 LEGISLATIVE INDEXING VOCABULARY	 1

INTRODUCTION

The *Legislative Indexing Vocabulary* (LIV) is the Congressional Research Service thesaurus for subject searching in the CRS online data bases in the Library of Congress automated information system and for subject access in selected publications. Indexers use this controlled vocabulary to assign subject terms to public policy literature, to CRS reports, and to legislative material in a consistent fashion. The vocabulary increases retrieval accuracy and allows greater search efficiency. It is available online which helps users to narrow queries for more precise retrieval or to broaden queries for browsing and for retrieving related material.

The Twentieth Edition of the *Legislative Indexing Vocabulary* is current as of December 16, 1991, with 9,954 terms. 53% of the terms are approved indexing terms while the remainder are USE references to lead users to authorized terms. The access vocabulary has been improved with the gain of 141 new terms over the previous edition. See the list of new postable terms on p. viii-ix which include *Defense burdensharing*, *Hispanic Americans*, and *Supreme Court nominations*. In addition, four subdivisions of general application have been approved for use: *Computer files*, *Health aspects*, *Selected articles*, and *Videoprograms*.

The LIV Reference Project, which systematically reviews cross references and applies a more rigorous definition of broader and narrower relationships, continued. The review makes the hierarchical relationships more explicit through eliminating some references and changing many broader and narrower terms to related terms. Some references were added to existing terms to improve access.

From time to time, compilations of terms selected from LIV and focused on a topic have been developed. A new microthesaurus on law, lawyers, and the judiciary and another on immigration, ethnic groups, and nationalities have been compiled as a guide for online searchers and indexers. Five others have been re-issued after having had new terms incorporated, changed to a double column format, and enhancements made. The microthesauri have stimulated input for new terms to access the literature as well as provided an effective vehicle for review of the cross reference structure. See p. xi for a complete list and ordering information.

History:

In the fall of 1967 management of the Congressional Research Service (then the Legislative Reference Service) decided to convert its indexing and cataloging operations from a manual to an automated mode to improve information services to Congressional clientele and its own research staff. The decision to automate the CRS information operations pointed up the need for a standard vocabulary that was internally consistent, and the *Legislative Indexing Vocabulary* was created to satisfy this requirement.

The candidate terms for the preliminary edition LIV were selected from a variety of sources. The basic core of the vocabulary was provided by terms chosen or adapted from the two earlier CRS authority lists: the *Subject Heading Guide to the Bibliographic Index* and the *LRS Shelflist*. This nucleus was enriched by a large selection of indexing terms and USE references chosen or adapted from the *Library of Congress Subject Headings* (LCSH) and other subject heading lists, thesauri, glossaries, etc. Additional candidate terms were suggested by the indexing staff and by subject specialists of various CRS divisions. A preliminary edition was distributed in 1969 for evaluation and suggestions to this user group and many of their suggestions were incorporated in subsequent editions of the LIV by Frederick John Rosenthal. Mr. Rosenthal was responsible for the creation and subsequent development of LIV through the Thirteenth Edition in 1980.

Scope, function and format:

The scope of the LIV encompasses the broad research areas of public affairs assigned to the research divisions of the Congressional Research Service, stressing the social sciences as well as policy aspects of the pure and applied sciences. In selecting terms for the LIV, the objective is to include words or combinations of words that have significant value in indexing the current periodical and documentary literature as well as CRS reports, and that subsequently would facilitate online retrieval and automated production of references to this body of literature.

The format employed in this vocabulary facilitates the assignment of indexing terms to a document at the most appropriate levels of specificity or generality and from a variety of points of view. Cross references show both hierarchical and collateral relations among terms. The former provide a choice of indexing levels for many concepts, while the latter assist in leading the user to relevant indexing terms reflecting other aspects of the topic.

The great variety of subject areas of research assigned to the Congressional Research Service make this indexing vocabulary a mixture of general and specific, popular and technical terminology. Current terminology is aimed for as well as an optimum degree of compatibility with LCSH. Collaboration with the staff of the Library's Subject Cataloging Division has resulted in achieving a high degree of compatibility between the two systems, and many LIV indexing terms are found in the 14th edition of the LCSH and in the online and card catalogs of the Library.

LIV is intended to be a pragmatic, dynamic, and flexible tool, responsive to the needs of its user population, and it is constantly subject to revision and addition of new terms to reflect the evolving CRS data bases and requirements for indexing current affairs. Revisions and additions to the thesaurus are processed through a computerized updating and maintenance system developed here at the Library of Congress.

LIV terms are used as subject content descriptors in the major legislative files created and maintained by the Congressional Research Service. They are assigned to current periodical and documentary literature in the CRS Public Policy Literature File, to CRS reports in the CRS Products File, to Issue Briefs in the Major Issues System, and to bills and resolutions in the Bill Digest Files beginning with the 94th Congress. Though not available as a separate file in the Library's SCORPIO system, LIV terms are online in all CRS files, facilitating the checking of the Vocabulary while at a terminal. The LIVT command provides an up-to-date display of the cross reference structure for any term. The retrieve command provides automatic switching to the preferred term when a USE reference is entered. (See p. xvi-xviii.)

Acknowledgments:

Bibliographers in Library Services Division who index the periodical literature, congressional publications, CRS reports, etc. using LIV are one source of new terms. For this 20th edition, Government and Law Bibliographer George H. Walser has again been the lead person in suggesting terms for improved access. He has also been outstanding in submitting changes to bibliographic citations to reflect these new terms. Access to material on earlier Supreme Court nominations was greatly facilitated with his identification of retrospective citations before Senate consideration of Clarence Thomas to the Supreme Court. Bibliographic Assistants Lee Burwasser and Valerie Miles-Washington and Work-Study Student Jennefir J. Johnson have provided needed assistance with inputting LIV transactions and with updating microthesauri. Lee Burwasser was also helpful in the transition from data entry via terminal to data entry via microcomputer. Thanks also to John Murto, Mercedes Ondich, and other staff members in ITS who maintained the production jobs associated with LIV transactions and with this edition of LIV.

- * Terms similar to these are now postable.

- * These terms became postable LIV terms.
- ** Terms similar to these are now postable.

LEGISLATIVE INDEXING VOCABULARY MICROTHESAURI

The microthesauri identify terms in the Legislative Indexing Vocabulary on selected topics. These terms may be used in searching the CRS Public Policy Literature File, the CRS Products File, the Bill Digest files, and the Major Issues System on SCORPIO. Congressional offices may order microthesauri by calling 707-7132 and requesting the specific compilation by report number:

	<u>Report No.</u>
1) Aging and the elderly	88-752 L
2) Agriculture and food	89-512 L
3) Arms and arms control	91-714 L
4) Astronautics and space	88-397 L
5) Automation and computers	90-376 L
6) Children, families, and domestic relations	90-40 L
7) Congress and congressional operations	91-506 L
8) Crime and criminal justice	88-437 L
9) Drug abuse and control	90-143 L
10) Education	89-54 L
11) Employment and labor	88-748 L
12) Environmental protection	87-792 L
13) Federal Government spending	88-467 L
14) Foreign policy and international relations	90-367 L
15) Housing and housing finance	86-1033 L
16) Immigration, ethnic groups, and nationalities	91-670 L
17) Insurance	88-582 L
18) Law, lawyers, and the judiciary	90-584 L
19) Money and banking	88-530 L
20) National defense and military operations	91-496 L
21) Nuclear energy	87-962 L
22) Political campaigns and elections	88-671 L
23) Public welfare	91-629 L
24) Taxes and taxation	89-646 L
25) Trade and international finance	89-653 L
26) Transportation	88-524 L
27) U.S. Presidents	89-131 L
28) Water and water resources development	90-544 L
29) Women	88-710 L

SAMPLE ENTRIES AND REFERENCE EXAMPLES

Postable Indexing Term

Postable term -----> **Technological innovations**
 [Use for discussions of fundamental technological improvements or changes in materials,
Scope Note -----> production methods, processes, organization, or management which increase efficiency and
 production. For works dealing with new inventions, use *Inventions*.]

UF references lead from nonpost-
 able terms to the postable term
 under which they are displayed.

UF Innovations in technology
 Technical innovations
 Technological change

NT references lead to concep-
 tually narrower or more specific
 terms.

NT Agricultural innovations
 Educational innovations
 Medical innovations

General references lead to
 additional references

see also subdivision Technological innovations under subject terms,
 e.g., *Construction industries--Technological innovations*

BT references lead to broader
 or more general terms

BT Inventions

RT references lead to
 related terms.

 USE Technological innovations <---- Postable term to be used for Technical innovations

USE reference -----> Technological change <----- Nonpostable term
 USE Technological innovations <---- Postable term to be used for Technological change

SUGGESTIONS FOR THE USER

Although these suggestions are directed to the indexer, many will be equally useful to the searcher of CRS data bases: they will explain how certain indexing terms are intended to be applied in the CRS environment and thereby also help guide other LIV users in their searching operations.

ALPHABETIZATION:

Alphabetization of indexing terms is word by word, and the words are displayed letter by letter in alphabetical order. Each complete word is displayed in turn. All terms beginning with a given combination of letters as the first complete word in a term precede any term beginning with the same combination of letters as only part of the first word. Nonalphanumeric characters, e.g. hyphens, are usually treated as spaces. Representative sequences of terms displayed according to the described method follow:

Navigation
Navigation (Aeronautics)
Navigation satellites
Navigational aids
Navigational aids (Aeronautics)

President and foreign policy
Presidential aides
Presidential-Congressional relations
Presidential election statistics
Presidents

DIRECT ENTRY:

Indexing terms consisting of two or more words are listed in their natural word order, i.e., the order normally used in English sentences: *Absentee voting* rather than Voting, Absentee; *Child welfare* rather than Welfare, Child.

SPECIFICITY OF INDEXING:

Follow the time-honored library practice of indexing to [or searching for] the most specific term available. Look for **Defense budgets** if that is what you want rather than Budgets because you think the LIV will not have Defense budgets. Look for **Automobile insurance** rather than Insurance if that type of insurance is all that you're interested in.

On the other hand, when looking for a term in the LIV in a downward hierarchical direction, i.e., when looking for an indexing term by going from the general to subordinate topics by means of narrower term (NT) references, keep in mind that ordinarily only one hierarchical level or reference is displayed under any given term. For example, under **Transportation** you will find an NT reference to **Railroads**, but no further references to railroad topics. To obtain these, you should look up **Railroads**, where you will find an array of more specific railroad topics displayed as NT references such as **Highspeed trains**.

SCOPE NOTES:

Scope notes are used to indicate how the indexing term is to be applied within the CRS environment. Often they will distinguish between the indexing term they are meant to define and a second, or even third, indexing term that might be more appropriate to the item to be indexed. (See also p. xxii.) In a few cases, the scope note will indicate when the term became postable, e.g., *Election districts*.

Examples: Presidents

[Use only for works related to the U.S. presidency. For foreign presidents, use *Politics and government*, geographically subdivided; for foreign presidential powers, use *Executive power*, geographically subdivided; for foreign presidential elections, use *Elections*, geographically subdivided, etc.]

West (U.S.)

[This term is to be used only as a geographic descriptor and may not be subdivided. It may, however, be used to subdivide topical indexing terms. The area comprises that part of the United States situated west of the Mississippi River.]

Election districts

[This term used beginning September 1984. Earlier materials can be found under the term *Political representation*.]

CORPORATE ENTRIES - EXCEPTIONS:

A certain number of corporate entries that ordinarily would be entered in Library of Congress (LC) cataloging under "U.S." may in the LIV be entered in different form:

Air force--U.S.
Army--U.S.
Congress

House of Representatives
Navy--U.S.
Presidents

Senate
Supreme Court
Vice Presidents

These exceptions are to be made only when these corporate entries are indexed as the subject matter of documents. When any of the above are entered as authors, the appropriate LC corporate entry form should be used.

SUBDIVISIONS OF GENERAL APPLICATION:

Effective use of the 59 subdivisions of general application (p. xxxi-xxxixi) enhances indexing and searching. For example, medical care of the poor is indexed as *Poor--Medical care*. The future of space programs is indexed as *Space programs--Future*. Legal cases on campaign funds in the U.S. is indexed as *Campaign funds--U.S.--Legal cases*.

While such subdivisions as **Law and legislation**, **Research**, **Statistics**, etc. are permissible they are not applied when such aspects of a topic have already been combined in the LIV with the topic proper into an authorized indexing term. Examples of such combinations are *Civil rights legislation*, *Astronautical research*, and *Educational statistics*. These combinations replace Civil rights--Law and legislation, Astronautics--Research, and Education--Statistics.

Corporate entries may be subdivided by many of the 59 subdivisions of general application in the same manner as regular indexing terms, e.g., *Senate--History*; *Congress--Public opinion*; *U.S. Dept. of Defense--Bibliography*; *United Nations--Chronology*, etc. Personal name entries may also be subdivided by some of the subdivisions of general application, e.g., *Carter, Jimmy--Public opinion*; *Kennedy, John F.--Bibliography*; *King, Martin Luther--Addresses, statements, etc.* Several of the subdivisions of general application may also be used with the names of U.S. public laws, e.g., *Flood Control Act--Legislative histories*.

GEOGRAPHIC SUBDIVISIONS:

While the *Library of Congress Subject Headings* permit geographic subdivision of subject headings as well as topical subdivision of geographic headings (depending upon the topic), the LIV directs that topics are to be subdivided geographically, e.g., *Education--France*. In addition to subdividing a topic, geographic terms may also serve as indexing terms in their own right. In such cases, however, they may not be subdivided. A geographic term may be used as an indexing term when the document to be indexed deals with a geographic topic (say, a country) in such a way as to cover a large number of aspects of that geographic topic, which it is not advisable to index separately. Such unsubdivided geographic terms are to be entered in field 651.

Some LIV terms are limited in their application to the U.S. and may not be subdivided. Examples are: *Presidential powers*, *Congress*, and *Pocket veto*. A few others may only be subdivided by the name of states, cities, etc., e.g., *Medicare*, *Presidential primaries*. Other terms such as *Congressional Medal of Honor* and *Universal language* are by their very nature not susceptible of geographic subdivision.

The question that may present indexers with some difficulty in the beginning is whether or not to subdivide geographically. In general, indexers should be guided by the consideration that where a topic is treated in a document specifically from a geographic point of view, or where the CRS research interest in that topic is geographically oriented, the

topic should be subdivided geographically. If, however, the geographic aspect of a topic is merely incidental to an author's discussion, and the topic itself is one that is not important from a geographic point of view, omit the subdivision. In the final analysis, indexers should always keep the researchers' probable interest in mind.

To provide a consistent approach for indexing documents dealing with Washington, D.C. or the District of Columbia, use **District of Columbia** as the authorized geographic subdivision, e.g., *Monuments and memorials--District of Columbia; Police--District of Columbia*. Washington, D.C. may, however, appear as an integral part of an indexing term, such as in *Capitol (Washington, D.C.)* or *White House (Washington, D.C.)*, this being brought out by the city's name being shown in parentheses.

AMERICAN STATES:

Because of the special interest in CRS research in state history, state laws, state taxation, etc., special indexing terms have been provided reflecting this interest. Therefore, in such cases use *State laws--Maryland*, not *Law--Maryland*; *State history--Iowa*, not *History--Iowa*; *State taxation--Alabama*, not *Taxation--Alabama*. This will permit the grouping together of such entries for faster searching or display. There is also a subdivision of general application for discussions of the states collectively in relation to a specific topic, e.g., *Civil service system--U.S.--States* (see p. xxxvii).

ONLINE CONSULTATION AND RETRIEVAL:

Consult LIV online using the SCORPIO system for the most current source of vocabulary information. New terms or changes are reflected online within two days of their incorporation. Use the LIVT command for a display of the cross reference structure for a term. Use the EXPN command if you would like to create a set as well as view the cross reference structure for a term.

Example: livt petroleum prices

PETROLEUM PRICES

Broader terms:

T01 Energy prices

Related terms:

T02 Petrodollars

T03 Petroleum

expn petroleum prices

LIVT IS THE SOURCE FOR THE EXPN COMMAND:

SET 1 998: SLCT SUBJ/PETROLEUM PRICES

PETROLEUM PRICES

Broader terms:

T01 ENERGY PRICES

Related terms:

T02 PETRODOLLARS

T03 PETROLEUM

For a list of new postable terms since the issuance of this edition, type **help newlivt while in a SCORPIO file.**

When a term is entered that is a see reference in the controlled vocabulary, the authorized form of the term will be searched with the Retrieve command. If *Gun control* is input, records with the authorized term *Firearms control* will be retrieved. If *Trust funds* is requested, then records with either *Government trust funds* or *Trusts and trustees* will be retrieved.

Gun control

USE Firearms control

Trust funds

**USE Government trust funds
Trusts and trustees**

retr subj/gun control

retr subj/trust funds

Occasionally, two LIV terms should be combined for an aspect of a topic. For example, *Promotions* when combined with *Federal employees* retrieves materials about promotion among this group of workers while *Promotions* combined with *Postal employees* or *Promotions* with *Women lawyers* retrieves material about other aspects of the topic.

MANUAL FOR BUILDING AND MAINTAINING THE LEGISLATIVE INDEXING VOCABULARY

INTRODUCTION:

These rules are designed to help the CRS staff of indexers to make similar decisions with respect to the addition and modification of terms in the Legislative Indexing Vocabulary. Although these are not rules for indexing per se, they will be invoked when an indexer or indexing unit supervisor find that there is no term in the LIV that is satisfactory for expressing an important concept found in a document. When this occurs, the indexer will recommend an appropriate term to express the concept. That term then becomes a candidate for inclusion in the LIV. The rules are to be applied both in the selection of candidate terms and in the final decision on whether to include the candidate term as an approved indexing term in the LIV.

TERM SELECTION:

Indexing terms are any single or multiword terms which appear in the Vocabulary and which may be used for indexing a document. Rules for selecting terms are as follows:

1. Indexing terms should represent important concepts found in the literature rather than concepts derived independently, and should be selected on the basis of their effectiveness in connoting useful retrieval concepts.
2. Generally, it is best to establish indexing terms that convey specifically the subject matter indexed and periodically to review the frequency of their use to determine their utility.
3. Indexing terms should be selected with a view to their relationships to terms that have been selected previously. Candidate terms will be examined to determine that they reflect a level of specificity commensurate with that of the existing structure (as well as of operating requirements) and that they represent discrete concepts. Avoid the selection of terms whose meanings coincide so closely with those of established terms that indexers and searchers will have difficulty in distinguishing between them.
4. Terms selected should have an agreed-upon meaning within the CRS environment and should be acceptable terminology within this environment. Acceptability will involve decisions as to current usage and other factors. Acceptability of terms will be determined by consulting dictionaries, encyclopedias, other indexing vocabularies, and the opinion of CRS subject specialists. While the present rules for term selection and construction serve as principal guidelines, compatibility with the *LC Subject Headings* will also be an important consideration in the selection of indexing terms.

5. In keeping with established practice, noun forms will be used wherever possible: *Competition* rather than *Compete*; the gerund *Teaching* rather than the verb form *Teach*.

6

6. Multiword terms (i.e. indexing terms consisting of two or more words) are in natural word order. Multiword terms should be used whenever single-word terms cannot describe a concept adequately or provide effective retrieval. If a single-word term is so general as to be virtually useless in searching (e.g., *Research*; *Statistics*; *Women*), consider combining it with another term (e.g., *Economic research*, *Medical statistics*; *Women lawyers*) to produce a more specific indexing term.

SINGULAR vs. PLURAL:

Generally, the plural form should be used for indexing terms in keeping with the precedent long established by major indexing and subject cataloging operations. Some exceptions are made for specific processes, properties and conditions; also for nouns where common usage dictates the use of the singular.

Plural form examples:

Federal budgets
Microcomputers
Runaway children
Surveys
Voting machines

Singular form examples:

Economic theory
International law
Metric system
Oxygen

ABBREVIATED WORD FORMS:

Abbreviated and unabbreviated forms of a given term are treated as synonyms and cross referenced accordingly, e.g., *ICBM USE* *Intercontinental ballistic missiles*. Some well established acronyms have been adopted as indexing terms, e.g., *Radar*, *Lasers*, and *Pulsars*.

HYPHENIZATION:

Words occurring normally in hyphenated form are treated according to the following criteria:

- (1) Compound adjectives, noun-noun combinations, and letter-word combinations retain the hyphen:

Employee-management relations	Federally-assisted loans
Four-day week	Nuclear-weapon-free zones
Self-care	X-rays

- (2) Words with normally prefixed syllables are spelled as unhyphenated words:

Antiamerican demonstrations	Anticolonialism
Counterinsurgency	Nonselfgoverning territories

Exceptions are:

Ex-Members of Congress	Ex-mental patients
Ex-offenders	Ex-Presidents
Ex-prisoners of war	Post-traumatic stress disorder

SYNONYMS AND QUASI-SYNONYMS:

When two or more candidate terms are true synonyms, one term will be selected as the postable indexing term, the other(s) entered as a USE reference.

To prevent scattering of like information in indexing and to obviate multiple searches for effective retrieval of information, it is both practical and desirable to consider terms having certain relationships to be synonyms for indexing and retrieval purposes, i.e. quasi-synonyms. Terms representing concepts that overlap significantly may be treated as quasi-synonyms: Drug addiction and *Narcotic addiction*; Farm labor and *Agricultural labor*. The preferred term (chosen on the basis of current usage and consistency with the rest of the vocabulary terms) will be entered as an indexing term, the other as a USE reference.

Terms that represent different viewpoints of the same general concept, such as *Inflation* and Deflation, may be considered quasi-synonyms. The preferred term will be entered as an indexing term, the other as a USE reference.

USE REFERENCES:

USE references are to be employed for the following types of nonpostable terms:

1. To indicate a preferred synonym:
Freedom of assembly USE Right of assembly
2. To refer from a specific term to a more general term which has been selected to represent (i.e., subsume) the specific concept:
Campaign literature USE Political paraphernalia
National holidays USE Holidays
3. To indicate a preference between spelling variations or to expand or explain abbreviations:
Flammable materials USE Inflammable materials
ICBM USE Intercontinental ballistic missiles
4. To express concepts that can be considered synonyms for purposes of indexing and retrieval:
Bolshevism USE Communism
Companies USE Corporations
5. To bring together different viewpoints of a conceptual continuum:
Segregation in education USE Desegregation in education
6. To explain variations or preferences in word order:
Government and computers USE Computers and government
7. To indicate selection of a compound term, reference is made from component parts of the compound term:
Congressional immunities USE Congressional privileges and immunities
8. To refer from a partial expression of a term to a fuller expression:
Medal of Honor USE Congressional Medal of Honor
9. To reflect current terminology:
Atomic energy USE Nuclear energy

TERM DEFINITION:

Terms that have more than one accepted meaning, that are intended to be used in a somewhat different way than ordinarily defined, or for which distinctions from other terms must be drawn, should be accompanied by an explanation. The meanings of terms will be clarified or made more specific in the following ways:

1. Modifying terms may be used to preface a given term, as in **Constitutional conventions** to make the meaning of the word conventions more specific. This is the method underlying the construction of natural language entries.

2. A parenthetical qualifying expression may be appended to a term to clarify meaning, e.g., to distinguish among the meanings of homographs, as in **Grading (Agricultural products)** and **Grading (Students)**. Such qualifying expressions become parts of the terms and should be entered with one space between the left parenthesis and the preceding character.

3. When a qualifying expression can't adequately convey the intended meaning, an explanation called a scope note will follow the term in brackets. It will not be a dictionary definition of the term, but will merely indicate the way in which the term is to be defined and is intended to be used within the CRS indexing and searching operations. The scope note is not a part of the indexing term.

Examples:**Civil rights**

[Use for works dealing with the constitutional and legal status and treatment of minority groups that are marked off from the majority by race, religion, national origin, sex, or age. For works dealing with the rights and liberties of individuals, use *Civil liberties*.]

Technology transfer

[Use for discussions of the application of results of scientific and technical research from one field of study to another. Use also for the transfer of advanced technology from one country to another. In the latter case, subdivide the term by the region or country transferring the technology and use the second subdivision to name the country or region receiving the technology, e.g. *Technology transfer--U.S.--Developing countries*.]

CROSS REFERENCE STRUCTURE:

Relationships among indexing terms are shown by cross references (USE, UF, NT, BT, RT) to aid users in selecting appropriate terms for either indexing or searching.

NOTATION	EXPLANATION AND USE
USE	<p>The USE reference leads from a nonpostable term, i.e., a term that can not be used in indexing and searching, to a valid or postable term that can be used. A USE reference leads from synonyms, near-synonyms, quasi-synonyms, abbreviations, alternative spellings and alternative word sequences - all of which are essentially equivalent - to a valid or postable term. A USE reference may also lead from specific terms not used in indexing or searching to more generic terms, such as <i>Book censorship</i> USE <i>Censorship</i>, where it has been decided that the term <i>Book censorship</i> is unnecessarily specific and that the more generic term <i>Censorship</i> will suffice for retrieval purposes.</p>
UF	<p>The UF or USED FOR reference is the reciprocal of the USE reference. The UF reference which appears under a postable term helps to define that term by telling the user that the main term includes the concept represented by the UF entry. For example, <i>Censorship</i> UF <i>Book censorship</i> states that for indexing purposes materials on book censorship are included in the concept <i>Censorship</i>. Further, the listing of the UF entry provides the user with negative information that the search can not be attempted using the concept listed as UF, or that there is no need to look up <i>Book censorship</i> for one would merely be referred back to <i>Censorship</i>.</p>
NT	<p>The NT notation stands for NARROWER TERM. Narrower terms are valid terms representing concepts that are generically more specific than the main term. Under the main entry <i>Ships</i>, the NT reference <i>Merchant ships</i> indicates that the latter term represents a more specific concept than the main entry term, which includes all classes of ships.</p>

NOTATION	EXPLANATION AND USE
BT	The BT notation stands for BROADER TERM and is the reciprocal of the NARROWER TERM. Broader terms represent more inclusive or more general concepts than the main entry term. Using the preceding example, under the main entry <i>Merchant ships</i> , the BT reference <i>Ships</i> indicates that the latter term represents a more general or inclusive concept than the main entry term, which is confined to a specific class of ships.
RT	The RT or RELATED TERM notation precedes a listing of postable terms that are neither broader nor narrower than the main entry term but are to some degree related conceptually to that term. Such RT references provide the collateral term relationships in a thesaurus that would not ordinarily be apparent if the user were to think only in terms of a hierarchical scheme. They serve to alert users to terms in which they may be interested, either as indexers as searchers.

There is a complementary, or reciprocal, entry elsewhere in the LIV for all cross references. For every USE entry, there is a reciprocal UF entry; for every NT entry, there is a reciprocal BT entry; conversely, for every BT entry, there is a reciprocal NT entry; and for every RT entry, there is a reciprocal RT entry.

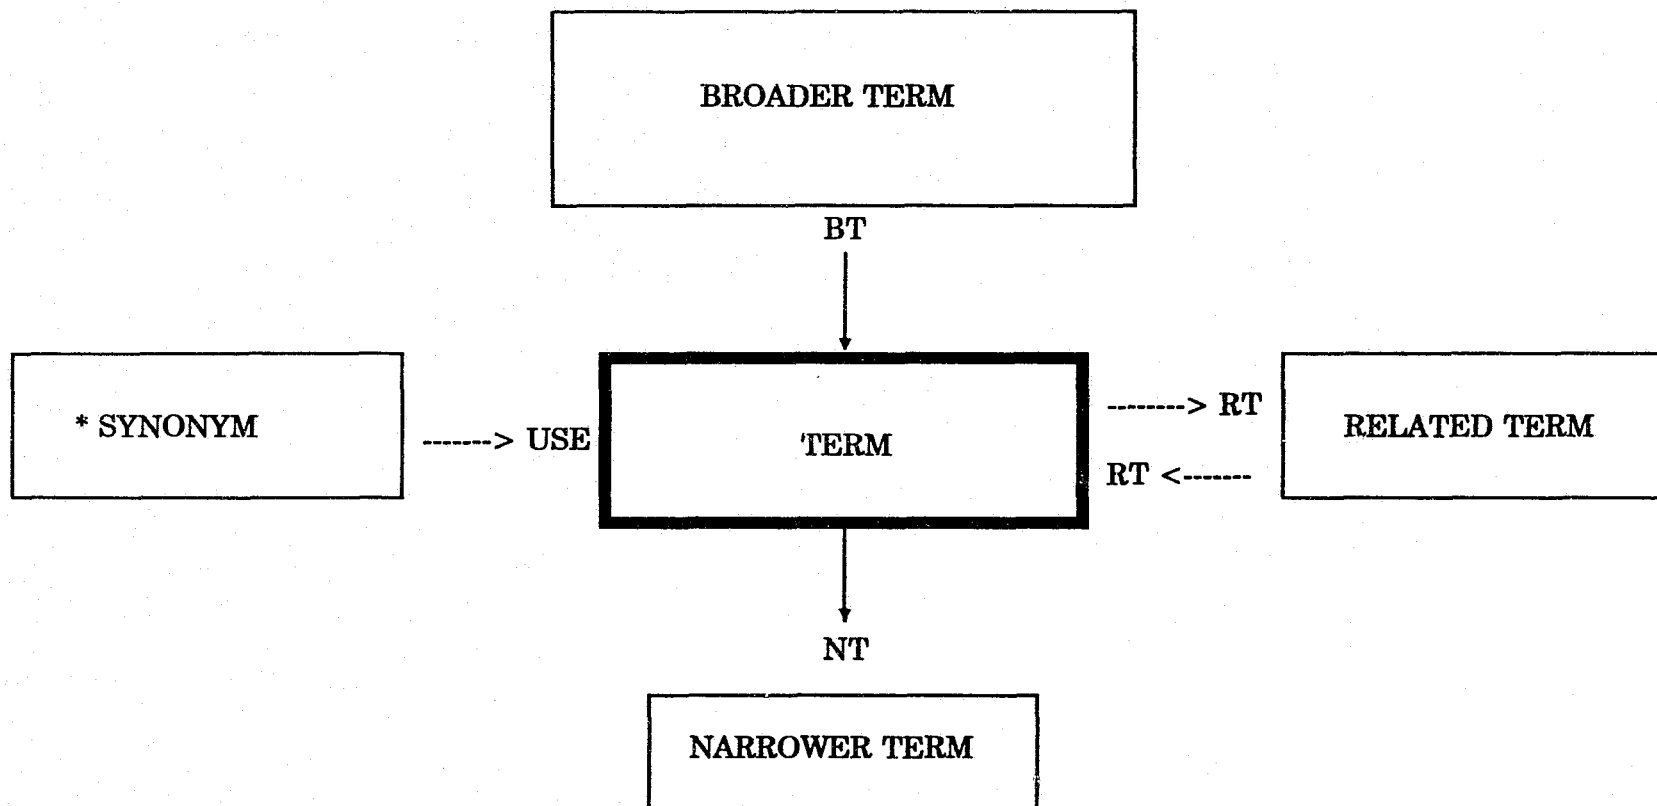

The order in which the notations appear under a valid or postable LIV term, when appropriate, is as follows:

UF - USED FOR
NT - NARROWER TERM
BT - BROADER TERM
RT - RELATED TERM

In addition to these specific cross references to and from indexing terms, the user is, in certain instances, referred to other indexing terms by general references in phrase form. Such general references serve two functions. The first is to avoid excessively lengthy enumerations of NT references under a given indexing term. Under the term *Crime and criminals*, for example, the number of NT references is fairly large to begin with. The general reference, "see also terms beginning with the word Criminal" guides the user to additional NT references. At the same time the NT display is kept to a reasonable size, a consideration of some importance for the user of the online LIV, who must consult cross references at a CRT terminal, where display possibilities are limited by the size of the screen.

A second function is to suggest to the user additional NT references as examples without having to list exhaustively all possible members of a class. A single example will suffice to illustrate the point: Under *Minorities*: "see also specific races, peoples, ethnic groups, e.g., *Blacks*, *Jews*, etc.; *Vietnamese--U.S.*, etc.; *Greek Americans*, etc."

CROSS REFERENCE STRUCTURE

This diagram is loosely based on a diagram included by Richard S. Angell in a paper presented in 1971 at an international symposium. Angell, Richard S. Library of Congress Subject Headings - Review and Forecast. *In* Subject Retrieval in the Seventies: New Directions. Edited by Hans (Hanan) Wellisch and Thomas D. Wilson. Westport Conn., Greenwood Pub. Co., 1972. p. 155. Z695.S89

* May also be near-synonyms, quasi-synonyms, abbreviations, alternative spellings, and alternative word sequences. The term may be a more specific term not used in indexing.

GEOGRAPHIC SUBDIVISIONS:

Discussions of otherwise general topics are frequently limited to specific countries, states, cities, or regions. To indicate such geographic treatment, many indexing terms in the LIV may be qualified - or subdivided - by showing the name of a country, political entity, or geographic region, etc. following the indexing term. The indexing term and the geographic qualifier are separated by a double dash:

Newspapers--Baltimore
 Newspapers--California
 Newspapers--Central America
 Newspapers--District of Columbia
 Newspapers--North Central States
 Newspapers--U.S.S.R.

**DO NOT SUBDIVIDE GEOGRAPHIC OR
 POLITICAL ENTITIES WHEN THESE
 ARE USED AS INDEXING TERMS.**

Terms qualified by a geographic subdivision may also be subdivided by a subdivision of general application. However, only one such level of additional subdivision is permitted for any term, e.g.:

Education--Belgium--Bibliography
 Education--District of Columbia--Public opinion
 Education--U.S.--Presidential messages

The order of entry is: 1) indexing term, 2) geographic or political entity, 3) topical or form subdivision.

To indicate bilateral relations among certain political or geographical entities, such as is the case in foreign relations or foreign economic relations, for example, a geographically qualified indexing term may be subdivided by another geographic or political entity. In every such case, the reciprocal relation must also be indexed, e.g.:

Foreign economic relations--China--Africa
 Foreign economic relations--Africa--China

Foreign relations--Middle East--U.S.
 Foreign relations--U.S.--Middle East

For some terms, the geographically qualified indexing term is subdivided by another geographic political entity with no reciprocal relation indexed. See the scope note for the terms for an indication of how the two geographic subdivisions are used.

Aerial bombing--Israel--Lebanon
 Annexation (International law)--U.S.--Philippines
 Armed forces abroad--U.S.--Western Europe
 Arms sales--U.S.--China
 Capital movements--Developing countries--U.S.
 Covert operations--U.S.--Nicaragua
 Dumping--Communist countries--U.S.
 Military intervention--U.S.S.R.--Afghanistan
 Nuclear warfare--U.S.--Japan
 Prisoners of war--U.S.--Vietnam
 Strategic bombing--U.S.--Germany
 Technology transfer--OECD countries--U.S.S.R.

Discussions stressing foreign aspects of a topic without, however, specifying individual countries or regions, or those discussing more than three such foreign countries or regions, may be subdivided as follows:

Education--Foreign
 Water resources development--Foreign--Law and legislation

A few indexing terms express the geographic aspect of a topic in phrase form rather than by subdivision. Under *Economic assistance*, for example, the scope note directs that economic assistance rendered by a specific country be shown by a phrase term, such as *American economic assistance*. (The recipient country, continent, etc. - if any - however, is to be indicated by a geographic subdivision after the phrase term.) The term *Economic assistance* itself is not to be subdivided by geographic terms. *Agricultural assistance*, *Military assistance*, and *Technical assistance* have similar phrase forms. Use Soviet in preference to Russian with these terms, e.g., Soviet military assistance. See also the scope note for *Foreign investments* and the general references for *Alien property* and *Minorities*.

GEOGRAPHIC TERMS IN THE LEGISLATIVE INDEXING VOCABULARY

This is a list of geographical descriptors in the *Legislative Indexing Vocabulary*. Other geographic terms may be used as needed. All postable terms are boldfaced.

Antarctic regions**Appalachia**

Appalachian Economic Development Region

USE Appalachia

Arab countries**Arctic regions****ASEAN countries****Comecon countries****Communist countries****Developed countries****Developing countries****East North Central States****EEC countries**

CATEGORIES OF TERMS OMITTED:

In order to keep the size of the LIV within reasonable bounds, the following categories of indexing terms are omitted and Bibliographers or indexers must supply the specific names required in the field indicated in parentheses.

1. Names of persons. (*Field 600*)
2. Names of families. (*Field 600*)
3. Corporate names:
 - a. Names of societies, clubs, etc. (*Field 610*)
 - b. Names of institutions, such as colleges, libraries, hospitals, etc. (*Field 610*)
 - c. Names of governments and their agencies. (*Field 610*)

Exceptions (*Field 650*):

Air force	Presidents
Army	Senate
Congress	Supreme Court
House of Representatives	Vice Presidents
Navy	

4. Names of places and regions, except when they form an integral part of other terms or when they appear as examples of geographic subdivision:
 - a. Political units: countries, states, provinces, counties, cities, metropolitan areas, etc. (*Field 651*)
 - b. Groups of states or countries, e.g. Maritime Provinces, Baltic States, etc. (*Field 651*)
 - c. Natural or geographic features: mountains, islands, rivers, oceans, lakes, etc. (*Field 651*)
5. Names of structures, such as bridges, canals, dams, reservoirs, buildings, historic houses; etc. (*Field 651*)
6. Parkways, roads, streets, etc. (*Field 651*)
7. Parks, forests, wildlife refuges, etc. (*Field 610*)
8. Ships. (*Field 610*)
9. Names of Indian tribes. (*Field 610*)
10. Public laws, proposed bills, treaties, etc. (*Field 610*)

Terms from these categories of names appear in the LIV only if they are used as examples.

SUBDIVISIONS OF GENERAL APPLICATION

Most of the indexing terms in the LIV are selected with a view toward fully expressing a concept in single or multiword terms. There are, however, certain aspects of many topics that recur with sufficient frequency to warrant the provision of subdivisions. To keep the size of the vocabulary within reasonable bounds (i.e., in order to avoid having to enumerate all possible applications of subdivisions in the body of the vocabulary), the permissible subdivisions are enumerated below with scope notes to indicate how the subdivisions are to be applied. (Additional comments on the application of subdivisions will be found on p. xv, xxvii-xxviii.)

The following 59 subdivisions may be used under any indexing term (except geographic names) as required or appropriate. The 33 bolded subdivisions are also postable indexing terms.

Addresses, statements, etc.

Appropriations

Authorization

Bibliography

Biography

Chronology

Computer files

Conferences

Costs

Wages

Addresses, statements, etc. Use as a form subdivision under topical indexing terms, names of individuals, or names of corporate bodies, e.g., *Energy policy--U.S.--Addresses, statements, etc.* For presidential messages, use the subdivision *Presidential messages*. For collections of newspaper and magazine articles compiled by CRS, use the subdivision *Selected articles*.

- * **Appropriations** Use under topical indexing terms or names of governmental bodies for documents discussing actual appropriations of public funds, e.g., *Executive departments--U.S.--Appropriations; U.S. Dept. of Defense--Appropriations*. For documents discussing the authorization of appropriations, use the subdivision *Authorization*.
- * **Authorization** Use under topical indexing terms or names of governmental bodies for documents discussing the authorization of appropriations of public funds, e.g., *Space programs--U.S.--Authorization*. For documents discussing actual appropriations, use the subdivision *Appropriations*.
- * **Bibliography** Use as a form subdivision under topical indexing terms for lists of books, reports, magazine articles, newspaper articles, etc., which pertain to those topics, e.g., *Balance of payments--U.S.--Bibliography*. For lists of works by or about one person or organization, use the subdivision *Bibliography* under the name of the person or organization, e.g., *Kennedy, John F.--Bibliography; U.S. Congressional Budget Office--Bibliography*.
- * **Biography** Use as a subdivision only for general collective biographies, e.g., *Scientists--Biography; Women--Biography*. Index biographies of individual persons under the name of the individual (in field 600) without subdivision.
- * **Chronology** Use under topical indexing terms or under names of persons for listings of events in order of occurrence, e.g., *International relations--Chronology; Presidential primaries--Chronology*.

Computer files Use as a form subdivision under topical indexing terms for material in machine-readable formats such as CD-ROMs, data disks, or floppy disks, e.g., *Census--Computer files*.

- * **Conferences** Use as a form subdivision under topical indexing terms to designate collected papers delivered at, or published on the occasion of, named or unnamed individual conferences; reports of the proceedings and discussions, program statements, lists of delegates, etc., of such conferences; or combinations of both, e.g., *Energy policy--Conferences; International trade--Conferences*.

Costs Use under types of industries, processes, services, or institutions, or under names of disciplines, for the actual outlay of money, time, labor, etc., while carrying out normal activities, e.g., *Grocery trade--Costs; Canning and preserving--Costs; Information services--Costs; Hospitals--Costs; Education--Costs*. Do not use the subdivision *Costs* for topics where phrase terms have been provided, e.g., *Construction costs; Labor costs; Social costs*.

Dictionaries Use as a form subdivision under names of languages; under topical indexing terms for works consisting of comprehensive, alphabetical lists of terms pertaining to those topics; or under topical indexing terms for encyclopedic works on those topics, e.g., *Arms control--Dictionaries; Environmental protection--Dictionaries*.

Directories Use as a form subdivision under topical indexing terms, classes of persons, types of corporate bodies, or names of particular corporate bodies for the names, addresses, and other identifying data of persons or organizations connected with the entities named, e.g., *Federal officials--U.S.--Directories*.

Economic aspects Use under appropriate indexing terms for works which discuss economic aspects of a particular topic, e.g., *Energy facility sites--U.S.--Economic aspects*. Do not use under topics for which phrase terms have been provided, e.g., *Agricultural economics; Defense economics; Medical economics*. Use a more specific subdivision if appropriate, e.g., *Costs, Fees, Finance, Prices, Wages*.

Environmental aspects Use under types of industries, processes, machines, constructions, or chemicals for environmental problems associated with their operation, creation, or use, e.g., *Automobiles--Environmental aspects; Heavy metals--Environmental aspects; Nuclear power plants--Environmental aspects*. Do not use under topics for which phrase terms have been provided, e.g., *Pesticide pollution; Water pollution*.

Equipment and supplies Use under names of disciplines, types of processes, industries, services, laboratories, or institutions, as well as under names of individual corporate bodies, e.g., *Solar heating and cooling--U.S.--Equipment and supplies*. Do not use under topics for which phrase terms have been provided, e.g., *Medical instruments and apparatus; Military and naval supplies; Optical instruments*.

Evaluation Use under types of products, institutions, or services for discussions of the ability of equipment to perform as required or on the value of programs or tasks carried out, e.g., *Computers--Evaluation; Public health--Evaluation; Libraries--Evaluation*. Do not use the subdivision *Evaluation* for classes of persons. Do not use under topics for which phrase terms have been provided, e.g., *Curriculum evaluation; Disability evaluation*.

Fees Use under classes of professional persons, or types of services, institutions, etc., for charges for services rendered, e.g., *Architects--Fees; Information services--Fees*. Do not use under topics for which phrase terms have been provided, e.g., *Dental fees; Legal fees; Medical fees*.

Film catalogs Use as a form subdivision under topical indexing terms for catalogs of pictorial media intended for projection, i.e., motion pictures, filmstrips, slides, video tapes, etc., on particular topics, e.g., *Drug abuse prevention--U.S.--Film catalogs*.

* **Finance** Use under types of industries, services, technical operations, or corporate bodies, as well as under names of individual corporate bodies, for the raising and expenditure of funds, e.g., *International agencies--Finance*. For the raising of funds of governmental bodies, see scope notes under the subdivisions *Appropriations* and *Authorization*. Do not use the subdivision *Finance* under topics for which phrase terms have been provided, e.g., *Educational finance*; *Housing finance*; *Railroad finance*.

* **Future** Use under topical indexing terms for works discussing (or illustrating by means of graphs, statistics, etc.) trends, projections, predictions, etc., concerning the indexed topic, e.g., *Natural resources--Future*; *Space programs--U.S.--Future*.

Graphs and charts Use as a form subdivision under topical indexing terms for data presented in the form of graphs and charts pertaining to such topics. When the number of graphs and charts on separate topics would require an excessive number of indexing terms, a broader term encompassing the concepts of the more specific terms should be used, e.g., *Commercial aviation--Graphs and charts* instead of *Air travel--Graphs and charts*, *Airline passenger traffic--Graphs and charts*, *Airline rates--Graphs and charts*, *Airports--Graphs and charts*, *Commercial aircraft--Graphs and charts*.

Health aspects Use under appropriate indexing terms for works which discuss the health effects or impact of a specific activity, product, substance, or technology, e.g., *Smoking--Health aspects*; *Contraceptives--Health aspects*.

* **History** Use under topical indexing terms for descriptions and explanations of past events within a particular field of knowledge, e.g., *Congressional powers--History*. Do not use the subdivision *History* under topics for which phrase terms have been provided, e.g., *Military history*; *Naval history*.

* **International cooperation** Use under topical indexing terms for international cooperative activities with or without the active participation of governments, e.g., *Postal service--International cooperation*; *Marine mammal protection--International cooperation*. Do not use under topics for which phrase terms have been provided, e.g., *International agricultural cooperation*; *International cooperation in science*.

Law and legislation Use as a form or topical subdivision under topical indexing terms, e.g., *Right of privacy--U.S.--Law and legislation*. Do not use under topics for which phrase terms have been provided, e.g., *Constitutional law*; *Irrigation laws*; *Water law and legislation*. See also these subdivisions: *Appropriations*, *Authorization*, *Legislative histories*, *Municipal ordinances*, and *State laws*.

Legal cases Use for compilations or discussions of court decisions on particular topics, e.g., *Campaign funds--U.S.--Legal cases*.

- * **Legislative histories** Use as a form or topical subdivision under topical indexing terms or corporate names for works documenting the chronological legislative steps or procedures leading to legislation pertaining to the topic or corporate entity, e.g., *Foreign relations--U.S.--Legislative histories; National Labor Relations Act--Legislative histories*.
- * **Licenses** Use under types of professions, employees, occupational groups, etc., or under particular types of industries or businesses for discussions of the permission granted in accordance with law by competent authority to engage in business or perform work, e.g., *Aircraft pilots--Licenses; Nuclear power plants--Licenses*. Do not use under topics for which phrase terms have been provided, e.g., *Driver licenses; Patent licenses*.
- * **Management** Use under types of industries or businesses, industrial plants or processes, special activities, names of disciplines, as well as under names of particular government agencies, for works which discuss the function of planning, organizing, directing and controlling an enterprise, activity, or affairs within a particular discipline, e.g., *Metal trade--Management; Strip mining--Management; Engineering--Management; U.S. Veterans Administration--Management*. Do not use the subdivision *Management* for topics for which phrase terms have been provided, e.g., *Farm management; Hospital administration; Office management*.
- * **Mathematical models** Use to subdivide topical indexing terms for materials which represent the operation of a specific process or system in mathematical terms, e.g., *Air pollution control--Mathematical models; Economic conditions--Asia--Mathematical models*.
- * **Medical care** Use under classes of persons, particular occupational groups, or ethnic groups for professional medical care received, e.g., *Aged--Medical care; Minorities--Medical care*. Do not use under topics for which phrase terms have been provided, e.g., *Child health services; Veterans' medical care; Women's health services*.
- * **Municipal ordinances** Use as a form or topical subdivision under topical indexing terms, e.g., *Building laws--U.S.--Municipal ordinances; Plant shutdowns--Pittsburgh--Municipal ordinances*.
- * **Periodicals** Use as a form subdivision under topical indexing terms for serials issued indefinitely at regular intervals, generally more frequently than annually, each issue of which normally contains separate articles or other writings, e.g., *National defense--U.S.--Periodicals*. In the CRS Public Policy Literature File, this subdivision is also used for the citation of sample issues of periodicals.
- * **Planning** Use under kinds of services, facilities, institutions, etc., e.g., *Heliports--Planning; Educational facilities--Planning; Hospitals--Planning*. Do not use under topics for which phrase terms have been provided, e.g., *Health planning; Transportation planning; Urban planning*.

Political activities Use under classes of persons or occupational groups, kinds of organizations or particular organizations, e.g., *Minorities--Political activities; Teachers--Political activities; Army--Nigeria--Political activities*. Do not use under topics for which phrase terms have been provided, e.g., *Aged in politics; Labor union political activities; Women in politics*.

* **Presidential messages** Use as a form or topical subdivision under topical indexing terms, e.g., *Federal employees--U.S.--Presidential messages; International cooperation in science--Presidential messages*.

* **Prices** Use under kinds of merchandise, products, etc., for amounts demanded for them at the time of sale on the market. Use also under types of industries where one general term for the products of that industry is lacking, e.g., *Construction industries--Prices*. For prices of professional services, use the subdivision *Fees*. Do not use under topics for which phrase terms have been provided, e.g., *Agricultural prices; Automobile prices; Energy prices*.

Pro and con Use as a subdivision under topical indexing terms for works discussing or presenting arguments for and against the indexed topic, e.g., *Capital punishment--U.S.--Pro and con; Congressional veto--Pro and con*.

* **Public opinion** Use under topical indexing terms for discussions or results of surveys on the predominant attitudes of a community on a topic, e.g., *Drug abuse--U.S.--Public opinion*. To bring out the location of the persons having the opinion, make a second indexing entry of the following type: *Public opinion--U.S.*

* **Research** Use under topical indexing terms for descriptions of proposed or ongoing research in particular subject fields, including such details as management, finance, personnel, special projects, methodology, goals, etc., e.g., *Space shuttles--U.S.--Research*. Do not use the subdivision *Research* under topics for which phrase terms have been provided, e.g., *Brain research; Fuel research; Military research*.

Safety measures Use under types of objects, chemicals, materials, machines, installations, industries, or activities, or names of disciplines, for discussions of measures to be taken to prevent accidents or injury, e.g., *Nuclear reactors--U.S.--Safety measures*. Do not use under topics for which phrase terms have been provided, e.g., *Radiation safety; Transportation safety*.

* **Salaries** Use under names of professional, administrative and clerical personnel for fixed compensations regularly paid. Do not use to subdivide terms for which phrase terms have been provided, e.g., *Executive compensation; Judicial compensation; Military pay*. For the remuneration of classes of laborers and others for work performed on an hourly, daily, or piecework basis, use the subdivision *Wages*.

Scenarios Use as a subdivision under topical indexing terms for materials presented as a narrative description of a sequence of events that could or might occur in the future, e.g., *Electoral college--Scenarios*. Scenarios are a distinctive form of simulation and are identified as such by the use of the word "scenario" in the material.

Security measures Use under types of buildings, establishments, installations, industries, or names of corporate bodies, including particular government agencies, for discussion of measures to be taken, including the use of security personnel, to prevent espionage, sabotage, observation, theft, etc., e.g., *Capitol (Washington, D.C.)--Security measures*. Do not use under topics for which phrase terms have been provided, e.g., *Computer security measures*; *Nuclear security measures*.

Selected articles Use as a form subdivision under topical indexing terms for collections of newspapers and magazine articles compiled by the Congressional Research Service, e.g. *Presidential elections--Selected articles*.

- * **Simulation methods** Use to subdivide topical indexing terms for materials which discuss comprehensively the development or use of several types of models for studying particular systems, processes, or concepts. For works which discuss the simulation of a particular system, process or concept using only one model type (e.g., mathematical models, gaming models, etc.) assign only the topic appropriate for the model type, e.g., *Air pollution control--Mathematical models*; *War games*.

Social aspects Use under appropriate indexing terms for works which discuss the impact of the item, activity, principle, or discipline in question on modern society and vice versa, e.g., *Agriculture--Social aspects*; *Energy facility sites--U.S.--Social aspects*; *Urban renewal--U.S.--Social aspects*. Do not use under topics for which phrase terms have been provided, e.g., *Business and social problems*; *Technology and social problems*.

- * **Standards** Use under topical indexing terms, particularly under kinds of materials or equipment, names of disciplines, or kinds of establishments, for descriptions of the example or model set up and established by authority which all others should follow, e.g., *Grain--Standards*; *Electric engineering--Standards*; *Libraries--Standards*. Do not use under topics for which phrase terms have been provided, e.g., *Industrial standards*.
- * **State laws** Use as a form or topical subdivision under topical indexing terms for discussions or compilations of laws or legislation of the major administrative divisions of countries organized on a federal basis, e.g., *Age (Law)--California--State laws*; *Workers' compensation--U.S.--State laws*.

States Use to subdivide names of countries whose major administrative divisions are called states (e.g., United States) for discussions of the states collectively in relation to a specific topic. Use the subdivision only when the name of the country is itself used as a subdivision under a topical term, e.g., *Civil service system--U.S.--States*.

- * **Statistics** Use as a form subdivision under topical indexing terms for compilations of numerical data pertaining to such topics, e.g., *Military personnel--Hawaii--Statistics*. Do not use the subdivision under topics for which phrase terms have been provided, e.g., *Labor statistics*; *Legislative statistics*; *Population statistics*.

Study and teaching Use under topical indexing terms for works which discuss both methods of studying and teaching in the field in question, as well as educational facilities and activities in that field, including institutions, courses, programs, students, funds, etc., e.g., *Mathematics--U.S.--Study and teaching*. Do not use under topics for which phrase terms have been provided, e.g., *Agricultural education*, *Environmental education*; *Medical education*.

- * **Supplemental appropriations** Use under topical indexing terms or names of governmental bodies, e.g., *Executive departments--U.S.--Supplemental appropriations*.

- * **Tariff** Use under terms for products on which import (or in some cases export) duties are imposed by governments, e.g., *Automobiles--Foreign--Tariff*.

- * **Taxation** Use under topical indexing terms for discussions of the taxes which are levied on income-producing activities, on articles of value, or applying to particular classes of persons, especially employed persons, e.g., *Petroleum industry--Taxation*; *Hospitals--Taxation*; *Drugs--Taxation*; *Investments--Taxation*; *Single people--Taxation*. Do not use under topics for which phrase terms have been provided, e.g., *Commuter tax*; *Property tax*; *Taxation of foreign income*.

- * **Technological innovations** Use under technical topics for discussions of the processes by which new products or techniques in these fields are developed and introduced into the economic system, e.g., *Computers--Technological innovations*.

- * **Treaties** Use as a form or topical subdivision under topical indexing terms, e.g., *Wheat trade--U.S.--Treaties*. Do not use under topics for which phrase terms have been provided, e.g., *Consular agreements*; *Fishery agreements*; *Peace treaties*.

Trends Use as a subdivision under topical indexing terms for materials describing or discussing trends or changes in the course of time pertaining to such topics, e.g., *Women's employment--U.S.--Trends*. Trends indicate changes that most typically are historical, ending with the present. Materials discussing "future trends" should be subdivided by the subdivision Future. Materials on trends are usually identifiable by the presence of the words "trends" or "changes" in the title, abstract, or text.

Videoprograms Use as a form subdivision under topical indexing terms for materials presented on videotape, e.g., *Congressional oversight--Videoprograms*.

* **Wages** Use under classes of laborers and others for remuneration of work performed on an hourly, daily, or piecework basis, e.g., *Blue collar workers--U.S.--Wages*. Do not use under topics for which phrase terms have been provided, e.g., *Agricultural wages*. For fixed compensation regularly paid to professional, administrative, and clerical personnel, use the subdivision *Salaries*, e.g., *Federal officials--U.S.--Salaries*.

GUIDELINES FOR THE SUBMISSION OF CANDIDATE INDEXING TERMS

1. When considering the need for a candidate indexing term, determine whether:
 - a. the term will be used with sufficient frequency to warrant its addition;
 - b. it is sufficiently distinctive to differentiate it from already existing terms;
 - c. a somewhat broader term already in the vocabulary will not serve equally well, especially if there are not too many records to which it has been applied before.
2. Examine the LIV Manual (p. xviii-xxx) for rules concerning the construction and form of the recommended term.
3. Give the source or authority for the candidate term:
 - a. Examine the 14th edition of the *Library of Congress Subject Headings*, the online SCORPIO Library of Congress Cross References file, or the online MUMS subject authority records to see whether the recommended term is already represented there. If it is, show whether it is listed as subject heading in its proposed form, as a subdivision, as an inverted heading or in some other form. If the LC subject heading is an outdated or obsolescent term, recommend a candidate term in current usage. Print relevant citations from the Library of Congress Computerized Catalog (LCCC) or MUMS.
 - b. If the Library of Congress has not established an appropriate term or if the LC heading is outdated or obsolete, examine periodical indexes to see whether (and in what form) the candidate term has already been established. Also, check dictionaries, glossaries, encyclopedias, etc., for possible alternative forms and list them as well. Photocopy as needed.
 - c. If no authority is found for the candidate term, submit the recommendation together with the materials intended to be indexed by the candidate term. Discussion with the analyst(s) in the area may be helpful.
4. As needed, add a clear, concise definition or scope note, indicating how the candidate term is to be applied for indexing in the CRS environment. Print selected citations from the CRS Public Policy Literature File and CRS Products File to show how the proposed term could be applied.
5. Examine the LIV and recommend cross references that ought to be made to and from LIV indexing terms. Keep in mind the principle that NT references should be made only to conceptually narrower terms and BT references may need to be deleted from an existing postable term.
6. Submit synonyms or similar terms from which USE references ought to be made to the candidate term.
7. Recommendations should be sent to Shirley Loo in LM-221 (Library Services Division, CRS).

Mediation

[A voluntary process for conflict resolution between disputants characterized by the intervention of an impartial third party and often involving joint problem solving. Originally designed to resolve industrial disputes, it is now accepted as a successful method for achieving settlement of disputes in a wide variety of fields. The mediated conflict is resolved when the parties themselves reach what they consider to be a workable solution that they can live with.]

- RT Natural areas

National security

[Use for works about "the ability of a nation to protect its internal values from external threats." Such works can be classified under two themes:

1. "The view that national security is concerned primarily with maximizing national power in conflict situations...based on the assumption that a nation can be secure only if it increases its power at the expense of another nation or nations." Works written from this point of view deal with national security in terms of military policy, economic policy, and civil-military relations.
2. An emphasis on "the minimizing of national power" and a stress on "conscious efforts to increase international cooperation...based on the assumption that the security of a nation can increase if the security of all nations increases."
