ERECTED
BY THE PEOPLE
AS A TRIBUTE TO THE
POLICE
OF THIS CITY
WHO GAVE THEIR
LIVES
IN THE DISCHARGE OF
DUTY

Chief's Letter of Transmittal

Commissioners:

I submit to you the 1989 Annual Report.

As you review the accomplishments of each of the department's bureaus and the year's statistical review, you will see that 1989 has been an extremely busy year. We received almost one-half million calls for police service. Part I Crimes were up by 4%. Correspondingly, the number of Part I Crimes cleared by arrest also rose by 4%. As we examine causes and solutions for the rise in crime, we can not overlook the popularity of illegal drugs.

Our success in fighting the drug war is tied directly to community involvement. Kansas City understands that while one of the by-products of the drug trade--crime--is a police problem, the drug problem itself is a community problem, requiring a community-wide response. We have a community that cares, that is involved, that is exerting some influence over its future. When you couple caring and involved citizens with a police department made up of committed people, you come up with a winning team. This unique relationship has captured national and international attention as others look to Kansas City for a way to successfully battle their cities' drug problem.

This will be my last Annual Report. In 1990, I will retire from the department. I have been a Kansas City, Missouri police officer for 30 years and have seen many changes. Those things that have not changed are the things that have made this an outstanding police department. The dedication of each person who has served as a Police Commissioner has given the department a continuity in its top leadership that is not enjoyed elsewhere. Above all, a great deal of recognition must be given to the people who make it all work--the dedicated men and women who have served our department and our community through the years. They have unselfishly given of their time, their energy, and 110 of them unselfishly gave their lives. To all of them, we owe a debt of gratitude.

Larry J. Coiner
Larry J. Coiner
Chief of Police

Board of Police Commissioners

The Board of Police Commissioners is responsible for ensuring that the citizens of Kansas City receive police service, as mandated by Missouri state statute. The Board, comprised of four citizens serving four-year terms, are appointed by the Governor of Missouri with the consent of the State Senate. The fifth member of the Board is the Mayor of Kansas City, by virtue of his elected office. The Secretary/Attorney of the Board, appointed by the Board members, acts as legal consultant and manages clerical matters for the Board.

The newest members of the Board are William Ray Price Jr. and Jacqueline L. Paul, appointed on April 24, 1989. They join Bailus M. Tate and Michael B. Mead as Police Commissioners.

Mr Price was appointed President of the Board of Police Commissioners, having previously served as Secretary/Attorney of the Board. He is a partner in the law firm of Lathrop, Koontz, Norquist, et al. Mr. Price was born in Fairfield, Iowa and graduated from Washington and Lee University Law School. He is married with two children.

Mrs. Paul is a native Kansas Citian and is the Operations Manager for Blue Cross/Blue Shield of Kansas City. She is married with one son.

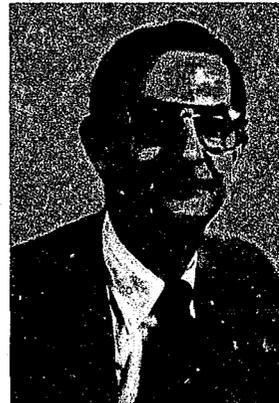

Cathy Dean, a partner in the law firm of Polsinelli, White, Vardeman & Shalton, was appointed Secretary/Attorney of the Board on May 26, 1989. She was born in Bloomington, Illinois and is married to K. Preston Dean, a judge with the 16th Judicial Circuit of Missouri. She is a graduate of the University of Missouri at Columbia Law School.

Chief of Police

Capt. Stephen R. Staffer
Commander
Internal Affairs Div.

Mr. E. David Swartzbaugh
Legal Advisor

Capt. Charles G. Schilling
Commander
Audit Unit

Appointed Chief of Police on March 30, 1984, Larry J. Joiner became the 37th commander of the Kansas City, Missouri Police Department. As Chief of Police, his office oversees five bureaus, each commanded by a lieutenant colonel, including the Administration and Services, Criminal Intelligence & Narcotics, Field Services, Fiscal, and Investigations Bureaus. Also under the command of this office are the Audit Unit, Public Affairs Unit, Internal Affairs Division, and Legal Advisor. Assisting Chief Joiner in his duties is Major Charles Key, Executive Officer.

Throughout 1989, Chief Joiner was called upon numerous times to represent the department as guest speaker and lecturer for various conferences and seminars held in Kansas City. Because of past participation, the department, early in the year, was chosen as a Pacesetter for the United Way fund drive. This distinction was given in recognition of

an overwhelming response by department members to contribute over the last several years. With this kind of participation and the support of Chief Joiner, it was noted by the United Way that the Kansas City, Missouri Police Department would be a shining example of how a group could bond together and work toward a common goal.

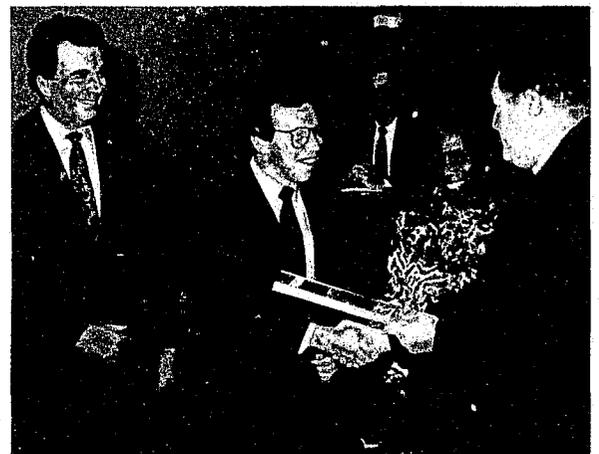

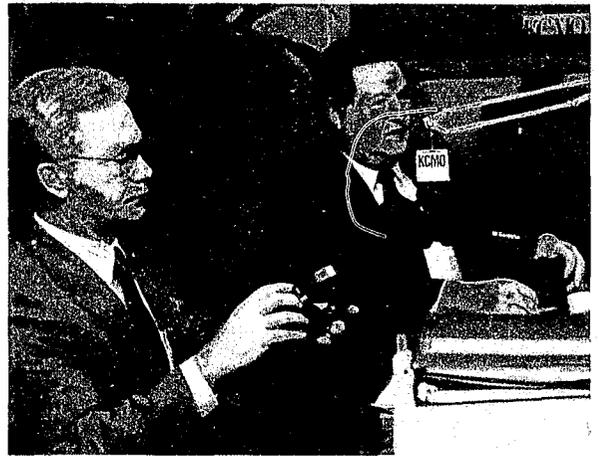

In addition to his many requests to take part in a number of the activities throughout the city, Chief Joiner was recognized by the Ad Hoc Group Against Crime for his outstanding service and assistance to their group. As department head, he led the way in bridging the gap often felt by members of the community when dealing with law enforcement agencies. This department has been able to boast of a very successful relationship with the many community groups in this city, due in large to Chief Joiner's efforts.

Because he has been willing to go to

Office of the Chief of Police

the heart of the matter and listen to the citizens by attending their neighborhood meetings, he has been better able to keep an eye on what's happening and an ear open to where things need to be improved, from their standpoint. This kind of accessibility has meant more of a willingness on the part of the citizens to become involved and listen to what the law enforcement community has to say. By opening up the lines of communication, the exchange of information between the various groups and the department has drawn national and international attention to our city as others attempt to strengthen the cooperative relationship between their departments and the citizens they serve.

Another benefit of working hand-in-hand with community groups is that it allows the department the opportunity to show the citizens some of the ways that law enforcement agencies are dealing with crime. During 1989, this was illustrated time and again through a variety of community projects designed to inform citizens of any problems and recognize those that have contributed their efforts to the department and department-sponsored programs. When the demand arose from the community for some answers to what kind of person commits violent crimes, the Chief chose some of the supervisors closest to these cases. Together they formed a panel with the county prosecutor to answer questions about how these people are found, tried, and sentenced. This direct approach has worked well in reassuring the public that, as a law enforcement agency, every step is being taken to curtail crime.

Maj. Alfred C. Lomax

Field Services Bureau

Maj. Milan E. Mulac
Commander
North Patrol Division

Maj. Marylyn D. Brauninger
Commander
Metro Patrol Division

Maj. Frederic Smith
Commander
Central Patrol Division

Maj. Victor A. Kauszarich
Commander
South Patrol Division

The Field Services Bureau, by far the largest bureau within the department, is commanded by Lt. Colonel Floyd Bartch. The 914 law enforcement and civilian personnel assigned to this bureau are responsible for ensuring that those laws and policies established by local, state, and federal governments are enforced to provide a safe and peaceful environment for the citizens of Kansas City. The six divisions within this bureau are Central, Metro, East, North, South, and City-Wide Traffic & Operations, with two Tactical Response squads assigned to the Central, Metro, and East Patrol Divisions.

The emphasis over the last 12 months has become more focused than in previous years due primarily to one thing: drugs. The rise in drug-trafficking in the metropolitan area meant an increase in the problems associated with drugs, including the criminal element that usually accompanies it. Additionally, this increased activity

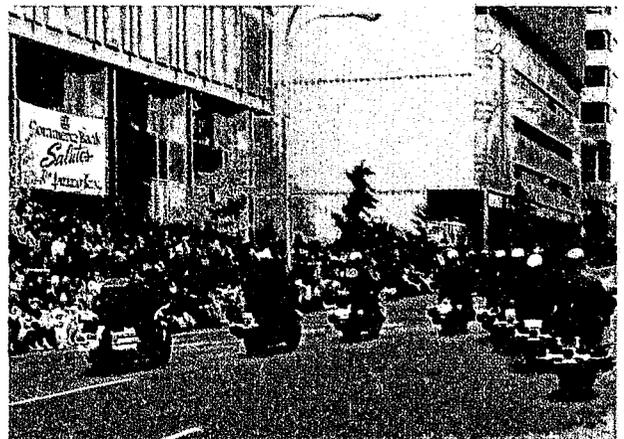

brought with it another problem in the form of guns. New and more advanced models of all types of guns were being seized each and every day from a simple car check to the person who chose to end another's life. One of the scariest facts that most officers have had to deal with is that this is quickly becoming the way of life for the younger children, a trend that most would like to stop.

The law enforcement and civilian personnel assigned to the Field Services Bureau experienced one of the busiest years to date in 1989. A wide variety of activities were handled by this bureau from a vice-presidential visit to a tour of the lower income housing areas by Missouri Governor John Ashcroft. In addition to handling events such as the St. Patrick's Day parade, Spirit Festival, and a number of other festivities throughout the year, members were called upon to handle an ever-increasing workload of calls for service.

Field Services Bureau

This past year, members were involved in a renewed crackdown on vice-related crimes in the Kansas City area and problems relating to the increased drug activity. Every available body was needed to ensure that requests for police assistance were answered and, when appropriate, action taken. The implementation of a domestic violence policy meant that if officers were called to a location on a domestic quarrel where an assault had occurred, the situation would be handled the very first time without someone having to sign a complaint to get something done. The officers could then take the guilty party out of the situation, and let things settle down for awhile. Although this increased the workload of other areas of the department because of the rise in arrests made for domestic violence, it decreased the number of times that the police were called to that same location, allowing for manpower to handle incoming calls for service.

To better equip the support personnel in dealing with the types of crime they are now encountering, each of the Tactical Response Units was issued a double action 9mm semi-automatic pistol in place of the standard-issue .38 caliber revolver. The 9mm automatic is lighter in weight, faster-handling, dependable, accurate, and easily maintained, a definite advantage over the revolver in situations requiring the quickest movements possible. By ensuring that the field officers have adequate equipment to keep the peace, the work of the patrol support personnel becomes that much easier by allowing them to concentrate on the situation at hand.

Maj. Sylvester H. Winston
Commander
Crimes Against Persons Div.

Maj. Donald D. Rey
Commander
Crimes Against Property Div.

Lt. Col. Richard C. Fletcher
Commander
Investigations Bureau

Maj. John L. Coleman
Commander
Fraud and Fugitive Div.

Maj. Harry J. Pottinger
Commander
Investigative Services Div.

The Investigations Bureau, under the command of Lt. Colonel Richard Fletcher, has the responsibility of conducting investigations and dealing with the criminal offenses so that the offenders are identified, apprehended, and prosecuted. This bureau is comprised of the Crimes Against Persons, Crimes Against Property, Fraud and Fugitive, and Investigative Services Divisions. In all, 234 law enforcement and civilian members are assigned to this bureau.

1989 was not a unique year. The number of crimes committed against persons are still creeping upward. Strategies that include the efforts of the police, such as case management, and efforts of the public, such as an active Crime Stoppers program, have proven to be an effective team in Kansas City's fight against crime.

The most dramatic increase in property crimes involved auto thefts. Like other crimes, there are a number

of variables responsible for this 26% increase, to include the ease with which some manufacturers' models are stolen, the need for get-away transportation, and the growing market for car parts.

The Property Response Unit, an element within the Crimes Against Property Division, conducts investigations into chop shops and vehicle retagging operations. It is estimated that 25% to 30% of all stolen autos which are not recovered have been parted-out. A \$15,000 automobile is made up of over \$40,000 in parts.

One of the largest chop shop investigations conducted by the Property Response Unit in 1989 resulted in 37 charges being submitted to the prosecutor. 25 vehicles, either whole or in parts, were recovered from three salvage yards. Found hidden in a wall during one search were 15 V.I.N. plates, 10 of which had matching titles.

Another way this unit is working to reduce the availability of illegal parts is

Investigations Bureau

through regular salvage yard inspections. Accompanied by a member of the Missouri Department of Revenue, detectives inspect car parts in a salvage yard's inventory, comparing parts to ledger entries and computerized information on stolen cars. Several recoveries and criminal cases have resulted from these inspections.

During 1989, the Crimes Against Persons Division was called upon to investigate a growing number of assaults and gun-related incidents. A very disturbing trend was the involvement of increasingly younger suspects and victims in crimes of violence. Nowhere was this violence more evident than in the work of the Murder Squad. The eight detectives and one sergeant who are assigned to this squad on a rotating basis have the responsibility of investigating those murders where the suspect is not immediately known. The Homicide Unit was kept plenty busy in 1989 when the murder total hit 140, topping by one the previous record set in 1980.

Detectives assigned to the Robbery Unit were also kept busy. Business, street, and a rash of armed residence robberies, involving multiple suspects and entire families of victims, contributed to the overall increased workload.

The lengths that people will go to when addicted to crack cocaine was disturbingly illustrated by a case that was investigated by the Sex Crimes Unit. A 23-year old mother traded her 3-month old son for \$20 worth of crack. Detectives were called upon to investigate more thefts and confidence games, process more crime scenes, and forensically examine more pieces of evidence.

Maj. William E. Frazier
Commander
Criminal Intelligence Div.

Lt. Col. Michael L. Boyle
Commander
Criminal Intelligence &
Narcotics Bureau

Maj. David M. Barton
Commander
Narcotics Enforcement Div.

In May of 1989, the Criminal Intelligence and Narcotics Bureau (CINB) was formed. Under the command of Lt. Colonel Michael Boyle, CINB combined the efforts of the Special Investigations Division, Street Narcotics Unit from the Field Services Bureau, and Career Criminal Unit from the Investigations Bureau. This reorganization placed units with compatible priorities and goals under a unified command, thereby improving results and providing for improved communications between the elements. Overall, this improved officer safety and reduced the likelihood that there would be a duplication of efforts undertaken by these elements.

Within CINB are the Criminal Intelligence Division and the Narcotics Enforcement Division. These divisions were kept busy throughout 1989 gathering information, targeting those known or suspected of being involved in organized criminal activities and drug

trafficking, and processing properties and assets seized in connection with drug trafficking or obtained by virtue of drug activities. This concentrated effort meant that the department could put the pinch on drug traffickers and their accomplices where it would affect them most: their assets. By combining resources and manpower, the department has been able to take steps to take from the criminals what they have garnered through their illegal dealings, but this entire process is time-consuming and cannot be completed overnight. Additionally, efforts must be coordinated to the extent that as soon as one step is completed in the process the next step is already in place.

Programs were initiated in 1989 to acquaint the public with the telltale signs of drugs in their neighborhoods, symptoms of their usage by children, and how and where to seek help. These programs also advised the citizens that to make a case against the individuals

Criminal Intelligence and Narcotics Bureau

or groups involved in the distribution of drugs is a lengthy process and takes time. And to ensure that the people responsible for this plague are taken out of the situation, all the available information pertaining to these dealings must be gathered, sorted through, and put together.

Federal grants that were made available to aid the fight against drugs have enabled this bureau to expand their efforts and put more emphasis on the individuals on the street level of the drug empires. By first eliminating the bottom level of this drug pyramid, the chances of getting someone from the next level to fall prey to the undercover operations of the department are better than average. So little by little, the bases for these empires are eroded and eventually, the top is exposed.

By targeting and concentrating on those responsible in just this way, this bureau has had a significant impact on the drug activity in the Kansas City area and, thereby, an effect on any connection to the rest of the country.

The effect of this effort by CINB has had an added impact on the children of this community who are involved in drug activity. By eliminating their source of easy money, the children are becoming aware just how unstable this kind of lifestyle can be. By showing them that a change can make all the difference in how their lives will turn out, there is a chance that any future dealings with law enforcement will not be as a suspect. By educating them while they are young, there is a chance that their futures can be changed.

Capt. Emily J. Stuart
Commander
Purchasing & Accounting Div.

Maj. James A. Reynolds
Commander
Information Services Div.

Lt. Col. Robert L. Wesley
Commander
Fiscal Bureau

Maj. William T. Hudson
Commander
Capital Improvements Unit

Maj. William H. Trimble
Commander
Logistical Services Div.

Capt. Vincent Mc Inerney
Commander
Budget Development Div.

The Fiscal Bureau is comprised of the Purchasing and Accounting Division, Budget Development Division, Information Services Division, Logistical Services Division, and the Capital Improvements Unit. The 276 civilian and law enforcement personnel assigned to this bureau, under the command of Lt. Colonel Robert Wesley, are responsible for monitoring the department's expenditures and ensuring that financial resources are used properly; preparing the yearly budget; long range planning; grant preparation and implementation; maintaining communication and computer services; maintenance of all department property, vehicles, and radio equipment; and coordination of the major construction projects funded out of the capital improvement bonds.

During 1989, this bureau examined various ways of increasing the efficiency of the department. A standing

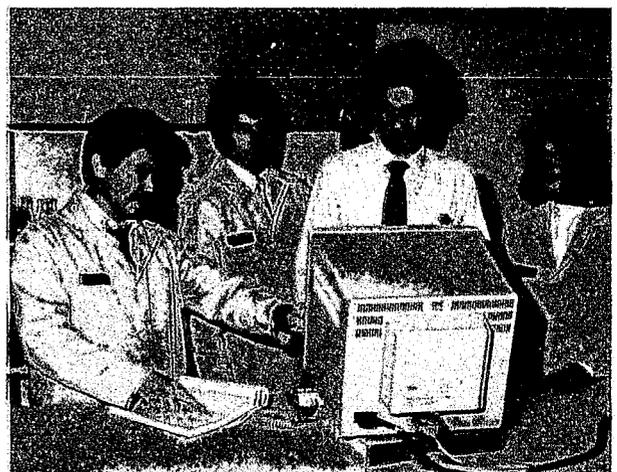

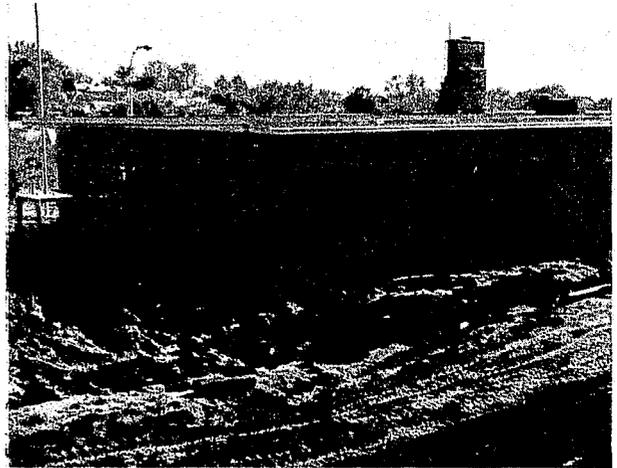

committee, to examine and recommend future internal and external automation needs and issues, referred to as the Comprehensive Information Management Program for Law Enforcement (C.I.M.P.L.E.), was established. In another move to save time and money, the Communications Unit was upgraded with an Enhanced 911 System (E911). This system provides not only the telephone number of the calling party, but also the location and address of that call. This expedites police service in that all the initial information is at the calltaker's fingertips, and help can be sent in the event the caller is unable to speak.

To meet the growing needs of the department as well as other agencies interconnected with our computer system, new IBM computer equipment was purchased during the past year. An IBM 3745 Communication Controller replaced the smaller 3725, which had been running at maximum capacity but

was not able to keep up with the demand. The 3745 will enable the department to expand the ALERT system by adding new and faster speed communication lines, with the advantage of being easily upgraded and performing at twice the capacity of its predecessor. Additionally, the critical shortage in on-line storage for the computer system was lessened with the acquisition of Direct Access Storage Devices and a Storage Controller, allowing for future growth.

As a result of the Public Safety General Obligation Bonds approved by voters in November 1988, work began on the East Patrol Division station in the fall to expand and update this facility. The paved driveways that once led to the garage area of the station have since been replaced by mounds of earth that will realign the surrounding grounds and the drives moved to better meet the needs of the division personnel. The interior will be redesigned to accommodate additional work space, detention, and storage areas. This renovation project will enable division personnel to conduct police business more efficiently and with more favorable surroundings.

Reconstruction work also began on the 5th floor of Police Headquarters, damaged by fire in the spring of 1988. Demolition of walls, asbestos removal, and construction of a structural slab for the 6th floor were initiated during the past year. By late fall, bids were opened for the 5th floor reconstruction work. In addition to redesigning the office layout for this area of the building, a conference room for the Board of Police Commissioners and other groups will be constructed on the 6th floor.

Lt. Col. Thomas O. Mills
Commander
Administration & Services Bureau

Maj. Raymond D. Roberts
Commander
Records Division

Maj. Dennis R. Shreve
Commander
Training Division

Maj. Arthur F. Barnett
Commander
Administrative Analysis Division

Maj. Steven C. Bishop
Commander
Personnel Division

Under the command of Lt. Colonel Thomas Mills, the Administration and Services Bureau is comprised of four divisions: Personnel, Training, Records and Administrative Analysis, with a complement of 248 civilian and law enforcement personnel. This bureau provides for hiring, training, promotional processes, and all other personnel matters within the department; monitoring changes and updates for procedures, policies, and programs pertaining to the department and personnel; providing administrative support to the department; and the operation of the city jail.

During 1989, the department began a recruitment drive to draw more applicants to the position of police officer and civilian dispatcher. Because of monetary constraints throughout the year, the academy classes were scaled down to a bare minimum to meet those vacancies caused by attrition. But the demand by the citizens of Kansas City

for more police officers on the street, as well as for more ethnic group representation within the department, meant that changes would have to be made to meet these needs. The recruitment drive began in the early fall to attract more law enforcement candidates to accommodate the increase in police service, in addition to searching for civilian dispatchers with the ability to speak Spanish. This latter project is an effort to communicate with the Hispanic-speaking members of Kansas City who find it difficult to get their message across in English. With the growing number of visitors from other countries, the advantage of having someone on the department who can speak their language cannot be measured.

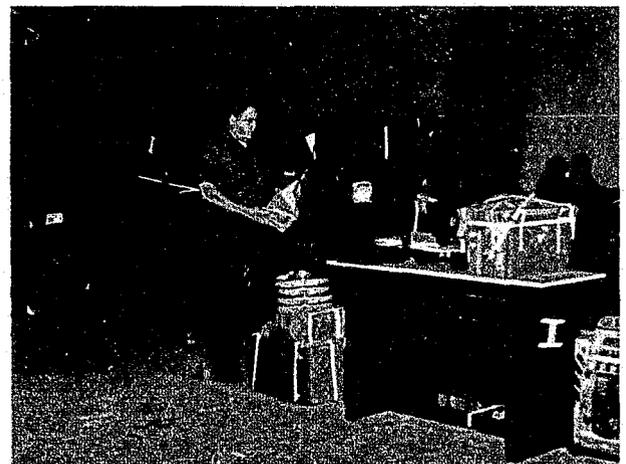

The increase in arrests and activity among the criminal element accounted for a record number of people who passed through the department's detention facility, an average of 125

Administration and Services Bureau

arrests per day during 1989. Members were required to work twice as fast to process the increased number of arrests, but with limited manpower. More female arrests were processed over the last year than had previously been noted in years before.

In an effort to put more officers on the street and utilize the potential of those law enforcement members who were on temporary light duty, this bureau made several changes that succeeded in solving these problems. Several positions formerly held by law enforcement officers were redesigned and defined so that the work could be performed by a civilian department member. In order to capitalize on the experience and manpower that has virtually gone untapped, a call-in report section was added to the Records Division. This provided those officers who were not released to return to full duty from the injury leave and sick leave pools the chance to work an eight-hour shift taking reports over the phone. This move also meant fewer calls for service of this nature for the officers in the field, since those calls could now be routed to an officer in Records.

To make room for the growing volume of recovered property received every day in the Property and Evidence Unit, this bureau moved a large amount of property to a vacant warehouse in the East bottoms. Although this building has the capacity to house a wide variety of items, some of the property now stored there includes bicycles, furniture, and equipment. By moving these larger pieces out of the Property Room, valuable space has been cleared and some of the cramped conditions alleviated.

Grant Projects

Crime Laboratory Assistance Program

Grantor: Missouri Department of Public Safety
Amount: \$82,702
Purpose: To increase the quantity and quality of all physical evidence and serological examinations.

Missouri Crime Laboratory Upgrade Program

Grantor: Missouri Department of Public Safety
Amount: \$35,000
Purpose: To provide funding solely for the purchase of equipment or capital improvements.

Motor Carrier Safety Assistance Program

Grantor: Missouri Department of Public Safety
Amount: \$408,706
Purpose: To increase the number of commercial vehicle inspections, educate owners of truck lines and civic groups of the importance of maintaining safety compliance programs.

55-65 M.P.H. Compliance

Grantor: Missouri Department of Highway Safety
Amount: \$125,000
Purpose: To increase compliance of speed limits within the corporate limits of Kansas City.

Sobriety Checkpoint

Grantor: Missouri Department of Highway Safety
Amount: \$35,000
Purpose: To increase the perception of risk of arrest by the vast majority of drunk drivers who are not arrested.

Kansas City Narcotic Action Project

Grantor: Missouri Department of Public Safety
Amount: \$73,928
Purpose: To negatively impact organized narcotic manufacturing, importation, and distribution by identifying and arresting distributors and by interdicting movement of illegal drugs.

Drug Use Forecasting

Grantor: National Institute of Justice
Amount: \$52,941
Purpose: To test female, male, and juvenile arrestees for illicit drug use.

Organized Crime Narcotics Program

Grantor: Bureau of Justice Assistance
Amount: \$463,650
Purpose: To identify and document the organization of crack cocaine distributors and to determine its leaders. To develop and prosecute conspiracy cases federally.

Safety Belt Promotional Effort

Grantor: Missouri Department of Highway Safety
Amount: \$25,000
Purpose: To increase the public's support to realize the validity of using restraints.

Financial Investigations Drug Trafficking Organizations

Grantor: Bureau of Justice Assistance
Amount: \$225,000
Purpose: To initiate and prepare documentation on complicated financial investigations and illegally obtained assets, then allow the department to follow up with seizure proceedings.

Urban Street Gang Trafficking Enforcement Demonstration

Grantor: Bureau of Justice Assistance
Amount: \$250,000
Purpose: To target gang leaders involved in drug trafficking and gang perpetrated violence.

Kansas City Drug Market Analysis Program

Grantor: National Institute of Justice
Amount: \$394,810
Purpose: To establish and test a system for maintaining an on-going comprehensive and current data file on locations of drug houses and purchases, and combine all data into a single analysis system.

*Figures based on 1980 U.S. Census population of 448,159.

Readers are cautioned against drawing conclusions from comparisons of crime figures between communities without considering the factors which will affect the amount and type of crime. Some of those factors are: density and size of the community and metropolitan populations, economic status and mores, attitude of the public toward law enforcement problems, and the administrative and investigative efficiency of the law enforcement agency.
