Introduction

The Federal budget for programs devoted to the Nation's fight against illegal drugs has seen unprecedented growth — both proportionally and in real dollar terms — since the Administration took office in January 1989. President Bush inherited a Fiscal Year 1989 drug budget that totalled \$6.4 billion. His current proposal for Fiscal Year 1992 drug programs totals \$11.7 billion, a \$5.3 billion or 82 percent increase.

Because Federal partnership with State and local anti-drug efforts is a central goal of the President's National Drug Control Strategy — and because State and local effort is ultimately the linchpin of national success — the Administration has proposed comparably large increases specifically for programs that provide direct assistance to non-Federal initiatives. The Federal budget for drug-related grants to State, local, and private agencies has now grown from \$1.3 billion in Fiscal Year 1989 to a Presidentially-proposed \$2.7 billion in Fiscal Year 1992, a \$1.4 billion or 108 percent increase. New grant programs have been created; a large number of others have been sizably expanded.

State, local, and private agencies face an array of possible sources for Federal drug-related grant assistance. More than once in the past two years, this Office has been contacted by potential grantees who are confused about what Federal drug assistance their jurisdictions and communities are *already* receiving, and what Federal programs remain available but yet untapped. This document catalogs Federal programs that make drug-related grants to States, localities, and private agencies.

Its first section describes and provides budget and application information for 51 programs in five Cabinet Departments and ACTION. Funding of these principal programs is counted as specifically drug-related in the Federal budget. Seven other programs that may be of related interest to State, local, and private agencies concerned with drugs and drug use are similarly enumerated in the second section of this white paper. A number of appendices list consolidated budget information and the names, addresses, and telephone numbers of regional and State officials through whose offices most listed programs and funds are directed.

Directory of Federal Anti-Drug Grants

This document will be updated and published annually, and it is my hope and intention that its wide and targeted distribution will help ensure that all available Federal drug-related assistance is fully and effectively used.

Bob Martinez
*Director, Office of National
Drug Control Policy*

National Drug Control Programs

Department of Education

Office of Elementary and Secondary Education

Drug-Free Schools State and Local Grants Program. This is a formula grant program that allocates funds to States based on school-age population. Each State's allocation is divided between the State educational agency (SEA) and the Office of the Governor. The SEA must allot at least 90 percent of the funds it receives to local education agencies (LEAs) to improve anti-drug abuse education, prevention, early intervention, and rehabilitation referral programs. The Governor provides financial support for anti-drug abuse efforts to community-based organizations. At least 42.5 percent of the Governor's funds must be used for programs for high-risk youth. Approximately \$497.7 million is available in FY 1991 to support this program. For FY 1992, \$497.7 million is requested. A table showing State allocations for FY 1990 through 1992 is included in Appendix A. A list of contacts in each State and Territory for the programs funded through the Governor's office and programs funded through the SEA is included in Appendix B.

Demonstration Grants Program. The purpose of this program is to award grants to institutions of higher education (IHEs) and consortia of IHEs for model demonstration programs coordinated with local elementary and secondary schools for the development and implementation of quality drug and alcohol abuse education and prevention programs. For FY 1991, approximately \$5 million was appropriated, of which approximately \$3.2 million is available for new grant awards. Grants will range from \$100,000 to \$500,000, with the average size of awards around \$320,000. An estimated ten awards will be made. Application materials were available on February 4, 1991. Applications were due by March 15, 1991. For FY 1992, \$5.1 million is requested.

Emergency Grants Program. This program provides assistance to LEAs that demonstrate a significant need for additional assistance in combating drug and alcohol use. Districts compete for funding to support a comprehensive range of services, including educational programs, counseling programs, enhancement of school security, after-school programs, programs for parents and other community outreach efforts, and alternative programs for students with a history of drug abuse or others who are difficult to reach in the regular school setting. Approximately \$24.3 million is available under this program in FY 1991. Grants will range from \$100,000 to \$1 million, with the average size of awards around \$500,000. An estimated 50 awards will be made. Application materials were available on February 22, 1991. Applications were due by April 5, 1991. For FY 1992, \$49.5 million is requested.

Federal Activities Grants Program. This program supports the development, implementation, dissemination, and evaluation of educational strategies and programs that are designed to prevent substance abuse. State educational agencies, LEAs, IHEs, and other nonprofit agencies, organizations, and institutions are eligible for award. Approximately \$5 million is available under this program for grants in FY 1991. Grants will range from \$100,000 to \$400,000, with the average size of awards around \$250,000. An estimated 20 awards will be made. Application materials were available on February 4, 1991. Applications were due by March 15, 1991. For FY 1992, \$5 million is requested.

School Personnel Training Program. This program provides financial assistance to SEAs, LEAs, and IHEs to establish, expand, or enhance programs and activities for the training of elementary and secondary school teachers and administrators, and other elementary and secondary school personnel concerning drug and alcohol abuse education and prevention. Approximately \$20 million is available for awards under this program in FY 1991. Grants will range from \$100,000 to \$300,000, with an average award of \$136,000. Applications for school personnel training grants for FY 1991 were due by February 22, 1991. An estimated 147 awards will be made. The Department has requested \$20 million for this program in FY 1992.

Counselor Training Grant Program. This new program, authorized by the Crime Control Act of 1990, will provide \$3.4 million in FY 1991 for the training of counselors, social workers, psychologists, or nurses who are providing or will provide drug abuse prevention, counseling, or referral services in elementary and secondary schools. State educational agencies, LEAs, IHEs, and private nonprofit agencies are eligible to apply. Deadline for applications is tentatively scheduled for July 1, 1991. Grants will range from \$50,000 to \$100,000 with the average size being around \$75,000. An estimated 45 awards will be made. For FY 1992, \$3.4 million is requested for this program.

Information. For further information on any of the programs listed above or to request application materials, please call the Drug-Free Schools and Communities Division at (202) 401-1599, or write:

Drug-Free Schools and Communities Division
Office of Elementary and Secondary Education
Department of Education
400 Maryland Avenue, SW, Room 2135
Washington, D.C. 20202

Regional Centers for Drug-Free Schools and Communities. The Department awarded five cooperative agreements for regional centers to: (1) train school teams to assess and combat drug and alcohol abuse

problems; (2) assist SEAs in coordinating and strengthening alcohol and drug abuse education and prevention programs; (3) assist LEAs and IHEs in developing training programs for educational personnel; and (4) evaluate and disseminate information on effective substance abuse education and prevention programs and strategies. The Centers are as follows:

For Indiana, Illinois, Iowa, Michigan, Minnesota, Missouri, Nebraska, North Dakota, South Dakota, and Wisconsin:

Midwest Regional Center
North Central Regional Educational Laboratory
Elmhurst, Illinois
Contact: Judson Hixson
(708) 571-4700

For Alabama, the District of Columbia, Florida, Georgia, Kentucky, North Carolina, Puerto Rico, South Carolina, Tennessee, Virginia, Virgin Islands, and West Virginia:

Southeast Regional Center
University of Louisville
Louisville, Kentucky
Contact: Nancy J. Cunningham
(502) 588-6852

For Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, and Vermont:

Northeast Regional Center
Super Teams, Ltd.
Sayville, New York
Contact: Gerald Edwards
(516) 589-7022

For Arizona, Arkansas, Colorado, Kansas, Louisiana, Mississippi, New Mexico, Oklahoma, Texas, and Utah:

Southwest Regional Center
University of Oklahoma
Norman, Oklahoma
Contact: John Steffens
(405) 325-1454

For Alaska, American Samoa, California, Guam, Hawaii, Idaho, Montana, Nevada, Northern Mariana Islands, Oregon, Trust Territory of the Pacific Islands, Washington, and Wyoming:

Western Regional Center
Northwest Regional Educational Laboratory
Portland, Oregon
Contact: Robert Rath
(503) 275-9476

A portion of the funds under the Regional Centers Program has been set aside for a project to provide support to the five regional centers. Their responsibilities include collecting and disseminating information on regional center activities, collecting and disseminating information on model alcohol and drug education and prevention activities, providing technical assistance to the centers in carrying out their responsibilities, and coordinating and supporting national workshops and conferences.

Office of Postsecondary Education

The grant competitions that follow are funded from the Institutions of Higher Education Student Programs. Funding for these competitions totals \$14.1 million in FY 1991, distributed as indicated in the competition descriptions. For FY 1992, \$14.4 million is requested, although the distribution of the requested funds among the competitions has not yet been established.

Approaches to Accountability in Prevention Programs. This program supports the formulation of promising new approaches to individual and institutional leadership and responsibility as they relate to drug abuse education and prevention for students in IHEs. Institutions of higher education and consortia of IHEs are eligible to apply. Approximately \$80,000 is available in FY 1991. Grants are for nine months beginning February 15, 1991, and ending November 30, 1991. The maximum amount of a grant under this competition was \$15,000. Applications were due by October 25, 1990.

Institution-Wide Program. Grants to IHEs and consortia of IHEs under the program support comprehensive, institution-wide programs designed to prevent or eliminate students' use of illegal drugs and abuse of other drugs and alcohol, including activities whose direct or indirect purpose is to train students, faculty, and staff in drug abuse education and prevention. Approximately \$11.951 million is available under this program in FY 1991. The estimated range of awards is \$10,000 to \$250,000, with the average size of awards around \$100,000. An esti-

mated 100 awards will be made. Application materials were available on October 19, 1990. Applications were due by January 22, 1991.

National College Student Organizational Network Program. This competition focuses on assisting national college student organizations, either singly or in consortia, that wish to work on drug and alcohol prevention, through their national network of chapters, in institutions of higher education across the Nation. In order to be eligible, a national college student network must work through an IHE which will submit the application, be the fiscal agent, and provide guidance and support. Approximately \$230,000 is available under this program in FY 1991. The estimated range of awards is \$10,000 to \$250,000, with the average size of awards around \$100,000. An estimated 100 awards will be made. Application materials were available on October 26, 1990. Applications were due by February 27, 1991.

Specific Approaches to Prevention Projects. Applicants are invited to propose consortia arrangements to assist local and nearby prevention professionals representing IHEs to meet on a monthly basis to discuss, investigate, and act on efforts to develop and improve their own comprehensive, institution-wide programs of drug education and prevention. Approximately \$910,000 is available under this program in FY 1991. The estimated range of awards is \$5,000 to \$40,000, with the average size of awards around \$34,000. An estimated 40 awards will be made. Application materials were available on November 20, 1990. Applications were due by February 21, 1991.

Dissemination of Successful Institution-Wide Projects. This program supports the dissemination of successful project designs, policies, and results of projects supported under Institution-Wide Program competitions and Special Focus Program Competitions. This competition is limited to current or former recipients of an award under the Institution-Wide Program and the Special Focus Program. Applicants who are proposing to disseminate their own successful projects that were funded in FY 1988 and for which Departmental assistance has ended are eligible. Approximately \$680,000 is available under this program in FY 1991. The estimated range of awards is \$35,000 to \$150,000. An estimated eight awards will be made. Application materials were available on November 1, 1990. Applications were due by January 14, 1991.

Analysis of Institution-Wide Projects. This program supports the analysis of successful project designs, policies, and results of projects supported under Institution-Wide Program competitions and Special Focus Program Competitions. This competition is limited to current or former recipients of an award under the Institution-Wide Program and the Special Focus Program. Applicants who are proposing to analyze the direct and indirect impacts of their projects that were funded in FY 1988 and for which departmental assistance has ended are eligible. Approxi-

mately \$300,000 is available under this program in FY 1991. The estimated range of awards is up to \$150,000. An estimated five to ten awards will be made. Application materials were available on November 1, 1990. Applications were due by January 14, 1991.

For additional information on the six programs listed above, please contact the Fund for the Improvement of Postsecondary Education (FIPSE) at (202) 708-5750.

Office of Special Education and Rehabilitative Services

Vocational Rehabilitation State Grant Program. The Vocational Rehabilitation (VR) State Grant Program provides funding for activities to rehabilitate disabled individuals. Funds are allocated to States and Territories on the basis of their population and per capita income. Persons who are considered drug dependent can qualify for VR services if their disability constitutes a substantial handicap to employment. It is estimated that approximately \$55.5 million of the FY 1991 appropriation and \$60.7 million of the FY 1992 budget request will be used to benefit the drug dependent. This program is administered by the Rehabilitation Services Administration (RSA) in the Office of Special Education and Rehabilitative Services (OSERS). For further information, please contact RSA at (202) 732-1282.

Grants for Infants and Families. This program, authorized by Part H of the Individuals with Disabilities Education Act, provides Federal support to help States develop and implement statewide systems of early intervention services for children, aged birth through two years, who are developmentally delayed or who have a diagnosed physical or mental condition that has a high probability of resulting in developmental delay. At their discretion, States may also aid children who are at risk of substantial development delay if early intervention services are not provided. Since many drug-exposed children are likely to be eligible for services under this program, the Department considers the program to be a significant component of the Federal effort to address the needs of these children. ED expects that 10 percent of the children served under the program will be children who were prenatally exposed to drugs. It is estimated that \$11.7 million of the FY 91 Part H appropriation and \$12.8 million of the FY 92 Part H budget request will be used to benefit prenatally exposed children. For further information, please contact OSERS at (202) 732-1265.

Early Childhood Education. This program supports research, demonstrations, and other activities to improve special education and early intervention services for infants, toddlers, and young children with disabilities. Included in this group are infants and toddlers aided under

the Grants to Infants and Families program, and children ages 3 through 8 who require special education as a result of a disability. An increasing number of infants, toddlers, and children who have been exposed to drugs are falling into these categories. In 1991, the program will award about \$750,000 for support of an early childhood research institute on drug abuse. The program has also included invitational priorities for applications that address the needs of young children born with drug addiction in competitions for model demonstration projects and outreach projects. A total of \$3.4 million is available in 1991 for the model demonstration and outreach competitions that include these invitational priorities. The application deadline for model demonstration projects was April 1, 1991, and the deadline for outreach projects was March 11, 1991. Similar competitions and funding levels are expected for 1992.

Information. For further information on any of the activities of the Department of Education summarized above, please call (202) 401-3030 or write:

Drug Planning and Outreach Staff
U.S. Department of Education
400 Maryland Avenue, SW, Room 4145
Washington, D.C. 20202

Department of Health and Human Services

Alcohol, Drug Abuse, and Mental Health Administration

The Alcohol, Drug Abuse, and Mental Health Administration (ADAMHA) includes the National Institute of Mental Health (NIMH), the National Institute on Drug Abuse (NIDA), the National Institute on Alcohol Abuse and Alcoholism (NIAAA), the Office for Substance Abuse Prevention (OSAP), and the Office for Treatment Improvement (OTI). Information on anti-drug abuse grants for NIDA, OSAP, and OTI is provided below.

Alcohol, Drug Abuse, and Mental Health Services Block Grant Program. The purpose of the Alcohol, Drug Abuse, and Mental Health Services (ADMS) Block Grant is to provide financial assistance to States and territories for the development of effective prevention, treatment, and rehabilitation programs and activities to deal with alcohol and drug abuse; to prevent the transmission of the etiologic agent for acquired immune deficiency syndrome (AIDS) by enhancing the capacity to treat intravenous drug abusers; to support community mental health centers for the provision of services to the mentally ill; to provide specialized services for seriously emotionally disturbed children and adolescents; to provide services designed for women (especially pregnant women and women with dependent children); and to conduct data collection and health services research on alcohol, drug abuse, and mental health disorders to enhance knowledge and improve effectiveness of services. For FY 1991, Congress appropriated \$1,268.7 million for the ADMS Block Grant. Of this amount, \$512.3 million is for the drug portion of the block grant. A table showing State allocations for FY 1990 through 1992 is included in Appendix A. For FY 1992, \$512.3 million is again requested for the drug portion of the block grant.

For information on the availability of the alcohol and drug abuse portion of the Block Grant monies, please contact the single State authority for alcohol and drug abuse in your State. A list of these contacts is included in Appendix C.

Information. For information on any ADAMHA program, please call (301) 443-3783 or write:

Alcohol, Drug Abuse, and Mental Health Administration
5600 Fishers Lane
Rockville, Maryland 20857

National Institute on Drug Abuse (ADAMHA)

The National Institute on Drug Abuse (NIDA) supports research on the nature and extent, causes and consequences, prevention and treatment of drug abuse. NIDA also supports research demonstration programs which generate information on promising new prevention, treatment, and AIDS outreach approaches. Applications are being accepted for drug abuse research in the following areas: (1) basic biomedical and neuroscientific research at the genetic, molecular, organ, and system level; (2) biochemistry, pharmaceutical/medicinal development and chemistry, and metabolic and pharmacokinetic studies; (3) epidemiology and natural history/etiology studies; (4) treatment research; (5) prevention research; (6) behavioral and clinical pharmacology research; (7) research on AIDS/HIV infection in relation to drug abuse; (8) workplace issues in drug abuse; (9) community-based initiatives to reduce drug-taking behaviors; and (10) studies of treatment systems and the cost/economic impact of drug abuse and treatment.

NIDA provides support through the following mechanisms: (1) research projects; (2) small grants; (3) conference grants; (4) first independent research support and transition awards; (5) small business innovation research grants; (6) research demonstration and dissemination projects; (7) program project grants; (8) research centers; and (9) contracts and cooperative agreements. NIDA also supports a number of different training support programs, including individual and institutional training grants, training contracts focused on specific populations, the Minority Access to Research training program, and research scientist development awards.

In 1991, \$416 million was appropriated for NIDA research activities. The President's Budget request for these activities in 1992 is \$446.2 million. Specific NIDA grant programs related to drug control activities are summarized below. Applications may be submitted by any public or private, nonprofit or for-profit organizations such as universities, colleges, hospitals, laboratories, units of State and local governments, and eligible agencies of the Federal government. Applications for the next grant cycles are due June 1 and October 1, 1991.

Information. Applications for NIDA programs are available from business or research offices at most universities, colleges, medical schools, and other research facilities, or directly from NIDA by calling (301) 443-6710 or by writing:

Grants Management Branch
National Institute on Drug Abuse
5600 Fishers Lane, Room 8A-54
Rockville, Maryland 20857

Neuroscience Research on Drug Abuse. NIDA awards grants for the study of the neural bases of drug abuse and the areas of neuroscience relevant to drug abuse, especially with respect to interfacing brain and behavior mechanisms. The purpose of these grants is to develop an increased understanding of the relationship between brain anatomy, physiology, pharmacology, and drug abuse behaviors. Areas of interest include the study of brain/reward mechanisms, neuropsychopharmacology, special study of drug-induced neurotoxicity, factors influencing vulnerability to drug abuse, developmental neurobiology, drug effects on cognitive processes and sensory processes, blood-brain barrier studies, and clinical neuroscience.

Research on Pain and Analgesia. NIDA has an ongoing program to solicit grant applications to study chronic pain and its treatment. Of special interest to NIDA are studies of pain that responds poorly to opiates and the basic mechanism of action of non-opiate analgesics; behavioral approaches to particular pain problems; analgesic levels attained by different routes of administration of opiates, techniques for the measurement of pain and its relief in clinical settings; understanding of the treatment of pain in children; and development of more effective, less addictive analgesics.

Vulnerability to Drug Abuse. NIDA solicits grants which investigate vulnerability to drug abuse, including study of the genetic and environmental factors that are involved in the etiology of the disorder; identify groups that are at high risk for the development of the disorder; facilitate the development of programs that are effective in preventing the disorder in high-risk groups; and improve effects of treating the disorder by addressing the etiological factors during treatment.

AIDS and the Prevention of Intravenous Drug Abuse. NIDA sponsors research that seeks to improve our understanding of the factors that contribute to the etiology of intravenous drug abuse; develop strategies that are effective in preventing intravenous drug abuse; improve our understanding of factors that contribute to needle sharing behavior among intravenous drug abusers; and develop strategies that are effective in preventing AIDS high-risk behaviors.

Treatment of IV Drug Abusers to Reduce the Spread of AIDS.

NIDA wishes to stimulate research in the treatment of intravenous drug abuse in order to ultimately reduce the spread of AIDS. Research applications are solicited for efforts to improve the effectiveness of existing treatment strategies and develop new strategies; develop methodology to attract more intravenous drug abusers into treatment; and prevent relapse following treatment. Both pharmacological and behaviorally-based interventions are encouraged.

Drug Abuse Treatment Research Grants. NIDA supports research on controlled clinical trials and scientifically based outcome evaluation research directed at the treatment of drug abuse and/or drug abuse treatment service systems. These include screening procedures to identify candidates for treatment or strategies to enhance entrance into treatment; diagnosis to provide individualized profiles of severity of substance abuse and matching treatment; utilization of diagnostic profiles to determine specific therapeutic interventions to optimize treatment efficacy; treatment delivery, monitoring, and outcome evaluation; aftercare service and post-treatment follow-up or prolonged treatment to reduce relapse or recurrence of drug use.

Patterns and Consequences of Drug Use. The purpose of these grants is to carry out epidemiologic research regarding the patterns of acute and chronic drug use and their differential effects. Research is encouraged to identify and describe important patterns of drug use which are differentiated by such factors as their predictors, the population groups at risk, and/or their distinct effects; refine and evaluate various methodologies for assessing and validating drug use patterns and consequences; and identify adverse consequences of drug use and estimate their probability of occurrence for specific groups.

Maternal and Paternal Drug Abuse and Its Effect on Offspring. This program focuses on the use of drugs during pregnancy. Research proposals are solicited to study the effects of abused drugs on reproductive and developmental processes, to identify the prevalence of maternal and paternal drug abuse and the consequences for the newborn; identify the mechanism underlying the organic and behavioral effects resulting from exposure in utero and/or during lactation; develop strategies and procedures to prevent, ameliorate, and/or reverse these toxic effects and their developmental consequences; and to identify multigenerational consequences of parental drug abuse on the offspring.

Development of Medications—Medicinal Chemistry Considerations. This program will support studies which involve rational design of new pharmacological agents by application structure-activity relationship studies, synthesis of analogs, screening for bioactivity, and preliminary studies to determine metabolism and bioavailability. Also of interest is dosage form development.

Psychotherapy and Counseling in Drug Abuse Treatment. Grant proposals are solicited to study psychotherapy, behavior therapy, drug abuse counseling, and other non-pharmacological intervention in the treatment of drug abuse. Studies involve the use of controlled clinical trials or other scientifically established research methods. A secondary aim is to encourage the development of instruments to measure process and outcome in nonpharmacological treatment.

Research on Behavior Change and Prevention Strategies to Reduce Transmission of Human Immunodeficiency Virus (HIV). Together with the National Institute on Alcohol Abuse and Alcoholism and the National Institute of Mental Health, NIDA solicits theoretically grounded research grants which develop methods and techniques to understand, prevent, and/or change high-risk sexual and drug-abusing behaviors and to sustain the changed behavior over time. Research is also encouraged to identify psychological, social, and cultural barriers and enhancers to these behavior changes. The behaviors under study include sharing of injection equipment, sexual relations without knowledge of partner's involvement with high-risk behaviors, sexual relations with someone at high risk without using proper protection, and not taking precautions to guard against transmitting HIV if known to be infected.

Office for Substance Abuse Prevention (ADAMHA)

The Office for Substance Abuse Prevention (OSAP) supports prevention and early intervention projects which serve as models in preventing abuse of alcohol and other drugs. Emphasis is placed on youth and families living in high-risk environments. OSAP programs which are included as part of the National Drug Control Strategy are summarized below. Additional OSAP grants related to drug control activities are summarized on page 41.

Community Partnership Demonstration Grants Program. The Community Partnership Demonstration Grants Program fights alcohol and other drug problems through community-based coalitions of public agencies and private organizations. The aim is to develop comprehensive, self-sustaining and replicable systems within a community, involving several organizations or agencies including health, education, law enforcement, social services, grassroots community, and religious organizations in the prevention and intervention of alcohol and other drug abuse. Grantees must also demonstrate effective training, evaluation, and capacity building strategies. Approximately \$99.1 million is available in FY 1991 for both grants and contracts that support the grant programs. Approximately \$92.4 million is available in FY 1991 for grant

awards only. In the second cycle of grant awards in FY 1991, approximately \$22 million is available for 75 community partnership grants. Awards range from \$50,000 to \$3 million, with the average size of awards around \$300,000. Applications must be submitted by April 24, 1991. For FY 1992, \$110.9 million is requested for both grants and contracts that support the grant programs. Of that amount, \$106.9 million is for grant awards only. For further information, please contact the Division of Community Prevention and Training at (301) 443-0369.

Community Youth Program. This program has three components: (1) a block grant program for States and territories; (2) a State demonstration grant program limited to the 50 states, the District of Columbia, Puerto Rico, and the territories; and (3) contract authority for Projects of National Significance. For FY 1991, approximately \$20.2 million is appropriated for the Community Youth Activity Program. About \$1.1 million is available to support Projects of National Significance, \$4.9 million for the block grant program, and \$14.2 million for the competitive State Demonstration Grant Program.

The Department is recommending that the Community Youth Program not be continued in FY 1992, rather the money be used for the High Risk Youth and Pregnant Women and Their Infants Programs, as discussed below. For further information on the Community Youth Activity Program, please contact the Division of Community Prevention and Training at (301) 443-0369.

Demonstration Grants Targeting Youth at High Risk. The purpose of this program is to support client-oriented programs that develop and evaluate strategies to decrease the incidence and prevalence of alcohol and other drug use among high-risk youth and to enhance resiliency factors that protect high-risk youth against using alcohol and other drugs. Approximately \$50.7 million is available in FY 1991 for both grants and contracts that support the grant programs. Applications for the new grant cycle are due by May 20, 1991. For FY 1992, \$54.8 million is requested for both grants and contracts that support grant programs. For further information, please contact the Division of Demonstrations and Evaluation at (301) 443-0353.

Model Projects for Pregnant and Postpartum Women and Their Infants. This program supports the development of model projects for pregnant and postpartum women and their infants that focus on prevention, early intervention, treatment, and aftercare. Successful projects include promising models or innovative approaches to prevent or minimize fetal exposure to alcohol and other drugs, as well as projects that coordinate existing community services with new or expanded services. Many of the funded programs offer a continuum of therapeutic programs, integrating comprehensive supportive services involving health, education, voluntary and other relevant community-based organizations

and service systems. Approximately \$45.7 million is available in FY 1991 for both grants and contracts that support the grant program. Approximately \$43.1 million is available for grant awards only. Applications for the new grant cycle are due by May 20, 1991. For FY 1992, \$52.4 million is requested for both grants and contracts that support grant programs. Of that amount, \$49.7 million is requested for grant awards only. For further information, please contact the Division of Demonstrations and Evaluation at (301) 443-4564.

Information. For further information about the OSAP programs summarized above or to obtain application materials, please contact the National Clearinghouse for Alcohol and Drug Information at (301) 468-2600 or 1-800-729-6686 or write:

National Clearinghouse for Alcohol and Drug Information
Post Office Box 2345

Office for Treatment Improvement (ADAMHA)

The Office for Treatment Improvement (OTI) supports treatment projects to expand capacity and improve the quality of services.

Treatment Grants to Crisis Areas/Target Cities. The primary goal of this program is to implement overall systemic improvements in metropolitan settings. In 1990, OTI awarded eight three-year treatment improvement demonstration grants in urban jurisdictions at \$29.7 million. Receiving awards were Los Angeles, California; Atlanta, Georgia; Baltimore, Maryland; Boston, Massachusetts; Albuquerque, New Mexico; San Juan, Puerto Rico; and Milwaukee, Wisconsin. This is a competitive grant program, however; eligibility is restricted to the 50 largest cities in the United States. Under the auspices of this program, States can apply for funding for one, and only one, metropolitan center that fits the population eligibility criteria. Also, the State must prove that there is a high incidence of drug abuse and a chronic need for treatment improvement in the jurisdiction. States must also provide assurance of support during and after the period of Federal funding for this program. For FY 1991, \$31.3 million was appropriated for continuation funding of this program. For FY 1992, \$32.5 million is requested for continuation funding.

Treatment Improvement in Critical Populations. The goal of this grant program is to fund three-year demonstration projects to become national prototypes for providing a continuum of comprehensive therapeutic services coupled with aftercare to improve treatment outcome for

critical populations. Under this program, OTI awards three-year demonstration grants for treatment program/treatment system enhancements that are geared toward critical populations, such as adolescents, racial and ethnic minorities, and residents of public housing. For FY 1991, \$38.1 million was appropriated for this program. A grant announcement will be published in the *Federal Register* in early summer 1991. For FY 1992, \$39.6 million is requested for continuation funding.

Treatment Improvement in Criminal Justice. This grant program is in response to studies showing that a high percentage of criminal offenders are addicted to drugs. The ultimate goal of the OTI grants is to improve treatment outcomes for these prisoners. Funded programs must have the goal of reducing drug use, and thereby drug-related criminal recidivism. Under this program, OTI awards three-year demonstration grants for treatment programs that are geared toward substance abusers in the criminal justice system. For FY 1991, \$15.9 million was appropriated for this program. A grant announcement will be published in the *Federal Register* in early summer 1991. For FY 1992, \$16.6 million is requested.

Treatment Campus. The goal of this program is to enhance treatment capacity; to improve the quality of treatment, especially through provision of primary medical care and HIV/AIDS testing, counseling, and prevention; and to create a controlled environment for assessment and evaluation of the efficacy of differing approaches to treatment service provision. Under this program, cooperative agreements are established between States and OTI for the establishment of treatment "campuses." Each campus consists of five to eight distinct service providers that occupy a common program facility. Central intake, patient assessment, referral, and program evaluation are onsite. The total patient population on any given campus will be at or near 500. For FY 1991, \$18 million was appropriated for this program. Applications are due in December 1991. For FY 1992, \$18.7 million is requested.

The Waiting Period Reduction Grant Program. Under this program, states may apply for grant funds on behalf of treatment programs within their jurisdictions that have verifiable "waiting lists." This program was designed solely to expand treatment capacity in areas where patient demand clearly exceeds availability of service. For FY 1991, \$38.5 million was obligated from funds appropriated in FY 1990.

Information. For further information on the OTI programs summarized above, please call (301) 443-2467 or write:

Office for Treatment Improvement
Rockwall II Building
5600 Fishers Lane, Tenth Floor
Rockville, Maryland 20857

Office of Human Development Services

The Administration for Children, Youth and Families, part of the Office of Human Development Services (HDS), administers five programs which are included as part of the National Drug Control Strategy. These grant programs are summarized below. An additional HDS grant related to drug control activities is summarized on page 42.

Abandoned Infants Assistance Program. The Office of Human Development Services awards grants for demonstration projects to prevent the abandonment in hospitals of infants and young children, specifically drug-exposed children and those with acquired immune deficiency syndrome (AIDS); and to develop, implement, and operate a comprehensive services program to address the needs of these children and their families. Comprehensive services may include foster family care services, case management services, family support services, respite and crisis intervention services, counseling services and group residential home services. As part of the development of comprehensive services, the demonstration program may include recruiting and training health and social services personnel, foster care families, and residential care providers in an effort to meet the needs of abandoned children. Approximately \$9.9 million was available in FY 1990. Twenty four projects were awarded two-year grants. In FY 1991, approximately \$12.6 million was appropriated for continuation funding. For FY 1992, \$12.6 million is requested. For additional information, please contact the Children's Bureau at (202) 245-0618.

Drug Abuse Prevention Program for Runaway and Homeless Youth. Grants are awarded to public and private nonprofit agencies, organizations, and institutions to carry out research, demonstration, counseling, and services to runaway youth and their families and to homeless youth to prevent or reduce the illicit use of drugs by such youth; to support peer counseling, community education, outreach, training, research and services coordination related to illicit drug use by runaway and homeless youth; and to provide runaway and homeless youth in rural areas assistance related to the illicit use of drugs. For FY 1991, \$14.8 million was appropriated to carry out existing grants. For FY 1992, \$14.8 million is requested. For additional information, please contact the Family and Youth Services Bureau at (202) 245-0078.

Youth Gang Drug Prevention Program. This program supports projects designed to prevent the participation of youth in gangs that engage in illicit drug-related activities; promote involvement of youth in lawful activities; prevent drug abuse by youth; educate youth about drug abuse; refer for treatment and rehabilitation youth gang members who abuse drugs; support outreach activities by law enforcement to youth gangs that commit drug crimes; inform gang members about drugs and

Directory of Federal Anti-Drug Grants

the availability of treatment and rehabilitation services for drug abuse; facilitate coordination among local school, juvenile justice, employment, social service, and drug treatment and rehabilitation agencies and programs to prevent the participation of youth in gangs that commit drug-related crimes; and for projects otherwise related to prevention of youth gang drug crime. For FY 1991 \$14.8 million was appropriated to carry out existing grants. For FY 1992, \$14.8 million is requested. For further information, please contact the Family and Youth Services Bureau at (202) 245-0078.

Information. Information on the programs summarized above, may also be obtained by writing:

Administration for Children, Youth, and Families
Post Office Box 1182
Washington, D.C. 20013

Department of Housing and Urban Development

Office of Public and Indian Housing

The following grant program is included as part of the National Drug Control Strategy. An additional grant related to drug control activities is summarized on page 43.

Public Housing Drug Elimination Grant Program. The Department of Housing and Urban Development (HUD) awards grants for drug prevention, control, and elimination activities at public and Indian housing developments to help mobilize communities against drugs by increasing security and ridding such projects of drug dealers and drug use. These grant funds can be used to develop and implement various activities, including security, information and retrieval to counseling and treatment and other outreach efforts to reduce drug use in and around public housing. The grants are awarded on a competitive basis directly to Public Housing Authorities (PHAs) and Indian Housing Authorities (IHAs).

For FY 1991, \$149 million will be awarded for Public Housing Elimination Grants. Of this amount, 5 percent or \$7.5 million of the grants are targeted to Youth Sports, and \$1 million is for technical assistance, training, and the Drug Information and Strategy Clearinghouse. A grant announcement will be published in the *Federal Register* in May 1991. For FY 1992, a total of \$165 million is requested for Drug Elimination Grants, which will increase the number of grants to PHAs and IHAs.

Youth Sports Program. This program provides financial assistance for the creation and implementation of sports services programs for youth in public housing organizations. These grants can be made to States, local governments, local park and recreation districts and agencies, nonprofit organizations, and Public and Indian Housing Authorities. Approximately \$7.5 million is available under this program. Individual grants will be for a maximum of \$125,000 and will require a 50 percent match by the applicant for the amount received. The "Notifications of Funds Available" will be published in the *Federal Register* in May 1991.

Department of Justice

Office of Justice Programs, Bureau of Justice Assistance

Edward Byrne Memorial State and Local Law Enforcement Assistance Program. The Edward Byrne Memorial State and Local Law Enforcement Assistance Program provides funds to assist States and local governments in carrying out specific programs that offer a high probability of improving the functioning of the criminal justice system, and to enhance drug control efforts at the State and local levels. The Program places special emphasis on nationwide and multi-jurisdictional projects and programs which address the drug problem and advance national drug control priorities. Additionally, the National Drug Control Strategy includes the following priorities for drug control and the criminal justice at the State and local levels, which the States are encouraged to consider as they develop their statewide strategies:

- Increased emphasis by States and localities on street-level drug law enforcement.
- Development and implementation of intermediate sanctions programs for nonviolent drug offenders, including house arrest and boot camps.
- Development and implementation of programs, that hold drug users and dealers accountable, including the vigorous prosecution and increased fines for misdemeanor drug offenses.
- Expansion of programs to eradicate the domestic marijuana crop.
- Adoption of programs throughout the criminal justice system to test defendants/offenders for drugs, including arrestees, prisoners, parolees, and those out on bail.
- Comprehensive planning and designing of judicial and correctional facilities.

The Bureau of Justice Assistance (BJA) is authorized to make grants to States, for use by States and local governments, to enforce State and local laws that establish offenses similar to offenses established in the Federal Controlled Substances Act and to improve the

functioning of the criminal justice systems, with emphasis on violent crime and serious offenders. Grants may provide personnel, equipment, training, technical assistance, and information systems for the more widespread apprehension, prosecution, adjudication, detention, and rehabilitation of persons who violate such laws, and may provide assistance (other than compensation), to the victims of such crimes. This assistance may include the following programs:

1. Demand reduction education programs in which law enforcement officers participate.
2. Multijurisdictional task force programs that integrate Federal, State, and local drug law enforcement agencies and prosecutors for the purpose of enhancing interagency coordination and intelligence and facilitating multijurisdictional investigations.
3. Programs designed to target the domestic sources of controlled and illegal substances, such as precursor chemicals, diverted pharmaceuticals, clandestine laboratories and cannabis cultivations.
4. Community and neighborhood programs which assist citizens in preventing and controlling crime, including special programs which address the problems of crimes committed against the elderly and special programs for rural jurisdictions.
5. Disrupting illicit commerce in stolen goods and property.
6. Improving the investigation and prosecution of white-collar crime, organized crime, public corruption crimes and fraud against the government with priority attention to cases involving drug-related official corruption.
7.
 - a. Improving the operational effectiveness of law enforcement through the use of crime analysis techniques, street sales enforcement, schoolyard violator programs and gang-related and low-income housing drug control programs.
 - b. Developing and implementing antiterrorism plans for deep draft ports, international airports and other important facilities.
8. Career criminal prosecution programs, including the development of model drug control legislation.

9. Financial investigative programs which target the identification of money laundering operations and assets obtained through illegal drug trafficking, including the development of proposed model legislation, financial investigative training and financial information sharing systems.
10. Improving the operational effectiveness of the court process by expanding prosecutorial, defender and judicial resources and implementing court delay reduction programs.
11. Programs designed to provide additional public correctional resources and improve the corrections system, including treatment in prisons and jails, intensive supervision programs and long-range corrections and sentencing strategies.
12. Providing prison industry projects designed to place inmates in a realistic working and training environment which will enable them to acquire marketable skills and to make financial payments for restitution to their victims, for support of their own families and for support of themselves in the institution.
13. Providing programs which identify and meet the treatment needs of adult and juvenile drug-dependent and alcohol-dependent offenders.
14. Developing and implementing programs which provide assistance to jurors and witnesses and assistance (other than compensation) to victims of crime.
15.
 - a. Developing programs to improve drug control technology, such as pretrial drug testing programs, programs which provide for the identification, assessment, referral to treatment, case management and monitoring of drug-dependent offenders and enhancement of State and local forensic laboratories.
 - b. Criminal justice information systems to assist law enforcement, prosecution, courts, and corrections organizations (including automated fingerprint identification systems).
16. Innovative programs which demonstrate new and different approaches to enforcement, prosecution, and adjudication of drug offenses and other serious crimes.
17. Addressing the problems of drug trafficking and the illegal manufacture of controlled substances in public housing.

18. Improving the criminal and juvenile justice system's response to domestic and family violence, including spouse abuse, child abuse and abuse of the elderly.
19. Drug control evaluation programs which State and local government may utilize to evaluate programs and projects directed at State drug control activities.
20. Providing alternatives to prevent detention, jail and prison for persons who pose no danger to the community.
21. Programs of which the primary goal is to strengthen urban enforcement and prosecution efforts targeted at street drug sales.

FORMULA GRANT PROGRAM

Funding: Funds remaining after a set-aside for the Discretionary Grant Program for any fiscal year will be distributed under the Formula Grant Program. Each State receives a base amount of .25 percent of the total formula allocation with the remaining funds allocated on the basis of each State's relative share of the total U.S. population. Approximately \$423 million is available in FY 1991. A table showing State allocations for FY 1990 through FY 1992 is contained in appendix A. For FY 1992, \$405 million is requested.

State Office: The chief executive of each participating State shall designate a State Office to administer the program and to coordinate the distribution of funds with State agencies receiving Federal funds for drug abuse education, prevention, treatment, and research activities and programs. An office or agency performing other functions within the State's executive branch may be designated as the State Office.

Administrative Funds: Up to 10 percent of the Formula Grant funds allocated to a State may be used to pay for costs incurred in administering the Formula Grant Program. BJA, however, encourages the States to keep administrative funding to no more than 5 percent, unless clearly justified in the application and approved by BJA.

Matching Requirements: At least 25 percent of the cost of a program or project funded with FY 1991 Formula Grant Funds must be paid with non-Federal funds. For FY 1991 and subsequent year appropriations, at least 50 percent of the cost of a program or project must be paid with non-Federal funds. The non-Federal share shall be in cash. Funds provided for match must be in addition to funds, which would otherwise be made available by the recipients for law enforcement. The match is to be provided on a project-by-project basis.

Passthrough: Local units of government must receive a share of the State's Formula Grant funds equal to the ratio of local criminal justice expenditures to the total criminal justice expenditures for the State.

Funding Priority: In distributing funds, the State shall give priority to those jurisdictions with the greatest need.

Period of Project Support: Projects funded under the Formula Grant Program may be funded for a maximum of four years (48 months) in the aggregate, including any projects occurring before the effective date of this Act.

Construction: Grant funds may be used for construction of penal and correctional institutions only. Acquisition of land with grant funds is prohibited.

Statewide Strategy: Each State is required to develop a statewide strategy to improve the functioning of the criminal justice system, with an emphasis on drug trafficking, violent crime, and serious offenders. The strategy shall be prepared after consultation with State and local officials, particularly those whose duty it is to enforce drug and criminal laws and direct the administration of justice.

DISCRETIONARY GRANT PROGRAM

Funding: Twenty percent of the total allocation, or \$50 million, whichever is less, is reserved for the Discretionary Grant Program. For FY 1992, \$50 million is requested.

Program Purposes: Discretionary grant funds provide Federal financial assistance to public or private agencies and private nonprofit organizations for purposes of:

- Undertaking educational and training programs for criminal justice personnel.
- Providing technical assistance to State and local units of government.
- Undertaking projects which are national or multijurisdictional in scope and which address the purpose areas authorized by the Act.
- Providing financial assistance to public agencies and private nonprofit organizations for demonstration programs which, in view of previous research or experience, are likely to be a success in more than one jurisdiction.

Directory of Federal Anti-Drug Grants

Eligibility: Public and private agencies and private nonprofit organizations are eligible to apply for and receive funds under this program.

Match: Grants may be made for up to 100 percent of the costs of an approved project.

Program Priorities: Program priorities for FY 1991 are designed to implement recommendations made in the National Drug Control Strategy and to respond to needs identified by State and local criminal justice practitioners. Areas of emphasis for FY 1991 include: Intermediate Sanctions and User Accountability; Gangs and Violence; Multijurisdictional Task Forces; Community-Based Policing; Drug Testing; Evaluation; Victims; and Improved Information Systems. A description of the programs and the request for proposals are published in the FY 1991 Discretionary Program Application Kit, available from the BJA Clearinghouse, 1-(800)-688-4BJA.

Evaluation Activities: The Anti-Drug Abuse Act of 1988 specifically mandates BJA's program evaluation activities. Section 501(c) requires that programs funded with Formula Grant funds contain an evaluation component that meets the guidelines developed by the National Institute of Justice (NIJ), in cooperation with BJA. The Director of BJA may waive this requirement under certain circumstances. Each State is required to provide to BJA, at the end of each fiscal year, a performance evaluation and assessment report concerning formula-funded activities and may use formula funds to pay for their evaluation activities.

Applicants for Discretionary Grant funding are required to include an evaluation component in their application and to agree to conduct required evaluations according to procedures and terms established by BJA.

In addition to these BJA-specific requirements, NIJ is designated as an active participant in the BJA evaluation program and requires the development of evaluation guidelines and the conduct of a "reasonable" number of comprehensive evaluations of selected Discretionary and Formula Grant Programs. The Director of NIJ is required to annually report to the President, the Attorney General, and the Congress on the nature and findings of the evaluation activities required in this Section. NIJ evaluations complement ongoing BJA evaluation efforts.

Each State is required to provide BJA with a summary of its grant activities and an assessment of the impact of these programs on the needs identified in its statewide drug strategy and to report to BJA the results of their evaluation activities. The BJA Director is required to submit an annual report which contains BJA evaluation results of programs and projects and State strategy implementation to the Speaker of the House of Representatives and the President pro tempore of the Senate.

Information. For further information on the Formula Grant Program, please call (202) 514-6838. For information on the Discretionary Grant Program, please call (202) 514-5947. Information on both the Formula and Discretionary Grant Programs may also be obtained by writing:

Washington, D.C. 20531

Office of Juvenile Justice and Delinquency Programs

The Office of Juvenile Justice and Delinquency Programs (OJJDP) was created by the Juvenile Justice and Delinquency Prevention Act of 1974 (42 U.S.C. 5601) in response to national concern about juvenile crime. It is the primary Federal agency for addressing juvenile crime and delinquency and the problem of missing and exploited children. OJJDP's anti-narcotics and dangerous drug program focuses on youth at high risk of narcotics and dangerous drug involvement. Drug prevention and education resources for FY 1991 total \$8.1 million. Grant announcements will be published in Spring 1991 in the *Federal Register*. For FY 1992, \$7.5 million is requested.

Information. For further information, please contact OJJDP at (202) 307-5911 or write:

Office of Juvenile Justice and Delinquency Programs
Office of Justice Programs
633 Indiana Avenue, N.W.
Washington, D.C. 20531

Department of Labor

Employment and Training Administration

Job Training Partnership Act Grant Programs. The Job Training Partnership Act (JTPA) provides job and training services for economically disadvantaged adults and youth, dislocated workers, and others who face significant employment barriers. JTPA aims to move the jobless into permanent self-sustaining employment. State and local governments have primary responsibility for the management and administration of job training programs under JTPA. Governors have approval authority over locally developed plans and are responsible for monitoring program compliance.

State Job Training Coordinating Councils are formed by the governors to provide recommendations on job training matters. Service Delivery Areas (SDAs) are designated by the governors to receive federal job training funds. SDAs are administrative districts into which the Nation is divided for JTPA purposes, typically a city or county with a population of 200,000 or more. Each SDA is required to set up a Private Industry Council (PIC) which are appointed by local elected officials to plan job training and employment programs at the SDA level. PIC members represent local businesses and provide policy guidance and have oversight responsibilities for local JTPA programs. Amendments to JTPA will be proposed for 1992 which will require individual assessment for each program participant, and specifically include drug and alcohol abuse counseling and referral as allowable services.

In estimating amounts to be utilized in drug control programs, the Department estimates the costs incurred in developing and maintaining drug-free workplace programs for State and local employees and the costs to counsel and educate all program participants on the effects of substance abuse.

In 1991, \$1,778.5 million was appropriated for the block grant program and \$682.9 million was provided for the Summer Youth Employment and Training Program (SYEP). Of these amounts, approximately \$31.9 million of the block grant and \$23.2 million of the SYEP are for drug abuse control. Under proposed amendments, these programs will be replaced in 1992 by Adult and Youth Job Training Programs. The President's Budget request for 1992 includes \$1,088 million for the Adult Program and \$1,377.6 million for the Youth program, of which \$33.1 million and \$27.3 million are for drug abuse control, respectively.

For additional information about JTPA, please contact your State JTPA liaison. A list of all JTPA liaisons is included in Appendix E.

Job Corps Programs. Title IV-B of JTPA provides disadvantaged youth ages 16 through 21 with basic education, vocational skills training, work experience, counseling, health care, and related support services in the residential setting of a Job Corps center. The program is intended to better prepare these youth to either obtain and hold gainful employment, pursue further education or training, or satisfy entrance requirements for careers in the Armed Forces. Job Corps operates through a partnership of government, labor, and the private sector. The government provides the facilities and equipment for Job Corps centers, funding for recruiting new students, center operations, and placement of students upon termination. Major corporations and nonprofit organizations manage and operate 106 centers in 44 states.

Drug resources for the Job Corps Program are divided into two components. The Substance Use and Abuse Prevention Program (SUAP) involves the administration of drug tests and educational programs which increase knowledge about drug and alcohol abuse. The Substance Intervention Program (SIP) focuses on drug treatment by assigning enrollees, whose drug test results were positive, to participate in intervention treatment activities. \$867.5 million was appropriated in 1991 for Job Corps, and the same level is requested for 1992. Of these amounts, \$9.5 million in 1991 and \$10.9 million in 1992 are for drug abuse control efforts. For further information, please contact the Employment and Training Administration's Office of Job Training Programs at (202) 535-0236.

Youth Opportunity Unlimited Program. The goal of the Department of Labor's Youth Opportunity Unlimited (YOU) demonstration program is to give local areas a chance to plan at the community level, and to provide coordinated, comprehensive services for all youth in a particular community. Local areas are required to develop primary goals for all youth in the target area — completion of high school, entry into community colleges or acquiring a career skill, placement into a career-track job. Supporting goals will also be developed — making schools more personal and effective, increasing police protection and drug prevention activities, strengthening families and the community. Developing a community drug eradication strategy is one of several components in the demonstration. In June 1990, Labor awarded six cities three-year grants at \$2.7 million each (\$1 million in 1990 and 1991 and \$700,000 in 1992). The cities which received grants were: Atlanta; Baltimore; Columbus; Los Angeles; San Diego; and Philadelphia. The state of Mississippi received a three-year rural demonstration grant. \$25 million will be requested for YOU in 1992 under the new JTPA amendments. For additional information, please contact the Employment and Training Administration's Office of Strategic Planning and Policy Development at (202) 535-0682.

Information. Further information on these programs may also be obtained by writing:

Employment and Training Administration

ACTION

ACTION's mission is to expand the involvement of volunteers in responding to a wide range of community issues and needs, including the prevention of illicit drug abuse. ACTION's anti-drug programming is targeted on preventing the use of illegal drugs, through such strategies as education/awareness, mentoring and peer support, alternative activities and community service. ACTION's programs are designed to increase the number of volunteers and the extent of volunteer participation in illicit drug use prevention activities. The demonstration of innovative strategies to involve increasing numbers of volunteers is a significant component of ACTION grant funding. The Domestic Volunteer Service Act of 1973 (Sect. 124), as amended, authorizes the Director of Action to engage in activities that mobilize and initiate private sector efforts to increase volunteerism in preventing drug abuse, including grants, contracts, conferences, speakers bureaus, public-private partnerships, and technical assistance. ACTION programs which are included as part of the National Drug Control Strategy are summarized below. An additional ACTION grant related to drug control activities is summarized on page 45.

Drug Alliance Grants. Drug Alliance grants support projects which use nonstipended volunteers to provide positive peer activities for youth; conduct alternative drug-free activities for youth; organize parent groups; assist children of illegal drug users; serve as mentors for at-risk youth; conduct public awareness efforts, especially among youth and in low-income communities; organize illicit drug use prevention training; and provide technical assistance. Only applications from private nonprofit incorporated organizations and public agencies will be considered. Such organizations may include local coalitions dedicated to the prevention of illegal drug use, volunteer groups, religious organizations, local government agencies, fraternities, sororities, and youth serving organizations. For FY 1991, drug prevention resources total \$2.2 million. Grants no larger than \$40,000 will be awarded. Application materials were available on January 9, 1991. Applications were due by February 25, 1991. For FY 1992, \$1.5 million is requested for prevention activities.

Information. For further information on the Drug Alliance Grants, please contact ACTION at (202) 634-9757 or the ACTION State Office near you. A list of all ACTION State Offices is included in Appendix F.

ACTION has a number of other programs which support anti-drug efforts through volunteer service. These programs are summarized below.

Foster Grandparents Program. This program provides older individuals opportunities for serving their communities by providing for the emotional, mental, and physical well-being of children through close, personal, and continuing relations. Anti-drug efforts include participating in anti-drug education programs in schools and working with "Crack Babies" in hospitals. Volunteers work in correctional institutions, homes for disadvantaged, dependent, or neglected children, and other settings within the community. Foster Grandparents must be at least 60 years of age and meet specific income guidelines. For FY 1991, drug prevention resources total \$1.7 million. For FY 1992, \$1.7 million is requested for drug prevention activities.

Retired Senior Volunteer Program. Through this program, retired individuals have the opportunity to participate in their communities through volunteer service. The program's projects are planned, organized, and operated at the local level and developed under the auspices of an established organization able to generate local program and financial support. Anti-drug efforts under this program include participating in drug prevention programs in schools, interacting with children and youth through recreational activities; and involvement in programs such as "Just Say No." Volunteers also provide administrative and management support for community substance abuse efforts. Volunteers also serve other older persons on the use, misuse, and abuse of prescriptions and over-the-counter medications. Volunteers must be at least 60 years of age. There are no income or educational restrictions. For FY 1991, drug prevention resources total \$0.4 million. For FY 1992, \$0.4 million is requested for drug prevention activities.

Senior Companion Program. The Senior Companion Program services in drug abuse prevention focuses primarily on assisting older adults having drug abuse problems due mainly to the use, misuse, and abuse of prescription and over-the-counter medications. For FY 1991, drug prevention resources total \$0.5 million. For FY 1992, \$0.5 million is requested for drug prevention activities.

Volunteers in Service to America (VISTA). VISTA provides opportunities for Americans to work with locally sponsored projects designed to increase the capability of low-income people to improve the condition of their own lives. Anti-drug activities include volunteer efforts to establish and expand drug use prevention projects in low-income schools and communities; developing community service activities for youth; prevention efforts within public housing projects; and recruiting and training community volunteers and generating private sector support to sustain and expand existing drug abuse prevention projects. For FY 1991, drug prevention resources total \$4.5 million. For FY 1992, \$5.2 million is requested for drug prevention activities.

Additional Grant Programs

Department of Health and Human Services

Office for Substance Abuse Prevention (ADAMHA)

Communications Cooperative Agreement Programs. The goal of this program is to demonstrate communication-centered approaches to prevent alcohol and other drug problems among targeted populations. Awards will be made as cooperative agreements, a type of assistance award which involves participation by Federal staff in the conduct of the projects. Federal staff will also provide technical assistance. This program will support efforts that carefully develop, disseminate, and evaluate public information and education efforts, as well as efforts that develop communication tools and materials which respond to the highly specific needs of particular audiences. Approximately \$2.6 million is available in FY 1991. Applications were due by February 1, 1991, while applications for the next grant cycle are due in the Fall of 1991. For FY 1992, \$2.7 million is requested. For further information, please contact the Division of Communications Programs at (301) 443-0373.

Conference Support Grants. Financial support is available from OSAP for coordinating, exchanging, and disseminating information on drug abuse prevention through domestic conferences. Applications are invited for conferences relating to substance abuse prevention, including conferences for the purposes of information dissemination to the services community and the general public, and national strategy development for substance abuse prevention. Priority consideration will be given to applications which demonstrate the potential for knowledge dissemination, interface with health promotion concepts and practices, resource utilization and/or consensus building in the furtherance of combating substance abuse, particularly as it pertains to high risk youth. Approximately \$2 million is available for constituency-initiated conferences under this announcement in FY 1991. Awards will be limited to no more than \$50,000 for any one conference. Applications must be submitted by April 24, 1991. For FY 1992, \$2.1 million is requested. For further information, please contact the Program Planning Unit at (301) 443-6980.

National Training System. Approximately \$26 million is available through this program, primarily through contracts. The goal of the National Training System (NTS) is to increase the recognition, prevention, and treatment of alcohol- and drug-related problems through the development of training initiatives directed at groups with access to populations at risk. The major activities of the NTS are designing and

delivering training, strengthening existing training materials and developing new ones, improving access to training resources, and providing technical assistance. For further information, please contact the Division of Community Prevention and Training at (301) 443-0369.

Technical Assistance Workshops. OSAP provides on-site technical assistance for prospective grantees. Technical assistance is provided for comprehensive, community-based prevention to communities and organizations interested in developing or enhancing prevention systems. OSAP offers other types of technical assistance to its demonstration program grantees as needed, e.g., programmatic, evaluation, communication, and management-related assistance. For further information, please contact OSAP at (301) 443-0365.

Office of Human Development Services

Head Start Family Service Center Demonstration Projects. The purpose of these projects is to demonstrate how Head Start programs can more effectively address the complex and interrelated problems of substance abuse, illiteracy, and chronic unemployment and underemployment, which limit the capacity of many Head Start families to achieve self-sufficiency. A principal role for the Head Start Family Service Center Demonstration Project grantees will be to demonstrate a model for Head Start family support which can effectively collaborate with community organizations to address significant problems impacting the self-sufficiency of Head Start families. Collaboration between the Head Start program, State welfare agencies, substance abuse treatment and prevention programs, adult literacy and basic education programs, job training programs, and other programs is sought to improve Head Start's capacity to establish more effective systems for addressing the problems of substance abuse, illiteracy, and chronic unemployment/underemployment. Approximately \$2.5 million was available in FY 1990. Thirteen projects were awarded three-year grants of up to \$225,000 per year. Additional Family Service Center Demonstrations may be funded in FY 1991. For additional information, please contact the Head Start Bureau at (202) 245-0573.

Department of Housing and Urban Development

Technical Assistance Program. Through this program, HUD provides technical assistance to public housing authorities, resident management corporations, and incorporated resident councils. The "Notifications of Funds Available" will be published in the *Federal Register* in Spring 1991. Additional funds for technical assistance and training will be available on September 1, 1991.

Information. For further information on these programs, please contact the Drug Information and Strategy Clearinghouse at (800) 245-2691 or the Office for Drug-Free Neighborhoods at (202) 708-1197 or write:

Office for Drug-Free Neighborhoods
Department of Housing and Urban Development
Washington, D.C. 20410

ACTION

Student Community Service Program. This program encourages students to volunteer their service to their communities. Anti-drug activities include providing substance abuse education through formal classroom presentations; providing counseling; mentoring at-risk youth living in poor neighborhoods; and providing structured educational and recreational programming, including substance abuse prevention activities for children in low-income housing projects. For FY 1991, drug prevention resources total \$54,000. Level funding is requested for FY 1992.

Information. For further information on this program, please contact ACTION at (202) 634-9757 or write:

* 1992 data are preliminary estimates based on the President's budget request.

** The HHS data in this table are estimates for each State's drug abuse spending. For the HHS grant, each State has a unique percentage established for the ratio of mental health funds to substance abuse funds. Within these unique ratios, each State must spend a minimum of 35% of its substance abuse funding for drugs, but may spend up to 65% of its substance abuse funding for drugs. The drug estimates for each State equal 50% of the amount each State receives for substance abuse. The sum total of the State grants are less than the drug portion of the HHS grant since set asides for research and data collection are not included.
