Residents in Wisconsin
Juvenile Correctional Institutions
on December 31, 1983
With Five-Year Trends for 1979-1983

Ethan Allen School, located in Waukesha County near the community of Wales, and Lincoln Hills School, a co-educational facility located near the town of Irma in Lincoln County, are Wisconsin's two facilities for juvenile offenders placed in Division of Corrections custody under provisions of the Wisconsin Children's code (revised November, 1978). The code states that juveniles may be placed in Division of Correction's custody only if: (1) adjudged delinquent of an act that would be punishable by a sentence of at least six months if committed by an adult and (2) found to be a danger to the public and/or themselves and in need of treatment in a restrictive custodial setting.

A total of 454 juveniles, 413 boys and 41 girls were in residence on December 31, 1983; a decrease of 11.9 percent over December 31, 1982, when 515 juveniles, 470 boys and 45 girls, were in residence. Tables 1 through 11 contain descriptive data about juveniles in residence on December 31, 1983; trend data for the years 1979-1983 can be found in Appendix Tables A and B.

Four hundred and thirteen boys, 276 at Ethan Allen and 137 at Lincoln Hills, were in residence on December 31, 1983. Boys committed from Milwaukee (185), Racine (25), Kenosha (16), Waukesha (16), and Rock (13) counties accounted for slightly more than three-fifths (61.8 percent) of the resident population. Slightly more than three-fourths (76.1 percent) of the residents at Ethan Allen and almost nine-tenths (87.6 percent) of the residents at Lincoln Hills had been received as new admissions to a juvenile correctional institution. Three boys not institutionalized under Wisconsin statutes were in residence at Lincoln Hills School. Boys in residence in December 31, 1983, were reported to have an average age of 16.2 years. Slightly more than one-half (53.3 percent) of the juvenile males in residence were reported as being from White or White-Hispanic family backgrounds. Boys from Black family backgrounds made up about two-fifths (39.5 percent) of the resident population. Ethan Allen, which serves the southern and southeastern area of the state, housed the majority (155 out of 163) of Black youths in residence on December 31, 1983, while Lincoln Hills housed 19 of the 25 boys from Native American backgrounds. Burglary, battery,

and armed robbery were the delinquent acts most commonly reported to have been committed by males in residence on December 31, 1983.

Juvenile institution treatment programs have two basic goals: (1) to determine a child's needs and (2) to provide both the assistance and opportunity to work on meeting these needs. Information about the problems and combinations of problems with which boys in residence on December 31, 1983, were confronted can be found in Table 5. Slightly more than one-tenth (11.1 percent) of the boys in residence were reported as having problems that were not related to assaultive behavior, drug/alcohol usage, or sexual behavior; less than 1 percent with only drug/alcohol related problems. Somewhat more than one-third (34.6 percent) of the boys were reported to have problems with drugs and/or alcohol in combination with other types of problems. Assaultive behavior, either by itself or in combination with other types of problems was reported for over one-half (56.3 percent) of the boys in residence. Disabilities considered either developmental or emotional in nature were reported for almost three-fourths (72.2 percent) of the boys while 13 were considered to have physical as well as developmental or emotional disabilities. Less than one-tenth (9.4 percent) were considered to be without some type of physical, developmental, or emotional disability.

Lincoln Hills School reported 41 girls in residence on December 31, 1983; a slight decrease from the previous year when 45 girls were in residence. The majority (85.3 percent) were new commitments, 4 had been returned from state aftercare supervision, and 2 were awaiting the outcome of state aftercare revocation hearings. Commitments from Milwaukee (12), Dane (4), Racine (3), and Rock (3) counties accounted for more than one-half (53.7 percent) of those in residence. Almost two-thirds (63.4 percent) were reported to be from White non-Hispanic backgrounds while about one-fourth (24.4 percent) came from Black family backgrounds. The average age was reported to be 16.0 years. The most common delinquent acts committed by girls prior to institutionalization were theft, battery, and burglary.

Drugs and/or alcohol, either alone or in combination with other types of problems, were reported to present difficulties for just over one-half (51.2 percent) of the girls in residence on December 31, 1983. A somewhat larger

proportion (56.1 percent) had difficulties relating to assaultive behavior either alone or in combination with drug and/or alcohol, sexual, or other behavior problems. Developmental and/or emotional disabilities were reported as affecting almost two-thirds (65.9 percent) of the residents.
