FORWARD

*Crime in Michigan, 1989* marks the thirty-first year that the Michigan State Police has compiled and published the annual crime statistics for the state. While this report does not claim to identify the total crime picture within the state, it represents the best attempt to accurately present the statistics submitted by the vast majority of its law enforcement agencies.

Since its inception in 1959, the state's Uniform Crime Reporting program has strived to be responsive to the needs of the criminal justice community, as well as state and local agencies and others who use crime statistics. The program has continued to develop both in quality and scope.

This report is possible only through the cooperation and diligence of the contributing agencies. Because of their efforts, we are able to present timely, accurate criminal justice data.

### **28.251 Uniform crime reports; duties of police departments to file, contents.**

Sec. 1. The police department of each city or village, any duly constituted police department of a township, and the sheriff's department of each county, once each month upon a date and form prescribed and furnished by the director of the department of state police, shall forward to the department of state police a crime report. Each reporting department shall report only on cases within its jurisdiction and upon which it is making, or has made, the primary police investigation. The report shall be called the uniform crime report and shall cover crimes reported and otherwise processed during the month preceding the month of the report. It shall contain the number and nature of offenses committed, the disposition of such offenses and such other information as the director of state police shall specify relating to the method, frequency, cause and prevention of crime. Under no circumstances shall the name of any person be reported.

### **28.252 Compilation of monthly uniform crime reports; use.**

Sec. 2. Upon receipt of the monthly uniform crime reports from the reporting agencies, the department of state police shall prepare a statewide compilation of the statistics contained therein and the resulting statistical compilation shall be available to any governmental law enforcement agency in the state, the judiciary committees of the Michigan state senate and the Michigan state house of representatives, and the federal bureau of investigation, upon request. The statistics made available through the uniform crime report shall be used for the purpose of studying the causes, trends and effects of crime in this state and for intelligence upon which to base a more sound program of crime detection and prevention and the apprehension of criminals.

### **28.253 Voluntary crime reports; inclusion in compilation.**

Sec. 3. Any governmental police agency, not falling within the description of those required to submit the

monthly uniform crime report set forth in section 1, which desires to submit such a report, shall be furnished with the proper forms by the department of state police. When a report is received by the department of state police from a governmental police agency not required to make such report, the information contained therein shall be included within the monthly compilation provided for in section 2.

### **28.254 Reports of wanted persons and stolen vehicles.**

Sec. 4. The chief of police of each city or village and of each township having a police department, and the sheriff of each county within this state, shall report to the department of state police, in a manner prescribed by the department, all persons wanted by, and all vehicles stolen from, their primary police jurisdictions. The report shall be made as soon as is practical after the investigating department either ascertains that a vehicle is stolen or obtains a warrant for an individual's arrest or determines that they have reasonable grounds to believe that the individual committed a crime. In no case shall this time exceed 12 hours after the reporting agency determines that it has grounds to believe that a vehicle was stolen or that the wanted person should be arrested.

### **28.255 Reports of apprehension or recovery.**

Sec. 5. When at any time after making a report required by section 4 it is determined by the reporting agency that a person is no longer wanted because of his apprehension, or any other factor, and when a vehicle reported stolen under section 4 is recovered, the chief of police or sheriff of the reporting agency shall immediately notify the department of state police in a manner prescribed by the department.

### **28.256 Inapplicability of act as to traffic misdemeanors.**

Sec. 6. The provisions of this act do not apply to misdemeanor traffic cases or to persons wanted for misdemeanor traffic offenses, or for the violation of any city, village or township ordinance. The provisions of

this act shall not be construed to in any way affect existing or future laws and procedures governing the reporting of persons wanted for traffic law violations or for the violation of city, village or township ordinances.

# THE MICHIGAN UNIFORM CRIME REPORTING SYSTEM

Michigan participates in a voluntary national program to collect crime statistics. The program is administered by the Federal Bureau of Investigation. The state's Uniform Crime Reporting system was instituted in 1959 when the State Police requested all Law enforcement agencies to voluntarily submit crime data to them for the purpose of compiling a uniform crime report. Michigan's Uniform Crime Reporting program (UCR) is designed to meet federal reporting requirements as well as to provide more detailed statistical information for state law enforcement agencies.

The number of participating agencies was small in the beginning. The larger agencies made up the majority of the contributors. The enactment of Michigan Public Act 319 in 1968, making submission of crime data mandatory, greatly spurred the growth of the program. Smaller agencies began to participate as well as campus police departments and airport security police.

Initially, only summary data was collected. Since the introduction of incident-based reporting in 1976, the Michigan UCR program has operated dual systems. The main difference between the summary and incident-based systems is the degree of detail in reporting. Agencies submitting summary data report aggregate counts of offense and arrest information for both index and non-index crimes. The types of data tallied include the number of offenses, clearances, types and values of stolen and recovered property, the age, race and sex of persons who are arrested, and Law Enforcement Officers Killed or Assaulted. Under the incident system, agencies collect more detailed information regarding individual crime incidents and arrests. This information is submitted in separate "reports" using prescribed data elements and data values to describe each incident and arrest.

Due to the great variation in definitions of criminal offenses, standardized definitions were adopted for all offenses to provide nation wide uniformity. Reporting agencies are required to submit data in accordance with these national definitions. Offenses are divided into Index and Non-Index categories. Because of their seriousness and frequency of occurrence, eight offenses (murder, rape, robbery, aggravated assault, burglary, larceny, motor vehicle theft, and arson) comprise the crime index and serve as indicators of our nation's crime experience.

Offenses are reported to UCR daily, weekly and monthly and are included without regard to the : age of the offender; value of property involved; recovery of stolen property; arrests; or action by prosecution. Unfounded complaints are not included in the crime tables. The same categories are used for both offenses and arrests. Sub-categories are added for robbery, assault, burglary, and larceny offenses to provide a more detailed look at these offenses. Agencies also provide statistics on domestic assaults. Additional information on homicides is collected through a supplemental homicide report.

Michigan's UCR program supports various levels of submission ranging from manually processed forms to automated tapes to on-line data collection. Ninety-three percent of contributors participate in the incident-based system, reporting seventy-one percent of the state's crime statistics. The remaining twenty-nine percent is reported by agencies on the summary system. Information submitted through both these systems provides a comprehensive data base to define the type and extent of crime in Michigan. Data is extracted from the UCR transactions monthly and submitted to the FBI Uniform Crime Reporting program which currently operates a summary system.

Each contributing agency reports only offenses or arrests for offenses committed within its jurisdiction. These offenses represent violations of Michigan statutes and local ordinances. Crime figures presented in this report are law enforcement statistics and are not to be confused with judicial or penal statistics. This report reflects a compilation of the data submitted to the federal program in 1989.

## COMMENTARY ON 1989 CRIME DATA

The information presented in this report provides a study of crime - location, frequency and type of offenses and arrests. It can be used to assist law enforcement agencies in identifying crime patterns. It **should not** be used as a measure of an individual agency's workload.

### CRIME FACTORS

When reviewing and comparing crime statistics, it is important to keep in mind that many factors affect the type and volume of crime that occurs in a given area. These factors have a great impact on the incidence of crime. Consider:

Economic conditions, including median income and job availability

Density and size of the population (urban vs rural)

Climate, including seasonal weather conditions

Relative stability of population (seasonal, transient)

Educational, recreational, and religious characteristics

Composition of the population (age, sex, race)

Effective strength of the police force

Policies of the prosecuting officials and the courts

Attitude of public towards law and enforcement problems

Administrative and investigative emphases of local law enforcement

Degree of adherence to crime reporting standards.

### CRIME RATES

A Crime Rate represents the number of crimes reported for each 100,000 population. It provides a measure of the severity of a crime problem within a given jurisdiction. The rate is calculated by multiplying the number of offenses by 100,000. That number is then divided by the population of the service jurisdiction based on 1980 census figures.

When using this rate for comparisons, keep in mind that certain large cities and tourist areas report crime that may be the result of transient populations. The crime rates for these areas do not reflect these special populations. Also, student populations for colleges and universities are used only to compute the crime rate for the facility, not for county and total state rates.

## URBAN VS RURAL CRIME

Taking into account the demographic changes in Michigan during the eighties, the criteria used to differentiate between urban and rural crime was changed in 1984. **URBAN** crime is defined as all activity reported by the following:

A law enforcement agency servicing an area that is within an area designated by the Census Bureau as urbanized (regardless of the size of its service population or type of agency). Note: an urbanized area is comprised of incorporated places and adjacent densely settled surrounding areas that together have a minimum population of 50,000;

A township police department servicing an area that may be only partially included in an urbanized area but with a population density of at least 500 persons per square mile;

A municipal police department servicing a population of 5000 or more, located outside an urbanized area (Exception: a municipal department with a service population of less than 5000 with boundaries that are adjacent to a municipality with a population of 5000 or greater);

A campus police department with a service area located in a municipality designated as urban, or with a student population of 5000 or more.

All other crime is defined as **RURAL**.

## TERMINOLOGY

Certain terms are used consistently throughout the report. Definitions for Uniform Crime Reporting purposes include:

**Clearance** - refers to the solution of a particular crime, either by the arrest of the offender or through an Exceptional Clearance.

**Exceptional Clearance** - made when an investigation has established an offender, there is enough information to support an arrest charge, the location of the offender is known, but there is a reason outside police control that prevents arresting, charging and prosecuting the offender.

**Clearance by Arrest** - an offense is cleared when an offender has been identified, sufficient evidence to formally charge the suspect has been obtained, and the offender has been ordered to appear in court.

**Trends** - show the fluctuation from year to year, provide an added perspective to study crime.

**Index Crimes** - serve as indicators of the state's crime experience, include Murder, Rape, Robbery, Aggravated Assault, Burglary, Larceny, Motor Vehicle Theft, and Arson. Definitions for these crimes are included with the Offense and Arrest Data.

**Non-Index Crimes** - violations of state and local law including:

***Negligent Manslaughter*** - deaths determined by police investigation to be primarily caused by gross negligence (except motor vehicle accidents).

***Other Assaults*** - all non-aggravated assaults and attempted assaults.

***Forgery & Counterfeiting*** - making, altering, uttering and possessing forged documents.

***Fraud*** - making, altering, presenting, advertising, converting and obtaining money under false pretenses.

***Embezzlement*** - all offenses concerning embezzlement and conversion.

***Stolen Property*** - offenses and attempts involving buying, receiving, and possessing such property.

***Vandalism*** - malicious destruction of property.

***Weapons*** - (carrying, possessing) all violations of firearm registrations.

***Prostitution & Commercialized Vice*** - sex offenses, attempts of a commercialized nature.

***Sex Offenses*** - all offenses and attempts against chastity, common decency and morals (except rape and prostitution).

***Drug Laws*** - possession and unlawful use, sale, or distribution of controlled substances.

***Gambling*** - promoting, permitting or engaging in gambling.

***Offenses Against Family & Children*** - non-support, desertion, neglect and abuse.

***Driving Under the Influence*** - operating a vehicle under the influence of liquor or drugs.

***Liquor Laws*** - all violations of the liquor laws with the exception of driving under the influence and common drunkenness.

***Drunkenness*** - drunk and disorderly and common drunkenness.

***Disorderly Conduct*** - offenses involving committing a breach of the peace.

***Vagrancy*** - offenses of vagabonds, beggars and loiterers.

***All Other Offenses*** - all other violations.

# COOPERATIVE DRUG CONCEPTS

The major thrust in Michigan narcotics enforcement has been the cooperative drug team. Many law enforcement agencies (police departments, sheriff offices, and the Michigan State Police) have joined forces to combat the sale, distribution and use of narcotics in Michigan.

The cooperative concepts cover nearly all of the state and consists of a Board of Directors comprised of state, county and local police officials, prosecutors, and in one instance, federal agencies. There are currently 17 cooperative teams.

The following departments provide manpower/funds/equipment to the cooperative concepts. The offenses and arrests reported to UCR for 1989 are also listed by concept. These offenses and arrests are included within State Police data by county. The statistics in this report may differ from the actual count. Since this is the first year there has been an attempt to publish separate statistics for drug concepts. Also, some figures were unavailable for publication at the time of printing.

# POPULATION PYRAMIDS

A population pyramid is intended to graphically show the distribution of persons by age and sex. Each bar shows the percent of the total population in that age group. The total of all the bars is 100 percent.

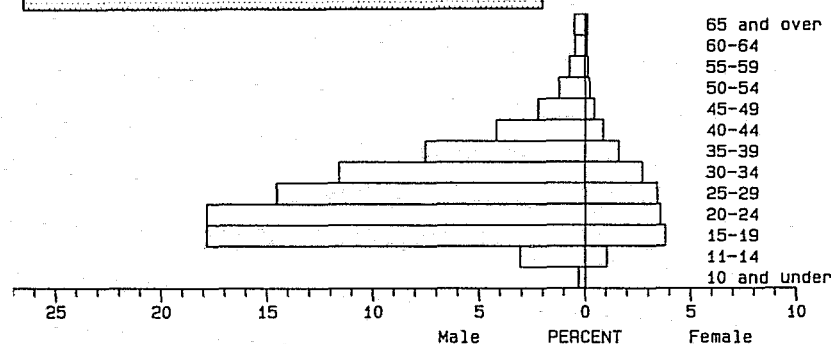

The pyramids displayed below show the characteristics of Michigan's 1988 and 1989 Total Arrests.

When comparing 1988 and 1989 distribution, there is only minimal change in the cohorts. There is a very slight increase, less than one percent, in the number of males arrested in the 35-39 age group and also in the 40-44 age group. There is a slight decrease, again less than one percent in the number of males arrested in the 20-24 age group and the 15-19 age group.
