ACQUISITIONS

Prepared and issued by the:  
Missouri State Highway Patrol  
Criminal Records Division

SHP-180

1986  
SUMMARY

— PLEASE NOTE —

Unfortunately we cannot state that all police agencies and sheriff departments within Missouri accurately record and submit crime statistics to the Missouri Crime Index; however, the statistics listed in this publication are based on the most accurate data currently available.

Attempts at comparison of crime figures between communities should not be made without first considering the individual crime factors present in each community. These crime influencing factors are present, to some degree, in every community and their presence affects, in varying degrees, the crime experience of that area.

Some crime factors which affect the volume and type of crime from place to place are:

1. Population density and size of locality and its surrounding area.
2. Variations in composition of the population, particularly age structure.
3. Stability of population with respect to residents' mobility and transient factors.
4. Economic conditions, including job availability.
5. Cultural conditions, such as educational, recreational, and religious characteristics.
6. Climate.
7. Effective strength of law enforcement agencies.
8. Administrative and investigative emphasis of law enforcement.
9. Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probation).
10. Attitudes of citizenry toward crime.
11. Crime reporting practices of citizenry.
