All manuscripts utilizing data made available through the Consortium should acknowledge that fact as well as identify the original collector of the data. The ICPSR Council urges all users of the ICPSR Data facilities to follow some adaptation of this statement with the parentheses indicating items to be filled in appropriately or deleted by the individual user.

The data (and tabulations) utilized in this (publication) were made available (in part) by the Inter-university Consortium for Political and Social Research. The data for JUVENILE DETENTION AND CORRECTIONAL FACILITY CENSUS, 1986-1987: PUBLIC FACILITIES were originally collected by United States Department of Justice. Office of Juvenile Justice and Delinquency Prevention. Neither the collector of the original data nor the Consortium bear any responsibility for the analyses or interpretations presented here.

In order to provide funding agencies with essential information about the use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, each user of the ICPSR data facilities is expected to send two copies of each completed manuscript or thesis abstract to the Consortium. Please indicate in the cover letter which data were used.

JUVENILE DETENTION AND CORRECTIONAL FACILITY CENSUS, 1986-1987:
PUBLIC FACILITIES (ICPSR 8973)

SUMMARY: The purpose of this data collection is to provide information on the numbers and type of juveniles placed in state and local residential facilities for juvenile offenders and to facilitate the development of programs under the Juvenile Justice and Delinquency Prevention Act of 1974. The collection augments information currently available on the adequacy and needs of the nation's juvenile correctional system. Six types of public facilities are covered: (1) detention centers, (2) shelters, (3) reception or diagnostic centers, (4) training schools, (5) ranches, forestry camps, and farms, and (6) halfway houses and group homes. Data are provided in this collection on the number of juveniles held according to age, sex, race, ethnic origin, reason for custody, facility type, and number of staff and educational programs. CLASS IV

UNIVERSE: All state county, and city operated public juvenile facilities in the United States. These include residential programs and group homes that were (1) in operation on February 2, 1987, (2) housed three or more residents, at least 50 percent of whom were juvenile, and (3) had accused or adjudicated delinquents or status offenders making up at least one percent of the daily population.

I. Purpose

A. Sponsorship

The 1987 Juvenile Facility Census was sponsored by the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention, with the data collection effort done by the Bureau of the Census. The Census updated and expanded the data base from the 1985 Juvenile Facility Census.

B. Justification

The 1987 Census was authorized by the Omnibus Crime Control and Safe Streets Act of 1968, as amended (42 U.S.C. 3732) and conducted under an inter-agency agreement with the Department of Justice and Census Bureau. The findings of this census will be compared to earlier efforts so changes and trends can be measured.

C. Uses/Users of the Data

Collected data will be used by Department of Justice officials to develop programs under the Juvenile Justice and Delinquency Prevention Act of 1974, as amended, and otherwise improve assistance provided to those concerned with juvenile problems. Without this collection effort, information on a national level on the adequacy and needs of the juvenile correctional system would not be available. Some users of these data include the following:

- . National Institute of Corrections
- . School of Social Work, University of Minnesota
- . National Council on Crime and Delinquency, San Francisco, CA
- . National Center for Juvenile Justice, Pittsburgh, PA
- . University of Chicago School of Social Work
- . National Criminal Justice Reference Service
- . Office of Special Litigation, Department of Justice
- . Criminal Justice Archive and Information Network, University of Michigan, Ann Arbor, MI

A public use tape which includes all the information obtained from public facilities will also be placed at the Archives Network at the University of Michigan, Ann Arbor. Interested researchers may obtain copies of the data codebooks and access to data for their own research.

II. Methodology

A. Census Coverage

The 1987 census collected information on 1-day counts of juveniles and facilities as of February 2, 1987, and annual data for the calendar, or fiscal year, 1986.

Residential programs and group homes in operation on February 2, 1987, were included in the census if they housed three or more residents; if at least 50% of the residents were juveniles; and if accused or adjudicated delinquents and status offenders were at least 1% of their average daily population. In California, however, all California Youth Authority facilities were included in the census. Juvenile facilities operated as part of adult jails were excluded, as were nonresidential facilities, facilities exclusively for drug or alcohol abusers or nonoffenders, and Federal juvenile correctional facilities.

All State, county and city operated public juvenile facilities were included in the census. A facility was classified as private if it was staffed by non-public employees. The following types of facilities were included in the census:

- . Detention Center
- . Shelter
- . Reception or Diagnostic Center
- . Training School
- . Ranch, Camp, and Farm
- . Halfway House and Group Home

The public facility universe was first updated using the American Correctional Association Directory of Juvenile and Adult Correctional Institutions. Following this, each State's department having responsibility for juvenile corrections was sent a listing of their facilities along with a letter requesting that they verify and/or update the listing and return it to the Census Bureau. In addition, other sources such as annual reports, State criminal justice directories and personal contacts were used to complete the update. For private facilities, facility listings were sent to various local juvenile courts and social service placement agencies asking them to verify and update the list which they use to place juvenile offenders. State juvenile correctional departments were also asked to do the same.

B. Data Collection

1. There were several new sections added to both the public and private questionnaires for the 1987 census. The following is a description of the new sections added:

<u>Section</u>	<u>Description</u>	<u>Public/Private</u>
IV D	Security Arrangements	Both
IV E	Staff Supervision	Both
IV H	Renovation Plans	Public only
IV H/I	Age of Facility	Both
IV L	Physical Settings	Both
V B	Split out Detained Offenders	Both
V C	Status Offenses	Both
XI A	Educational Programs	Both
XI B	Treatment Programs	Both
XI C	Medical Service	Both
XIII A&B	Court Order/Consent Decree	Public only
XIV A&B	Availability of Records	Both

The additional questions extended data collection, data processing and other followup procedures. Due to added length, 40% of the private facilities did not report complete data for their facility. These facilities are coded with 10 8's in data field #584 of the private data file.

2. This effort was a complete census therefore all known juvenile correctional facilities were surveyed. The data were obtained through mailed questionnaires. A followup 2nd mailing and nonresponse telephone calls were made to encourage reporting.
3. Data Collection Activities - Data collection activities were carried out in Washington for the public forms and in Jeffersonville, Indiana for the private ones. Below is the schedule of operations.

<u>Operation</u>	<u>Dates</u>
original mailout	May 18, 1987
second mailout	July 15, 1987
third mailout (private only)	October 16, 1987
edit and code returned forms	July thru December 1987
non-response followup	December 1987 thru March 1988
data collection closeout	March 25, 1988

4. Response Rate - The public sector had a response rate of 99.9 percent yielding 1,107 facilities. Only two facilities refused to participate in the census. The private sector had a response rate of 80 percent yielding 2,239 facilities.
5. Non-response followup - Nonresponse telephone followup began in December 1987 for both the public and private facilities. There were 125 public and 1,200 private facility nonrespondents contacted by telephone.

C. Data Processing Activities

An extensive quality control procedure was applied to data in the file. A manual edit of each questionnaire was conducted by Census staff. During the edit, an item-by-item comparison of the 1985 data with the 1987 data was made for each facility. After another professional review, they were sent to Jeffersonville, Indiana for data keying. After data was transmitted back to Washington, an extensive computer edit was applied to the entire file to check for internal consistencies and punching errors. Error listings were reviewed and resolved and a final computer edit was run against the file to catch any undetected errors. A tally program was then used to create summary tables which were closely analyzed making comparisons to the 1985 data.

D. Data Limitations

1. Public facilities - Data limitations were fewer for the public facilities than the private due mainly to the good rapport shared with the public sector administrators. However, there are a few.

First, there were 63 formerly private facilities in the state of New York that transferred auspices to the public sector. This was brought about by a change in making all the contract personnel running the homes, State employees. This will result in a large increase in the number of facilities in the State of New York. There were five Michigan State facilities that chose to report data on 1 form since all 5 facilities were on the same campus under one director. Two county facilities also in Michigan did the same.

2. Private facilities - Private facility response proved to be about 50 percent before telephone followup began. Telephone followup brought the figure to 80 percent, however, not all data was collected during this phase of data collection due to the length of the questionnaire and unavailability of data. Data for sections IV H and L; XI A - number of juveniles enrolled; XI B - number of juveniles enrolled (except for drug and alcohol dependency); XI C - medical service; XIII A and XIII B - access to records; was not collected during telephone followup. For these records, there are 10 - 8's keyed in data field #584 of the record, signifying incomplete data for the particular facility. Those facilities that responded have complete data for each facility.

E. Special Coding:

Each facility record has several special numbers or codes in it that were computer generated, based on the data that was obtained from the census. Each facility record has the average age of male and female juveniles, in years and months, calculated for the male and female juveniles in the facility on the reference date. This calculation is located as follows:

<u>Average Age of</u>	<u>Field #</u>
Males - years	634
- months	635
Females - years	636
- months	637

Another calculation done by computer is the facility census classification code. Each facility is also asked to classify itself and this self-classification is located in field #38.

Each facility was coded as either short-term or long-term based on the purpose for which most juveniles were held. Short-term facilities typically hold juveniles awaiting adjudication or other disposition. Long-term facilities generally hold juveniles who have been adjudicated and committed to custody.

The environment of each facility was also categorized as institutional or open, based on security arrangements and the degree of access residents had to community resources. Institutional environments impose greater restraints on residents' movements and limit access to the community. Most detention or diagnostic centers, training schools and ranches were classified as having institutional environments. Open environments allow greater movement of residents within the facility and more access to the community. Facilities with open environments included mainly shelters, halfway houses, group homes, and a few ranches.

One of the following codes was computer generated based on the above characteristics reported by each facility on the census form and placed into field #638:

Facility Characteristic & Code

Short-Term

INSTITUTIONAL - Code = 1
OPEN - Code = 2

Long-Term

INSTITUTIONAL - Code = 3
Open - Code = 4

Another code placed in the facility record is the region code. This code is used to identify the region in which the facility is located and is placed in the ASCII position #21 of the identification section. A region code listing, by state, is located in the appendix.

Whenever data was not available for the number of juveniles enrolled in education and treatment programs (sections XI A&B) and for capital expenditures (section XII B), ten 9's were keyed into that particular data field (for both public and private files). The following data fields may have ten 9's in them indicating that data for that item was not available:

Data Fields - 490, 491, 497, 498, 504, 505, 511, 512, 518, 519, 525, 526, 532, 533, 534, 535, 537, 538, 542, 543, 547, 548, 550, 551, 553, 554, 556, 557, 559, 560, 562, 563, 565, 566, 568, 569, and 583.

FROM THE DIRECTOR
BUREAU OF THE CENSUS

On behalf of the Department of Justice, the Bureau of the Census is conducting the periodic census of publicly administered juvenile facilities. We are collecting this information solely for research and statistical purposes.

Department of Justice officials will use the data to develop programs under the Juvenile Justice and Delinquency Prevention Act of 1974, as amended, and otherwise improve assistance provided to those concerned with juvenile problems. Since 1974, the Justice Department has also published these findings in a report series, "Children in Custody."

In order to complete data collection as soon as possible and permit early publication of census results, we will appreciate a prompt response, preferably within 3 weeks. If there are any items on the questionnaire for which answers cannot be readily obtained from available records, please provide reasonable estimates and identify them with an asterisk (*). If we can be of help in completing the questionnaire, please call Mr. Arthur Ciampa on (301) 763-7825.

Title 42, United States Code, Section 3732, provides the authority for conducting this census. While you are not legally required to respond, we need your participation to make the results of the census comprehensive, accurate, and timely.

Thank you for your cooperation. Your Census Bureau is grateful to you for your help.

Sincerely,

John G. Keane

JHN G. KEANE

DO NOT COMPLETE THE QUESTIONNAIRE FOR MORE THAN ONE FACILITY.
IF MORE QUESTIONNAIRES ARE NEEDED, CALL COLLECT AT (301) 763-7825.

Section I - EXCLUSIONS

If this facility falls into any of the following categories, you need NOT complete the remainder of the questionnaire. Simply mark (X) the appropriate box and return the questionnaire in the enclosed envelope.

- NOT KEYED**
- 1 ☐ This facility operates only a nonresidential community program — the juveniles receive counseling or educational services from this facility but do not stay here overnight.
- 2 ☐ This is a foster home for fewer than 3 juveniles

Section II - DEFINITIONS

Juvenile — A person subject to the exercise of juvenile court jurisdiction for purposes of adjudication and treatment based on age and offense limitations as defined by State law.

For the purposes of this report, a person who was of juvenile age at the time of admittance is still considered a juvenile even though retained beyond the juvenile age up to the maximum retention authority set by law.

For the purposes of this Census, a person of juvenile age is still considered a juvenile even though tried as an adult in criminal court.

Adult criminal offender — A person subject to the original jurisdiction of the criminal court rather than the juvenile court because at the time of the offense the person was above a statutorily specified age.

For purposes of this report **youthful offenders** should be considered adults. A **youthful offender** is a person adjudicated in criminal court, who may be above the statutory age limit for juveniles but below a specified upper age limit and for whom special correctional commitments and special record-sealing procedures are made available by statute.

Committed or commitment — Refers to placement of juvenile offenders following adjudication and any placement procedure. May be referred to as "placement."

Detained or detention — Refers to juveniles who are pending adjudication or who have been adjudicated but are awaiting disposition or placement. Include those juveniles undergoing diagnosis or classification before disposition or placement.

Section III - ADULTS HELD

A. At any time during the annual period covered by this report, did the facility hold any persons who were admitted to the facility as adult criminal offenders, as defined by the laws of your State?

FROM THE DIRECTOR
BUREAU OF THE CENSUS

On behalf of the Department of Justice, the Bureau of the Census is conducting the periodic census of publicly administered juvenile facilities. We are collecting this information solely for research and statistical purposes.

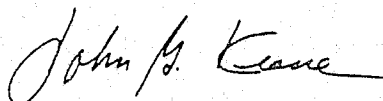

Department of Justice officials will use the data to develop programs under the Juvenile Justice and Delinquency Prevention Act of 1974, as amended, and otherwise improve assistance provided to those concerned with juvenile problems. Since 1974, the Justice Department has also published these findings in a report series, "Children in Custody."

In order to complete data collection as soon as possible and permit early publication of census results, we will appreciate a prompt response, preferably within 3 weeks. If there are any items on the questionnaire for which answers cannot be readily obtained from available records, please provide reasonable estimates and identify them with an asterisk (*). If we can be of help in completing the questionnaire, please call Mr. Arthur Ciampa on (301) 763-7825.

Title 42, United States Code, Section 3732, provides the authority for conducting this census. While you are not legally required to respond, we need your participation to make the results of the census comprehensive, accurate, and timely.

Thank you for your cooperation. Your Census Bureau is grateful to you for your help.

Sincerely,

JOHN G. KEANE

DO NOT COMPLETE THE QUESTIONNAIRE FOR MORE THAN ONE FACILITY.
IF MORE QUESTIONNAIRES ARE NEEDED, CALL COLLECT AT (301) 763-7825.

Section I - EXCLUSIONS

If this facility falls into any of the following categories, you need NOT complete the remainder of the questionnaire. Simply mark (X) the appropriate box and return the questionnaire in the enclosed envelope.

- 1 ☐ This facility operates only a nonresidential community program — the juveniles receive counseling or educational services from this facility but do not stay here overnight.
- 2 ☐ This is a foster home for fewer than 3 juveniles

Section II - DEFINITIONS

Juvenile — A person subject to the exercise of juvenile court jurisdiction for purposes of adjudication and treatment based on age and offense limitations as defined by State law.

For the purposes of this report, a person who was of juvenile age at the time of admittance is still considered a juvenile even though retained beyond the juvenile age up to the maximum retention authority set by law.

For the purposes of this Census, a person of juvenile age is still considered a juvenile even though tried as an adult in criminal court.

Adult criminal offender — A person subject to the original jurisdiction of the criminal court rather than the juvenile court because at the time of the offense the person was above a statutorily specified age.

For purposes of this report **youthful offenders** should be considered adults. A **youthful offender** is a person adjudicated in criminal court, who may be above the statutory age limit for juveniles but below a specified upper age limit and for whom special correctional commitments and special record-sealing procedures are made available by statute.

Committed or commitment — Refers to placement of juvenile offenders following adjudication and any placement procedure. May be referred to as "placement."

Detained or detention — Refers to juveniles who are pending adjudication or who have been adjudicated but are awaiting disposition or placement. Include those juveniles undergoing diagnosis or classification before disposition or placement.

Section III - ADULTS HELD

A. At any time during the annual period covered by this report, did the facility hold any persons who were admitted to the facility as adult criminal offenders, as defined by the laws of your State?

- 1 ☐ Yes — Please complete B
