Acknowledgement of Assistance

All manuscripts utilizing data made available through the Consortium should acknowledge that fact as well as identify the original collector of the data. The ICPSR Council urges all users of the ICPSR Data facilities to follow some adaptation of this statement with the parentheses indicating items to be filled in appropriately or deleted by the individual user.

The data (and tabulations) utilized in this (publication) were made available (in part) by the Inter-university Consortium for Political and Social Research. The data for NATIONAL CRIME SURVEYS REDESIGN DATA: PEORIA RECORD CHECK STUDY were originally collected by Robert M. Groves. Neither the collector of the original data nor the Consortium bear any responsibility for the analyses or interpretations presented here.

In order to provide funding agencies with essential information about the use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, each user of the ICPSR data facilities is expected to send two copies of each completed manuscript or thesis abstract to the Consortium. Please indicate in the cover letter which data were used.

NATIONAL CRIME SURVEYS REDESIGN DATA: PEORIA RECORD CHECK STUDY
(ICPSR 8669)

SUMMARY: The purpose of this study was to measure criminal activity in the United States based on survey reports of crime victims. In the study two different questionnaire forms were used in order to assess which provided better responses. One form was very lengthy and asked detailed questions about each household, person, and incident. The second form was much shorter and asked very generalized questions. The data collection was an attempt to find alternative methods of sampling, interviewing, designing questionnaires, managing data, and reporting results. Detailed information is provided on household characteristics and other characteristics of the respondents, as well as on crime incidents, including burglary, vandalism, assault, and rape. CLASS IV

UNIVERSE: All persons in the United States twelve years of age and older.

SAMPLING: Combination of sample from police record system and random digit dialed sample.

NOTE: For reasons of confidentiality the ICPSR has masked several variables.

CONTROL FILE VARIABLES

Variables 101-133 have been assigned to the control file data. Variables 134-199 are reserved for recoded variables for this file. The frequencies appearing following the description of the variables are for all cases in the control file (completed, partials, breakoffs, and non-interviews). See V120 for the result code.

- 0. Certainty selections
- 1-10. Replicate code

NOTE: The police record sample was selected in 10 replicate groups and one certainty group. Replicates 0-3 were put into the field on Oct. 2, 1981. Replicates 4-6 were put into the field later. Replicates 7-10 were not used. Replicate code was not relevant for the RDD sample. However, because the replicate code appeared on the labels, RDD sample telephone numbers were assigned a random replicate code from 1-3. This was done to make all labels in the same format. It was impossible from the label to determine which sample generated any one label. The link was possible only after a data management step merged the control file and the CATI numeric data file.

V114 CV:CATI #/CONTROL COL= 40 WID=4 NDEC=0 T=C MD1=0 MD2=9999 REFNO=114

This variable is the control file CATI ID. The control office assigned breakoff interviews (result codes 35,55,65) IDs ranging from 5000-9998. Result codes 01 and 05 (completed and partial interviews) are assigned IDs that match the CATI interview data. NOTE: If you intend to match control file data to CATI numeric data (interview data) you must use %H ID and PERSON ID as identifiers.

FINAL DISPOSITION

Interview -- all samples

- 01. Complete interview
- 05. Partial interview

Noninterview -- all samples

- *31. Initial refusal by R
- *32. Initial refusal, not by R
- *33. Initial refusal, R undetermined
- 34. Refusal, never reached for conversation
- 35. Initial refusal, breakoff no conversion
- 51. Final refusal by R
- 52. Final refusal, not by R
- 53. Final Refusal, R undetermined
- 55. Final refusal, breakoff on conversion
- 56. Final refusal, no conversion attempt
- 62. NI -- never answered
- 63. NI -- circumstantial
- 65. NI -- incomplete
- 67. NI -- lost
- 69. NI -- grid filled

Noninterview --

- 68. NI - NS, end of study replacements

Nonsample

- *44. Initial strange noise or fast busy
- 73. Final silence
- **74. Final strange noise or fast busy
- 82. Second wrong connection
- 84. Nonworking number
- 85. Nonresidential number
- 86. Out of primary area
- 91. No eligible R

NONSAMPLE -- recontact only

- 75. Wrong # for R, no new # available
- 76. R's # is no longer in service

* Codes 31,32,33, and 44 are not final - so do not appear in final frequency listing (those cases so classified initially and not subsequently coded in a different category would become 51,52,53, and 74).

** Six-attempt procedure was used for strange noise and fast busy signal; number verified by calling the # twice. Confirmed by waiting 3 days after initial 2 calls and trying twice again. If 2 more 44's were obtained, waited 3 days and tried again. If sixth call on sixth day was a strange noise or fast busy, coded 74.

Form B Screener Questions

NOTE: Form B Q38-Q44 were to be asked only of person 1 (the household respondents).
These Qs yield Household Variables - V2009-2015.

There were some problems using this rule during field operations. Problems arose when person 1 was a break-off with call back scheduled, the person 2 was completed and person 1 never finished his/her interview. Another error was I'wers who took a HH listing before the completion of the first I'w, then interviewing persons 2+ before person 1, then person 1's interview was never completed. This resulted in some person 1 interviews with the code '97' in HH variables rather than a valid code or 98,99. ('97' is the code here for INAP. -- this question was never asked.)

The following cases have this problem: 212 (HH 314), 1563 (HH 858), 1724 (HH 1127). This means the count of '97' codes varies slightly by question number.

In addition, some R's that were person number 2-20 were originally interviewed as person 1 (case 138 and 2519). The decision is to leave data as they are, making the file seem somewhat inconsistent. This decision may require the analyst to use filters for analysis with HH variables in Version B.

Form A Screener Section

NOTE: The Form A Screener Section is designed to elicit mentions of potential incidents - which, if they meet our requirements for a valid incident (as determined in the "dating sequence"), generate labels to be stored in the "stack".

The response categories for all questions in the screener section are:

1. YES **F** - - SKIP TO C1 (Skip to C14 if other than first "yes" in screener section)
5. NO
8. DON'T KNOW /RQ/

A "yes" response on any screener Q sends interview to appropriate dating sequence (to QC1 for first "yes" in series, to QC14 for all subsequent "yes's") with the following exceptions:

1. A "no" (rather than 'yes') response on Qs B12, B25 and B40 also sends interview to the appropriate dating sequence.
2. Qs B24 and B42 about vandalism to apt. bldg. and public vandalism do not generate labels.

READ THE FOLLOWING TO ALL RESPONDENTS:

SC656 The most important aim of this study is to learn how people we interview have actually been harmed by wrongful acts of others. I will ask only about things that happened since April 1st.

Many people do not find it easy to remember things we ask about, so, it's necessary to ask a number of specific questions. Some questions may seem to repeat earlier ones. Please think about each new question to see if it reminds you of ANOTHER TIME something happened to you. Thanks again for your help, and if at any time you remember something you didn't think of before, tell me about it right then.

IF A33d ANSWERED 'NO', ASK APPROPRIATE VERSION OF B1.0-B1.4

RECODE for Number of Labels (Form A)

These variables (V3148-V3193) are recoded variables. Each screener question in Form A with a "yes" response (or in case of Qs. 812, 825 and 840 a 'no' response) went to a 'dating sequence'. The number of labels variables were created by searching the dating sequence for valid, unduplicated incident mentions, and coded as follows:

Codes:

- 0. No incidents
- 1-6. Number of valid, unduplicated single incidents
- 7. This screener question generated a mention of a series incident ("happens often")
- 8. INAP
- 9. Missing

Dating Sequence (Form A)

The following sequence of questions will be asked after each 'YES' response to most screener questions or a 'NO' response to QB12, B25, and B40. A 'YES' response to QB45 (vicarious victimization) triggers a different set of questions (QV1-QV7) and does not generate an incident label.

NOTE: The variable numbers shown here are for dating sequence Qs triggered by a 'YES' response on screener QB1. Additional variable numbers for these questions are found on the table at the end of this section.

Index of Variable Numbers for Each Dating Sequence

NOTE: The variable numbers have not been filled in on this table except for lines B1 and B42, and column C14. Each line indicates the "dating sequence" (Qs C14, C15, & C1-C12b) questions triggered by a 'yes' response (or 'no' on Qs B12, B25, and B40) on those Form A screener Qs listed on the left of table. You can find the variable number for any given dating sequence Q by finding the screener Q which triggered the dating sequence - on left hand column of table - then starting with Variable number in column C14, adding 1 to each succeeding dating sequence Q on that line (as in line B1 and B42). Also see current NCS master file OSIRIS dictionary.

INCIDENT FORM VARIABLES

NOTE I: Although the questions in the incident form are the same for Form A and Form B, some Form B questions at the beginning of the incident form had to be put on different screens than Form A due to logic necessary to control skip patterns in the CATI system. Form B screen numbers are those in parentheses.

NOTE II: There are two sets of variable numbers for information in the incident form. What we have called the "interview-level" file variable numbers are those initially assigned by question number across all possible incidents (16, as it happened) in any given interview. Thus, Q.1 (Q.1a), allowing for up to 16 possible incidents, is assigned variable #4002 to #4017; Q.2 (Q.2a) is assigned variable #4018 to #4033, etc. These variables are found in NCS.DI10. For most analytic purposes, of course, this system is unwieldy (if not impossible) to use. So the "incident-level" file was set up--assigning variable numbers by incident across all questions. With the addition of variable #4001 (incident #) to to this file, analysis was facilitated. Thus, for analysis we have variable #4015 (Q.1) through #4107 (Q.20d in the incident form) to #4136 (including open-end codes and recodes). These variable numbers are found in the incident level dictionary, INC.DI10. The variable numbers listed first are the "incident-level" variable numbers. Variable numbers followed by an asterisk are the "interview-level" variable numbers.

20b. What was the reason the incident was not reported to the police? Any other reason?

Police related reason

01. Police can't do anything; it wouldn't help; wouldn't do any good; they can't/won't solve crime; stolen good won't be/rarely recovered
02. No evidence or proof for police to work with; I couldn't identify the goods; "didn't have serial number"; I couldn't prove anything; too late; too long after the crime
03. Police not interested; too trivial for police to deal with; they won't investigate if loss under a certain \$ amount; didn't want to bother them
04. R's previous experience with police not good/helpful; don't like to deal with the police
05. Involving the police can't undo impact of crime/damage to R; won't make me less afraid

Offender related reason

11. R's familiarity with offender; "Because I knew who did it"
12. Offender(s) very/too young
18. Fear of reprisal; worry that offenders would come back/hurt R if reported
19. Other offender related reasons why R didn't report; "didn't want to cause trouble with the neighbors; didn't want to embarrass them"

Reason related to Nature of Crime

21. Not important; trivial incident; things taken not valuable; "not worth it"
22. Nothing stolen; no damage or injuries
23. "Not necessary" NA why
24. Problem has stopped/been solved; goods returned or fixed or replaced
25. No crime or not sure crime occurred; may have been an accident; may have left the door open myself

Contacted another authority

31. Called another (relevant) authority or agency to deal with crime; called the school/ animal shelter/dept. of social services/security office

Personal reasons

41. Been too busy to do it
42. It's too much trouble/red tape; didn't want to get involved; didn't want any more problems; "line was busy"
43. Didn't think of it; "didn't realize you could report things like that"
44. Took care of it myself; I confronted person and got goods returned
45. R thinks crime was his/her fault; I was careless left things unlocked

Recoded Variables from the Incident Form (Interview-Level)

NOTE: The following recoded screener history variables are found in NCS.D110--the interview-level file. There is a separate variable for each of the sixteen possible incidents in any given interview. The code for these variables indicates the screener question and form which generated the mention of the incident.

Form A interviews have a code equal to the number of the screener question which generated mention of the incident. The possible Form A codes are:

1 through 9; generated by Qs B1-B9A respectively
 9.5 generated by Q B9B
 10 through 44; generated by Qs 10-44 respectively.

Form B interviews have a code equal to the number of the form B screener question which generated mention of the incident, plus 100 (since there was an overlap in the question numbers on the two forms). The possible form B codes are:

138 through 157 for mentions generated by questions 38-57 respectively.

INTERVIEW: Interview all owners with respondent. Mark box below if structured probe used:

300 1 STRUCTURED PROBE: Was the reason because you felt there was no NEED to call, didn't think police COULD do anything, didn't think police WOULD do anything, or was there some other reason?

If necessary

No NEED to call

- 301 1 Object recovered or offender unsuccessful
- 2 Respondent did not think it important enough
- 3 Private or personal matter or took care of it myself
- 4 Reported to someone else

Police COULDN'T do anything

- 302 1 Didn't realize crime happened until later
- 2 Property difficult to recover due to lack of serial or I.D. number
- 3 Lack of proof, no way to find/identify offender

Police WOULDN'T do anything

- 303 1 Police wouldn't think it was important enough, they wouldn't want to be bothered
- 2 Police would be inefficient, ineffective, insensitive (they'd arrive late, wouldn't pursue case properly, would harass/insult respondent, etc.)

Some other reason

- 304 1 Afraid of reprisal by offender or his family/friends
- 2 Did not want to take time - too inconvenient
- 3 Other - Specify
- 4 Respondent doesn't know why it wasn't reported

Is more than one reason marked in 20b?

d. Please take a minute to think back to the time of the incident (PAUSE). Besides the fact that it was a crime, did YOU have any other reason for reporting this incident to the police? (Specify)

IF PHONE INTERVIEW: For example, did you report it because you wanted to prevent this or a future incident, to collect insurance or recover property, to get help, to punish the offender, or because you had evidence that would help catch the offender, thought it was your duty, or was there some other reason?

Any other reason? Mark all that apply. Verify, if necessary.

- 305 1 To stop or prevent this incident from happening
- 2 To keep it from happening again or to others
- 3 In order to collect insurance
- 4 Desire to recover property
- 5 Need for help after incident because of injury, etc.
- 6 There was evidence or proof
- 7 To punish the offender
- 306 8 Because you felt it was your duty
- 9 Some other reason - Specify

Crime Victimization in Peoria
P468071

Background of this Study

This study is part of a larger research effort exploring different methodological options for an ongoing National Crime Survey (NCS). The NCS is funded by the Department of Justice and conducted by the Bureau of the Census. Its purpose is to measure criminal activity in the United States through the survey reports of crime victims. Some 140,000 people are interviewed every year in the NCS. They are asked to report incidents of criminal victimization, and to give some basic demographic data to correlate with the incidence of victimization. The survey helps to fill an important knowledge gap because many crimes are never reported to police, and, consequently, the records underestimate the actual amount of criminal activity in the country.

The Department of Justice has a continuing interest in upgrading the quality of the NCS. It has funded a group of researchers at various universities to look into alternative methods for sampling, interviewing, questionnaire design, data management and reporting, and other procedures in the NCS. As part of these activities, we have adapted two NCS questionnaire formats for CATI, and we will compare the findings they produce in this study. Researchers in other organizations are also looking into alternative questionnaire designs, and we will compare our findings with theirs after the studies are completed. Some of the procedures being explored will be incorporated into the ongoing NCS if they prove effective.

Study Design

In this study, you will administer two different questionnaires, each with its own distinctive features. Form A, the long form, asks more questions about characteristics of the respondent which may relate to victimization, and asks numerous specific questions which may elicit victimization reports. Form A also seeks to disentangle possible multiple crime events by asking Rs to date each event.

Form B, by contrast, asks fewer, more general victimization questions.

Whereas Form A gathers extra background information and may produce reports of victimization which a shorter questionnaire would not, Form B is probably easier to administer. This is a classic tradeoff in survey research, and we are interested to see whether the two forms actually produce different levels of victimization reporting.

To test the two questionnaires, you are going to interview respondents in Peoria, Illinois, long considered a "typical" American city, and one large enough to have residents who have experienced some form of crime event. We have sampled some phone numbers from areas in the city which police statistics led us to believe are "crime prone." The other half of the sample numbers came from a general RDD sample of the city. We have sampled this way to try

to make sure that we get a good test of the two questionnaires by having enough potential victims in the sample to check out all the questions, and still not bias the test by having you expect to get a crime incident reported in every interview. The sample phone numbers are now all mixed up, and the labels do not identify whether any phone number comes from a "crime prone" or a "safe" part of the city.

Both forms, A and B, have four sections: a set of introductory questions, a set of "screener" items, an "incident form," and a set of demographic questions at the end. The introductory questions gather background information from respondents. The "screener" items ask whether or not respondents gather details on events reported in screener questions. In both forms of the questionnaire, the entire set of introductory questions and screener items are asked prior to administering the incident form for each incident mentioned. (See Figures 1 and 2.)

Special Features of Form A:

While the two forms of the questionnaire have a similar overall structure, they differ in some important ways. In the introductory questions in Form A, there is a more extensive housing section, and there are questions about the respondent's usual activities. The two forms share a common occupation section (which we borrowed from the Survey of Consumer Attitudes, so you may be familiar with it).

In Form A, we use some information from introductory questions to set up skip patterns in the subsequent screener items. For example, Rs who do not own a motor vehicle receive a smaller number of vehicle-related screener questions. Those who report having been "really mad" or "scared" in the past several months about some possible crime situations will be reminded of their feelings prior to certain screener items. One of the advantages of CATI is that we can program skip patterns like this which you would find difficult or impossible to follow in hard copy.

The screener questions cover a variety of victimization events, for example, burglary, vandalism, assault, and rape. (The list in Form A is longer than the one in Form B.) Each "yes" mention to a Form A screener item is followed by a set of questions designed to find out if it is related to others already mentioned, when the incident occurred, and to set a brief description (incident label) which you will use in later incident form questions. After these "identifying" questions are complete, the next screener item will automatically appear, and so on to the end of the list. Meanwhile, all of the incident labels you obtain after "yes" screener mentions are stored in what we call a "stack." After the set of screener questions, the list (stack) of incidents created by the sequence of screener questions will be brought up, one at a time, for incident form questioning. After asking about each incident, we get some demographic information and the interview is finished for that respondent.

The incident form questions elicit supplementary information about the victimization event, so that it can be classified in a "type of crime" code. In some cases the incident form questions will ask about things the R may have already told you. When this happens, ask the question as a check of the information rather than asking the question as if you hadn't heard what he or she said earlier.

Special Features of Form B:

The introductory section in Form B asks only a few questions about housing and job status. The screeners questions are different from Form A, in that they cover fewer types of incidents and some questions are asked only of a "household respondent." (In Form A, every person in a household over 11 years of age will be asked all of the screener questions.) Additionally, the "stack" of incidents is set up somewhat differently in Form B. After a "yes" to a screener item, you will ask the respondent "how many times" that incident occurred. The answer to this question determines how many incident forms need to be completed for that screener question. So, if the respondent reports that a particular kind of incident occurred three times during the reference period (the reference period is the six months previous to the interview), you will enter three labels (one describing each incident) into the list (stack). Later, after all of the screener items have been asked, three incident forms will be completed so that details about each event are obtained.

Series Incidents:

There are special procedures in both questionnaire forms for situations where victimization events are so numerous and psychologically indistinguishable that the respondent is unable to attach a date to them (Form A) or to say exactly how many times they happened during the reference period (Form B). Both forms probe immediately (WC). In these fairly infrequent cases, Form A will further probe respondents to make certain that they cannot provide discrete dates for the incidents. If the events cannot be distinguished, they are termed "series incidents" and respondents will be questioned with an incident form which asks only about the most recent occurrence of that type of event. Form B does less extra probing of respondents who say they cannot report exactly how many incidents were associated with an individual screener question. If this happens in Form B, you are instructed to enter a label into the list (stack) that describes these events as a series. A special incident form sequence will be used which asks only about the most recent incident of that series.

Figures 1 and 2 depict the two interview formats and outline the flow of the interview. Refer to these schema as you read the question-by-question instructions, and during your CATI practice.

QUESTION-BY-QUESTION OBJECTIVES: FORM A

Housing Section, A1-A12, A17: We ask these questions to see if different living circumstances are related to victimization risk. Depending on the answers to questions A1-A5, different question wordings will appear later in the housing and screener questions. For example, the word "townhouse" will be inserted in later questions if respondents report living in that sort of dwelling. Apartment dwellers may wonder in QA6 whether we are referring to the next apartment, or the nearest separate building. By "closest neighboring house or dwelling" we mean the closest separate building.

Vehicle Ownership, A13-A15: These questions are used to assign respondents to different question branches involving vehicle theft, damage, etc., depending on ownership. "Motor vehicle" includes cars, trucks, Jeeps, RVs, snowmobiles, dune buggies, and so forth.

Occupation Section, E1-E7: This sequence is the same as that found in the Survey of Consumer Attitudes. In addition to gathering occupational information, the sequence sets up skip patterns for screener items later in the questionnaire. Respondents may occupy more than one role (e.g., working and going to school), so E1 sets up different skip patterns depending on whether R makes multiple mentions to this question.

Income, A24-A24f: This is the same sequence as in the Survey of Consumer Attitudes.

Transportation, A19, A20, A24-27: These questions are included to find out if people who go to work or school by various means of transportation are more or less likely to be victimized. NOTE: The category "walk" applies only to respondents who walk the entire distance from home to work or school. If R says that he or she "takes the bus and walks" to work, the appropriate category is "public transportation."

Activities, A28a-A29b: These questions ask about R's activities in the previous week, or month.

Protective Devices, A30-A31b: Reassure respondents, if necessary, that we don't care what devices they have, but whether they have any or not. We are collecting the information only to see whether possession of protective devices relates to victimization risk.

Attitudinal Warmups, A32-A33e: These questions are designed to start R thinking about possible victimization events which occurred in the previous six months. They also cue special questions in the screener section.

Screener Section, B1-B45: As the introduction states, this is the most important part of the questionnaire--the section where the burden of identifying crime victims falls.

The introduction attempts to do a number of important things: 1) to instruct respondents on their role and motivate them to perform it well; 2) to define the things we are looking for; 3) to define the reference period; 4) to inform respondents about the upcoming questioning strategy; 5) to remind them to report things which they remember "spontaneously."

B1-B4: These items cover theft from in-and-around home, as well as break-ins and attempted break-ins, with special wording for different types of housing. For example, those living in multiple family dwellings are asked particularly about storage lockers, laundry rooms, hallways and mailboxes, while those living in single family houses are asked about house, garage, and yard. As noted on each screen, here and throughout the screener section, give R a short feedback after any "yes" mention. Remarks like "I see," and "Thanks for reporting that" are good ones to use. We will provide a feedback list for you to put up in your carrel.

B5-B11: These questions on motor vehicles and bicycles are asked in special sequences for those who do not own these things, but may have used them.

B12-B12b: This is the first of several questions which summarize the fact that R has reported nothing until that point in the screener, and ask him or her to verify that in a "yes" response. These questions seek to make sure that nothing was missed, and to break up any long sequence of "no" responses.

B13-22: These questions are reminders about thefts which may have occurred while R was away from home. There are special probes which will appear for those who reported earlier that they work or go to school.

B23-24: These questions about vandalism have special probes for respondents who reported in the attitudinal warmup section being angry about damaged property, and for those living in multiple family dwellings.

B25: Similar to B12.

B26-31, B35-39: Questions about direct physical attacks, by strangers or acquaintances, using all kinds of weapons.

B32-34: Questions about threats and intimidation.

B40: Similar to B13 and B25.

B41-42: Questions about problems with neighbors, and vandalism to public property.

B43.1-44.2: Asks about calling the police, with a sequence where the wording is altered slightly for those who have reported some incidents previously.

B45: Asks about "vicarious" victimization--events which did not happen directly to R, but which affected him or her nevertheless. A "yes" to this question cues a special "incident" report to find out some details of the event.

Setting up the "Stack" for Form A

After a "yes" response to a screener item (except B12, B25, B40, and B45), a set of screens will appear which attempt to distinguish this incident from others which may have been mentioned, and to attach a label to it so that you can refer to it later in the incident form section of the questionnaire.

Labelling Incidents: "The Stack"

The question-set following each screener mention will ask 1) if the incident is related or the same as another incident already mentioned, 2) if the event happened more than once in the previous 6 months, 3) the month(s) in which the incident(s) occurred, and 4) briefly, what happened. If the type of incident happened only once, R is asked for a month of occurrence and a label. If more than once, he or she is asked for separate dates and labels (up to 6 possible events for each screener mention in Form A).

If R is initially unable to say when a number of different incident occurrences happened but says "it happens all the time," or "so often I can't remember," he or she is asked only about the last month. If there were two or more occurrences in the last month, we define this as a "series" incident. In the incident form, rather than asking about each separate occurrence of that type of incident, we will ask about only the most recent occurrence.

So, there are three possible outcomes of the "stacking" procedure:

- 1) R mentions only one occurrence of the event associated with the screener item--one label goes into the stack (e.g., garage broken into 1 time);
- 2) R mentions 2 or more discrete occurrences of the event--the appropriate number of labels go into the stack (e.g., garage broken into 3 times);
- 3) R says that there were so many occurrences of the event that he or she cannot say precisely how many--after probing the event defined as a series incident (e.g., garage broken into ? times). In this case, the label should indicate a series of garage break-ins.

You have some important tasks to perform in creating this stack which will be used later to call up incident forms about each event. First, remember that the label you type in describing the event is the only reference you will have to the incident in the incident followup questions which appear later. So, the label should be descriptive and easy for you to read.

When you ask R to "briefly describe what happened" in SC745, it is helpful to start the description with "You had...(something stolen)," or "Someone... (took your purse)." This is because when the incident form appears later, it begins with "You told me earlier that...". If you type the label as suggested, you can read easily "You told me earlier that...(you had something stolen) (someone took your purse) (etc.)." The reference to "you" or "your" in the label makes the wording flow more easily.

The other thing to remember about the label is that, if there is more than one occurrence of a particular event, you should designate in the label which one is being addressed. So, if R says that the garage was broken into in May and in June, you would have two labels: e.g., "Your garage was broken into in May," and "Your garage was broken into in June." You will have the month information from the questions immediately preceding the label screen. If there are two occurrences in a single month, you would enter "Your garage was broken into in May-first time" and "Your garage was broken into in May-second time." If the incident is of the "series" type, you should enter a label such as: "Your garage was broken into-series." This label will remind you later to select the "series" question sequence in the incident form.

The Form A screener approaches different crime events from a variety of angles, so some respondents may report the same event more than once. We have built in some protections against this possibility, since we don't want to fill out multiple incident forms for the same incident. First, if R says "yes" to more than one screener item, he or she will be asked whether the current "yes" mention is related to earlier ones and if it is, in fact, the same incident. If so, the computer will automatically return you to the screener questions and no incident form will be "stacked" for later questioning. In addition, after each incident is labeled, you will tell the respondent that this is all you need to know about that incident for now. This phrase may prevent them from thinking that they have to report a single incident every time they have a question that reminds them of it.

We also have a protective mechanism for "out-of-reference period" mentions. We are only interested in things which occurred since the first of February, so whenever you enter a date prior to that time, the machine will return you to the screener without setting up a stack item for incident form questioning. This feature and the protection against duplicate mentions should make it unlikely that you will have to use the "not a valid incident" option to delete mentions before the incident form.

QUESTION-BY-QUESTION INSTRUCTIONS: FORM B

The housing, employment, and income sections of Form B are identical to questions in Form A. The only difference is that there are fewer housing items in this version.

Screeners Questions: Form B asks some of the screener questions only of a "household respondent." The household respondent will be the first person you interview in that household, and he or she will be asked questions 38-44 in addition to questions 45-57.

Q38-40: These questions are similar to those found at the beginning of Form A dealing with break-ins, attempted break-ins, and theft from around the house.

Q41: Similar to questions in Form A which ask about theft from R while he or she was away from home.

Q42-44: Form B has a short vehicle section which is asked only of the household respondent.

Q45-57: These questions are asked of all respondents. They cover muggings, assaults, threats, thefts, and attempted thefts.

Setting up the Stack: In Form B the stack is set up when R says "yes" to a screener item and you then ask "How many times" that type of incident happened in the previous six months. Entering the number of times it happened calls up enough label screens for you to describe each of the incidents for later questioning. If there is more than one incident associated with any screen question, be sure to indicate on the labels the number of each occurrence--"You were mugged - first time," for example. Just as in Form A, when all of the screener questions are completed, the machine will bring up each label from the stack in turn for incident form questioning. The incident form is the same for Forms A and B.

INCIDENT FORM

This set of questions gets detailed information about each incident identified by the screener items. The details are needed in order to find out what has actually happened, to code incidents properly, and in order to analyze aspects of crime with an eye toward prevention. In some cases respondents will have already given you much of the information about the incident spontaneously. When this happens, you may verify the information by using a phrase such as, "You told me earlier that..." or "Let me make sure about this...". The procedure to use if you know the answer to a question is to check the information with R as you go through the incident form questions.

QUESTION-BY-QUESTION INSTRUCTIONS: DISPLAYING "THE STACK"

At the point of the interview when you are ready to begin asking about the details of each incident, a screen will display each label you previously entered separately until the list is completed. This screen serves two purposes: (1) to allow you to describe which incident you will be asking the respondent about next and (2) to allow you to determine (by way of a checkpoint) which of the incident-form versions you will use for this sequence. The checkpoint

consists of three designations: "single incident," "series incident," or "not a valid incident." "Single" incidents are those which R is able to date and describe separately--whether there is one or several of that type. "Series" incidents, as described above, are those which R cannot describe separately--these have a special incident form which only addressed the most recent occurrence. The third option, "not a valid incident," allows you to skip out of the incident form questions. This option is needed because there is no way to delete a label from the list (stack) once it is entered. You may find that you need to escape if the incident is discovered to be a duplicate or out of the reference period.

The first six questions of the incident form ask about when and where the incident happened. Depending on the answers to Q5, the computer will branch you to one of the two question sequences. The first branch, following a response that the incident happened at R's house or at a place he or she was staying, asks whether the offender broke into the dwelling, or tried to (Q6a-6d). If the event happened elsewhere, you will be branched to a screen which asks whether R saw the incident or not. Depending on this answer, you will either ask a set of questions to determine if R was attacked, injured or threatened (Q7a-10b), or you will ask questions about whether R has any information about who committed the offense (Q9a-11o). (Those who were present at the time of the offense are asked these questions later.)

After these sequences, you will ask whether (or to verify that) property was stolen (or someone tried to steal it) during the incident and, if so, what the property was, its value, and whether it was repaired or recovered.

Q18a-18c: Ask whether, apart from stolen property, any property was damaged during the incident, and whether it was repaired or replaced. Again, you will verify the information requested here if you already know it.

Q19a-19e: Are location-specific questions which ask whether, in addition to R's injury or loss, the offender stole something from the establishment where the event occurred.

The next set of questions (Q20a-20c) ask whether the incident was reported to the police and the reasons why or why not.

READ THE FOLLOWING TO ALL RESPONDENTS:

SC656 The most important aim of this study is to learn how people we interview have actually been harmed by wrongful acts of others. I will ask only about things that happened since April 1st.

Many people do not find it easy to remember things we ask about, so, it's necessary to ask a number of specific questions. Some questions may seem to repeat earlier ones. Please think about each new question to see if it reminds you of ANOTHER TIME something happened to you. Thanks again for your help, and if at any time you remember something you didn't think of before, tell me about it right then.
