PREFACE

New York State

Violent Felony Processing Sourcebook

1983 - 1987

This report highlights trends in the criminal justice processing of violent felony arrests in New York State from 1983 to 1987. Focus is on several prominent stages in the processing of violent felony offenders including arrest, prosecution, conviction, and sentencing. Summary characteristics of violent felony arrestees in 1987 and prior criminal history of convicted offenders are presented. Information is provided for the State and three geographic regions: New York City (including Bronx, Kings, New York, Queens, and Richmond counties), Suburban New York City (consisting of Nassau, Rockland, Suffolk, and Westchester counties), and Upstate (consisting of all remaining counties).

As the eleventh report issued by the Division of Criminal Justice Services pursuant to Section 837-a of the Executive Law that describes trends in the criminal justice processing of violent felony offenses in New York State, it is the fourth prepared under the auspices of the Office of Justice Systems Analysis and its predecessor organization, the Office of Policy Analysis, Research and Statistical Services.

Readers wishing additional information regarding violent felony offense processing are invited to contact the Division of Criminal Justice Services, Bureau of Statistical Services at (518) 457-8381.

EXECUTIVE SUMMARY

New York State

Violent Felony Processing Sourcebook

1983 - 1987

ARRESTS

- o Between 1983 and 1987, 40 percent of all felony arrests in the State were for violent felonies.
- o There were 67,034 violent felony arrests reported in 1987. This is a 15.1 percent *increase* from the 58,216 arrests reported in 1983, and a 1.9 percent increase from those reported in 1986.
- o *Three-quarters of the State's violent felony arrests were reported from New York City in 1987 while Suburban New York City reported 8 percent and Upstate accounted for 16 percent.*
- o Violent felony arrests *increased, on the average, 3.7 percent each year* during the period. The actual annual percent change fluctuated, ranging from a decrease in 1984 (-1.6%) to a sharp increase in 1986 (+9.3%).
- o Since 1983 there has been a striking *rise* in the number of reported *Assault* arrests (+37.1%) and *Sex Offense* arrests (+23.5%) while there has been an actual *decline* in the number of arrests reported for *Homicide* (-8.1%) and *Weapons* (-2.8%). By 1987 Assault arrests accounted for almost one-third of the violent felony arrests reported. *The large increase in Assault arrests has been in part attributed to the growing tendency to arrest in domestic violence complaints coupled with an increase in arrests for drug-related assaults.*

CHARACTERISTICS OF ARRESTEES

- o The median age for violent felony arrestees in 1987 was 25.5 years. Approximately 70 percent of the State's violent felony arrestees were under thirty years of age. Sex offenders had the highest median age (27.8 years) while Robbery offenders had the lowest (22.6 years).
- o Over one-half (56.1%) of all 1987 violent felony arrestees were black while Hispanics accounted for 21.6 percent and white arrestees comprised 20.7 percent. Approximately 90 percent of the 1987 violent felony arrestees were male.

PROSECUTIONS

- o One-third of the violent felony arrests disposed in 1987 were upper court prosecutions, a decrease from the 40.7 percent prosecuted in the upper courts in 1983. Homicide arrests were the most likely offense category in 1987 to be prosecuted in the upper courts (69.8%) with Assaults the least likely (11.0%). New York City processed the smallest proportion of violent felony offenses in the upper courts (30.9%) compared with Suburban New York City (41%) and Upstate (45.8%).

CONVICTIONS

- o Fifty-three percent (N=30,664) of the violent felony arrests disposed in 1987 resulted in a conviction for some offense, as compared with 60.6 percent (N=32,993) in 1983.
- o Of all regions, *Suburban New York City had the highest overall conviction rate for violent felony arrests disposed in 1987 (72.9%) followed by Upstate (68.2%) and New York City (48.2%).*
- o Burglary arrests were the most likely violent felony offense type in 1987 to result in a conviction to some charge (66% overall conviction rate). Assault was the least likely with a 44.5 percent overall conviction rate.
- o The proportion of the overall convictions that were convictions to a felony (felony conviction rate) was relatively stable throughout the period (53% in 1983 to 51% in 1987).
- o There were 12,447 violent felony convictions in New York State in 1987. Robbery accounted for 41% of these convictions; the largest proportion of any offense category.
- o The violent felony conviction rate decreased over the period from 45 percent of all violent felony arrests disposed in 1983 to 40 percent in 1987.
- o *Over three-quarters of the violent felony offenders convicted of a violent felony in 1987 had a prior arrest record. Approximately one-half had a prior conviction.*

SENTENCING

- o The *incarceration rate* for all convictions resulting from violent felony arrests *increased slightly* over the period from 56.2 percent in 1983 to 59.7 percent in 1987.
- o Of those violent felony arrests disposed as a conviction to some charge in 1987, 29 percent were sentenced to prison, 30 percent were sentenced to jail and 17 percent received probation.
- o The 1987 incarceration rate for violent felony convictions was 81.1 percent (60.6% prison and 20.5% jail). Approximately 18 percent of the convictees were sentenced to probation.
- o Violent felony Homicide convictees were the most likely offenders to receive a prison term (98.3%) followed by those in the combined category Kidnapping, Arson, and Intimidation (88.5%) and Robbery (70.2%).
- o Slightly more than 5.5 percent of the 1987 offenders convicted of a violent felony and sentenced to prison were sentenced to life-maximum terms (418 offenders).
- o The median-minimum and median-maximum sentences for a violent felony conviction remained stable throughout the five-year period and across all regions (30 months and 72 months).

I. VIOLENT FELONY ARREST TRENDS IN NEW YORK STATE

1983 - 1987

ARREST HIGHLIGHTS

Number of Arrests and Percent Change:

- o Violent felony arrests *increased* 15.1 percent in New York State between 1983 (58,216) and 1987 (67,034). Among regions, New York City experienced the greatest increase in total number of violent felony arrests (+17.9%). Suburban New York City actually showed a decrease of -3.1 percent, while the Upstate region showed an increase of 12.6 percent. The fact that New York City accounts for almost three-quarters of the violent felony arrests in the State clearly indicates that any change in New York City arrest and prosecution patterns will greatly affect State figures.

Average Annual Increase:

- o The average annual increase in the number of violent felony arrests in the State was 3.7 percent during the period. However, there was *much fluctuation* in this rate from year to year. In 1985 there was actually a decrease in the number of arrests by -1.6 percent from 1984 figures, while in 1986 there was a sharp increase of 9.3 percent. In 1987 violent felony arrests increased only 1.9 percent over the previous year's total.

Violent Felony Arrests As a Proportion of Total Felony Arrests:

- o During the five-year period there were 792,923 felony arrests in the State, of which 40 percent were arrests for *violent* felonies. Gradually, violent felonies have been accounting for *less* of the total felony arrests. In 1983, 41.2 percent of all felony arrests were for violent felonies, while in 1987 that percent decreased to 37.5 percent. This proportional decline in violent felonies reflects the fact that from 1983 to 1987, *non-violent felony arrests increased 34.4 percent; more than twice the rate of violent felonies*. The increase in non-violent felony arrests was fueled by a *doubling (+118%) of felony drug arrests* during the same period.

Regional Comparison of Total Arrests with Total Population:

- o Although three-quarters of the State's violent felony arrests were reported from New York City in 1987, that region accounted for approximately 41 percent of the State's total population. Suburban New York City reported 8 percent of the arrests while comprising 21 percent of the population. Upstate accounted for 16 percent of the State's violent felony arrests and was estimated to contain 38 percent of the State's population. Similarly, New York City accounted for 67.5 percent of the State's non-violent felony arrests, Suburban New York City 10.8 percent, and the Upstate region 21.7 percent.

Two Largest Offense Categories:

- o *Statewide*, over the period, *Assaults made up the largest proportion of violent felony arrests (31.3%) followed by Robbery (29.7%)*. Regionally, these categories and proportions varied. For example, in 1987 in New York City, these two offense categories each made up 33.8 percent of the total violent felony arrests while in Suburban New York City, Assault made up 33.9 percent with Burglary accounting for 26.8 percent. In the Upstate region, the two largest categories were Burglary comprising 33.9 percent and Assault, 29.1 percent.

Offense Category Having the Greatest Increase:

- o Violent felony *Assault arrests experienced the largest growth in numbers of any category* between 1983 and 1987 (+37%). As a consequence, Assault has been accounting for an increasing proportion of the total number of violent felony arrests. By 1987 *Assaults made up almost one-third of the State's total violent felony arrests*. One factor that may explain some of the increase is the *growing tendency to arrest in domestic violence complaints*. Using New York City Police Department data as an example, the number of arrests for domestic violence increased 66.7 percent between 1985 and 1987 while the number of calls to police concerning family disputes increased less than 5 percent. Another possible factor is the *increase in arrests for drug-related assaults*. Reports of aggravated assault were up 48 percent in New York City during this period with the New York City Police Department estimating that up to one-half of these were drug-related.

*Adding violent felony and non-violent felony figures together will not give the total number of arrest events. The violent felony data file includes some arrest events where a non-violent felony was the most serious charge, and the violent felony was an underlying charge. These rare events are also included in the non-violent felony arrest counts shown here, resulting in an inflated number of total felony arrests when the two categories are combined.

CHARACTERISTICS OF VIOLENT FELONY ARRESTEES

Age at Time of Arrest:

- o In New York State almost one-half of all adult violent felony arrestees were between sixteen and twenty-four years of age in both 1983 and 1987.
- o The median age of violent felony arrestees in New York State has been gradually increasing. In 1983 the State median age was 23.2 years, rising to 24.6 years by 1987. (Non-violent felony arrestees in 1987 were slightly older, with a median age of 25.5 years.) Regionally, the median age of violent felony arrestees was 24.9 years in New York City, 23.5 years in Suburban New York City and 23.8 years Upstate.
- o Statewide, violent felony *Robbery* offenders had the *lowest* median arrest age in 1987 (22.6 years), while *Sex offenders* had the *highest* median arrest age (27.8 years).
- o Among regions, the greatest rise in median age during the period occurred in Suburban New York City (21.6 years in 1983 to 23.5 years in 1987). The other regions experienced smaller increases.
- o *Upstate New York* had the *greatest range in median age* among violent felony categories for all regions. *Upstate Burglary* arrestees had the *lowest* median age in the State (20.7 years) while *Upstate Weapons* arrestees had the *highest* (28.5 years).

Race/Ethnicity of 1987 Arrestees:

- o During 1987 in New York State, 56.1 percent of all violent felony arrestees were black, 21.6 percent were Hispanic and 20.7 percent were white. Among non-violent felony arrestees 41.8 percent were black, 30.8 percent were Hispanic and 26.4 percent were white.
- o The Upstate region had the largest percentage of white offenders. This category accounted for 57.2 percent of the violent felony arrestees and 70.6 percent of non-violent felony arrestees. Hispanics made up 1.8 percent of the total violent felony arrestees Upstate.
- o In the New York City region, blacks made up the highest proportion of violent felony arrestees (60.1%), with Hispanics comprising 27.3 percent of the total. In comparison, of the New York City non-violent felony arrestees, blacks comprised 46.0 percent while Hispanics accounted for 42.2 percent. In Suburban New York City, 51.9 percent of violent felony arrestees were black, 41.5 percent were white, and 6.1 percent were Hispanic.

Sex of Arrestees:

- o The *overwhelming majority* of violent felony arrestees were *male* (89.8% in 1987). However, the number of female arrests rose at a much greater rate (+37.6%) over the five-year period than male arrests which rose +13.3 percent. As a result, the overall proportion of violent felony arrests represented by females statewide increased from 8.7 percent in 1983 to 10.2 percent in 1987.
- o *The increase in female arrests may be linked to the increase in Assault arrests. Assault had the highest ratio of female arrestees* of any single category (15.9%) and experienced the *largest increase in arrests* of any violent felony category.
- o *Female violent felony arrests rose at a much greater rate in New York City (+42.6%)* than in Suburban New York City (+10.0%) and Upstate (+9.2%).

Non-Violent Felony	30,200 26.4%	8,784 10.9%	5,673 50.3%	15,743 70.6%
Other				
Violent Felony	1,071 1.6%	889 1.7%	25 0.5%	151 1.4%
Non-Violent Felony	1,082 0.9%	747 0.9%	66 0.6%	269 1.2%

*Adding violent felony and non-violent felony figures together will not give the total number of arrest events. The violent felony data file includes some arrest events where a non-violent felony was the most serious charge, and the violent felony was an underlying charge. These rare events are also included in the non-violent felony arrest counts shown here, resulting in an inflated number of total felony arrests when the two categories are combined.

II. CRIMINAL JUSTICE PROCESSING

PROSECUTION HIGHLIGHTS

Trend in Upper Court Prosecution Rates: Violent Felony and Non-Violent Felony

- o There has been an overall *decline* in the proportion of violent felony arrests being processed through the upper courts. Approximately one-third of all violent felony arrests disposed in 1987 were upper court prosecutions, down from 40.7 percent in 1983. Much of this decrease can be attributed to a *rise in the proportion of violent felony arrests that are of a lower felony class* (most notably Assaults) which *decreases the likelihood of upper court prosecutions*.
- o In contrast, there has been an *increasing proportion of non-violent felonies* being processed through the upper courts, from 24.6 percent in 1983 to 33.8 percent in 1987. This increase is largely due to *changes in felony drug prosecutions* as the proportion of felony drug arrests prosecuted in the upper courts rose from 35 percent (1983) to 51 percent (1987). *By 1987 both violent and non-violent felonies were being processed at approximately the same rate through the upper courts (about one-third of all violent and non-violent felony arrests)*.

Probability of Prosecution in the Upper Courts:

- o The probability that a violent felony arrest would be processed in the upper courts *varied by the relative seriousness of the offense* as determined by class. In 1987 Homicide arrest cases were the most likely to be processed in the upper courts in New York State (69.8% upper court prosecution rate) while Assaults (which consists primarily of class C and D felonies) were the least likely (11.0%).
- o The upper court prosecution rate for violent felonies *varied by region* throughout the five-year period. Suburban New York City had the highest percentage of violent felony cases processed in the upper courts in both 1983 (50.2%) and 1987 (45.8%). New York City continued to have the lowest with 39.7 percent in 1983 and 30.9 percent in 1987. Upstate New York was the only region to experience little change in the proportion of violent felony arrests being prosecuted in the upper courts; 40.3 percent in 1983 and 41.0 percent in 1987.
- o Assault was the offense category showing the greatest disparity among regions in upper court prosecution rates. By 1987, Assault arrests were almost three times more likely to be prosecuted in the upper courts in the non-New York City areas than in New York City.
- o *For all offense categories but Weapons, upper court prosecution rates were higher in the non-New York City areas.* Upstate Weapons offenses were much less likely to be prosecuted in the upper courts (28.8%) than Suburban New York City (58.9%) and New York City (50.4%).

Note: Percent of cases processed does not equal 100 percent. Decline to prosecute actions or failure to return a bill of indictment account for the difference.

*Less than 10 cases.

CONVICTION HIGHLIGHTS

Overall Conviction Rates:

- o *A smaller proportion of violent felony dispositions resulted in a conviction to some charge (overall conviction rate) in 1987 (52.8%) than in 1983 (60.6%).* In actual numbers there was a total of 30,664 convictions in 1987, down 7.1 percent from the 32,993 reported in 1983.
- o The decrease in the overall conviction rate is in part a function of *fewer cases reaching the upper court* for prosecution. The upper court conviction rate is very high and actually *increased slightly* during the five-year period, from 84.6 percent in 1983 to 86.5 percent in 1987. However, this increase in upper court conviction rate was not great enough to offset the decrease in the upper court prosecution rate which consequently affected the overall conviction rate.
- o In comparison, a higher proportion of non-violent felony dispositions resulted in a conviction to some charge in 1983 (72.7%) and in 1987 (68.8%) than violent felonies. Although the overall conviction rate for both violent felonies and non-violent felonies decreased between 1983 and 1987, the decrease in the overall conviction rate for violent felonies was more than double that of non-violent felonies. Again, the increase in convictions stemming from felony drug arrests has had the effect of moderating the decline in the non-violent felony overall conviction rate.
- o In 1987, *Suburban New York City had the highest overall conviction rate for violent felony arrests (72.9%)* followed by the Upstate (68.2%) and New York City (48.3%) areas. This conviction rate declined steadily over the five-year period only in New York City. In the Suburban New York City counties, the conviction rate rose from 71.9 percent in 1983 to 77.5 percent in 1985, and then declined to 72.9 percent in 1987. The conviction rate remained essentially unchanged Upstate (approximately 68%).
- o The overall conviction rate *varied* in accordance with the specific violent felony arrest charge. In 1987, violent felony *Burglary arrests had the highest overall conviction rate* of any offense (66.0%) followed by Homicide (60.1%). *Assault had the lowest* at 44.5 percent.

Rate of Conviction to a Felony:

- o The proportion of violent felony arrests that led to a felony conviction (felony conviction rate) remained relatively *stable* throughout the period (53% in 1983 and 51% in 1987).
- o While the felony conviction rate was greater when an offender was arrested for a violent felony, the non-violent felony rate exhibited a more dramatic increase over the five-year period (40.8% in 1987 up from 25.7% in 1983). Regionally, the felony conviction rate for violent felonies in 1987 was greater in both New York City and Suburban New York City (52%) than Upstate (48%), although this gap was larger in the earlier years (55% versus 44% respectively, in 1983).

Rate of Conviction to a Violent Felony:

- o Approximately 40 percent of all violent felony arrests disposed as a conviction in 1987 were convictions for violent felony offenses. This was a decline from the 1983 violent felony conviction rate of 45 percent.
- o *Statewide, Robbery offenses comprised the largest single category of violent felony convictions (41% in 1987).* In the non-New York City areas the largest category of violent felony convictions was for Burglary (39.6% in Suburban New York City and 33.9% Upstate).
- o Among regions, the *Upstate area had the lowest rate of conviction to a violent felony.* In 1987, 32.5 percent of the Upstate violent felony arrests that resulted in a conviction were convictions to violent felony offenses as compared with 44.9 percent in Suburban New York City and 41.9 percent in New York City.

Prior Criminal History of Convicted Violent Felony Offenders:

- o *The majority of offenders (approximately three-quarters) convicted of a violent felony in 1987 had a prior arrest record (76.3%) and approximately one-half had a prior conviction (52.8%). New York City convictees were much more likely to have had a prior felony arrest than those in any other region. Suburban New York City violent felony convictees were the least likely to have had a prior conviction to any crime.*

SENTENCING HIGHLIGHTS

Incarceration Rate:

For Violent Felony Arrests Leading to Any Conviction

- o Statewide, the incarceration rate for all convictions resulting from violent felony arrests *increased* between 1983 and 1987. Incarcerative sentences were imposed in 59.7 percent of the convictions in 1987. This was an increase from the 56.2 percent rate in 1983. Regionally, Suburban New York City maintained the highest incarceration rate (63.9% in 1987) followed by Upstate (60.1%) and New York City (59.0%).

For Non-Violent Felony Arrests Leading to Any Conviction

- o In contrast, the incarceration rate for non-violent felonies rose more dramatically, from 43.8 percent of all convictions in 1983 to 54.7 percent in 1987. Again, this is attributed to harsher drug offense sentencing where 70 percent of the convictions from felony drug arrests resulted in an incarcerative sentence in 1987 (up from 50% in 1983).

For Violent Felony Arrests Resulting in a Violent Felony Conviction

- o The incarceration rate varied by conviction charge. Homicide convictions had the highest incarceration rate of any violent felony conviction (99.0%) for all regions, followed by Robbery convictions at 86.7 percent. *The lowest incarceration rate statewide was for violent felony Weapons convictions at 56.6 percent in 1987.*

Incarcerative Sentences:

For Violent Felony Arrests Leading to Any Conviction

- o Throughout the five-year period, sentences of *prison and jail* for convictions from violent felony arrests made up *equal proportions* of the total incarcerative sentences statewide. However, in the non-New York City areas, jail sentences comprised a larger proportion of incarcerations (approximately 60%) than prison sentences.

For Violent Felony Arrests Resulting in a Violent Felony Conviction

- o If the violent felony arrest resulted in a violent felony conviction, the offender had an eight in ten chance of receiving an incarcerative sentence in 1987 which is approximately the same probability as in 1983 (78.3%). A slightly higher percentage of violent felony convictions in the Suburban New York City and Upstate region (84%) resulted in incarcerative sentences than in New York City (80.2%).

Non-Incarcerative Sentences:

- o Of those violent felony arrests disposed in 1987 that led to a conviction to any charge, 40.3 percent received a non-incarcerative sentence with probation accounting for 17.1 percent of all sentences.
- o Statewide, 18.9 percent of 1987 convicted violent felons were given non-incarcerative sentences with probation accounting for 18.2 percent of all sentences imposed. *Probation was utilized more frequently in New York City (19.8%) and Upstate (16.6%) than in the Suburban New York City area (15.7%).*

Median-Minimum/Median-Maximum Prison Terms for Violent Felony Convictions:

(Note: For the purposes of this study all "life" maximum sentences were eliminated in calculating the median-maximum prison terms, and the number is noted where appropriate. Exceptions to this were for Class A violent felony convictions and Homicide convictions where the large number receiving life-maximum sentences caused the median-maximum Class A and Homicide prison terms to be life.)

- o The median-minimum and median-maximum prison terms for violent felony convictions has stayed about the same from 1983 through 1987 (30 months and 72 months). This stability was true for all regions of the State, although the median-minimum was greater Upstate (35.5 months).
- o In contrast, non-violent felony prison sentences in New York State, although stable throughout the period, were shorter; with a median-minimum/median-maximum prison term in 1987 of 23.6 and 47.9 months (two and four years).
- o Homicide had the longest median-minimum/median-maximum prison sentence of any offense category in New York State in 1987 with a median-minimum of 100 months and a median-maximum of Life. (When excluding those maximums set at life the median-maximum sentence was 180 months.) *Weapons convictions had the shortest median-minimum (24 months) and median-maximum (48 months) prison sentences.*
- o By class of offense, the median-minimum/median-maximum prison sentences for violent felony convictions in New York State for 1987 were as follows:

Class	Median Minimum (months)	Median Maximum (months)	No. of Cases Receiving Life Maximum	Total Number of Cases
Class A	240.9	Life*	308	324
Class B	54.1	143.7	47	2217
Class C	35.6	72.2	25	2678
Class D	24.0	48.5	32	2155
Class E	19.0	36.9	6	172

III. SPECIFIC VIOLENT FELONY OFFENSE CATEGORIES

PL 120 - ASSAULT

Arrests:

- o There were 22,187 violent felony Assault arrests reported in 1987 accounting for approximately one-third of the State's total number of violent felony arrests and representing a 37 percent increase from the 16,178 violent felony Assault arrests reported in 1983. This was by far the *largest increase statewide of any offense category*.

Characteristics of Arrestees:

- o The median age of 1987 New York State Assault arrestees at time of arrest was 26.9 years. Suburban New York City had the lowest median age, 24.9 years.
- o Fifty-six percent of the violent felony Assault arrestees in New York State in 1987 were reported as black, 21.3 percent were reported as Hispanic, 20.7 percent as white and 1.6 percent were classified as other/unknown.
- o Of the major violent felony arrest categories, *Assault had the highest proportion of female arrestees (15.9% in 1987)*. Only the *combined* category of Kidnapping, Arson and Intimidation had a higher proportion (17.4%).

Prosecutions:

- o Assault had the *lowest proportion of cases processed through the upper courts* of any offense category throughout the five-year period. Only 11 percent of the Assault arrests disposed in 1987 were processed in the upper courts. Over 84.2 percent of those upper court prosecutions resulted in a conviction.

Convictions:

- o The *Assault overall conviction rate was the lowest* of any violent felony offense category in the State (44.5% in 1987). This rate declined consistently from the 1983 rate of 52.5 percent despite an increase in the upper court conviction rate (from 78.2% in 1983 to 84.2% in 1987). Among regions in 1987, New York City had the lowest Assault overall conviction rate (39.9%) compared to Suburban New York City (66.8%) and Upstate (61.0%).
- o Of those violent felony Assault arrests disposed as convictions in 1987, only 16.9 percent were convictions to a felony. *Assault had the lowest felony conviction rate of any offense category*. Over 43 percent were convictions to a misdemeanor and 39.6 percent were convictions to a lesser offense. *There were 1,129 violent felony Assault convictions in New York State in 1987*.

Sentencing:

- o Forty-one percent of Assault arrestees convicted of some charge in 1987 were incarcerated. This rate was highest Upstate (49.8%), followed by Suburban New York City (43.9%), and New York City (38.3%).
- o In New York State in 1987, 78.7 percent of violent felony Assault convictees were incarcerated (44.5% prison and 34.2% jail).
- o The median-minimum/median-maximum prison sentence for a violent felony Assault conviction (excluding life-maximum sentences) in New York State in 1987 was 24.3 months and 60.2 months. There were 8 life-maximum prison terms for Assault.

PL 125 - HOMICIDE

Arrests:

- o In 1987, 2,764 Homicide arrests were reported in New York State accounting for about 4 percent of the State's total violent felony arrests. Based on 1983 figures (3,008), Homicide arrests decreased 8 percent over the five-year period. This decrease actually occurred only in the early years of the period, with increases reported in 1986 (+7.5%) and again in 1987 (+1.8%).
- o Homicide arrests were particularly a New York City phenomenon; approximately 86 percent of the State's Homicide arrests occurred in New York City in 1987.

Characteristics of Arrestees:

- o New York State Homicide arrestees in 1987 had a median age of 24.4 years, while among regions, Upstate had the highest median age, 27.4 years. Approximately 15 percent of the Homicide arrestees statewide in 1987 were white, 55 percent black, and 28 percent were Hispanic. Ninety-four percent of all Homicide arrestees were reported as male.

Prosecutions:

- o Of the Homicide arrest cases disposed in 1987, almost 70 percent were prosecuted in the upper courts with approximately 80 percent of those upper court prosecutions leading to a conviction to some charge.

Convictions:

- o The overall conviction rate for Homicide fluctuated during the five-year period and averaged 65.4 percent. Statewide in 1987, this rate was 60.1 percent but there were large regional variations including Suburban New York City with the highest rate of 80 percent and New York City with the lowest at 57.8 percent.
- o Because of the severity of the offense, it is not surprising that Homicide is the violent felony arrest category having the highest felony conviction rate. In 1987, 91.5 percent of the convictions from the State's Homicide arrests were felony convictions. In Suburban New York City that rate was highest at 98 percent. *There were 826 violent felony Homicide convictions in New York State in 1987.*

Sentencing:

- o Of those Homicide arrests disposed in 1987 as a conviction to some charge, 87.9 percent were sentenced to incarceration. Of those resulting in a Homicide conviction in New York State that year, 99 percent were incarcerated (98.3% were sentenced to prison, 0.7% were sentenced to jail) and 1.0 percent (8 cases) received probation.
- o The median-minimum/median-maximum prison sentence for Homicide convictions (less those receiving a maximum of life) was 99.7 months and 180.6 months. There were 295 life-maximum sentences imposed for Homicide convictions in New York State in 1987.

PL 130 - SEX OFFENSES

Arrests:

- o In 1987, 3,955 violent felony Sex Offense arrests were made in New York State, representing an *increase* of 23.5 percent from the 3,202 arrests reported in 1983. Regionally, *Upstate New York had a dramatic increase* (almost +50% since 1983) while in New York City, the increase in such arrests was less than 12 percent.
- o Sex Offense arrests made up less than 6 percent of the total number of violent felony arrests reported in the State in 1987. However, while Upstate Sex Offense arrests accounted for approximately 14 percent of that region's violent felony arrests they accounted for 36.6 percent of the State's Sex Offense total. Suburban New York City accounted for 9.4 percent of the State's total Sex Offense arrests and New York City accounted for 54.0 percent.

Characteristics of Arrestees:

- o The median age of 1987 Sex Offense arrestees in New York State was 27.8 years. This was the *highest median age for any offense category*. The Upstate region median age was the highest among the regions; 28.3 years.
- o Whites made up 35.5 percent of the Sex Offense arrestees in 1987, blacks 46.3 percent, and Hispanics 16.6 percent. Almost 99 percent of the Sex Offense arrestees in the State were male. The Sex Offense category is noted as having the largest male proportion. (*The predominance of males in this arrest category is primarily due to the legal definitions of sex offenses in use during this period.*)

Prosecutions:

- o Of those arrests disposed in 1987, 1,447 (42.6%) were prosecuted in the upper courts and resulted in an 85 percent conviction rate. The upper court prosecution rate for Upstate was the highest of any region with 56 percent of the Sex Offense cases disposed being prosecuted in the upper courts. The Upstate upper court conviction rate was comparable to that of the State's (86.4%).

Convictions:

- o There has been little change in the overall conviction rate for Sex Offense arrests disposed (51.3% in 1983 and 52.3% in 1987). *Upstate showed a substantially higher overall conviction rate in 1987 (67.9%) compared with Suburban New York City (63.7%) and New York City (41.4%).*
- o *An increasing proportion of Sex Offense convictions has been to felony charges.* Fifty-four percent of the Sex Offense convictions in 1983 were to a felony, whereas 64.2 percent were to a felony in 1987. *There were 898 violent felony Sex Offense convictions in New York State in 1987.*

Sentencing:

- o Of the Sex Offense arrests disposed as a conviction to some charge, thirty-five percent were sentenced to prison, twenty-eight percent received jail terms and one-fourth were sentenced to probation. New York City was the least likely to incarcerate such an offender (55.7% of convictions) compared with Suburban New York City (67.5%) and Upstate (69.6%).
- o Of those arrests that led to a Sex Offense conviction, 82.8 percent received an incarcerative sentence and 17.1 percent were given probation. There was *little variation* among regions although Suburban New York City's sentencing was slightly harsher.
- o The median-minimum/median-maximum prison sentence for violent felony Sex Offense convictions (less those receiving a maximum of life) was 36 months and 90 months. There were 9 life-maximum sentences imposed for Sex Offense convictions in New York State in 1987.

PL 140 - BURGLARY

Arrests:

- o There were 10,916 violent felony Burglary arrests reported in 1987; a *slight increase* from the 10,808 arrests reported in 1983. Among regions, however, there was *substantial variation* in this trend. *Upstate experienced an increase of 11 percent while Suburban New York City showed a decrease of -21.4 percent. New York City's Burglary arrests increased only slightly (+1.9%).*
- o Burglary made up 16.3 percent of all violent felony arrests in New York State in 1987 and was the third largest category in the State. In the non-New York City regions Burglary arrests accounted for a much larger proportion than in New York City. In Suburban New York City 26.8 percent of the reported violent felony arrests were for Burglary while Upstate, Burglary accounted for one-third of that region's total.

Characteristics of Arrestees:

- o While the median age at time of arrest for State Burglary arrestees in 1987 was 23.5 years, Upstate Burglary arrestees were much younger with a median age of 20.7 years. This category, *Upstate Burglary, had the lowest median age of any violent felony category in any region.*
- o In 1987, Burglary was the one violent felony arrest category in New York State where *blacks and whites most closely accounted for similar proportions (37.4% white and 43.8% black)*. Hispanics accounted for 17.6 percent of the violent felony Burglary arrestees. As demonstrated in all categories, males made up the highest proportion of Burglary arrests; 92.7 percent in 1987.

Prosecutions:

- o Of the 9,024 Burglary arrests disposed in 1987, 38.2 percent were prosecuted in the upper courts and resulted in an upper court conviction rate of 93.8 percent. *The Burglary upper court conviction rate is the highest of any category in the State.*

Convictions:

- o The overall conviction rate for Burglary was 66.0 percent in 1987 and was the *highest among violent felony offense categories*. Almost 51 percent of those Burglary arrests disposed as a conviction to some charge were felony convictions. Suburban New York City had the highest overall conviction rate, 80.1 percent, with 61.3 percent resulting in a conviction to a felony. *There were 2,319 violent felony Burglary convictions in New York State in 1987.*

Sentencing:

- o Approximately two-thirds of all violent felony Burglary arrests leading to a conviction to some charge received an incarcerative sentence (27% prison and 37% jail). This incarceration rate was similar to that of Sex Offenses and the combined category Kidnapping, Arson, and Intimidation although both had a higher percent receiving a prison term.
- o Of those convicted of violent felony Burglary, 82.6 percent were incarcerated while 17.1 percent were sentenced to probation. *The New York City region was much harsher in sentencing Burglary convictees than the non-New York City regions.* New York City sentenced 70 percent of the convictees to prison while Suburban New York City and Upstate sentenced approximately 45 percent of the convictees to prison.
- o The median-minimum/median-maximum prison sentence for Burglary convictions (less those receiving a maximum of life) was 29.8 months and 71.3 months. There were 25 life maximum sentences imposed for Burglary convictions in New York State in 1987.

PL 160 - ROBBERY

Arrests:

- o The number of violent felony Robbery arrests reported in New York State in 1987 totaled 19,808; a 13.3 percent *increase* from the 17,480 reported in 1983. Robbery arrests *actually decreased in two regions*, Suburban New York City (-7.1%) and Upstate (-1.2%) while New York City Robbery arrests increased 16.3 percent.
- o Robbery is the second largest violent felony arrest category in the State. Almost 30 percent of the violent felony arrests reported in 1987 were for Robbery with 87 percent of those arrests occurring in New York City.

Characteristics of Arrestees:

- o Research into the characteristics of 1987 Robbery arrestees statewide has shown that this category has the *youngest median age* of any violent felony offense type (22.6 years) and that blacks make up the largest proportion (67.2%) followed by Hispanics (20.8%) and whites (11.1%). As with all violent felony offense categories, Robbery arrestees were overwhelmingly categorized as male (91%).

Prosecutions:

- o Forty-two percent of the 17,837 Robbery arrests disposed were prosecuted in the upper courts. Eighty-eight percent of those prosecuted resulted in a conviction.

Convictions:

- o The overall conviction rate for Robbery arrests (which includes both lower and upper court convictions) was 53.4 percent in 1987. This was a *decline from 1983's overall conviction rate* of 63.5 percent. Suburban New York City had the highest overall conviction rate with approximately three-quarters of the Robbery arrests prosecuted in 1987 resulting in a conviction.
- o Robbery had the third highest felony conviction rate. Almost 67 percent of the State's 1987 convictions from Robbery arrests were felony convictions. Only Homicide (91.5%) and Weapons offenses (70.0%) had a higher felony conviction rate than Robbery. *There were 5,106 violent felony Robbery convictions in New York State in 1987.*

Sentencing:

- o *Of those violent felony arrestees convicted of some charge in 1987, Robbery arrestees were second only to Homicide in the proportion receiving a prison sentence (43.3%).* There was little variation in the proportional breakdown of sentences among regions with the exception of Suburban New York City which imposed slightly more serious sentences.
- o Eighty-seven percent of those convicted of violent felony Robbery received an incarcerative sentence. *Only those convicted of Homicide or one of the offenses in the combined category of Kidnapping, Arson, and Intimidation had a greater chance of being sentenced to prison.* Seventy percent of those convicted of Robbery in New York State were sentenced to prison. (This rate was consistent across all regions.)
- o The median-minimum/median-maximum prison sentence for Robbery convictions (less those receiving a maximum of life) was 30.2 months and 72.2 months. There were 50 life-maximum sentences imposed for convictions to Robbery in New York State in 1987.

PL 265 - WEAPONS

Arrests:

- o There were 6,607 violent felony Weapons arrests reported in New York State in 1987 which accounted for 9.9 percent of the total number of violent felony arrests. Weapons arrests made up 11 percent of the New York City region violent felony arrests, 6.7 percent of Suburban New York City's total, and 5.9 percent of the Upstate region's violent felony arrests.

Characteristics of Arrestees:

- o The median age of New York State Weapons offenders in 1987 was 24.3 years. *Upstate Weapons arrestees had the highest median age of any category for any region with a median age of 28.5 years.*
- o More than half the 1987 Weapons arrestees in the State were classified as black (51.1%), almost one-third were Hispanic, and less than 15 percent were white. Slightly more than 93 percent of the violent felony Weapons arrestees were male.

Prosecutions:

- o Of those 5,773 cases disposed in 1987, 49.1 percent were prosecuted in the upper courts resulting in an 80.5 percent upper court conviction rate. Upstate New York had a dramatically smaller proportion processed through the upper courts, only 28.8 percent, with an upper court conviction rate higher than the State's (86.7%). *The diminished proportion of Upstate Weapons arrests reaching prosecution in the upper courts directly affects subsequent processing measures for that region including, in this instance, a lower felony conviction rate and less severe sentencing.*

Convictions:

- o The overall conviction rate for violent felony Weapons arrests disposed in 1987 was 53.4 percent (down from the 1983 rate of 58.6%). Suburban New York City and Upstate New York had much higher overall conviction rates (71.4% and 75.2% respectively) than New York City (50.6%). Note: Suburban NYC tends to have a higher conviction rate for all violent felony offenses than the other regions (exception, slightly lower conviction rate than Upstate for Sex Offenses). Upstate's high overall conviction rate for weapons arrests is impacted by an unusually high lower court conviction rate (73.4%) and as already mentioned, the large proportion of Weapons arrests prosecuted in the lower courts. The State's lower court conviction rate for this arrest type was 29.9% in 1987.
- o Statewide, felony convictions accounted for 70 percent of all Weapons arrests disposed as convictions in 1987 whereas in 1983, felony convictions made up 66 percent. (Upstate's 1987 felony conviction rate for Weapons arrests disposed was 27.2%). *There were 1,950 violent felony Weapons Convictions in New York State in 1987.*

Sentencing:

- o Weapons arrestees convicted of some offense in 1987 were the *most likely violent felony type to receive a probationary sentence (31.7%)*. Almost 49 percent were sentenced to some form of incarceration (21.5% prison and 27.4% jail). *Upstate, less severe sentencing occurred with only 10.5 percent receiving prison terms. Also, fines were imposed at a greater rate Upstate than in any other region (30.2% fined Upstate versus 8% in New York City and 11.9% in Suburban New York City). The differential sentencing among regions for Weapons offenses is actually a consequence of the smaller percentage of cases being prosecuted in the upper courts Upstate with fewer felony convictions being the result.*

- o Of the violent felony Weapons convictions in New York State in 1987, 56.6 percent received an incarcerative sentence. The Upstate incarceration rate for this type of conviction was comparable to Suburban New York City's (72.6% and 74.3% respectively). New York City's incarceration rate (54.8%) directly influenced the State's rate as *over 90 percent of the Weapons convictions were accounted for by New York City.*
- o Convicted Weapons offenders in 1987 were the *least likely violent felony offenders to be sentenced to prison* in the State (30.5% received prison) and the *most likely to be sentenced to probation* (40.3%). Prison accounted for a much larger proportion of sentencing Upstate than in the other regions. (Upstate, 46.4 percent were sentenced to prison while in New York City 29.4% were so sentenced. In Suburban New York City 36.2 percent of those convicted of a violent felony Weapons charge were sentenced to prison.)
- o The median-minimum/median-maximum prison sentence for Weapons convictions (less those receiving a maximum of life) was 23.8 months and 48.3 months. There were 13 life-maximum sentences imposed for Weapons convictions in New York State in 1987.

PL 135, 150, 215 - KIDNAPPING, ARSON, INTIMIDATION

Arrests:

- o Collectively, there were 797 combined Kidnapping, Arson, and Intimidation arrests reported in New York State in 1987 representing slightly more than one percent of all violent felony arrests. Sixty-eight percent of these arrests were reported from New York City.

Characteristics of Arrestees:

- o Arrestees in this group had one of the *highest median ages* in 1987 in the State for any offense category (27.0 years) surpassed only by Sex Offenders (27.8 years) and followed closely by Assault arrestees (26.9 years).
- o Greater than one-half of the 1987 Kidnapping, Arson, and Intimidation arrestees were black (52.9%), while 26.9 percent were white, and 19.1 percent were classified as Hispanic.
- o Of all categories, this combined category had the *largest proportion of females*; 17.4 percent in 1987.

Prosecutions:

- o Of the 732 arrests for Kidnapping, Arson, and Intimidation that were disposed in New York State in 1987, 43.9 percent were prosecuted in the upper courts and resulted in an 84.7 percent upper court conviction rate.

Convictions:

- o The overall conviction rate (upper and lower court convictions to any charge) for this category was 56.4 percent.
- o There were 104 violent felony Kidnapping, Arson and Intimidation convictions in New York State in 1987.

Sentencing:

- o The incarceration rate for convictions to any charge stemming from the combined category of Kidnapping, Arson, and Intimidation was over 60 percent in 1987. Probation was given to 26.6 percent.
- o *Because of the high felony class level of these offenses, the severity of sentencing for Kidnapping, Arson, and Intimidation convictions was second only to Homicide.* Over 91 percent were incarcerated (88.5% prison and 2.9% jail). Similar incarceration rates occurred across regions.
- o The median-minimum/median-maximum prison sentence for Kidnapping, Arson, and Intimidation convictions (less those receiving a maximum of life) was 31 months and 72 months. There were 6 life-maximum sentences imposed for this category in the State in 1987.

APPENDIX A: VIOLENT FELONY LEGISLATION

Chapter 481 of the 1978 Laws of New York created Penal Law Section 70.02 to designate specific Class B, Class C, and Class D felonies as violent felony offenses. Subsequent amendments to Penal Law section 70.02 defined additional offenses and attempted offenses as violent felonies. (A listing of the specific offenses is provided in Appendix B).

Chapter 481, Section 837 of the Executive Law requires the Division of Criminal Justice Services to report on the criminal justice "processing and disposition" of designated violent felony offenses. This report is published in compliance with that mandate.

Section 70.02 further specifies the sentences to be imposed for convictions to violent felonies. It provides for minimum mandatory indeterminate state prison sentences for convictions to many of the crimes designated as violent felonies. Discretionary provisions in the law permit the court to impose alternative sentences for youthful offender adjudications and for selected violent felony convictions if the court determines that mitigating circumstances exist. Alternative sentences are permitted where it is determined that the mandated sentence would be unduly harsh.

Chapter 481 (Criminal Procedure Law Section 1.20, sub. 41) created an armed felony category. An "armed felony" is defined as any violent felony that includes as a statutory element either (a) possession, being armed with or causing serious injury by means of a loaded deadly weapon; or (b) displaying what appears to be a firearm. Special sentencing provisions were created for cases disposed by plea to a Class D felony entered in satisfaction of an armed felony indictment charge.

Subsequent amendments to the original violent felony statutes include changes in the firearm laws which became effective August 12, 1980 (Chapter 233 of the Laws of 1980). This created new violent felony offenses, such as Criminal Use of a Firearm, and designated Criminal Possession of a Weapon 3^o and its attempt as an armed violent felony subject to plea restrictions and enhanced sentencing. Chapter 233 restricted plea bargaining and enhanced sentencing options for Class B armed felony convictions.

A change in the Penal Law governing Burglary offenses became effective September 1, 1981 (Chapter 361 of the Laws of 1981). This change made all burglaries of a dwelling a violent felony offense by repealing that element of Burglary in the first or second degree which required that such burglaries be committed at night. This, in effect, elevated many third degree burglaries to violent felonies.

The most recent legislative change became effective November 1, 1986 and resulted in the inclusion of "intimidation of a victim or witness" in the first degree (PL 215.17) as a Class B violent felony, attempt of PL 215.17 as a Class C violent felony, and in the second degree (PL 215.16) as a Class D violent felony (Ch. 124, Laws of 1986).

APPENDIX B: VIOLENT FELONY OFFENSE ARTICLE CLASSIFICATIONS

- A. Violent Felony Assault Offenses:
 - 1. PL 120.11 - Aggravated Assault on a Peace Officer
 - 2. PL 120.10 - Assault 1°
 - 3. PL 120.05 - Assault 2°

- B. Violent Felony Homicide Offenses
 - 1. PL 125.20 - Manslaughter 1°
 - 2. PL 125.27 - Murder 1°**
 - 3. PL 125.25 - Murder 2°**

- C. Violent Felony Robbery Offenses:
 - 1. PL 160.15 - Robbery 1°
 - 2. PL 160.10 - Robbery 2°

- D. Violent Felony Burglary Offenses:
 - 1. PL 140.30 - Burglary 1°
 - 2. PL 140.25 - Burglary 2°

- E. Violent Felony Weapon Offenses:
 - 1. PL 265.04 - Crim. Possession of a Dangerous Weapon 1°
 - 2. PL 265.09 - Crim. Possession of a Firearm 1°
 - 3. PL 265.03 - Crim. Possession of a Weapon 2°
 - 4. PL 265.08 - Criminal Use of a Firearm 2°
 - 5. PL 265.02 - Criminal Possession of a Weapon 3°
 - 6. PL 265.12 - Criminal Sale of a Firearm 1°

- F. Violent Felony Sex Offenses:
 - 1. PL 130.35 - Rape 1°
 - 2. PL 130.50 - Sodomy 1°
 - 3. PL 130.70 - Aggravated Sexual Abuse
 - 4. PL 130.65 - Sexual Abuse 1°

- G. Other Violent Felony Offenses
 - 1. PL 135.25 - Kidnapping 1°**
 - 2. PL 135.20 - Kidnapping 2°
 - 3. PL 150.20 - Arson 1°**
 - 4. PL 150.15 - Arson 2°
 - 5. PL 215.16 - Intimidating a Victim or Witness 2°*
 - 6. PL 215.17 - Intimidating a Victim or Witness 1°

Note: The above offenses include both attempts and completed unless designated by * which indicates completed offenses only.

** Indicates not designated legislatively as a violent felony, but included in this analysis because these offenses are governed by similar sentencing provisions.

APPENDIX C: DATA SOURCE AND DEFINITIONS

Data Base

Data for this analysis were obtained from the Computerized Criminal History/Offender-Based Transaction Statistics data system (CCH/OBTS) maintained by the Division of Criminal Justice Services (DCJS). This system is a compilation of information on individuals that have been arrested and charged with committing a "fingerprintable" offense as specified in Section 160.10 of the New York State Criminal Procedure Law. The data are collected from police, prosecutors, courts, and correctional agencies in order to track individual offenders through the criminal justice system. (See Attachments A, B, and C for arrest and disposition reporting forms used by DCJS to code and computerize criminal justice processing data).

Unit of Count

The "arrest event" is the unit of count utilized in this report. An arrest event consists of all charges placed against an offender for a given arrest. For this analysis, only those arrest events involving an adult that contains at least one violent felony charge are counted. In those events where two or more violent felonies were charged at arrest, only the most serious offense, based on class and/or Penal Law Article, is counted. For example, an event containing Robbery 1° (Class B felony) and Criminal Use of a Firearm 2° (Class C felony) was classified as a Robbery event. In the analysis of system processing and sentencing, the most serious disposition occurring in a calendar year is the unit of count. (See Appendix D for an explanation of the method used to determine the selection of arrest charges and dispositions for analysis).

Violent Felony Definition

The specific offenses designated as violent felonies are listed in Appendix B. The Class A-I felonies of Murder 1°, Murder 2°, Arson 1°, and Kidnapping 1° have been included in this analysis because they are governed by similar sentencing provisions.

When summarized by Penal Law Article, the violent felony data include only those offenses within that article that are designated as violent felony offenses by legislation. For the analytic purposes of this report and because of the relatively small number of offenses in each separate category, the violent felonies of Kidnapping, Arson, and Intimidation were collapsed into one "Other" offense category.

The specific articles examined include:

Penal Law Article

120	Assault
125	Homicide
130	Sex Offenses
135	Kidnapping
140	Burglary
150	Arson
160	Robbery
215	Intimidation
265	Weapons

Geographic Regions

Arrest and processing data are presented statewide and for three major geographic areas of the State which have been determined by specific county designations. The geographic regions consist of:

New York City which includes Bronx, Kings, New York, Queens, and Richmond counties (accounting for an estimated 41 percent of the State population in 1987'),

Suburban New York City which includes Nassau, Rockland, Suffolk, and Westchester counties (accounting for 21 percent of the State population in 1987'), and

Upstate which includes those remaining fifty-three counties of the State not included in the New York City region or the Suburban New York City region and a small number of cases absent a specific county designation (accounting for 38 percent of the State population in 1987').

Population proportions are compiled from county estimates as projected by the United States Department of Commerce, Bureau of the Census and are based on the 1980 census. It has been determined that these figures represent not more than a .4 percent change in population proportions over the five-year period.

Race/Ethnicity

In this report, the term race/ethnicity includes the categories black, Hispanic, white and other. Because of a data transmission problem, proper coding and reporting of Hispanics in the New York City region after 1982 and through 1984 did not occur. It appears that Hispanic offenders were most often reported as white. As a result, only 1987 highlights are presented.

Courts

The New York State courts have been divided into two groups: lower courts and upper courts. Lower courts include all District, City, Town, and Village courts, and the New York City Criminal Court. Upper courts include the Supreme Court (New York City) and any County Court (outside New York City).

Cases prosecuted in the upper courts can be assumed to have retained at least one felony charge through the indictment or Superior Court Information stage of processing. Dispositions in the lower courts, that is, courts which have only preliminary jurisdiction over felony cases, indicate that the felony charge was dropped or reduced to a non-felony during the early stages of processing.

Overall Conviction Rate

As used in this report this term refers to the proportion of all arrests disposed that resulted in a conviction to any charge, not necessarily the violent felony offense charged at arrest.

Violent Felony Conviction Rate

A more restrictive term than the general overall conviction rate, the violent felony conviction rate refers to the percent of violent felony arrests disposed that resulted in a conviction to a violent felony offense. (There are some instances where there are multiple conviction charges and a conviction to a violent felony was not the most serious conviction. These few cases are referred to as secondary violent felony charges and, where appropriate, are reported separately and noted.)

Overall Incarceration Rate

An incarcerative sentence in this report refers to the sentence categories prison, jail, time served, and jail and probation. The overall incarceration rate is the proportion of convictions resulting in an incarcerative sentence.

Incarceration Rate for Violent Felony Convictions

This rate is based on the proportion of violent felony convictions resulting in an incarcerative sentence. There are some instances where there are multiple conviction charges and a conviction to a violent felony was not the most serious conviction (top-charge). Those few cases are referred to as secondary violent felony charges and when included in the incarceration rate are appropriately noted.

Median-Minimum/Median-Maximum Prison Sentence

The median is defined as the midpoint of a ranked distribution of values. When used in this report in reference to prison sentences, the median figure denotes that one-half of the sentences studied were ranked above the median sentence cited and one-half were ranked below.

The median-minimum and median-maximum prison terms were calculated independently of each other and should not be interpreted as a range similar to the term to which an individual offender would be sentenced. Medians are presented for class of offense for the State and for each specific offense for both the State and regions. Medians for specific offenses will be greatly affected by the number of prison sentences in each class for that offense as the class of the conviction largely defines the range of minimum and maximum prison terms to which the offender can be sentenced. For example, the greater the number of convictions to a class A or B felony the greater the median-minimum/median-maximum prison term will be for that category. Offenses have not been broken down by class for each region but represent the total number of sentences for all classes.

APPENDIX D: SELECTION OF CHARGE AND DISPOSITION FOR ANALYSIS

The following rules apply to the selection of arrest charge and disposition for this analysis:

- At arrest, if there was more than one charge, the most serious violent felony charge was selected.
- If the charges in the arrest event resulted in more than one disposition, the most serious disposition type was selected. (Disposition types were ranked as follows: Conviction, Acquittal, Dismissal, Other, No True Bill, Prosecution Declined.)
- If the charges in the arrest event resulted in dispositions in more than one disposition year, an attempt is made to select only the most serious disposition types across all years that the event was disposed. For example, if the event had a dismissal in 1984 and a conviction in 1985, the event would only be selected for the 1985 disposition cohort. There is no attempt to rank charges within disposition types across years, so an event with a 1983 dismissal and a 1984 dismissal, for example, would be selected for both the 1983 and 1984 disposition cohorts.
- Charge seriousness was determined by the class of offense. Within classes, specific offenses were ranked with personal crimes considered most serious followed by property crimes.

BRO - Brown	WHI - White
GRY - Gray or Partially Gray	OTH - Other

*Bald (BAL) is to be used when subject has lost most of the hair on his head or is hairless.
19. **EYES** - Enter the eye color codes which best describes the person's eye color.

BLK - Black	HAZ - Hazel
BLU - Blue	MAR - Maroon
BRO - Brown	PNK - Pink
GRY - Gray	XXX - Unknown
GRN - Green	OTH - Other
22. **ARRESTING OFFICER ID.** - Unique permanent number used by your agency to identify the arresting officer.
25. **ARREST NO. OR AGENCY ID.** - Number assigned to identify the individual arrested by the arresting agency.
30. **TIME OF ARREST** - Use military time such as 0300 for 3 A.M., 1330 for 1:30 P.M. and 2320 for 11:20 P.M., etc.

34. **TYPE OF ARREST** - Includes WAR - Warrant, NWR - No Warrant Used, SUM - Summons, CIP - Crime in Progress, COM - Complaint, OTH - Other or UNK - Unknown, AT - Appearance Ticker, TOF - Turned Over To, FOA - Fugitive for Other Authority, etc.
35. **COURT OF ARRAIGNMENT** - Enter court name and geographical jurisdiction, e.g. Buffalo City Court. If a Town or Village Justice Court, enter the name and jurisdiction, including Town or Village and County of the Judge, e.g. Hon. Henry Learned, T. J. Berne, Albany Co.
36. **CHARGE(S)** - Enter all charges with the most serious first, as set forth in the DCJS Charge Code Manual. At least one of the charges must be a fingerprintable offense as defined in CPL Section 160.10. If more space is needed, enter in Item 36A.

LAW - Enter law abbreviation. For example:

PL - Penal Law	CPL - Criminal Procedure Law
VTL - Vehicle & Traffic Law	

SECTION NUMBER - Enter Section Number of Law.
SUBDIVISION NUMBER - Enter subdivision, if any; if none, enter "00".
CLASS - Enter class of crime - A, B, C, D, E, or U - Unclassified. In the case of an "attempted" crime, enter the class as though the crime had been committed and enter "A" in the Attempt Code field.
OFFENSE CATEGORY - Enter letter as follows:

F - Felony	V - Violation
M - Misdemeanor	I - Infraction

ATTEMPT CODE - Enter "A" for attempted crimes, "0" for all other crimes.
DEGREE - Enter degree of crime, if applicable.
NAME OF OFFENSE - Enter name of offense for which individual is charged using standard abbreviations when applicable, e.g., CR POSS CONTROLLED SUBST, ASSAULT - 2nd.
COUNTS - Enter the number of counts for each offense.
NCIC CODE - Enter the appropriate 4 digit NCIC Uniform Offense Classification Code whose literal best describes the offense committed.
- 37/38. **VICTIM'S AGE AND SEX** - Enter the age and sex of the oldest victim on the line used to record charges involving this oldest victim. Leave the victim age and sex boxes blank on any line where the charge entered does not involve the oldest victim or where the charge involves a law enforcement officer. When eldest victims are the same age but different sex, enter the letter "D".
39. **TYPE OF WEAPON** - Required for PL 265 Arrests - Pistol, Rifle, Knife, etc.
44. **CASE NUMBER** - Enter the number assigned by your agency to the file folder used to hold the information about all victims and offenders involved in this case.
46. **NUMBER OF VICTIMS** - Enter the total number of persons victimized by the offenders in this case.
49. **PHYSICAL MARKS & ODDITIES** - Enter any amputations, deformities, visible scars, marks or tattoos.
51. **ADDITIONAL INFORMATION** - Enter any miscellaneous information which may be helpful. If used for additional space for another item, please indicate the item number to which you are referring.

OCA-501, Reverse (Rev. 4/83)

▲ Tear off on dotted line ▲

INSTRUCTIONS FOR INITIAL COURT REPORT OF CRIMINAL CASES

1. **Arresting Officer** (outside NYC) Complete Section 1 including the top 2 arrest charges. The OCA-501 should be immediately attached to and remain with the accusatory instrument.
2. **Assistant District Attorney** If all charges against the defendant on this arrest are dismissed by an ADA prior to arraignment, check the box in Section 2, enter the date of dismissal, and initial. (NYC arrest) Hand over the card to the Criminal Court in your borough. (outside NYC arrest) Mail the Card to:

Criminal Disposition Reporting Unit
NYS UNIFIED COURT SYSTEM
(Office of Court Administration)
270 Broadway
New York, New York 10007

3. **Courts Using the OCA-540 or 540-A:** The number on the card must be entered onto the CDR form, after which it is stapled onto the CDR form.

Courts Using On-Line System (OBTIS): Use the number on this card to identify arrest file in initialization or arraignment entry routine.

ACKNOWLEDGEMENTS

Acknowledgement is offered to Marge Cohen for her guidance throughout the construction of this report, to Richard Ross for sharing his expertise on the topic of violent felonies and providing insight on related matters, to Kelly Haskin-Tenenini for proofreading the manuscript, and to Carol King for her patient and willing secretarial support. It is with gratitude that I wish also to acknowledge Pat Gillett, who endured endless questions concerning the data file; Janet Whitaker, who is credited for her vigilant coaching in word processing applications; and Gerald Luciano, whose suggestions for both cover and page layout have been appreciated by the author and readers alike.
