ACQUISITIONS

This report was prepared for the U.S. Department of Justice, Bureau of Justice Assistance. Points of view or opinion are those of the author and do not necessarily reflect the opinion of the U.S. Department of Justice, Bureau of Justice Assistance.

The Knoxville Police Department has developed an integrated service delivery model, whereby a systems approach is utilized to bring about desired results and a commitment to crime prevention by the entire community. The use of a systems approach to crime prevention is essentially based on historical and traditional roles of police, the business community, schools, the residential community, service organizations, governmental support services, special interest groups, and other elements comprising the community which has resulted in a fragmentation of crime prevention efforts. The Knoxville Police Department has tried both preventive patrol and traditional patrol as a way to combat crime and increase crime prevention within the community. This has led to fragmentation of crime prevention efforts and frustration from within the department as well as in the community.

Over the last two decades, the citizens and police have realized that the police by themselves are limited in their ability to reduce crime and that citizens must become involved to bring about significant reductions in crime rates. Considerable attention has been focused on community crime prevention programs of various types such as blockwatch, neighborhood watch, and property identification and although these programs constitute a strong basis for reducing crime and creating an atmosphere of involvement between the citizen and police, the potential of a comprehensive approach to crime prevention has not been realized.

Traditional policing methods and myths have prevented the complete integration of police personnel in crime prevention activities. The Knoxville Police Department utilizes a traditional policing model for crime prevention, in that a separate and distinct crime prevention unit operates removed from the main stream of the department and performs functions considered to be generalist in nature. The impact of crime prevention activities and programs have been significant even though the department has continued a form of separatism through traditional policing methodologies.

Compounding the problem of developing a comprehensive crime prevention program has been the fragmentation of the activities and reduced involvement of citizens in developing strategies and clear definitions of what crime prevention ought to be.

In February, 1986, the Knoxville Police Department was one of five sites selected by the Bureau of Justice Assistance, Office of Community Crime Prevention, to receive federal funding for the development of a crime prevention initiative. Basically, the initial proposal stated that although crime prevention programs used in the past (Operation ID, neighborhood watch, etc.) were good, they did not go far enough nor were they

comprehensive enough to make a significant reduction in crime or crime-related activities.

What the Knoxville Police Department proposed to do was to develop a comprehensive crime prevention plan, based on a systems approach and needs assessment, and publicize the plan for community consumption and integration in the total urban planning process. The results of this plan would be disseminated through the development of a crime prevention council/commission who would make decisions of what areas would receive specific crime prevention services.

A basic generic process was established that includes three components: **Planning---Analysis---Service Delivery.** Each element of the community, police, interagencies, community participants, and private organizations would be actively involved in each component or phase based on their respective ability and capacity. See the attached Crime Prevention Program Model Chart.

In Knoxville, an Assessment Team was developed that included members from all city agencies, including schools, fire, codes, traffic engineering, service, police, recreation, as well as representatives from other appropriate agencies, i.e. Metropolitan Planning Commission, Tennessee Department of Corrections, Knox County Juvenile Court, Knoxville Community Development Corp., Knoxville Utilities Board, South Central Bell Telephone Company, and any other organizations that had an interest in crime prevention activities. Once these organizations co-opted into the idea that crime prevention was everyone's problem, we began to look toward developing an operational information base.

The information base is a key ingredient to the development of such an undertaking. Without data on the area, known as the descriptive package, it is hard to make rational and sound decisions on where to concentrate the efforts so that they do the most good. Some examples of the information to be collected in the data base included serious habitual offender information for both adults and juveniles, crime analysis data, fire incident data, neighborhood/community data, business development data, urban development, growth patterns, traffic flow patterns, recreational development, and community-base organizational data. The establishment of this database is critical to the development of a comprehensive assessment of the community and the identification of key data sources to coordinate the implementation of prevention strategies.

Once the data base is developed and the data is analyzed, the service delivery component will serve as the primary point of implementation of the prevention strategies developed from the descriptive package. The police concerns will be directed toward prevention program management and the integration of prevention strategies into the primary service deliver components of the

organization, patrol, investigations, and special services. Each organization or element will be vested with specific role expectations in the delivery of services. During the development of the descriptive and prescriptive packages, interactive participation will be emphasized and the need for continuation of interactive communication to assist the organization in the delivery of effective services. This service delivery approach will permit all participants to focus on problem-oriented issues, rather than traditional methods of providing services in a reactive nature.

The crime prevention program that is being used by the Knoxville Police Department is shown in Table 1, Crime Prevention Program Model. Under the planning area is shown the various agencies that would be involved in the program. This list is very broad and general and allows the community or city to include any agencies that they wish. In the analysis column, the list includes specific people that would be involved in the planning process and that would be involved in the collection and analysis of data. Column three, the service delivery column, shows the persons in the various agencies that would be recipients of the data.

Table 2, the Neighborhood Profile, shows a area map with various types of data listed. This represents the descriptive portion of the project. This list can include any or all of the various types of information listed and can include any other data that might be available in a community or city. The Strategy for Change, shown in Table 3, represents the prescriptive package and would include specific types of programs or assistance that may be needed in the area being profiled.

The rest of the information presented in this outline of the Crime Prevention program in Knoxville will address the program model and how it was organized and the descriptive package. We will begin to explain some of the prescriptive programs that are being developed; however, the prescriptive portion is still being developed and refined.

TABLE 3

## CRIME PREVENTION PROGRAM MODEL

## CRIME PREVENTION PROGRAM MODEL

The Knoxville Police Department, through the Crime Prevention Unit, formed a city-wide Assessment Team or Management Review Team made up of representatives from all city departments as well as other government agencies, schools, corrections, etc. A complete list of participants is shown in Table 4. Not all of the agencies elected to participate by sending representatives to the meetings; however, we always notify them of meetings. On April 7, 1986, the Mayor of Knoxville issued an executive order to all city departments stressing the importance of the crime prevention project and soliciting their support. See Table 5.

The first meeting was held on November 19, 1986 and at this meeting, the systems approach to crime prevention was outlined to the represented agencies. Assessment Team meetings were then scheduled each month. During the initial team meetings, time was spent in learning about each agency - what their goal is, how they operate, types of records kept, and other data. It became obvious early on in the meetings, that many of us did not know very much about the other departments and/or agencies.

Because the Knoxville Police Department was to be the lead agency in this project, we began to develop our data bases for the descriptive package. The Knoxville Police Department maintains its calls for service data based on traffic zones. These traffic zones are small geographical areas that have set boundaries and are more frequently known as sub-census tracts. Some of the traffic zones are quite small (several city blocks in the downtown area) to extremely large in the outlying areas of the city. Even though our beats are frequently modified or changed, the traffic zones remain consistent and allow us to maintain both current calls for service data as well as historical service data.

It was decided to develop the descriptive package based on traffic zones for the City of Knoxville. There are 160 such zones. The Crime Prevention Unit met with the Assessment Team to discuss the gathering of information by traffic zones. What we found out, was that each agency or department maintained various amounts of data, but all the data was in various formats and did not represent defined areas, such as traffic zones. Some of the agencies had their data on computer, others were still using manual methods of data collection. Some agencies collected and maintained data by census tracts, zip codes, districts, street address, alphabet or some other self-designed zones or community configurations. It quickly became evident that no two agencies collected data using the same areas or consistent with any other agency.

The Crime Prevention Unit then decided to contact each agency individually and review their records and if necessary to

collate the data into traffic zone format. Since some of the agencies involved cannot release their data because of confidentiality issues, we worked closely with those agencies to help place the needed data into the correct zones. The Tennessee Department of Corrections and Tennessee Department of Human Services are two such agencies whose records are confidential.

The data, once gathered, was to be placed into a Traffic Zone Profile. See Table 6 for a copy of the profile. The Traffic Zone Profile can contain as much information as you wish to include on an area and you define the area you are wanting to describe. The cover sheet is a checklist of various types of information that can be included in a profile. Some of the information is relatively easy to collect, such as churches, apartments, social agencies, health-related agencies and services. The Assessment Team reviewed the profile data and made suggestions for additions or deletions in the profile.

Although this descriptive package for 160 traffic zones was admirable, it was not possible to develop this much data. After many months, the Knoxville Police Department Crime Prevention Unit decided to modify the information by consolidating the traffic zones into areas called Small Area Studies (SAS). These SAS areas are thirty-three areas developed by the Metropolitan Planning Commission for purposes of defining neighborhoods. All of the data previously gathered in the Traffic Zone Profiles was transferred to the SAS. These 33 areas make the data much easier to gather and allows us to keep the integrity of the neighborhood together. Table 7 contains a copy of the SAS profile. Much of the information contained in the SAS profile is similar to the Traffic Zone Profile.

The data collected in the SAS profiles will never be finished as it will be periodically reviewed and updated and as new information becomes available on each of the small areas, the profile data will be added to the existing information. The data gathered in the profiling will also be made available to each of the Assessment Team agencies for use in their planning of activities for their departments or agencies.

Another source of data that has been added to the profiles is data taken from a community survey implemented during the summer of 1986. The survey was conducted by telephone and through a massive mail-out. A total of 755 surveys were completed. The survey was divided into a total of 81 questions based on the following general areas:

- 1) General demographic data
- 2) Fear and perception of crime
- 3) Victim-Offender relationship
- 4) Attitudes about police services

A copy of the survey is attached in Appendix A for your review. All of the data collected from the survey was utilized except the

third section concerning victim-offender relationships. Because of faulty design of the survey, the data collected was ambiguous and confusing and therefore was not used for data collection.

In an effort to gather more information on local crime in Knoxville, the Crime Prevention Unit will initiate at least two other crime surveys as a part of this program. The first survey will deal with victimization of students in the local school system. We want to get some idea as to who the victims are as well as who the offenders are. This survey will focus on students from grades six through twelve randomly selected and will hopefully provide both the police department and school officials with facts on teenage crime victims. This survey will be tested in the spring of 1988 with implementation in the fall. A draft copy of the survey is included in Appendix B.

A third survey will be directed toward known crime victims in the city. Although the survey has not been designed, we will be calling randomly selected victims of crime (taken from the offense reports) to find out how the crime has effected them as well as the level of police services that they received and their satisfaction with the service provided. This survey will be conducted during the summer months. Once all the survey data is completed, it will be added to the various profiles.

The initial profiling data is now complete for the thirty-three small areas and the information is being presented to the Assessment Team members. The Assessment Team will then begin to develop the prescriptive package which will include the strategies for change for each of the small areas.

The prescriptive package will be based on two different approaches: (1) we will utilize the existing data gathered in the profiles to recommend programs for the areas and (2) we will take the information to the neighborhoods or small areas and hear their input for what programs are wanted and/or needed for their area. To do this, we will be going to each of the areas and holding a meeting with the community. We would notify as many people as possible through the various community groups and organizations in the area and through our previous contacts in the neighborhoods. We want their support and we want them to know that we are listening to them. We will have representatives from as many of the city agencies and other agencies on the Assessment Team so that we can hear not only of crime-related issues in the area but also other quality of life issues that go hand in hand with crime.

Since 1978, the Knoxville Police Department has had a crime prevention program (initiated during the comprehensive crime prevention days of LEAA) that has developed a community information network to help assist neighborhoods, schools, businesses, and others. Many of the programs are still applicable and would provide the basics for the prescriptive packages for each area. Some of the basic programs available include the following:

OPERATION IDENTIFICATION is the most requested program. Electric markers are loaned to individuals to engrave their drivers license number on their property. The purpose of this program is to give individuals a means of identifying their property in the event of theft or loss.

SECURITY SURVEY is a complete survey of the exterior and interior surroundings of individual residences (houses and apartments). Cost effective security recommendations are then given to the resident (i.e. locks, windows, environmental changes, etc.).

NEIGHBORHOOD WATCH is a community involvement crime prevention program. After requesting a program, neighborhoods are presented with a list of suggested guidelines for forming a watch group. Representatives from the Crime Prevention Unit are generally present at each Neighborhood Watch meeting to provide guidance and information. Upon becoming an organized Neighborhood Watch group, signs are displayed in the individual neighborhoods. The purpose of Neighborhood Watch is to decrease the level of criminal activity in a neighborhood by watching out for each other. Operation Identification is most often used in conjunction with Neighborhood Watch programs.

BUSINESS SURVEY is a complete survey of the exterior and interior surroundings of businesses (stores, churches, park areas, etc.). Formally written security recommendations are presented to the business representatives. The purpose of this program is to give the most secure recommendations to fit the means of each individual business and enhance the importance of security habits for safety as well as liability purposes.

Other programs designed for businesses include Check Cashing and Bad Check Prevention, Currency Protection, Robbery Prevention, Hotel and Motel Safety Programs, Employee Pilferage Prevention, Burglary Prevention, Safety for Retailers, Robbery Reaction and Shoplifting Prevention. The most requested business program is the Shoplifting Prevention.

Other highly wanted programs that have been offered by the Crime Prevention Unit include Rape Prevention and Personal Protection Programs as well as programs for the Senior Citizen including personal protection and "con" games and money security programs.

Youth programs are another area in which the Crime Prevention Unit has developed for presentations. These programs include:

STRANGER DANGER PROGRAMS are the most requested youth programs. This program is designed for children ages 3 to 7 years of age. The Stranger Danger program provides tips to children through employment of coloring books, "junior police" badges, and film strips designed for that age group. And no

program for children would be complete without McGruff, who frequently makes appearances to shake "paws" with the children.

YOUTH FINGERPRINT PROGRAM is a program that the Unit started in the school system. A child is fingerprinted only with parental permission and the parents keep the prints. This program is generally supervised by the Crime Prevention Unit, but for large promotions, the equipment can be loaned to individuals or groups if they want to do the program themselves.

BICYCLE RODEOS consist of bicycle skill tests and safety tips for youth. They are presented with materials to read and awards are given for skills. These programs are usually in demand during the summer months.

The Crime Prevention Unit is also involved with two youth programs that are incorporated into our school system - Teens Against Crime and the Adopt-A-School program.

TEENS AGAINST CRIME is a student advocacy group that includes students from each area high school as well as faculty sponsors. This program was begun with help through the National Crime Prevention Council. The Teens Against Crime work on solving crime-related issues in their schools through the help and assistance of groups such as the Crime Prevention Unit and other city agencies. They currently are working on reducing student victimization on school campuses.

ADOPT-A-SCHOOL PROGRAM is one in which a partnership is formed between a school and usually a business or corporation. It is a sharing of time, talent, and expertise in which each person in the adopting organization plays a part. The purpose of the program is to establish a people-to-people relationship between the adopter and the adoptee that will create a spirit of involvement and concern between the school and the business.

The Knoxville Police Department has also developed several other programs that will be utilized in conjunction with the development of the prescriptive packages. They include Directed Patrols, Crime Prevention Through Environmental Design, Serious Habitual Offender Comprehensive Action Program, and an Inner City Drug Program. Each of these four programs will be discussed individually in the next section of this report.

TABLE 5  
EXECUTIVE ORDER

The City of Knoxville has received a Crime Prevention Grant from the United States Department of Justice. This grant is to be used to systematically implement Crime Prevention programs on a citywide basis to improve the quality of life and to reduce criminal opportunity through environmental designs. Implementation of this grant will involve all City agencies and departments.

Crime is a community wide problem that impacts the citizens of Knoxville, whereby Crime Prevention must become the focus of all resources within the City government and the community. An interdisciplinary team will be formed to conduct a citywide assessment of crime and contributing social variables to determine the susceptibility of the various environments. The findings of this interdisciplinary team will be used to develop specific anti-crime strategies incorporating active participation by all City agencies and departments. A Crime Prevention Commission will then be established to coordinate and initiate comprehensive Crime Prevention strategies which are developed from the citywide assessment.

Each City agency and department will be expected to designate a representative to participate on the Crime Prevention assessment team in order to achieve the project goals. The representative designated by each department will be expected to provide meaningful input in the development of the community wide assessment.

A representative from the Crime Prevention Unit of the Knoxville Police Department will be in contact with each department to establish a meeting schedule.

## DIRECTED PATROL

The Knoxville Police Department began to use the concept of directed patrols in 1982. Based on national studies, approximately 30-40% of a police officers time is "undirected" or what we routinely refer to as "patrolling." This means that 30-40% of his time is not spent responding to calls, report writing, handling administrative functions, etc. With directed patrols, we want to be able to direct that officers time toward positive objectives. Directed patrols release the patrol officer from calls for service for short periods of time to conduct special activities.

Directed patrols can be developed through two ways: top down or bottom up. The first is initiated from the top of the organization down (management conceived) and generally results in the supervisor directing the officer to go correct a problem or handle a specific complaint. The other is a bottoms up approach or officer initiated activity. This is when an officer sees a problem on his beat and he proposes a solution for the problem or initiates ways to take corrective action. A good mix of both approached is recommended although the officer initiated activity is preferred. Directed patrols can be apprehension related or prevention oriented. It is the prevention oriented activities that the department has promoted through this grant.

Because our officers have all received a basic crime prevention course, they are aware of prevention techniques that can be employed in an area. They have also been given training in environmental design concepts so they are trained to look for things in the community that could be potential crime problems or contribute to crime.

Attached is a copy of the directed patrol form currently utilized by the Knoxville Police Department. If during the officer's tour of duty, he finds a problem developing in his beat, he can initiate a "DP" and submit it to his supervisor(s). If the officer makes recommendations for solving a problem or situation that involves another agency, the patrol supervisor passes that on to the Crime Prevention Unit, who contacts the appropriate agency for action.

Some examples of directed patrols geared towards prevention include:

1. Attending a block watch or neighborhood watch meeting.
2. Going to a school or meeting and presenting crime prevention tips.

3. Updating business emergency locator cards.
4. Doing a site visit of an area and making appropriate recommendations for crime reduction.
5. Performing residential surveys and/or business security surveys.

The list is only restricted by your imagination; however, some of the benefits that can be expected include improved patrol skills and job satisfaction, increased patrol productivity, increased arrests thus leading to a decrease in crime, and increasing the public or citizen contact with the patrol officers.

## CRIME PREVENTION THROUGH ENVIRONMENTAL DESIGN

If crime prevention is the anticipation, recognition and appraisal of a crime risk and the initiation of some action to remove or reduce it, the Crime Prevention Through Environmental Design (CPTED) premise is that through proper design and effective use of the built environment, CPTED can lead to a reduction in the fear and incidence of crime and an improvement in the quality of life. For years, the premise behind crime prevention was that the police could not do it alone but needed the help of its citizens and the community to provide us with extra eyes. Carrying this idea further, through this project we are attempting to show that we need the help of other agencies and that by all of us working together, we can reduce the fear of crime and also improve the quality of life issues that are often effected by crime.

The CPTED concept has been ideal of this program. The Knoxville Police Department has sent mid-level managers and chief executive officers to the CPTED programs taught by the National Crime Prevention Institute in Louisville, KY. We have then been able to utilize various concepts on environmental design to our advantage in problem areas throughout the city. Participants to CPTED have come from the Metropolitan Planning Commission (zoning, long-range planning), Traffic Engineering (traffic control, street signing), Recreation, Office of Housing and Urban Affairs (inner city housing and commercial development), Knoxville Community Development Corp. (public housing areas), and the Knoxville Police Department (Crime Prevention and Planning).

A good example of how these agencies have taken the CPTED concepts and applied them to Knoxville includes a public housing area located in the north section of town. The Knoxville Police Department was experiencing a large amount of drug trafficking in the area. Police efforts alone were futile as the drug pushers would just move over to another street and continue business or they would run when the police moved in. Through efforts of the patrol officers and the Crime Prevention Unit, several other agencies were brought in on the project to help with solutions.

The service department came in and picked up piles of garbage and debris and replaced burned out and shot out street lamps. Traffic Engineering came in and changed the flow of the traffic design and suggested areas be cul-de-sac and rumble strips be put in. Codes Enforcement personnel came out to see that nothing violated the various codes and the Fire Department came out to make sure that they could still reach all the apartments with the various changes in place. Although the drug problem has not been completely eradicated, we were able to reduce the opportunity for the crime to take place through a joint effort by many agencies.

Since it is not feasible to send everyone to CPTED schools, the Knoxville Police Department proposes to bring the CPTED school to Knoxville in an abbreviated format. In the fall of 1988, we will offer a two day seminar in Crime Prevention Through Environmental Design. The participants will include not only personnel from the various city agencies but will also include architects, builders, contractors, developers, apartment managers, security personnel from commercial and industrial businesses, and any other persons interested in learning how to make their environment safer.

## SERIOUS HABITUAL OFFENDER COMPREHENSIVE ACTION PROGRAM

### SHOCAP

During the assessment process of identifying areas within the City of Knoxville that are trouble spots for the police or potential problem areas for other agencies, the department began to track both adult and juvenile offenders that were on probation or parole. It became very clear that many of these persons all lived in close proximity to each other and we began to see clusters appearing in areas that were already identified by the police and other agencies as problem areas.

Over the past several years, the Knoxville Police Department has sent many of its officers to training sessions sponsored by the Office of Juvenile Justice and Delinquency Prevention in POLICY - Police Operations Leading to Improved Children and Youth Services. Many of the concepts taught in this program appeared to be just right for the City of Knoxville and to merge with the Crime Prevention program.

Also, at this time, the Office of Juvenile Justice and Delinquency Prevention awarded a grant to the Public Administration Service (PAS) of McLean, Va. to replicate the Serious Habitual Offender Comprehensive Action Program (SHOCAP) across the country. The SHOCAP program is an extension of the Serious Habitual Offender/Drug Involved (SHO/DI) program and the Habitual Serious and Violent Juvenile Offender (HSVJO) program which have been implemented in several major cities across the United States.

During the spring of 1987, PAS requested any agency to apply for acceptance into the program. No funds would be directly made available to the agencies but through indirect benefits, the agencies would be able to implement the SHOCAP program with very little cost involved. Knoxville applied for and was accepted as a transfer site in June, 1987.

The SHOCAP model encompasses eight areas:

- Establishing a data base
- Criteria for Habitual Status
- Procedures for Early Identification
- Special Crime Analysis Capabilities
- Lineage and Flow of Information
- Establishing Special Criminal Justice Procedures
- Interagency and Community Support
- Technical Resources

The program encourages agencies in the juvenile justice system to work together on serious and violent juvenile offenders through information sharing to prepare a more comprehensive case history of offenders and to handle these major offenders in a fair and swift manner.

In July, the Knoxville Police Department held a meeting of the Chief Executive Officers from law enforcement, courts, prosecution, schools, corrections, and human services to introduce them to the SHOCAP program and to solicit their endorsement for the program in Knoxville. At that time, the CEO's agreed to the concept of the program. Later that month, an assessment of the juvenile justice system was done by a team from the Public Administration Service to determine the needs of each agency towards implementing the SHOCAP program in this area. To that end, there were portions of the assessment especially tailored for each agency. From that assessment, came detailed training for the local agencies.

In August, PAS came to Knoxville and presented a 40-hour training program on SHOCAP. Representatives were invited from each of the major areas of the juvenile justice system including the Knoxville Police Department, Knox County Sheriff's Office, Knox County Attorney General's Office, Knox County Juvenile Court, Tennessee Department of Corrections, Tennessee Department of Human Services, Knox County Probation Office, Mental Health, and a representative from the Tennessee State Legislature.

During this training session, the goal of the session was to come away with a site level implementation plan designed specifically for Knoxville. This resulted in a six phase plan:

- Phase I: Project Mobilization
- Phase II: Incident and Offender Analysis
- Phase III: Identify Sources of SHO Information
- Phase IV: Organizational Development Strategy
- Phase V: Implement Procedures for Identifying SHO's and Monitoring Their Activities
- Phase VI: Determine the Appropriate Agency Services to be Focused on SHO's

Each phase had three to six tasks to complete, with assignments as to who would perform the task and a target date for completion of the task. Also during the training, it was decided that a Task Force consisting of agency chief executive officers and/or their designee would work on putting the finer points of the program together. This would be an ongoing process until all phases and tasks are completed. The targeted implementation date for the Knoxville SHOCAP program is May 31, 1989.

The SHOCAP Task Force is made up of previously named agencies and has been expanded to include representatives from the other law enforcement agencies and mental health agencies in the area. The main responsibility of the Task Force is to continue to fulfill the site implementation plan by developing and defining the criteria to be used for the program as well as developing policies and procedures for the program.

A preliminary list of youthful offenders was prepared for the Task Force. Each agency was asked to submit a list of their "worst of the worst kids" to ensure a comprehensive and complete list as possible. From this list, representatives began to develop complete histories of the offenders. Out of an initial list of sixty-four (64) offenders, forty-eight (48) were identified as potential SHO's.

In developing the criteria for SHO's, the Task Force studied the criteria already being used in Jacksonville, Fl., Colorado Springs, CO., and Oxnard, CA. and we even used their criteria against our list of offenders. Surprisingly, regardless of the criteria used, the list did not change significantly.

In Knoxville, the Knoxville Police Department and the Knox County Sheriff's Office have both assigned an investigator to work directly with the SHOCAP program. These investigators will be responsible for the development and maintenance of the SHOCAP records for the law enforcement agencies. The Juvenile Court has assigned one counselor to be directly responsible for the SHOCAP offenders. The counselor and investigators will work together to provide intense supervision and control over those in the SHOCAP program.

Attached for your review is copies of the following:

1. Agency Letter of Agreement
2. Site Level Implementation Plan
3. Interagency SHOCAP criteria

## LETTER OF AGREEMENT

**KNOX COUNTY SCHOOL BOARD**  
**KNOX COUNTY ATTORNEY GENERAL'S OFFICE**  
**TENNESSEE DEPARTMENT OF HUMAN SERVICES**  
**KNOX COUNTY JUVENILE COURT**  
**TENNESSEE DEPARTMENT OF CORRECTIONS**  
**KNOXVILLE POLICE DEPARTMENT**

This letter of agreement is made by and between the Knox County School Board, Knox County Attorney General's Office, Tennessee Department of Human Services, Knox County Juvenile Court, Tennessee Department of Corrections, and the Knoxville Police Department to take effect July 7, 1987.

The parties, acting cooperatively, have mutual concerns in the identification of the serious habitual juvenile offender and to further apprehend, prosecute, incarcerate, and interdict the habitual offender cycle. The success of this interagency effort is predicated on the mutual agreement to meet regularly for the purpose of discussing at the policy-making level issues, concerns, and strategies to address the complexities associated with controlling the growth of the serious habitual juvenile offender and improving the strategies and responses of the juvenile justice system. The involved parties agree to commit policy-making persons to represent their agencies in the development and implementations of operational strategies and policies to improve the juvenile justice system through emphasis on the serious habitual juvenile offender. This process will involve and include the following strategies:

- o the identification of services being provided by the agencies involved to the juvenile population;
- o the identification of duplication of services being provided by agencies involved and the reduction of such duplication;
- o the coordination of services provided by the involved agencies;
- o the coordination and networking of information to assist each agency in providing effective and efficient service to juvenile related services;

o enhance the communications between the agencies in the coordination and delivery of services, which are directed toward improving the juvenile justice system and the responses therein;

o assist each agency in making timely and effective responses to the needs of the citizens of Knox County;

We the undersigned agree and commit to identifying services available from our respective agencies; to specifying policy-making personnel to serve as an interagency contact person and interagency representative to meet regularly for the purpose as prescribed above; to sharing of data and information where permissible; and to maintaining an ongoing communications network, allowing for more effective intervention in community problems related to juveniles and the juvenile justice system. We further agree the mutual and coordinated effort will provide the citizens served a more efficient service and a renewed level of confidence in our respective agencies.

# KNOXVILLE, TENNESSEE SHOCAP PROJECT

## SITE LEVEL IMPLEMENTATION PLAN

PHASES AND TASKS	AGENCY RESPONSIBLE	INDIVIDUAL	TARGET DATE	COMPLETION DATE
<hr/>				
Phase VI: Determine the Appropriate Agency Services to be focused on SHO's.				
Task 1: Complete an inventory of the range and type of service provided by each agency at each level.	Task Force		5/31/88	
Task 2: Establish strategies for placement of SHO's.	Task Force		5/31/88	
Task 3: Identify additional program and/or services needed to deal with problems that arise in SHO profiles.	Task Force		5/31/88	

The following is a summary of the Knoxville SHO/DI selection criteria:

- \* A juvenile is selected as a SHO based on criteria consisting of a points system and an evaluation of the more serious and/or violent activities.
- \* Points are assessed to a SHO's arrest record based on frequency and seriousness of crime. The point criteria is as follows:
  - 40 points = Violent Felony person crimes
  - 30 points = Property Felony
  - 30 points = Drug Felony
  - 10 points = Other Offenses
- \* Must have one adjudication and one felony charge.
- \* Minimum of 20 points to qualify as a SHO candidate.
- \* If a candidate has 50 points accumulated and one adjudication, he is automatically elevated to SHO status if there is room.
- \* If 20 points are compiled in 1 (one) criminal episode, he needs 30 points to qualify as a SHO candidate.
- \* If multiple offenses are committed against a single victim, only the highest charge is counted, (e.g., the charges of burglary (30), theft (30) and criminal mischief (10) in a single location/case report would be 30 points).
- \* If there are multiple case reports/victims in one location, they are counted as separate points.
- \* The only exception to the multiple offense rule is a sexual assault. Each charge is counted regardless of the number of victims/reports. This exception was made in order to more effectively identify and deal with sex offenders.
- \* Each child will accumulate 5 points for each charge with 20 points and 30 points consecutively being designated as flagging points to alert juvenile officers of potential candidates for the SHOCAP Program.
- \* A SHO or candidate is placed on inactive status if:
  1. there is no police activity for a 6 month period.
  2. he is committed to the Department of Corrections.
- \* A SHO or candidate may be reactivated if he is under 18 years of age, commits a new offense or there is some indication of new activity.

Amendments or adjustments to the above criteria can/will be made if and only if all SHOCAP Task Force agencies listed above and who's representatives signatures appear below are in agreement with such changes. The SHOCAP Task Force may, however, also designate an alternate or subcommittee to review any suggested changes to be considered.

This agreement duly signed by the agency representative listed below.

## INNER CITY DRUG INITIATIVE

One of the greatest problems facing law enforcement today is drugs. In several of the larger cities, over half of all arrests involve drugs either through the suspect being on drugs when arrested or the arrest is drug-related, i.e. committing burglary to support a drug habit. The City of Knoxville is not significantly different and to fight this problem, the Knoxville Police Department has prepared a grant for funding through the State of Tennessee to encourage neighborhoods in high-risk areas, i.e. public housing areas, to form self-help organizations utilizing the assistance available to them through their local law enforcement agency.

The Knoxville Police Department proposes to address this program through four ways - (1) apprehension and prosecution of drug sellers; (2) education of the residents of the public housing areas; (3) development of a leadership group within the project area; and (4) interagency coordination of services for these areas.

The units that will be directly involved from the Knoxville Police Department will include the Patrol Division, Narcotics Unit, and the Crime Prevention Unit. To discuss the role that each will play in this grant program, we will talk about each of the four areas.

### APPREHENSION AND PROSECUTION

The Knoxville Police Department has had much success with utilizing its street patrol officers in buy/bust techniques through the use of directed patrols. By utilizing directed patrols, the patrol officers can spring these raids on drug pushers at any time of the day or night and on any day of the week. They can be activated quickly and require minimal resources. If further in-depth investigation is needed to bring desired results, the Patrol Units will work with the Narcotics Unit, who is better able to handle more long term investigations. Funds are being requested to assist the Patrol Units in doing buy/busts in the public housing projects and helping them to gather needed evidence for vigorous prosecution in the courts.

### EDUCATION

The Knoxville Police Department will begin working with a core group to develop a leadership group in each of the targeted project areas. This will be through the Crime Prevention Unit of the department and funds are requested for the hiring of a student intern on a part time basis. The intern will be responsible for developing a working relationship with the Knoxville Community Development Corporation (KCDC) and the City of Knoxville's Office of Community Development, which are

responsible for overseeing either directly the public housing projects or working in the immediate areas.

The intern will be employed for the duration of the grant on a part-time basis of 20 hours per week. The intern will be assigned to the Crime Prevention Unit but will only work in the public housing areas. The intern will be responsible for development of a working leadership group made up of residents in these areas and developing education programs and providing assistance to them in the areas of prevention and working through the police department in helping to rid their area of drug pushers and problems.

#### LEADERSHIP GROUP

The intern, by developing a working relationship with KCDC and the Knoxville Community Development office, will develop a leadership group made up of representatives from each of the selected housing projects. After this group becomes more formalized, these representatives may be elected by the public housing area. For a beginning point, the department will work with the housing managers in an effort to determine a strong person who exhibits leadership skills and abilities and has an interest in working for the betterment of the housing area.

Through this group, meetings will be held to jointly discuss concerns (not only crime related but also quality of life issues) and to recommend priorities and solutions for getting the desired results. Also through this group, a newsletter will be developed and distributed to the residents in the area. Meetings will be held in each of the housing units that will be both educational and informative to the residents.

#### INTERAGENCY COOPERATION

The Knoxville Police Department intends to utilize members from other city agencies to provide support to the public housing areas. This will be handled through an executive order from the Mayor. Other agencies from outside the system (state, federal, or private agencies) may be periodically requested to come in to a housing area for meetings or discussions with the residents concerning their problems. These meetings will be educational and informative and could include such areas as prevention, health agencies that can provide help to the residents, etc.

The interagency cooperation will be a spin off of the current crime prevention effort being undertaken in which the Knoxville Police Department is trying to correct many of the crime-related problems through cooperation with other city agencies. We have found through this project, that often the quality of life issues can contribute too or cause crime in an area. An example is an area that is neglected, run down, transient, etc. By cleaning up the area (Service Department), getting the owners to clean up the

property (Building Codes), working on the vandalism problems (schools), changing the direction of traffic flow or patterns (traffic engineering), etc., the neighborhood can begin to take on a new appearance and begin to show some pride through its residents.

We support this approach from the responses of the residents of the public housing areas. They desire to take pride in their homes or apartments but the "marshmallow effect" is just too big for them to swallow by themselves. Through this interagency cooperation, we feel that we can begin to restore this pride.

TRAINING

## TRAINING

One of the major components of the Crime Prevention initiative was to provide training to the Knoxville Police Department as well as to the other governmental agencies that would be associated with this project. This training has taken two forms: in-house training and training through outside schools.

The in-house training included providing basic crime prevention training to all officers in the department. This training was given by the National Crime Prevention Institute, Louisville, KY. and consisted of 40 hours of basic crime prevention core courses, including locks, lighting, alarms, security surveys, and other crime prevention ideas as they pertain to robbery, burglary, larceny, etc. A total of 280 officers or 93% of the department participated in this training.

As a part of the training, the officers were taught to perform security surveys and were sent out to various businesses to do a survey and prepare a written report. During the eight weeks of training, approximately 75 commercial businesses, schools and churches were surveyed. Seven months later, the Crime Prevention Unit followed up on the surveys to determine if the businesses had utilized the recommendations. The following results were reported:

- 80% of the original participants were interviewed.
- 100% of those interviewed, received their copy of the security survey.
- 90% found the recommendations useful.
- 82% implemented some of the recommendations.
- 3% felt some of the recommendations were unrealistic.
- 100% said officers were courteous and professional while conducting the security survey.
- 100% would recommend the security survey to other businesses.
- 25% indicated they would like more information and services from the Crime Prevention Unit.

The purpose of this training for all officers was to give them training so that as crime prevention is decentralized from a specialized unit, the officers will be able to respond to the requests for services for their beat or district. We want to get the officers that work a particular area to respond to basic requests for crime prevention services and to get to know the citizens of that community in which they are working.

The Knoxville Police Department has also expanded from the basic training to some specialized training primarily by sending representatives from the police department and other city agencies to the Crime Prevention Through Environmental Design (CPTED) schools offered by the National Crime Prevention

Institute in Louisville, KY. Representatives to CPTED have included the Metropolitan Planning Commission, Traffic Engineering, Recreation, Housing and Urban Development, Knoxville Community Development Corp., and Knox County Schools. We wanted to provide them with concepts relative to the environment and how they can work with the police department to make changes in an effort to reduce crime in a particular area. An example of this would be traffic pattern modification in a community. By redirecting traffic through, around, or totally out of a neighborhood, you can help to maintain the integrity of the area.

As an extension of the CPTED training, the Knoxville Police Department will be hosting a two day seminar in Knoxville for mid-level and upper-level personnel from the city agencies in CPTED concepts. This course will be an abbreviated seminar based on many of the concepts taught in the 40 hour course. We also will expand the seminar to include representatives from the private sector, i.e. architects, contractors, developers, apartment managers, etc. We want them to begin to view their environment from the perspective of crime and what they can do to reduce the potential for crime.

The other training that has taken place in conjunction with the overall crime prevention concept has been the SHOCAP training provided by Public Administration Service. This training was discussed in detail in the SHOCAP section of this report.

## SUMMARY

## SUMMARY

The Crime Prevention Program for the Knoxville Police Department is basically a very simple concept - expand from the communities and neighborhoods and incorporate all governmental agencies in the prevention process - prevention of not only crime but other quality of life issues that relate to crime or result in criminal activity. Although this is a simplistic statement of the program, the coordination and cooperation is the key to the program. The police agency must take the lead in the program and then must co-opt the other agencies and people, both from government, community agencies, and the private sector into sharing in the responsibility of prevention.

We at the Knoxville Police Department had to begin to look at our way of thinking about crime prevention from within our own organization. For many years, we have considered crime prevention a specialized function within the department and took most of the control and opportunity away from the patrol officers. We now realize that we need to put much of the initial responsibility for providing crime prevention activities back into the communities through better utilization of our officers. After all, who knows an area, neighborhood, or community better than the officer that patrols that beat?

We want to develop the crime prevention unit as a support unit for field operations and allow the unit to provide technical assistance for the officers. This is not to say that we are putting all the responsibility for crime prevention on the patrol officers, but we do want to make them more responsive to the citizens on their beat. The Crime Prevention Unit will serve as a conduit for information, design of programs, and development of strategies. They will further act as the coordinators for activities in the areas and help to develop a stronger working relationship with other government agencies and community organizations.

To strengthen that commitment, the Knoxville Police Department has issued the following policy statement on crime prevention:

"The Department has committed substantial resources to provide basic knowledge of crime prevention techniques and tactics to virtually every sworn officer. This initial training will be supplemented annually through both roll call and in-service training to continuously improve the skill level of all members of the Department. The impact of this new initiative is already apparent from citizen and officer response. To facilitate further development of our crime prevention programs, every member of the Department is encouraged to participate in the delivery of crime prevention services. To ensure compliance with this policy, supervisory personnel are directed to

incorporate crime prevention activities as an element in the annual officer evaluations. This action is taken to strongly encourage every member to participate in crime prevention programs.

Crime Prevention has long been a part of the KPD mission. Substantial research exists supporting the impact of crime prevention strategies and techniques. The KPD is fortunate to have a wide range of crime prevention programs...Without a broad base of support, the impact will be less than desired. Most importantly, these crime prevention programs are designed to improve the quality of police services provided to our citizens, reduce the fear level of the citizens, and reduce the opportunity for crime to occur. With these goals, the members of the KPD are directed to strive toward the achievement of these goals utilizing resources available to all members. The development of strategies for the delivery of crime prevention services should be coordinated through existing resources (Crime Prevention Unit) and through the use of existing tactics such as directed patrols.

Achievement of this policy goal will only result positively if all members of the KPD work together and strive toward the common goal of improving the quality of services being provided to the citizens we serve..."

As stated earlier, the keys to this program are cooperation among agencies and coordination of activities between agencies. The development of the descriptive package can be as simple as everyone sitting around a table with a map and marking their problem areas to more sophisticated methods of data collection and collation. The amounts and methods of data you want to collect are by your own design. Suggestions are offered in the neighborhood profile in Table 2 at the beginning of this report.

The prescriptive package should be a result of the data collected in the descriptive package so that you have a sound and solid basis for designing programs for an area or designating services to an area. The community needs should also be taken into account and not overlooked because without their support, all the programs in the world won't work. This prescriptive package should incorporate the existing programs utilized by the Crime Prevention personnel (if you already have an existing program) to the development of new programs to meet the needs as shown from the data collection effort. Some areas may need multiple programs or projects utilizing various agencies while other areas may only need minimal support to existing programs.

The Knoxville Police Department program is in the prescriptive package stage. We anticipate that the prescriptive package will be completed in the fall with full implementation of programs by 1989. Our biggest obstacle was at the descriptive package stage. We frankly tried to gather too much data in such a way that it was not manageable or could not be put into already existing data bases. After we simplified our methods and

resorted to working with individual agencies on a one-on-one basis we began to see progress. The concept is simple - coordination and cooperation among all agencies with emphasis towards the prevention of crime and criminal related activities.

To further respond to your questions concerning the program, contact the Crime Prevention Unit, Knoxville Police Department, 800 E. Church Avenue, Knoxville, TN. 37915, telephone (615) 521-1299 or 525-1020.

COMMUNITY SURVEY

APPENDIX A

CRIME PREVENTION SURVEY - CPS-01

GENERAL BACKGROUND

1. Sex

- \_\_\_\_\_ (1) Male  
\_\_\_\_\_ (2) Female

2. Race

- \_\_\_\_\_ (1) White  
\_\_\_\_\_ (2) Black  
\_\_\_\_\_ (3) Hispanic  
\_\_\_\_\_ (4) Other (Specify) \_\_\_\_\_

3. Age

- \_\_\_\_\_ (1) Under 25  
\_\_\_\_\_ (2) 25-40  
\_\_\_\_\_ (3) 41-65  
\_\_\_\_\_ (4) Over 65

4. Marital Status

- \_\_\_\_\_ (1) Single  
\_\_\_\_\_ (2) Married  
\_\_\_\_\_ (3) Divorced  
\_\_\_\_\_ (4) Widow(er)

5. Education

- ☐ (1) 8th Grade or Less
- ☐ (2) 9-11.9
- ☐ (3) High School Diploma
- ☐ (4) Some College
- ☐ (5) College Degree
- ☐ (6) College Degree - Plus
- ☐ (7) Graduate Degree

6. Family Income

- ☐ (1) 0-10,000
- ☐ (2) 10,000-20,000
- ☐ (3) 20,000-30,000
- ☐ (4) 30,000-40,000
- ☐ (5) 40,000-50,000
- ☐ (6) Over 50,000

7. Are you employed?

- ☐ (1) Yes (answer question 8)
- ☐ (2) No (go to question 9)

8. If employed, is it:

- ☐ (1) Full Time
- ☐ (2) Part Time

9. How many adults are in your household?

- \_\_\_\_\_ (1) 1
- \_\_\_\_\_ (2) 2
- \_\_\_\_\_ (3) 3
- \_\_\_\_\_ (4) 4
- \_\_\_\_\_ (5) 5
- \_\_\_\_\_ (6) More than 5

10. How many children are in your household?

- \_\_\_\_\_ (1) 0
- \_\_\_\_\_ (2) 1
- \_\_\_\_\_ (3) 2
- \_\_\_\_\_ (4) 3
- \_\_\_\_\_ (5) 4
- \_\_\_\_\_ (6) 5 or more

11. How long have you lived at your current address?

- \_\_\_\_\_ (1) Less than one year
- \_\_\_\_\_ (2) 1-2 years
- \_\_\_\_\_ (3) 3-5 years
- \_\_\_\_\_ (4) Over 5 years

12. Do you live in a

- \_\_\_\_\_ (1) House (if so, answer question 13)
- \_\_\_\_\_ (2) Mobile Home (if so, go to question 14)
- \_\_\_\_\_ (3) Apartment (if so, go to question 14)
- \_\_\_\_\_ (4) Condo (if so, go to question 14)
- \_\_\_\_\_ (5) Other (if so, go to question 14)

13. In regards to your residence, do you

- \_\_\_\_\_ (1) Own
- \_\_\_\_\_ (2) Rent
- \_\_\_\_\_ (3) Other

14. Why did you move to this particular neighborhood (multiple answers)

- \_\_\_\_\_ (1) Nice neighborhood
- \_\_\_\_\_ (2) Good schools
- \_\_\_\_\_ (3) Safe from crime
- \_\_\_\_\_ (4) Only place we could find
- \_\_\_\_\_ (5) Price was right
- \_\_\_\_\_ (6) Location
- \_\_\_\_\_ (7) House characteristics
- \_\_\_\_\_ (8) Always lived in this neighborhood
- \_\_\_\_\_ (9) Other (work, school, etc.) \_\_\_\_\_

15. Prior to your current residence, did you live

- \_\_\_\_\_ (1) In the city
- \_\_\_\_\_ (2) In Knox County
- \_\_\_\_\_ (3) Elsewhere in TN
- \_\_\_\_\_ (4) Outside TN

16. Why did you move from your old neighborhood?

- ☐ (1) Prefer this location
- ☐ (2) House characteristics
- ☐ (3) Wanted better housing
- ☐ (4) Wanted less expensive
- ☐ (5) Had no choice
- ☐ (6) Change in living arrangements
- ☐ (7) Didn't like neighborhood
- ☐ (8) Crime, or fear of crime
- ☐ (9) Other \_\_\_\_\_

17. Is there anything you do not like about the neighborhood where you currently live?

- ☐ (1) Traffic, parking
- ☐ (2) Environment
- ☐ (3) Crime, or fear of crime
- ☐ (4) Inadequate schools, shopping, etc.
- ☐ (5) Bad elements moving in
- ☐ (6) Problems with neighbors
- ☐ (7) Mostly no problems
- ☐ (8) Other (describe) \_\_\_\_\_

#### FEAR AND PERCEPTION

18. How often do you go out in the evening?

- ☐ (1) Once a week or more
- ☐ (2) Less than once a week/more than once a month
- ☐ (3) About once a month
- ☐ (4) 2-3 times per year
- ☐ (5) Less than 2-3 times per year

19. Do you go out more or less than you did a year ago?

\_\_\_\_\_ (1) More

\_\_\_\_\_ (2) Less

\_\_\_\_\_ (3) About the same (skip question 20)

20. If you are going out more or less than you did a year ago, is it because of: (multiple answers)

\_\_\_\_\_ (1) Money

\_\_\_\_\_ (2) Health

\_\_\_\_\_ (3) Transportation

\_\_\_\_\_ (4) Age

\_\_\_\_\_ (5) Family Reasons

\_\_\_\_\_ (6) Crime or fear of crime

\_\_\_\_\_ (7) Other - Specify \_\_\_\_\_

21. When you go out in the evening, is it usually in the City or out of the City?

\_\_\_\_\_ (1) In the city

\_\_\_\_\_ (2) Outside the city

\_\_\_\_\_ (3) About equal

22. Are there some parts of the city where you would not go during the day because of fear of crime?

\_\_\_\_\_ (1) Yes

\_\_\_\_\_ (2) No

23. Can you name any locations? \_\_\_\_\_

24. Are there some parts of the city where you would not go during the night because of fear of crime?

\_\_\_\_\_ (1) Yes

\_\_\_\_\_ (2) No

25. Can you name any locations? \_\_\_\_\_

26. Have you limited or changed your activities in the past five years for fear of crime?

\_\_\_\_\_ (1) Yes

\_\_\_\_\_ (2) No

\_\_\_\_\_ (3) Don't know

27. Within the past year, do you think the crime in Knoxville has:

\_\_\_\_\_ (1) Increased (answer question 28)

\_\_\_\_\_ (2) Decreased

\_\_\_\_\_ (3) Remained the same

\_\_\_\_\_ (4) Don't know

28. Were you thinking about any particular crime when you said that crime in Knoxville had increased?

\_\_\_\_\_ (1) No

\_\_\_\_\_ (2) Yes

If yes, what crime? \_\_\_\_\_

29. Within the past year, do you think crime in your neighborhood has:

\_\_\_\_\_ (1) Increased (answer question 30)

\_\_\_\_\_ (2) Decreased

\_\_\_\_\_ (3) Remained the same

\_\_\_\_\_ (4) Don't know

30. Were you thinking about any specific crime?

\_\_\_\_\_ (4) No

\_\_\_\_\_ (5) Yes

If yes, what type of crime? \_\_\_\_\_

31. Do you think the crimes in your neighborhood are committed by:

\_\_\_\_\_ (1) People in the neighborhood

\_\_\_\_\_ (2) Outsiders

\_\_\_\_\_ (3) Equally by both

\_\_\_\_\_ (4) Don't know

32. What crime most concerns you within your neighborhood?

\_\_\_\_\_

33. How safe do you feel in your neighborhood at night?

\_\_\_\_\_ (1) Very safe

\_\_\_\_\_ (2) Safe

\_\_\_\_\_ (3) Unsafe

34. Is your neighborhood dangerous enough to make you want to move elsewhere?

\_\_\_\_\_ (1) Yes

\_\_\_\_\_ (2) No

35. How do you think crime in your neighborhood compares with other parts of the City?

\_\_\_\_\_ (1) More dangerous

\_\_\_\_\_ (2) About the same

\_\_\_\_\_ (3) Less dangerous

36. Would you say that in the past five years your chances of being robbed or attacked in your neighborhood have:

- \_\_\_\_\_ (1) Gone up
- \_\_\_\_\_ (2) Gone down
- \_\_\_\_\_ (3) Remained the same
- \_\_\_\_\_ (4) Don't know

37. Which statement do you agree with most?

- \_\_\_\_\_ (1) Crime is less serious than the newspapers and TV report
- \_\_\_\_\_ (2) Crime is more serious than the newspapers and TV report

38. Do you think people in general have limited or changed their activities in the past five years due to a fear of crime.

- \_\_\_\_\_ (1) Yes
- \_\_\_\_\_ (2) No
- \_\_\_\_\_ (3) Don't know

39. Do you think people in your neighborhood have limited or changed their activities in the past five years due to a fear of crime.

- \_\_\_\_\_ (1) Yes
- \_\_\_\_\_ (2) No
- \_\_\_\_\_ (3) Don't know

#### VICTIM OFFENDER RELATIONSHIP

40. During the past year, have you been the victim of a crime?

- \_\_\_\_\_ (1) Yes (if yes, go to question 41)
- \_\_\_\_\_ (2) No (if no, skip to question 68)

41. Did you report the crime to the police department?

\_\_\_\_\_ (1) Yes

\_\_\_\_\_ (2) No (If no, skip to question 68)

42. During the past year, has anyone broken into your residence or another building on your property?

\_\_\_\_\_ (1) No

\_\_\_\_\_ (2) Yes - How many times \_\_\_\_\_

43. In the last year, did you find a door jimmied, a lock forced, or any other signs of an attempted break-in?

\_\_\_\_\_ (1) No

\_\_\_\_\_ (2) Yes - How many times \_\_\_\_\_

44. During the past year, has anything been stolen from outside your home, such as a bicycle, garden hose, or lawn furniture?

\_\_\_\_\_ (1) No

\_\_\_\_\_ (2) Yes - How many times \_\_\_\_\_

45. How many different motor vehicles, (cars, trucks, motorcycles, etc.) are owned by you or any other members of your household during the past year?

\_\_\_\_\_ (1) None

\_\_\_\_\_ (2) One

\_\_\_\_\_ (3) Two

\_\_\_\_\_ (4) Three

\_\_\_\_\_ (5) Four or more

46. During the past year, has anyone stolen or tried to steal or use any of these vehicles without permission?

\_\_\_\_\_ (1) No

\_\_\_\_\_ (2) Yes - How many times \_\_\_\_\_

47. During the past year, has anyone stolen or tried to steal parts attached to any of these vehicles such as batteries, hubcaps, etc.

\_\_\_\_\_ (1) No

\_\_\_\_\_ (2) Yes - How many times \_\_\_\_\_

48. During the past year did anyone take something directly from you by using force, such as by a stick-up, mugging, purse snatching, etc.?

\_\_\_\_\_ (1) No

\_\_\_\_\_ (2) Yes - How many times \_\_\_\_\_

49. Did anyone try to rob you by using force or threatening to harm you within the past year?

\_\_\_\_\_ (1) No

\_\_\_\_\_ (2) Yes - How many times \_\_\_\_\_

50. Did anyone beat you up, attack you, or hit you with something, such as a rock or bottle within the past year?

\_\_\_\_\_ (1) No

\_\_\_\_\_ (2) Yes - How many times \_\_\_\_\_

51. Within the past year, were you knifed, shot at, or attacked with some other weapon by anyone?

\_\_\_\_\_ (1) No

\_\_\_\_\_ (2) Yes - How many times \_\_\_\_\_

If questions 40 through 51 were yes, ask the following questions concerning the offender:

52. Was the crime committed by only one or more than one person?

- \_\_\_\_\_ (1) Only one (answer questions 53 thru 58)
- \_\_\_\_\_ (2) More than one (answer questions 59 thru 67)
- \_\_\_\_\_ (3) Don't know (skip to question 68)

**SINGLE OFFENDER**

53. Was this person male or female?

- \_\_\_\_\_ (1) Male
- \_\_\_\_\_ (2) Female
- \_\_\_\_\_ (3) Don't know

54. How old would you say the person was?

- \_\_\_\_\_ (1) Under 12
- \_\_\_\_\_ (2) 12-14
- \_\_\_\_\_ (3) 15-17
- \_\_\_\_\_ (4) 18-20
- \_\_\_\_\_ (5) 21-29
- \_\_\_\_\_ (6) Over 30
- \_\_\_\_\_ (7) Don't know

55. Was the person someone you knew or a stranger you had never seen before?

- ☐ (1) Known (answer question 56-58)
- ☐ (2) Stranger (skip to question 58)
- ☐ (3) Don't know (skip to question 68)

56. How well did you know the person - by sight only, casual acquaintance, or well known?

- ☐ (1) Sight only
- ☐ (2) Casual acquaintance
- ☐ (3) Well known

57. What was the person's relationship to you?

- ☐ (1) Spouse
- ☐ (2) Ex-spouse
- ☐ (3) Parent
- ☐ (4) Own child
- ☐ (5) Brother/sister
- ☐ (6) Other relative
- ☐ (7) Boyfriend/girlfriend
- ☐ (8) Friend/ex-friend
- ☐ (9) Other non-relative

58. Was he/she white, black or some other race?

- ☐ (1) White
- ☐ (2) Black
- ☐ (3) Other
- ☐ (4) Don't know

MULTIPLE OFFENDER

59. How many persons?

\_\_\_\_\_ (1) Actual number

\_\_\_\_\_ (2) Don't know

60. Were they male or female?

\_\_\_\_\_ (1) All male

\_\_\_\_\_ (2) All female

\_\_\_\_\_ (3) Don't know sex of any offenders

\_\_\_\_\_ (4) Both male and female

61. How old would you say the youngest was?

\_\_\_\_\_ (1) Under 12

\_\_\_\_\_ (2) 12-14

\_\_\_\_\_ (3) 15-17

\_\_\_\_\_ (4) 18-20

\_\_\_\_\_ (5) 21-29

\_\_\_\_\_ (6) 30 or over

\_\_\_\_\_ (7) Don't know

62. How old would you say the oldest was?

\_\_\_\_\_ (1) Under 12

\_\_\_\_\_ (2) 12-14

\_\_\_\_\_ (3) 15-17

\_\_\_\_\_ (4) 18-20

\_\_\_\_\_ (5) 21-29

\_\_\_\_\_ (6) 30 or over

\_\_\_\_\_ (7) Don't know

63. Were any of the persons known to you or were they all strangers you had never seen before?

- \_\_\_\_\_ (1) All known (answer questions 64-67)
- \_\_\_\_\_ (2) Some known (answer questions 64-67)
- \_\_\_\_\_ (3) All strangers (skip to question 66)
- \_\_\_\_\_ (4) Don't know (skip to question 66)

64. How well did you know the person(s) - by sight only, casual acquaintance or well known?

- \_\_\_\_\_ (1) Sight only (skip to question 66)
- \_\_\_\_\_ (2) Casual acquaintance (skip to question 66)
- \_\_\_\_\_ (3) Well known (answer question 65)

65. What was the well known person's relationship to you?

- \_\_\_\_\_ (1) Spouse
- \_\_\_\_\_ (2) Ex-spouse
- \_\_\_\_\_ (3) Parent
- \_\_\_\_\_ (4) Own child
- \_\_\_\_\_ (5) Brother/sister
- \_\_\_\_\_ (6) Other relative
- \_\_\_\_\_ (7) Boyfriend/exboyfriend
- \_\_\_\_\_ (8) Girlfriend/exgirlfriend
- \_\_\_\_\_ (9) Friend/exfriend
- \_\_\_\_\_ (10) Other non-relative

66. Were the offenders white, black, or some other race?

- \_\_\_\_\_ (1) White
- \_\_\_\_\_ (2) Black
- \_\_\_\_\_ (3) Other
- \_\_\_\_\_ (4) Don't know

(if more than one is marked in question 66, ask question 67)

67. What race were most of the offenders?

- \_\_\_\_\_ (1) Mostly white
- \_\_\_\_\_ (2) Mostly black
- \_\_\_\_\_ (3) Mostly some other race
- \_\_\_\_\_ (4) Evenly divided
- \_\_\_\_\_ (5) Don't know

#### POLICE SERVICES

68. Would you say that the Knoxville Police Department is doing a -

- \_\_\_\_\_ (1) Excellent job
- \_\_\_\_\_ (2) Above average job
- \_\_\_\_\_ (3) Average job
- \_\_\_\_\_ (4) Fair job
- \_\_\_\_\_ (5) Poor job

69. In what ways could the Knoxville Police Department improve (multiple answers)?

- ☐ (1) Be more courteous
- ☐ (2) Concentrate on serious crimes
- ☐ (3) Don't discriminate
- ☐ (4) Improve training
- ☐ (5) Hire more officers
- ☐ (6) More community involvement
- ☐ (7) Concern with minor crimes/vandalism
- ☐ (8) More traffic enforcement:
  - (8a) ☐ Speeding      (8c) ☐ Reckless Driving
  - (8b) ☐ DWI              (8d) ☐ Other, specify \_\_\_\_\_

70. Have you called the police during the last year to report something that happened to you which you thought was a crime?

- ☐ (1) Yes
- ☐ (2) No (if no, skip to question 78)

71. The last time you called the Knoxville Police Department, considering the nature of the call, do you feel that the response time was adequate?

- ☐ (1) Yes
- ☐ (2) No
