## Foreword

This volume represents a long-term commitment to four critical standards--comprehensiveness, accuracy, completeness, and usefulness. The Bureau of Justice Statistics, which publishes this reference tool, and the Hindelang Criminal Justice Research Center, which produces it, have undertaken every year for almost two decades to improve a resource that from the beginning has served as an essential reference work.

Only here can readers turn directly from American public opinion on criminal justice matters to the number of Federal criminal defendants to drug use by high school students. Whether the user wants to know about local institutions, such as jails, or about Federal questions, such as national expenditures for justice, this single book meets those diverse needs. This book reflects the reality that criminal justice issues in the United States concern every citizen and are the responsibility of every jurisdiction and community.

All information is presented as it was originally published, so that while the form may change somewhat, the content is the same. Interested readers can refer to the sources for more detail, but they have at their fingertips all the notes and explanatory materials necessary to understand the information presented.

Even in selecting material for a book as large as this one, the editors have had to leave out more than they included. We are confident that users of this reference volume will find that the material selected has met exacting standards and is of research and operational significance.

Steven D. Dillingham, Ph.D. Director Bureau of Justice Statistics

## For your information

This is the 19th annual Sourcebook of Criminal Justice Statistics. It brings together in a single volume nationwide data of interest to the criminal justice community.

Nearly all the data are nationwide in scope and, where possible, they are displayed by regions, States, and cities to increase their value for local decisionmakers and for comparative analyses.

Data available for limited groups of cities, States, or jurisdictions are included if they pertain to a topic of major concern.

## Overview of the availability of nationwide data

Statistical information about crime and criminal justice in the United States is published by hundreds of public and private agencies, academic institutions, research organizations, public opinion polling firms, and other groups. All levels of government collect and disseminate such data.

## Organization of the Sourcebook

This book has six sections:
(1) Characteristics of the Criminal Justice Systems presents data on the number and types of criminal justice agencies and employees, criminal justice expenditures, workload of agency personnel, and so on. It also includes tables that summarize, State by State, the statutory, regulatory, or administrative characteristics and practices of criminal justice agencies.
(2) Public Attitudes Toward Crime and Criminal Justice-related Topics presents the results of nationwide public opinion polls on such matters as fear of victimization; the death penality; prison reform; gun control; drug use; and evaluation of law enforcement, judicial, and correctional agency performance.
(3) Nature and Distribution of Known Of-
fenses presents data from several indicators of the extent of illegal activities. They include proportions of persons reporting that they have used various drugs or participated in other illegal activities; surveys of individuals and households that may have been victims of crimes; and law enforcement agency counts of offenses reported to them.
(4) Characteristics and Distribution of Persons Arrested includes tabulations of arrestees by age, sex, race, and area; proportions of known crimes cleared by arrests; and counts of illegal goods seized.
(5) Judicial Processing of Defendants presents data on the number of juveniles and adults processed through the courts and on the characteristics, dispositions, and sentences of defendants.
(6) Persons Under Correctional Supervision presents data about persons on probation and paroie, population and movement of inmates of State and Federal prisons, and characteristics of State prison inmates. It also presents data on offenders executed and offenders currently under sentence of death.

Each of the six sections operis with an overview of its contents.

## Annotated sources and list of publishers

Publications from which tables or figures have been taken for presentation in Sourcebook are described in annotations that precede the appendices. The annotations include standard bibliographic information, periodicity of publication, dates of tabular information appearing in the publication (many sources, even some annual reports, contain data for a number of years), a brief summary of the publication's contents, and a list of Sourcebook tables and figures taken from the sources. Addresses of the publishers follow the annotations.

## Explanatory appendices

For sources that use complex survey methods or that require a long list of definitions of terms, explanatory text is presented in the
Sourcebook. These appendices add information or clarify the data presented, but readers should consult the original sources for even more detailed and complete explanations.

## Reliability of the data

Data in this book are no more reliable or complete than the sources from which they are taken. Responsibility for the quality of data is borne by the original source; responsibility for its selection and presentation rests with the Sourcebook staff.

## Reporting periods

The aim for each edition of the Sourcebook is to combine the most recent data available with earlier data to show trends. Unfortunately, many reports are based on data already several years old at the time of publication.

It is sometimes impossible or imprecise to compare data from different sources. For example, data in one source may be expressed only in fiscal years while those in another are expressed only in calendar years. Until June 30, 1976, the fiscal year for Federal agencies ran from July 1 through June 30, but it now runs from October 1 through September 30. The period July 1 September 30, 1976, is called the "transition quarter." Because various data sources treat this change in different ways, it is best to check a table's explanatory note to verify the precise periods covered by its data. Readers should be extremely cautious in combining or comparing data from different sources or in examining data from the same source over time.

## Table and figure preparation

Updating. For tables and figures from annual publications, such as the FBl's Crime in the United Siates and Criminal Victimization in the United States from the Bureau of Justice Statistics, updating involves replacing older with newer data, taking care to note any changes in methodology or reporting procedures that should be brought to the reader's attention.

For tables and figures from nonannual and special publications (such as surveys, research reports, and public opinion polls), updating and expansion involves searches for new or more recent data. Sometimes, data from previous editions of the Sourcebook are retained, either alone or along with more recent data.

Bodies of tables. The badies of most
Sourcebook tables appear exactly as in the original sources. This presentation is consistent with the Sourcebook's main function-to bring together data from diverse sources for presentation as originally published, rather than to transform or recompute the original data.

However, the Sourcebook staff has:
(a) constructed some tables based on printed narrative or machine-readable data from the source; and
(b) adapted some tables with only nonsubstantive changes from the source.

Notes. Sourcebook tables carry three types of explanatory and cautionary notes:
(1) Notas that follow tables and begin with "Note:" are written by the Sourcebook staff from information in the original source.
(2) Some are brief notes in parentheses "()" just above the table body. Most of these notes repeat information from the source table, but a few are added by the Sourcebook staff.
(3) Some are footnotes reprinted as they appeared in the original source. Most of these footnotes are keyed to specific table entries or to variables that require explanation.

## A note on definitions of terms

Because the Sourcebook includes data from so many sources, similar or identical terms sometimes have different referents when used in different sources. For example, the precise meaning of terms such as "case," "caseload," "rate," and "race/ethnicity," differs among sources. To clarify the meaning of ierms as they are used by various sources, many definitions are provided in notes on tables and in appendices to which table notes refer.

However, in a compilation such as this it is impossible to provide an exhaustive list of definitions and explanations for each table that will satisfy the needs of all readers. Users with strong interest in particular tables--especially those not familiar with the substantive area to which a table refers--are advised to consult the original source for a fuller explanation of subtleties with respect to data collection procedures, data exclusions, definitions of terms, and so on.

## Cross-references to last year's edition

For each table and figure in this edition, the figure and table list (which follows the table of contents) indicates whether last year's edition contained exactly the same table or an equivalent table with data from an earlier year.

## Your input requested

Your critical comments and suggested changes will help us to improve future editions of the Sourcebook.

Please tell us about appropriate sources of criminal justice statistics you believe we have overlooked. Of special interest are sources of data--preferably, but not necessarily, national in scope-that have not been drawn upon for this edition.

It would help us to know for what purposes you have used the Sourcebook and how much it has helped in achieving those purposes.

A special page for your comments and suggestions appears at the end of the book, just after the index. Please use this selfmailer to give us the benefit of your comments and suggestions for a more useful Sourcebook.

## Guide to symbols used in tables

The following symbols have been used uniformly, unless otherwise noted in specific tables:

0 Represents the quantity zero or rounds to less than half the unit of measurement shown.

NA Data not separately enumerated, tabulated, or otherwise available.
$X$ Figure not applicable because column heading, stub line, or other contingencies make an entry impossible, absurd, or meaningless.

B Not computed because the base figure is too small from which to generate a derived figure that meets statistical standards for reliability.
() Figure in parentheses is the base on which percentages or other statistics in the table column or row have been calculated. A lower case letter in parentheses in a table cell is $\beth$ footnote entry.
-- No entry in original source; reason not differentiated in original source.
$Y$ Indicates that the relevant attribute is present.

Where a different symbol meaning is used in order to maintain clarity within the context of a given table, this is noted for that particular table.

## Acknowledgments

This 19th edition of the Sourcebook of Criminal Justice Statistics is the result or a collaboration involving many people throughout the United States.

The staff at the Hindelang Criminal Justice Research Center deserve many thanks. They are an outstanding group of individuals and we are grateful for their commitment to the project.

## Ann Pastore, Managing Editor of the

 Sourcebook of Criminal Justice Statistics has been involved in all facets of the production of the Sourcebook since the first edition in 1973. Ann deserves credit for the clarity, readability, and utility of the design of Sourcebook. Her talent, expertise, and unrivaled attention to detail are reflected in this volume; and we deeply appreciate her many efforts.Editorial Assisfant Kim Schoonmaker contributed her experience and diligence in all aspects of the production of the manuscript. Marcy O'Connor, the project's Statistical Typist, diligently prepared the copy and updated numerous tables with efficiency and care. Kim and Marcy also devote countless hours to careful proofreading, updating and maintenance of computer files, correspondence with data providers, and many other tasks which contribute to the finished Sourcebook. We deeply appreciate the efforts of our production team.

Our Assistant Editors help to define the Sourcebook in many ways. We rely on their judgment, methodological expertise, writing skills and sense of humor on a daily basis. We appreciate the work of David Wilber, Eric Riksheim, Steven Chermak, Andrew Goldberg, and Barbara Luntz. Sharon Wright, Administrative Associate of the Hindelang Center, has lent her experience to the project by skillfully guiding us through the layers of administrative and budgetary issues. We appreciate her considerable efforts.

In Washington, Sue A. Lindgren, Associate Deputy Director of the Bureau of Justice Statistics, contributed her sharp eye and experience in criminal justice statistics in reviewing the manuscript. We are deeply grateful for the time and care that Sue devotes to the Sourcebook each year. Hep many suggestions have greatly improved the final product. Sue works under the direction
of Benjamin H. Renshaw III, Deputy Director for Management and Intergovernmental Affairs. Marilyn Marbrook, Chief of Publications and Dissemination at the Bureau of Justice Statistics, administered publication assisted by Yvonne Boston.

The Sourcebook staff also relies on many individuals in State and Federal justice agencies, research centers, and universities who produce criminal justice statistical information. These people assist us in many ways, including advising us of new sources of criminal justice statistical data, providing prepublication copies of materials, and answering myriad questions from our editorial team äbout terminology and data collecticn procedures. This year, the following individuals were particularly helpful and we acknowledge their generous assistance: Thomas Hester, Joan Johnson, Lisa Bastion, and Lou Jankowski of the Bureau of Justice Statistics; Pat Richards and Anita Richardson of the Administrative Office of the United States Courts; Lloyd Johnston, Jerald Bachman, Patrick O'Malley, and Ginger Maggio, Institute for Social Research; Kathleen Sampson and Julie Garmel, American Judicature Society; Joseph P. Briggs, U.S. Marshals Service; Leslie C. McAneny, The Gallup Organization; Dorothy Cook, Media General, Inc.; David Sanchez, National Institute on Alcohol Abuse and Alcoholism; Christopher Innes, Federal Bureau of Prisons; Jack D. Schamp, National Park Service; Norma Coleman, Drug Enforcement Administration; G. Thomas Munsterman, National Center for State Courts; Su Perk Davis, CEGA Publishing; James Alan Fox, Northeastern University; Thomas Castellano, Southern Illinois University; Candy Johnson and Susan Katzenelson, U.S. Sentencing Commission; Mark Overstreet, National Rifle Association Blanche Shanks, Immigration and Naturalization Service; Ellyne R. Riggs, UCLA, Higher Education Research Center; Joan F. Minton, The Council of State Governments; Fay Honey Knopp, The Safer Society Program; Andrew Kohut, Times Mirror Center for The People and The Press; Edward B. Keller, The Roper Organization, Inc.; Howard W. Stanley and Richard G. Niemi; and Samuel Walker, University of Nebraska at Omaha.

Finally, we wish to thank the many Sourcebook users who provide information about new sources of data, comments on Sourcebook, and suggestions for improvement. We receive these comments from colleagues at professional meetings, through telephone calls, and by mail, and we follow up on all inquiries, suggestions and comments. Suggestions of additional materials for possible inclusion in subsequent editions are especially appreciated, and can be made
either by using the questionnaire at the end of this book or by contacting the Editors at the Hindelang Criminal Justice Research Center, State University of New York, University at Albany, 135 Western Avenue, Albany, New York 12222, (518) 442-5608.

Salaries for police officers and other law enforcement personnel 58
Civilian review agencies investigating police misconduct 62
Duties performed by the U.S. Marshals Service 64
Appropriations, salaries, and personnel for the Federal judiciary 68
Criminal cases filed per judgeship in U.S. District Courts 73
Duties performied by magistrates in U.S. District Courts 76
Number and term of State court judges 77
Qualification requirements, salaries, and selection process for State court judges 79
Prosecutors in State courts 87
Staff and budget of judicial conduct commissions 88
Expenditures and utilization of petit and grand jurors in U.S. District Courts 89 Investigative reports by Federal probation officers 91
Characteristics of State probation departments 92
Jail inmates, population density, expenditures, employees, and payroll in local jails 99
Characteristics of correctional personnel 106
Salaries of correctional personnel 113
Entry requirements, training, and counseling for correctional officers 115
Characteristics of private correctional facilities 120
Characteristics of Federal Bureau of Prisons facilities and staff 126

Furlough activity in State and Federal correctional agenciss 130
Financial assistance for inmates at release 139
Use of inmate labor for prison construction 143
Correctional departments under court order 145
Statutory provisions related to capital offenses 146
Characteristics of State and Federal paroling authorities 148
Activities of the U.S. Parole Commission 149
Restrictions for judicial waiver of juveniles to criminal court 153
Juvenile and adult sex-offender programs 156
Crime victim legislation 158
Statutory provisions on handguns 160
Statutory provisions related to alcohol use and drunk driving 161
State and Federal controlled substances acts 168

Section 2
Public attitudes toward crime and criminal justice-related topics 171

Country's most important problem 172
Problems facing schools 173
Public confidence in institutions 174
Confidence in the U.S. Supreme Court 175
Ratings of components of the criminal justice system 178
Ethics of lawyers 178
Ethics of police 179
Respect for police and knowledge of police brutality 179
Police use of force 182
Level of crime 185
Level of spending for the problems of crime and drugs 186
Fear of crime and perceived safety 191
Responses to crime and criminals 199
Crime deterrence and punishment 202
Severity of local courts 203
Victims' rights 206
Criminals' rights to profit from their story 206
Women's right to abortion 207
Use of wiretaps $208^{*}$
Purpose of prisons 210
Penalty for murder 211
Death penalty 211
Gun ownership 215
Gun control policies 216
High school seniors' attitudes:
Selected social problems 221
Performance of selected institutions 223
Performance of the police 224
Performance of the courts 225
Drug and alcohol use and drug legalization 227
College freshmen attitudes:
Legalization of marihuana 233
Abortion 233
The courts 233
Capital punishment 234
Homosexual relationships 234

AIDS testing and drug iesting 234 Gun cuntrol 234
Fifth and sixth graders:
Drug use and availability 235
Drug legalization and its effects 238
Drug abuse as a community problem, and knowledge of others' use 240
Drug use, public policies, and funding 241
Punishment for drug use or possession 244
Warrantiess searches of drug dealers' houses 244
Drug use and testing among U.S. Military personnel 246
Driving while intoxicated 246
Pornography and public policies 248
Child abuse 252
Legalization of prostitution 254
Homosexual relations 254

## Section 3

Nature and distribution of known offenses
249
Personal and household victimization 256
Victimizations against teenagers 261
Reasons for reporting and not reporting victimization to police 267
Police response time 271
Economic loss in personal and household victimizations 272
Rates of personal victimization 274
Victim-offender relationship in personal victimization 281
Trends in personal victimization 283
Respondents reporting whether they have
been hit or had something taken by force 288
Self-protective measures employed by victims 292
Rate of household victimizations 294
Trends in household victimization 299
Rate of motor vehicle theft 302
Characteristics of lone-offender victimizations 303
Characteristics of multiple-offender victimizations 305
Weapon use in personal victimizations 308
Students reporting victimization at school 310
Students reporting drugs, alcohol, and gangs at school 311
High school seniors' victimization experiences 315
High school seniors' self-reported delinquency 326
High school seniors' invoivement in traffic violations 337
High school seniors' involvement in traffic violations while under the influence of drugs 340
High school seniors' involvement in traffic accidents 342
High school seniors' self-reported drug and alcohol use 344
College students' and young adults' selfreported drug and alcohol use 348
Drug use among military personnel 352
Prevalence of drug and alcohol use 353

Problems resulting from alcohol or drug use 360
Drug abuse-related emergency room episodes 363
Alcohol use and frequency of use 367
Blood alcohol concentration levels of fatallyinjured motor vehicle drivers 370
Involvement of alcohol in automobile crashes 371
Offenses known to police 372
Firearm-related violent crime 385
Average loss incurred for selected offenses 396
Offenses in Federal parks 397
Murders 398
Robberies 404
Aggravated assaults 406
Burglaries 406
L-arceny-thefts 407
Motor-vehicle thefts 407
Bank fraud and embezzlement investigations 407
Violations of Federal bank robbery statutes 408
Law enforcement officers killed and assaulted 410
Prison staff killed by inmates 421
Explosives incidents 422
Arson, deaths, and property loss due to fires 426
International terrorist incidents 428
Criminal acts related to air transportation 428
Crime insurance policies, claims, and losses 429

## Section 4

Characteristics and distribution of persons arrested 411

Number of arrests, national estimates 432
Offense charged and characteristics of persons arrested 435
Arrests in cities, suburban areas, and rural counties 447
Felony arrests in fourteen States 459
Arrests for forgery or fraud-related felonies in six States 460
Arrest rates for violent crimes 461
Arrest rates for property crimes 461
Offenses cleared by arrest 462
Clearances from arrest of persons under 18 years old 465
Juveniles taken into police custody 467
Alcohol-related arrests 468
Drug-related arrests 469
Drug use by arrestees 473
Drug seizures and removals 479
Seizures and arrests by the U.S. Customs Service 480
Seizures and arrests by the U.S. Coast Guard 486
Counterfeiting enforcement activities by U.S. Secret Service 486
Aliens deported from the U.S. 488

Section 5
Judicial processing of dsiendants 489
Requests for immunity by Federal prosecutors 490
Court-authorized interception of wire, oral, or electronic communications 490
Referrals to and indictments by U.S. Attorneys 492
Cases argued and pending in U.S. Attorneys' offices 492
Pretrial release and detention of defendants in U.S. District Courts 493
Criminal matters concluded by U.S. Attorneys 497
Suspects declined for prosecution by U.S. Attorneys 498
Suspects referred to U.S. magistrates 499
Defendants prosecuted, convicted, and sentenced in U.S. District Courts 500
Cases filed, terminated, and pending in U.S. District Courts 509
Length of time to disposition of cases in U.S. District Courts 516
Defendants detained by U.S. District Courts 520
Dispositions and sentences of drug law violators in U.S. District Courts 522
Antitrust cases filed in U.S. District Courts 524
Defendants disposed of and sentenced in U.S. District Courts 525

Application of U.S. Sentencing Commission guidelines 536
Felony cases and convictions in State courts 544
Type and length of sentences imposed by State courts 545
Case processing in eight States 546
Disposition, likelihood of conviction, and sentences received in 14 States 547
Case processing of forgery or fraud-related crimes in six States 54 S
Case processing in the 75 largest counties 551
Prisoner petitions filed in U.S. District Courts 555
Appeals filed in U.S. Courts of Appeals 555
Activities of the U.S. Supreme Court 557
Cases filed, disposed of, and pending in the U.S. Supreme Court 558

Writ of certiorari petitions to the U.S. Supreme Court 559
Executive clemency applications 561
Criminal tax fraud cases 562
Arrests and convictions handled by the U.S. Postal Inspection Service 563
Prosecutions and convictions for violations of immigration and nationality laws 564
Investigative activity and dispositions of arrests by the U.S. Secret Service 567
Criminal enforcement activities of the U.S.
Environmental Protection Agency 568
Forged check and bond cases 568
Delinquency and status offense cases processed by juvenile courts 570
Abuse of public office cases 577
Judicial misconduct cases 578
U.S. Army Courts-Martial cases 580
U.S. Air Force Courts-Martial cases 581
U.S. Coast Guard Courts-Martial cases 584

## Section 6

Persons under correctional supervision 587

Persons under community supervision 588
Movement of the probation population 589
Persons under supervision of the Federal
Probation System 590
Federal probationers in 32 counties 593
Population and characteristics of residents of public and private juvenile custody facilities 596
Problems reported by youth served by
runaway and homeless centers 609
Deinstitutionalization of status offenders 610
Characteristics of jails and jail inmates 611
Deaths of jail inmates 619
Characteristics of female jail inmates 625
Jall inmates involvement with drugs 627
Drug treatment programs in jails 631
Prisoners in jails due to overcrowded Siate facilities 633
Population and characteristics of prisoners in State and Federal institutions 636
Characteristics, current offense, and criminal histories of State prison inmates 645
Female offenders in correctional facilities 649
State prison inmates involvement with drugs 650
Violent female offenders in State prisons 651
Prisoners serving life sentences 652
Population and characteristics of prisoners in Federal institutions 653
Academic education programs in State and
Federal prisons 658
Drug treatment programs for prison inmates 662
Shock incarceration programs 670
Sex offenders: housing, treatment programs and parole provisions 674
Prison population projections 677
Drug and alcohol treatment units and number of clients 680
Population and capacity of military correctional facilities 690
Escapes from correctional facilities 691
Releases from State and Federal institutions 692
Movement of the parole population 694
Prisoners admitted to State and Federal institutions for violations of conditional release 695
Entries to and discharges from State parole supervision 696
Prisoners granted parole by the U.S. Parole Commission 698
Entries to and discharges from Federal parole supervision 699
Deaths among sentenced prisoners 701
Prisoners under sentence of death 703
Movernent of prisoners under sentence of death 708
State and Federal prisoners executed 711
Methods of execution in States 714

## Figures and tables

For users who wish to compare data in this book with that in the 1990 Sourcobook, the number of equivalent tables and figures in the 1991 Sourcebook are shown in parentheses. Table and figure numbers marked with an asterisk ( ${ }^{*}$ ) contain identical data in the 1990 and 1991 editions; these tables have been repeated from 1990 to 1991, with possible changes in titles and notation for accuracy and consistency within this edition. The table and figure numbers within parentheses and without astorisks are those for which the most recent data are presented in (generally) the same format as the one in the 1990 edition. Tables for which dashes (--) appear have no comparable table in the 1990 edition.

6.139 Deaths and assaults among inmates and staff in State and Federal prisons, by jurisdiction, 1989 and $1990(-) 702$
6.140 Prisoners under sentence of death, by race or ethnicity and jurisdiction, Spring 1992 (6.127) 703
6.141 Prisoners under sentence of death, by region and jurisdiction, on Dec. 31, 1989 and 1990 (6.128) 704
6.142 Prisoners under sentence of death, by demographic characteristics, prior felony conviction history, and legal status, United States, on Dec. 31, 1990 (6.129) 705
6.143 Prisoners received from court under sentence of death, by race, region, and jurisdiction, 1990 (6.130) 705
6.144 Prisoners received from court under sentence of death, by age, legal status at time of arrest, and region, United States, 1990 (6.131) 707
6.145 Movement of prisoners under sentence of death, United States, 1968-90 (6.132) 707
6.146 Movement of prisoners under sentence of death, by race, ethnicity, region, and jurisdiction, United States, 1990 (6.133) 708
6.147 Prisoners removed from death row, by current status, region, and jurisdiction, 1990 (6.134) 710
6.148 Prisoners removed from death row, by method of removal, region, and jurisdiction, $1990(6.135) 711$
6.149 Prisoners executed, by jurisdiction, 1930-Dec. 31, 1990 (6.136) 711
6.150 Prisoners executed under civil authority, by region and jurisdiction, 1930-90 (6.137) 712
6.151 Prisoners executed under civil authority, by race and offense, United States, 193090 (6.138) 713
6.152 Female prisoners executed under civil authority, by offense, race, and jurisdiction, United States, 1930-90 (6.139) 714
6.153 Methods of execution in States authorizing the death penalty, by State, 1990 (6.140) 714

## Section 1

## Characteristics of the criminal justice systems

The data presented in this section describe the organization, structure, financial expenditures, and employment of criminal justice systems in the United States. This section includes information on the functioning of criminal justice systems at the local, county, State, and Federal levels. Selected legislation relating to criminal justice matters is also included.

The initial portion of the section presents data from surveys conducted by the U.S. Bureau of the Census for the Bureau of Justice Statistics (BJS). Tables provide detailed information on justice systern expenditures at the Federal, State, and local levels. Data on expenditures for police functions, judicial activities, and corrections activities are presented. The cost of correctional health services is included as are trends for expenditures for the Federal drug control budget. A number of tables also focus on the number of persons employed in the justice system.

The second segment of the section provides information on the characteristics of police agencies. In particular, data from the Law Enforcement Management and Administrative Statistics survey describe the employment, expenditures, and characteristics of law enforcement personnel and departments at the State and local levels. Additionally, several tables present information on drug testing of police personnel. Data based on a survey conducted by the International City Management Association also provide information on police personnel and expenditures. Data from the Federal Bureau of Investigation's Uniform Crime Reporting program provide the number and rate of law enforcement employees for various regions of the country. Information on civilian review agencies investigating police misconduct is presented. Information on the duties of the U.S. Marshals Service is previded; these include property seizures, the execution of warrants and court orders, witness security, and the transportation of Federal prisoners.

The next portion presents information relating to the court process. Information on appropriations for the Federal judiciary, salaries, and personnel is presented. Data on criminal cases filed in U.S. District Courts and duties periormed by U.S. magistrates are presented. Characteristics of State court judges such as qualifications, saiaries, and length of term are included. In addition, information on prosecutors in State courts is presented. A number of tables describe judicial conduct commissions, juror expenditures and utilization, and characteristics and
responsibilities of Federal and State probation officers.

The fourth segment of the section presents a series of tables involving jails in the United States. Data on the number of jail inmates, space allocation, jails under court order, AIDS testing of inmates, expenditures, employment and payroll, and the officer-toinmate ratio are provided. Information is also presented on correctional personnel and facilities in adult and juvenile systems. This includes details on State and Federal correctional officers, such as salaries, training requirements, and other characteristics, as well as information on wardens, superintendents, and health-care staff. Additionally, furlough programs, financial assistance for inmates at release, and the use of inmale labor are described. Finally, data on correctional departments under court order and the workload and decisions made by the U.S. Farole Commission are displayed.

The final set of tables presents staiutory provisions relating to a number of issues such as capital offenses, restrictions for judicial waiver of juveniles to criminal court, sex offender programs, enhancement statutes for crimes against the elderly, and statutory restrictions relating to handguns. Information is also provided on alcohol use and driving, characteristics of controlled substances acts, and asset forfeiture.

| Municipal | 22,550,436 | 17,947,913 | 2,215,116 | 947,430 | 1,078,324 | 189,362 | 2,338,221 | 49,186 |
| Difect | 22,050,134 | 17,591,760 | 2,172,122 | 911,286 | 1,076,622 | 184,214 | 2,237,700 | 48,552 |
| Intergovernmental | 500,302 | 356,153 | 42,994 | 36,144 | 1,702 | 5,148 | 100,521 | 634 |
| Note: These data were collected by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics. The Federal Government, all State governments, and a sample of county, municipal, and township governments ware included in the survey, Since not all local governments ware included in the survey, these data are subject to sampling error (i.e., variations that might resulit if difterent sample were used). The category "Other justice activities" includes data not elsewhere classifled, that eut across more than one category, or that are not allocable to separate categories (e.g., crime commissions, neighborhood crime councils, and State criminal justice coordinating counciis). |  |  |  | Intergovernmental expendifure consists of payments from one government to another. Such expenditure eventually will show up as a direct expenditure of a reciplent government. Dupllicalive transactions between lavels of governments are excluded from the totals for all governments, all State and local governments, and total local governments. <br> For survey mathodology and delinitions of terms, see Appendix 1. |  |  |  |  |

Note: See Nete, table 1.1, Data for the Federal government were extracted from Budget of the United States Goyomment, FY 1992, Appendlx. Beginning with the 1985 survey that document allowed the classification of appropriate expenditure and employment arnounts for the Immigration and Naturallzation Service, the U.S. Customs Service, and the Internal Revenue Service as "prosecution and legal services." In earlier years, those amounts could not be
broken out of the "police protection" category. (Source, $p$, 12.) For survey methodology and definitions of ferms, see Appendix 1.

| Federal Bureau of Prisons | 960,490,600 | 114,345,162 | 11.9 | 2,392 | 47,804 |

Note: These data were collected through a survey of the 50 State correctional systems and the Federal Bureau of Prisons (FBP) conducted by the National Commission on Correctional Health Care in the Spring of 1990. Usable responses were obtained from 46 States and the Federal Bureau of Prisons. Data were not available for Hawaii, Indiana, Mississippi, and North Dakota. Responses to the malled questionnaire were supplemented with telephone inquiries whenever questions arose as to the inclusion or exclusion of specific cost items. The figures reported include mental health services as well as medical and dental cars. Where mental health services were provided by a different section of the department of corrections or by an outeide agency with a separate budget, adjustments were mase io \%s ajpropriate cost figure. Adjustments were made for iion-agency hospitalization costs if these were not included in the totals reported. Health care staffing was included in all of the figures reported and hospitalization, specialty care, equipment and pharmaceuticals were included in virtually all instances.
Care should be taken in the interpretation of the cost survey results because it is not known to what extent budgetary line items included in the "Total department of corrections expenditure" figure vary across jurisdictions. For instance, some jurisdictions may have included new construction costs and these costs may vary significantly.

Also, no attempt was made to control for differences in the cost of living among the States, so some of the variation in heaith care expenditures may be attributable simply to differences in the cost of care.
${ }^{\text {a }}$ The respondents were asked specifically to exclude new construction costs and to include mental health costs even it the latter service was provided by a different section of
the department of corrections or an outside agency.
Based on average daily population.
CData are for fiscal year 1990.
$d_{\text {Includes }} \$ 1,226,987$ in non-department of corrections dollars.
Adjusted for special hospitalization costs.
Includes mental health security cosis.
9 Includes $\$ 30,000,000$ from mental health agency.
hincludes $\$ 1,850,000$ from outside mental health agency. Adult population orly.
includes $\$ 16,250,000$ for outside agency hospitalization.
Includes $\$ 2,900,000$ for mental health services.

Note: The U.S. Bureau of the Census collecis the variable passthrough data (VPT) for the U.S. Department of Justice, Bureau of Justice Statistics (BJS) as a part of the BIS Survey of Justice Expenditure and Employment. BJS provides the Bureau of Justice Assistance (BJA) with the VPT data for use in BJA's State and lecal formula grant program. The grant program is authorized by the Omnibus Crime Control and Saie Streets Act of 1968, as amended (Public Law 90-354). This law includes a formula to determine the amount of each State's grant and requires the passthrough of funds to local governments using VPT data. The VPT data determine how much of each State's total award can be used at the State level and how much must be passed through to local governments. Variable passthrough percents are allocated between the State and local governments according to the ratio of State-to-local criminal justice expenditure. Ownsources expenditure excludes any amount expended from revenue received from other governments.

Note: These data are from the budget submitted by the President to Congress in February 1992. The budget authority (actual or estimated) for each fiscal year includes appropriaHons for that year, as well as for future years, that have been approved by Congress. The outlays (actual or estimated) for the corresponding year are funded partially by the budget authority and partially through unspent funds allocated in previous years. "Outlays" ars defined as values of checks issued, interest accrued on public debt, or other payments made, and net of refunds and reimbursements. These data do not include various fees and program changes that may reduce actual expenditures.

Note: The Anti-Drug Abuse Act provides financial and technical resources to State and local units of government, as weil as the Federal Government, to engage them In the Nation's fight against drugs. The purpose of the Edward Byrne Memorial State and Local Law Enforcement Assistance Program is to assist States and units of local government in carrying out speciffc programs which offer a high probability of improving the functioning of the criminal justice system. Special emphasis is placed on nationwide and multi-jurisdictional projects and projects that advance national drug control priorities. In accordance with Sec. 501 (b) of the Act, the States may award formula grant funds to State agencies and units of local government for the purpose of enforcing State and local laws which establish offenses similar to offenses established in the Controlled Substances Act (21 U.S.C. 801 et seq.) and to improve the functioning of the criminal justice system, with emphasis on violent crime and serious offenders. Grants may provide personnel, equipment, training, technical assistance, and information systems for the more widespread apprehension, prosecution, adjudication, detention, and rehabilitation of persons who violate such laws, and to assist the victims of such crimes (other than compensation). (Source 1991, pp. 1-3.)

Nota: See Note, table 1.1. For survey methodology and definitions of terms, see Appendix 1.

Detail may not add to total because of rounding.
Data for municipalities, and the local government totals that includie municipal data, are estimates subject to sampling variability; data for State and county governments
are based on a canvass of all such governments and therefore are not subject to sampling variability.

Nota: These data are from the second Law Eniorcement Management and Administrative Statistlcs (LEMAS) survey conducted in 1980. The first survey was conducted in 1987. The data were collected by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics. The LEMAS survey collects data from a nationally-representative sample of nearly 17,000 publicly-funded law enforcement agencles in the United States, All 780 State and local law enforcement agencies with 100 or more sworn officers were included in the survey. For agencles with fewer than 100 sworn officers, a na-tionally-representative sample was drawn. A stratified random sample based on type of agency (local, sheriff, or special police), size of population served, and number of sworn officers was used. A total of 2,945 agencies responded to the survey yielding a 94.5 percent response rate. The final database includes responses from 1,830 local police departments, 840 sheriffs' departments, 226 special police departments, and 49 primary State police departments. Hawali does not have a State police agency. The data from agencies with fewer than 100 sworn personnel were derived from a sample, and therefore subject to sampling variation.

A local police department was defined as a general purpose police department operated by a munlcipal or county government. A State police department was defined as the general purpose State police agency operated in each State. Other police departments such as those with jurisdiction Ilmited to enforcement of wildlife conservation or liquor laws, parks, transit systems, airports, college and university campuses, or school systems have been defined as special police and are not included in any tables excopt the above table. Local and State police categories include only general purpose agencies. The special police category includes both State and local-level agencles.
${ }^{\text {a }}$ Detail may not add to total because of rounding.
Except for the State police, the number of agencies reported is an estimate from a weighted sample, not an exact enumeration.

Note: See Note, table 1.61. The "entrance salary" refers to salary paid during the first 12 months of employment with the department as a sworn police officer (excluding uniform allowance, holiday pay, and other additional compensation). The "maximum salary" refers to salary paid to personnel who do not hold any promotional rank (excluding uniform allowance, holiday pay, hazard pay, or any other additional compensation). The mean is calculated by dividing the total number of salaries into the total amount paid in salaries. The median is the salary that marks the point below which and above which 50 percent of ail the salaries
fall. The first quartile salary is the salary below which 25 percent of all salaries fall; the third quartile salary is the salary below which 75 percent of all the salaries fall. For definitions of terms, a list of States in reglons, and detail of survey response rates, sea Appendix 2.

| Commission | 3 | 27,810 | 28,000 |
| Town meeting | 4 | 25,621 | 26,150 |

Note: These data are from a mail survey of municipal officials conducted by the international City/County Management Association in the summer of 1991 . Of the 7,145 cities surveyed, 5,249 responded for a rate of 73.5 percent. The mean salary level is calculated by dividing the total number of salaries by the total amount paid in salarles. The median salary level is the salary that marks the point below which and above which 50 percent of all salarles fall. Classifications having less than three cities reporting were excluded because meaningful statistics cannot be computed. Consequently, the number reporting in some subcategories does not always equal the total reporting. For definitions of terms, a list of States in regions, and detail of survey response rates, see Appendix 2.

| San Diego, CA | Citizen Review Board | 1988 | Ordinance | II | 20 | By city manager | Reviews all citizen complaints-makes recommendations |  |

See notes at end of table.

Characteristics of civilian revlew agencies investigating police misconduct in 30 large cities

United States, 1991--Continued

| City | Name of organization | Date established | Enabling authority | Class ${ }^{\text {a }}$ | $\begin{aligned} & \text { Number } \\ & \text { of } \\ & \text { members } \end{aligned}$ | Method of appointment of board or director | Responsiblities | Other characieristics |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| San Francisco, CA | Office of Citizens Complaints | 1983 | Ordinance | 1 | 1 | Director appointed by Police Commission | Receives and investigates all complaints-makes recommendations | The Office of Citizen's Complaints is headed by one director who conducts investigations and recommends |
| Toledo, OH | Clvillian Review Board | 1991 | Ordinance | II | 11 | By mayor | Reviews complaints of police misconduct-makes recommendations |  |
| Tucson, AZ | Chizens' Police <br> Advisory <br> Committee | 1982 | Ordinance | If | 13 | By city counsol-the Police Chief and City Manager are members also | Serves as appellate review in cases alleging inadequato pollicies and procedures or violation of existing procedures | The Committee is comprised of both sworn and nonsworn personnal |
| Washington, DC | Clivilian Complaint Review Board | 1980 | Ordinance | 1 | 7 | By mayor (approved by council) | Recelves and investigates all citizen complaints-* makes recommendations |  |

Note: These data were obtained through a telephone and mail survey of the 50 largest cittes in the United States. Police departments were contacted by telaphone and department spokespersons wore interviewed concerring procedures for handling cltizen complaints about police misconduct. Civillan review procedures were found to exist in 30 of the surveyed cities. Where a civilian review procedure existed, documents regarding the structure and process of the procedure were requested and used to verify information obtained in the telephone interviews.
${ }^{a}$ Civilian review procedures are classified according to who does the initial Investigation of a cittzen complaint, and who reviews the investigative report and makes a recommendation for action. This results in three types of civilian review agencies: Class I--nitial investigation and fact finding by sworn officers; review of investigative report and recommendation for
action by nonsworn person or board consisting of a majority of nonsworn persons, Class Il-initial Investigation and fact finding by sworn police officers; review of Investigative report and recommendation for action by nonsworn person or board consisting of a majority of nonsworn persons. Class Ill--initial investigation and fact finding by sworn police officers; review of investigative report and recommendation for action by sworn officers; and opportunity for a citizen who is dissatisfied with the final disposition of the complaint to appeal to a board that includes nonsworn persons.

Duties performed by Deputy U.S. Marshals
By type of activity, fiscal year 1991

Note: The U.S. Marshals Service (USMS) is a law enforcement agency performing duties for the Execultive Branch of the Federal Government. The agency executes all warrants issued by the Foderal courts, conducts fugitive investigations, and maintains custody of all Federal prearial detainees. In addition the USMS is responsible for prisoner processing and detention, transportation and production of prisoners, protection of Federal judiciary, Federal witness security, the execution of court orders, and manageances in Federal prisons, and arresting dangerous fugitives, Data 1992), p. 6. Figure constructed by SOURCEBOOK staff. on workload, accomplishments, and time utilization are collected on a regular basis from the 94 district offices.

Director's Report: A Review of the United States Marshals

A fugitive is an individual who has been convicted or is susected of criminal activity and attempts to avoid legal sanctions by fleeing from the justice system. Fugitive warrants are issued for a variety of violations, e.g., escape, bond default, parole or probation violations, and felony violations in cases where the originating agency does not have arrest authority.

Note: See Note, figure 1.1. For the Witness Security Program, the U.S. Marshals Service provides protection to government witnesses when their lives become endangered because they have agreed to provide critical information to the government and the courts about organized crime and other serious criminal enterprises. This protection is provided 24 hours a day to all such witnesses while they are in a 'threat' environment and upon their return to a danger area for trials or other court appearances. The witnesses and authorized dependents are given new idenitites, moved to another city, and provided services necessary to assist them in becoming self-sustaining and acclimated to their new community as quickly as possible." (Source, 1990, p. 47.)

| No report requested | 2.5 | 0.0 | 0.0 | 0.0 | 0.0 | 0.0 | 0.0 |

Note: These data were compiled from a variety of sources. Primarily used were questionnalres completed by judicial nominees for the Senate Judiciary Committee, transcripts of the confirmation hearing conducted by the Committee, and personal interviews. In addition, an investigation was made of various biograpincal directories including The American Bench (Sacramento: R.B. Forster), Who's Who in American Poltics (New York: Bowker), Martindale-Hubbell Law Directory (Summit, NJ: Martindale-Hubbell, Inc.), various regional editions of Who's Who, State legislative handouts, and relevant newspaper articles from the home State of nominees or appointees.

Law firms are categorized according to the number of partners/associates: 25 or more associates for a large firm, 5 to 24 associates for a moderate firm; and 4 or less for a small firm. Percent subtotals for occupational experience sum to more than 100 because some appointees have had both judicial and prosecutorial experience.

The American Bar Association's (ABA) ratings are assigned to candidates after invesiligation and evaluation by the ABA's Standing Committee on Federal Judiciary, which considers prospective Federal judicial nominees only upon referral by the U.S. Attorney General or at the request of the United States Senate. The ABA's Committee evaluation is directed primarily to professional qualifications-competence, integrity, and judicial temperament. Factors including intellectual capacity, judgment, writing and analytical ability, industry, knowl-
edge of the law, and professional experlence are assessed. To be rated "excep tionally well qualified," the prospective nominee has to stand at the top of the egal profession in the community involved and have outstanding legal ability, wide experience, and the highest reputation for integrity and temperament. Similar high standing in the community is also required. To be rated "well qualified," the nominee has to have the Committee's strong afilirmative endorsemen and be regarded one of the best available for the vacancy from the standpoint of compelence, integrity, and temperament. The evaluation of "qualified" indicates that it appears the prospective nominee would be able to perform satisfactorily as a Federal judge with respect to competence, integrity, and temperament. When a nominee is found "not qualified," it means that the Committee's investigation indicates that the prospective nominee is not adequate from the standpoint of competence, integrity, or temperament \{American Bar Association, Standing Committee on Federal Judiciary (Chicago: American Bar Association, 1980), pp. 3-5).
${ }^{\text {a }}$ Category includes "well qualified."

Table 1.80
Criminal cases tlled per Judgeship in U.S. Dlstrlet Courts
By cistrict, years ending June 30, 1970-90--Continued

Note: The Federal courts are organized Into 11 geographic circuits. Each circuit consists of a number of District Counts, which are the trial courts, and a Court of Appeals, which hears appeals taken from other courts. There is also a separate District Court and Court of Appeals for the District of Colurnbia.

On Oct. 1, 1981 the number of U.S. District Court Circuits was increased from 10 to 11. The new circuit was created by the removal of Alabarna, Florida, and Georgla from the Fifth Circuit and the reorganization of these courts into the Eleventh Circuit.
Beginning with the year ending June 30, 1976, U.S. District Courts have reported the number of minor offense cases filed in the Federal courts in addition to the number of felonies and misdemeanors above the minor offense level (offenses involving penalites that do not exceed y year imprisonment or a fine of more than $\$ 1,000$ ). This additional reporting resulted from the Speedy Trial Act of 1974 (Public Law 93-619), which required the courts to maintain records on all offenses above the petty offense level (offenses involving penalties that do not exceed 6 months incarceration and/or a fine of not more than $\$ 500$ ). Because the majority of minor offense cases are handled by magistrates in Federal courts and because this report is primarily a statistical statement reflecting the workload per authorized judgeship, the minor offense cases have been excluded from the 1976-79 data by the Administrative Office of the United States Courts. The exclusion of these cases from the workload statistics has been done in an effort to make the 1976-79 data more comparable to previous years' data that did not Include most minor offense cases. In 1979, the Federal Magistrates Act (Public Law 9682) expanded the authority of magistrates to dispese of all misdemeanors. To reflent the workload per authorized judgeship, the 1980-90 data exclude all cases below the felony level.

Data for 1979 are provided in two columns in order te reflect the efforts of individual judges before and after the enactment of the Omnibus Judgeship Act (Public Law 95-486), which became effective Oct. 20, 1978. Because the increase in authorized judgeships
became effective midway through the year and most of the newly authorized positions were not filled by June 30, 1979, computations based only on the newly authorized judgeships do not give an accurate indication of the efforts of individual judges.

The sharp decline in criminal cases filed in the Canal Zone after 1979 resulted from the passage of the Panama Canal Act of 1979 (Public Law 96-70), signed Sept. 27, 1979. This information was provided to SOURCEBOOK staff by the Administrative Office of the United States Courts, Statistical Analysis and Reports Division.
${ }^{\text {a }}$ On Apr. 1, 1979, as a result of the enactment of Public Law 95-409, the Central District Court of Illinois was established, the Eastern District Court of Illinois was eliminated, and the Southern District Court of tlinois underwent extensive reorganization. Consequently, data collected for the Southern District Court after this date are not comparable with data collected prior to this date.
${ }^{5}$ Included in the criminal statistics for this district are numerous traffic offense cases that are classified as misdemeanors above the minor offense level. In most districts similar cases are classified as minor offienses and are excluded from this report.
${ }^{\text {CPublic Law } 95-157 ~ e s t a b l i s h e d ~ t h e ~ D i s t r i c t ~ C o u r t ~ o f ~ t h e ~ N o r t h e r n ~ M a r i a n a ~ I s l a n d s ~ o n ~ N o v . ~} 8$, 1977. Court was convened on Jan. 9, 1978.

Note: The Federal Magistrates Act (28 U.S.C. 636(b)) provides the authority under which magistrates assist courts in the performance of "additional duties." This authority was both broadened and clariffed by Public Law 94-577, Oct. 21, 1976, and by new procedural rules governing most habeas corpus proceedings In the District Courts, effective Feb. 1, 1977. The changes make clear the ability of the parties of a civil case to consent to have the case referred to a magistrate for trial as a special matter; the changes also empower magistrates to conduct evidentiary hearings in prisoner pettion cases. Additionally, the role of magistrates in providirig pretrial assistance to district judges in both dispositive and non-dispositive matters has been clarified. A magistrate's authority to conduct arraignments following indictment in a criminal case is provided under Rule to of the Federal Rules of Criminal Procedure in 86 Districts.
$\mathrm{a}_{1} 989$ figures have been revised by the Seurce and therefore will differ from previous editions of SOURCEBOOK. Also, some differences between 1989 and 1990 under "additional duties" are attributable to changes in reporting procedures. Reporting rate for 1989 was 94 percent; for 1990, 96 percent.
Includes search and arrest warrants and summonses.
CIncludes evidentiary hearings.

| Note: The salaries reported for the highest appellate courts refer to salaries paid to associate justices, not chief justices. National averages for the highest appellate and general trial courts are based on figures for the 50 States. For intermediate appellate courts, the average is based on the 38 States that have such counts. Two figures are shown for States where lncallties supplement State-paid salaries. The first is the sum of the State pay plus the lowest supplement paid by the localities. The second figure (shown in parentheses) is the sum of the State pay plus the highest possible supplement paid by the localities. Supplements may include payments for travel and cther expenses, and locally authorized salary increments. |  |  |  |  | Source: National Center for State Courts, Survey of Judicial Salaries (Williamsburg, VA: :National Center for State Courts, January 1992), p. 10. [^8]Method of selection and length of inltial and retention terms of the highest appellate court justices

By State, as of May 1992-Continued
Note: These data were compiled through a survey of State statutes; they were then verilled by personnel of the American Judicature Soclety.
"Partisan election" refers to elections in which the judicial candidates' names appear on the ballot with their respective party labels; "zonpartisan election" refers to the situation when no party labels are attached to judicial candidates' names on the ballot. "Retention election" refers to an election in which a judge runs unopposed on the ballot and the electorate votes solely on the question of his continuation in office. In the retention election, the judge must win a majority of the vote in order to serve a full term except in Hinols which requires 60 percent. "Nominating commission" is a merit selection procedure that reters to the nonpartisan body, composed of lawyers and nonlawyers, which actively recruits, screens, and nominates prospective judicial candidates to the executive for appointment. The nominating commission method of selection was established by executive order in Delaware, Maryland, and Massachusetts and by constitutional or statutory authority in all other jurisdictions. "Initial selection" is detined as the constitutional or statutory method by which judges are selected for a full term of office. "Retention" refers to the mothod used to select judges for subsequent terms of office.
${ }^{\mathrm{a}}$ In States that use nominating commissions, the governor generally makes the appointment.
The Judicial selection commission submits a list of prospective judges to the governor who nominates one to fill a vacancy. The legislature then votes to approve or disapprove that nomination.
${ }^{\text {C }}$ Initial appointment is made by the President of the United States and confirmed by the Senate. If the President does not wish to reappoint the judge, the District of Columbia Nomination Commission compiles a new list of candidates.
${ }^{d}$ The highest State court is named the Court of Appeals.
${ }^{9}$ The appointment requires the approval of the elected executive council.
'Oklahoma and Texas have two courts of final jurisdiction: the supreme court, which has final civill jurisdiction; and the court of criminal appeals, which has final criminal jurisdiction.

| Serving more than one county | 20 | 29 | 11 | 1 | 21 | 24 | 10 |

Note: These data were collected as part of the 1990 National Prosecutor Survey Program (NPSP) conducted by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics. The NPSP involved a nationally-representative survey of 290 chief prosecutors, resulting in 289 completed questionnaires. The prosecutorial districts of these chief prosecutors encompassed a total of 514 counties and independent cities. All States except Vermont, which did not by chance enter the random sample, were represented in the survey. The source of workioad data is the National Judicial Reporting Program Survey of 1988. These data are derived from a sample and therefore subject to sampling variation.
${ }^{\text {a }}$ The term county includes both counties and independent cities that have their own court systems separate from any adjacent or surrounding counties.

| Note: The Center for Judicial Conduct Organizations conducts annual surveys of judicial conduct commissions. These commissions are typically State agencies created by statute or constitutional amendment with the mandate to receive, investigate, and dispose of complaints regarding judicial misconduct. Information was not avaliable for lowa, Maryland, Rhode Island, South Dakota, Tennessee, Vermont, West Virginia, and Wyoming. <br> ${ }^{a}$ States do not maintain uniform reporting periods. Most States rejorled data for the calendar year 1989. However, the following States reported data for the calendar year 1990: Nebraska and South Carolina. The following jurisdictions reported on a tiscal year basis: Florida, Georgia, Hawail, Kentucky, Missouri, New Mexico, North Carolina, Oklahoma, Utah, Virginia (7/1/89 through 6/30/90); Texas (9/1/89 through 8/31/90); Alabama and the District of Columbia (10/1/89 througn $9 / 30 / 90$ ); California (12/3/89 through 11/30/90); Tennessee ( $8 / 23 / 89$ through 8/21/90). <br> Budget included a $\$ 50,000$ supplemental appropriation for attorney's fees. ${ }^{C}$ Part-time. <br> ${ }^{\text {d Commission was newly created in July 1989. Budget reflects period from }}$ $9 / 1 / 89$ through 6/30/90. <br> ${ }^{\text {e }}$ All expenses are paid for by funds from the Delaware Supreme Court except when private counsel is appointed by the Court on the Judiciary for a judge. If private counsel is appoirted, payment is made from a Superior Court fund established to reimburse private counsel for representing State judicial employfes before a Delaware court. <br> In addition to its dlse,plinary function, the Commission also evaluates active judges who seek reappointment and reviews the fitness of retired judges who wish to continue their judicial service as senior judges. <br> ${ }^{9}$ Commission is budgeted through the Supreme Court's budget, therefore no specific amount is reported. <br> $\mathrm{h}_{\text {Investigators are available on a contractual basis. }}$ <br> The Executive Director is the employed attornay, the administrative assistant fulfills secretarial duties, and investigations are done by the attorney/executive secretary, or by an investigator hired on a contractual basis for particular assignments. <br> ${ }^{1}$ Executive Director is also an attorney and Administrative Assistant is also a paralegal. <br> ${ }^{k}$ This figure represents actual costs. The Commission is funded from the General Operating Budget of the Judiciary Branch. <br> One full-time; one part-time. <br> ${ }^{3}$ Five full-time; one part-time. <br> ${ }^{\Pi}$ Five full-time; two part-time, <br> ${ }^{\circ}$ Commission employs a Finance/Personnel Officer, Budget Assistant, and a Clark. <br> ${ }^{\text {P }}$ Staft works for both Judicial Conduct Commission and the attorney Disciplinary <br> Board, with the latter taking by far the majority of time. <br> ${ }^{9}$ Six full-time; one part-time. <br> ${ }^{5}$ Commission employs a paralegal. <br> ${ }^{5}$ Four full-time; one part-time. <br> tcommisslon employs an Administrative Technician. <br> ${ }^{U}$ The Executive Director is a contract employee and hires Investigators and secretarial assistants, etc. <br> ${ }^{\text {Commission employs a Database Coordinator/Receptionist. }}$ <br> WCommission's budget is biennial, thus no budget was reported. <br> Source: American Judicature Society, The Center for Judicial Conduct Organizations, Judicial Conduct Reporter 13 (Summer 1991), pp. 3, 4. Note: Persons under supervision of the Federal Probation Systern Include persons placed on probation--either by U.S. District Courts, U.S. magistrates, or at the request of U.S. attorneys (deterred prosecution)-and Federal offenders released from confinement on parole or mandatory release. A Federal prisoner is eligible for mandatory release when the prisoner has served the full termi of imprisonment less "good-time" allowances. If the offender has earned more than 180 days of "good-time" credit, supervision (as if on parole) is for that period in excess of 180 days. If "good-time" is less than 180 days, release occurs without supervision. As of 1987 the total figure no longer includes bail interviews because this function was transferred from the probation offices to the pretrial services offices. The 1987 data have been revised by the Source and may differ slighlly from previous editions of SOURCEBOOK.

Note: These data are from the 1983 and 1988 Censuses of Local Jalls, conducted by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics. The 1983 Census collected information from 3,358 jails for a response rate of 99 percent and the 1988 Census gathered information from 3,316 jails for a response rate of 100 percent. For additional information on the Census methodology, see Note, table 1.98.

The number of inmates is that number for which housing Information was available. Floorspace includes all areas where inmates slept at night and in use on June 30. Excluded from housing were areas used only for recreation, services, or administration.

Averages for square footage, number per unit, and hours confined are all computed by using the number of inmates reported to be in each unit, and comparing this to its physical dimensions, average across units or duration of confinement as appropriate. Special housing units are reserved for disciplinary, protectivz custody, or administrative segregation while other housing is any other non-general housing such as an infirmary or tilagnostic unit.

Note: The 1988 Census of Local Jails was conducted by the U.S. Bureau of the
Census for the U.S. Department of Justice, Bureau of Justice Statistics. Questionnaires were mailed to $\mathbf{3 , 4 4 8}$ locally-administered jails in the Nation during the week of Aug. 1, 1988. Forty-four jails were added to the initial mailing, and 176 were deleted, leaving a final count of 3,316 facilities. Through the use of various followup procedures a response rate of 100 percent was achieved.

The 1988 Census included all locally-administered jails that held inmates beyond arraignment (usually more than 48 hours) and that were staffed by municipal or county employees. Elght fails that were privately operated under contract for local governments were also included. Excluded from the Census were physically separate drunk tanks, lockups, and other holding facilities that did not hold persons after they had been formally charged, as well as all Federal and State-adminis.
tered facilities, including the combined jail-prison systems in Alaska, Connecticut, Delaware, Hawali, Fhode Island, and Vermont. Five locally-operated jails in Alaska were included. (Source p. xiv.)
${ }^{\text {a }}$ Defail adds to more than total number of jalls under court order tor specific condi-
tions because some jails were under judiclal mandate for more than one reason.
${ }^{\text {Food service, disciplinary policies, grievance procedures, fire hazards, the totality }}$ of conditions, and other reasons.

Table 1.101
Jall payroll and nonpayroll staff and number of inmates per employee
By occupational category, United States, June 30, 1983 and 1988

| Occupational category | Number of employees |  | Number of Inmates per employee |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1983 | 1988 | 1983 | 1988 |
| Total | 64,560 | 99,631 | 3.5 | 3.4 |
| Administrators | 6,091 | 6,727 | 37.4 | 50.0 |
| Correctional officers | 44,454 | 73,280 | 5.1 | 4.6 |
| Clerical and maintenance staff | 8,415 | 11,711 | 27.0 | 28.7 |
| Educational staff | 893 | 1,216 | 254.8 | 276.3 |
| Prolessional and technical staft | 4,524 | 6,177 | 50.3 | 54.4 |
| Other staff | 183 | 520 | 1,243.4 | 646.2 |

Note: See Note, table 1.98. Part-time and nortpayroll jail employees accounted for 9 percent of all jail statt in 1988, oxcluding community volunteers. The ratio of jall inmates to staff, therefore, is based on full-time and part-time, and payroll and nonpayroll employees. By contrast, in State correctional facilities where part-time and nonpayroll employees accounted for less than 4 percent of all staff in 1984, the ratio of inmates to staff was based on full-time payroll employees only. The inmates per employee ratlo was obtained by dividing the average dally inmate population by the number of employees (excluding community volunteers).

| New Mexico | 48.72 hours. | Warden. | Yes; wife or other relative. | Clear conduct for 6 months; be within one year of release. | None. |
| New York | Up to 7 days. | Temporary Release Committee, superintendent, director of temporary release, commissioner (for statutory crimes). | Yes; blood relative. | 2 years to parole eligiblity date; no escapes or abscondences from temporary release; veritied residence with blood relative. | None. |
| North Carolina | Length of time varies according to the need of the specific program, | Area administrator. | Depends on the program. | Must be in level III of minimum custody. | None. |
| North Dakota | 8 hours; 24 hours; 48 hours. | Unit manager/treatment director/chief of securty/ warden. | Yes; any person who is approved as an institutional visitor may apply to be a sponsor. | Substantial completion of all recommended treatment or education programs; no Class I or II reports for 60 days; document 3 goals; acceptable sponsor; no contact with officials or witnesses; within 120 days of release. | None. |

[^15]| Characteristics of furiough programs in State and Federal correctional agencies |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| By Jurisdiction, United States, 1990--Continued |  |  |  |  |  |
| Jurisdiction | Length of furlough | Furlough approved by: | Furlough sponsor required? Who may serve as sponsor? | Minimum eligibility requirements for furloughs | Recent changes in furlough eligibility |
| Oklahoma | No longer than 72 hours. | Facility head: emergency programmatic and transportation passes; medical director: health passes of inmates in minimum or community facilities; governor: health passes of inmates in medium or maximum facillties. | Yes (programmatic passes); spouse, other relative or voluntear after background investigation and orlentation. | Health passes: voluntary basis or medical emergency; documented evidence of a medical or psychiatric/psychological need. Emergency passes: all offenders, except those on death row or deemed to be a threat to the public or employees. Other passes: discharging within 60 days or within 30 days and recommended for pre-parole conditional supervision or parole; current participation in or completion of institutional reintegration program; not deemed a security risk. | Statutory restrictions added; drug offenders and sex offenders passes have certain criteria. |
| Oregon | No more than 30 days. | Superintendents. | No. | Have minimum custody; not a threat to the community; minimal potential for adverse community relations; acceptable past performance on prior releases (if any); be in suitable physlcal and mental condition; institutional conduct warrants leave consideration. | Significantly reduced length from 7 months to 30 days maximum at end of sentence due to legislative statutory changes. |
| Pennsylvania | It depends on the number of previous furloughs and the reason for the furlough. Usually start with 2-3 days and no furloughs can exceed 7 days. | The institution staff, the sentencing judge and the executive deputy commissioner if a prerelaase waiver or exception is required. | Yes; family member or friend (sponsor and home must first be approved by the home furlough investigator). | Must have at least $1 / 2$ of the minimum sentence served or not less than 9 consecutive months served in a State facility; no Class 1 or multiple Class II misconducts within the last 9 months, no outstanding detainers; approval of the sentencing court. | None. |
| Rhode island | 9 hours per day: up to 5 conseculive days. | Classification Board with final approval by the director. | Yes; blood relative, stepmotherfather, half brother/ sister, spouse with certificate of marriage/common law affidavit with income tax return. | All are eligible for serious illness visitation once every 120 days or In an emergency; inmates eligible for work training or education programs after serving $1 / 6$ of sentence; employment and/or to secure residence to those within 90 days of release date; overnight furloughs no more than onco each 60 days except to those in the Work Release Program, once each 30 days. | Currently dratting new polictes and procedures for the furlough program. |
| South Carolina | Normal horne visit furfough are for 78 hours. Funeral and emergency furioughs can vary not to excsed seven days. After four 72 hour furloughs, an inmate can apply for one 48 hour optional furlough per calendar year. | Director of Dlvision of Community Services. | Yes; immediate family (spouse, adult child, brother, sister, parent). | Non-violent offenders must have been in highest security level attalnable for 60 days. Violent offenders must have been it highest security level attainable for 1 year and must have served $1 / 4$ of their total sentence. All participants must have a clear disciplinary record for 6 months; have an approved famly member as a sponsor. All participants on the home furlough program are given a drug test before arid after the furlough period. Those testing positive forfeit $\dagger$ furlough. OHenders commited for lewd act on child and those inmates serving life sentences without parole would not be eligible. | Spring, 1990: inmates committed for criminal sexual conduct offenses were ineligible. Fall, 1990: Inmates currently serving a sentence of murder, manslaughter, assault and battery with intent to kill, kidnaping, or armed robbery and who have a previous conviction for one of these crimes are irieligible. Inmates committed tor life without parole are ineligible; legislation was introduced to prohibit the violent offender from participation. As a compromise, the department recommended that instead, the violent offender be required to serve $1 / 4$ of total sentence and aiso be in " $A A^{\prime \prime}$ custody at least one year before furlough participation. |

See notes at end of table.

Characteristics of furlough programs in State and Federal correctlonal agencies
By jurisdiction, United States, 1990-Continued

| Jurisdiction | Length of furlough | Firlough approved by: | Furlough sponsor required? Who may serve as sponsor? | Minimum eligiblity requirements for furioughs | Recent changes in furlough eligibility |
| :---: | :---: | :---: | :---: | :---: | :---: |
| South Dakota | 12 hours maximum. | Furlough Board. | Yes; must be on Inmate's visit list (family member or responsible irlend), | Must be level of trusty or community custody; must have 90 days in custody level; free of disciplinary reports for 30 days; must be working and must receive good evaluation reports. | Pollcy was last revised 12/31/90 with minor revislons; until the summer of 1989, Hifers were allowed trusty and corimunily custody levels and furloughs. All minimum lifers were reclassified medium status without furloughs. |
| Tennessee | 12 hours to 3 days. Medical furlough may be indefinite. | Warden. | No. | An emergency within the inmate's immediate family; preparole 3 day furlough ( 3 within last 90 days); work release furlough of 12 hours duration; extended medical furlough. | None. |
| Texas | 1.5 days; emergency furloughs; 7 days; appropriate reason furloughs. | Unit administration, State Classification Committee, sheritt's office. | Yes; relative or volunteer. | Must be within 1 year of parole eligibility; meet requirements of TDCJ-ID policy regarding offense, conduct, status, prior criminal history; considered to be acceptable security risk for release. | None. |
| Utah | 12 hours at most; back by <br> 8 p.m.; must be on weekend. | Warden designate and unit captain. | Yes; any approved visitor. | Must be lowest classification; have sponsor; parole date within 36 months; 60 days disciplinary free; off property work experience; sign contract. | From 48 months to 36 months on parole date. |
| Virginia | 30 days, | Deputy director, Division of Adult Services. | No. | Must be granted discretionary parole; no violent ofienses, past or present. | Between 1987 and 1989, the department encounter* ed public opposition to general furloughs based on a series of killings by inmates on furloughs from work release and pre-release. Consequently all furloughs except extended furloughs were eliminated. |
| Washington | No more than 60 days in a 12 month pariod. | Facility superintendent, pre-release or work release administrator. Headquarters in emergency situations. | Yes; sponsars must know the applicant's furlough plan and be familiar with the conditions of the furlough. | Inmate must have minimum custody; must have completed mandatory portion of sentence, if any; generally must be within 6 months of release. | In 1990, due to community protectlon legislation, elligibility was limited to prerelease and work release status; for sex offenders rereleased on furlough, the DOC had to notify within 48 hours the place to which offender had been granted furlough. |
| West Virginia | Up to 52 hours. | Chief executive officer for work release. | Yes; wife, mother, slster, brother, grandmother, grandfather, close relative. | Clear conduct record; length of stay; approved furlough destination; favorable community sentiment; program particlpation. | Yes; furloughs restricted to community corrections only; volont offenders in work rerelease returned to prison; additional staff to be added to work release centers; tight ening of eligibility for work release, furlough, etc. |
| Wisconsin | Up to 3 days exclusive of travel wih possible extension of 3 days. | Institution's warden. | Yes; close family member (parent, child, spouse, grandparent, brother or sister). | Minimum or community residential confinement; within 6 months of mandatory release or discharge; inmates serving a life sentence shall have reached parole eligibility; have no probation or parole revocation proceedings pending; agree to examinations such as urinalysis or breathalyzer test and personal or strip searches upon return or during the leave; have consent to leave by all principals. | None. |

[^16]Characteristics of furlough programs in State and Federal correctional agencies
By jurisdiction, United States, 1990--Continued

| Jurisdiction | Length of furiough | Furlough approved by: | Furlough sponsor required? Who may serve as sponsar? | MinImum eliglbility requirements for furioughs | Recent changes in furlough eligibility |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Wyoming | 10 days maximum, generally 48 hours. | Agency head. | Yes; approved sponsor. | 6 months prior to completion of minimum sentence; minjmum security classification. | Family furlough limited to minimum security facilities. |
| Federal Bureau of Prisons | Day furloughs and overnight furloughs generally limited to seven days. | Warden. | Yes; generally a family member. | Minimum requirements: inmate must have community custody; be within 2 years of release; must have demonstrated responsible behavior. | Changes provide for increased scrutiny of offenders with a history of escape, weapons use, aggres sive behavlor or major drug distribution. |

Note: This information was collected through a survey of the 50 States, the Federal Bureau of Prisons, and the District of Columbia. The following jurisdictions do not use inmate labor for prison construction: Alaska, Connecticut, the District of Columbia, Illinois, Maryland, Minnesota, Nevada, New Jersey, New York, North Dakota, Ohio, Pennsylvania, Tennessee, Utah, Vermont, Virginia, and the Federal Bureau of Prisons. Mississippi uses inmate labor to build support facilities and Missouri uses inmate fabor for routine repair and maintenance of facilities but no additional information was avalilable for these States. The Source presents the information as submitted by the responding agencles. No attempt is made by the Source to verify the information recelved.

| California | Treason; aggravated assault by a prisoner serving a life term; firsi-degree murder with special circumstances; train wrecking; perjury causing execution. | 18 |  |
| Colorado | First-degree murder; kidnaping with death of victim. | 18 |  |
| Connecticul | Murder of a public safety or correctional officer; murder for pecunlary gein; murder in the course of a felony; murder by a defendant with a previous conviction for intentional murder; murder while under a life sentence; murder during a kidnaping; illegal sale of cocaine, methadone, or heroin to a person who dies from using these drugs; murder during firstdegree sexual assault; multiple murders. | 18 |  |
| Delaware | First-degree murder with aggravating circumstances. | None specified |  |
| Florida | First-degree murder. | None specifled |  |
| Georgia | Murder; kidnaping with bodily injury when the victim dies; alrcrath hijacking; treason; kidnaping for ransom when the victim dies. | 17 | S |
| Idaho | First-degree murder; aggravated kidnaping. | None specifled |  |
| Illinois | Murder accompanied by at least one of 11 aggravating factors. | 18 |  |
| Indiana | Murder, with aggravating circumstances. | 16 |  |
| Kentucky | Aggravated murder; kidnaping when victim is killed. | 16 | $s$ |
| Louislana | First-degree murder; treason. | 16 |  |
| Maryland | First-degree murder, either premeditated or during the commission of a felony. | 18 | S |
| Mississippi | Murder of a peace officer or correctional officer; murder while under life sentence; murder by bomb or explosive; contract murder; murder committed during specific felonies (rape, burglary, kidnaping, arson, robbery sexual battery, unnatural intercourse with a child, non-consensual unnatural intercourse); murder of an elected official; capital rape ${ }^{\text {a }}$; aircraft plracy. | 13 |  |
| Missouri | First-degree murder. | 16 |  |
| Montana | Deliberate homicide; aggravated kidnaping when the victim or rescuer dies; attempted deliberate homicide, aggravated assault, or aggravated kidnaping by a State prison inmate with a prison conviction for deliberate homicide or who has been previously declared a persistent felony offender. | 12 |  |
| Nebraska | First-degree murder. | None specifled |  |
| Nevada | First-degree murder. | 16 |  |

Statutory provisions related to capital offenses
By State, 1991--Continued

| Capital offense |  | Minimum age for imposition of death penalty | Prohibits execution of mentally retarded |
| :---: | :---: | :---: | :---: |
| New Hampshire | Contract murder; murder of a law enforcement officer; murder of a kidnaping victim; killing another after being sentenced to life imprisonment without parole. | 17 |  |
| New Jersey | Purposeful or knowing murder: contract murder. | 18 |  |
| New Mexico | First-degree murder; felony murder with aggravating circumstances, | 18 |  |
| North Carolina | First-degree murder. | 17 |  |
| Onio | Assassination; contract murder; murder during escape; murder while in a correctional facility; murder after conviction for a prior purposeful kiling or prior attempted murder; nurder of a peace officer; murder arising from specified felonles (rape, kidnaping, arson, robbery, burglary); murder of a witress to prevent testimony in a criminal proceeding or in retallation. | 18 |  |
| Oklahoma | Murder with malice aforethought; murder arising from specified felonies (forcible rape, robbery with a dangerous weapon, kidnaping, escape from lawtul custody, first-degree burglary, arson); murder when the victim is a child who has been injured, tortured, or maimed. | 16 |  |
| Oregon | Aggravaled murder. | 18 |  |
| Pennsylvania | First-degree murder. | None specified |  |
| South Carolina | Murder with statutory aggravating circumstances. | None specified |  |
| South Dakota | First-degree murder; kidnaping with gross permanent physical injury infllcted on the victim; felony murder. | 10 |  |
| Tennessee | Flrst-degree murder. | 18 | 5 |
| Texas | Murder of a public safety officer, fireman, or correctional employee; murder during the commission of specified felonies (kidnaping, burglary, robbery, aggravated rape, arson); murder for remuneration; multiple murders; murder during prison escape; murder by a State prison inmate. | 17 | $S$ |
| Utah | First-degree murder; aggravated assault by prisoners involving serious bodily injury. | 14 | : |
| Virginia | Murder during commission or attempts to commit specified felonies (abduction, armed robbery, rape); contract murder; murder by a prisoner while in custody; murder of a law enforcement officer; multiple murders; murder of a child under age 12 during an abduction. | 15 |  |
| Washington | Agyravated first-degree premeditated murder. | None specified |  |
| Wyoming | First-degree murder Including felony murder. | 16 |  |
| Note: This information was compiled by the National Coalition to Abolish the Death Penalty through a survey of legislation in the 50 States. The survey was conducted between November 1990 and August 1991. In the table, "S" indicates that such a provision is provided expressly by statute. Statutes should be consulted for the full text and meaning of specific provisions. The following States do not have statutory provisions for sentences of death: Alaska, Hawall, Jowa, Kansas, Maine, Massachusetts, Michigan, Minnesota, New York, North Dakota, Fhode Island, Vermont, West Virginia, and Wisconsin. <br> ${ }^{\text {a }}$ Capital rape is the forcible rape of a child under the age of 14 by a person age 18 or older. <br> Source: Natlonal Coalition to Abolish the Death Penalty, 1991 Survey of State Legislation (Washington, DG: National Coalition to Abolish the Death Penalty, 1991), pp. 3-68. Note: The U.S. Parole Commission conducts parole hearings for 24,000 inmates currently in the custody of the Federal Bureau of Prisons and exercises furisdiction over 22,000 Federal parolees (Source, p.i). The hearing examiner's workload consists of in-person hearings and record reviews. At an In-person hearing, the offender appears before the examiner and can introduce additional information for consideration. At a record review, only information contained in the prisoner's case file is considered. Some data reported as hearings were actually record reviews because the prisoner was serving concurrent Federal and State sentences in a State institution. With implementation of presumptive parole date procedures, "one-third hearings" and "review hearings" have been phased out.
For definitions of Initial hearing, one-third hearing, statutory reviewfinterim hearing, and other terms, and a list of States In regions, see Appendlx 4.

| 1990 | 2,885 | 724 | 570 | 531 | 531 | 529 |

Note: See Note, table 1.123. If probable cause for revocation is established at the local hearing, the parolee may be returned to the institution to await the institutional hearing. A local hearing is not necessary if the parolee has been convicted of a crime committed while under supervision. Data for 1978 have been revised from earlier reports by the Source. For definitions of terms and a list of States in regions, see Appendix 4.

Note: See Note, table 1.123. In 1978, the U.S. Parole Commission adopted a system of guldelines, based on a calculation of parole risk, to ald in the determination of an optimal parole release date. Release decislons may be made either above or below the designated guideline range if warranted by discretionary, statutory, or pollcy considerations. For this table, only discretionary decisions outside the guideline structure are counted as "above" or "below." Thus, decisions to deny parole where the mandatory release date is below the guldeline range, and decisions to grant an effective parole date above the guldeline range due to time needed to develop a suitable release plan or because the minimum sentence is beyond the guideline range, are counted as "within" the parole policy guidelines. Decisions below the guideline range because of policy limitations are excluded from this table (Source, 1981, p. 22). Guidelines are used in revocation hearings in order to establish an eligibility date for "reparole." In addition, cases in which the guidelines developed by the District of Columbia Paroie Board were used as the result of a court order are excluded from this table in 1988.

For definitions of terms, see Appendix 4.

Waiver permitted if child charged with a felony, it child has been twice previously adjudged delinquent for offense which would be a fetony if child were an adult. |
|  | Under 16 | Murder; aggravated murder: attempted murder; attempted aggravated murder; first degree manslaughter; first degree assault; first degree rape; first degree sodomy; first degree robbery. |  |  |  |

Table 1.126
Age and crime restrictions for judicial waiver of juveniles to criminal court
By State, March 1991--Continued

| State | Age at which juvenile can be transferred to criminal court | Crime restrictions |
| :---: | :---: | :---: |
| West Virginia, continued | 16 and older | Waiver permitted if child has committed an oliense of viotence to the person which would he a felony if committed by an adult. Waiver permitted if child has committed an offense which would be a felony if committed by an adutt, if child previously judged delinquent for offense which would be a telony if child were an adult. Waiver required when demanded by the child. |
| Wisconsin | 14 and older | Child charged with first or second degree murder. |
|  | 16 and older | If child alleged to have violated a State criminal law, child or district attorney may request waiver |
| Wyoming | No specific age. | None. |

Note: These data were produced by a computerized search of a database that contains State juverile codes (the Automated Juvenile Law Archive). The search was completed in March 1991. Other related statutes may be found in State criminal codes or rules of juvenile procedurg. No attempt was made to include relevant case law. For the most complete understanding of this complex issue, the Source encourages readers to consult the full text of the relevant statute, For States not appearing in the table no provisions relating to fudicial waiver were located in the juvenile codes. in Nebraska, no waiver provisions exist because the juvenile and criminal courts have concurrent jurisdiction and the prosecutor decides where to file.

Note: This information was collected by the Safer Sociaty Program through a questionnaire mailed to 1,500 juvenile and adult sex-offender treatment programs and service providers. These programs were identified through telephone and mail surveys; contacts with local county, and State sex-offender treatment networks; and consultations.
The information above does not include: services provided for the incest offerder when freated only within the context of the incest family, nonspecialized groups that include sex offenders, or adult sex-cifender self-help pragrams (Source, p. 5).
The categories labeled "court" are those existing in conjunction with the court such as probation or parole offices or school districts. Categories labeled "private" refer to private
nonprofit or private-for-profit agencies or professional service. "Community based, prisonbased" programs are those that are located in halfway houses operated by prison authorities. At the time of the survey, Mississippi did not provide service to either fuvenile or adult sex offenders.

|  | Repeat offense | Mandatory minimum of 2 years, during which no probation, parole, furlough, work ielease, or good time allowed. |
| New Mexico | Noncapital felonies | 1 year sentence enhancement that can't be suspended or deferred. 2 year enhancement if serlous bodily injury. |
| Oklahoma | 1) Assault, battery, or assault and battery with dangerous weapon; 2) Aggravated assault and battery; 3) Burglary in 2nd Degree; 4) Use of firearm or offensive weapon; 5) Grand larceny; 6) Extortion; 7) Fraud; 8) Embezziement against elderiy (age 62 or older) or incapacitated persons. | 30 -day mandatory minimum jail term in addition to subsequent probation; restitution and community service required; fine also may be imposed. Repeat offense against elderly results in 10 -year mandatory minimum for crime with sentence normally exceeding 5 years. Third offense erinancement also created in statute. |
| Pennsylvania | Sets mandatory minimums. Crimes committed by persons under age 60 against person over age 60: |  |
|  | Aggravated assauit | Not less than 2 years |
|  | Rape | Not less than 5 years |
|  | Involuntary deviate sexual intercourse | Not less than 5 years |
|  | Theft by deception | Not less than 12 months (minimum sentence discretion where the court finds justifiable cause and explains in writing). Parole should not be granted until minimum term of imprisonment has been served. |
| Rhode Island | Assaultbatlery of person age 60 or older causing serious bodily injury becomes felony. | Imprisonment not less than 3 years but not more than 20 years, or fine not more than $\$ 10,000$, or both. Mandatory restitutior, and/or community service. |
|  | Assaulthattery by person respnnsible for care of person age 60 or older causing bodily injury becomes felony. | Imprisonment not exceeding 5 years, or fine not exceeding $\$ 2,500$ or both. |
|  |  | Health care faclity also may be fined, not exceeding \$5,000. |
|  | Assaultbattery by person responsibie for care of person age 60 or older causing serious bodily injury becomes ftlony. | Imprisonment mandatory 2 years but not more than 20 years, of fine not more than $\$ 10,000$. Heaith care facility also may be fined not more than $\$ 15,000$. |
| Texas | Aggravated robbery of persun age 65 or older or disabled persen that causes bodily injury or places person in fear of imminent bodily injury or death becomes ist degree felony. | 5 years to lite |
| West Virginla | Assault, battery, or assault during commission of or attempt to commit felony against person age 65 or older. | Sentence mandatory, not subject to probation or suspension. |

Note: This information was collected through a search of State statutes conducted during October and November of 1989 by the National Cenference of State Legislatures. States not listed in the table had no enhancement statule at the time of data collection.

Note: These data were compiled by the National Rille Association of America, Institute for Legislative Action. in addition to State laws, the purchase, sale, and in certain circumstances, the possession and interstate transportation of firearms are regulated by the Federal Gun Control Act of 1968 as amended by the Firearms Owners' Protection Act. Also, cities and localities may have thelr own firearms ordinances in addition to Federal and State laws. The Source notes that State firearms laws are subject to frequent change. State and local statutes and ordinances, as well as local law enforcement authorities, should be consulted for full text and meaning of statutory provisions.

The Source defines "constitutional provision" by citing Article 1, Section 15 of the Connecticut State Constitution as an example of the basic feature contained in the constitutions of many States. It reads: "Every citizen has a right to bear arms in defense of himself and the State."

License to carry in a vehicle either openly or concealed.
${ }^{\text {b }}$ Akansas prohibits carrying "with a purpose to employ it as a weapon agalinst a person." Tennessee prohibits carrying "with the intent to go armed."
Applies to Chicago only, pre-registered firearms. No new handguns may be brought into the city.
${ }^{\mathrm{d}}$ Handguns prohibited in Evanston, Oak Fark, Morton Grove, Winnetka, Willmette, and Highland Park.
${ }^{\theta}$ Certain cities or counties.
${ }^{t}$ Handguns must be presented to the city chief of police or county sheriff to obtain a certificate of inspection.
${ }^{9}$ Loaded.
${ }^{\mathrm{h}}$ Some municipalities control the possession, sale, transfer, or carrying of handguns, e.g., Cleveland and Columbus require a police permit tor purchase; Toledo requires a handgun owner's Identification; Cincinnati requires application for purchase, In addition, some forbid the possession and sale of handguns with a certain magazine capacity, usually 20 rounds pr more.
Prohibits carrying a firearm "with the intent or purpose of injuring another."
${ }_{\text {Applies only to pre-registered firearms. No new handguns may be brought into the city. }}$

Note: These data were collected through a review of the statutory provisions of the 50 States, the District ol Columbla, and Puento Rico.
The evidentiary weight given to blood alcohol concentrathon levels generally falls into one of two categories.
"Presumption at 0.10 percent" indicates that such a level of blood alcohol concentration creates a presumption of intoxication in a court of law. "llegal per se at 0.10 percent" indicates that such a level of blood alcohol concentration is considered conclusive evidence of intoxication in a court of law. Statutory provisiens of several jurisdictions treat the 0.10 percent level as both presumptive and illegal per se evidence of driving under the influence. Thls appears to be the result of States having adopted one of the standards without amending statutes which had previously authorized the other standard. In such cases, the actual
statutes should be consulted for cierification. "Open container laws" refer to laws prohibiting the possession of open containers of alcoholic beverages in the passenger compartment of a motor vehicle. "Anti-consumption laws" refer to laws prohibiting the consumption of alcoholic beverages in the passenger compartment of a motor vehicle. "Dram shop laws" refer to laws which make owners of drinking establishments civilly liable for serving alcohol to an Intoxicated patron who then goes out and injures another individual in a motor vehicle accident. la the table, " S " indicates that such a provision is provided expressly by statute, In all jurisdictions, use of a controlled substance or use of a controlled substance in conjunction with alcohol also constitutes the basis for a driving while intoxicated charge. Statutes should be consulted for the full text and meaning of specific provisions.

Statutory provisions authorizing blood alcohol concentration tests for persons suspected of driving whille intoxicated, and sanctions for refusal to take such tests

By jurisdiction, as of Jan. 1, 1992--Continued

Note: See Note, table 1.130. The blood alcohol concentration level of persons suspected of driving while intoxicated is generally determined through the administration of either preliminary breath tests or chemical blood, treath, or urine tests. "Preliminary breath tesis" are administered at the site of a traffic stap and are used for screening purposes in determining the need to arrest and the need to conduct further blood alcohol concentration tests. "Chemical tests," authorized under "implied consent laws," are typically administered after arrest (see table for exceptions) and are used to obtain admissible evidence of intoxication (U.S. Department of Transportation, National Highway Traftic Safety Administr-tion, Alcohol and Safety Laws: A NaIlanal Overvlew, 1981 (Washington, DC: USGPO, 1982), pp. 1 3.9). "Implied consent laws" provide that "any person who operates a motor vehicle upon a public highway is deemed to have given consent to a chemical test or tests of his or her blood, breath, or urine for the pur :ose of determining the blood alcohol content" (U.S. Department of Transponation, National Highway Traffic Safety Administration, Alcohol and Highway Safety Laws: A National Overvlew, 1981 (Washington, DC: USGPO, 1982), p. 9). "Criminal" sanctions refers to fines and/or jail sentences whereas "adminnstrative licensing action" reters to suspension or revocation of license. In the table, "S" indicates that such a provision is provided expressly by statute. Statutes should be consulted for the full text and meaning of specific provisions.
${ }^{\text {a }}$ Eased upon a reasonable suspicion of a driving while intoxicated offense.
${ }^{5}$ A law enforcement officer can request a driver to submit to a chemical test if the driver has been arrested for a driving while intoxicated offense, it the driver has been involved in a fatal accident, or if there is "reasonable cause to believe" that the driver is intoxicated or has a blood alcchol concentration level of 0.10 or more.
${ }^{c}$ A proliminary breath test may be conducted without legislative guthority.
${ }^{\text {Although arrest is not required, police must have "probable }}$ cause."
${ }^{\text {e }}$ Unclear, but probably not
${ }^{\text {t}}$ Provides onfy for the testing of urine.
${ }^{9}$ An arrest is not required if there is "reasonable grounds" to believe that a person was driving while intoxicated and they were involved in an accident that resulted in either serious injury or death.
The police need oniy "reasonable grounds" of driving while intoxicated offense before the implied consent law is applicable. However, a subsequent statule appears to indicate that "probaple cause ${ }^{n}$ is needed.
Gefore the preliminary breath test can be given, a law enforcement officer must have probable cause to believe that the driver is violating the driving while intoxicated law. The test is given prior to an actual driving while intoxicated arrest for the purpose of assisting the officer in determining whether to require a chemical (evidensiary) test under the implied consent law. ${ }^{1}$ A person responsible for an accident that resulted in either an injury or death may be asked to submit to a chemical test under the implied consent law based only on "probable cause." ${ }^{k}$ Limited to an accident in which there has been a death or a serious bodily injury likely to cause death.
A law enforcement officer only needs "reasonable grounds" and
any one of the following: ( 1 ) a driving while intoxicated arrest; (2) an accident resulting in injury or death; (3) a preliminary breath test refusal; (4) a prellminary breath test reading of 0.10 percent; or (5) a preilminary breath test reading of less than 0.10 percent but the officer has reasonable grounds that the driver was under the influence of drugs or drugs and alcohol
${ }^{m}$ No arrest is required if the person has been Involved in a moter vehicle accident resulting in property damage, injury, or death
The law uses the term "detained" instead of "arrested."
${ }^{\text {O}}{ }_{\text {A restricted/hardship license may be issued. }}$
A driver commits a gross misdemeanor if they refuse to submit to a chemical test and they have had a previous license revocaHion (either once in 5 years or twice in 10 years) for elther: (1) refusal to submit to an implied consent test; (2) an administrative per se violation; (3) a driving whille intoxicated offense conviction; or (4) a conviction for vehicle homicide.
Police only need reasonable grounds and probable cause of driving while intoxicated.
'Only "reasanajle grounds" are needed not an arrest.
Sonly "reasonable grounds" seem to be required.
The law only authorizes these tests in those situations where a driver has been involved in an accident and has committed a traffic law violation. A violation could include other offenses as well as driving while intoxicated.
${ }^{4}$ An arrest is not required in all situations. If a preliminary breath est indicates that alcohol has been consumed, a request to submit to a chemical test under the implied consent law may be made without the need of a formal arrest.
If criminal process for the driving while intoxicated offense has been issued arrest is not required.
The implied consent law would seem to indicate that an airest is necessary belore licensing sanctions for refusal could be imposed. However, a recent court decision appears to hold that only "reasonable grounds" not an actual arrest is all that is needed. See Magill v. Com., 522 A. 2 d 172 (Pa. Crnwlth. 1987). ${ }^{x_{A}}$ driver's license is not subject to revocation for refusal to submit to a chemical test under the implied consent law if the driver pleads guilty to a driving while intoxicated offense and such plea occurs either (1) prior to a licensing agency hearing on the refusal issue, or (2) if a hearing is not requested, prior to a revocation order belng issued.
If a driver refuses to submit to a chemical test and the police officer had "reasonable grounds to believe" that the driver was driving while intoxicated, the State may proceed to suspend/revoke the driver's license.
${ }^{2}$ A blood sample may be requested (1) if breath testing equipment is not avallable to determine alcohol content; or (2) if the law enforcement officer believes that the driver was under the influence of drugs.
${ }^{\text {aa }}$ If there is an injury likely to cause death, a person may be compelled to submit to a test for drugs as well as alcohol. If a person pleads guilty to a driving whila intoxicated offense within 10 days of arraignment, the license suspension for refusal shall not take effect.

Note: See Note, table 1,130, "The sanctions listed for convictions of alcohol driving offenses. . . are those specified by statute. If a sanction is not specified by law. . . It is not listed," (U.S. Department of Transportation, National Highway Traffic Safety Administration, Digest of State Alcohol-Highway Safety Related Leglslatlon, January 1983 (Washington, DC: U.S. Department of Transportation, 1983), pp. 1, 2.) Imprisonment refers to both jall sentences and prison sentences. "The term 'mandatory sanction' means either a criminal sanction or an administrative licensing action which must be imposed by either a court or administrative agency" (Source, p. 1-2). Because of variation among the jurisdictions within categories of sanctions, e.g., terms of imprisonment or amounts of fines, the Source document as well as individual jurisdictions' statutes should be consulted. Statutes should be consulted for the full text and meaning of specific provisions. Unless atherwise stated, the sanctions are the same for all alcohol and drug driving offenses (e.g., driving while under the influence of either alcohol or drugs, illegal per se, etc.).
$\mathrm{a}_{\text {In lle }}$ of fail for a driving while intoxicated conviction.
${ }^{\mathrm{b}}$ Consecutively.
${ }^{\text {c }}$ Suspended.
${ }^{\circ}$ Revoked.
${ }^{\mathbf{e}} 48$ hours must be served consecutively.
${ }^{\prime}$ May not apply to certain offenders who have been suspended pursuant to the administrative per se law.
$\mathrm{G}_{\text {Not necessarily served consecutively, the sanctions are for non-injury offenses. }}$
$\mathrm{h}_{48}$ consecutive hours or to days of community service became mandatory when the Department of Motor Vehicles certified that an application for 23 USC 408 grant funds had peen submitted to the U.S. Department of Transportation.
Mandatory sanctions for driving while under the influencefillegal per se offenses.
Applies only to first filegal per se convictions.
${ }^{\text {K }}$ Mandatory community service regardless of whether there is a mandatory imprisonment sanction.
"House arrest" or the use of an "ignition interlock" device may be ordered in lieu of a jail sentence.
"It appears that a court may order the use of an "ignition interlock" device in lieu of mandatory licensing action.
The court must sentence defendants to at least one of these sanctions but may sentence them to more than one such sanction.
${ }^{\circ}$ Must serve at least 48 consecutive hours.
$\mathrm{P}_{\text {Not more }}$ than 200 hours of community service in lieu of the fine.
${ }^{G}$ This sentence may not be suspended; however, the statute is silent as to probation.
${ }^{r_{A}}$ person may be issued a restricted license not withstanding this revocation if certain conditions are met.
${ }^{5}$ Followed by work release for 3 days.
${ }^{1}$ Followed by work release for 88 days.

$\mathrm{u}_{\text {Home incarceration is possible. }}$
"Provided the defendant either (1) had a Blood Alcohol Content (BAC) level of 0.15 or more; (2) was driving 30 MPH over the speed limit and had a BAC level of 0.08 or more; (3) was eluding a police officer and had a BAC level of 0.08 or more; (4) refused to submit to a chemical test; or (5) was driving with a passenger under 16 years old.
WTemporary restricted license may be issued only for the purpose of attending either an alcohol education or treatment program.
${ }^{x}$ Or 14 days in a treatment facility.
${ }^{W}$ Work release is available for this period of time.
$\mathrm{z}_{\text {Possible. }}$
${ }^{2 a}$ In lieu of imprisonment for 30 days, 8 hours of community service may be substituted for each day less than 30 days that the person would have served in jall.
${ }^{a}$ Applies only to Driving While Intoxicated oftenses.
${ }^{\text {ac }}$ Does not apply to illegal per se offense; this sanction only applies to "regular" driving while intoxicated offenses.
${ }^{20}$ Must serve 48 consecutive hours; daes not apply to illegal per se offenses.
${ }^{a \theta}$ This revocation may not be mandatory if the defendant meets certain eligibility requirements for and does participate in a driver rehabilitation or improvement program.
at One day imprisonment or 24 hours of community service if rehabilitation is taken.
$\mathrm{ag}_{5}$ days if rehabilitation is taken; 48 hours must be served consecutively.
${ }^{\text {ah }}$ Three consecutive 24 hour periods in a house of correction and seven consecutive 24 hour periods in a driving while intoxicated detention center.
${ }^{2}$ Mandatory treatment of not less than 12 or more than 48 hours; this time is to be spent in an intoxicated driver resource center.
a) Not more than 90 days as an alternative to imprisonment.
ak The law states that the right to operate a motor vehicie is "forfited."
${ }^{\text {a }}$ If there is no imprisonment sanction, the defendant must serve either 48 consecutive hours of inpatient rehabilitation/treatment or 10 days of community service.
amplus th: following mandatory surcharges: first offense $-\mathbf{-} \$ 50$; second offense-- $\$ 100$; and third offense--\$200.
an Could be 5 years under the habitual offender law.
${ }^{20}$ As a part of probation.
${ }^{\text {ap }}$ Applies to driving while intoxicated offenses that are not related to injury or death.

Note: State and Federal controlled substances acts (CSA's) regulate the possession, use, sale, distribution, and manufacture of specified drugs or categories of drugs and establish penalties for CSA violations. The information in this table summarizes the major elements of each State CSA. The data are derived from published State codes and the most recent code supplements available as of December 1990.

There are three types of "forfeiture." Civil forfeiture involves government action to take possession of property cornected with illegal activity, independent of criminal action against any individual. Property subject to civil forfeiture may include instrumentalities of illegal trade; property exchanged or intended to be exchanged for drugs; proceeds traceable to an illegal drug exchange; and money, negotiable instruments, and securities used or intended to be used to facilitate drug laws viclations, Criminal forfeiture involves government action to take possession of an individual's property upon conviction for a criminal offense. A convicted individual's profits from, and interests in, a continuing criminal enterprise, as well as property or contractual rights that afford a source of income over the enterprise, may be subject to forfeiture. Administrative forieiture involves government action to have property and proceeds forfeited to the government without judicial process.

Under the Federal CSA, property with a value up to $\$ 100,000$ may be forfeited administratively; in State CSA's authorizing administrative forteiture, other ceilings may be set.
"Paraphernalia" includes any equipment, product, or material of any kind that is intended or designed primarily for use in manufacturing, compounding, converting, concealing producing, processing, preparing, injectirig, inhaling, or otherwise introducing into the human body a controlled substance. In some CSA's "paraphernalia" also may include kits used, intended for use, or designed for use in planting, propagating, cultivating, growing, or harvesting of any species of plant that is a controlled substance or from which a controlled substance can be derived. "Imitation drugs" are non-controlled substances, which, by dosage unit; appearance including color, size, shape, and markings; and representations made, would lead a reasonable person to belleve that the substance is a controlled substance. Imitation controlled substances also are called "look-alike" drugs. Analogs refer to slustances that have a chemical structure substantially similar to the chemical structure of a controlled substance in schedule I of the Federal CSA; that have a stimulant, depressant or hallucinogenic effect on the central nervous system that is substantially similar or greater than the stimulant, depressant, or hallucinogenic effect on the central nervous system

of a controlled substance in schedule for $l$ of the Federal CSA, Analogs also are called "designer drugs." A safe house (also called rock house) is any place, including buildings, rooms, or enclosures, maintained, managed, or controlled for the purpose of manufacturing, distributing, or using any controlled substance. "Schoolyards" refers to provisions in the Federal CSA and some State CSA's that prohibit the manufacture, distribution, or use of illegal drugs within a specified distance from a public or private elemientary, vocation, or secondary school or a public or private college, junior college, or university. "Triplicate prescriptions" indicates that a State has provisions requiring the use of triplicate prescription forms for certain drugs. Precursor chemicalsfíngredients are principal compounds used, or produced primarily for use, in the manufacture of a controlled substance; an immediate chemical intermediary used or likely to be used in the manuiacture of such controlled substance.

## Section a

## Public attitudes toward crime and criminal justice-related topics

Surveys of public opinion focusing on criminal justice topics are conducted periodically in the United States. These surveys are conducted by public opinion research organizations for political campaigns or in general social surveys; others are conducted for governmental agencies or commissions concerned with specific problems. Selected populations such as high school seniors or college students have been the focus of some opinion surveys. In this edition, the results of a drug survey of fifth and sixth graders and a survey of drug use and testing among U.S. military personnel are also featured. Results from a variety of public opinion polls, examining attitudes toward particular social problems are presented in this section.

Public attitudes about problems facing the country and the public schools; public confidence in selected institutions such as the police, courts, and the U.S. Supreme Court; and atitudes toward the honesty and ethics of lawyers and police officers are presented in this section. Knowledge of police brutality and public attitudes regarding police use of force have been examined. Also examined through recent public opinion surveys are victims' rights, criminals' right to profit from their stories, vigilantism, and public support for Federal anti-drug efforts. Perceptions of changes in the level of crime in one's own area and the country as a whole are presented as are attitudes toward crime reduction measures and perceived personal safety. Also presented are opinions on the severity of courts and the level of spending on crime reduction efforts and the drug problem. Attitudes regardi y punishment responses, including the death penalty for murder and drug trafficking are provided. Issues surrounding firearms, e.g., possession, sale, and registration, have been examin-ed through opinion surveys and are presented as well. In addition, opinions of warrantless searches of drug dealers' homes and confiscation of automobiles when drivers are found in possession of drugs are examined. High school seniors' attitudes and beliefs about social problems, crime and violence, performance of the police and courts, harmfulness of drug use, and the legalization of marihuana are provided. Aititudes of college freshmen regarding marihuana legalization are included; as are their beliefs about criminals' rights, capital punishment, gun control, and AIDS testing. Attitudes of fifth and sixth graders have been examined in terms of knowledge about drugs, perceived prevalence of drugs, and respondents' intentions to try drugs in the future. Finally, public atti-
tudes about driving while intoxicated, pornography, child abuse, and legalized prostitution are examined.

When available, survey results are broken down by demographic characteristics of respondents--such as age, sex, race, income, and occupation--enabling comparisons across important social dimensions. Finally, because some questions have been asked repeatedly, many trend tables have been constructed by Sourcebook staff and are presented.

Two appendices are included which outinie survey sampling procedures, methodology, and definitions of terms used in the surveys. Appendix 5 describes procedures used in The Gallup Poll, the Gallup/Phi Deita Kappa Education Poll, the Harris Survey, and the Media General/Associated Press Poll. Also included in Appendix 5 is a description of the General Social Survey (GSS) conducted by the National Opinion Resezich Center. The GSS is an annual survey of a national probability sample that has been conducted each year since 1972 (with the exception of 1979 and 1981). Appendix 6 describes a series of surveys focusing on the behaviors and attitudes of high school seniors and young adults. The Monitoring the Future Project provides data from nationwide surveys of high school seniors conducted annually since 1975 by the Institute for Social Research at the University of Michigan. These surveys report on the attitudes of high school seniors and young adults toward drinking and drug use.

Readers should be aware that many factors, including slight differences in the wording of survey questions, may have significant effects on survey responses. In addition, the margin of error for survey results, presented in Appendix 5, may vary slightly between surveys. Thus, attontion to the exact wording of questions and the appropriate estimate of error, should always accompany comparisons.

Respondents' ratings of components of the criminal justice system
United States, 1991 ${ }^{\text {a }}$
Question: "Based on your experience and what you have heard, how would you rate the ... that serve your community in accomplishing their part of the criminal justice mission -. excellent, good, only fair, or poor?"

|  | Excellent | Good | Only fair | Poor | Not sure |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Police | $16 \%$ | $48 \%$ | $25 \%$ | 9\% | $2 \%$ |
| Prosecutors | 7 | 41 | 31 | 13 | 9 |
| Judges | 8 | 37 | 31 | 17 | 7 |
| Prisons | 5 | 27 | 28 | 26 | 14 |
| Parole boards | 3 | 19 | 30 | 27 | 21 |

Note: These data are from a survey conducted in March 1991 by Shulman, Ronca and Bucuvalas, inc. (SRBi) for the National Victim Center. The survey instrument was constructed by the National Victim Center, and SRBI collected, processed, and tabulated the survey results. The results are based on a national cross-sectional sample of 1,000 adults contacted by telephone. In order to select the sample, the adult household population of the country was siratified by region, and within each stratum, counties were selected as primary sampling units. Telephone numbers were randomly selected from each primary sampling unit using random digit dialing procedures. One adult respondent, aged 18 or older, was selected within bach household sampled using systematic selection procedures, Any non-residential contacts were screened out of the survey.

Table 2.21
Attiludes toward the level of spending to halt the rising crime rate
By demographic characteristics, United States, selected years 1980-91 ${ }^{\text {a }}$
Question: "We are faced with many problems in this country, none of which can be solved
easily or inexpensively. I'm going to name some of these problems, and for each
one l'd like you to tell me whether you think we're spending too much money on it,
too little money, or about the right amount. First (halting the rising crime rate) are
we spending too much, too litte, or about the right amount on (halting the rising
crime rate)?"

Attitudes toward the level of spending to deal with drug addiction
By demographic characteristics, United States, selected years 1280-91 ${ }^{\text {a }}$
Question: "We are faced with many problems in this country, none of which can be solved
easily or inexpensively, l'm going to name some of these problems, and for each one I'd like you to tell me whether you stink we're spending too much monay on it,
too litite money, or about the right amount. First (dealing with drug addiction) are
we spending too much, too little, or about the right amount on (dealing with drug addiction)?"

Table 2.31
Respondents reporting what they would do if they saw or knew about selected wrongdoings

United States, 1990
Question: "When they see or know of wrongdolings by others some people feel they should report it so that someone can try to do something about it. Others feel it is better not to get involved--elther because it isn't their business or because they feel it wouldn't do any good. I'm going to name some different situations, and for each one would you tell me whether it is something you would be likely to report or not?"

If you saw someone's purse
being snatched on the street,
do you think you would be likely
to try and call a policeman or to
stay out of it?
If you worked at a company and knew that its management was mishandling the employees' pension fund, would you be likely to report it to someone you think could do something about it, or stay out of ft ?

If you worked at a company and knew that its management was withholding product safety information from consumers, would you be likely to report it to someone you think could do something about ti, or stay out of it?

If you knew a relative's son or daughter was using drugs, would you be likely to tell the parents or stay out of it?

If you worked in a store and know
that a fellow employee was occasion-
ally taking home merchandise, would you be likely to report it to man-

| agement or stay out of it? | 60 | 22 | 14 | 4 |
| :--- | :--- | :--- | :--- | :--- |

If you knew someone was cheating on his income tax, would you be likely to report it to the tax authoritles or stay out of it?

Note: These data are derlved from interviews conducted among a sample of adult Americans on two separate occasions. The surveys were designed and analyzed by Princeton Survey Research Associates Inc. (PSRA) for the Times Mirror Center for The People and The Press. The field intervlewing for the survey was done by fesponse Analysis Corporation under the supervision of PSRA. Personal intervlews were conducted among a nationally-representative sample of 3,004 adults, Interviews were conducted during the perlod of May 1-31, 1990. A random sample of 1,000 respondents was re-interviewed by telephone during the period of Aug. 19-25, 1990. The sample used for this survey is a multi-stage area probability sample consisting of 100 Primary Sampling Units and 1,600 Secondary Sampling Units based on 1980 U.S. Bureau of the Census data. For this survey, interviewing was conducted in 193 sampling locations. These locations were stratified into community strata of three different sizes. Specific blocks within each location were sampled, and adult respondents were selected using systematic techniques. Weighting procedures were used to reduce sample blas that might occur because of underrepresentation of persons who are difficult to find at home. (Times Mirror Center for The People and The Press, "The People, The Press and Politics 1990", Washington, DC: Oct. 11, 1990. (Mimeographed.) Pp. 90-92.)

Note: These data are from a series of nationwide surveys of hlgh scheol senlors conducted Source: Lloyd D. Johnston, Jerald G. Bachman, and Patrick M. O'Malley, Monttoring the by the Survey Research Center of the Institute for Social Research from 1975 through 1991. The survey design is a muttistage random sample of high school sentors in public. and private schools throughout the continental United States. All percentages reported are based on weighted reases; the N's that are shown in the tables refer to the number of weighted cases.

Response categories were "never," "seldom," "sometimes;" and "often." Readers interested in responses to this question for 1975 through 1978 should consult previous editions of SOURCEBOOK. For survey methodology and definitions of terms, see Appendix 6.

Note: See Note, table 2.57. Data are given for those who identify themselves as White or Caucasian and those who ideniffy themselves as Black or Afro-American because these are the two largest racial/ethnic subgroups in the population. Data are not given for the other ethnic categorles because these groups coniprise less than 3 percent of the sample in any given year (Source, 1982, p. 9). "College plans" distinguishes those sentors who expect to graduate from a 4 -year college from those who expect to receive some college training or none. The four drug use categories are based on an index of seriousness of Involvement. The "pills" category indicates use of any of a number of drugs including some that usually are not taken in pill form. Respondents indicating the use of one or more of a number of llicit drugs but who had not used any one class of them on three or more occasions and did not use heroin al all fall thio the "few pills" category. Respondents indicating such use on three or more occasions and did not use heroin at all fall into the "more pilis" category. Respondents reporting heroin use were included in a separate category that is not presented here due to the small number of respondents indicating such use. (Source, 1982, pp. 8, 9, 14.)

Response categories were "never," "seldom," "sometmes," and "often." Readers interested in responses to this question for 1975 through 1978 should consult previous editlons of SOURCEBOOK. For survey methodology and definitions of terms, see Appendix 6.

High school seniors reporting positive attitudes toward the performance of the courts and the fustice system in general

By sex, race, region, college plans, and llicit drug use, United States, 1979-91
Question: "Now we'd like you to make some ratings of how good or bad a job you fesl each of
the following organizations is doing for the country as a whole. ... How good or
bad a job is being done for the country as a whole by. . . all the courts and the jus-
tice system in general?"
(Percent responding "good" or "very good")

Note: These data are from a series of nationwide surveys of high school seniors conducted by the University of Michigan's Institute for Social Research for the National Institute on Drug Abuse from 1975 through 1991. The survey design is a multistage random sample of high school seniors in public and private schools. Depending on the survey year, from 66 to 80 percent of the schools initially invited to participate agreed to do so. Completed questionnaires were obtained from 77 to 84 percent of all sampled students in participating schools each year. All percentages reported are based on weighted cases; the $N$ s that are shown in the tables also refer to the number of weighted cases. "Crack" is a highly potent and addictive form of cocaine Alcohol and cigarette use are included in selected tables. Feaders interested in responses to this question for 1975 through 1978 should consult previous edt-
tions of SOURCEBOOK. For survey methodology and dezinitions of terms, see Appendix 6.
${ }^{\text {a }}$ Answer alternatives were: (1) no risk, (2) slight risk, (3) moderate risk, (4) great risk, and (5) can't say, drug unfamiliar.

Table 2.70
College ireshmen reporting that marihuana should be legalized
By sex, United States, 1968-91
(Percent indicating "agree strongly" or "agree somewhat")

Note: The Cooperative Institutional Research Program Freshman Suvey is conducted annually by the Higher Education Research Institute (HERI) at the University of California, Los Angeles. Each fall, the HERI surveys approximately 200,000 full-time students entering the freshman classes from a nationally-representative sample of two-year and four-year colleges and universities in the United States. From 1968 to 1970, approximately 15 percent of the Nation's institutions of higher education were selected by sampling procedures to participate in the program. Beginning in 1971, a stratified sample was selected from all institutions that have entering freshman classes and that respond to the U.S. Department of Education's Higher Education General information Survey. An institution is considered eligible if it was operating at the time of the survey and if it had a freshman class of at least 25 students. The data presented above are weighted estimates of all first-lime, full-time sudents entering higher education institutions in the fall of each year. Response categories were "agree strong ly," "agree somewhat," "disagree somewhat," and "dlsagree strongly." The text or format of the questions or responses may differ slightly in different years.

Table 2.77
Fith and sixth graders' knowledge of drug use
By type of drug, United States, 1990
Questions: "Do you know any adults or older kids who have tried or who use. . ? Do you know any kids your own age who have tried or who use. . .?"

| Type of drug | Adults or <br> older kids | Klds your <br> own age |
| :--- | :---: | :---: |
| Bear | $77 \%$ | $34 \%$ |
| Wine or llquor | 64 | 26 |
| Marihuana | 15 | 5 |
| Cocaine or crack | 10 | 2 |
| Ice | 3 | 2 |
| Ecstasy | 1 | 1 |

Note: These data are from a national telephone survey conducted by NFO Research, Inc. for Edelman Public Relations. Households were selected from NFO's nationally-representative panel of 250,000 households. This panel was selected to be comparable to U.S. Bureau of the Census data in its distribution of geographic reglon, market size, age of household head, household size, and househoid income. A total of 500 Interviews were conducted with filth or sixth grade children in NFO panel households. Prior to telephoning, a letter was mailed to
1,700 panel members with children between the ages of 10 and 12. The letter explained the purpose of the study and the areas of questioning and asked for cooperation with the study. Five hundred interviews, evenly divided between lilith and sixth graders, were conducted between Apr. 20 and May 2, 1990. Students who had participated in the Drug Abuse Resistance Educatlon (DARE) program, a preventive education program for school children, were not interviewed. Interviewed households were regionally and demographically comparable to total U.S. househoids with children between the ages of 10 and 12. These data are estimates derived from a sample and therefore subject to sampling variation.
$\mathrm{a}_{\text {lce is a smokable form of methamphetamine. }}$
Ecstasy is the street name for MDMA, an illegal stimulant with hallucinogenic properies.

| Urinalysis testing reduces drug use in the military | 75.9 | 74.9 | 80.7 | 80.0 | 71.4 |
| Urinalysis tests are rellable | 41.2 | 43.6 | 44.1 | 43.2 | 35.1 |
| Emphasis on detection and discipline in my Service's drug program hurts morale | 14.9 | 17.0 | 17.2 | 15.5 | 10.2 |

Note: These data are derived from the 1988 Worldwide Survey of Substance Abuse and Health Behaviors Among Military Personnel conducted by the Research Triangle Institute. The 1988 survey is the fourth in a series of surveys of military personnel conducted in 1980, 1982, 1985, and 1988. The sampling design for the 1988 survey was a stratified, two-stage probability sample. The eligible population for the survey consisted of all active-duty military personnel except recruits, service academy students, persons absent without leave, and persons who had a permanent change of station at the time of data collection. The first-stage sample consisted of military installations (and associated units clustered with the installations based on geographical proximity) for each branch of service located in four broad reglons of the world (Americas, North Pacific, Other Pacific, Europe). The second-stage sample consisted of military personnel stationed at the selected first-stage installatlons who were randomly selected within pay grades. For 1988, usable questionnaires were obtained from
18,673 military personnel, and the overall response rate among those eligible for the study was 81.4 percent. These data are estimates derived from a sample and therefore subject to sampling varlation.

## Section 3

## Nature and distribution of known offenses

The data presented in this section describe the nature and extent of criminal activity. There are essentially three ways in which the level of crime is measured--through officially recorded data, victimization surveys, and through self-reports of criminal involvement. Because it is well known that many crimes are not reported to the police, surveys of the population and selected subgroups have been utilized to provide an additional perspective on the extent of criminal activity. Two methods have been most commonly used: (1) surveys of households and businesses to determine the rate of victimizations and characteristics of victims of criminal acts and (2) surveys of the general population to determine the proportion and characteristics of persons who have committed criminal offenses. The former are known as victimization surveys, while the latter involve selfreported criminal activity.

This section begins with information presented from the National Crime Victimization Survey (NCVS), which is conducted for the Bureau of Justice Statistics by the U.S. Bureau of the Census. The NCVS is a national probability survey of households in the United States. Detailed information is provid ed on the extent and nature of completed and attempted crimes, frequency of occurrence, characteristics of victims and offenders, victim-offender relationships, the circumstances surrounding criminal incidents and their impact, associated economic costs, and reasons for reporting and not reporting crimes to the police.

In addition to the presentation of general NCVS findings, this edition features data from the School Crime Supplement conducted in conjunction with the 1989 NCVS. These tables focus on victimization experiences at school, drug and alcohol availability at school, participation in drug education, and the presence of gangs at school. Also featured in this edition are trends in victimization across several major offenses as well as trends in reporting victimization experiences to the police.

The next segment includes information from the Monitoring the Future Project. This project conducts a series of nationwide surveys of high school seniors. Information on victimization experiences and involvement in delinquent activities is gathered aniuually. This segment also contains information derived from surveys on drug use and related attitudes of high school seniors, college students, and young adults in the United States. Data are presented on most recent use of alcohol, cigarettes, and drugs. Drugs examined include marihuana, cocaine, crack,
heroin, inhalants, sedatives, stimulants, tranquilizers, hallucinogens, and steroids.

Also included in this section is information on drug use by U.S. military personnel and data derived from the 1990 and 1991 National Household Survey on Drug Abuse. Information is presented on drug use among the Nation's population age 12 and older. Prevalence and recency of use figures are presented for various types of drugs as well as needle use. Data are also presented on reported problems associated with alcohol, drug, and cigarette use. Also featured this year are data from the Drug Abuse Warning Network (DAWN) focusing on drug abuserelated emergency room episodes. In addition, data derived from the Gallup Poll on alcohol use and related problems are included. Finally, information is presented on alcohol-related motor vehicle accidents.

The final part of this section presents data on officially recorded crime figures. The Federal Bureau of Investigation collects information on crimes known to the police through its Uniform Crime Reporting (UCR) Program. Nationwide data on crimes are collected and tabulated by city, county, Metropolitan Statistical Area, population group, and geographic division. Offense characteristics and situational factors of violent crime, property crime, and the eight index offenses are presented. included among the situational factors are type of target, type of weapon used, victimoffender relationship, circumstances of the offense, demographic characteristics of the victim (i.e. sex, race, age), offender characteristics, and place and time of occurrence. Also, data are presented for the 50 States and large U.S. cities on the involvement of guns in violent crime.

Also included in this section is information on motor vehicle thefts and Federal bank robberies. In addition, this section contains information on the number of law enforcement officers who were assaulted and killed in the United States. Data are presented on the circumstances at the scene of the incident, type of assignment, selected characteristics of officers (i.e. race, sex, age, length of service), persons identified in the killing of law enforcement officers, and the type of weapon used. Information is also provided on prison staff killed by inmates.

This section concludes with information presented on explosives incidents, loss due to incendiary or suspicious fires, casualties resulting from international terrorism, criminal acts involving aviation, and Federal Crime Insurance policies.

Note: The National Crime Victimization Survey (NCVS) is conducted for the Bureau of Justice Statistics by the U.S. Bureau of the Census. These estimates are based on data derived from a continuous survey of a representative sample of housing units in the United States. Approximately 47,000 housing units, inhabited by 95,000 individuais age 12 and older, partic/pated in the survey. For 1990, 97 percent of all ellgible housing units took part in the NCVS. For survey methodology and definitions of terms, see ippendix 7.

Note: These data are based on city, suburban, and rural victiml- are based on the size of the core city area of an MSA as opposed zations reported to the National Crime Victimization Survey (NCVS) from 1973-89. The NCVS, conducted for the U.S. De partment of Justice, Bureau of Justice Statistics by the U.S. Bureau of the Census, is an ongoing survey of approximately 114,000 persons age 12 and older, interviewed twice a year in about 52,000 households. These data are estimates derived from a sample and therefore subject to sampling variation. City household's are in more densely populated areas, classified by the U.S. Bureau of the Census as the core of Metropolitan Statistical Areas (MSA). Suburban households are in less densely populated areas outside the central city but within the MSA Rural households are those in less densely populated areas to the entire population of an MSA. This was done to be consist ent with the NCVS annual reports published by the Bureau of Justice Statistics. For this reason, yearly rates in this table may slightly differ from the average annual yeariy rates for 1987-89 presented In tables 3.5, 3.6, 3.34, and 3.62. For survey methodology and definitions of terms used in the National Crime Victimization Survey, see Appendix 7.

Note: These data are based on victimizations reported to the National Crime Victimization Survey (hưVS) from 1979-88. The NCVS is conducted for the U.S. Department of Justice, Bureau of Justice Statistics by the U.S. Bureau of the Census, and is an ongoing survey conducted since 1973. Data for the National Crime Victimization Survey are drawn from a nationally-representative sample of the United States population. The NCVS conducts interviews twice a year in a sample of approximately 50,000 households. Household members aged 12 and older are interviewed. Data for $1985-88$ accounted for 1.9 million violent victimizations experlenced by 28.1 million teenagers during each year. These data are estimates derived from a sample and therefore subjact to sampling variation. For survey methodology and definitions of terms used in the National Crime Victimization Survey, see Appendix 7.

Note: See Note, table 3.7. A revised National Crime Victimization Survey questlonnaire was introduced in July 1986. New response categories were added to a number of questions including those dealing with place of occurrence of the
crime. These new categories have been combined to make the data comparable to that which was collected prior to July 1986. For survey methodology and definifions of terms used in the National Crime Victimization Suryey, see Appendix 7.
${ }^{2}$ Percents may not sum to 100 because of rounding.
${ }^{\mathrm{b}}$ Excludes personal larcenies with contact occurring at or near home. Personal larcenles without contact, which comprise most crimes of theft, cannot by definition occur at or near home.
${ }^{c}$ Excludes school playgrounds, which are classified as on school property.

| Completed | 1,226,990 | 100 | 22.8 | 68.9 | 22.2 | 30.7 | 16.1 | 8.3 |
| Attempted | 740,550 | 100 | 16.4 | 72.6 | 21.2 | 38.5 | 13.0 | 11.0 |

Note: See Note, table 3.1. An incident is a specific criminal act involving one or more victims. The number of incidents of personal crime is lower than the number of victimizations because some crimes are simultaneously committed against more than one individual. For survey methodology and definitions of terms, see Appendix 7.

Estimate is based on about 10 or fewer sample cases.

Note: These data are based on victimizations reported to the National Crime Victimization Survey (NCVS) for the years 1973 to 1988. The NCVS is conducted by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics. Data for the NCVS are obtained from persons age 12 and older residing in a nationally-representative sample of housing units. Sample sizes from the period 1973 to 1988 ranged from 49,000 to 62,000 households and 100,000 to 137,000 individuals interviewed from these housing units. These data are estimates derived from a sample and therefore subject to sampling variation. The numbers for crimes of violence and personal theft are for persons age 12 and older. For survey methodology and definitions of terms used in the National Crime Victimization Survey, see Appendix 7.

| Crimes of high concern ${ }^{\text {d }}$ | 6.7 | 10.3 | 8.8 | 9.0 | 7.3 | 7.3 | 6.5 | 7.2 | 10.1 | 6.1 | 5.0 |

Note: See Notes, tables 3.1 and 3.41. The entries tor white households experiencing Estimates of households in urban, suburban, and rural areas for $1986-90$ are not crime are computed as a percent of the total number of white households, the entries for black households experiencing crime are computed as a percent of the total number of black households, and the entries for other households experiencing crime are computed as a percent of the total number of other households. "Other" households refer to those headed by an individual whose racial identification is other than white or black. For survey methodology and definitions of terms, see Appendix 7.
${ }^{3}$ Detail does not add to total because of overlap in households experiencing different crimes.

Estimates of households in urban, suburban, and rural areas for 1986-90 are no
comparable to those of previous years. Geographic codes for 1986 through 1990 estimates are based upon 1980 U.S. Bureau of the Census definitions, and estimates for earlier years are based upon 1970 U.S. Bureau of the Census definitions.

Table 3.49
Est!mated number and rate (per 1,000 households and per 1,000 vehicles owned) of motor vehicle theft

By age, race of head of household, and form of tenure, United States, 1990

|  | Household |  |  | Vehicles owned |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Number | Number of theits | $\begin{aligned} & \text { Rate per } \\ & 1,000 \end{aligned}$ | Number | Number of thetts | $\begin{gathered} \text { Rate per } \\ 1,000 \end{gathered}$ |
| Race of head of household |  |  |  |  |  |  |
| All races | 95,762,680 | 1,967,540 | 20.5 | 171,405,990 | 2,011,980 | 11.7 |
| White | 82,355,730 | 1,509,360 | 18.3 | 153,884,630 | 1,548,500 | 10.1 |
| Black | 10,916,990 | 397,640 | 36.4 | 13,361,650 | 402,930 | 30.2 |
| Other | 2,489,950 | 60,540 | 24.3 | 4,159,710 | 60,540 | 14.6 |
| Age of head of household |  |  |  |  |  |  |
| 12 to 19 years | 992,940 | 36,710 | 37.0 | 1,213,650 | 39,240 | 32.3 |
| 20 to 34 years | 26,143,830 | 799,270 | 30.6 | 44,923,940 | 804,820 | 17.9 |
| 35 to 49 years | 29,180,950 | 650,840 | 22.3 | 60,482,560 | 678,610 | 11.2 |
| 50 to 64 years | 19,167,770 | 311,860 | 16.3 | 39,231,830 | 315,280 | 8.0 |
| 65 years and older | 20,277,170 | 168,850 | 8.3 | 25,553,990 | 174,010 | 6.8 |
| Form of tenure |  |  |  |  |  |  |
| Owned or being bought | 61,273,650 | 958,510 | 15.6 | 127,364,130 | 989,570 | 7.8 |
| Rented | 34,489,030 | 1,009,030 | 29.3 | 44,041,860 | 1,022,410 | 23.2 |

Note: See Notes, tables 3.1 and 3.20. The number of thefts based on vehicles owned is equal
to or higher than the corresponding figure based on households because the former includes all completed or attemnted vehicle thefts, regardless of the final classification of the event personal crimes of contact and burglary occurring in conjunction with motor vehicle thefts
take precedence in determining the final clabsification based on the number of households.
For survey methodology and definitions of terms, see Appendix 7.

[^28]Students reporting victimization at school
By selected student and school characteristics, United States, 1989

Note: The National Crime Victimization Survey (NCVS) is conducted by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics. These data are rational estimates derived from the School Crime Supplement (SCS) conducted as part of the 1989 NCVS. The findings are based on a natlonally-representative sample of 10,449 youth who were interviewed from January to June 1989. Eligible respondents for the SCS were household members between the ages of 12 and 19 , who had attenced school any time during the 6 months preceding the interview, and were enroiled in a school that would advance them foward the recelpt of a high school diploma. The SCS focused on personal crimes of violence and theft that were committed inside a school butiding or on school property only. These data are estimates derived from a sample and therefore subject to sampling
variation. For survey methodology and definitions of terms used in the National Crime Victimization Survey, see Appendix 7.
a Includes the crimes of rape, robbery, simple, and aggravated assault.
b includes personal larceny, with and without contact, and motor vehicle theft.

Note: These data are from a series of nationwide surveys of high school seniors conducted from 1975 through 1991 by the Survey Research Center of the Institute for Social Research. The survey design is a multistage random sample of high school seniors in public and private schools throughout the continental United States. All percentages reported are based on weighted cases; the N's that are shown in the tables also refer to the number of weighted cases. Readmrs interested in responses to this question for 1976 through 1978 should consult previous editions of SOURCEBOOK. For survey methodology and definitions of terms, see Appendix 6.

Note: See Note, table 3.71. Data are given for those who identity themselves as White or Caucasian and those who identify themselves as Black or Airo-American because these are the two largest racial/ethnic subgroups in the population. Data are not given tor the other ethnic categories because these groups comprise less than 3 percent of the sample in any given year (Source, 1982, p. 9). Readers interested in responses to this question for 1976 through 1978 should consult previous editions of SOURCEEOOK. For survey methodology and definitions of terms, see Appendix 6.

Table 3.80

## High school students reporting carrying a weapon

By sex, race, and ethnicity, United States, 1990

| Race, ethnlcity | Percent reporting carrying a weapon during the 30 days preceding the survey |  |  |
| :---: | :---: | :---: | :---: |
|  | Total | Male | Female |
| Total | 19.6\% | 31.5\% | 8.1 \% |
| White | 16.8 | 28.6 | 5.3 |
| Black | 27.2 | 39.4 | 16.7 |
| Hispanic | 25.8 | 41.1 | 122 |

Note: These data are from the 1990 national school-based Youth Risk Behavior Survey (YRBS). The YRBS is a component of the Youth Risk Behavior Surveillance System, which periodically measures the prevalence of priority health-risk behaviors among youth through comparable national, State, and local surveys. A three-stage sample design was used to obtain a representative sample of 11,631 siudents in grades 9 through 12 in the 50 States, the District of Columbla, Puerto Rico, and the Virgin Islands. As pant of the YRBS students were asked: "During the past 30 days, how many times have you carried a weapon, such as a gun, knife, or ciub, for self-protection or because you thought you might need it in a tight?"

| White | 28.1 | 16.1 | 7.9 | 2.1 |
| Black | 20.4 | 13.5 | 6.5 | 1.4 |
| Hispanic | 30.4 | 19.5 | 12.0 | 2.4 |

Note: See Note, table 3.80. Students were asked whether they had seriously thought about attempting suicide during the 12 months preceding the survey, whether they had made a specific plan about how they would attempt suicide, how many times they had actually made a suicide atternpt, and whether the suicide attempt(s) resulted in an injury or polsoning that had to be treated by a doctor or nurse.
${ }^{\text {a }}$ Resulted in an injury or poisoning that had to be treated by a doctor or nurse.

Note: These data are from a series of nationwide surveys of high school seniors the nearest hundred) of weighted cases. The number of respondents for 1990 conducted by the University of Michigan's Institute for Social Research for the Natlonal Institute on Drug Abuse from 1975 through 1991. The survey design is a multistage random sample of high school seniors in public and private schools. Depending on the survey year, from 66 to 80 percent of the schools initially invited to participate agreed to do so. Completed quesilonnaires were obtained from 77 to 84 percent of all sampled students in participating schools each year. All percentages reported are based on weighted cases; the N's that are shown in the tables also refer to the approximate number (l.e., rounded to was approximately 15,200 and for 1991, 15,000 excluding cases with missing data. These data were derived from the questions Indicated above. For survey methodology and definitions of terms, see Appendix 6.

Note: See Note, table 3.50. These data were derived from the questions indicated above. For Source: Table constructed by SOURCEBOOK staff from data provided by the Monitoring the survey methodology and definitions of terms, see Appendix 6. Future Project, Survey Research Center, Lloyd D. Johnston and Jerald G. Bachman, Principal Investigators.

Table 3.92
Reported drug use, alcohol use, and cigarette use within last 12 months among high
school senjors
By type of drug, United States, 1979-91
Question: "On how tilany occasions, if any, have you used. . .during the last 12 months?"
(Percent who used in last 12 months)

Note: See Note, table 3.90. Data for the categories "inhalants" and "hallucinogens" are underestimated because some users of amyl and butyl nitrites, and PCP fail to repert in these drug categories. Since 1979, the survey addresses this issue by asking specific questions about amyl and butyi nittites (inhalants) and PCP (a hallucinogen) on one survey alternate form. The results of this survey are used to adjust for underreporting in these drug categories. Since 1982, new questions were introduced on the use of controlled and non-controlled stimulants in order to exclude over-the-counter amphetamines; which were believed to have been inflating the statistic during 1980 and 1981. "Crack" is a highly potent and addicive form of cocaine. "Other cocaine" refers to nonerack forms of this drug. Readers interested in responses to this question for 1975 through 1978 should consult pravious editions of SOURCEBOOK. For survey methodology and definitions of terms, see Appendix 6.
${ }^{\text {a }}$ Data based on four questionnaire forms in 1978-88. $N$ is four-fiths of $N$ indicated, Data based on five questionnalre forms in 1989-91; $N$ is five-sixths of $N$ indicated.
${ }^{D}$ Data based on a single questionnaire form. N is one-fifth of N indicated in 1979-88 and one-sixth of N indicated in 1989-91.
${ }^{\text {C }}$ Question text changed slightly in 1987.
${ }^{d}$ Data based on a single questionnaire form in 1986. N is one-fith of N indicated, Data based on two questionnaire forms in 1987-89; $N$ is two-fifths of $N$ indicated in 1987-88 and two-sixths of $N$ indicated in 1989. Data based on six questionnaire forms in 1990 and 1991.
${ }^{\text {e }}$ Data based on a single questionnaire form in 1987-89; $N$ is one-fifth of $N$ indicated in 1987 and 1988 and one-sixth of $N$ indicated in 1989. Data based on four questionnaire forms in 1990 and 1991; $N$ is four-sixths of $N$ indicated
Only drug use which was not under a doctor's orders is included here.
${ }^{9}$ Data based on two questionnaire forms; N is two-sixths of N indicated. Sterold data pased on a single questionnalre form in 1989 and 1990.
Data based on five questionnaire forms in 1975-88, six questionnaire forms in 1989, and one questionnaire form in 1990 and 1991. $N$ is one-sixth of $N$ indicated in 1990 and 1991.

Table 3.95
Reported recency of drug use, alcohol use, and cigarette use among college students
By type of drug, United States, 1980-91

Note: See Note, table 3.90. These data are from a follow-up survey of respondents 1 to 4 a This drug was asked about in four of the five questionnal................................................................................................................................................................... in $1980-89$, and in five of years past high school who are presently enrofled in college. Included are those registered as full-time students in March of the year in question and who report that they are enrolled in a two- or four-year college. Those individuals previously in college and those who have already completed college are excluded. The number of respondents for each year is as follows: 1980, 1,040; 1981, 1,130; 1982, 1,150; 1983, 1,170; 1984, 1,110; 1985, 1,080; 1986, 1,190; 1987, 1,220; 1988, 1,310; 1989, 1, 300; 1990, 1,400; 1991, 1,410.

Since 1982, new questions were introduced on the use of controlled and non-controlled stimulants in order to exclude over-the-counter amphetamines, which were believed to have been inflating the statistic during 1980 and 1981. "Stimulants adjusted" is based on the data obtained from these new questions. "Crack" is a highly potent and addictive form of cocaine. For survey methodology and definitions of terms, see Appendix 6.
he six questionnaire forms in 1990 and 1991. Total N in 1991 for college students is $1,170$. ${ }^{5}$ This drug was asked about in one of the five questionnalre forms in 1986; in two of the five questionnaire forms in 1987-89, and in all slx forms in 1990 and 1991.
COnly drug use whith was not under a doctor's orders is included here.
${ }^{0}$ This drug was asked about in two of the six questionnaire forms. Total N in 1991 for college students is 470 .

| Any drug ${ }^{\text {b }}$ | 4.8 | 8.9 | 6.9 | 11.8 | 5.4 | 11.3 | 4.0 | 7.8 | 2.1 | 3.8 |
| Any drug except marihuana | 3.1 | 5.9 | 3.9 | 6.9 | 3.4 | 8.1 | 3.6 | 5.9 | 1.9 | 2.9 |

Note: These data are derived from the 1988 Worldwide Survey of Substance Abuse and Health Behaviors Arnong Military Personnel conducted by the Research Triangle Institute. The 1988 survey is the fourth in a series of surveys of millitary personnel conducted in 1980, 1982, 1985, and 1988. The sampling design for the 1988 survey was a stratified, two-stage probability sample. The eligible population for the survey consisted of all active-duty military personnel except recruits, service academy students, persons absent without leave, and persons who had a permanent change of station at the time of data collection. The first-stage sample consisted of military installations (and associated units clustered with the installations based on geographical proximity) for each branch of service located in four broad regions of the wortd (Americas, North Pacific, Other Pacific, Europe). The second-stage sample consisted of military personnel stationed at the selected first-stage installations who were randomly selected within pay grades. For 1988 , usable questionnaires were obtained from 18,673 military personnel, and the overall response rate among those eligib! 9 for the study was 81.4 percent. Drug use is measured by the frequency of nonmedical use of: marihuana or hashish, PCP,

LSD or other hallucinogens, cocaine, amphetamines or other stimulants, tranquilizers or other depressants, barbiturates or other sedatives, heroin or other opiates, analgesics or other narcotics, inhalants, and designer drugs. These data are estimates derived from a sample and therefore subject to sampling variation.
${ }^{\text {a }}$ Compounds that produce the effects of controlled substances classified under schedule I or II of the Federal Controlled Substances Act but that are chemically different from the targeted controlied șubstance. The effects of such compounds can be several times that of the drug they are designed to imitate. Designer drugs are also called analogs.
${ }^{5}$ Nonmedical use one or mors times of any drug(s) listed in the table.

Note: These data are from the 1991 National Household Survey on Drug Abuse sponsored by the National Institute on Drug Abuse. Households were randomly sampled from all households in the United States from Jan. 8 to June 30, 1991. The 1991 Survey is the eleventh in a series of surveys measuring the prevalence of drug use among the American household population aged 12 and older. For survey methodology, see Appendix 9.

Table 3.110
Respondents reporting problems associated with alcohol use during the past year
By age group and type of problem, United States, 1990

| Type of problem | Total all ages ${ }^{\text {a }}$ ( $\mathrm{N}=5,982$ ) | Age group |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | $\begin{gathered} 12 \text { to } 17 \\ \text { years } \\ (N=858) \end{gathered}$ | $\begin{gathered} 18 \text { to } 25 \\ \text { years } \\ (N=1,601) \end{gathered}$ | $\begin{gathered} 26 \text { to } 34 \\ \text { years } \\ (\mathrm{N}=1,850) \end{gathered}$ | 35 years and older ( $\mathrm{N}=1,673$ ) |
| Aggressive or cross while drinking | 13.9\% | 21.0\% | 25.0\% | 17.0\% | 8.2\% |
| Heated argument while drinking | 9.0 | 14.0 | 18.1 | 10.2 | 5.0 |
| Stayed away from work or school | 3.9 | 5.9 | 10.5 | 4.6 | 1.2 |
| High or tight on job or at school | 4.2 | 12.7 | 8.9 | 3.9 | 1.8 |
| Lost or nearly lost job | 0.8 | (b) | 1.0 | 1.1 | 0.6 |
| Pariner told me I should cut down | 7.7 | 9.3 | 10.7 | 9.5 | 5.7 |
| Relative told me I should cut down | 5.1 | 6.2 | 8.8 | 6.6 | 3.1 |
| Friend told me I should cut down | 3.3 | 7.5 | 5.1 | 3.4 | 2.1 |
| Tossed down drinks fast to get effect | 10.6 | 24.8 | 23.7 | 10.9 | 4.5 |
| Afrald I might be or decome alcoholic | 7.1 | 15.2 | 10.4 | 7.6 | 4.8 |
| Stayed drunk for more than one day | 2.9 | 5.1 | 5.5 | 3.1 | 1.8 |
| Difficult for me to stop drinking | 5.3 | 11.7 | 9.3 | 6.3 | 2.8 |
| Unable to remember what happened | 10.6 | 25.2 | 22.6 | 10.6 | 5.0 |
| Quick drink when no one was looking | 3.9 | 20.3 | 4.6 | 2.6 | 2.4 |
| Drink first thing in morning | 1.6 | 2.1 | 2.1 | 1.6 | 1.3 |
| Hands shook after drinking day before | 3.1 | 5.0 | 5.7 | 3.3 | 1.9 |
| Got high or tight while drinking alone | 11.7 | 12.5 | 17.2 | 15.9 | 7.9 |
| Kept on drinking atter promising myself not to | to 5.2 | 8.0 | 9.2 | 7.0 | 2.8 |

Note: See Note, table 3.100. Respondents with missing data on problems are coded as not
having problems. Compared with estimates based on coding missing data for nonusers or light users of alcohol as not having problems, the figures are good estimates for individual problems, but are slightly conservative estimates of the prevalence of any problems or muttiple problems. For survey methodology and definitions of terms, see Appendlx 8.
${ }^{2}$ Only respondents who report having had at least one drink in the past 12 months are included.
Estimates based on only a few respondents are omitted because one cannot place a high degree of contidence in their statistical accuracy.

Tabla 3.111
Respondents reporting problems assoclated with alcohol use during the past year
By type of alcohol use and type of problem, United States, $1990^{\text {a }}$

|  | Type of alcohol use |  |  |
| :---: | :---: | :---: | :---: |
| Type of problem | Drunk more than twice a month ( $\mathrm{N}=537$ ) | Drunk about twice a month or less often ( $\mathrm{N}=1,979$ ) | Not drunk in past year ( $\mathrm{N}=2,928$ ) |
| Aggressive or cross while drinking | 53.3\% | 26.5 \% | 4.2\% |
| Heated argument while drinking | 41.4 | 17.8 | 1.8 |
| Stayed away from work or school | 21.9 | 6.8 | 0.7 |
| High or tight on job or at school | 24.0 | 6.8 | 0.8 |
| Lost or nearly lost job | 7.3 | 0.8 | (b) |
| Partner told me I should cul down | 37.2 | 11.6 | 3.0 |
| Relative told me \| should cut down | 32.2 | 7.2 | 1.2 |
| Friend toid me I should cut down | 22.1 | 4.1 | 0.6 |
| Tossed down drinks fast to get effect | 45.9 | 20.8 | 2.4 |
| Afraid I might be or become alcoholic | 28.6 | 11.5 | 2.8 |
| Stayed drunk for more than one day | 24.2 | 3.7 | 0.2 |
| Difficult for me to stop drinking | 31.6 | 8.9 | 0.8 |
| Unable to remember what happened | 48.4 | 21.4 | 1.7 |
| Quick drink when no one was looking | 14.8 | 5.5 | 2.0 |
| Drink first thing in morning | 14.0 | 1.4 | 0.3 |
| Hands shook after drinking day before | 19.3 | 4.5 | 0.6 |
| Got high or tight while drinking aione | 47.2 | 22.8 | 3.2 |
| Keep on drinking atter promising myself not to | to 25.5 | 8.7 | 1.4 |

Note: See Notes, tables 3.100 and 3.110. "Drunk more than twice a month" includes respondents who reported getting very high or drunk on alcohol 25 or more days in the past 12 months, "Drunk twice a month or less often" includes respondents who reported getting very high or drunk on alcohol at least once but no more than 24 days in the past 12 montis. For survey methodology and definitions of terms, see Appendix 8 .
${ }^{\text {a }}$ Only respondents who reported having at least one drink in the past 12 months and who reported their frequency of being drunk in the past year are included.
${ }^{6}$ Estimates based on only a few respondents are omitted because one cannot place a high degree of confidence in their statistical accuracy.

Note: These data were gathered through the Drug Abuse Warning Network (DAWN) sponsored by the National Institute on Drug Abuse. The data are weighted estimates representing all drug abuse-related emergency room episodes from a stratified random sample of hospitals in the 48 contiguous States, the District of Columbia, and 21 metropolitan areas. These data are estimeies derived from a sample and therefore subiect to sampling variation. For information on mrsthodology, sampling, and estimation procedures, see Appendix 10.
aincludes episodes for which sex of patient was unknown or not reported.
Includes American Indians, Alaskan Natives, Asians, and Pacific Islanders.
Estimate does not meet standard of precision (estimates with a relative standard error of 50 percent or higher are suppressed).

Table 3.121
Respondents reporting whether they drink more than they sinould

By demographle characteristlcs, United States, 1992
Question: "Do you sometimes drink more than you think you should?"

Note: This question was presented to the 64 percent of respondents answering "yes" to the question: "Do you have occasion to use alcoholic beverages such as liquor, wine or beer, or are you a total abstainer?" asked in February 1992. Responses of "don't know/refused" were omitted. For a discussion of public opinion survey sampling procedures, see Appendix 5.

Note: These data are based on information submitted by all 50 States, the District of Columbia, and Puerto Rico to the National Center tor Statistics and Analysis maintained by the National Highway Tratific Safety Administration. The National Highway Traffic Safety Administration uses an estimation procedure to derive national statistics on blood alcohol levels of motor vehicle drivers involved in fatal accidents, who were not tested or for whom blood alcohol concentration (BAC) test results are unknown. The probability of alcohol involvement of each driver for whom there is no BAC data is calculated based on known test results for
people In similar accidents using specific driver and crash parameters. This procedure allows national estimates of alcoholrelated motor vehicle fatalities to be darived. Data have been revised by the Source and may differ from prevlous editions of SOURCEBCOK.

| Property damage only |  |  |  |  |
| 1988 | 4,633,000 | 100 | 226,000 | 5 |
| 1989 | 4,450,000 | 100 | 181,000 | 4 |
| 1990 | 4,255,000 | 100 | 220,000 | 5 |
| Minor or moderate injury |  |  |  |  |
| 1988 | 1,828,000 | 100 | 177,000 | 10 |
| 1989 | 1,800,000 | 100 | 148,000 | 8 |
| 1990 | 1,825,000 | 100 | 173,000 | 9 |
| Severe or fatal injury |  |  |  |  |
| 1988 | 415,000 | 100 | 76,000 | 18 |
| 1989 | 394,000 | 100 | 68,000 | 17 |
| 1990 | 382,000 | 100 | 77,000 | 20 |

Note: These data are from the annual reports of overall crash statistics produced from data collected by the General Estimates System (GES) for the National Highway Traffic Safety Administration (NHTSA). The GES obtained its data from a nationally-representative probability sample selected from an estimated 6.9 million police-reported frafic crashes that occurred in the United States in 1988, approximately 6.6 million in 1989, and approxinately 6.5 million in 1990 . The GES obtahed a sample of approximatoly 49,000 police accident reports in 1988, 44,000 reports in 1989, and 46,000 reports in 1990 from 400 police agencles within 60 geographic sites across the United States. Alcohol Involvement was coded by police officers when evidence of alcohol was present. The code does not necessarily mean that a driver, passenger, or nonoccuparit was tested for alcohol. These data are ostimates derived from a sample and therefore subject to sampling variation.

Estimaied number and rate (per 100,000 inhabtants) of offenses known to police
By offense, United States, 1960-90-Continued

Note: These data were compiled by the Federal Bureau of Investigation through the Uniform Crime Reporting Program. On a monithly basis, law entorcement agencles ipolice, sherifis, and State police) report the number of offenses that become known to them in the following crime categories: murder and nonnegligent manslaughter, manslaughter by negligence, forcible rape, robbery, assault, burglary, larceny-theft, motor vehicle theft, and arson. A count of these crimes, which are known as Part I offenses, is taken from records of all complaints of crime recelved by law enforcement agencies from victims or other sources and/or from offlcers who discovered the offenses. Whenever complaints of crime are determined through inyestigation to bs unfounded or talse, thay are eliminated from an agency's count (Source, 1990, p. 2).
The Uniform Crime Reporting Progrim uses saven crime categorles to establish a "crime index" in order to measure the trend and distributlon of crime in the United States. Crime index offenses include murder and nonnegligent manslaughter, forclble rape, robbery, aggravated assaut, burglary, larceny-theft, and motor vehicle thett; the "Total Crime index" is a simple sum of the index offenses. Arson was designated as a Part I Index offense in October 1978; data collection was begun in 1979. However, due to the incompletenass of arson reporting by police in 1979-90, arson data are not displayed nor are they included in the Toial Crime index of the offerises known to the police.

The figures in this table are subject to updating by the Uniliorm Crime Reporting Program. The number of agencies reporting and populations represented may vary from year to year. This table and tables 3.128 and 3.129 present estimates for the United States or particular areas based on agencles reporting. For dellifilons of offenses, see Appendix 3.
${ }^{\text {a }}$ Populations are U.S. Bureau of the Census provisional estimates as of July 1, except for the Apr. 1, 1980 prelimirrary census counts and the 1990 decennial census counts, and are subject to change.
Because of rounding, the offenses may not add to totals.
CViolent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-thett, and motor vehicle theft. Data are not included for the property crime of arson.
Data for 1988 were not available for Florida and Kentucky; therefare, it was necessary that their crime counts be estimated by the Source.
${ }^{\text {e }}$ All rates were calculated on the offenses before rounding.

Note: See Note, tabie 3.127. These data include estimated offense totals for agencies submitting less than 12 but more than 2 months of offense reports (Source, p. 324). For definitions of offenses and areas, see Appendix 3.
${ }^{\text {a }}$ Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
Croperty crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
${ }^{\text {C }}$ Forcible rape figures furnished by the State-level Uniform Crime Reporting (UCR) Program administered by the llinois Department of State Police were not in accordance
with national UCR guidelines. The 1990 forcible rape totals for lllinols were estimated by the Source using the national rate of forcible rapes when grouped by like agencies. Therefore, only the State total is shown.
d U.S. Bureau of the Census decennial census counts for Puerto Rico were unavailable.

## Offenses in Federal parks known to pollce

By offense, 1975-91

Note: The National Park Service is responsible for the administration of 361 park areas that are owned by the Federal Government. Three urban park areas are policed by the U.S. Park Pollise, whereas other park areas are policed by the U.S. Park Fangers. The offense categories listed above are the Uniform Crime Reports Part I offenses; see Appendix 3 for definitions. Note, however, that these offenses are not counted in the Federal Bureau of Investigation figures. From 1985 through 1990, total annual visitation figures were rounded by the Source. In 1975, the "Human Kind-
ness Day" activities hald in Washington, DC accounted for approximately 500 robbery incidents in that year.
a includes negligent and nonnegligent manslaughter.
bincludes attempts.
Included in tabulations as a Part I offense beginning in 1981.

Note: See Note, table 3.127. In trend tables "construcled" or "adapted" by SOURCEBOOK staff from Crime In the Unifed States, the data were taken from the first year in which the data were reported. It should be noted that the number of agencles reporting and the populations represented vary from year to year.

The Uniform Crime Reporting Program requests that additional information be transmitted to the FBI when a murder has been committed. The actual number of offenses presented in the tables displaying characteristics of murders known to the police may differ from figures in other tables that reflect data from only the initial report on the offense.
${ }^{\text {a }}$ This category includes beatings and strangulations. Pushed is also included in personal weapons.
This category includes drownings, arson, poison, explosives, narcotics, asphyxiation, etc. CBecause of rounding, percents may not add to total.
${ }^{d}$ Data for 1988 were not available for the States of Florida and Kentucky; therefore, these States were omitted by the Source.

Note: These data were compiled from reports of Investigations conducted by the Federai Bureau of Investigation, the U.S. Department of the Treasury, the U.S. Postal Service, and the U.S. Capitol Pollce. The Federal Bureau of Investigation is responsible for the investigation of assaults on personnel of the U.S. Department of the Interior, the U.S. Department of Justice, and the Federal judiciary. Customarily, the U.S. Department of the Treasury, the U.S. Postal Service, and the U.S. Capitol Police investigate assaults against officers assigned to their agencles. All assaults and threats of assault are included in the analysis even though no injury to an officer may have resulted, as are assaults that resulted in the death of an officer.
${ }^{\text {a }}$ Number of offenders not reported for Bureau of Prisons during 1988.
$\mathrm{b}_{\text {Increase }}$ in Immigration and Naturalization Service figures due to changes in reporting procedures.
$\mathrm{c}_{\text {Increase in }}$ U.S. and Assistant U.S. Attorney figures due to change in reporting procedures.
decrease in Internal Revenue Service figures due to change in reporing procedures.

| 1988 | 78 | 14 | 18 | 3 | 1 | 7 | 3 |
| Note: Data on police killings were obtained by the Crime Control Institute from the U.S. Department of Justice, Federal Bureau of Investigation. Killings were counted as drug-related when the presence of drugs was viewed as a necessary condition of, rather than an incidental element to, the killing. Deaths are recorded in the year the injury was inflicted rather than the year the officer succumbed to the injury and therefore these data may differ slighty from similar data derived from the Federal Bureau of Investigation. |  |  |  | Source: Lawrence W. Sherman et al. Police Murdered in Drug-Related Situatlons, 1972-88, Crime Control Reports, No. 7 (Washington, DC: Crime Control Institute, 1989), Tables 1 and 3. Table adapted by SOURCEBOOK staff. Note: This information was collected through a survey of the 50 States, the District of Columbla, and the Federal Bureau of Prisons, conducted during the Summer and Fall of 1990. Utah did not respond to the survey. Colorado reported that information on the number of staff killed was not avallable. Information was incomplete for Louisiana. All other States reported no staff homicides during the period surveyed.

The Source presents the information as submitted by the responding agencies. No attempt was mado by the Source to verify the information received.
aformer inmate's friends were also charged.

Note: These figures are from reports to the Bureau of Alcohol, Tobacco and Firearms (ATF) vices" are inactive or "dummy" devices designed to appear as bombs or explosive materials. and other law enforcement agencles; these reports may not include all explosives incidents.
"Explosives Incidents" are any explosives-Involved situations that have an impact on ATF jurisdiction. "Bombings" are any incidents in which a device constructed with criminal intent and using high explosives, low explosives, or blasting agents explodes. "Attempted bombings" are incidents in which a device designed or purposely contrived to detonate/ignite fails to function. Intent of activity was criminal in nature. Thls pertains to malfunctioning, recovered, and/or disarmed devices. "Incendiary bombings" are criminally-motivated bombing incidents in which an incendlary/chemical device that induces burning is used. "Hoax de-
(Source, 1990, pp. 69, 70.)
Bombing flgures for the years 1976 and 1977 include 30 and 21 criminal accidents, respectively, that were separately enumerated by the Source.

Note: Detailed information concerning each bombing incident reported as occurring in the United States, Puerto Rico, Guam, and the Virgin Islands is submitted by FBI field offices to the Uniform Crime Reporing Program. Local and State public safety agencies bring Inctdents whithin their jurisdictions to the attention of the field offices. Because not ali bombing incidents constitute Federal violations within the FBI's investigative purview, these other law enfarcement agencies facilitate the reporting of occurrences and details of the incidents.

Bombing incidents refer to actual and attempted detonations of explosive or incendlary devices in violation of a State, local, or Federal law. Prior to 1990, these tabulations excluded: threats to bomb, hoax bomb devices, accidental explosions, recoveries of explosive or incendiary devices, and such misdemeanor offenser as the illegal use of fireworks. In 1990, only bomb threats and such violations as the illegal use of fireworks were excluded from the tabulations.
${ }^{\text {a }}$ figures may not add to total because of rounding. The Source began reporting by millions of dollars in 1989. Previous editions repored by thousands of collars.
Includes major bombing incidents resulting in an unusually high number of personal injuries and deaths, or substantial damage to property.
${ }^{\text {Includes }} 27$ incidents involving combination devices.
${ }^{\mathrm{d}}$ Includes 30 incidents involving combination devices.

Note: See Note, table 3.173. "Elasting agents" refers to a specilic type of explosive that can be classitied as either a low or high explosive depending on how it is used. For this reason, it is separately enumerated. "RDX" refers to an extremely powerful eynlosive manufactured by the U.S. Army and found, in small quantities, in blasting caps, shells, and bombs.
${ }^{\text {a }}$ Military explosives and TNT have been combined since 1985.
${ }^{b}$ Called blasting caps in previous editions of SOURCEBOOK.
${ }^{\circ}$ Other specific types of explosives were identified and combined in this category due to the small quantities involved.

Source: U.S. Department of the Treasury, Bureau of Alcohol, Tobacco and Firearms, Explosives Incldents Report 1988, pp. 28, 35; and 1990, pp. 30, 37 (Washington, DC: U.S. Department of the Treasury). Table adapted by SOURCEBOOK staff.

Table 3.178
Deaths, injuries, and property damage resulting from criminal bombings and accidental explosions

Reported to the Bureau of Alcohol, Tobacco and Firearms, United States, 1976-90

|  | Deaths | Injuries | Property damage (in millions) |  |
| :---: | :---: | :---: | :---: | :---: |
| 1976 | 73 | 272 | \$12.1 |  |
| 1977 | 127 | 374 | 61.3 |  |
| 1978 | 68 | 707 | 27.5 |  |
| 1979 | 54 | 328 | 16.0 |  |
| 1980 | 91 | 483 | 31.2 |  |
| 1981 | 75 | 262 | 105.6 |  |
| 1982 | 56 | 221 | 12.3 |  |
| 1983 | 71 | 400 | 34.3 |  |
| 1984 | 47 | 288 | 74.9 |  |
| 1985 | 104 | 477 | 26.5 |  |
| 1986 | 64 | 373 | 29.3 |  |
| 1987 | 57 | 384 | 45.6 |  |
| 1988 | 60 | 691 | 165.9 |  |
| 1989 | 74 | 495 | 48.9 |  |
| 1990 | 64 | 385 | 16.3 |  |

Note: See Note, table 3.173. These data include detonated and incendiary bombings, and criminal and noncriminal explosives incidents. The 1977 property damage figure includes approximately $\$ 50$ million resulting from grain elevator explosions. The dramatic Increase in the 1978 injury figure is due to two major incidents: 150 people in New York City were injured In the accidental, noncriminal exploslon of an ice cream truck; 250 people in Kentucky and West Virginia were injured by illegal fireworks.

Source: U.S. Department of the Treasury, Bureau of Alcohol, Tobacco and Firearms, Explosives Incidents Report 1985, p. 9; and 1990, p. 11 (Washington, DC: U.S. Department of the Treasury), Table adapted by SOURCEBOOK staff.

Table 3.179
Estlmated number of fires, clvilian fire deaths, and value of property loss due to incendlary or suspiclous structure fires

United States, 1990

|  | Estimated number of fires | Estimated number of civilian fire deaths | Estimated value of property loss (in thousands) |
| :---: | :---: | :---: | :---: |
| Total, all fires in structures | 624,000 | 4.400 | \$6,713,000 |
| Total, incendiary and |  |  |  |
| suspicious fires | 97,000 | 715 | 1,394,000 |
| Incendlary fires | 58,500 | 565 | 875,000 |
| Suspicious fires | 38,500 | 150 | 519,000 |

Note: The data above are welghted estimates from a survey conducted annually of fire deparments drawn from the Fire Service Inventory File of the National Fire Protection Association. All U.S. fire departments that protect communities of 100,000 or more are included in the sample. For departments that protect less than 100,000 population, the sample is stratified by community size. A total of 2,860 fire departments responded to the 1990 survey. Readers are advised to consult the Source for more detailed information on methodology and weighting procedures.
"Incendiary fires" are fires in which "legal decision or physical evidence indicates that the fire was deliberately set." "Susplcious fires" are fires in which "circumstances indicate the possibility that a fire may have been deliberately set." "Suspiclous circumstances" include multiple ignitions or a lack of accidental or natural ignitlon factors. "Civilians" include "anyone other than a fire fighter, and covers public service personnel such as police officers, civil defense staft, nun-fire service medical personnel, and utility company employees." (Source, p. 44.)

| Total | 20,509 | 188,611 | 6,035,385 | 1,260 | 5,432,823.21 |

Note: The Federal Crime Insurance Program was established by Congress in 1970. It is administered by the Federal Emergency Management Agency through its Federal Insurance Administration, which is authorized to ofier Federal Crime Insurance policies in States in which it is conciuded that there exists a critical problem in the avaliability of crime insurance. In 1991, 14 States, the District of Columbla, Puerto Rico, and the Virgin islands were participating in the program. Policies, offered both to individuals and businesses, cover losses due to robbery and burglary.
"Annual written premiums" are the payments that would be recelved if all policies were in effect for the entire year. A "combination" policy provides ditferent coverage limits for robbery and burglary.

Agency, Federal Insurance Administration.

## Characteristics and distribution of persons arrested

This section begins with a series of tables from the Federal Bureau of Investigation's Uniform Grime Reporting (UCR) Program. The UCR obtains information on offenses known and arrests made by participating law enforcement agencies across the country. Included in this section are data on total arrests, and arrests in cities, suburban areas, and rural counties. An arrest is reported to the UCR program "each time a person is taken into custody, notified, or cited for criminal infractions other than traffic violations.' The arrest data are presented by type of offense, and the age, race, and sex of persons arrested. Trend data for both violent and property crime arrests, and arrest rates by offense charged and region, are also displayed. Felony arrest data, collected through the Offender-Based Transaction Statistics (OBTS) program, are provided as well.

The number of offenses "cleared by arrest" is presented. An offense is cleared by arrest when at least one person is arrested, charged, and turned over to the court for prosecution. These tables include type of offense, geographic area, number of police agencies reporting, population served, and offenses cleared by arrest of juveniles. Addjtionally, information on juveniles taken into police custody and arrests for alcohol-related violations is presented.

This section also includes information pertaining to arrests for drug law violations shown for the four regions of the country and large U.S. cities. Drug use by adult and juvenile arrestees in a sample of U.S. cities is also provided. These tables include data on type of drug use, and age, sex, race, and ethnicity of arrestees. Additionally, information is presented on drug testing of arrestees by local police and sheriffs' departments as well as seizures of illegal drugs by State and local law enforcement agencies. Drug seizures by the U.S. Customs Service and the Drug Enforcement Administration are presented. Finally, data from law enforcement activities under the jurisdiction of other Federal agencies are provided. These agencies include the U.S. Coast Guard, the U.S. Secret Service, and the Immigration and Naturalization Service.

Table 4.1
Estimated number of arrests ${ }^{a}$
By offense charged, Unlted States, 1990

| Offense charged |  |
| :---: | :---: |
| Total ${ }^{\text {b }}$ | 14,195,100 |
| Murder and nonnegligent manslaughter | 22,990 |
| Forcible rape | 39,160 |
| Robbery | 167,990 |
| Aggravated assault | 475,330 |
| Burglary | 432,600 |
| Larceny-theft | 1,554,800 |
| Motor vehicle theft | 211,300 |
| Arson | 19,100 |
| Violent crime ${ }^{\text {c }}$ | 705,500 |
| Property crime ${ }^{\text {d }}$ | 2,217,800 |
| Total Crime Index ${ }^{\text {e }}$ | 2,923,300 |
| Other assaults | 1,014,100 |
| Forgery and counterfeiting | 94,800 |
| Fraud | 291,600 |
| Embezzlement | 15,300 |
| Stolen property; buying, receiving, possessing | 165,200 |
| Vandalism | 326,000 |
| Weapons; carrying, possessing, etc. | 221,200 |
| Prositution and commercialized vice | 111,400 |
| Sex offenses (except forcible rape and prostitution) | 107,600 |
| Drug abuse violations | 1,089,500 |
| Gambling | 19,300 |
| Offenses againsi family and children | 85,800 |
| Driving under the influence | 1,810,800 |
| Llquor laws | 714,700 |
| Drunkenness | 910,100 |
| Disorderly conduct | 733,000 |
| Vagrancy | 38,500 |
| All other offenses (except trafic) | 3,267,800 |
| Suspicion (not included in total) | 22,200 |
| Curfew and loitering law volations | 80,800 |
| Runaways | 174,200 |

Note: These data were compiled by the Federal Bureau of Investigation through the Uniform Crime Reporting Program. On a monthly basis, law enforcement agencles report the number of offenses that become known to them in the following crime categories; murder and nonnegligent manslaughter, manslaughter by negligence, forcłble rape, robbery, assault, burglary, larcony-theft, motor vehicle theft, and arson. All of these crime categories, except manslaughter $b_{y}$ nogligence, are used to establish a crime index in order to measure the trend and distribution of crime in the United States. The "Total Crime Index" Is a simple sum of the index offenses. Arson was designaled as a Part I Index offense in October 1978. Unilike the tables from Crime In the United States presented in Section 3, arrest statistics for the crime of arson are complete and appear in the "Total Crime Index" and" "Property crime" total.

Arrest statistics are compiled as part of this monthly data collection effort. Participating law enforcement agencies are instructed to count one arrest each time a person is taken Into custody, notified, or cited for criminal infractions other than traflic violations, Annual arrest figures do not measure the number of individuals taken into custody becatise one person may be arrested several times during the year for the same type of offense or for different offenses. A juvenile is counted as a person arrested when he/she commits an act that would be a crimina! offense if committed by an adult. Two offense categories, "curfew and loitering" and "runaway," are tabulated only for juveniles. Violations of local Juvenile acts other than runaway and curfew and loltering law violations are Included in the "all other" classiffeation (U.S. Department of Justice, Fedeial Bureau of Investlgation, Uniform Crime Reporting Handbook (Washington, DC: USGPO, 1984), p. 60).

Data in this table are estimates tuased on arrest statistics for all law enforcement agencies in the Uniform Crime Reporting Program, including those subrnltting reports for less than 12 months in 1990 (Source, p. 325).

Due to reporting problems at the State level, arrest data for law enforcement agencies in Georgla were not avallable. Also, arrest data for New Hampshire agencies were noi recelved in time. Arrest totals for these States were estimated for inclusion in the above table. For tables presenting arrests by age, sex, race, or population group, data from Georgia and New Hampshire have been omitted by the Source.

For defintions of offenses, see Appendix 3.
${ }^{\text {a }}$ Arrest totals based on all reporting agencies and estimates for unreported areas.
Because of rounding, Items may not add to totals.
${ }^{\text {c }}$ Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, lareeny-theft, motor vehicle theft, and arson. ${ }^{\theta}$ Includes arson.

Number and rate (per 100,000 inhabltants) of arrests
By offense charged and size of place, 1990
(Population figures rounded to the nearest thousand. All rates were calculated on the popula-
tion before rounding. Rate per 100,000 Inhabitants.)

Note: See Note, table 4.1. This table presents data from all law enforcement agencies subniuting complete reports for 12 months in 1990 (Source, p. 326). Population figures represent U.S. Bureau of the Census 1990 decennial census counts. For detinitions of offenses, see Appendix 3.

Because of rounding, percents may not add to total.
Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

| Black | 63,071 | 92.8 | 71.4 | 45.9 | 17.5 |
| Other | 1,319 | 93.8 | 76.5 | 48.8 | 24.1 |
| Age | 185,602 | 93.8 | 73.9 | 46.2 | 18.9 |
| 19 years and younger | 15,605 | 94.6 | 75.1 | 41.6 | 21.6 |
| 20 to 29 years | 89,958 | 94.0 | 75.6 | 48.4 | 19.0 |
| 30 to 39 years | 55,281 | 93.7 | 73.2 | 47.0 | 18.0 |
| 40 years and older | 24,758 | 92.9 | 68.7 | 38.8 | 18.8 |

Note: These data were collected through the Offender-Based Transaction Statistics (OBTS) program maintained by the U.S. Department of Justice, Bureau of dustice Statistics. The OBTS program provides detailed data on the criminal justice processing of persons arrested for felonies in participating States. These data were drawn from six States that voluntarily participated from 1983 to 1988. These States are California, Minnesota, New York, Pennsylvania, Nebraska, and Virginia. These six States reported 174,767 forgery and fraud-related arrests comprising 6 percent of the 3 million arrests reported by these States from 1983 to 1988. Data on sex, race, and age were reported for $97.2,93.7$, and 91.8 percent, respectively , of 202,145 total cases. For survey methodology and definitions of terms, see Appendix 11.

Note: See Note, table 4.1. "An offense is 'cleared by arrest' or soived for crime reporting purposes when at least one person is: (1) arrested; (2) charged with the commission of the offerise; and (3) turned over to the courl for prosecution. The prosecution can follow arrest, court summons, or pollice notice." An offense is also counted as cleared by arrest if any of the following "exceptional" conditions pertaln: (1) suicide of the offender; (2) double murder; (3) deathbed confession; (4) offender killed by police or citizen; (5) confession by offender already in custody or serving a sentence; (6) an offender prosecuted in another jurisdiction for a difierent offense and that jurisdiction does not release offender to first jurisdiction; (7) extradition denied; ( 8 ) victim refuses to cooperate in prosecution; ( 9 ) warrant is outstanding for felon but betore arrest the offender dies of natural causes or as a result of an accident, or is killed in the commission of another offense; or, (10) handing of a juvenile offender either orally or by written notice to parents in instances involving minor offenses where no referral to juvenile court is made as a matter of publicly accepted police policy. (U.S. Department of Justice, Federal Bureau of Investigation, Uniform Crime Feporting Handbook (Washington, DC:
USGPO, 1984), pp. 41, 42.) It should be noted that the arrest of one person can clear several crimes or several persons may be arrested to clear one crime.

Arson was designated an Index property crime in October 1978. Due to the incompleteness of arson reporting by police for offenses known, arson data are not included in this table. Forcible rape figures furnished by the State-level Uniform

Crime Reporting (UCR) Program administered by the llifinois Department of State Police were not in accordance with national UCR guidelines and were excluded by the Source from the forcible rape, violent crime, and Total Crime Index categories. This tatle presents data from all law enforcement agencies submitting complete reports for at least 6 months in 1990 (Source, p. 325). Population figures represent U.S. Bureau of the Census 1990 decennial census counts. For definitions of offenses, city and suburban areas, and rural countles, see Appendix 3.
${ }^{\text {a }}$ Includes offenses cleared by exceptional means.
${ }^{\text {b }}$ Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
${ }^{\text {CPoperty }}$ crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
${ }^{\mathrm{d}}$ Includes suburban city and county law enforcement agencles within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Note: These data were compiled from the Federal Bureau of Investigation's Uniform Crime Reporting Program. The data presented in this tabie differ from those presented in the U.S. Department of Justice, Federal Bureau of Investigation, Crime in the United States, 1990 (Washington, DC: USGPO, 1991). This is because this table includes data processed by the Federal Bureau of Investigation after the cut off date for that publication. "In many States where drunkenness and/or vagrancy are not treated as criminal actions, these categories are not permissible causes of arrest. In one respect, these data may be considered conservative estimates of alcohol-related arrests. Arrests are classified by a single offense, using a hierarchical rule. Consequently, crimes committed while intoxicated are categorized under the primary offense. On the other hand, 'driving under the influence' includes impairment due to any type of drug; it is not limited to impairment due to aicohul" (Source).

Source: Table adapted by SOURCEBOOK staff from table provided by the U.S. Department of Health and Human Services, National Institute on Alcohol Abuse and Alcoholism.

Percent distribution of arrests for drug law violations ${ }^{\text {a }}$

Note: These data were compiled by the Federal Bureau of Investigation through ${ }^{\text {a }}$ Subcategories may not sum to total because of rounding. the Uniiorm Crime Reporting Program. This table Includes data from all law enorcement agencles submitting complete reports for 12 months in 1980, 1985, and 1989. Data were excluded if a city reported less than 12 months of data or if the population fell below 100,000 in either 1980, 1985, or 1989. For a description of the Uniform Crime Reporting Program, see Appendix 3.

Note: These data are from the Drug Use Forecasting (DUF) program sponsored by the National Institute of Justice. DUF data are collected in central booking facilities in participating cities throughout the United States. For approximately 14 consecutive evenings each quarter, trained local staff obtain voluntary and anonymous urine specimens and interviews from a new sample of arrestees (Source, p. 2). For methodology, survey sampling Information, and a list of participating cities, see Appendix 12.
a $_{\text {Includes }}$ cocaine, oplates, marihuana, phencyclidine (PCP), methadone, benzodiazepine (Valium), methaqualone (Ouaalude), propoxyphene (Darvon), barbiturates, and amphetamines.
Less than 20 cases.

Note: These data are from the secend Law Enforcement Management and Administrative Statistics (LEMAS) survey conducted in 1980. The first survey was conducted in 1987. The data were collected by the U.S. Bureau of the Census for the U.,. Department of Justice, Bureau of Justice Statistics. The LEMAS survey collects data from a nationally-representative sample of nearly 17,000 publicly-funded law enforcement agencies in the United States. All 780 State and local law enforcement agencies with 100 or more sworn officers were included in the survey. For agencies with fewer than 100 sworn officers, a nationally-representative sample was drawn. A stratified random sample based on type of agency (local, sheriff, or special police), size of population served, and number of sworn officers was used. A total of 2,945 agencles responded to the survey yielding a 94.5 percent response rate, The final database includes responses from 1,830 local police departments, 840 sheriffs' departments, 226 special police departments, and 49 primary State police departments. Hawail does not have a State police agency. Data from special police agencies are not included in this table. The data from agencies with fewer than 100 sworn personnel were derived from a sample, and therefore subject to sampling variation.

A local police deparment was defined as a general purpose pollce department operated by a municipal or county government. A Staie police department was defined as the general purpose State pollce agency operated In each State.
${ }^{\text {a }}$ Detall may not add to total because of rounding.

Note: The data presented for 1975 and 1976 coincide with the former Federal fiscal year, the period July 1 to June 30. The transition quarter refers to the period July 1, 1976 to Sept. 30, 1976. The Feieral fiscal year is now Oct. 1 to Sept. 30. Some data have been revised by the Source and therefore will differ from previous editions of SOURCEBOOK.

The drug value is computed using the Drug Enforcement Administration (DEA) retail value lists. The illegal market retail drug prices for heroin and cocaine are based on evidence exhibits purchased by DEA; other dangerous drug prices are derived from monthly avallability reports submitted by DEA field offices.
${ }^{\text {a }}$ Value data were computed using retail values as of the fourth quarter of fiscal year 1976.
Value data were computed using retail values as of the third quarter of the fiscal year.

CVaiue data were computed using the most recent retail values available at the time of publication. Values for heroin, cocalne, marihuana, and total have been recalculated to reflect updated retail price data from the National Narcotics intelligence Consumers Committee and the DEA.
${ }^{\mathrm{C}}$ Values for heroin, cocaine, and marihuana were estimated from the DEA national retail price data for the period July to September 1988. The value of hashish was estimated from the Royal Canadian Mourted Police retail price data for the month of August 1988. Values for oplum, morphine, and other drugs cannot be estimated because of a lack of U.S. price data. Estimated values of "other drugs" for the years prior to fiscal year 1988 were based on an estimated mix of drugs that is no longer considered valid.

Note: The data presented for years prior to and including 1976 coincide with the former Federal fiscal year, the period July 1 to June 30 . The transition quarter refers to the period July 1, 197 e to Sept. 30, 1976. The fiscal year for the Federal Government is now from Oct. 1 to Sept. 30. "Aliens deported" refers to those aliens required to leave the country under formal orders of deportation. "Public charge" refers to persons deported for vagrancy and similar reasons. "Other" includes persons who, at the time of their entry, were excludable as: polygamists, draft evaders, iliterates over 16 years of age, children under 16 years of age unaccompanied by parent(s), smugglers, and those deported for unknown reasons. Data for $1980-90$ have been revised by the Source and therefore will differ from previous editions of SOURCEBOOK.

## Section 5

Judicial processing of defendants
This section provides information on the judicial processing of adult and juvenile defendants in the United States. The data present information on State, Federal, and military courts.

The initial tables involve requests for immunity by Federal prosecutors and court orders for interception of wire, oral, or electronic communication. In addition, information concerning the activities of the U.S. Attorneys' offices is presented.

The next segment presents data from the Federal Justice Statistics database. Tables provide information on pretrial release and detention of defendants in U.S. District Courts, criminal matters concluded in U.S. District Courts, suspects declined for prosecution and referred to U.S. magistrates, and defendants prosecuted, convicted, and sentenced in U.S. District Courts. Additional tables present data on cases filed, terminated, and pending, and the length of trials in U.S. District Courts. Finally, a number of tables display information on defendants detained, disposed, and sentenced in U.S. District Courts.

The third portion of the section begins with an assessment of the application of the U.S. Sentencing Commission's guidelines to defendants in U.S. District Courts. This information includes the number of defendants, the types of sentences imposed, and the reasons for upward and downward departure from the Commission's guidelines.

Information on case processing in State courts comprises the next section. The data are from the National Prosecutor Survey Program, the National Judicial Reporting Program, the Offender-Based Transaction Statistics program, and the National Pretrial Reporting Program, Information is provided on felony convictions and sentences in State courts as well as case processing in a number of States. In addition, release status, bail, disposition, adjudicatiori outcome, and sentencing information for defendants in the 75 largest counties is presented.

The next portion of the section includes information on petitions filed in U.S. District Courts, appeals to the U.S. Courts of Appeal, and activities of the U.S. Supreme Court. Data on requests for executive clemency, commutations of sentences, and pardons are also presented.

Information on criminal tax fraud cases, and arrests and convictions by the U.S. Postal Inspection Service is provided. Furthermore, a series of tables present data on violations
of immigration and nationality laws. These include suspects investigated and prosecuted by U.S. Attorneys, and disposition, conviction, and sentencing information on immigration law violators in U.S. District Courts. Information on the activities of the U.S. Secret Service and the U.S. Environmental Protection Agency is also provided.

The final segment of the section presents data on delinquency and status offense cases processed hy juvenile courts in a number of States. Tables involving offenses, detention, probation, and placement are presented for those adjudicated delinquent and for status offenders. In addition, information on abuses of public office and judicial misconduct inquiries is provided. Finally, military court-martial activities of the Army, Air Force, and Coast Guard are displayed.

Table 5.1
Requests for Immunity by Federal prosecutors to the U.S. Attorney General and witnesses involvedi in these requests

By origin of request, fiscal years 1973-91

| Fiscal year | Requests |  |  | Witnesses |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total number | Criminal Division |  | Total number | Criminal Division |  |
|  |  | Number | Percent |  | Number | Percent |
| 1973 | 1,160 | 769 | 66\% | 2,715 | 1,598 | $59 \%$ |
| 1974 | 1,410 | 1,121 | 80 | 3,655 | 2,055 | 56 |
| 1975 | 1,632 | 1,259 | 77 | 3,733 | 2,183 | 58 |
| 1976 | 1,789 | 1,361 | 76 | 3,923 | 2,366 | 60 |
| 1977 | 1,798 | 1,250 | 70 | 4,413 | 1,969 | 45 |
| 1978 | 1,445 | 959 | 66 | 2,997 | 1,403 | 47 |
| 1979 | 1,596 | 1,163 | 73 | 3,204 | 1,816 | 57 |
| 1980 | 1,653 | 1,207 | 73 | 3,530 | 1,892 | 54 |
| 1981 | 1,686 | 1,252 | 74 | 3,271 | 2,032 | 62 |
| 1982 | 1,835 | 1,394 | 76 | 3,810 | 2,233 | 59 |
| 1983 | 1,986 | 1,425 | 72 | 4,226 | 2,243 | 53 |
| 1984 | 2,378 | 1,838 | 77 | 4,784 | 2,858 | 60 |
| 1985 | 2,451 | 1,898 | 77 | 5,146 | 3,329 | 65 |
| 1986 | 2,550 | 1,948 | 76 | 5,013 | 3,267 | 65 |
| 1987 | 3,161 | 1,869 | 59 | 5,918 | 3,249 | 55 |
| 1988 | 3,125 | 1,821 | 58 | 5,961 | 3,205 | 54 |
| 1989 | 3,072 | 1.807 | 59 | 5,760 | 3,249 | 56 |
| 1990 | 2,845 | 1,694 | 60 | 5,062 | 2,905 | 57 |
| 1991 | 2,587 | 1,560 | 60 | 4,364 | 2,448 | 56 |

Note: These data reflect requests received from Federal prosecutors under 18 U.S.C. 6001 * 6005, the statute that now governs the granting of use immunity. 18 U.S.C. 6003 requires all Federal prosecuting attorneys to receive authorization from the U.S. Attorney General (or representative) before seeking a court order for witness immunity. It should be noted that in some cases in which the authorization is obtained, the prosecutol may decide not to seek the immunity order from the courts. Therefore, the number of witnesses actually granted immunity is probably lower than the data in the table indicate. It should also be noted that data for 1973 and 1974 include a total of 11 requests and 27 witnesses, and 7 requests and 11 witnesses, respectively, falling under an older statute, 18 U.S.C. 2514, which has since been repealed. "Criminal Division" refers to the Criminal Division of the U.S. Department of Justice and the U.S. Attorneys. Other requests, not pertaining to the Criminal Division, come from the remnining divisions of the U.S. Department of Justice (e.g., Antitrust, Tax, Civil Division, Civil Rights, and Lands and Natural Resources), as well as to the other Federal agencies (e.g., Interstate Commerce Conmission, Federal Trade Commission, Securities and Exchange Commission, and Department of the Army) and to the Congress, all of which may request immunity for witnesses. Some data have been revised by the Source and theretore will differ from previous editions of SOURCEBOOK.

Source: Table constructed by SOURCEBOOK staff from data provided by the U.S. Department of Justice, Criminal Division.

Table 5.2
Court-authorized orders for interception of wire, oral, or electronic communications
United States, 1968-90

Note: The Director of the Administrative Office of the United States Courts is required, in accordance with provisions of 18 U.S.C. $2519(1)$, to transmit to Congress a report regarding applications for orders authorizing or approving the interception of wire, oral, or electronic communications. This report is required to contain information about the number of such orders and any extensions granted. Every State and Federal judge is required to file a written report on each application made. This report is required to contain information on the grants and denials, name of applicant, offense involved, and duration of authorized intercept. Prosecuting officials who have applied for intercept orders are required to file reports containing information on the cost of the intercepts and the results of the intercepts in terms of arrests trials, convictions, and the number of motions to suppress the use of the intercepts (Source 1990, p. 1). A total of 40 jurisdictions had statuies authorizing the interception of wire, oral, or electronic communications during 1990. Fifteen of these jurisdictions did not have any courtauthorized orders for interception during 1990.
${ }^{a_{\text {For }} 1968 \text {, the reporting period was from June to December. }}$

Table 5.6
Civil and criminal trials argued by U.S. Attorneys' offices
Fiscal years 1970-91

Note: The U.S. Attorney is the highest ranking law enforcement representative in each of the Federal judicial districts. The Attornay and staff members assist the U.S. Attorney General in the enforcement of Federal sriminal laws, the investigation and prosecution of corrupt public officials and organized crime figures, and the initiation of environmental litigation. In addition, the U.S. Attorney is responsible for the enforcement of laws pertaining to Federal programs. These include violations involving Medicaid and Medicare, U.S. Government contracts, the use of labor union funds, educational benefits for war veterans, and the food stamp program. in the civil law area, U.S. Attorneys are involved in tort claim and civil fraud cases, actions filed against the U.S. Government, Freedom of Information Act cases, and other civil matters. U.S. Attorneys are responsible for collecting criminal fines, civil judgments, prejudgment claims, forieitures, penalties, and other monies owed to the Federal Government.

| Other | 64 | 49 | 20 | 32.8 | 29.7 | 14.1 | 20.3 | 10.9 |

Note: These data are from the U.S. Department of Jusice, Bureau of Justice Statistics' Federal Justice Statistics database maintained by Abt Associates, inc. Sources of information include the Executive Office for U.S. Attorneys, the Administrative Office of the United States Courts, the Federal Bureau of Prisons, the U.S. Parole Commission, and the Pretrial Services Agency.

The sum of the detendants released and detained exceeds 100 percent because some defendants who were initially detained eventually ralsed bail or had the condittoris of their bail changed by rehear ing or appeal. Total also includes defendants for whom release status data were unavailable. For methodology and definitions of terms, see Appendix 13.

Data describe number of defendants scheduled to be interviewed. Initially held two or more days.

Cincludes deposit bond, surety bond, and collateral bond. Includes temporary detention and detention ordered after a pretria detention hearing.
May include some non-violent offenses.
Excludes tax fraud.
$g_{\text {Excludes transportation of stolen property. }}$
$h_{\text {Excludes fraudulent property offenses; including destruction of }}$ property, trespass.
Too few cases to obtain statistically reliable data.
Predominately prosecution under the Racketeer Influenced and Corrupt Organizations Act.

Note: See Note, table 5.8. Data were derived from the Pretrial Services Agency data files,
Data describe defendants whose cases and pretrial services were disposed in 1988. A
defendant with more than one type of violation appears in more than one columit. A detendant with more than one of the same type of violation appears only once in that column. Therefore, sum of individual violations exceeds the total. Not all violations resulted in revocation. For methodology and definitions of terms, see Appendix 13.
${ }^{\text {a }}$ Excludes defendants who were released but whose records did not contain sufficient information to determine type of release or violation behavior.
Excludes tax fraud.
Includes lax fraud.

Note: See Note, table 5.8. This table was created by matching the Administrative Office master data files with the Pretrial Services Agency data files and probation and parcle data files. Records were included in the table if the relevant iniormation was available from any source. Some items are avallable only from one of the files. The number of records for these ltems is lower than those for items which might have come from two or three files. Moreover,
many records omit data on certain items, such as ethnicity. Table indicates the number of records on which relevant data were available. For methodology and definitions of terms, see Appendix 13.

Table 5.26
CrIminal zases filed, terminated, and pending in U.S. District Courts
Years ending June 30, 1955-90

Note: There are two reporting changes during fiscal year 1976 that have affected the data base. Beginning Oct. 1, 1975, all minor offenses (offenses involving penaltes that do not exceed 1 year imprisonment or a fine of more than $\$ 1,000$, with the exception of most petty offenses (offenses invoiving penalties that do not exceed 6 months Incarceration and/or a fine of not more than $\$ 500$ ), are inciuded. Minor offenses are generally disposed of by the magistrates and, in past years, most of these minor offenses would not have been counfed in the workload of the district courts. Second, when the Federal Government's motion to dismiss an original indictment or information is granted, the superseding indictment or information does not become a new case as in the years prior to 1976, but remains the same case. (An indictment is the charging document of the grand jury, and an information is the charging document of the U.S. Attorney.)
"Received by transter" includes defendants transferred by Rule 20, Federal Rules of Criminal Procedure, which provides that defendants who (1) are arrested or held in a district other than that in which an indictment or information is pending against them or in which the warrant for their arrest was issued and (2) state in writing that they wish to plead guilty or nolo contendere, may consent to disposition of the case in the district in which they are arrested or are held, subject to the approval of the U.S. Attorney for both districts.
${ }^{\text {a }}$ Does not include 362 cases that were reopened during the reporting period.

Note; These data are computed only for the respective time intervals actually begun and terminated during the year ending June 30,1990 . The Speedy Trial Act of 1974 (U.S.C. $3152-3156$ and $3161-3174$ ) required each U.S. District Court to adopt a plan for the prompt disposition of criminal cases in accordance with statutory time limits. The time interval from arrest to indictment or information is 30 days (18 U.S.C. 3161 (b)). Deiendants entering a plea of not guilty must bs brought to trial not more than 70 days after a filing of an information or indictment, or after an appearance before a judicial officer of the court in which the charge is pending, whichever comes last (18 U.S.C. 3161 (c) (1)). The trial may not commence sooner than 30 days from the date the defendant first appears unless
written waiver is given (18 U.S.C. 3161 (c)(2)). See Note, table 5.24 for definttions of indictment and informatlon.
The Speedy Trial Act does not establish time limits governing the period between conviction and sentencing, but does require that statistics be furnished regarding the time span of this interval. The Committee on Administration of the Criminal Law of the Judicial Conference has recommended a 45 -day time limit for the interval from conviction to sentencing.

Appllcation of the U.S. Sentencing Commission's guldelines to defendants in U.S.
District Courts
By circuit and district, fiscal year 1991

Appilication of the U.S. Sentencing Commission's guidelines to defendants in U.S. District Courts

By circult and district, fiscal year 1991--Continued
Note: The sentencing reform provisions of the Comprehensive Crime Control Act, Public Law No. 98-473 (1984), created the United States Sentencing Commission. The Commlssion's primary function is to develop sentencing policies and practices for the Federal courts. On Apr. 13, 1987, the Commission submitted its initial Sentencing Guidellnes and Policy Statements to Congress. The guidelines became effective on Nov. 1, 1987, and apply to all offenses committed on or after that date. These data are derived from the United States Sentencing Commission's fiscal year 1991 data file. The Commission collected information on 33,419 cases sentenced under the Sentencing Reform Act of 1984 during fiscal year 1991 (Oct. 1, 1990, through Sept. 30, 1991), for which data were received by the Commission as of Jan. 17, 1992. Given the nature of the data file and reporting requirements, the following types of cases are not included in the data presented here: cases initiated but for which no convictions were obtained; defendants convicted for whom no sentences were yet issued; defendants sentenced but for whom no data were stbmitted to the Commission; and cases that solely involved petty offenses.

Due to the termination of the Administrative Office of the U.S. Court's Federal Probation Sentencing and Supervision information System (FPSSIS) in September of 1990, the
Commission now collects variables previously imported from the FPSSIS data collection system. Information appearing on tables previously derived from FPSSIS indicators may appear to have changed from 1990 to 1991. Any such changes should be interpreted with caution. Rather than actual changes occurring in the Federal judicial system, these differences may be a function of different data collection methods or the result of having a centralized and strictly monitored data collection system. (Source p. A-1.)

A case or defendant is a single sentencing event for a single detendant. Multiple defendants in a single sentencing event are treated as separate cases. If an individual deiendant is sentenced more than once during the time period of interest, each sentencing event is identfied as a separate case. (Source, p. 47.)

Note: These data are derived from a 12.5 percent random sample of cases from the fiscal year 1990 U.S. Sentencing Commission database. Through review of both computerized files and case files, 1,165 defendants were identified who met the criteria for receipt of a mandatory minimum drug or weapons sentence. (Source, p. 37.)
${ }^{\text {a }}$ Of the 1,165 sampie cases, 7 were exciuded due to missing information.
of the 1,165 sample cases, 72 were excluded due to missing information
${ }^{\text {Cof the }} 1,165$ sampla cases, 77 were exciuded due to missing information.
$d_{\text {includes both white and black Hispanics, and thus the numbers reported underrepresent }}$ black defendants.
e Includes American Indians, Alaska Natives, and Aslan or Pacific Islanders.
Of the 1,165 sample cases, 41 were excluded due to missing information.
OOf the 1,165 sample cases, 44 were excluded due to missing information.
Includes any other controlled substance not listed.

The low category includes defendants whose drug amount was less than 100 grams of heroin or equivalents for other drugs as established by statute. The medium category includes defendants whose drug amount was greater than or equal to 100 grams but less than 1 kilogram of heroin or equivalents. The high category includes defendants whose drug amount was greater than or equal to 1 kilogram of heroin or equivalents;
Ol the 1,165 sample cases, 66 were excluded due to missing information,
Kof the 1,165 sample cases, 118 were excluded due to missing information
The peripheral role includes girlfiend, spouse, or caurier with little knowledge of the drug activity.
${ }^{T}$ The minor role includes unloaders, and drug cartiers or couriers who were aware of the scope or hierarchy of the drug organization.

Note: See Note, table 5.39. Previously, national estimates on departures and sentances within the guideline range were based on a 25 percent random sample. For fiscal year 1991, however, departure rates zie reported for all cases received. The case files were analyzed and sentences were classified as within or outside of Commission guidelines. The statement of reasons for departure was reviewed. If not avallable, phone calls were made to determine reasons for departure. An upward departure involves applying a more serious sentence than the guidelines recommend. A downward departure involves applying a less serious sentence than the guidelines recommend.
${ }^{\text {a Based on }} 538$ upward depature cases for which Reports on the Sentencing Hearing were avallable. Intormation on reasons was unavailable in 14 cases Involving upward departures. Courts often provided more than one reason for departure; consequently, the percentage across all reasons for departure sums to more than 100 percent.
${ }^{5}$ The defendant's criminal background warrants a more or less severe sentence than the guidelines dictate.

CIncludes cases in which the delendant committed the offense to facilitate or cover up ancther offense (e.g., firearms violation to commit a robbery).
dff offense conduct, such as a multiple count conviction, reflects more than a five unit increase in seriousness, judges have the discretion to depart upward from the guldelines. Elncludes all reasons given between one and three times among relevant cases.
fBased on 5,509 downward departure cases for which Reports on the Sentencing Hearing were avallable. Information on reasons was unavaliable in 116 cases involving downward cepartures. Courts often provided more than one reason for departure; consequently, the percentage across all reasons for departure sums to more than 100 percent.
GInsludes cases in which the judge believes the defendant provided substantial assistance but the prosecution does not submit a motion for downward departure.
$\mathrm{h}^{\text {The circumstances surrounding the offense mitigate the ultimate harm caused by its com- }}$ mission (e.g., mercy killing).
iDefendant is to be deported.

| Waiver of incictment or prellminary hearing | 10 | 17 | 16 | 7 | 5 |
| Other ${ }^{\text {a }}$ | 23 | 9 | 21 | 31 | 21 |

Note: These data were collected as part of the 1990 National Prosecutor Survey Program (NPSP) conducted by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of dustice Statistics. The NPSP involved a nationally-representallve survey of 290 chief prosecutors, resulting in 289 completad questionnaires. The prosecutorial districts of these chiel prosecutors encompassed a total of 514 countles and independent cities. All States except Vermont, which did not by chance enter the random sample, were represented in the survey. These data are derived from a sample and therefore subject to sampling variation.
${ }^{\text {a }}$ About half of survey respondents' written explanations of "other" Indicated that sometimes an information was filled belore a prelliminary hearing was held.

Table 5.46
Felony convictions in State courts
By most serious convicition offense, United States, 1988

| Most serious conviction offense | Felony convictions |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | United States |  | 75 largest countles |  |
|  | Number | Percent | Number | Percent |
| Total | 667,366 | 100\% | 310,547 | $100 \%$ |
| Murder ${ }^{\text {a }}$ | 9,340 | 1.4 | 4,859 | 1.6 |
| Rape | 15,562 | 2.3 | 6,723 | 2.2 |
| Robbery | 37,432 | 5.6 | 24,436 | 7.9 |
| Aggravated assault | 37,566 | 5.6 | 18,131 | 5.8 |
| Burglary | 101,050 | 15.2 | 42,976 | 13.8 |
| Larceny ${ }^{\text {b }}$ | 95,258 | 14.3 | 44,493 | 14.3 |
| Drug traficking | 111,950 | 16.8 | 64,160 | 20.7 |
| Other falonies | 259,208 | 38.8 | 104,769 | 33.7 |

Note: These data are based on the results of the second survey of State lelony courts from the National Judicial Reporting Program (NJRP). Data were collected by the U.S. Bureau of the Census and the National Association of Criminal Justice Planners for the U.S. Department of Justice, Bureau of Justice Statistics. The first survey, conducted in 1986, reportad on felony ce';e processing in State courts in a sample of 100 counties. The 1988 NJRP expanded the sample to 300 counties selected to be nationally representative. The sample includes 54 countles representative of the Nation's 75 largest. The 75 largest countles In the United States comprise about 37 percent of the U.S. population but in 1988 accounted for over half of all crime reported to police and nearly half of all felony convictions in State courts. Oniy offenses that State penal codes define as telonies are included. Excluded are Federal courts and State courts or local courts that did not try felony cases. Any person convicted of multiple offenses that included any of the FBI Index crimes received th: offense designation of the most serious index crime. Drug traticking was the designation only if the person was not also convicted of one of the Index crimes. Sentencing data specifying the conviction offense were available for 100 percent of the estimated total. These cata are estimates derived from a sample and therefore subject to sampling varlation.

For definitions of terms and survey sampling procedures, see Appendix 14.
a Includes nonnegligent manslaughter.
Includes motor vehicle theft.

Note: These data were collected through the Offender-Based Transaction Statistics (OBTS) program maintainod by the U.S. Department of Justice, Bureau of Justice Statistics. The OBTS program provides detalled data on the criminal justice processing of persons arrested for felonles in participating States. These data are from eight States that voluntarily participated in 1988. The elght States are Alaska, Calilornia, Kentucky, Minnesota, Missouri, New York, Oregon, and Pennsylvania. Public-order offenses include weapons, driving while Intoxicated, disturbing the peace, obstructing pollce, vice, bribery, sex offenses not involving assault, family-refated felonies, flight or escape, and parole vlolations. For methodology and definitions of terms, see Appendix 11.
aincludes only arrest reports containing readable fingerprints and excludes 129 incidents for which the FBI's National Crime Information Center (NCIC) codes are not known.

| None | 19,610 | 100 | 78 | 32 | 45 | 22 | 21 | 2 |

Note: The data were collected through the National Pretrial Reporting Program initiated by the U.S. Department of Justice, Bureau of Justice Statistics in 1988. The data are based on a sample of 39 of the 75 most populous counties in the United States and a sample of felony deferdants in each of the 39 counties. The sample was designed and selected by the U.S. Bureau of the Census. Information is based on 11,063 sample felony cases processed in the 39 jurisdictions in February 1988. These data are derived from a sample and therefore subject to sampling variation.

Data on both most serious prior conviction and detentionrelease outcome were available for 88 percent of all cases.

Data on both number of prior convictions and detention-release outcome were available for 86 percent of all cases. For survey methodology, definitions of terms, and crimes within offense categories, see Appendix 15.

Note: The data above represent actions taken during the annual terms of the U.S. Supreme Ccurt. "Amicus" relers to a party who is not involved directly in the suit, but who demonstrates an interest in the case by filing a supportive brief. "Decided on merits" refers to a reassessment and resolution of the substantive issues presented in the case, but that does not involve active participation of the litigants through the filing of written and oral arguments.
${ }^{\text {includes cases summarily affirmed, reversed, or vacated on the In Forma Pauperis }}$ Docket.
${ }^{b}$ Percent is based on the total cases in which thes Government participated. $c_{\text {Inciudes cases in which the Government filed briste as amicus curiae but did not partic- }}$ ipate in the argument.
dincludes cases set for reargument in succeeding ferms.

Table 5.76
Executive clemency applications for Federal offenses received, disposed of, and pending in the Office of the U.S. Pardon Attorney

Fiscal years 1953-91

Note: Article II, Section 2 of the U.S. Constifution authorizes the President to grant executive clemency for Federal offenses. The U.S. Pardon Attorney, in consultation with the Deputy Attorney General, receives and reviews all petitions for executive clemency, initiates the necessary investigations, and prepares the recommendations of the Deputy Attorney General to the President (Source, 1980, p. 35). Clemency may be a reprieve, remission of fine, commutation, or pardon. A "pardon," which is generally considered only after sentence completion, restores basic civil fights and may ald in the reinstatement of prolessiorial or trade licenses that may have been lost as a result of the conviction. A "commutation" is a reduction of sentence. Peitions denied also include thase that are closed administratively. The figures presented in this table do not include clemency actions on draft resisiers, or milltary deserters and absentees during the Vietnam era.

Source: U.S. Department of Justice, Ofice of the Attorney General, The Annual Report of the Attorney General of the Unfted States 1979, p. 31; 1980, p. 35 (Washington, DC: USGPO); and data provided to SOURCEBOOK staff by the U.S. Department of Justice, Office of the Pardon Attorney. Table adapted by SOURCEBOOK staft.

| 1990 | 5,280 | 3,228 | 2,015 | 192 | 2,472 |
| 1991 | 5,234 | 3,572 | 1,941 | 130 | 2,651 |

Note: The Criminal Investigation Division of the Internal Revenue Service is responsible for enforcing the criminal provisions of the tax laws, investigating evidence of tax evasion or tax fraud, identifying and investigating persons who derive substantial income from illegal activities and who violate tax laws, investigating money laundering violations under the Bank Secrecy Act (Titie 31) and recommending prosecution (Source, 1978, p. 30).

The Criminal Tax Division of the Office of Chief Counsel handies criminal tax legal mattars for the Internal Revenue Service, reviews criminal cases and decides if cases warrant prosecution, coordinates criminal tax prosecutions with the U.S. Department of Justice, and provides assistance to U.S. Attorneys
in criminal tax trials upon request (Source, 1978, p. 53). Some cases referred by the Criminal Investigation Division may not go through the Office of Chief Counsel. For example, recommendations to prosecute money laundering violations are referred directly to U.S. Attorneys.

| 1989 | 3,225 | 2,669 | 7 | 1,931 | 351 | 67 | 247 |
| 1990 | 3,276 | 2,875 | 7 | 2,079 | 393 | 59 | 215 |
| 1991 | 3,503 | 3,142 | 5 | 2,178 | 473 | 90 | 189 |

Note: See Note, table 5.77. For an explanation of indictments and intormations, see Noie, table 5.24. A "nolle prosse" disposition occurs when a prosecutor decides not to prosecute a case. "No true bill" refers to cases in which the grand jury decides not to indict the defendant. "Nclo contendere" is a plea of guilty, but prevents civil action beling taken against defendant for the same acts. Data for 1984-86 have been revised by the Source.
${ }^{\text {a }}$ Includes cases approved by the Office of Chief Counsel plus cases that are referred directly to the U.S. Department of Justice and to U.S. Attorneys by the Criminal Investigation Division.

## Table 5.79

| 1989 | 11.502 | 9,479 | 1,543 | 1,225 |
| 1990 | 12,060 | 9,614 | 1,699 | 1,486 |
| 1991 | 13,513 | 10,320 | 1,772 | 1,297 |

Note: The U.S. Postal inspection Service is the law entorcement arm of the U.S. Postal Service and is responsible for protecting the mall, postal facilities and employees from criminal attack, and protecting the American public from mall fraud schemes, pornography, and other postal-related crimes. The number of convictions may be greater than the number of arrests in a given year because convictions may occur in a year subsequent to an arrest.

Source: U.S. Postal Service, U.S. Postal Inspection Service, Sempannual Report, Aprll 1 September 30, 1991 (Washington, DC: U.S. Postal Inspection Service, 1991), p. 55; and data provided by the U.S. Postal Service, U.S. Postal Inspection Service. Table constructed by SOURCEBOOK staff.

Table 5.80
Arrests and convictions handled by the U.S. Postal Inspection Service
By type of offense, fiscal year 1991

Note: See Note, table 5.79. Internal crimes are those involving employees of the U.S. Postal Service and external crimes are those committed by individuals or groups outside the organ:zation. Internal mail theft includes contractors and some non-employees engaged in mail related work such as mailroom employees. Embezzlement includes theft of funds and falsilfcation of records. Note: These data were analyzed by Abt Associates, Inc. for the aliens who have no authorization to work in the United States Federal Justice Siatistics Program sponsored by the U.S. Department of Justice, Bureau of Justice Statistics. The data were provided
by the Executive Otfice for U.S. Attorneys and the Administrative Office of the U.S. Courts and describe matters terminated in 1987. Immigration offenses include both public-order offenses (primarily iliegal entry and reentry, and harboring and bringing in aliens) and fraudulent offenses (primarily falsifications involving passports, naturallzation papers and alien registration documents). While some mmigration offenses can be committed only by aliens, residents and aliens allke may be charged with bringing in or harboring aliens, an offense category that since 1986 has included knowingly employing
(Source, p. 3).
${ }^{a}$ In order to obtain a consistent trend from 1980-87, a portion of the allen and naturalization ofienses for 1987 were classified as nonimmigration offenses.
Includes unknown offense types.

Note: These data were collected by the National Center for Juvenile Justice for the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention. The data are gathered from courts with juvenile jurisdiction in paricipating States. States included in this table are Alabama, Arizona, California, Florida, Hawali, lowa, Maryland, Mississippl, Nebraska New Jersey, North Dakota, Ohio, Pennsylvania, South Dakota, Utah, and Virginia. These States represent 35.6 percent of the U,S. youth population at risk. The findings are direct refiections of the activities of the courts in each jurisdiction and are not national
estimates. For methodology, definitions of terms, and offenses within categories, see Appendix 16.
${ }^{\text {a Detail may not add to totals because of rounding or interpolation }}$ techniques.

Note: Questionnalres are sent annually to the U.S. Attorneys' offices in each of the
Federal judicial districts eliciting data concerning indictments and convictions during the year as well as prosecutions awailing trial on December 31 of each year. These data cover persons elected or appoinied to office and career (staff) government employees; "others involved" include individuais who hold no official position, but who participated in an offense aimed at corrupting another's public office. "Abuse of public office" includes offenses such as extortion, bribery, and conflict of interest.
${ }^{\text {a }}$ The $19 a 3$ figures were reviewed to attempt to identify the reason for the substantial jump in prosecutions of Federal officials. The explanation appears to be two-fold; there clearly has been a greater focus on Federal cornuption nationwide, but there
also appears to have been more consistent reporting of tower-level employees who abused their office, cases that may have been overiooked in the past. For reference, the U.S. Attomeys' offices were told: "For purposes of this questionnaire, a public corruption case Includes any case involving abuse of office by a public employee. We are not excluding low-level employees or minor crimes, but rather focusing on the job-relatedness of the offense and whether the offense involves abuse of the public trust placed in the employee."

Note: The Center for Judicial Conduct Organizations conducts annual surveys of judicial conduct commissions. These commissions are typically State agencles created by statute or conslitutional amendment with the mandate to recelve, investigate, and dispose of complaints regarding judicial misconduct. The judiclal conduct commissions handie complaints such as junicial prejudice or bias, slow processing of orders, procedural or administrative Irregularity, courtroom demeanor, and confllct of interest. (The Center for Judicial Conduct Organizations, Judiclal Conduct Reporter 3 (Fall 1981), p. 2.) A confidentiatity provision prohibits fevealing disposition of complaints in Virginia and Wyoming. Information was not available for lowa, Maryland, Rhode Island, South Dakota, and West Virginia. The data presented are for 1989 and 1990; however reporting perlods vary across jurisdictions, with some States reponting by calendar year and others by fiscal year. Cross jurisdiction comparisons should be done cautiously due to differences among the States in definitions. of complaints and recording practices. (The Center for Judicial Conduct Organizations, Judiclal Conduct Reporter 7(Fall 1985) p. 1.) For the States of Alaska, Arkansas, California, Georgia, Idaho, Kansas, Michigan, Mississippl, Missourl, New Hampshire, New Mexico, and Oklahoma any discrepancies in totals usually are due to multiple or consolidated complaints and/or dispositions.
${ }^{\text {States do not maintain uniform reporting periods. Most States reported data for the }}$ calendar year 1989. However, the following States reported data fer the calendar year 1990: Nebraska, South Carolina, and Vermont. The following jurisdictions reported on a fiscal year basis: Florida, Georgia, Hawali, Kentucky, Missouri, New Maxico, North Caroli-
na, Oklahoma, Utah (7/1/89) through 6/30/90); Texas (9/1/89 through 8/31/90); Alabama and the District of Columbia (10/1/89 through 9/30/90); Calfornia (12/3/89 through $11 / 30 / 90$ ); Tennessee ( $8 / 23 / 89$ through $8 / 21 / 90$ ).
${ }^{\text {b }}$ Category includes complaints dismissed after no investlgation, minimal or initial investigation, or substantial investigation.
${ }^{\text {Con }}$ Censure by Court of the Judiciary not the Commission. Alabama is two-tier.
${ }^{\text {S }}$ Suspension as a final sanction by Court of the Judiciary not the Commission.
${ }^{\theta}$ Commission does not consider a complaint "disposed" until Supreme Court has formally pated.
Reporting year was from 9/1/89 to 12/31/89.
${ }^{9}$ Private and public censure figures were not available in 1989, but were available in 1990. ${ }^{\prime}$ Not included in this total is a complaint investigated by the Commisslon that has been tabled until additional action needs to be taken.
Twenty-two referred to Administrative District Judge of appropriate district prior to Judicial Council handling complaints against Magistrate Judges. As of 7/1/90, Council handles all complaints agbinst Magistrate Judges.
Commission reprimand is always private, because only the Court can impose discipline from private reprimand to removal.
These cases resulted in letters to cease and desist and an admonishment.
'Referral of Judicial Conduct Organization's recommendation of disciplinary action to Supreme Court, where it was pending at the end of 1989.

Table 5.103
Army personnel tried and percent convicted in General and Speclai (BCD) Courts-Martlal
By type of personnel, fiscal years 1971-91

Note: In the military justice system, a General Court-Martial consists of a military judge and not less than five members (jurors), although a trial may be heard by a military judge alone, if requested by the accused (10 U.S.C. 815). A Special Court-Martial consists of not less than three members, or a military ludge and not less than three members, or trial by military judge alone, if requested by the accused (10 U.S.C. 815). The jurisdiction of the Special CourtMartial is limited to non-capital offenses. In addition, a Special Court-Martial cannot adjudge a dishonorable discharge, dismissal, confinement longer than 6 months, hard labor without confinement for longer than 3 months, forfelture of more than two-thirds pay, or any forfeiture of pay for longer than 6 months. If a bad conduct discharge (BCD) is adjudged, the Special Court-Martial must have included a verbatim record of the proceeding, counsel for the accused, and a military judge (10 U.S.C. 819). This is referred to as a Special (BCD) CourtMartial.

These data reflect the combined activity of both General and Special (BCD) Courts-Martial. The data presented for years prior to and including 1976 coincide with former Federal
fiscal years. The transition quarter refers to the period July i, 1976 to Sept. 30, 1976. The fiscal year for the Federal Government is now from October 1 to September 30.
a Includes one cadet.
bincludas one civilian.
$c_{\text {Includes two prisoners. }}$
${ }^{d}$ The number of enlisted personnel tried is much lower than previous years because there were fewer trials than usual during the deployment to Southwest Asia and subsequent military operations in that region. In addition, the size of the Army is currently being reduced.

Note: See Note, table 5.103. A Summary Court-Martial is a millitary trial by one commissioned officer who need not be a lawyer. Punishment may not exceed 30 days in confinement, and may include reduction and forfeitures of not more than two-thirds of 1 month's pay. No counsel is furnished for prosecution or defensi. Accused personnel have the option to refuse trial by Summary Court-Martial, but retusal may result in the charges being referred to a higher level court-martial. The data presented for years prior to and including 1976 coincide with former Federal fiscal years July 1 to June 30. The transition quarter refers to the pertod July 1, 1976 to Sept. 30, 1976. The fiscal year for the Federal Government is now from October 1 to September 30.

## Section 6

## Persons under correctional supervision

Information presented in this section focuses on persons under community supervision, juveniles in public and private confinement facilities, the number and characteristics of jails and jail inmates, and myriad characteristics of State and Federal prison populations. In addition, information is provided on clients in drug and alcohol treatment units as well as prisoners executed and under sentence of death.

The U.S. Bureau of the Census conducts an annual survey for the Bureau of Justice Statistics examining parole and probation in the United States. The results of this survey provide data on the number, rate, and movement of persons under parole and probation supervision. When available, these data are presented for each of the 50 States.

A series of tables on juveniles confined in State and local facilities is derived from a national census of public and private juvenile facilities conducted periodically by the U.S. Bureau of the Census. Data presented include the number and confinement rate of juveniles, annual admissions and discharges, characteristics of juveniles detained, average length of stay, and average cost per resident. Trend tables based on data from the past seven censuses provide comparisons for the years 1975 through 1989. Also presented are tables reflecting problems reported by youth seeking services from runaway and homeless youth centers as well as the deinstitutionalization of status offenders.

The next section presents data on local jails. This information is from the National Jail Census, conducted every five years, and the Annual Survey of Jails which is conducted in noncensus years. Information provided includes: the number of jails and jail inmates, average daily population, juveniles held in jails, capacity of jails, annual admissions and releases, inmate-to-staff ratios, and causes of inmate deaths. Data from the 1991 Survey of Inmates in Local Jails provide characteristics of jail inmates such as sex, race, ethnicity, offense, prior drug use, and involvement in drug treatment. Trend tables are provided when available, allowing comparisons for the years 1983 through 1991.

Information on State and Federal prisoners is derived from an annual census of all State correctional departments and the Federal Bureau of Prisons. These tables present the number and rate of prisoners under State and Federal jurisdiction at yearend, admissions and releases during the year, type of release, and selected prisoner characteristics. A number of trend comparisons are also provided. These surveys also provide addi-
tional descriptive information; this includes inmate characteristics, criminal history, characteristics of violent offenders, and involvement with drugs.

A series of tables display information on female prison inmates. These data are derived from various Bureau of Justice Statistics databases and a survey of female State and Federal prisoners conducted by the American Correctional Association. These tables provide demographic characteristics of female inmates, criminal history, offense, alcohol and drug use, and victim-offender relationship.

This section also presents data on life term inmates, drug treatment programs for inmates, shock incarceration, prison academic education programs, and sex offender treatment programs in State prisons. The number of escapes from State prisons and escapees returned; and population and capacity data for U.S. Navy and U.S. Marine Corps correctional centers are also displayed.

A series of tables dealing with clients in drug and alcohol treatment units are also presented in this section. This information includes the number of drug and alcohol treatment units in the United States, clients in treatment, client characteristics (sex, age, race, ethnicity, and jurisdictional location), budgeted capacity, and utilization rate.

A section on post-release supervision focuses on conditional and unconditional releases from State and Federal correctional facilities, rates of persons on parole, movement of the parole population, and persons released from parole supervision. Data derived from the National Corrections Reporting Program provide information on Federal and State parole entries and discharges.

The final portion of this section presents data on inmate deaths, death sentences, and executions. State and Federal prisoners sentenced to death, movement of prisoners on death row, and persons executed or otherwise removed from death row are provided. Selected characteristics of persons sentenced to death and executed are included. In addition, methoas of execution used in death penalty States and execution trends are provided for each State.

Note: These data are from a survey of probation and parole agencies of the 50 States, the Dlstrict of Columbla, and the Federal system on 1989 and 1990 probation and parole populations. The survey was conducted by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics. Persons on probation are defined as offenders who have been placed under the supervision of a probation agency resulting from a court order. Excluded under this definition are persons placed on bench probation, court probation, summary probation, or any status not requiring supervision by a probation agency. Parolees are offenders conditionally released from prison to parole supervision either by a discretionary parole board decision or by futfiliting the conditions for a mandatory release. Many States update their population counts, so that the Jan. 1, 1990, numbers may differ from those previously publistied for Dec. 31, 1989. For a discussion of survey methodology, definitions of terms, and jurisdictional explanatory notes, see Appendix 17.
${ }^{\text {a }}$ Unpublished U.S. Bureau of the Census estimates of the adult population age 18 and older for July 1, 1989 and Apr. 1, 1990, were used to calculate rates.
${ }^{\circ}$ Federal and State entries do not sum to total because of rounding.
${ }^{\text {C }}$ Maine eliminated parole in 1976. See Appendix 17 for additional information. ${ }^{0}$ Estimated.

Note: Persons under supervision of the Federal Probation System Include persons placed on probation--elther by U.S. District Courts, U.S. magistrates, or at the request of U.S. Attorneys (deferred prosecution)-and Federal offenders released from confinement on parole or mandatory release. A Federal prisoner is eligible for mandatory release when the prisoner has served the full term of impris onment less "good-time" allowances. If the offender has earned more than 180 days of "good-time" credit, supervi sion (as if on parole) is for that period in excess of 180 days. If "good-time" is less than 180 days, release occurs without supervision.

These data represent persons who began supervision in the 12 -month period prior to June 30 of the year noted. The Canal Zone, Guam, and the Virgin Islands began reporting data in 1977.
"Pretrial diversion" was called "deferred prosecution" in years prior to 1977.
"Special parole" refers to a specified period of parole attached to a term of imprisonment at sentencing. This provision is applicable to violations of certain drug laws (see Drug Abuse Prevention and Control Act of 1970, Public Law 91-513, Oct. 27, 1970, 84 Stat. 1260).
"Supervised release" refers to a specified term of postrelease supenvision enacted in November 1987 under the Federal Sentencing Guidelines.

| Drug offenses | 27,052 | 34 | 61 | 27 | 20 | 74 | 69 | 11 | 85 | 60 | 39 | 65 |
| Tratficking | 15,480 | 19 | 66 | 24 | 23 | 67 | 63 | 9 | 86 | 59 | 40 | 68 |
| Possession | 11,572 | 15 | 56 | 32 | 16 | 84 | 75 | 13 | 85 | 62 | 37 | 62 |
| Weapons offenses | 2,117 | 3 | 30 | 19 | 21 | 37 | 42 | 7 | 95 | 45 | 54 | 58 |
| Other offenses9 | 13,239 | 17 | 45 | 26 | 18 | 36 | 42 | 9 | 86 | 66 | 31 | 55 |

Note: These data were compiled by the U.S. Department of Justice, Bureau of Justice Statistics. The data were drawn mainly from two surveys: a survey of felors sentencea to probation in 100 counties nationwide in 1986, and a follow-up sunsey of felons sentenced to probation in 32 of the original 100 countles. The follow-up survey comprised 12,370 sample cases representing 79,043 felons placed on probation in 32 counties from 17 States. These data are derived from a sample and therefore subject to sampling variation. Any person convicted of multiple offenses received the offense designation of the most sericus felony conviction offense. The hierarchy from most to least serious is generally the order in which offense categories are displayed in the table. Conviction offense was ascertained in 100 percent of cases; jail continement in original sentence, 99 percent; prior felony conviction, 76 percent; sentence recommendation, 50 percent; drug abuser, 69 percent; intensive supervision, 61 percent; sex, 99 percent; race and age, 97 percent.

For survey methodalogy and a list of paricipating counties, see Appendix 18.
${ }^{\text {a }}$ based on those for whom a Pre-Sentence Investigation Report was prepared.
$\mathrm{b}_{\text {Includes }}$ murder and nonnegligent manslaughter.
${ }^{\mathrm{C}}$ Less than 1 percent.

Note: These data are from the Census of Public Juvenile Detention, Correctional, and Shelter Facilities, conducted by the U.S. Bureau of the Census for the U.S. Department of Justice, Office of Juverile Justice and Delinquency Prevention. Census dates were Dec. 31, 1979; Feb. 1, 1983 and 1985; Fab. 2, 1987; and Feb. 15, 1989. One-day counts rellect the number of juveniles under custody on the census date. Admissions figures are calendar year data and were collected in 1978, 1982, 1984, 1986, and 1988. For survey methodology and definitions of terms, see Appendix 19.

Note: See Note, table 6.12. Juvenile custody rates are calculated by dividing the number of juveniles in public facilities on the census date by the number of persons from 10 years of age up to the statutorily defined maximum age of original juvenile court jurisdiction in each State. For survey methodology and definitions of terms, see Appendix 19.
${ }^{\text {a }}$ Custody rates refer to the number of juveniles on the census date.

${ }^{\text {a }}$ Design capacity is the number of residents a facility is constructed to hold without double bunking or housing residents in areas not designed as sleeping quarters.
Refers to the total annual operating costs for State and local governments administering juvenile facilities. Operating costs are not adjusted for inflation and are based on expenditures from the calendar year.
${ }^{C}$ These figures are based on annual data from the calendar year preceding each census date.

| Prostitution | 1 | 2 | 1 |
| Venereal disease | 1 | 1 | 0 |
| None of the above | 19 | 19 | 20 |

Note: These data were collected by the U.S. Department of Health and Human Services and are for the period Oct. 1, 1989 to Sept. 30, 1990. The data were collected in response to Section 361 of the Runaway and Homeless Youth Act, Title III of the Juvenile Justice and Delinquency Prevention Act of 1974, as amended, including amendments and renumbering under the Anti-Drug Abuse Act of 1988 (P.L. 100-690). The Runaway and Homeless Youth Act is administered by the Family and Youth Services Bureau, within the Administration for Children, Youth and Families, Office of Human Development Services, Department of Health and Human Services.
These data are derived, in large part, from the Youth Information Forms that are filled out by basic center staff for each youth receiving shelter or ongoing services. In fiscal year 1990, there were 338 basic centers located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, the Northern Mariana Islands, and Palau. It is important to note that center submission of the data to the U.S. Department of Health and Human Services was voluntary. Approximately 60 percent of the centers reporied at least partial data. Both the response rate and the nonrandom nature of the sample should be kept in mind when interpreting these data. The U.S. Department of Health and Human Services defines a runaway youth as a "person under 18 years of age who absents himself or herself from home or place of legal residence without the permission of parents or legai guardian." A homeless youth is defined as a "person under 18 years of age who is in need of services and without a place of shelter where he or she receives supervision and care." (Source, pp. 2, 3.)
${ }^{2}$ Because mutitiple responses are permitted, totals exceed 100 percent.

Table 6.33
Deinstitutionalization of status offenders under the Juvenlle Justice and Dellnquency
Prevention Act of 1974
By State, 1988

Note: These data were collected by the U.S. General Accounting Office to determine the extent to which status offenders are detained in secure facilities. The Juvenile Justice and Delinquency Provention Act of 1974 established a formula grant program for States to improve their juvenile justice systems. One component of the Act stipulated that States receive grant funds for removing status offenders from secure detention and correctional facilities. Status offenders are juveniles under 18 years of age who are charged with such violations as truancy, possession of alcohol, and running away. These data also include nonoffencers Nonoffenders are juveniles who may have come in contact with the legal system for reasons other than illegal behavior, such as being neglected or abused.
aStates have entered the program at varying times. When States enter the program, they are required to identify the number of status offenders held in secure detention for longer than 24 hours.
bstate increased from base year but did not exceed the maximum threshold of status offenders detained set by the program.
Cln 1987, Nevada had 3 years to reduce its deinstitutionalization of status offenders viola-
tions.
oDid not participate in the program in 1988.

| Percent of fated capacity occupled | 80\% | 90\% | 94\% | $96 \%$ | 98\% | $101 \%$ | 108\% | $104 \%$ | $101 \%$ |

Note: Data for 1983 and 1988 are from the National Jail Census, taken every 5 years and conducted for the Bureau of Justice Statistics by the U.S. Eureau of the Census. Questionnaires were mailed to all $(\mathrm{N}=3,358)$ locally-administered jails in the Nation in January 1983. Through the use of varlous tollow-up procedures a response rate of 99 percent was achieved. In 1988, questlonnaires were malled to 3,448 locally-administered jails in the Nation during the week of August 1. Forty-four jalls were added to the initial mallout, and 176 were deleted, leaving a final count of 3,316 facilities. Through the use of various follow-up procedures a response rate of 100 percent was achieved.

Data for 1984-57 and 1989-91 are from the Annual Survey of Jalls that is taken during noncensus years. Data for 1984-87 and 1989 are based on figures foported for June 30. Data for 1990 are based on figures reported for June 29. Data for 1991 are based on figures reported for June 28. The survey is based on all jalls in jurisdictions with 100 or more jail inmates and a stratified random sample of jurisdictions with an average daily population of less than 100 inmates. For $1984,1,164$ jalls representing 893 jurisdictions were surveyed; in 1985, 1,142 jails in 874 jurisdictions were represented in the survey; in 1986, 1,137 jalls in 868 jurisdictions were included; in 1987, 1,135 jails in 866 jurisdictions were included; in 1989, 1,128 jails in 809 jurisdictions were included; in 1990 1,135 jails in 804 jurisdictions were included; and in 1991, 1,124 jails in 799 jurisdictions were included. Data for these survey years are estimates and therefore subject to sampling error.

A local jail is detined as a facility that holds inmates beyond arralgnment, usually for more than 48 hours, and is administered by local offlclals. Specifically, excluded from the count were temporary lockups that house persons for less than 48 hours, physically separate drunk tanks, ather holding facilities that did not hold persons after they fad been
formally charged, and Federal or State administered facilities. (Source, 1991, p. 5.) Connecticut, Delaware, Hawail, Rhode Island, and Vermont have combined jail-prison systems and therefore were excluded in 198391. Alaska was also excluded as a combined system in 1987-91, In 198891, tive locally-operated jails in Alaska and eight jails that were privatelyoperated under contract for local governments were included.

For 1988 data, a number of hems were incompletely reported. Where the number of inmates convicted and awaiting sentence was not avallable, estimates were accepted. In some cases data for inmates convicted and awaiting sentence may have been reported as awaiting arraign ment/trial or being tried. The race of Hispanic inmates and Hispanic staft was incompletely reported. Respondents estimated approximately 20 percent of the data on time spent in jail prior to discharge.
$a_{\text {Juveniles are persons of an age specified by State statute (usually }}$ under 18) initially subject to juvenilie court authority even if tried as adults in criminal court. Because fewer than 1 percent of the jail population were fuveniles, caution must be used in interpreting any changes over time. Percent of rated capacity occupled is besed on the 1-day count of inmates.

Note: See Note, table 6.34. The ratio of jail inmates to correctional offlcers is determined by dividing the average daily inmate population by all correctional officers except community volunteers. Jail size is based on average daily population. - indicates that there are no jails of that size in the State.

Note: The 1989 Survey of Inmates in Local Jails was conducted by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics. A nationallyrepresentative sample of 5,675 inmates in 424 local jails were interviewed from July to September 1989. A jall is defined as a confinement facility administered by a local government agency that holds persons pending adjudication and persons committed atter adjudication, usually for sentences of a year or less. These data are estimates derived from a sample and thereiore subject to sampling variation. For information on methodology and survey sampling procedures, see Appendix 20.
a Detail may not add to total because of rounding.
Includes Asians, Pacific Islanders, American Indians, Alaska Natives, and other racial groups.

Criminal history of Jall Inmates
By sex, race, and Hispanic origln, United States, 1989a

|  | Percent of jail inmates |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Sex |  | Race and Hispanic origin |  |  |  |
|  |  |  | White non- | Black non- |  |  |
| Criminal history | Male | Female | Hispanic | Hispanic | Hispanic | Other ${ }^{\text {b }}$ |
| Total | 340,249 | 35,333 | 144,889 | 157,110 | 64,676 | 8,907 |
| No previous sentence | $21.5 \%$ | 31.3\% | 19.1\% | 23.0\% | 29.2\% | 19.2 \% |
| Current violent offense | 6.7 | 6.2 | 6.0 | 7.4 | 6.3 | 6.9 |
| Current nonviolent offense | 14.8 | 25.1 | 13.1 | 15.6 | 22.9 | 12.3 |
| Violent recidivists ${ }^{\text {c }}$ | 31.4 | 16.2 | 27.3 | 33.7 | 25.5 | 35.7 |
| Current and prior violent | 8.1 | 2.2 | 6.3 | 8.9 | 6.0 | 13.0 |
| Currant viclent only | 10.9 | 6.2 | 11.1 | 11.0 | 7.7 | 10.0 |
| Prior violent only | 12.4 | 7.8 | 9.9 | 13.8 | 11.8 | 12.7 |
| Nonviolent recidivists ${ }^{\text {d }}$ | 47.1 | 52.4 | 53.6 | 43.2 | 45.2 | 45.1 |
| Priar minor public-order offenses only ${ }^{\text {e }}$ | 3.4 | 4.1 | 3.9 | 3.2 | 3.0 | 3.7 |
| Other prior ofienses | 43.7 | 48.3 | 49.7 | 40.0 | 42.2 | 41.4 |

Note: See Note, table 6.46. A recidivist was defired as an inmate who reported a sentence to probation or incarceration at any time in the past. The data presenfed above exclude an estimated 19,971 inmates in 1989 for whom current offense and prior probation or incarceration offenses were unknown. For information on methodology and survey sampling procedures, see Appendix 20.

Apercents may not add to 100 because of rounding.
Includes Asians, Pacific islanders, American Indians,
Aleuts, Eskimos, and other racial groups.
CViolent recidivists were convicted in the past, and at least either the current charge or a previous conviction was for a fiolent offense.
${ }^{\mathrm{d}}$ Nonviolent recidivists were convicted of only nonviolent offenses in the past, and their current charge or conviction was for a nonviolent offense.
Includes drunkenness, vagrancy, loitering, disorderly conduct, minor traffle offenses, commercialized vice, invasion of privacy, contributing to the delinquency of a minor, liquor law violations, and juvenile-status offenses.

Note: The Drug Treatment Program Survey was conducted as bia. Jails in Hawail and Vermont did not respond. These part of a larger program funded by the U.S. Department of responses represent 57 percent of all jails nationally. Justice, Bureau of Justice Assistance (BJA) entited "Drug Treatment in the Jail Setting: A National Demonstration Program." The American Jail Association was awarded a grant from BJA to administer a survey of the Nation's jails regarding the presence of drug treatment programs. Questionnaires were mailed to 3,400 jails in March 1988. Through the use of various follow-up procedures, 1,737 surveys were returned as of Apr, 10, 1990. Findings based on fewer than 1,737 respondents reflect missing information from the suivey. Surveys were returned from 48 States and the District of Colum-
${ }^{\text {a }}$ Drug treatment services other than detoxification services. brogram includes group counseling, drug education, transitlon planning, and referral to outside treatment agencles.

Figure 6.1
Sentenced prisoners in State and Fedoral Institutlons on Dec. 31
United States, 1925-90

Note: Prison population data were compiled by a yearend census of prisoners held in custody in State and Federal institutions, Data for 1925 through 1939 include sentenced prisoners in State and Federal prisons and reformatories whether committed for felonies or misdemeanors. Data for 1940 through 1970 include all adult felons serving sentences in State and Federal institutions. Since 1971, the census has included all aduts or youthful offenders sentenced to a State or Federal correctional institution with maximum sentences of over 1 year.
Beginning on Dec. 31, 1978, a distinction was made between prisoners "in custody" and prisoners "under jurisdiction." As defined in a 1978 report (U.S. Department of Justice, Bureau of Justice Statistics, Prisoners in State and Federal Institutions on December 31, 1978, NPS Bulletin SD-NPS-PSF-6 (Washington, DC: USGPO, 1980)), "in custody" refers to the direct physical control and responsibility for the body of a confined person. "Under jurisdictlon" Is defined as follows: A State or Federal prison system has jurisdiction over a person if it retains th. legal power to incarcerate the person in one of its own prisons. Jurisdiction is not determined by the inmate's physical location; jurisdiction is determined by the legal authority to hold the inmate. Examples of prisoners under the jurisdiction of a given system, but not in its custody, are those housed in local jails, in other States, or in hospitals (including mental health facilities) outside the correctional system; inmates on work release, furlough, of bail; and State prisoners held in Federal prisons or vice versa.
For information on methodology, definitions of terms, and a detalled explanation of revised, estimated, and noncomparable data, see Appendix 21.

Nole: See Notes, figures 6.1 and 6.4. Sentenced prisoners are defined as those sewing sentences of more than 1 year. The data for the years $1971-77$ represent sentenced prison ers in the custody of State and Federal institutions. The data for 1978-90 represent sentenced prisoners under the jurisdiction of State and Federal correctional authorities. Population estimates are provided by the U.S. Bureau of the Census. Data for 1985 and 1986 have been revised from previous presentations. For information on methodology, definitions of terms, and jurisdictional explanatory notes, see Appendix 21.
${ }_{\text {a }}$ Figures include both jall and prison inmates; fails and prisons are combined in one system,
$\mathrm{b}_{\text {All data for Arizona, California, the District of Columbia, Georgla, Illinols, Irdiana, lowa, }}$ Massachusetts, Michigan, North Carolina, Texas, West Virginla, and Wycining are custody, rather than jurisdiction counts. Florida's counts are based on custody data ${ }^{c}$ Counis of inmates by sentence length may be slightly incorrect. See "Sentencing information" for the relevant jurisdictions in Appendix 21.

Note: See Note, figure 6.1. All figures on admissions and releases are of prisoners sentenced to more than 1 year. The data represents the number of transactions and not the number of individual prisoners who were involved in such movements. Because of different counting procedures among the States, a "0" entry in any categery can mean that: (1) the State uses this category of admission or release but had no inmates in the category during 1990; (2) the State uses this category but cannot report the number of inmates in the category; or (3) the State does not use this category. "Unconditional releases" include expiration of sentence, commutation of sentence, and other such unqualified discharges. "Conditional releases" are those involving some form of supervision over the offender upon
return to the community and include parole, probation, supervised mandatory release
(early release because of good behavior), and other forms of conditional discharge. For information on methodology, detinitions of terms, and jurisdictional explanatory noles, see Appendix 21.
${ }^{\text {a Figures include both jail and prison inmates; jalls and prisons are combined in one }}$ system.

Note: These data were coilected by the U.S. Department of Justice, Fyreau of Justice Statistics through the National Prisoner Statistics (NPS) program. The NPS is now administered by the U.S. Bureau of Justice Statistics and data are collected and processed by the U.S. Bureau of the Census. Where admission data are avallable on "sentenced feions admitted to prison as new court commitments," these data are used. Where there are no data on new court commitments, data on a more broadly defined category of admitted prisoners are the source of the numbers for race. The more broadly defined category of prisoners admitted applles to the years 1926-36 and 1980-82. For 1926 to 1936 the coly available data are for new court commitments that include both sentenced felons and a small number of sentenced misdemeanants. For 1980 the data cover all types of sentenced felons admitted to prison, not just new court commitments. For 1981 and 1982 the figures for race cover sentenced felons who were new court commitments or returned conditional release violators. For
1926-36 felons were defined as all admissions regardless of sentence length.
From 1937 to 1960 telons were dethed as prisoners with maximum sentences of 6 months or longer. No data were available for 1961-63. From 1964 to 1970 felons were defined as prisoners with maximum sentences of 1 year or longer.

After 1970 felons were defined as prisoners with maximum sentences loriger than 1 year. (Source, pp. 1, 2.)

No statistics were available for 1951-59, 1961-63, 1965-69, and 1971-73. The Federal Government apparently did not operate the NPS admissions serizs during these years. (Source, p. 2.) The number of admissions to State and Federal prisons includes prisoners whose race was unknown. Percentages are based on figures that exclude cases where race was unknown. The "other races" category consists of Asians, American Indians, Alaska Natives, and Pacific Istanders.
${ }^{\text {a }}$ For 1926 the "white" total shown excludes Mexicans and the "other races" total shown includes Mexicans.
${ }^{5}$ Males only.
CIncludes blacks plus "other" races.

| 45 to 54 years | 4.0 | 4.1 |
| 55 years and older | 1.3 | 1.5 |
| Median age | 28 years | 27 years |
| Education |  |  |
| 9th grade or less | 18.4 | 17.8 |
| 9th to 11th grade | 45.1 | 44.8 |
| High school graduate | 28.6 | 29.1 |
| Some college | 7.6 | 8.0 |
| Other | 0,3 | 0.4 |
| Median education | 11th grade | 11th grade |

Note: These data were collected by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics through the Nationa: Corrections Reporting Program. Thirty-five States, the Federal Bureau of Prisons, the District of Columbla, and the Calitorria Youth Authority (CYA) provided data on prison admissions and releases, and entries to parole. Twenty-elght States, the Federal jurisdiction, and the CYA provided data on discharges from parole.

The 307,562 prison admissions reported by 35 States, the District of Columbia, and the CYA accounted for about four-fitths of all prison admissions in these jurisdictions during 1988. New court commitments are offenders entering prison directly from a sentence by a court and not from an unsuccessful period of community supervision.

Data on race were reported for 92.8 percent of the 307,562 admissions to prison with a sentence of more than 1 year, data on ethnicity for 79.5 percent, and data on education for 46.3 percent. Data on race were also reported for 92.8 percent of the 207,482 new court commitments with a sentence of more than 1 year, data on ethnicity for 76.3 percent, and data on education for 51.7 percent. Data on age at admission were reported for 99.8 percent of all admissions and new court commitments. The median is the point above which and below which 50 percent of all cases fall.
For methodology, offenses within categories, and juriscictional explanatory notes, see Appendix 22.
${ }^{\text {ancludes }}$ American Indians, Alaska Natives, Asians, and Pacfic Islanders.

| More than \$1,000 | 31.4 | 31.5 |

Note: These data were collected by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics through the Survey of Inmates of State Correctional Facilities. This survey, conducted in 1979 and 1986, employs a two-stage stratified probability sampling design with the probabilities proportional to the size of the correctional facifity. In the first stage the sample is selected independently from two frames: the ifrst for males only, and a second to allow an oversample of females. Within each frame, facillities are stratified by type (prison versus community corrections facillty) and by census region. In the second stage, interviewers visit each selected fackity and select a sample of inmates using predetermined sampling procedures. In 1979, 11,397 interviews were conducted at 215 prisons with a selected sample of about 12,000 inmates. In 1986, 13,711 interviews were conducted at 275 prisons from a sample of approximately 15,000 inmates. In 1979, the State prison population was an estimated 274,563. In 1986, the estimated prison population was 450,416. For each characteristic other than ethnicity and income, data were available for at least 99 percent of the inmates. Ethnicity data were available for 95 percent of the inmates in both 1979 and 1986. Income data were available for 50 percent of the inmates in 1979 and 89 percent of the inmates in 1986. These data are estimates derived from a sample and therefore subject to sampling variation.
a The median age was 26 in 1979 and 28 in 1986.
${ }^{6}$ The median number of years education was 11 in 1979 and 10 in 1986.

Table 6.86
Use of Illegal drugs prior to Incarceration by State prison Inmates
By sex, United States, 1986

|  | Percent of State prison inmates |  |
| :---: | :---: | :---: |
| Illegal drug use batore prison | Female | Male |
| Any drug ${ }^{\text {a }}$ |  |  |
| Ever used | 71.8 \% | $79.9 \%$ |
| Ever used on a regular basis ${ }^{\text {b }}$ | 56.5 | 62.6 |
| Used in month before current offense | 49.6 | 56.0 |
| Used daily in month befare current offense | 39.2 | 42.7 |
| Major drup ${ }^{\text {c }}$ |  |  |
| Ever used | 53.8 | 52.3 |
| Ever used on a regular basis ${ }^{\text {b }}$ | 39.3 | 34.8 |
| Used in month before current offense | 32.2 | 27.8 |
| Used dally in month before current offense | 24.2 | 18.3 |
| Under the influence of drugs at the time of current offense | 33.7 | 35.4 |

Note: See Notes, tables 6.82 and 6.83. Drug use history was based on seif-reports provided by the inmates. In the interview, inmates were asked a very detalled set of questions about each of 10 drugs. Erug use historles were developed by examining the responses to all 10 sets of questions, The drugs that were specifically asked about were heroin or methadone; amphetamines and barbiturates (atone or in combination); methaqualone (quaaludes); cocaine; LSD; PCP; and marihuana or hashish. Alcohol use was examili ed in a separate set of questions.
${ }^{2}$ Includes heroin, methadone, amphetamines, methequalone, barbiturates, cocaine, PCP, SSD, and marlhuana/hashish.
${ }^{6}$ Used once a week or more for at lesst a month.
CMajor drugs include heroin, methadone, cocaine, PCP, and LSD.

| Once or twice a week | 3.4 | 6.1 |
| Dally | 6.8 | 7.5 |

Note: These data are from, a survey conducted by the American Correctional Association's Task Force on the Female Offender. In late 1987 the Task Force malled surveys to over 400 correctional faclilites in all 50 States, the District of Columbla, and the Federal Bureau of Prisons. Each facility coordinator was asked to administer the questionnaire to a specified number of adult inmates or juvenile residents, using a random selection procedure specified In the instructions. Overall, the requested sample was 2,958 respondents. This represents approximately 6.9 percent of the approximately 43,000 female Inmates in the United States. Usable responses were received from a total of 2,094 inmates, or 70.8 percent of those requested. The number of adult respondents was 1,880 and the number of juvenile respondents was 214. These data are estimates derived from a sample and therefore subject to, sampling variation.

Respondents were asked: "How often did you use ...?" Information on alcohol use was not avaliable for 20 adults and 1 juvenile; marihuana, 34 adults and 1 juvenile; heroin, 35 adults and 1 juvenile; cocaine, 38 adults and 1 juvenile; and crack, 38 aduits and 1 juvenile.
${ }^{2}$ Percents may not add to 100 because of rounding.

Note; This information was collected through a survey of the 50 States, the District of Columbia, and the Federal Bureau of Frisons. The survey was malled to academic education departments in these corrections agencies during November and December 1991. Nebraska, New Hampshire, and the Districi of Columbla did not respond to the survey. In the table, Y indicates the existence of a program; -- indicates that the respondent did not provide the requested information.
${ }^{\text {a }}$ Over course of incarceration, most inmates participate to some degree.
Difficult to report success rate because program requirements vary.
Approximately
Depending on the unit to which Inmate is assigned.
In 1990, 499 inmates earned a G.E.D. from a population of about 7,000.
${ }^{f}$ At the Correctional Training Facility and the California Men's Colony Inmates can earn a four-year degree. At other instifutions inmates can earn a two-year degree.
$\mathrm{g}_{\text {All except those in Security Housing Units; segregation. }}$
Includes vocational programs.
English as a Second Language program offered.
375 to 400 G.E.D. diplomas and 5 to 7 associate's degrees awarded annually.
Correspondence courses only.
At one time; however almost all inmates participate prior to release.
${ }^{m}$ While a bachelor's degree is possible, time and scheduling constraints severely limit this potential and associate's degrees are more attainable and more common.
Interpreters are avallable
${ }^{\circ}$ Satellite facilities.
${ }^{\text {S }}$ Satellite facilitiles.
${ }^{9}$ Master's degree is possible but not likely.
${ }^{\mathrm{r}}$ A.B.E. and G.E.D. only.
${ }^{\text {S }}$ Programs are competency based; 4,337 inmates earned a G.E.D. in 1990-91.
$t_{2,990}$ completions in fiscal year 1990-91; includes A.B.E., G.E.D., vocational, and college.
${ }^{4}$ All inmates are eligible to participate however, housing status and custody level preclude some from enrolling.

## $V_{\text {Males. }}$

${ }^{W}$ Females.
$x_{\text {Leisure activities, }}$ physical fitness, and wellness programs are also part of the education department.
$Y_{\text {G,E.D. only. }}$

Note: See Note, table 6.99.
$a_{\text {includes full-time equivalent positions. }}$
$\mathrm{b}_{\text {Respondents were asked to compare salaries of teachers in prison to salaries of public }}$ school teachers in the same jurisdictlon; response categories were: public school teachers earn more, public school teachers earn less, they both earn about the same.
In most jurisdictions.
${ }^{G}$ Per month.
ef130 as of July 1991; 107 anticipated for December 1991.
$f_{\text {Because public school teachers work fewer months. }}$
Goth prison and public school teachers start at the same salary but public school teachers
adivance in salary at a more rapid rate.
Salaries vary because of differing salary schedules for the five community colleges involved:
When compared for equivalent contract days; prison programs are 12-month programs.
Approximately; about average.
Kper week.

Varies with each local school district.
$\mathrm{m}_{\text {Position dependent. }}$
$n_{\text {Plus an additional }} 120$ par-time teachers.
OTeachers in prison start out thigher but reach the top of the grade quickly.
$P_{g 2}$ correctional teachers and 250 from the community college system.
$\mathrm{q}_{\text {in the large citles. }}$
${ }^{r}$ However, prison teachers work 235 days and public school teachers work 190 days.
$\mathrm{s}_{\text {Based }}$ on number of hours worked.
tstate contracts for all teachers from local community college districts; district salary schedules vary.
128 State employed teachers; 25 contracied teachers.
Vlus an additional 150 positions contracted.

Table 6.105
Sex offenders, housing, treatment programs, and parole provisions
By Jurisdiction, 1990

| Jurisdiction | Total prison population | Number of incarcerated sex offenders | Are sex offanders housed separately? | Treatmient programming for sex offenders | Are all sex offenders eligibla for parole? | Special parole provisions for sex offenders? |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Alabama | 16017 | 1.247 | No | Individual and group counseling, support g' 'Lps. | Yes | No; must report to sheriff of county. |
| Alaska | 2,622 | 497 | No | individual I group counseling, support. i. | Yes | Treatment may be required; some restrictions. |
| Arizona | 14,771 | 797 | No | Individua, 3 group counseling. | No | -- |
| Arkansas | 6,817 | 881 | No | Individual counseling, support groups, treatment for medical related problems. | Yes | May be referred to local mental health services for treatment or to attend support groups ifi communlty. |
| California | 101,606 | 15,000 ${ }^{\text {a }}$ | No | Individual and group counseling, support groups. | No; most are ellgible; some recelve life without parole. | Out-patient treatment, no contact with minors without approval, and other special conditions. |
| Colorado | $8,043^{\text {b }}$ | 1,693 ${ }^{\text {c }}$ | No | Group counseling, individual counseling supplemental to group as needed, Sexaholics Anonymous support groups and limited chemical treatment. | Yes | Specialized parole supervision, participation in sex offender treatment, special conditions are added depending on offense. |
| Connecticut | 12,300 | $560{ }^{\text {d }}$ | No | Individual and group counseling, use of chemical treatment. | No; some have determinate sentences. | Usually stipulated to treatment; also true for majority of sexual offenders who leave on probation. |
| Delaware | 3,372 | 434 | No | Group counseling, medical services on a cyclical basis. | No; Department of Correcilons goals emphasized the certainty and consistency of punishment. Truth in sentencing is determinate and parole for most is abolished. | No |
| District of Columbia | 7,980 | 82 | No | -- | Yes | No |
| Florida | 44,868 | 4,957 | No, | Individual and group counseling. | No; must successfully complete program of treatment. | - |
| Georgla | 22,673 | 2,554 | No | Individual and group counseling, support groups. | No; due to nature of crime, maximum sentence may be served. | Community freatment may be a condition for some. |
| Hawall | 2,500 | $300{ }^{\text {a }}$ | No | Individual and group counseling. | Yes | Must be assessed, recelve treatment and agree to followup treatment. |
| Idaho | 1,906 | 402 | Yes; security reasons. | Individual and group counseling, support groups. | No; some have fixed sentences. | No; hope to have speciallized caselcads statied with trained onficers. |
| Illinols | $27,516{ }^{\text {e }}$ | 3,755 ${ }^{\text {f }}$ | No | Individual and group counseling. | Yes | Prisoner review board may put special conditions on parole. |
| Indiana | $13,000^{\text {a }}$ | 2,500 ${ }^{\text {a }}$ | No | Individual and group counseling. | Yes; mandatory 1 year parole for all offenders. | None required, but could include counseling, avolding certain individuals atc. |
| lowa | 4,015 | (9) | Somb; treatment purposes and security reasons. | Individual and group counseling; support groups. | Yes; however, lifers are not eligible for parole. | Continue sex offa, der treatment. |
| Kansas | 5,674 | 1,221 | No | Individual and group counseling, support groups. | Yes | Aftercare counseling; if child offender, must stay away from children. |
| Kentucky | 9,023 | 951 | Yes; most at Kentucky State Reformatory. | Individual and group counseling, referred to medical treatment. | No; must complete sex offender treatment program to meet the parole board. | Community sex offender treatment program where avallable, recommends conditions of parole; otherwise, referred to mental healith center. |

[^49]Sex offenders, housing, treatment programs, and parole provisions
By jurisdiction, 1990--Continued

| Jurisdiction | Total prison population | Number of incarcerated sex offonders | Are sex offenders housed separately? | Treatment programming for sex offenders | Are all sex offenders eliglble for parole? | Special parole provisions for sex offenders? |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Loutilana | 18,994 | 1,981 | No | Individual and group counseling. | No; some offe nses are nonparolable. | Reterral to mental health, sex offender therapy and support groups. |
| Maine | 1,620 | 289 | No | Limited group counselling. | No; parole abolished in 1976. | X |
| Massachusetts | 7,553 | 1.131 | No. | Individual and group counseling, support group. | Yes | No |
| Michigan | 31,880 | $3,881^{\text {h }}$ | No | Individual and group counseling. | Yes | -- |
| Minnesota | 3,178 | 643 | Yes; only when involved in sex offender programming. | Individua! and group counselling, support groups. | State does not have parole; has sentencing guidalines sysiem. | Residential placement and other special conditions. |
| Mississippl | 8,576 | 700 | No | Individual (upon request) and general medical treatment. | Some are serving mandatory or habitual criminal sentences. | No |
| Missouri | 15,188 | 1,800 | Yes; when in final phase of treatment. | Individual (as needed) and group counseling, support groups, medical treatment (as needed). | Sex offender must complete Missouri Sex Offender Program to be eligible. | Usually; vary according to resources of the district and community. |
| Nebraska | 2,433 | 280 | Yes; treatment purposes. | Individual and group counseling, support groups, psychlatric consultation is available. | Yes | Placed on Intensive supervision status for a minimum of 90 days. |
| Nevada | 5,715 | 793 | No | Individual and group counseling. | Yes | No |
| New Hampshire | 1,580 | 315 | Some for treatment purposes. | Individual and group counseling, support groups, chemical treatment. | Yes | Sometimes limitations on employment or living arrangements and other matters to limit exposure. |
| New Jersey | 23,518 | 1,761 | Yes; treatment purposes. | Individual and group counseling, support groups, specialized therapy at treatment center. | Yes | Those at special institution for sex offenders must be recommended for parole by special classification review board. |
| Naw Mexico | 3,200 | 467 | No | Individual counseling. | Yes | Depends on parole board requirements. |
| Now York | 55,399 | 3,802 | No | Individual and group counseling. | Yes | Parole is a separate agency and establishes its own guidelines. |
| North Carolina | 18,622 | 2,073 | No | Individual and group counseling. | Yes | No |
| North Dakota | 562 | 103 | No | Individual and group counseling, support groups. | No; must successfully complete sex offender program. | If qualified sex offender counselors are available in the area, parolee must attend sessions. |
| Ohio | 32,634 | 4,858 | Some offenders are assigned to treatment units for the duration of the program. | Individual and group counseling, support groups, routine health care not specifically related to sex offense or behavior. | No; some are released after expiration of definite sentence without further supervision. | If ordered by parole board as a special condition. |
| Oklahoma | 12,861 | 1.449 | No | Group counseling, support groups. | Yes | Must register with local police. |
| Oregon | 6,383 | 1,318 | Some, treatment pupposes. | Individual and group counseling, support groups, individual medical treatment determined by attending physician. | Yes | May include no contact with minors, submit to random polygraph tests, complete treatment, register with authorities, no contact with victims. |
| Pennsylvania | 21,930 | 2,746 | 3 institutions have sex offender program housing units. | Individual and group counseling, support groups, therapeutic communities at 3 institutions. | No; lifers are not eligible. | Continue in therapy, intensive supervision, no contact with victim. |
| Rhode Island | 2,605 | 283 | No | Individual and group counseling. | Yes | No, continuation of counseling is encouraged. |

[^50]Sex offenders, housing, treatment programs, and parole provisions
By Jurisdiction, 1990--Continued

| Jurisdiction | Total prison population | Number of incarcerated sex offenders | Are sex offenders housed separately? | Treatment programming for sex offenders | Are all sex offenders eligible for parole? | Speclal parole provisions for sex offenders? |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| South Carolina | 16,031 | 1,681 | No | Group and limited individual counselling. | Yes | No; sex offenders are classiffied as violent offenders and therefore have longer sentences to serve betore parole eligible. |
| South Dakota | 1,406 | 226 | No | Individual and group counseling. | Yes; however, lifers are not eligible. | Counseling in community. |
| Tennessee | $13,861{ }^{\prime}$ | 2,344 | No | Individual and group counseling, support groups. | Yes | Sometimes; special conditions for out-patieni/communith treatment. |
| Texas | 49,665 | 6,009 | Housing is assigned on a unit by unit basis for treatment and security purposes, depending on avallable facilities. | Individual and group counseling, support groups. | Yes | Must attend counseling for 1 year; tollow-up counseling for 5 years; placement on a specialized caseload while on parole. |
| Utah | 2,538 | 622 | Some for treatment and security reasons. | Individual and group counseling, support groups. | Yes, however, some are required to complete mandatory term. | Longer maximum length of parole; required treatment. |
| Vermont | 1,100 | 217 | If they are involved in treatment. | Individual and group counseling. | Yes | Participation in specialized treatment. |
| Virginia | 17,233 | 1,585 | No | Individua! and group counseling, support groups. | Yes | Frequently, special conditions for counseling and/or intensive supervision. |
| Washington | 8,411 | 1,902 | No; one facility is designed to house and treat sex offenders but assignment is not mandatory. | Individual and group counseling. | Yes | SRA provisions related to "communlty placement." |
| West Virginia | 1,699 | 339 | Yes; security reasons. | Individual and group counseling, support groups. | Yes | Recent psychological compieted before grenting of parole parole board may mandate treatment as condition of parole. |
| Wisconsin | 7,320 | 1,467 | One 100-bed unit for sex offenders at Oshkosh Correctional Institution, otherwise no segregated housing. | Individual and group counseling, support groups. | Yes | No |
| Wyoming | 703 | 251 | No | Individual and group counseling, support groups, occasional chemical treatment. | Yes, if comnuted from life sentence. | Parole board often stipulates sex offender therapy as a conditton of parole, however, therapy may be unavailable in the various communities. |
| Federal Bureau of Prisons | 62,000 | $500^{\text {a }}$ | Yes; treatment purposes. | Individual and group counseling, support groups, medical treatment if necessary. | Yes | Yes (no details provided). |

Note: This information was collected through a survey mailed to the 50 States, the District of Columbla, and the Federal Bureau of Prisons. Maryland and Montana did not respond to the survey. The survey did not specify which offenses ware to be included as sex offenses, therefore each jurisdiction used its own definition of "sex offenders." Total prison population figures were repoited by each jurisdiction. However, the survey specified no time frame for reporting population figures. As a result, population figures may differ from those presented elsewhere in SOURCEBOOK.

The Source presents the information as submitted by the responding agencies. No attempt is made by the Source to verity the information received.
a Estimated.
Jail backlog, community and intensive probation supervision.

Includes past and current convictions, plea bargains and institutional sex offenses; excludes jail backlog, community or intensive probation supervision.
${ }^{0} 560$ have a primary sex offense and 3,000 are identifiable male sexual offenders.

| West Virginla | 1,640 | 1,998 | 2,109 | 2,330 | $\begin{aligned} & \text { Yes - } 1993 \\ & \text { Yes - } 1995 \\ & \text { No - } 2000 \end{aligned}$ | No |
| Wisconsin | 7,464 | 9,581 | 11,841 | 19,385 | No | Yes; community residenilal confinement, community structured supervision program, reconsideration of people originally deferred to mandatory release and boot camps. |
| Wyoming | 1,102 | - | - | ** | $\cdots$ | Yes; increasing community allernative programs and introducing legislation for house arrest and day reporting centers. |
| Federal Bureau of Prisons | 63,67: | 79,033 | 100,470 | 136,980 | Yes | Yes; intermediate punishments such as community corrections centers, home conflnement, electronic monitoring, etc. |
| Note: This information was cullected through a survey of the 50 States, the District of Columbia, and the Federal Bureau of Prisons conducted between August and October 1991. Alaska did not respond to the survey. Colorado was unable to provide population projections or information on aliernatives to prison. Colorado, Loulsiana, New Mexico, Texas, and Wyoming do not develop population profections. The Source presents the information as submitted by the responding agencies. No attempt is made by the Source to verify the information received. <br> ${ }^{2}$ As of August through October, 1991. <br> Unavallable; Information dstermined every 3 years. <br> ${ }^{\text {C Phode }}$ Island is currently initiating a prison projection model and initial research regarding intermediate sanctions. Both programs are within the scope of internal development. The department is researching all aspects of intermediate sanctions for sentenced and pretrial populations. <br> dBased on current construction program. |  |  |  |  |  |  |

Table 6.107
Estimated number and percent of cllents in drug and/or alcohollsm treatment unlts
By sex, race, ethnicity, and age, United States, as of Sept, 28, 1990

Note; These data are from the National Drug and Alcoholism Treatrnent Unit Survey (NDATUS) and reflect information es of Sept. 28, 1990. The 1990 NDATUS was a jcint effort betwreen the National Institute on Drug Abuse (NIDA) and the National institute on Alcohol Abuse and Alcoholism (NIAAA), The NDATUS is a national survey that is designed to measure the location, scope, and characteristics of drug abuse and alcoholism $\mathfrak{f}$. latment and prevention facilities, services, and activitles throughout the 50 States, the District of Colun)bla, Guam, Puerto Rico, and the Virgin Islands. Both public and privately funded programs are included.

A total of 7,759 treatment units responded to the 1989 survey reporting a total of 734,955 clients in treatment and a total of 8,742 treatrnent units responded to the 1990 survey reporting a total of 767,829 clients in treatment. For a discussion of survey methodology, data limitations, and definitions of terms used in the 1989 NDATUS, see Appendix 23.
aExcludes clients for whom sex, race, ethnicity, or age was not known or not reported.
Source: U.S. Department of Health and Human Services, National Institute on Drug Abuse and National Institute on Alcohol Abuse and Alcohollsm, Highilghts from the 1990 Natlonal Drug and Alcohollsm Treatment Unit Survey (NDATUS) (Rockvile, MD: U.S. Department of Health and Human Services, Y991), p. 6.

Table 6.108
Estimated number of drug and/or alcohol treatment units, cllenis in treatment, budgeted capacity, and utilization rate

By jurisdiction, as of Sept. 30, 1989

Note: See Note, tabie 6.107. This table excludes treatment units which did not report budgeted capacity for alcohel or drug abuse clients. The total number of units in this table is not equal to the sum of units in tables 6.112 and 6,116 because combined units are counted only once. Readers should note that utilization rates may be affected by problems that some units experience in determining a budgeted capacity level for outpatient treatment. (Source, p. 13.) For a discussion of survey methodology, data limitations, and definitions of terms, see Appendix 23.

Note: Data have been collected from the organizations or agencles through a mail survey. The Navy also operates other small correctlonal centers and detention spaces in the United States and overseas. All facilities are for Naval personnel 17 years of age and older awaiting court-martial or serving court-martial sentences. "Normal capacity" is the number of inmates the faclity was designed to hold.
${ }^{\text {a }}$ These facilities retrain inmates for return to honorable service, preparation for return to civillan life, or holding for transter to the Federal Bureau of Prisons.

Table 6.122
Normal capacity and ayerage population of U.S. Marine Corps correctional centers

Note: See Note, table 6.121. Facilities listed are for Marine Corps personnel 17 years of age and older awaiting court-martia! or serving sentence of Summary, Speciai, or General CourtsMartial.

Source: American Correctional Association, 1992 Directory of Juvenlle and Adult Correctlonal Departments, Institutlons, Agencles and Parollng Authorities (Laurel, MD: American Correctional Assoclation, 1992), p. 460, Table constructed by SOURCEBOOK staff. Reprinted by permission,

Number of escapes from correctional facilities and number of inmates returned
By type of facility and jurisdiction, 1989 and 1990

Note: This information was collected through a survey mailed to the departments of correction in the 50 States, the District of Columbla, and the Federa! Bureau of Prisons. Colorado, New Jersey, and the Federal Bureau of Prisons did not respond to the survey. Categories may not add to total because work and education releases, furloughs, walkaways, and late returns may not be calculated in the total escape category for some States. Number of escaped inmates returned may lnclude retumed escapes from previous years. The Source presents the information as submitted by the responding agencles. No attempt is made by the Source to verity the information recelved.

Note: See Notes, figure 6.1 and table 6.73. Cata for the Federal jurisdiction were unavailable for 1990. For information on methodology, definitions of terms, and jurisdictional explanatory notes, see Appendix 21.
${ }^{\text {a }}$ Figures include both jail and prison inmates, jails and prisons are combined in one system.
Unconditional releases may include a small number of inmates who were released to probation.
${ }^{\text {All }}$ data for Arizona, California, the District of Columbia, Georgia, Illinois, Indiana, lowa, Massachusetts, Michlgan, North Carolina, Texas, West Virginfa, and Wyoming are custody, rather than jurisdiction counts. Florida's counts are based on custody data.
Numbers for release categories are estimated.
${ }^{\text {e }}$ Counts of inmates by sentence length may be slightly incorrect. See "Sentencing information" for the relevant jurisdiction in Appendix 21.

Note: See Note, table 6.79, Data are based on 13,674 releases with a sentence length of more than 12 months. First releases are persons reieased for the first time on their current sentence. Al data exclude persons released from prison by escape, death, fransfer, appea!, or detainer. Sentence length reters to the maximum sentence that an offender may be required to servs for the most serious offense. Data on maximum sentence length were reported for 96.7 pericent of first releases. Data on time served in prison are based on all first releases for whom the most serious offense and time served were reported. For methodology, offenses within categories, and furisdictional explanatory notes, see Appendix 22.

Note: The U.S. Parole Commission conducts parole hearings for 24,000 inmates currentiy in the custody of the Federal Bureau of Prisons and exercises jurisdiction over 22,000 Federal parolees (Source, p. I). These data reter only to defendants sentenced as adults. The "percent" column refers to inmates who were granted parole as a proportion of the total number of inmates considered for parole. The Source notes, "while the percentage granted parole has traditionally served as an indicator of parolIng policy, it has several limitations. First, it is affected by changes in types of offenders entering the system. For example, the rate of parole grants for auto thieves (whose number entering the Federal system had declined over the years) may noi be the same as for narcotics dealers (whose number has risen). Second, the measure may be aflected by changes in sentencing practices" (Source, October 1, 1989 to September 30, 1990, p. 9). The data do not reflect decisions modified under the Commission's appellate or reopening provisions. Data for 1978 have been revised from earlier reports by the Source.

For a list of States in reglons, see Appendix 4.

Note: The NAACP Legal Defense and Educatlonal Fund, lnc. periodically collects data on persons on death row. As of Spring 1992, 36 jurisdictions, the Federal Government, and the United States military had capital punishment laws; and 33 jurisdictions, the Federal Govern ment, and the United States military had at least 1 prisoner under sentence of death. Be-
tween Jan. 1, 1973 and Spring 1992, an estimated 1,176 convictions or sentences have been reversed or vacated on grounds other than constitutional. Between Jan. 1, 1973 and May 30, 1990, an estimated 558 death sentences have been vacated as unconstitutional.
${ }^{\text {a }}$ Includes three females.
Includes two females.

Note: See Note, table 6.142. This table Identifies the legal or other event effectively terminating the death sentence. For information on methodology, definitions of terms, and jurisdictional explanatory notes, see Appendix 21.
${ }^{\text {a }}$ Inmates died of natural causes in each of the following States: California (2), Georgia (1), Nebraska (1), and Pennsylvania (1). One inmate in Arkansas committed suicide and one inmate in Texas was murdered by another inmate.
${ }^{5}$ Commutaion effects an immediate change in sentence from death to life imprisonment or a term of years. ${ }^{C}$ Further legal proceedings may have followed the vacating of sentences and of convictions and may have resulted in now sentences of death. An American Indian prisoner in North Carolina had his senience overturned and was awaiting resentencing. An Asian inmate in Virginia had his conviction and sentence vacated and was awaiting retrial to determine gult.

Note: In three States, Maine, Minnesota, and Wisconsin, the death penally was abolished for the entire period covered by the table. Alaska and Hawall have not had the death penalty since 1960, when they were first included as States. The death penally was abolished in Michigan in 1963 and in lowa and West Virginia in 1965. Death penalty legislation expired in 1975 in North Dakota and was not renewed. Death penalty laws were found unconstitutional in Kansas (1973), the District of Columbia (1973), Rhode Island (1979), and New York (1984) and have not been rewritten. In South Dakota, the death penaity was abolished in 1915, restored in 1939, abollshed agaln in 1977, and restored in 1979. Oregon abolished the death penalty in 1914, restored it in 1920, abolished it again in 1964, restored it in 1978, and it was found to be unconstitutional in 1981. Massachusetts abolished the death penalty in 1980, restored it in 1983, and it was found unconstitutional in 1984. In California, the death penalty was found to be partially unconstitutional in 1984. In the following States death penalty laws
were found unconstitutional but have been revised to meet constitutional standards: Colorado, Delaware, Illinols, Indiana, Kentucky, Maryland, Missouri, New Hampshire, New Jersey, New Mexico, North Carolina, Ohio, Oklahoma, Pennsylvania, Tennessee, and Washington. For information on methodology, definitions of terms, and Jurisdictional explanatory notes, see Appendix 21.
$a_{\text {As }}$ States, Alaska and Hawail are included in the serles beginning Jan. 1, 1960.

## Annotated list of sources and references

Only published documents cited by the Sourcebook are listed here. Information provided to Sourcebook staff in the form of single tables or mimeographed reports are not listed.

Where data from more than one edition of a publication were used in trend tables, only the latest edition of the publication is annotated.

Sources typically contain more tables than were selected for presentation in the Sourcebook. Narratives that describe or analyze the tables and the procedures used to collect the data may also be presented in greater detail in the original source.

Administrative Office of the United States Courts

## 1990 Annual Report of the Director

(Annual. Washington: USGPO, 1991. 319 pages, 135 tables (estimated), 9 figures, 2 appendices.)

Presents data for year ending June 30, 1990 and trend tables for years ending June 30 , 1980-90. SOURCEBOOK tables 1.76, 1.81, 1.92, 1.94, 5.25-5.31, 5.34-5.38, 5.69-5.74, 6.3-6.5.

This report begins with an overview of Federal judicial business, administration, appropriations, and expenditures, and provides data on all aspects of the Federal court system. A detailed analysis of the workload is presented for the U.S. Courts of Appeals and the U.S. District Courts. For the appellate courts, information is presented on filings, terminations, types of appeals, State prisoner petitions, etc. Information for the U.S. District Courts includes civil cases filed, terminated, and pending; prisoner petitions; juror utilization; Federal pubiic/community defenders; criminal cases filed, terminated, and pending; dispositions of criminal cases filed; amount of time from filing to dispositions of criminal defendants; and length of civil and criminal trials. Data are provided in aggregate form and are also presented by circuit and district court.

## Federal Court Management Statistics 1990

(Annual. Washington: Administrative Office of the United States Courts, 1990.167 pages, 125 tables.)

Presents data for years ending June 30, 1985-90. SOURCEBOOK table 1.80.

This report presents workload and performance statistics on both civil and criminal matters for each of the U.S. Courts of Appeals and each of the 94 U.S. District Courts. Data for the former inclite appeals filed, terminated, and pending; number of judgeships; types of appeals; number of opinions and percent reversed or denied; median time from filing to disposition; and other matters pertaining to the appellate courts. Data for the U.S. District Courts include cases filed, terminated, and pending; actions per judgeship; median time from filing to disposition; juror usage index; and other matters related to activities in U.S. District Courts. As part of the profile, each court is ranked on various dimensions. Two tables presenting the national profile for all U.S. Courts of Appeals and all U.S. District Courts on workload and performance measures are also included

## Federal Judicial Workload Statistics December 31, 1990

(Annual. Washington: USGPO, 1991. 71 pages, 28 tables, 5 figures, 1 appendix.)

Presents data for 1989 and 1990 and trend tables for 1986-90. SOURCEBOOK table 5.24

This report reviews the judicial workload in Federal courts. Data on criminal and civil cases filed, terminated, and pending in UU.S. District Courts and Courts of Appeal are presented by district and in aggregate form. Information on persons received and removed from probation supervision under the Federal jurisdiction is presented, and U.S. Bankruptcy Court workload data are also highlighted. Data on pretrial services, juror service, the U.S. Court of International Trade, and the U.S. Claims Court are also presented.

## Grand and Petit Juror Service in United States District Courts

(Annual. Washington: USGPO, 1990. 180 pages, 112 tables, 3 figures, 4 appendices.)

Presents data for year ending June 30, 1989 and trend tables for years ending June 30, 1982-89. SOURCEBOOK table 1.91.

This report on juror utilization in the Federal courts is presented in three sections. The first section presents information on grand jury operation, petit juror activity, comparisons of grand jury duration for the period July 1 ,
1984-June 30, 1989, and comparisons of petit juror utilization for the period June 30 , 1984-June 30, 1989. The second section contains information on 1989 payments for juror attendance, subsistence, mileage, and
other costs. The final section provides individual profile pages that highlight pertinent juror statistics for each of the 94 U.S. District Courts. Historical data for a 5 -year period are also provided along with comments discussing specific factors affecting juror usage. Appendix $A$ is a glossary of terms found in the report. Appensix B lists the most recent rules setting the size of juries adopted by U.S. District Courts. Appendix C provides the local rules assessing juror costs for late settlements for each of the circuits. Appendix D presents the 1989 schedule of juror fees.

Report on Applications for Orders Authorizing or Approving the interception of Wire, Oral, or Electronic Communications for the Period January 1, 1980 to December 31, 1990
(Annual. Washington: Administrative Office of the United States Courts, 1991. 222 pages, 13 tables, 4 figures, 1 appendix.)

Presents data for 1990 and trend tables for 1980-90. SOURCEBOOK tables 5.2-5.4.

This report details the applications for orders authorizing or approving the interception of wire, oral, or electronic communications, as required by Title 18, United States Code, Section 2519(1). There is a description of the reporting requirements of the statute, regulations for filing reports, and summaries of the reports submitted by judges and prosecuting officials. The tables in the body of the report include data on grants, denials, and authorized length of intercept orders; offenses for which court intercept orders were granted; types of surveillance used; average costs of electronic surveillance; arrests and convictions resulting from electronic surveillance; and a summary of authorized intercepts from 1980 to the year of the report. The appendix tables contain detailed data from reports filed by Federal and State judges and prosecuting officials on court-authorized electronic surveillance activities during the focal year and on arrests, trials, and convictions as a result of intercepts installed during previous years.

## The Third Branch

(Monthly. Washington: USGPO. Contents and dates of data presented: See below. SOURCEBOOK table 1.74.)

The Third Branch is a monthly newsletter for the Federal courts compiled by the Administrative Office of the United States Courts. The publication focuses on current issues facing the Federal judiciary. In addition to segments on special topics (e.g., October 1991--expanded role for Federal courts, problems with mandatory minimums, and the fiscal 1992 judiciary budget), regular features include interviews with prominent judicial and con-
gressional personnel, and a calendar of events pertinent to judicial personnel.

American Correctional Association

## 1992 Directory of Juvenile and Adult

 Correctional Departments, Institutions, Agencies and Paroling Authorities(Annual. Laurel, MD: American Correctional Association, 1992. 623 pages, 18 tables, 2 figures.)

Presents data for 1991. SOURCEBOOK tables 1.103-1.105, 1.120, 1.122, 6.121, 6.122.

This directory describes the organization and administrative structure of correctional services in all 50 States, the District of Columbia, the Federal Bureau of Prisons, and the U.S. territories. For each jurisdiction, data are provided on institutions, parole boards, and parole and probation services for both adults and juveniles. Descriptions and addresses of each facility within each jurisdiction are provided.

Summary statistics are provided on personnel, fiscal expenditures, correctional populations, paroling authorities, types of facilities, and the death penalty. Information is provided on the U.S. Department of Justice, military correctional facilities, and the Canadian correctional system. New York City, Philadelphia, and Cook County (Chicago) departments of correction are also included.

## The Female Offender: What Does the Future Hold?

(Special. Laurel, MD: American Correctional Association, 1990. 108 pages, 188 tables, 32 figures, 1 appendix.)

Presents data for 1987. SOURCEBOOK tables 6.87, 6.90.

This report presents the findings from three surveys conducted in 1987 by the American Correctional Association's Task Force on the Female Offender. The report is divided into five sections. The first section provides descriptive information from a survey of adult and juvenile female offenders incarcerated in over 400 correctional facilities in the United States. The second section profiles local government jails designed to house female inmates. The third section presents information on State correctional facilities for females. The fourth section summarizes the Task Force recommendations for improving the administration and treatment of female inmates. The final section presents detailed findings from the female offender survey, the local government jail survey, and the State
correctional facility survey. Some of the information from the surveys includes: demographic information on female offenders, their living arrangements prior to incarceration, number of children, prior physical and sexual abuse, use of alcohol and drugs, employment history, arrest and sentence information, the physical characteristics, capacity and utilization, and staffing of local jails and State correctional facilities.

## Vital Statistics in Corrections 1991

(Periodic. Laurel, MD: American Correctional Association, 1991. 74 pages, 48 tables, 18 figures.)

Presents data for 1990 and 1991, and trend tables for 1840-1991. SOURCEBOOK table 1.108.

This report is divided into seven sections and presents detailed information on correctional departments in the United States. Section one presents operating expenditures and budgets for State correctional systems. Section two includes salary and benefit information for personnel employed in State systems. Section three discusses educational and training requirements as well as salaries for State correctional officers. Section four presents information on State and county probation and parole departments. Statistics on inmate populations, court orders, recidivism, and the death penalty are presented in section five. Section six discusses State employee unions and organizations. The final section provides data on jails and detention centers including budgets, inmate populations, and personnel. Also included is an overview of the American Correctional Association.

American Judicature Society, The Center for Judicial Conduct Organizations

## Judicial Conduct Reporter

(Quarterly. Chicago: American Judicature Society. Contents and dates of data presented: See below. SOURCEBOOK tables 1.90 , 5.102.)

The Judicial Conduct Reporter is a quarterly publication presenting recent developments in laws relating to judicial conduct and ethics as well as data on the procedures and operations of State judiciai conduct commissions. The newsletter features annual reports on the disposition of complaints of judicial misconduct and on the personnel and budgets of the State commissions. Also presented are reviews of necent law review articles in the field.

Anno, B. Jaye
"The Cost of Correctional Health Care: Results of a National Survey"
(Special. Chicago: National Commission on Correctional Health Care, August 1990. Mimeographed. 19 pages, 11 tables, 1 appendix.)

Presents data for fiscal 1989. SOURCEBOOK table 1.10.

This report presents data on the cost of correctional health care in 46 State correctional systems and the Federal Bureau of Prisons. Data are presented on total departmental expenditures; total health care expenditures, including mental health care; and annual health care costs per inmate. Line items included in correctional health care service budgets are also provided. Comparisons of per inmate health care costs are provided for each jurisdiction for three time periods. The report also contains an appendix which provides a rank ordering, by jurisdiction, of total departmental expenditures and health care expenditures.

## Prison Health Care: Guidelines for the Management of an Adequate Delivery System

(Special. U.S. Department of Justice, National Institute of Corrections. Washington: U.S. Department of Justice, 1991.360 pages, 20 tables, 6 figures, 12 appendices.)

Presents data for fiscal 1989. SOURCEBOOK table 1.107.

This report provides a comprehensive overview of issues involved in prison health care. It discusses the history of correctional health care, legal and ethical issues, as well as health promotion and disease prevention in correctional facilities. The organizational structure of prison health services is also presented. Staffing levels, programming for inmates with special health needs, and planning correctional health facilities are discussed. Finally, chapters are devoted to data management of health records and methods that can be used to improve the quality of prison health care. Data comparing prison health issues in State correctional systems and the Federal Bureau of Prisons are provided. Data describing the organizational structure of health services programs, personnel working in prison health care, and inmate to staff ratios are presented from a 1989 survey. Information on the cost of inmate health care is also included. The appendices provide detailed data and additional technical information.

Astin, Alexander W.; Eric L. Dey; William S. Korn; and Ellyne R. Riggs

## The American Freshman: National Norms for Fall 1991

(Annual. Higher Education Research Institute. Los Angeles: University of California, 1991. 166 pages, 13 tables, 6 figures, 6 appendices.)

Presents data for 1991. SOURCEBOOK tables 2.70-2.76.

This report presents national data on the characteristics of students entering American colleges and universities as first-time, fulltime freshmen in Fall 1991. These data are based on the responses of 210,739 students at 431 of the Nation's 2 - and 4 -year colleges and universities, and have been statistically adjusted to reflect the responses of the 1.6 million first-time, full-time students entering college as freshmen in Fall 1991. Major trends from the Fall 1991 survey are also presented.

Bennack, Frank A., Jr.
The American Public's Hopes and Fears for the Decade of the 1990s
(Special. New York: The Hearst Corporation, 1989.51 pages, 79 tables.)

Presents data for 1989. SOURCEBOOK table 2.24.

The results of the sixth annual Hearst survey are presented in this report. The national survey asked respondents about their expectations concerning a number of topics for the 1990s. The topics included international affairs, science, technology, the environment, the economy, selected social issues, and lifestyle. The report is divided into three sections: a summary of the findings, the findings in tabular form, and the survey methodology.

Bray, Robert M.; Mary Ellen Marsden; L. Lynn Guess; Sara C. Wheeless; Vincent G. lannacchione; and $S$. Randall Keesling

## 1988 Worldwide Survey of Substance

 Abuse and Health Behaviors Among Military Personnel(Special. Research Triangle Park, NC: Research Triangle Institute, 1988.53 pages, 19 tables, 24 figures, 1 appendix.)

Presents data for 1988 and trend tables for selected years, 1980-88. SOURCEBOOK tables 2.93, 3.99.

This report presents the results of a worldwide survey of the prevalence and correlates of substance use and abuse, and health behaviors among li.S. military personnel. The data are based on survey responses from 18,673 military personnel in the Army, Navy, Marines, and Air Force. The report presents an overview of trends in substance use, the negative effects of substance use, and other health practices. Estimates of the prevalence of alcohol, drug, and tobacco use are provided. The negative effects of alcohol and drug abuse are also discussed. Additionally, specific health behaviors are explored as are attitudes about AIDS. An appendix provides detailed tabular material.

Carter, David L. and Allen D. Sapp
Police Education and Minority Recruitment: The Impact of a College Requirement
(Special. Washington: Police Executive Research Forum, 1991. 35 pages, 6 tables, 2 figures.)

Presents data for 1988. SOURCEBOOK table 1.36.

This report presents data obtained through a comprehensive literature review; a national survey of municipal, State, and county police departments, as well as county sheriff departments; and site visits to seven police departments. Information from the mail survey provides data on minority representation within police departments and sworn officer education levels. The legal issues concerning requiring college for police employment as well as recruitment issues are discussed.

CEGA Publishing

## Corrections Compendium

(Monthly. Lincoln, NE: CEGA Publishing. Contents and dates of data presented: See below. SOURCEBOOK tables 1.9, 1.95, 1.96, 1.106, 1.109, 1.115-1.119, 3.172, 6.91, $6.102-6.106,6.123,6.139$ )

The Corrections Compendium is a monthly publication focusing on issues related to corrections. Regular features of the Corrections Compendium include articles on subjects of special interest in the field, sections on court decisions, legal issues, and news items focusing on corrections. Each issue also carries the results of a survey and tabular information on a selected correctional issue (e.g., May 1991 escapes from State prisons).

The Council of State Governments
The Book of the States 1992-93
(Biennial. Lexington, KY: The Council of State Governments, 1992. 706 pages, 245 tables, 2 figures. Dates of data presented: See below. SOURCEBOOK tables 1.82, 1.83.)

The Book of the Stales is a reference work containing information on the operations, revenues, expenditures, and services of State governments. The book is divided into ten sections: State constitutions; the State Executive Branch; the State Legislative Branch; the State Judicial Branch; the State Elections; the State Finances; State Management and Administration; Selected State Activities, Issues, and Services; Intergovernmental Affairs; and a final section on historical and contemporary State characteristics. Data that were collected by the Council of State Governments or that were compiled from other sources are presented on a wide variety of topics.

DeSantis, Victor S.

## "Salaries of County Officials for 1991"

(Annual. The Municipal Year Book 1992, pp. 101-110. Washington: International City/County Management Association, 1992. 10 pages, 3 tables, 2 figures.)

Presents data for 1991 . SOURCEBOOK table 1.68.

This article presents data collected from the 1991 County Salary Survey conducted by the International City/County Management Association. The salaries of county officials are presented by job title, region, county population, and county type. County officials surveyed include the governing board chairperson/president/county judge, county manager, county administrator, clerk to the governing board, chief financial officer, county health officer, planning director, county engineer, director of welfare/human services, chief law enforcement official, purchasing director, and personnel director.
"Salaries of Municipal Officials for 1991"
(Annual. The Municipal Year Book 1992, pp. 79-100. Washington: International City/County Management Association, 1992. 22 pages, 3 tables, 2 figures.)

Presents data for 1991 and trend tables for 1986-91, SOURCEBOOK table 1.67.

This article presents data collected from a survey of municipal officials conducted by the

International City/County Management Association in July and August of 1991. The salaries of municipal officials are presented by job title, city size, region, city population, and form of government. Selected central city and suburban officials' salaries are also presented, as are a comparison of city manager and chief administrative officer salaries. City officials surveyed include the mayor; chief appointed administrator; assistant city manager; city clerk; chief financial officer; controller; treasurer; engineer; police chief; fire chief; librarian; and directors of public works, planning, personnel, parks and recreation, data processing, and purchasing.

Elam, Stanley M.; Lowell C. Rose; and Alec M. Gallup
"The 23rd Annual Gallup Poll of the Public's Attitudes Toward the Public Schools"
(Phi Delta Kappan (September 1991), pp. 41-56. 16 pages, 47 tables.)

Presents data for 1991 and trend data for 1981-90. SOURCEBOOK table 2.2.

This article presents the results of public opinion surveys on attitudes toward public schools. Data are provided on various topics including: America's future strength, national goals for education, extending the public school day and year, publicly supported preschools, national curriculum and standards, teacher salaries, budgets, and problems facing schools. A brief explanation of the composition of the sample and the research procedure is also provided.

Executive Office of the President, Office of Management and Budget

## Budget of the United States Government, Fiscal Year 1993

(Annual. Washington: USGPO, 1992. 1,713 pages, 600 tables (estimated), 3 appendices.)

Presents data for fiscal 1991-95 and trend tables for fiscal 1977-95. SOURCEBOOK table 1.12.

This report details the actual budgetary expenditures for fiscal 1991 and the projected expenditures for fiscal 1992-95. Data are presented on expenditures of the Federal Gervernment, by department, and on the budget as a whole. The report is divided into three sections. Part one presents an agenda for growth and priorities for the future. Th:is includes the President's budget message and a general overview of the budget. Part two includes receipts, user fees and other collec-
tions, and tax expenditures. Part three provides alternative budget presentations. The first appendix discusses Federal programs by function, agency, and account. This includes summary information and detailed budget estimates. Appendix two presents the Budget Enforcement Act Preview Report and current services estimates. The final appendix includes a glossary of budget terms, a list of charts and tables, Office of Management and Budget contributors to the 1993 budget, and an index.

Executive Office of the President, Office of
National Drug Control Policy

## National Drug Control Strategy: Budget Summary

(Annual. Washington: Executive Office of the President, 1992. 214 pages, 110 tables (estimated), 1 figure.)

Presents data for fiscal 1993 and trend tables for fiscal 1981-93. SOURCEBOOK table 1.14.

This report summarizes the budget authority for the National Drug Control Strategy developed by the Office of National Drug Control Policy. The report outlines Federal drug funding priorities and resource requirements. Descriptions of the fiscal 1993 budget requests for each of the approximately 50 agencies and accounts that comprise the National Drug Control Budget are also presented. The final section provides additional information on funding and employment levels, including trend tables presenting funding levels for fiscal 1981 through the President's request for 1993.

Gallup, George, Jr.

## The Gallup Poll

(Princeton, NJ : The Gallup Poll. Periodicity, contents, and dates of data presented: See below. SOURCEBOOK tables 2.1, 2.9-2.14, 2.16.)

The results of public opinion research conducted by the Gallup Organization are released several times monthly by The Gallup Poll News Service. A wide variety of topics are included in these surveys including problems facing the nation, personal drinking habits, and selected political issues. A brief note on sample size, sample tolerance, and survey dates is included in each release.

## The Gallitp Poll Monthly

(Monthly. Princeton, NJ: The Gallup Poll.
Contents and dates of data presented: See
below. SOURCEBOOK tables 2.4, 2.6, 2.15, 2.17, 2.20, 2.25, 2.27, 2.33-2.36, 2.40, 2.41 2.43-2.45, 2.48, 2.51-2.54, 2.56, 2.84, 2.89, 2.99, 2.100, 2.102, 2.103, 3.119-3.123.)

The Gailup Poll Monthly contains the results of opinion surveys conducted by the Gallup Poll with demographic breaks on selected questions. Political, social, and economic trends are presented in monthly issues that include many topics (e.g., February 1992--ratings of various foreign countries, the economy, President Bush's job performance, the Presidential race, and consumption of alcoholic beverages). A brief note on sample size, sampling tolerance, and survey dates is included in each issue.

Gardner, Thomas and Drew Wallner
"Police, Fire, and Refuse Collection Personnel and Expenditures--1991"
(Annual. The Municipal Year Book 1992, pp. 111-183. Washington: International City/County Management Association, 1992. 73 pages, 24 tables, 1 figure.)

Presents data for 1991 and trend tables for 1981-91. SOURCEBOOK tables 1.61, 1.62, 1.66.

This report presents data gathered through a mail survey sent to all municipalities with populations of 10,000 persons and over in the United States. The survey was conducted in January 1991 by the International City/County Management Association. Data are presented on personnel, salaries, and expenditures for police, fire, and refuse departments as are data from several similar surveys conducted in previous years.

Goldman, Sheldon
"The Bush Imprint on the Judiciary: Carrying on a Tradition"
(Judicature 74 (April-May 1991), pp. 294306. 13 pages, 2 tables.)

Presents data for 1963-90. SOURCEBOOK tables 1.78, 1.79.

This article reports the results of research on judgeships to Federal district and appeals courts. Background characteristics of those appointed by President Bush during 1989 and 1990 are compared with those of appointees made by Presidents Johnson, Nixon, Ford, Carter, and Reagan. Appointees who had noteworthy political and legal credentials are highlighted as are controversial appointees.

Harris, Louis

## The Harris Poll

(Los Angeles: Creators Syndicate, Inc. Periodicity, contents, and dates of data presented: See below. SOURCEBOOK tables 2.5, 2.26.)

The Harris Poll is a weekly release of public opinion research conducted by Louis Harris and Associates. The releases deal with a variety of topics including confidence in selected institutions; the Presidential campaign; and government spending on medical, environmental, energy, defense, and space research. A brief note on sample size and survey dates is included in each release.

Hunzeker, Donna
State Legislative Response to Crimes Against the Elderly
(Special. Washington: National Conference of State Legislatures, 1990. 25 pages, 2 tables, 2 figures, 4 appendices.)

Presents data for 1989. SOURCEBOOK table 1.128.

This report presents information on State legislative responses to crimes against the elderly. It provides information on the extent of elder abuse, the creation of adult protective services, the existence of mandatory reporting statutes, investigative and support services, and extended care facilities. Data are presented on penalties and enhanced penalties for crimes and abuse againsit the elderly and handicapped. In addition, information on crime prevention and community education, and future legislation is provided, Finally, the four appendices list the statutes which pertain specifically to crimes against the elderly.

Insurance Information Institute

## 1992 Property/Casualty Insurance Facts

(Annual. New York: insurance Information Institute, 1992. 132 pages, 100 tables, 37 figures.)

Presents data for 1990 and trend tables for 1981-90. SOURCEBOOK table 3.155 .

This yearbook provides data on the property and liability segment of the insurance industry in the United States. Statistics are presented on property and liability insurance companies; policies written and in force, by type of
coverage; and insurance written through special programs such as flood insurance and the Federal Crime Insurance Program. Data are presented on insurance losses due to fire, natural disasters, traffic accidents, crime, and other causes.

Johnston, Lloyd D.; Patrick M. O'Malley; and Jerald G. Bachman

Smoking, Drinking, and Illicit Drug Use Among American Secondary School Students, College Students, and Young Adults, 1975-1991
(Annual. Washington: USGPO, 1992.)
Presents data for 1991 and trend tables for 1975-91. SOURCEBOOK tables 2.63-2.69, 3.90-3.93, 3.95-3.98.

This document is the fourteenth in an annual series reporting on drug use and related attitudes of high school seniors, college students, and young adults in the United States. The research is sponsored by the U.S. Department of Health and Human Services, National Institute on Drug Abuse. Two major topics treated in the report are trends in drug use among American high school students since 1975 and prevalence of drug use among American high school seniors. Also reported are data on school grade at first use; intensity of "high" produced by drug use; attitudes and beliefs among seniors about various types of drug use; and their perceptions of certai.h relevant aspects of the social environment, such as parental disapproval of drug use or availability of drugs. Beginning in 1985, data on the prevalence and trends in drug use among young adults who have completed high school are incorporated into the report.

Karter, Michael J., Jr.
"Fire Loss in the United States During 1990"
(Annual. NFPA Journal 85(September/ October 1991), pp. 36-48. 10 pages, 6 tables, 4 figures.)

Presents data for 1990 and trend tables for 1977-90. SOURCEBOOK table 3.179.

This article reports the results of the 1990 National Fire Experience Survey conducted by the National Fire Protection Association. Data are presented that describe fire incidence, deaths, injuries, and property loss, by fire type (structural, vehicular, and arson), property use, and geographic region.

Knopp, Fay Honey; Robert Freeman-Longo; and William Ferree Stevenson

## Nationwide Survey of Juvenile and Adult Sex-Offender Treatment Programs and Models, 1992

(Special. Orwell, VT: The Safer Society Program, 1992. 39 pages, 9 tables, 2 appendices.)

Presents data for 1992. SOURCEBOOK table 1.127.

This report presents data from a national survey of identified treatment programs for both juvenile and adilt sex-offenders. The number of facilities available' and the type of treatment services provided are presented for each State and the District of Columbia. Also included is information about the treatment of special juvenile and adult populations. The appendices provide sample questionnaires and the names and addresses of the facilities that were surveyed.

NFO Research, Inc.
Final Report, Drug Awareness and Attitude Study
(Special. Chicago: NFO Research, Inc., 1990. 34 pages, 23 tables, 1 appendix.)

Presents data for 1990. SOURCEBOOK tables 2.77-2.82.

This report presents data from the drug awareness and attitude study conducted by NFO Research, Inc. for Edelman Public Relations. A nationally-representative sample of 500 fifth and sixth graders were surveyed during the Spring of 1990 . The report begins with an executive summary of the survey findings. Detailed findings in tabular form are presented on the awareness and classification of drugs, knowledge of drug use, discussions with others about drugs, the ability to describe drugs, and drugs seen in public areas. Data is also presented on whether respondents had been offered drugs, perceptions of the effects of drugs, attitudes toward and intentions to try drugs, self esteem and peer pressure questions, and the awareness of drug education programs. An appendix provides a demographic comparison between the sample and U.S. households.

National Center for State Courts

## Survey of Judicial Salaries

(Biannual. Williamsburg, VA: National Center for State Courts, 1992. 12 pages, 2 tables.)

Presents data for January 1992. SOURCEBOOK table 1.84.

This report presents State judicial salaries as of January 1992. Salaries are presented for judges in the highest court, the intermediate appellate court, general trial court, and the courts of limited and special jurisdiction of each State. Information is also presented on salary levels of the Chief Justice and Associate Justices of the highest court and intermediate court as well as salaries of State court administrators.

National Coalition to Abolish the Death Penalty

## 1991 Survey of State Legislation

(Annual. Washington: National Coalition to Abolish the Death Penalty, 1991. 72 pages.)

Presents data for 1991. SOURCEBOOK table 1.121.

This report presents information on capital offenses as they are statutorily defined by each State. This includes the statutory provisions relating to the minimum age below which the death penalty may not be imposed, whether the State prohibits execution of persons with mental retardation, and the maximum penalty for States that do not have a sentence of death. Also provided is a description of State legislation introduced during 1991 that pertains to capital punishment and each bill's status at the end of the 1991 legislative sessions. The names of the Governor and Attorney General for each State, the expiration of their current term, the party composition of each State legislature, and its session length are also provided.

National Criminal Justice Association

## A Guide to State Controlled Substances Acts

(Special. Washington: National Criminal Justice Association, 1991. 146 pages, 18 tables, 4 appendices.)

Presents data for 1990. SOURCEBOOK tables 1.134, 1.135.

This guide presents a comparative review of the controlled substances acts (CSA's) of the 50 States, the District of Columbia, and the Federal government. These acts govern the possession, use, sale, distribution, and manufacture of drugs that may lead to dependence or abuse. The guide is divided into four sections. The first section briefly reviews the history of Federal drug control efforts, the development of the model Uni-
form Controlled Substances Acts, and general variations among State CSA's. The second section describes the Federal CSA and recent amendments contained in the AntiDrug Abuse Act of 1988 and Comprehensive Crime Control Act of 1990. The next section includes a general overview of each State's CSA and a comparative analysis of State and Federal CSA provisions. Section three lists summaries of each State's CSA in tabular form for comparison purposes. These summaries include highlights of the particular State's controlled substances act and lists penalties, forfeiture possibilities, and other consequences associated with violation of the CSA. The final section of the guide contains four appendices which list elements of controlled substances acts; penalties for basic violations; substances targeted for enhanced penalties; types of assets forfeitable; currency transaction reporting statutes; and drug tax provisions. The U.S. Attorney General's guidelines on seized and forfeited property are also presented.

National Opinion Research Center

## General Social Surveys, 1972.91

(Annual. Storrs, CT: The Roper Center for Public Opinion Research, University of Connecticut, distributors. Contents: See below.)

Presents data for 1972-78, 1980, and 198291. SOURCEBOOK tables 2.7, 2.18, 2.19, 2.21-2.23, 2.28, 2.37, 2.42, 2.46, 2.49, 2.50, $2.55,2.83,2.96,2.97,3.35,3.36,3.48$.

This cumulative data file merges all 18 General Social Surveys into a single ma-chine-readable data file with each survey year as a subfile. Interviews were conducted by the National Opinion Research Center during February, March, and April of 1972-78, 1980, and 1982 through 1991. The data are derived from a national probability sample of English speaking adults, 18 years or older, living in non-institutional arrangements in the continental United States. Survey questions relate to a variety of social issues, including politics, abortion, religion, homosexuality, crime, law enforcement, guns, and capital punishment.

The items appearing on the surveys are one of three types: permanent questions that occur in each survey, rotating questions that appear two out of every three years, and a few questions that occur in a single survey. A comprehensive codebook entitled General Social Surveys, 1972-1991: Cumulative Codebook is published by The Roper Center for Public Opinion Research. Survey methodology and the data program are explained in detail in the document.

National Victim Center
"America Speaks Out: Citizens' Attitudes About Victims' Rights and Violence"
(Special. Fort Worth, TX: National Victim Center, April 1991. Mimeographed. 68 pages, 32 tables, 14 figures.)

Presents data for 1991. SOURCEBOOK tables 2.8, 2.29, 2.30, 2.32, 2.38, 2.39.

This report presents findings from a national public opinion survey conducted by Schulman, Ronca and Bucuvalas, Inc. for the Na tional Victim Center. Survey results for a wide variety of criminal justice and victimization topics are presented including data comparing attitudes on defendants' and victims' rights. Data are also presented on the effects of crime and fear of crime on the public, and the public's rating of the performance of various elements of the criminal justice system. Additionally, the report discusses key issues related to victims' rights such as AIDS testing for defendants charged with rape, the death penalty, and notoriety for profit statutes.

Sherman, Lawrence W.; Christine DeFiso; Danee Gaines; Dennis Rogan; and Ellen G. Cohn

## Police Murdered in Drug-Related Situations, 1972-88

(Special. Crime Control Reports No. 7. Washington, DC: Crime Control Institute, 1988. 49 pages, 3 tables, 3 figures, 1 appendix.)

Presents trend data for 1972-88. SOURCEBOOK table 3.165.

This report contains narrative, data, and descriptive summaries on law enforcement officers feloniously killed in the line of duty. Data are presented on officers killed in drugrelated matters and by type of drug-related enforcement activities. Descriptive summaries of drug-related killings of police officers are also provided.

Snyder, Howard N.; Terrence A. Finnegan;
Ellen H. Nimick; Melissa H. Sickmund;
Dennis P. Sullivan; and Nancy J. Tierney

## Juvenile Court Statistics 1988

(Annual. Office of Juvenile Justice and Delinquency Prevention. Washington: USGPO, 1991. 197 pages, 91 tables, 50 figures, 3 appendices.)

Presents data for 1988 and trend tables for 1987-88. SOURCEBOOK tables 5.91-5.100.

This report is a product of the National Juvenile Court Data Archive and presents juvenile court workload data for 1988. The data were collected by the National Center for Juvenile Justice through a grant provided by the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention. The data describe the number and characteristics of delinquency and status offense cases disposed by courts with juvenile jurisdiction in participating States. The report is divided into three sections: national estimates of delinquency cases; national estimates of petitioned status offense cases; and sample specific analyses of caseloads for jurisdictions providing comparable information. Data are presented on age, race, and sex of juveniles under court jurisdiction, offense type, case dispositions, use of secure detention, probation, and out of home placement. Comparisons with 1987 data are provided when available. The appendices provide methodology and estimation procedures, a glossary of terms, and reported cases in each county for 1988.

Stanley, Harold W. and Richard G. Niemi

## Vital Statistics on American Politics

(Special. Washington: CQ Press, 1990.435 pages, 187 tables, 35 figures, 1 appendix.)

Presents single year data and trend tables covering a broad range of years. SOURCEBOOK table 1.77.

This source compiles statistical data on topics relevant to American politics. Information is presented on elections; Congress; the presidency; the judiciary; the Constitution; the mass media; interest groups; foreign, social, military, and economic policy; as well as a variety of issues related to State and local governments. Various types of data are provided including hard data such as votes cast and offices won, as well as ranking of public officials' reputations, content data, and public opinion data. When available, data spanning numerous years are presented in trend tables. A reference list of available political statistics is also provided.

Szymanski, Linda A., Esq.

## Waiver/Transfer/Certification of Juveniles to Criminal Court: Age Restrictions--Crime Restrictions

(Special. Pittsburgh, PA: National Center for Juvenile Justice, 1991. 88 pages, 2 tables.)

Presents data for 1991. SOURCEBOOK table 1.126.

This report presents information on the transfer of juvenile offenders to adult criminal court by judicial waiver. Citations to specific provisions of State juvenile codes, age restrictions, and offense restrictions governing juvenile waiver to criminal court for the 50 States and the District of Columbia are provided in tabular form. Information regarding the currency of each State's legislation is also included.
U.S. Department of Health and Human Services, Centers for Disease Control

## Morbidity and Mortality Weekly Report

(Washington: USGPO. Periodicity, contents, and dates of data presented: See below. SOURCEBOOK tables $3.80,3.81,3.94$.)

The Morbidity and Mortality Weekly Report is a weekly series prepared by the Centers for Disease Control. Releases present national data compiled by State health departments on a variety of health issues and risk behaviors. Often featured are data from the national Youth Risk Behavior Surveillance System, which measures the prevalence of priority health-risk behaviors among youth.
U.S. Department of Health and Human Services, National Instifute on Drug Abuse

## Annual Emergency Room Data 1990

(Statistical Series I, Number 10-A. Washington: USGPO, 1991. 120 pages, 86 tables, 3 appendices.)

Presents data for 1990 . SOURCEBOOK tables 3.115-3.118.

This report presents information on drug abuse-related emergency room (ER) episodes. The data were compiled by the Na tional Institute on Drug Abuse through the Drug Abuse Warning Network (DAWN). These data are weighted estimates representing all drug abuse ER episodes in 1990 from hospitals in the 48 coterminous States, the District of Columbia, and 21 metropolitan areas. Estimates are provided for demographic and episodic characteristics as well as type of drug involved. These data are also presented for the 21 metropolitan areas. The survey methodology is described in detail, and the reporting form is provided in an appendix.

## National Household Survey on Drug Abuse: Main Findings 1990

(Biennial. Washington: USGPO, 1991. 258 pages, 108 tables.)

Presents data for ison. SOURCEBOOK tables 3.100-3.105, 3.110-3.114.

This report presents data on drug abuse among the Nation's population age 12 and older. Prevalence estimates for specitic drugs are provided for age groups, sex and race, as well as other demographic characteristics. The drugs included are marihuana, cocaine, inhalants, hallucinogens, PCP, heroin, stimulants, sedatives, tranquilizers, analgesics, other psychotherapeutics, alcohol, cigarettes, and smokeless tobacco. Estimates of frequency of use as well as problems asscciated with use are provided. Population estimates, based on the prevalence figures, are also presented. A series of appendices provide methodological and statistical information as well as definitions of terms. Finally, selected portions of the survey questionnaire are provided including questions on drugs.

## National Household Survey on Drug Abuse: Population Estimates 1991

(Annual. Washington: USGPO, 1991. 125 pages, 143 tables.)

Presents data for 1991. SOURCEBOOK tables 3.106-3.109.

This report presents data on drug abuse among the Nation's population age 12 and older. Prevalence estimates for specific drugs are provided for age groups, sex and race, as well as region of the country. The drugs included are: marihuana, cocaine, crack, inhalants, hallucinogens, PCP, psychotherapeutics, stimulants, sedatives, tranquilizers, analgesics, alcohol, cigarettes, smokeless tobacco, and heroin. Population estimates, based on the prevalence figures, are also provided. Prevalence and population estimates for use of any illicit drug and needle use are also presented by age group, sex, race, and region. Finally, estimates of frequency of use during the past year for marihuana, cocaine, and alcohol users are presented.
U.S. Department of Health and Human Services, National Institute on Drug Abuse and National Institute on Alcohol Abuse and Alcoholism

Highlights from the 1990 National Drug and Alcoholism Treatment Unit Survey (NDATUS)
(Annual. Rockville, MD: U.S. Department of Health and Human Services, 1991. 13 pages, 11 tables.)

Presents data for 1990. SOURCEBOOK table 6.107.

This report presents data on drug and alcoholism treatment units in the United States, the District of Columbia, Guam, Puerto Rico, and the Virgin Islands. The data were collected through the National Drug and Alcoholism Treatment Unit Survey (NDATUS) and reflect information as of Sept. 28, 1990. Data on the number of treatment units and the number of clients in treatment are presented. Information is also provided on treatment unit function, utilization rate, and unit capacity. Demographic characteristics for clients in treatment are included as well as information on funding sources and staffing of treatment units. Finally, the number of treatment units and clients in treatment are presented for each State.

## National Drug and Alcoholism Treatment Unit Survey (NDATUS) 1989, Main Findings Report

(Annual. Rockville, MD: U.S. Department of Heallh and Human Services, 1990.73 pages, 51 tables, 2 appendices.)

Presents data for 1989. SOURCEBOOK tables 6.108-6.120.

This report presents data on drug abuse and alcoholism treatment units in the 50 States, the District of Columbia, Guam, Puerto Rico, and the Virgin Islands. These data were collected through the National Drug and Alcoholism Treatment Unit Survey (NDAFUS) and reflect information as of Sept. 30, 1989. The information is presented by treatment type, location, ownership, specialized populations served, and types of services provided. Also provided is a profile of total drug abuse and aicoholism clients in all treatment units that responded to the survey. The client tables present the number of persons in treatment, the number of clients who could be treated (budgeted capacity), and the utilization rate. Additional client data include distributions by demographic characteristics, which are displayed separately for outpatients and inpatients. Also presented are tabulations of the annual unduplicated client count, the number of family members or others receiving services, and the estimated number of intravenous drug users. State level tabulations are provided for client demographics and for the number of treatment units, clients in treatment, budgeted capacity, and utilization rate. Also presented is information on sources of funding and average cost per client. Two appendices provide a glos-
sary of terms used in the survey and the data collection instrument.
U.S. Department of Health and Human Services, Office of Human Development Services
"Annual Report to the Congress on the Runaway and Homeless Youth Program, Fiscal Year 1990"
(Annual. Washington: U.S. Department of Health and Human Services, 1991. Mimeographed. 21 pages, 10 tables.)

Presents data for fiscal 1990. SOURCEBOOK table 6.32.

This report is submitted to Congress by the U.S. Department of Health and Human Services pursuant to the Runaway and Homeless Youth Act enacted in 1974. The report provides an overview of the status of the runaway and homeless youth centers funded under the Act. The legislative history of the program, and information regarding the extent of the problem of runaway and homeless youth are presented. Data are provided for centers funded during fiscal 1990, clients served, and services provided. Also discussed are the major activities undertaken by the U.S. Department of Health and Human Services to support the Runaway and Homeless Youth Basic Centers Program, such as funding of additional grants and research initiatives.

## U.S. Department of Justice, Bureau of Justice Assistance

"Drug Treatment Services in Jails: Results of a National Survey"
(Mimeographed. Washington: U.S. Department of Justice, 1991. 21 pages, 8 tables, 4 appendices.)

Presents data for 1987. SOURCEBOOK tables 6.67-6.69.

This report presents findings from a national survey of drug treatment programs in jails. The survey was conducted by the American Jail Association and funded by the U.S. Department of Justice, Bureau of Justice Assistance. Data on drug treatment programs in jails are presented by size of jail, program characteristics, treatment interventions, inmate characteristics, funding sources, and additional treatment services. Information is also presented on factors related to the development of drug treatment programs. The effectiveness of drugg treatment and the results of previous jail surveys are discussed.

The Edward Byrne Memorial State and Local Law Enforcement Assistance Programs: FY 1991 Formula Grant Program Guidance and Application Kit
(Annual. Washington: U.S. Department of Justice, 1991.71 pages, 1 table, 5 appendices.)

Presents data for fiscal 1991 and 1992. SOURCEBOOK table 1.15.

This document describes the Edward Byrne Memorial State and Local Law Enforcement Assistance Programs and provides guidance on the application procedure necessary to obtain program funds. The document describes key program elements, the purpose of formula grant funds, and the allocation of funds to the States. Detailed information is also provided on the requirements necessary to obtain program funds, allowable and unallowable expenses, State application requirements, State application review procedures, and program evaluation and State reporting requirements. The appendices provide information on authorized program areas, allocation of funds, application forms and assurances, and a description of Statewide program strategy development.
U.S. Department of Justice, Bureau of Justice Statistics

## Capital Punishment 1990

(Annual. Bulletin NCJ-131648. Washington: U.S. Department of Justice, September 1991. 15 pages, 16 tables, 3 figures.)

Presents data for 1990 and trend tables for 1930-90. SOURCEBOOK tables 6.141, 6.142, 6.149, 6.152, 6.153.

This bulletin presents data on prisoners sentenced to death, current methods of execution, and recent changes in capital punishment legislation. Prisoner information includes sex, race, ethnicity, age, education, marital status, and criminal history.

## Census of Local Jails 1988

(Periodic. Bulletin NCJ-121101. Washington: U.S. Department of Justice, February 1990. 11 pages, 24 tables.)

Presents data for 1988 and trend tables for 1978-88. SOURCEBOOK tables 1.101, 6.366.38.

This document presents selected findings frem the June 30, 1988 National Jail Census conducted by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics. This census is the fifth in a
series of surveys of local jails conducted in 1970, 1972, 1978, and 1983. Data are presented on the number of jails and inmates for both 1983 and 1988 by State and region, jail overcrowding, average daily jail population, admissions and releases, rated jail capacity, inmate deaths, number of jail employees, jails under court order, and jail expenditures. This bulletin precedes a detailed five volume publication presenting additional data from the 1988 Census.

## Census of Local Jails, 1988

(Periodic. NCJ-127992. Washington: U.S. Department of Justice, 1991. 36 pages, 44 tables.)

Presents data for 1988. SOURCEBOOK tables 1.98-1.100, 6.35, 6.39, 6.40, 6.41, $6.43,6.44,6.47,6.52$.

This report presents findings from the 1988 Census of Local Jails conducted by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics. This census is the fifth in a series of surveys of local jails conducted in 1970, 1972, 1978, and 1983. Data presented are as of June 30, 1988 and include tables on the number of jails and jail inmates, jail capacity, use of space, and number of jails under court order or consent decree. Also presented are data on programs and health services available for inmates and causes of inmate deaths.
Number and characteristics of jail employees, jail expenditures, and expansion plans are also provided. Data on juveniles detained in local jails are included as are data on amount of time served prior to release. The survey methodology is described and an appendix provides a copy of the questionnaire.

## Compendium of Federal Justice Statistics, 1988

(Annual. NCJ-130474. Washington: U.S. Department of Justice, 1991. 119 pages, 47 tables, 7 figures.)

Presents data for 1988. SOURCEBOOK tables 5.8-5.11, 5.17-5.19, 5.22, 6.6, 6.137.

This report presents detailed information on the processing of cases in the Federal criminal justice system during 1988. The data are derived from the Federal Justice Statistics data base which is constructed from source files provided by the Executive Office for U.S. Attorneys, the Administrative Office of the U.S. Courts, the Pretrial Services Agency (PSA), and the Federal Bureau of Prisons. Information is provided on prosecutorial decision-making processes by U.S. Attorneys, form and outcome of pretrial release or detention, disposition of cases, type and length of sentences imposed, and outcomes
of parole and probation. In addition, information on average time served and sentence length for those offenders who were incarcerated are presented. A brief methodological description, as well as a glossary of terms are included.

## Correctional Populations in the United States, 1990

(Annual. NCJ-135946. Washington: USGPO, 1992, 189 pages, 92 tables.)

Presents data for 1990 and trend data for 1930-90. SOURCEBOOK tables Fig. 6.1-Fig. $6.70-6.77,6.124,6.129,6.138,6.143-6.148$, 6.150, 6.154.

This report consolidates information collected through a series of surveys of State and Federal corrections officials. The surveys, which include the 1990 Sample Survey of Jails; the 1990 Probation Data Survey; and the Census of State and Federal Correctional Facilities in 1990, among others, were sponsored by the Bureau of Justice Statistics and conducted by the U.S. Bureau of the Census. Data on the numbers and characteristics of persons under correctional supervision in each jurisdiction, including movements between the major components of the correctional system, are presented. Probation and parole populations are examined. Jail facilities and inmates housed in local jails are presented. In addition, data on the numbers and characteristics of offenders under sentence of death are reported.

## Crime and the Nation's Households, 1990

(Annual. Bulletin NCJ-130302. Washington: U.S. Department of Justice, August 1991. 7 pages, 5 tables, 3 figures.)

Presents data for 1990 and trend tables for 1975-90. SOURCEBOOK tables 3.41, 3.42, Fig. 3.1, Fig. 3.2.

This annual bulletin presents data from the National Crime Victimization Survey (NCVS) regarding the frequency with which American families experience crime directly. While concentrating on 1990, the bulletin also presents trend data from 1975. Demographic characteristics presented include race and ethnicity of household head, annual family income, region, and place of residence. An explanation of the methodology involved in developing the households touched by crime indicator is also included.

## Crime Victimization in City, Suburban, and Rural Areas

(Special. NCJ-135943. Washington: U.S. Department of Justice, 1992. 16 pages, 14 tables, 4 figures.)

Presents data for 1987-89 arid trend data for 1973-89. SOURCEBOOK tables 3.4-3.6, 3.34, 3.64.

This report presents information on citt, suburban, and rural victimizations using data reported to the National Crime Victimization Survey from 1973-89. Data are presented on trends in violent, theft, and household victimizations. Average annual rates of crimes of violence and theft, and household crimes are presented by demographic characteristics for city, suburban, and rural areas. Data on selfprotection measures employed by victims are included. Victims' perceptions of offender characteristics, offenders' use of a weapon, and offencers' use of drugs and alcohol are also provided.

## Criminal Victimization 1990

(Annual. Bulletin NCJ-130234, Washington: U.S. Department of Justice, October 1991. 8 pages, 9 tables, 4 figures.)

Presents data for 1989 and 1990 and trend tables for 1973-90. SOURCEBOOK tables 3.2, 3.3.

This report presents information on criminal victimization in the United States using National Crime Victimization Survey (NCVS) data from 1989 and 1990. Data presented in this report include levels and rates of victimization for personal and household crimes and police reporting rates for personal and household crimes for 1989 and 1990. Changes in victimization rates and police reporting rates for personal and household crimes for the period 1973 through 1990 are also presented.

## Criminal Victimizalion in the United States, 1990

(Annual. NCJ-134126. Washington: U.S. Department of Justice, 1992. 1.56 pages, 133 tables, 4 figures, 5 appendices.)

Presents data for 1990. SOURCEBOOK tables 3.1, 3.10-3.13, 3.16-3.28, 3.37-3.40, 3.43-3.45, 3.49, 3.51-3.61.

This report presents information on criminal victimization in the U.S. during 1990, and is the 18th in a series of annual reports prepared under the National Crime Victimization Survey (NCVS) program. The NCVS, conducted for the Bureau of Justice Statistics by the U.S. Bureau of the Census, is based on findings from a continuous survey of a representative sample of approximately 47,000 housing units across the U.S., inhabited by about 95,000 individuals age 12 and older.

The NCVS concentrates on certain criminal offenses: the personal crimes of rape, robbery, assault, and larceny, and the
household crimes of burglary, larceny, and motor vehicle theft. Both completed and attempted crimes are included in the survey. These crimes are examined from the perspective of their frequency, characteristics of the victims and offenders, circumstances surrounding the offenses and their impact, and patterns of police reporting.

The appendices present the data tables, survey questionnaire and instrument, and technical information concerning sampling design, data collection, estimation procedures, reliability of estimates, and information on stiandard error computation. Estimates of the economic cost of crime to victims are presented as is a supplementary analysis on family violence. The final section of the report is a glossary, listing crime category definitions and the meanings of variables and other terms used in the NCVS.

## Criminal Victimization in the United States: 1973-88 Trends

(Special. NC.J-129392. Washington: U.S. Department of Justice, 1991, 94 pages, 49 tables, 9 figures, 2 appendices.)

Presents trend data for 1973-88. SOURCEBOOK tables 3.14, 3.29-3.32, 3.46, 3.47, 3.50 .

This report presents information on criminal victimization in the U.S. from 1973-88. The data are derived from the National Crime Victimization Survey (NCVS) conducted for the U.S. Department of Justice, Bureau of Justice Statistics by the U.S. Bureau of the Census. Numbers and rates of personal and household crimes are provided for the 16year period. Data are broken down by victim age, race, sex, and locality of residence for the personal crimes of rape, robbery, assault, and personal larceny. For the crimes of burglary, household larceny, and motor vehicle theft, data are presented by race of head of household, household tenure and size, and locality of residence. In addition, number and percent of victimizations reported to the police are displayed by the age, race, and sex of the victim. The survey methodology is discussed and a glossary of terms is provided.

## Drug Enforcement by Poiice and Sheriffs' Departments, 1990

(Special Report NCJ-134505. Washington: U.S. Department of Justice, May 1992. 10 pages, 17 tables.)

Presents data for 1990. SOURCEBOOK tables 1.56-1.60, 4.37, 4.38.

This report presents data from the Law Enforcement Management and Administrative Statistics (LEMAS) program of the U.S. Department of Justice, Bureau of Justice

Statistics. Findings are presented for 49 State police agencies and a nationallyrepresentative sample of 1,830 local police departments and 840 sheriffs' departments. Data are presented on seizures of drugs, special drug enforcement units, participation in multi-agency drug enforcement, receipt of money or goods from drug asset forfeiture, and drug testing of arrestees. Information is also included on drug testing of employees by random and mandatory tests and tests under suspicion of use; sanctions for testing positive; and drug testing programs. A description of the methodology used for the 1990 LEMAS survey is included.

## Drugs and Jail Inmates, 1989

(Special Report NCJ-130836. Washington: U.S. Department of Justice, August 1991. 12 pages, 20 tables.)

Presents data for 1983 and 1989. SOURCEBOOK tables 6.58-6.60, 6.64, 6.65.

This report presents data from the 1989 Survey of Inmates in Local Jails conducted for the U.S. Department of Justice, Bureau of Justice Statistics by the U.S. Bureau of the Census. The report focuses on inmates who were charged with or convicted of a drug offense or had used drugs prior to committing their offense. Information is provided on characteristics of jail inmates, type ui current and prior sentence, and criminal history. In addition, data are presented on drug use, drug use history, crack and cocaine use, reason for committing the offense, drug treatment participation, family background, and prior physical or sexual abuse. A brief methodology section is also provided.

## Federal Criminal Case Processing, 198089, With Preliminary Data for 1990

(Annual. NC.J-130526. Washington: U.S. Department of Justice, 1991. 29 pages, 18 tables.)

Presents trend data for 1980, and 1985-90. SOURCEBOOK tables 5.12-5.16, 5.20, 5.21, 5.23.

This report presents detailed information on the processing of cases in the Federal criminal justice system for the years 1980, 198589 , and preliminary figures for 1990. The data are derived from the Federal Justice Statistics database and describe initial prosecution decisions by U.S. Attorneys, suspects referred to U.S. magistrates, total number of cases terminated, defendants convicted or dismissed in U.S. Disirict Courts, and defendants convicted and dismissed under the jurisdiction of U.S. magistrates. In addition, the number and percent of offenders sentenced to prison in U.S. District Courts, and
their average sentence length is provided.
Felony Sentences in State Courts, 1988
(Periodic. Bulletin NCJ-126923. Washington:
U.S. Department of Justice, December 1990. 11 pages, 14 tables.)

Presents data for 1988. SOURCEBOOK tables 5.46-5.52.

This bulletin presents data on felony sentences imposed by State courts. The data are derived from the National Judicial Reporting Program administered by the U.S. Department of Justice, Bureau of Justice Statistics. The results are based on case processing in a nationally-representative sample of 300 counties, Information presented includes number of felony convictions and types of sentences imposed by State courts. Data on sentence length and time served are provided. Demographic characteristics of persons convicted of felonies are also presented, as are data on number and type of felony convictions. Mean and median number of days between arrest and sentencing are included as is information on the use of collateral penalties by State courts.

## Forgery and Fraud-Related Offenses in 6 States, 1983-88

(Special Report NCJ-132445. Washington: U.S. Department of Justice, 1992.7 pages, 10 tables, 1 figure.)

Presents trend data for 1983-88, SOURCEBOOK tables 4.17, 5.58-5.62.

This report presents information on forgery and fraud-related criminal case processing in California, Minnesota, Nebraska, New York, Pennsylvania, and Virginia. Information is presented on felony arrests, prosecutions, and dispositions by type of offense. Also provided is information on sentences received by those arrested for felonies. Sentence information is presented by arrest offense as well as conviction offense. The likelihood of being prosecuted, convicted, and sentenced to jail or prison is provided as well. The report also contains data on the sex, race, and age of persons arrested for felonies in the six States. A brief methodology section describes the Offender Based Transaction Statistics database from which this informetion was obtäined.

## Immigration Offenses

(Special Report NCJ-124546. Washington: U.S. Department of Justice, August 1990. 6 pages, 12 tables, 1 figure.)

Presents data for 1987 and trend tables for 1980-87. SOURCEBOOK tables 5,83-5.86.

This report presents information on the apprehension and disposition of immigration law violators. These data are provided by the Executive Office for U.S. Attorneys and the Administrative Office of the U.S. Courts. Data are presented on the number of suspects investigated by U.S, Attorneys for the years 1980-87 and the number of suspects referred to U.S. Attorneys in 1987 by the Immigration and Naturalization Service (INS). Also presented is information on decisions to prosecute by U.S. Attorneys and prosecutions and case outcomes handled by U.S. Magistrates and U.S. District Courts. Type of sentence and average length of prison sentences imposed on offenders convicted of immigration offenses in U.S. District Courts are also provided. An appendix table presents a detailed breakdown of the immigration offense categories for suspects investigated by U.S. Attorneys in 1987. A brief methodological description is also included.

## Jail Inmates 1991

(Annual. Bulletin NCJ-134726. Washington: U.S. Department of Justice, June 1992.7 pages, 12 tables.)

Presents data for 1990 and 1991 and trend tables for selected years 1978-91. SOURCEBOOK tables 6.34, 6.42, 6.45, 6.51.

The bulletin presents data from the 1991 Annual Survey of Jails. Data presented include average daily population, admissions and releases, demographic characteristics of inmates, rated jail capacity, percent occupied, inmate deaths, and jails under court order. Also included is an appendix table which lists the one-day counts and the average daily population of jail inmates for 1978, 1983, and 1988-91.

## Juslice Expenditure and Employment, 1990

(Periodic. Bulletin NCJ-135777. Washington: U.S. Department of Justice, August 1992. 13 pages, 14 tables.)

Presents data for 1990 and trend tables for 1971-79, 1985, 1988, and 1990. SOURCEBOOK tables 1.1-1.4, 1.16, 1.17, 1.20.

This report presents criminal justice expenditure and employment data for 1990 and trend tables for 1971-79, 1985, 1988, and 1990. The information was collected by the U.S. Bureau of the Census from the Federal Government, all State governments, all county governments, and a sample of municipal and township governments. Data are presented on six categories of criminal justice
activities: police protection; courts; prosecution and legal services; public defense; corrections; and a residual "other" category. The report contains a description of the methodology, data limitations, and definitions of terms. Public experiditure data are for fiscal 1990. Employment data are for the government's pay period that includes Oct. 12, 1990 and payroll data are for the month of October 1990.

## Justice Expenditure and Employment in the U.S., 1990

(Annual. NCJ-137754. Washington: USGPO, 1992.179 pages, 72 tables.)

Presents data for 1990 and trend data for 1971-79, 1985, 1988, and 1990. SOURCEBOOK tables 1.5-1.8, 1.18, 1.19, 1.21.

This publication is the $23 r d$ in a series of reports that present public expenditure and employment data on civil and criminal justice activities in the United States. The data in this report were collected by the U.S. Bureau of the Census for the Bureau of Justice Statistics through a special Survey of Criminal Justice Expenditure and Employment, which was an annual survey from 1971 to 1979 and was conducted for 1985, 1988, and 1990. Data are presented for six categories of justice activity: police protection; courts; legal services and prosecution; public defense; corrections; and a residual "other" category. Specific data are supplied for the Federal Government, each of the 50 State governments, and the aggregate local level of government within each State. Data are published separately for the county governments and the municipal governments (cities, towns, and townships) for each of the 72 counties with a 1986 population of 500,000 or more, and for the 49 municipalities with a 1986 population of 300,000 or more. A survey methodology section discusses the variation in some fiscal year ending dates. The data in this report are not comparable to those in the Justice Expenditure and Employment Extracts series.

## Justice Variable Passthrough Data, 1990

(Periodic. Technical Report NCJ-133018. Washington: U.S. Department of Justice, February 1992. 8 pages, 2 tables, 1 figure.)

Presents data for 1990 and trend data for 1971-90. SOURCEBOOK tabie 1.11.

This report presents criminal justive expenditures from "own souices" revent:es and variable passthrough (VPT) data for 1990 for each State government and the aggregate of all locai governments in each State. VPT data determine the amount of a State's grant that must be allotted to local governments in the

State. Specifically, the VPT data indicate to each State government how much of its total award can be used at the State level and how much it must pass through to local governments. The data in this report were collected by the U.S. Bureau of the Census for the Bureau of Justice Statistics (BJS). BJS provides the Bureau of Justice Assistance (BJA) with the VPT data for use in BJA's State and local formula grant program. A brief methodology section is included in the report.

## National Corrections Reporting Program, 1988

(Annual. NCJ-123522. Washington: U.S. Department of Justice, 1992.93 pages, 74 tables, 8 figures.)

Presents data for 1988. SOURCEBOOK tables 6.79-6.81, 6.92-6.94, 6.125, 6.126, 6.130-6.132, 6.134-6.136.

This report presents data from the National Corrections Reporting Program. It is the fourth in an annua! series that describes the characteristics of persons admitted to and released from State and Federal prison and parole systems during 1988. The report is divided into eight sections. The first two sections provide information on admissions and releases from State prison by a number of demographic characteristics, offense type, sentence length, time served, and method of release. The next two sections present data on entries and discharges from State parole. These data also include demographic characteristics, offense type, and time served, as well as successiful and unsuccessful parole discharges. Four sections are devoted to Federal prison admissions and releases, and Federal parole entries and discharges. These sections reflect the same type of information presented for the States. A description of the methodology is included as vell.

## Population Density in Local dails, 1988

(Sperial. NCJ-122299. Washington: U.S. Department of Justice, Narch 1990. 10 pages, 11 tables, 2 figures.)

Presents data for 1988 and trend tables for 1983 and 1988. SOURCEBOOK tables 1.97, 1.102.

This report presents data on jail population density from the 1988 Census of Local Jails conducted by the U.S. Bureau of the Census for the Bureau of Justice Statistics. Information is provided on amount of housing space available, number and size of jails, number of correctional officers, and inmate to staff ratios. Also presented is average square feet of living space per inmate, inmates per living unit, and hours confined to living unit. Indicators of social and spatial density are also
provided by region. Data from the 1983 Census of Local Jails is presented in some cases for comparison.

## Pretrial Release of Felony Defendants, 1988

(Special. Bulletin NCJ-127202. Washington: U.S. Department of Justice, February 1991. 10 pages, 16 tables.)

Presents data for 1988. SOURCEBOOK tables 5.63-5.68.

This report presents pretrial release data on a sample of felony defendants in the 75 most populous counties in the United States. The data are derived from the National Pretrial Reporting Program initiated in 1988 by the U.S. Department of Justice, Bureau of Justice Statistics. Information is presented on the number of felony defendants released before case disposition, financial and nonfinancial release, and type of offense. In addition, data on bail amounts, number of prior convictions, and the number rearrested prior to case disposition are provided. Finally, time from pretrial release to rearrest, time from arrest to adjudication, adjudication outcome, and sentencing outcome are presented. A methodology section describes the study and provides definitions of terms used in the report.

## Probation and Parole 1990

(Annual. Bulletin NCJ-133285. Washington: U.S. Department of Justice, November 1991. 8 pages, 5 tables, 2 figures.)

Presents data for 1990 and trend tables for 1977-90. SOURCEBOOK tables 6.1, 6.2, 6.127, 6.128.

This bulletin reports on probation and parole populations for the 50 States, the District of Columbia, and the Federal system. Data are presented on probation and parole entries and exits for 1990, and on the rate of probationers and parolees per 100,000 adult residents. Summary data comparing prison, probation, and parole populations are presented as are national data on trends in methods of State prison releases.

## Profile of Jail Inmates, 1989

(Special Report NCJ-129027. Washington: U.S. Department of Justice, April 1991. 12 pages, 20 tables.)

Presents data for 1983 and 1989. SOURCEBOOK tables 6.48, 6.53, 6.56, 6.57, 6.63, 6.66.

This report presents data from the 1989
Survey of l.mates in Local Jails conducted
for the U.S. Department of Justice, Bureau of Justice Statistics by the U.S. Bureau of the Census. Information is provided on characteristics of jail inmates, detention status, current offenses, criminal justice status at arrest, prior sentences and criminal history, sentence length, and time served. In addition, data are presented on drug and alcohol use, treatment for drug and alcohol abuse, family background, prior physical and sexual abuse, and mental health problems. A brief methodology section is also provided.

## Profile of State Prison Inmaies 1986

(Special. Bulletin NCJ-109926. Washington: U.S. Department of Justice, January 1988.8 pages, 15 tables.)

Presents data for 1979 and 1986. SOURCEBOOK table 6.82.

This bulletin presents the results of the 1986 Survey of Inmates of State Correctional Facilities. This survey is conducted by the U.S. Bureau of Census for the Bureau of Justice Statistics. Data on sociodemographic characteristics, current offense, criminal history, and prior sentences of a sample of State prisoners are provided. Also included is information on inmates' pre-incarceration alcohol and drug use as well as selected characteristics of the victims of violent crimes committed by these inmates. Data from the 1979 Survey of Inmates is also presented for comparison.

## Prosecutors in State Courts, 1990

(Periadic. Bulletin NCJ-134500. Washington: U.S. Department of Justice, March 1992. 9 pages, 20 tables.)

Presents data for 1990 and comparison data for 1974. SOURCEBOOK tabies 1.88, 1.89, 5.45.

This report presents data from the 1990 National Prosecutor Survey Program (NPSP), the first national survey of prosecutors since the 1974 National District Attorneys Association survey. The 1990 NPSP survey was conducted by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics. The data are derived from a nationally-representative sample of 290 chief prosecutors, resulting in 289 completed questionnaires. The prosecutorial districts of these chief prosecutors encompassed a total of 514 counties and independent cities. The report presents information on chief prosecutors in State courts including prosecutorial employment, workload, and population served. Data are also presented on policies and practices related to the stages of felony prosecution. A brief methodological description is also provided.

## Race of Prisoners Admitted to State and Federal Institutions, 1926-86

(Special. NCJ-125618. Washington: U.S. Department of Justice, 1991. 54 pages, 10 tables, 3 appendices.)

Presents trend data for 1926-86. SOURCEBOOK table 6.78.

This report provides information on the race of prisoners admitted to State and Federal prisons from 1926 through 1986. These data were collected through the National Prisoner Statistics program conducted by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics. Data are presented for each State and Federai jurisdiction for each year as well as in aggregate form.

## Recidivism of Felons on Probation, 1986-

 89(Special Report NCJ-134177. Washington: U.S. Department of Justice, February 1992. 11 pages, 14 tables, 1 figure.)

Presents data for 1986-89 (aggregate). SOURCEBOOK tables 6.7-6.11.

This report presents data collected in a followup survey of felony probationers compiled by the U.S. Department of Justice, Bureau of Justice Statistics. The original survey, conducted in 1986, collected data on felony sentencing in 100 counties. The followup survey was conducted in 32 of the original 100 counties. This survey used criminal history files and probation files to obtain information on arrests during probation, and also used probation files to obtain additional information. Data are presented on the characteristics of felony probationers, felony probationers that received a sentence with special conditions or a financial penalty, and compliance with these sentences. Also presented is information on the number of probationers arrested for a felony while on probation and the type of sentence imposed on probationers arrested for a felony.

## School Crime

(Special. NCJ-131645. Washington: U.S. Department of Justice, 1991. 18 pages, 31 tables.)

Presents data for 1989. SOURCEBOOK tables 3.64-3.70.

This report summarizes the responses collected by the National Crime Victimization Survey (NCVS) in a special supplement focusing on victimization at school, conducted during the first half of 1989. The data represent an estimated 21.6 million students,
ages 12 to 19. Data are presented on victimizations occurring at school by demographic characteristics of students and characteristics of the school. Several tables also present information on the availability of drugs and alcohol at school as well as the existence of drug prevention measures at school. Data on gang presence and fear of victimization at school are also provided. Fear-inspired behaviors such as avoiding certain areas of the school or bringing a weapon to school for protection are also examined. A discussion of the NCVS methodology and a copy of the school crime supplement questionnaire are included.

## Sheriffs' Departments 1990

(Bulletin NCJ-133283. Washington: U.S. Department of Justice, February 1992. 11 pages, 24 tables.)

Presents data for 1990 . SOURCEBOOK tables 1.24, 1.26, 1.29, 1.31, 1.34, 1.38, 1.40, $1.42,1.44,1.46,1.49,1.52,1.55$.

This bulletin presents data from the Law Enforcement Management and Administrative Statistics (LEMAS) program of the U.S. Department of Justice, Bureau of Justice Statistics. Findings are presented for sheriffs' departments that comprise approximately 30 percent of the police agencies participating in the LEMAS program. National estimates are derived from a sample of 840 responding sheriffs' departments. Data are presented on number and characteristics of personnel, size of population served, operating expenditures, workload and job functions, and training and educational requirements for recruits. Information is also presented on lethal and nonlethal weapons authorized for use, and body armor policies. The extent of computerization, and the existence of special units and written policy directives are also discussed. A description of the methodology used for the 1990 LEMAS survey is included.

## State and Local Police Departments, 1990

(Bulletin NCJ-133284. Washington: U.S. Department of Justice, February 1992. 14 pages, 34 tables.)

Presents data for 1987 and 1990. SOURCEBOOK tables 1.22, 1.23, 1.25, 1.27, 1.28, $1.30,1.32,1.33,1.35,1.37,1.39,1.41,1.43$, $1.45,1.47,1.48,1.50,1.51,1.53,1.54$.

This bulletin presents data from the Law Enforcement Management and Administrative Statistics (LEMAS) program of the U.S. Department of Justice, Bureau of Justice Statistics. Findings are presented for 49 State
police agencies and a nationally representative sample of 1,830 local police departments. Data are presented on number and characteristics of sworn personnel, size of population served, operating expenditures, job functions, and training and educational requirements for recruits. Information is also presented on lethal and nonlethal weapons authorized for use, and body armor policies. The extent of computerization, and the existence of special units and written policy directives are also discussed. A description of the methodology used for the 1990 LEMAS survey is included.

## Teenage Victims

(Special. NC.J-128129. Washington: U.S. Department of Justice, 1991. 13 pages, 26 tables.)

Presents aggregate data for 1985-88 and trend data for 1979-88. SOURCEBOOK tables 3.7, 3.8, 3.15, 3.33, 3.63.

This report presents aggregate data for 198588 on the number of teenagers victimized by crimes of violence and theft. Data on rape, robbery, assault, and crimes of theft were derived from the National Crime Victimization Survey conducted annually by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics. Data on homicides were collected from the Uniform Crime Reports compiled by the Federal Bureau of Investigation. Information on teenage victimization is reported by various victim and offender characteristics including sex, race, ethnicity, victim-offender relationship, and household composition. In addition, data on place of occurrence, type of weapon, injuries sustained, reasons for not reporting to the police, and perceived alcohol use by the offender are presented.

## Tracking Offenders, 1988

(Bulletin NCJ-129861. Washington: U.S. Department of Justice, June 1991. 6 pages, 10 tables, 1 figure.)

Presents data for 1988. SOURCEBOOK tables 4.16, 5.53-5.57.

This report presents information on criminal case processing in Alabama, Alaska, California, Delaware, Kentucky, Minnesota, Missauri, Nebraska, New York, Oregon, Pennsylvania, Utah, Vermont, and Virginia. Information is presented on felony arrests, prosecutions, and dispositions by type of offense. Also provided is information on sentences received by those arrested for felonies. Sentence information is presented by arrest
offense as well as conviction offense. The likelihood ofr being prosecuted, convicted, and sentenced to jail or prison is provided as well. The report also contains data on the sex, race, and age of persons arrested for felonies in the fourteen States. A brief methodology section describes the Offender Based Transaction Statistics data base from which this information was derived.

## Women in Jail 1989

(Special Report NCJ-134732. Washington: U.S. Department of Justice, Narch 1992. 12 pages, 22 tables.)

Presents data for 1983 and 1989. SOURCEBOOK tables $6.46,6.49,6.50,6.54,6.55$, 6.61, 6.62.

This report presents data on women incarcerated in local jails throughout the United States. The data were collected through the 1989 Survey of Inrnates in Local Jails conducted by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics. Data presented include inmate demographic characteristics, prearrest employment and income, current offenses, criminal history, prior drug and alcohol use, and past physical or sexual abuse. For women convicted of violent offenses, the characteristics of their victims are described. Data from the 1983 Survey of Inmates in Local Jails are also presented for comparison. A brief methodology section presents details on the survey procedures.

## Women in Prison

(Special Report NCJ-127991. Washington: U.S. Department of Justice, March 1991. 8 pages, 15 tables.)

Presents data for 1979 and 1986, and trend data for 1980-89. SOURCEBOOK tables 6.83-6.86, 6.88, 6.89 .

This report presenis data on women incarcerated in State prisons. The data were collected through the 1986 Survey of Inmates in State Correctional Facilities conducted by the U.S. Bureau of the Census for the U.S. Department of Justice, Bureau of Justice Statistics. Data presented include the characteristics and offenses of female inmates, relationship to victims, criminal history, and sentence length and time served. Information is also provided on the use of drugs among female inmates, prior physical and sexual abuse, mothers in prison, and the recent growth of the female offender population. A brief methodology section presents details of the survey procedures.
U.S. Department of Justice, Criminal Division
"Report to Congress on the Activities and
Operations of the Public Integrity Section for
1990 " 1990"
(Annual. Washington: U.S. Department of Justice, 1991. Mimeographed. 30 pages, 3 tables.)

Presents data for 1970-90. SOURCEBOOK table 5.101.

This report was compiled by the Public Integrity Section of the U.S. Department of Justice. It presents tabular information describing Federal prosecutions of Federal, State, and local public officials for offenses involving abuse of public office. The number of public officials and others involved who were indicted, convicted, and awaiting trial is presented for each year from 1970 to 1990. Additionally, the number of convictions of individuals involved in abuse of public office is reported by judicial district.

## U.S. Department of Justice, Drug Enforce-

 ment Administration
## 1991 Domestic Cannabis Eradication/Suppression Program

(Annual. Washington: U.S. Department of Justice, 1992. 42 pages, 8 tables, 9 figures.)

Presents data for 1991 and trend tables for 1982-91. SOURCEBOOK table 4.41.

This document reports on the Drug Enforcement Administration's (DEA) Domestic Marijuana Eradication/ Suppression Program, describing the effort of the DEA in cooperation with State, local, and other Federal agencies to eradicate domestically cultivated marihuana in the United States. The report presents statistics on the number of marihuana plants destroyed, the number of plots sighted and eradicated, the number of persons arrested, and the number of weapons seized in connection with the eradication program. Data are also presented on the number of sinsemilla and ditchweed plants destroyed, the number of indoor cultivation operations eradicated, and the value of assets seized. Program funding, training, and cooperation with other agencies is also discussed.

## U.S. Department of Justice, Executive Office for United States Attorneys

United States Attorney's Office: Statistical Report Fiscal Year 1991
(Annual. Washington: USGPO, 1991. 75 pages, 37 tables, 14 figures.)

Presents data for fisca! 1991 and trend tables for fiscal 1982-91. SOURCEBOOK tables 5 ., 5.7.

This annual publication is comprised of charts, tables, and commentary summarizing the criminal and civil workloads in U.S. Attorneys' offices. Data are presented on civil and criminal cases filed, terminated, and pending; criminal complaints received, closed, and pending; monetary and nonmonetary civil matters received, terminated, and pending; criminal and civil trials in U.S. District Courts; and number and method of disposition of criminal cases and defendants in U.S. District Courts and U.S. appellate courts. Additional information is provided on fines imposed, collected, suspended, and uncollectable; grand jury proceedings; appeals filed and terminated in U.S. Attorneys' offices; and staffing in U.S. Attorneys' offices.

## U.S. Department of Justice, Federal Bureau of Investigation

"Bank Crime Statistics, Federally Insured Financial Institutions"
(Annual. Washington: U.S. Department of Justice, 1992. Mimeographed. 19 pages, 20 tables, 11 figures.)

Presents data for 1991. SOURCEBOOK tables 3.157, 3.158.

This report presents data on crime involving Federally insured financial institutions. Information is provided on violations of Federal bank robbery statutes and the Hobbs Act. The data are broken down by characteristics of the banking institutions, offenders, property loss and recovery, community characteristics, deaths, injuries sustained, hostages taken, and State and region of occurrence.

## Bomb Summary 1990

(Annual. FBI Uniform Crime Reports. Washington: U.S. Department of Justice, 1991. 40 pages, 10 tables, 17 figures.)

Presents data for 1990 and trend tables for 1980-90. SOURCEBOOK tables 3.175, 3.176 .

This summary provides tables, charts, narrative descriptions, and comments on bombing incidents reported to the FBI. Data are presented for type of target; type of explosive device; region; State; time of day; day of week; month of year; and personal injury, deaths, and property damage.

## Crime in the United States, 1990

(Annual. FBI Uniform Crime Reports. Washington: USGPO, 1991. 363 pages, 105 tables (estimated), 41 figures, 5 appendices.)

Presents data for 1990 and trend tables for 1981-90. SOURCEBOOK tables 1.63-1.65, 3.127-3.130, 3.134, 3.135, 3.138-3.146, 3.148-3.154, $3.180-3.182,4.1-4.15,4.18-$ 4.28, 4.30.

This report begins with a summary of the Uniform Crime Reporting Program. Each Index offense (murder'and nonnegligent manslaughter, aggravated assault, forcible rape, robbery, burglary, larceny-theft, motor vehicle theft, and arson) is described individually in terms of the volume and trend of offenses known to police, the nature of the offense (e.g., type of weapon used, regional distribution, or target of the offense), clearances of the offense, and persons arrested and charged. Data on Index offenses cleared by arrest are then presented, followed by information on persons arrested and persons charged. The last section of the report focuses on law enforcement personnel.

Data are presented on offenses known to police by State, region, size of place, and extent of urbanization. Clearance and arrest information are presented for the United States as a whole (estimated), cities, suburban areas, and rural areas. Disposition data are based on a limited number of reporting agencies and are presented by offense, except for juveniles taken into custody. The law enforcement personnel information includes data on the number of sworn and civilian law enforcement employees in the United States.

The 1990 report includes five appendices. The first appendix describes the data base and construction of each of the major tables in the report. Definitions of the offenses are presented in the second appendix. In the third appendix there are definitions of population categories used throughout the report. The fourth appendix presents the Index of crime and the number of index offenses known to police by Metropolitan Statistical Area. The fifth appendix is a directory of State Uniform Crime Reporting Programs.
"The Financial Institution Fraud and Failure Report for Fiscal Year 1991 Ending September 30, 1991"
(Annuai. Washington: U.S. Department of Justice, 1992. Mimeographed. 9 pages, 8 tables.)

Presents data for fiscal 1991 and trend tables for fiscal 1986-91. SOURCEBOOK table 3.156.

This report presents information on financial institution fraud and failure cases investigated
by the Federal Bureau of Investigation's White Collar Crime Program. Data are presented on the number and type of failed financial institutions under investigation as well as the number of major cases pending. Also presented are figures on the number of financial institution fraud and failure matters resulting in convictions and the dollar amount losses attributed to fraud and failure matters.

## Law Enforcement Officers Killed and Assaulted, 1990

(Annual. FBI Uniform Crime Reports. Washington: USGPO, 1991.59 pages, 38 tables, 3 figures.)

Presents data for 1990 and trend tables for 1981-90. SOURCEBOOK tables 3.159-3.164, 3.166-3.171.

This report contains comments, tables, charts, and descriptive summaries on law enforcement officers feloniously killed and assaulted in the line of duty. Data on officers killed are presented by State; geographic region; population group; circumstances at the scene of the incident; type of officer assignment; type of weapon used in the offense; location of the fatal wound; distance between the officer and offender; and the month, day, and time of the attack. Profiles of the victim officers and the known offenders are also included. Data on officers assaulted are presented by geographic region, population group, type of weapon, circumstances at the scene of the incident, type of officer assignment, percent receiving personal injury, time of day, and percent cleared.

Information is also provided on law enforcement officers accidentally killed. These data are broken down by geographic region, State, and circumstances at the scene of the incident.

The report also presents data on assaults on Federal officers from six sectors of the U.S. Government: the Department of the Interior, the Department of Justice, the Depariment of the Treasury, the judicial branch, the U.S. Capitol Police, and the U.S. Postal Service. This section begins with departmental summaries and descriptive summaries of selected incidents of assaults on Federal officers that occurred during 1990. Data are presented on the number of known assailants, officers killed or injured, type of weapon, type of activity the officer was engaged in at time of incident, disposition of known assailants, and geographic region.
U.S. Department of Justice, Federal Bureau of Prisons

## Facilities 1991

(Annual. Washington: U.S. Department of Justice, 1991.89 pages, 2 figures.)

Presents data for 1991. SOURCEBOOK table 1.111.

This is the ninth edition of a report that presents information on Federal Bureau of Prisons' facilities. A brief history of the Federal Bureau of Prisons is provided. Data are presented on facility security level, judicial district of each facility, rated capacity, population, number of staff, housing accommodations, educational and vocational training programs, Federal prison industry programs, various services provided, accreditation status, and an overview of each facility. Also included are a list of staff training centers, an overview of new faciity construction, community corrections office locations, and an organizational chart of the Bureau of Prisons.
U.S. Department of Justice, National Instifute of Justice

## 1990 Drug Use Forecasting Annual Repert

(Annual. NCJ-130063. Washington: U.S. Department of Justice, August 1991. 23 pages, 16 tables, 11 figures.)

Presents data for 1990 and trend figures for 1986-90. SOURCEBOOK tables 4.33-4.37.

This report presents data on drug use among arrestees in 23 cities throughout the United States. The data are drawn from the Drug Use Forecasting ;DUF) program which is sponsored by the U.S. Department of Justice, National Institute of Justice. Data are based on voluntary urinalysis testing and self-reports from samples of arrestees. Information is presented on the use of any drugs, use of marihuana, cocaine, heroin, and multiple drug use. In addition, the data are broken down by gender, age, and race. The distribution of arrest charges for adult arrestees and juvenile arrestees/detainees is provided. Selfreported use of alcohol among arrestees is also discussed.
U.S. Depariment of Justice, Office of Juvenile Justice and Delinquency Prevention

## Children in Custody 1989

(Periodic. NCJ-127189. Washington: U.S. Department of Justice, January 1991. 10 pages, 8 tables.)

Presents data for 1989 and trend data for 1985-89. SOURCEBOOK tables 6.19-6.22, 6.24-6.26, 6.28, 6.29 .

This report presents information from the 1989 Children in Custody census (CIC) conducted by the U.S. Bureau of the Census for the Office of Juvenile Justice and Delinquency Prevention. Also included are selected findings from the 1985 and 1987 Censuses of Public Juvenile Detention, Correctional, and Shelter Facilities. Data are presented on the number of facilities, population counts, population flow, and demographic characteristics of juveniles in public juvenile facilities. Also provided are data on detention status and reasons for custody. In addition, information is presented on juvenile admissions and types of State and locally administered public juvenile custody facilities. Information on the total number of public facilities administered by State and local governments, total annual and per resident operating costs, and average daily population is also included.

## National Juvenile Custody Trends 19781989

(Periodic. Washington: U.S. Department of Justice, 1992. 42 pages, 11 tables, 19 figures.)

Presents data for 1989 and trend data for 1978-89. SOURCEBOOK tables 6.12, 6.13, $6.15-6.18,6.23,6.27,6.30,6.31$.

This report presents information from the biennial Children in Custody census conducted by the U.S. Bureau of the Census for the Office of Juvenile Justice and Delinquency Prevention. Data are presented for number and type of juvenile facilities as well as other facility characteristics. Population counts presented include number of admissions for calendar years as well as under custody figures based on 1 -day counts. Demographic characteristics of juveniles held are provided as is information on detention status and reasons for custody. In addition, the number and rate of juveniles under custody is provided by region and State.

## U.S. Department of Justice, U.S. Marshals Service

## The Director's Report: A Review of the United States Marshals Service in FY 1991

(Annual. Washington: U.S. Department of Justice, 1992.80 pages, 11 tables, 27 figures.)

Presents data for fiscal 1991 and trend data for fiscal 1981-9\%. SOURCEBOOK tables Fig. 1.1, Fig. 1.2, 1.70-1.73.

This report describes the activities of the U.S. Marshals Service (USMS) for fiscal year 1991. A brief history of the USMS is provided, followed by an explanation of various USMS
duties. These duties include fugitive investigations, prisoner processing and detention, prisoner production and transportation, protection of the judiciary, witness security, execution of court orders, government seizures, and special operations and analysis. Also included is a brief explanation of executive direction, support operations, administration, and training within the USMS.

## U.S. Department of Justice, U.S. Parole Commission

Annual Report of the United States Parole Commission October 1, 1989 to Sepiember 30, 1990
(Annual. Washington: U.S. Department of Justice, 1991. 19 pages, 9 tables.)

Presents data for fiscal 1990 and trend tables for fiscal 1987-90. SOURCEBOOK tables 1.123-1.125, 6.133.

This report presents information on the activjties of the U.S. Parole Commission for fiscal year 1990. The U.S. Parole Commission conducts parole hearings for 24,000 inmates currently in the custody of the Federal Bureau of Prisons and exercises jurisdiction over 22,000 Federal parolees. The document describes the guidelines used in reaching various types of parole decisions and the procedures involved in administrative appeals and the field supervision of parolees. Recent litigation involving the U.S. Parole Commission is presented as well as a brief overview of projects carried out by the Research Unit. The report documents workload statistics and decision trends for the fiscal year, describing number and type of hearings conducted, parole grants and warrants issued, percent of decisions within guidelines, percent of hearings with inmate representation, and the results of appeals to parole decisions. Finally, biographical information for the parole commissioners is provided.

## U.S. Department of State

## Patterns of Global Terrorism: 1990

(Annual. Washington: U.S. Department of State, 1991. 77 pages, 2 tables, 4 figures, 4 appendices.)

Presents data for 1990 and trend data for 1968-90. SOURCEBOOK table 3.183.

This report provides tables, charts, narrative descriptions, and comments on incidents of international terrorism. Data are presented on types of incidents and victims, and on terrorist groups, regional patterns, counter-terrorist activities, and State-supported terrorism.

Appendix A presents a statistical review of international terrorist attacks. Appendix B presents a chronology of significant terrorist events in 1990. Appendix C provides a worldwide overview of organizations that engage in terrorism. Appendix D provides a map identifying the location of international terrorist incidents in 1990.

## U.S. Department of Transportation, Federal Aviation Administration

Annual Report to Congress on the Effectiveness of the Civil Aviation Security Program, January 1-December 31, 1990
(Annual. Washington: U.S. Department of Transportation, 1992.23 pages, 5 tables, 4 figures.)

Presents data for 1990 and trend data for 1979-90. SOURCEBOOK tables 3.184, 3.185.

This report contains data on threats against civil aviation, both foreign and domestic, in the forms of hijackings, airport bombings, bomb threats, and security incidents. Also included in these reports are data on passenger screening activities and summaries of other ongoing preventive measures. This particular report covers the period Jan. 1 to Dec. 31, 1990, and provides more detailed descriptions of criminal acts against civil aviation committed during that period. The trend tables span various combinations of the years from 1979 to 1990 depending on the availability of data.
U.S. Department of Transportation, National Highway Traffic Safety Administration

## Digest of State Alcohol-Highway Safety Related Legislation, Current as of January 1, 1992

(Annual. Washington: USGPO, 1992. 513 pages, 2 tables, 2 appendices.)

Presents data for 1992. SOURCEBOOK tables 1.130-1.133.

This tenth edition of the digest provides a detailed description of the various statutory provisions related to alcohol use and highway safety. The data were collected through an examination of the statutory codes of the 50 States, the District of Columbia, and Puerto Rico. Statutory provisions are examined in the following areas: blood alcohol concentration (BAC) levels as evidence in court, preliminary breath test and implied consent laws, chemical tests authorized under implied consent laws, provisions related to adjudication of driving while intoxicated charges,
sanctions for refusal to submit to a blood alcohol concentration test, sanctions following a conviction for driving while intoxicated relaied offenses, laws requiring a blood alcohol concentration test on persons killed in traffic crashes, minimum legal drinking age, liability of owners of drinking establishments for serving alcohol to intoxicated patrons and to minors, open container laws, and anticonsumption laws. The appendices provide the Uniform Vehicle Code and Federal Alcohol Incentive Grant Criteria.

## Fatal Accident Reporting System 1990

(Annual. Washington: USGPO, 1991. 202 pages, 119 tables, 32 figures.)

Presents data for 1990 and trend data for 1966-90. SOURCEBOOK tables 3.124, 3.125.

The Fatal Accident Reporting System (FARS) gathers data on traffic accidents occurring in the United States that result in loss of human life. FARS data are collected by each State under contractual agreements with the Na tional Highway Traffic Safety Administration. This report presents information on traffic fatality trends by demographic characteristics and related situational factors. A number of tables and figures are presented on the characteristics of fatal accidents including alcohol involvement, use of safety belts, type of vehicle involved, and involvement of pedestrians. Three appendices and a glossary of terms are included.

## General Estimates System 1990

(Annual. Washington: U.S. Department of Transportation, 1991. 152 pages, 57 tables, 52 figures, 1 glossary, 3 appendices.)

Presents data fur 1990. SOURCEBOOK table 3.126.

This is the third annual report of automobile crash statistics produced from data collected by the General Estimates System. This report presents estimates of selected national characteristics of approximately $6,500,000$ police-reported motor vehicle traffic crashes that occurred in the United States in 1990. The report is divided into three sections. The first section provides information on frequency and location of automobile crashes. It also presents information on crash type, crash severity, and alcohol-related crashes. The second section presents data on the type of vehicle involved in the accident--passenger cars, light trucks, vans, utility vehicles, medium and heavy trucks, and motorcycles. Section three provides information on persons injured or killed by automobile crashes. Data are presented on drivers, passengers, pedestrians, and pedalcyclists. This report
also contains a glossary of terms and three appendices. The first appendix provides the 1990 General Estimates System variable list The second appendix lists the collection sites from which the data were obtained. The final appendix discusses the sample design, the estimation procedure, and the accuracy of the sample estimates.

## U.S. Department of Transportation, U.S. Coast Guard

## Digest of Law Enforcement Statistics, Thru March 31, 1992

(Semi-annual. Washington: U.S. Coast Guard. Mimeographed. 50 pages, 27 tables, 6 figures.)

Presents data thru Mar. 31, 1992 and trend data for 1973-92. SOURCEBOOK table 4.44.

This report presents data on the law enforcement activities of the U.S. Coast Guard. General contraband seizures, marihuana and cocaine interdictions, and other orug seizures are included. Also included are data on marihuana interdictions by vessei nationality, drug eradications with Coast Guard assistance, and Navy assistance to Coast Guard drug enforcement. Coast Guard boarding statistics are presented as is information on illegal migrant interdictions and fisheries law enforcement seizures and forfeitures.
U.S. Department of the Treasury, Bureau of Alcohol, Tobacco and Firearms

## Explosives Incidents Report 1990

(Annual. Washington: U.S. Department of the Treasury, 1991.70 pages, 22 tables, 10 figures.)

Presents data for 1990 and trend tables for 1986-90. SOURCEBOOK tables 3.173 , 3.174, 3.177, 3.178.

This report provides tables, figures, and narrative descriptions of criminal bombings and other explosives incidents that were reported to and investigated by the Bureau of Alcohol, Tobacco and Firearms. This, however, does not necessarily include all the bombings and explosives incidents that may have occurred in the United States during these years. The report is divided into seven sections. The first section describes support programs. The second section analyzes the explosive incidents. Data are presented on types of incidents, targets, motives, injuries, property damage, types of devices, geographic location, and accidental explosions.

Section three describes stolen and recovered explosives. The fourth section analyzes significant explosives investigations occurring in 1990. The final three sections present program initiatives, a directory of the Bureau's district offices, and a glossary of terms. Throughout the report, a 5 -year retrospective of explosives incidents data is presented.

## U.S. Department of the Treasury, U.S. Customs Service

## U.S. Customs m-Update 1991

(Annual. Washington: U.S. Department of the Treasury, 1992. 32 pages, 7 tables, 13 figures.)

Presents data for fiscal 1991 and trend tables for fiscal 1987-91. SOURCEBOOK tables 4.39, 4.43.

This document describes the activities of the U.S. Customs Service for fiscal 1991. The report discusses the agency's role in collecting revenue from imports and enforcing customs and related laws. Data are presented on Customs' collections by region, district, and category; carriers and persons entering the United States; merchandise entries; and seizures of property, narcotics, and dangerous drugs for violation of laws enforced by the Customs Service.
U.S. Environmental Protection Agency, Office of Enforcement

## Enforcement Accomplishments Report, Fiscal Year 1990

(Annual. Washington: U.S. Environmental Protection Agency, 1991. 123 pages, 4 tables, 8 figures, 1 appendix.)

Presents trend data for fiscal 1977-90. SOURCEBOOK table 5.89.

This report presents information on the enforcement activities of the U.S. Environmental Protection Agency, The accomplishments discussed include the development of a plan for enhanced enforcement, civil and criminal environmental enforcement activity, major enforcement litigation, and key court decisipns occurring during the year. Also included is inormation on building and maintaining a strong national enforcement program as well as media specific enforcement performance. Detailed activities of the regional offices are also provided. The report concludes with trend data on the disposition of civil and criminal enforcement and information on administrative actions and judicial referrals.
U.S. General Accounting Office, General Government Division

## Federal Criminal Justice System: A Model to Estimate System Workload

(Special. Washington: U.S. General Accounting Office, 1991. 86 pages, 38 tables, 5 figures, 7 appendices.)

Presents data for fiscal 1987-91 and estimates for 1992. SOURCEBOOK table 5.5.

This report presents actual and estimated U.S. Attorney, U.S. courts, and Federal law enforcement agency workload data. The actual data are used to develop a model designed to estimate the workload of the various components of the Federal criminal justice system. This model estimates the potential effects of increases or decreases in the budgets or staff of the various components of the Federal criminal justice system on the other components. The first section of this report describes the rational behind the development of the model, describes the model, and provides estimates produced by the model. The remainder of the report consists of seven appendices that provide more technical details on modeling methodology, model development and testing, results of the model testing, model applications, and a listing of the 148 Federal law enforcement agencies with criminal law enforcement authority.

## Noncriminal Juveniles

(Special. Washington: U.S. General Accounting Office, 1991. 77 pages, 8 tables, 12 figures, 7 appendices.)

Presents data for 1988 and trend data for 1983-88. SOURCEBOOK table 6.33.

This report discusses State compliance with the Juvenile Justice and Delinquency Prevention Act of 1974, which established a formula grant program for States to improve their juvenile justice systems. States receive grant funds for, among other things, removing status offenders (noncriminal juveniles) from secure detention and correctional facilities. Data are presented on the extent to which status offenders have been removed from secure facilities as well as general compliance with U.S. Department of Justice, Office of Juvenile Justice and Deli:Iquency Prevention regulations. The use of valid court order violations to continue to detain status offenders in secure facilities is also discussed. The appendices provide the questionnaire sent to the States as well as case studies from Ohio, Tennessee, and Utah.

U.S. Postal Service, U.S. Postal Inspection Service

## Semiannual Report, April 1 - September 30, 1991

(Semi-annual. Washington: U.S. Postal Inspection Service, 1991. 55 pages, 8 tables, 6 figures, 7 appendices.)

Presents data for fiscal 1991 and trend figures for fiscal 1986-91. SOURCEBOOK tables 5.79, 5.80

This report presents information on the activities of the U.S. Postal Inspection Service. The activities described include investigating postal service abuse, auditing internal controls, protecting the work environment, investigating criminal misuse of the mail system, and employing enforcement tools. Data are provided on financial audits, employees identified for narcotics violations, mail theft, workers' compensation fraud, and summary statistics on arrests and convictions for other criminal activities. The appendices include information on other financial audits, contract audits, operations audits, revenue audits, pending findings, Inspector General reporting requirements, and criminal statistics.

## U.S. Sentencing Commission

## Annual Report 1991

(Annual. Washington: U.S. Sentencing Commission, 1992. 392 pages, 447 tables (estimated), 13 figures, 3 appendices.)

Presents data for fiscal 1991. SOURCEBOOK tables 5.39-5.42, 5.44.

This publication presents detailed information related to U.S. Sentencing Commission activity for fiscal year 1991. The Commission's primary function is to develop and monitor sentencing policies and practices for the Federal courts that include guidelines prescribing the appropriate form and severity of punishment for offenders convicted of Federal crimes. The information is presented in five sections: administration, guideline amendments, legal issues, training and technical assistance, and research. The administration section details the organizational structure of the Commission as well as job responsibilities and budget obligations. The guideline amendments section presents information on the progress of periodic modification and refinements made to the sentencing guidelines. The legal issues section examines Federal case law interpretations of key provisions and constitutionality of the sentencing guidelines. The fourth section provides descriptive evaluation of the training and technical assistance available to Federal judges
and probation officers who utilize the guidelines. The final section of the report presents research data on monitoring, evaluation, and a mandatory minimum study applicable to the sentencing guidelines. Also provided are a description of datafiles and variables, selected sentencing statistics (by district), and supplementary tables.

## Mandatory Minimum Penalties in the Federal Criminal Justice System

(Special. Washington: USGPO, 1991. 236 pages, 45 tables, 12 figures, 10 appendices.)

Presents data for Oct. 1, 1989-Sept. 30, 1990 and trend tables for 1984-90. SOURCEBOOK tables 5.33, 5.43.

This report is submitted io Congress by the U.S. Sentencing Commission pursuant to its general authority under 28 U.S.C. $995(\mathrm{a})(20)$, specifically the statutory directive of Public Law 101-647 requiring a report on mandatory minimum sentencing provisions. The report provides an overview of mandatory minimum sentencing in the Federal criminal justice system, including a brief history of the development of this approach to sentencing and a description of the status of mandatory minimums in 1991. The advent of the Federal sentencing guidelines system established by the Sentencing Reform Act of 1984 is discussed. Also provided is an analysis of the compatibility of mandatory minimum sentencing provisions and the Federal sentencing guidelines system. The results of a detailed empirical study of mandatory minimum sentencing are presented. An analysis of methods Congress may employ to effect sentencing policy other than through enactment of mandatory minimums is offered. The appendices include a listing of the mandatory minimum sentencing provisions in effect in 1991 as well as other information useful to an understanding of mandatory sentencing provisions and their alternatives.

Walker, Samuel and Vic W. Bumphus
"Civilian Review of the Police: A National Survey of the 50 Largest Cities, 1991"

## (Occasional. Criminal Justice Policy

Focus, No. 91-3, Center for Applied Urban Research. Omaha, NE: University of Nebraska at Omaha, 1991. 6 pages, 2 tables.)

Presents data for 1991. SOURCEBOOK table 1.69.

This document reports the results of a survey of civilian review procedures for handling civilian complaints about police misconduct in the 50 largest cities in the United States. Civilian review procedures were found to exist in 30
of the 50 cities. Tables describe civilian review agencies, names of organizations, dates established, enabling authority, class of review agency, number of members, method of appointment, responsibilities, and other characteristics.

## Appendix 1

Justice Expenditure and Employment Data Survey methodology and definitions of terms

Note: The following information has been excerpted from the U.S. Department of Justice, Bureau of Justice Statistics, Justice Expenditure and Employment, 1990, Bulletin NCJ-135777 (Washington, DC: U.S. Department of Justice, August 1992), pp. 9, 12; and information provided by the U.S. Department of Justice, Bureau of Justice Statistics.

## Data collection

The Bureau of Justice Statistics (BJS) discontinued its survey of criminal justice expenditure and employment (CJEE) for budgetary reasons following the collection of 1979 data. That survey provided comparable trend data irom 1971 to 1979. Beginning with 1980, the Bureau adopted a different methodology to compile and present public expenditure and employment data at greatly reduced cost. In 1985, 1988, and 1990 the original survey methodology was reimplemented to provide data necessary for block grant allocation of Bureau of Justice Assistance funds.

Trend comparisons between the 1971-79, 1985, 1988, and 1990 survey data and data in the Justice expenditure and employment extracts series are complicated by differences in methodology. In making trend comparisons, users should limit their analysis to one of the two sources: long-term trends for 1971-79, 1985, 1988, and 1990 from the Justice expenditure and employment survey series; or recent year-to-year trends from the 1980-90 Justice expenditure and employment extracts reports.

## Methodology

These data were collected by the U.S. Bureau of the Census for the Bureau of Justice Statistics using a special sample survey of State and local governments. Data were collected for the Federal government, all State governments, all county governments, all municipalities (and townships in the six New England States, the three Middle Atlantic States, and Michigan and Wisconsin) having a 1986 population of 10,000 or more, and for a sample of the remaining municipalities and townships. A totai of 8,867 local governments were included in the survey panel ( 3,042 county governments, 4,693 municipalities, and 1,132 townships).

The survey was accomplished using two methods of data collection: field compilation
and mail canvass. Trained field representatives compiled expenditure and employment data from the governments' own records for all States, 78 counties, and 52 municipalities. Other units in the sample were canvassed by mail. Response for the field-complled units was 100 percent. For the mail canvass units, the response rate was 87 percent.

Data for the Federal government were extracted from Budget of the United States Government, FY 1992, Appendlx. Beginning with the 1985 survey, that document allowed the classification of appropriate expenditure and employment amounts for the immigration and Naturalization Service, the U.S. Customs Service, and the Internal Revenue Service as "prosecution and legal services." In earlier years, those amounts could not be broken out of the "police protection" category.

The justice data in this report include the expenditures and employment of the Federal government, State governments, and a sample of couniy, municipal, and township governments. Unless otherwise noted, data for total governmental functions and nonjustice governmental functions also include the expenditures of special districts and school districts, which generally do not have justice functions. Justice expenditure data for these districts are not collected, although in 1. 3 (the most recent year for which such data are available) 0.6 percent of justice expenditures were made by such districts. The special district and school district data are included in the total government spending to allow State-by-State comparisons across States that make varying use of school districts to finance education.

## Definitions of terms

Expenditure includes only external cash payments made from any source of monies, including any payments financed from borrowing, fund balances, intergovernmentai revenue, and other current revenue. It excludes any intergovernmental transfers and noncash transactions, such as the provision of meals or housing of employees. It also excludes retirement of debt, investment in securities, extensions of loans, or agency transactions. Total expenditures for all government functions do include interest payments on debt, but the expenditure data for individual functions such as justice or education do not.

Expenditure is divided into two major categories:

1. "Direct expenditure" is all expenditure except that classified as intergovernmental. It includes "direct current expenditure" (salaries, wages, fees, and commissions and purchases of supplies, materials, and contractual services) and "capital outlays" (construction and purchase of equipment, land,
and existing structures). Capital outlays are included for the year when the direct expenditure is made, regardless of how the funds are raised (for example, by bond issue) or when they are paid back.
2. "Intergovernmental expenditure" is the sum of payments from one government to another, including grants-in-aid, shared revenues, payments in lieu of taxes, and amounts for services performed by one government for another on a reimbursable or cost-sharing basis (for example, payments by one government to another for boarding prisoners).

Employees are all persons on government payrolls during the pay period including Oct. 12, 1990. They include all paid officials and persons on paid leave, but exclude unpaid officials, persons on unpaid leave, pensioners, and contractors.

Full-time employees are all persons employed on a full-time basis, including all full-time temporary or seasonal workers who were employed during this pay period.

Full-time equivalent employment is a statistical measure that estimates the number of full-time employees that could have been employed if the reported number of hours worked by part-time employees had been worked by full-time employees. This statistic is calculated separately for each function of a government by dividing the "part-time hours paid" by the standard number of hours for full-time employees in the particular government and then adding the resulting quotient to the number of full-time employees.

In reports in this series prior to 1988, a different methodology was used to compute this statistic, affecting comparability over time. In the past, the payroll-based formula divided the total payroll (full-time plus part-time) by the full-time payroll and multiplied the result by the number of full-time employees.

Payroll is the gross payroll before deductions and includes salaries, wages, fees, and commissions paid to employees as defined above for the month of October 1990.

Police protection is the function of enforcing the law, preserving order, and apprehending those who violate the law, whether these activities are performed by a city police department, sheriff's department, State police, or Federal law enforcement agency such as the FBI and the Drug Enforcement Administration. Private security police are outside the scope of the survey.

Judicial (courts only) includes all civil and criminal courts and activities associated with courts such as law libraries, grand juries, petit juries, and the like. It is not the same as the "judicial and legal services" category in reports from the Bureau of Justice Statistics Justice expenditure and employment extracts series. The "judicial" category in the Extracts reports also includes "prosecution
and legal services" and "public defense," which are displayed separately in this repon:

Prosecution and legal services includes the civil and criminal justice activities of the attorneys general, district attorneys, State's attorneys, and their variously named equivalents and corporation counsels, solicitors, and legal departments with various names.

Public defense includes legal counsel and representation in either criminal or civil proceedings as provided by public defenders and other government programs that pay the fees of court-appointed counsel.

Corrections involves the confinement and rehabilitation of adults and juveniles convicted of offenses against the law and the confinement of persons suspected of a crime awaiting trial and adjudication. It includes costs and employment for jails, prisons, probation, parole, pardon, and correctional administration. Data for institutions with authority to hold prisoners beyond arraignment (usually 48 hours or more) are included in this sector. Data for lock-ups or "tanks" holding prisoners less than 48 hours are included in "police protection."

Correctional institutions are prisons, reformatories, jails, houses of correction, penitentiaries, correctional farms, workhouses, reception centers, diagnostic centers, industrial schools, training schools, detention centers, and a variety of other types of institutions for the confinement and correction of convicted adults or juveniles who are adjudicated delinquent or in need of supervision. It also includes facilities for the detention of adults and juveniles accused of a crime and awaiting trial or hearing. Prison is sometimes used to refer to State correctional institutions.

Probation, parole, and pardon includes data on probation agencies, boards of parole, boards of pardon, and their variously named equivalents. Although probation departments frequently function under the administration of a courti, the data are presented separately under corrections after having been deducted from the judicial data.

Other justice activities includes expenditure and employment data that are not elsewhere classified, that cut across more than one category, or that are not aliocable to separate categories. Examples are crime commissions, neighborhood crime counsels, and State criminal justice coordinating councils.

## Appendix 2

The Municipal Year Book 1992 Definitions of terms and survey response rates

This information was excerpted from International City/County Management Association, The Municipal Year Book 1992 (Washington, DC: International City/County Management Association, 1992), pp. xiii, xiv, xv, xvi, 79, 101, 111. Non-substantive editorial adaptations have been made.

## Regions

Northeast-the New England and MidAtlantic Divisions;

North Central--the East and West North Central Divisions;

South--the South Atlantic and the East and West South Central Divisions;

West--the Mountain and Pacific Coast Divisions.

## Geographic divisions

New England--Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont;

Mid-Atlantic--New Jersey, New York, and Pennsylvania;

East North Central--llinois, Indiana, Michigan, Ohio, and Wisconsin; West North Central--lowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota;

South Atlantic--Delaware, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, and West Virginia, plus the District of Columbia;

East South Central--Alabarna, Kentucky, Mississippi, and Tennessee; West South Central--Arkansas, Louisiana, Oklahoma, and Texas; Mountain--Arizona, Colorado, Idaho, Montana, Nevada, Nevz Mexico, Utah, and Wyoming;

Pacific Coast--Alaska, California, Hawaii, Oregon, and Washington.

## Metro status

To be classified by the U.S. Office of Management and Budget (OMB) as a Metropolitan Statistical Area (MSA), an area must include a city with a population of at least 50,000 or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. The OMB further groups metropolitan areas of over $1,000,000$ population into consolidated metropolitan statistical areas (CMSAs) and primary metropolitan statistical areas (PMSAs).

Central cities--The core cities of an MSA having a population of at least 25,000 and meeting two commuting requirements: at least 40 percent of the employed residents of the city must work within the city and there musi be at least 75 jobs for each 100 residents who are employed. Cities between 15,000 and 25,000 population may also be considered central cities if they are at least one-third the size of the MSA's largest city and meet the two commuting requirements.

Suburban cities--The other cities, towns, and incorporated places in an MSA.

Independent cities--The incorporated places not located within an MSA.

City types include metro for municipalities located within an MSA and nonmetro for municipalities located outside an MSA. County types refer to counties located within an MSA for metro; and nonmetro for counties located outside the boundaries of an MSA.

## Forms of government

Mayor-council--an elected council serves as the legislative body with a separately elected head of government;

Council-manager--the mayor and council make policy and an appointed administrator is responsible for the administration of the city;

Commission--a board of elected commissioners serves as the legislative body and each commissioner is responsible for administration of one or more departments;

Town meeting--qualified voters meet to make basic policy and choose a board of selectmen to carry out the policy;

Representative town meeting--representatives selected by citizens vote at meetings, which may be attended by all town citizens.

Table. Survey response rates for 1991

|  | Police, fire, and refuse collection |  |  | Survey of municipal officials |  |  | Survey of county officials |  |  |

## Appendix 3

Crime in the United States Definitions of terms

Note: The following information has been excerpted from the U.S. Department of Justice, Federal Bureau of Investigation, Crime in the United States, 1990 (Washington, DC: USGPO, 1991), pp. 1-6, 327-330. Nonsubstantive editorial adaptations have been made. See U.S. Department of Justice, Federal Bureau of Investigation, Uniform Crime Reporting Handbook (Washington, DC: USGPO, 1984) for further definitions and information on classification and counting rules.

## Population definitions

For purposes of statistical presentation, the cities and counties in the United States are divided into groups based on population size. The population group classifications used by the Uniform Crime Reporting Program are shown in Table 1.

Table 1 Population group, political label, and population coverage

| Population group | Political label | Population coverage |
| :---: | :---: | :---: |
| 1 | City | 250,000 and over |
| II | City | 100,000 to 249,999 |
| III | City | 50,000 to 99,999 |
| IV | City | 25,000 to 49,999 |
| $\checkmark$ | City | 10,000 to 24,999 |
| VI | City ${ }^{\text {a }}$ | Less than 10,000 |
| VIII (Rural county) | County ${ }^{\text {b }}$ |  |
| IX <br> (Suburban county) | County ${ }^{\text {b }}$ | - |

$\mathrm{a}_{\text {Includes }}$ universities and colleges to which po population is attributed.
Includes State police to which no population is attributed.

## Metropolitan Statistical Area

(MSA)--This includes a city or an urbanized area with a population of 50,000 or more inhabitants and the surrounding county or counties that share certain metropolitan characteristics. MSAs made up approximately 77 percent of the total U.S. population in 1990.

Rural counties--Rural counties are those outside MSAs. These areas represented 14 percent of the national population in 1990. Prior to 1981, rural counties were referred to as rural areas.

Suburban areas--These areas consist of cities with populations of less than 50,000 together with counties (unincorporated areas) that are within a MSA. Suburban areas can, therefore, be divided into suburban cities and suburban counties.

Other cities--Other cities are urban places outside MSAs; most of these areas are incorporated. These cities comprised 9 percent of the 1990 national population.

Community types:

|  | MSA | Non-MSA |
| :---: | :---: | :---: |
| Cities | Cities over 50,000 Suburban cities | Other cities |
| Counties (unincorporated area) | Suburban counties | Rural counties |

As a general rule, sheriffs, county police, and many State police report on crimes committed within the lirnits of the counties, but outside cities; local police report on crimes committed within the city limits.

The major source of Uniform Crime Reporting (UCR) data is the individual law enforcement agency. The number of agencies includer in each population group will vary slightly fromi year to year due to population growth, geopolitical consolidation, municipal consolidation, etc. Population figures for individual jurisdictions are estimated by the UCR Program in noncensus years. For 1990, the population counts are U.S. Bureau of the Census 1990 decennial census data, which are subject to possible adjustment for undercount or overcount. Table 2 shows the number of agencies within each population group in 1990.

Table 2 Population group and number of agencies

| Population group | Number of agencies |
| :---: | :---: |
| 1 | 64 |
| 11 | 133 |
| III | 345 |
| IV | 698 |
| V | 1,680 |
| VI | 7,553 ${ }^{\text {a }}$ |
| VIII (Rural area) | 3,692 b |
| IX (Suburban county) | 1,702 ${ }^{\text {b }}$ |
| Total | 15,867 |

[^53]
## Regions and divisions

The United States is divided into four regions; these regions are further divided into nine divisions. The following is a list of States within divisions and regions.

## Northeast:

New England--Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont.

Middle Atlantic--New Jersey, New York, Pennsylvania.

## Midwest:

East North Central--Illinois, Indiana, Michigan, Ohio, Wisconsin.

West North Central--lowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota.

## South:

South Atlantic--Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, West Virginia.

East South Central--Alabama, Kentucky, Mississippi, Tennessee.

West South Central--Arkansas, Louisiana, Oklahoma, Texas.

## West:

Mountain--Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, Wyoming.

Pacific--Alaska, California, Hawaii ${ }_{i}$ Oregon, Washington.

## The Crime Index and Part I offenses

## The Crime Index

The following offenses and attempts to commit these offenses are used in compiling the Crime Index: (1) murder and nonnegligent manslaughter, (2) forcible rape, (3) robbery, (4) aggravated assault, (5) burglary, (6) lar-ceny-theft, (7) motor vehicle theft, and (8) arson. Arson was added as the eighth index offense in October 1978. (Manslaughter by negligence and simple or minor assaults are not included in the Crime Index.)

## Part I offenses

Criminal homicide--a. Murder and nonnegligent manslaughter: the willful (nonnegligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, accidental deaths, and justifiable homicides are excluded. Justifiable homicides are limited to: (1) the killing of a felon by a law enforcement officer in the line of duty and (2) the killing of a felon by a private citizen. $b$. Manslaughter by negligence: the killing of another person through gross negligence. Traffic fatalities are excluded. While manslaughter by negligence
is a Part I crime, it is not included in the Crime Index.

Forcible rape--The carnal knowledge of a female forcibly and against her will. Included are rapes by force and attempts or assaults to rape. Statutory offenses (no force used--victim under age of consent) are excluded.

Robbery--The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Aggravated assault--An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated boslily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

Burglary--breaking or entering--The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

Larceny-theft (except motor vehicle theft)--The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles or automobile accessories, shoplifting, pocket-picking, or the stealing of any property or article which is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, "con" games, forgery, worthless checks, etc., are excluded.

Motor vehicle theft--The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on the surface and not on rails. Specifically excluded from this category are motorboats, construction equipment, airplanes, and farming equipment.

Arson--Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

## Part li offenses

Other assaults (simple)--Assaults and attempted assaults where no weapon is used and which do not result in serious or aggravated injury to the victim.

Forgery and counterfeiting--Making, altering, uttering, or possessing, with intent to defraud, anything false in the semblance of that which is true. Attempts are included.

Fraud--Fraudulent conversion and obtaining money or property by false pretenses. Included are confidence games and bad checks, except forgeries and counterfeiting.

Embezzlement--Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

Stolen property; buying, receiving, possessing--Buying, receiving, and possess*
ing stolen property, including attempts.
Vandalism--Willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or persons having custody or control.

Weapons; carrying, possessing, etc.--All violations of regulations or statutes controlling the carrying, using, possossing, furnishing, and manufacturing of deadly weapons or silencers. Included are attempts.

Prostitution and commercialized vice--Sex offenses of a commercialized nature, such as prostitution, keeping a bawdy house, procuring, or transporting women for immoral purposes. Attempts are included.

Sex offenses (except forcible rape, prostitution, and commercialized vice)--Statutory rape and offenses against chastity, common decency, morals, and the like. Attempts are included.

Drug abuse violations--State and local offenses relating to the unlawful possession, sale, use, growing, and manufacturing of narcotic drugs.

Gambling--Promoting, permitting, or engaging in illegal gambling.

Offenses against the family and children--Nonsupport, neglect, desertion, or abuse of family and children.

Driving under the influence--Driving or operating any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

Liquor laws--State or local liquor law violations, except "drunkenness" and "driving under the influence." Federal violations are excluded.

Drunkenness--Offenses relating $\%$ drunkenness or intoxication. Excluded is "driving under the influence."

Disorderly conduct--Breach of the peace.

Vagrancy--Vagabondage, begging, loitering, etc.

All other offenses--All violations of State or local laws, except those listed above and traffic offenses.

Suspicion--No specific offense; suspect released without formal charges being placed.

Curfew and loitering laws-(persons
under age 18)--Offenses relating to violations of local curfew or loitering ordinances where such laws exist.

Runaways-(persons under age 18)--Limited to juveniles taken into protective custody under provisions of local statutes.

## Appendix 4

## Annual Report of the U.S. Parole Commission Parole guidelines and definitions of terms

Note: The following information was excerpted from the U.S. Department of Justice, U.S. Parole Commission, Parole Commission Rules (28 C.F.R. 2.1-2.65). Washington, DC: U.S. Parole Commission. Pp. 4, 5, 6, 10, 11, $44,62,68,81$; and information provided by the Source. Non-substantive editorial adaptations have been made.

## Parole guidelines

Initial parole consideration--The U.S. Parole Commission has adopted guidelines for parcie release considerations. These guidelines indicate the customary range of time to be served before release for various combinations of offense (severity) and offender (parole prognosis) characteristics. The time ranges specified by the guidelines are established specifically for cases with good institutional adjustment and program progress. These time ranges are merely guidelines, where the circumstances warrant, decisions outside the guidelines (either above or below) may be rendered.

The guidelines designate offense characteristics as falling into one of eight severity categories. Category 1 represents the least severe and category 8 the most severe offense behavior. Mitigating or aggravating circumstances in a particular case may justify a decision or severity rating different from that listed.

An evaluation sheet containing a salient factor score serves as an aid in determining parole prognosis (potential risk of parole violation). A salient factor score is calculated by summing the offender's score on each of the following items: number of prior convictions and adjudications, number of prior commitments of more than 30 days duration, age at current offense, commitment of more than 30 days duration within the past 3 years, probation/parole/escape status at time of current offense, and heroin/opiate dependence.

Reparole consideration--An offender whose parole is revoked is eligible to be considered for reparole. If revocation is based upon an administrative violation only, i.e., a violation not involving new criminal conduct, the behavior is graded as a category 1 offense and the salient factor score recalculated. If a finding is made that the prisoner has engaged in behavior constituting new criminal
conduct, the appropriate severity rating for the new criminal behavior is calculated. New criminal conduct may be determined either by a new Federal, State or local conviction or by an independent finding by the U.S. Parole Commission at a revocation hearing. If the criminal conduct is in violation of State or local law the appropriate severity level is determined by analogy with the listed Federal offense severity ratings and the salient factor score is recalculated. Time served on a new State or Federal sentence is counted as time in custody for reparole guideline purposes.

## Definitions of terms

Initial hearing--The initial parole determination hearing for an eligible prisoner, where examiners discuss with the prisoner his/her offense severity rating and salient factor score, his/her institutional conduct, and any other matter the panel may deem relevant.

Following an initial hearing, the Commission may (1) set a presumptive release date (either by parole or by mandatory release) within 15 years of the hearing; (2) set an effective date of parole; or (3) continue the prisoner to a 15 year reconsideration hearing pursuant to 28 C.F.R. 2.14(c).

One-third hearing--Covered under 28 C.F.R. 2.14(e) (1976) until it was phased out. The section provided that a prisoner sentenced to a maximum term of more than 18 months under 18 U.S.C. 4205(b)(2), 18 U.S.C. 294, or 26 U.S.C. 5871, could not be continued past one-third of the maximum sentence. The one-third hearing was phased out after implementation of presumptive date procedures in September 1977.

Pre-hearing record reviews--A review of the prisoner's case file by an examiner during the month preceding a regularly scheduled institutional review hearing. If the recommendation was to grant parole, and the regional commissioner concurred, no in-person hearing was conducted. Pre-hearing record reviews (28 C.F.R. 2.14(b)(1976)) were replaced by presumptive date record reviews.

Statutory review hearings--Replaced by statutory interim hearings. The purpose of the "interim hearing" is to consider any significant developments or changes that may have occurred subsequent to the initial hearing. Following the interim hearing, the presumptive release date that had been set may be advanced for superior program achievement or cther clearly exceptional circumstances, retarded or rescinded for reason of disciplinary infractions, or remain unchanged.

Review hearing--Subsequent parole hearing intended to focus on developments or changes in the prisoner's status; replaced by the statutory interim hearing.

Rescission hearing-28 C.F.R. 2.34 provides that if a prisoner has been granted parole and has subsequently been charged
with institutional misconduct sufficient to become a matter of record, or is alleged to have committed a new criminal act, a rescission hearing may be scheduled at which time parole may be rescinded or retarded.

Retroactive record review--A special type of consideration resulting from a revision of the parole decision guidelines in June 1979; for more information, see 28 C.F.R. $2.20,2.21$. For information on the local revocation hearing and institutional revocation hearing, see 28 C.F.R. 2.48-2.52 (1976).

Local or institutional revocation hearing--28 C.F.R. 2.49(a)(c)(1981) provides that the parolee may request that he/she be given a revocation hearing reasonably near the place of the alleged violation or arrest if the following conditions are met: (1) the parolee has not been convicted of a crime committed while under supervision; and (2) the parolee denies that he/she has violated any condition of his/her release. A parolee will be given a revocation hearing upon his/her return to a Federal institution if he/she voluntarily waives his/her right to a local revocation hearing, if he/she admits any violation of the conditions of parole, or if he/she is retaken following conviction for a new crime.

Region--The five regions of the United States are defined in the following manner:

Northeast--Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia;

Southeast-Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee;

North Central--Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, Ohio, Wisconsin;

South Central--Arkansas, Louisiana, New Mexico, Oklahoma, Texas; West--Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, North Dakota, Oregon, South Dakota, Utah, Washington, Wyoming.

## Appendix 5

## Public opinion survey sampling procedurss

Note: Information on Gallup survey sampling procedures was excepted from George H . Gallup, The Gallup Poil, Public Opinion 1934-1971, Vol. 1, 1935-1948 (New York: Fandom House, 1972), pp. vivilit; George H. Gallup, The Gallup Opinion Index, Report No. 162 (Princeton, NJ: The Gallup Poll, January 1979), pp. 29, 30; George Gallup, The Sophisticated Poll Watcher's Guide (Princeton, NJ: Princeton Opinion Press, 1976), p. 102; and from information provided to SOURCEBOOK staff from the Gallup Organization. Information on the Harris Poll survey sampling procedures was provided to SOURCEBOOK staff by Louis Harris and Associates, Inc.; similar procedures used in earlier surveys are described in Louis Harris and Associates, Inc., The Harris Yearbook of Public Opinion 1970: A Compendium of Current American Attitudes (New York: Louis Harris and Associates, Inc., 1971), pp. 511-514. Information on the survey procedures employed by the National Opinion Research Center was excerpted from the National Opinion Research Center, General Social Surveys, 1972-1990: Cumulative Codebook (Chicago: National Opinion Research Center, University of Chicago, 1990), pp. 1, 59, 829-639. Information on the Media General/Associated Press Poll was provided by Media General/Associated Press Poll. Information on the Gallup/Phi Delta Kappa Education Poll was excerpted from Stanley M. Elam, "The 22nd Annual Gallup Poll of the Public's Attitudes Toward the Public Schools," Phi Delta Kappan (September 1990), p. 54; and Stanley M. Elam, Lowell C. Rose, and Alec M. Gallup, "The 23rd Annual Gallup Poll of the Public's Attitudes Toward the Public Schools," 1hi Delta Kappan (September 1991), p. 56. Information on the Roper Reports was provided by The Roper Organization, Inc.

The sampling procedures of six public opinion survey organizations are presented in this appendix; The Gallup Poll, the Harris Survey, the National Opinion Research Center, the Media General/Associated Press Poll, The Roper Organization, Inc. and the Gallup/Phi Delta Kappa Education Poll.

## GALLUP POLLS

All Gallup polls since 1950, excluding certain special surveys, have been based on a national probability sample of interviewing areas. Refinements in the sample design
have been introduced at various points in time since then. However, over this period the design in its essentials has conformed to the current procedure, as described in the following paragraphs.

The United States is divided into seven size-of-community strata: cities of population 1,000,000 and over, 250,000 to 999,999, and 50,000 to 249,000 , with the urbanized areas of all these cities forming a single stratum; cities of 2,500 to 49,999 ; rural villages; and farm or open country rural areas. Within each of these strata, the population is further divided into seven regions: New England, Middle Atlantic, East Central, West Central, South, Mountain, and Pacific Coast. Within each size-of-community and regional stratum the population is arrayed in geographic order and zoned into equal sized groups of sampling units. Pairs of localities in each zone are selected with probability of selection proportional to the size of each locality's popula-tion--producing two replicated samples of localities.

Within selected cities for which population data are reported by census tracts or enumeration districts, these sample subdivisions are drawn with probability of selection proportional to the size of the population. For other cities, minor civil divisions, and rural areas in the sample for which population data are not reported by census tracts or enumeration districts, small, definable geographic areas are drawn, with the probability of selection proportional to size where available data permit; otherwise with equal probability.

A block or block ciuster is drawn with probability of selection proportional to the number of dwelling units from within each subdivision selected for which block statistics are available. In cities and towns for which block statistics are not available, blocks are drawn at random, that is, with equal probability. In subdivisions that are rural or open country in character, segments approximately equal in size of population are delineated and drawn with equal probability.

In each cluster of blocks and each segment so selected, a randomly selected starting point is designated on the interviewer's map of the area. Starting at this point, interviewers are required to follow a given direction in the selection of households, taking households in sequence, until their assigned number of interviews has been completed. Within each occupied dwelling unit or household reached, the interviewer asks to speak to the youngest man 18 or older at home, or if no man is at home, the oldest woman 18 or older. This method of selection within the household has been developed empirically to produce an age distribution by men and women separately which compares closely with the age distribution of the population. It increases the
probability of selecting younger men, who are at home selatively infrequently, and the probability of reaching older women in the household who tend to be under-represented unless given a disproportionate chance of being drawn from among those at home. The method of selection among those at home within the household is not strictly random, but it is systematic and objective, and eliminates interviewer judgment in the selection process. Interviewing is conducted at times when adults a:e most likely to be at home, which means on weekends or if on weekdays, after 4 p.m. for women and after 6 p.m. for men. Allowance for persons not at home is made by a "times-at-home" weighting procedure rather than by "call-backs." This procedure is a standard method for reducing the sample bias that would otherwise result from under-representation of persons who are difficult to find at home.

The pre-stratification by regions is routinely supplemented by fitting each obtained sample to the latest available U.S. Bureau of the Census estimates of the regional distribution of the population. Also minor adjustments of the sample are made by educational attainment (for men and women separately), based on the annual estimates of the U.S. Bureau of the Census derived from their Current Population Survey. The sample procedure described is designed to produce an approximation of the adult civilian population living in the United States, except for those persons in instifutions such as prisons or hospitals. The four regions of the country, as reported in Gallup public opinion surveys, have been defined in the following manner:

East--Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Maryland, Delaware, West Virginia, District of Columbia;

Midwest--Ohio, Mic'iigan, Indiana, Illinois, Wisconsin, Minnesota, lowa, Missouri, North Dakota, South Dakota, Nebraska, Kansas;

South--Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, Texas; and

West-Montana, Arizona, Colorado, Idaho, Wyoming, Utah, Nevada, New Mexico, California, Oregon, Washington, Hawaii, Alaska.

Prior to 1950, the samples for all Gallup surveys, excluding special surveys, were a combination of what is known as a purposive design for the selection of cities, towns, and rural areas, and the quota method for the selection of individuals within such selected areas.

The first step in obtaining the sample was to draw a national sample of places (cities, towns, and rural areas). These were distrib-
uted by six regions and five or six city-size, urban-rural groups or strata in proportion to the distribution of the population of voting age by these regional city-size strata. The distribution of cases between the non-South and South, however, was on the basis of the vote in presidential elections.

Within each region, the sample of such places was drawn separately for each of the larger States and for groups of smaller States. The places were selected to provide broad geographic distribution within States and at the same time in combination to be politically representative of the State or groups of States in terms of three previous elections. Specifically, they were selected so that in combination, they matched the State vote for three previous elections within small tolerances. Great emphasis was piaced on election data as a control in the era from 1935 to 1950.

Within the civil divisions in the sample, responderits were selected on the basis of age, sex, and socioeconomic quotas. Otherwise, interviewers were given considerable latitude within the sample areas, being permitted to draw their cases from households and from persons on the street anywhere in the community.

According to Gallup policy, if the interviewee does not hear or does not understand a question, the interviewer repeats the question and if on the second reading the person does not understand or does not get the point of the question, the interviewer checks the "no opinion" box. It should also be noted that seldom more than 10 percent oif all those contacted refuse to be interviewed. Surveys of college students usually are based on in-person interviews with 1,000 full-time students representing 60 campuses. A sample of campuses is derived from a list of all colleges and universities obtained from the National Center for Education Statistics. Occasionally, special surveys conducted by Gallup for other organizations use smaller samples because of time and/or financial constraints.

Surveys of teenagers are conducted through recontact telephone interviews. A list of eligible teenagers is derived from previously conducted omnibus polls that gather a wide variety of demographic information. These omnibus polls determine whether a teenager is present in the respondent's home and whether the teenager is eligible for subsequent interview. Recontact calls are made based on this information.

Urbanization--Central cities have populations of 50,000 and above. Suburbs constitute the fringe and include populations of 2,500 to 49,999 . Rural areas are those which have populations of under 2,500.

Race/ethnicity--Nonwhite is comprised of individuals who report themselves as any combination of the following classifications: Hispanic, American Indian, Other Indian, Oriental, and Black. Black and Hispanic are subcategories of Nonwhite. However, due to variation in respondent reporting the category White may also include some Hispanics.

The data presented in SOURCEBOOK from this Source were taken from the following reports. The dates on which interviews were conducted are presented in parentheses after each citation.

Poll, March 1992, pp. 51, 52. (Feb. 28-Mar. 1, 1992.)

## Sampling error

All sample surveys are subject to sampling error, that is, the extent to which the results may differ from what would be obtained if the entire population surveyed had been interviewed. The size of sampling errore depends largely on the number of interviews. The following table may be used in estimating sampling error. The computed allowances have taken into account the effect of the sample design upon sampling error. They may be interpreted as indicating the range (plus or minus the figure shown) within which the results of repeated samplings in the same time period could be expected to vary, 95 percent of the time, assuming the same sampling procedure, the same interviewers, and the same questionnaire.

Recornmended allowance for sampling error (plus or minus) at 95 percent confidence level

| (Percent) |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Percentages $\qquad$ |  | Sample size |  |  |  |  |
| nea | 1,000 | 750 | 600 | 400 | 200 | 100 |
| 10 | 2 | 3 | 3 | 4 | 5 | 7 |
| 20 | 3 | 4 | 4 | 5 | 7 | 9 |
| 30 | 4 | 4 | 4 | 6 | 8 | 10 |
| 40 | 4 | 4 | 5 | 6 | 8 | 11 |
| 50 | 4 | 4 | 5 | 6 | 8 | 11 |
| 60 | 4 | 4 | 5 | 6 | 8 | 11 |
| 70 | 4 | 4 | 4 | 6 | 8 | 10 |
| 80 | 3 | 4 | 4 | 5 | 7 | 9 |
| 90 | 2 | 3 | 3 | 4 | 5 | 7 |

The table would be used in the following manner: Assume a reported percentage is 33 for a group which includes 1,000 respondents. Proceed to row "Percentages near 30 " in the table and then to the column headed, "1,000." The 'igure in this cell is four, which means that at the 95 percent confidence level, the 33 percent obtained in the sample is subject to a sampling error of plus or minus four points.

## GALLUP/PHI DELTA KAPPA EDUCATION POLL

The 1990 Gallup/Phi Delta Kappa education poll was a modified probability sample of 1,594 adults 18 years of age or older living in the United States. Interviewing took place during April 6-18 and May 4-22, 1990. The 1991 Gallup/Phi Delta Kappa education poll was also a modified probability sample of 1,500 adults 18 years of age or older. Interviewing occurred during May 3-17, 1991. Both samples employed personal, in-home interviewing of the civilian population (excluding persons in institutions such as prisons and hospital). "Nonpublic school parents" includes parents of students who attend parochial schools, private schools, or
independent schools. For further information on the survey sampling procedures see Elam M. Stanley, "The 22nd Annual Gallup Poll of the Public's Attitudes Toward the Public Schools," Phi Delta Kappan (September 1990), p. 54. For further information on the 1988 and 1989 education polls see George Gallup Jr. The Gallup
Report, Report Nos. 276 and 289, respectively.

## HARRIS SURVEYS

Harris surveys are based on a national sample of the civilian population of the continental United States. Alaska and Hawaii are not represented in the sample, nor are those in prisons, hospitals, or religious and educational institutions. The sample is based on census information on the population of each State in the country, and on the population living in standard metropolitan areas and in the rest of the country. These population figures are updated by interceísal estimates produced annually by the U.S. Bureau of the Census, and sample locations are selected biennially to reflect changes in the country's demographic profile.

National samples are stratified in two dimensions--geographic region and metropolitan (and non-metropolitan) residence. Stratification insures that the samples will reflect, within 1 percent, the actual proportions of those living in the country in different regions and metropolitan (and nonmetropolitan) areas. Within each stratum the selection of the ultimate sampling unit is achieved through a series of steps, a process which is technically called multistage unclustered sampling. Each sampling unit yields one interview. First States, then counties, and then minor civil divisions (cities, towns, townships) are selected with probability proportional to census estimates of their respective household populations. The Harris Survey has four of these national samples, and they are used in rotation from study to study. The specific sample locations in one study generally are adjacent to those used in the next study. For most surveys covering the entire country, more than one national sample may be employed. Harris Surveys of a nationwide sample usually include 1,250 respondents.

All interviews prior to 1978 were conducted in person, in the homes of respondents. At each household the respondent was chosen by means of a random selection pattern, geared to the number of adults of each sex who live in the household. Interviews lasted approximately 1 hour. Almost all interviews conducted as of 1978 have been telephone interviews. Respondents are selected on the basis of random digit dialing. When the completed interviews are received in New

York, a subsample of the respondents are re-contacted to verify tifat the data have been accurately recorded. Questionnaires are edited and coded in the New York office. The Harris sampling procedure is designed to produce a national cross-section that accurately reflects the actual population of the country 18 years of age and older living in private households. This means that the results of a survey among a national sample can be projected as representative of the country's civilian population 18 years old and older.

Harris Survey national results are reported for the Etst, Midwest, South, and West regions of the country, defined as follows:

East-Maine, New Hampshire, Vermont, New York, Massachusetts, Rhode Island, Connecticut, Pennsylvania, Maryland, New Jersey, Delaware, West Virginia;

Midwest--North Dakota, South Dakota, Nebraska, Kansas, Minnesota, lowa, Missouri, Wisconsin, Illinois؛ Michigan, Indiana, Ohio;

South--Kentucky, Virginia, Tennessee, North Carolina, South Carolina, Georgia, Alabama, Mississippi, Florida, Louisiana, Arkansas, Oklahoma, Texas; and

West--Washington, Oregon, California, Idaho, Nevada, Utah, Arizona, Montana, Wyoming, Colorado, New Mexico.

The data presented in SOURCEBOOK from this Source were taken from the following reports. The number of interviews conducted and the interview dates are presented in parentheses after the citation.

Louis Harris. The Harris Poll. Los Angeles: Creators Syndicate, inc., Apr. 14, 1991, p. 2. ( $\mathrm{N}=1,25 \mathrm{5}$, Mar. 29-Apr. 2, 1991.) . The Harris Poll. Los Angeles: Creators Syndicate, Inc., Aug. 4, 1991, p. 2. ( $N=1,250$, July 26-31, 1991.)

## Sampling error

It should be kept in mind that the results of the surveys are subject to sampling error, i.e., the difference between the results obtained from the sample and those which would be obtained by surveying the entire population. The size of a possible sampling error varies to some extent with the size of the sample and with the percentage giving a particular answer. The following table sets forth the range of error in samples of different sizes and at different percentages of response:

Recommended allowance for sampling error (plus or minus) at 95 percent confidence level

| Response percent | Sample size |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1,600 | 1,200 | 900 | 500 | 250 | 100 |
| 10(90) | 2 | 2 | 2 | 3 | 5 | 7 |
| 20(80) | 2 | 3 | 3 | 4 | 6 | 10 |
| 30(70) | 3 | 3 | 4 | 5 | 7 | 11 |
| 40(60) | 3 | 3 | 4 | 5 | 7 | 12 |
| 50 | 3 | 3 | 4 | 5 | 8 | 12 |

For example, if the response for a sample size of 1,200 is 30 percent, in 95 cases out of 100 the response in the population will be between 27 percent and 33 percent. This error accounts only for sampling error. Survey research is also susceptible to other errors, such as data handling and interview recording.

## NATIONAL OPINION RESEARCH CENTER

The National Opinion Research Center (NORC) maintains a national probability sample. The General Social Surveys are interviews administered to the NORC national samples using a standard questionnaire. They have been conducted during February, March, and April from 1972 to 1978, 1980, and from 1982 to 1991. There are a total of 27,782 completed interviews ( 1,613 in 1972; 1,504 in 1973; 1,484 in 1974; 1,490 in 1975; 1,499 in 1976; 1,530 in 1977; 1,532 in 1978; 1,468 in 1980; 1,506 in 1982; 1,599 in 1983; 1,473 in 1984; 1,534 in 1985; 1,470 in 1986; 1,466 in 1987; 1,481 in 1988; 1,537 in 1989; 1,372 in 1990; and 1,517 in 1991). Sampling frames are oased on 1970 census information for surveys conducted in 1972-78, 1980, and 1982. For all interviews conducted from 1984-91, the national sampling frame was based on 1980 census information. A split sample transition design was used in the 1983 survey. One-half of the sample was drawn from the 1970 frame and one-half from the 1980 frame. Since 1973, the median length of the interview has been about one and a half hours. This study employed standard field procedures for national surveys, including interviewer hiring and training by area supervisors in interviewing locations when necessary.

Each survey is an independently drawn sample of English-speaking persons 18 years of age or older, living in non-institutional arrangements within the United States. Alaska and Hawaii are not included in samples drawn from the 1970 sampling frame, but are represented in one-half of the 1983 surveys, and all those conducted from 1984-91. Block quota sampling was used in the 1972, 1973, and 1974 surveys and for half of the 1975 and 1976 surveys. Full probability sampling was employed in half of the 1975 and 1976
surveys and in all of the 1977, 1978, 1980, and 1982-91 surveys. At the block level, quota sampling is used with quatas based on sex, age, and employment status. The cost of the quota samples is substantially less than the cost of a full probability sample of the same size, but there is, of course, the chance of sample biases mainly due to not-at-homes which are not controlled by the quotas. However, in order to reduce this bias, the interviewers are given instructions to carivass and interview only after 3:00 p.m. on weekdays or during the weekend or holidays. The first stage of sample selection includes selection of the Primary Sampling Units (PSUs). The PSUs employed are Standard Metropoli$\tan$ Statistical Areas (SMSAs) or nonmetropolitan counties selected in NORC's Master Sample. These SMSAs and counties were stratified by region, age, and race before selection. The units of selection of the second stage were block groups ( $B G$ ) and enameration districts (EDs). These EDs and BGs were stratified according to race and income. The third stage of selection was that of blocks, which were selected with probabilities proportional to size. In places without block statistics, measures of size for the blocks were obtained by field counting. The average cluster size is five respondents per cluster.

The quotas call for approximately equal numbers of men and women with the exact proportion in each segment determined by the 1970 census tract data. For women, the additional requirement is imposed that there be the proper proportion of employed and unemployed women in the location. Again, these quotas are based on the 1970 census tract data. For men, the added requirement is that there be the proper proportion of men over and under 35 years old in the location. Past experience would suggest that, for most purposes, this quota sample of 1,500 could be considered as having about the same efficiency as a simple random sample of 1,000 cases.

The 1975 and 1976 studies were conducted with a traditional sample design, one-half full probability and one-half block quota. The sample was divided into two paris for several reasons: (1) to provide data for possibly interesting methodological comparisons; and (2) on the chance that there are some differences over time, that it would be possible to assign these differences to either shifts in sample designs, or changes in response patterns. Having allowed for the appearance of all items in the transitional sample design, the General Social Survey then switched to a full probability sample for the 1977 survey.

## 1970 National Sampling Frame

For 1977, 1978, 1980, 1982 and one-half of 1983 interviews, the NORC national probabillty sample is a stratified, mult-stage, area
probability sample of clusters of households in the continental United States based on 1970 census information. The selection of geographic areas at successive stages is in accordance with the method of probabilities proportional to size. Furthermore, the clusters of households are divided into replicated subsamples in order to facilitate estimation of the variance of sample estimators of population characteristics.

## At the first stage of selection, Standard

Metropolitan Statistical Areas (SMSAs) and non-metropolitan counties covering the total continental United States were grouped according to size strata within the nine census regions. All population figures and other demographic information were obtained from 1970 U.S. Bureau of the Census reports. Within each size stratum, grouping, based on geographic location or racial characteristics (or both), was accomplished before selection. The final frame was further separated into zones or "paper strata" of equal population size in order to facilitate the selection of replicated subsamples of primary sampling units (PSUs). The selection of PSUs was designed to produce four independent subsamples of equal size. The four subsamples were randomly combined to form two larger subsamples of 101 PSUs each. The large subsamples are thus internally separable into two replicated subsamples for variance estimation purposes. NORC has selected one of the two large subsamples described above to serve as its principle frame of households for the remainder of the decade. The PSUs fall into 89 distinct SMSAs and non-metropolitan counties. (New York, a very large SMSA, represents five PSUs, whereas the smaller counties represent only one PSU.)

The second-stage procedure involved the direct selection of census block groups or enumeration districts (EDs) within SMSAs or counties, eliminating the traditional intermediate stage of clustering selections within urban places or county divisions. Before selections, census tracts, minor civil divisions, censue county divisions containing the block groups, and EDs were carefully stratified by geographic location, income, and race, in order to maximize the precision of sample estimation within a PSU. Block groups and EDs were then selected with probabilities proportional to size in numbers sufficient to satisfy survey demands for households expected throughout the decade. Lists of the separate households contained in the second stage blocks or EDs were constructed by field personnel or obtained from directories. Thus, the principal NORC national probability sample is, in effect, an inventory of identifiable households, each with a known probability of selection. In a typical sample survey with equal probability of selection for individual households (i. ... a self-weighting sample), households a. which interviews will take
place are probabilistically selected from the available lists of addresses for blocks and EDs. The method of probabilities proportional to size results in the assignment of an approximately equal number of interviews in each firial stage cluster, which in turn leads to increased precision in the estimation of overall population characteristics.

## 1980 National Sampling Frame

Census information for 1980 was used to sample respendents for one-half of the 1983 interviews, and all those surveys administered 1984-91. Eighty-four PSUs were selected at the first stage. The PSUs consist of counties, SMSAs, independent cities and, in New England, parts of counties. Prior to selection, the United States was divided into PSU's; the PSUs were then grouped into 84 strata. The strata were formed by grouping metropolitan and non-metropolitan PSUs within each of the four Census regions. Within each region, additional variables were used to define strata. The stratifying variables included within-region geography and size; size was measured by the 1980 Census count of occupied housing units. One PSU was selected from each stratum using a controlled selection procedure. This procedure ensured proportionate representation along certain control dimensions (such as percentage Hispanic in the West). The exact control variables (like the stratification variables) differed somewhat from region to region. Sixteen strata contained only one PSU, which was selected with certainty. The remaining 68 PSUs were selected with probability proportional to size (measured in housing units).

The unit for second stage selection was the block or enumeration district (ED). The number of secondary selections within a PSU depended in part on the stratum size. The number of second stage selections listed for NORC's national frame in the 16 PSUs selected with certainty ranged from 24 to 6 selections for PSU. In the remaining 68 sample PSUs, 6 second stage selections were listed. All total, the new frame includes 562 secondary selections.

Prior to selection, the second stage units within each sample PSU were sorted by county, by minor civil division (in some areas), by Census Tract or ED number, and by block number. Counties were ordered within PSUs according to size and geography. Secondary selections were made using syatematic zone selection; the probabilities of selection were proportional to size (measured in housing units). Each secondary selection included at least 50 housing units.

In enumeration districts and blocks with a large number of dwelling units, a ihird stage of selection was carried out. The block or ED
was subdivided into pieces which were "fiela counted." Based on the field count, a piece of the sample block or ED with probability proportional to its size was selected.

Survey results are reported for four regional categories, with the States classified in the following way:

Northeast--Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont;

North Central--llinois, Indiana, lowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Wisconsin;

South--Alabama, Arkansas, Delaware, District of Culumbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia;

West--Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming.

## MEDIA GENERAL/ASSOCIATED PRESS POLL

Media General and The Associated Press polls are based on telephone interviews with adults across the continental United States. All samples are drawn randomly by Survey Sampling, Inc. of Fairfield, Connecticut and include both listed and non-listed households with telephones. The data project to an estimated 161 million adults living in households with telephones.

Interviews on the drug problem were conducted on May 11-20, 1990 and included a representative sample of 1,143 adults.

Survey results are reported for four regional categories, with the States classified in the following way:

Northeast-Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont; North Central-Illinois, Indiana, lowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Wisconsin;

South--Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia;

West--Arizona, California, Colorado, Idaho, Mºntana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming.

## ROPER REPORTS

A nationwide cross section of 1,984 men and women, 18 years of age and older was interviewed in face-to-face interviews in respondents' homes. The persons interviewed comprise a representative sample of the popula-
tivn of the continental United States, age 18 and older--exclusive of institutionalized segments of the population (military bases, nursing homes, prisons, etc.). A multi-stage, stratified probability sample of interviewing locations was employed. The probabilities of selection at each stage are based on the latest U.S. Census population data, and detailed Census maps are used to identify and locate the selected areas.

At the first stage, 100 countles were selected with probabilities proportionate to population, after all the counties in the 48 contiguous States and the District of Columbia were ordered by population size within 18 strata. The strata were constructed by classifying counties as metropolitan and non-metropolitan within each of the nine Census Geographic Divisions. At the second stage, within each primary sampling unit, two Census block groups (or Census Enumeration Districts, when Census block statistics data are unavailable) were selected with probabilities proportionate to population from a computer listing in which the block groups (ED's) are stratified by size of place in which located. At the third stage, within each sample block group (ED), two sample locations (blocks or rural equivalents of blocks) were selected. When Census block data were available the sample blocks were selected with probability proportionate to size (population) from a cumulative computer listing. When no such block data were available, sample Enumeration Districts were broken into identifiable segments (small areas defined by roads, streams, railroad tracks, or other unambiguous boundaries), and the sample segments were selected with equal probability.

At the block (segment) level, the interviewer was assigned a starting point and a path to proceed around the sample area. Quotas for men and women over and under age 45 were imposed, as were quotas for employed people. In addition it was required that interviewing on half the assigned blocks (segments) be conducted after $5 \mathrm{p} . \mathrm{m}$. on weekdays or on Saturday or Sunday to facilitate fulfilling the employment quota. While the assigned quotas produced the proper number of men and women over and under 45, there were small imbalances when the sample was examined in finer age terms, e.g., too few 18 29 year olds, too many $30-44$ year olds. Accordingly the sample was weighted to achieve the correct proportions of men and women 18-29, 30-44, 45-59, and 60 and older.

## Appendix 6

Monitoring the Future 1975-1991 Survey methodology and definitions of terms

Note: The following information was excerpted from Lloyd D. Johnston, Jerald G. Bachman, and Patrick M. O'Malley, Monitoring the Future 1986 (Ann Arbor, M1: Institute for Social Research, University of Michigan, 1987), pp. 2-10, 13, 14, 269 ; Lloyd D. Johnston, Patrick M. O'Malley, and Jerald G. Bachman, Smoking, Drinking, and lllicit
Drug Use Among American Secondary School Students, College Students, and Young Adults, 1975-1991 (Washington, DC: USGPO, 1992); and information provided by the Monitoring the Future Project. Non-substantive editorial adaptations have been made.

## Survey methodology

The basic research design involves annual data collections from high school seniors during the spring of each year, beginning with the class of 1975. Each data collection takes place in approximately 125 to 135 public and private high schools selected to provide an accurate cross section of high school seniors throughout the coterminous United States.

Since 1985, the results of a follow-up survey of those young adults 1 to 10 years beyond high school have been presented. These results should accurately characterize 85 percent of the young adults in the class cohorts 1 to 10 years beyond high school who are high school graduates. The high school dropout segment, missing from the senior year surveys, is also missing from the follow-up segments,

Also since 1985, the results of follow-up surveys of those high school students who have continued on to college have been presented. The college sample is limited to the most typical one for college aitendance: 1 to 4 years past high school, which corresponds to the modal ages of 19 to 22 years old. This age category should encompass about 85 percent of all students enrolled in college fulltime in 1980.

## Sampling procedures

The procedure for securing a nationwide sample of high school seniors is a multistage one. Stage 1 is the selection of particular geographic areas, Stage 2 is the selection of one or more high schools in each area, and Stage 3 is the selection of seniors within each high school.

Stage 1: Geographic areas. The geographic areas used in this study are the primary sampling units (PSUs) developed by the Sampling Section of the Survey Research Center for use in the Center's nationwide interview studies. These consist of 74 primary areas throughout the coterminous United States--including the 12 largest metropolitan areas, which contain about 30 percent of the nation's population. Of the 62 other primary areas, 10 are in the Northeast, 18 in the North Central area, 24 in the South, and 10 in the West. Because these same PSUs are used for personal interview studies by the Survey Research Center (SRC), local field representatives can be assigned to administer the data collections in practically all schools.

Stage 2: Schools. In the major metropolitan areas more than one high school is often included in the sampling design; in most other sampling areas a single high school is sampled. In all cases, the selections of high schools are made such that the probability of drawing a school is proportionate to the size of its senior class. The larger the senior class (according to recent records), the higher the selection probability assigned to the high school. When a sampled school is unwilling to participate, a replacement school as similar to it as possible is selected from the same geographic area.

Stage 3: Students. Within each selected school, up to about 400 seniors may be included in the data collection. In schools with fewer than 400 seniors, the usual procedure is to include all of them in the data collection. In larger schools, a subset of seniors is selected either by randomly sampling classrooms or by some other random method that is convenient for the school and judged to be unbiased. Sample weights are assigned to each respondent so as to take account of variations in the sizes of samples from one school to another, as well as the (smaller) variations in selection probabilities occurring at the earlier stages of sampling.

The three-stage sampling procedure described above yieided the number of participating schools and students indicated in Table 1.

One limitation in the design is that it does not include in the target population those young men and women who drop out of high school before graduation (or before the last few months of the senior year, to be more precise). This excludes a relatively small proportion of each age cohort--between 15 and 20 percent. Though not an unimportant segment, we do know that certain behaviors such as illicit drug use and delinquency tend to be higher than average in this group. However, the addition of a representative sample of dropouts would increase the cost of the present research enormously, because of their dispersion and generally higher level
of resistance to being located and interviewed.

For the purposes of estimating characteristics of the entire age group, the omission of high school dropouts does introduce certain biases; however, their small proportion sets outer limits on the bias. For the purposes of estimating changes from one cohort of high school seniors to another, the omission of dropouts represents a problem only if different cohorts have considerably different proportions who drop out. The source has no reason top expect dramatic changes in those rates for the foreseeable future, and recently published government statistics indicate a great deal of stability in dropout rates since 1970.

Some may use the high school data to draw conclusions about changes for the entire age group. While the source does not encourage such extrapolation, the source suspects that the conclusions reached often would be valid, since over 80 percent of the age group is in the surveyed segment of the population and the source expects that changes among those not in school are very likely to parallel the changes among those who are. Nevertheless, for purposes of characterizing the entire age group the source would urge the user to check the results emanating from the present monitoring system against those emerging from other data collection systems using different methods, such as household interviews.

One other important feature of the base-year sampling procedures should be noted. All schools (except for half of the initial 1975 sample) are asked to participate in two data collections, thereby permitting replacement of half of the total sample of schools each year. One motivation for requesting that schools participate for 2 years is administrative efficiency; it is a costly and time-consuming procedure to secure the cooperation of schools, and a 2-year period of participation cuts down that effort substantially. Another important advantage is that whenever an appreciable shift in scores from one graduating class to the next is observed, it is possible to check whether the shift might be attributable to some differences in the newly sampled schools. This is done simply by repeating the analysis using only the 60 or so schools which participated both years. Thus far, the half-sample approach has worked quite well; and examination of drug prevalence data from the "matched half-samples" shows that the half samples of repeat schools yielded drug prevalence trends which were virtually identical to trends based on all schools.

## Questionnaire administralion

The questionnaire administration in each school is carried out by the local SRC repre-
sentatives and their assistants, following standardized procedures detailed in a project instruction manual. The questionnaires are administered in classrooms during normal class periods whenever possible, although circumstances in some schools require the use of larger group administrations. Teza, ıers are not asked to do anything more than introduce the SRC staff members and (in most cases) remain in the classroom to help guarantee an orderly atmosphere for the survey. Teachers are urged to avoid walking around the room, so that students may feel free to write their answers without fear of being observed.

The actual process of completing the questionnaires is quite straightforward. Respondents are given sharpened pencils and asked to use them becausa the questionnaires are designed for automatic scanning. Most respondents can finish within a 45-minute class period; for those who cannot, an effort is made to provide a few minutes of additional time.

## Content areas and questionnaire design

Drug use and related attiludes are the topics which receive the most extensive coverage in the Monitoring the Future project; but the questionnaires also deal with a wide range of other subject areas, including attitudes about government, social institutions, race relations, changing roles for women, educational aspirations, occupational aims, and marital and family plans, as well as a variety of background and dernographic factors. The list below provides an outline of the 19 general subject areas into which all items are categorized. Given this breadth of content, the study is not presented to respondents as a "drug use study," nor do they tend to view it as such.

## Measurement content areas

A. Drugs. Drug use and related attitudes and beliefs, drug availability and exposure, surrounding conditions and social meanings of drug use. Views of significant others regarding drugs.
B. Education. Educational lifestyle, values, experiences, and environments.
C. Work and leisure. Vocational values, meaning of work and leisure, work and lejsure activities, preferences regarding occupational characteristics and type of work aetting.
D. Sex roles and family. Values, attitudes, and expectations about marriage, family structure, sex roles, and sex discrimination.
E. Population concerns. Values and attitudes about overpopulation and birth control.
F. Conservation, materialism, equity, etc. Values, attitudes, and expectations related to conservation, pollution, materialism, equity, and the sharing of resources. Preferences regarding type of dwelling and urbanicity.
G. Religion. Religious affiliation, practices, and viows.
H. Politics. Political affiliation, activities, and views.
I. Social change. Values, altitudes, and expectations about social change.
J. Social problems. Concern with various social problems facing the Nation and the world.
K. Major social institutions. Confidence in and commitment to various major social institutions (business, unions, branches of government, press, organized religion, military, etc.).
L. Military. Views about the armed services and the use of military force. Personal plans foi military service.
M. Interpersonal relationships, Qualitative and quantitative characteristics of cross-age and peer relationships. Interpersonal conflict.
N. Race relations. Attitudes toward and experiences with other racial groups.
O. Concern for others. Concern for others; voluntary and charitable activities.
P. Happiness. Happiness and life satisfaction, overall and in specific life domains.
Q. Other personality yariables. Attitudes about self (including self-esteem), locus of control, loneliness, risk-taking, trust in others, importance placed on various life goals, counter-culture orientation, hostility.
R. Background. Demographic and family background characteristics, living arrangements.
S. Deviant behavior and victimization. Delinquent behaviors, driving violations and accidents (including those under the influence of drugs), victimization experiences.
T. Health habits and symptoms. Health habits, somatic symptoms, medical treatments.

Because many questions are needed to cover all of these topic areas, much of the questionnaire content was divided into five different questionnaire forms in 1976-88 and six different questionnaire forms for 1989 and beyond which are distributed to participants in an ordered sequence that produces virtual-

Iy identical subsamples. About one-third of each questionnaire form consists of key or "core" variables which are common to all forms. All dem:ographic variables and some measures of drug use are included in this "core" set of measures. This use of the full sample for drug and demographic measures provides a more accurate estimation on these dimensions and alse makes it possible to link them statistically to all of the other measures which are included in a single form only.

## Representativeness and validity

The samples for this study are intended to be representative of high school seniors throughout the 48 coterminous States. As previously mentioned, this definition of the sample excludes one important portion of the age cohort: those who have dropped out of high school before nearing the end of the senior year. But given the aim of representing high school seniors, it is useful to consider the extent to which the obtained samples of schools and students are likely to be representative of all seniors and the degree to which the data obtained are likely to be valid.

There are at least four ways in which survey data of this sort might fall short of being fully accurate. First, some sampled schools refuse to participate, which could introduce some bias. Second, the fallure to obtain questionnaire data from 100 percent of the students sampled in participating schools would also introduce bias. Third, the answers provided by participating students are open to both conscious and unconscinus distortions which could reduce validity. Finally, limitations in sample size and/or design could place limits on the accuracy of estimates.

## School participation

As noted in the description of the sampling design, schools are invited to participate in the study for a 2 -year period. With very few exceptions, each school which has participated for one data collection has agreed to participate for a second. Thus far, from 66 percent to 80 percent of the schoois initially invited to participate have agreed to do so each year; for each school refusal, a similar school (in terms of size, geographic area, urbanicity, etc.) was recruited as a replacement.

The selection of replacement schools almost entirely removes problems of bias in region, urbanicity, and the like that might result from certain schools refusing to participate. Other potential biases are more subtle, however. For example, if it turned out that most schoois with "drug problems" refused to participate, that could seriously bias the drug estimates derived from the sample. And if any other single factor was dominant in most refusals, that also might suggest a source of serious bias. In fact, however, the reason for
schools' refusals to participate are varied and largely a function of happenstance events of the particular year. Thus, there is a fair amount of confidence that school refusals have not seriously biased the surveys.

## Student participation

Completed questionnaires are obtained from three-fourths to four-fifths of all students sampled. The single most important reason that students are missed is that they are absent from class at the time of data collection, and in most cases it is not workable to schedule a special follow-up data collection for them.

In addition to absenteeism, student nonparticipation occurs because of schedule conflicts with school trips and other activities which tend to be more frequent than usual during the final months of the senior year. Of course, some students refuse to complete or turn in a questionnaire. However, the SRC representatives in the field estimate this proportion to be only about one percent.

## Research design for the follow-up surveys after high school

Beginning with the graduating class of 1976, each class is followed up and surveyed each year after high school. From the approximately 17,000 seniors originally participating in a given class, a representative sample of 2,400 individuals was chosen for follow-up. In order to ensure sufficient numbers of drug users in the follow-up surveys, those fitting certain criteria of current drug use (that is, those reporting current daily marihuana use in senior year or use of any of the other illicit drugs in the previous 30 days) were selected with higher probability (by a factor of 3.0 ) than the remaining seniors. Differential weighting is used in all follow-up analyses to compensate for the differential sampling probabilities.

The 2,400 selected respondents from each class were randomly assigned to one of two matching groups of 1,200 each; one group was surveyed on even-numbered calendar years, while the other group was surveyed on odd-numbered years. This biannual procedure was intended to reduce respondent burden.

## Follow-up procedures

Using information provided by respondents at the time of the senior survey (name, address, phone number, and the name and address of someone who would always know how to reach them), students selected for the panels were contacted by mail. Newsletters were sent each year and name and address corrections were requested. Questionnaires were sent by certified mail in the spring of each
year. A check for $\$ 5.00$ made out to the respondent, was attached to the front. Reminder letters and post cards went out at fixed intervals thereafter and finally, those not responding received a prompting phone call from the Survey Research Center's phone interviewing facility in Ann Arbor. If requested, a second copy of the questionnaire was sent.

## Panel retention rates

To date the panel retention rates have remained quite high. In the first follow-up after high school, about 81 percent of the original panel returned questionnaires. The retention rate decreases ordinally with time; however, the 1990 panel retention from the Class of 1976--the oldest of the panels, now aged 32 --remains at about 70 percent.

Since attrition is to a modest degree associated with drug use, corrections to the prevalence estimates are presented for the followup panels. These raise the prevalence estimates from what they would be uncorrected, but only slightly. It is believed thait the resuliing estimates are the most accurate obtainable, but still low for the age group as a whole due to the omission of dropouts and absentees from the population covered by the original panels.

## Validity of self-report data

Survey measures of delinquency and of drug use depend upon respondents reporting what are, in many cases, illegal acts. Thus, a critical question is whether such self-reports are likely to be valid. Like most studies dealing with these areas, there is no direct, objective validation of the present measures; however, the considerable amount of inferential evidence which exists strongly suggests that the self-report questions produce largely valid data. A number of factors suggest a reasonable amount of confidence about the validity of the responses to what are presumably among the most sensitive questions in the study: a low nonresponse on the drug question; a large proportion admitting to some illicit drug use; the consistency of findings across several years of the present study; strong evidence of construct validity (based on relationships observed between variables); a close match between these data and the findings from other studies using other methods; and the findings from several methodological studies which have used objective validation methods.

## Accuracy of the sample

A sample survey never can provide the same level of accuracy as would be obtained if the entire target population were to participate in the survey-in the case of the present study, about three million seniors per year. But perfect accuracy of this sort would be extremely
expensive and certainly not worthwhile considering the fact that a high level of accuracy can be provided by a carefully designed probability sample. The accuracy of the sample in this study is affected both by the size of the student sample and by the number of schools in which they are clustered. Virtually all estimates based on the total sample have confidence intervals of plus or minus 1.5 percentage points or smaller--sometimes considerably smaller.

## Interpreting racial differences

Data are given for the two largest racial ethnic subgroups in the population--those who identify themselves as White or Caucasian and those who identify themselves as Black or Afro-American. Data are not given for the other ethnic categories (American Indians, Asian Americans, Mexican Americans, Puerto Ricans, or other Latin Americans) since each of these groups comprise less than three percent of the sample in any given year, which means that their small N's (in combination with their clustered groupings in a limited number of schools) would yield estimates which would be too unreliable. In fact, even Blacks-who constitute approximately 12 percent of each year's sample--are represented by only 350 to 425 respondents per year on any single questionnaire form. Further, because the sample is a stratified clustered sample, it yields less accuracy than would be yielded by a pure random sample of equal size. Therefore, because of the limited number of cases, the margin of sampling error around any statistic describing Blacks is larger than for most other subgroups described in this survey.

There are factors in addition to unreliability, however, which could be misleading in the interpretation of racial differences. Given the social importance which has been placed on various racial differences reported in the social science literature, the reader is cautioned to consider the various factors which could account for differences. These factors fall into three categories: differential representation in the sample, differential response tendencies, and the confounding of race with a number of other background and demographic characteristics.

Differentia! representation--A smaller segment of the Black population than of the White population of high school age is represented by the data contained here. Insofar as any characteristic is associated with being a school dropout or absentee, it is likely to be somewhat disproportionately underrepresented among Blacks in the sample.

Differential response tendencies--In examining the full range of variables, certain racial differences in response tendencies were noted. First, the tendency to state agreement
in response to agree-disagree questions is generally somewhat greater among Blacks than among Whites.

There is also a somewhat greater than average tendericy for Black respondents to select extreme answer categories on attitudinal scales. For example, even if the same proportion of Blacks as Whites felt positively (or negatively) about some subject, fewer of the Whites are likely to say they feel very positively (or very negatively). In the process of interpreting racial differences, the reader should be aware that differences in responses to particular questions may be related to these more general tendencies.

Covariance with other factors--Some characteristics such as race are highly confounded (correlated) with other variables--variables which may in fact explain some observed racial differences. Put another way, at the aggregate level one might observe a considerable racial difference on some characteristic, but once orie controls for some background characteristics such as socio-economic level or region of the couniry--that is, comparing the Black respondents with Whites who come from similar backgrounds--there may be no racial difference at all.

## Definitions of terms

Sex--Percentage distributions are given separately for males and females. Respondents with missing data on the question asking the respondent's sex are omitted from both groupings.

Race--Percentage distributions are given separately for those describing themselves as "White or Caucasian" and "Black or Afro-American." Comparable columns for the other racial or ethnic groups (Mexican Americans, Asian Americans, American Indians, etc.) are not shown because of the low number of cases in each group.

Region--Percentage distributions are given separately for respondents living in each of four mutually exclusive regions of the country. The regional classifications are based on Census categories and are defined as follows:

Northeast: Census classifications of New England and Middle Atlantic States; includes Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, and Pennsylvania.

North Central: Census classifications of East North Central and West North Central States; includes Ohio, Indiana, Iliinois, Michigan, Wisconsin, Minnesota, lowa, Missouri, North Dakota, South Dakota, Nebraska, and Kansas.

South: Census classifications of South Atlantic, East South Central, and West South Central States; includes Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina,

Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, and Texas.

West: Census classifications of Mountain and Pacific States; includes Montana, Idaho, Wyoniing, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, and California.

Four-year college plans--Percentage distributions are given separately for (1) respondents who indicate that they "definitely will" or "probably will" graduate from a fouryear college program and (2) those who say that they "definitely won't" or "probably won't" graduate from a four-year college program. Respondents not responding are omitted from both columns. A number of those who do not expect to complete a four-year college program do expect to get some post-secondary education.

Illicit drug use: Lifetime--Percentage distributions are given separately for five mutually exclusive subgroups differentiated by their degree of involvement with illicit drugs. Eligibility for each category is defined below.

None--This column contains data from those respondents who indicated that they had not used marihuana at any time and did not report use of any of the following illicit drugs in their lifetime: LSD, other psychedelics, cocaine, amphetamines, tranquilizers, methaqualone, barbiturates, heroin, or other narcotics.

Marihuana only--This column contains data from other respondents who indicated that they had used marihuana (or hashish) but had never used any of the other illicit drugs just listed.

Few pills--This column contains data from those respondents who indicated having used one or more of the above listed drugs (other than marihuana) but who had not used any one class of them on three or more occasions and who had not used heroin at all.

More pills--This column contains data from respondents who had used any of the above listed drugs (other than marihuana) on three or more occasions but who had never used heroin.

Any heroin--This column contains data from those respondents who indicated having used heroin on one or more occasions in their lifetime.

Weighted number of cases--The number of cases is stated in terms of the weighted number of respondents rather than the actual number, since all percentages have been calculated using weighted cases. The actual number of respondents generally is about 15 percent higher than the weighted number for data collected in 1975, 1976, and 1977. A comparison of weighted and unweighted numbers is provided in Table 2. For data collected in 1978 or later, the actual number of respondents is roughly equal to the weighted number. Weighting is used to
improve the accuracy of estimates by correcting for unequal probabilities of selection which arise in the multi-stage sampling procedures.

Drug types--Definitions or identifiers used in survey forms include:

Marihuana--pot, grass or hashish; Other psychedelics--mescaline, peyote, PCP; Amphetamines--uppers, pep pills, bennies, speed; Quaaludes--quads, methaqualone; Barbiturates--downers, goofballs, reds, yellows;

Heroin--smack, horse;
Other narcotics--methadone, opium, codeine, paregoric;

Inhalants--glue, aerosols, laughing gas;
Tranquilizers--Librium, Valium, Miltown.
Beginning with the 1979 survey, amyl and butyl nitrites were considered "other inhalants" for questions on one alternate survey form ( $\mathrm{N}=$ one-fitth of total sample size). This was due to the fact that not all users of this subclass of inhalants were reporting themselves as inhalant users. Hallucincigen use had been similarly underestimated because some users of the hallucinogenic drug PCP do not report themselves as uisers of hallu-cinogens--even though PCP was included as an example of a hallucinogenic drug in earlier surveys and on other questions. The alternate questionnaire form contained a special set of questions about PCP, which provided other street names for it (e.g., angel dust). As a result of these definition changes, since 1979 data for drug use in these two drug classes have been adjusted for underreporiing. For more information, see the Source.

## Appendix 7

National Crime Victimization Survey Data collection procedures and definitions of terms

Note: The following information was compiled by SOURCEBOOK staff and excerpted from U.S. Department of Justice, Bureau of Justice Statistics, Criminal Victimization in the United States, 1990, NCJ-134126 (Washington, DC: U.S. Department of Justice, 1992), Appendix III and glossary; and Crime Victimization in City, Suburban, and Rural Areas, NCJ-135943 (Washington, DC: U.S. Department of Justice, 1992), p. 16.

The National Crime Victimization Survey Program surveys a nationwide sample of residents throughout the Nation, including persons living in group quarters such as dormitories, rooming houses, and religious group dwellings. Crew members of merchant vessels, Armed Forces personnel living in military barracks, and institutionalized persons, such as correctional facility inmates, did not fall within the scope of the survey. Similarly, United States citizens residing abroad and foreign visitors to this country were excluded. With these exceptions, individuals age 12 and older living in units designated for the sample were eligible to be interviewed.

## Data collection

Each housing unit selected for the National Crime Victimization Survey (NCVS) is in the sample for 3 years with each of seven interviews taking place at 6 -month intervals. An NCVS interviewer's first contact with a housing unit selected for the survey is in person, and if it is not possible to secure face-to-face interviews with all eligible members of the household during this initial visit, interviews by telephone are permissible thereatter. The only exceptions to the requirement that each eligible person be interviewed apply to incapacitated persons and individuals who are absent from the household during the entire field-interviewing period.

Beginning in July of 1986, unless a knowledgeable household member insists otherwise, 12 - and 13 -year olds are interviewed directly by the interviewer. This differs from the previous practice of interviewing a knowledgeable adult as a proxy respondent for all 12 - and 13 -year olds unless the adult insisted that the child be interviewed and the alternative was no interview at all. In the case of temporarily absent household members and persons who are physically or mentally incapable of granting interviews, interviewers
may accept other household members as proxy respondents, and in certain situations (under rigidly prescribed rules) nonhousehold members may provide information for incapacitated persons.

Prior to February 1980 the second through seventh interviews were conducted in the same manner as the initial interview. At that time, however, the mode of interviewing was changed to cut data collection costs. Telephone interviewing was increased and inperson interviewing was reduced. This change was implemented in a manner that reduced the possibility of biasing the results. For half the remaining interviews at a sample address, the procedure was the same as that used for the entire sample prior to February 1980: The third, fifth, and seventh interviews were conducted primarily in person, with telephone follow-up permitted. The three even-numbered interviews have been conducted insofar as possible by telephone. Beginning in March 1986, all interviews were done by telephone wherever possible, except for the first and fifth interviews, which are still primarily conducted in person. Face-to-face interviews are often conducted with other family members present. Consequently, if offender and victim reside in the same household, it may not be possible ior the victim to relate his or her experience because of the presence of the offender. In telephone interviews the interviewer has no way of knowing if a household member's responses are being monitored.

A basic screen questionnaire and a crime incident report are used to elicit information on the relevant crimes committed against any members of the household age 12 or older. The initial interview is designed to screen for all instances of victimization before details of any specific incident are collected. In the screen questions respondents are asked if they were attacked or threatened but not directly asked if they have been raped. Nor are they told that threats or attacks by their intimates are germane to the survey. Only if a respondent volunteers that she or he has been raped or threatened with rape is the incident so classified.

## Sample design and size

Survey estimates are based on data obtained from a stratified, multistage cluster sample. The primary sampling units (PSU's) composing the first stage of the sampling were counties, groups of counties, or large metropolitan areas. Large PSU's were included in the sample automatically and were considered to be self-representing (SR), The remaining PSU's, called non-self-representing (NSR), were combined into strata by grouping PSU's with similar demographic characteristics, as determined by the 1980 census. From each stratum, one PSU was selected for the
sample, the probabillicy of selection having been proportionate to the PSU's population.

In June 1984, a sample cut resulted in the reduction of NSR strata from 220 to 153. This also included a 20 percent sample reduction in the larger of the 156 PSU's. Phase-in of a revised NCVS sample design based on 1980 census data began in January 1985. Thus, households that were interviewed during 1987 were drawn from both the 1970 - and 1980 -based sample designs. The 1980 design consists of 84 SR PSU's and 153 NSR strata, with one PSU per straturi selected with probability proportionate to size. Part of the reduction in the number of SR PSU's is due to a different procedure for drawing PSU boundaries, especially in the New England states, so that the 156 PSU's in the 1970 design are equivalent to 130 PSU's in the current design. Even with this smaller number of sample areas, the reliability of estimates has been maintained by using crimerelated characteristics in the formation of the strata and by improving sample selection within the PSU's.

The remaining stages of sampling were designed to ensure a self-weighting probability sample of dwelling units and group quarters within each of the selected areas. This involved a systematic selection of enumeration districis (geographic areas used for the 1980 census), with a probability of selection proportionate to their 1980 population size, followed by the selection of clusters of approximately four housing units each from within each enumeration district. To account for units built within each of the sample areas after the 1980 census, a sample was drawn, by means of an independent clerical operation, of permits issued for the construction of residential housing. Jurisdictions that do not issue building permits were sampled using small land-area segments. These supplementary procedures, though yielding a relatively small portion of the total sample, enabled persons occupying housing built after 1980 to be properly represented in the survey. With the passage of time, newly constructed units account for an increased proportion of the total sample.

Approximately 62,600 housing units and other living quarters were designated for the sample. For purposes of conducting the field interviews, the sample was divided into six groups, or rotations, each of which contained housing units whose occupants were to be interviewed once every 6 months over a period of 3 years. The initial interview was for purposes of bounding (that is, establishing a time frame to avoid duplicative recording of information on subsequent interviews) but was not used in computing annual estimates. Each rotation group was further divided into six panels. Persons occupying housing units within one-sixth of each rotation group, or
one panel were interviewed each month during the 6 -month period. Because the survey is continuous, additional housing units are selected in the manner described and assigned to rotation groups and panels for subsequent incorporation intc the sample. A new rotation group enters the sample every 6 months, replacing a group phased out after being in the sample for 3 years. Interviews were obtained at 6 -month intervals from the occupants of about 47,000 of the 56,800 housing units designated for the sample. The large majority of the remaining 9,800 units were found to be vacant, demolished, converted to non-residential use, or otherwise ineligible for the survey. However, approximately 1,600 of the 9,800 units were occupied by persons who, although eligible to participate in the survey, were not interviewed because they could not be reached after repeated visits, declined to be interviewed, were temporarily absent, or were otherwise not available.

Thus, the occupants of about 97 percent of all eligible housing units, or some 95,000 persons, participated in the survey.

Approximately 10 percent of the 47,000 households in the 1990 sample, were interviewed using a new technique called Com-puter-Assisted Telephone Interviewing (CATI). This technique was first used in 1987, and a study of the results revealed that it had no serious effect on the NCVS data. Therefore, the data collected from CATI-designated households are included in the 1990 results.

## Estimation procedure

To ennance the reliability of the estimates presented, the estimation procedure incorporated additional data on those characieristics of the population that are believed to effect victimization rates. These data were used in: the various stages of ratio estimaition.

The estimation procedure produces quarterly estimates of the volume and rates of victimization. Sample data from 8 months of field interviewing are required to produce estimates for each quarter. Each quarterly estimate is made up of equal numbers of field observations from the months during the half-year interval prior to the time of interview. This arrangement minimizes expected biases associated with the tendency of respondents to place criminal victimizations in more recent months during the 6-month reference period than when they actually occurred. Annual estimates are derived by accumulating data from the four quarterly estimates, which in turn are obtained from 17 months of field in-terviewing--from February of one year through June of the following year. The population and household rates of victimization are based on an average for these 17 months, centering on the ninth month of data collection period, or October 1990.

## Reliability of estimates

All of the National Crime Victimization Survey data presented are population estimates derived from nationwide probability samples. The samples used for the national survey are large; during a 6 -month period, about 47,000 household interviews and 95,000 personal interviews are conducted. Nevertheless, whenever samples of a population--rather than the entire population--are studied, a certain amount of sampling error is introduced into the results. The size of this error depends on such factors as the sice of the sample and the variability of the population. However, the sampling design and techniques were carried out in a way that permits an estimation of the amount of sampling error present in the results.

The sample used for the NCVS is one of a large number of possible samples of equal size that could have been used applying the same sample design and selection procedures. Estimates derived from different samples would differ from each other.

The standard error of a survey estimate is a measure of the variation among the estimates from all possible samples and is, therefore, a measure of the precision with which the estimate from a particular sample approximates the average result of all possible samples. The estimate and its associated standard error may be used to construct a confidence interval, that is, a range of numbers having a prescribed probability that it would include the average result of all possible samples. Estimates falling within the prescribed confidence interval are considered statistically significant. Most comparisons cited in this report were significant at a level of 2.0 standard errors (the 95 percent contidence level), meaning that the estimated difference is greater than twice the standard error of the difference. Comparisons that failed the 90 percent test were not considered statistically significant.

Because the method utilized in the calculation of these standard errors and confidence intervals is based on approximations, the standari errors are an indication of the order of magnitude of the standard error rather than the precise standard error for any specific item. It should be noted that as finer and finer breakdowns of the population are made--for example, along dimensions of race, income, age, etc.--the size of the standard error, relative to the size of the estimate, can be expected to increase.

## Series victimizations

Three or more criminal events that are similar if not identical in nature and incurred by individuals who are unable to identify separately the details of each act or recount accurately
the total number of such acts are known as series victimizations. Because of the inability of the victims to provide details for each event separately, series crimes have been excluded from analysis and tables derived from the 1990 NCVS data.

## Definitions of terms

Age--The appropriate age category is determined by the respondent's age on the last day of the month before the interview.

Aggravated assault--Attack or attempted attack with a weapon, regardless of whether or not an injury occurred, and attack without a weapon when serious injury results. Serious injury includes broken bones, lost teeth, internal injuries, loss of consciousness, and any injury requiring two or more days of hospitalization.

Annual family income--The total income of the household head and all relatives living in the same housing unit for the 12 months preceding the interview. Includes wages, salaries, net income from businesses or farms, pensions, interest, dividends, rent, and any other form of monetary income. The incomes of people who are not related to the head of the household are not included.

Assault--An unlawful physical attack or threat of attack. Assaults may be classified as aggravated or simple. Rape and attempted rape are excluded from this category, as well as robbery and attempted robbery. The severity of assaults ranges from minor threat to incidents which are nearly fatal.

Attempted forcible entry--A form of burglary in which force is used in an attempt to gain entry.

Burglary--Unlawful or forcible entry or attempted entry of a residence. This crime usually, but not always, involves theft. The illegal entry may be by force, such as breaking a window or slashing a screen, or may be without force by entering through an unlocked door or an open window. As long as the person entering has no legal right to be present in the structure a burglary has occurred. Furthermore, the structure need not be the house itself for a burglary to take place; illegal entry of a garage, shed, or any other structure on the premises also constitutes household burglary. If breaking and entering occurs in a hotel or vacation residence, it is still classified as a burglary for the household whose member or members were staying there at the time the entry occurred.

Ethnicity--A classification based on Hispanic culture and origin, regardless of race.

Forcible entry--A form of burglary in which force is used to gain entry to a residence. Some examples include breaking a window or slashing a screen.

Head of household--A classification which defines one and only one person in each housing unit as the head. Head of household implies that the person rents or
owns (or is in the process of buying), the housing unit. The head of household must be at least 18 , unless all members of the household are under 18, or the head is married to someone 18 or older.

Household--A person or group of people meeting either of the following criteria: (1) people whose usual place of residence is the same housing unit, even if they are temporarily absent; (2) people staying in a housing unit who have no usual place of residence elsewhere.

Household crimes--Attempted and completed crimes that do not involve personal confrontation. Examples of household crimes include burglary, motor vehicle theft, and household larceny.

Household larceny--Theft or attempted theft of property or cash from a residence or the immediate vicinity of the residence. In order to occur within a house, the thief must have a legal right to be in the house (such as a maid, delivery person or guestit, as unlawful or forcible entry constifutes a burglary.

Incident--A specific criminal act involving one or more victims and offenders. For example, if two people are robbed at the same time and place, this is classified as two robbery victimizations but only one robbery incident.

Larceny--Theft or attempted theft of property or cash without involving force or illegal entry. This category is subdivided into personal larceny and household larceny.

Location of residence--A metropolitan area is a county or counties that contain a city or cities, or an urbanized area, having at least 50,000 total population. A central city is the largest city of a metropolitan area. A suburban area is the portion outside the central city. Nonmetropolitan areas include rural areas and cities of fewer than 50,000 , outside of an MSA.

Marital status--Every person is assigned to one of the following classitications: (1) married, which includes persons in common-law unions and those who are currently living apart for reasons other than marital discord (employment, military service, etc.); (2) separated or divorced, which includes married persons who are legally separated and those who are not living together because of marital discord; (3) widowed; and (4) never married, which includes persons whose marriages have been annulled and those who are living together and not in a common-law union.

Metropolitan Statistical Area--Office of Management and Budget defines this as a population nucleus of 50,000 or more, generally consisting of a city and its immediate suburbs, along with adjacent communities having a high degree of economic and social integration with the nucleus. NiSA's are designated by counties, the smallest geographic units for which a wide range of statistical data can be obtained. However, in New England, MSA's are designated by cities and
towns since these subcounty units are of great local significance and considerable data is available for them. Currently, an area is defined as an MSA if it meets one of two standards: (1) a city has a population of at least 50,000; (2) the Census Bureau defines an urbanized area of at least 50,000 people with a total metropolitan population of at least 100,000 (or 75,000 in New England). The Census Bureau's definition of urbanized areas, data on commuting to work, and the strength of the economic and social ties between the surrounding counties and the central city determine which counties not containing a main city are included in an MSA. For New England, MSA's are determined by a core area and related cities and towns, not counties. A metropolitan statistical area may contain more than one city of 50,000 and may cross State lines. Within this general classification unit, there are three subclassifications that are urban, suburban, and rural. They are as follows:

Central city (city)--The largest city, or grouping of cities in a metropolitan statistical area. Urban areas are categorized as those portions of metropolitan areas located in "central cities."

Outside central city
(suburban)--A county or group of counties containing a central city, plus any contiguous counties that are linked socially and economically to the central city. Suburban areas are categorized as those portions of metropolitan areas situated "outside central cities."

Nonmetropolitan areas (rural)--A county or group of counties not located inside a metropolitan statistical area. This category includes a variety of localities, including smaller cities with populations less than 50,000 ; however, it is primarily comprised of sparsely populated areas.

Minor injury-Injuries that (1) involve bruises, black eyes, cuts, scratches, swelling, or (2) are of undetermined nature that required less than 2 days of hospitalizatior.

Motor vehicle--An automobile, truck, motorcycle or any other motorized vehicle legally allowed on public roads and highways.

Motor vehicle theft--Stealing or unauthorized taking of a motor vehicle, including attempted thetts.

Nonstranger--A classification of a crime victim's relationship to the offender. An offender who is either related to, well known to or casually acquainted with the victim is a nonstranger. For crimes with more than one offender, if any of the offenders are nonstrangers, then the group of offenders as a whole is classified as nonstranger. This category only applies to crimes which involve contact between the victim and the offender; the distinction is not made for personal larceny without contact since victims of this offense rarely see the offenders.

Offender--The perpetrator of a crime; this term usually applies to crimes involving contact between the victim and the offender.

Offense--A crime. When referring to personal crimes, the term can be used to refer to both victimizations and incidents.

Personal crimes--Rape, personal robbery, assault, personal larceny with contact or personial larceny without contact. Includes both atiempted and completed crimes.

Personal crimes of theft--Personal larceny. The theft or attempted theft of property or cash by stealth, either with contact (but without force or threat of force) or without direct contact between the victim and the offender.

Personal crimes of violence--Rape, personal robbery or assault. Includes both attempted and completed crimes, and the crime always involves contact between the victim and the offender.

Personal larceny--Equivalent to personal crimes of theft. Personal larceny is divided into two subgroups depending on whether or not the crime involved personal contact between the victim and the offender.

Personal larceny with contact--Theft or attempted theft of property or cash directly from the victim by stealth, not force or threat of force. Includes both purse snatching and pocket picking.

Personal larceny without contact-Theft or attempted theft of property or cash from anyplace other than the victim's home or its immediate vicinity, without direct contact between the victim and the offender. This crime differs from household larceny only in the location in which the theft occurs. Examples of personal larceny without contact include theft of an umbrella in a restaurant, a radio from the beach, or cash from an automobile parked in a parking lot. Occasionally, the victim may see the offender commit the crime.

Physical injury--Physical injury is measured for the three personal crimes of violence. Completed or attempted robberies that result in injury are classified as involving "serious" or "minor" assauit. Examples of injuries from serious assault include broken bones, loss of teeth, internal injuries, loss of consciousness, and undetermined injuries requiring two or more days of hospitalization. Injuries from minor assault include bruises, black eyes, cuts, scratches, swelling, or undetermined injuries requiring less than two days of hospitalization. Assaults without a weapon are classified as aggravated if the victim's injuries fit the description given above of serious assault. All completed rapes are defined as having resulted in physical injury. Attempted rapes are classified as having resulted in injury if the victim reported having suffered some form of physical injury.

Race--Racial categories for this survey are white, black, and other. The category "other" is composed mainiy of Asians and American Indians. The race of the head of household is used in determining the race of the household for computing household crime demographics.

Rape--Carnal knowledge through the use of force or the threat of force, including attempts. Statutory rape (without force) is excluded. Both heterosexual and homosexual rape are included.

Rate of victimization--See "Victimization rate."

Robbery-Completed or attempted theft, directly from a person, of property or cash by force or threat of force, with or without a weapon.

Robbery with injury--Completed or attempted theft from a person, accompanied by an attack, either with or without a weapon, resulting in injury. An injury is classified as resulting from a serious assault, irrespective of the extent of injury, if a weapon was used in committing the crime, or, if not, when the extent of the injury was either serious (broken bones, loss of teeth, internal injuries or loss of consciousness, for example) or undetermined but requiring two or more days of hospitalization. An injury is classified as resulting from a minor assault when the extent of the injury was minor (for example, bruises, black eyes, cuts, scratches or swelling) or undetermined but requiring less than 2 days of hospitalization.

Robbery without injury--Theft or attempted theft from a person, accumpanied by force or the threat of force, either with or without a weapon, but not resulting in injury.

Self-protective measures--These include attacking the offender(s) with or without a weapon; threatening the offender(s) with or without a weapon; resisting or capturing the offender(s); scaring, warning, persuading, or appeasing the offender(s); running away or hiding; getting help or giving alarm; screaming from pain or fear; or some other method reported by the respondent.

Serious injury--Injuries 1) that involve gunshot or knife wounds, internal injuries, broken bones, loss of consciousness, loss of teeth or 2) that are of undetermined nature that required 2 or more days of hospitalization.

Simple assault--Attack without a weapon resulting either in minor injury (for example, bruises, black eyes, cuts, scratches or swelling) or in undetermined injury requiring less than two days of hospitalization. Also includes attempted assault without a weapon.

Stranger-A classification of the victim's relationship to the offender for crimes involving direct contact betweer, the two. Incidents are classified as involving strangers if the victim identifies the offender as a stranger, did not see or recognize the offender, or knew the offender only by sight. Crimes involving multiple offenders are classified as involving nonstrangers if any of the offenders was a nonstranger. Since victims of personal larceny without contact rarely see the offender, no distinction is made between strangers and nonstrangers for this crime.

Tenure--The NCVS recognizes two forms of household tenancy: (1) owned,
which includes dwellings that are mortgaged, and (2) rented, which also includes rent-free quarters belonging to a party other than the occupants, and situations where rental payments are in kind or in services.

Unlawful entry--A form of burglary committed by someone having no legal right to be on the premises, even though no force is used.

Victim--The recipient of a criminal act, usually used in relation to personal crimes, but also applicable to households.

Victimization--A crime as it affects one individual person or household. For personal crimes, the number of victimizations is equal to the number of victims involved. The number of victimizations may be greater than the number of incidents because more than one person may be victimized during an incident. Each crime against a household is assumed to involve a single victim, the affected household,

Victimization rate--A measure of the occurrence of victimizations among a specified population group. For personal crimes, this is based on the number of victimizations per 1,000 residents age 12 and older. For household crimes, the victimization rates are calculated using the number of incidents per 1,000 households.

Victimize--To commit a crime against a person or household.

## Appendix 8

## National Household Survey on Drug Abuse: Main Findings 1990 Survey methodology

Note: The following information was excerpted from U.S. Department of Health and Human Services, National Institute on Drug Abuse, National Household Survey on Drug Abuse: Main Findings 1990 (Washington, DC: USGPO, 1991), pp. 1-11, and Appendices A and B. Non-substantive editorial adaptations have been made.

## Survey methodology

The 1990 National Household Survey on Drug Abuse (NHSDA) is the tenth study in a series of national surveys to measure the prevalence of drug use among the American household population aged 12 and older. Population estimates of drug use prevalence for the civilian, noninstitutionalized population of the United States are presented.

The following drugs or categories of drugs are examined in the National Household Survey: marihuana (including hashish), cocaine (including crack), inhalants, hallucinogens (including PCP), heroin, nonmedical use of four classes of psychotherapeutic drugs (stimulants, sedatives, tranquilizers, and analgesics), cigarettes, smokeless tobacco, and alcohol. The principle correlates of drug use examined are age, sex, race/ethnicity, population density, geographic region of residence, educational attainment among those 18 years old and older, and current employment.

Essentially the same methodology has been used in each of the 10 National Household Surveys. A national probability sample of households in the coterminous United States was selected from 100 primary sampling units. The household population includes more than 98 percent of the U.S. population. It excludes persons living in group quarters or institutions such as military installations, dormitories, hoteis, hospitals, and jails and transient populations such as the homeless. The 1990 survey also oversampled the District of Columbia Metropolitan Statistical Area (MSA) relative to the proportion of households occurring in the sampling frame. Alaska and Hawaii were not included in the sample until 1991 because of logistic and cost considerations. (See Appendix 9.)

The 1990 sample design used a composite size measure methodology and a specially
designed within-household selection procedure to meet specified precision constraints for subgroups defined by age and minority group membership. To reduce survey costs, the design sampled Hispanics at higher rates in geographic areas where they were concentrated. The basic plan involved several selection stages: the selection of primary areas
(e.g., counties), subareas (area segments) within these primary areas, sample households within subareas, and one or two eligible residents (if any) within these households.

To reduce the number of required screenings, two selections per household were allowed in some household types containing 12 to 17 year-olds. A total of 34,586 listings were screened to identify sufficient households to yield the Hispanic and black agedomain samples. In each selected household, a roster recording the age, race/ethnicity, and sex of all household members aged 12 and older was completed. Two, one, or no respondents were selected to be interviewed using a random sampling procedure, with selection probabilities based on the race/ethnicity of the head of household and the ages of household members. The procedure was designed to control the sample sizes for age and race/ethnicity groups of interest. The sample design ensured adequate sample sizes for four age groups ( 12 to 17, 18 to 25,26 to 34 , and 35 and older) and three race/ethnicity groups (Hispanic, nonHispanic black and non-Hispanic white).

Respondents were interviewed in person in their homes by trained interviewers. At the conclusion of data collection for the study, sample weights that reflect the various stages of sampling described above were constructed. The sample weights were then adjusted to account for sample persons who could not be found at home or who refused to participate. Finally, these weights were poststratified to census projections of population counts for Hispanic origin by age group and race by age group. This adjusted weight is used in deriving estimates.

For the 1990 National Household Survey, data were collected from Mar. 13, to June 30, 1990, resulting in a total of 9,259 interviews. A completed interview had to contain, at a minimum, data on use of marihuana, cocaine, alcohol, and cigarettes in the respondent's lifetime, Strategies for ensuring high rates of participation resulted in a response rate of 82 percent. Of the 9,259 completed interviews, 5,502 were with whites and others (i.e., nonHispanic, non-blacks), 1,842 were with (nonHispanic) blacks, and 1,915 were with Hispanics. About 5 percent (508) of the interviews were conducted using the Spanish version of the questionnaire. The completed interviews represented a 96.4 percent completion rate for screening sample households
and 82.0 percent for interviewing sample individuals. The response rates for these three racial/ethnic groups were 82 percent for whites and others, 79 percent for blacks, and 86 percent for Hispanics.

The importance of confidentiality was stressed to the interviewers. Throughout the course of the study, the respondent's anonymity and the privacy of his or her responses were protected by separating identifying information from survey responses. Respondents were assured that their identities and responses would be handled in the strictest confidence in accordance with Federal law. The questionnaire itself and the interviewing procedures were designed to enhance the privacy of responses, especially during segmenis of the interview in which questions of a sensitive nature were posed. Show cards were displayed when questions concerning illicit drug use were asked, and respondents were asked to mark answer sheets to record their responses to questions read aloud by the interviewer. The interviewer did not see the completed answer sheets.

## Sampling error and confidence intervals

Estimates which are based on survey data may differ from true population values because cf two sources of error: sampling error and nonsampling error. Sampling error for individual rates results from asking questions of a sample rather than of everyone in the target population. Sampling theory provides the basis for calculation of confidence intervals around the estimates and tests of significance in comparing two estimates. The size of the intervals and the algorithm for tests of significance depend on (1) the sample size;
(2) the extent of homogeneity of the sample on the variable in question, that is, the appropriate design effect; (3) the specific type of probability sampling procedure used; and (4) the degree of confidence required in the estimate. In the 1990 National Household Survey on Drug Abuse (NHSDA), sampling error due to the random process used to subsample the total population of inferential interest (i.e., the household population age 12 and older of the coterminous United States), was quantified using 95 percent confidence intervals. Because one is often dealing with small percentages in the 1990 NHSDA, asymmetrical confidence intervals for estimated percentages and corresponding population sizes were calculated using methods based on logit transformations. Nonsampling error refers to error due to nonresponse, misreporting, and miscoding. Nonsampling errors cannot be quantified, although rigorous attempts were made to minimize them through pretesting, interviewer training and evaluation, interview verification, coder training, coding checks, and other quality control measures.

## Missing data

The issues concerning the effects of missing data on drug use prevalence estimates are different for the 1990 NHSDA than has been true for previous NHSDA rounds prior to 1988, while issues concerning the effects of missing data in other variables are similar.

## Prevalence measures and missing data

Effectively, after editing and imputation, there are no missing data in the 1990 NHSDA for the age, sex, race/ethnicity, adult education, and current employment variables and for the drug use prevalence measures. Even before statistically imputing values to replace missing data in the recency-of-use measures on which prevalence estimates are based, no recency-of-use variable had missing data for more than 0.38 percent of the sample cases.

## Procedures for handling missing data in analyses

When there are no missing data, a decision rule is not required. When there are only a few cases with missing data, analytic resulis are not likely to be greatly affected by how missing data are treated. When the amount of missing data is substantial, results can be appreciably affected by decisions about how to handle the missing data. Both the situations of a little missing data and substantial missing data in variables other than age, sex, race/ethnicity, adult education, and current employment and the drug-use prevalence measures need to be considered in assessing how results were produced for the 1990 data.

There are two other situations in which the decision about treatment of missing data can significantly affect the interpretation of results. The first instance occurs when comparing prevalence rates for 1982, 1985, 1988, and 1990 in the trend tables. Since there are no data missing for lifetime use in any of these 4 years, interpreting differences in lifetime prevalence rates across the period $1982-90$ is straightforward. However, prior to 1985, if past year or past month use or nonuse of a drug could not be determined, the respondent was effectively counted as a nonuser in any period for which use or nonuse was missing; then prevalence rates were calculated by dividing the number of users by the sum of the number of users, nonusers, and missing cases. Such treatment of respondents known to have used the drug at some time in their lifetime for whom use or nonuse in the past year or month is unknown seems unwarranted since doing so results in underestimating past year and past month drug use. For 1985, if it was not possible to determine past year or past month use or nonuse of a drug, the case was excluded from the appropriate analyses. For 1988 and

1990, the elimination (see section below for discussion of this procedure) of missing data for past year and past month drug use by means of statistical imputation has essentially the same effect as did excluding cases with such missing data from analyses of the 1985 NHSDA data. In practice, underestimation of past year and past month drug use prior to 1985 appears to have been negligible because the amount of missing data has always been very small, with one axception. In 1982 counting cases known to have used alcohol at some time in their lifetimes for whom past year and past month alcohol use was unknown as nonusers resulted in atypically low prevalence rates for the past year and past month pariods; nevertheiess, differences between 1982 and 1985 rates of past year and past month alcohol use calculated both ways are negligible.

The second instance where treatment of missing data significantly affects interpretation of results occurs in the tables which focus on the problems that respondents attributed to alcohol or drugs are analyzed. Nearly 11 percent of respondents who had used some drug and who should have answered the questions on the drug problems failed to do so. Most of these persons smoked cigarettes or drank alcohol less often than weekly and had used no illicit drug in their lifetimes. The decision was made to treat these respondents as not having problems rather than exclude them from the analyses. This treatment is documented in both the tables and the accompanying text and represents a conservative strategy that errs, if at all, in the direction of underestimating the prevalence of problems thought by respondents to have been caused by their use of alcohol, tobacco, or drugs.

## Adjusting for nonresponse through imputation

Missing data for recency-of-use variables (other than for alcohol, marihuana, and cocaine), for the frequency-of-use-in-past-12months variables, and for age, race, Hispanic origin, marital status, past week work status, education, health insurance, and personal earnings variables were imputed by using a statistically-based technique known as hotdeck imputation. The first step in the hot-deck imputation procedure involved progressively sorting the data file by age, sex, Hispanic origin, and race. This sorting produced an ordered data file in which adjacent data records represent individuals with similar characteristics. A missing value for each demographic variable was then replaced by the nonmissing response for the same variable in the last encountered record in the sorted data base. After all missing age, race, and Hispanic-origin values had been statisti-cally-imputed, the file was again progressively sorted by these variables. Then a missing
value for each recency-of-use, frequency-of-use-in-past-12-months, marital status, past week work status, education, health insurance, and personal earnings variables were replaced by the nonmissing response for the same variable in the last encountered record in the sorted data base. For each hot-deck imputation-revised variable, there is an imputation-indicator variable whose values distinguish whether the imputed variable's value originated from edited (and perhaps logically imputed) interview responses or were imputed by the hot-deck technique.

## Limitations of the household survey

Aithough the NHSDA is useful for many purposes, it has certain limitations. First, the data are self-reports of drug use, and their value depends on respondents' truthfulness and memory. Although some experimental studies have established the validity of selfreport data in similar contexts and the NHSDA procedures were designed to encourage honesty and recall, some under- and over-reporting may have taken place. Second, the survey is cross-sectic $7 a l$ rather than longitudinal. That is, individuals were interviewed only once and were not followed for additional interviews. The surveys therefore provide an overview of the prevalence of drug use at specific points in time rather than a view of how drug use changes over time for groups of individuals. Third, because the target population of the survey is detined as the household population of the contimental United Siates, a small proportion (less than 2 percent) of the population is excluded. The subpopulations excluded are those in noninstitutional group quarters (e.g., military installations, college dormitories, group homes), those in institutional group quarters (e.g., prisons, nursing homes, treatment centers), and those who had no permanent residence (the homeless and residents of single rooms in hotels). If the drug use of these groups differs from that of the household population, the NHSDA may provide slightly inaccurate estimates of drug use in the total population. This may be particularly true for prevalence estimates of rarely used drugs such as heroin.

## Definitions of terms

## Population density

Large metropolitan--Includes Standard Metropolitan Statistical Areas (SMSAs) with a population of $1,000,000$ or more in 1980. Large metropolitan areas include central cities and surrounding areas as defined by the U.S. Bureau of the Census.

Nonmetropolitan--Those areas of the coterminous United States that were not part of a Standard Metropolitan Statistical Area (SMSA) as of 1980, according to the U.S.

Bureau of the Census. In general, this includes small communities, rurai non-farm areas, and rural farm areas

Small metropolitan--Standard Metropolitan Statistical Areas with a population of 50,000 to 999,999 in 1980 constitute Small Metropolitan areas.

## Regions

North Central--The States included are the East North Central States--Illinois, Indiana, Michigan, Ohio, and Wisconsin--and the West North Central States--lowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota.

Northeast--The States included are the New England States of Connecticut, Maine,

Massachusetts, New Hampshire, Rhode Islano' Vermont and Middle Atlantic States- New Jersey, New York, Pennsylvania.

South--This census classification contains the South Atlantic States--Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, and West Virginia; the East South Central States of Alabama, Kentucky, Mississippi, and Tennessee, and the West South Central States of Arkansas, Louisiana, Texas, and Oklahoma.

West--This census classification includes the States of Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

## Appendix 9

Natlonal Household Survey on Drug Abuse: Population Estimates 1991<br>Survey methodology

Note: The following information was excerpted from U.S. Department of Health and Human Services, National Institute for Drug Abuse, National Household Survey on Drug Abuse: Population Estimates 1991 (Washington, DC: USGPO, 1991), pp. 1-10, 13-15. Non-substantive editorial adaptions have been made.

## Survey methodology

The 1991 National Household Survey on Drug Abuse is the eleventh study in a series of national surveys to measure the prevaience of drug use among the American household population aged 12 and older. Population estimates of drug use prevalence for the civilian, noninstitutionalized population of the United States are presented.

For the 1991 National Household Survey, a national probability sample of households in the United States was selected from 125 primary sampling units. The sample included persons living in some group quarters, such as civilians living on military installations, college dormitories, and homeless shelters, but did not include transient populations such as the homeless not in shelters. Alaska and Hawaii were included in the National Household Survey for the first time in 1991.

Essentially the same methodology has been used in each of the eleven National Household Surveys. In each selected household, a roster recording the age, race/ethnicity, and sex of all household members aged 12 and older was completed. Using a random sampling procedure, either two, one, or no respondents wers selected to be interviswed. (Selection probabilities were based on the race/ethnicity of the head of household and the ages of household members.) The procedure was designed to control the sample sizes for age and race/ethnicity groups of interest. After selection, respondents were interviewed in person in their homes by trained interviewers. The interview process included use of self-administered answer sheets and other procedures designed to assure respondents that their responses to sensitive questions would be kept confidential and anonymous.

For the 1991 National Household Survey, data were collected from Jan. 8,1991 to June 30,1991 , resulting in a total of 32,594 inter-
views with a 96.5 percent completion rate for screening sample households and 84.2 percent for interviewing sample individuals. The median completion date for the survey was Mar. 12, 1991.

Age and race/ethnicity were the two primary correlates of drug use on which the 1991 sample was strautied. The sample design ensured adequate sample sizes for four age groups ( 12 to 17,18 to 25,26 to 34 , and 35 and older) and three race/ethnicity groups. In adelition, for the 1991 National Household Survey on Drug Abuse, sample sizes in the Washington, DC Metropoiitan Siatistical Area (MSA) were designed to be large enough to support estimation. Based on the respondents' self-classifications the race/ethnicity groups were classified as: (1) Hispanic in origin, regardless of race; (2) White, not of Hispanic origin; and (3) Black, not of Hispanic origin. As defined, these groups are mutually exclusive. Those who did not identify themselves as Hispanic, non-Hispanic White or non-Hispanic Black were included in the population totals, but no separate population estimates were presented for this "Other" race/ethnicity group because of the small sample size.

## Development of weights

Sampling weights were calculated to reflect selection probabilities and to compensate for nonresponse and undercoverage. Each weight can be viewed as the number of population members that the responding sample member represents. A post-stratification adjustment was made to force respondent weight totals to reflect population totals for age, sex', and race/ethnicity population groups.

## Adjusting for nonresponse through imputation

The prevalence estimates are based on the total sample or all cases in a subgroup, including some cases for which missing data for some recency-of-use and frequency-ofuse variables were replaced with logically or statistically imputed values. Prior to determining the completeness of a case, an editing procedure was implemented to check for inconsistencies and to determine if missing information was retrievable by using other information in the questionnaire. Logical imputation was then done to replace inconsistent, missing, or invalid data. Determinatien of completeness of a case was then made. To be classified as minimally complete interviews, and therefore included in the data base, data on the recency of use of alcohol, marihuana, and cocaine had to have been provided by the respondent or logically imputed from other answers supplied by the respondent.

Missing data for recency-of-use questions (for drugs other than alcohol, cocaine, and marihuana) and for the frequency-of-use-in-the-past-12-months variables were statistically imputed (that is, replaced) by using a technique known as hot-deck imputation. The first step in this procedure involved sorting the data file with a progressive series of subsorts using data on recency-of-use of alcohol, marihuana, cocaine, age, sex, Hispanic origin and race. This sorting produced an ordered data file in which adjacent data records represent individuals with similar characteristics. Missing values for particular items were then replaced by the last encountered non-missing response in the sorted data base. A hot-deck imputation procedure was appropriate for use because the level of item nonresponse was low.

The use of imputation can potentially reduce the bias caused by missing data and substantially improve estimates. In this survey, however, the potential impact of bias due to item nonresponse and the impact of imputation on the estimates themselves is quite small because item nonresponse was less than 5 percent for drug use questions. The main advantage of such imputation for this survey was that it simplified calculation of the estimates.

## Sampling error and confidence intervals

In the National Household Survey on Drug Abuse, as in every sample survey, there is some degree of statistical uncertainty or error. The estimates provided in this report are subject to uncertainties of two types: nonsampling and sampling errors. Nonsampling errors are attributed to such sources as recording and coding errors, missing data, and differences in respondents' interpretations of questions. Nonsampling errors cannot be quantified, however rigorous attempts were made to minimize them through pretesting, interviewer training and evaluation, interview verification, coder training, coo ig checks, and other quality control measures.

Sampling errors denote the random fluctuations that occur in estimates when a sample of the population is drawn rather than conducting a complete census. Different samples drawn using the same procedures from the same population would be expected to result in different estimates. Many of these observed estimates would differ to some degree from the "true" population value and these differences are due to sampling errors. Sampling errors are quantified in this report by way of confidence intervals. Methods based on a logit transformation were used to calculate asymmetrical 95 percent confidence intervals for all estimated proportions and corresponding population estimates. The precise interpretation of the 95 percent confidence interva! is as follows: If repeated
samples of identical design were drawn from the population, and the sample estimate and corresponding upper and lower confidence limits were calculated for each sample, then the true population value would be included In the confidence intervals of 95 out of every 100 samples.

## Considerations in interpreting the data

Readers are cautioned to take the following into accoun! when using or interpreting these estimates: (1) The value of self-reports depends upon the honesty and memory of sampled respondents. The National Household Survey procedures are designed to encourage truthfulness and recall, nevertheless, some under- or over-reporting may occur. (2) Drug use prevalence estimates from the National Household Survey for specific subgroups are sometimes based on modest to small sample sizes, which may lead to substantial sampling error. (3) The population projections prepared by the Cur-
rent Population Survey and used in weighting the National Household Survey sample are subject to more error as the time since the last census increases. (4) The population surveyed is the noninstitutionalized population living in households, college dormitories, and civilians on military installations and therefore does not include some segments of the U.S. population which may contain a substantial proportion of drug users, such as transients and those incarcerated.

Consequently, the estimates produced should be viewed as approximations based on the best data available at this time.

## Regions

North Central--The States included are the East North Central States--llinois, Indiana, Michigan, Ohio, and Wisconsin--and the West North Central States--lowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota.

Northeast--The States included are the New England States of Connecticut, Maine, Massachusetts, New Harnpshire, Rhode Island, Vermont and Middle Atlantic States--New Jersey, New York, Pennsylvania.

South--This census classification contains the South Atlantic States--Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, and West Virginia; the East South Central States of Alabama, Kentucky, Mississippi, and Tennessee, and the West South Central States of Arkansas, Louisiana, Texas, and Oklahoma.

West--This census classification includes the States of Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

## Appendix 10

## Annual Emergency Room Data 1390

Methodology, estimation procedure, reliability of estimates, and data limitations

This information was excerpted from U.S. Department of Health and Human Services, National Institute on Drug Abuse, Annual Emergency Room Data 1990, Statistical Series I, Number 10-A (Washington, DC: USGPO, 1991), pp. 1-13. Non-substantive editorial adaptations have been made.

## Methodology

These data were collected by the National Institute on Drug Abuse through the Drug Abuse Warning Network (DAWN). The data are weighted estimates representing all drug abuse-related emergency room (ER) episodes in the 48 contiguous States, the District of Columbia, and 21 metropolitan areas for calendar year 1990. During 1990, 503 sample hospitals with 533 separate ER facilities provided data to DAWN. The sample hospitals reported a total of 110,448 ER drug abuse episodes and 184,176 drug mentions. With the application of sampling weights, these data lead to the estimate of 371,208 drug abuse episodes and 635,460 drug. mentions in the universe of eligible hospitals across the United States.

Hospitals eligible for DAWN are non-Federal, short-stay general hospitals in the coterminous United States that have a 24 -hour emergency room. The American Hospital Association (AHA) 1984 and 1985 Annual Surveys of Hospitals were used to obtain a sampling frame. Hospitals in the frame were stratified according to several characteristics. The first characteristic was size, with hospitals reporting 80,000 or more annual ER visits assigned to a single stratum and selected with certainty. Additional strata were defined according to whether the hospital had an organized outpatient department or a chemical/alcohol inpatient unit; facilities were assigned to one of three strata depending on whether they had neither type of unit, either one or the other, or both. Each of the 21 DAWN metropolitan areas was oversampled, and hospitals outside these areas were assigned to the national panel and sampled. In addition to the other strata, haspitals in the metropolitan areas were classified as to whether they were inside or outside the central city. Operationally, this was determined by whether they were located in one of the cities listed in the official name of the metropolitan area. The national response rate in 1990 was 80 percent; this rate is based on
the number of eligible hospitals in the sample and the number actually responding. Data from the 21 oversampled metropolitan areas were pooled with data from the national panel to produce the national estimates.

For the purpose of reporting to the DAWN system, drug abuse is defined as the nonmedical use of a substance for psychic effect, dependence, or suicide attempt/gesture. Nonmedical use includes: the use of prescription drugs in a manner inconsistent with accepted medical practice; the use of over-the-counter drugs contrary to approved labeling; or the use of any other substance (heroin, cocaine, marihuana, glue, aerosols, etc.) for psychic effect, dependence, or suicide.

An episode report is submitted for each drug abuse patient who visits a DAWN emergency room and each drug abuse death encountered by a DAWN medical examiner. Each report of a drug abuse ER episode includes demographic information about the patient and information about the circumstances of the episode. In addition to drug overdoses, drug abuse emergency room spisodes may result from the chronic effects of habtual drug usage or from unexpected reactions. Unexpected reactions reflect cases where the drug's elfect was different than anticipated (e.g., causing hallucinations). Up to four different substances, in addition to alcohol-incombination, can be specified for each ER episode.

It should be noted that alcohol is reported to DAWN only when used in combination with another drug. It also should be noted that episodes involving children under 6 years of age are not reported to DAWN.

Within each facility participating in the DAWN system, a designated DAWN reporter, usually a member of the emergency room or medical records staff, was responsible for identifying drug abuse episodes and recording and submitting data on each case. On a weekly basis, the total number of daily emergency room visits and the number of cases related to drug abuse were entered into a reporting $\log$. From the official facility records, the relevant details of each drug abuse episode were transferred onto DAWN data forms. A number of quality control procedures are used to assure that DAWN data are as accurate and methodologically consistent as possible. These procedures include: (1) training of personnel responsible for collecting the data within the participating hospitals; (2) provision of instruction manuals and other materials specifying data collection methods, definitions and requirements; (3) monitoring of reporting practices and problem resolution by a staff of traveling field liaison representatives assigned to five regions of the country; (4) inhouse manual editing of data collection forms with followup to resolve problems; (5)
computer editing of data to identify problems; and (6) reabstracting studies at participating facilities to monitor the accuracy and completeness of reporting on a periodic basis and, as needed, on a special study basis to review unusual trends.

## Estimation procedure

The data represent weighted estimates of total emergency room drug episodes and drug mentions in the coterminous U.S. and in the 21 metropolitan areas oversampled in DAWN. In order to produce representative estimates for the entire population of hospital ERs, the sampling probabilities must be taken into account. In a random sample such as the DAWN ER sample, each unit has a known probability of being selected. Data from a random sample can be extrapolated to the total population using the sampling weighis. In a simple case, each hospital in the sample might have a selection probability of 0.2 , or 20 percent. This means that onefifth of hospitals in the sampling frame are selected, and each selected facility represents itself and four others. In this situation, the sampling weight for each facility is 5 , the reciprocal of 0.2 . If one of the sample facilities reports 20 drug abuse episodes, then these episodes would be weighted by a factor of 5, resulting in 100 episodes. Applying the sampling weight to the observed data results in weighted estimates.

As mentioned above, the sampling frame of hospital emergency rooms was stratified before the sample was selected. Though a random sample was chosen within each stratum, sampling proportions varied by stratum. In making estimates from a stratified sample, the sampling proportion in each stratum is taken into account in determining the weight applied to data from sample units in that stratum.

As part of the DAWN emergency room sample design, strata were defined within each area, and a sample was drawn from each stratum. Sampling weights are determined for each stratum based on the sampling proportion in that stratum, and stratumlevel estimates can be generated by applying the weights. Metropolitan area estimates are produced by aggregating the weighted estimates for the component strata; and national estimates are generated by summing the weighted estimates from the 21 metropolitan areas and the national panel. Facilities in the national panel were selected with a lower probability than facilities in the 21 metropolitan areas. Thus data from hospitals in the national panel are given greater weight than those in the oversampled areas when national estimates are developed.

In addition to inflating the sample data to regresent the total universe, the estimation
process also must make adjustments to offset other sources of possible bias. Sampling weights must be adjusted after the sample is drawn to compensate for facilities that declined to participate (i.e., unit nonresponse). Nonresponse in a stratum or metropolitan area increases the actual relative standard errors of the estimates and thus reduces their precision.

Facilities participating in the system sometimes fail to provide data on all the possible reporting days in a given time period. This daily nonresponse problem usually results from delayed submission of data. When the data files are closed for a given month, the data for some facilities are incomplete because of these delays. Three procedures are used to minimize the effects of daily nonresponse due to delayed reporting. First, annual reports such as this one are prepared using data received up to five months after the end of the year in question. Second, critical late reporters are identified, and intensive efforts are made to obtain data from them. in these efforts, priority is given to hospitals with (a) a lower than average number of days reported and a high weighted number of mentions of cocaine in a previous quarter, and (b) hospitals that reported for fewer days in the month and are in strata with poorer unit response rates. Third, the estimation procedures include an adjustment for days when facilities failed to submit data.

In addition to considering the original sampling probabilities and the adjustments for unit and daily nonresponse, the estimates presented in this report include another adjustment based on the total number of ER visits to all eligible hospitals in the specific metropolitan area. This final factor is applied to produce a ratio estimator. Essentially, this final ratio adjustment benchmarks the weighted estimates of total drug episodes obtained from the sample by the ratio of ER visits from the AHA frame to an estimate of this value obtained from the survey. This benchmarking procedure increases the precision of the estimate of total drug related episodes by taking advantage of the inherent correlation between the number of these episodes experienced by a facility and its total number of ER visits. Ideally, the benchmark factor has a value of 1.0. However, deviations from 1.0 may occur as a result of nonresponse, sampling error, and other errors.

The final weight is a product of the above mentioned components. (1) the inverse of the selection probability, (2) adjustments for unit and daily nonresponse, and (3) a benchmark adjustment for each metropolitan area and the national panel, that takes into account the total numbers of visits to all eligible facilities
and to sample facilities. Specifically, this factor is the ratio of $E R$ visits from the AHA Annual Survey sampling frame and an estimate of this value derived from the sample. The weights are generated each quarter for each hospital in the sample. For unit nonrespondents, closed, and ineligible hospitals, the weights are equal to zero.

## Reliability of estimates

As indicated in the discussion of the new sample, each estimate is subject to sampling variability, and the relative standard error (RSE) is an index of the degree of sampling variability. The greater the RSE value, the lower the precision of the estimates. The RSE is defined as the standard error of the estimate expressed as a percentage of the value of the estimate. The standard error reflects the variability of the estimate that would be observed if different samples were drawn from the same population using the same procedures. If there are 10,000 estimated mentions of a given drug and this estimate has a standard error of 500 , then the RSE value is 5 percent.

One simple rule of thumb is that, in 68 percent of the cases, estimates derived from repeated sampling would be expected to differ from the observed estimate by a percentage of no more than the RSE value, in either direction.

Methods of calculating the variance, standard error, and relative standard error (RSE) of estimates from the DAWN ER sample data have been developed. These calculations are somewhat difficult because of the complex design of the sample survey, including the use of a stratified ratio estimator in computing the weights.

The fact that weiglits are developed according to quarter requires that annual estimates be computed by summing the estimates for the four component quarters. This creates additional complexities in calculating variances and standard errors. The quarterly data are correlated because they are based, except in rare cases, on the samie sample hospitals. Therefore, the variance calculations for the annual estimates must take into account the covariances between quarters. These difficulties notwithstanding, RSEs have been calculated for the 1990 DAWN estimates.

Estimates with an RSE value of 50 percent or higher were regarded as too imprecise. In addition, estimates of less than 10 were excluded. Although many estimates in this range had RSEs of less than 50 percent, the reliability of the RSE estimates themselves are suspect in these cases.

## Data limitations

DAWN collects information about only those drug abuse occurrences that have resulted in a medical crisis and, subsequently, have been identified as drug abuse episodes by a reporting facility. It should be noted that although standard instruction manuals and training are provided to each DAWN reporter, the specific methods and procedures used to identify drug abuse episodes and substances may vary from facility to facility. Emergency room data may reflect drug use self-reported by the patients to attending medical staff. The number of emergency room episodes reported to DAWN is not equivalent to the number of individuals involved, since one person may make repeated visits to an emergency room. DAWN data contain no personal identifiers, which would be required to eliminate repeat visits. A drug abuse episode may have multiple drug mentions. Therefore, not every reported substance is, by itself, necessarily a cause of the medical emergency. On the other hand, substances that contributed to a drug abuse episode may occasionally go unreported or undetected. The presence of multiple drug mentions in an episode has implications for the interpretation of data on both drug use and episode characteristics. For example, since a single drug use motive is reported for each episode, that motive is assigned to each separate drug mentioned in the episode; thus, some caution must be exercised when relating drug mention patterns to specific motives.

## Appendix 11

Offender-Based Transaction Statistics program Methodology, data limitations, and definitions of terms

Note: The following information was excerpted from the U.S. Department of Justice, Bureau of Justice Statistics, Criminal Cases in Five States, 1983-86, Special Report NCJ-118798 (Washington, DC: U.S. Department of Justice, September 1989), p. 3; U.S. Department of Justice, Bureau of Justice Statistics, Tracking Offenders, 1988, Bulletin NCJ-129861 (Washington, DC: U.S. Department of Justice, June 1991), pp. 1-3, 6; and U.S. Department of Justice, Bureau of Justice Statistics, Forgery and FraudRelated Offenses in 6 States, 1983-88, Special Report NCJ-132445 (Washington, DC: U.S. Department of Justice, January 1992), pp. 1, 2, 7. Non-substantive editorial adaptations have been made.

## Methodology

These data are derived from the Bureau of Justice Statistics' Offender-Based Transaction Statistics (OBTS) program. The OBTS program receives information about dispositions of adult felony arrests from criminal justice repositories of participating States. In 1988 the participating States, whichi accounted for more than 36 percent of the resident population of the United States, were Alabama, Alaska, California, Delaware, Kentucky, Minnesota, Missouri, Nebraska, New York, Oregon, Pennsylvania, Utah, Vermont, and Virginia. The data for forgery and fraudrelated offenses for 1983 to 1988 are from the following six States: California, Minnesota, Nebraska, New York, Pennsylvania, and Virginia.

Local criminal justice agencies record arrest data and other information on fingerprint cards and disposition documents. The agencies forward the data to a State's criminal information repository that updates appropriate master records. OBTS receives data from the repositories. OBTS coverage may remain incomplete within the reporting States for several reasons. Not all law enforcement agencies fingerorint all persons arrested, and some do not $s$ semit all their fingerprint cards. Offenders sometimes surrender directly to a court and are not fingerprinted. Even when a fingerprint card is filed, the prosecutor or court may not report the final disposition.

BJS annually solicits State repositories to extract and submit data from the master records, following OBTS guidelines. Some

States are in the process of automating their criminal-history files and cannot participate. Other States have not joined because of insufficient reporting by local agencies, crimi-nal-history files not designed for statistical extraction, or lack of resources.

To allow comparability among States, the OBTS standards use the FBI's National Crime Information Center (NCIC) offense codes. To ensure privacy, an OBTS record uses as personal identifiers only an encrypted identification number (to permit study of repeat offenders), sex, race, and age.

The OBTS program captures information on the most serious charge and the most serious consequence for the arrestee at each decision point in the justice process. A basic program requirement is that the arrestee must have been originally charged with a felony, an ofiense that may be punishable by imprisonmerit for more than 1 year. An OBTS record distinguishes among arrestees, incidents, and charges. The arrestee is identified through fingerprints and is assigned an identification number which can be linked to earlier records. The incident number identifies each incident so that records in multiple charge cases can be condensed. In the latter situation, the program collects the most serious arrest charge as well as the most serious disposition by the police, prosecutor, grand jury, or court, depending on the circumstances of the particular case. Sentence information is also collected for the conviction on the most serious charge. OBTS data are based on the year of final disposition, not on the year of arrest. Thus, an OBTS year includes arrests that occurred in an earlier year. A final disposition refers to either a decision not to prosecute or a trial court finding, not to an appeal.

## Definitions of terms

Adult is defined by State statute, and OBTS defines felony as any crime for which an offender can be imprisoned for more than 1 year.

BJS' standard crime definitions and categories are used. The basic categories and major crimes in each are as follows:

Drug crimes--possession, manufacturing, trafficking of illegal drugs.

Forgery or Fraud-related
crimes--nonviolent crime for financial gain, committed by deception including forgery, counterfeiting, fraud, embezzlement, bribery, tax, and health and safety violations (drug and food misbranding or adulteration).

Property crimes--burglary, larceny or theft, motor vehicle theft, arson, fraud, embezzlement, stolen property.

Public-order crimes--weapons, driving while intoxicated, disturbing the peace, obstructing police, vice, bribery, sex offenses
not invoiving assault, parole violations, fami-ly-related felonies, flight or escape.

Violent crimes--murder and nonnegligen's manslaughter, negligent manslaughter, kidnaping, rape, other sexual assault, robbery, aggravated assault.

## Appendix 12

## 1990 Drug Use Forecasting Annual Report

 Methodology and survey sampling informationNote: The following information was excerpted from the U.S. Department of Justice, National Institute of Justice, 1990 Drug Use Forecasting Annual Report (Washington, DC: U.S. Department of Justice, August 1991), pp. 2-3. Non-substantive editorial adaptations have been made.

## Methodology

Drug Use Forecasting (DUF) data are collected in booking facilities throughout the United States. For approximately 14 consecutive evenings each quarter, trained local staff obtain voluntary and anonymous urine specimens and interviews from a new sample of booked arrestees. The DUF sample is based on arrestees brought into the booking facility. Arrestees released before booking are not part of the DUF sample. In each site, approximately 225 males are sampled. In some sites, female arrestees and juvenile arrestees/detainees are also sampled. Generally, more than 90 percent of the arrestees approached agreed to be interviewed. Approximately 80 percent of those interviewed provide urine specimens.

To obtain samples with a sufficient distribution of arrest charges, DUF interviewers, where possible, limit the number of male booked arrestees who are charged with the sale or possession of drugs. Because such persons are likely to be using drugs at arrest and are undersampled, DUF statistics ? re quently are minimum estimates of drug use in the male arrestee population. Males charged with driving offenses generally are excluded from the samples due to DUF's emphasis on more serious crimes. In Omaha, however, all male arrestees brought to the booking facility are included in the DUF sample to obtain a sample of sufficient size. Because they are fewer in number, all female arrestees brought to the booking facilities and all juvenile arrestees/detainees brought to the detention centers during the data collection period are included in the DUF samples, regardless of charge.

All urine specimens, excluding those from Phoenix and Portland, were sent to a central laboratory for analysis. The specimens were analyzed for 10 drugs: cocaine, opiates, marihuana, PCP, methadone, benzodiazepines, methaqualone, propoxyphene, barbiturates, and amphetamines. In Phoenix and

Portland, drug testing was done at local laboratories, which do not test for all 10 drugs. Male specimens from Phoenix are not tested for methaqualone, barbiturates, and propoxyphene; female specimens from Phoenix are not tested for methaqualone and barbiturates. Portland does not test adult or juvenile specimens for methadone, methaqualone, and propoxyphene. All positive results for amphetamines were confirmed by gas chromatography to eliminate positives that may be caused by over-the-counter drugs. For most drugs, the urine test can detect use in the previous 2 to 3 days. Exceptions are marihuana and PCP, which can sometimes be detected several weeks after use.

Table. DUF sample sizes, 1990

| City | Male | Female | Juvenile male |
| :---: | :---: | :---: | :---: |
| Atlanta, GA | 292 | 163 | (a) |
| Birmingham, AL | 729 | 320 | 198 |
| Chicago, IL | 891 | (b) | (a) |
| Cleveland, OH | 854 | 213 | 388 |
| Dallas, TX | 993 | 402 | (a) |
| Denver, CO | 946 | 381 | (a) |
| Detroit, MI | 818 | 353 | (a) |
| Fort Lauderdale, FL | 867 | 409 | (a) |
| Houston, TX | 1,000 | 411 | (a) |
| Indianapolis, IN | 792 | 361 | 402 |
| Kansas City, MO | 860 | 370 | 145 |
| Los Angeles, CA | 1,140 | 623 | 394 |
| Manhattan, NY | 1,021 | 274 | (a) |
| New Orleans, LA | 959 | 358 | (a) |
| Omaha, NE | 615 | (b) | (a) |
| Philadelphia, PA | 1,108 | 447 | (a) |
| Phoenix, AZ | 976 | 521 | (a) |
| Portland, OR | 815 | 313 | 290 |
| St. Louis, MO | 1,004 | 330 | 285 |
| San Antonio, TX | 796 | 349 | 150 |

| Washington, D.C. | 932 | 360 | 394 |

a Juvenile males not tested.
${ }^{5}$ Females not tested.

## Appendix 13

## Federal Criminal Case Processing

Methodology and definitions of terms

Note: The following was excerpted from U.S. Department of Justice, Bureau of Justice Statistics, Federal Criminal Case Processing, 1980-89, With Preliminary Data for 1990, NCJ-130526 (Washington, DC: U.S. Department of Justice, 1991), pp. 19-29; and
Compendium of Federal Justice Statistics, 1988, NCJ-130474 (Washington, DC: U.S. Department of Justice, 1991), pp. 57, 58, 113-119. Non-substantive editorial adaptations have been made.

## Methodology

The data are derived from the Bureau of Justice Statistics (BJS) Federal Justice Statistics database. The database is constructed from source files provided by the Executive Office for U.S. Attorneys, the Administrative Office of the United States Courts (AO), the Pretrial Services Agency, the U.S. Bureau of Prisons, and the U.S. Parole Commission.

Records in the Federal justice database are matched according to a statistically weighted combination of names, other personal identifiers, dates of court appearances, types of offenses, and other relevant information contained in the files. Using the matched data files, it is pessible to combine information about all stages of the processing of a criminal matter or case, from the prosecutor's decision of whether to file a criminal case, through adjudication, and, if the defendant is convicted, through prison and/or supervised release.

The unit of analysis is a combination of a person (or corporation) and a matter or case. For example, if a single person is involved in three different criminal cases during the time period specified in the table, he or she is counted three times in the tabulation. Similarly, if a single criminal case involves a corporate defendant and four individual defend ants, it is counted five times in the tabulation.

The offense classifications in the tables are based on the classification system used by the AO. Specific offenses in the AO classification are combined to form the BJS categories in the tables. These categories are designed to be as consistent as possible with BJS publications on State criminal justice systems. Offense categories for the average time served until first release data are based on offense designations by the Bureau of

Prisons. They are similar to the BJS categories but may not be directly comparable.

Where more than one offense is charged or adjudicated, the most serious offense, the one that may result in the most severe sentence, is used in the classification. The offense description may change as a case goes through the criminal justice process. Tables indicate whether charged or adjudicated offenses are used.

Data describing the number and rate of prosecutions and the results of magistrate proceedings include only those cases handled by U.S. Attorneys. Suspects are classified according to the most serious offense investigated. Data describing prosecutions by other agencies, including the Criminal Division of the U.S. Department of Justice, were not available. Data in all the remaining tables describe the processing of defendants in all court cases, regardless of the prosecuting agency.

The availability of particular items of information is affected by the data source. Data on prosecutors' decisions prior to court filing are provided for cases investigated by U.S. Attorneys, but not for those handled by the Criminal Division of the U.S. Department of Justice. Criminal Division cases enter the data base once they are filed in U.S. District Court, however. Many items of social and demographic information come from presentence investigation records or supervision records, and are available only for arrested defendants who were convicted and/or began serving a sentence involving supervised release. (This particularly affects ethnicity and occupational information.)

Sentencing figures differ from statistics published by the Administrative Office of the United States Courts for the average "regular" sentence imposed. "Regular" sentences exclude two categories of offenders included in the BJS calculations: offenders receiving a "split" sentence ( 5 days through 6 months followed by probation) and offenders sentenced under 18 USC 4205(b)(1) and (b)(2) (where a maximum term is set accompanied by no or a small minimum).

Tables concerning prisoners include only prisoners committed by U.S. District Courts for violations of the U.S. Code. Other pisoners, such as probation and parole violators, and other types of offenses, such as military, District of Columbia, or State offenses, are excluded. Unlike BJS publications concerning State prisoners, which exclude prisoners serving sentences under 1 year, these data include Federal prisoners who received sentences of any length.

Time served in prison is the number of months from the prisoner's arrival into custo-
dy of the Bureau of Prisons until first release from prison, plus any jail time served and credited. The calculation is the same as that currently used by the Bureau of Prisons. Because other publications may include different groups of prisoners, calculate time served differently, or use a different offense classification, these data may differ from estimates of time served in previous publications by the Bureau of Prisons or in publications based on other data sources.

These data are constructed to permit the user to make valid comparisons of numbers within each table and to compare pircentage rates across tables. The total numbers of su'ojects which are based on records linked between two files are generally less than the total number of records in either source file. Accordingly, comparisons of absolute numbers across two or more tables, or between these data and other data sources, are not necessarily valid.

The section below defines all offense categories used, citing the U.S. Code. "Racketeering and extortion" offenses include primarily prosecutions under the Racketeer Influenced and Corrupt Organizations (RICO) Act.
"Murder" includes nonnegligent homicide but excludes negligent homicide. "Other sex offenses" for the most part refer to violent offenses but may also include some nonviolent offenses. "Other property offenses" in" clude destruction of property and trespassing.

## Definitions of terms

Definitions of offense categories describe all offenses included in each category. Statutory sections are cited in parentheses at the end of each definition.

Agriculture violation--violation of the Federal statutes on agriculture and conservation, for example, violations of the Agricultural Acts, Federal Seed Act, Game Conservation Acts, Insecticide Act, and the Packers and Stockyards Act; also violation of laws concerning plant quarantine and the handling of animals pertaining to research (title 7 U,S.C. except sections on food stamps).

Antitrust-violation of Federal antitrust statutes (15 U.S.C. 1, 2, 3, 8, 13(A)-(F), 20, 24, 701, and 72).

Arson-willfully or maliciously setting, or attempting to set, fire to any property within the special maritime and territorial jurisdiction of the United States as defined in 18 U.S.C. 7(18 U.S.C. 81).

Assault-intentionally inflicting, attempting or threatening to inflict bodily injury to anyone within the special maritime and territorial jurisdiction of the United States as defined in 18 U.S.C. 7 or to any Governr יnt official, foreign official, official guest, internationally protected person, or any officer or employee of the United States designated in section 1114 of title 18; also certain violations
of the Fair Housing Law (18 U.S.C. 111, 112(A)-(C), 113(A)-(F), 114, 351(C)-(E), 372, 1501-2, 1751(E), 1991, 2231 (A)(B), and 2233; 21 U.S.C. $461(C), 675(A)(B)$, and 1041 (C); 26 U.S.C. $7212(A)(B) ; 42$ U.S.C. $3610(A)$, $3611(F)$, and $3631 ; 46$ U.S.C. 701(6); and 49 U.S.C. 1472(ki) and 1475(J)(k1)).

Bail-the sum of money promised as a condition of release, to be paid if a released defendant defaults (18 U.S.C. 3142(c)).

Bribery--offering or promising anything of value with intent to unlawfully influence a public official, bank employee, officer or employee of the U.S. Government, witness, or any common carrier as well as soliciting or accepting such an offer. Soliciting or receiving anything of value in consideration of aiding a person to obtain employment in the U.S. Government. Receiving or soliciting any remuneration, directly or indirectly, in cash or any kind in return for purchasing, ordering, leasing, or recommending to purchase any good, service, facility, or item for which payment may be made through Medical Assistance Programs. Bribing in sporting contests is also illegal (18 U.S.C. 201(A)-(I), 203-5, 207 (B)(C), 208-15, and 224; 21 U.S.C. 622; 26 U.S.C. 7214(A); 42 U.S.C. 1396H(B); 46 U.S.C. 239(I); and 49 U.S.C. $10(4), 917(B)$, and $1472(D))$.

Burglary--breaking and entering into another's property with intent to steal within the special maritime and territorial jurisdiction of the United States, as defined in 18 U.S.C. 7; also including breaking and entering into any official bank, credit union, savings and loan institution, post office, vessel or steamboat assigned to the use of mail service, or personal property of the United States or breaking the seal or lock of any carrier facility containing inter-State or foreign shipments of freight or express (18 U.S.C. 2111, 2113(A), and 2115-17).

Collateral Bond--an agreement made by a defendant as a condition of his or her pretrial release that requires the defendant to post property valued at the full bail amount as an assurance of his or her intention to appear at trial.

Conspiracy-an agreement by two or more persons to commit or to effect the commission of an unlawful act or to use unlawful means to accomplish an act that is not in itself unlawful; also any overt act in furtherance of the agreement. A person charged with conspiracy is classified under the substantive offense alleged.

Counterfeiting-falsely making, forging, or altering any obligation or security of the United States, foreign obligation or security, coin or bar stamped at any mint in the United States, money order issued by the Postal Service, domestic or foreign stamp, or seal of any department or agency of the United States. Passing, selling, attempting to pass or sell, or bringing into the United States any of the above falsely made articles. Making, sell-
ing, or possessing any plates or stones used for printing counterfeit obligations or securities of the United States, foreign obligations or securities, Government transportation requests, or postal stamps (18 U.S.C. 331, 471-74, 476-81, 485-88, 490, 492, 500-502, 506-7, and 509; 21 U.S.C. 458(C4) and 611(B4); 26 U.S.C. 5604(A4) and 7241; and 46 U.S.C. 410 ).

Deposit bond--an agreement made by a defendant as a condition of his or release that requires the defendant to post a fraction of the bail before he or she is released.

Detention--the legally authorized confinement of persons after arrest, whether before or during prosecution. Only those persons held 2 or more days are classified as detained.

Drug offenses--possessing or trafficking in (distributing, importing, and manufacturing) controlled substances. Also furnishing of fraudulent or false information concerning prescriptions as well as any other unspecified drug-related offense. (See specific offenses in this section for citations.)

Embezzlement--fraudulently misapplying property by a person to whom such property has been entrusted or into whose hands it has lawfully come where offense is committed by bank officers or employees; officers or employees of the Postal Service; officers of lending, credit, or insurance institutions; any officer or employee of a corporation or association engaged in commerce as a common carrier; court officers of the U.S. courts; or officers or employees of the United States. Embezzling, stealing, or knowingly converting to one's own use or the use of another or without authority selling, conveying, or disposing of any money, property, records, or thing of value to the United States or any department thereof (12 U.S.C. 630; 15 U.S.C. $645(\mathrm{~B})(\mathrm{C}) ; 18$ U.S.C. $332,334,641-$ $57,660,664,665(\mathrm{~A})(\mathrm{B}), 1025,1163,1709-11$ and 1721; 22 U.S.C. $1179 ; 29$ U.S.C. 501(C) and $502(B) ; 38$ U.S.C. 3501 ; and 42 U.S.C. 2703A, 2971F(A)(B), 3220(B), and 3791).

Escape--departing or attempting to depart from the custody of a correctional institution; a judicial, correctional, or law enforcement officer; or a hospital where one is committed for drug abuse and drug dependency problems. Knowingly advising, aiding, assisting, or procuring the escape or attempted escape of any person from a correctional facility, an officer, or the abovementioned hospital as well as concealing an escapee. Forcibly rescuing any person in an attempt to prevent execution or forcibly removing or attempting to remove the dead body of any executed offender in order to prevent an autopsy. Aiding or enticing any person belonging to the Armed Forces of a belligerent nation or fraction, who is interned in the United States in accordance with the law of nations, to escape or attempt to escape. Providing or attempting to provide to an inmate in prison a prohibited object or
making, possessing, obtaining, or attempting to make or obtain a prohibited object (as defined in section 1791C of title 18). Instigating, assisting, attempting to cause, or causing any mutiny or riot at any Federal penal, detention, or correctional facility or conveying into any of these institutions any dangerous instrumentalities (18 U.S.C. 751, 752(A)(B), 753-57, 1071-74,1791-92, 3150, and 4082(D); 42 U.S.C. 261 (B)(C) and 3425-26; and 50 U.S.C. 822-23).

Failure to appear--willful absence from any court appointment.

Felony-a criminal offense punishable by death or imprisonment for a term exceeding 1 year (18 U.S.C. 1).

Financial conditions--monetary conditions upon which release of a defendant before trial is contingent. Includes deposit bond, surety bond, and collateral bond (see individual definitions).

Food and drug violations--violations of the Federal Food and Drug Act (21 U.S.C. $16-17,20-23,62-63,104,111,115,117,120$, 122, 124, 126, 134(A)-(E), 141-45, 151-55, 157, 158, 201, 203, 205, 207, 209-12, 331 (A)-(G), $331(\mathrm{I} 2)(13), 331(\mathrm{~J})$-(P), 333(A)(B), 458(A1)-(A5), 459, 460(A)-(D), $461(A), 463,466(A), 610(A)(B)(B 2)(C)$, $611(A)(B 3), 620(D), 642,676(A), 1037$, $1041(A), 1175$, and $1175 F$; and 26 U.S.C. 4591, 4594(A)-(C), 4597(A), 4804(A2)(A4)(B), 4805(B), 4814(A1), $4815(\mathrm{~A})(\mathrm{B}), 4817,4833(\mathrm{~A} 2)(\mathrm{B})(\mathrm{C}), 4834(\mathrm{~A})$, 4841, 4862(B), 7234(A)(C)(D1)(D2A)(D2B) (D3)(D4), 7235(A)-(E), 7236, 72.64, 7265(A)(B), and 7266(A1)-(A3)(B)).

Forgery--falsely and with intent to defraud, making, counterfeiting, altering, or possessing with intent to pass off as genuine any U.S. Postal Service money order; postmarking stamp or impression; obligation or security of the United States; foreign obligation, security, or bank note; contractors' bond, bid, or public record; seal of a court or any department or agency of the U.S. Government; the signature of a judge or court officer; ships' papers; documents on entry of vessels; deed; power of attorney; customs matters; bond of distilleries; military or naval discharge certificate; coin or bar; and so forth. Also making, possessing, selling, or printing plates or stones for counterfeiting obligations or securities and receiving, possessing, concealing, selling, or disposing of any falsely made securities, tax stamps, or pledges that have crossed a State or the U.S. boundary after being stolen or unlawfully converted (18 U.S.C. 471-74, 478-79, 482-$85,493-98,500,503,505-8,1025,2314-15$, and 2318; 19 U.S.C. 1436; 21 U.S.C. 458(B)(C1)(C2), and 611(B1); 26 U.S.C. 5601(A4)(A5); 43 U.S.C. 1191-92; and 49 U.S.C. 1472(B)).

Fraud--unlawfully depriving a person of his or her property or legal rights through intentional misrepresentation of fact or deceit other than forgery or counterfeiting. Includes
violations of statutes pertaining to lending and credit institutions, the Postal Service, inter-State wire, radio, television, veterans benefits, allotments, bankruptcy, marketing agreements, commodity credit, the Securities and Exchange Commission, railroad retirement, unemployment, Social Security, false personation, citizenship, passports, conspiracy, and claime end statements, excluding tax fraud. The category excludes fraud involving tax violations that are shown in a separate category under "Public-order, other offenses." (See specific offenses in this section for citations.)

Gambling--transporting, manufacturing, selling, possessing, or using any gambling device in the District of Columbia or any possession of the United States or within Indian country or the special maritime and territorial jurisdiction of the United States as defined in section 7 of title 18. Also transporting gambling devices in the jurisdiction of the United States, except under authority of the Federal Trade Commission or any State that has a law: providing for their exemption from these provisions, transmitting wagering information in inter-State or foreign commerce, inter-State transporting of wagering paraphernalia, importing or transporting lottery tickets, or mailing lottery tickets or related matter. An employee of the Postal Service acting as a lottery agent is considered guilty of this offense (15 U.S.C. 1172-76; and 18 U.S.C. 1082(A)(B), 1084, 1301-3, 19533, and 1955).

Hispanic--ethnic category based on classification by reporting agency. Hispanic persons may be of any race.

Immigration offenses--offenses involving illegal entrance into the United States, illegally reentering after being deported, willfully failing to deport when so ordered, or willfully remaining beyond days allowed on conditional permit. Falsely representing oneself to be a citizen of the United States or counterfeiting any visa, permit, or other document to enter the United States as well as violating any of the provisions for travel of citizens or aliens during war or national emergency. Also bringing in or harboring any aliens not duly admitted by an immigration officer (8 U.S.C. 331, 333-34, 338-39, 1185(C), 1252(D)(E), 1282(A)(C), 1286-87, 1321, and 1324-26; and 18 U.S.C. 911 and 1546).

Incarceration--any sentence of confinement, including prison, jail, and other residential placements.

Kidnaping--unlawfully seizing any person, within the special maritime and territorial jurisdiction of the United States as defined by section 7 of title 18 , for ransom or reward, except in the case of a minor by a parent. Also receiving, possessing, or disposing of any money or other property that has been delivered as ransom or reward in connection with a kidnaping as well as conspiring to kidnap. This offense include kidnap-
ing or attempting to kidnap any Government official, the President of the United States, the President-elect, the Vice President, any foreign official, any official guest, or any internationally protected person (18 U.S.C. $351(B)-(D), 1201-2$, and 1751(B)-(C)).

Labor law violations--violations of the Fair Labor Standards Act, the Taft-Hartley Act (labor-management relations), the Byrnes Act (transportation of strikebreakers), laws regarding the 8 -hour day on public works, and peonage laws (18 U.S.C. 1231 and 1581-88; 29 U.S.C. 162, 186(A), 206-7, 211 (C)(D), 212, 214-15, 216(A), 439(A)-(C), $463(B), 503(C), 504(B)$, and 1131 ; and 40 U.S.C. 321-22).

Larceny-taking and carrying away with intent to steal any personal property of another, within the special maritime and territorial jurisdiction of the United States, as defined in 18 U.S.C. 7. Stealing, possessing, converting to one's own use, or illegally selling or disposing of anything of value to the United States or any of its departments or agencies or any property made or being made under contract for the United States or any of its departments or agencies. Stealing anything of value (in excess of \$100) from a bank, the Postal Service, or any inter-State or Foreign shipments by carrier. Receiving or possessing stoien property or pirate property. Stealing or obtaining by fraud any funds, assets, or property that are the subject of a grant, contract, or other form of assistance, whether received direcily or indirectly, from the Law Enforcement Assistance Administration or that belong to or are entrusted to the custody of an Indian tribal organization. This offense category excludes the transportation of stolen property ( 18 U.S.C. $641,659,661-$ $62,1024,1163,1660,1702,1704,1707-8$, and $2113(B)(C) ; 42$ U.S.C. 3791 ; and 49 U.S.C. $1472(\mathrm{~K} 1)$ ).

Liquor violations--violations of Internal Revenue Service laws on liquor as well as violations of liquor laws not cited under these laws, such as smuggling goods into the United States; dispensing or unlawfully possessing intoxicants in Indian country; transporting intoxicating liquors into any State, territory, district, or possession where sale is prohibited; shipping packages containing unmarked and unlabeled intoxicants; failing to declare liquor at customs; shipping liquor by C.O.D.; knowingly delivering a liquor shipment to someone other than to whom it has been consigned; and violating in any way the Federal Alcohol Administration Act (18 U.S.C. 545, 1154-56, and 1262-65; 19 U.S.C. 1461; 26 U.S.C. 5061 (B), 5113 (A), 5115 , 5171(A), 5179(A)-80, 5214(A), 5221(A), $5273(\mathrm{~B}), 5291(\mathrm{~A}), 5301(\mathrm{~A})-(\mathrm{C}), 5601(\mathrm{~A} 1)-$ (A4)(A6)-(A14), 5602, 5603(A)(B), $5604(\mathrm{~A} 1)-$ (A3), (A6)-(A13)(A15)-(A19), 5605-7, 5608(A)(B), 5661(A)(B), 5662, 5671-72, 5674, 5676(1-3)(5), $5681(\mathrm{~A})-(\mathrm{C}), 5682-83$, $5685(\mathrm{~A})(\mathrm{B}), 5686-87,5689$, and $5691(\mathrm{~A})$; and

27 U.S.C. 203, 205(E)(F), 206(A)(B), 207, and $208(A)(D)$ ).

Mailing or transportation of obscene materials-knowingly using the mail for mailing obscene or crime-inciting matter, as defined in 18 U.S.C. 1481 and 39 U.S.C. 3001 (E). Also transporting for sale or distribution, importing, or transporting any obscene matter in inter-State or foreign commerce (18 U.S.C. 1461-63, 1465, and 1718).

Migratory birds offenses--taking, killing, or possessing migratory birds, or any part, nest, or egg thereof, in violation of Federal regulations or the transportation laws of the State, territory, or district from which the bird was taken. Misuse or nonuse of a migratory-bird hunting and conservation stamp. Violation of the regulations of Bear River Refuge in Utah and Ouachita National Forest sanctuary and refuge in Arkansas and Oklahoma (16 U.S.C. 690(D)(G), 693A, 701, 703-6, 707(A)(B), 708-11, and 718(A)(E)(G)).

Misdemeanor--a criminal offense punishable by a jail term not exceeding 1 year and any offenses specifically defined as a misdemeanor by the Administrative Office of the U.S. Courts for the purposes of data collection. (This category includes offenses previously called minor offenses that were reclassified under the Federal Magistrates Act of 1979.)

Mixed sentence--a sentence requiring the convicted offender to serve more than 6 months of incarceration, followed by a term of probation. Unless otherwise noted, offenders receiving mixed sentences are included in both incarceration and probation categories.

Most serious offense-the offense with the greatest potential penalty.

Motor carrier violations--violations of the Federal statutes listed below concerning the Motor Carrier Act (15 U.S.C. 1986, 1990, and 1990(C); and 49 U.S.C. 1(7)(17)(20), $10(1), 15(11)(12), 41(1), 46,301-4$, 322(A)(D), 917(A)(E)(F), 1021(A)(B)(E)(F), and $1159(A)$ ).

Motor vehicle theft--inter-State or foreign transporting, receiving, concealing, storing, bartering, selling, or disposing of any stolen motor vehicle or aircraft (18 U.S.C., 2312 and 2313 ; and 49 U.S.C. 1472I, I1A, 11B, NA, and NB).

Murder--committing or attempting to commit murder (first or second d.egree) or voluntary manslaughter within thi special maritime and territorial jurisdiction of the United States (18 U.S.C. 7). Killing or attempting to kill any Government official, the President of the United States, the Presidentelect, the Vice President, any officers and employees of the United States, any foreign officials, any official guests, or any internationally protected persons. As applied to the owner or charterer of any steamboat or vessel, knowingly and willfully causing or allowing fraud, neglect, misconduct, or violation of any law resulting in loss of life (18 U.S.C. $351(A), 1111-16,1751(A)$, and

2113(E); 21 U.S.C. 461 (C) and 675(C); 49 U.S.C. 1472(K1)).

National Defense Violations--violations of the national defense laws on the Selective Service Acts, the Defense Production Act, the Economic Stabilization Act of 1970 (which includes prices, rents, and wages), the Subversive Activities Centrol Act, alien registration, treason (including espionage, sabotage, sedition, and the Smith Act), curfew and restricted areas, exportation of war materials, trading with an enemy, and use of uniform and any other violations of the Federal statutes concerning national defense ( 50 U.S.C. 210, 321-29, and 824; 50 A U.S.C. 327, 462, 468, and 2061-66; 8 U.S.C. 1304 (d-e), 1306 (a-d); and 18 U.S.C. 792-95, 797-99, 953, 2153 (a-b), 2154 (a-b), 2156 (a-b), 2381, 2384-90; and 42 U.S.C. 2273, 2274 (a-b), 2275-77, 2278 A (b), 2278 A (c)(b), and 2462 (g)).

Negligent manslaughter--causing the death of another, within the special maritime and territorial jurisdiction of the United States as defined in 18 U.S.C. 7, by wanton or reckless disregard for human life. Also negligent manslaughter of any Government official, the President of the United States, the Presidenielect, the Vice President, any officers and employees of the United States, any foreign officials, and official guests, or any internationally protected persons. This offense category also includes misconduct, negligence, or inattention to duties by ship officers on a steamboat or vessel resulting in death to any person (18 U.S.C. 351(A), 1112, 111416, and $1751(\mathrm{~A})$; and 49 U.S.C. $1472(\mathrm{~K} 1)$ ).

Offense--violation of U.S. criminal law. Where more than one offense is charged, the offense with the greatest potential penalty is reported.

Other property offenses-offenses that involve the destruction of property moving in inter-State or foreign commerce in the possession of a common or contract carrier. The malicious destruction of Government property, or injury to U.S. postal property such as mailboxes or mailbags. Trespassing on timber and Government lands is also included in this category of offenses (15 U.S.C. 1281; 16 U.S.C. 3, 9A, 45A, 45C-E, 114, 121$24,146,152,163,171,403 \mathrm{H}-4,413,430 \mathrm{H}$, $430 \mathrm{Q}, 430 \mathrm{~V}, 460 \mathrm{~K}-3,460 \mathrm{~N}-3,460 \mathrm{~N}-5,460 \mathrm{~N}-$ 7, 471, 476-78, 478A, 479, 481-82, 551, and 604-6; 18 U.S.C. 1164, 1361-64, 1705-6, 1851-63, 2071(A)(B), and 2072; 24 U.S.C. 286; 40 U.S.C. $53,101,193(E)$ (O)(P)-(R), and 318(C); and 43 U.S.C. 316K).

Other public-order offenses--violations of laws pertaining to abortion; bigamy; disorderly conduct on the U.S. Capitol grounds; civil disorder; hunting, trapping, or fishing on Indian lands or military areas and zones; and obscene or harassing telephone calls (18 U.S.C. 231, 1165, 1384-85, and 2101; 40 U.S.C. 193(B)-(D)(F)(G)(O)(P); and 47 U.S.C. 223). Included in "public-order, nonregulatory offenses" (q.v.).

Other regulatory oftenses--violations of civil rights' election laws, the Communication Act (including wire tapping and wire interception), contempt, laws regarding congressional contempt, custom laws (except narcotics and liquor), importation of injurious animals and birds, inter-State commerce (the Connally Act, Hot Oil Act, transportation or importation of prison-made goods, and the Railroad and Transportation Act), maritime and shipping laws, laws regarding stowaways, the Federal Boat Safety Act of 1971 , the Federal Water Pollution Control Act, U.S. postal laws (excluding injury to postal property), intimidation of witness laws, aircraft reguiations, explosives (except in vessels), the Gold Acts, train wrecking, and any other regulatory offenses not listed above. (For citations refer to the United States Title and Code Criminal Offense Citations, Administrative Office of the United States Courts, September 1982.)

Other sex offenses--transporting, coercing, or enticing any women to go from one place to another in inter-State or foreign commerce, in the District of Columbia, or in any territory or possession of the United States with the intent and purpose to engage in prostitution, debauchery, or any other immoral purpose. Importing, maintaining, or harboring any women for purposes of prostifution or debauchery or for any other immoral purpose. These offenses may be either violent or nonviolent (8 U.S.C. 1328 and 18 U.S.C. 2421-24).

Perjury--knowingly or willfully giving false evidence or swearing to false statements under oath or by any means procuring or instigating any person to commit perjury. Making any false material declarations under oath in any proceeding before or ancillary to any court or grand jury of the United States. This offense also includes any officers and employees of the Government listed under 13 U.S.C. 21-25 who willfully or knowingly furnish or cause to be furnished any false information or statement (8 U.S.C. 1357(B), 13 U.S.C. 213, 18 U.S.C. 1621-23, and 22 U.S.C. 1203).

Personal recognizance--pretrial release condition in which the defendant promises to appear at trial and no financial conditions are required to be met.

Possession--acquiring a controlled substance by misrepresertation or fraud, attempting or conspiring to possess, or simple possession of a controlled substance in schedules I-V (as defined by 21 U.S.C. 812). Also possession of a controlled substance in schedule I or II or a narcotic drug in schedule III or IV on board a vessel of the United States or vessels within custom waters of the United States or by any citizen of the United States on board a vessel. Possessing any punch, die, plate, stone, or any other thing designed to reproduce the label upon any drug or container is an offense under this category. Distributing a small amount of
marihuana for no remuneration is treated as simple possession and, therefore, is included in this offense category (21 U.S.C. 843 (А3)(A5), 844(A), 846, 955, and 962-63).

Pretrial release-the release of a defendant from custody, for all or part of the time before or during prosecution. The defendant may be released either on personal recognizarce, unsecured bond or on financial conditioris. The category includes defendants released within 2 days after arrest and defendants who were initially detained but subsequently released after raising bail or having release conditions changed at a subsequent hearing.

Property offenses, fraudulent--property offenses involving the elements of deceit or intentional misrepresentation. Specifically includes embezzlement, fraud (excluding tax fraud), forgery, and counterfeiting.

## Property offenses, non-irau-

duient--violent offenses against property; burglary, larceny, motor vehicle theft, arson, transportation of stolen property, and other property offenses (destruction of property and trespassing). These offenses are termed "non-fraudulent" only for the purpose of distinguishing them from the category "property offenses, fraudulent," above.

Public-order, non-regulatory of-fenses--offenses concerning weapons; immigration; tax law violations (tax fraud); bribery; perjury; national defense; escape; racketeering and extortion; gambling; liquor; mailing or transporting of obscene materials; traffic; migratory birds; conspiracy, aiding and abetting, and jurisdictional offenses; and "other public-order offenses" (q.v.). These offenses are termed "non-regulatory" only for the purpose of distinguishing them from the category "public-order, regulatory offenses," below.

Public-order, regulatory of-fenses--violations of regulatory laws and regulations in agriculture, antitrust, labor law, food and drug, motor carrier, and other regulatory offenses that are not specifically listed in the category "public-order, non-regulatory offenses" above.

Racketeering and extortion--using inter-State or foreign commerce or any facility in inter-State or foreign commerce to aid racketeering enterprises such as arson, bribery, gambling, liquor, narcotics, prostitution, and extortionate credit transactions. For officers or employees of the United States, or anyone representing himself or herself as such, obtaining property or money from another, with his or her consent induced by actual or threatened force, violence, blackmail, or unlawful interference with employment or business. Transmitting by inter-State commerce or through the mail any threat to injure the property, the person, or the reputation of the addressee or of another or to kidnap any person with intent to extort (i8 U.S.C. 872-74, 875(A-D), 876-77, 892-94, 1951-52, 1954, 1962(A-D), and 1963; 19
U.S.C. 60; 27 U.S.C. 205(C); and 42 U.S.C. 2703(B)).

Rape--rape, assault with intent to commit rape, and carnal knowledge of a female under 16 who is not one's wife, within the territorial and special maritime jurisdictions of the United States as defined in 18 U.S.C. 7(18 U.S.C. 113(A), and 2031-32; and 49 U.S.C. 1472(K1)).

Robbery--taking anything of value from the person or presence of another by force or by intimidation, within the special maritime and territorial jurisdiction of the United States (18 U.S.C. 7). Also robbery of bank property, U.S. postal properiy, or personal property of the United States. Also assaulting or putting the life of any person in jeopardy by the use of a dangerous weapon while committing or attempting to commit such robbery (18 U.S.C. 113(B), 1661, 1991, 2111-12, $2113(A)(D)(E)$, and 2114; and 49 U.S.C. 1472(K1)).

Split sentence--a sentence requiring the convicted person to serve a period of confinement of 6 months or less, followed by a period of probation. Unless otherwise noted, convicted offenders receiving split sentences are included in both the incarceration and probation categories.

Sentence--sanction imposed on a convicted offender. For sentences to incarceration, the maximum time the offender may be held in custody is reported.

Surety bond--an agreement by the defendant as a condition of his or her release that requires a third party (usually a bail bondsman) to promise to pay the full bail amount in the event that the defendant fails to appear.

Suspect--a person who is under investigation or interrogation as a likely perpetrator of a specific criminal offense.

Tax law violations--tax fraud offenses such as income tax fraud; evading or defeating tax; willful failure to file; fraudulently withholding on exemption certificate or failing to supply information; counterfeiting any stamps with intent to defraud the collection or payment of tax; willful failure to collect or pay tax; putting fraudulent or false statements on tax returns; failure to obey summons to produce any papers concerning taxes; preparers of returns disclosing or using any information for any purpose other than to assist in preparing returns; failing to furnish receipts for employees of tax withheld; failing to furnish information relating to certain trusts, annuity, and bond purchase plans; and not obtaining a license for a business that makes a profit from foreign items. Also included in this offense category are violations of excise and wagering tax laws and any other laws listed below from the internal Revenue Service title (26 U.S.C. 3402, 441112, 4918(E)(H), 4919(B2), 5751(A1)(A2), 5752(A)-(D), 5762(A1)-(A11)(B), 6047(A)-(C), 6051, 6056, 6331, 6420(E2), 6421(F2), 6424(D2), 6427(E2), 6674, 7001, 7121-22,

7201-5, 7206(1)-(4)(5A)(5B), 7207, 7208(1), 7210, 7213(A1)-(A3)(B)-(D), 7215(A), 7216, 7231-32, 7322(2), 7261-62, 7272(A), 7512, 7513(B), 7602-3, and 7604(B); and 50A U.S.C. 243(A)).

Technical violation-failure to comply with any of the conditions of pretrial release, probation, or parole, excluding alleged new criminal activity. May result in revocation of release status. Examples of conditions that may be imposed and then violated include remaining within a specified jurisdiction, or appearing at specified intervals for drug tests.

Threats against the President--knowingly and wilffully depositing in the mail, at any post office, or by any letter carrier a letter, paper, writing, print, missive, or document containing any threat to take the life of or to inflict bodily harm upon the President, Vice President, or any other officer in order of succession to the Presidency. Knowingly and willfully making such threats in any way to the above-named people (18 U.S.C. 871).

Traffic offenses--driving while intoxicated or any moving or parking violations on Federal lands (40 U.S.C. 212 B).

Trafficking-importing any controlled substance in schedule I, II, III, IV, or V (as defined by 21 U.S.C. 812). Manufacturing, distributing, selling, or possessing with intent to manufacture, distribute, or sell a controlled s'jostance or a counterfeit substance. Exporting any controlled substance in schedules 1 V. Manufacturing or distributing a controlled substance in schedule 1 or II for purposes of unlawful importation. Making or distributing any punch, die, plate, stone, or any other thing designed to reproduce the label upon any drug or container or removing or obliterating the label or symbol of any drug or container. Obtaining a prescription of a controlled substance in schedule III or IV without a written or oral prescription. Distributing for reasons other than medical a controlled substance in schedule V. Illegally crossing the border if the individual is addicted to or using drugs or has been convicted of any violation of narcotics or marihuana laws ( 18 U.S.C. 1407; and 21 U.S.C. 825(A)-(D), 829(B)(C), 841 (A)(B1A)(B2)-(B4), 842(A4)-(A8), 843(A1)(A2)(A5)(B), 845(A)(B), 846, 952(A)(B), 953(A)(C)(E), 954-55, 957, 959, 960(A1)(B2), 961(2), and 962-63).

Transportation of stolen property-transporting, seiling, or receiving stolen goods, stolen securities, stolen moneys, stolen cattle, fraudulent State tax stamps, or articles used in counterfeiting if the above articles or goods involve or constitute inter-State or foreign commerce (18 U.S.C. 2314-17).
U.S. Attorneys--all United States Attorneys. Prosecutorial data in this compendium come from the Docket and Reporting System of the Executive Office for U.S. Attorneys.

Unsecured bondi-an agreement by the defendant as a condition of his or her release in which the defendant agrees to pay full
bond amount in the event of nonappearance at trial, but is not required to post security as a condition to release.

Violation (of pretrial release, probation, or parole)--allegation of a new crime or a technical violation while on pretrial release, probation, or parole.

Violent offenses--threatening, attempting, or actually using physical force against a person. Includes murder, negligent manslaughter, assault, robbery, rape, other sex offenses (some of which may be nonviolent), kidnaping, and threats against the President. (See specific offenses for citations.)

Weapons violations--violations of any of the provisions of sections 922 and 923 of title 18 concerning the manufacturing, importing, possessing, receiving, and licensing of firearms and ammunition. Manufacturing, selling, possessing, or transporting (within any territory or passession of the United States, within Indian country, or within the special maritime and territorial jurisdiction of the United States) (18 U.S.C. 7) any switchblade knife. Engaging in importing, manufacturing, or dealing in firearms if not registered with the secretary in the Internal Revenue Service District In which the business is conducted or not having paid a special occupational tax. Carrying on the U.S. Capitol grounds or within U.S. Capitol buildings any firearm, dangerous weapon, explosive, or incendiary (2 U.S.C. 167(D); 15 U.S.C. 124243; 18 U.S.C. 922(A)-(M), 923, and 924(A)(C); 18A U.S.C. 1202(A1)-(A5), (B1)(B5); 26 U.S.C. 5801-2, 5811-12, 5821-22, 5841-44, 5851, $5861(A)$-(L), and 5871 ; 40 U.S.C. 193F(A); and 49 U.S.C. 1472(L1)(L2)).

## Appendix 14

Felony Sentences in State Courts, 1988
Definitions of terms and survey sampling procedures

Note: The following information has been excerpted from the U.S. Department of Justice, Bureau of Justice Statistics, Felony Sentences in State Courts, 1988 (Washington, DC: U.S. Department of Justice, December 1990), pp. 7-11. Non-substantive editorial adaptations have been made.

## Crime definitions

Before the sample was drawn, eight crime categories were defined. State penal codes, restricted to those defined as felonies and most closely conforming to each of the eight definitions, were identified. Convicted felons were placed into appropriate categories based on their penal code citations. The eight definitions are the following:

## Murder and nonnegligent manslaugh-

 ter--Murder is (1) intentionally causing the death of another person without extreme piovocation or legal justification or (2) causing the death of another while committing or attempting to commit another crime. Nonnegligent (or voluntary) manslaughter is intentionally and without legal justification causing the death of another when acting under extreme provocation. The combined category of murder and nonnegligent manslaughter excludes involuntary or negligent manslaughter, conspiracies to commit murder, solicitation of murder, and attempted murder.Rape--Forcible intercourse (vaginal, anal, or oral) with a female or male. Includes forcible sodomy and penetration with a foreign object (both of which are sometimes called "deviate sexual assault"); excludes statutory rape or any other nonforcible sexual acts with a minor or with someone unable to give legal or factual consent. Includes attempts.

Robbery--The unlawful taking of property that is in the immediate possession of another, by force or the threat of force. Includes forcible purse snatching but excludes nonforcible purse snatching, which is classified as larceny/theft. Includes attempts.

Aggravated assault--(1) Intentionally and without legal justification causing serious bodily injury, with or without a deadly weapon or (2) using a deadly or dangerous weapon to threaten, attempt, or cause bodily injury, regardless of the degree of injury if any. Includes "attempted murder," "aggravated battery," "felonious assault," and "assault with a deadly weapon."

Burglary--The unlawful entry of a fixed structure used for regular residence, industry, or business, with or without the use of force, to commit a felony or theft. Includes attempts.

Larceny and motor vehicle theft--Larceny is the unlawful taking of property other than a motor vehicle from the possession of another, by stealth, without force or deceit. Includes pocket picking, nonforcible purse snatching, shoplititing, and theits from motor vehicles. Excludes receiving and/or reselling stolen property (fencing) and thefts through fraud or deceit. Includes attempts. Motor vehicle theft is the unlawful taking of a self-propelled road vehicle owned by another. Includes the theft of automobiles, trucks, and motorcycles but not the theft of boats, aircraft, or farm equipment (which is classified as larceny/theft). Also includes receiving, possessing, stripping, transporting, and reselling stolen vehicles and unauthorized use of a vehicle (joyriding). Includes attempts.

Drug trafficking--Includes manufacturing, distributing, selling, smuggling, or "possession with intent to sell." Includes attempts.

Other felonies--All felony offenses not listed above. Includes drug possession, forgery or fraud, weapon possession, negligent manslaughter, receiving stolen property, driving while intoxicated or other traffic offenses, statutory rape, and sexual assault (excluding rape). Includes attempts.

## Survey sampling procedures

A sample of 300 counties was drawn for the 1988 National Judicial Reporting Program (NJRP) survey. Every county in the Nation had a nonzero probability of being in the sample. In general, the more felony cases a county had, the more likely it was to be in the sample.

The survey used a two-stage, stratified cluster sampling design. In the first stage the Nation's 3,109 counties or county equivalents were divided into 8 strata. Strata 1 and 2 consisted solely of the 75 largest counties in the United States as defined by the 1985 resident population. Strata 3 through 8 consisted of the remaining 3,034 counties.

Because the 75 largest counties account for a disproportionately large amount of serious crime in the Nation, they were given a greater chance of being selected than the remaining counties.

Stratum 1 consisted of both the 19 counties with the largest number of felony convictions in 1985, and 12 counties whose participation in the survey had been prearranged. Every county in stratum 1 was selected for the sample.

Stratum 2 consisted of the 44 most populous counties that were not in stratum 1. The 44 were ordered by their number of felony convictions in 1985, and then approximately every other county was selected. Stratum 2 thus contributed 23 counties to the sample. Altogether, 54 out of the 75 largest counties were sampled. Data on 1985 felony convictions were obtained from a mail survey described in State Felony Courts and Felony Laws (NCJ-106273) and Census of State Felony Courts, 1985 (codebook for ICPSR 8667). The 54 sampled counties in the 1988 NJRP survey were the same 54 as in the 1986 survey.

The 3,034 counties not among the 75 largest were placed into 6 strata defined by the total number of felony convictions in 1985 and then arrayed within stratum by region, and within region from largest to smallest on felony conviction totals. Sampling specifications for the 6 strata are given in Table 1.

The final sample thus included 246 counties from among the 3,034 counties outside the 75 largest. Case-level data were successfully obtained on convicted felons sentenced in 1988 from all 300 sampled counties.

The 60 sampled counties in strata 1 and 3 were self-representing only, and their sampled cases therefore had a first-stage sampling weight of 1 . The remaining 240 counties sampled from strata 2 and 4 through 8 were selected to represent their respective stratum so that the felony conviction cases sampled had first-stage weights greater than 1.

The smallest courty in the sample had a 1988 resident population of about 1,500 persons; the largest county had 8.6 million. Every State except. Vermont had a county in the sample. The number of sentenced felons ranged from a low of 0 in 2 counties to a high of 29,000 in the largest county.

At the second stage of sampling, a systematic sample of felons sentenced for murder/nonnegligent manslaughter, rape, robbery, aggravated assault, burglary, felony larceny/motor vehicle theft, drug trafficking, and other offenses was selected from each county's official records. The total sample numbered 80,930 cases. Of these, 52,346 cases were in the 75 largest counties.

Rates at which cases were sampled varied by stratum and crime type. In smaller counties every felony case was taken. In larger counties all murder cases and rape cases were typically included, but other offense categories were sampled.

Before the sample of cases was drawn, each felon sentenced in the sampled county in 1988 was placed into one of the eight offense categories identified above. Any person
convicted of multiple offenses that included any of the Federal Bureau of Investigation's Index crimes received the offense designation of the most serious Index crime. Drug trafficking was the designation only if the person was not also convicted of one of the Index crimes. These procedures gave each sentenced felon a single chance to be in the sample. An exception would have occurred if a felon appeared in court on more thar 1 day for different offenses and received a sentence at each reappearance.

The survey targeted and recorded initial sentences imposed in 1988. If a sentence was imposed on one date and then modified at a later date, the revision was ignored. The survey recorded sentences that were actually executed, not suspended sentences.

Because the year of conviction was not a defining characteristic, some cases in the sample were of persons convicted before 1988 but not sentenced untll 1988.

In a few counties, where it was impractical to target sentences in 1988, the target was felons convicted in 1988. In some of the cases the data relate to sentences imposed after 1988.

## Sources of data

For 76 percent of the 300 counties sampled, NJRP data were obtained directly from the State courts. Other sources included prosecutor offices ( 6 percent) and courts and prosecutor offices combined (3 percent). Individual-level NJRP records were obtained through a variety of collection methods, including magnetic tape ( 25 percent of the counties), printouts and other documents (36 percent), manually completed forms (18 percent), and field collection ( 20 percent).

Data collection for 233 counties was performed by the U.S. Bureau of the Census and for 67 counties by the National Association of Criminal Justice Planners.

## Sampling error

NJRP data were obtained from a sample and not from a complete enumeration. Consequently they are subject to sampling error. A standard error, which is a measure of sampling error, is associated with each number reported. In general, if the difference between two numbers is at least twice the standard error of that difference, there is at least 95 percent confidence that the two numbers do in fact differ; that is, the apparent difference is not simply the result of surveying a sample rather than the entire population.

National estimates of the number of convictions for individual crime categories and for
the aggregate total had a coefficient of variation of 3 percent.

## Missing data

Computations of statistics excluded sample cases that were missing data for the particular variables being tabulated. An exception was table 5.63 , which is based on computations that redistributed cases with missing data according to the distribution of the known cases.

Table 1. Sampled counties for NJRP, 1988

| Stratum | Total number of counties | Number of convictions in each county | Sampling rate | Number of countles sampled |
| :---: | :---: | :---: | :---: | :---: |
| 3 | $29^{\text {a }}$ | 2,000 or more | 1 in 1 | 29 |
| 4 | 71 | 950 to 1,99s | 1 in 2 | 34 |

## Appendix 15

## Felony Defendants in Large Urban

Counties, 1988 Survey methodology, definitions of terms, and crimes within offense categories

Note: The following information has been excerpted from U.S. Department of Justice, Bureau of Justice Statistics, Felony Defendanis in Large Urban Counties, 1988 NCJ122385 (Washington, DC: U.S. Department of Justice, 1990), pp. 1-3; and Pretrial Release of Felony Defendants, 1988, Bulletin NCJ-127202 (Washington, DC: U.S. Department of Justice, February 1991), p. 10. Non-substantive editorial adaptations have been made.

## Methodology

The National Pretrial Reporting Program (NPRP) conducted its initial survey from February 1988 to February 1989 to describe the criminal justice process from arrest to case disposition. NPRP used a sample of cases designed to represent the Nation's 75 most populous counties (by 1985 estimates). Almost half of all reported U.S. crimes in 1985 occurred in these counties.

The sample was designed and selected by the U.S. Bureau of the Census. It is a twostage stratified sample with 40 of the 75 most populous counties selected at the first stage (one county had to be dropped from the sample at which point no site could be substituted for it), and a systematic sample of felony filings (defendants) within each county selected at the second stage.

The 40 counties were divided into 4 firststage strata, based on court filing information obtained through a telephone survey. Fourteen counties were included in the sample with certainty because of their large number of court filings. The remaining 26 counties were allocated to the 3 non-certainty strata based on the variance of felony court dispositions.

The second-stage sampling (filings) was designed to represent all defendants who had felony cases filed with the court during the month of February 1988. The participating jurisdictions included every defendant who had a felony case filed on selected days during that month. The number of days selected depended on the stage-one stratum in which the county had been placed. One week's worth of filings were selected in the first two strata, 2 weeks of filings in the third stratum, and all felony filings for the month
were selected from jurisdictions in the fourth stratum.

Data on 11,063 sample falony cases were collected from the 39 sampled jurisdictions. This sample represented more than 47,000 weighted cases filed during the month of February 1988 in the 75 most populous counties. Cases that, because of incomplete information, could not be classified into one of the four major crime categories (violent, property, drug, public-order) were omitted from the analysis. This reduced the weighted total to 46,921 cases. The data collection effort was supervised by the Pretrial Services Resource Center in Washington, D.C.

Data were collecied from the following participating counties: Arizona (Maricopa); California (Los Angelles, Orange, Sacramento, San Bernardino, San Diego, Santa Clara); District of Columbia; Florida (Broward, Dade, Duval, Hillsborough, Palm Beach, Pinellas); Georgia (Fulton); Hawaii (Honolulu); Illinois (Cook); Massachusetts (Suffolk); Michigan (Wayne); Missouri (St. Louis); New Jersey (Essex); New York (Bronx, Erie, Kings, Monroe, New York, Queens); Ohio (Hamilton); Pennsylvania (Allegheny, Montgomery, Philadelphia); Tennessee (Shelby); Texas (Dallas, Harris, Tarrant); Utah (Salt Lake); Virginia (Fairfax); Washington (King); Wisconsin (Milwaukee).

## Definitions of terms

## Terms relating to pretrial release

Released defendant-Any defendant who was released from custody prior to the disposition of his or her case by the court. Includes defendants who swere detained for some period of time before being released and defendants who were returned to custody after being released because of a violation of the conditions of pretrial release.

Detained defendant--Any defendant who remained in custody from the time of arrest until the disposition of his or her case by the court. Includes defendants whose cases were disposed of in such a short time that they had no opportunity for pretrial release. Detained defendants are also referred to as "not released."

Failure to appear--When a court issues a bench warrant for a defendant's arrest because he or she has missed a scheduled court appearance.

## Type of financial release

Full cash bond--The defendant posts the full bail amount in cash with the court. If the defendant makes all court appearances, the cash is returned to him or her. If the defendant fails to appear in court, the bond is forfeited.

Deposit bond--The defendant deposits a percentage (usually 10 percent) of the full
bail amount with the court. The full amount of the bail is required if the defendant fails to appear in court. The percentage bail is returned after the disposition of the case, but the court often retains 1 percent for administrative costs.

Surety bond--A third party, usually a bail bondsman, signs a promissory note to the court for the full bail amount and charges the defendant a fee for the service /usually 10 percent of the full ball amount). If the defendant fails to appear, the bondsman must pay the court the full bail amount. Frequently the bondsman requires the defendant to post collateral in addition to the fee.

## Type of nonfinancial release

Unsecured bend--The defendant pays no money to the court but is liable for the full amount of bail should he or she fail to appear in court.

Release on recognizance--The court releases the defendant on the promise that he or she will appear in court as required.

Citation release--Arrestees are released pending their first court appearance on a written order issued by law enforcement personnel.

## Offense categories

Felony offenses were classified into 12 categories. These categories were further divided into the four major crime categories of violent offenses, property offenses, drug offenses, and public-order offenses. The following listings contain a representative summary of most of the crimes contained in each category; however, these lisis are not meant to be exhaustive. All offenses, except murder, include attempts and conspiracies to commit.

## Violent offenses

Murder--Includes homicide, nonnegligent manslaughter, and voluntary homicide. Does not include attempted murder (which is classified as felony assault), negligent homicide, involuntary homicide, and vehicular manslaughter (which are classified as "other violent crime").

Rape--Includes forcible intercourse, sodomy, or penetration with a foreign object. Does not include statutory rape or nonforcible acts with a minor or someone unable to give legal consent, nonviolent sexual offenses, and commercialized sex offenses.

Robbery--Includes the unlawful taking of property by force or threat of force.

Assault--Includes aggravated assault, aggravated battery, attempted murder, assault with a deadly weapon, felony assault or battery on a law enforcement officer, or other felony assaults. Does not include extortion, coercion, or intim:dation.

Other violent offenses--Includes vehicular manslaughter, involuntary manslaughter, negligent or reckless homicide, nonviolent or nonforcible sexual assault, kidnaping, unlawful imprisonment, child or spouse abuse, cruelty to child, reckless endangerment, hit and run with bodily injury, intimidation, and extortion.

## Property offenses

Burglary--Includes any type of entry to a residence, industry, or business with or without the use of force with the intent to commit a felony or theft, such as forcible entry and breaking and entering. Does not include possession of burglary tools, trespassing, and unlawful entry where the intent is not known.

Theft--Includes grand theft, grand larceny, motor vehicle theft, or any other felony theft. Does not include receiving or dealing stolen property, fraud, forgery, or deceit.

Other property offenses--Includes receiving or buying stolen property, forgery, fraud, embezzlement, arson, reckless burning, damage to property, criminal mischief, vandalism, bad checks, counterfeiting, criminal trespassing, possession of burglary tools, and unlawful entry.

## Drug offenses

Drug sale/trafficking-Includes trafficking of controlled substances, sales, distribution, possession with intent to distribute or sell, manufacturing, or smuggling. Does not include possession of controlled substances.

Other drug offense--Includes possession of controlled substances, prescription violations, possession of drug paraphernalia, and other drug law violations.

## Public-order offenses

Driving-related--Includes driving under the influence of drugs or alcohol, driving with a suspended or revoked license, or any other felony in the motor vehicle code.

Other public-order offenses---Includes flight/escape, parole or probation violations, prison contraband, habitual offender, obstruction of justice, rioting, libel and slander, weapons offenses, treason, perjury, prostitution/pandering, bribery, and tax law violations.

## Appendix 16

## Juvenile Court Statistics 1988

inethodology, definitions of terms, and offenses within categories

This information was excerpted from Howard N. Snyder et al., Juvenile Court Statistics 1988, U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention (Washington, DC: USGPO, 1991), pp. 1-3, 147-153. Non-substantive editorial adaptations have been made.

## Methodology

These data describe the number and characteristics of delinquency and status offense cases disposed in 1988 by courts with juvenile jurisdiction. Such courts may handle other matters, including traffic, child support, adoption, termination of parental righis, and abuse or neglect cases. However, these data focus on the court's handling of juveniles charged with a law violation (a criminal law violation or a status offense).

Data collection involves the secondary analysis of data originally compiled by juvenile courts or juvenile justice agencies to meet their own information and reporting needs. As a consequence, the incoming data are not uniform across jurisdictions. In addition, the data do not come from a scientifically selected probability sample of courts, but rather from those juvenile court systems which routinely collect and willingly disseminate their data. To combine information from various sources, the data were recoded into standardized coding categories which at times sacrificed detail in order to increase the amount of data available for analysis. Every attempt was made to insure that only compatible information from the various data sets was placed into the standardized data file.

The unit of count is a case disposed. A case disposed represents a youth processed by a juvenile court on a new referral regardless of the number of charges contained in that referral. A youth charged with four burglaries in a singie referral represents a single case, while a youth referred to court intake for three burglaries and referred again the following week on another burglary charge represents two cajes.

The offense coded was the most serious offense for which the youth was referred to court. Aitempts to commit an offense were included under that offense category except attempted murder, which was included in the aggravated assault category.

The term disposed means that some definite action has been taken or that some plan of treatment has been decided upon or initiated. It does not necessarily mean that the case is closed or terminated in the sense that all contact with the youth has ceased,

## Definitions of terms

Delinquent act/offense--An act committed by a juvenile for which an adult could be prosecuted in a criminal court, but when committed by a juvenile is within the jurisdicion of the juvenile court.

Detention--The placement of a youth in a restrictive facility between referral to court intake and case disposition.

Nonpetitioned cases--Informally handled cases which duly authorized court personnel screen for adjustment prior to the filing of a formal petition. Such personnel include judges, referees, probation officers, other officers of the court and/or an agency statutorily designated to conduct petition screening for the juvenile court.

Petioned cases--Formally handled cases that appear on the official court calendar in response to the filing of a petition or other legal instrument requesting the court to adjudicate the youth a delinquent, status offender, or a dependent child, or to waive the youth to criminal court for processing as an adult.

Placement out-of-home--Cases in which youth were placed out of the home in a residential facility housing delinquents or status offenders or were otherwise removed from their home.

Probation--Cases in which youth were placed on informal/voluntary or formal/courtordered probation or supervision.

Race--The race of the youth referred as determined by the youth or by court personnel.

White--A person having origins in any of the original peoples of Europe, North Africa, or the Middle East. (Nearly all Hispanics were included in the white racial category.)

Black--A person having origins in any of the black racial groups of Africa.

Other--A person having origins in any of the original peoples of North America, the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands.

Nonwhite--Includes black and other racial categories.

Stalus offense--Acts or conduct which are offenses only when committed or engaged in by a juvenile, and which can be adjudicated only by a juvenile court.

Upper age of court jurisdiction-The oldest age at which a juvenile court has original jurisdiction over an individual for lawviolating behavior. In 1988 in three States (Connecticut, New York, and North Carolina) the upper age of jurisdiction was 15, in eight States (Georgia, Illinois, Louisiana, Massa-
chusetts, Michigan, Missouri, South Carolina, and Texas) the upper age of jurisdiction was 16, in Wyoming it was 18, and in the remaining 38 States and the District of Columbia the upper age of jurisdiction was 17 . It must be noted that within most States there are exceptions to the age criteria which place or permit youth at or below the State's upper age of jurisdiction to be under the original jurisdiction of the adult criminal court. For example, in most States if a youth of a certain age is charged with one of a defined list of what are commonly labelled "excluded offenses," the case must originate in the adult criminal court. In addition, in a number of States, the district attorney is given the discretion of filing certain cases either in the juvenile or in the criminal court. Therefore, while the upper age of jurisdiction is commonly recognized in all States, there are numerous exceptions to this age criterion.

Youth population at risk--For delinquency and status offense matters this is the number of children from age 10 through the upper age of jurisdiction. In all States the upper age of jurisdiction is defined by statute. In most States individuals are considered adults when they reach their 18th birthday. Therefore, for these States, the delinquency and status offense youth population at risk would equal the number of children who are 10 through 17 years of age living within the geographical area serviced by the court.

## Offenses within categories

Crimes against persons--This category includes criminal homicide, forcible rape, robbery, aggravated assault, simple assault, and other person offenses as defined below.

Criminal homicide--Causing the death of another person without legal justification or excuse. Criminal homicide is a summary category, not a single codified offense. The term, in law, embraces all homicides where the perpetrator intentionally killed someone without legal justification, or accidentally killed someone as a consequence of reckless or grossly negligent conduct. It includes all conduct encompassed by the terms murder, nonnegligent (voluntary) manslaughter, negligent (involuntary) manslaughter, and vehicular manslaughter. The term is broader than the Crime Index category used in the Federal Bureau of Investigation's Uniform Crime Reports (UCR) in which murder and nonnegligent manslaughter does not include negligent manslaughter or vehicular manslaughter.

Forcible rape--Sexual intercourse or attempted sexual intercourse with a female against her will by force or threat of force. The term is used in the same sense as in the UCR Crime Index. (Some States have enacted gender neutral rape or sexual assault statutes which prohibit forced sexual penetration of either sex. Data reported by such States do not distinguish between forcible
rape of females as defined above and other sexual assaults.)

Robbery--Unlawful taking or attempted taking of property that is in the immediate possession of another by force or the threat of force. The term is used in the same sense as in the UCR Crime Index and includes forcible purse snatching.

Assault--Unlawful intentional inflicting, or attempted or threatened inflicting, of injury upon the person of another.

Aggravated assault--Unlawful intentional inflicting of serious bodily injury, or unlawful threat or attempt to inflict bodily injury or death by means of a deadly or dangerous weapon with or without actual infliction of any injury. The term is used in the same sense as in the UCR Crime Index. It includes conduct included under the statutory names aggravated assault and battery, aggravated battery, assault with intent to kill, assault with intent to commit murder or manslaughter, atrocious assault, attempted murder, felonious assault, and assault with a deadly weapon.

Simple assault-Unlawful intentional inflicting, or attempted or threatened inflicting, of less than serious bodily injury without a deadly or dangerous weapon. The term is used in the same sense as in UCR reporting. Simple assault is often not distinctly named in statutes since it consists of all assaults not explicitly named and defined as serious. Unspecified assaults are contained in the other offenses against persons category.

## Other offenses against

persons--This category includes kidnaping, violent sex acts other than forcible rape (e.g., incest, sodomy), custody interference, unlawful restraint, false imprisonment, reckless endangerment, harassment, etc., and attempts to commit any such acts.

Crimes against property-This category includes burglary, larceny, motor vehicle theft, arson, vandalism, stolen property offenses, trespassing, and oiher property offenses as defined below.

Burglary--Unlawful entry or attempted entry of any fixed structure, vehicle or vessel used for regular residence, industry, or business, with or without force, with intent to commit a felony or larceny. The term is used in the same sense as in the UCR Crime Index.

Larceny--Unlawful taking or attempted taking of property (other than a motor vehicle) from the possession of another, by stealth, without force and without deceit, with intent to permanently deprive the owner of the property. It includes shop-lifting and purse snatching without force.

Motor vehicle theft--Unlawful taking, or attempted taking, of a self-propelled road vehicle owned by another, with the intent to deprive him of it permanently or temporarily. The term is used in the same sense as in the UCR Crime Index. It includes
joyriding or unauthorized use of a motor vehicle as well as grand theft auto.

Arson--Intentional damaging or destruction by means of fire or explosion of the property of another without their consent, or of any property with intent to defraud, or attempting the above acts. This term is used in the same sense as in the UCR Crime Index.

Vandalism--Destroying or damaging, or attempting to destroy or damage, the property of another without their consent, or public property, except by burning.

Stolen property offenses-Unlawfully and knowingly receiving, buying, or possessing stolen property, or attempting any of the above. The term is used in the same sense as the UCR category stolen property; buying, receiving, possessing.

Trespassing-Unlawful entry or attempted entry of the property of another with the intent to commit a misdemeanor, other than larceny, or without intent to commit a crime.

## Other property offenses--This

category includes extortion and all fraud offenses, such as forgery, counterfeiting, embezzlement, check or credit card fraud, and attempts to commit any such offenses.

Drug law violations--Unlawful sale, purchase, distribution, manufacture, cultivation, transport, possession, or use of a controlled or prohibited substance or drug, or drug paraphernalia, or attempt to commit these acts. Sniffing of glue, paint, gasoline and other inhalants are also included; hence, the term is broader than the UCR category drug abuse violations.

Offenses against public order-This category includes weapons offenses; non-violent sex offenses; non-status liquor law violations; disorderly conduct; obstruction of justice; and other offenses against public order as defined below.

Weapons offenses-Unlawful sale, distribution, manufacture, alteration, transportation, possession, or use of a deadly or dangerous weapon, or accessory, or attempt to commit any of these acts. The term is used in the same sense as the UCR category weapons; carrying, possessing, etc.

Sex offenses--All offenses having a sexual element, not involving violence. The term combines the meaning of the UCR categories prostitution and commercialized vice and sex offerises. It includes offenses such as statutory rape, indecent exposure, prostitution, solicitation, pimping, lewdness, fornication, adultery, etc.

Liquor law violations, not status--Being in a public place while intoxicated through consumption of alvohol, or intake of a controlled substance or drug. It includes public intoxication, drunkenness and other liquor law violations. It does not include driving under the influence. The term is used in the same sense as the UCR category of the same name. (Some States treat public
drunkenness of juveniles as a status offense, rather than delinquency; hence, some of these offenses may appear under the status offense code status liquor law violations. Where a person who is publicly intoxicated performs acts which cause a disturbance, he or she may be charged with disorderly conduct.)

Other delinquent acts--This category includes those offenses which contain a combination of person, property, drug and/or public-order offenses or those offenses coded as Other in the original data.

Status offenses--Acts or conduct which are offenses only when committed or engaged in by a juvenile, and which can be adjudicated only by a juvenile court. Although State statutes defining status offenses vary (and some States may classify cases involving these offenses as dependency cases), the following types of offenses were classified as status offenses.

Running away--Leaving the custody and home of parents, guardians, or custodians without permission and failing to return within a reasonable length of time, in violation of a statute regulating the conduct of youth.

Truancy--Violation of a compulsory school attendance law.

Ungovernability-Being beyond the control of parents, guardians, or custodians, or disobedient of parental authority, referred to in various juvenile codes as unruly, unmanageable, incorrigible, etc.

Status liquor law
violations--Violation of laws regulating the possession, purchase or consumption of liquor by minors. (Some States treat consumption of alcohol and public drunkenness of juveniles as a status offense, rather than delinquency; hence, some of these offenses may appear under this status offense code.)

Other status offenses--This category includes both a variety of miscellaneous status offenses not included above (e.g., tobacco violation, curfew violation, and violation of a ccurt order in a status offense proceeding), and those offenses coded as Other in the original data.

## Appendix 17

Probation and Parole in the United States Definitions of terms, survey methodology, and jurisdictional explanatory notes

This information was excerpted from U.S. Department of Justice, Bureau of Justice Statistics, Probatlon and Parole 1990, Bulletin NCJ-133285, pp. 6, 7 (Washington, DC: U.S. Department of Justice); and information provided by the U.S. Department of Commerce, Bureau of the Census. Non-substantive editorial adaptations have been made. Data were collected for the U.S. Department of Justice, Bureau of Justice Statistics by the U.S. Bureau of the Census.

## Definitions of terms

Probation entries--Persons entering probation directly from a sentencing court, or from a correctional facility as a result of split sentencing or sentence modification.

Probation exits--Persons removed from probation including discharges (termination, completion of terms, and early discharges), revocation and commitment to incarceration, and people who die while on probation.

Probation population--All adults who have been placed under the supervisory authority of a probation agency as part of a court order. Bench, court, informal and summary probation cases, where the judiciary never surrenders jurisdiction to a probation agency are excluded from counting.

Probationers--Persons who have been placed under the supervisory authority of a probation agency as part of a court order regardless of whether they have been convicted.

Parole entries--Persons entering parole supervision from a correctional facility as a result of either parole, reparole, reinstatement, or mandatory supervised release.

## Parole exits

## Mandatory supervised release--

Persons entering parole supervision from a correctional facility upon expiration of sentence not as a result of a paroling authority decision.

Removals--Persons removed from parole: discharges, including terminations, completion of term and early discharges; revocations and recommitments to prison; and deaths.

Parole population--All persons under the jurisdiction of a paroling authority. (Out-of-State parolees under courtesy supervision are counted in the population of the paroling authority with jurisdiction.)

Paroling authority--A board, commission, or authority responsible for parole supervision which may or may not have discretionary power to release offenders from prison prior to the expiration of sentence, to revoke parole and return violators to prison, and to reinstate or grant other forms of reentry to parole supervision.

## Jurisdictional explanatory notes

## Probation notes

Nany States update their population counts, therefore the Jan. 1, 1990, numbers may differ from those previously published for Dec. 31, 1989.

The following States omitted absconders from their January 1 and December 31, counts: California, Colorado, Florida, Indiana, Massachusetts, Mississippi, Missouri, New Mexico, Virginia, and Wisconsin.

Alabama--The State revised the previously reported yearend 1989 count by excluding those supsrvised for other States.

Arizona--The State revised the previously reported yearend 1989 count for corrected pending cases.

Arkansas--The State estimated all data.
California--Exits include 13,496 transfers of jurisdiction, deaths, or loss of jurisdiction.

Delaware--The State estimated all data.
Georgia--The State included 1,945 abandonment and bastardy cases, and interstate compact cases as entries. Exits include 3,621 abandonment and bastardy cases, special termination, and transferred out-ofState cases. The transfer of abandonment and bastardy cases to another State agency is reflected in the exits. All data exclude probationers who have been sent to another State for supervision and include probationers that Georgia supervises for other States.

Indiana--Exits include 1,435 intrastate transfers and 575 interstate transfers.
lowa--The State estimated all data.
Kentucky--The State included 13 dismissed cases as exits. Inactive supervision cases were excluded from the probation count.

Maryland--Exits include 4,875 unsatisfactory closings. The State excluded 31,079 cases supervised under the Drinking Driver Monitor Program.

Wichigan--The State estimated entries and exits.

Missouri--The State estimated all data. Entries include 118 diversion cases without sentence.

Nevada--The State estimated entries and exits.

New Mexico--The State included 1,108 closed semiactive cases and interarea transfers as exits.

Ohio--The State included persons trans-
ferred between State and county probation agencies in entries and exits.

Oklahoma--Data does not include those persons on probation with weekend incarceration.

Oregon--Data does not include 6,209 probationers supervised by county agencies.

South Dakota--All data are midyear 1990 counts.

Texas--All data are for August 1990.
Utah-Exits include 207 revocations and discharges and 6 reversals of court orders.

Virginia--The State included revocations, out-of-State cases terminated, and cases closed administratively as exits.

West Virginia--The State estimated all data. Entries include 50 reinstatements.

Wyoming--Exits include 221 bench warrants, relief of responsibility, and interstate transfers.

## Parole notes

Many States update their population counts, therefore, the Jan. 1, 1990, numbers may differ from those previously reported for Dec. 31, 1989.

The following States omitted absconders from their January 1 and December 31 counts: Arkansas, California, Colorado, Florida, lowa, Kansas, Mississippi, New Hampshire, New Mexico, Ohio, Vermont, Virg:nia, and Wisconsin.

Alaska--The State estimated all data.
Arizona--Entries include 491 interstate compact cases. Exits include 10 early discharges.

California--Data include California Youth Authority (CYA) cases.

Colorado--The January 1, 1990, count differs from the previously reported December 31, 1989, count to reflect 175 cases supervised out-of-State.

Delaware--The State estimated all data.
Fiorida--The State supervised only persons sentenced to a year or more.

Hawail--Exits include 89 parclees whose maximum sentence had expired.

Illinois--Only persons sentenced to a year or more are supervised. Entries include 533 out-of-State parolees and 2,060 interstate compact and apprehension cases. The number under supervision by Illinois authorities on December 31, 1990, was 14,973; the remainder were under supervision by other authorities.
lowa--The State only supervises persons sentenced to a year or more.

Kansas--The January 1 population differs from the previously reported 1989 yearend count to include 296 parolees with an active warrant but with a known location. Exits exclude an unknown number of persons returned to prison or jail, parole revocation pending: returned to prison or jail, new charges pending; or transferred to another
parole jurisdiction. Exits include 275 absconded, 290 expiration of sentence, 62 prerevocation confinements, and 229 Kansas offenders supervised out-of-State. The State monitors absconders (563) apart from the regular parole caseload.

Kentucky--The State included 489 transfers from out-of-State districts as entries.

Maine--The State abolished parole in 1976. Thirty pre-1976 parolees remain under supervision, and 25 in prison will become eligible for parole.

Massachusetts--The State estimated entries and exits.

Minnesota--Entries include 402 parolees on work release.

Mississippi--Entries include intrastate transfers and two work release cases.

Missouri--The State estimated all data. Data exclude 283 parolees from local jails.

New Hampshire--The State supervised only persons sentenced to a year or more. Entries include 92 administrative parolees.

New Jersey--Exits include 151 persons recalled by court and discharged by Parole Authority Decree.

New Mexico--The State estimated entries and exits.

Ohio--Entries include 139 parolees supervised out-of-State. Exits include 31 inactive cases and 67 interstate compact cases.

Pennsylvania--Entries include 21,271 parolees released by county courts. The State supervised 610 parolees from local jails.

Rhode Island--Absconders are removed from parole only if a revocation warrant has been issued.

South Carolina--Exits include 12 pardoned parolees. The State excluded youthful offenders from its counts.

Tennessee--The January 1, 1990, count differs from the previously reported December 31,1989 , count because 189 parolees with an alias were doublecounted. Exits include 436 inactive parolees whose supervision was terminated.

Texas--Data are for the year ending August 1990. Entries include approximateiy 12,000 parole releases direct from county jail.

Virginia--Entries include 367 transfers from other States. Exits include 379 terminated out-of-State cases.

West Virginia--Entries include 95 interstate compact cases.

Wisconsin--Data do not include parolees supervised out-of-State. Exits include 15 administrative closings.

Wyoming--Exits include 29 administrative closings and pardons.

## Appendix 18

Recidivism of Felons on Probation, 1986-
89 Methodology and a list of participating counties

Note: The following information has been excerpted from the U.S. Department of Justice, Bureau of Justice Statistics, Recidivism of Felons on Probation, 1986-89 (Washington, DC: U.S. Department of Justice, February 1992), pp. 8-11. Non-substantive editorial adaptations have been made.

## Methodology

The data were drawn from a variety of sources but were mainly from two surveys: 1) a survey of 1986 felony sentencing in 100 counties across the Nation; 2) a follow-up survey of the felons sentenced to probation in 32 of the counties. The 1986 sentencing survey relied mostly on court records. The follow-up survey used State criminal history files and probation files to obtain information on arrests during probation, and also used probation files to obtain additional information, such as whether the probationer complied with their court-imposed conditions of probation. Unlike the sentencing survey, the follow-up survey was not based on a sample selected to be nationally representative. Nevertheless, based on 12,370 sample cases representing 79,043 felons placed on probation in 32 counties from 17 States across the nation, the follow-up survey does represent the largest survey of its kind ever conducted. Thirty-nine percent of follow-up cases were California probationers. To the extent tha: they were uncharacteristic of probationers nationwide, results of the follow-up may differ from resu'ts that would be obtained from a national random sample or complete census of propationers.

Responsibility for gathering of data from probation agency files varied. In one county, a retired probation officer collected the data; in another, the agency's probation audit team; in 22, college students hired by the agency; and in the remaining 8, the probation officers themselves. One review was done to learn whether data gatherers affected survey results. A visual check indicated no relationship between how well probationers complied with the conditions of their sentence and which data gatherers recorded the degree of compliance.

## Sampling design

Within each of the 32 counties in the study, a representative sample was drawn of felons sentenced by State courts in 1986. Those
cases receiving a probation sentence formed the sample of probationers in the follow-up. Rates at which cases were sampled varied by county size and conviction offense. All counties contributed to the sample, but cases in larger counties were generally sampled at lower rates than those in smaller ones. Also, less frequent conviction offenses (for example, murder convictions) generally were sampled at higher rates than more frequent categories (for example, larceny convictions). The hierarchy from least to most frequent was murder, rape, robbery, aggravated assault, burglary, larceny, drug trafficking, followed by other felonies.

## Period of follow-up

Time from receiving probation to time of follow-up varied, largely depending on which month in 1986 the felon received probation. Probation questionnaires based on information in probation files were completed between July and September of 1989. Consequently the maximum exposure to probation that a case could have had was 44 months (January 1986 to September 1989) while the minimum could have been 29 months (December 1986 to June 1989). Exposure time on arrest activity was several months longer. Rap sheets were completed between December 1989 and June 1990.

## Missing data

Computations of statistics generally excluded sample cases that were missing data for the particular variables being tabulated. Each table gives the percentage of weighted cases on which table figures were based.

## Participating counties

The following 32 counties in 17 States provided probation data: Arizona, Maricopa; California, Los Angeles, Orange, San Bernardino, San Diego, Santa Clara, Ventura, San Francisco; Colorado, Denver; Florida, Dade; Hawail, Honolulu; lllinois, Cook; Kentucky, Jefferson; Maryland, Baltimore, Baltimore City; Minnesota, Hennepin; Missouri, St. Louis County, St. Louis City; New York, New York, Kings, Monroe, Erie, Nassau, Suffolk; Ohio, Franklin; Oklahoma, Oklahoma; Pennsylvania, Philadelphia; Texas, Bexar, Dallas, Harris; Washington, King; and Wisconsin, Milwaukee.

## Sampling error

Probation follow-up data were obtained from a sample and not from a complete enumeration. Consequently they are subject to sampling error. A standard error, which is a measure of sampling error, is associated with each number in the tables. In general, if the difference between two numbers is at least twice the standard error of that difference,
there is at least 95 percent confidence that the two numbers do in fact differ; that is, the apparent difference is not simply the result of surveying a sample rather than the entire population. All differences presented in the tables had a confidence interval at or above 95 percent. Standard errors for each table are provided.

Table 1. Estimates of one standard eiror for table 6.19

| Most serlous felony conviction offense | Percent of probationers with a special condition |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total | Residential placement | Alcohol treatment | $\underset{\text { Dreatment }}{\text { Drug }}$ | Drug testing | $\begin{aligned} & \text { Mental } \\ & \text { health } \\ & \text { counseling } \end{aligned}$ | House arrest | $\begin{aligned} & \text { Day } \\ & \text { program } \end{aligned}$ | Community service |
| All offenses | 0.6 \% | $0.3 \%$ | $0.4 \%$ | $0.6 \%$ | 0.6\% | 0.3 \% | 0.1 \% | 0.1 \% | 0.4 \% |
| Violent offensec | 1.0 | 0.5 | 0.7 | 0.8 | 0.7 | 0.8 | 0.2 | 0.1 | 0.5 |
| Property offenses | 1.0 | 0.5 | 0.6 | 0.8 | 0.9 | 0.5 | 0.3 | 0.1 | 0.7 |
| Drug offenses | 1.2 | 0.6 | 0.6 | 1.2 | 1.2 | 0.5 | 0.2 | 0.1 | 0.7 |
| Weapons offenses | 4.0 | 1.6 | 1.9 | 1.9 | 3.0 | 1.8 | 1.0 | 0.3 | 2.7 |
| Other offenses | 1.8 | 0.9 | 1.6 | 1.3 | 1.6 | 1.3 | 0.4 | 0.4 | 1.4 |

Table 2. Estimates of one standard error for table 6.20

| Most serious felony conviction offense | Percent of probationers with a financial penalty |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total | Court costs | Probation supervision | Victim restitution | Other fees |
| Average penalty | 90.4 | 32.1 | 10.2 | 262.3 | 7.0 |
| All offenses | 0.4 \% | $0.6 \%$ | 0.4 \% | 0.5\% | 0.5\% |
| Violent offenses | 0.8 | 0.8 | 0.4 | 0.8 | 0.9 |
| Property offenses | 0.5 | 0.9 | 0.8 | 1.0 | 0.9 |

## Appendix 19

Children in Custody Survey methodology and definitions of terms

The following information was excerpted from U.S. Department of Justice, Bureau of Justice Statistics, Children in Custody, 1975-85: Census of Public and Private Juvenile Detention, Correctional, and Shelter Facilities (Washington, DC: USGPO, 1989), pp. 48; U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention, Children in Custody, 1989 (Washington,
DC: U.S. Department of Justice, 1991), pp. 1, 2, 10 ; and information provided by the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention. Non-substantive editorial adaptations have been made.

## Survey methodology

Data for each of the censuses were collected by the U.S. Bureau of the Census for the Bureau of Justice Statistics or the Office of Juvenile Justice and Delinquency Prevention.

All data collected for each of the censuses reflect State-by-State variation among juvenile justice systems and thus require caution when making comparative interpretations. Caution should also be used when interpreting changes over time in categories where the population of interest makes up less than 1 percent of the total population.

The comparison of data is also limited by changes in the questionnaires at each enumeration. The present analysis has accounted for the majority of these changes by collapsing categories where applicable. Tables may include only one or two of the years under consideration because earlier data may not be comparable with later collections. In using these tables one should take into consideration whether the total residential population or only the juvenile population was used. A juvenile is a person of an age (usually under 18) specified by State statute who is subject to juvenile court authority at the time of admission, regardless of age at the time of the census.

## The 1975 census

Period of reference
The 1975 census was conducted on June 30, 1975. Most data elements (including the facility counts and the number of individuals residing within the facilities) pertain to midyear 1975 (June 30). Other data elements, namely
admissions and discharges, apply to the annual year from July 1, 1974, to June 30, 1975, whereas the information on expenditures reflects activities that in general refer to the fiscal year July 1, 1974, through June 30, 1975. For some facilities this timeframe coincided with the calendar year.

## Criteria for inclusion

To be included in the 1975 census, juvenile detention and correctional facilities in the public sector were required to have been in operation at the time the census was conducted (February 1976), to have been in operation at least a month before the census reference date (June 30, 1975), and to have a resident population in which juveniles made up at least 50 percent of the total population. This last criterion, however, did not apply to California State administered fa jlilities that held youthful offenders in addition to juveniles. These facilities were included in the census even in cases where the youthful offender population outnumbered the juvenile component.

In addition to meeting the public facility criteria, private facilities were eligible for enumeration if a minimum of 10 percent of their residents were adjudicated delinquents, persons in need of supervision (PINS), voluntary admissions, persons awaiting transfer to another jurisdiction, or persons held pending disposition by the courts.

Excluded were facilities in which more than 90 percent of the residents were dependent or neglected or other types of non-offenders. Also excluded were juvenile detention centers operated as part of local jails but lacking a separate staff or budget; Federal juvenile facilities; non-residential facilities; foster homes; and facilities exclusively for drug abusers, alcoholics, dependent or neglected persons, unwed mothers, and the emotionally disturbed or the mentally retarded.

## Data collection procedures

The census was conducted by mail, with two follow-up mailings, and then by a telephone call or telegram to nonrespondents.

An overall response rate of virtually 100 percent was achieved for public facilities that met the selection criteria; the rate for private facilities was 95 percent. For the few private facilities that ultimately did not respond to the census, data were supplied from the questionnaires returned in the 1974 census. Respondents were requested to provide estimates for data that could not be obtained from available records. Respondents were asked to submit expenditure information on a fiscal year basis for the period from July 1, 1974, to June 30, 1975; however, other reference
periods such as the calendar year were acceptable.

## Other notes

In response to an increased interest in the extent to which juvenile facilities emphasized rehabilitation-oriented programs, the 1975 instrument included an additional facility type--residential treatment centers. Uneven responses necessitated the elimination of this category and the reclassification of these facilities to the other six types.

Data for two State forestry camps in New Mexico were reported with those for a State training school.

The nonjuvenile component of the population included youthful offenders as well as adults. The 1975 youthiul offender figures included 2,072 males and 58 females, all in public California facilities. Of the 176 adults, 16 males (all in public facilities) were in Montana, whereas private sector institutions held 152 males and 8 females distributed among Alabama, Arizona, California, Colorado, Connecticut, Florida, Massachusetts, Minnesota, New Hampshire, North Dakota, and Oregon.

## The 1977 and 1979 censuses

## Period of reference

The reference date for both the 1977 and 1979 censuses was changed from midyear, the point used in earlier censuses, to yearend (December 31). Data on occupancy, admissions, discharges, average daily population, and expenditures were for calendar years Jan. 1, 1977, through Dec. 31, 1977, and Jan. 1, 1979, through Dec. 31, 1979.

## Criteria for inclusion

To be included in the 1977 and 1979 censuses, facilities were required to have been in operation on December 31 and to have a resident population in which juveniles made up at least 50 percent of the total population. This last criterion, however, did not apply to California State-administered facilities that held youthful offenders in addition to juveniles. These farilties were included even in cases where the youthful offender population outnumbered the juvenile component. Facilities were included in the count if they had as few as 1 percent offenders in an otherwise exclusively nonoffender population. In the 1975 census a minimum of 10 percent offenders was required for inclusior.

Excluded were juvenile detention centers operated as a part of local jails but lacking a separate staff or budget; non-residential facilities, that is, those in which juveniles did not stay overnight; establishments operated by

Federal authorities; and foster homes for fewer than three juveniles. Also excluded were facilities solely for alcoholics; dependent, neglected, or abused persons; the emotionally disturbed or the mentally retarded; unwed mothers; or other types of nonoffenders.

## Data collection procedures

The 1977 and 1979 censuses were conducted by mail, with two follow-up mailings, and then by a telephone call to nonrespondents.

An overall response rate of virtually 100 percent was achieved for public facilities that met the selection criteria; the rate for private facilities was 94 percent. For the few private facilities that ultimately did not respond to the census, data were supplied from the questionnaires returned for earlier years. Respondents were requested to provide estimates for data that could not be obtained from available records. Respondents were asked to submit expenditure information on a calendar year basis for the period from January 1 to December 31. However, other reference periods such as the fiscal year were acceptable.

Other notes
On Dec. 31, 1977, there were 2,131 nonjuveniles housed in juvenile facilities $(1,824$ in public facilities; 307 in private facilities). A total of 2,191 nonjuveniles were housed in juvenile facilities on Dec. 31, 1979 ( 2,162 in public facilities; 29 in private facilities). As in earlier enumerations the nonjuvenile component of the 1977 and 1979 censuses consisted primarily of youthful offenders, the large majority of whom were committed by the California Youth Authority.

An additional facility classification scheme was added in 1977. In order to provide a classification method that would uniformiy group all facilities according to their basic function and at the same time take into account the increasing national policy interest in the degree of restrictiveness prevailing in juvenile custody facilities, the 1977 and 1979 censuses (and all censuses thereafter) were expanded to obtain information on the specific nature of each facility's mission and on key factors indicative of onsite controls.

The designations "short-term" and "longterm" were retained, but assignment to one or the other of these broad categories was determined by which of the following the respondent facility identified as its paramount purpose:

Short-term: Diagnosis and/or classifications; detention pending adjudication, commitment, or placement.

Long-term: Commitment and/or placement for treatment; probation or aftercare;
voluntary admission. If a facility marked more than one of these categories, the largest group of juveniles usually held determined its classification.

Additional designations for "institutional" and "open" environments were added. Questions were added to the instrument to determine existing security arrangements. Respondents were asked to characterize facilities according to three key factors indicative of the control environment:

1. Frequency of access to community resources.
2. Physical and staff restraints on the movement of residents.
3. A qualitative judgment based on (1) and (2) above about the degree of restrictiveness pervading the facility.

These factors were used as the basis for a classification system (referred to as "census classification") permitting the designation of a facility as either institutional or open as well as short-term or long-term.

## The 1983 census

## Period of reference

The 1983 census was conducted on Feb. 1, 1983. Most data elements pertain to this date. Other data information elements, namely admissions and discharges and expenditures, apply to the calendar year Jan. 1, 1982, through Dec. 31, 1982. Other reference periods such as the fiscal year were acceptable.

## Criteria for inclusion

Juvenile programs in operation on Feb. 1, 1983, were included in the census if they housed more than three residents, 50 percent of whom were juveniles, and if offenders were at least 1 percent of their average daily population. In California, however, all California Youth Authority facilities were included in the census. Juvenile detention centers operated as part of an adult jail were excluded, as were non-residential facilities, facilities exclusively for drug or alcohol abusers or nonoffenders, and Federal juvenile correctional facilities.

## Data collection procedures

The census was conducted by mail, with follow-up mailings and phone calls used to encourage reporting. The response rate was virtually 100 percent in the public facilities and 90 percent for the private facilities. For the few private facilities that did not respond to the census, data were supplied from the questionnaires returned for earlier years. Respondents were requested to provide estimates for data that could not be obtained from available records.

## Other notes

On Feb. 1, 1983, there were 2,181 nonjuveniles housed in juvenile facilities ( 2,098 in public facilities; 83 in private facilities).

## The 1985 census

## Period of reference

The 1985 census was conducted on Feb. 1, 1985. Most data elements refer to that date. Other annual data such as admissions, discharges, and expenditure information apply to the calendar year Jan. 1, 1984, through Dec. 31, 1984.

Criteria for inclusion
Juvenile programs in operation on Feb. 1, 1985, were included in the census if they housed more than three residents, if at least 50 percent of the residents were juveniles, and if accused or adjudicated delinquents and status offenders were at least 1 percent of their average daily population. In California, however, all California Youth Authority facilities were included in the census. Juvenile facilities operated as part of adult jails were excluded, as were non-residential facilities, facilities exclusively for drug or alcohol abusers or non-offenders, and Federal juvenile correctional facilities.

## Data collection procedures

The census was conducted by mail, with follow-up mailings and phone calls used to encourage reporting. The response rate for public juvenile facilities was virtually 100 percent; the response rate for private facilities was 99 percent.

Respondents were requested to provide estimates for data that could not be obtained from avallable records.

## Other notes

On Feb. 1, 1985, there were 2,112 nonjuveniles housed in juvenile facilities ( 2,080 in public facilities; 32 in private facilities).

## The 1987 census

Criteria for inclusion
Except in California, residential programs and group homes operating on Feb. 2, 1987 were included in the census if they met the following three criteria: 1) They housed three or more residents. 2) At least 50 percent of the residents were juveniles. 3) Accused or adjudicated delinquents and status offenders made up at least one percent of their average daily population. In California, all California Youth Authority facilities were included. Juvenile facilities which are a part of adult
facilities, non-residential facilities, and facilities operated exclusively for substance abuse and non-offenders were excluded from the census, as were Federal juvenile correctional facilities.

## Data collection procedures

The 1987 Census of Public and Private Juvenile Detention, Correctional, and Shelter Facilities collected information from 1,107 public and 2,195 private juvenile institutions. The response rate for public institutions was almost 100 percent, with only two refusing to participate. Approximately 80 percent of private facilities responded. The initial response rate from private institutions was about 50 percent. The remaining 30 percent responded to telephone interviews. The questionnaire is fairly iengthy, and in some cases, some information could not be collected during the telephone interviews. Correcting for incomplete data and missing cases was not attempted.

## Period of reference

The census included a count of juveniles and adults in these facilities on Monday, Feb. 2, 1987. These data wfie used to calculate the rates and counts of juveniles in institutions. Annual data for the fiscal year 1986 on admissions, discharges, average length of stay, average daily population, staff, services provided, characteristics of the facility, and revenues and expenditures were also collected.

## Other notes

Individuals over the age of juvenile court jurisdiction could be in these institutions for two reasons. First, there were about 2,600 adult offenders housed in these facilities on the date of the census. These adults were not included in the counts of juveniles. Second, there were about 8,000 juvenile offenders in these facilities who passed the age of juvenile court jurisdiction while in detention, but remained in the juvenile facility. These juvenile offenders were included in the counts of juveniles in custody.

The custody rate is the simple ratio of all children in custody to the sum of the juvenile populations aged 10 to majority for all States, multiplied by 100,000 . The age at which juvenile courts lose jurisdiction over young offenders ranges from 16 to 19 . For each State, the appropriate upper age is used in deriving the sum for the denominator. Estimates of the population (in one thousands) of each State and the District of Columbia, by age and by gender were provided by the U.S. Bureau of the Census. Juveniles aged to to the age at which the juvenile court loses jurisdiction were defined as the population at risk.

There were a total of 1,037 youths under the age of 10 in juverile facilities on the census date. These youngsters, along with the approximately 8,000 juvenile offenders who were past the age of juvenile court jurisdiction while in a facility are included in the numerator of the rates, but these age groups are not included in the denominator. The rates will be slightly inflated because of this. On the other hand, the rates are deflated because some institutions did not respond to the survey.

## The 1989 Census

The 1989 Children in Custody census surveyed more than 3,200 public and private facilities nationwide that provide custody and care for over 92,000 children daily who are wards of juvenile courts, juvenile corrections, or private agencies.

These facilities represent a broad spectrum of residential programs for juveniles who are either accused or adjudicated delinquents or status offenders--runaways, incorrigibles, or truants. Some facilities also house youth who are detained or committed for treatment or placement as a result of abuse, dependency, or neglect, or for other reasons. They include juvenile detention centers, shelters, reception and diagnostic centers, training schools, camps, ranches, and group homes.

Results are presented from the public facility census only. These results are based on data from 1,100 facilities--nearly all such facilities administered by State or local governments in 1989. Facilities reported information on their operations for calendar year 1988 and for the census date, Feb. 15, 1989.

## Definitions of terms

Admissions--Entry transactions recorded by the facility including new entries, reentries, and transfer entries. The number of admissions recorded in a given year does not represent the number of different juveniles admitted.

Adult--A person subject to the original jurisdiction of the criminal court, rather than juvenile court, because at the time of the offense the person was above a statutorily specified age. This includes youthful offenders who have been tried in adult court and who have been committed to a facility that also houses juveniles.

Commitment--Placement of a juvenile in a juvenile custody facility for supervision and treatment following ar, adjudication for committing a specific delinquent or status offense following a determination that the juvenile was dependent, neglected, or abused, or for some other reason unrelated to delinquency.

Detention--Temporary holding of a juvenile pending adjudication for a specific delinquent or status offenses or for a condition
such as dependency, neglect, or abuse. A juvenile who has already been adjudicated and is awaiting disposition or transfer to a placement facility is also considered to be detained.

Discharges--Exit transactions recorded by the facility including final exits, transfer exits, exits to supervision, and unauthorized exits. The number of discharges recorded in a given year does not represent the number of different juveniles discharged.

Juvenile--A person subject to juvenile court jurisdiction for purposes of adjudication and treatment based on age and offense limitations defined by State law. The upper age of original juvenile court jurisdiction ranges from 16 to 19 , but for most States it is 17 or 18.

## Types of facilities

Institutional environments-- Impose restraints on residents' movements and limit access to the community. They are usually much larger than open facilities. Most detention centers, reception and diagnostic centers, and a majority of training schools are classified as having institutional environments.

Long-term--Facilities generally holding juveniles who have been adjudicated and committed to treatment and custody.

Open environments-Allow greater movement of residents within the facilities and more access to the community. Facilities with open environments included most private facilities and most shelters; ranches, forestry camps or farms; halfway houses and group homes.

Private facility-A juvenile facility (either profit-making or nonprofit) subject to governmental licensing but under the direct administrative and operational control of private enterprise; it may receive substantial public funding in addition to support from private sources.

Public facility--A facility under the direct administrative and operational control of a State or local government and staffed by governmental employees.

Short-term--Facilities typically holding juveniles awaiting adjudication, disposition, or placement.

## Adjudication status

Committed or commitment--The placement of juvenile offenders following adjudication and any placement procedure. May be referred to as "placement."

Detained or detention--Juveniles who are pending adjudication or who have been adjudicated but are awaiting disposition or placement. Includes those juveniles undergoing diagnosis or classification before disposition or placement.

Voluntary admission - A type of admission in which a juvenile voluntarily commits
himself/herself to a facility without having been adjudicated by a court. The juvenile may be referred to the facility by parents, court, school, or a social agency.

## Appendix 20

1989 Survey of Inmates in Local Jails
Methodology and survey sampling procedures

Note: The following information was excerpted from the U.S. Department of Justice, Bureau of Justice Statistics, Profile of Jail Inmates, 1989, Special Report NCJ-129097 (Washington, DC: U.S. Department of Justice, April 1991), pp. 11, 12; and Drugs and Jail Inmates, 1989, Special Report NCJ130836 (Washington, DC: U.S. Department of Justice, August 1991), pp. 11, 12. Nonsubstantive editorial adaptations have been made.

## Methodology

The 1989 Survey of Inmates in Local Jails was conducted for the U.S. Department of Justice, Bureau of Justice Statistics by the U.S. Bureau of the Census. Through personal interviews during July, August, and September 1989, data were collected on individual characteristics of jail inmates, current offenses and sentences, characteristics of victims, criminal histories, jail activities and programs, prior drug and alcohol use and treatment, and health care services provided while in jail. Similar surveys of jail inmates were conducted in 1972, 1978, and 1983.

## Sample design

The sample for the 1989 survey was selected from a universe of 3,312 jails that were enumerated in the 1988 National Jail Census. The sample design was a stratified two-stage selection. In the first stage six separate strata were formed based on the size of the male and female populations. In two strata all jails were selected; in the remaining four strata, a systematic sample of jails was selected proportional to the population size of each jail. Overall, a total of 424 local jails were selected. In the second stage interviewers visited each selected facility and systematically selected a sample of male and female inmates using predetermined procedures. As a result, approximately 1 of every 70 males were selected, and depending on the stratum, 1 of every 14, 15 or 70 females were selected. A total of 5,675 interviews were completed, yielding an overall response rate of 92.3 percent.

Based on the completed interviews, estimates for the entire population were developed using weighting factors derived from the original probability of selection in the sample. These factors were adjusted for
variable rates of nonresponse across strata and inmate characteristics. Further adjustments were made to control the survey estimates to counts of jail inmates obtained from the 1988 National Jail Census and the 1989 Sample Survey of Jails.

## Accuracy of the estimates

The accuracy of the estimates depends on two types of error: sampling and nonsampling. Sampling error is variation that may occur by chance because a sample rather than a complete enumeration of the population was conducted. Nonsampling error can be attributed to many sources, such as nonresponse, differences in the interpretation of questions among inmates, recall difficulties, and processing errors. In any survey the full extent of the nonsampling error is never known.

The sampling error, as measured by an estimated standard error, varies by the size of the estimate and the size of the base population. Estimates of the standard errors have been calculated for the 1989 and 1983 surveys of jail inmates (see table 1). These standard errors may be used to construct confidence intervals around the percentages. For example, the 95 percent confidence interval around the percent of jail inmates in 1989 who were in jail for a drug offense is approximately 23.0 percent plus or minus 1.96 multiplied by 0.6 percent (or 21.8 percent to 24.2 percent).

These standard errors may also be used to test the statistical significance of the difference between two sample statistics by pooling the standard errors of the two sample estimates. For example, the standard error of the difference in the percent in jail for drug offenses in 1989 compared to 1983 would be .72 (or the square root of the sum of the squared standard errors in each year). The 95 percent confidence interval around the difference would be 1.96 multiplied by 0.72 percent (or 1.4 percent). Since the observed difference of 13.7 percent ( 23.0 percent minus 9.3 percent) is greater than 1.4 percent, the difference would be considered statistically significant.

All comparisons discussed in this report were statistically significant at the 95 percent confidence level. Because of the sample design, State, local or other subnational estimates cannot be made.

## Self-reported information

Criminal history data are based on selfreported information provided by each respondent. Through a series of questions, inmates were asked to report on past probation sentences as juveniles and as adults and on past sentences to incarceration up to 10
prior times. For each sentence, the inmates were asked the offenses for which they were sentenced, the type of institution in which they served time, the date of admission, and the length of time actually served. From this information, a criminal history profile was constructed. A recidivist was defined as an inmate who reported a sentence to probation or incarceration at any time in the past.

Drug use and treatment history data are also based on responses from the inmates. Inmates were asked a detailed set of questions about each of 10 types of drugs. These drugs included heroin; methadone used outside of a treatment program; amphetamines and barbiturates (aione and in combination); methaqualone (Quaaludes); cocaine or crack; LSD; PCP; and marihuana and hashish. Drug use histories were developed by examining the responses to questions for each of these drugs. Inmates who were unconvicted (awaiting arraignment, awaiting trial, or on trial) were not asked any questions about drug use during the month before the arrest for which they were currently detained or about drug use in the month before the first offense for which they had served time in the past.

Table 1. Standard errors of the estimated percentages, all jail inmates, 1989 and 1983

| Base of the estimate and year | Estimated percentages |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 98 or 2 | 95 or 5 | 90 or 10 | 80 or 20 | 70 or 30 | 50 |
| 1,000 |  |  |  |  |  |  |
| 1989 | 4.4 \% | $6.9 \%$ | 9.5\% | 12.7 \% | 14.6\% | 15.9 \% |
| 1983 | 3.1 | 4.8 | 6.6 | 8.7 | 10.0 | 10.9 |
| 5,000 |  |  |  |  |  |  |
| 1989 | 2.0 | 3.1 | 4.3 | 5.7 | 6.5 | 7.1 |
| 1983 | 1.4 | 2.1 | 2.9 | 3.9 | 4.5 | 4.9 |
| 10,000 |  |  |  |  |  |  |
| 1989 | 1.4 | 2.2 | 3.0 | 4.0 | 4.6 | 5.0 |
| 1983 | 1.0 | 1.5 | 2.1 | 2.8 | 3.2 | 3.5 |
| 25,000 |  |  |  |  |  |  |
| 1989 | 0.9 | 1.4 | 1.9 | 2.5 | 2.9 | 3.2 |
| 1583 | 0.6 | 1.0 | 1.3 | 1.7 | 2.0 | 2.2 |
| 50,000 |  |  |  |  |  |  |
| 1989 | 0.6 | 1.0 | 1.3 | 1.8 | 2.1 | 2.2 |
| 1983 | 0.4 | 0.7 | 0.9 | 1.2 | 1.4 | 1.5 |
| 100,000 |  |  |  |  |  |  |
| 1989 | 0.4 | 0.7 | 1.0 | 1.3 | 1.5 | 1.6 |
| 1983 | 0.3 | 0.5 | 0.7 | 0,9 | 1.0 | 1.1 |
| 200,000 |  |  |  |  |  |  |
| 1989 | 0.3 | 0.5 | 0.7 | 0.9 | 1.0 | 1.1 |
| 1983 | 0.2 | 0.3 | 0.5 | 0.6 | 0.7 | 0.8 |
| 223.550 ${ }^{\text {a }}$ |  |  |  |  |  |  |
| 1983 | 0.2 | 0.3 | 0.4 | 0.6 | 0.7 | 0.8 |
| 395,553 ${ }^{\text {a }}$ |  |  |  |  |  |  |
| 1989 | 0.2 | 0.3 | 0.5 | 0.6 | 0.7 | 0.8 |

${ }^{--}$The total number of jall inmates in 1983 and 1989.
Note: The rellability of an estimated percentage depends on the size of the percentage and its base. Each standard error when multiplied by 1.96 provides a 95 percent confidence interval around an estimated percentage. To calculate the standard error of the difference between two estimated percentages, take the square root of the sum of each squared standard error for the percentages being compared.

## Appendix 21

## Correctional Populations in the United

States, 1990 Survey methodology, definitions of terms, and jurisdictional explanatory notes

Note: The following information has been excerpted from U.S. Department of Justice, Bureau of Justice Statistics, Correctional Populations in the United States, 1990, NC,J-135946 (Washington, DC: USGPO', 1992). Non-subssintive editorial adaptations have been made.

## Survey methodology

These data are based on yearend 1989 and 1990 inmate counts and on enumerations of prisoner transactions during 1990. As in past years, these data were collected with a standard questionnaire transmitted to the appropriate State authorities and the Federal Bureau of Prisons. The final date for receipt of information was Feb. 15, 1991.

In each jurisdiction, the questionnaire was completed by a central agency reporting for institutions within the correctional system. This procedure was also used by the Federal Bureau of Prisons in supplying data on Federal institutions. Because the information was derived from a complete enumeration rather than a survey, the statistical data are not affected by sampling error. Response errors were held to a minimum by means of a systematic telephone follow-up and, where necessary, other control procedures. Thus, the yearend counts are generally considered reliable. Because of the absence of standardized administrative and record keeping practices from State to State, the data for admissions and departures are not always entirely comparable across jurisdictions. Jurisdictions may revise their numbers in later years. Subsequent publications may therefore differ from data currently presented.

## National Prisoner Statistics (NPS) category definitions

Jurisdiction population, Dec. 31, 1990--Includes all inmates under jurisdiction of State correctional authorities on Dec. 31, 1990 regardless of location. Does not include other jurisdictions' inmates (for example, inmates from other States, pretrial detainees) merely housed in prisons.

Custody population, Dec. 31, 1990-Includes all inmates in the State's custody, that is, housed in State correctional facilities on Dec. 31, 1990. Does not include

State inmates housed outside State prison facilities; does include other jurisdictions' inmates (for example, inmates from other States, the courts, local jails) housed in the State's facilities.

Overcrowding, Dec. 31, 1990--Includes all State prison inmates housed in local jails on Dec. 31, 1990, as a direct result of State prison overcrowding. Does not include State prison inmates held in local jails for other reasons (for example, work release, court appearance, etc.).

## Admissions

New court commitments--Includes all inmates who were admitted with all new sentences, that is, these inmates were not readmitted for any sentences for which they had already served some prison time. This category includes probation violators entering prison for the first time on the probated ofifenses. Does not include parole violators with new sentences.

Parole violators with new sen-tences--Includes all parolees returned with new sentences.

Other conditional release violators with new sentences--Includes all individuals on conditional release (other than parole) who are returned with new sentences, for example, returns from supervised mandatory release, from shock probation, etc.

Parole violators only, no new sen-tences--Includes all parolees returned only for formal revocations of parole that were not accompanied by new sentences. If the parole was not formally revoked, that is, the parolee was held only temporarily pending a hearing, no admission occurred for NPS purposes.

Other conditional release violators only, no new sentences--Same as above, substituting conditional release violator for parole violator.

Transfers from other jurisdic-tions--Includes all inmates transferred to a State's jurisdiction to continue sentences already in force. Does not include admissions if State does not acquire jurisdiction. Does not include movements from prison to prison within State.

Absent without leave (AWOL) returns, with or without sentences---Includes all returns from AWOL, that is, failures to return from authorized temporary absences such as work furlough, study release, mercy furlough, or other authorized temporary absence.

Escapee returns, with or without new sentences--|ncludes all returns from escape, that is, unlawful departures from a State correctional facility or from the custody of State correctional personnel.

Returns from appeal/bond--Includes all inmates reinstated to correctional jurisdiction from long-term jurisdictional absences on appeal or bond. Does not include returns from short-term movements (less than 30
days) to court (that is, where the State retains jurisdiction).

Other admissions--Includes all other admissions not covered by the above categories.

## Releases

Unconditional--An unconditional release occurs only if the released inmate cannot be imprisoned for any sentence for which he/she was in prison.

Expirations of sentence--Includes all inmates whose maximum court sentences minus credits have been served.

Commutations--Includes all inmates whose maximum sentences have been changed (lowered) to time served to allow immediate unconditional release.

Other unconditional releases--Includes all other unconditional releases not covered by the above categories.

Conditional--A conditional release occurs if the released inmate, upon violating the conditions of release, can be imprisoned again for any of the sentences for which he/she was in prison.

Probations--Includes all inmates who have been placed under probation supervision and conditionally released; includes all shock probation (split sentence) releases.

Supervised mandatory reieases--Includes all inmates who must, by law, be conditionally released. This type of release may also be called mandatory conditional release.

Paroles-Includes all inmates conditionally released to parole.

Other conditional releases--Includes all other conditional releases not covered by the above categories.

Death:
Executions--Self-explanatory.
IIIness/natural causes--Self-ex-
planatory.
Suicides--Self-explanatory.
Accidental injury to self--Includes all inmates who accidentally cause their own deaths (for example, a fall from a ladder, mishandling electrical equipment).

Death caused by another person--Includes all inmates whose deaths were caused accidentally or intentionally by another inmate or prison personnel.

Other deaths--Includes all other deaths not covered by the above categories.

Other releases:
Absent without leave
(AWOL)--Includes all failures to return from an authorized temporary absence such as work furlough, study release, mercy furlough, or other authorized temporary absence. Escapes from confinement--Includes all unlawful departures from a State correctional facility or from the custody of State correctional personnel.

Transfers to other jurisdic-tions--Includes all inmates who were trans-
ferred from one State's jurisdiction to another to continue sentences already in force. Does not include the release if State does not relinquish jurisdiction. Does not include movements from prison to prisor within State.

Releases to appeal/bond--Includes all inmates released from correctional jurisdiction to long-term jurisdictional absences on appeal or bond. Does not include short-term movements (less than 30 days) to court (that is, where the State correctional system retains jurisdiction).

Other releases--Includes all other releases not covered by the above categories.

## Race

White--A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.

Black--A person having origins in any of the black racial groups of Africa.

American Indian or Alaska Native--A person having origins in any of the original peoples of North America, who maintains cultural identification through tribal affiliation or community recognition.

Asian or Pacific Islander--A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands. This area includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa.

Other--Any other race not covered by the above categories.

Not known--Any inmate whose racial origin is unknown.

## Ethnic origin

Hispanic--A person of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish culture or origin, regardless of race.

Not Hispanic--A person not covered by the above category.

Not known-Any inmate whose ethnic origin is unknown.

## Capital punishment explanatory notes

The statistics reported for capitai punishment may differ from data collected by other organizations. The differences occur for a variety of reasons.
(1) Inmates under sentence of death are originally added to the National Prisoner Statistics (NPS) counts when they enter correctional facilities rather than when judges pronounce sentence.
(2) Following the year when prisoners are first counted, their admissions or releases as a result of court order are attributed to the
year for the sentence or court order. For example, a prisoner sentenced in November 1988 and entering prison custody in January 1989 would be counted as an admission in the 1989 report; the 1990 report would count him or her as being under sentence of death at yearend 1988. Similarly, a prisoner whose sentence is overturned in 1988 but who remains in the count until 1990 when the court's decision is reported would be subtracted from the 1988 and 1989 reports.
(3) NPS counts of persons under sentence of death are always for the last day of a calendar year and thus will differ from more recent counts.

## Correctional Populations in the United

States, 1989, failed to include 20 inmates who either were reported late to the NPS program or were not in the custody of State correctional authorities at yearend 1989: Florida (1), Georgia (2), Idaho (1), Illinois (4), Nevada (1), Oklahoma (3), Pennsylvania (3), Tennessee (1), and Texas (4). Twenty-seven inmates had sentences of death removed in 1989 but were not reported: California (1), Florida (5), Georgia (2), Idaho (1), Indiana (1), Kentucky (3), Maryland (1), Mississippi (4), North Carolina (5), Pennsyivania (1), South Carolina (1), and Texas (2).

In 1990, five male prisoners of the Armed Forces were under a military death sentence for murder.

## Jurisdictional explanatory notes

Differing legal and administrative requirements as well as diverse record keeping practices among jurisdictions hamper efforts to collect uniform nationwide data on the number and movement of inmates in State and Federal correctional institutions. Not all jurisdictions are able to provide information that meets NPS definitions. For some, the discrepancies between reported data and the criteria are minor, but in others these discrepancies are more serious and, overall, serve to limit the comparability of data among jurisdictions. Limitations in State data, of course, carry over into regional and national figures, which, as a consequence, should be viewed as providing an order of general magnitude rather than precise totals.

The notes that follow identify deviations from the category definitions used in the 1990 questionnaire, provide details on the content of "other" admission and release categories, and specify revisions to data that should be taken into account when comparing 1989 and 1990 figures. State inmates housed in local jails are generally considered to be under State jurisdiction. Exceptions to this rule are noted below. Some States included an adjustment residual in their admission or re-
lease figure in order to balance the yearend 1989 count with the yearend 1990 count.

## Jurisdictional explanatory notes

Alabama--New court commitments: include other conditional release violators with or without new sentences. Escapees and AWOL prisoners: Counted as a single category. Other admissions: Unspecified in the Alabama data system. Other conditional releases: Unspecified in the Alabama data system. Cause of death: Can specify only execution.

Alaska--New court commitments: Include other conditional release violators with or without new sentences. Other unconditional releases: Court-ordered releases. Other releases: Include releases to the U.S. Immigration Naturalization Service and Federal detainer. Total inmate population: Custody and jurisdiction counts include inmates in prisons and jails, which form an integrated system in Alaska. Race and Hispanic origin: Were estimated.

Arizona--Population, admissions and releases counts: Based on custody data. Other unconditional releases: Court-ordered releases. Other conditional releases: Include supervised early releases, supervised provisional releases, supervised work furloughs and releases to home arrest program. Unspecified causes of death: Cause of death not known at time of data collection. Other releases: Include early releases to detainer and persons returned to prison pending a revocation hearing. The sex breakdown for the 52 inmates housed in local jails to ease oversfowding in prisons is estimated, based proportionally on admissions.

Arkansas--Arkansas revised the previously reported Dec. 31, 1989, population of inmates with maximum sentences of more than 1 year. Sentencing information: Population with sentences of more than 1 year includes a small number of inmates with sentences of 1 year or less. Parole violators with new sentences: Include parole violators without new sentences. Other unconditional releases: Court-ordered releases. Other conditional releases: Comprised of persons released to supervision under the provisions of Arkansas' Acts 378 and 814.

California--Population, admissions and releases counts: Based on custody data. Other conditional release violators with new sentence: Include some parole violators and returns from supervised mandatory release with new sentence. Other conditional release violators only, no new sentences: Include some parole violators without new sentences. The category also includes supervised mandatory and parole releases returned to prison pending revocation hearings. Other admissions: Contaln the differerice between total admissions and the number in other admissions categories. Unconditional releases, expirations of sentence: Include some
court-ordered releases. Supervised mandatory releases: Include some releases to parole. Other releases: Contain the difference between total releases and the number in other categories of releases.

Colorado--Sentencing information; Reported population with sentences of more than 1 year includes a very small number of inmates with maximum sentences of 1 year. Transfers to and from other jurisdictions: Include custody transfers of inmates from and to other States due to interstate compacts. Escapees: Numbers estimated. Jurisdiction counts for admissions, releases, and population characteristics: Exclude 401 men and 9 women housed in jails solely to ease prison crowding. Other releases: Court-ordered releases not classified as conditional or unconditional. Race and Hispanic origin: Were estimated.

Connecticut--New court commitments: May inclucle a small number of prisoners reíurned from appeal or bond and some probation violators entering with or without new sentences. Unconditional releases, expirations of sentence: Does not distinguish inmates with probation conditions in effect upon expiration of the incarceration portion of their sentences. Includes some releases to probation supervision. Other unconditional releases: Court-ordered releases and pardon discharges. Other unconditional releases: Court-ordered releases and pardon discharges. Other conditional releases: Community residence releases under supervision similar to that for parolees. Causes of death: Can specify only executions. Total inmate population: Custody and jurisdiction counts inciude inmates in prisons and jails, which form an integrated system in Connecticut. Hispanic origin: Categorized as prisoners of unknown race.

Pelaware--Sentencing information, partially suspended sentences: Some prisoners serve sentences in which the term in prison is partially suspended, to be completed under probation. They were categerized with inmates sentenced to 1 year or more only when the prison portion of their sentences exceeded 12 months. As a result, the population and movement counts of inmates with maximum sentences of more than 1 year are understated, and the population count of inmates with 1 year or less maximum sentences is overstated. Parole violators and conditional release violators with new sentences: Iriclude violators with or without new sentences. Unconditional releases, expirations of sentence: Include some releases to probation. Other admissions and releases: Include admissions from and releases to State hospitals, local hospitals and those inmates serving weekend sentences. Unconditional releases, expiration of sentence: include some releases to probation. Other unconditional releases: Court-ordered releases. Total inmate population: Custody and jurisdiction counts include inmates in prisons
and jails, which form an integrated system in Delaware. Unknown race: Includes Puerto Rican and Mexican prisoners.

District of Columbia--The jurisdiction revised the previously reported Dec. 31, 1989, population of inmates with maximum sentences of more than 1 year. Population, admissions and releases counts: Based on custody data. Sentencing information, partially suspended sentences: Some prisoners serve sentences in which the term in prison is partially suspended, to be completed under probation. They were categorized with inmates sentenced to 1 year or more only when the prison portion of their sentences exceeded 12 months. As a result, the population and movement counts of inmates with maximum sentences of more than 1 year are understated, and the population count of inmates with 1 year or less maximum sentences is overstated. Sentencing information, short sentences: An undetermined number of inmates housed in neither the District of Columbia jail nor the detention center and having either no sentence or a maximum sentence of 1 year or less were included in the admissions, releases, and population counts of inmates with more than 1 year maximum sentences. As a result, the population and movement counts of inmates with maximum sentences of more than 1 year are overstated, and the population count of inmates with 1 year or less maximum sentences is understated. Parole and other conditional release violators: The total number is actual; the counts of men within categories of violation are estimated. The female parole violators are counted as having new sentences. Transfers from and to other jurisdictions: Only includes transfers from mental hospitals and Federal facilities. Unconditional releases, expirations of sentence: Include some inmates with partially suspended sentences and those released to probation. Cause of death: No cause is specified in the District of Columbia's data system. Jurisdictiontal population totals: Include unsentenced inmates held for the first time in the District jail or deterition center. Total inmate population: Custody and jurisdiction counts include inmates in prisons and jails, which form an integrated system in the District of Columbia. Race: Numbers estirnated. Hispanic origin: Categorized as prisoners of unknown race.

Federal prisons--Population total: Includes some men and women held under the jurisdiction of the U.S. Immigration and Naturalization Service. Jurisdiction population, inmates with a year or less sentence: includes 1,327 males and 31 females whose sentence length is unknown. Custody population, inmates with a year or less sentence: Includes 926 males and 6 females whose sentence length is unknown,

Florida--Population, admissions and releases counts: Based on custody data. Returns from appeal or bond hearings and
other admissions: Contain the difference between total admissions and the number otherwise categorized. Include returns from authorized temporary absences on appeal or bond. Other unconditional releases: Include pardons, vacated sentences, and unconditional releases ordered by the Frobation and Parole Commission. Other conditional releases: Include inmates released to supervised community release. Hispanic origin: Categorized as prisoners of unknown race.

Georgia--Population, admissions and releases counts: Based on custody data. New court commitments: May include some prisoners returning from appeal or bond. Parole violators with hew sentences: Include other conditional release violators with or without new sentences. Escapees and AWOL prisoners: Counted as a single category. Other conditional releases: Include special reprieves and supervised reprieves controlled by the State Parole Board as well as Governor emergency releases. Unspecified causes of death: Cause of death not known at time of data collection. Jurisdiction population: Excludes inmates awaiting pickup from jails.

Hawaii--The jurisdiction revised the previously reported Dec. 31, 1989, population of inmates with maximum sentences of more than 1 year. Category estimates: Jurisdiction and custody totals are aciual counts. Admissions, releases, race, and Hispanic origin are estimated from information from Hawail's Correctional Information System (CIS). Sentencing information, partially suspended sentences: Some prisoners serve sentences in which the term in prison is partially suspended, to be completed under probation. They were categorized with inmates sentenced to 1 year or more only when the prison portion of their sentences exceeded 12 months. As a result, the population and movement courits of inmates with maximum sentences of more than 1 year are understated, and the population count of inmates with 1 year or less maximum sentences is overstated. Other unconditional releases: Include administrative discharges. Total inmate population: Custody and jurisdiction counts include inmates in prisons and jails, which form an integrated system in Hawaii. Unknown race: :haludes Puerto Ricans, prisoners of other Hispanic origin, and inmates who identified more than one racial background; however, prisoners of part-Hawailian ancestry were counted as Asians or Pacifig islanders. Hispanic origin: Includes Puerto Ricans and individuals of Hawaii's "Other" race category with Spanish surnames.

Idaho--The population count for Dec, 31, 1989, excludes 122 men and 1 woman housed in jails solely to ease prison crowding. Escapees and AWOL prisoners: Counted as a single category. Other admissions: Include civil commitments. Other unconditional releases: Include court-ordered releases and 1 release to Health and WelfareCivil commitment. Other releases: Include 14
inmates released to Agreement on Detainer and 8 releases to the U.S. Marshals Service by court order. Race and Hispanic origin: Were estimated.

Illinois--Population, admissions and releases counts: Based on custody data. Data for inmates with sentences of more than 1 year include some inmates with 1 year maximum sentences. Conditional release violators with new sentences: Include some parole violators with new sentences. Other conditional release violators without new sentences: Include some parole viölators without new sentences, and some returned violators with charges pending. Other admissions and releases: Contain the difference between long-term admission and release movements not reported in other categories. Include transfers and release to/ returns from medical furlough, writ appeal, or bond. Other unconditional releases: Cout-ordered releases. Unspecified causes of death: Cause of death not known at time of data collection. Hispanic origin: Categorized as prisoners of unknown race.

Indiana-Population, admissions and releases counts: Based on custody data. Jurisdictional populaiton: Excludes 757 male inmates awaiting pickup from local jails. Conditional release violators with new sentences: indude paroie violators with or without new sentences and other conditional release violators without new sentences. Other unconditional releases: The Parole Board determines the termination of sentences. Conditional releases, probations: Numbers estimated. Other conditional releases: Releases to regulated community assignment.

Iowa--Population, admissions and releases counts: Based on custody data. Parole violators without new sentences: Include persons returned to prison to await a revocation hearing. Other admissions: Include safekeepers. Other unconditional releases: Cout-ordered discharges. Conditional releases, paroles: Include prisoners remanded to prison prior to a formal revocation hearing at which they were returned to parole. Also include inmates released to parole by Conditional Commutation Orders. Other conditional releases: Include releases to work release programs.

Kansas-New court commitments: Include prisoners teturning from appeal or bond. Other conditional release violators, with or without new sentences: Include some probation violators who should have been categorized as new court commitments. Escapees and AWOL prisoners: Counted as a single category, Other admissions: Include admissions not categorized at time of data collection. Other conditional releases: Prisoners under supervision similar to that for parolees. Hispanic origin: Categorized as prisoners of unknown race.

Kentucky-Escapees and AWOL prisoners: Counted as a single category. Other
admissions: Prisoners returned to prison by court-order. May include some prisoners returning from appeal or bond. Other releases: Court-ordered releases, conditional or unconditional. May include some releases to appeal or bond.

Louisiana--New court commitments: include prisoners returning from appeal or bond. Escapees and AWOL prisoners: Courted as a single category. Other admissions: Inmates whose types of admission were unknown at time of data collection. Other unconditional releases: Include courtordered releases, pardons, and good-time releases. Unspecified causes of death: Cause of death not known at time of data collection. Other releases: Inmates whose types of release were unknown at the time of data collection. Race: Distinguished as white or black. Hispanic origin: Not included in Louisiana's data system.

Maine--Other conditional release violators: Returns from probation. Escapees and AWOL prisoners: Counted as a single category. Other admissions: Returns from intensive supervision program. Other conditional releases: Releases to intensive Supervision Program.

Maryland--Category estimates: The admissions, releases, and population totals are actual counts. Categories for admissions and releases are estimated by applying percentages from automated data to the totals that are made manually. The automated data count only inmates with maximum sentences of more than 1 year, while the detailed categories in the manual data include inmates with maximum sentences of 1 year or less. New court commitments: Include prisoners returning from appeal or bond. Parole violators, with or without new sentences: Include supervised mandatory release violators returned to prison. May also include parole violators pending revocation. Other conditional release violators: Patuxent work release inmates returned from halfway houses. Escapees and AWOL prisoners: Counted as a single category. Other unconditional releases: Court-ordered releases. May include a small number of releases to appeal or bond. Other conditional releases: Inmates from Patuxent Institution released to hallway houses.

Massachusetts--Population, admissions and releases counts: Based on custody data. Category estimates: The totals for admissions and releases are actual; the categories are estimated. New court commitments: Include some parole violators with new sentences and other conditional release violators with or without new sentences. Unconditional releases, expirations of sentence: Include some releases to probation. Other unconditional releases: Court-ordered releases and some releases to appeal or bond. Total inmate population with sentences of more than 1 year: Offenders who are sentenced to locai correctional facilities for
terms up to $21 / 2$ years are excluded from counts of population, admissions, and releases; however, they may be included in reports about the jail population. Total jurisdiction population: Excluded 418 men and 12 women housed in jails solely to ease prison crowding. Unknown race: Includes Hispanics who are not specified as any other race.

Michigan--Population, admissions and releases counts: Based on custody data. Transiers to and from other jurisdictions: Include transfers to and from mental hospitals, Federal prisons, and prisons in other States. May include other long-term admissions such as writs or medical cases. Returns to/from appeal or bond: Contain the net difference between movements to and from courts. Unspecified causes of death: Causes unknown at the time of data collection. Hispanic origin: Includes only MexicanAmericans who are also categorized as prisoners of unknown race. Other Hispanic prisoners are classified as non-Hispanic.

Minnesota--Parole violators with new sentences: Include other conditional release violators from supervised mandatory releases and work releases with new sentences. Parole violators without new sentences: Include other conditional release violators from supervised mandatory releases and work releases without new sentences. Escapees and AWOL prisoners: Counted as a single category. Other unconditional releases: Include prisoners discharged after the Office of Adult Releases modified their sentences or after a court or executive order. May include some commutations. Other conditional releases: Work releases. Prisoners of unknown race: Include 22 non-Hispanic men categorized as prisoners of unknown race. Hispanic prisoners and prisoners of unknown race: Include 105 men and 4 women, of Hispanic origin, categorized as prisoners of unknown race. Unsentenced prisoners: Include 9 holds for Hennepin County and 30 holds for the U.S. Marshal.

Mississippi-New court commitments: Include some probation violators both with and without new sentences. Other admissions: Inmates awaiting a parole revocation hearing as well as returns from appeal or bond, and data adjustments. Other unconditional releases: Court-ordered releases. Other conditional releases: Work releases. Other releases: Inmates who went back to prison pending a parole revocation hearing that subsequently reiurned them to community supervision. Also includes some releases to appeal/bond. Hispanic origin: Categorized as prisoners of unknown race.

Missouri--Parole violators with new sentences: Include other conditional release violators returned to prison. Parole violators without new sentences: Include some other conditional release violators with no new sentences. Other admissions: Include returns from appeal or bond and shock probation. Other releases: Include releases to appeal or
bond, commutations, court-ordered releases, and shock probation.

Montana--New court commitments: Include some probation violators with and without new sentences.

Nebraska--Parole violators without new sentences, men: Include some parole violators with new sentences. Other unconditional releases: Include court-ordered releases.

Nevada--New court commitments: Include some returns from appeal or bond. Escapees and AWOL prisoners: Counted as a single category. Hispanic origin: Categorized as prisoners of unknown race.

New Hampshire--New court commitments: Include some prisoners returned from appeal or bond and may include other conditional release violators with or without new sentences. Parole violators without new sentences: Include parole violators who receive new sentences after readmission to prison. Conditional releases, probation: Shock probation releases (the shock incarceration program began in March, 1990). Other unconditional releases: Include court-ordered releases.

New Jersey--New court commitments: May include some transfers from other jurisdictions and returns from appeal/bond. Other conditional release violators without new sentences: Prisoners returned (some with new sentences) from the Intensive Supervision Program, an experimental program operated by the Administrative Office of the Courts. The category may also include some conditionally released prisoners returned with new sentences. Escapees and AWOL prisoners: Counted as a single category. Other conditional releases: Prisoners released to the Intensive Supervision Program. Other race: Includes Hispanic inmates who are not classified as white or black.

New Mexico--New Mexico revised the previously reported Dec. 31, 1989, population count of inmates with maxirnum sentences of more than 1 year. Parole violators without new sentences: May include parole violators with additional sentences. Other conditional release violators: Include returns from community corrections program. Other admissions: Include unknown type of admission at time of data coliection. Other conditional releases: Include releases to community corrections program. Cause of death: Can specify only execution.

New York--New York revised the previously reported Dec. 31, 1989, population of inmates with maximum sentences of more than 1 year. New court commitments: Include parole violators and other conditional release violators with new sentences. Transfers from and to other jurisdictions: Include transfers from and to the Department of Mental Hy giene for psychiatric treatment. Other admissions: Include 2 male parolees discharged by court order who were returned upon reaffirmation of their sentence by the courts, 106 men and 2 women returned from conditional
parole deportation to custody of the Bureau of Immigration and Naturalization Service, and 2 men returned following erroneous discharge. Unspecified causes of death: Causes unknown at the time of data collection. Other releases: Includes 42 releases following erroneous admission and 29 for whom type of release was not indicated. Race and Hispanic origin: Categorized all Hispanic inmates, white and black, as white,

North Carolina--Population, admissions and releases counts: Based on custody data. Sentencing information, partially suspended sentences: Some prisoners serve sentences in which the term in prison is partially suspended, to be completed under probation. They were categorized with inmates sentenced to 1 year or more only when the prison portion of their sentences exceeded 12 months. Although the maximum sentences of all such prisoners were more than 1 year, nearly all of them were included with those prisoners having sentences of 1 year or less. As a result, the counts of population, admissions, and releases of inmates with more than 1 year maximum sentences are understated, and the population count of inmates with maximum sentences of 1 year or less is overstated. Parole violators with new sentences: Include some parole violators without new sentences and some other conditional release violators with or without new sentences. Escapees and AWOL prisoners: Counted as a single category. Other admissions: Contain an adjustment residual to balance movement data with the Dec. 31, 1990 population. Other unconditional releases: Include court-ordered releases. Conditional releases, parole: Include some supervised mandatory releases. Category estimates, sentencing: Population totals are actual; populations by sentence length are estimated.

North Dakota--New court commitments: Include some parole violators with new sentences and some probation violators with new sentences. Other conditional releases: Include court-ordered releases. Unknown race: Includes an Iranian whose race was not determined as black or white.

Ohio--Sentencing information: The yearend total of inmates with maximum sentences of more than 1 year includes some inmates with sentences of 1 year or less. New court commitments: Include some other conditiona! release violators with new sentences. Transfers: Include only prisoners transferred between prison and Ohio's Forensic Unit. Escapees and AWOL prisoners: Counted as a single category. Other unconditional releases: Include sentences vacated by courts. Race and Hispanic origin: Include counts only of jurisdictional inmates in Ohio's custody.

Oklahoma--Sentencing information: The counts of population, admissions, and releases of inmates with maximum sentences of more than 1 year may include a very small
number of inmates with sentences of 1 year. New court commitments: Include an undetermined number of conditional release violators with or without new sentences. Other unconditional releases: Include legislative cap releases. Other releases: Include courtordered releases. Total jurisdiction population: Excludes 189 men and 21 women housed in jails solely to ease prison overcrowding. Hispanic origin: Categorized as prisoners of unknown race.

Oregon--Oregon revised the previously reported Dec. 31, 1989, population of inmates with maximum sentences of more than 1 year. Parole violators: Cannot specify violators returned with new sentences from those without a new sentence. Includes some returned parolees whose revocation status was unknown at the time of admission. Other admissions: Include type of admission unknown. Other unconditional releases: Include court-ordered releases. Other conditional releases: Include accelerated community releases (pre-parole).

Pennsylvania--Parole violators with or without new sentences: Include 1,637 men and 53 women returned to State incarceration by the Board of Probation and Parole. They entered on their original sentences and not as technical or convicted parole violators. Their count was divided between violators with new sentences and violators without new sentences according to the ratios of actual convicied or technical parole violators. Thus, 769 men and 25 women were categorized as parole violators with new sentences, and 868 men and 19 women were categorized as parole violators without new sentences. Other unconditional releases: Include court-ordered releases. Conditional releases, parole: Includes an undetermined number of men and women who nad been admitted to prison for parole violations and then released after a revocation hearing on their original paroles. Other releases: Include unknown type of release.

Rhode Island--Sentencing information, partially suspended sentences: Some prisoners serve sentences in which the term in prison is partially suspended, to be completed under probation. They were categorized with inmates sentenced to 1 year or more only when the prison portion of their sentences exceeded 12 months. As a result, the population and movement counts of inmates with maximum sentences of more than 1 year are understated, and the population count of inmates with 1 year or less maximum sentences is overstated. Other admissions: Include returned from erroneous release to probation. Other unconditional releases: Include court-ordered releases. Total inmate population: Custody and jurisdiction counts include inmates in prisons and jails, which form an integrated system in Rhode isiand.

South Carolina--New court commitments: Include some transfers from other jurisdictions. Other unconditional releases:

Include court-ordered releases and offenders who paid fines. Other conditional releases: Include inmates released to the jurisdiction of the Department of Parole and Community Corrections under the Emergency Powers Act.

South Dakota--South Dakota revised the previously reported Dec. 31, 1989, population of inmates with maximum sentences of more than 1 year.

Tennessee--Sentencing information: Reported population with sentences of more than 1 year includes some inmates with maximum sentences of 1 year or less. As a result, the population and movements of inmates with maximum sentences of more than 1 year are overstated. Parole violators with new sentences: Include parole violators without current sentences. Other conditional release violators with new sentences: Include some probation violators without new sentences. Escapees and AWOL prisoners: Counted as a single category. Other admissions: Include returns from community corrections programs. Releases to parole: Include some mandatory releases to supervision. Other conditional releases: Include releases to community correction programs. Unknown race: Includes all inmates who are not classified as white or black. Hispanic origin: Tennessee's data system does not distinguish Hispanic origin.

Texas--Population, admissions and releases counts: Based on custody data. Parole violators with or without new sentences: Include parole violators reported as having new sentences. Other conditional release violators with or without new sentences: Include conditional release violators reported as having new sentences. Other admissions and other releases: Include an adjustment for inmates counted as being released even though they remained in the jurisdiction of a prison. Includes prisoners returning from or leaving for long-term bench warrants and medical furloughs. Other unconditional releases: Include court-ordered releases. Unspecified cause of death: include all causes of death other than by execution. Other race: Includes inmates of Hispanic origin.

Utah--Other unconditional release: Include inmates whose sentences were terminated by the Board of Pardons.

Vermont--Parole violators with or without new sentences: May include an undetermined number of other conditional release violators returned. Total inmate population: Custody and jurisdiction counts include inmates in prisons and jails, which form an integrated system in Vermont. "Lockups" operated by some cities and counties are excluded. Population and custody counts: Made Dec. 6, 1990. Race: Numbers estimated, with less than 0.5 percent of the men classified as nonwhite.

Virginia--Other admissions: Include parole revocations pending (both discretionary and mandatory), transfers, and returns from appeal or bond. Other unconditional releases: Include administrative releases. Supervised mandatory releases and paroles: Include releases to detainer and transfers from other jurisdictions. Other releases: Include an undetermined number of persons who were returned to prison pending revocation of discretionary and mandatory parole, for whom no revocation occurred, who are being returned to parole or other supervised status. Also includes 23 men and 1 woman, housed in local jails and pre-release centers, who escaped (not considered escapes from confinement since facilities are not State operated). Unspecified causes of death: Cause of death not known at time of data collection. Hispanic origin: Categorized as prisoners of unknown race.

Washington--Escapees and AWOL prisoners: Counted as a single category. Other race: Includes inmates with mixed racial origins.

West Virginia--Conditional releases, probation: Include some releases to court jurisdiction of inmates declared unfit to remain in a particular minimum security facility. Other releases: Include court-ordered releases for which conditions, if any, are unknown. Total jurisdiction population: Excluded 87 men and 15 women housed in jails solely to ease prison overcrowding.

Wisconsin--Other admissions: Include erroneous admissions. Other conditional releases: Include Special Action early releases. Other releases: Include court-ordered releases, for which conditions, if any, are unknown, and release following erroneous admissions.

Wyoming--Wyoming revised the Dec. 31,1989 , population court of male inmates with maximum sentences more than 1 year. Population, admissions, and releases counts: Based on custody data. New court commitments and unconditional releases, expirations: May include a small number of administrative turnovers-the start of a consecutive sentence. Escapees and AWOL prisoners: Counted as a single category. Other releases, men: Include releases to detainers. Other race, men: Includes Hispanic prisoners.

## Appendix 22

National Corrections Reporting Program, 1988 Methodology, offenses within categories, and jurisdictional explanatory notes

Note: The following information has been excerpted from the U.S. Department of Justice, Bureau of Justice Statistics, National Corrections Reporting Program, 1988, NCJ-134929 (Washington, DC: U.S. Department of Justice, 1992), pp. 1-5. Non-substantive editorial adaptations have been made.

## Methodology

The National Corrections Reporting Program (NCRP) collected data on prison admissions and releases and on parole entries and releases for calendar year 1988. Thirty-five States, the Federal Bureau of Prisons, the District of Columbia, and the California Youth Authority (CYA) provided data on prison admissions and releases and entries to parole. Twenty-eight States, the Federal Parole Commission, and the CYA provided data on discharges from parole. States reporting in the 1988 program were Alabama, California, Colorado, Delaware, Florida, Georgia, Hawaii, Illinois, lowa, Kentucky, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, Tennessee, Texas, Utah, Virginia, Washington, West Virginia, and Wisconsin.

Multiple admissions or releases per person during the year were recorded as separate events. The NCRP data covered prisoners admitted to or released from custody regardless of the jurisdiction where the prisoner was sentenced. Persons who were sentenced to a State prison but were admitted to or released from the custody of a local jail were included in the NCRP.

Beginning in 1983 all sentenced inmates, including those with a sentence of a year or less, were counted. To assure greater comparability across jurisdictions, the 1988 data include only inmates with a sentence of more than a year except where noted.

Data on sentence length refer to the offense with the longest sentence. Whenever a sentence had both a minimum and a maximum term, the maximum was used to define the sentence length. A life sentence was defined as any prison sentence with a fixed or maximum term of life in prison, regardless of the possibility of parole.

Time served refers to the amount of time spent in prison between the date of admission and the date of release or to the amount of time spent on parole between the date of prison release and the date of parole discharge. Time served in prison underestimates the actual time served because data on time spent in jail that was credited to the prison sentence for the current offense were not available for most inmates. All tables present data for time served in prison only.

Total time under supervision was calculated by adding time spent in prison and time spent on parole. Once again, adding jail-time credits may provide a better estimate of the total time under supervision.

The medians were calculated from ungrouped data, since sentencing data do not conform to the standard assumptions permitting calculations from grouped data. Because nearly all sentences are multiples of 12 month units, the assumption of an even distribution of values within groups is not met. Therefore, a shift of only a few cases may increase or decrease the median by 12 months.

In contrast to the calculation of medians, mean sentence lengths excluded prisoners with a sentence of life in prison or death. Medians are sensitive to the uneven distribution of cases; means are strongly influenced by extreme values. Because of the limitations of each measure, both medians and means were reported for sentence length.

Time served data do not group at 12-month intervals. Both medians and means have been reported to provide a more accurate summary of the data.

Care should be exercised when comparing 1988 data on sentence length and time served to data published for 1987 and previous years. Year-to-year comparisons should be restricted to those jurisdictions reporting data in all years of interest. Care should be exercised when comparing groups of inmates on sentence length and time served. Differences may be the result of factors not described in the tables, including variations in the criminal histories of each group, variations in the offense composition of each group, and variations among participating jurisdictions in their sentencing and correctional practices.

## Offenses within categories

Each jurisdiction's offenses were recoded to a common set of offense codes. Attempts and conspiracies were included with completed offenses, except for attempted murders and conspiracies to commit murder, which were classified as assaults.

Offense types include the following offenses:
Homicide--murder, felony murder, nonnegligent manslaughter, voluntary manslaughter, negligent manslaughter, involuntary manslaughter, and unspecified homicide.

Murder and nonnegligent manslaugh-ter---murder, felony murder, nonnegligent manslaughter, and voluntary manslaughter.

Murder--murder and felony murder.
Manslaughter--negligent manslaughter, vehicular manslaughter, involuntary manslaughter, and negligent homicide.

Nonnegligent manslaughter--voluntary manslaughter, nonnegligent manslaughter, and aggravated manslaughter.

Unspecified homicide--homicide and homicide type not specified.

Kidnaping--abduction, kidnaping, and felonious restraint.

Rape--forcible rape, aggravated rape, and sexual intercourse without consent.

Other sexual assault--statutory rape, carnal abuse, gross sexual imposition by force, fondling, child molestation, and lewd acts with children.

Robbery--unarmed robbery, armed robbery, aggravated robbery, and forcible purse snatching.

Assault-attempted murder, simple assault, aggravated assault, aggravated battery, vehicular assault, and criminal injury to persons.

Other v:-lent--extortion, intimidation, hit-and-run driving with bodily injury, child abuse, and criminal endangerment against a person.

Burglary-breaking and entering, burglary, and safecracking.

Larceny-theft, petty larceny, and grand larceny.

Motor vehicle theft--auto theft, conversion of an automobile, receiving and transferring a stolen vehicle, and unauthorized use of a vehicle.

Arson--arson and burning a thing of value.

Fraud--worthless checks, uttering, obtaining money by false pretenses, credit card fraud, fraud, forgery, counterfeiting, and embezzlement.

Stolen property--possession, transportation, receiving, or selling of stolen property.

Other property--destruction of property, vandalism, criminal tampering, trespassing, entering without breaking, and possession of burglary tools.

Drug possession--possession or use of controlled substances.

Drug trafficking-importation, manufacture, sale, or delivery of controlled substances; possession with intent to sell.

Other drug--forging or uttering a false prescription for a controlled substance; possession of drug paraphernalia, unknown drug offenses, and violations of controlled substance acts where the type of violation was unspecified.

Weapons--unlawful sale, distribution, manufacture, transportation, or possession of a deadly or dangerous weapon.

Other public-order--escape from custody, court offenses, obstruction, driving while intoxicated, other traffic offenses, drunkenness, disorderly conduct, morals and decency violations, commercialized vice, and liquor law violations.

Other offenses-juvenile offenses and unspecified felonies.

Federal offenses were recoded to many of the same categories defined above. Specific Federal categories include the following:

Embezzlement--postal, bank, and benefit plans.

Fraud--postal, passport, Veterans' and other benefits, government employment, banks, computer, and impersonation.

Counterfeiting--postal, money orders, securities, and altering or forging currency.

Regulatory-violation of banking and insurance laws, smuggling, violation of customs, election laws, food and drua laws, maritime and railroad laws, retirement act and unemployment insurance, communication law, and other regulatory provisions.

Irnmigration--illegal entry, harboring or smuggling illegal aliens, and other immigration violations.

Tax law--internal revenue violations, including tax fraud, tax evasion, and failure to pay excise, alcohol, inheritance, wit̂hholding, Social Security, or other taxes.

Racketeering and extortion-threats through the mail, over the phone, or in interstate commerce, labor racketeering, RICO, money laundering, and interference with commerce by threat or violence.

## Jurisdictional explanatory notes

## Race

Ohio codes American Indian/Alaska Natives, Asian/Pacific Islanders as "unknown."

South Carolina's parole release records code any persons other than white or black as "unknown."

## Hispanic origin

Colorado, Illinois, and Minnesota code inmates of Hispanic origin as "unknown."

In Michigan and Oklahoma, Hispanics include Mexican Americans only.

In New York, Hispanics include only persons of Puerto Rican birth or parentage.

In Oklahoma, Hispanics include only those of Mexican origin.

Texas prison admission and release records code Hispanic as "unknown."

Federal data on the Hispanic origin of inmates were not available for persons released from prison before July 1983.

## Education

Data on education in Maryland include credits from education received after entering prison for parole discharge records only.

Ohio has included an undetermined number of records of people who have a college degree in the category of "some college."

## Admission date

Data on date of admission in New York and Texas refer to the original admission date, rather than the most recent date, if inmates had been released and then returned.

For Federal offenders the date of sentencing is provided instead of the date of admission. This date is accurate for only new court commitments.

## Admission type

In Alabama, Colorado, and Ohio, "new court commitments" includes some parole violators returned with new sentences.

In Minnesota, "new court commitments" includes probation violators.

Delaware's data on admission type were reported inaccurately for an undetermined number of prison release records. Also, "transfers" includes inmates returned to Delaware after being tried in another State.

In Massachusetts, "transfers" includes returns to prison after court appearance, temporary interstate transfers, transfers from other States, Federal transfers, transfers fromi county to State custody, and transfers from other secure facilities.

In Hawaii and Maryland, "new court commitments" includes all types of admissions.

Nebraska reported the following types of admissions: regular, multiple-offender, evaluator, Federal safekeeper, county safekeeper, and other. Since these could not be translated into the NCRP categories, they were coded as "missing/invalid data entries."

In Nevada, "parole revocation, new sentence" and "parole revocation, no new sentence" may have been underreported.

In Ohio, type of admission includes an undetermined number of parole violators returned with new sentences.

In Tennessee, data on admission type were only available for a small number of cases.

In New York, admission type for parole revocations were reported for those with no new sentence only. There are no probation revocations because probation is considered a county function.

In North Carolina, "probation revocation" includes persons whose parole status was pending.

In Minnesota, "parole revocation with or without new sentence" includes mandatory parole violators returned and work release violators returned.

In Pennsylvania, "parole revocation, no sentence information" includes parole revocation with recommitment decisions pending.

In North Carolina, "parole revocation, no sentence information" includes all parole violators with or without new sentences as well as pending parole revocations.

In South Carolina, "parole revocation, no sentence information" includes revocation of "supervised furlough II releases" and Emergency Powers Act releases.

In Texas, "parole revocation, no sentence information" and "mandatory parole revocation, no sentence information" include all parole revocations, with or without new sentences.

In Wisconsin, "parole revocation, new sentence" and "parole revocation, no new sentence" include returns of inmates released early because of overcrowding.

In New York, "mandatory parole revocation with or without new sentence" includes the return of inmates who were granted early release for good time served.

On parole releases records in New York, data on admission type were reported only for parole violators with no new sentence.

In North Carolina, "mandatory parole revocation, no sentence information" includes all mandatory parole violators with or without new sentences as well as pending mandatory parole revocations.

In Pennsylvania, "escapees returned" are not considered escapes until returned from court.

In South Carolina, "escapees returned" are not counted as admissions.

In Texas, "not known" includes inmates returning from vocational or educational programs.

## Offenses

Delaware, New Jersey, North Carolina, South Carolina, and Pennsylvania reported only one offense--the most serious.

Minnesota reports only most recent offense instead of the most serious.

In Virginia and Washington, the category "life" includes "life without parole."

For Federal prisoners, only two offenses per inmate are reported, usually the two most serious. If an inmate receives an additional offense after admission that is more serious than the original offenses, the inmate's record is updated to show that offense.

## Maximum sentence and total maximum sentence

In Illinois and Maryland persons receiving indeterminate sentences were reported as "not known" for sentence length.

## Minimum time to be served

Maryland did not report "minimum sentence" because there is no statute establishing minimum sentence.

## Prison release date

In the Federal prison system and Maryland, the prison release date on parole exit records is the date parole supervision begins, not the actual release date.

## Prison release method

In Massachusetts, "parole board decision" includes some inmates released by the Massachusetts parole board to another parole board.

In New York, "parole board decision" includes some inmates released by the Division of Prisons.

In Pennsylvania "parole board decision" and "mandatory parole releases" are not distinguished.

On prison release records in South Carolina, "parole board decision" includes inmates released from a Youthful Offenders Act sentence to a straight sentence and vice versa. Also "other unconditional release" includes those inmates who paid a fine after serving some prison time; those whose sentence was reduced; those who were retired; and those released for medical reasons. On parole release records, "parole board decision" includes inmates released to supervised furlough.

In Wisconsin, "parole board decision" includes early releases because of overcrowding.

IrI New York, "mandatory parole releases" includes early releases for good time served.

In Minnesota, "other conditional releases" includes work releases.

Mississippi's "other conditional releases" includes split sentences, work release, and supervised earned releases.

New York codes "releases to custody, detainer, or warrant" as either "parole board decision" or "mandatory parole release."

In Ohio, "other conditional releases" consists of releases for educational or vocational purposes, inmates paroled or shock paroled, on detainer, and under interstate compact.

In Okiahoma, "other conditional releases" consists of releases to a community treatment center. Also, "transfers to probation and probation from house arrest" are coded as "probation release."

In South Carolina, "other conditional releases" consists of persons released by the Emergency Powers Act.

For the California Youth Authority, "other unconditional releases" includes some discharges to prison.
"Other unconditional releases" in Delaware, Maryland, Ohio, Texas, and Wyoming consists of court-ordered releases.
"Other unconditional releases" in Minnesota consists of discharges of persons with indeterminate sentences by the releasing authority.

In Mississippi, "other unconditional releases" includes shock probation, court suspensions, and court-ordered releases.

In Nebraska, "other unconditional releases" consists of persons whose sentence was vacated.

In Tennessee, "other unconditional releases" consists of unconditional releases to probation.

In Ohio, "other releases" consists of inmates-at-large who did not belong to any other NCRP category.

In Texas, "other releases" includes inmates released to attend vocational or educational facilities.

## Parole release method

In the Federal prison system, "discharged, completion of term" includes absconders and inmates whose convictions were reversed.

In New York, "other release" includes parole board decision (discretionary after 3 years) court-ordered releases; new revocations, not pursued; and cases in the revocation process in which statutory requirements were not fulfilled.

In Pennsylvania, "other releases" includes parole board case closures for persons who have reached their maximum expiration date and who are in one of the following categories: criminal charges pending, absconders, or returned to home State.

Maryiand includes inmates who failed to comply with spacial conditions of their parole as "discharged, absconder."

## Appendix 23

## National Drug and A/coholism Treatment Unit Survey (NDATUS) 1989, Main Find-

ings Report Survey methodology, data limitations, and definitions of terms

Note: The following information was excerpted from the U.S. Department of Health and Human Services, National Institute on Drug Abuse and National Institute on Alcohol Abuse and Alcoholism, National Drug and Alcoholism Treatment Unit Survey (NDATUS) 1989, Main Findings Report (Rockville, MD: U.S. Department of Health and Human Services, 1990), pp. 1-8, A1-A9. Non-substantive editorial adaptations have been made.

## Survey methodology

The National Drug and Alcoholism Treatment Unit Survey (NDATUS) was conducted as of Sept. 30, 1989. The 1989 NDATUS was a joint effort between the National institute on Drug Abuse (NIDA) and the National Institute on Alcohol Abuse and Alcoholism (NIAAA), with other Federal agencies also cooperating in the survey. The NDATUS is a national survey which is designed to measure the location, scope, and characteristics of drug abuse and alcoholism treatment and prevention facilities, services, and activities throughout the 50 States, the District of Columbia, Guam, Puerto Rico, and the Virgin Islands. The NDATUS is the only survey that includes private as well as publicly funded programs. Data collected from all treatment units include unit identification, type and scope of services provided, client capacity and utilization, selected client characteristics, sources of funding, and staffing. Prevention type facilities completed a partial survey, which includes data on unit identification and types and scope of services provided. Unless otherwise noted, all data are based on information collected as of Sept. 30, 1989.

The 1989 NDATUS was largely dependent on participation from the States to ensure proper identification of all existing active units, including new or closed units, and to assist in distributing and collecting the NDATUS forms from the participating units. Although the level of effort involved in reviewing and editing the NDATUS forms varied by State, a representative from each State attended formal training sessions to assure that he or she possessed sufficient expertise to perform the required survey functions and to provide assistance to the reporting units. To further clarify the reporting requirements, each State and reporting unit was provided a manual
containing item-by-item instructions and a glossary of definitions. On-site technical assistance was available and offered to all States. In three cases such assistance was requested and provided. In all other cases technical assistance to State staff was handled by telephone.

For this survey, an individual was counted as an active client if the following three criteria were met: (1) the individual had been admitted to treatmesit and a treatment plan had been developea; $(\underset{2}{2})$ the individual had been seen on a scheduled appointment basis at learst once during September 1989; (3) the individual had not been discharged from treatment by Sept. 30, 1989. For inpatients and residential patients, this definition applied to active clients as of Sept. 30, 1989. For outpatients, individuals were to be counted as active if they received treatment between Sept. 1 arid Sept. 30, 1989.

## Treatment unit participation

A total of 9,608 units reported data to the 1989 NDATUS. However, most of the data presented are resiricted to the 7,759 units that provide actuai treatment services to drug abuse and/or alcoholism clients. A total of 13,345 preprinted forms were mailed to the States for distribution to the programs or units. In addition, new units identified by the States were surveyed using blank forms. A total of 13,893 treatment and prevention units were surveyed. Of these units, 1,563 were either closed, reported at the program level, were no longer appropriate for inclusion in NDATUS (i.e., no longer served substance abuse clients), or reflected duplicate forms. Thus of the total surveyed 12,330 units were considered to be active units (although whether they are treatment units is not known where no response was received). Altogether, 9,608 units responded to the NDATUS, and 2,722 units did not respond. The 1989 NDATUS therefore achieved an overall response rate of 77.9 percent.

## Data limitations

There are certain procedural considerations and limitations which must be taken into account when interpreting the data from the 1989 NDATUS. The following issues should be considered:

While NDATUS attempts to obtain responses from all known treatment units, it is a voluntary survey. While the response rate is believed to be very high among freatment units, it must be recognized that treatment units which did not respond to the survey are not reflected in the data presented.

Data on the number of reporing units from the 1989 NDATUS are not comparable to data collected prior to 1987 and do not corre-
spond precisely to the 1987 NDATUS data. In the 1987 NDATUS, States were given the option of allowing units to report aggregate data at the administrative or program level rather than at the clinic level. This option had not been available in previous NDATUS efforts. Under the option, a program consisting of a number of clinics may now report data for the entire program on one survey form rather than submitting a separate survey form for each clinic in the program. Since each completed survey was counted as a single reporting unit, this optional change in reporting level had the effect of reducing the number of currently operating units when compared to previous NDATUS surveys prior to 1987. It should be noted that if the choice was made to report at the program level, then the program level entry was the only one that appeared in the National Directory. While the data on numbers of units were rendered incomparable between NDATUS efforts because of the optional change in reporting level, the data on numbers of clients were not affected by the change in reporting level. Client data were unaffected because capacity, clients in treatment, and client characteristics, etc., from all component clinics were included in the program level response. The choice to report at the program level was made either at the State level or by the units themselves. Thus the degree of reporting at the program level varied within and across States and probably varied between the 1987 NDATUS and the 1989 NDATUS.

Because NDATUS is based on a reference date, the data reported include only those clients who were in treatment as of Sept. 30, 1989. The definition of "in treatment" includes inpatients who were in the unit on Sept. 30, 1989 and outpatients who had been seen at least ance during September 1989. Clients need not have actually been seen on that date to be reported but must have been currently enrolled in the treatment program. Exceptions to the reference point reporting procedures include data on funding, on the annual unduplicated client count, and on staffing. The first two of these items cover a 12-month period, and the third covers a onemonth period. The funding data, as discussed below, are based on a 12 -month period that included the reference date: this period may vary from one unit to another. The unduplicated count of clients is the number of different clients a unit served in the 12 -month period ending with Sept. 30, 1989; thus, it is only unduplicated within units. As clients could be treated at more than one unit reporting to NDATUS within the time period covered, tabulations of the unduplicated annual client count variable may, in fact, include some multiple counting. Staffing data include all staff who worked during the month of September, regardless of whether they were still working on Sept. 30, 1989.

Since both drug abuse and alcoholism clients are reported in the combined units, it is necessary to unduplicate the count of combined units when totaling the data from units providing services to all drug abuse or all alcoholism clients. The clients can be summed, but the units cannot be totaled without counting the combined units twice.

Data on budgeted capacity by treatment modality (drug abuse) and type of care (alcoholism), especially in combined units, must be treated with caution. The inpatient or residential capacity is determined by the unit's total number of beds. However, it should be noted that in units providing multiple types of services, the same beds could be used by clients in different treatment modalities or types of care. Of greater concern is the problem of establishing a budgeted capacity figure for an outpatient unit, since some of the units responded that they had "unlimited capacity" or were unable to provide any estimate of outpatient capacity. Units that did not report budgeted capacity were excluded from the calculations of utilization rates. The utilization rate is calculated by dividing the actual number of clients by the budgeted capacity and reporting the result as a percentage.

Client caseload matrices for drug abuse and alcoholism treatment did not collect the same data items. The drug abuse matrix collected data by treatment modality and environment whereas the alcoholism matrix collected data by type of care and facility location. As units could provide multiple types of services, these matrices could contain multiple entries reflecting clients receiving different types of services. In such cases the data processing procedures ensured that the totals equaled the sum cif cilents receiving each type of service. Client demographic data were collected for drug abuse clients and alcoholism clients separately from the client caseload matrices. In the case of combined units, demographic data were collected separately for drug abuse clients and alcoholism clients. The total for each demographic category (i.e., age, gender, and race/ethnicity) was set equal to the number of clients reported in the client caseload matrix. Any initial discrepancy between the demographic total and the caseload total was included in the "unknown" demographic category. The "unknown" category, however, is excluded from any calculations based on demographic data.

In many combined units the patients' primary diagnoses did not allow a differentiation between alcoholism and drug abuse clients. In contrast to the 1987 NDATUS, however, no attempt was made tc artificially allocate clients or other data between the alcoholism and drug abuse categories; data were accepted as reported. Readers should bear in mind the underlying problem of dual diag-
noses, since any procedure in handling the data will lead to a degree of arbitrariness in defining all of the drug abuse clients or all of the alcoholism clients. To avoid the loss of usable information, obseryations with missing, incomplete, or invarilid information for individual items were retained and are excluded only from tabulations involving those items. Thus, the number of treatment units on which related tables are based varies somewhat from table to table.

The NDATUS is a census of units, not individuals. Readers are cautioned that data on client characteristics are aggregate attributes of the units and do not represent the characteristics of individual clients. Data collected in different matrices are only indirectly related. For example, data on patient characteristics were reported in a separate matrix from data on the sources of funding. Therefore, the relationship between the funding and the characteristics of the clients can only be analyzed indirectly.

Two tabulation conventions should be noted. First, tabulations of treaiment facilities are based on facilities which reported either budgeted capacity or actual clients on Sept. 30, 1989. Second, tables showing utilization rates are based on data from facilities that reported budgeted capacity; units that reported actual clients but no budgeted capacity are excluded from these tables.

## Definitions of terms

Actual clients in treatment--The actual number of active clients being treated in each type of care/modality and facility location/environment as of Sept. 30, 1989.

Aftercare/followup services--Provided after the cessation of routine treatment or recovery services provided by the unit.

Aversive techniques--Behavioral approaches to the treatment of drug abusers or alcoholics that include the use of procedures which punish unwanted actions and behaviors.

Black (not of Hispanic origin)--A person having origins in any of the peoples of sub-Saharan Africa or Haiti who does not self-classify as Hispanic.

Budgeted capacity or capacity of treatment-The maximum number of individuals who could be enrolled as active clients as of Sept. 30, 1989 given the unit's staffing, funding, and physical facility at that time. For residential and other 24-hour care units, treatment capacity is equal to the number of beds available at the unit. For outpatient units, treatment capacity reflects the maximum active client caseload a unit could carry. This maximum caseload would depend upon such factors as the percentage of staff hours devoted to direct client care, the average length of counseling sessions, and the frequency of client visits to the unit.

Child care services--Services which provide care for minor children of active clients, including supervised activities.

Crisis intervention services--Activities which provide information about the availability of services and/or provide services directly to a person on an outpatient basis when he/she is in a crisis situation. A hotline could provide this service by referring a person for emergency care or to an appropriate treatment unit.

Driving while inioxicated/aicohoi safety action program (DWI/ASAP)-These programs are designed to educate or provide referral or treatment services to persons who are arrested for Driving While Intoxicated (DWI) or Driving Under the influence (DUI). In California, these offenses are known as first offender and multi-offender drinking driver programs.

Early intervention services--These services are intended to encourage persons to seek early help for their alcohol and drug problems, provide crisis services, educate the helping professions to recognize persons with substance abuse problems and to offer appropriate services, and the like.

Employee assistance program (EAP) services--Services designed to assist employees in overcoming job performance problems. The program provides or arranges services for employees or their collaterals, which can include diagnosis, referral, counseling, education, treatment or rehabilitation, etc. The services can also include marketing of an employee assistance program.

Family counseling/therapy serv-ices--Services which are provided during the same session to members of a family/collateral group.

Group counseling/therapy serv-ices--Services which are provided to a group of clients by unit staff members. This would include but not be limited to psychotherapy, insight therapy, reality therapy, transactional analysis, and the various types of expressive groups.

Hispanic--A person of Cuban, Mexican, Puerto Rican, and all other Spanish cultures and origins, regardless of race (includes Central and South America and Spain).

Individual counseling/therapy serv-ices--Services which are provided to a client on a one-to-one basis by a unit staff member.

Outreach services--Outreach activities involve efforts in the community for early case-finding and early intervention services to drug and alcohol abusers. These services would also include efforts to educate various groups about drug and alcohol abuse.

Physical examination services--A medical examination by (or supervised by) a physician or other health professional to determine the status of an individual's health.

Research services--Activities performed by unit staff to systematically collect and/or analyze empirical data based on the scientific model of developing knowledge.

Self-help group services--Independent support groups or fellowships organized by and for drug abusers, alcoholics or their collaterals to help members achieve and maintain abstinence from and/or cope with the effects of licit or illicit drugs and alcohol. Examples are Alcoholics Anonymous, Narcotics Anonymous, Women for Sobriety, Al Anon or other non-professionally led groups such as Adult Children of Alcoholics.

Teen suicide prevention serv-ices--Services for youth, family members, and peers designed to educate, prevent, or intervene in teen suicidal behavior.

Transportation services-A service designed to provide a client with the means to travel or to move from place to place by auto or bus or other conveyance.

Treatment unit--A facility having: (1) a formal structured arrangement for alcohol or drug abuse treatment or recovery using alcohol or drug-specified personnel; and (2) a designated portion of the facility (or resources) for treatment services; and (3) an allocated budget for such treatment services. A treatment unit must directly provide services to clients at the facility's location. The unit usually offers some form of initial evaluation or diagnosis of its clients and, thereafter, may include a wide range of different services, such as counseling, job placement, or other rehabilitation services. This is also referred to as a recovery unit in some States.

Unduplicated annual client count--The number of different clients a unit served in the 12 -month period ending Sept. 30,1989 . This number is unduplicated only within units. As clients could be treated at more than one unit reporting to NDATUS at some time during the 12 -month reference period, tabulations of the unduplicated annual count may in fact include some multiple counting.

White (not of Hispanic origin)--A
Caucasian person having origins in any of the people of Europe (includes Portugal), North Africa, or the Middle East.

## Evaluation form for Sourcebook of Criminal Justice Statistics 1991

1. For exactly what purpose did you consult the Sourcebook?
2. Was the Sourcebook adequate for that purpose? [.] quite adequate [] adequate $[1$ somewhat adequate [] not adequate quite inadequate
Specifically, what helped or hindered your achieving that purpose?
3. Can you suggest data from primary sources (not found in the Sourcebook) the inclusion of which would have helped you achieve your purpose? (Please give full citations.)
4. Are there data from other primary sources which you would suggest including in future Sourcebooks?
5. Can you point out specific table notes which are not clear or additional terms which need to be defined?
6. Are there sources of data included in the Sourcebook which are of strong interest to you, but of which you were not aware before consulting the Sourcebook? (Please specify sources.)
7. To achieve your purpose, was it necessary for you to consult the original source of the data? For what reason?
8. In what capacity did you consult the Sourcebook? criminal justice agency empioyee (specify functional area) researcher $\square$ student $\square$ other governmental agency employee [] educator $\square$ other
9. On about how many separate occasions have you consulted the Sourcebook?
10. Add any additional comments you care to make.

## Selected Bureau of Justice Statistics Publications on CD-ROM

The National Economic, Social, and Environmental Data Bank (NESE-DB) CD-ROM, produced by the U.S. Department of Commerce, is a comprehensive electronic information source focusing on the U.S. economy, society, and environment.

NESE-DB presents the full text of many of the Federal Government's most popular publications on CD-ROM, including The Economic Report of the President, Toxics in the Community, Health Statistics U.S., and Digest of Educational Statistics. The following publications from the Bureau of Justice Statistics (BJS) are also included:

- Criminal Victimization in the U.S., 1990 (text and tables)
- Capital Punishment, 1990 (text)
- Crime and the Nation's Households, 1990 (text)
- Drugs and Jail Inmates, 1989 (text)
[ Felony Sentences in State Courts, 1988 (text)
- Ferriale Victims of Violent Crime (text)
- Jail Inmates, 1990 (text)
- Prisoners in 1990 (text)
- Profile of Jail Inmates (text)

Probation and Parole, 1990 (text)

- School Crime (text)
- Wornen in Prison (text)

The CD-ROM includes ASCll text, Lotus tables, and updated Browse software. It can be used on any IBM-compatible PC with at least 640K of memory, an ISO 9660 (standard) CD-ROM reader, and Microsoft CD-ROM extensions (version 2.0 or higher).

The NESE-DE CD-ROM can be purchased from the BJS Clearirghouse for \$15. For more information, call 1-800-732-3277.

[^54]
## BJS DATA ON CD-ROM

The Bureau of Justice Statistics (BJS) presents crime and justice data on CD-ROM. Prepared by the Inter-University Consortium for Political and Social Research (ICPSR) at the University of Michigan, the CD-ROM contains 24 data sets, including the following:

- National Crime Victimization Surveys: 19871989 Incident File
- National Crime Victimization Surveys: 1989 Full File
- Law Enforcement Management and Administrative Statistics, 1987
- National Pretrial Reporting Program, 1988-1989
- National Judicial Reporting Program, 1986 and 1988
- Survey of Inmates of Local Jails, 1983 and 1989
- National Jail Census, 1978, 1983, and 1988
- Survey of Inmates of State Correctional Facilities, 1974, 1979, and 1986
- Census of State Adult Correctional Facilities, 1974,
 1979, and 1984
- Survey of Youth in Custody, 1987
- Expenditure and Employment Data for the Criminal Justice System, 1971-79, 1985, and 1988

The BJS CD-ROM contains ASCil files that require the use of specific statistical software packages and does not contain full-text publications. SAS and SPSS setup files are provided.

The BJS CD-ROM can be purchased from the Bureau of Justice Statistics Clearinghouse for $\$ 15$. It is available free through ICPSR member institutions. For more information, call 1-800-732-3277.
