P.O. Box Y, State Capitol Juneau, Alaska 99811-3100 Mail Stop 3100 (907) 465-3991

#### December 29, 1987

MEMORANDUM

TO: Representative Niilo Koponen

ATTN: Shari Paul

FROM: Karla Hart KHL Legislative Analyst

RE: Education Programs in Prisons Research Request 88.070

You requested this agency to provide the following information on education programs within prisons:

- a history of education in Alaska prisons;
- the Bureau of Indian Affairs' (BIA) contribution to the education of Native inmates housed in Alaska prisons;
- a description of education programs offered in federal prisons; and
- examples of outstanding prison education programs in other states.

In responding to your request, I spoke with Ben Fewell, Program Coordinator, Department of Corrections; Robert Pringle, Area Education Program Administrator, BIA; U.S. Bureau of Prisons staff; U.S. Department of Education staff; and Alaska Department of Education staff.

# Education in Alaska Prisons

Education in Alaska prisons includes Adult Basic Education (ABE) and General Equivalency Diploma (GED) programs, life skills, vocational education, postsecondary education, and practical work assignments--all intended to provide inmates with useful skills to help in reforming their behavior and Representative Koponen December 29, 1987 Page 2

eventual transition (for many) to life outside prison. At this time, programs vary within each institution. Mr. Fewell said that he hopes to standardize the programs offered within all of the prisons in the future.

Compiling a history of education within Alaska prisons has proved to be difficult. In 1984, Corrections was reorganized as a department from its prior status as a division within the Department of Health and Social Services (DHSS). Barbara Lacher, Alaska Department of Education (DOE), said that prior to 1982 education programs were provided by private vendors or the University of Alaska under contracts administered by the Division of Corrections. From July 1, 1982 through June 30, 1986, the education programs within prisons were administered through a cooperative agreement with the Office of Adult and Vocational Education, DOE. A copy of the FY 86 agreement is included in Attachment A.

According to Mr. Fewell, the legislature cut the FY 87 funding for education programs in prisons from \$990,000 to \$371,000. The accompanying legislative intent stated that the DOE should administer the adult basic education program through vendor contracting. However, Mr. Fewell said that DOE was not willing to provide the services after the budget was cut and the Department of Corrections resumed responsiblity for education services. Currently, education is provided by trained employees of the Department of Corrections and through some vendor contracting. Inmates that enroll in postsecondary education courses must bear the expenses, as State funding is no longer available.

#### Cleary Settlement Requirements for Education

The 1983 Cleary Settlement Agreement (Section Q--Rehabilitation Treatment) states that, providing there is inmate need, both GED and various simultaneously taught college, vocational or special interest courses should be offered. It also provides that all inmates shall have the opportunity to enroll in a college level degree program based upon university admission requirements and complimentary requirements established by the Department of Corrections and that college level degree programs be offered at the Fairbanks, Juneau, and other correctional institutions.

\_\_\_\_

<sup>1</sup>Mr. Fewell, previously with the LearnAlaska Network, Department of Education (DOE), assumed his position with Corrections in the fall of 1987. In our discussions, he mentioned many ideas he is exploring to improve the education programs within Alaska prisons and expressed interest in discussing them with members of the legislature.

Representative Koponen December 29, 1987 Page 3

Bureau of Indian Affairs' Contribution to Native Inmates' Education

Mr. Pringle said that BIA funding for education is available only to fulfill needs unmet after all other funding sources have been exhausted. He explained that BIA contracts with independent providers throughout Alaska to deliver education services within specific tribal service areas and that services are provided only to Natives who are enrolled members of tribes. He said that in some cases, BIA funds may be used to deliver Adult Basic Education services to Native inmates; however, BIA has no programs specifically targeted at these individuals.

#### Education Programs Offered in Federal Prisons

The Federal Bureau of Prisons has combined traditional education programs, vocational education and prison industries to form the Industries, Education and Vocational Training Division. A brief description of their programs and services is presented in a brochure entitled "New Partnerships" (Attachment B).

#### Outstanding Prison Education Programs in Other States

In responding to your request for information on outstanding prison education programs in other states, I am attaching "Colleges with Fences: A Handbook for Improving Corrections Education Programs".<sup>2</sup> The publication provides strategies and implementation suggestions for improving programs within prisons.

I hope this information in helpful. If you would like more detailed information on any of these programs or have additional questions, please call.

ATTACHMENT A Cooperative Agreement Between the Department of Corrrections and Department of Education

#### COOPERATIVE AGREEMENT BETWEEN THE Department of Corrections and Department of Education Office of Adult and Vocational Education

#### PURPOSE

The purpose of this agreement is to set forth a working agreement between these two state agencies, and their representatives, for the provision of education programs within the state adult correctional facilities.

#### GENERAL AGREEMENT

It will be our joint policy to provide education programs in all adult correctional facilities within Alaska. Programs should conform to established statutes, regulations and policies of both agencies.

#### SPECIFICALLY

I. Department of Corrections shall:

Provide funding through a reimbursable services agreement (RSA) to the Department of Education. The RSA shall provide the authority for the Department of Education to expend funds in grants and administration as agreed to with a written plan drawn between the Program Coordinator's office of the Department of Corrections and the Office of Adult and Vocational Education, Department of Education, delineating a specific service plan for the correctional facilities statewide. All Changes in the plan for services must be coordinated between the two (2) offices named above.

II. The Department of Education, Office of Adult and Vocational Education shall:

Administer and direct the Corrections education programs. Program administration shall conform to the following parameters:

- a) Provide a full time program administrator.
- b) Provide clerical assistance necessary to the program administration.
- c) Provide technical assistance to each facility in the following areas:
  - 1) The Alaska Career Information System (AKCIS).
  - 2) Administer the education program including the solicitation of bids to provide programs. Copies of all successful bids shall be provided to the Program Coordinator's Office, Department of Corrections, within two (2) weeks of the award.

- 3) Negotiate RSA's for post-secondary education to include correspondence study and provide copies of all RSA's to the Program Coordinator's Office, Department of Corrections, within two (2) weeks of final approval.
- 4) Administer special education programs and provide a description of all special education programs to the Program Coordinator's Office, Department of Corrections, monthly.
- 5) As funding permits, commence development of a vocational program curriculum and provide a copy of the plan for vocational program curriculum development to the Program Coordinator's Office, Department of Corrections, as it presently exists with monthly updates thereafter.
- 6) Develop and maintain a computer data base of the numbers of students and classes by correctional facility.
- 7) Provide Corrections with monthly object code summaries of educational expenditures.
- 8) Act as the agent for Corrections in the event of a legislative audit.
- 9) Respond for Corrections to any request for information from the media regarding education.
- Respond for Corrections on education matters pursuant to any litigation.
- 11) Provide legislative testimony upon the request of the Department of Corrections.
- 12) Provide monthly audio conferences with all education vendors, correctional centers, and the Program Coordinator's Office.

This agreement is entered into this \_\_\_\_\_\_ day of \_\_\_\_\_\_, 1985, and is to remain in effect for/until \_\_\_\_\_\_\_except that either of the parties may give

days notice to the other, signifying a desire to cancel or amend this agreement.

expanding those options.

Morman a Carloon Norman A. Carlson Director

This brochure is designed to acquaint interested individuals with the organization and functions of education programs for inmates in the Federal Bureau of Prisons. It also describes the new partnerships that have been established both within the Bureau with the administrative reorganization that placed the Education Division within UNICOR, and also between the Education Division and the outside communities that it serves. This information is offered in the hope that the experience of the Federal Bureau of Prisons will be instructive to others charged with the important responsibility of providing meaningful programs for the incarcerated.

Delivery of Education Services
Trends and Challenges
Appendixes

Since its establishment in 1930, the Federal Bureau of Prisons has recognized that education, vocational training, and work experiences are powerful influences in helping offenders shape more productive lives after their release.

Consequently, the Bureau has attempted over the years to provide such experiences to the varied and changing populations entrusted to its care. Recent developments now permit the provision of these services in a more integrated manner.

**BACKGROUND**. Before 1930, education, vocational training, and work programs in federal prisons consisted of basic literacy training, a few correspondence courses, and work programs based on institution needs. It was not until a centralized Federal Bureau of Prisons was established in 1933 and Federal Prison Industries (UNICOR) was founded in 1934 that the programs changed. The Bureau's first director, Sanford Bates, established a

comprehensive educational program.

Since those early days, the education and training opportunities within the Bureau have expanded dramatically. Academic education programs have been expanded, vocational training facilities have been built, recreation programs have been developed, and libraries have been established. Trained education supervisors have been hired at each institution and the number of teaching and supervisory staff has increased. Inmates are now tested to assess their educational and vocational levels of achievement as well as their aptitudes to benefit from programs designed to enhance their present skills.

The establishment of prison industries provided paid employment and training to federal inmates for the first time. Industrial employment serves to eliminate inmate idleness through productive work experiences and provides funds and services for vocational training for inmates. In addition, UNICOR serves as a motivating force to expand the educational system. Through employment in industries, opportunities are provided to acquire knowledge and skill in trades and occupations that assist inmates upon their release.

UNICOR has recently combined resources with the education branch of the Federal Bureau of Prisons to produce a series of innovative vocational training projects in fields that offer greater than average job growth during the current and ensuing decade. All programs are certified by vocational training schools, junior colleges, or private accrediting agencies.

The education staff at each Bureau institution offers a wide variety of courses geared to help offenders learn to cope not only with personal problems but also to develop their abilities to become productive citizens.

**OFFENDER PROFILE.** Over 11,000 inmates enroll in educational or occupational training programs on an annual basis. The average daily population figure for the FBOP during fiscal year 1984 was 32,833. Of this number 31.5% were black, 2.0% American Indian, and 0.7% Asian and other minorities. Of the 65.8% who were Caucasian, 18.7% percent were of Hispanic origin. The average age of federal inmates is 35.6 years, and the average time served is 15.6 months.

Inmates represent a broad educational spectrum. The typical offender reads at a 7th grade level and functions academically at approximately the 9th grade level. Most inmates lack a marketable skill. Approximately 52.6% are high school graduates while many have completed college or other postsecondary education courses. This wide variation in offender ability and skill level presents a challenge to the education staff as they strive to be responsive to each offender's particular needs.

# **EDUCATIONAL GOALS OF THE FEDERAL BUREAU OF PRISONS.** Based on identified offender needs, the Federal Bureau of Prisons has established the educational and occupational goal of providing all inmates with opportunities to:

- Acquire educational skills commensurate with his or her need and ability through offerings ranging from basic to postsecondary programs
- Acquire or improve a marketable skill through one or more training programs which include the performance of live work which provides a product or service for use by the institution, UNICOR, or another agency and/or employment in the institution or prison industries

3

 Use leisure time more positively through directed leisure activities. Academic study, job training, life skills and positive leisure activities all combine to better prepare the inmate for responsible citizenship outside the institution. The following briefly describes the seven different educational activities available to offenders.

**ADULT BASIC EDUCATION** (ABE) programs are designed for the approximately 17% of the federal inmates who have less than a sixth grade education. These inmates are required to enroll in an ABE program for 90 days. Additionally, only those inmates who successfully complete an ABE program are eligible for UNICOR or other paying assignments above the entry level pay grade. Monetary incentives, intensified tutoring, and other positive reinforcements are also used to encourage enrollment in and completion of ABE courses.

ABE is often taught in a Learning Center where students learn at their own pace using programmed instructional materials, audio-visual aids, computer-assisted instruction, and individualized personal instruction. Inmates or community volunteers often serve as educational aides.

Special provisions are also made to accommodate the handicapped and those identified as having a learning disability. Since the ABE program is already highly individualized, such modifications permit the handicapped and learning disabled student to be

integrated into the regular program. Adaptations include the provision of special materials such as large print, Braille, or large print typewriters, interpreters for the hearing impaired, readers for blind students, note-takers for the writing impaired, and other individualized instructional techniques as necessary. Policy requires that all institutions now have either a reading specialist or a special education instructor on staff.

# **GENERAL EDUCATIONAL DEVELOP-**

**MENT** (GED) is designed for the approximately 16,000 inmates who lack a high school diploma. To meet their needs, high school equivalency courses and the GED examinations are offered. The traditional classroom and the Learning Center approach are used to prepare inmates for the GED examination. GED instructional materials and the GED test are also available in Spanish, French, large print, Braille, and audio cassette.

# ADULT CONTINUING EDUCATION

(ACE) courses are open to inmates in most federal prisons through contract arrangements with local school districts and/or community colleges. Courses are offered both on a non-credit and credit basis. Continuing education courses usually do not require that students be high school or college graduates. The courses, similar to those offered in many communities nationwide, are designed to enrich inmates' general knowledge or to enable them to learn new skills. Some courses are designed for "brush up" in particular subjects or to meet a special interest, such as speed reading, contemporary issues, or foreign languages. English as a Second Language (ESL) is also offered in institutions where a significant number of inmates speak Spanish as their primary language. If courses that lead to a high school diploma are offered, they are included in the continuing education category.

OCCUPATIONAL EDUCATION (OE) programs provide skill training in a wide variety of disciplines and skill levels, ranging from entry level to highly skilled occupations, in an effort to provide each inmate with a marketable skill. An estimated majority of federal offenders are unskilled at the time of commitment to prison. They have the opportunity to upgrade their skills through instruction and work experience, career orientation, and vocational training. Program options cover a wide range of areas such as the general exploration of the world of work, formal vocational training, apprenticeship programs, on-the-job training in institution offices, shops, and prison industries, and work release into the community.

The most significant recent innovation in occupational education has been

the development of pre-industrial training programs. These programs are designed to reduce inmate idleness without compromising factory productivity or safety by providing an initial orientation to the UNICOR world of work. The programs provide hands-on skill training before an inmate takes his or her place in production. They also provide refresher, continuing, or advanced training as needed during production. In addition to classroom work, the pre-industrial programs make use of UNICOR factories during non-production evening and weekend hours for handson experience with the equipment. In this phase of their training, inmates perform actual production work under close supervision which is then checked for compliance with standards and eventually sold to customers.

In 1984, the Board of Directors of Federal Prison Industries authorized the expenditure of \$3 million for innovative projects in vocational training. These innovative model programs, described in detail later in this booklet, provide training in high growth occupations.

**POSTSECONDARY EDUCATION** is for inmates who have successfully completed high school and want to further their education. Courses are provided on the basis of inmate interest, need, and ability to succeed in college. On-site programs developed by institutions of higher learning, correspondence courses, and study release are available to meet inmates' needs for postsecondary education.

Under Bureau policy all inmates must pay for college courses. An institution may pay up to one-half of the cost if a student is unable to develop personal resources and if the inmate's classification team approves the college course as an appropriate program goal.

**SOCIAL EDUCATION** programs consist of planned learning activities that assist inmates in their adjustment to the institution, their personal growth, and their ability to cope with problems encountered in society upon release. The courses are designed to develop competency in "life skills" connected with family relationships, household management, job seeking, consumer law, and so forth.

# **RECREATION AND LEISURE ACTIVI-**

**TIES** are sufficiently diversified so that most prisoners find something of interest. Recreation specialists design programs so that inmates can improve their physical and mental health, improve interpersonal skills, reduce stress, and learn to use their free time constructively.

Intramural sports include softball,

baseball, basketball, and volleyball. Weightlifting, handball, soccer, track, and physical conditioning and weight reduction are also important physical activities for inmates. Inmates and community volunteers actively serve as umpires and coaches, and many community athletic teams come into the prisons to compete with institution teams.

Hobbycraft programs also provide outlets for artistic expression. Inmates pursue a variety of arts and crafts including ceramics, painting, woodworking, and leather craft. Some completed art works are sold by inmates through the institution visiting room program and proceeds are returned to the inmate.

One particular program, artist-in-

residence, is funded jointly by the Federal Bureau of Prisons and the National Endowment for the Arts. Professional artists are employed, on an experimental basis, for one year in selected institutions to establish visual or performing arts programs and to pursue their own art form in the prison setting. Approximately twenty-five federal prisons have now participated in this program and most have continued all or a portion of the experimental effort.

Increasingly, emphasis is being placed on leisure programs as important tools in helping inmates cope with the psychological impact of incarceration and to help maintain good health as it affects institution life and job performance.

As in any education system, a variety of support services, such as testing, counseling, and data management, must complement the actual delivery of teaching programs. This section will describe these services and their impact on offender participation and achievement.

**TESTING.** During their orientation period, all English-speaking prisoners (except pre-trial, study and observation, and sentenced aliens with a deportation detainer) take the Stanford Achievement Test (SAT) to determine their academic achievement level. Other appropriate tests are administered to individual inmates if further testing is required. The Spanish version of the Comprehensive Test of Basic Skills (CTBS) is administered to those inmates for whom Spanish is the primary language.

**EDUCATION REPRESENTATIVE.** During orientation, an education representative

meets with each new inmate to help him or her establish realistic academic and occupational goals and to map an education program. Program plans are periodically reviewed to ensure that the original goals continue to be compatible with the needs, capabilities and interests of the inmate. If prisoners choose to do so. they can meet with an education representative to discuss education related problems. These representatives help inmates meet individual goals

and inform them of new programs and opportunities.

**IN-HOUSE PROGRAMS.** Approximately 95% of all education programs are offered within the institutions. In an effort to enhance participation and motivation. education facilities are modern in design and pleasant in appearance, thus providing an atmosphere conducive to learning. Also, most institutions have upto-date audio-visual materials and equipment to facilitate the education process. Nontraditional teaching methods such as individualized instruction, computers, and instructional television are successful with many offenders who have failed in traditional classroom settings. Education programs maximize the use of individualized learning procedures and materials, and inmate tutors often serve as education aides and help to increase student-teacher contact. The education departments are open up to 12 hours a day on a year-round basis; work programs operate up to 8 hours a day.

**COMMUNITY RESOURCES.** Many education and training programs are strengthened through services provided by community-based educational institutions. Some are within walking distance of the prison while others require transportation to reach. Universities, twoand four-year colleges, and vocational training schools provide accredited academic and occupational instruction. Courses are offered both inside and outside the institution depending on the custody level of the inmate population. Study release enables carefully selected inmates to attend local education facilities during the day and return to their respective institutions at night.

The community also participates in the department's activities by providing volunteers who give their time to organize and direct leisure time programs and serve on advisory groups inside the institutions. Citizens are active in a wide variety of inmate organizations including such groups as Alcoholics Anonymous. Toastmasters, Jaycees, and in religious, athletic, and recreational activities. From time to time, these same volunteers arrange for qualified inmates to join them in the community for special programs sponsored by their respective organizations. Community groups and individual volunteers are indispensable in providing assistance for the many social, educational, recreational, athletic, and religious activities available at federal prisons.

# LAW LIBRARIES AND LIBRARY SER-VICES. The Federal Bureau of Prisons has long recognized the right of inmates to have access to the courts and to legal

research material. Thus, the Bureau has

provided law libraries for many years. In 1977, the types of publications available were widely expanded to meet the requirements of the Supreme Court decision, **Bounds v. Smith**.

A trained staff member is present on a part-time basis to help offenders find appropriate resource materials. Staff is responsible for ordering and maintaining all law library materials.

Federal institutions also provide general library services, sometimes including a formal library from which inmates check out books of their choice. In many instances, library services are available through the auspices of state, local, or university libraries. Books are ordered by mail, by special inter-library loan arrangements, or from bookmobiles visiting the institutions. Generally, there is no charge for these services.

Recently published paperback books are purchased on a quarterly basis by many institutions and large quantities of surplus paperbacks are also donated from the community. Paperbacks are usually distributed to the housing units for easy access. Library services are under the general supervision of a credentialed librarian in the Bureau's Central Office who is available for consultation and technical assistance to all institution staff.

OFFENDER PARTICIPATION AND ACHIEVEMENTS. The Inmate Programs Reporting System (IPRS) is an automated performance measurement system that monitors inmate program involvement and performance. Through IPRS, inmate program plans, progress and achievements are documented and updated.

The IPRS data is used as a management tool to determine each institution's funding and programming needs. The data is also used to measure the degree of success of the Bureau's educational efforts.

Offender participation in the many available programs has increased dramatically (see appendix 2, "Inmate Completions, Fiscal Years '80–'84). This increase is expected to continue as the new partnership among education, industries, and the community is strengthened and additional avenues of interrelationships are explored.

ORGANIZATION STRUCTURE AND RESPONSIBILITIES. In 1984, over 500 staff were directly involved in administering and providing education, training, and leisure programs for federal inmates. In the past fiscal year, the Industries, Education, and Training Division was established within the Bureau to coordinate these related programs and services.

Prior to 1974, institution education departments were directly accountable to the Bureau's Central Office in

Washington, D.C., where a professional staff provided overall program administration. In 1974, the Bureau of Prisons established five regional offices, each with an education administrator. These administrators monitor education, training, and leisure activity services at the institutions within their regions. They also provide planning and program assistance.

The Central Office staff is now responsible for overall budget development and implementation, policy development, definition and maintenance of performance standards, in-service staff training, and the identification of new instructional materials, methods, and related resources. Institution supervisors of education choose their own teaching materials and design their own programs within the standards established by the Central Office and in consultation with the regional education administrator.

**FUNDING.** During fiscal year 1984, expenditures for general and occupational education and for leisure activity programs were in excess of \$23 million. Funding comes from two sources: earnings (profits) from Federal Prison Industries and congressional appropriations.

and Challeng

In 1983, education in the Federal Bureau of Prisons was placed under the same organizational umbrella as prison industries. This new partnership places equal emphasis on job training, work, and education; all play a role in providing inmates with the best possible post-release survival skills.

"Project \$3 Million" was established in an effort to strengthen vocational education throughout the Federal Bureau of Prisons. Under the program, UNICOR sponsors skill training programs that meet special, rigorous criteria: service to the institution, UNICOR, or other agency; training for highly marketable jobs; community involvement in designing, delivering, and certifying the skill training through voluntary or contractual participation; innovative training methods; and critical evaluation of the overall program. Some 46 programs are currently in place in over 30 institutions and provide training for occupations

ranging from entry level to advanced technology. Typical of the programs are the following:

**OPTICS.** An optics training program, at the Federal Correctional Institution Butner, North Carolina, is fully integrated with an apprenticeship program. Classroom instruction is provided on the theory of human optics and lens grinding. After completion of the academic program, trainees assume paid apprenticeship jobs in a new UNICOR optics

factory. Eye glasses are manufactured for all inmates within the Federal Bureau of Prisons and for some patients in Veterans Administration hospitals. The apprenticeship program leads to certification by a state licensing board.

**CULINARY ARTS.** Various kinds of food service programs are operating at the Federal Correctional Institutions at Fort Worth, Texas, and Lexington, Kentucky, and at the Metropolitan Correctional Center, Miami, Florida. Students are involved in various phases of culinary arts training: food service preparation and presentation, short-order cooking, and cooking and baking.

BUSINESS INFORMATION CENTERS AND DATA PROCESSING. Business and office skills programs, involving state-ofthe-art equipment, operate in the Federal Correctional Institutions at Danbury, Connecticut, Memphis, Tennessee, Milan, Michigan, Morgantown, West Virginia, Pleasanton, California, and Sandstone, Minnesota. A very broad range of skill training is provided and includes instruction in word processing, computer programming, computer literacy, and microcomputer accounting.

LANDSCAPE TECHNOLOGY. Landscape technology programs, which provide a service to the institutions as well as prepare trainees for entry level employment, are provided at the Metropolitan Correctional Center, Tucson, Arizona; the Federal Correctional Institutions at Texarkana, Texas, and Phoenix, Arizona; and Federal Prison Camps at Big Spring, Texas, and Maxwell, Alabama. Landscape technology features a career ladder that prepares a student for direct employment after the first semester of training. Students who hold advanced certificates can seek employment at higher levels.

DRAFTING AND COMPUTER-ASSISTED **DRAFTING.** Several institutions have undertaken projects that provide training in drafting and design technologies; in other projects computer-assisted drafting has been added to the basic drafting course. The U.S. Penitentiary, Lewisburg, Pennsylvania, and the Federal Correctional Institutions at Texarkana, Texas, Bastrop, Texas, Danbury, Connecticut, and Oxford, Wisconsin, provide these programs. Wherever possible, they provide precise scale renderings for institution construction and repair projects. The training is rigorous and fully comparable to that available in the community.

Other noteworthy programs involve training in computer sciences, petroleum technology, waste water treatment, pest control, cleaning services, and diesel truck driving, repair, and maintenance.

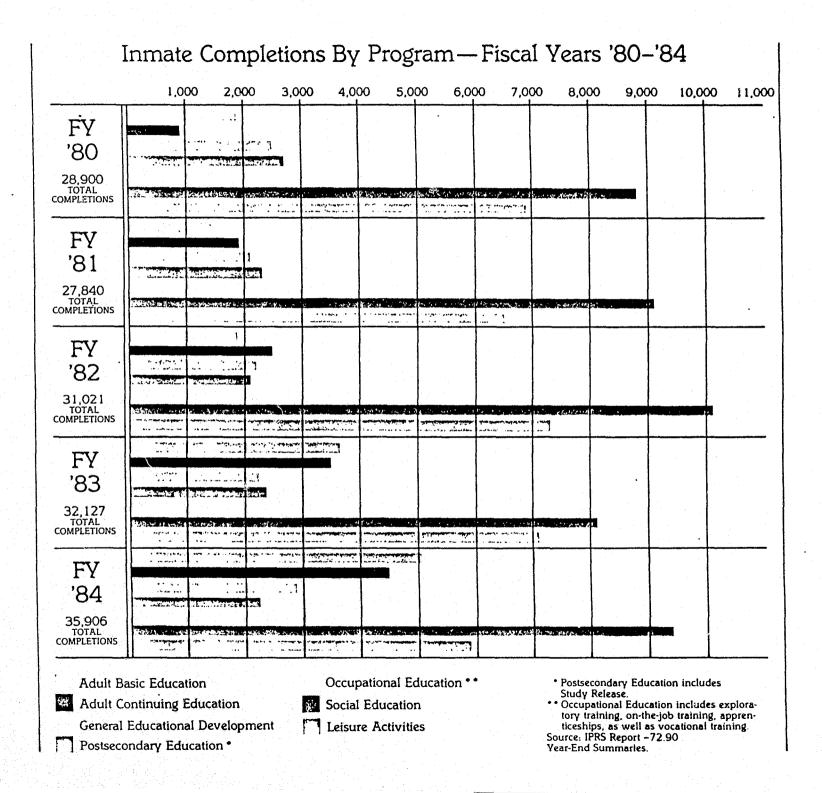

Additional innovative projects are under consideration and are expected to be operational within the coming year. The combination of classroom instruction coupled with hands-on, live work is expected to help inmates compete successfully in the job market when they are released.

# Conclusion

Education and recreation staff in the Federal Bureau of Prisons are justifiably proud of the many opportunities offered federal prisoners to use education and related programs to improve not only the quality of their life while incarcerated, but also their chances for post-release employment and successful personal and community activities.

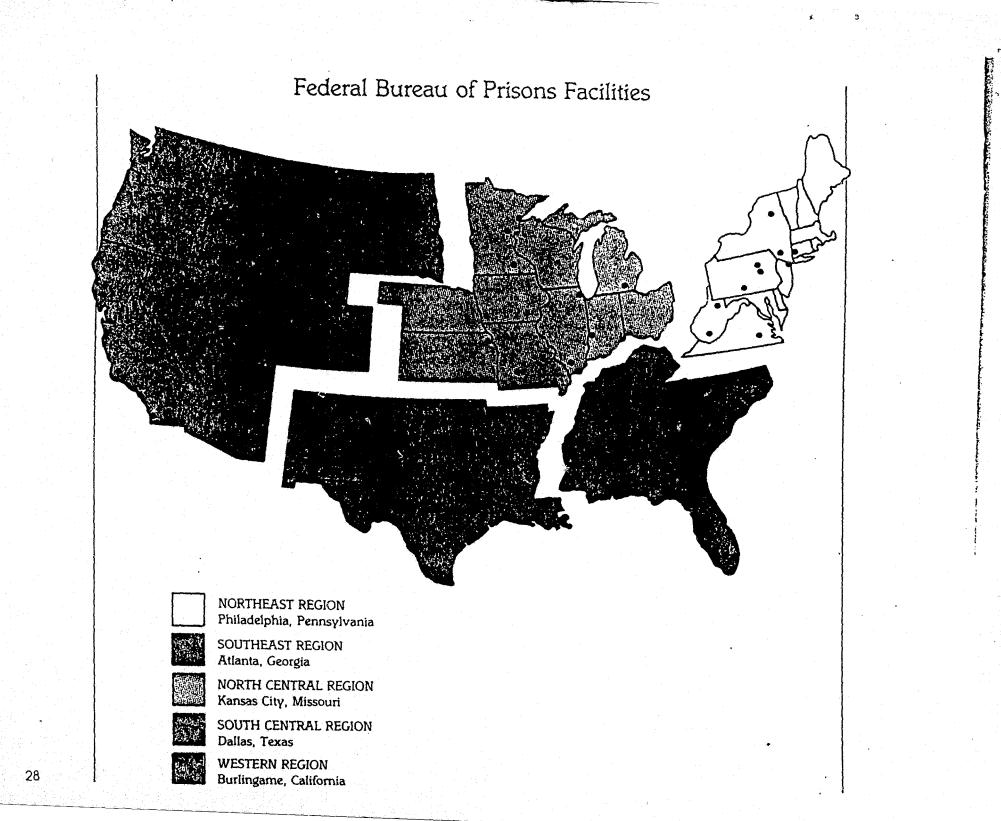

All programs are reexamined periodically to determine whether they meet the needs of the participants and whether they are sufficiently motivating to maintain sustained enrollments. This brochure describes programs which are constantly changing to keep up with what is viewed as the best in a dynamic field. This is done because federal correctional administrators continue to believe that education can serve as a change agent, particularly to people who need and want to change.
