Statutory Authority

Nebraska Revised Statutes 83-171 and 83-901 (Reissue 1981) establish the Department of Correctional Services as an independent agency of State Government for the custody, control, study, correctional treatment, training and rehabilitation of persons committed to the Department so that they may be prepared for lawful and productive community living. Prior to this Legislative change, the Department had been a part of the Department of Public Institutions.

Agency Purpose

The Department's statutory purpose has become it's mission, which is to provide for the custody, study, care, discipline, training, and treatment of persons in correctional institutions, and to supervise persons committed to the Department on parole, as well as develop policies and programs for the correctional treatment and rehabilitation of those persons committed to it.

The Legislative Committee for the Development of the Correctional Services Plan of 1974 Statevide established the primary goal of corrections in Nebraska to be: The successful reintegration of the inmate into the community, through functional and realistic programming, while providing for the protection of society. To assist in fulfilling the mission of the Department, four major areas of operation oversee the various institutions/centers/ programs: the Division of Administrative Services; the Division of Adult Services; Classification & Correctional Programming; and, the Division of Juvenile Services. Through this organizational structure, the Department seeks to refine its' processes and policies and maintain the public's confidence and safety.

The philosophic framework for all actions planned by the Department is contained in statutory requirements (Revised Statutes of Nebraska 83-171, 181, 182, 183, 901, 924, 927, 932 936, 939, and 943) and in the planning principles found in the budget documents the past several years. These principles are:

1) <u>REDUCTION OF ESCAPES:</u> Maintain the level of custody required to ensure that individuals under the control of the Department do not escape or abscond thereby jeopardizing persons in free society.

2) <u>REDUCTION OF CRIMINAL ACTIVITY</u>: Activities which can be construed to be unlawful or counter to rules and regulations of the Department should be controlled. Activities and programs within the Department shall strive to reduce the frequency of such incidences.

3) <u>MAINTENANCE OF EQUITABLE LENGTH OF STAY</u>: Inmates should be treated consistently in classification and programming considerations. The Department shall provide a system of gradual reduction of supervision designed to promote positive behavioral change and allow for custody assignment which places immates in the least restrictive environment while providing appropriate controls.

4) <u>MAINTENANCE OF A LOW RECIDIVISM RATE</u>: The Department provides the vehicle through which an inmate can make positive changes. Department activity shall attempt to further reduce this rate.

5) TO OPERATE THE DEPARTMENT IN AN EFFICIENT AND <u>EFFECTIVE</u> MANNER: The Department has a responsibility to the State's citizens to provide a quality delivery system, utilizing scarce resources as prudently and as beneficially as possible.

Agency Goals

Major Department goals for the 1989/91 biennium, from which all facilities, centers, and major programs formulate objectives are:

89-91.01: FACILITY MAINTENANCE AND CLEANLINESS. Continue the Department's efforts to ensure a high standard of cleanliness, hygiene, and safety at all facilities/centers/programs. Improvements necessary for achievement of this goal will <u>continue</u> to receive high priority. 89-91.02: MAINTENANCE OF THE EIGHT HOUR WORK/PRO-GRAM DAY. Reduction of inmate idleness and promotion of the work ethic to facilitate the smooth, efficient, and safe operation of the institutions/programs/ centers.

89-91.03: CONTINUATION OF THE SYSTEMATIC REINTE-GRATION PROGRAM TO FACILITATE THE PLACEMENT OF INMATES IN APPROPRIATE CUSTODY LEVELS FROM INTAKE THROUGH RELEASE. The process of rehabilitation should begin early in the incarceration period with the development of a personalized plan of action for each inmate. This plan should be flexible and designed to facilitate the timely movement of inmates through the correctional process and into the community with an enhanced chance for success.

89-91.04: <u>ACHIEVEMENT AND MAINTENANCE OF DEPART-MENT-WIDE ACCREDITATION</u>. The primary tool available for the evaluation of good correctional practice and humane concern for staff and inmates is the accreditation process developed by the American Correctional Association. The Department has been actively involved in this process since 1979 and is dedicated to continued success.

89-91.05: TO MAINTAIN & QUALITY PROGRAM OF PER-SONNEL RECRUITMENT AND DEVELOPMENT. Recruitment of highly qualified personnel, development of their skills and abilities, and the availability of career employment with the Department is a continuing For staff to fulfill their job responsipriority. bilities in a competent, legal, and professional manner, appropriate training and development programs and continuing education opportunities must be available. The maintenance of skill levels and the recognition and development of talents and abilities promote personal and professional growth while facilitating the technical, economic and policy changes necessary for the effective management of the Department.

89-91.06: <u>ONGOING REVIEW AND REFINEMENT OF THE</u> CORRECTIONAL TRACKING SYSTEM, MANAGEMENT INFORMATION <u>SYSTEM AND DATA BANK</u>. Designed to provide detailed and quality information to management for decisionmaking purposes. Refinements in certain areas will continue to improve the utility of information.

89-91.07: <u>TO EFFECTIVELY AND EFFICIENTLY ADDRESS</u> <u>THE PROBLEMS CAUSED BY SIGNIFICANT INCREASES IN THE</u> <u>DEPARTMENT'S INMATE POPULATION.</u> The Department bas experienced significant population increases since 1980. Present incarcerated populations have gone beyond designed bousing capacities and have significantly impacted DCS programs and services. With this trend continuing and community sentiment strongly in favor of removing the criminal from society, the Department must seek the means to utilize limited resources prudently while continuing to meet its mandated mission.

89-91.08: <u>TO ESTABLISH AND MAINTAIN A SYSTEMATIC</u> <u>EVALUATION, MONITORING, AND REVIEW PROCESS.</u> Measuring acceptable performance in achieving objectives, insuring effective and efficient operation, organizational structure, policy and procedures is an integral part of providing legislatively mandated services.

89-91.09: <u>TO PROVIDE HUMANE ADMINISTRATION AND</u> DIRECTION OF INSTITUTIONAL CARE THROUGH THE DELIVERY OF SERVICES TO THE INMATE, WHILE PRESERVING INDIVIDUAL RIGHTS AND RESPONSIBILITIES AND THE ULTIMATE PROTEC-<u>TION OF SOCIETY</u>. The provision of adequate, effective and efficient services (medical and health care, library, recreation, social and religious services, food service, academic and vocational programs) are fundamental to the administration of the Department.

89-91.10: TO PROVIDE FOR AND MAINTAIN INMATE RIGHTS UNDER THE U.S. CONSTITUTION AND FEDERAL AND STATE LAW. The Department has the obligation to insure that inmate rights are preserved through a fair process of inmate rules, discipline, and grievance procedures, and compliance with State Statutes, Department rules and regulations, ACA standards, and court ordered consent decrees and settlements.

89-91.11: <u>TO OPERATE WITHIN BUDGETARY GUIDELINES</u> <u>AND LIMITS.</u> The Department must operate in an effective and efficient manner. Department efforts must ensure that its services are provided within budgetary limits.

History

Corrections in Nebraska began operations as a territorial prison in a barn-like structure, with its first commitment arriving on February 22, 1869. Prior to that time, prisoners were confined by the counties or in federal prisons. On March 4, 1870, the State Legislature approved the construction of the Nebraska State Penitentiary, to be located south of the City of Lincoln. The original structure, constructed of magnesia limestone, was capable of housing 375 inmates and opened in 1876.

Juvenile facilities became a reality beginning in 1879, when the Legislature passed a law establishing the Nebraska State Reform School for Juvenile Offenders. The first offender was committed in July 1881. Ten years later, the Girls Industrial School was established by the Legislature.

During the first two decades of the 1920's, correctional services were expanded, raising the adult male and female inmate capacity to 750. Female prisoners were housed in separate quarters at the Nebraska State Penitentiary; however, on May 11, 1920, the newly authorized women's prison accepted it's first inmate. Initially called the Reformatory for Women, the institution was a two-story frame house located on a farm at the outskirts of the community of York, Nebraska.

In the years that followed, Nebraska's correctional needs continued to grow and existing facilities were enlarged and additional units were opened. The Department has been involved in more than a decade of rigorous prison reform and rebuilding. Beginning in 1975 and 1976, the initial Legislative authorizations were received. Today, the Department of Correctional Services provides care, custody, control and supervision for some 3000 individuals in its five adult and two juvenile facilities, two community corrections centers, and the adult and juvenile parole programs.

Accreditation

In 1979, the Legislature mandated the Department of Correctional Services to become accredited by the Commission on Accreditation for Corrections (now a division of the American Correctional Association). The accreditation process involves coming into compliance with a set of separate and distinct standards developed by nationally recognized correctional professionals and agencies for all correctional operation and program areas.

With the trend continuing regarding increased inmate population and community sentiment strongly in favor of removing the criminal from society, the CAC standards provide for the humane administration and direction of institutional and program care which are paramount in preserving individual rights and responsibilities and, in turn, the ultimate protection of society. The accreditation process supports improved institutional management practices through better organization of policies and procedures and ascertainment of staff compliance with them. The process provides for more effective program evaluation while producing greater effectiveness in programs and operations. Accreditation provides an operational and philosophical base by which the Department can

operate. A final benefit of accreditation is that it hopefully provides an enhanced ability to defend legal actions that are lodged by immates.

The Department has been dedicated to achieving success in accreditation for all facilities/centers/programs. Since 1979, with the exception of the newly occupied Hastings Correctional Center, all facilities/centers/ programs have been accredited and have continued working on maintaining compliance levels through the three-year reaccreditation procedure. The current accreditation status for each facility, center, or program may be found in the section devoted to each Department division.

Recidivism

Many individuals in prison have been there before and many will return at some point after their next The effectiveness of the criminal justice release. system is often guaged by the extent to which inmates continue to engage in criminal activity after their release from prison. The rate at which released prisoners return confinement is termed to "recidivism." The Department utilizes a standardized definition:

"Recidivism is measured by criminal acts that result in conviction by a court when committed by inmates released from the Nebraska Prison System during a specified base time period who return to the Nebraska System within three years of their release date."

The recidivist rate is the number of convictions for new crimes divided by the number of releases. This rate represents the proportion of inmates who left the Nebraska Prison System during a specified time period who were reincarcerated because of convictions for committing a new offense,

The maintenance and lowering of the recidivist rate is one of the planning principles of the Department. The numbers compiled for FY87/88 shows a 23.6% recividism rate as reflected for both males and females. It should be noted that this figure also includes parolees who were revoked from parole for felonies. This class of recidivist was not included in some of the previous calculations. Further, the definition, criteria, and method of defining recidivism varies from state to state.

DIVISION of ADMINISTRATIVE SERVICES

DIVISION OF ADMINISTRATIVE SERVICES

Established in accordance with Nebraska Revised Statute section 83-922 (Reissue 1987), the Division of Administrative Services provides assistance and support services to the Department's facilities, centers, and programs. The mission of the Division is accomplished through the following primary goals, which will provide the Department:

1) Timely response to requests for assistance and information;

- An effective management information system;
- 3) Effective and efficient support services;

4) Technical analysis, evaluation, planning, research, and recommendations for functional improvement;

5) Support, coordination and assistance to assure Department-wide accreditation;

6) Support, coordination and assistance with safety and sanitation efforts throughout the Department.

Fiscal Management

Fiscal Management (Central Accounting) is responsible for the coordination of all agency accounting functions. This includes all payments for goods or services, monitoring grants via the grant/project system, compliance with state accounting policies and monitoring expenditures versus the budget. All accounting functions for Lincoln and Omaha based facilities are centralized. Responsibility also includes oversight of the inmate trust fund.

Purchasing and Inventory

This area is responsible for coordinating the centralized purchasing system and for effecting a more efficient communication and paper flow within the Department. The bottom line is the reduction in delays in procurement. Quality control is emphasized in all areas to ensure that supplies are received as ordered. Coordination of volume ordering with other state agencies is carried out where items are compatible.

Engineering and Management Information

This section provides the Department with technical and management assistance for construction projects of all sizes, from the preliminary planning stage to completion and readiness for occupancy. Guidance and assistance is also provided to assist the various facilities/centers/programs with their maintenance programs.

Management information assistance is provided Department-wide with regard to data management, technical expertise and information retrieval. This includes such applications as CTS, CMS, and personal computer hardware and software.

Medical Services

While providing health care services throughout the Department, the primary goal of this program is ensuring the maintenance of good health for all inmates. The Department's health care program provides a wide range of medical services under the direction of a Health Care Administrator.

The professional staff at the five primary facilities includes 55 full-time equivalent positions. Two chief medical officers serve within the system; one at the Nebraska State Penitentiary; and one located at the Lincoln Correctional Center & Evaluation Unit services that facility, the Nebraska Center for Women and the Community Corrections Centers. The Department has two infirmaries and six out-patient clinics, which are licensed by the Department of Health and fully comply with all requirements imposed by that agency. Medical services provided within the facilities include: Initial medical screening, comprehensive health care examinations, health care records, laboratory and radiology services, dental, optometry and pharmacy services, and sick call. Arrangements with local hospitals and other specialized medical professionals are in place should their services be necessary.

<u>Planning and Research</u> <u>and</u> Safety/Sanitation Program

Planning and Research

Planning and Research is responsible for a wide range of activities, including research and information gathering, planning and management, system/program evaluation and monitoring, federal grants administration, the administrative regulation process, and the adult and juvenile accreditation process. The staff provides direction, assistance, and monitors these areas throughout the adult and juvenile facilities/ centers/programs and the Department's central office administration.

Safety/Sanitation Program

Inspections of all adult and juvenile facilities are carried out on a periodic basis by the Department's Safety/Sanitation Officer in order to identify and correct safety bazards and sanitation needs. Staff and inmate/student dining areas, food preparation areas, equipment, and warehouses, refrigeration and water temperatures, fire prevention methods and equipment, mechanical and electrical equipment usage, toxic and caustic chemical control are but some of the areas regularly inspected.

Administrative regulations are developed or revised in order to comply with Commission on Accreditation for Corrections standards or any of the numerous state and federal statutes, codes and regulations. The National Electrical Code, National Fire Prevention Administration Standards, the Life Safety Code, and OSHA regulations, among others, are used in developing and maintaining the Department's policies and procedures in this area.

During this past year, a departmental asbestos identification and control program was initiated. Two central office staff members received training and tertification as Asbestos Building Inspectors and Management Planners. The Department's program involves two parts, complying with: 1) AHERA requirements directed toward asbestos in schools, which involve the Youth Development Centers in Geneva and in Kearney, and 2) OSHA, EPA, and NESHAPS requirements which involve all but two of the Department's other facilities/centers/programs. Both of the Youth Development Centers have been inspected and the proposed management plan is in final draft form.

At least two maintenance personnel from all affected facilities successfully completed the required EPA accredited asbestos worker training and the required Nebraska Department of Health worker certificates have been received. Special equipment for minor asbestos removal and debris clean-up has been purchased.

Food Service Program

The maintenance of acceptable standards of food preparation, which results in a product of high quality being served in the most attractive and efficient manner possible, is the goal of the Food Service Program. Headed by the Food Service Director, the office provides technical assistance to and in-service training for the Department's food service employees at all the adult and juvenile facilities/centers/ programs. In cooperation with the officials of the State Health Department, sanitation classes are conducted for all Food Service personnel.

<u>Cornhusker State Industries</u> <u>and</u> <u>Federal Surplus Property</u>

Cornhusker State Industries

Cornhusker State Industries (CSI) engages in the manufacture and sale of a variety of products and services to Nebraska state agencies, county and local governments, and registered non-profit organizations. Cornhusker State Industries is a diversified organization which employs inmates to work in both traditional industries programs and Private Venture Projects.

Traditional programs include: License plates, wood and metal furniture, janitorial products, printing, finished textile products, and braille transcription. Other services provided by CSI include data entry, telemarketing, trucking, moving, and varehousing. The inmates working at traditional industries programs are paid from a revolving fund, not by the institution, which reduces the cost of their incarceration. The Private Venture Projects are operated under the sponsorship of the Private Sector/Prison Industry Enhancement Certification Program of the U.S. Department of Justice. In this program, the inmates work for a private company, within the confines of the institution, while fulfilling a variety of requirements imposed by the Federal Government. The inmates working in these jobs are paid with outside funds, a portion of which goes to the Nebraska Crime Victim's Compensation Fund, to family support, restitution, room and board, state and federal taxes.

Federal Surplus Property

Established by Legislative Act in 1947, Surplus Property was originally under the jurisdiction of the Department of Public Institutions. Transferred to several different state agencies in the ensuing years, it became a sub-program of the Department of Correctional Services in 1982.

The program is a self-supporting component that is responsible for the equitable distribution of Federal surplus property to eligible state and local governmental sub-divisions and certain non-profit health and education related institutions. It provides employment for inmates in the areas of warehousing and refurbishing property, as well as in the maintenance and improvement of the physical facility.

Three operational areas of the Department report directly to the Director: Legal Services, Personnel Management/Staff Training, and Security Coordination.

Legal Services

The Legal Division is responsible for supervising a number of Department activities: Contracts, real estate, promulgation of inmate rules and regulations, inmate grievances and disciplinary appeals, legislation, representation of Department interests in administrative proceedings, and responses to inquiries from judges, attorneys, and the State Ombudsman. The Legal Counsel also monitors changes in case law which might affect Department policies and procedures.

Each facility/center/program bas a designated employee to assist the Attorney General's Office in the discovery process following the commencement of new legal actions. Legal Services, which provides assistance to the facilities in such matters, also handles its own litigation caseload, and acts as a liaison between the Department and the Attorney General's Office.

During this fiscal year, the number of inmate grievances appealed to the Director's level of review reached 1215 (compared with 582 in FY1986/87). Appeals of the inmate disciplinary actions to the central office Appeals Board numbered 672 and 167 claims involving the Department were filed with the State Claims Board. Thirty bearings were conducted by the State Personnel Board and fourteen with the Nebraska Equal Opportunity Commission which involved the Department as the Respondent. Legal Services also represented the Department in collective bargaining.

Personnel Management/Staff Training

Personnel

Under the direction of the Personnel Administrator, this section provides human resources management for the Department. The Administrator's office handles all labor relations activities, including discipline and grievance administration, negotiations with labor organizations, development/review of Department personnel policies and also provides technical assistance to the facilities/centers/programs.

Classification, staffing monitoring, affirmative action, research, management systems applications and wellness programming is handled by the Special Projects Office. The Employee Office is responsible for employment services in recruiting, screening, selection and hiring, employee orientation and processing. Payroll and personnel records are handled by the NEIS coordinator.

<u>Staff Training</u>

The Department's Staff Training Academy, under the direction of the Training Administrator, provides all new employees with a minimum of 40 hours of orientation/training prior to job assignments.

Depending upon the employee's classification, years of service and contact with inmates, additional hours vary from 16 to 120. Classroom training to meet these requirements is provided at the Academy, located in Lincoln and/or by Training Officers at the out-state facilities.

On-the-job training (OJT) is conducted on site by each supervisor. During this fiscal year, 1273 full and part-time employees received a total of 84,947 hours of training. OJT hours accounted for 27,218 (32%) of that total.

Security Coordination

The development, coordination and training of the Department's Emergency Response Team (REACT) and Hostage Negotiation Team are the responsibility of the Security Coordinator. Other major duties include the development and coordination of regulations, policies and procedures pertaining to security and custody operations, facility/center/program security audits, internal affairs investigations involving staff and/or inmates, and the supervision of the Special Services Unit.

The Special Services Unit issues warrants for the Department's escapees and parole absconders and makes the necessary arrangements for their return when apprehended. Adult and juvenile inter-institution transportation is handled by the Unit and assistance is also provided to local and county governments with prisoner transportation. Special Services also handles the interstate and intrastate Detainer Compact Agreements. During this fiscal year, the Special Services Unit transported 1221 adults and juveniles for the Department and 440 prisoners for other government agencies, travelling 153,459 vehicles miles and 43,674 air miles. The number of detainers handled by the Unit were 544, with 63 notifications made and 133 warrants issued for escapees/absconders.

DIVISION of ADULT SERVICES

*Reports to the Deputy Director

21

DIVISION of ADULT SERVICES

Section 83-939, Nebraska Revised Organized under (Reissue 1976), the Division of Adult Statutes Services exists to administer and supervise the state's adult correctional facilities. All adult female inmates are received at the Nebraska Center for Women, where they are evaluated, classified and placed in programs and/or work assignments at that facility. All adult male inmates are received at the Lincoln Correctional Center's Evaluation Unit, where screening and evaluation are performed and a mental health unit is maintained for special adjustment cases. Upon completion of evaluation, inmates are assigned to an appropriate adult facility/center, and are placed in program and/or work assignments at the respective facilities. Release from any of the adult institutions is via placement in work or educational release programs, parole or expiration of sentence.

Nebraska State Penitentiary

Opened: 1869 Capacity: 488 FY88 Average Population: 651 Average Yearly Cost: \$18,521 Maximum/Medium Custody Males Accredited: 1985 Reaccredited: 1988

Operating on the same site since 1869, the Nebraska State Penitentiary stood as the only adult facility until the early 1920's. At that time, the Nebraska Center for Women opened (1920) and the Men's Reformatory was established (1921).

Renovation and new construction at the Penitentiary was completed during the fall of 1981. The new physical plant includes four modular housing units, a central utility plant, and an administrative complex which houses the administrative offices, visiting area, inmate gymnasium, kitchen and hospital.

The Penitentiary is for the care, custody, and program needs of older, multiple offender male inmates classified as maximum or medium level custody. Those inmates classified as medium custody are assigned to housing in the Medium Security Unit at the facility.

Responsibility for the institution rests with the Warden, who is assisted by a Deputy Warden and two Associate Wardens.

Hastings Correctional Center

Opened: 1987 Capacity: 152 FY88 Average Population: 54 Average Yearly Cost: \$22,335 Minimum Custody Males Accreditation: Scheduled 1990

The Hastings Correctional Center is the Department's newest adult institution, having received it's first inmates in June 1987. It is located in a renovated building on the grounds of the Hastings Regional Center.

The facility houses inmates who are close to the end of their sentence and who are often from that area of Nebraska. The inmate work programs include work details on the Regional Center campus, in the local community and in neighboring towns.

The operation of the institution is the responsibility of the Superintendent and an Assistant Superintendent.

Lincoln Correctional Center and Evaluation Unit

Opened: 1921 Capacity: 468 FY88 Average Population: 676 Average Yearly Cost: \$15,538 All Custody Level Males Accredited: 1984 Reaccredited: 1987 Originally known as the Men's Reformatory, the present institution was provided for by the 1975 Legislature. The Lincoln Correctional Center, a medium-minimum security institution, and the Diagnostic and Evaluation Center, a maximum security institution, opened in August 1979. In July 1986, the two facilities were administratively combined into a single institution called the Lincoln Correctional Center.

The Evaluation Unit of the institution provides reception, diagnostic, evaluation, classification, and assignment services to all adult male felons received from the district courts. It also contains a protective custody unit which serves all the adult male facilities. Continuing service is also provided to the district courts as they request evaluation assistance in felony cases prior to the determining of sentence.

The facility also provides care, custody and programming services to younger, first-time male inmates in a variety of custody levels. The facility consists of five housing units which contain maximum and medium custody inmates and includes a number of special populations. One-half of one housing unit serves as the in-patient mental health unit for adult males in the Department. Another housing unit contains an in-patient program for sex offenders and for chemically dependent inmates. The remaining housing units are for general population inmates who are mostly involved in academic and vocational training programs and institutional maintenance and work programs.

Responsibility for the management of the institution resides with the Warden, who is assisted by a Deputy Warden and two Associate Wardens.

Omaha Correctional Center

Opened: 1984 Capacity: 240 FY88 Average Population: 294 Average Yearly Cost: \$15,834 Minimum Custody Males Accredited: 1986

The Omaha Correctional Center houses inmates who are close to the end of their sentence and who are often from the Omaha/Douglas County metropolitan area. The facility is located on a 37-acre site in east Omaha. Inmates assigned to the facility are shorter and longer term nonviolent-violent males with minimum custody status. A variety of self-improvement opportunities are provided at the facility, including but not limited to: mental health counseling, including substance abuse, alcoholics anonymous, library services/legal aid, self-betterment clubs, volunteer activities, prerelease preparation, survival skills training, social/ leisure skills training, and self-interest classes.

In July 1987, the facility assumed the management responsibility for the Community Corrections Center-Omaha which is located across the street to the north. This program was established in Omaha in 1971 and had operated out of various Omaha locations until the new facility was constructed and occupied in July 1985. The facility is now identified as the OCC-Work Release Unit. Statistical data and cost information regarding the Work Release Unit is maintained under the "Community Corrections Center" identifiers.

The management team at this institution includes a Superintendent and three Assistant Superintendents.

Nebraska Center for Women

Opened: 1920 Capacity: 84 FY88 Average Population: 89 Average Yearly Cost: \$22,281 All Custody Level Females Accredited: 1984 Reaccredited: 1987

The Nebraska Center for Women receives and processes all adult women committed to the Department by the courts. Following initial orientation, evaluation, and classification, the women are assigned to the housing area, programming and work activities appropriate to their needs and requirements.

The academic needs of the women are met through the facility's State accredited school. Vocational skills are fostered by a variety of programs and employability is enhanced by the opportunities provided through the Cornhusker State Industries programs located on the grounds. The institution meets other needs of the inmates via individualized planning and goal setting. One of the more unique and innovative programs available is Mother Offspring Life Development (MOLD), which allows eligible mothers to have their young children for periodic overnight visits at the facility.

Located at the outskirts of York, Nebraska, the institution is under the direction of a Superintendent and two Assistant Superintendents.

Community Corrections Centers Lincoln and Omaha

Program Established: 1967 Capacity: 219 FY88 Average Population: 224 Average Yearly Cost: \$9,435 Community Custody Males & Females Accredited: 1981 Reaccredited: 1984*

Community Corrections, previously known as Post Care or the Work Release Program, was created by State Statute 83-184 (R.R.S. 1943) and established in October 1967. It allowed a select group of adult inmates to be employed in the community or attend an educational program not available within the confines of the institution. Those inmates initially participating in the program were housed in the institution during non-working hours. In 1971, the program established a community residential facility in Lincoln. Additional sites were established in Omaha and for a time, in other Nebraska cities. In 1974, female inmates were included in the program.

The two Community Corrections Centers now in operation are located in Lincoln and in Omaha. Both house male and female inmates and are in operation 24-hours day, seven days a week. The facilities provide work release, educational release, and community detail assignment opportunities to those inmates who have achieved community custody status and are nearing release from sentence by parole and/or discharge. Community leave privileges in the form of passes and furloughs may be earned.

The Community Corrections Center-Lincoln is managed by a Superintendent and an Assistant Superintendent. The Omaha facility, known as the Omaha Correctional Center-Work Release Unit, is under the direction of the OCC Superintendent, with an Assistant Superintendent officed at the unit.

*Due to the July 1987 reorganization of the Community Corrections program, the facility at Lincoln is scheduled for a new initial accreditation audit in 1990. The Omaha facility, now a part of the Omaha Correctional Center, is scheduled for reaccreditation in 1989 along with that institution.

CLASSIFICATION & CORRECTIONAL PROGRAMMING

CLASSIFICATION and CORRECTIONAL PROGRAMMING

Established by the Director, Classification and Correctional Programming supervises the adult immate classification system and various support programs for both adult and juvenile divisions. The section is organized into six functional areas, with a seventh, the Adult Parole Administration, providing programming services to the Department's adult parolees.

Inmate Classification

order to realize the Department's mission of Tn protecting the public and providing programs to return adult inmates and juvenile offenders to society as law-abiding citizens, an accurate identification of the incarcerant's characteristics and needs must be accomplished. Once identified, they must be matched with appropriate physical security, supervision, and Classification is a systematic process programming. of coordinating assessment and assignment procedures with available resources. It is essential for appropriate management of the Department's institutions and facilities and is a basis for management decisions concerning facility planning and program development.

The Department's Adult Inmate Classification System is an adaptation of the Federal Bureau of Prison's Security Designation and Custody Classification System. It utilizes a mechanical scoring procedure in which specific factors are assigned point values. It is intended to identify those salient factors of the inmate's potential and level of functioning in determining his/ber individual security and supervision needs. Specifically, it seeks to:

A. Assign each inmate to the least restrictive environment appropriate to maintain the public's confidence and safety;

B. Facilitate the timely movement of inmates through the correctional system;

C. Provide for the assignment, continuation and removal of inmates from administrative segregation status;

D. Identify inmate needs and recommend program involvement which will assist in meeting those needs; and,

E. Assure the most difficult classification

decisions are made at the highest level of authority within the Department.

This classification process utilizes an objective rating instrument while permitting the use of professional judgment and is not binding upon the classification authority. Though this process allows flexibility, it also provides a basis for consistent classification decisions.

Mental Health Services

Under the supervision of the Mental Health Director, who is a certified clinical psychologist, this program provides mental health services for adult immates. The program includes intensive in-patient programming and comprehensive out-patient programming. It is also responsible for substance abuse counseling and intervention services. Although headquartered at the Lincoln Correctional Center, the program oversees the provision of mental health services by the Department or by contract services to the facilities outside of Lincoln, including those made available to the adult females at the Nebraska Center for Women.

In-patient treatment is provided at the Lincoln Correctional Center for sex offenders, the socially and/or developmentally impaired, inmates in need of substance abuse treatment and other inmates who would have difficulty in general population because of their mental health problems. The majority of in-patient treatment centers around group activities and therapy. Programming for the socially and developmentally impaired is highly structured and includes, but is not limited to, activities such as life planning, awareness and relaxation. Higher functioning inmates with mental bealth problems participate in groups for conflict resolution, anger reduction, personal skills and adjustment, and others. Sex offenders and inmates receiving in-patient substance abuse treatment address their specific behavior needs through open-ended group participation, emphasizing needed changes in inappropriate behavior.

The out-patient treatment provided by Mental Health Services is modeled after the community mental health concept. Services are provided through individual counseling/treatment, group interaction (i.e. anger reduction, relaxation therapy) and crisis intervention. Specific groups are arranged according to similarity of problem areas. Although the majority of out-patient treatment is provided in the group setting, individual treatment is also available to all male inmates in general population and is oriented primarily to resolution of situational problems.

Psychiatric care is provided by contract with several community psychiatrists. Inmates found to be treatable, mentally disordered sex offenders are transferred to the Lincoln Regional Center for intense in-patient treatment. After evaluation and a due process hearing, severe mentally ill inmates are also transferred to that facility for treatment.

Academic/Vocational Services

The academic and vocational education section is headed by the Department's Educational Coordinator, who is responsible for planning, development, and providing assistance in the operation of the academic and vocational education and pre-release programming within the Department. The Department operates its own state-approved schools in its two juvenile facilities and the adult female institution. Lincolnbased facilities receive educational services through contract agreement with the Corrections Division of Southeast Community College. The institutions located in Omaha have contract arrangements with Metropolitan Technical Community College. Hastings inmates have access to educational opportunities through Central Community College. The women at the York facility who desire additional education after high school, can take advantage of correspondence courses.

ABE/GED studies and college transfer programs for adults, and high school, independent living courses

and Chapter I (math and reading) for juveniles are the academic programs available. The vocational education programs for adults range from business/clerical, computer programming, horticulture, culinary arts, and industrial housekeeping, to welding, auto body, auto mechanics, machine tool, heating/air conditioning/ small appliances, and building and industrial maintenance. Juveniles may choose to be involved in building trades, welding/metals, auto mechanics and auto body, word processing and computers.

A total of 79 students graduated or completed GED programming at the schools operated by the two youth development centers during FY1987-88. At the adult facilities/centers/programs, 132 earned their GED certificates, 278 participated in pre-release programming, and 193 received vocational educational certificates while 15 earned Associate of Arts degrees.

Interstate Corrections Compact

The Department has entered into contracts with several states in order to provide inmates the opportunity to request a transfer to another state. The Interstate Corrections Compact Administrator, under the supervision of the Assistant Director for Classification and Correctional Programming, coordinates and documents all actions undertaken via the Compact provisions. Inmates are given consideration for transfer if the transfer will: 1) Enable an inmate to be closer to and maintain family ties; 2) allow an inmate to concurrently serve sentences; 3) provide for greater immediate personal safety of an inmate; 4) provide greater institutional security, custody, and control; and/or, 5) provide specialized programs for treatment and rehabilitation not otherwise available.

During FY1987-88, an average of 30 inmates were housed in other states and 31 inmates from other states were housed by Nebraska. During this time period, nine Nebraska inmates were transferred out-of-state and seven were accepted from other states.

Volunteer Services

Each facility/center/program has a designated staff member who is responsible for recruiting, training, and the overall coordination of volunteer programs. The Central Office Volunteer Services Coordinator has the overall departmental responsibility for the Volunteer Services Program. This person also chairs the Volunteer Services Committee, which is comprised of the facility/center/program coordinators, as well as volunteers, and works to ensure that appropriate policy and procedure is followed.

Volunteerism generates a variety of direct services for inmates through such areas as education, selfbetterment groups, alcohol/drug treatment and mental health services, counseling, employment assistance, transportation and as community release sponsors. Staff receive direct and indirect help through the support and services volunteers provide.

Over 800 community individuals, and many organizations and groups (some 3877 volunteer contacts), have volunteered their time and energy at the adult and juvenile facilities/centers/programs during this past year. Areas attracting the most volunteers were Alcoholics Anonymous, recreation, athletics and leisure time activities, and religious programs.

Inmate Programs

Direct supervision of various innate programs is the responsibility of the individual institution's administration. Classification and Correctional Programming functions in a coordinating role in an effort to ensure consistent programming activities for the individuals in the facilities. Currently, programs include religious services, recreational services, self-betterment clubs, and cultural organizations.

Adult Parole Administration

Established in Nebraska in 1893, the Governor originally held the sole power to parole. By Legislative action effective on August 23, 1969, the Parole Administration was established. It was responsible for handling both juvenile and adult parole matters. In April 1979, the Parole Administration was divided into two separate entities: the Juvenile Parole Administration and the Adult Parole Administration. The Juvenile Parole Administration is a program within the Department's Division of Juvenile Services. The Adult Parole Administration was originally a program within the Division of Community Centered Services. Due to organizational realignment at the end of fiscal year 1987, Adult Parole is now a part of Classification and Correctional Programming.

The Adult Parole Administration is responsible for providing statewide parole services in the community for all inmates paroled from Nebraska's adult correctional institutions. It is also responsible for those inmates from other states who have been transferred under the Interstate Compact.

The mission of the Adult Parole Administration is to protect the public and provide supervision and assistance to enable the paroled inmate to become a productive and law-abiding citizen. In support of the mission, Adult Parole helps the paroled inmate live his/her own life within the limits set by the community. By providing supervision, guidance, and assistance, and by relying on community resources and community cooperation, parole services helps the individual resume a responsible place in the community.

In response to increasing institutional populations, the Extended Leave Program (ELP) was implemented in December 1986. This program allows certain inmates who are on work or educational release or assigned to a community detail program to be allowed to reside at an approved private residence with immediate family. Approval for participation is by the Nebraska Board of Parole and by the Director of the Department of Correctional Services.

Over the past decade, the Adult Parole Administration has experienced a 34% increase in the number of parolees under field supervision. Between the fiscal years of 1986/87 and 1987/88, these figures have translated into an increase of 50.7%. Creative use of scarce resources, realignment of staff, and grant assistance have been utilized thus far in attempting to continue to provide quality services to the increased number of parolees.

Dealing with the increasing number of parolees who are chemical abusers, a grant was received from the Nebraska Crime Commission in January 1988 for the purpose of providing drug education and follow-up drug treatment groups to inmates at the Community Corrections Centers and parolees in the Lincoln and Omaha areas. The entire grant is for the provision of contract services. Early results of the program have been most encouraging.

The Adult Parole Administration is under the direction of an Administrator. District parole offices are maintained in Omaha and in Lincoln, with individual regional offices established where necessary. Adult Parole was accredited by the Commission on Accreditation for Corrections in 1981, reaccredited in 1984 and again in 1987.

DIVISION of JUVENILE SERVICES

DIVISION of JUVENILE SERVICES

The Legislature of 1879 passed a law establishing "The Nebraska State Reform School for Juvenile Offenders," which was to be located in Kearney, Nebraska, Both boys and girls were to be housed at the facility during the early years of operation. The first juvenile committed to the facility was a boy, who arrived on July 12, 1881. On March 4, 1891, the Legislature established the Girls' Industrial School at Geneva, Nebraska. On March 14, 1892, a group of 57 girls were transferred from the school at Kearney to the new location in Geneva. Known by various names throughout the years, such as reform schools, industrial schools or training schools, the facilities are now identified as Youth Development Centers.

Nebraska State Statute 83-922 provided authority for the Department of Correctional Services to fulfill the functions of state government relating to the care, custody, discipline, training and treatment of persons in correctional and detention institutions. This statute also established the separate divisions within the Department, of which the Division of Juvenile Services is one. Juvenile Services, organized under Sections 83-935 through 83-930 (Revised Statutes, Reissue 1976), is headed by an Assistant Director and exists to administer and supervise the State's juvenile correctional facilities and programs. The Division includes the Youth Development Centers (YDC) in Geneva (for girls) and in Kearney (for boys) and the Juvenile Parole Administration.

The mission of the Division of Juvenile Services is to provide services and programs enabling the juvenile offender to develop the skills necessary to return to the community as a responsible, law-abiding individual.

Youth Development Center - Kearney

Opened: 1881 Capacity: 227 FY88 Average Population: 151 Average Yearly Cost: \$23,648 Adjudicated Boys Accredited: 1981, 1986

Opened in July 1881, the Youth Development Center-Kearney, is located on several hundred acres of land on the western edge of the City of Kearney. The

Posicive Peer JUVENILE care enabling 405ter Culture Lincoln Population: 151 Assistant Superintendent awareness Vocational training girls Geneva Juvenile Parole boys education Youth Development Center Interstate Accredited Kearney self-development Compact \$2,78% discipline Nverage Yearly Cost: Opened: 1881 (YDC) Superintendent responsibility Guided Group Interaction youth

purpose of the facility is to provide for the retention, education, discipline, industrial training and reformation of juvenile offenders.

Positive Peer Culture (PPC) is the treatment philosophy around which programming for each juvenile It is a group treatment program is structured. designed around groups of students working together to solve mutual problems, under the leadership of an adult. The three concepts of PPC relate to the psychology of giving, the power of peers as change agents, and the role that students can play in helping others of similar backgrounds. Following initial orientation and evaluation, each new commitment is assigned to an appropriate PPC group, based on the individual's maturity, intelligence, physical stature and level of sophistication. To enhance the degree of success for the younger boys, ages twelve to thirteen, a combination of PPC and Guided Group Interaction is utilized.

The Youth Development Center-Kearney operates a State Department of Education accredited special purposes school, which is under the direction of a principal. Vocational training is offered in the fields of auto mechanics/auto body, welding/metals, and building trades.

A Superintendent and an Assistant Superintendent oversee the management of the facility.

Youth Development Center - Geneva

Opened: 1892 Capacity: 78 FY88 Average Population: 70 Average Yearly Cost: \$27,023 Adjudicated Girls and both Boy and Girl Evaluators/Detainees Accredited: 1981, 1987

The Youth Development Center at Geneva receives girls who have been adjudicated as delinquent by the various courts of the state. They must be under age 18 at the time of the original commitment and must be released on or before their 19th birthday. Nebraska State Statute precludes the commitment of status offenders. In addition to the regular commitments, YDC-G also provides predisposition evaluations for both female and male adolescents for the courts in an effort to determine the causes of particular behaviors and to select appropriate modes of treatment. Further, immediate, short-term detention services are available.

The Geneva program is designed to meet the needs of each student under a plan which includes: 1) An individual profile with psychological testing and evaluation; 2) testing and placement; and, 3) a developmental appraisal to determine attitudes, thought processes and awareness. The primary goal is to bring about a self-development program for each student that provides a satisfactory and productive life with no further delinquency involvement.

The YDC-G educational program, under the supervision of a principal, is accredited by the State Department of Education as a special purposes school, with G.E.D. and independent living programs also available. Vocational training is offered in the areas of business and clerical skills and in word processing/computers.

Management of the Youth Development Center-Geneva is under the direction of a Superintendent and an Assistant Superintendent.

Juvenile Parole Administration

Established: 1969 FY88 Average Population: 237 Average Yearly Cost: \$2,784 Accredited: 1981 Reaccredited: 1984; 1987 In April 1979, the Juvenile Parole Administration was established as a separate program of the Department of Correctional Services. Previously, the juvenile and adult parole responsibilities had been administered by a single Parole Administration. The separation of the two areas has enabled both to be more effective in serving and supervising the individuals in their care.

The Juvenile Parole Administration is responsible for the supervision and control of all juvenile persons paroled from Nebraska's juvenile institutions and those juvenile parolees and probationers who qualify for placement in Nebraska under the jurisdiction of the Interstate Compact on Juveniles. In addition, it is the responsibility of the Juvenile Parole Administration to supervise a limited number of juvenile probationers committed to the Department by order of the Nebraska Juvenile Courts for placement in foster homes.

During the course of the fiscal year, approximately 40% of the youth being released on parole are placed in foster care. Drawn from the ranks of successful foster care homes, a Mini-Group Home Program is also in operation. The families take up to three youths into their homes at any one time. This highly beneficial and successful program averages about ten such homes a year. Juveniles involved in the Interstate Compact program average about 7% of the youth assisted by the Juvenile Parole Administration.

In addition to the Juvenile Parole administrative office, which is located in Lincoln, five satellite offices are maintained across the state, with one field office located at the Youth Development Center-Kearney. The program is under the direction of an Administrator.
