first attempt is that the respondent refuses to be interviewed. Write

out the reason given by the respondent as close to verbatim as is

possible in the comments section of the Log Sheet. The Log Sheet

should then be given to the Team Leader. Team Leaders may decide to

attempt again to achieve an interview if they feel the person may have been too busy at the time. However, we do not wish to intrude unnecessarily into delicate situations. Consequently, be sure to write out sufficient detail about the nature of the refusal to insure that we do not call someone back who has a legitimate reason for refusing to be interviewed (e.g., a family member who called to ask for emergency medical care in an instance where a death in the family resulted).

The procedures for handling unsuccessful attempts will be the same on later attempts up to the sixth callback. After the sixth attempt to contact the person, the Debriefing Log Sheet should be passed along to the Team Leader with a Trouble Slip asking for instructions as to future actions.

All completed debriefing interviews should be placed in a box or file at the designated place in the office for review by the Team Leader in charge of this process in each site. If specific problems exist with a form, a Trouble Slip should be stapled to the front of the form. The difficulty should be described in sufficient detail so that a Team Leader can resolve it without further discussion. The Team Leader will review forms with Trouble Slips first and return information to the interviewer about the resolution of the problem. The Team Leader will also review all other forms and route any form with incomplete or incorrect coding back to the interviewer for correction.

After a Citizen Debriefing Form has been approved by a Team Leader, it will be placed in the appropriate box or file for the Office Manager. The Office Manager will log all forms sent to Bloomington in

triplicate. One copy of the log will go into the package. One copy

of the log will go to Bloomington via a separate carrier. The third

copy will be retained on file by the Office Manager. A flow chart

describing the work flow for the Debriefing Process has been prepared

and will be discussed during training week and posted in each site

office.

Special Procedures for Handling Marital Disputes

Since this is a delicate type of debriefing, we will handle any

incident of this type in our sample in a special manner. A particular

concern is that we only talk to the person who initially made the call

to the Police Department. One spouse may not know that the other

spouse called the police. Information from us given to the spouse who

did not call could potentially raise the argument all over again. We

do not wish to be responsible for instigating additional difficulties.

We will not send a letter to a potential respondent in this type

of incident. The letter might be opened by someone other than the

person who called on the police.

We also wish to insure that the sex of the interviewer matches

the sex of the potential respondent. If a husband is jealous of a

wife, having a male call for his wife may cause difficulties and

vice versa.

The interviewer should ask to speak specifically to the person

who made the call. If the person is there, the interviewer should

use the regular introduction. Then, ask whether this is a convenient

time to talk. This gives the potential respondent a chance to indicate

that he or she cannot talk at this time. If the potential respondent

is not there, we should simply say that we will call back at a later

time. If asked for our name and why we are calling, simply give your

name and say: "I just wanted to chat with _____ for a few

minutes sometime in the near future and I will call back again."

Interview Instructions

Introduction

Two different paragraphs are provided on the cover sheet. One

should be used when you have the name of the individual who called.

The second can be used when there is no name. Be prepared to elaborate

further on these introductions if asked questions. Either introduction

can be used for in-person interviews.

Some typical questions from respondents include:

Where did you get my name? Tell them that we have the cooperation
of the _____ Police Department in providing a sample of names of
individuals who have recently had contact with the police. Be sure to
stress that the respondents answer will be held confidential and that
we are independent of the police department.

Who is doing the study? A team from Indiana University and the
University of North Carolina is conducting the study. We have a team
of researchers resident in the _____ area for a three month period.

What will you learn from this study? How officers from the _____
Police Department deal with citizen's requests for police services and
how this compares to other police that are organized differently.

Who is funding the study? The study is funded by the National
Science Foundation Grant.

Will I ever see the results? We will send out a short report
to those respondents who indicate an interest in receiving our report.
Post name and address to Request for Report form. Copy of form on
next page.

official, or anyone else who should begin receiving our Newsletters, do not
fill out this form. Use regular address form for Computer Based Retrieval
System. Individuals on this mailing list will receive one short overview
of our findings from the research conducted during the summer of 1977.

Be prepared for the possibility of a touchy situation any time you call a potential respondent who called the police for emergency medical assistance. In most instances the respondent is willing to talk about their experience. However, in a small proportion of cases the call did not have a happy ending. Someone might be in the hospital and seriously ill. Someone might have died on the way to the hospital. If you were to call someone where there has been a recent death in the family, do not continue with the interview. Simply say: "I am very sorry that you have lost a member of your family. I apologize for any inconvenience our phone call has caused you."

If the respondent wants to know how to verify who you are and what the project is all about, give them the telephone number of the Field Director and indicate a time at which you think the Field Director would be available to talk with them on the phone. If they want to know if they can check with the local police department, indicate that they can call the Police Chief's office and verify that we have their cooperation and assistance.

Page 2: When you start the actual interview post the time it started on page 2. This should be the time when you ask the first question for either an in-person or telephone interview. In other words, this is the time you actually start the interview rather than the time that you first knock on the door or first have the respondent say "hello" on the telephone. Later, you will post the time at which you complete the interview on the last page of the interview schedule. You will then compute the total time of the interview and post that to the cover sheet. It is only the total time of the interview that is keypunched.

Page 2: Question 1

Write out in sufficient detail what happened to the individual so that you can code using the Problem Type Codes. The description of each of these codes is contained in this manual starting on page ___ . Carefully code the type of problem after completing the interview. You may use multiple codes for describing the nature of the problem -- up to 3 codes for each problem.

You should also code whether the respondent was the person involved or a third party. If they were victimized, assisted, or one of the persons involved in the disturbance, we will code them as a person involved. If the respondent called the police for an accident they witnessed, to report a disturbance, or to report any other type of incident of which they were not a party, we will code them as a third party.

If the respondent begins to describe a clearly different incident from the one attached to the Debriefing Log Sheet, ask them if they had an incident similar to the one described on the particular date. Then, indicate that this is the incident we wish to discuss. If they did not have such an incident on that date, obtain the information about the contact they had and place a Trouble Slip on the completed interview when passing it along to the Team Leader for review.

Question 2

Again, you need to write out sufficient information about the location of the incident to be able to code this response after the interview is completed. Use the maps in the site office to determine where the incident took place if you are uncertain. You'll note that if the incident took place in their residence, it also took place in their block, and by definition, in the sample neighborhood. However, we are not multiple coding this question. Thus, code only that the incident took place in their residence if that is the location of the incident. Or, code only that the incident took place on their block if it took place down the street but not in their residence. It is only when the incident took place in some location other than their residence or block that you will need to get an exact location for this incident in order to determine if it is in the sample neighborhood. We already know that the address and telephone number shown in the Log Sheet for this incident are within the sample neighborhood. We are conducting a full interview with anyone who was selected in the sampling process for debriefing even if the incident they are talking about is outside the sample neighborhood. But we do need to know where the incident itself occurred.

Question 3

You may be able to code this while conducting the interview, but be sure to write down sufficient information if you are uncertain of how to code it while the interview is in process. That way, you can more carefully code the response after the interview is completed.

Page 3: Question 4

Here we want as good an estimate as is possible of the amount of property loss. You would only ask this question if they indicate that something was stolen or damaged. If their first response to this question is "I don't know", do ask again if they have any idea of its value. One might attempt to zero in on getting an estimate by asking them whether or not they think the estimated loss is closer to $10, $100, $1,000, or $10,000. Frequently that will evoke a more careful consideration on the part of the respondent and some estimate of property loss.

Question 5

Ask this question if the type of problem involved would lead you to suspect that someone had been injured. If in doubt, be sure to ask the question.

Question 6

Most of the responses to this question will be straightforward yes's or no's. If the response is a no, then we ask Question 7, "why didn't they come?" If the response is yes, then we go down and ask Question 8, "were you there when the police arrived?"

In a few instances the respondent will indicate that no one came at the time of the call but detectives came later. If this respondent gives you this response, you would skip all the way to page 8 where you would ask about the knowledge level of the respondent and the activities of the detectives when they did come.

Question 7

Ask only if they respond "no" to Question 6. Write sufficient information to be able to code later. Regardless of the response to this question, go directly to page 4.

Question 8

Ask only if the police arrived. If the respondent was not there when the police came, you skip to the appropriate encounter section. The respondent might not have been there when they arrived, but was there later and witnessed some of the activities. If respondent was only present at the time of calling the police and knows nothing about the activities undertaken at the scene (if the police came) go to Page 4 and ask the questions relevant to the person making the first call.

Encounter Sections

There are four encounter sections placed in between page 3 and page 14.
The first encounter section starts and ends on page 4. It should be used
in all cases where the police did not come, the respondent does not know
if they came, and/or the respondent only talked to the police in the
first place and can only tell us about what the person who answered the
police phone did.

The encounter sections for ASSISTANCES OR DISTURBANCES begins on page 5
and continues through page 7. Use only when police came.

The encounter sections for VICTIMIZATIONS begins on page 8 and continues
through page 11. Use only when police came.

The encounter sections for TRAFFIC ACCIDENTS begins on page 12 and ends
on page 13. Use only when police came.

For all encounter sections, ask only the items that are relevant to this
incident. Check the "+ ___ not asked" code for those you do not ask.
If in doubt about relevance, ask the item.

Frequently, respondents will have given you the answers to a number of
these questions in their responses to earlier questions. When this occurs,
and when you are certain of the response because the respondent was very
clear in their earlier statement, you may code the question without asking
it. In this instance you will code an answer and you will not check
the plus box for a question that is not asked. The intent of the overt
checking of plusses for when questions are not asked is to know which
questions you thought were not relevant to the particular circumstance.
Later we will want to do frequencies of those persons who were asked a
question and not include in those frequencies those persons for whom the
question was not relevant.

The order of the items on the encounter sections are intended to reflect
the most frequently asked items at the beginning of the form, the less
frequently toward the end. Many times the respondent will tell you a
response to an item before you ask. If the reference was clear, do not
re-ask the item. Code the response volunteered by the respondent.

Most of the questions on the encounter sections are quite straightforward.
Some respondents have not understood the difference between taking
someone to the station for questioning or other purposes, and arresting
someone. If someone indicates that confusion, and is not certain whether
they had arrested a person when they took them to the station, code
that they took the person to the station and code "no" for whether they
arrested anyone.

The victimization encounter section now starts with some questions about
the type of information the respondent might have about who committed

the victimization. If the person had no information about who did it, you would simply ask them Question 53, Question 57, and Question 58. However, if they had some information you would follow up to find out the type of information (Question 54), what information they gave to the police (Question 55). If they had more information than they actually gave to the police, then you would ask Question 56. For Questions 54, 55, and 56 write out thoroughly what they indicate in the interview and code these questions after the interview is completed.

Page 14: Questions 113 to 116

None of the questions on page 14 should be asked if police never sent officers to the scene. As directed on the Encounter Section, you skip to Question 126 on page 15.

We ask first about the number of officers who came and then whether they were courteous, how many were male, and how many were white.

Question 117 and Follow-up Questions

If they respond that they were very satisfied, satisfied, or neutral, skip to Question 122.

If dissatisfied or very dissatisfied we ask 118. Write out response. Code response from list after interview is completed. You may code up to four reasons for dissatisfaction.

If they complained to someone, you need to find out to whom they complained and specific information about the type of individual or office involved. Code from List A on the back of page 13. You can code two different types of individuals to whom they complained.

If they didn't complain, you need to write out their answer in sufficient detail that you can later code from List B on the back of page 13. You can code two different types of reasons for not complaining.

Page 15: Questions 122 through 124

These questions should only be asked if the respondent was the person involved. Do not ask of third parties.

Question 126 and Follow-up Questions

We are attempting to find out if the respondent was referred to any internal or external agency. If no referral occurred, skip over the rest of page 15 and all of page 16. If there was a referral, get specific details in Question 127 so that you can code either the generic type of agency (e.g., a Detoxification Center) or a specific agency located in the site (e.g., the _____ County Detoxification Center). Use the Agency and Unit Types Code Sheet to code Question 127 after the interview is completed.

Page 17: There are now some general questions about the housing unit in which a
person lives and a couple of evaluative questions.

Page 18: In Question 41 you ask whether they have had any other contact with the
police that has influenced their opinion of police. If they indicate
either "no" or "don't know" you would go to the next page. If they
have had some other contact, you ask in Question 142 for sufficient detail
that you can code their response later. They may have had several contacts
with the police previously that they feel have influenced them, be sure
to code each of those types of previous experiences. Then you ask
Question 143 and Question 144.

Page 19: The heading helps to attain individual's cooperation with questions
that are of somewhat more personal nature. If a respondent does indicate
hesitation about answering questions of a personal nature, you may
indicate that answering these questions is optional, but that obtaining
answers to them is very helpful to us in comparing the neighborhoods and
the departments we are studying.

The Cover Sheet

After completing the interview and your coding and review, fill

out the cover sheet. Post your interviewer number first. From Debriefing

Log Sheet (top and bottom portions) post: number of callbacks prior

to interview, recorded date of incident, problem codes of incident, the

date letter was sent and the date of an interview. (BE SURE TO POST THE

DATE OF INTERVIEW ON THE LOG SHEET ITSELF SO THAT WE DO NOT CALL THIS

RESPONDENT BACK.) You will then code whether the interview was conducted

on the phone or in person and whether it is a completed or partial

interview. If it is a partial interview, please explain why the inter-

view was not completed in the Comments section.

Carefully post either or both case numbers asked for in Questions 10

and 11 of the Cover Sheet. The case number of the Calls for Service/

Dispatch Records Form you will find in the second and third line of the

form. The case number of the Patrol Encounter Form is found on the last

line of the Calls for Service/Dispatch Records Form or on the Patrol

Encounter Name and Address Form. These numbers must be posted very

carefully. This is an essential tie between the three different forms.

Compute the total time of the interview from the first and last

pages of the interview form itself.

What To Do With Unused Encounter Sections

BEFORE stapling the completed form together, carefully remove

the unused Encounter Sections from the instrument. The completed

instrument should have only one Encounter Section forwarded for Team

Leader review and keypunching. Be very careful to keep the appropriate

Encounter Section that you used in the interview and to toss only the

three Encounter Sections that you did not use.
