Chief's Letter of Transmittal

Commissioners:

I hereby respectfully submit the Annual Report for 1988.

1988 proved to be a year like no other for the Police Department, from the beginning of the year that saw the intense investigation into the tortures/murders performed by Robert Berdella to the arson at a construction site that took the lives of six firefighters. These incidents alone were monumental in terms of human lives lost, but together they focused our attention on those persons in our society who have little or no regard for life.

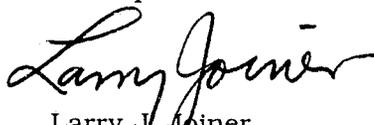

This became even more evident throughout the year with the increase of violent crimes associated with the influx and use of crack cocaine in our community. From the member entering the data in the computer, to division commanders receiving the latest statistics on weapons recovered, to the officer routinely stopping a traffic violator and discovering weapons and/or drugs involved, no one is immune to the fact that the problem of drugs in this city is one that we need to face squarely and deal with harshly.

With the rise in drug trafficking has come a new challenge for the department - the infiltration of Los Angeles gangs. This challenge has been met by continued investigations conducted cooperatively between members of our department and various federal agencies. Through these combined resources, significant progress has been made in diluting gang-related crime.

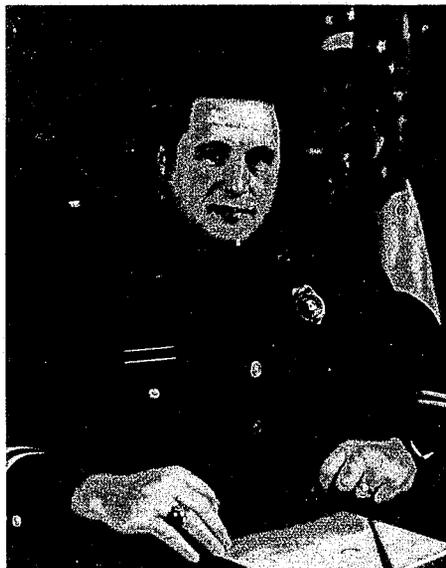

Drug education and community involvement are two other fronts in the war against drugs. The demand for anti-drug programs continues to rise and community involvement in spreading the anti-drug message has intensified. An educated and involved community is the precursor to a successful drug enforcement program; and, while I am pleased with the progress which has been made, there is also the realization that our efforts must continue.

In 1988, the department became official guardian, of sorts, for the abused spouses in the city. The laws regarding domestic violence were revised so that an abused spouse is no longer the only person who can have the abuser arrested. Now, the police are responsible for assuring that the responsible party is taken out of the situation. It is hoped that this new law will reduce the incidents of abuse.

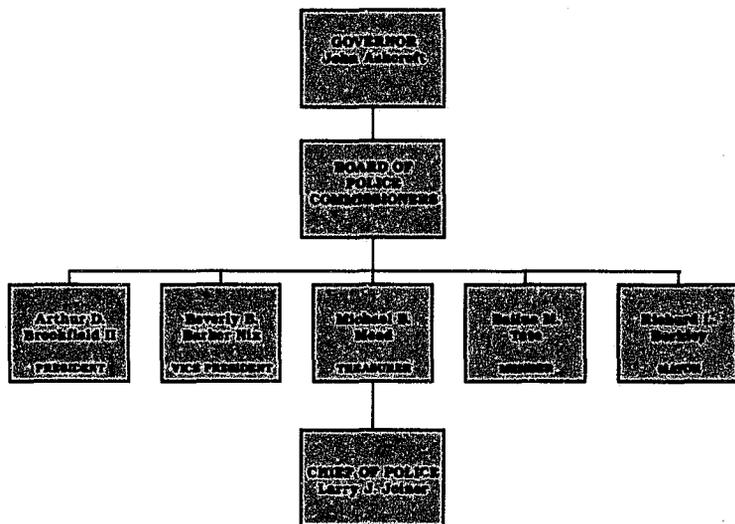

Without the continued support of each and every one of its members, this department would not have accomplished even the smallest task this past year. But because of this support, we've made many strides toward reducing the tight hold the criminals have on the throat of our society, and we in turn have come through 1988 with a renewed vision of what can be accomplished.

Larry J. Joiner
Chief of Police

Board of Police Commissioners

The Board of Police Commissioners is responsible for providing police service to the citizens of Kansas City, Missouri, as mandated by Missouri state statute. The Board is comprised of four citizens, appointed by the Governor of Missouri and with the consent of the State Senate, who serve four-year terms. The fifth member of the Board is the Mayor of Kansas City, by virtue of his elected office. The Secretary/Attorney of the Board of Police Commissioners is appointed by the Board members and acts as legal consultant, as well as managing clerical matters for the Board.

In addition to determining policy and adopting rules and regulations consistent with governing police-related activities, the Board is responsible for the appointment of the Chief of Police, secretary to the Board, police surgeons, police physicians, attorneys, chaplains, and consultants. Members of the Board oversee the management and control of the Kansas City, Missouri Police Department.

Also under the authority of the Board is the Office of Citizen Complaints, which was created to provide formal procedures for the receipt and processing of complaints from citizens regarding alleged misconduct by department members.

Office of the Chief of Police

Larry J. Joiner was appointed Chief of Police of the Kansas City, Missouri Police Department on March 30, 1984, becoming the 37th man to hold this position since the department was founded in 1873. The Chief's Office oversees four bureaus, each commanded by a lieutenant colonel. These bureaus include: Field Services, Investigations, Fiscal, and Administration and Services. Also under the command of the Chief's Office is the department's Legal Advisor, Internal Affairs Division, Special Investigations Division, Public Affairs Unit, and Audit Unit. Chief Joiner is assisted in his administrative duties by Lieutenant Colonel Lester N. Harris, Executive Officer.

During 1988, Chief Joiner was asked to participate in numerous fund-raising campaigns, to include "Arresting" a local lawyer, whose bond benefited the United Way. In the spring of 1988, Chief Joiner was named Police Chief of the Year by the Missouri Police Chiefs Association for his implementation of innovative programs to curtail crime in Kansas City.

The Legal Advisor monitors department procedures and policies from a legal standpoint and reviews legislation, court decisions, and opinions for their effect on the department.

Office of the Chief of Police (cont.)

Special Investigations Division

The Special Investigations Division is responsible for gathering and reporting intelligence data for resource allocation purposes, and targeting groups or individuals who are known or suspected to be involved in organized criminal activities and drug trafficking. This

division also provides drug education programs to community groups when requested.

During 1988, division personnel intensified enforcement efforts to reduce drug activity in the Kansas City area. As compared with 1987,

this resulted in the investigation and charging of 330 subjects in state and federal courts, an increase of 49%; seizure of more than \$4 million worth of drugs and firearms, an increase of 186%; the seizure of assets used in or derived from criminal narcotics activities including vehicles, real estate, and miscellaneous property valued at more than \$2.5 million; and the virtual elimination of some entire networks

of traffickers. They effected 371 arrests for prostitution, of which 105 were filed at state level, and 16 arrests for pornography violations. In addition to their other efforts, members of the division trained fifty department members and members of local police departments in the Basic Undercover Officer Training School.

Internal Affairs Division

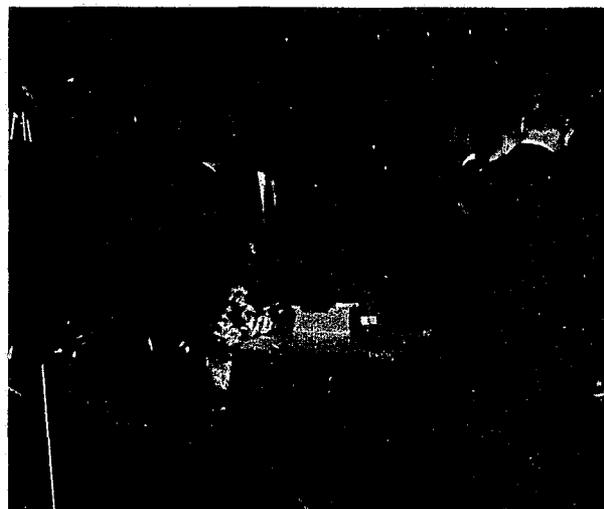

The Internal Affairs Division is responsible for conducting objective investigations into allegations of improper conduct by department members; internal investigations including the discharge of a firearm by or involving a department member and disarming an officer; and investigations regarding recommendations for commendations and honor awards.

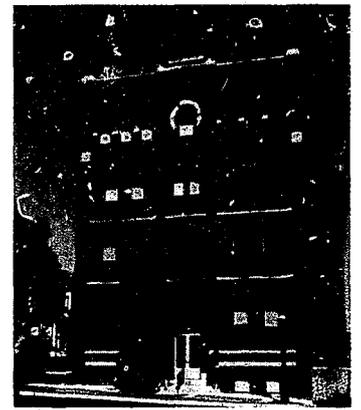

Audit Unit

The Audit Unit assists management in recognizing problems and recommends courses of action to correct those problems. Operational auditing permits management to assess performance by means of periodic reports and direct observation by the auditors.

Public Affairs Unit

The Public Affairs Unit is responsible for publishing the department's monthly newsletter and the Crusade Crier, a quarterly newsletter for the Citizens Crusade Against Crime; processing department awards for presentation by the Chief of Police; arrangements for various department functions and banquets; and numerous other projects designated by the Chief's Office. The supervisor also functions as the department's media liaison and is responsible for the dissemination of newsworthy items to the media as well as assisting in their efforts to obtain useful information.

The mural entitled "**Municipal Law Enforcement**" was painted in 1948 by **Charles M. (Pat) Murray**. Mr. Murray studied under famed artist Thomas Hart Benton. He presented the painting to the department in 1950. In the picture, the left half of the police building is in the daytime while the right half is a night-time view. This is symbolic of the continuous 24-hour operation of the Police Department. Various city landmarks are depicted in the mural which still remain trademarks of our city. The current photographs surrounding the mural indicate technology moves forward as the theory of law enforcement remains the same.

South Patrol Division

Maj. Frederic Smith
Commander
Central Patrol Division

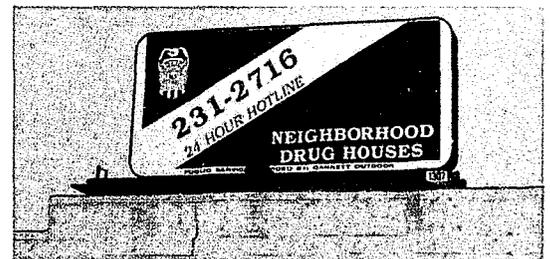

Field Services Bureau

The largest of the department's four bureaus is the Field Services Bureau, commanded by Lieutenant Colonel Richard Fletcher. The 874 law enforcement and civilian members of its staff are assigned to six divisions. Central, Metro, East, North, and South Patrol are responsible for policing specific geographic areas of the city. The City-Wide Traffic & Operations Division, created in 1988 by combining the Traffic and Patrol Support Divisions, is divided into the Traffic Enforcement, Safety Education, Traffic Specialist, Canine, and Helicopter Units. This division is responsible for the enforcement of traffic laws through accident investigation and selective enforcement; air support through the use of the department's helicopters; training and deployment of the canine teams, including the bomb and narcotics specialty canines; and traffic escorts for visiting dignitaries and other special events.

During 1988, this bureau focused intensively on the problem of drug trafficking in the Kansas City area, primarily on the street dealer level, utilizing various means of drug enforcement.

Field Services Bureau (cont.)

During the past year, there were over 492,136 radio call dispatches and 208,181 total arrests made by bureau personnel. Of the 208,181 total arrests, 77,287 were for Part I and Part II offenses. The majority of these Part I and Part II arrests were effected by the officers assigned to the various patrol division stations. In addition to handling their regular assignments, bureau personnel were called upon to handle a variety of special events and operations, such as selective enforcement in the Westport area in an effort to curtail an increase in the number of assaults, thefts, drug sales, and other problems; prostitution decoy operations; and several enforcement programs designed to reduce the incidence of drugs in the city.

To combat the problem of drug trafficking in the city, the department implemented various programs designed to identify those responsible. These efforts netted hundreds of

arrests; the recovery of several thousand dollars worth of illegal narcotics; and the confiscation of several hundred thousand dollars worth of cash, property, and vehicles. Drug education programs were in great demand by the public, as the public's involvement and cooperation are needed to pinpoint the problem areas.

Bureau organizational structure modifications were accomplished during the year to more efficiently and effectively utilize available resources. A Field Inspection element was established within the bureau office to identify specific bureau-wide administrative and operational problems affecting quality productivity, and to recommend viable solutions to identified problems.

The staff personnel of the Crime Prevention Unit were decentralized to the five field patrol divisions to permit easier and more personable access to crime prevention officers by the numerous patrol division based community-neighborhood groups. Officers assigned to the function are in a position to provide timely identification of developing business and residential crime problems in a geographical area, and offer sound prevention measures to counter identified trends.

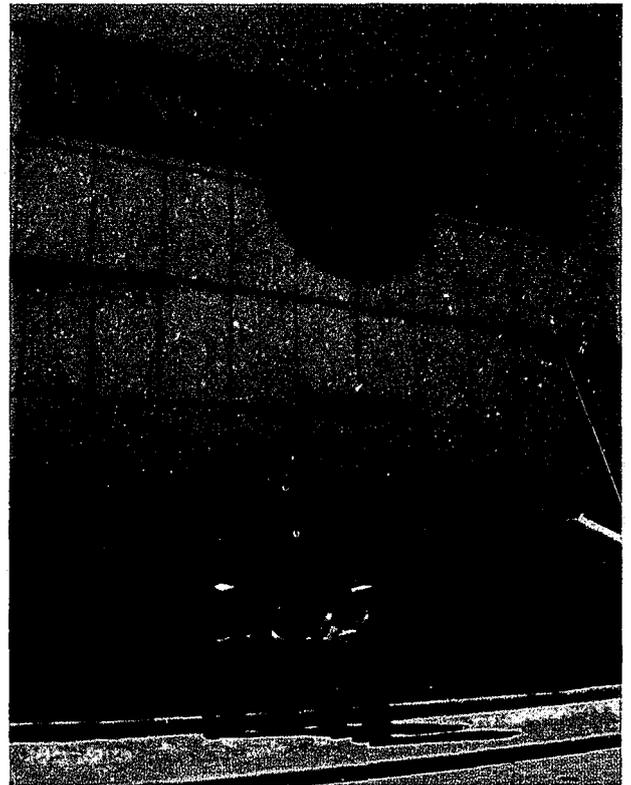

Decentralization of Reserve Unit officers to the five field patrol divisions enabled division commanders to better coordinate reserve officer deployment assistance. Availability of reserve officers at each division has enhanced planning and performance of special problem enforcement concentration and special events operations.

City-Wide Traffic & Operations Division

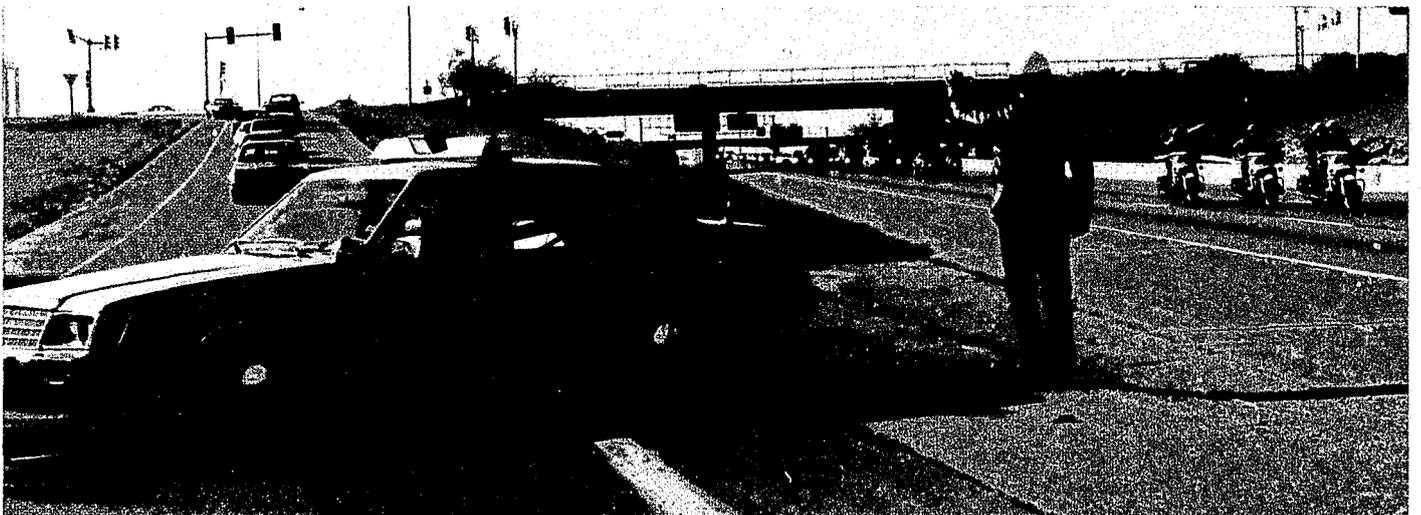

During 1988, this division was frequently called upon to handle special projects and events, from the Operation Handshake Air Show at Richards-Gebaur Air Force Base to the NCAA Final Four Basketball Tournament. With the approaching November election, numerous visiting dignitaries to the Kansas City area required the utilization of various elements of the department, but specifically the personnel of this division. Because most of the candidates believed Missouri to be a pivotal state, their campaign appearances here were often close together and required this division to continually arrange manpower accordingly. These visits necessitated the re-routing and shutdown of traffic, monitoring of pedestrian traffic, securing the campaign sites, and ensuring the safety of all modes of transportation used.

In addition to these other assignments, members of this division issued 76,691 hazardous moving citations; conducted 10 sobriety checkpoints with over 2,155 vehicles stopped and 121 intoxicated drivers identified and arrested; and provided air support for 1,689 calls for service. This last figure is significant because the manpower for the Helicopter Unit was reduced in the spring of 1988 by approximately one-third.

Throughout 1988, the Canine Unit personnel assisted in numerous drug enforcement assignments. Their expertise in many cases quickly led to the discovery of narcotics hidden in cars, residences, and many other places that would not necessarily have been detected upon a visual search. This proved essential when dealing with known drug

houses and the people running them, as any delay in time could mean the difference between seizing a substantial amount of drugs and cash, and the possibility of recovering only a small portion. Because of this demand for their services, the Canine Unit was increased by two additional officers and narcotics detection dogs during the year. These additions will enable both patrol officers and narcotics detectives to utilize these special services simultaneously rather than waiting for an available canine team to complete one assignment before responding to the next. This will enable the department to cover a larger area in its drug enforcement activities.

Lt. Col. Robert E. Jenkins
Commander
Investigations Bureau

Maj. William E. Frazier
Commander
Crimes Against Property Div.

Maj. William D. Dycus
Commander
Fraud and Fugitive Div.

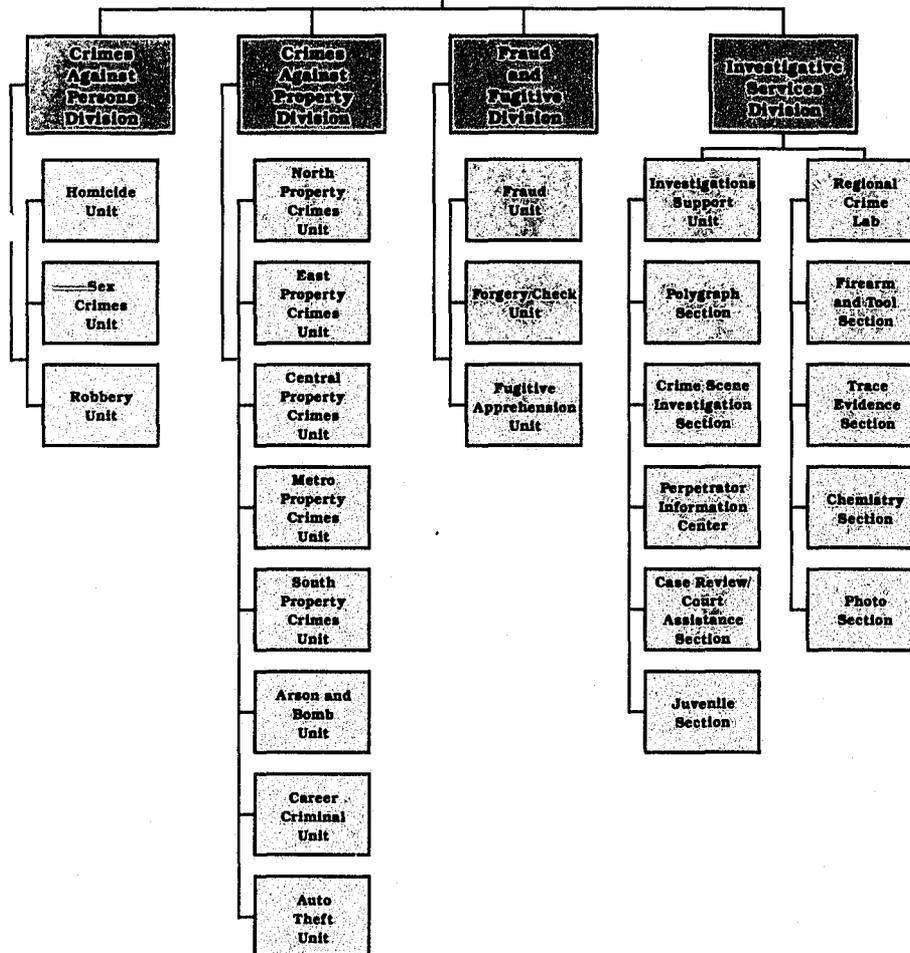

Maj. Sylvester H. Winston
Commander
Crimes Against Persons Div.

Maj. John L. Coleman
Commander
Investigative Services Div.

**INVESTIGATIONS
BUREAU**

The Investigations Bureau, commanded by Lieutenant Colonel Robert Jenkins, is comprised of four divisions: Crimes Against Property, Crimes Against Persons, Fraud and Fugitive, and Investigative Services Divisions. The responsibilities of this bureau include conducting investigations of criminal offenses in an effort to identify, apprehend, and prosecute those responsible.

During 1988, the 237 law enforcement and civilian personnel assigned to this bureau investigated a variety of crimes, including the homicides committed by serial murderer Robert Berdella and the arson at a south city construction site that touched off a massive explosion, killing six firefighters. These two investigations are two of the most extensive investigations ever conducted by this police department.

Crimes Against Property Division

The Crimes Against Property Division is comprised of eight units: Bomb and Arson, Auto Theft, Career Criminal, and the five

Property Crimes Units, located at each of the five patrol division stations. Throughout the year, this division investigated numerous incidents involving explosives or highly volatile materials that had been stored for some time and were considered unstable. Additionally, enforcement was stepped up to curtail the problems of auto theft and burglary.

Investigations Bureau (cont.)

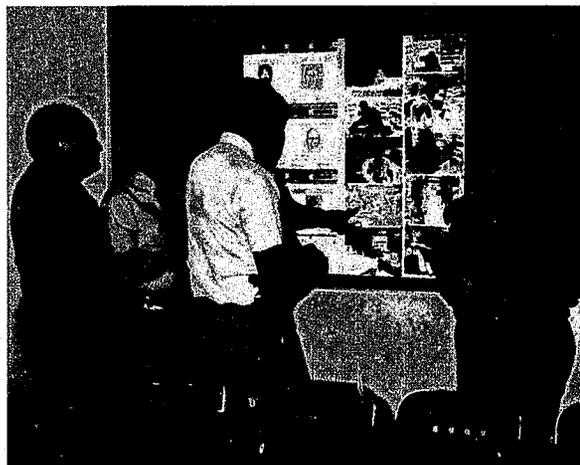

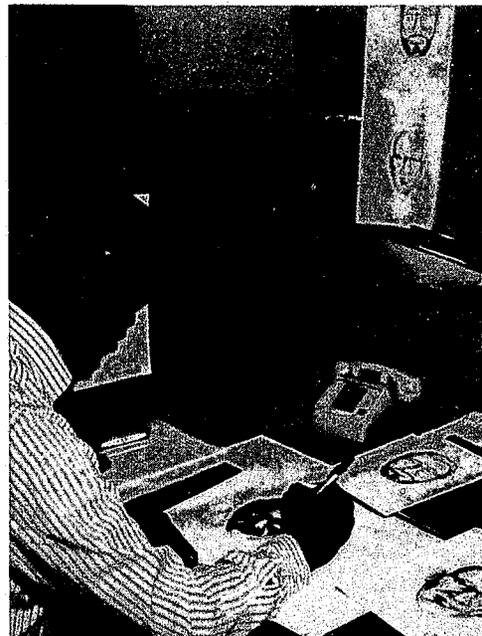

Crimes Against Persons Division

The Crimes Against Persons Division is charged with investigating homicides, assaults, robberies, rapes, abductions, child abuse, and any other crime against a person. This division is comprised of the Homicide, Sex Crimes, and Robbery Units. 1988 brought a wide range of crimes that tested the capability of every member of this division. The larger volume of drugs in the city meant a higher incidence of violent crimes, including robberies, assaults, and homicides.

The detectives utilize various methods to investigate cases, including line-ups, videos, composite sketches, re-creating crime scenes, and special squads. In September of 1988, the two squads assigned to the Homicide Unit were divided into three squads, each made up of one sergeant and eight detectives. This third squad investigates all murder cases not solved within the first few hours after the occurrence. These squads rotate every month, enabling all detectives within this unit to have the opportunity of focusing their attention and skills on solving homicide cases. These efforts have resulted in a clearance rate of 85% of the reported homicide cases.

Fraud and Fugitive Division

Within the Fraud and Fugitive Division are the Forgery/Check, Fugitive Apprehension, and

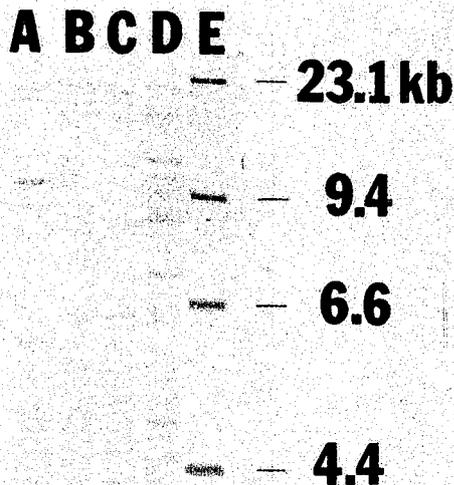

Fraud Units, which have the responsibility of investigating frauds, confidence games, destruction of property, forgeries, shoplifting and embezzlements, telephone harassments, missing persons, and runaway juveniles.

With the influx of visitors to the Kansas City area during the NCAA Final Four Basketball Tournament, division personnel and various elements of the department were instrumental in curtailing the incidences of ticket scalping. A total of forty-six persons were arrested during this operation and a substantial amount of money was seized, a portion of which involved narcotics. Additionally, there was a significant increase in the number of offenses reported that required this division's investigative skills, and as a result more arrests were made.

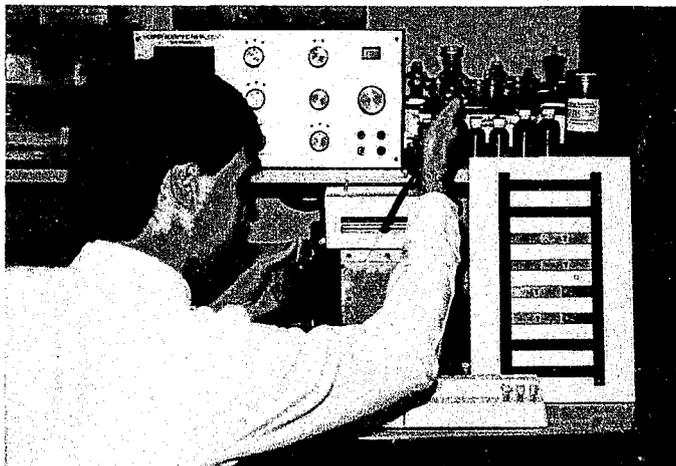

Investigative Services Division

The Investigative Services Division is responsible for the collection and preservation of evidence related to criminal offenses, forensic examination of that evidence, and the administration of polygraph examinations. Within this division are the Investigations Support Unit consisting of the Perpetrator Information Center and the Crime Scene Investigations, Case Review/Court Assistance, Juvenile, and Polygraph Sections as well as the Regional Crime Laboratory which includes the Firearm and Tool, Trace Evidence, Chemistry, and Photo Sections.

The Regional Crime Laboratory has long been recognized for its progressiveness in the forensic sciences. In the early 1970s, after receiving training from Scotland Yard, Kansas City's Crime Lab became one of the first in the country to conduct blood enzyme analysis. Our laboratory was also one of the first in the country to become certified by the American Society of Crime Lab Directors.

That tradition has continued in 1988. Applications research began in the lab and training was received at the Mayo Clinic as we began to evaluate the procedures necessary to apply the analysis of deoxyribonucleic acid (DNA) to criminal cases. DNA analysis is already established in medicine as a valuable tool in researching genetic diseases. Applying those same principles to forensic samples offers the potential of positive suspect identification from body fluids.

Sir Edward Henry, who in 1900 published a book titled *The Classification and Uses of Fingerprints*, would certainly be amazed at the research into suspect identification which is being conducted today. But while DNA profiling represents a quantum leap from the Henry system of fingerprint classification, the philosophy of personal evidence used to solve a crime remains the same.

Lt. Col. Floyd O. Bartz
Commander
Fiscal Bureau

Maj. William H. Trimble
Commander
Information Services Div.

Maj. Michael L. Boyle
Commander
Logistical Services Div.

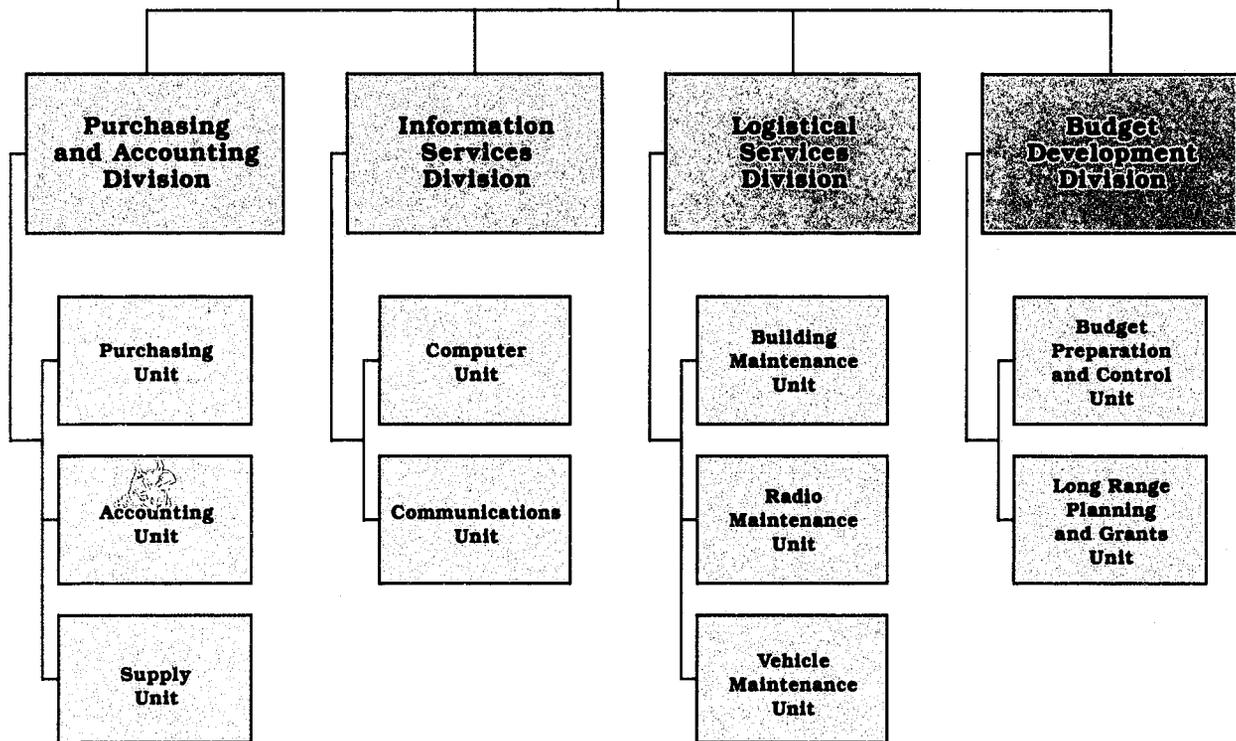

Capt. Richard C. Sayles
Commander
Purchasing & Accounting Div.

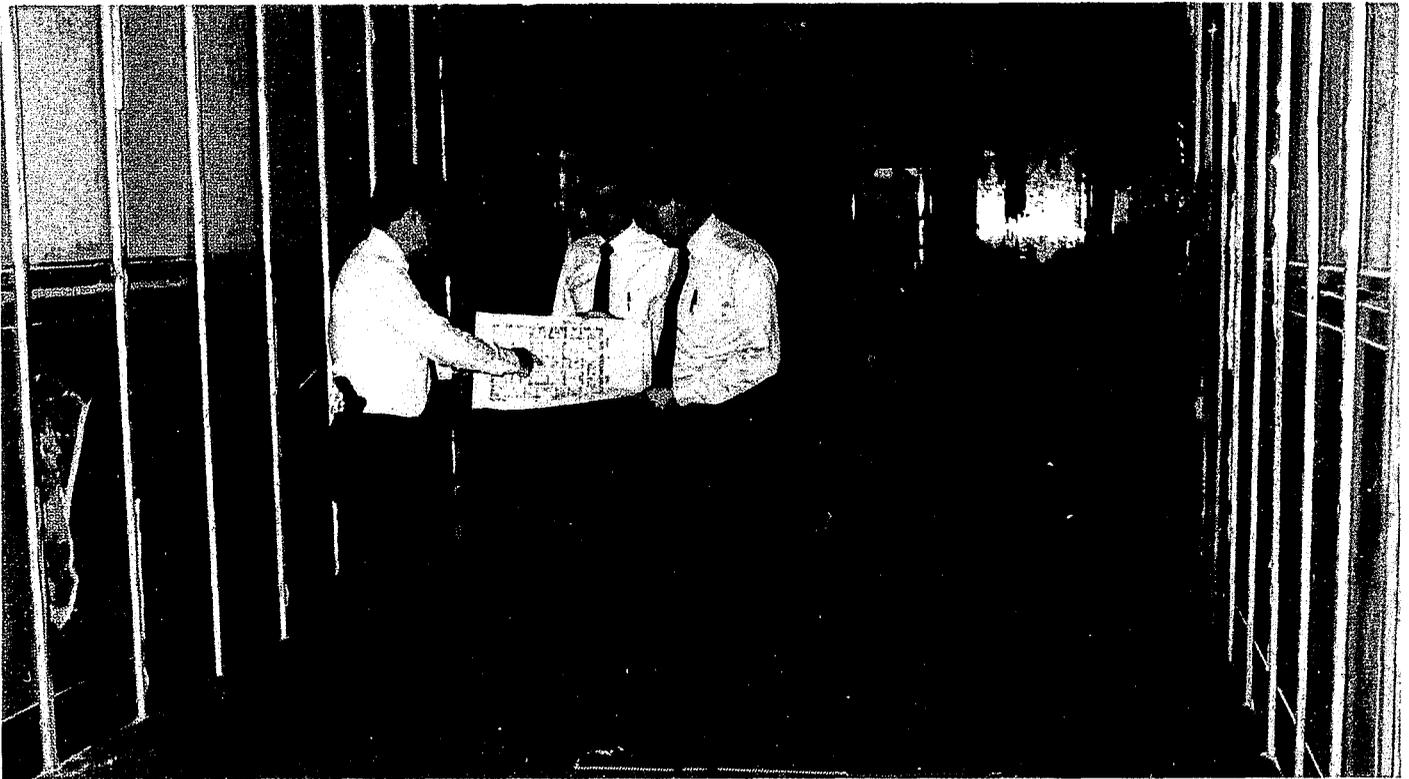

Maj. William T. Hudson
Commander
Capital Improvements

Sgt. Daniel J. Agin
Commander
Budget Development Div.

The Fiscal Bureau, under the command of Lieutenant Colonel Floyd Bartch, is comprised of four divisions: Budget Development; Information Services; Purchasing and Accounting; and Logistical Services. The 257 law enforcement and civilian personnel assigned to this bureau are responsible for budget preparation; proper utilization of fiscal resources; recording all financial transactions; long range planning and grant administration; communications and computer services; and maintenance of department property, vehicles, and radio equipment.

On May 19, 1988, a fire broke out on the fifth floor of the Police Headquarters building, virtually destroying the entire floor and damaging other areas of the structure. This situation heightened the department's need to bring this building up to code, thus paving the way for the department's request for capital improvement bonds to be included on the election ballot. A bond package was proposed which would benefit the city's police and

fire operations, and would substantially increase the capabilities of both departments in serving the citizens.

Throughout 1988, the department made every effort to inform the public of the need for financial support in this project. The bond package was passed on November 8 with over 71% of the voters showing their approval for the funds.

Fiscal Bureau (cont.)

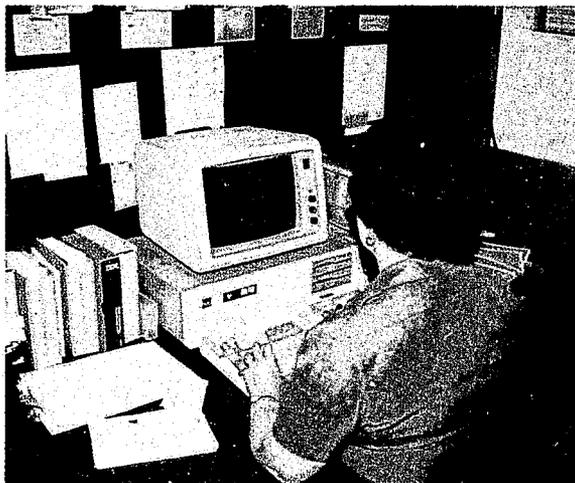

Purchasing and Accounting Division

The responsibility for recording all financial transactions, purchases, and disbursements of materials and services goes to the Purchasing and Accounting Division, made up of the Purchasing, Accounting, and Supply Units. This division maintains a storage of uniforms, office supplies, weapons, ammunition, and other miscellaneous equipment used by the department; purchases standard items and specialty equipment as required; and monitors the purchase of police vehicles.

Many of the records kept by this division are being automated to accommodate the on-going demand for services and supplies. This system will ensure timely records of individual issue, as well as more accurate inventory and usage data to enable more cost-effective management.

Information Services Division

The Information Services Division, made up of the Communications Unit and the Computer Unit, is responsible for providing the communications and computer support necessary to meet the needs of the department. As a result of the May fire, both operations were disrupted for only a very brief period of time, with little or no interruption in service to the community. While all personnel were being evacuated from the building, the Communications Unit was utilizing the Emergency Communications Center (ECC), which was

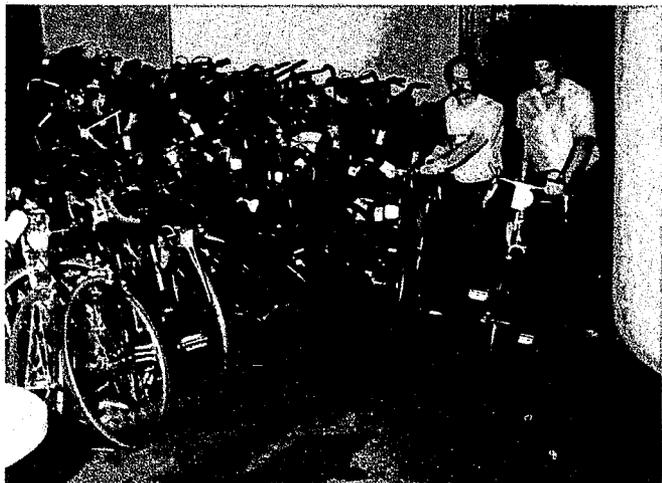

established in 1987 for situations such as this. The Computer Unit, located on the fourth floor, sustained smoke and water damage but was operating again within a short time.

Logistical Services Division

The Logistical Services Division is charged with maintaining and repairing the department's motor fleet, police facilities, and radio electronic equipment. Within this division are the Building Maintenance, Vehicle Maintenance, and Radio Maintenance Units.

During the past year, personnel assigned to the division assisted in storing, transporting, organizing and sorting the items to be sold in the property auction. In addition to their regular duties, members helped in clean-up efforts after

the Headquarters fire, the removal and storage of property from the Robert Berdella residence, construction of additional storage space for property, as well as maintaining the cleanliness and repair of department facilities.

In accordance with the mandatory seat belt law, safety checks were conducted on all seat belts currently installed in the cars, wagons, and jeeps to ensure the safety of department personnel operating police vehicles.

Budget Development Division

The Budget Development Division consists of the Budget Preparation and Control Unit and the Long Range Planning and Grants Unit. In addition to preparing the department's budget, this division is also responsible for applying for available grants. One such grant, through the Missouri Department of Public Safety, has assisted the department in establishing a program of truck inspections to ensure compliance with the various state and federal safety regulations.

During 1988, this division was responsible for informing the Kansas City community of the need for adequate police equipment and facilities, and the need for capital improvement bonds to finance these improvements. With the help of various other elements of the department, a \$39.7 million bond package was developed to include a joint police/fire

communications center, automated fingerprint identification system, renovation of the East Patrol Division station, construction of a new Central Patrol Division station, and upgrading the Headquarters building.

This bond package passed; and due to the magnitude of this project, the Capital Improvements element was established to oversee all the projects requested by the department as well as reconstruction of the fifth floor of Headquarters. The completion date for all projects is targeted for early 1993.

Lt. Col. Rufus Evans
Commander
Administration & Services Bureau

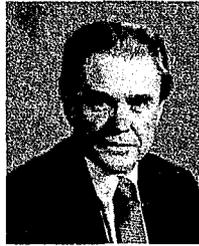

Maj. Robert L. Wesley
Commander
Records Division

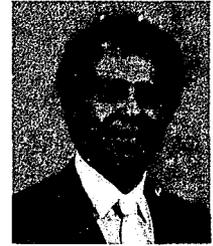

Maj. Dennis R. Shreve
Commander
Training Division

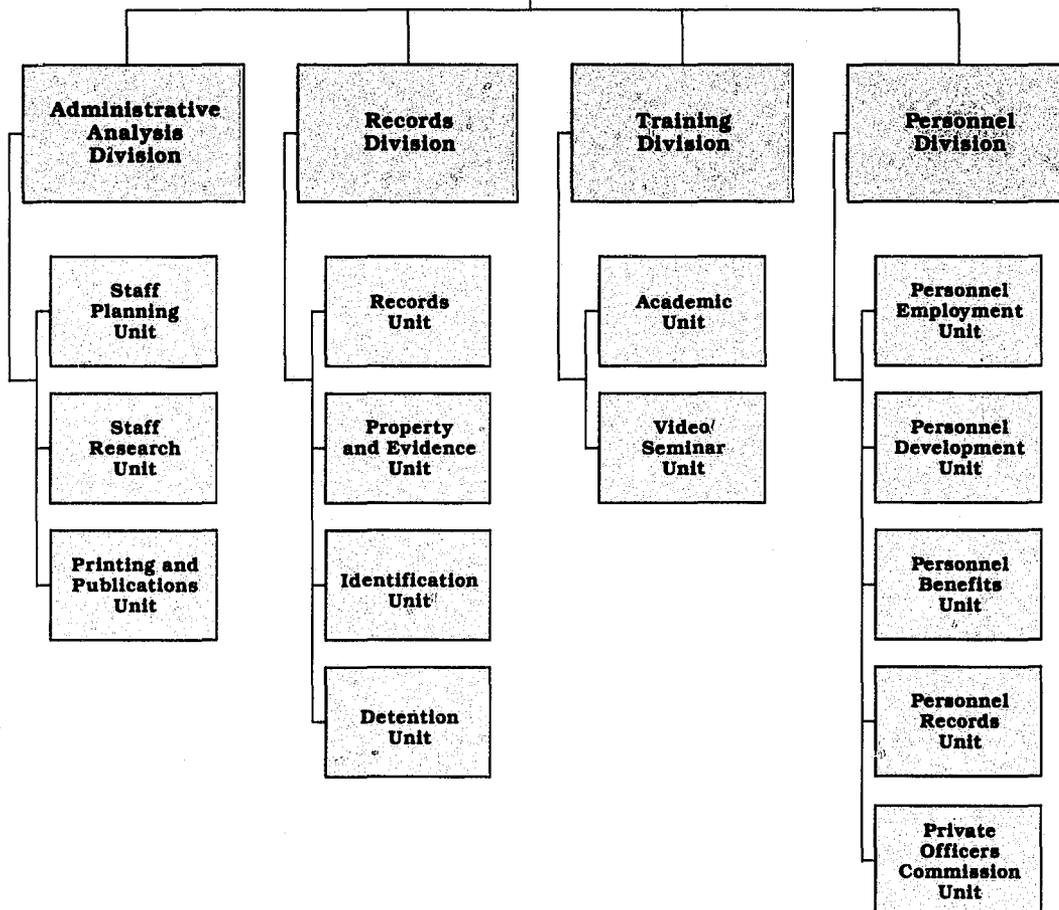

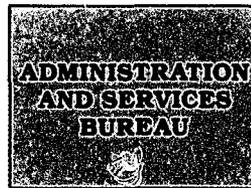

Maj. Arthur F. Barnett
Commander
Administrative Analysis Division

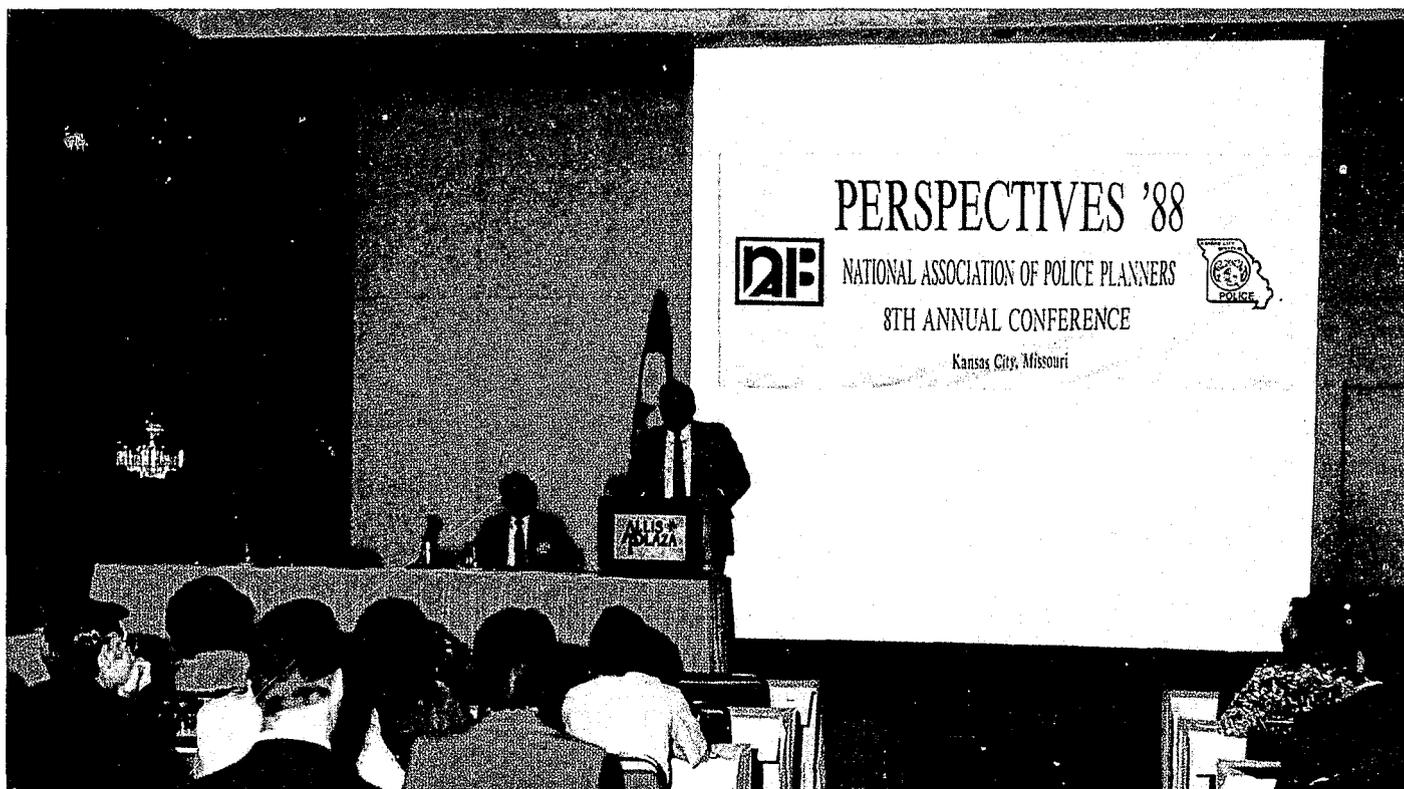

Maj. Gerald A. Kimmis
Executive Officer
Administration & Services Bureau

Maj. Alfred C. Lomax
Commander
Personnel Division

Administration and Services Bureau

The Administration and Services Bureau, commanded by Lieutenant Colonel Rufus Evans, is divided into four divisions: Training, Personnel, Records, and Administrative Analysis. The 204 law enforcement and civilian personnel assigned to this bureau are responsible for providing administrative support to the department; reviewing all matters relating to hiring, training, promotion, and other personnel matters; and planning, researching, and analyzing past, current, and proposed policies, procedures, and programs of the department.

In 1988, this bureau organized and presented the National Association of Police Planners (NAPP) Conference in Kansas City. The response was so favorable upon its completion that Kansas City has been chosen to host the conference again in the future. As a service to other police planning units, this bureau has the task of maintaining a listing of planning and research projects in the form of a Planning Abstract Listing Service book. The information contained in this book is available to NAPP member law enforcement agencies upon request, with over 1000 projects currently listed.

Over the past year, this bureau has brought up-to-the-minute training techniques to all elements of

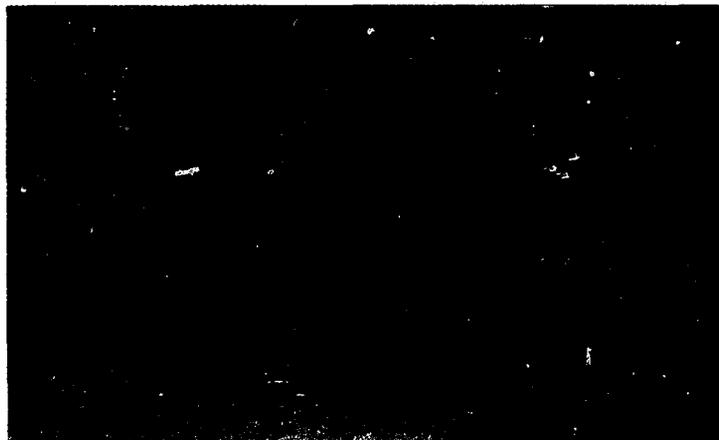

the department, by providing in-service training sessions for law enforcement and civilian personnel. These sessions include a variety of topics such as critical incident training for supervisors and commanders dealing with their response to the scene of an emergency situation, in-service firearms training, and legal issues regarding police procedures and policies.

Administration and Services Bureau (cont.)

Personnel Division

Within the Personnel Division are the Employment, Employee Benefits, Personnel Records, Personnel Development, and Private Officers Commission Units. This division is responsible for all areas relating to personnel matters including: recruiting of law enforcement applicants; testing and processing of all applicants; requests for transfer and promotional processes; job classifications/reclassifications; employee benefits and policies; and maintaining records of past and present employees.

In 1988, this division initiated a recruiting program directed toward military personnel nearing the end of their tour of duty. This was to encourage those persons with military police training to apply their experience and knowledge in a career with the Kansas City, Missouri Police Department. This program

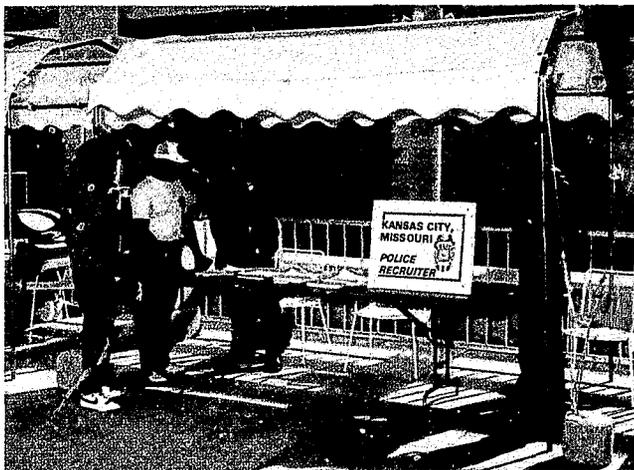

required recruiting trips to numerous military bases in Missouri and Kansas, as well as intensive efforts conducted locally. These programs were so successful that the department received over 1,300 applications for the position of police officer during the past year, of which a large number were military personnel.

This division ensures that all job openings within the department are posted, enabling those qualified members the opportunity to apply. These openings are posted on bulletin boards displayed in various areas of the department.

Records Division

The Records Division consists of four units: Identification, Property and Evidence, Detention, and Records. All reports, arrest warrants, property and evidence, fingerprints, and detentions of arrests are processed through this division. With the passage of the capital improvement bonds in the November election, this division has been involved in the development of specifications, configurations, and selection of equipment for an Automated Fingerprint Identification System (AFIS). The system will enable the department to search fingerprints from arrested subjects and fingerprints from crime scenes in a matter of minutes thereby resulting in greater efficiency.

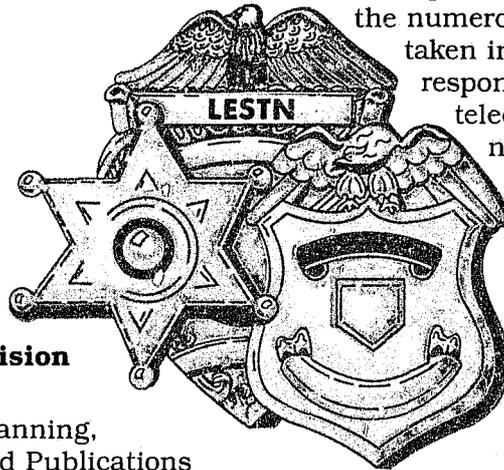

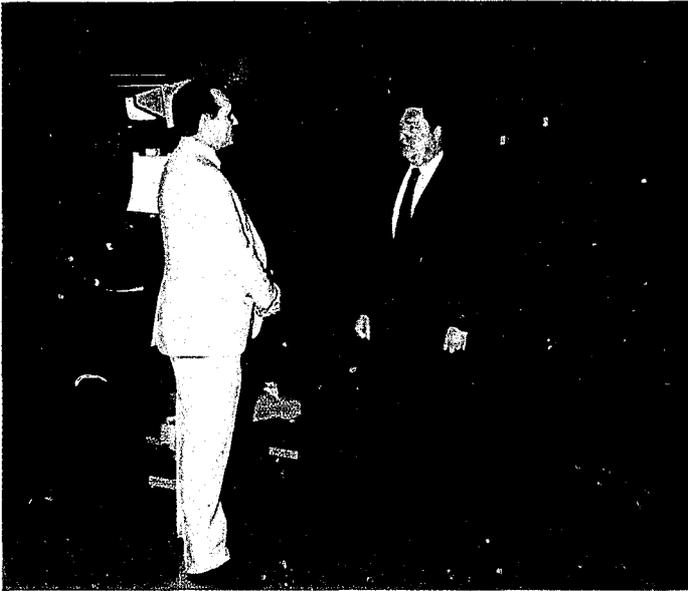

In order to clear space for recovered property and evidence until it is needed or claimed, this division sponsors a property auction each spring. Property which has been held for three years or more and has not been claimed or is not needed for use in an investigation, homicide, or for further charges, is sold at auction with the proceeds going to the department.

Training Division

The Training Division, whose personnel are responsible for providing basic police training for seventy-seven law enforcement agencies in the eight-county metropolitan area as well as additional training for members of this police department, is made up of the Academic Unit and the Video/Seminar Unit. This division provides entry-level training for recruit officers and in-service training in firearms, personal defense, and physical conditioning to sworn police officers, reserves, and private officers.

The Video/Seminar Unit produces video training material, video teleconferences, and broadcasts over the department's closed circuit network. In 1988, this unit was instrumental in helping create public service announcements for local stations, in an effort to heighten the public's awareness of the need for capital improvement bonds. In addition to the numerous projects this unit has undertaken in the last year, its members were responsible for producing several teleconferences that were broadcast nationally and internationally, at no cost to the participants.

Administrative Analysis Division

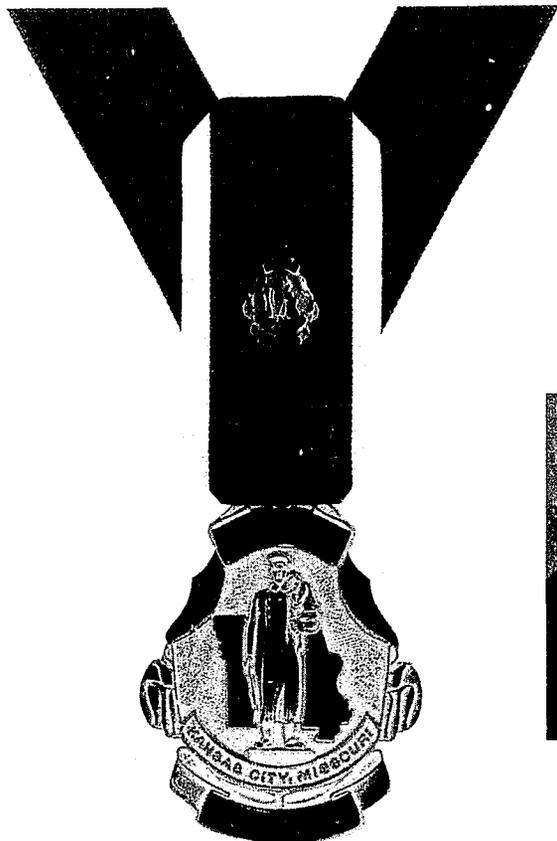

The Administrative Analysis Division consists of the Staff Planning, Staff Research, and Printing and Publications Units. This division is responsible for conducting studies and proposing plans to resolve problems and meet the needs of the department. Throughout 1988, personnel assigned to this division revised policies and procedures to maintain the high standards of the department and implemented new changes to enhance the capabilities of the department.

During the past year, this division undertook the task of designing and printing a new logo for the Law Enforcement Satellite Training Network (LESTN), in conjunction with the Video/Seminar Unit and the Federal Bureau of Investigation. LESTN is responsible for the teleconferences, presented jointly by this department and the FBI, which are televised to various policing agencies nationally and internationally. The teleconferences produced by these two groups represent a quality of programming that is recognized throughout the country as being the leader in the field of teleconferencing. The LESTN logo will represent that same quality.

Grant Projects

55-65 MPH Compliance

Grantor - Missouri Division of Highway Safety

Amount - \$40,000

The 55-65 MPH Compliance grant is totally funded through the Missouri Division of Highway Safety. The objective of this grant is to increase speed compliance on interstate roadways within the corporate limits of Kansas City. This is accomplished by maintaining a high level of speed enforcement. The grant provides money for supplemental overtime deployment only, and is a continuous grant.

Sobriety Checkpoints

Grantor - Missouri Department of Public Safety

Amount - \$45,450

The Sobriety Checkpoints grant is totally funded through the Missouri Department of Public Safety. The objective of this grant is to deter drunk driving through actual arrest and increased perception of risk or arrest. The grant provides money to be spent on overtime for officers and one sergeant to conduct roadside checks of the conditions of drivers. Along with the overtime money, the grant has provided money for the purchase of new breath testing equipment. This is a continuous grant that was initiated in 1986.

Motor Carrier Safety Assistance Program

Grantor - Missouri Department of Public Safety

Amount - \$394,035

The Motor Carrier Safety Assistance Program (MCSAP) is funded through the Missouri Department of Public Safety and local funding. The total amount of this grant is \$394,035 of which 80% is received from the state and the remaining 20% is matched by local funds. The objective of the MCSAP grant is to increase the number of inspections of commercial vehicles and hazardous materials and provide training for all officers in the area of hazardous materials. Grant monies provide salaries for both full and part-time inspectors including overtime. Travel and training expenses are financed also. All supplies and equipment including a new mini-van were purchased with grant funds.

Crime Laboratory Assistance Program

Grantor - Missouri Department of Public Safety

Amount - \$85,260

The Crime Laboratory Assistance Program (CLAP) grant is funded through the Missouri Department of Public Safety. The total amount of the grant is \$85,260 of which 50% is received from the state and the remainder is matched by local funds. Local funds must be derived from income received from Missouri user agencies. The objective of this grant is to increase the quantity and quality of all physical evidence examinations and, as an area of emphasis, increase the number and depth of serological examinations. The CLAP grant monies are spent in the following manner: salaries for two serologists on a contract basis; travel to DNA training at the Serological Research Institute, Richmond, California; DNA materials and supplies; and new equipment, i.e., a scanning electron microscope. With this grant, the forensic support of the Kansas City community is improved. The more sophisticated techniques of the analysis of blood, semen, and body fluids from stains found at crime scenes provide for one of the finest forensic serology systems in the country.

Narcotics Trafficking Enforcement Program (OCN)

Grantor - Bureau of Justice Assistance	Basic OCN	Amount - \$300,000
	Operational Support	Amount - \$ 80,000
	Financial Support	Amount - \$ 33,650

The Organized Crime - Narcotics Trafficking Enforcement Program (OCN) is funded by the Bureau of Justice Assistance through the Institute of Intergovernmental Research. The objective of this grant is to identify and document the organization of crack cocaine distributors, to determine the leaders of the organization, and also, to develop and prosecute conspiracy cases federally as a continuing criminal enterprise. Initially the Basic OCN grant provided monies for: confidential expenses; purchase/evidence (drugs, firearms, stolen property, etc.); and purchase/information (informant fees). The grant was then amended and modified to include both Operational Support and Financial Support. Operational Support is to be used for overtime for investigator and primary supervisor for selected cases. Financial Support covers two areas: computer equipment consisting of an IBM RT computer system, software, and training in the use of this machine; and training in financial investigations. The OCN grant was again amended to provide additional monies for the Basic OCN.

Kansas City Narcotic Action Project-Operational Component

Grantor - Missouri Department of Public Safety	Amount - \$474,059
--	--------------------

The Kansas City Narcotic Action Project-Operational Program grant is funded through the Missouri Department of Public Safety. The total amount of this grant is \$474,059 of which 54% has provided equipment to enhance officer safety and productivity. This equipment included portable radios, video equipment, transmitters, recorders, office equipment, and other items necessary for successful undercover operations. The remaining 46% is comprised of salary expenses for one sergeant and six detectives to expand the Drug Enforcement Unit. The objective of this grant is to negatively impact organized narcotic manufacturing, importation, and distribution by identifying and arresting distributors and by interdicting movement of illegal drugs, stolen property, and money used in those processes. This is a one-year grant.

Kansas City Narcotic Action Project-Laboratory Upgrade

Grantor - Missouri Department of Public Safety	Amount - \$26,293
--	-------------------

The Kansas City Narcotic Action Project-Laboratory Upgrade grant is funded through the Missouri Department of Public Safety. The total amount of this grant is \$26,293 of which 75% is received from the state. The remaining 25% is matching funds from seized and forfeited monies. The objective of this grant is to fund the salary expense of one chemist to analyze Special Investigations Division examinations. One forensic chemist has been hired for this purpose. This is a one-year grant.

Drug Use Forecasting

Grantor - National Institute of Justice	Amount - \$35,560
---	-------------------

The Drug Use Forecasting grant is totally funded by the National Institute of Justice. The objective of this grant is to test arrestees for illicit drug use for statistical purposes only. Throughout the year, one thousand arrestees are tested. Each individual tested receives either candy or cigarettes for his or her volunteer participation. The grant money provides for three contract employee interviewers, one contract employee supervisor, and two detention facility officers on an overtime basis. Along with the salaries, the grant money is also spent on necessary supplies.

*Figures based on 1980 U.S. Census population of 448,159.

Readers are cautioned against drawing conclusions from comparisons of crime figures between communities without considering the factors which will affect the amount and type of crime. Some of those factors are: density and size of the community and metropolitan populations, economic status and mores, attitude of the public toward law enforcement problems, and the administrative and investigative efficiency of the law enforcement agency.

Controlled Substance Enforcement

During the year 1988, \$191,590.08 in federal, local, and grant funds were expended against the drug war in Kansas City, Missouri and the surrounding metropolitan area. The investigations focused on the importation, distribution, and manufacture of controlled substances. This investment was returned in part, by the recovery of controlled substances with a value of \$3,023,575. This includes the interdiction and seizure of ten kilograms of cocaine on May 13, 1988, the largest seizure in the city's history. Along with controlled substances, firearms with a value of \$14,468 and other contraband property valued at \$1,009,521 were recovered. The total value of \$4,047,564 represents an increase of 186% over the controlled substance, firearms, and other contraband property recovered by the Drug Enforcement Unit in 1987.

A total of 160 cases involving 239 purchases of controlled substances were investigated in 1988. Of these purchases, 100% were from the priority target group of PCP, heroin, cocaine, LSD, and methamphetamine.

The Drug Enforcement Unit received 1,191 controlled substance cases from other elements of the department. Of the cases processed, 386 or 32% resulted in charges being filed at the federal, state, city, and juvenile court system levels.

During the year, the Drug Enforcement Unit expanded their joint local/federal task force target beyond the Jamaican distribution problem to include: a Cuban distribution organization, California street gang distribution organizations, and several local distribution groups.

The efforts of investigative personnel resulted in the virtual elimination of entire networks of some traffickers as exemplified by the complete shutdown of one local crack organization when seventeen key figures were indicted. The hierarchy of this organization was tried and convicted in federal court and each subject received a sentence of 29 to 65 years with no parole.
