FOREWORD

This is the sixteenth Crime and Justice Annual Report prepared by the Division of Criminal Justice Services pursuant to Sections 837, 837-a, and 837-b of the Executive Law.

The Division appreciates the cooperation and support of the nearly 600 police departments, sheriffs' offices and specialized police agencies that provide offense and arrest data for the report. We also wish to express our gratitude to District Attorney and Special Prosecutor offices throughout the State for their continued cooperation and assistance in providing data on the processing of felons. The Division is also indebted to the Superintendent of the Division of State Police, the Chairman of the Board of Parole, the Chairman of the Commission of Correction, the Commissioner of Correctional Services, the State Administrator of the Courts, the Chairperson of the Crime Victims Board, the Director of the Division for Youth, and the Director of Probation and Correctional Alternatives for the data provided by their respective agencies.

The contributions of all involved in the preparation of this report permit the Division to provide a clear picture of the nature of crime and justice issues in New York State. Without the concerted and dedicated efforts of the people who serve in the many local and State agencies which comprise our criminal justice system, the publication of this report would not be possible. It is these efforts which are documented in this Crime and Justice Annual Report.

1990 CRIME AND JUSTICE

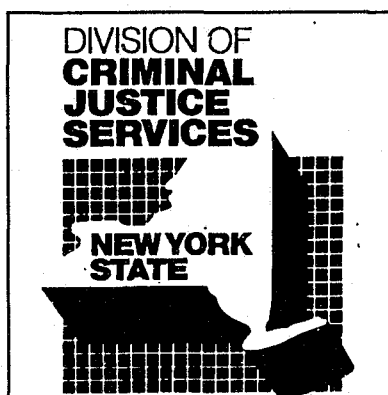

ANNUAL REPORT

NEW YORK STATE COUNTIES AND COUNTY SEATS★

ALBANY
STATE OF NEW YORK

INTRODUCTION

The New York State Division of Criminal Justice Services was assigned the responsibility for the collection of data concerning crimes and arrests in New York State, effective January 1975, pursuant to Sections 837, 837-a and 837-b of the Executive Law.

In assuming that responsibility, the Division was also committed to providing relevant data to the National Uniform Crime Reporting Program administered by the Federal Bureau of Investigation and to disseminating this information to the New York State criminal justice community.

This publication is the sixteenth annual report produced in discharge of that responsibility.

Because of incomplete reporting by some agencies in Cattaraugus, Chemung, Dutchess, Herkimer, Onondaga, Ontario, Rensselaer and Seneca counties, tables presenting data for these agencies and counties (see pp. 14ff) may have reduced 1990 crime totals. Comparisons with the 1989 data (which was based on complete reporting) should be made with this in mind. The effect on upstate and statewide crime totals for 1990 must also be taken into consideration when making any comparisons.

UNIFORM CRIME REPORTING

Uniform Crime Reports submitted monthly by police agencies in New York State are the basis for much of the material contained in this report. These reports include information on:

Part I Offenses
Part II Offenses
Location and Time of the Offense
Value of Property Stolen
Part I Arrests
Part II Arrests
Law Enforcement Officers Killed or
Assaulted
Number of Law Enforcement Employees

This report also provides greater detail regarding the following aspects of Part I Offenses:

- a. Type of Weapon/Force Used
- b. Type of Location in which the Crime was Committed
- c. Number of Offenses Cleared
- d. Type and Amount of Property Stolen and Recovered

For many reasons, not all offenses come to the attention of the police. Victims may feel too embarrassed to report a crime or that the loss sustained was too small to report or believe that there is nothing the police can do. Victimization studies have confirmed that many offenses are never reported.

When an offense is cleared, it is usually done by one or more arrests. However, there are exceptional circumstances when an offense may be cleared without an arrest. Exceptional clearances result when the police know who and where the offender is and have enough evidence to support an arrest, but are prevented from doing so because of some reason outside of their control.

To combat crime effectively, it must be known when and where crime is occurring. The county, as a crime location, is not sufficiently definitive. Therefore, we have instituted direct reporting to the state program from every police chief and sheriff in New York State in accordance with state law.

It is important to note that without the collaboration of the law enforcement agencies and cooperation of the criminal justice agencies, this report would not be possible.

- ▶ In 1990, 571 of 574 law enforcement agencies participated in the Uniform Crime Reporting Program and agencies with multi-county jurisdictions reported separately for each county within their jurisdiction. Because of incomplete reporting by some agencies in Cattaraugus, Chemung, Dutchess, Herkimer, Onondaga, Ontario, Rensselaer and Seneca counties, tables presenting data for these agencies and counties (see pp. 14ff) may have reduced 1990 crime totals. Comparisons with the 1989 data (which was based on complete reporting) should be made with this in mind. The effect on upstate and statewide crime totals for 1990 must also be taken into consideration when making any comparisons.

AGE, SEX, RACE AND ETHNIC ORIGINS OF PERSONS ARRESTED

1. Persons Under 16 Years of Age (Juvenile)
2. Persons 16 Years of Age and Over (Adults)

- ▶ Note: The FBI/UCR Program treats persons under 18 as juveniles, and requires that they be so reported. This report, however, is compiled in accordance with New York State law which classifies juveniles as those persons under 16 and adults as those 16 and over.

LAW ENFORCEMENT OFFICERS KILLED OR ASSAULTED

Statistics are provided on the number of New York State law enforcement officers killed or assaulted. A description of the conditions under which the officers were assaulted is also provided.

HOMICIDE ANALYSIS

- ▶ Details on homicides committed in New York State, including characteristics of victims and circumstances under which such homicides occurred, are provided.

ARSON ANALYSIS

- ▶ This report provides additional detail concerning arson. The analysis describes the types of structures involved, distribution of activity and clearance rates.

DOMESTIC VIOLENCE

- ▶ Statistics are presented relating to the incidence of domestic violence by geographic locations in New York State, New York City and Upstate Counties.

In addition to Uniform Crime Reporting data contained in this report, we have provided data on felony arrests, felony drug arrests, and felony indictments and dispositions.

- ▶ The arrest material is derived from the Computerized Criminal History (CCH), which is based on the arrest fingerprint cards submitted to the Division of Criminal Justice Services in compliance with Section 160.20 of the Criminal Procedure Law. Adult felony and misdemeanor arrests are presented for each county from 1986 through 1990.

FELONY INDICTMENT AND DISPOSITION

The felony indictment and disposition material is reported by District Attorneys and Special Prosecutors throughout the State pursuant to Section 837-a of the Executive Law. This material includes data on felony indictments, felony drug indictments, felony dispositions and median time from indictment through disposition.

- ▶ Information from other criminal justice agencies is included in this report to present, in one volume, as much information as possible about the criminal justice system.

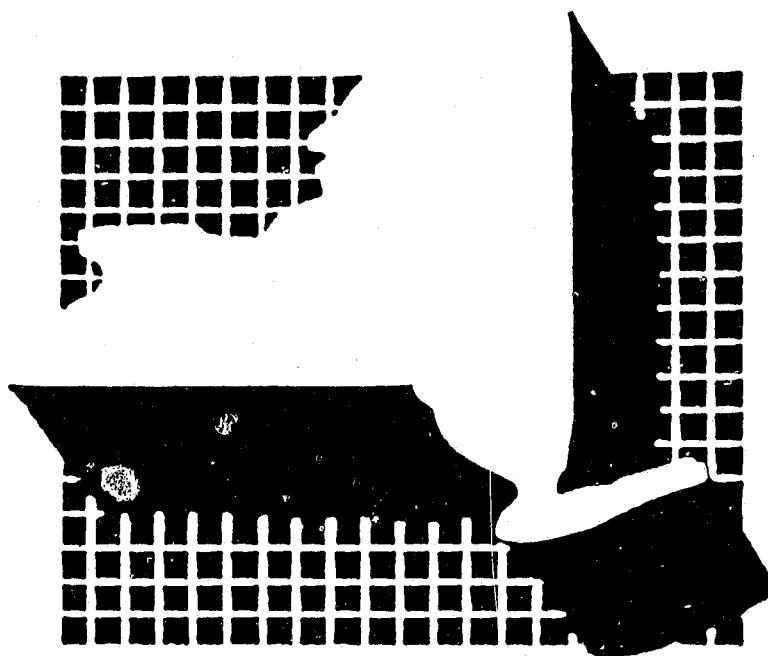

OTHER SUBMITTING AGENCIES

Agencies that have submitted data and are included in this report are:

Office of Court Administration
Division of Probation and Correctional Alternatives
Department of Correctional Services
Commission of Correction
Division of Parole
Division For Youth
Crime Victims Board

POPULATION DATA SOURCE

Population data used for calculating crime rates for the 1990 Crime and Justice Annual Report are based on 1990 census data and updates provided by the United States Department of Commerce - Bureau of Census and the United States Department of Justice - Federal Bureau of Investigation.

DOMESTIC VIOLENCE

OFFENSES

For over 50 years criminal offenses have been used as a crime index to assess the level of criminal activity within an area. The index offenses were selected because of their seriousness or frequency of occurrence.

The index offenses are murder & non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny and motor vehicle theft.

Comparisons of crime rates between police agencies or counties should be made with extreme caution. The crime rates published in this report are based solely on offenses reported or known to the police and the size of the resident population. Additional factors which may influence crime rates are density of population, geographic location, social attitudes, economic conditions, number of law enforcement officers, seasonal and transient populations, and rural or urban environments.

**NEW YORK STATE
HOMICIDE
1990**

SUMMARY

Reported Homicides

- ▶ There were 2,624 homicide victims in New York State in 1990, a 15.8 percent increase over the 2,266 victims in 1989.
- ▶ The 2,624 homicide victims were slain in 2,439 homicide incidents which involved a total of 1,600 known offenders.
- ▶ The month of February had the fewest homicides (162) and November had the most (258), a range of 96.
- ▶ The first quarter of 1990 had the fewest homicides (22 percent) and the fourth quarter had the most (28 percent).
- ▶ New York City reported 86 percent of the homicides in the State, the remaining 14 percent being reported by counties outside New York City.

Offender Characteristics

- ▶ In the 1,251 cases where the age of the offender was known, 50 percent of the offenders were in the age group of 16-24.
- ▶ Offenders were predominately male. In the 1,495 cases where the sex of the offender was known, 93 percent of the offenders were male.
- ▶ In the 1,455 cases where offender race was known, 41 percent of the offenders were white and 56 percent were black.

Note: Prior to 1989, a homicide victim with an undetermined number of offenders was counted as one offender and added to the "unknown" offender tally. Beginning with the 1989 report, no assumption is made about the number of offenders in a case with an undetermined number of offenders. As a result, the "unknown" value is not reported in the offender tables, since it is truly unknown. For this analysis, the number of incidents and the number of victims are the basic units of count, with the offender, weapon and other data as subordinate data fields attached to the victim(s) in a given incident.

Victim Characteristics

- ▶ In the 2,586 cases that the age of the victim was known, 63 percent of the victims were in the age group of 20-39.
- ▶ In the 2,617 cases where the victim's sex was known, 84 percent of the victims were male.
- ▶ For the 2,609 cases where victim race was known, 48 percent of the victims were white and 50 percent were black.

Victim-Offender Characteristics

- ▶ Victims tend to be slightly older than the offenders. A victim is most likely to be in the 20-24 age range, while an offender is most likely to be in the 16-19 age range.

Victim-Offender Relationship

- ▶ Males are more likely to be killed in situations outside the family setting, usually involving a stranger or a casual acquaintance. This occurs in 86 percent of the 643 cases where the relationship is known.
- ▶ Females are more likely to be killed by a family member or in a romantic dispute. This occurs in 44 percent of the 211 cases where the relationship is known.

Circumstances

- ▶ The circumstances surrounding a homicide were unknown in 50 percent of the cases.
- ▶ For the 1,313 cases where the circumstances were known, 35 percent were felony connected.
- ▶ In the 2,624 cases where the location was known, 42 percent of the victims were killed indoors and 58 percent outdoors.

Weapons

- ▶ In the 2,599 cases where the type of weapon was known, 66 percent were killed by firearms and 34 percent were killed by all other means.
- ▶ Among the firearm victims, 94 percent were killed by handguns and 6 percent by rifles, shotguns, etc.
- ▶ The most frequently occurring homicide was a shooting with a handgun of a victim 20-24 years old.

ARSON

This is the twelfth analysis of arsons in New York State to be presented in the Crime and Justice Annual Report. The data for these analyses are derived from a supplementary arson data collection program begun in 1979 under the Uniform Crime Reporting (UCR) System.

- *Arson is defined by the Uniform Crime Reporting Program as a "willful or malicious burning, or attempted burning of a dwelling house, public building, motor vehicle, aircraft, or personal property of another." Only fires determined through investigation to have been willfully or maliciously set are classified as arsons.*
- *A "cleared"* arson incident is defined as an offense for which a perpetrator has been taken into custody or is otherwise known by police to have committed the crime, but for reasons outside police control cannot be taken into custody.*

Arsons reported under Part II of the UCR program and shown elsewhere in this volume are reported under the "hierarchy rule," whereby an offense is counted only if it is the most serious in an incident. Under this program, an arson offense is reported regardless of whether it occurred in conjunction with a more serious offense. This analysis, therefore, shows more arson offenses than are shown for arson offenses in the UCR Part II offense presentations.

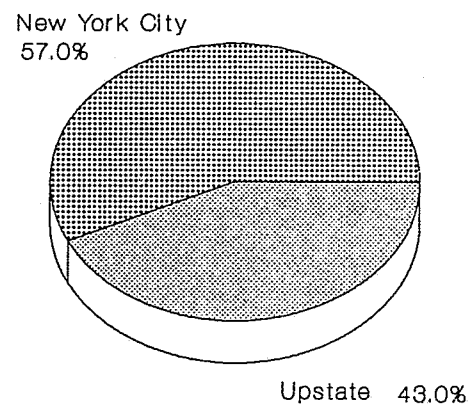

Estimated values of property damaged are included in the report in order to provide an estimate of the absolute minimum dollar value. Because many police departments have little or no access to dollar amounts for arson, the monetary values for many arson cases are not reported.

TYPE OF PROPERTY

STRUCTURAL	MOBILE	OTHER
Residential <i>Single Occupancy:</i> Houses, townhouses, duplexes <i>Other:</i> Apartments, flats, tenements, hotels, dormitories, boarding houses	Motor Vehicle Automobiles, trucks, buses, motorcycles, snowmobiles Other Airplanes, boats, trailers, recreational vehicles	Crops, timber, fences, signs
Commercial <i>Storage:</i> Warehouses, garages, barns <i>Industrial/Manufacturing:</i> Factories, manufacturing facilities <i>All other:</i> Stores, restaurants, offices		
Public/Community Churches, schools, hospitals, jails		
Other Monuments, construction sites, out-buildings		

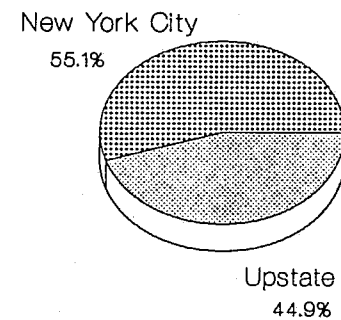

* The clearance rate is the ratio of clearances to the net number of arsons reported, expressed as a percent. Because a 1990 clearance does not necessarily reflect clearance of an offense reported in 1990, the clearance rate should be considered only as a general indicator of processing efficiency.

ARSON ANALYSIS NEW YORK STATE SUMMARY

ARSONS REPORTED

There were 11,404 arson incidents reported in New York State in 1990, a 4.8% increase from 1989.

Structural Arsons

- o Arsons of structures accounted for 58.0% of all New York State arsons. Of these, 40.1% were residential arsons. Consistent with data from previous years, residential structural arsons remained the most common type of structural arson throughout the state.*
- o Commercial structure arsons accounted for 12.7% of all arsons in New York State. "Other Commercial" arsons, the most frequent form of commercial arson in New York State, accounted for 8.3% of the arsons statewide.*
- o The 756 arsons that occurred in abandoned structures accounted for 6.6% of all arsons in New York State. Residential structures were the most common form of abandoned structures to be targets for arson.*

Mobile Arsons

- o In this category, the 4,317 "motor vehicle" arsons reported in New York State accounted for 37.9% of all New York State arsons, while "other mobile" accounted for 1.0% of these arsons.*

ARSONS CLEARED

- o In 1990, 1,275 arson incidents were cleared in New York State. Of these, 78.0% were structure arsons, of which 49.3% were residential and 19.0% were commercial.*
- o Three hundred twelve of the arson clearances involved persons under age 18. Persons in this age group accounted for 24.5% of the arson clearances in the state; this represents a decrease from 1989 when they accounted for 26.3%.*

ARSON CLEARANCE RATES

- o The 1990 clearance rate for all arsons in New York State was 11.2%. This relatively low clearance rate seems to reflect the extreme difficulty in solving a crime in which much of the physical evidence is destroyed.*
- o Arson clearance rates also vary by the type of property involved. In 1990, statewide clearance rates for the "community/public" (22.7%) and "single occupancy residential" (20.4%) categories had the highest clearance rates, while "motor vehicle arson" had the lowest clearance rate (5.2%).*

NEW YORK STATE DOMESTIC VIOLENCE 1990

The Governor's Task Force on Domestic Violence was established by Executive Order #90 on May 17, 1979, to study "the traumatic effects of domestic violence and how our social and legal systems can better deal with such violence and its causes."

The Uniform Crime Reporting System (UCR) is utilized by DCJS as the data collection instrument for obtaining domestic violence data from the local law enforcement agencies. The domestic violence data reflected in this report are based on those offenses which have come to the attention of law enforcement officers, regardless of whether a formal complaint was filed or an arrest made.

Statewide, domestic violence offenses reported decreased. A total of 88,227 offenses were reported in 1990 as opposed to 93,109 reported in 1989, a decrease of 5.2 percent. For New York City, the 44,617 offenses reported in 1990 is a 14.6 percent decrease over 1989, while the Upstate counties increased 6.8 percent.

INDICTMENTS AND DISPOSITIONS

The following tables present data on felony indictments and dispositions for 1990 and 1989. This information is obtained from a statistical reporting system based on individual reports of each indictment and each disposition submitted by district attorneys and special prosecutors throughout the State. The unit of count in this reporting system is the defendant/indictment; that is:

- ▶ When several defendants are named in one proceeding or indictment, each defendant is counted separately; and
- ▶ When one defendant is named in multiple proceedings or indictments, each indictment is counted separately.

The use of offender-based statistics and the tracking of each defendant from time of indictment until final disposition makes possible the measuring of elapsed time between various stages in processing. The median time is obtained by ranking all the values in a specific category (for example, time from indictment to disposition) and choosing the middle number - that is, the number with an equal amount of values above and below it. As a result, the median values are not influenced by very large or very small numbers which can affect averages.

It should be noted that the disposition data reported in these tables pertain to cases handled during the specified year by the superior courts. These dispositions may be for indictments in the same or previous years.

BUREAU OF ENVIRONMENTAL CONSERVATION INVESTIGATIONS (continued)**

From these events, there were 154 charges against 45 persons; 77 felonies, 73 misdemeanors and 2 lesser offenses. Fifty-two corporations were charged with 248 charges; 42 felonies, 199 misdemeanors and 7 lesser offenses. (Over 62% of all charges were accounted for by corporations and over half of the cases (54%) were accounted for by corporate offenders). Arrest charges included such offenses as endangering public health, safety or the environment, operating a solid waste facility without a permit, hazardous waste manifest system violations, permit violations, illegal dealing, possession, disposal, transport of hazardous waste, transporting solid waste without a permit, discharging pollutants into water without a permit, failure to report spills at bulk storage facilities, water pollution, operation of a facility where a leak is occurring, failure to obtain a State Pollution Discharge Elimination System (SPDES) permit. Penal Law violations were also charged such as making false statements, falsifying business records, criminally negligent homicide, manslaughter in the second degree, reckless endangerment, forgery, and criminal possession of a forged instrument.

The Bureau of Environmental Conservation Investigations reported 54 cases disposed in 1990 in addition to 35 administrative settlements. There were 19 dismissals, 1 acquittal, 32 convictions by plea, 2 convictions by trial. Sentences for criminal convictions included 2 jail terms totaling 9 months (and one sentence equal to time served in jail), three sentences of probation totaling 13 years and three sentences to community service amounting to 500 hours. Sentences for fines, penalties, and consent orders totaled \$3,145,003.

Note: A consent order is a legal and enforceable negotiated agreement between the Department of Environmental Conservation and responsible parties where responsible parties agree to undertake investigation and cleanup or pay for the costs of investigation and cleanup work. The order includes a description of the remedial actions to be taken and a schedule for implementation. Monies collected via consent orders are placed in a remedial fund which is used in the cleanup of hazardous waste. Fines indicate a criminal disposition; penalties and consent orders indicate a civil or administrative disposition.

DEPARTMENT OF ENVIRONMENTAL CONSERVATION
DIVISION OF ENVIRONMENTAL ENFORCEMENT
1990 REPORT ON HAZARDOUS WASTE AND WASTE DISPOSAL VIOLATIONS

The Department of Environmental Conservation's (DEC) Division of Environmental Enforcement (DEE) assists in the civil and criminal enforcement of Environmental Conservation Law. Consisting of attorneys, engineers, geologists and chemists, DEE provides valuable legal and technical assistance to a number of State units; Environmental Conservation Investigations, County District Attorney's Offices, the State Attorney General's Office and the U.S. Department of Justice. Support services provided by DEE include legal sufficiency evaluations of investigations, sampling and analysis of evidence, the drafting of search warrants, legal research, and investigator assistance in the development of matters for prosecution referral.

While DEE does not have independent criminal prosecution authority, on many occasions DEE attorneys have been deputized to handle environmental prosecutions.

The Division of Environmental Enforcement's report on 1990 Division activities concerned with hazardous waste and waste disposal violations includes assistance with the cases already reported by Environmental Conservation Investigations and several reported by the District Attorney's Offices. In addition, Environmental Enforcement assists the Department of Justice, the Attorney General's Office, and District Attorney's offices with cases.

Last year the Division of Environmental Enforcement reported 42 criminal cases leading to a conviction. Sentences included jail terms (7) totaling 30 years 10 months, fines and penalties amounting to \$334,750. There was \$100,000 required of an offender to be donated to the monitoring fund, remediation amounting to \$90,000, community service amounting to 630 hours. This year, forfeitures alone amounted to \$909,000.

Sixty civil/administrative actions against offenders resulted in signed consent orders amounting to \$3,354,250 (in one case alone, the offender was penalized \$3.25 million). In addition, one offender was required to place \$150,000 in a site closure account, and to pay \$75,000 for a site monitor. There were also clean up requirements and a requirement in one case to educate employees on the legal application of pesticides.

DIVISION OF CRIMINAL JUSTICE SERVICES
OFFICE OF JUSTICE SYSTEMS ANALYSIS
ENVIRONMENTAL CRIME REPORT

Division of Criminal Justice Services - The Computerized Criminal History/Offender-Based Transaction Statistics (CCH/OBTS) data system utilized by the Division of Criminal Justice Services (DCJS) is a compilation of data from police, courts, and correctional agencies and is used to track individual offenders through the criminal justice system. The total number of violations reported from the information contained in this file is considerably lower than the total number reported by Environmental Conservation Investigations (currently considered the most complete data source on the subject). The reasons are several. In order to be included in the DCJS data base, the charge must have been for a fingerprintable offense as designated by State law. Not all Environmental Conservation hazardous waste/waste disposal violations are fingerprintable. It also follows that in order to be fingerprintable, the charge must have been levied against a person as opposed to a corporation or other entity. In a 1988 review of the hazardous waste/waste disposal violation data on cases disposed by the DEC Investigations Unit it was determined that less than 20 percent of the violators charged were individuals. Lastly, the CCH/OBTS data system requires that the fingerprintable Environmental Conservation hazardous waste/waste disposal charge must be the most serious charge levied ('top-charge') in an arrest or disposition event in order to be included in a DCJS count. Often a violation will include other more serious charges.

The information available through the Division's CCH/OBTS file includes a regional breakdown of the number of violations.

DIVISION OF CRIMINAL JUSTICE SERVICES (continued)

For reasons described above, the number of environmental crimes reported to this agency are small. However, throughout the State there was a noticeable decrease in the number of arrests in which a hazardous waste violation was the most serious charge. Statewide, felony arrests decreased by one-third over the previous year with the greatest regional decrease occurring in New York City and Upstate (50% decrease in felony arrests in both regions).

Dispositions for 1990 indicated seven cases disposed with five disposed in the lower courts and two in the upper courts. Of the lower court dispositions, four cases were dismissed and one resulted in a fine. (Information on the reasons for dismissal is not available. In many cases criminal prosecutions are dismissed in order to pursue civil or administrative remedies.) Of the two Upper Court dispositions, one was dismissed and one resulted in a conviction with a sentence of jail.

FUTURE DIRECTION

Efforts are being made in the State to increase awareness of these crimes and an understanding of the Environmental Conservation Laws. Last year the Division of Criminal Justice Services' Office of Justice Systems Analysis instituted a project to clarify and improve information system reporting of selected Environmental Conservation Law violations. Funded in part by a Federal Department of Justice grant and relying on the assistance of the Department of Environmental Conservation, the Project compiled a guide of chargeable statutes in the Environmental Conservation Law and selected New York Codes Rules and Regulations related to hazardous, solid and medical waste. This document summarizes the statutes, lists the class of the offense (including possible civil/administrative classification), the statutes governing sentencing, and sets the standard to be used in reporting charges on official documents. The Project will issue a dictionary of terms related to hazardous, medical and solid waste to serve as an additional reference tool for practitioners. A final report of the Project outlining the justice processes involved in a case is planned and will further serve to enhance an understanding of this very complex area of law.

SUMMARY

No single data source reveals the complete picture of 1990 hazardous waste and waste disposal violations in New York State. The primary reason for this is that each individual reporting agency focuses on particular aspects of the problem that are of concern to that agency be it the transport of hazardous materials, the court processing of offenders, arrest processing or the clean-up, prevention or investigation of violations.

Currently, the diverse information-gathering and reporting systems being implemented by these agencies along with the possibility of data overlap prohibit combining the reports to arrive at a single, accurate accounting of total violations in the State. For these reasons, a State summary has not been included.

The information in this report provides a general overview of the number of hazardous waste and waste disposal violations that were monitored and addressed by specific State agencies in 1990. New legislation is presented and an overview of what is being proposed to improve data systems and enhance an understanding of the Environmental Conservation Laws is outlined.

CRIMINAL CASES

Criminal cases are processed in the trial courts as follows: Felony indictments and superior court informations are processed in the Criminal Term of the Supreme Courts in New York City and in the County Courts outside New York City. In several counties outside New York City, a portion of the felony caseload is processed in the Supreme Court as well. The District Courts of Nassau and Suffolk and the City, Town, and Village Courts outside New York City have original jurisdiction over felonies and complete jurisdiction over misdemeanors, violations, and infractions.

1. Criminal Term of Supreme and County Courts

Filings: Statewide, 79,322 felony cases were filed in the Supreme and County Courts during 1990.³ Sixty-seven percent (52,905) of the 1990 filings occurred in New York City.

Table 2-2 shows 1990 filings by judicial district.

Table 2-3 focuses on individual counties, showing the eighteen counties with 400 or more felony case filings in the Supreme and County Courts. These eighteen counties accounted for 91% of all felony filings in these courts.

³"Cases" are a count of "defendant-indictments", i.e., each defendant on each indictment counts as a case.

Dispositions: Statewide, 77,628 cases reached disposition (guilty plea, trial verdict, dismissal, or miscellaneous other) in 1990. Sixty-six percent (51,275) of the 1990 dispositions occurred in New York City.

Table 2-2 shows 1990 dispositions by judicial district.

Table 2-3 shows the nineteen counties with more than 400 dispositions in 1990; these counties accounted for 91% of all felony case dispositions. Twelve counties which commenced over 40 trials accounted for 88% of felony trials commenced statewide in 1990. Of the total of 5,079 felony trials commenced, 4,262 (84%) were jury trials.

Figure 2-1 shows felony case dispositions by type. There were 65,620 guilty pleas (84%) 6,238 dismissals (8%), 4,415 trial verdicts (6%) and 1,355 other dispositions (2%).

STANDARDS AND GOALS.

Since 1975, Standards and Goals of the Chief Administrator of the Courts have provided performance measures for the courts for elapsed time to disposition for felony cases in the Supreme and County Courts, civil cases in the Supreme Courts, and for proceedings in the Family Courts.⁶

Felony Cases: The standard is disposition within six months from filing of indictment, excluding periods when a case is not within the active management control of the court (e.g., warrant outstanding).

During 1990, 86% of felony case dispositions statewide were achieved within the six-month standard.

Civil Cases: The standard is disposition within fifteen months from the filing of note of issue. During 1990, 92% of note of issue dispositions statewide were achieved within this standard.

Family Court: The standard is disposition within 180 days of the commencement of the proceeding, excluding periods when a case is not within the active management control of the court (e.g., warrant outstanding). During 1990, 99% of dispositions statewide were reached within the standard.

⁶See Standards and Goals memorandum of the Chief Administrator of the Court of 2/28/79, containing revisions approved by the Administrative Board of the Courts 1/25/79 to Standards and Goals adopted in 1975.

PROBATION DEPARTMENTSIntake Services

Cases opened for intake services decreased 2% from 148,976 in 1989 to 145,643 in 1990.

Investigations

Probation departments conducted 114,284 regular investigations (pre-sentence, pre-plea, JD, and PINS) and 77,894 other investigations in 1990, as compared to 109,777 and 74,384 respectively in 1989. This 192,178 total is a 4% increase over the 184,161 investigations conducted in 1989.

Pre-disposition Services

There were 22,534 cases received for supervision prior to court disposition in 1990. This is a 1% decrease from the 22,859 received in 1989.

Probation Supervision

The total number of family and criminal cases sentenced to probation rose from 53,688 in 1989 to 54,552 in 1990. The number of family and criminal cases on probation at the end of the year rose from 135,881 in 1989 to 152,491 in 1990, an increase of 12%.

The number of probation cases supervised on December 31 in NYC increased from 58,830 in 1989 to 67,675 in 1990. Statewide the number of criminal court cases supervised at the end of the year increased from 128,707 in 1989 to 145,266 in 1990.

The number of cases sentenced to probation in NYC increased by 2% from 19,429 in 1989 to 19,796 between 1989 and 1990. During 1990, there were 54,552 cases sentenced to probation in New York State. This is a 2% increase over 1989 when 53,688 cases were sentenced to probation.

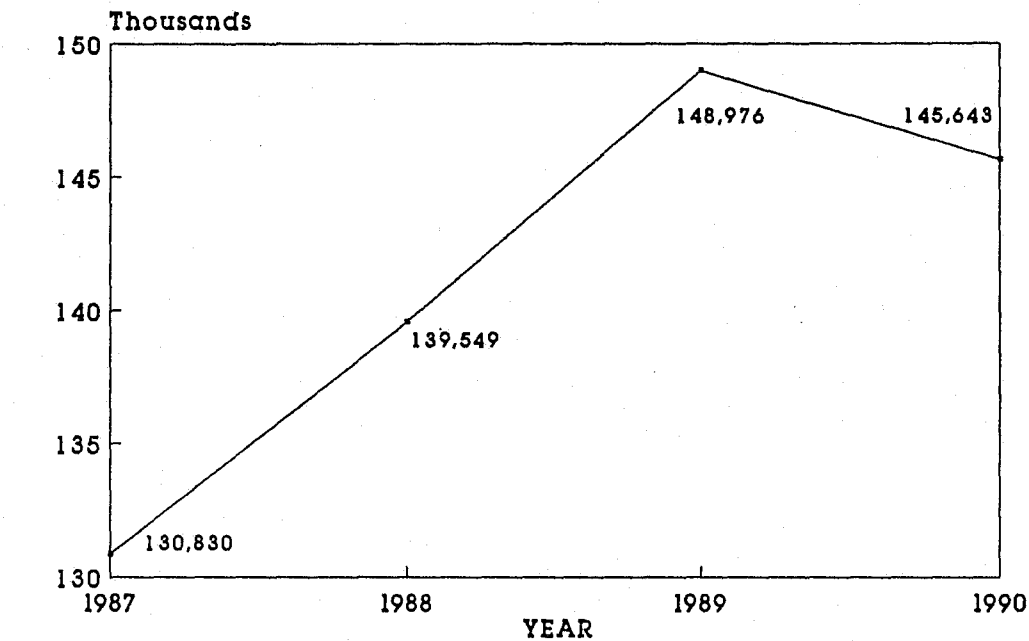

Felony cases sentenced to probation increased much more than misdemeanors from 1986 to 1990. The increase was much more obvious in NYC than in Upstate counties.

Since 1986, felony cases supervised at the end of the year have outnumbered misdemeanors. Outside NYC, there has continued to be a larger number of misdemeanor cases.

Of the 39,076 cases closed in 1990, 12,825 (33%) were by early discharge and another 9,970 (26%) were closed by maximum expiration. In NYC, these categories reflected 45% of all case closings. Outside NYC, these categories reflected 65% of all case closings.

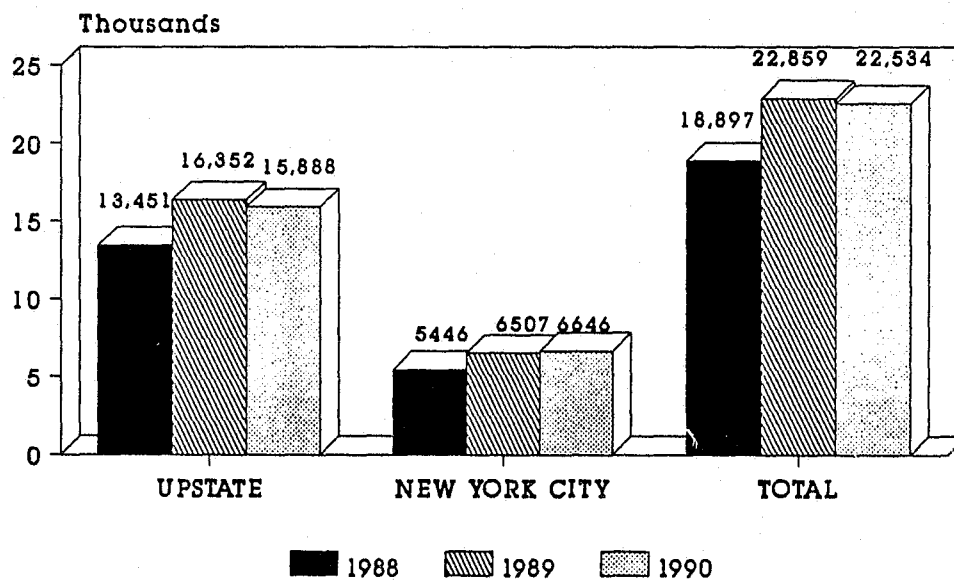

On 12/31/90, there were 807.5 cases on probation for every 100,000 residents (based on 1990 population data). The case figures ranged from 341.0 in Hamilton County to a high of 1,573.4 in Sullivan County.

ALTERNATIVE TO INCARCERATION PROGRAMS

Alternative to incarceration (ATI) programs seek to reduce reliance on incarceration by providing more and better information upon which critical judicial decisions are made, or by offering new and different options to the court. During 1990, 154 ATI programs (data for which were available in 124 cases) operated in 57 counties and the City of New York, including 117 programs funded under the Classification /Alternatives bill and 37 programs funded and operated as demonstration projects (N.B. Programs with dual funding are included as demonstration programs in the attached tables). Programs are listed by county in Table 4. Operated by a variety of service providers, including private not for profit agencies as well as probation departments and other government agencies, these programs provided services to more than 53,000 clients during 1990. Currently, programs operate within four broad models:

Pretrial Release Programs

Pretrial release programs collect and verify information about criminal defendants and present the information to the courts so that more informed decisions regarding pretrial release conditions can be made. Some programs provide community supervision of the defendant during the pretrial period. Some pretrial programs also provide bail expediting services, assisting the defendant to raise bail by contacting potential sureties. During 1990, 44 pretrial programs interviewed 42,103 defendants, leading to 12,695 release decisions (Tables 5 and 5A).

Community Service Sentencing

Community service sentencing offers the courts a new sentencing option. The typical community service program screens offenders to determine their appropriateness for participation and then places these individuals with carefully selected non profit or governmental agencies where the offender must complete the number of service hours imposed by the court. Over 5,170 offenders whose sentence included the performance of community service were monitored by 38 programs in 1990 (Table 6).

Defender Based Advocacy Programs

These programs receive referrals from defense counsel and prepare a variety of reports to facilitate pretrial release, plea negotiations and alternative sentencing. In addition, defender based advocacy programs routinely refer defendants to social service agencies based on evaluations of the offender's personal needs. Alternative sentencing plans prepared by these programs often include enhanced provisions for community supervision and mandatory participation in treatment programs. During 1990, 13 defender based advocacy programs provided services to 1,695 defendants and prepared 863 reports (Table 7).

Specialized Alternative Programs

Specialized alternative programs provide a variety of services aimed at specific offender populations. During 1990, six Treatment Alternative to Street Crimes (TASC) programs provided assessment, referral and monitoring services to 3,294 offenders in need of drug, alcohol and mental health treatment (Table 8). Twenty four other specialized alternative programs provided services to 4,331 offenders across the state and included home confinement programs, residential programs and programs aimed at offenders with special needs such as juveniles, offenders with alcohol and drug dependency problems, individuals with developmental disabilities, and those in need of job training (Table 9).

NEW YORK STATE DEPARTMENT OF CORRECTIONAL SERVICES

Under Custody Population (Table 1 and Chart 1)

The number of inmates in New York State prisons rose to an all-time high of 54,895 at the close of calendar year 1990. This represents a rise of 7.1% or 3,663 inmates from the previous year and 341% from a low of 12,444 inmates on December 31, 1972. Prior to 1972 the prison population had declined following a series of executive, legislative and judicial actions which diverted a number of offenders to other agencies. In the early 1970's, a rising volume of crime led to the enactment of more stringent legislation which was accompanied by an increase in admissions to state prison. In 1973 admissions exceeded prison releases for the first time since 1963 and the prison population increased. This increase has continued annually and the increase is expected to continue over the coming five years.

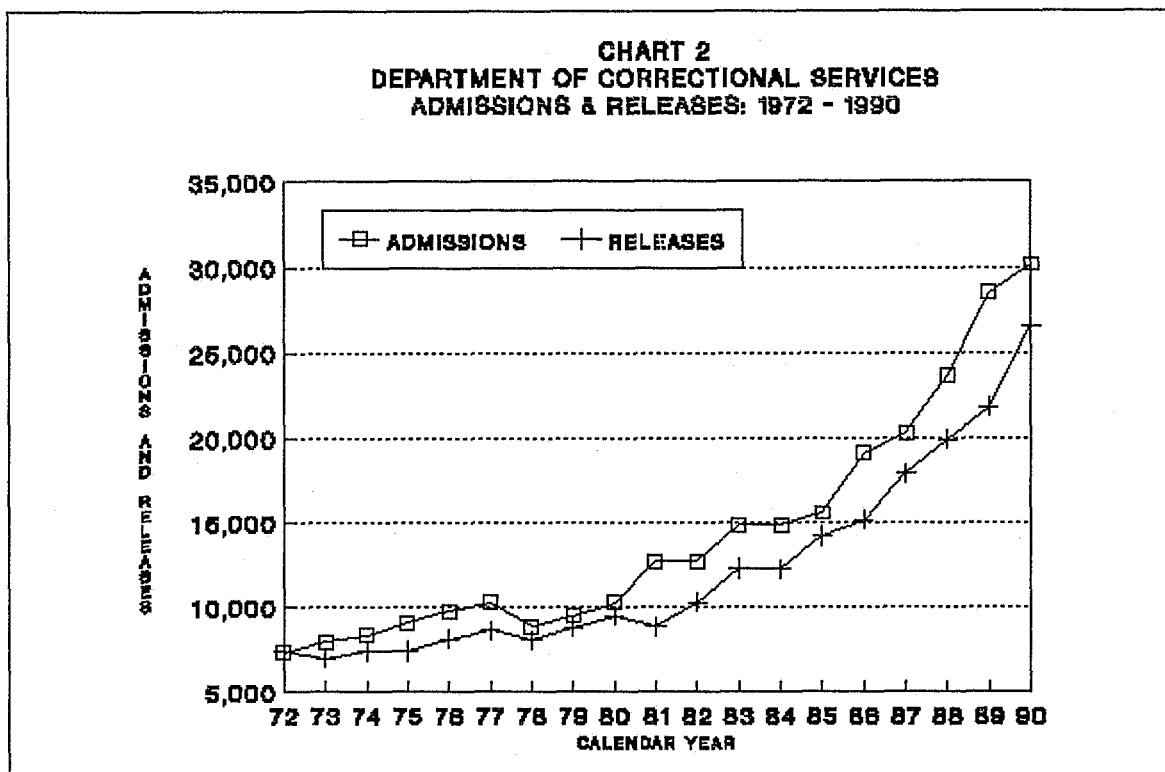

The number of women in prison has risen at a higher rate than the number of men. At the close of 1973 there were 397 female inmates. By the close of 1990 there were 2,696, a rise of 2,299 or 579%. Males rose from 12,047 to 52,199, an increase of 40,152 or 333%. The rapid growth in drug felony commitments has contributed greatly to the rise in the number of women prisoners.

Admissions To Department Custody (Table 1 and Chart 2)

Admissions have shown a general rise over the twenty year period 1971 - 1990, reaching an all time high of 30,179 in 1990. Court commitments account for three out of four admissions and trends in this category largely shape the flow of offenders into state prisons. Court commitments declined to a low of 4,250 in 1970. From this 1970 low, commitments have risen to a high of 23,115 in 1990, an increase of 18,865 or 444%. Beginning in 1971, felony commitments rose rapidly, offsetting declines in commitments for lesser offenses which have been diverted to other agencies. Contributing to this trend has been a rise in crime, felony arrests, indictments, and court dispositions and an increasing tendency of the courts to commit convicted felons to prison. Several more stringent laws enacted in 1973 and in subsequent years have added to this increase in commitments. These include the second felony offender law which imposes mandatory state prison terms for such offenders; a drug law which imposes harsher penalties on drug felons; and the imposition of mandatory terms of imprisonment for all Class B and certain Class C and Class D felonies. The trend toward a higher level of court commitments has continued through 1990 reflecting also the impact of the violent felony legislation that became effective in 1978 as well as the growing pool of felony offenders who must be sent to prison in the event of any new felony conviction.

Reason For Commitment (Table 2 and Chart 3)

Of the record number of commitments to DOCS in 1990, 52.9% were sentenced as second felony offenders while 0.9% or 197 were sentenced as persistent felons. Drug felonies made up the single largest crime group, accounting for 46.6% or 10,785 of all commitments.

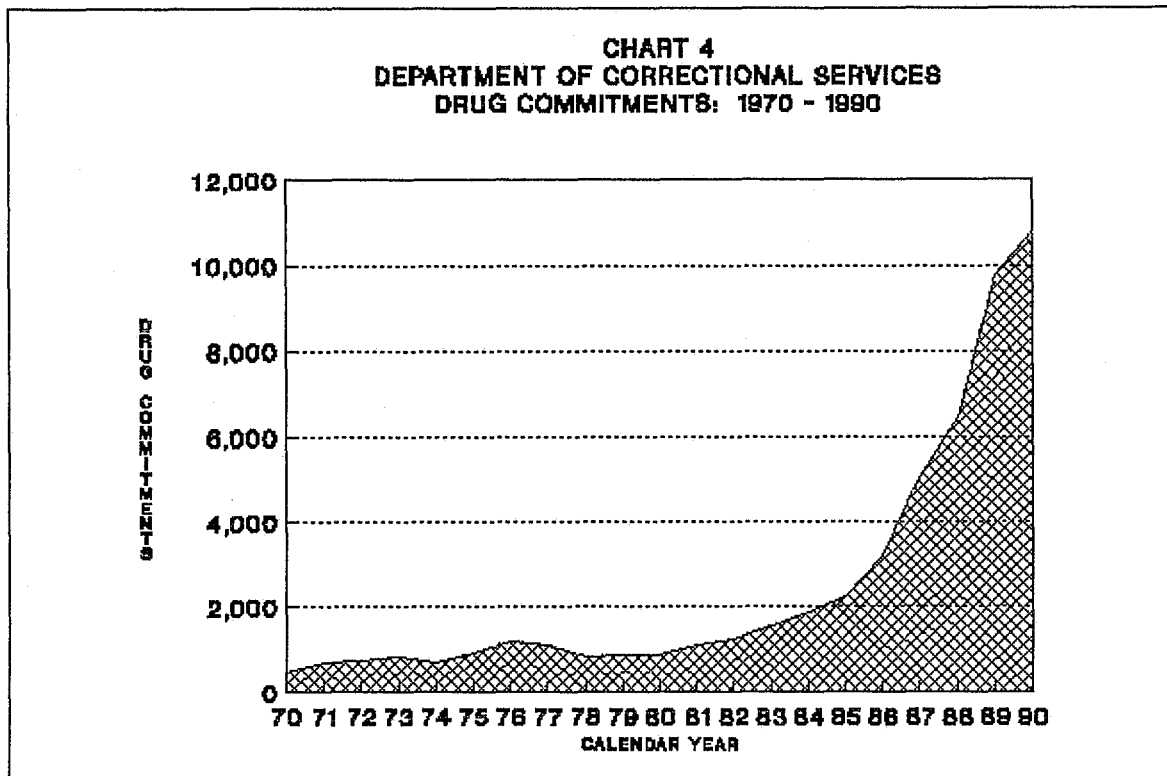

One out three (7,435 or 32.2%) of the 1990 commitments had been convicted of crimes designated in the penal law as Violent Felony Offenses (VFO). Robbery led the VFO group followed by burglary, homicide, dangerous weapons, assault, and violent sex crimes. Second felony offenders accounted for only 40.7% of the VFO group, the smallest proportion among the various crime groupings.

Property and other felonies accounted for 3,245 or 14.0% of the 1990 commitments. Burglary 3rd was the largest crime category in this group followed by larceny, stolen property, forgery and driving while intoxicated. This group had the highest portion sentenced as second felony offenders, 68.4%.

There were 1,191 commitments for lesser felonies involving violence or coercion. Robbery commitments led this group followed by crimes of homicide, other sex crimes, and assault. Over half, 57.1%, were sentenced as second felony offenders.

Drug Felony Commitments (Tables 3 and 4 and Chart 4)

The number of drug commitments to DOCS over the period 1970 - 1982 rose from an annual total of 470 to 1,243. Over this 14 year period, drug felons accounted for an average of 12.2% of all DOCS commitments ranging from a low of 10.5% to a high of 15.0%. Since then the proportion of drug felons to total commitments has steadily risen to an all time high of 46.7% or 10,785 drug offenders in 1990. Class A felonies accounted for 840 or 7.8% of all drug commitments in 1990 (95 for Class A-I and 795 for Class A-II). There were 2,666 or 24.7% Class B drug felons committed followed by 2,460 Class C (22.8%); 3,649 Class D (33.8%); and 1,169 Class E (10.8%). Crimes of drug sale accounted for 70.4% of drug commitments while possession accounted for 29.6%. Only among Class A felons did possession at 55.6% account for a greater portion of commitments than did sales at 44.4%.

Over one half (58.5%) of all drug commitments received predicate felony sentences. Only 8.6% or 72 of the Class A drug felons were sentenced as second or persistent felony offenders. Among the Class B group, 21.8% or 580 were sentenced as predicate felony offenders and 49.8% or 1,226 of the Class C group. Class D drug offenders had the second highest proportion sentenced as predicate felony offenders at 91.0% or 3,320 with the Class E group at 95.1% or 1,112 with the highest proportion of predicate felony sentences.

Releases From Department Custody (Table 1 and Chart 2)

Releases from Department custody in 1990 totaled 26,516, an increase of 21.6% over 1989. Releases remained relatively stable during the five year period 1971-1975, averaging 7,285 annually. In 1976 a sharp rise is observed, up 10% over the previous year. This substantial rise reflected a growth in the pool of parole eligible inmates. The year 1978 saw a temporary drop in releases reflecting longer minimum periods of incarceration set by the Board of Parole and a modest shift toward longer sentences on the part of the courts, both of which lessened the number of paroles. Releases for 1979 and subsequent years have generally resumed an upward trend, which tends to lag the trend in admissions by approximately two years. The SHOCK program has also contributed to the growth in releases over the past two years and has contributed to the decline in the median time served by persons released from DOCS custody.

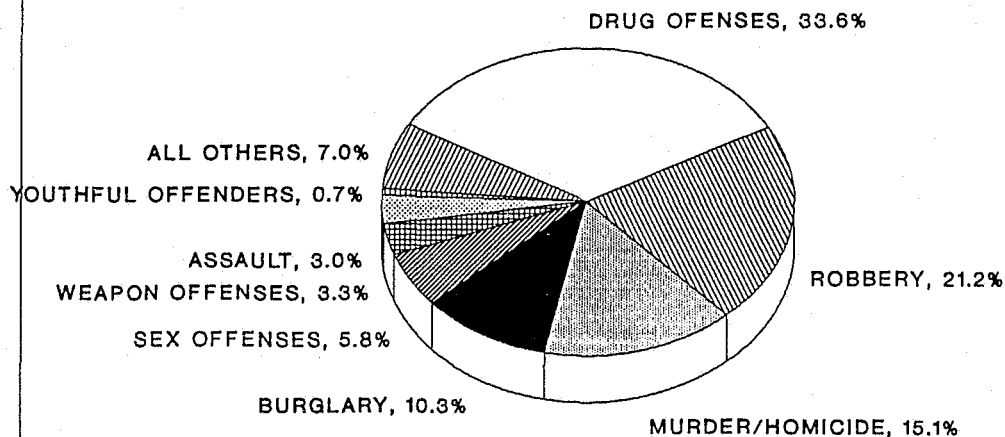

Time Served By First Releases (Table 5 and Chart 5)

There were 17,839 inmates released to parole supervision for the first time on their current sentence during 1990. The median time served by these offenders in DOCS facilities was 17.1 months. Violent felony offenders had the highest time served at 26.2 months. Other coercive felons served a median time of 17.4 months followed by property/other felons at 15.5 months, drug felons at 14.7 months and Youthful Offenders at 8.2 months.

NEW YORK STATE COMMISSION OF CORRECTION

The State Commission of Correction oversees all correctional facilities in New York State including state prisons, county jails, city, town and village lockups and precincts. Its goals are: to regulate and oversee the operation and management of state and local correctional facilities; to develop policies, plans and programs that will improve the administration of these facilities; and to promote a safe and secure correctional environment for both staff and inmates. In light of these goals, the Commission investigates incidents and correctional management issues; establishes and enforces minimum standards; provides training for county correction officers and managers; offers technical assistance on health services including AIDS related issues; and, approves plans and specifications for new jail construction or renovations. The Commission also serves as a central repository for information on the correctional system in New York State.

Three Commissioners head the agency: A Chairperson and two members who chair the Citizens' Policy and Complaint Review Council and the Medical Review Board, respectively. The Citizens' Council monitors grievances in county facilities and provides an avenue for citizen participation in development of Commission policies and programs. The Medical Review Board monitors medical and mental health services in correctional facilities and investigates circumstances surrounding inmate deaths.

The correctional system in New York State is comprised of three major correctional jurisdictions including the Department of Correctional Services, the New York City Department of Correction, and county jails/penitentiaries. The Department of Correctional Services (DOCS) operates all state correctional facilities. DOCS houses only those inmates who are sentenced to more than one year. The New York City Department of Correction (NYCDOC) operates all county correctional facilities within the City of New York; and thirdly, county jails and penitentiaries are operated by individual county sheriffs/correction departments. These county departments house pre-trial individuals as well as those who are sentenced to one year or less.

In addition, the Commission of Correction monitors and serves as a central repository of data for the New York City Police Department (operating New York City Precinct Lockups) and all other City, Town and Village Police Department Lockups outside the City of New York.

INMATE POPULATIONS

The Commission began collecting inmate population data by conducting semi-annual telephone surveys to county jails and penitentiaries in 1981. Currently, county facilities report daily inmate populations via the on-line Jails Daily Population Reporting System.

Inmate population counts for both the New York City Department of Correction and the State Department of Correctional Services are obtained from Daily Population Reports produced by both departments.

Table I and Figure 1 present the inmate populations across the three major correctional jurisdictions from 1981-1990.

STATE AND COUNTY INMATE POPULATION 1981 - 1990

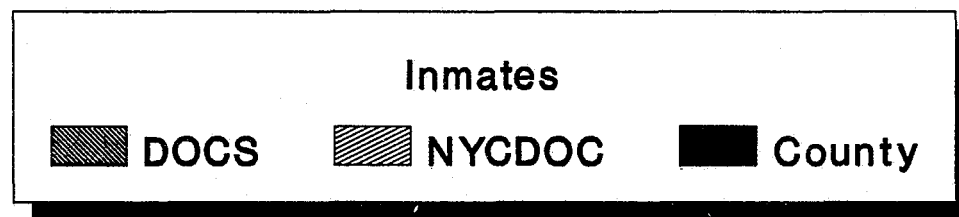

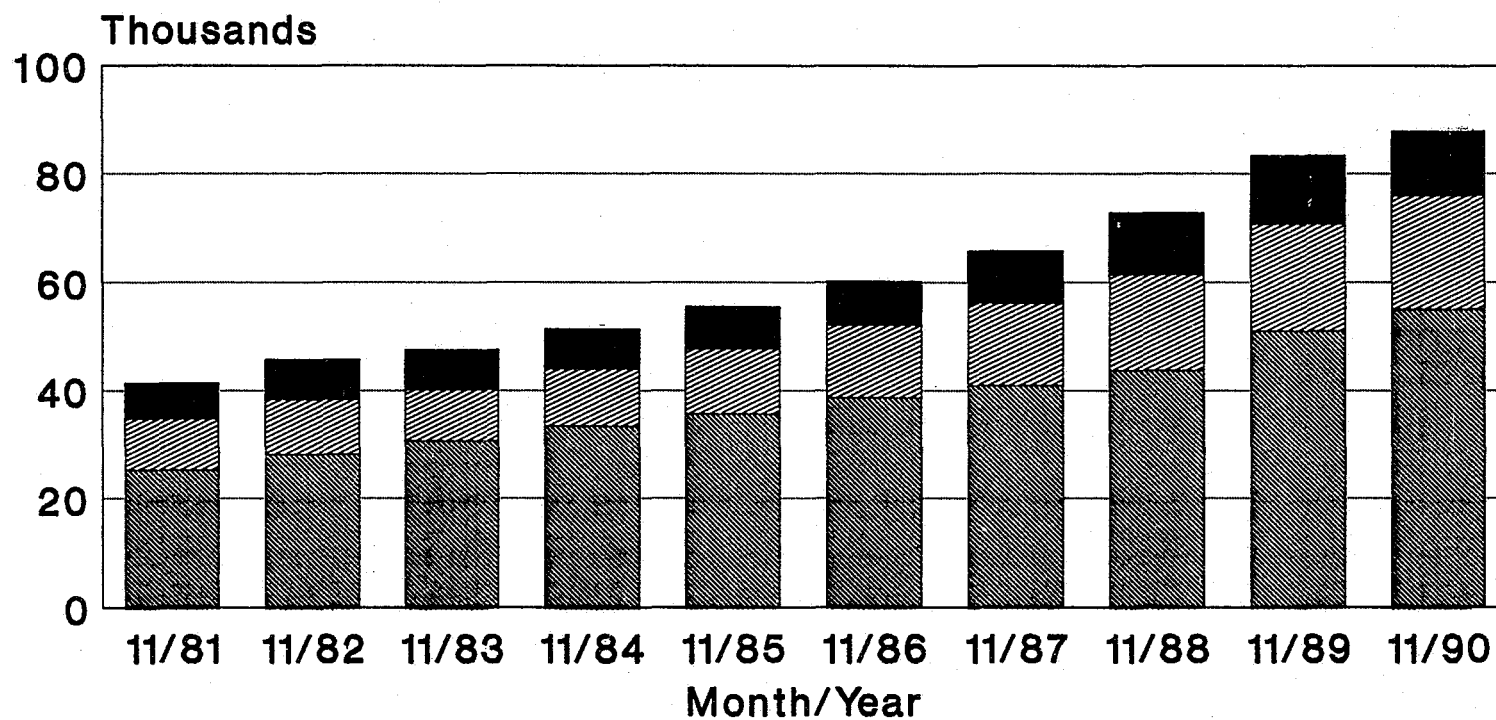

FIGURE 1

Table II illustrates the percent of occupancy of county inmates to jail capacity for upstate facilities as well as the City of New York. The average daily count for the month of December, 1990 includes the physical body count only. It is common for "upstate" jails to board their inmates out to other counties due to overcrowding. This decreases their body count in order to maintain facility compliance for maximum occupancy. Inversely, many counties board-in inmates from surrounding counties when they have bed space available. This increases their body count to include all inmates housed. The following table reports the actual body count for all jails across New York State for the last month of 1990. The design capacity represents the amount of permanent jail space within each facility. The total capacity includes all permanent and temporary jail space available within each facility. Examples of approved temporary capacity would include a day room that has been converted to house inmates until permanent jail space is obtained.

The average daily CENSUS for county correctional facilities for the last three years, 1988-1990, are displayed in Table III. The average census reflects the number of county inmates for whom the sheriff/commissioner are responsible. The census is computed by adding to the physical body count all those inmates who are boarded out to another county, housed out to a mental hygiene facility, etc. Inmates who are boarded in would not be included in the census. Rather these inmates are reflected in the county of origin or census county.

TOTAL INMATE ADMISSIONS FOR COUNTY JAILS/PENITENTIARIES AND THE
NEW YORK CITY DEPARTMENT OF CORRECTION

County jail and penitentiary admission data are derived from the Statewide Compilation of Data from Sheriffs' Annual Reports for the years 1977-1989. The Commission of Correction compiles annual data from individual Sheriff and Penitentiary reports submitted by all county correctional facilities. Annual reports submitted by the New York City Department of Correction since 1983 are the source of all City admission data. The annual report for 1990 has not yet been completed by the New York City Department of Correction.

Tables IV and V represent total admissions reported by county correctional facilities. Total admissions include all sentenced and unsentenced admissions.

TOTAL ADMISSIONS TO CITY, TOWN AND VILLAGE LOCKUPS

The total number of admissions reported by police department lockups across New York State from 1977-1990 are reflected in Table VI. The Commission compiles annual data from individual record of detention reports received from police department lockups.

Beginning in 1985, the Commission requested a one day population figure from police departments. This one day population represents the number of admissions during the 24 hour period of 12/31. Table VII reports these December 31 population figures.

INMATE DEATHS

The Commission of Correction is mandated to investigate the causes and circumstances surrounding inmates who die while incarcerated. The following three tables focus on inmate deaths reported across New York State. Table X reports the number of inmate deaths across all correctional jurisdictions during 1990. The number of suicides reported since 1978 and the number of AIDS deaths reported since 1981 are reflected in Tables XI and XII respectively.

NEW YORK STATE DIVISION FOR YOUTH

During 1990, 2,470 individuals were admitted the custody of the Division for Youth. Of these, 1800 were admitted to Division operated facilities, 625 to voluntary agencies, 22 to foster care and 23 were directly admitted to the Division's community care program.

Among the 2,470 custody admissions, 7% were placed in secure facilities and an additional 32% in limited secure facilities. The largest category among remaining custody admissions was replacement in voluntary agencies which accounted for 16% of the custody admissions.

Juvenile Delinquent adjudications accounted for 80% of the custody admissions and Juvenile Offender convictions an additional 7%. Persons in Need of Supervision were responsible for 12% of the 1990 custody admissions.

Males made up 86% of the custody admissions. African-Americans accounted for 58% of custody admissions and Whites 36%. Twenty two percent of custody admissions were Latino, regardless of race.

The following table provides a more detailed breakdown of the information provided above. Please note that this table describes the characteristics of admissions to the Division's custody. This differs from prior reports which depicted facility admissions, including readmissions from Community Care.

DIVISION OF PAROLE 1988-1990

THE BOARD OF PAROLE

During the 1988-89 and 1989-90 fiscal years, the Parole Board conducted over 48,000 interviews and/or hearings in State correctional facilities to determine parole eligibility dates for certain inmates, the release readiness of eligible inmates for parole supervision and the re-release of parole violators, as well as other types of administrative hearings.

The number of release interviews conducted by the Parole Board increased from 22,074 in 1988-1989 to 26,393 in 1989-90, a 20% increase.

The Parole Board granted release to 32,036 inmates during the last two fiscal years with an increase of 21% in 1989-90. Release decisions were granted to 19,969 initial applicants during the two year period (inmates who became eligible for parole release after serving their minimum sentence from April 1, 1988 through March 31, 1990). Reappearance interviews resulted in 5,274 release decisions for inmates who were previously eligible for parole release, but were denied release and became eligible again. Re-release interviews for violators and other release interviews resulted in 6,793 inmates released to the community. The decisions rendered at the various release interviews are summarized in Table 1 below.

* This table excludes release interviews conducted with Shock Incarceration inmates and interviews related to release to the Immigration and Naturalization Service for deportation proceedings, both of which began in 1987-88.

The community protection efforts of the Parole Board are reflected in a comparison of some of the characteristics of inmates granted and denied release at initial interviews. The comparison reveals that inmates who were denied release were more likely to have committed crimes involving the use of a weapon or the occurrence of an injury. Further, those who were denied release had more extensive prior records than inmates granted release. The effectiveness of the Parole Board's screening is demonstrated in greater detail in the table to follow:

PAROLE OPERATIONS

Institutional Parole

The Parole Officer assigned to an institution plays a critical role in the inmate's transition from institutional to community life. These Parole Officers serve in a bridging capacity between the inmate and the community, the inmate and the field parole officer, and the inmate and the Parole Board.

The role of the Parole Officer with an institutional assignment includes an assessment of the needs of each inmate and encourages their participation in programming during incarceration which meets these needs. These Parole Officers conduct inmate group counseling sessions and Parole orientation classes for inmates. Additionally, they interview inmates in advance of their Board release interviews, to gather information which is presented to the Board in summary reports together with recommendations as regards the granting or denial of parole release and the possible conditions of release.

After a parolee has been granted release, the Parole Officer continues to participate in Parole Board release planning through the Community Preparation Program. The Parole Officer provides the link between the institution and the community both through pre-release interviews conducted with inmates and through ongoing communication with the Field Area Office to which the parolee is to be released. These services are provided to both inmates who are released by decision of the Parole Board and to those conditionally released.

Finally, institutionally assigned Parole Officers continue to participate on correctional temporary release committees which grant temporary work release and furloughs to inmates. The Institutional staff is involved in committees within the state's correctional facilities that give support and advice to drug and alcohol programs.

Community Supervision of Parolees

Community supervision is at the heart of the Division's community protection mission. The Parole Officer with a field assignment is located in the community supervising offenders released from state correctional facilities. Community protection requires that Parole Officers adhere to strict supervision standards. Additionally, it is essential to ensure that parolees comply with the terms and conditions of release. When the conditions of release are violated, the Parole Officer must take appropriate action.

Presence in the community allows the Parole Officer to become familiar with the services and resources within their neighborhood. Through their familiarity with the surrounding community, the officer can expedite the reintegration of the offender by linking offenders with particular needs to relevant services.

Beginning in FY 85-86, the Division implemented Differential Supervision which was a unique approach to community supervision caseload management. The concept targets resources on parolees with the highest levels of need for surveillance and social services in an attempt to meet the agency's goals of community protection and parolee reintegration. Allocation of these resources is based on a model of risk management under which newly released parolees are placed on Intensive caseloads which require extensive contact standards and reduced caseload size. After 15 months parolees are moved to Regular caseloads when their potential threat to the community and level of service needs have been reduced.

There were 44,202 individuals under community parole supervision during fiscal year 1989-90, as reflected in Table 3. This represented an increase of 8% over the previous year's figure of 40,771. Parole Board releases from state correctional facilities increased from 14,822 during fiscal year 1988-89 to 17,327 during fiscal year 1989-90. Statistics reflecting median time-served of those released by the Parole Board have remained very consistent over the years.

A/ These individuals were actually released from state prison during the given fiscal year. The total number of releasees should not be confused with the number of inmates granted release by the Parole Board during the same year. Release interviews are done two months in advance, so that the number of actual releases is usually less than the number of inmates granted release by the end of a year. Moreover, inmates granted release in March, which is the close of the fiscal year, would be counted as releasees in the new fiscal year.

B/ During fiscal year 1989-90, community supervision of local releasees was transferred to local probation departments.

C/ This includes cases released to supervision both within and out-of-state.

D/ Removals include parolees discharged from parole supervision by expiration of maximum sentence, death, Board action, court order and prison returns.

E/ Dynamic population is the cumulative number of parolees under supervision during all or any part of the year.

E/ Delinquents are those parolees carried by parole officers who are either in the stages of the violation process or are absconders. Not all delinquents in the violation process will have their parole revoked.

Outcome of Parole Supervision

The primary goals of the Division of Parole are to assist offenders released from correctional institutions to adjust to community life, and to provide community protection by preventing these individuals from re-engaging in criminal behaviors.

Parole Officers carry out these goals by supervising parolees in the community, coordinating the delivery of available social services, and helping to motivate and guide the parolees towards a

more positive lifestyle. However, one must realize that not all persons will abide by their conditions of release. The Division must, therefore, fulfill the goal of community protection by returning a violator to prison.

A violation of parole occurs when an individual under supervision violates the conditions of parole in an important respect. These conditions are agreed to in writing by an inmate upon release from prison to community parole supervision. They stipulate, for example, that if the releasee absconds from supervision or re-engages in criminal activity, his/her parole is subject to revocation. The individual may consequently be returned to prison following a series of due process hearings.

In the 1989-90 period, 21% of all parolees under supervision during the year were returned to prison by the courts for committing new crimes or by the Parole Board for violating the rules of parole (e.g., absconding, or illegal use of drugs). Table 4 provides a more detailed analysis of the parole success rate.

Table 4

Outcome of Parole Supervision

<u>Outcome Measure</u>	<u>1988-89 A/</u>	<u>1989-90 B/</u>
Rate of Parolees Returned to Prison with New Court Conviction During Year (N=1,781)	4%	5% (N=2,408)
Rate of Parolees Returned to Prison for Violating Conditions of Parole During Year (N=4,958)	12%	15% (N=6,764)
Total Rate of Prison>Returns During Year (N=6,739)	17%	21% (N=9,172)

A/ Rates computed on basis of dynamic population of 40,771 parolees during April 1, 1988 through March 31, 1989.

B/ Rate computed on basis of dynamic population of 44,202 parolees during April 1, 1989 through March 31, 1990.

In view of the data in Table 4, the parole success rate can be measured in several different ways.

In terms of total number of parolees not returned to prison, the success rate was 83% in 1988-89 and 79% in 1989-90. These results are an indication of the Division's overall performance in deterring parolee crime and reincarceration.

From the point of view of enforcing the rules of parole, parolees returned to prison for rule violations cannot really be considered "failures" in the same sense as those who were returned for new criminal convictions. For example, absconding from supervision is less serious than committing a violent offense. But, more importantly, a prison return based on a rule violation decreases the chances of a parolee being a threat to community safety. Given this, the success rate was actually 96% for fiscal year 1988-89 and 95% for fiscal year 1989-90.

Using the most rigorous definition of success, those parolees in an active reporting status, the success for 1988-89 was 69%; in 1989-90 it was 72%. This measure excludes parolees in either an incarcerative or absconder status. It is important to note that not all of these incarcerated or absconder parolees will have their parole revoked or even enter the violation process.

STATE OF NEW YORK
EXECUTIVE DEPARTMENT
CRIME VICTIMS BOARD

The Crime Victims Board (CVB) was established August 1, 1966 to provide monetary compensation to eligible crime victims. Since 1966 numerous legislative enactments have expanded eligibility and award criteria which have enabled the CVB to provide a wide array of assistance to crime victims and witnesses.

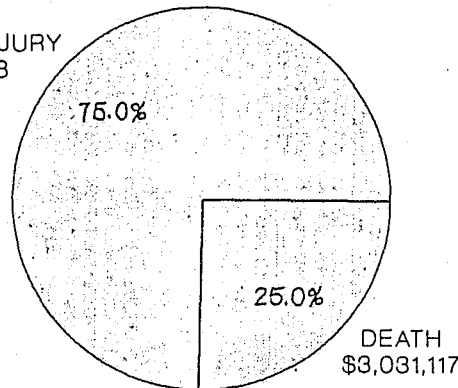

By statute the CVB is mandated as the "payer of last resort." Crime related losses compensable to crime victims include, but are not limited to awards for: unreimbursed medical expenses including the cost of necessary counseling expenses for victims and appropriate family members; unreimbursed loss of earnings/support up to a weekly maximum of \$400 with a total maximum of \$25,000; unreimbursed funeral expenses to a maximum of \$2,000; the cost of repair or replacement of items of essential personal property up to \$500, with a \$200 limit for lost currency; unlimited, unreimbursed occupational or vocational rehabilitative expenses; the cost of residing at or utilizing the services of a domestic violence shelter; and the payment of reasonable attorney's fees up to \$1,000. As a result of the Governor's initiatives that were enacted in 1989 and 1990, the survivors of police officers slain in the line of duty as a direct result of a crime are eligible for reimbursement of reasonably incurred burial expenses and counseling without regard to financial difficulty.
