NEW YORK STATE ARRESTS AND INDICTMENTS

(Preliminary Data)

JANUARY THROUGH DECEMBER 1991 vs. 1990 PERCENT CHANGES

HIGHLIGHTS

-20%

» Arrests: Total adult arrests decreased three percent statewide during 1991 compared with 1990, resulting in the second consecutive year of declining arrests. Contrary to the 1980s when heightened enforcement of drug laws led to unprecedented annual increases in arrests, drug offenses in the 1990s have thus far accounted for a large proportion of the decrease in total arrests. Approximately the same number of arrests for violent felony offenses (VFO) occurred in 1991 as in 1990. The Suburban New York City area reported the largest regional decline in total arrests.

Misd. Drug -17.3

» Indictments: The number of felony indictments (including superior court informations - SCIs) dropped almost two percent when preliminary 1991 data are compared with preliminary 1990 data. If the patterns in the final data are similar*, this will mark the first decline in total indictments since 1983. The rise in felony drug arrests contributed to most of the growth in indictments during the 1980s. Felony drug indictments doubled in number between 1980 and 1985, and continued to multiply until peaking in 1989. This surge resulted in drug indictments outnumbering violent felony indictments for the first time ever in 1987. However, this trend has recently reversed as violent felony indictments rose seven percent in 1990 and five percent in 1991, while felony drug indictments dropped nine and seven percent, respectively. Across the state, the Upstate area was the only region to record an increase in indictments between 1990 and 1991.

^{*} The indictment/SCI preliminary figures represent reports received by 1/23/92. Percentage increases or decreases may change somewhat as reporting becomes final.

Source: Indictment Statistical System (1/92); note that statewide indictment totals include data from special prosecutors not included in the three geographic areas. Suburban New York City includes Nassau, Rockland, Suffolk and Westchester counties. Because these comparisons are based on preliminary data, the percent increases or decreases may change somewhat as reporting becomes final.
