

FOREWORD

As a part of the Federal Emergency Management Agency's National Emergency Training Center, the Emergency Management Institute has the mission of providing training and education to the emergency managers of the nation through programs delivered both at the central residential facility in Emmitsburg, Maryland, and in the field by supporting regional, state and local efforts.

Because the limitations of a two-day course preclude covering all the elements of the field of teaching, specific content areas were defined based on assessment of the instructional needs of Emergency Program Managers.

This course seeks, within the 16-hour format, to provide the student with an operational understanding of instructional principles and techniques relevant to emergency program management at the local level. The training will provide managers with an overview of the professional job of the instructor through the use of a "four-step" teaching technique. This technique, taught in modular form, will provide an instructional systems approach to training.

INSTRUCTOR'S PREFACE

The emergency program manager must assume a number of responsibilities that are critical to the welfare of the public. These responsibilities include protecting life and property in emergency situations through coordinating the planning of emergency actions. When a crisis does occur, the emergency program manager must provide decisive field leadership.

The success of an emergency program manager's effort is directly correlated to the efficiency with which the staff carry out their assigned duties. This efficiency is acquired, in part, through classroom instruction coupled with realistic exercises.

A strong training program will help to attain the desired level of efficiency. Planning and conducting training programs, therefore, becomes an important responsibility of the emergency program manager.

This course has been developed to supplement the emergency program managers instructional capabilities. The training program has been built around a four step training process: Preparation, Presentation, Practical Application, and Evaluation.

Each of the steps in this method is a <u>planned</u> step. Successful completion of each step is made possible by identifying a variety of factors that are important to the total process and considering each of these factors as the course proceeds.

- o PREPARATION involves the <u>planning</u> of activities that will make the student want to learn and be comfortable with the training process.
- PRESENTATION involves the planning of activities that will enable the student to gain the identified knowledge and skills in the most efficient manner possible.
- o APPLICATION involves the planning of activities which allows the student to practice the skills that have been presented.
- o EVALUATION involves the planning of activities that allows the instructor to assess whether the student is able to satisfactorily meet established objectives.

Because these four steps have been identified as essentials of training, this course has been designed around them and participants are given an opportunity to apply what they have learned in carefully structured microteaching sessions.

- iii -

MATERIALS OF INSTRUCTION

Several types of educational materials have been generated for this course. They include an Instuctor Guide, a Student Manual, and a number of visual and audio-visual aids. Specific information about these materials is presented below:

Instructor Guide (IG)

The Instructor Guide is a tool for preparing and delivering the course. It has the following features:

- Each unit has learning objectives that are listed in the lesson plan for presentation to the course participants. Each objective is repeated in the instructional outline. In this way, the instructor can track along from section to section with the course objectives.
- The course content is outlined in the "content/activity" column. This is the critical course content to be communicated to the student if the course objectives are to be met. The methodology is also contained in this column.
- 3. The "instructor notes" column indicates all media support and provides cross references to the student manual where the text, illustrations, and activities can be found.
- The "time" column provides both the actual time for the activity and, in parenthesis, the elapsed time since the beginning of the unit.
- 5. The Instructor Guide corresponds very closely to the outline contained in the Student Manual. By covering the outline carefully and systematically, you will present everything contained in the text.
- 6. There are also Learning Checks which are designed to reinforce the key concepts of the course. They are referenced in the appropriate place in the methodology section and are contained in the Student Manual, Instructor Guide Text and in Appendix A.
- 7. Appendix A of the Instructor Guide contains a copy of the lesson plan format, learning checks, practicum worksheets, and participant review form. These may be reproduced, as needed, and given to the students during the course.

The Student Manual (SM)

The Student Manual was designed for use during the Instructional Techniques for Emergency Program Managers Course and as a reference for participants when they have completed the course. Each unit contains the stated objective(s); outlines of lesson content; reproductions of overhead transparencies; space for taking notes; and student learning checks. The format is designed to provide the student with the full course content to which he/she may add notes and comments as needed.

Final Evaluation

Final evaluation of the students will be done through evaluation of the microteaching segment by designated facilitators.

Audio-Visual Aids

Appendix B of the Instructor Guide includes a copy of all course transparencies and they should be reproduced on a copy machine, mounted in frames, and numbered clearly in preparation for conduct of the course.

An introductory slide/tape presentation is available through publication supply channels. A supplementary slide presentation entitled "Effective Slide Presentations" is available for use in Unit II.

This course incorporates the use of video-tape recording of the microteaching sessions. It is recommended that, if possible, the Session I microteaching be video-taped. This should be the only session recorded and the students should immediately review their presentation for the purpose of self-critiquing their performance. The two and one-half day format, page xiii, lends itself more to video-taping than does the two-day course because of time limitations.

PREPARING FOR THE COURSE

Prior to teaching the course, it is necessary to gather all of the materials needed, check to see that all equipment is in good working order and prepare the classroom. The specific time schedule should also be verified with the course coordinator. Specific materials and considerations for this course are provided below:

Materials

- Read both the Instructor Guide and Student Manual. Highlight key points and add instructional notes, as necessary.
- O Inventory all overhead transparencies, and arrange them in proper order. Be sure that slides are in proper sequence and check to see that slides are visible on the screen from any student position in the classroom.
- Preview all of the visual-aids and delete, add, or modify transparencies, as necessary, to suit the presentation to be made.

Equipment

Basic equipment required for the course includes:

- o 35mm Slide Projector with extension cord and remote control
- Cassette tape player (for 1,000 Hz pulse) synchronized with slide projector or a unit that combines slides and tape
- o Chalkboard, chalk and eraser
- Flipchart (only one necessary; one for each work session group could be used, if available)
- Overhead Projector, pointer and pens for marking on transparencies
- o Projection Screen
- o (Optional) Video equipment including camera, playback deck, and monitor(s)

Classroom Environment

The room must be physically safe. All local fire codes and safety considerations must be met. Additionally, the room must be inviting: well lit, well ventilated, spacious enough, and with good acoustics. Chairs and tables need to be comfortable and arranged to encourage sharing of ideas and productive discussions. During small group activities, tables accommodating four or five people are recommended. The instructor's podium or lectern, projection screen, chalkboard or flipchart must be clearly visible to all students.

Schedule

Check with course coordinator to confirm:

- o Time of orientation;
- o Time class actually begins;
- o Time of scheduled breaks, if any;
- o Lunch time, and
- o Any other scheduled activities which involve the course.

Note that this course can be taught in a two day or two and onehalf day format. Both schedules are found on pages x through xiii. The Instructor Guide conforms to the two day format though modification to suit the longer course is easily done by expanding the times as shown on the longer schedule.

OVERVIEW

Unit I, Introduction, will present objectives and an overview of the course.

Unit II, <u>Preparation</u>, introduces the student to the basic elements of instruction and ways of analyzing the needs of those for whom he/she will provide training and stresses the importance of motivating the learner. Next, formulation of training objectives and selection of training modes will be considered. Finally, preparation of a training environment and acquisition of appropriate equipment will be discussed.

Unit III, <u>Presentation</u>, presents the student with information on the accepted teaching methods -- Conference, Discussion, Demonstration, Illustration, and Lecture. A variety of teaching aids will be presented and discussed. Emergency managers are also concerned about the "how" of presentation, so practical tips and techniques for teaching and using teaching aids are included. During the course the instructor will be demonstrating and using proper techniques and aids, both to reinforce the course content and to serve as a model of correct instructional methods. There is also a section on dealing with different types of student behavior with emphasis on the "how to" techniques.

Unit IV, Application, focuses on practical teaching skills. The knowledge and skills obtained in Units II and III will be exercised in Unit IV.

Unit V, Evaluation, considers the various types of evaluations and the selection of the types of evaluation most useful for specific kinds of training. Evaluation design and administration will be discussed, followed by a practical exercise.

Unit VI, <u>Closing Remarks and Presentation of Certificates</u>, closes the course.

MEDIA REQUIREMENTS

- Unit I: Introduction
 - o Overview Slide/Tape Presentation
 - o Overhead Transparencies
- Unit II: Preparation
 - o Overhead Transparencies
 - o Chalkboard
 - o Flipchart

Unit III: Presentation

- o Overhead Transparencies
- o Chalkboard
- o Flipchart
- o Slide Presentation
- o Charts, Posters, and/or models

Unit IV: Practical Application

- Overhead Transparencies
 (blank for student use--up to four per student)
- o Flipcharts (one per work session group)

Unit V: Evaluation

o Overhead Transparencies

Unit VI: Closing Remarks, Presentation of Certificates

o None required

COURSE INTRODUCTION

I.	ADMINISTRATIVE ANNOUNCEMENTS	(5 min.)
II.	STUDENT AND INSTRUCTOR INTRODUCTIONS	(15 min.)
III.	COURSE INTRODUCTION AND PHILOSOPHY	(20 min.)
IV.	COURSE OVERVIEW	(5 min.)
v .	PRESENTATION OF UNIT OBJECTIVES	(5 min.)
	TOTAL	(50 min.)

LESSON PLAN NO. 1

COURSE TITLE:Instructional Techniques for Emergency Program
ManagersLESSON TITLE:Course IntroductionTIME: 50 min.

- OBJECTIVE(S): The participant will be able to identify and demonstrate the four steps of instruction: Preparation, Presentation, Application, and Evaluation.
- SCOPE: Administrative announcements; introductions (student and instructor); course introduction and philosophy; course overview, and presentation of unit objectives.
- REFERENCES: Instructor Guide Student Manual

REQUIREMENTS: The instructor will need an overhead projector and a screen. Additonally, the instructor should use the visual-aid shown in "Instructor Notes" Column in the lesson. The instructor will also need a copy of the slide/tape program, "Instructional Techniques for Emergency Program Managers," and equipment for its presentation.

> A well-lighted classroom capable of being darkened; adequate life safety considerations; adequate climate control; comfortable seating with tables; and adequate toilet facilities are essential for the entire program. Name cards will be needed for each participant.

REMARKS:

- 1. This unit will introduce and provide an overview of the course.
- 2. Two media formats are used: overhead transparencies and a slide/tape presentation.
- 3. It is essential that the classroom requirements listed above be met as they are used as examples and illustrations for material covered later in the course.

	CONTENT/ACTIVITY	TIME	INSTRUCTOR NOTES

LESSON PLAN NO. 2

COURSE TITLE:	Instructional Techniques for Emergency Program Managers
LESSON TITLE:	Preparation TIME: 3 Hours and 55 min.
OBJECTIVE(S):	The course participant will be able to demonstrate all of the activities of course preparation, as identified in this unit, to an instructor in a classroom setting.
SCOPE:	Introduction; people (the adult learner); goals and objectives of training; structuring a lesson plan; environment, equipment and instructional aids; summary; and practicum.
REFERENCES:	 Bloom, Benjamin S. ed Taxonomy of Educational Objectives, Handbook I; Congnitive Domain, David McKay Inc., New York, 1976.
	 Maslow, Abraham Harold, Almost Everything You Ever Wanted to Know About Motivating People, or Maslow's Hierarchy of Needs (film) Salenger Educational Media, 1975.
	3. Student Manual.
REQUIREMENTS:	The instructor will need an overhead projector and screen. Additionally, the instructor should use the visuals indicated in the "Instructor Notes" column throughout the lesson. Copies are included in Appendix B of this guide and can be reproduced on a photocopy machine.
	The blank lesson plan form and Practicum forms in Appendix A may be reproduced for each student as handouts.
REMARKS :	 This unit will initiate a process of lesson preparation that will culminate in two micro- teaching sessions in Unit IV.
•	2. Early in the lesson, the students should be told to select a topic suitable for prepara- tion of a seven-minute presentation; prefera- bly relative to his/her work.

IG II-2

٠

- 3. During the practicum at the end of the lesson, the students will be given time to develop both objectives and a lesson plan for the selected topic.
- 4. Learning checks one through four are provided for reinforcement of subject areas covered.
- 5. Although times are established for each teaching segment, the actual amount of time and emphasis devoted to each topic will depend on the experience and needs of the students. The instructor should take the time necessary to assess the knowledge of the students so that appropriate time can be provided where it is needed.
- 6. Because the course is built upon a tight time format, the instructor is encouraged to complete each segment within the allotted time frame.

	o Remember: Teaching does not necessarily mean learning has occurred.		
	o Situation 1: Learning is going on but the student has not practiced enough to show the desired <u>behavior</u> .		
	O Situation 2: Watching a film means there has been some teaching but there is no evidence yet that behavior has changed.		
	<pre>o Situation 3: Kerry has performed successfully. Behavior is indicated by "performed correctly."</pre>		

INSTRUCTOR NOTES	CONTENT/ACTIVITY	TIME
	LEARNING CHECKPOINTS:	
	1. Has a new skill or information been learned, or have old skills and in- formation been sharpened?	
	2. Has the skill or information been used in practice? Can the manager show you what has been learned through behavior?	
	3. Has the student done what is ex- pected? Can you as an instructor tell?	

LEARNING CHECK 1

Below are several short "learning" descriptions.

Read each one. Then use the checklist below to decide if you can tell whether or not learning has really taken place. Be prepared to justify your choice. You have 5 minutes.

Learning Situation		Learning Occurred?
Learning Situation Manager Thomas Walsh is taught National Warning System (NAWAS) pro- cedures for the first time. He understands the operations manual but in an exercise he fails to terminate the transmission correctly. 		Learning Occurred? <u>ck One</u> NO Learning is going on but the student has not practiced enough to show the desired behavior.
 A group of managers watch a film on handling hazard- ous materials emergencies. 		Watching a film means there has been some teaching but there is no evidence yet that behavior has changed.
3. Kerry Brown learns radio- logical decontamination of personnel. After practice Kerry is tested for both technique and safety prac- tices. The instructor then certifies Kerry, who has performed correctly and feels confident about the new skill.	Kerry has performed successfully. Behavior is indicated by "Performed Correctly."

DISCUSS:	Answers with students.		
0	Situation 1: <u>Security needs</u> . Students need to feel confident that they have taken necessary precautions before entering a hazardous area.		
Ô	Situation 2: Physical needs. Students will be uncomfortable without a breakadded physi- cal discomfort from hunger when they miss lunch.		
0	Situation 3: Social needs. Students enjoy training more when working in teams.		
0	Situation 4: <u>Self-Esteem</u> . Working for others they respect; their own pride in being a "pro- fessional," whether paid or not.		
LEARNING CHECK 2

Four short statements below depict students within learning situations. Identify which of the five needs (within Maslow's hierarchy) applies to each situation.

1. The new emergency program manager needs to learn precautions to take before entering a hazardous area.

SECURITY NEEDS.

Students need to feel confident that they have taken necessary precautions before entering a hazardous area.

2. A visiting radiological officer (RO) talks to a group of emergency managers for what seems like hours. When he finally gives them a break they've missed lunch and shortly have to go to another scheduled class.

PHYSICAL NEEDS.

Students will be uncomfortable without a break... added physical discomfort from hunger when they miss lunch.

3. Emergency managers critique an increased readiness exercise in groups.

SOCIAL NEEDS.

Students enjoy training more when working in teams.

4. Jim makes all meetings and exercises and has hopes of becoming the Public Information Officer.

SELF-ESTEEM.

Working for others they respect; their own pride in being a "professional," whether paid or not.

INSTRUCTOR NOTES	CONTENT/ACTIVITY	TIME
	1. Adult learning should be problem centered.	
	o Present some problems that require discus- sion.	
	o Present some problems that require physical action.	
	o Allow sufficient time for solutions.	
	o Choose problems care- fully to avoid frustra- tion due to lack of skills or knowledge.	
	2. Learning should be experience centered.	
	o Relate to experience of members.	
	o Use real examples in training.	
	3. Students should actively participate.	
	o Identify means of achieving goals.	
	o Become involved in discussion.	
	4. Students should have feedback.	
	 Informally-tell students when they are doing well, identify areas of error. 	
	 Formally - through eval- uation, qualification. 	

.

UNIT II PRACTICUM

PREPARATION

Objectives:

Through completion of a worksheet, the student will be able to apply the principles of instructional preparation presented in this Unit to a specific topic.

Directions:

The first item you must decide on is a topic/objective. This topic/objective should be selected from the cognitive domain in this course (Preparation, Presentation, Application, and Evaluation). List your topic/objective below. Your instructor will quickly check your topic and approve it or assist you in selecting an area that is appropriate for this course.

Using your approved topic, you will be required to complete the activity by recording each of the preparation items listed on pages 41-42. (Spend approximately 5 to 10 minutes on each preparation topic.)

This activity must be completed before starting the next unit. Watch your time carefully - 30 minutes maximum.

Your Topic

UNIT II Practicum

PREPARATION FOR TEACHING

Answer the following questions with reference to the topic selected:

PEÒPLE:

1. Identify the domain in which most learning should occur.

2. List two ways the audience can be motivated.

TOPICS AND OBJECTIVES:

Write out the objective for your topic identifying the A.B.C.D. A

LESSON PLAN NO. 3

COURSE TITLE:	Instructional Techniques for Emergency Program Managers
LESSON TITLE:	Presentation TIME: 2 hours 50 min.
OBJECTIVE(S):	1. The course participant will be able to define in writing appropriate teaching methods and ap- propriate instructional aids for a given topic and an identified audience.
	2. The course participant will be able to identify in writing positive and negative instructor be- havior and classroom dynamics that enhance or inhibit the presentation and reception of course material.
SCOPE:	Introduction, methodology, instructional aids, classroom dynamics, summary, and practicum
REFERENCES:	Instructor Guide Student Manual
REQUIREMENTS:	The instructor should use the visuals as outlined in the unit. Additionally, the instructor will need a chalkboard, a flipchart and markers, an overhead projector with blank transparencies, a 35 mm slide projector and a video-playback (3/4 inch) deck and monitor.
	The blank Practicum form in Appedix A may be re- produced for each participant as a handout.
REMARKS:	Introduction
	This unit stresses a variety of teaching techniques that will help students analyze what they are going to teach so they can choose appropriate methods of instruction.
	As the instructor, you are free to consider advan- tages and disadvantages of each method and visual- aid. Much of the material in this unit is covered thoroughly in the student manual for reading and reference.

In this unit it is critical to demonstrate and be a role model for the proper use of the various instructional methods and teaching aids.

As you present each method and aid, discuss techniques or practical tips that can be used to make the activity more effective.

The instructor, therefore, should focus the classroom presentation on his/her activity as an instructional role model rather than simply presenting factual information.

Teaching the Unit

The content of this unit is presented briefly in the instructor guide; you will find it helpful to review the more detailed content presented in the student manual.

Model the positive techniques of each method or instructional aid as you present it. Follow each presentation (as on the lecture method for example) with a discussion of the instructor techniques noted by participants during the presentation. Some techniques are obvious (having an outline, for example), others are more subtle (monitoring feedback and body language). Be sure to bring out the more subtle points in discussion with the participants.

Once again, the learning checks do not lend themselves to single right or wrong answers. Participants should be able to present and defend a reasonable decision.

Unit Practicum

This unit activity builds on that which ended Unit II. Be sure that participants have a clearly defined audience and have approved objective(s) when they begin the Unit III practicum. Work with the participants as they select methodologies and visual-aids; questioning and advising to help them think through their decisions.

			questions on the learning check- sheet.
			Divide total number of students by six, have participants count off by sixes and form six groups.
			Have participants share answers among group members for ten (10) minutes.

LEARNING CHECK 5

For the following case study situation choose the most appropriate method or methods of instruction for each given training topic. Be prepared to discuss your plan for presentation. There is no single "right" answer.

Your audience is a group of 12 Emergency Program Managers. They have varying levels of knowledge and experience. You have access to a suitable training area, which includes a 20' x 30' meeting room with a slide projector, an overhead projector, and a 16mm film projector. The teacher is skilled in instructional methods.

IG I

PRACTICUM (UNIT III)

PRESENTATION

- OBJECTIVES: 1. The course participant will be able to define in writing appropriate teaching methods and appropriate instructional aids for a given topic and an identified audience.
 - 2. The course participant will be able to identify in writing positive and negative instructor behavior and classroom dynamics that enhance or inhibit the presentation and reception of course material.

DIRECTIONS: You have already decided on a topic and the objective(s) for a lesson and the audience for that lesson.

Based on those two decisions, you are now ready to plan your presentation.

First, decide on the key points you need to "cover" when presenting this training.

Next, for each key point, decide which method(s) could be best used. (Remember that using several methods makes a lesson easier to remember.)

Finally, note the instructional aids you would like to use in the presentation.

Use the following pages to outline the lesson topics, methods, and instructional aids you have chosen.

The instructor may ask you to explain your choices in discussion with the rest of the class at the end of the activity.

PRACTICUM (UNIT III)

PRESENTATION

Using your approved topic, lesson title, objectives, and answers to unit I questions, consider and answer the following questions about the four key points of the presentation step.

METHODS:

1. Identify which overall method you would choose to present your lesson.

2. Explain why you chose this method.

INSTRUCTOR MANNERISMS:

1. List two positive mannerisms you can use to help teach the lesson.

2. What negative instructor mannerisms may get in the way of learning in this lesson?

PRACTICUM (UNIT III)

INSTRUCTIONAL AIDS:

- Identify the best instructional aids for your lesson. (see text for reference)
- 2. Explain why you chose them.
- 3. How could you best recover from equipment failure during instruction?

CLASSROOM DYNAMICS:

1. Label and describe a type of student problem that could arise in your class while teaching this lesson.

2. Describe the first step you would take to resolve the problem.

LESSON PLAN NO. 4

COURSE TITLE: Instructional Techniques for Emergency Program Managers LESSON TITLE: Practical Application TIME: 4 Hours 45 minutes OBJECTIVE(S): The course participant will be able to apply the principles learned in Units II and III in presentations before his/her peers.

SCOPE: Introduction, microteaching Session I, group debriefing, preparation, microteaching Session II.

REFERENCES: Instructor Guide Student Manual

REQUIREMENTS: Classroom break out space for four to six groups. One facilitator for each group. Six copies of Participant Review Form for each student. Instructional aids including flip charts, chalkboard, overhead projector, blank transparencies and markers for each group. Equipment for video-taping and viewing presentations is recommended for this session. A separate room for participant review of his/her session is also necessary.

REMARKS: Methodology: In Session I the students will be divided into groups of four to six with a facilitator for each group. Each student will make a seven minute presentation followed by a five minute peer and facilitator evaluation. This will be followed by a group debriefing and time for the student to further prepare or modify his/her presentation in preparation for Session II.

INSTRUCTOR NOTES

CONTENT/ACTIVITY

Small, facilitator moderated groups.

D. <u>Describe</u>.

 Steps in Microteaching Process

> Participants deliver short pre entation to small groups.

- Group members and facilitators comment on presentation.
- Group discussion provides feedback to presenter.
- Ways in which Microteaching reinforces classroom skills.
 - Provides reinforcement to participants
 - Raises level of participant interest
 - Allows for demonstration of:
 - Teaching with variety
 - Pacing lessons
 - appropriately
 - Using examples
 - Questioning techniques
 - Eliciting questions

o The second microteaching segment in which presentations are made to a larger group is designed to allow the student to improve upon the first segment.

Facilitators:

- Integrate participant feedback
- Reduce confusion
- Foster a climate of supportive problem-solving

Explain importance of varying repetitious sessions.

LESSON PLAN NO. 5

COURSE TITLE: Instructional Techniques for Emergency Program Managers LESSON TITLE: Student Evaluation TIME: 35 minutes

OBJECTIVE(S): Given the objective(s) of a topic, the course participant will be able to develop a valid written, oral and/or practical evaluation to measure student attainment of the objective(s).

SCOPE: Introduction; characteristics of a good test; types of tests; constructing tests; administering tests; evaluating results; summary.

REFERENCES: Instructor Guide Student Manual

REQUIREMENTS: The instructor will need an overhead projector and screen. Additionally, the instructor should use the visuals shown in the listing of visuals in the "Instructor Notes" column.

REMARKS:

1. This lesson will introduce the participant to methods of student evaluation. Emphasis in this Unit is on evaluation rather than testing though the terms are similar. Testing may have a negative connotation, particularly for the adult learner.

2. Emphasis will be placed on developing the evaluation around the objectives and the domains of learning.

- Students should be encouraged to think of the evaluation tool appropriate for his/her sevenminute presentation.
- 4. Because of the time frame, the instructor is encouraged to complete the lesson within the allotted time.
- 5. Explain to the students that the evaluation of this course was done through the microteaching segment evaluation.

LESSON PLAN NO. 6

COURSE TITLE: Instructional Techniques for Emergency Program Managers

LESSON TITLE: Closing Remarks and Presentation of Certificates

TIME: 30 min.

andar Artista and Artista and Artista Artista and Artista and Artista and Artista

OBJECTIVE(S): The participant will be able to specify verbally information learned that is applicable to his/her instructional roles.

SCOPE: Presentation of objective; course evaluation; administrative annoncements; acknowledgements; closing remarks; Presentation of Certificates

REFERENCES: Instructor Guide Student Manual

REQUIREMENTS: A prepared certificate for each successful student; where possible, a local official to make closing remarks and hand out certificates.

> The printed course evaluation form should be distributed and collected. Course ends with certificates being handed out to participants.

SAMPLE LESSON PLAN

LESSON PLAN NO. 2

COURSE TITLE: Instructional Techniques for Emergency Program Managers

LESSON TITLE: Preparation

TIME: 3 Hours

OBJECTIVES: 1. The course participants will be able to demonstrate all of the activities of course preparation, as identified in this unit, to an instructor in a classroom setting.

SCOPE:

Introduction; People (the adult learner); Goals and Objectives of Training; Structuring a Lesson Plan; Environment, Equipment and Instructional Aids; and Practicum.

REFERENCES:

 Bloom, Benjamin S., ed Taxonomy of Educational Objectives, Handbook I; Congnitive Domain, David McKay Inc., New York, 1976.

 Maslow, Abraham Harold, Almost Everything You Ever Wanted To Know About Motivating People; or Maslow's Hierarchy of Needs [Film] Salenger Educational Media, 1975.

3. Student Manual.

SAMPLE LESSON PLAN

REQUIREMENTS: The instructor will need an overhead projector and screen. Additionally, the instructor should use the visuals shown in the listing of visuals indicated in the Instructor Notes column throughout the lesson. Hard copies are appended and can be reproduced on a photocopy or "thermofax" machine.

The blank lesson plan from, SM pages 27 through 30, should be reproduced twice for each student as a handout.

REMARKS:

- 1. This lesson will initiate a process of lesson preparation that will culminate in two micro-teaching segments during the third unit.
- 2. Early in the lesson, the participant should be told to select a topic for preparation of a seven minute presentation relative to his/her work.
- 3. During the practicum at the end of the lesson, the participant will be given time to develop both objectives and a lesson plan relative to his/her selected topic.
- 4. Learning checks are provided at frequent intervals to provide for reinforcement of subject areas covered.
- 5. Although times are established for each teaching segment, the actual amount of time emphasis devoted to each topic will depend on the experience and needs of the participants. The instructor should take the time necessary to assess the knowledge of the participants so that appropriate time can be provided where needed.
- 6. Because the course is built upon a tight time format, the instructor is encouraged to complete each segement within the allotted time frame.

CONTENT/ACTIVITY TIME INSTRUCTOR NOTES					
	CONTENT /ACT		E TNS	TRUCTOR NOTES	

Below are several short "learning" descriptions.

8

Read each one. Then use the checklist below to decide if you can tell whether or not learning has really taken place. Be prepared to justify your choice. You have 5 minutes.

Learning Situation	Has Competent Learning Occurred?		
 Manager Thomas Walsh is taught National Warning System (NAWAS) pro- cedures for the first time. He understands the operations manual but in an exercise he fails to terminate the transmission correctly. 	YES	NO Learning is going on but the student has not practiced enough to show the desired behavior.	
 A group of managers watch a film on handling hazard- ous materials emergencies. 		Watching a film means there has been some teaching but there is no evidence yet that behavior has changed.	
3. Kerry Brown learns radio- logical decontamination of personnel. After practice Kerry is tested for both technique and safety prac- tices. The instructor then certifies Kerry, who has performed correctly and feels confident about the new skill.	Kerry has performed successfully. Behavior is indicated by "Performed Correctly."		

Four short statements below depict students within learning situations. Identify which of the five needs (within Maslow's hierarchy) applies to each situation.

1. The new emergency program manager needs to learn precautions to take before entering a hazardous area.

SECURITY NEEDS.

Students need to feel confident that they have taken necessary precautions before entering a hazardous area.

2. A visiting radiological officer (RO) talks to a group of emergency managers for what seems like hours. When he finally gives them a break they've missed lunch and shortly have to go to another scheduled class.

PHYSICAL NEEDS.

Students will be uncomfortable without a break... added physical discomfort from hunger when they miss lunch.

3. Emergency managers critique an increased readiness exercise in groups.

SOCIAL NEEDS.

Students enjoy training more when working in teams.

Jim makes all meetings and exercises and has hopes of becoming the Public Information Officer.

SELF-ESTEEM.

4.

Working for others they respect; their own pride in being a "professional," whether paid or not.

For each pair of objectives, determine which one is clear and which objective is more confusing. Put a check in the appropriate box.

		<u>Clear</u>	Confusing
1a	The emergency manager will become familiar with triage.		X
1b	The emergency managers will list the four levels of triage in the correct order.	<u> </u>	
2 a	The emergency manager will recite (3) reasons for having the right equipment at the scene of the emergency.	<u> </u>	
2b	The emergency manager will know which equipment to take to a specific emergency scene and how to access it.	· · · · · · · · · · · · · · · · · · ·	<u>x</u>
3a	The emergency manager will understand hazard analysis.		<u>x</u>
3Ъ	When given a community profile, the emergence manager will be able to develop a list of potential hazards.		
wri	Using terms from the useful word list force te clear objectives.	s inst	ructor to

\$ \$

Answer the following questions regarding supplies, equipment and aids necessary to teach the following lesson:

Lesson

You will be teaching a group of twenty elderly people how to access emergency assistance by telephone. (15 minutes)

1. What type of safety considerations are necessary?

2. Where would you teach this lesson?

3. Who can you contact for assistance? What will they do?

4. What equipment and instructional materials are required?

5. What other considerations are important in teaching this lesson?

For the following case study situation choose the most appropriate method or methods of instruction for each given training topic. Be prepared to discuss your plan for presentation. There is no single "right" answer.

Your audience is a group of 12 Emergency Program Managers. They have varying levels of knowledge and experience. You have access to a suitable training area, which includes a 20' x 30' meeting room with a slide projector, an overhead projector, and a 16mm film projector. The teacher is skilled in instructional methods.

UNIT II PRACTICUM

PREPARATION

Objectives:

Through completion of a worksheet, the student will be able to apply the principles of instructional preparation presented in this Unit to a specific topic.

Directions:

The first item you must decide on is a topic/objective. This topic/objective should be selected from the cognitive domain in this course (Preparation, Presentation, Application, and Evaluation). List your topic/objective below. Your instructor will quickly check your topic and approve it or assist you in selecting an area that is appropriate for this course.

Using your approved topic, you will be required to complete the activity by recording each of the preparation items listed on pages 41-42. (Spend approximately 5 to 10 minutes on each preparation topic.)

This activity must be completed before starting the next unit. Watch your time carefully - 30 minutes maximum.

Your Topic

UNIT II Practicum

PREPARATION FOR TEACHING

Answer the following questions with reference to the topic selected:

PEOPLE:

1. Identify the domain in which most learning should occur.

2. List two ways the audience can be motivated.

TOPICS AND OBJECTIVES:

Write out the objective for your topic identifying the A.B.C.D. A

B	 		
С			
D			
	· .	-	······································

UNIT II Practicum

RESOURCES:

Identify where you might obtain reference material or a lesson plan for this topic.

PLACES:

Specify where it would be best to present and apply the lesson.

THINGS:

List the audio-visual equipment that would be best used to present and apply the lesson?

PRACTICUM (UNIT III)

PRESENTATION

- OBJECTIVES: 1. The course participant will be able to define in writing appropriate teaching methods and appropriate instructional aids for a given topic and an identified audience.
 - 2. The course participant will be able to identify in writing positive and negative instructor behavior and classroom dynamics that enhance or inhibit the presentation and reception of course material.

DIRECTIONS: You have already decided on a topic and the objective(s) for a lesson and the audience for that lesson.

Based on those two decisions, you are now ready to plan your presentation.

First, decide on the key points you need to "cover" when presenting this training.

Next, for each key point, decide which method(s) could be best used. (Remember that using several methods makes a lesson easier to remember.)

Finally, note the instructional aids you would like to use in the presentation.

Use the following pages to outline the lesson topics, methods, and instructional aids you have chosen.

The instructor may ask you to explain your choices in discussion with the rest of the class at the end of the activity.

PRACTICUM (UNIT III)

PRESENTATION

Using your approved topic, lesson title, objectives, and answers to unit I questions, consider and answer the following questions about the four key points of the presentation step.

METHODS:

1. Identify which overall method you would choose to present your lesson.

2. Explain why you chose this method.

INSTRUCTOR MANNERISMS:

1. List two positive mannerisms you can use to help teach the lesson.

2. What negative instructor mannerisms may get in the way of learning in this lesson?

PRACTICUM (UNIT III)

INSTRUCTIONAL AIDS:

- Identify the best instructional aids for your lesson. (see text for reference)
- 2. Explain why you chose them.
- 3. How could you best recover from equipment failure during instruction?

CLASSROOM DYNAMICS:

1. Label and describe a type of student problem that could arise in your class while teaching this lesson.

2. Describe the first step you would take to resolve the problem.

	PARTICIPANT REVIEW FORM
NAM	E OF STUDENT INSTRUCTOR:
NAM	E OF PERSON COMPLETING THIS FORM:
LES	SON TITLE:
1.	In your own words, what was the stated objective?
2.	State what you were expected to do during this session.
3.	Did the student instructor speak clearly?
	If not, how can he or she improve?
4.	Refer to pages 46 through 55 concerning methods of instruction. Was the correct method(s) of instruction used to present the topic and attain the stated objective(s).
	to present the topic and attain the stated objective(s).
5.	Overall, what were the instructor's strong points?
6.	Overall, what were the instructor's weak points?
-	
/.	Were the instructor's objectives achieved? If not, briefly state the reason.

Participant Introductions

Name: Hometown: Job title/Function: Number of years in Emergency Management: **Reason for taking the course:** Where were you and what were you doing ten years ago?

Unit I - Course Introduction

Course Objective:

The participant will be able to identify and demonstrate the four steps of instruction:

- Preparation
- Presentation
- Practical Application
- Student Evaluation

Unit II — Preparation

Objective:

The course participant will be able to demonstrate all of the activities of course preparation, as identified in this unit, to an instructor in a classroom setting.

Preparation

- People
- Goals and Objectives of training
- Structuring a Lesson Plan
- Environment, Equipment, and Instructional Aids

- Learning Is "Observable" by the Learner and Instructor
- Learning Is a Result of Exposure to New Information or Skills
- Learning Happens After the Learner Practices the Skills/Information
- Learning Is Verified Through Testing
- Teaching Is Not Learning

Maslow's Hierarchy of Needs

Motivation

- Benefits of Learning
- Actual Experiences
- Hypothetical Situations
 - Relation to Job

Adult Learning

Problem-Centered

- Experience-Centered With Goals Meaningful to Adults
- Encourage Active Participation
- Provide Feedback Toward Progress
- Learning Speeds Differ

Identification of Training Goals

- By Committee
- By Governmental Standards
- For Qualification

From Task Analysis

Domains of Learning

2-8

Training Goals

a. **AUDIENCE** b. **BEHAVIOR** c. **CONDITIONS** d. **DEGREE**

Objective Parts

- A. Audience "The Course Participant"
- B. Behavior

"Will be able to demonstrate ... activities of course preparation"

C. Conditions

"to an instructor in a classroom setting"

D. Degree

"... demonstrate all of the activities"

Qualities of a Lesson Plan

A Good Lesson Plan . . .

- Can Be Reused
 - Identifies Key Points
 - Organizes Lesson
 - Can Be Used By Others

0

Assures Consistency

Unit III - Presentation

Objective 1:

The course participant will be able to define in writing appropriate teaching methods and appropriate instructional aids for a given topic and an identified audience.

Onit III – Presentation

Objective 2:

The course participant will be able to identify in writing positive and negative instructor behavior and classroom dynamics that enhance or inhibit the presentation and reception of course materials.

0

Ó

- Methodology
- Instructional Aids
- **Classroom Dynamics**

Instructional Methods

1. Lecture

2. Illustration

3. Discussion

4. Conference

5. Demonstration

Can be used for large groups

Moves quickly through material

 \leq

- Shows items that are small or hidden
- Shows unusual occurances
- Shows complex processes

Sharing information among participants

High degree of student involvement

For Groups with power and knowledge to interact

Effective for problem solving

Demonstration Method

Relates theory to performance

Allows students to see a physical skill

Chalkboards

- Removable
- Excellent for problem centered teaching
- Aspects of diagrams can be easily changed
- Responses can be listed during instruction

Flipcharts

- Prepared in advance
- Covered until ready
- Can be saved
- Inexpensive
- Used to capture student ideas
- Pages can be separated and posted

Charts, Posters & Models

- Purchased or prepared in advance
- Reusable
- Can be left around room for future reference
Transparencies

- Inexpensive preparation
- Can be made from printed materials using different copy machines
- Can be saved and reused
- Can be written on during presentation
- Lights can be left on
- Overlays can be added to transparency to add information sequentially

Slides and Tapes

- Inexpensive
- Adaptable
 - Equipment is portable
- Title slide can be produced by using a "menu board"
- Programs can relate to local community

Large Audience Strong Impact

Ease of Use Instant Playback Physical Skill Evaluation Student Instructor Evaluation

Establishing Rapport

- Speaking Voice
- Eye Contact
- Gestures
- Dress

Types of Questions

- Rhetorical
- Knowledge
- Comprehension
- Application
- Analysis

- Synthesis
- Evaluation
- Directed
- Overhead

Relay Questions Ask-Pause-Call 3-19

Students with Special Needs

- Fast Learner
 - Argumentative Student
 - Students with Hidden Agenda
 - Timid Students
 - **Slow Learners**
 - Inattentive Students

How To Handle Students with Special Needs

Motivate

- Seek Involvement
 - Personal Attention
 - Reinforcement
 - Feed Back

Unit IV — Practical Application

Objective:

The course participant will be able to apply the principles learned in Units II and III in presentations before his/her peers.

Unit V - Student Evaluation

Objective:

Given the objective of a topic, the course participant will be able to select a valid written, oral, and/or practical evaluation instrument to measure student attainment of the objective.

Student Evaluation

- Characteristics of a Good Evaluation
- Types of Evaluations
- Constructing Evaluation
- Administering Evaluation
- Evaluation Results

Characteristics of Good Evaluations

- Validity
- Comprehensiveness
- Ease of Administration
- Clear Directions
- Ease of Scoring

Written

Oral

Performance Skills

5-4

Evaluating In The Domains

- 1. Start with Objective(s)
