## WORK RELEASE FOR FELONS A SUMMARY OF FIVE YEAR'S EXPERIENCE

This report is a five year summary of the experience of the program of work release for felons who were committed to Minnesota correctional instimutions. More detailed data by institution from which this summary was developed is available from the Research, Information, and Data Systems Unit of the Minnesota Department of Corrections.

The work release program for felons began in 1967. It permits residents of correctional institutions to apply for work (or educational) release status to the Adult Corrections Commission (adults 21 years of age and older at commitment), and to the Youth Conservation Commission (youthful offenders 18 through 20 years of age at commitment). The program allows men and women who are incarcerated in correctional institutions to attend school or work in the "open community" while living in institutional or residential facilities during non-working hours. The program does not provide treatment modalities other than employment and vocational and personal counselling. Fach participant is assigned to the Work Release Unit for assistance and supervision. The primary objective of the program is to ease the difficult transition from the dependency of institutional life to the acceptance of individual responsibility and independence required in the "free community."

Since the inception of the program, the special Work Release Unit supervises the participants, provides counselling addice on financial matters,
assists in solving problems in family and interpersonal relationships, and
assists in or arranges employment or vocational and academic training programs. The provision of these services is accomplished by the "treatment team"
approach involving all members of the Work Release Unit. Each work releasee is
seen individually at least weekly (usually Wednesday evening) by two members of

the team who call upon him at his work release residence. On the following day the entire Unit "staffs" each participant to provide current planning and services to meet his ongoing needs. In past years this was accomplished by regular participant group meetings, but is now more individualized to achieve better interpersonal relationships with staff members.

Much of the Unit's efforts are involved in job development activity.

This involves an educational program for prospective employers as well as job placement for individual work releasees.

During calendar year 1972 there were 171 persons participating in the Work Release program; 24 were active on January 1, 1973; 147 were terminated from the program during 1972; 132 were admitted during the year, and 39 were active as of January 1, 1972.

The following tables describe the specific characteristics of the 147 participants who were terminated from the program.

TABLE I. SEX AND RACE

Female _ Span. Amer.										
TOTAL	21	100	30	100	27	100	18	100	24	100

Adult male\_whites have had a decreasing representation in the program as have American Indians, although there has been a slight increase in the female\_white participation. The same decrease is noticeable among youthful offender white males as well as among youthful offender white females. Black females in the youthful offender group show an increasing participation trend.

In the fiscal year 1971\_72 the following racial population distribution existed in institutions:

Race	Female	Male
White	72.9%	74.8%
Black	16.7	16.6
Amer. Indian	8,3	8.0
Spanish Amer.	0	
Other	2.1	
	100.0	100.0

The Adult Commission has been granting work release to an increasing proportion of offenders who committed crimes against the person. Work release has been granted to fewer offenders committed for forgery and related offenses. The Youth Commission too has increased the use of work release for offenders committed for homicide or crimes against the person. Damage to property among adult offenders has been decreasing while youthful offender crimes in this same category have been gradually increasing. Sex offenses among adult offenders has also been steadily increasing.

Mean	11,19	13.30	13.32	17.68	21.17

The mean number of months from institution admission to work release placement for adult offenders has been decreasing whereas for youthful offenders an increasing amount of time is being spent in the institution before work release placement. This is related to the longer sentences of youthful work releasees.

For the majority of adult and youthful offenders first job placement after institutional release came through the Department of Corrections. However, this source has been steadily decreasing in the last five years. In the case of youthful offenders there has been an increased number of youths who find their own first job and for adults increasing assistance in first job placement is being provided by friends.

A decreasing number of adult and youthful offender releasees have been terminated for violation of rules with an increasing number of adults and youthful offenders being terminated for placement on parole. The percent of adult work releasees terminated for escape has decreased in the past several years; the percent of youth releasees terminated for escape increased in 1972.

TABLE 16. SUMMARY OF "SUCCESS AND FAILURE" OF WORK RELEASEES TERMINATED FROM PROGRAM BY YEAR

Adjustment Adults	No.	1968 %	No.	1969	No.	1970	No.	1971 %	No.	1972 %	No.	YRS.

Adjustment Youth												
Success	10	62.5	9	40.9	13	54.2	11	64.7	14	66.7	57	57.0
Failure	6	37.5	13	59.1	11	45.8	6	35,3	7	33.3	43	43.0
TOTAL	16	100.0	22	100.0	24	100.0	17	100.0	21	100.0	100	100.0

The success rate for work releasees has increased greatly from 1969, the first full year of operation. The greatest improvement has been among youthful offenders from a low of 41% success in 1969 to 67% in 1972. These figures may reflect a better selection process as well as a change in policy limiting work release to those who have employment or who will be attending school.

TABLE 17. PROGRAM COST ANALYSIS

Calendar Year	Total Cost	Number Participants	Number Days of Care	Participant Cost Per Day of Care		
1968	\$ 43,485	107	7,464	\$ 5.83		
1969	76,026	178	14,891	5,11		
1670	90,578	154	12,419	7,29		
1971	108,367	156	9,926	10.92		
1972	89,835	171	11,744	7,65		
5 YR. TOTAL	. \$408,291		56,444	\$ 7.23		

Costs are composed of salaries paid Work Release employees, travel and subsistence for these employees, support for work releasees either while out of work or to supplement income and for supplies and equipment for unit operations.

The above table details the annual costs, which when viewed in the context of the cost of incarceration, becomes an economically sound program. Daily costs of incarceration during fiscal year 1971\_72 for the State Prison were \$14.14, for the State Reformatory for Men costs were \$19.00 and for the Correctional Institution for Women costs were \$23.82. This does not include capital outlay nor services provided by central office. In addition it must be noted that work releasees in 1972 paid board and room, family support, taxes, payment on back debts, and personal expenses, none of which they could have done while incarcerated.
