FOREWORD

This publication provides statistics related to law enforcement officers killed in the line of duty, officer assaults, and law enforcement employment levels in Missouri. Each year these statistics are updated and published as a continuing series by the Missouri State Highway Patrol, Statistical Analysis Center.

The Center also conducts special studies in response to requests from State and local agencies for research and statistics in the areas of crime and traffic safety. In many cases, statistics can be quickly retrieved from existing data files to assist agencies with priority requests. As a unit of the Patrol, the Center and its staff are dedicated to serving criminal justice agencies and the public.

C. E. Ailer

C. E. FISHER, Superintendent Missouri State Highway Patrol

ACKNOWLEDGEMENTS

This report is an update to a series published by the Missouri State Highway Patrol, Statistical Analysis Center (SAC) which contains information on officers killed and assaulted in the State of Missouri as well as information on Missouri law enforcement employment levels. Data used in this report come primarily from the Federal Bureau of Investigation's Uniform Crime Reporting System (UCR). In addition, information on officers killed was obtained from the Federal Bureau of Investigation's Law Enforcement Officers Killed and Assaulted publications.

It should be noted that a number of Federal, State, and local law enforcement agencies were instrumental in the development of this document. The staff of the Federal Bureau of Investigation, UCR Section provided the officer assault and employment computerized databases that were analyzed and the findings displayed in this report. Many Missouri law enforcement agencies report information on their officer assaults and employment levels to the Uniform Crime Reporting Program. Their cooperation and voluntary submission of this type of information made the publication of this report possible.

Finally, the U.S. Department of Justice, Bureau of Justice Statistics has, over the years, provided the federal grant funds used to support the development of this and other types of criminal justice publications. In the past year, the Bureau of Justice Statistics provided the means for the SAC to obtain a desktop publishing computer system used in the development of this publication.

Martin P. Carso Jr., Director Missouri State Highway Patrol Statistical Analysis Center

EXECUTIVE SUMMARY

The purpose of this report is to provide the law enforcement community, other criminal justice authorities, and interested parties with selected information concerning the dangers encountered by law enforcement officers in the State of Missouri. A secondary purpose is to provide information concerning law enforcement manpower resource levels found in the State of Missouri. Manpower information is included in order to obtain a perspective of the capabilities which the State and individual communities have for protecting the lives, property, and welfare of their citizens.

This report is produced annually by the Missouri State Highway Patrol, Statistical Analysis Center (SAC). The primary source of data for the report is the Federal Bureau of Investigation's (FBI), Uniform Crime Reporting Program (UCR). Additional information is obtained from FBI publications entitled *Law Enforcement Officers Killed and Assaulted*. These publications use data from the FBI UCR Program but also contain data collected from FBI field divisions and legal attache offices.

Information presented in the report provides a historical perspective of officers killed in the line of duty, officer assault activity, and law enforcement employment levels in the State of Missouri. In this report, emphasis is placed on the most current year's activity.

Sworn officers in the State of Missouri face an ever-present danger while performing law enforcement responsibilities as indicated by the following facts.

- From 1979 through 1988, 25 officers have been killed in the line of duty. This is an average of 2.5 officers killed on an annual basis. Of the total, 16 or 64.0 percent were killed by felonious acts and 9 officers or 36.0 percent were killed as a result of accidents or by negligence. Of the 16 killed by felonious acts, 15 or 93.8 percent were killed by firearms and one officer was killed by another weapon (vehicle). In 1988, no officers were killed feloniously and one officer was killed accidentally in the line of duty.
- There were 1,751 officer assaults reported during 1988. Of these, 30.1 percent resulted in injury to an officer. For every 100 officers in the State of Missouri, it is estimated there were 25.2 officer assaults. One officer was assaulted in the State every 5.0 hours. In 81.6 percent of the officer assaults in 1988, physical force was used by the assailant, while in 18.4 percent of the cases, a weapon of some type was used. It should be noted that law enforcement officers sustained other injuries while performing their law enforcement duties. Non-fatal injuries resulting from accident or negligence, however, are not presented in this report because of a lack of data.

Law enforcement manpower resource availability is a critical factor in the ability of a community to adequately cope with the preservation of order, crime prevention, crime detection and apprehension, traffic safety, and other public safety problems.

• Law enforcement agencies reported that 12,670 persons were employed on a full-time basis in 1988. It is estimated that a total of 13,322 persons were actually employed on a statewide basis. Of these, 72.4 percent were sworn officers and 27.6 percent were civilians. In 1988, there were 1.9 sworn officers per 1,000 population on a statewide basis.

INTRODUCTION

This report is produced annually by the Missouri State Highway Patrol, Statistical Analysis Center (SAC). It presents selected data on law enforcement officers killed in the line of duty between 1979 and 1988, and law enforcement officer assaults between 1984 and 1988 in the State of Missouri. In addition, data are provided which describe Missouri's law enforcement personnel manning levels from 1984 through 1988. Emphasis is placed on providing detailed data displays for the most recent year which, in this report, is 1988. This publication differs from earlier editions in that all data displays, graphs, and text were developed using a desktop publishing computer system in order to improve readibility.

Data in this report are segmented into four sections. The first section presents data displays related to sworn law enforcement officers killed in the line of duty in the State of Missouri. The second section presents data related to law enforcement officers assaulted. In general, the data displays in these two sections provide an appreciation of the extent and nature of the loss of life and assaults sustained by law enforcement officers in the performance of their duties. In particular, the displays are intended to help identify circumstances surrounding the assault or death of law enforcement officers. They also are intended to contribute to the development of policies and procedures that will lead to a reduction in officer deaths and assaults. The third section contains data and displays concerning the size and composition of law enforcement personnel resources. The purpose of these displays is to provide an assessment of the manpower capabilities available to provide law enforcement services to citizens in the State of Missouri. Finally, the last section summarizes data on law enforcement employment and officer assaults for specific law enforcement jurisdictions in the State. These data displays provide a community perspective of law enforcement personnel availability and the state of officer assaults.

Data presented in this report come from two sources. The primary source of information for the officer assaults and employment levels is the Federal Bureau of Investigation's (FBI), Uniform Crime Reporting (UCR) Program. In this program, Missouri law enforcement agencies submit information on a voluntary basis. Data on officers killed or assaulted are collected and submitted on a monthly basis, while the number of law enforcement employees are reported on a yearly basis. The employment data in this report represent the number of full-time law enforcement employees the agency had on its payroll as of October 31 of each year. The FBI provides report forms, tally sheets, and self-addressed envelopes to Missouri law enforcement agencies who participate in the FBI UCR Program. Additional data on officers killed in the line of duty were taken from FBI publications entitled Law Enforcement Officers Killed and Assaulted. These publications contain data on officers killed that are not normally reported to the FBI UCR Program.

There are limitations associated with the data in this report. While in most states reporting to the FBI UCR Program is required by state statute, this is not the case in Missouri. Certain Missouri law enforcement agencies either do not report to the program or they submit incomplete data. Because the FBI UCR Program relies upon voluntary participation in the State of Missouri, there are problems associated with the completeness and representativeness of the data.

To reduce the problems associated with both non-reporting and incomplete reporting, estimation procedures have been used in the report. Where these procedures have been used, it is so noted in the title of the data display or in a footnote.

1.0 LAW ENFORCEMENT OFFICERS KILLED IN MISSOURI

A SERIES OF TABLES AND FIGURES ARE PRESENTED THAT RELATE TO THE NUMBER OF SWORN LAW ENFORCEMENT OFFICERS KILLED IN THE LINE OF DUTY IN THE STATE OF MISSOURI. THE PURPOSE OF THESE DISPLAYS IS TO PROVIDE AN APPRECIATION OF THE EXTENT AND NATURE OF THIS SERIOUS PROBLEM AND TO INCREASE THE AWARENESS OF THE SACRIFICE MADE BY THE LAW ENFORCEMENT COMMUNITY IN PROTECTING THE LIVES, RIGHTS, AND PROPERTY OF MISSOURI CITIZENS.

INTRODUCTION

The information in this section is based on monthly reports submitted by Missouri law enforcement agencies to the FBI UCR Program. Additional information on officers killed also was obtained from field investigations conducted by the FBI and reported in the Law Enforcement Officers Killed and Assaulted publications. Officers killed in the line of duty include those officers killed by felonious acts, as well as by accident, or negligence. Excluded from this section are fatalities resulting from activities not within the official realm of law enforcement duties or deaths attributed to natural causes. It should be noted that this section contains statistics relative to felonious and accidental, line-of-duty deaths of duly sworn Federal, State, and local law enforcement officers having full arrest powers.

1988 SUMMARY ANALYSIS

- In 1988, one officer was killed accidentally or by negligence in the line of duty in the State of Missouri.
- Since 1979, 25 officers have been killed in the line of duty. Of these, 16 or 64.0 percent were killed by felonious acts and 9 or 36.0 percent were killed in accidents or by negligence.
- Of the 16 cases where an officer was feloniously killed, 62.5 percent involved a handgun. In 18.8 percent of these cases, the officer was killed with a rifle and in 12.5 percent of the cases a shotgun was the weapon used. In one, or 6.3 percent, of the cases the officer was killed with another weapon (a vehicle).

2.0 MISSOURI LAW ENFORCEMENT OFFICERS ASSAULTED

A SERIES OF TABLES AND FIGURES ARE PRESENTED ON SWORN LAW ENFORCEMENT OFFICERS ASSAULTED IN THE LINE OF DUTY IN THE STATE OF MISSOURI. THESE DISPLAYS HAVE BEEN INCLUDED TO GAIN A BETTER PERSPECTIVE OF THE RISKS WHICH LAW ENFORCEMENT OFFICERS FACE IN PERFORMING THEIR DUTIES AND TO ASSIST IN FORMULATING POLICIES AND PROCEDURES WHICH MAY REDUCE THESE RISKS IN THE FUTURE.

INTRODUCTION

Data in this section were based on monthly reports of officer assaults submitted by Missouri law enforcement agencies to the FBI UCR Program. Officer assaults are defined as any untawful attack by a person on a law enforcement officer in the performance of his/her duty. Officer assaults include those assaults which result in serious injury to the officer, all assaults in which the assailant used a weapon which could have caused serious injury or death, and assaults on officers beyond mere verbal abuse or minor resistance to an arrest. Assaults resulting in the death of a law enforcement officer are not included in this section, but can be found in Section 1.0 of this report. Assaults committed on federal law enforcement officers in the State of Missouri are not included in this section.

1988 SUMMARY ANALYSIS

- There were 1,751 officer assaults reported during 1988 which was an 11.1 percent increase over 1987.
- For every 100 officers in the State of Missouri it is estimated there were 25.2 assaults in 1988 compared to 22.2 in 1987.
- Of the 1,751 officer assaults in 1988, 527 or 30.1 percent resulted in injury to an officer.
- One officer was assaulted in the State every 5.0 hours in 1988. In addition, one assault resulting in the injury of an officer occurred every 16.7 hours.
- In 1988, the clearance rate for officer assaults in the State was 91.3 compared to 91.1 in 1987.
- In 1988, 81.6 percent of all assaults on officers involved physical force and 18.4 percent of the assaults involved a weapon.
- Of all officer assaults in 1988, 76.4 percent occurred from 4:00 p.m. through 3:59 a.m.
- The situation resulting in the greatest number of officer assaults in 1988 was disturbance calls which accounted for 34.8 percent of the total. Attempting to make an arrest combined with traffic pursuits accounted for 27.3 percent of the officer assault cases.

MISSOURI LAW ENFORCEMENT OFFICERS ASSAULTED SUMMARY: 1987 and 1988

Year	Number of Assaults	Assaults/1 100 Officers	Assault Clearance Rate
1987	1,576	22.2	91.1
1988	1,751	25.2	91.3
Percent of Change	+11.1	+13.5	+ 0.2

¹The Assaults per 100 Officers is an estimate based on data from only those agencies which reported a full 12 months of officer assault activity and annual employment figures to the FBI UCR Program.

MISSOURI LAW ENFORCEMENT ASSAULT CLOCK¹

1988

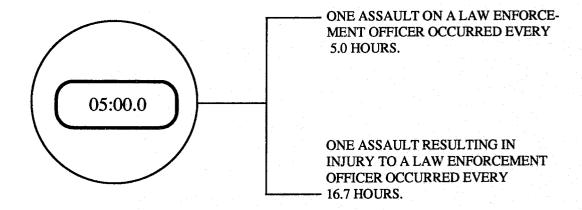

FIGURE 2.1

¹The Law Enforcement Assault Clock should be viewed with care. It is designed to convey annual reported officer assault activity by showing its relative frequency of occurrence. This method of display should not be taken to imply a regularity in the commission of officer assaults; rather it represents the annual ratio of officer assaults to fixed time intervals.

LAW ENFORCEMENT OFFICERS ASSAULTED, TWENTY-FOUR HOUR ANALYSIS STATE OF MISSOURI 1988

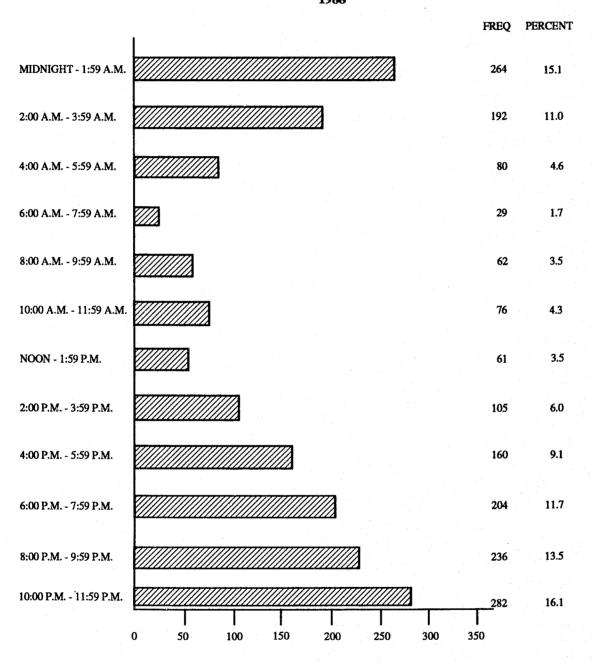

FIGURE 2.5

3.0 MISSOURI LAW ENFORCEMENT EMPLOYMENT

A SERIES OF TABLES PRESENTS DATA ON LAW ENFORCEMENT PERSONNEL RESOURCES IN THE STATE OF MISSOURI. THE PURPOSE OF THESE DISPLAYS IS TO PROVIDE AN ASSESSMENT OF THE AMOUNT AND GENERAL COMPOSITION OF LAW ENFORCEMENT RESOURCES THAT ARE AVAILABLE IN THE STATE OF MISSOURI.

INTRODUCTION

Data in this section are drawn from annual reports on employment submitted by Missouri law enforcement agencies to the FBI UCR Program. Employment figures include full-time sworn officers with full arrest powers, and civilian employees that an agency has on its payroll as of October 31 of each year. They do not include part-time or auxilliary officers. It must be noted that this section does not include employment data for federal law enforcement agencies whose jurisdictional responsibilities encompass the State of Missouri. Estimation procedures have been used with employment data in this section in order to provide a more accurate picture of Missouri law enforcement manning levels. A description of the estimation procedure used can be found in the Glossary of this report.

1988 SUMMARY ANALYSIS

- Law enforcement agencies reported that 12,670 persons were employed on a full-time basis in 1988. It is estimated that a total of 13,322 persons were actually employed on a statewide basis.
- Of the estimated 13,322 persons who were full-time employees of Missouri law enforcement agencies, 72.4 percent were sworn officers and 27.6 percent were civilians.
- It is estimated that there were 9,647 full-time sworn law enforcement employees in 1988 compared to 9,637 in 1987 which is a 0.1 percent increase. It is estimated that there were 3,675 full-time civilian law enforcement employees in 1988 compared to 3,586 in 1987 which is a 2.5 percent increase.
- It is estimated that there were 1.9 sworn officers per 1,000 population in the State of Missouri in 1988.

MISSOURI LAW ENFORCEMENT EMPLOYMENT SUMMARY: 1987 and 1988

Year	Estimated Number of Sworn Employees	Estimated Number of Civilian Employees
1987	9,637	3,586
1988	9,647	3,675
Percent of Change	+ 0.1	+ 2.5

4.0 MISSOURI LAW ENFORCEMENT AGENCY EMPLOYMENT/ASSAULT ANALYSIS

A SERIES OF TABLES SUMMARIZES THE NUMBER OF LAW ENFORCEMENT EMPLOY-EES AS WELL AS THE NUMBER OF ASSAULTS ON SWORN PERSONNEL ASSOCIATED WITH LAW ENFORCEMENT JURISDICTIONS WHICH REPORTED TO THE FEDERAL BUREAU OF INVESTIGATION'S UNIFORM CRIME REPORTING PROGRAM. THESE DATA DISPLAYS PROVIDE AN OVERVIEW OF LAW ENFORCEMENT PERSONNEL RESOURCES AND THE PROBLEM OF OFFICER ASSAULTS WITHIN MISSOURI COMMUNITIES.

INTRODUCTION

Data in this section are drawn from monthly and annual reports submitted by Missouri law enforcement agencies to the FBI UCR Program. Participants in the Program voluntarily report officer assault activity on a monthly basis. Officer assaults are defined as the unlawful attack by a person on a law enforcement officer in the performance of his/her duty. Officer assaults include those which result in a serious injury to the sworn officer, all assaults in which the assailant used a weapon which could have caused serious injury or death, and assaults on officers that were beyond mere verbal abuse or minor resistance to an arrest. Assaults resulting in the death of a law enforcement officer are not included but can be found in Section 1.0 of this report.

Employment information is reported on an annual basis by FBI UCR participants. It reflects a count of full-time sworn officers with full arrest powers and civilian employees the agency has on its payroll as of October 31 of each reporting year. It does not include part-time employees or auxiliary officers.

Population figures contained in this section are provided by the FBI and represent the population associated with the reporting agency's jurisdiction. For suburban and rural county tables, the figures represent the jurisdiction normally covered by sheriff's departments and/or county police departments. These population figures are computed by subtracting the population of all municipalities within a county having their own law enforcement agencies from the total population of the county. Population figures provided by the FBI for a given year are estimates which are based upon the last census taken by the U.S. Census Bureau.

¹Total population includes only those jurisdictions which submitted employment data to the UCR Program in 1988.

²Number of officers associated with a reporting agency in relation to the jurisdictional population. It should be noted that other enforcement agencies (such as the Missouri State Highway Patrol) may have officers assigned to the same jurisdiction. A dash indicates a value was not computed because the agency reported no employment data to the UCR Program during 1988.

³Number of Index Crimes (see Glossary) submitted by reporting agency in relation to its officers. A dash indicates a value was not computed because the agency reported less than 12 months of Index Crime data, or it did not report employment data to the UCR Program during 1988.

⁴A dash indicates a value was not computed because the agency reported no assault data to the UCR Program during 1988.

¹Total population includes only those jurisdictions which submitted employment data to the UCR Program in 1988.

²Number of officers associated with a reporting agency in relation to the jurisdictional population. It should be noted that other enforcement agencies (such as the Missouri State Highway Patrol) may have officers assigned to the same jurisdiction. A dash indicates a value was not computed because the agency reported no employment data to the UCR Program during 1988.

³Number of Index Crimes (see Glossary) submitted by reporting agency in relation to its officers. A dash indicates a value was not computed because the agency reported less than 12 months of Index Crime data, or it did not report employment data to the UCR Program during 1988.

⁴A dash indicates a value was not computed because the agency reported no assault data to the UCR Program during 1988.

¹Total population includes only those jurisdictions which submitted employment data to the UCR Program in 1988.

²Number of officers associated with a reporting agency in relation to the jurisdictional population. It should be noted that other enforcement agencies (such as the Missouri State Highway Patrol) may have officers assigned to the same jurisdiction. A dash indicates a value was not computed because the agency reported no employment data to the UCR Program during 1988.

³Number of Index Crimes (see Glossary) submitted by reporting agency in relation to its officers. A dash indicates a value was not computed because the agency reported less than 12 months of Index Crime data, or it did not report employment data to the UCR Program during 1988.

⁴A dash indicates a value was not computed because the agency reported no assault data to the UCR Program during 1988.

GLOSSARY

ASSAULT: Officer assaults are defined as any unlawful attack by a person on a law enforcement officer who is in the performance of his/her duty. Officer assaults include those which result in serious injury to the sworn officer, all assaults in which the assailant used a weapon which could have caused serious injury or death, and assaults on officers that were beyond mere verbal abuse or minor resistance to an arrest.

ASSAULTS PER 100 OFFICERS RATE: This rate is an indicator of reported officer assault activity standardized by the number of officers employed by the agencies reporting the activity. The officer assault rate formula is:

Number of Officer Assaults X 100

Number of Law Enforcement Officers Employed

This rate is based on data from only those agencies which reported a full 12 months of officer assault activity and annual employment figures to the FBI UCR Program.

ASSIGNMENT: These categories identify the specific assignment of an officer at the time of the assault. Two-Man Vehicle and One-Man Vehicle pertain to uniformed officers on patrol. Special Assignment pertains to those non-uniformed officers functioning as detectives or on special assignment. Other Assignment pertains to those officers as- saulted while functioning in some other capacity, such as foot patrol, off-duty, etc. The term "assisted" refers to law enforcement assistance only.

CLEARANCE: The resolution of an assault on an officer by the arrest, charging and turning over to a court for prosecution one or more persons alleged to have committed the offense. An offense can also be cleared by exceptional means when a law enforcement agency has: 1) established the identity of the offender, 2) has enough information to support an arrest, charge and prosecution in court, 3) the exact location of the offender is known so that he/she could be taken into custody, and 4) there is some reason outside law enforcement control that precludes arresting, charging and prosecuting the offender.

CLEARANCE RATE: The number of clearances divided by the total number of assaults, expressed as a percentage. The formula is:

EMPLOYMENT: The number of persons, either sworn officers with full arrest powers or civilians, working in a full-time capacity and appearing on the payroll of a Missouri law enforcement agency as of October 31 of a reporting year.

EMPLOYMENT ESTIMATION TECHNIQUE: An estimation technique was used in this report to determine the total number of sworn officers and civilians employed in the State of Missouri.

This technique categorized Missouri law enforcement agencies by type (i.e., municipal police departments vs. sheriff and county police departments) and also by jurisdictional population levels (i.e., municipal police departments covering populations between 50,000 and 99,999). For each class of agency the following formulas were applied:

Employment Rate for Total Population of Reporting
Reporting Agencies X and Non-Reporting Agencies =

Employment Estimate for Each Class of Agency

Employment Est. Employment Est. Employment Est. for Class₁ + for Class₂ + for Class_x =

Statewide Employment Estimate

INDEX CRIMES: Index Crimes are the eight major offenses used to indicate the occurrence of crime in the United States. They were selected due to their frequency of occurrence and because they are most likely to be reported to a law enforcement agency. The eight offenses are: murder, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft, and arson.

INDEX CRIMES PER OFFICER RATE: This rate indicates the number of index crime incidents which occurred in a community in relation to the law enforcement agency's sworn officer resource availability. The formula is:

Number of Index Crimes

Number of Law Enforcement Officers Employed

OFFICERS PER 1,000 POPULATION RATE: This rate is an indicator of a law enforcement agency's sworn officer resource availability in relation to the population of the community it serves. The formula is:

Number of Officers Employed X 1,000

Community Population

PERCENT CHANGE: The formula is:

Value in Current Period - Value in Base Period

X 100

Value in Base Period

POPULATION: The number of persons residing in a jurisdiction estimated by the FBI for a given year based upon the last census taken by the U.S. Census Bureau.
