PREFACE

Crime in Illinois, 1989 marks the eighteenth year that the Illinois State Police has compiled and published annual crime statistics for the state. The publication is one of the products of the Illinois Uniform Crime Reporting Program, which entails the submission of data by law enforcement agencies throughout the state. When correlated and analyzed, the statistics constitute a useful body of knowledge that can significantly contribute to management and planning activities at local, state and federal levels.

Each year, the quality and scope of the Illinois Uniform Crime Reporting Program have increased, thanks to the cooperation and dedication of each participating agency. I am confident that the trend will continue.

With appreciation and thanks to all who have contributed to its publication, I present *Crime in Illinois, 1989* to the people of Illinois.

INTRODUCTION

THE ILLINOIS UNIFORM CRIME REPORTING PROGRAM

The Illinois Uniform Crime Reporting (I-UCR) Program was developed in 1971 and implemented on January 1, 1972. The I-UCR Program has evolved into a system intended to meet the needs of all reporting agencies. It is an incident-based reporting system designed to accomplish the following major goals:

- To provide needed administrative statistics for law enforcement agencies.
- To provide the legislature with information necessary to formulate effective laws which address the crime problem.
- To provide Illinois citizens with the most complete information on the nature and extent of crime.
- To include comprehensive data for researchers and planners.
- To adhere to the national program's standards.

Reporting crime statistics is mandated by chapter 38, paragraph 206-8 of the *Illinois Revised Statutes:*

> *206-8. Crime Statistics. The Department (of State Police) shall be a central repository and custodian of crime statistics for the state and it shall have all power incident thereto to carry out the purposes of this Act, including the power to demand and receive cooperation in the submission of crime statistics from all units of government.*

Reporting agencies receive monthly and quarterly summaries of the reported criminal activity within their jurisdictions upon request. All offenses known to law enforcement agencies are reported monthly to the Crime Studies Section of the Bureau of Identification. Participating jurisdictions include villages, municipalities, counties, colleges, universities, park districts, railroads, and hospitals throughout Illinois. Agencies may also submit service code and local ordinance data in order to provide law enforcement administrators with information for use in planning and research, determining and utilizing manpower, budgeting, and developing and evaluating crime prevention programs.

In 1989, there were 1,002 law enforcement agencies in Illinois, 752 of which reported crime statistics directly to the Bureau of Identification. The remaining agencies reported their crime statistics through an intermediary agency (sheriff's office, police department, etc.). Agencies submit their data through the use of paper forms, computer printouts, magnetic tape, floppy disk, or via remote on-line terminals.

CHICAGO POLICE DEPARTMENT AND DOWNSTATE ILLINOIS TOTALS

The practices employed by the Chicago Police Department to report Illinois Uniform Crime data are not consistent with those used by all other reporting agencies. In order to avoid creating a misleading impression concerning statewide crime and arrest trends, statistics from the Chicago Police Department are presented separately in this publication.

The reader is advised to read carefully the footnotes in the various sections of this publication that pertain to specific Chicago Police Department reporting practices.

Sections pertaining to Crime Index Offense and Arrest data indicate separate totals for Chicago Police Department and separate totals for Downstate Illinois which consists of sheriff's offices, police departments (other than the Chicago Police Department), colleges, universities, and Secretary of State's Office. State totals have been calculated only when the inclusion of the Chicago Police Department data would not create a misleading impression concerning the statewide total.

CONSIDERATIONS FOR INTERPRETATION

When comparing the crime statistics of one agency with another, many factors should be taken into consideration before conclusions are made. Some of the conditions affecting the type and volume of crime are:

- Population density and degree of urbanization with size of locality and its surrounding area.
- Variations in composition of the population, particularly youth concentration.
- Stability of population with respect to residents' mobility, commuting patterns, and transient factors.
- Modes of transportation and highway systems.
- Economic conditions, including median income, destitution, and job availability.
- Cultural conditions, such as educational, recreational, and religious characteristics.

Considerations For Interpretation (cont'd)

- Family conditions with respect to divorce and family cohesiveness.
- Climate.
- Effective strength of law enforcement agencies.
- Administrative and investigative emphases of law enforcement.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
- Attitudes of citizenry toward crime.
- Crime reporting practices of citizenry.[1]

THE CRIME INDEX

The Crime Index is the total number of index offenses occurring within a given jurisdiction during a specified period of time. It is used to indicate the amount and extent of serious crimes as defined by the International Association of Chiefs of Police Committee on Uniform Crime Reports. The Crime Index consists of violent crimes — murder and nonnegligent manslaughter; forcible rape; robbery; and aggravated assault, and of property crimes — burglary, theft, motor vehicle theft, and arson.

The index crimes used by the I-UCR Program translate into the national program's eight Crime Index offenses as:

Violent Crimes

Murder and nonnegligent manslaughter — The willful killing of a person or the death of a person caused by gross negligence of an individual other than the victim.

Forcible rape — The carnal knowledge of a female, forcibly and against her will; includes attempted rape. Illinois reports criminal sexual assault offenses rather than rape offenses under this category.

Robbery — The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence; includes attempted robbery.

Aggravated assault — The intentional causing of serious bodily harm or the intentional attempt or threat of serious bodily injury or death; includes aggravated battery and attempted murder.

Property Crimes

Burglary — The unlawful entry of a structure to commit a felony or theft; includes attempted burglary.

Theft — The unlawful taking or stealing of property or articles without the use of force, violence, or fraud; includes burglary from motor vehicle and attempts.

Motor vehicle theft — The unlawful taking or stealing of a motor vehicle; includes attempted motor vehicle theft.

Arson — The willful or malicious burning or attempts to burn, with or without intent to defraud, a dwelling house, public building or any building, motor vehicle, aircraft, or personal property of another.

THE CRIME RATE

The crime rate indicates the volume of crime occurring within a given population. It is defined as the total number of index crimes per 100,000 inhabitants and is calculated as follows:

$$\frac{\text{Crime Index} \times 100{,}000}{\text{jurisdictional population}} = \text{crime rate}$$

The jurisdictional population can be that of a city, town, village, state, or nation.

CRIME TRENDS

VIOLENT CRIMES
PROPERTY CRIMES

Please note the following while reviewing this section:

The Downstate Total is the sum of data reported by sheriffs' offices, police departments (other than the Chicago Police Department), colleges, universities and the Secretary of State's Office.

The Chicago Police Department Total is the data reported only by the Chicago Police Department.

State Total is the sum of the Chicago Police Department and Downstate Illinois. State Totals have been calculated only when the inclusion of the Chicago Police Department data would not create a misleading impression concerning the statewide total.

Each category of offense and arrest information reflect data for offenses that occurred between January 1, 1989 and December 31, 1989. Because of agency adjustments and late submissions, 1988 figures reflected in this publication are not comparable with those figures published in *Crime In Illinois 1988.*

The 1988 and 1989 Murder totals are a total of First and Second Degree Murder. The 1987 Murder total is a total of Murder and Voluntary Manslaughter. The statute provisions for Murder and Voluntary Manslaughter were amended to First and Second Degree Murder and became effective on July 1, 1987. Since the statute amendment became effective during the I-UCR reporting year, the I-UCR offense code change was not implemented until January 1, 1988.

For previous *Crime In Illinois* publications, the actual decennial census supplemented by special census updates was used for calculating the crime rate. In order to be more responsive to population changes, the 1987 and 1988 crime rates for this section were calculated using the 1986 estimated population statistics. The 1989 crime rate was calculated using the 1988 estimated population statistics. The population census statistics indicated in this section are the most recent complete population census statistics available for each year. The crime rates in this section are not comparable to previous publications of *Crime In Illinois.* Section IV, Crime Index/Crime Rate Data, contains a more detailed explanation.

First degree murder

38 § 9-1.

(a) A person who kills an individual without lawful justification commits first degree murder if, in performing the acts which cause the death:

(1) He either intends to kill or do great bodily harm to that individual or another, or knows that such acts will cause death to that individual or another; or

(2) He knows that such acts create a strong probability of death or great bodily harm to that individual or another; or

(3) He is attempting or committing a forcible felony other than second degree murder.

Second degree murder

38 § 9-2.

(a) A person commits the offense of second degree murder when he commits the offense of first degree murder as defined in paragraphs (1) or (2) of subsection (a) Section 9-1 of this Code and either of the following mitigating factors are present:

(1) At the time of the killing he is acting under a sudden and intense passion resulting from serious provocation by the individual killed or another whom the offender endeavors to kill, but he negligently or accidentally causes the death of the individual killed; or

(2) At the time of the killing he believes the circumstances to be such that, if they existed, would justify or exonerate the killing under the principles stated in Article 7 of this Code, but his belief is unreasonable.

(b) Serious provocation is conduct sufficient to excite an intense passion in a reasonable person.

The murder totals indicated in the various charts reflect an aggregate total of first degree murder and second degree murder.

ARSON

The I-UCR Program includes arson-explosive device, arson-incendiary device, aggravated arson, and attempted arson in the data presented under the heading of arson, but does not include possession of explosive or incendiary devices.

Arson

38 § 20-1.

A person commits arson when, by means of fire or explosive, he knowingly:

(a) Damages any real property, or any personal property having a value of $150 or more, or another without his consent; or

(b) With intent to defraud an insurer, damages any property or any personal property having a value of $150 or more.

Property "of another" means a building or other property, whether real or personal, in which a person other than the offender has an interest which the offender has no authority to defeat or impair, even though the offender may also have an interest in the building or property.

Aggravated arson

38 § 20-1.1.

(a) A person commits aggravated arson when, in the course of committing arson, he knowingly damages, partially or totally, any building or structure, including any adjacent building or structure, and:

(1) He knows or reasonably should know that one or more persons are present therein; or

(2) Any person suffers great bodily harm, or permanent disability or disfigurement as a result of the fire or explosion.

(3) A fireman or policeman who is present at the scene acting in the line of duty, is injured as a result of the fire or explosion.

VANDALISM

As used in the national program, the term vandalism includes a broad range of malicious behavior such as cutting auto tires, drawing obscene pictures on public walls, smashing windows, and destroying school records. Vandalism statistics are not part of the Crime Index, but are presented here for general interest.

The I-UCR Program includes criminal damage to property, criminal damage to vehicle, criminal damage to state supported property, criminal damage to fire fighting apparatus, and institutional vandalism in the data presented under the heading of vandalism.

This section reflects only Downstate Illinois totals. The Chicago Police Department does not report Vandalism related offenses to the I-UCR Program.

OFFENSE AND CLEARANCE DATA

Since Illinois Uniform Crime Reporting practices employed by the Chicago Police Department are not consistent with those used by all other reporting agencies, this section does not contain any State totals. Two separate Offense and Clearance Trend reports are presented. The first report is for Downstate Illinois and contains data reported by sheriffs' offices, police departments (other than the Chicago Police Department), colleges, universities and the Secretary of State's Office. The second report is for the Chicago Police Department. Each report includes the following:

Offenses Known to the Police — the number of offenses scored.

Offenses Actually Occurred — offenses police pursued through investigation to solution; the total Offenses Known to Police minus Unfounded Offenses and Offenses Referred to Responsible Jurisdiction; used to compile the Crime Index.

Total Offenses Cleared — Cleared by Arrest-Adult, Cleared by Arrest-Juvenile, Failed to File Complaint or Prosecute-Adult, Failed to File Complaint or Prosecute-Juvenile, Other Exceptional Clearances-Adult, and Other Exceptional Clearances-Juvenile; administratively closed cases are not considered clearances.

CRIME INDEX/CRIME RATE DATA

Caution should be exercised when reviewing and using these data. The many social factors related to crime and a community's residential population, used to calculate the crime rate, must be considered when making statistical comparisons. A community may have a small residential population but a large moving population because of a substantial number of manufacturers, motels, etc., within its jurisdiction. The large moving population attracts criminal behavior that occurs within the small jurisdiction and must be reported by the law enforcement agency. The crime rate calculation does not compensate for a moving population. The statistics can make it appear that crimes are committed by community residents when this is not necessarily true.

It should be noted that in past years, the I-UCR Program has used the actual decennial census supplemented by the Bureau of the Census's special census updates. In order to be more responsive to population changes, the 1988 crime rate for this section was calculated using the 1986 estimated population statistics. The 1989 crime rate was calculated using the 1988 estimated population statistics. This section's population statistics are the most recent complete population statistics available and were obtained from U.S. Bureau of the Census, Current Population Reports, Series P-26, No. 88-ENC-SC, 1988 Population and 1987 Per Capita Income Estimates for Counties and Incorporated Places: East North Central, and series P-26, No. 86-ENC-SC, 1986 Population and 1985 Per Capita Income Estimates for Counties and Incorporated Places: East North Central U.S. Government Printing Office, Washington, D.C. 1990.

During the Illinois Uniform Crime Reporting year of 1989, there were 57 cities with I-UCR participating police departments which were located in more than one county. During the Illinois Uniform Crime Reporting year of 1988, there were 56 cities with I-UCR participating police departments which were located in more than one county (see appendix for list of cities and counties.) In order to calculate the county crime rate, crime index total and each of the eight crime index offense totals, each of the 57 cities' crime rate, crime index total and each of the eight crime index offense totals has been proportioned based on the percentage of population residing in each county. The following is an example for calculating the crime index total:

> Naperville with a total population of 66,930 has 61,260 or 91.5% of its population in Du Page County and 5,670 or 8.5% of its population in Will County. The total crime index for Naperville in 1988 was 2,002.
>
> The crime index has been computed as follows for Du Page and Will County:

	County	Population	Total Crime Index
Naperville	Du Page	61,260 ÷ 66,930 = .91528 × 2,002 =	1,832
	Will	5,670 ÷ 66,930 = .08471 × 2,002 =	170
Naperville	Total	66,930	2,002

The crime index that was calculated for Du Page County based upon the percentage of Naperville's population residing in Du Page County has been added to the total crime index for Du Page County. The crime index that was calculated for Will County based upon the percentage of Naperville's population residing in Will County has been added to the total crime index for Will County.

It should be noted that each county total reflects crime data reported by police departments, sheriffs' offices, colleges and universities that are located within each county. Since the Secretary of State's Office has districts that have multi-county jurisdiction, the Secretary of State's Office totals are not reflected in the county total but are reflected in the state total.

There are separate Crime Index/Crime Rate comparison reports for the following:

Police Departments
Sheriffs' Offices
Colleges and Universities
Secretary of State
Counties
Illinois State Police
Hospitals
Railroads
Park District
Airports
Other Agencies

The Crime Index/Crime Rate Comparison State Total is an aggregate total of the sheriffs' offices, police departments, colleges, universities and Secretary of State's Office.

Positive values in this section are not preceded by a '+' as in other sections within this publication.

Because of agency adjustments, late submissions and changes in the population statistics used for calculating the crime rate, the 1988 figures reflected in this section are not comparable with those figures published in *Crime In Illinois 1988*.

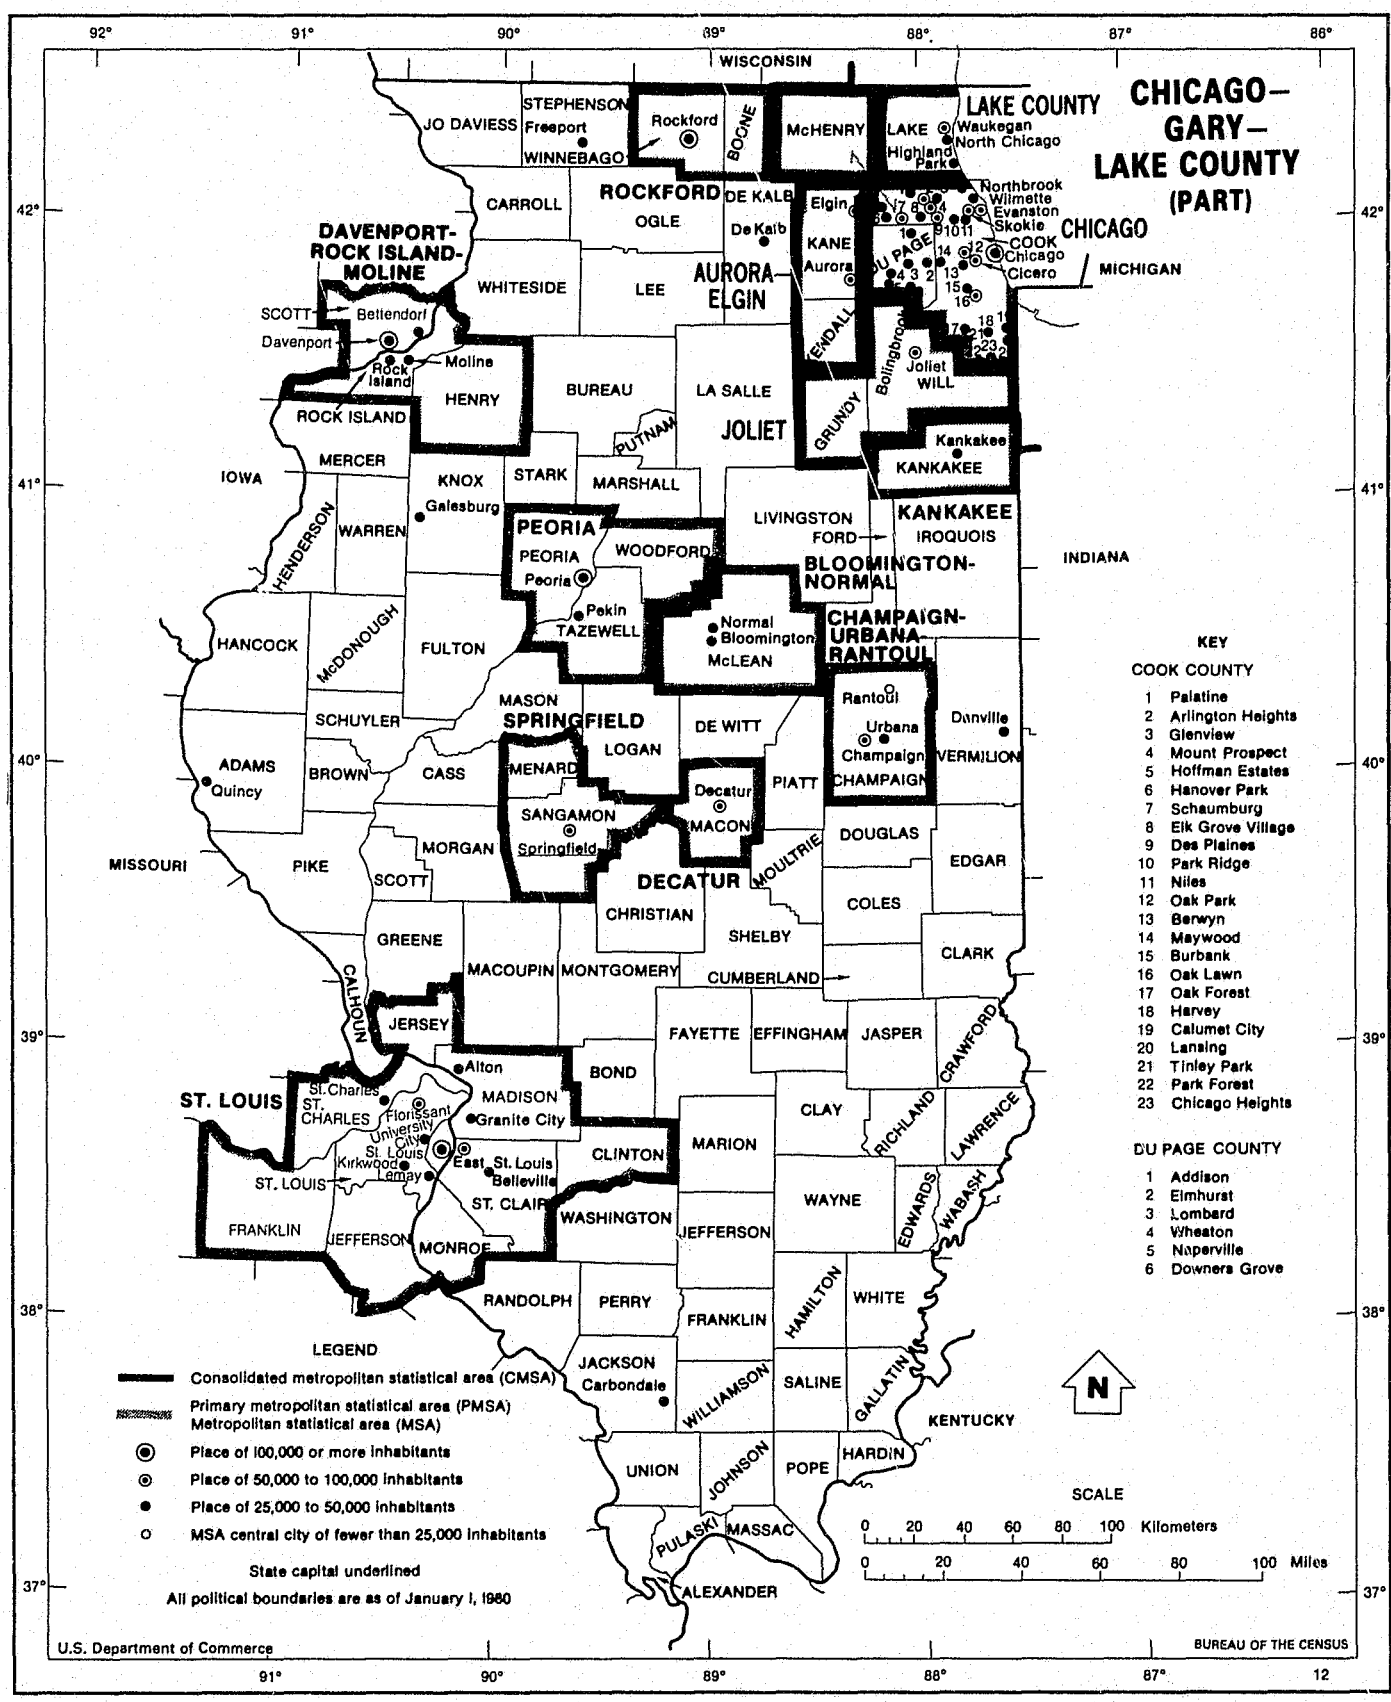
METROPOLITAN STATISTICAL AREAS



CMSA, PMSA, and MSA boundaries are as defined on October 12, 1984

METROPOLITAN STATISTICAL AREAS

By 1980 standards, an area qualifies for recognition as an MSA in one of two ways: (1) if it includes a city of at least 50,000 population, or (2) if it includes an urbanized area of at least 50,000 population with a total metropolitan population of at least 100,000. In addition to the county containing the main city or urbanized area, an MSA may include additional cities having strong economic and social ties to the central city.* In Illinois MSAs, the county sheriff's office is also included for crime reporting purposes. Two of the MSAs overlap with Iowa and Missouri. Areas outside of Illinois that are included in an MSA are not represented in the statistics presented here. In some cases, the percentages may not equal 100 due to rounding.

MSA Summary

The inhabitants of the large and small municipalities that comprise the states MSAs account for 82.5 percent of the state population. The total MSA index crimes account for 92.2 percent of the Illinois Crime Index.

LAW ENFORCEMENT EMPLOYMENT INFORMATION

The employment rate for law enforcement personnel is calculated as follows:

$$\frac{\text{number of employees} \times 1{,}000}{\text{jurisdictional population}} = \text{employment rate}$$

Example:

A department with 60 employees in a population of 51,000 has an employment rate of 1.2 per 1,000 inhabitants.

$$\frac{60 \times 1{,}000}{51{,}000} = 1.2 \text{ per } 1{,}000 \text{ inhabitants}$$

Law enforcement employment rates should not be correlated with index crimes; non-index offenses and the many services performed by the typical law enforcement officer amount to over 80 percent of the officer's workload, the details of which usually remain unpublished. Each community should consider all the factors related to the causes of crime and determine the role of the law enforcement department relative to crime and to required services.

The 25,279 part- and full-time sworn officers in 1989 account for 84.2 percent of the police department work force. The 1989 employment rate for sworn employees of police departments is 2.7 per 1,000 inhabitants. The 4,749 civilian employees comprise 15.8 percent of the police department work force, with an employment rate of .5 per 1,000 inhabitants.

The 3,551 part- and full-time sworn officers in 1989 account for 72.7 percent of the sheriffs' offices work force. The 1989 employment rate for sworn employees of sheriffs' offices is 1.5 per 1,000 inhabitants. The 1,334 civilian employees comprise 27.3 percent of the sheriffs' offices work force, with an employment rate of .6 per 1,000 inhabitants.
