MARICOPA COUNTY JUVENILE COURT CENTER
FIVE YEAR COMPARISONS
1984 - 1988

This report summarizes information about children who were referred to the Maricopa County Juvenile Court Center during the five year period from 1984 to 1988. The data are based on information obtained from police reports, other referring entities, and from probation officers who interviewed the children and their families.

A child becomes known to the court by a "referral" which alleges that the child has violated the law in some way. It should be noted that many children whose actions or social conditions might warrant action by the Juvenile Court are not referred to the court and are therefore not included in these data. Some children are not referred simply because their illegal actions are not observed or reported, or the child is not apprehended. Furthermore, not all activities of juveniles once reported to the police are subsequently referred to the Juvenile Court. Some police agencies within the county use community counseling programs for children apprehended for minor offenses, followed by release to their parents. Consequently, the data presented in this report cannot be taken as a complete measure of the extent of delinquent behavior in the county.

When it has been decided by a referring agency that a child's action or social condition warrants intervention by the court, he is referred, and when a child is referred, the intake division of the Juvenile Court begins the process of diagnosis and recommendation. There are numerous ways in which a referral may be dealt with by the court. However, the best interest of the child, balanced with what is in the best interest of the community, must always be considered.

Data are collected throughout the year from all referrals received by the Court Center. The chart on the following page provides a view of the many paths a referral may take as it proceeds through the Juvenile Court system from intake to final disposition.

A summary of the Court Center's workload for the last five years is presented in the following table. The disposition counts represent the number of children whose cases were dispositioned during each reported year. One child may represent more than one referral and the disposition in any one year may reflect referrals received in prior years.

The bulk of this report is concerned with referrals and detentions received during each reported year.

The report is divided into four sections: (1) 1988 Referrals - Detail Report, (2) 1984-1988 Referrals, (3) First Time Offenders and (4) Children Detained. Each section contains a number of tables describing the children in terms of some basic characteristics such as age, sex, ethnicity, as well as type of offense charged, etc. In addition, the Detail Report includes first breakdowns of activities during 1988 such as recidivism of first time offenders, hearings held and dispositions of referrals. The second part of the Detail Report includes breakdowns of referrals received during 1988.

In most tables, each cell (or box) contains two figures. The top figure is a whole number and states the number of referrals that belong in that category. The second figure is a percentage, and represents the percent of that category occurring in each year. All percentages for each row, or each column as applicable, should total 100%. The upper left hand corner of each table indicates row percentages with the words "ROW PCT" under the word "COUNT" and column percentages with the words "COL PCT".

This report was prepared by the staff of the Division of Research and Planning of the Maricopa County Juvenile Court Center, 3125 West Durango, Phoenix, Arizona 85009, and any questions concerning this report should be directed to them (602-269-4488).

1988 JUVENILE REFERRALS
DETAIL REPORT

The first four tables of this section are activity reports summarizing the court hearings, dispositions, and previous referrals by dispositions. The last activity report displays the 1988 patterns of recidivism for children referred for the first time in 1987 by the type of the first offense and the type of the second offense, if any. This table displays recidivism only for those children who were at risk for the full 365 days. Therefore, any child who was over the age of 17 at the time of the first referral is not counted.

The rest of this section describes all 1988 referrals. There were an estimated 286,685 juveniles between the ages of 8 and 17 in Maricopa County during 1988. Of those 17,371 children were referred. This represents 6.1% of the total juvenile population at risk.

Most of these tables are categorized by the Severity Type of the Most Severe Charge. The Most Severe Charge table is broken down by Ethnicity.

CHARACTERISTICS OF REFERRALS RECEIVED

1984 - 1988

The following section describes all referrals received by the Maricopa County Juvenile Court Center during the five year period 1984-1988. In viewing the following tables it should be noted that one referral may represent more than one offense and that one child may be the subject of more than one referral during the year. In 1988 the average number of referrals per child was 1.44 referrals generated by 17,371 children.

During 1986, the Maricopa County Juvenile Court Center ceased creating "administrative" referrals to track a court-ordered detention. This procedural change accounts for the noticeable reduction in the number of "Administrative Hold" referrals.

CHARACTERISTICS OF CHILDREN DETAINED

This section describes characteristics of the children who were referred and detained. It is important to note that a child could appear in this section more than once if he or she was referred and detained more than once.

During 1986, the Maricopa County Juvenile Court Center ceased creating "administrative" referrals to track a court-ordered detention. This procedural change accounts for the noticeable reduction in the number of "Administrative Hold" detentions.
