## INTRODUCTION

### History of Florida's Juvenile Court Statistics

In 1971 Florida's Department of Health and Rehabilitative Services (the Department) assumed responsibility for a uniform statewide system of intake and probation services. Prior to that time these services were provided by juvenile courts throughout the state. In 1975 legislation was passed which required the Department to develop an integrated automated information system. The legislation specified that the system contain management as well as client and program data to facilitate administration of service delivery and management decision-making. The authority for the Department to collect data is currently stated in Florida Statute section 20.19(13a). The data are used by the Department locally and at the state level for planning, budgeting, and monitoring caseloads and service delivery.

### Data Collection Methods

The Department's responsibilities include delinquency and dependency [court] intake services; detention; probation and furlough; residential and non-residential commitment programs (including training schools) for delinquents; delinquency prevention and diversion programs; emergency shelter, protective services, foster care, and adoption services for dependent children; child abuse/neglect prevention programs; day care; and children's mental health programs. Department staff are responsible for court related activities associated with each of these functions.

Florida's circuit court has exclusive original jurisdiction over all cases relating to juveniles except traffic cases (both criminal and civil) which fall under the original jurisdiction of county courts. Florida has 20 judicial circuits and 67 counties.

Data are collected locally on Client Information Forms completed by Department or contract staff as information on the referral becomes available. The Client Information Forms are sent daily to data entry operators for input. The majority of local offices utilize on-line data entry. The few that don't use an on-line system, use a batch system for data entry. Referral information is updated if the status of the child changes.

A referral record is initiated by Department staff whenever they receive a new case to investigate. Each unique occurrence of delinquent behavior (each count or charge) is counted by the Department as a separate referral. For example, a juvenile referred for two counts of burglary and one count of trespassing would result in three forms (referral records).

### Archived Data Files

The data files received by the Archive contain a separate record for each delinquency or dependency offense (count or charge) disposed during the calendar year. The Archive then extracts the delinquency and status offense records from the original data file. Although Florida legally defines status offense cases (i.e., running away, truancy, curfew violation, liquor law violation, ungovernable) as dependency cases, the Archive data files combine the status offense records with the delinquency offense records. From these offense-level files the Archive creates case-level files. A case-level file is created by first grouping offense records by CLIENT ID NUMBER (FD001) and then within CLIENT ID NUMBERS grouping records by DATE REFERRAL RECEIVED (FD022 and FD023). Cases are comprised of all the offenses for each juvenile which were referred on the same date.

For each case one offense record is selected to provide data for the case (demographic and referral variables). If the case has only one offense record, that record provides data for the case. If the case contains more than one offense record, the offense selected to provide case data is the most serious offense, of those that received the most severe disposition, within those which were most recently disposed. (Seriousness and severity hierarchies were developed by Archive staff and are presented in Appendices II and III.)

In order to provide a more complete view of cases involving multiple offenses, the Archive has also created several variables which are appended to the case record. These created variables present data on "most serious" case characteristics which may have been connected to offenses other than the one chosen to provide demographic and referral data.

The data in the files are stored as numeric characters (which are whole numbers) unless otherwise noted. The records for each case in 1984 and 1985 are 119 characters in length and contain 57 variables, ten of which were created by the Archive. The data are stored in single year files. The number of case records in each calendar year data file is as follows:

<u>Year</u>	<u>Records</u>
1984	91,753
1985	101,483

#### Terms of Availability

Each request to use these data should be directed to the Archive. The Archive will contact Florida's Department of Health and Rehabilitative Services regarding their release. Upon the Department's authorization to release and disseminate the data, the data files will be supplied to the requestor by the Archive with any necessary cautions or restrictions.

The Archive provides the data on magnetic tapes AS IS and shall not be held responsible for any liability incurred as a result of any error or omission in the data as it appears on the magnetic tapes. However, should any inconsistencies be found, the Archive asks to be notified so that corrections can be made to the data.

All questions and requests should be addressed to:

Summary tabulations on selected variables (manner of handling and sex breakdowns for delinquency/status offense cases and dependency/neglect cases for each Department service district in Florida) are publicly available beginning with 1982 data through the Inter-university Consortium for Political and Social Research at the University of Michigan, P.O. Box 1248, Ann Arbor, Michigan. 48106.

## USING THE CODEBOOK

The information that follows is based on a study of available documentation from the data supplier (e.g., Health and Rehabilitative Services' Manual for Children, Youth and Families Client Information System), interviews with the data supplier and court personnel, and diagnostic analyses performed by the Archive staff. The example below is a reproduction of information appearing in the codebook for a typical variable. The numbers in brackets do not appear in the codebook, but are references to the descriptions which follow this example.

<u>Column/ Width</u>	<u>Variable Number</u>	<u>Code Value and Description</u>
[1] 72/2	[2] FD034	[3] ACTION TAKEN BY STATE ATTORNEY
		[4] The formal action taken by the State Attorney. This item is required only for delinquency law violation offenses (FD025 offense codes 001-039 and 041-043).
		[5] [6]
		(00) Not applicable, status offense
		(01) No petition filed
		(02) Petition filed
		(03) Information filed - State Attorney filed directly in adult/criminal court
		(04) Waived to adult/criminal court
		(05) Indicted by grand jury
		(09) Not applicable - non-law violation delinquency offense (FD025 offense codes 40 and 44-49).
		( ) No entry
	[7]	(99) Missing
	[8]	NOTE: For cases filed directly to adult/criminal court [State Attorney action code (03)] the juvenile has the right in most cases to remove the case to juvenile court.

- [1] The starting location and width of the variable in the machine-readable data file. This is the format information needed to read the data into other systems.
- [2] The variable number. The variable number is used as a variable name when the file is processed by systems which use alphabetic variable names (e.g. SPSS).
- [3] The variable label used by statistical systems to identify the variable or program output.
- [4] A description of the variable contents.
- [5] The code values occurring in the data for the variable.
- [6] The textual definitions of the codes. The first 20 characters form a short value label which some systems use to document the output of analysis programs. A longer description follows the short label when necessary.

- [7] The designation of missing data. The Archive staff has replaced any out-of-bounds codes with missing data codes. Many analysis packages require that certain types of data which are usually excluded from analysis be designated as "missing data". Fields with no entry were left blank and "( ) No entry" is listed as a code value. Some variables also have response options representing "unknown" which are also listed as code values.
- [8] An explanatory/cautionary note.

DATE OF DISPOSITION: The date of the primary case disposition (FD038) – coded in Julian format (year/day). For judicial dispositions this is the date of the court's action. For non-judicial dispositions this is the "clear date" upon which the action occurred (such as the date of referral to another agency or program). For others, such as "closed after intake counseling," counselors use their judgment regarding the date entered.

Original Data Collector's Statement of Acceptance

## STATEMENT OF ACCEPTANCE

I, Samuel M. Streit, Director of the Children Youth and Family Services, Florida Department of Health and Rehabilitative Services, have reviewed *Florida Juvenile Court Case Records: 1984 - 1985 User's Guide* and accept it as an accurate description of the delinquency and status offense data stored at the National Juvenile Court Data Archive and of the methods used by the Department of Health and Rehabilitative Services to collect these data. This user's guide may be revised to cover future years' data unless there are such major changes in the data collected as to warrant completely new documentation.
