## Publishing Information

---

This fourth annual report on school crime in California was prepared by Peter E. Kneedler, Consultant, working with Mary Weaver, Manager, School Climate Unit, California Department of Education. *School Crime in California for the 1988-89 School Year* was published by the Department of Education, 721 Capitol Mall, Sacramento, California (mailing address: P.O. Box 944272, Sacramento, CA 94244-2720). Any questions regarding the report should be addressed to Dr. Kneedler in the School Climate Unit (telephone: 916-323-0565). The report was distributed under the provisions of the Library Distribution Act and *Government Code* Section 11096.

# Executive Summary of the Standard School Crime Reporting Program for 1988/89

This is the fourth annual summary of school crime data collected by California school districts, as required by AB 2483, Chapter 1607 (Statutes of 1984). In addition to including school crime data for the reporting period July 1, 1988, to June 30, 1989, the report includes a comparison of the 1988/89 results with those of the three previous years. All of California's school districts completed reports for the fourth reporting period.

*Students have an inalienable right to attend safe schools.*

In June 1982, 56 percent of California's voters passed an initiative that added Article I, Section 28 (c) to the California Constitution which states that students and staff in our public schools have the inalienable right to attend school on campuses that are "safe, secure, and peaceful." Crime rates on many campuses, however, remain high, and school crimes continue to disrupt the educational process for students and staff members.

*The purpose of the crime reporting program is to provide legislative and educational leaders with data for planning safer schools.*

The severity, frequency, and type of school crime and the number of perpetrators vary from school to school and from district to district. But with accurate data on school crime collected consistently, schools, districts, county-operated programs and sites, county offices of education, local governments, the State Department of Education (SDE), and the Legislature will "have sufficient data and information about the type and frequency of crime occurring on school campuses to permit development of effective programs and techniques to combat crime on school campuses." (*Penal Code* section 628) A comparison of the number of crimes reported in different years, however, would be misleading because the number of students has increased every year. To account for the population discrepancy, those preparing this report converted the actual number of crimes to the "number of crimes per average school" statistic. The "crimes per average school" statistic is useful because it corrects for changing school enrollments,

*Results are reported in terms of the average size school in order to correct for enrollment changes.*

while providing an easily understood metric of school crime. The "crime per average school" figures are calculated by simply dividing the number of crimes by the number of public schoolchildren, then multiplying by 568 (the size of an average California school).

While the average school concept is helpful in comparing crime rates over the years, it does not reflect the fact that many schools and districts have excellent crime prevention programs and low crime rates. On the other hand, there are schools that must operate in communities where crime rates are high.

## Major Findings and Recommendations

*There was less crime in the average California school in 1988/89 than there was in 1985/86.*

*Crime in the average school increased compared to the previous year.*

*Substance abuse has continued to decrease in California schools.*

*The highly successful strategies used to combat drug abuse should be applied to other school crime areas.*

**A. School crime has decreased 2 percent over the four-year history of the School Crime Reporting Program.** There have been decreases in certain categories of property crime, substance abuse, theft from students, and sex offenses. The average California school of 568 students had 22.06 crimes in 1985/86 and 21.66 in 1988/89; however, the average school of 568 students had 20.68 crimes in 1987/88 and 21.66 in 1988/89. Categories that showed the greatest increases were Assault/Attack/Menace and Assault/Attack with a Weapon. There was also an increase in the number of weapons reported in the average California school.

**B. There has been a dramatic decrease in the incidence of substance abuse.** Substance abuse has dropped over 43 percent in the last four years in the average California school. A 1988 Department of Justice study (*Report to the Attorney General: Biennial Survey of Drug and Alcohol Use Among California Students In Grades 7, 8, and 11*) also found that substance abuse on school campuses has declined in the three grades studied.

It is recommended that the successful strategies that have been employed in programs like "Just Say No," "Decide," "Impact," "Here's Looking at You 2000," and D.A.R.E. (Drug Abuse Resistance Education) be applied to other crime areas. These programs emphasize curriculum development and staff in-service training; partnerships among education, community, business, and law enforcement; family involvement; and other techniques that emphasize character development, self-esteem, decision-making skills, and personal responsibility.

*Elementary schools have the lowest crime rates.*

**C. Elementary Schools.** Elementary schools had the lowest overall crime rate in 1988/89 with 10.94 crimes per average school. Although the elementary school crime rate went up 7 percent from last year, it is down 2 percent over the last four years.

*Middle grades have the highest crime rates.*

**D. Middle Grade Schools.** Middle grade schools had the highest crime rate at 39.29 incidents per average school but showed decreases in the following categories: Substance Abuse, Homicide, Robbery, Extortion, and Sex Offenses. The following categories showed a substantially higher frequency of incidents: Weapons Possession and Assault/Attack with a Weapon.

*Reduction of crime in the middle grades should receive priority.*

It is recommended that the reduction of crime in the middle grade schools receive special priority. Since the inception of the crime reporting program in 1985, the middle grade schools have had the highest crime rates. While efforts to make all schools safer should continue, students in middle schools must be provided with a safer learning environment.

*Assault/Attack/Menace increased in high schools in 1988/89.*

**E. High Schools.** The high school crime rate dropped during the first three years of the crime reporting program but increased in 1988/89 by 9 percent. The following crime categories showed the largest increases: Assault/Attack/Menace, especially against others; Weapons Possession, especially guns; and Assault/Attack with a Weapon, especially against others (others would include, for example, a parent or student from another school). Categories that showed decline were Property Crimes, Substance Abuse, Theft from Students, and Sex Offenses.

*School property crimes cost California over \$24 million dollars last year.*

**F. Economic Losses.** Economic losses to schools from property crimes such as arson, vandalism, burglary, and theft totaled \$24,275,661 in 1988/89. The average school loss was \$3,014 in 1988/89. Over four years, the per school rate decreased 5 percent. In 1988/89, arson caused 39 percent of all direct economic losses (\$9,473,535), with vandalism (\$8,995,394) accounting for another 37 percent of the total.

*Weapons-related incidences, especially those involving guns, continue to increase.*

**G. Weapons Possession.** School administrators, parents, and local law enforcement agencies need to give special attention to the increased incidence of weapons possession, especially guns, on the school campus. Weapons possession for the average school campus was up 21 percent in 1988/89 and up 28 percent over the last four years. Possession of guns, knives, and explosives was up 40 percent, 18 percent, and 11 percent, respectively. Possession of "other" weapons was up 43 percent on the average school campus. The category of Assault/Attack with a Weapon was also up 21 percent in 1988/89.

*Assembly Bill 450 should be expanded to require all schools to develop and implement a safety plan.*

To help school personnel deal with the issue of weapons possession and related crimes, it is recommended that Education Code sections 35294 and 35294.1 (Assembly Bill 450/Chapter 1253, Statutes of 1989) be expanded to require all schools to develop and implement a school safety plan. With the cooperation of local law enforcement agencies, community leaders, parents, pupils, teachers, administrators, and other persons interested in the prevention of campus crime and violence, a safety plan should be developed that addresses safety concerns identified through a systematic planning process. The recently published handbook, *Safe Schools: Planning Guide for Action*, developed by the School/Law Enforcement Partnership, provides a guide for revising and implementing a school safety plan.

*Crime reporting systems should be validated.*

**H. Validation of Local Crime Reporting Systems.** Efforts to obtain funding for Senate Bill 271 should continue. This legislation would require the validation of school crime reporting programs to determine their efficiency and accuracy. The validation process will lead to a more consistent and uniform method of reporting crime.

*More prevention programs are needed.*

**I. Resources for Prevention Programs.** The Legislature should provide the necessary resources not only to ensure a quality crime reporting program but also to help move the program from one that merely collects numbers to one that can develop preventive programs as well.

*Standards for crime reporting and prevention should be established.*

**J. Standards for Crime Prevention/Reporting.** Standards for crime reporting/prevention should be established for use in the State Department of Education's Program Quality Review (PQR) process. The inclusion of quality criteria for crime reporting/prevention would help a large number of educators on both sides of the review process understand the importance and need for accurate crime reporting.

# Introduction to the Standard School Crime Report for 1988-89

Each year the Department prepares a report describing the results of the previous year's school crime data and identifies trends from the previous year and the base year. The severity, frequency, type of school crime, and the number of perpetrators vary from school to school and from district to district. But with accurate data on school crime collected consistently, schools, districts, county-operated programs and sites, county offices of education, local governments, the State Department of Education, and the Legislature will "have sufficient data and information about the type and frequency of crime occurring on school campuses to permit development of effective programs and techniques to combat crime on school campuses." (Penal Code section 628)

This report covers the period from July 1, 1988, to June 30, 1989, and shows some positive trends; for example, there has been a continuous drop in the rate of substance abuse over the four-year history of the School Crime Reporting Program. Substance abuse has dropped 43 percent during the last four years. Other crime reporting categories showed declines since 1985/86: Theft from Students, down 23 percent; Felony Sex Offenses, down 43 percent; Robbery, down 39 percent; and Extortion, down 29 percent.

While it is gratifying to see crime rates decrease in certain categories, there is great concern over the increase of offenses involving weapons, especially guns. Over the four-year history of the program, incidences of weapons possession went up 28 percent. The largest increase shows a 100 percent increase in the number of guns on campus, increasing from 503 incidences of gun possession in 1985/86 to 1,131 in 1988/89. Assault/Attack/with a Weapon has gone down 8 percent since 1985/86; however, the 1988/89 figure was 21 percent greater than it was in 1987/88.

In order to keep these statistics in perspective, it must be realized that in the average school fewer than 22 crimes were committed during the entire school year, and less than 4 percent of California's students were involved in any kind of crime during 1988/89.

This report is divided into seven sections. Part I of this report describes the total number of crimes that occurred on California public school campuses in 1988/89, and Part II examines crime statistics in terms of the average California school. Comparisons are made to the previous year's results as well as those accumulated over the four-year history of the program. Part III describes overall economic losses by schools as well as those of the average California school. Part IV discusses crime statistics in terms of three categories of schools: average elementary, middle grades, and high school. Each school type is again described through comparisons with data from the previous year and to results accumulated over the four-year history of the program. In the remainder of the report, Part V describes change in crime rates at the county level, and Part VI examines crime data in terms of the proportion of crimes committed by students and nonstudents. The final section, Part VII, contains recommendations for the State Department of Education and other organizations that may help reduce crime in California schools and improve the crime reporting system.

## I. Overall Crime Rates in the Public Schools

Table 1 shows that the total number of crimes on California public school campuses in 1988/89 was 174,478. The largest number of crimes in a major crime category was the 69,191 reported incidents of Assault/Attack/Menace (an assault/attack/menace consists of a threat, attempt, or act of violence [without a weapon] on another person), of which the largest number of crimes by far were directed against students.

**TABLE 1**  
**Crime Rate per Average School\***  
(by year and type of crime)

TYPE OF CRIME	Number of Crimes 1988-89	Crime Rate Per Average School				Percent Change	
		1985/86 (1st Year)	1986/87 (2nd Year)	1987/88 (3rd Year)	1988/89 (4th Year)	3rd Year to 4th Year	1st Year to 4th Year
Property Crimes	62,116	7.77	7.19	7.60	7.71	1%	-1%
<i>Vandalism</i>	44,154	5.02	4.89	5.28	5.48	4%	9%
<i>Burglary</i>	8,534	1.39	1.10	1.09	1.06	-3%	-24%
<i>Theft from school</i>	8,296	1.19	1.05	1.09	1.03	-6%	-13%
<i>Arson</i>	1,132	.17	.15	.14	.14	0%	-18%
Assault/Attack/Menace	69,191	7.39	7.52	7.65	8.59	12%	16%
<i>Against students</i>	63,908	6.89	6.93	7.14	7.94	11%	15%
<i>Against employees</i>	3,838	.41	.43	.41	.48	17%	17%
<i>Against others</i>	1,445	.09	.16	.10	.18	80%	100%
Substance Abuse	12,630	2.74	2.10	1.74	1.57	-10%	-43%
Theft from Students	14,684	2.36	2.17	1.96	1.82	-7%	-23%
Weapons Possession	10,569	1.02	.97	1.08	1.31	21%	28%
<i>Knife</i>	5,328	.56	.51	.56	.66	18%	18%
<i>Explosives</i>	2,498	.26	.25	.28	.31	11%	19%
<i>Gun</i>	1,131	.07	.08	.10	.14	40%	100%
<i>Other</i>	1,612	.13	.13	.14	.20	43%	54%
Sex Offenses	2,160	.28	.31	.29	.27	-7%	-4%
<i>Misdemeanor</i>	1,835	.21	.25	.23	.23	0%	10%
<i>Felony</i>	325	.07	.06	.06	.04	-33%	-43%
Assault/Att w/Weapon	1,830	.25	.23	.19	.23	21%	-8%
<i>Against students</i>	1,510	.21	.19	.15	.19	27%	-10%
<i>Against employees</i>	229	.03	.03	.03	.03	0%	0%
<i>Against others</i>	91	.01	.01	.01	.01	0%	0%
Robbery	860	.18	.11	.12	.11	-8%	-39%
Extortion	424	.07	.06	.05	.05	0%	-29%
Homicide	14	.002	.002	.001	.002	100%	0%
<b>TOTAL CRIME</b>	<b>174,478</b>	<b>22.06</b>	<b>20.66</b>	<b>20.68</b>	<b>21.66</b>	<b>5%</b>	<b>-2%</b>

\*Average school is based on a student population of 568.

The next largest number of crimes reported was 62,116 incidents of Property Crime (not including Theft from Students, which is shown as a separate category); the largest number of property crimes by far were incidents of Vandalism (44,154).

Schools reported 12,630 incidents of Substance Abuse, which include the possession, use, or sale of drugs. Theft from Students was also fairly common, with 14,684 incidents reported statewide. Crimes that were least frequently cited were Homicide (14 victims), Extortion (424 incidents), Felony Sex Offenses (325 incidents), and Robbery (860 incidents). Total crime figures for each of the past four years may be found in Appendix A.

## II. Crime Rates for the Average California School

The total number of crimes that occurred on public school campuses in 1988/89 is included in this report to demonstrate the extent of school crime last year. A comparison of the number of crimes reported in different years, however, would be misleading because the number of students has increased every year. To account for the population discrepancy, the actual number of crimes has been converted to the "number of crimes per average school" statistic. The "crimes per average school" statistic is useful because it corrects for changing school enrollments, while providing an easily understood metric of school crime. The "crime per average school" figures are calculated by simply dividing the number of crimes by the number of public schoolchildren, then multiplying by 568 (the size of an average California school).

The crime rate per average school (568 students) for the four years of the crime reporting program is included in Table 1. The first column under the caption "Percent Change" displays the percent change from the previous year to the current year (1987/88 to 1988/89), and the last column displays change from the first to fourth year (1985/86 to 1988/89), which is useful for long-term analyses of school crime rates. (While "percent change" figures can be helpful in identifying trends, they become less useful when calculating change between very small numbers. For example, it can be seen in Table 1 that the changes in Homicide over the years are based on very small numbers.)

### A. Comparisons of Data from 1987/88 and 1988/89

Although the crime rate appears to have stabilized during 1988/89 at about 21 per average school, there were significant changes within individual crime categories. It should be noted that Substance Abuse was down by 10 percent, a category that has continued to decline since the inception of the Crime Reporting Program. Other categories showed increases; for example, there was a 100 percent increase in incidents of homicide in 1988/89. The category of Assault/Attack/Menace increased 12 percent in 1988/89, with Assault Against Others showing the greatest increase at 80 percent. Assaults with a Weapon increased 21 percent in the past year.

Other crimes that increased substantially from 1987/88 to 1988/89 were Weapons Possession, up 21 percent in one year. In the Weapons Possessions category, Other Weapons (such as clubs, rocks, brass knuckles, scissors, etc.) increased 43 percent over 1987/88, and Gun Possession went up 40 percent. Knives and Explosives went up 18 and 11 percent, respectively.

### B. Comparisons of Data for the Past Four Years

The last column of Table 1 displays the total number of crimes per average California school over four years. In the first reporting year (1985/86), there was a total of 22.06 crimes per average school. This figure dropped to 20.66 in the second year and changed only marginally to 20.68 in the third year. The fourth year shows a slight increase to 21.66. The "First Year to Fourth Year" column in Table 1 displays the overall trend during the four reporting years. Overall, school crime is down 2 percent over four years. The largest reductions have been in the categories of Robbery (down 39 percent), and Substance Abuse (down 43 percent). Extortion, Theft from Students, Sex Offenses, and to a lesser extent, Property Crimes, also decreased over the four-year history of the program.

### III. Economic Loss Because of Property Crimes

Table 2 displays the economic loss experienced by schools in 1988/89 and during the past four years because of four primary types of property crimes. The property crimes are listed in descending order of dollar loss. Arson, while being the least frequent of all property crimes (see Table 1), results in the largest economic loss to schools: \$9,473,535 in 1988/89. The economic loss due to arson, however, has been reduced over four years by 26 percent. Vandalism also accounts for major losses to schools, with dollar losses totaling \$8,995,394 in 1988/89. Burglary (breaking in and resulting theft during after-school hours or on weekends) and theft from schools (occurring during school hours) account for 24 percent of total losses.

The crime-related economic losses sustained by the average California school totaled \$3,014 in 1988/89. This represents a 4 percent decrease over the previous year, and it is still below the average loss experienced in 1985/86. (Note: Differences between years were calculated by comparing losses per average school each year.)

**TABLE 2**  
**Dollar Loss Because of Property Crimes in an Average California School**  
(by year and type of crime)

TYPE OF PROPERTY CRIME	Total Dollar Loss in 1988/89	Dollar Loss Per Average School				Percent Change	
		1985/86 (1st Year)	1986/87 (2nd Year)	1987/88 (3rd Year)	1988/89 (4th Year)	3rd Year to 4th Year	1st Year to 4th Year
Arson	\$9,473,535	\$1,587	\$1,510	\$1,434	\$1,176	-18%	-26%
Vandalism	8,995,394	1,048	946	1,090	1,117	2%	7%
Burglary	4,099,981	316	328	390	509	31%	61%
Theft from school	1,706,751	214	217	210	212	1%	-1%
<b>Dollar Loss</b>	<b>\$24,275,661</b>	<b>\$3,165</b>	<b>\$3,001</b>	<b>\$3,124</b>	<b>\$3,014</b>	<b>-4%</b>	<b>-5%</b>

Losses in 1985/86 totaled \$23,338,028.

Losses in 1986/87 totaled \$22,878,540.

Losses in 1987/88 totaled \$24,471,422.

## IV. Crime Rates for the Average Elementary, Middle Grades, and High School

While Table 1 is useful in drawing general conclusions on crime rates in California schools, it does not show crime trends for each of the three major school types. Tables 3, 4, and 5 show the crime rates in an average California elementary, middle grades, and high school, respectively. All rates are based on an average enrollment of 568 students.

### A. Crime Rates for the Average Elementary School

Property Crimes, in particular vandalism, are the most common incidents of crime on elementary school campuses. During the 1988/89 school year, an average elementary school experienced 6.55 incidents of property crime, 4.85 of which were Vandalism. Overall, Property Crimes have changed little since the first reporting year: 6.45 in 1985/86 versus 6.55 in 1988/89, representing a 2 percent increase in property crimes.

Even though Property Crimes seem high compared to the other crime categories presented in Table 3, it should be pointed out that this rate is relatively low when compared to similar rates in both middle grades and high schools. Elementary schools experienced the lowest crime rate among the three major groups of schools. The overall crime rate in 1988/89 for an average elementary school was 10.94, much lower than the 39.29 reported for middle grade schools and the 31.41 reported at the high school level (Tables 4 and 5).

Although the crime rate dropped for elementary schools in most of the major crime categories during the first three years of the crime reporting program, the 1988/89 results show increases in all major categories. Increases were the highest in: Assault/Attack/Menace Against Others (267 percent), Possession of Guns (50 percent) and Other Weapons (75 percent), and Assault/Attack with a Weapon, especially Against Students (50 percent). The only major area that showed a decrease was Robbery, which declined 17 percent in 1988/89.

This report reflects the number of homicide *victims* reported in 1988/89. Although there were only nine homicide incidents statewide during this period, the multiple homicide at the Cleveland Elementary School in Stockton in February 1989 resulted in six homicide victims. Thus, the total number of victims for 1988/89 was fourteen.

Most areas of crime in the elementary school have declined over the four years of the crime reporting program. The major areas that showed the greatest decline over the four years are Theft from Students (-33 percent), Sex Offenses (-13 percent), Robbery (-38 percent), Substance Abuse (-14 percent), and Extortion (-33 percent). Property Crimes have increased only marginally over the four years, while Weapons Possession has increased 24 percent.

### III. Economic Loss Because of Property Crimes

Table 2 displays the economic loss experienced by schools in 1988/89 and during the past four years because of four primary types of property crimes. The property crimes are listed in descending order of dollar loss. Arson, while being the least frequent of all property crimes (see Table 1), results in the largest economic loss to schools: \$9,473,535 in 1988/89. The economic loss due to arson, however, has been reduced over four years by 26 percent. Vandalism also accounts for major losses to schools, with dollar losses totaling \$8,995,394 in 1988/89. Burglary (breaking in and resulting theft during after-school hours or on weekends) and theft from schools (occurring during school hours) account for 24 percent of total losses.

The crime-related economic losses sustained by the average California school totaled \$3,014 in 1988/89. This represents a 4 percent decrease over the previous year, and it is still below the average loss experienced in 1985/86. (Note: Differences between years were calculated by comparing losses per average school each year.)

**TABLE 2**  
**Dollar Loss Because of Property Crimes in an Average California School**  
(by year and type of crime)

TYPE OF PROPERTY CRIME	Total Dollar Loss in 1988/89	Dollar Loss Per Average School				Percent Change	
		1985/86 (1st Year)	1986/87 (2nd Year)	1987/88 (3rd Year)	1988/89 (4th Year)	3rd Year to 4th Year	1st Year to 4th Year
Arson	\$9,473,535	\$1,587	\$1,510	\$1,434	\$1,176	-18%	-26%
Vandalism	8,995,394	1,048	946	1,090	1,117	2%	7%
Burglary	4,099,981	316	328	390	509	31%	61%
Theft from school	1,706,751	214	217	210	212	1%	-1%
<b>Dollar Loss</b>	<b>\$24,275,661</b>	<b>\$3,165</b>	<b>\$3,001</b>	<b>\$3,124</b>	<b>\$3,014</b>	<b>-4%</b>	<b>-5%</b>

Losses in 1985/86 totaled \$23,338,028.  
Losses in 1986/87 totaled \$22,878,540.  
Losses in 1987/88 totaled \$24,471,422.

#### IV. Crime Rates for the Average Elementary, Middle Grades, and High School

While Table 1 is useful in drawing general conclusions on crime rates in California schools, it does not show crime trends for each of the three major school types. Tables 3, 4, and 5 show the crime rates in an average California elementary, middle grades, and high school, respectively. All rates are based on an average enrollment of 568 students.

##### A. Crime Rates for the Average Elementary School

Property Crimes, in particular vandalism, are the most common incidents of crime on elementary school campuses. During the 1988/89 school year, an average elementary school experienced 6.55 incidents of property crime, 4.85 of which were Vandalism. Overall, Property Crimes have changed little since the first reporting year: 6.45 in 1985/86 versus 6.55 in 1988/89, representing a 2 percent increase in property crimes.

Even though Property Crimes seem high compared to the other crime categories presented in Table 3, it should be pointed out that this rate is relatively low when compared to similar rates in both middle grades and high schools. Elementary schools experienced the lowest crime rate among the three major groups of schools. The overall crime rate in 1988/89 for an average elementary school was 10.94, much lower than the 39.29 reported for middle grade schools and the 31.41 reported at the high school level (Tables 4 and 5).

Although the crime rate dropped for elementary schools in most of the major crime categories during the first three years of the crime reporting program, the 1988/89 results show increases in all major categories. Increases were the highest in: Assault/Attack/Menace Against Others (267 percent), Possession of Guns (50 percent) and Other Weapons (75 percent), and Assault/Attack with a Weapon, especially Against Students (50 percent). The only major area that showed a decrease was Robbery, which declined 17 percent in 1988/89.

This report reflects the number of homicide *victims* reported in 1988/89. Although there were only nine homicide incidents statewide during this period, the multiple homicide at the Cleveland Elementary School in Stockton in February 1989 resulted in six homicide victims. Thus, the total number of victims for 1988/89 was fourteen.

Most areas of crime in the elementary school have declined over the four years of the crime reporting program. The major areas that showed the greatest decline over the four years are Theft from Students (-33 percent), Sex Offenses (-13 percent), Robbery (-38 percent), Substance Abuse (-14 percent), and Extortion (-33 percent). Property Crimes have increased only marginally over the four years, while Weapons Possession has increased 24 percent.

### III. Economic Loss Because of Property Crimes

Table 2 displays the economic loss experienced by schools in 1988/89 and during the past four years because of four primary types of property crimes. The property crimes are listed in descending order of dollar loss. Arson, while being the least frequent of all property crimes (see Table 1), results in the largest economic loss to schools: \$9,473,535 in 1988/89. The economic loss due to arson, however, has been reduced over four years by 26 percent. Vandalism also accounts for major losses to schools, with dollar losses totaling \$8,995,394 in 1988/89. Burglary (breaking in and resulting theft during after-school hours or on weekends) and theft from schools (occurring during school hours) account for 24 percent of total losses.

The crime-related economic losses sustained by the average California school totaled \$3,014 in 1988/89. This represents a 4 percent decrease over the previous year, and it is still below the average loss experienced in 1985/86. (Note: Differences between years were calculated by comparing losses per average school each year.)

**TABLE 2**  
**Dollar Loss Because of Property Crimes in an Average California School**  
(by year and type of crime)

TYPE OF PROPERTY CRIME	Total Dollar Loss in 1988/89	Dollar Loss Per Average School				Percent Change	
		1985/86 (1st Year)	1986/87 (2nd Year)	1987/88 (3rd Year)	1988/89 (4th Year)	3rd Year to 4th Year	1st Year to 4th Year
Arson	\$9,473,535	\$1,587	\$1,510	\$1,434	\$1,176	-18%	-26%
Vandalism	8,995,394	1,048	946	1,090	1,117	2%	7%
Burglary	4,099,981	316	328	390	509	31%	61%

\*Average school is based on a student population of 568.

## B. Crime Rates for the Average Middle Grades School

Table 4 shows the incidence of crime for an average middle grades school in California by type of crime. Although there was a slight increase in crime rates for the average middle grades school over the previous year (1 percent), there were significant decreases in Substance Abuse (-16 percent), Assault/Attack/Menace Against Others (-59 percent), Sex Offenses (-11 percent), and Assault/Attack with a Weapon Against Others (-50 percent). Robbery and Extortion also decreased.

Weapons possession in the middle grades increased 15 percent in 1988/89. There was a 25 percent increase in Guns and a 29 percent increase in "other" weapons in 1988/89. The categories of Knife and Explosives also increased 14 percent and 7 percent, respectively.

California's middle grades, although responsible for less than one quarter of the students enrolled in public schools, had the highest crime rates per school. In the first four reporting years, middle grades schools in California consistently experienced the highest crime rate among the three major school types. The overall crime rate in middle grades schools in California has risen consistently each year since the crime reporting program began in 1985. In 1988/89, the average middle grades school experienced 39.29 incidents of crime compared to 37.32 in 1985/86. Fifty-two percent of these crimes were in the Assault/Attack/Menace category, which has increased 15 percent over the past four years. Property Crimes and Weapons Possession also had higher figures in 1988/89 than they had in 1985/86.

Although the overall crime rate for the middle grades has increased, there has been marked improvement in several of the individual crime categories. For example, incidents of Substance Abuse are down 46 percent from the first reporting year; Burglary, Assault/Attack with a Weapon, Robbery, Extortion, and Theft from Students also went down.

## C. Crime Rates for the Average High School

Table 5 is composed of the data for crimes in California's average high school. In comparing results of 1988/89 with 1987/88, it can be seen that the following areas showed decreases: Property Crimes, Burglary, Theft from School, Substance Abuse, Theft from Students, and Sex Offenses. Areas that showed increases were: Assault/Attack/Menace, especially Against Others (up 164 percent); Weapons Possession, especially Guns (up 61 percent); Assault/Attack with a Weapon, especially Against Others (up 100 percent); and Extortion (up 25 percent).

Over the past four years the crime rate at the average high school in California has decreased by 3 percent, and significant decreases occurred in certain crime categories. For example, Robbery is down 55 percent; Substance Abuse, 38 percent; and Extortion, 17 percent. Property crimes have also decreased 9 percent over the last four years.

The following areas showed increases during the last four years: Assault/Attack/Menace (up 39 percent), and Weapons Possession, especially guns (up 142 percent). Assault/Attack with a Weapon increased marginally by 3 percent.

**TABLE 4**  
**The Number of Crimes in an Average Middle Grades School**  
 (by year and type of crime)

TYPE OF CRIME	Average Middle/Junior High School*				Percent Change

Extortion	.06	.05	.04	.05	25%	-17%
Homicide	.001	.002	.002	.0014	-30%	40%
<b>TOTAL CRIME</b>	<b>32.46</b>	<b>29.71</b>	<b>28.91</b>	<b>31.41</b>	<b>9%</b>	<b>-3%</b>

\*Average school is based on a student population of 568.

## **V. Student Versus Nonstudent Offenders**

Even though the crimes reported on the School Crime Reporting Form occurred on school campuses, the offenders may not have been students enrolled in the reporting school. Table 6 shows the percent of crimes that were committed by enrolled students.

Overall, in the crimes committed in which the offender was identified, 82 percent of the crimes committed on school campuses where the offender was identified were committed by student offenders. Over 92 percent of the incidents classified as Assault/Attack/Menace, Substance Abuse, Extortion, Theft from Students, and Weapons Possession were committed by students.

Over the past four years, the percent of all crimes reported as committed by student offenders dropped 4 percent. Those categories showing the greatest decline during the last four years were Assault/Attack with a Weapon, especially Against Employees, and Property Crimes, especially Burglary.

## **VI. Changes in Crime Rates, by County**

The earlier parts of this report included the results of a statewide analysis of data on crime in the public schools. Two of the appendices to this report examine data from a county-level viewpoint. Appendix B displays changes in crime rates from 1985/86 to 1988/89 by county and type of crime. Appendix C displays a four-year summary of data on crime for each county in terms of the actual number of crimes reported.

**TABLE 6**  
**Percentage of Reported Offenders Who Were Students**  
 (by year and type of crime)

TYPE OF CRIME	Percentage of Reported Offenders Who Were Students				Change	
	1985/86 (1st Year)	1986/87 (2nd Year)	1987/88 (3rd Year)	1988/89 (4th Year)	3rd Year to 4th Year	1st Year to 4th Year
Assault/Attack/Menace	94%	94%	95%	96%	1%	2%
<i>Against students</i>	95%	95%	96%	97%	1%	2%
<i>Against employees</i>	77%	81%	81%	84%	3%	7%

Certification: I hereby certify that to the best of my knowledge and belief, the data contained in this form are true, accurate, and complete. Signature of district superintendent or designee: _____ Date: _____	Contact person: _____ Telephone: _____
---	---

Distribution: Return original to the State Department of Education. Retain copy for district files.

# Instructions for Completing Form DSCR-85

The information requested on this form is required by *Penal Code* Section 628 (Assembly Bill 2483/Chapter 1607, Statutes of 1984), which calls for the collection of data about incidents related to school crimes. The intent of the Legislature is to ensure that schools, school districts, local governments, and the Legislature have sufficient data and information about the types and frequencies of crimes occurring on public school campuses and at school-sponsored activities to permit the development of effective programs and techniques to combat such crimes.

## Completion of the Form

Report information about crimes committed against individuals or property on school grounds or at school-sponsored events. Include incidents reported to school authorities or to law enforcement agencies. All data reported should be based on incidents occurring during the period of the report. Return the district summary of the Standard School Crime Reporting Form (Form DSCR-85) to the State Department of Education by February 1 for the reporting period July 1 through December 31 and by August 1 for the reporting period January 1 through June 30. Send the form to California State Department of Education, School Climate Unit, P.O. Box 944272, Sacramento, CA 94244-2720.

In completing Form DSCR-85, enter the number of incidents, by location; number of offenders, by student status; and number of incidents, by time of occurrence, for the various categories indicated. Report the total number of incidents of each crime classification in the "total" column. Report for property crimes only the total dollar losses to the district, regardless of any restitution or insurance reimbursement.

## Definitions of Crime Classifications

Use the following definitions of crime classifications in completing this form:

### 1. Assault/attack/menace

- a. *Assault* is defined as "an unlawful attempt, coupled with a present ability, to commit a violent injury on the person of another." (*Penal Code* Section 240)
- b. *Attack* (battery) is the "willful and unlawful use of force or violence upon the person of another." (*Penal Code* Section 242)
- c. *Menace* is an act performed in a threatening manner or done to show intention of harm. (Refer to *Education Code* Section 44014.)

### 2. Assault/attack with a deadly weapon

Assaults or attacks with a deadly weapon are defined as acts or attempted acts by one person on another with the intent to kill, maim, or inflict severe bodily injury with the use of such items as firearms; knives or other cutting instruments; clubs; bricks; bicycle chains; nunchakus; bottles; explosives; acids; fire; and bodily parts, such as hands, fists, and feet. (*Note:* Crimes involving hands, fists, and feet should be included in this category if their use results in serious injury requiring medical care by a health practitioner.)

### 3. Homicide

Homicide is the killing of a person by another person.

### 4. Sex offenses

Sex offenses include an act or attempted act initiated by a person against the chastity, common decency, morals, and the like of another person and accompanied by threat, fear, or danger. The offenses listed on the form are distinguished by severity of punishment; that is, felony vs. misdemeanor. (Refer to *Penal Code* sections 261, 286, 288, and 647a.)

### 5. Robbery

Robbery is defined as the "taking of property in possession of another, from his person or immediate presence and against his will, accomplished by *means of force or fear*." (*Penal Code* Section 211)

### 6. Extortion

Extortion is defined as obtaining or attempting to obtain property from another person, with that person's consent, through the wrongful use of force or fear. Usually, extortion does not involve the element of immediate danger inherent in robbery. (Refer to *Penal Code* sections 518 and 519.)

### 7. Substance/chemical/alcohol abuse

Substance/chemical/alcohol abuse refers to the possession, use, or sale of any chemical, alcoholic, or intoxicating substance. Do *not* report the unauthorized use of tobacco in this category; report such incidents in Classification 10, "Other."

### 8. Possession of weapons

Possession of weapons includes the unauthorized presence or use of dangerous weapons, which include, but are not limited to, all kinds of guns, knives, bombs, explosives, and firecrackers. Do *not* report *bomb threats* in this classification; report such threats in Classification 10, "Other."

### 9. Property crimes

Property crimes include arson, burglary, theft, and vandalism, as defined below:

- a. *Arson* means the malicious burning of or attempt to burn property belonging to another, regardless of the value of the property.
- b. *Burglary* is defined as any *unlawful entry* to commit a felony or theft, even though force may not have been used to gain entry. This classification also includes attempted burglary. (Refer to *Penal Code* Section 459.)
- c. *Theft* (larceny) is defined as the taking and carrying away of property belonging to another with intent to deprive the rightful owner of its use, regardless of the value of the property. This classification also includes attempted theft.
- d. *Vandalism* (to school or private property) is defined as the intentional defacing or destroying of school property or another person's property.

### 10. Other

Report the incidence of any other crime in this category, such as bomb threats, trespassing, and loitering.

## Submission of Form DSCR-85

Districts are to compile the data submitted by the schools and send the aggregated data on Form DSCR-85 to the State Department of Education in accordance with the following schedule:

- For the reporting period July 1—December 31, the district's Form DSCR-85 should be received by the Department no later than the following February 1.
- For the reporting period January 1—June 30, the district's Form DSCR-85 should be received by the Department no later than the following August 1.

Completed forms should be forwarded to:

California State Department of Education  
School Climate Unit  
P.O. Box 944272  
Sacramento, CA 94244-2720
