Directory of Automated Criminal Justice Information Systems 1993

Volume I: Law Enforcement

142645

Want on-line access to

The Automated Index of Criminal Justice Information Systems?

Then call the SEARCH-BBS!
916/392-4640

What is the SEARCH-BBS?

The SEARCH-BBS is an electronic bulletin board system available free to criminal justice professionals nationwide • It's a national forum and communications network that gives you access to on-line databases, an events calendar, downloadable software, indispensable justice publications, electronic mail message areas, and the Internet • The SEARCH-BBS is a service of SEARCH, The National Consortium for Justice Information and Statistics, and is funded by the Bureau of Justice Statistics, U.S. Department of Justice

On-line Access to the Automated Index

Selecting hardware and software for your agency can be a complex and frustrating task • The SEARCH-BBS helps by providing on-line access to the Automated Index of Criminal Justice Information Systems, a database containing profiles of automated criminal justice agencies and descriptions of computerized information systems designed specifically for use by justice agencies • The Automated Index database enables you to quickly identify public domain and commercial software systems that meet specific needs, and to identify agencies with practical experience with those systems • Agencies and vendors can update the Automated Index with information about their organizations and software products

How to Reach Us

Any justice professional with a computer, a modem and a communications package can reach the SEARCH-BBS 24 hours a day, 7 days a week • The SEARCH-BBS supports modems of 1200, 2400, 4800 and 9600 bits per second (v.32 and v.42 compatible)

1. **Set** your **system parameters** to:
   - ✓ 8 data bits
   - ✓ 1 stop bit
   - ✓ No parity
2. **Dial** 916/392-4640
3. **Log on** to the SEARCH-BBS

The menu-driven system is easy to use, and first-time callers may register on-line

For more information, call SEARCH at 916/392-2550

Acknowledgments. This directory was prepared by SEARCH, The National Consortium for Justice Information and Statistics, Dr. Francis J. Carney Jr., Chairman, and Gary R. Cooper, Executive Director. The project director was David J. Roberts, Deputy Director, Programs, and the project manager was Seth F. Jacobs, Director, Research and Statistics Program. Support was provided by Jane L. Bassett, Publishing Assistant; Twyla R. Cunningham, Manager, Corporate Communications; Cheryl A. Gambetta, Programmer/Analyst; Julie K. Gutierrez, Manager, Software Services; Amir A. Holmes, Law Student Intern; Cheryl Z. Moore, Research Analyst; and William R. Spernow, Systems Specialist. The project was conducted under the direction of Paul D. White, Program Manager, Bureau of Justice Statistics.

Report of work performed under BJS Grant No. 92-BJ-CX-K006, awarded to SEARCH Group, Inc., 7311 Greenhaven Drive, Suite 145, Sacramento, California 95831. Contents of this document do not necessarily reflect the views or policies of the Bureau of Justice Statistics or the U.S. Department of Justice.

The U.S. Department of Justice authorizes any person to reproduce, publish, translate or otherwise use all or any part of the copyrighted material in this publication with the exception of those items indicating they are copyrighted or reprinted by any source other than SEARCH Group, Inc.

The Assistant Attorney General is responsible for matters of administration and management with respect to the OJP agencies: the Bureau of Justice Assistance, Bureau of Justice Statistics, National Institute of Justice, Office of Juvenile Justice and Delinquency Prevention and the Office for Victims of Crime. The Assistant Attorney General further establishes policies and priorities consistent with the statutory purposes of the OJP agencies and the priorities of the Department of Justice.

Foreword

The Bureau of Justice Statistics has long supported and encouraged the criminal justice community to replicate, coordinate and share information management systems, policy and data. To facilitate such sharing, BJS and SEARCH have, since 1980, collaborated in the production of four editions of the *Directory of Automated Criminal Justice Information Systems*, a project initiated by the Law Enforcement Assistance Administration in 1972. The *Directories* provide information about particular information management systems and the level of automation among justice agencies. They are designed with the specific intent of facilitating the exchange of information and the transfer or adaptation of exemplary systems.

Our latest, and fifth such collaboration, the 1993 edition of the *Directory of Automated Criminal Justice Information Systems*, is comprised of two separate volumes: Volume I contains agency and system records relevant to Law Enforcement, while Volume II contains agency and system records relevant to Corrections, Courts, Probation/Parole, and Prosecution.

Taken together, the *Directories* are a valuable resource for criminal justice agencies in the process of selecting an automated information management system that will meet their individual needs. It is the hope of the Bureau of Justice Statistics that this series of *Directories* will promote computerized information processing and also will help state and local agencies to generate accurate and timely criminal justice statistics.

This series of *Directories* is part of the Bureau of Justice Statistics' continuing efforts to inform the criminal justice community of advances in information management and to promote automation among criminal justice practitioners nationwide.

Acknowledgments

Hundreds of criminal justice professionals contributed to the success of the 1993 series of *Directories* by providing information on the level of automation in their agencies and describing criminal justice information systems. The National Clearinghouse for Criminal Justice Information Systems is grateful for the participation of these practitioners and developers, and for the support and leadership of the Bureau of Justice Statistics, which has long recognized the value of information technology to the administration of justice.

Introduction

In 1976 SEARCH, The National Consortium for Justice Information and Statistics, created the National Clearinghouse for Criminal Justice Information Systems to promote and facilitate the transfer of automated, public domain management information systems. The role of the Clearinghouse has grown to include the collection and dissemination of information about proprietary information systems as well. In support of this function, the Clearinghouse maintains the Automated Index of Criminal Justice Information Systems, a database containing information on criminal justice software systems and automated agencies. Since 1980 the Clearinghouse, with support from the Bureau of Justice Statistics, has published four editions of the *Directory of Automated Criminal Justice Information Systems*, a publication based on information generated from the Index database. The publication of this, the fifth edition in the *Directory* series, serves as a valuable resource for criminal justice practitioners who need guidance in selecting an appropriate automated records system. It also helps to minimize duplicate system development efforts among local and state criminal justice agencies nationwide.

Methodology

In 1992, SEARCH staff designed a survey instrument to collect new data for the Automated Index of Criminal Justice Information Systems, the database for the *Directory*. (Samples of the survey instruments are available in Appendix 2, *Sample Agency Survey*, and Appendix 3, *Sample Software Developer Survey*.) Surveys were mailed to all agencies and software developers listed in the 1990 *Directory of Automated Criminal Justice Information Systems* so that the information on those agencies and systems could be updated. In addition, SEARCH sought to augment the database by surveying new agencies and developers of systems not already listed in the Automated Index. Updating the Automated Index became necessary due to the rapid increase in agencies that are automating their manual systems, the influx of new systems to the marketplace, and the continued enhancement and revision of existing systems. As

part of this effort, SEARCH compiled a mailing list using several sources, including the U.S. Bureau of the Census, the National Center for State Courts, and the National Police Chiefs and Sheriffs Information Bureau, as well as other sources. SEARCH then mailed surveys to the agencies and the system developers/vendors. If a vendor identified agencies where its product was installed, a survey was also mailed to those agencies. Similarly, if an agency indicated that it used a particular system, a survey was mailed to that system's developer or vendor.

Organization and Use

In 1980, 1983 and 1986 the *Directory* was published as a single, large volume. In the 1990 edition, five separate volumes were published—one *Directory* for each of five principal criminal justice disciplines: Corrections, Courts, Law Enforcement, Probation/Parole, and Prosecution. This 1993 edition is comprised of two separate volumes: Volume I contains information on Law Enforcement agencies and systems; Volume II contains information on agencies and systems for Corrections, Courts, Probation/Parole, and Prosecution. Together, the two volumes of the *Directory* contain profiles on over 1,100 criminal justice agencies and over 200 automated systems.

Volume I of the *Directory* focuses on Law Enforcement and is divided into five parts: Part I, Agency Description Records; Part II, System Description Records; Part III, Agency Indices; Part IV, System Indices; and Part V, Appendices. (Volume II of the *Directory* is organized in a similar format, with each of the four criminal justice disciplines divided into distinct sections.) The Agency Description Records are based on information provided by individual agencies responding to SEARCH's national survey of criminal justice agencies, and the System Description Records reflect survey responses from system developers and vendors.

Part I: Agency Description Records

Agency Description Records for law enforcement are divided into four sections. The first section, "Agency Description," provides the

name, address and telephone number of the agency, the name and title of a contact person, and indicates the type of agency, the size of the population served, the total number of personnel and the number of full-time personnel, the number of service requests processed annually, and the number of data processing employees.

The second section, "Computer Equipment," lists information on the agency's computer hardware. For each computer, the list includes the type of computer (that is, mainframe, minicomputer or microcomputer), the manufacturer and model, the operating system and the number of units (in the case of minicomputers and microcomputers, this refers to the number of CPUs; for mainframes, this refers to the number of workstations attached to the CPU). If the computer is on a network, the type of network is identified.

The third section, "Automated Functions," identifies general functions within the agency that are automated, such as accounting, electronic mail, spreadsheets and word processing. This section also lists any automated functions that are specific to law enforcement, such as computer-aided dispatch, crime analysis, field interrogation and UCR/IBR. (See Appendix 1, *Automated Functions*, for a complete listing of automated functions specific to law enforcement.)

The final section of the Agency Description Record is "Criminal Justice Software Applications," which lists the name and acronym of any criminal justice or law enforcement-specific software application currently used by the agency. If the agency lists a software system for which a vendor or developer has returned an Automated Index survey, then the page on which that system information appears is also listed. This cross-reference to the System Description Records enables the reader to obtain detailed information about such systems.

Part II: System Description Records

System Description Records for law enforcement are divided into five sections. The first section, "System Description," lists the product name and acronym (if applicable), as well as the developer's

name, address, telephone number and the name and title of a contact person. The record indicates whether the product is proprietary or in the public domain, whether the software can be modified, and whether the source code is available. It also identifies the programming language in which the system is written, the types of local area networks on which it runs, the vendor support services offered and the product features.

Section two, "Computer Equipment," lists the hardware configurations upon which the system runs, indicating the type (mainframe, minicomputer or microcomputer), manufacturer and model, and operating system.

Section three, "Automated Functions," lists automated functions of the system that are specific to law enforcement, such as fleet management, intelligence and missing persons, as well as general functions of the system, such as accounting and word processing. (See Appendix 1, *Automated Functions,* for a complete listing of automated functions specific to law enforcement.)

In the "Narrative" section, the vendor provides a general description of the system, and often includes pricing information.

The fifth, and final, section of the System Description Record, "System Users," identifies up to three agencies that have obtained the named product. Every attempt is made by SEARCH to collect information from the agencies identified by vendors/developers as users of their product. If a listed agency has returned an Automated Index survey, then the page on which that agency information appears is also listed. This cross-reference to the Agency Description Records enables the reader to identify and contact agencies that are familiar with the software.

Part III: Agency Indices

This *Directory* contains five types of Agency Indices, which enable readers to search the *Directory* records quickly and easily for information on automated law enforcement agencies. These Agency

Indices are as follows:

1. *Agency Index by Agency Name* — lists agencies in alphabetic order by name, and includes each agency's city and state;

2. *Agency Index by Total Personnel* — lists agencies in ascending order by the total number of civilian and sworn personnel they employ, and includes each agency's city and state;

3. *Agency Index by Computer Equipment* — identifies agencies by the manufacturer and model number of the computer equipment (hardware) they use;

4. *Agency Index by Automated Functions* — identifies agencies by the law enforcement-related functions they have automated; and

5. *Agency Index by Criminal Justice Software* — identifies agencies by the criminal justice software applications they use.

Part IV: System Indices

This *Directory* contains five types of System Indices, which enable readers to search the *Directory* records quickly and easily for information on automated systems used by law enforcement agencies. These System Indices are as follows:

1. *System Index by System Name* — lists systems in alphabetic order by name, and includes each system's acronym, if applicable;

2. *System Index of Mainframes and Minicomputers* — identifies systems by the manufacturer and model number of the mainframes or minicomputers on which they run;

3. *System Index of Microcomputers* — identifies systems by the microcomputer operating system on which they run;

4. *System Index by Automated Functions* — identifies systems by the law enforcement-related automated functions they perform; and

5. *System Index of Public Domain Software* — alphabetically lists systems that are in the public domain.

Part V: Appendices
This *Directory* also contains the following four Appendices:

1. *Automated Functions* — A list of the law enforcement-specific automated system functions included on the survey instrument;

2. *Sample Agency Survey* — A sample of the survey form that was mailed to law enforcement agencies;

3. *Sample Software Developer Survey* — A sample of the survey form that was mailed to software developers and vendors; and

4. *Update/Correction Notification Form* — A form that agencies or developers can use to inform SEARCH of record additions, updates, omissions or corrections.

Limitations

Although the compilers of this *Directory* have sought to create a useful and comprehensive resource document, readers should be aware of and understand its limitations. This *Directory* is not an exhaustive list of all automated criminal justice agencies or of all criminal justice information management systems. The publication is based on information voluntarily provided by criminal justice practitioners, system developers and vendors who responded to our survey. It was not possible to verify all submitted information; thus, in most cases, the data were accepted and used as reported. (For example, if a survey was incomplete or an answer was unclear, the *Directory* will show a blank for that particular response.)

Whenever possible, systems listed under "Criminal Justice Soft-

ware Applications" in an Agency Description Record are cross-referenced with a System Description Record. Similarly, if a developer states that a system is operational in a particular agency, every attempt was made to establish a link to a corresponding Agency Description Record. As mentioned above, however, records were only created if the developer or the agency completed and returned a survey.

This *Directory* volume can provide an excellent overview of a law enforcement agency's size and level of automation, as well as a representative sketch of a system's functions and features. Systems are frequently updated, however, and personnel turnover and organizational changes may cause some of the information contained in the *Directory* to be out of date. We suggest that readers interested in a particular system contact the developer or the agency using the system to learn first-hand of its capabilities.

In some cases, readers should review Volume II in the *Directory* series when searching for a system or an agency. For example, it is possible that a sheriff's office, classified as a law enforcement agency, would have an Agency Description Record in Volume I, yet is using an automated jail management system that has a System Description Record in the Corrections Section of Volume II of the *Directory*.

Finally, it is important that any omissions or errors be corrected and new information added to the Automated Index of Criminal Justice Information Systems. Readers are asked to use the *Update/Correction Notification Form* (see Appendix 4) to keep SEARCH informed of agency and system changes. This form may also be used to request an agency survey or a vendor survey form. All submitted forms will be used to amend and expand future editions of the *Directory* and the Automated Index of Criminal Justice Information Systems.

Practitioners and system developers may update or correct existing agency or system records *on-line* by accessing the SEARCH-Bulletin Board System (SEARCH-BBS). New agency or system

records may also be added on-line through the SEARCH-BBS. See below for more information.

On-line Access to Directory Information

As noted earlier, the Automated Index of Criminal Justice Information Systems is the electronic database for the *Directories*. The Automated Index is continuously updated and revised as SEARCH receives new information on systems and automated agencies. Practitioners may call or write to SEARCH and request a custom search of the Index database.

Practitioners may also access the Automated Index through the SEARCH-BBS, an electronic bulletin board that is available free of charge to the criminal justice community. Users may search the Automated Index for systems that meet specific functional, hardware or software needs. They may also identify agencies which meet certain criteria and then review the criminal justice information systems in use by those agencies. Both of these approaches utilize a user-friendly, menu-driven system.

The SEARCH-BBS, which is funded by the Bureau of Justice Statistics, U.S. Department of Justice, serves as a national forum for information exchange, and provides the criminal justice community with access to on-line databases, downloadable software, message areas and publications. It provides a direct line of communication between criminal justice practitioners, allowing them to exchange information, share resources and query criminal justice databases.

To access the Automated Index through the SEARCH-BBS, users need a microcomputer, a modem and a communications package. Users are registered on-line by dialing 916-392-4640. Please set your communication package to 8 data bits, 1 stop bit, no parity. The SEARCH-BBS supports modems of 1200, 2400, 4800 and 9600 bits per second (v.32 and v.42 compatible). For more information about the SEARCH-BBS, or for a demonstration disk (DOS required), please call Mr. Seth F. Jacobs, SEARCH-BBS System Operator, at 916-392-2550.

NARRATIVE

The AT&T Law Enforcement software is a user-friendly records management system that was designed by a law enforcement officer. It offers easy access to all the data agency personnel need and eliminates paperwork with automatically compiled statistical and summary reports. By design, the system is easy to learn and simple to use.

AUTOMATED FUNCTIONS

Discipline-specific
Case management, Crime analysis, Criminal associates, Criminal history, Gang activity, Intelligence, Link analysis, Modus operandi, Name index, Organized crime, Victim/Witness information

NARRATIVE

The Enhanced Criminal Network Analysis (ECNA) is a stand-alone analytical tool that permits an investigator or analyst to analyze complex criminal networks. A data file consists of "links" between "entities" (people, places, or things). "Strength" values and "validity estimates" are assigned to each link. ECNA can accommodate as many as 2,000 entities, 5,000 links and as many as 20 separate "linktypes" (e.g., money, stolen property, drugs, etc.) ECNA produces several analytic products, including "link networks". ECNA will also produce a graphic link chart (automatically and immediately) based on a link network. The ECNA program is not sold without training. The cost for ECNA and the three-and-one-half day training course is $675.00.

NARRATIVE

The BIS Criminal Justice System is a totally integrated and extensive computer system designed by criminal justice experts for criminal justice efficiency. It is the proven "information management system," providing full capabilities previously found only in very large and very expensive installations. The BIS application arsenal includes systems for law enforcement, corrections, and courts. Specifically, BIS manufactures and supplies its Public Safety constituents with Computer-Aided Dispatch for Police and Fire, Law Enforcement Records Management, Records Management Systems for local Jails, Prisons or detention facilities, Court Management systems, Prosecution case management systems, and Probation case management systems.

NARRATIVE

The CHIEFS system is a user friendly, modular, menu-driven, soft-coded product developed by experienced public safety professionals. The system operates in native mode on the IBM AS/400 platform, and there is a System 36 version specifically written for that architecture in RPG III. The law enforcement reporting system is incident based and the fire reporting system meets the new California (CFIRS) requirements as well as NFICS. Modules of CHIEFS include CRIMES Law Enforcement Incident Based Reporting; FIRES Incident Reporting and Fire Prevention/Inspections; Computer-Aided Dispatch and E-911 Connectivity; Parking Management; Vehicle Maintenance; Training and Selection; and Crackdown/Narcotics and Gang Tracking. There are 220 CHIEF installations in 34 states and Canada.

AUTOMATED FUNCTIONS

Discipline-specific
Computer-aided dispatch

NARRATIVE

Advanced Computer-Aided Dispatch (A-CAD) automates the communication section of public safety agencies. Complaint-taking and dispatching data entry are done on-screen as calls are taken. The system continuously updates all information so that current field conditions can be viewed at any time. The A-CAD design speeds call entry and dispatch while increasing accuracy and field safety. A-CAD reports supply information needed for effective resource allocation. Trouble spots can be pinpointed and individual officer performance can be evaluated. In addition, the completed call entries can be transferred to the Calls For Service module in the Fire Records Management System (FIRES) or Criminal History Records Management System (CAPS) for additional report analysis. Color and E-911 interface are available. Prices start at $3,500.00 for single user.

AUTOMATED FUNCTIONS

NARRATIVE

This Photo Imaging (PONY Capture/Display) system is a complete image workstation that captures and stores images on disk. These images are normally appended to the CISCO data base and can be viewed or printed in photographic quality color using the optional film printer. The images can be stored on a hard disk of the workstation or transferred to the central computer using the LOCUS PCI software. Thus, PONY is available in a single-user version and the multi-user version which can be integrated into UNIX, XENIX and Local Area Networks. Each image takes about 6kb of disk space using the Video Compression Board. The video capture device can be a live action camera, a still camera or a document scanner in the case of printed matter.

AUTOMATED FUNCTIONS

General functions
Workload analysis

NARRATIVE

The Patrol Workload Analysis System evaluates patrol effectiveness based on calls-for-service consumed time. The system prepares shift and day-off schedules for either "4-10" or "5-8" work schedules. It produces reports of queue, travel and response time by priority of call, by hour, shift and day of week. The system analyzes consumed time by beat and reporting district and allows experiments to reassign reporting districts from one beat to another. Adequacy of patrol staff is analyzed, relative to consumed time workload. This system is available at no cost to law enforcement agencies. Requesting agencies must supply two 360KB floppy disks or equivalent.

NARRATIVE

The Data Investigator is a sophisticated law enforcement package designed for single user or networked environments. The Data Investigator sells for $3,500.00 as a single user or $4,500.00 for the network version. It can handle any kind of law enforcement agency. All data can be cross-referenced to find suspects, property, or any type of condition, design, or field within the system. All reporting features are included within the system. Requirements are IBM compatible, 286 MHZ, hard drive, mono or color monitor.

AUTOMATED FUNCTIONS

Discipline-specific
Computer-aided dispatch, Criminal history, Mapping or geocoding

NARRATIVE

E T Software's CAD encompasses single or multi-agency dispatching of such units as police, fire and emergency medical services. Geocoding is provided as is unit and shift assignments. Unit status is automatically updated so that the dispatcher always knows units available. Calls can be prioritized according to the user's needs. Previous history at a location is provided along with an option to check the Master Name File for Warrant and Arrests. Dispatchers perform functions such as Call Received, Unit Dispatched, Unit Arrival, and Call Completed. All clock times are automatically attached to each transaction. A number of reporting capabilities are included, such as alarms answered, officer/unit monthly activity, response time, monthly zone activity, daily call log, case history, and shift summary. Users can contract to have specialized reports written. This module can be purchased separately or as an add-on to E T's Computerized On-line Police System (C.O.P.S.).

NARRATIVE

VT-DISPATCH is an integrated call-taking, computer-aided dispatching (CAD) software product for law enforcement, fire and emergency medical service agencies of all sizes. The software enables the entry of calls for service on-line or by automatically accessing enhanced 9-1-1 automatic number identification (ANI) or automatic location identification (ALI) information. It helps dispatchers select appropriate units, captures all time and assignment data, and displays unit/event status. Pricing depends upon operating system and hardware platform.

Gering Police Dept

Discipline-specific (continued)
management, Traffic accident report, Traffic case processing, Victim/Witness information, Wanted persons, Warrants

NARRATIVE

VT-PRISM is a new generation of automated information management software for law enforcement agencies. Its advanced features provide a powerful tool for crime analysis, management decision-making, report generation and other investigative support. All critical departmental record management needs are addressed by the system. VT-PRISM contributes to the increased effectiveness and productivity of personnel at all organizational levels with access to the system. Pricing is dependent upon operating system and hardware platform.

NARRATIVE

Mapinfo is a desktop mapping system which allows display, management, and analysis of information geographically. Data from dbase or ASCII files can be overlaid onto maps, automatically pinpointing data or shading areas. MapInfo has many other features such as address matching, map and boundary editing, polygon searches, presentation output, and a built-in database management system. With the optional MapCode language, MapInfo can be tailored for custom applications. MapInfo is also available for network use. MapInfo supplies maps, ranging from nationwide boundary files to actual street maps of thousands of cities in the U.S.

Fleet management

NARRATIVE

This Fleet Maintenance System (FLEET) is a low-cost ($75.00) computerized filing system used to store details about departmental vehicles. Details about gasoline usage and repairs are monitored and form the basis for periodic reports. Next scheduled maintenance is also monitored for each vehicle, either by a target mileage or specific date. A table of service codes may be created that are then automatically tied to each work order. MicroServices can modify FLEET to exact needs.

Discipline-specific
Computer-aided dispatch

NARRATIVE

The OCS Technologies' Computer-Assisted Dispatch system has been renamed "DispatchManager." It is a geofile-based system which links inquiries to responses, and suggests the appropriate units to geographically mapped addresses stored in the computer, even in rural areas with poor address descriptors. It can be tailored to your needs. CAD handles dispatch operations whether the entire call activity or only the initial call information is recorded by the call taker. Additional flexibility built in to the system allows each operator to use the method that is most efficient for them.

Roark, A L & Associates Inc

NARRATIVE

RESPONSE is a fully integrated computer and software system designed to asist public safety agencies in responding to requests for service. It automates many time-consuming communication, call-taking, dispatching, deployment, and unit status recording activities. The RESPONSE Computer-Aided Dispatching implementation improves productivity of both communications center operations and field personnel. More time can be devoted to decision making because of automated call data transfer and unit assignment. Field safety is substantially improved and field resources utilized more effectively. Software prices start at $20,000.00 for the small system and vary with the needs of the installation to a maximum of $80,000.00 for the large-scale system.

NARRATIVE

The Tiburon Computer-Aided Dispatch System, CAD/2000, is a full-featured, state-of-the-art means for Public Safety agencies to control dispatch operations and collect management information in an automated environment. Complete police, fire and emergency medical support is provided in single or multiple-agency environments. In addition, CAD/2000 provides interfaces and support for external data bases, E-911, and mobile digital terminal systems. CAD/2000 is a full-function system designed for use by medium to large-sized agencies, installed "as is" or customized as needed.

NARRATIVE

The Tiburon Records Management System, RMS/2000, is a full-featured Records Management System designed for public safety departments which need comprehensive management of information. RMS/2000 is designed to minimize data entry requirements by virtually eliminating redundant entry of information. RMS/2000 supports records processing from the entry of a dispatch event or incident through its final disposition. A series of integrated subsystems records information on locations, persons, property, vehicles, and events, and supports transactions to add, modify, and delete this information. RMS/2000 supports a single-entry concept: when a user enters or updates information, the system automatically disseminates the information and updates all pertinent files. Both historical and current information are maintained and made available through on-line inquiries and/or reports.

AUTOMATED FUNCTIONS

Discipline-specific
Crime analysis, Victim/Witness information, Wanted persons

NARRATIVE

COMPUSKETCH is a composite sketching software package that generates criminal suspect sketches from witness descriptions. It features an interactive witness interview which contains up to 150 questions and is designed to assure unbiased uniformity and prevent bluffing. It includes a library of over 40,000 facial features which can be combined to produce trillions of suspect faces. Sketches can be printed, stored and transferred to DTP programs. List price is $4,500.00, including Paint and B/U/Restore program.

Survey of Automated Agencies — Law Enforcement

The Automated Index of Criminal Justice Information Systems is used by criminal justice professionals to share their expertise about what works in information technology — an expertise vital to criminal justice professionals faced with system development decisions. To collect and disseminate this information for the benefit of criminal justice agencies, the Bureau of Justice Statistics, U.S. Department of Justice, established The National Clearinghouse for Criminal Justice Information Systems. For over 15 years, the Clearinghouse has documented automated information systems, promoted and facilitated their transfer among agencies, and operated the Automated Index of Criminal Justice Information Systems — a database containing information on automated systems and agencies.

The Automated Index is based on a national survey of hundreds of criminal justice agencies and software developers. Criminal justice practitioners provided information describing their agencies in terms of type, size and jurisdiction; computer equipment (including operating systems and local area networks); automated agency functions; and any criminal justice software applications used. Software developers and vendors provided the information that describes each system in the Index in terms of hardware and operating system requirements, program language, product features, support services and whether it is proprietary or in the public domain. Vendor contact and agency user information is also included.

Information contained in the Automated Index is available to justice practitioners in three formats. Individuals may directly access the Index through the SEARCH-BBS, our electronic bulletin board (916/392-4640); telephone SEARCH (916/392-2550) and request a special search of the Index; or request a copy of the *Directory of Automated Criminal Justice Information Systems,* published by the Bureau of Justice Statistics. This is a five-volume series: Vol. I, *Corrections*; Vol. II, *Courts*; Vol. III, *Law Enforcement*; Vol. IV, *Probation and Parole*; and Vol. V, *Prosecution.* All volumes may be ordered from the National Criminal Justice Reference Service (800/732-3277).

The purpose of this brief survey is to update and expand our records in the Automated Index. The survey requests information about your agency including the type of automated systems maintained and any criminal justice software applications used. Knowledge of your agency's systems may help others who are seeking to use technology to effectively manage data. We would appreciate it if you would take the time to complete this important survey. Your cooperation will ensure that information about your agency's systems is listed in the Automated Index and any future editions of the *Directory*, and that it is current, complete and accurate. Thank you for your assistance.

Does your agency use a computer to accomplish any of its tasks?

☐ No, we have a manual system.

If **"No,"** it is not necessary for you to complete this survey.

☐ Yes, we have an automated system.

If **"Yes,"** please complete this brief survey and return it to SEARCH at your earliest convenience. Simply refold it so the return address shows and seal it with tape — no postage is necessary. If you have any questions regarding this survey, please contact Cheryl Moore at SEARCH (916) 392-2550.

SECTION I — AGENCY DESCRIPTION

1. Please check the *one box* that best describes your agency:

- ☐ Municipal Police
- ☐ County Police
- ☐ Sheriff's Office
- ☐ State Police
- ☐ Highway Patrol

- ☐ Other *(please specify)*_____

_____

_____

2. Population of jurisdiction served (approximate):_____

3. Total number of agency personnel:_____

4. Number of full-time sworn personnel:_____

5. Approximate number of requests for service annually:_____

6. Does your agency have any employees whose primary responsibilities include investigating computer crime?

- ☐ No
- ☐ Yes

SECTION II — COMPUTER HARDWARE

■ This section collects information about the physical equipment (hardware) and system software your agency is currently using. Included are questions about how your agency's information processing is accomplished.

1. Does your agency have any employees whose primary responsibilities include data processing, computer maintenance, programming, etc.?

- ☐ No
- ☐ Yes → **If yes, how many full-time equivalent employees (FTE)?**_____

2. Please use the following table to describe the computer hardware used by your agency. Four examples are provided.

MANUFACTURER and MODEL	COMPUTER TYPE (Please check one)			NUMBER OF PCs OR WORKSTATIONS*	OPERATING SYSTEM and VERSION	LOCAL AREA NETWORK
	Main-Frame	Mini	Micro			
Examples						
APPLE MACINTOSH SE			✓	2	SYSTEM 7.0	APPLETALK
PC COMPATIBLE			✓	4	MS-DOS 4.0	NOVELL
PRIME 2250		✓		30	PRIMOS 20.2.7	
IBM 3090/150	✓			100	MVS 2.1	
1.						
2.						
3.						
4.						
5.						
6.						
7.						
8.						

* Please indicate the total number of PC's or workstations connected to each computer, including overlaps. For example, a terminal connected to a minicom-

SECTION III — LEVEL OF AUTOMATION

■ Question number 1 below collects information on your agency's use of software packages which are *not specifically oriented to criminal justice* (e.g., WordStar, Lotus 123, Rbase 5000).

1. The following is a list of GENERAL OFFICE AUTOMATION functions. Please place a check in the box next to each function for which your agency uses one or more software packages.

- ☐ Accounting
- ☐ Budgeting
- ☐ Bulletin Board System
- ☐ Database Management
- ☐ Desktop Publishing
- ☐ Electronic Mail
- ☐ Graphics
- ☐ Payroll
- ☐ Personnel
- ☐ Planning
- ☐ Research/ Statistics
- ☐ Scheduling
- ☐ Spreadsheets
- ☐ Training
- ☐ Word Processing
- ☐ Workload Analysis

☐ Other *(please specify)*_____

_____

_____

■ Question number 2 below collects information on your agency's use of software packages which are *specifically oriented to criminal justice functions or information systems.*

2. The following is a list of CRIMINAL JUSTICE functions. Please place a check in the box next to each function for which your agency uses one or more software packages.

- ☐ Animal Licensing
- ☐ Arrest/Crime Records
- ☐ Automated Vehicle Location
- ☐ Case Disposition Reports
- ☐ Case Management
- ☐ Citation Control
- ☐ Computer-aided Dispatch
- ☐ Computerized Sketching
- ☐ Crime Analysis
- ☐ Crime Lab
- ☐ Criminal Associates
- ☐ Criminal History
- ☐ DWI/DUI
- ☐ Drug Law Violations
- ☐ Evidence Management
- ☐ Field Contact Report
- ☐ Fingerprint Processing
- ☐ Firearms Registration
- ☐ Fleet Management
- ☐ Fraud Offenses
- ☐ Gang Activity
- ☐ Intelligence
- ☐ Inventory Control
- ☐ Juvenile Records
- ☐ License/Registration
- ☐ Link Analysis
- ☐ Mapping/Geocoding
- ☐ Missing Persons
- ☐ Modus Operandi
- ☐ Name Index
- ☐ Narcotics Control
- ☐ NCIC Entry
- ☐ NIBRS
- ☐ Organized Crime
- ☐ Parking Tickets
- ☐ Pawned Articles
- ☐ Report Writing
- ☐ Stolen Property
- ☐ Summons Mgmt.
- ☐ Traffic Tickets
- ☐ Traffic Accident Report
- ☐ Traffic Case Processing
- ☐ Transport of Prisoners
- ☐ UCR
- ☐ Vehicle Inspection
- ☐ Victim/Witness Info.
- ☐ Wanted Persons
- ☐ Warrants

☐ Other *(please specify)*_____

_____

SECTION IV — AUTOMATED JUSTICE APPLICATIONS

■ We will use the following information to contact the developer(s) of the software system(s) your agency currently uses. This will allow us to gather additional information about the developer's software packages.

1. Please provide the following information about the criminal justice software system(s) your agency currently uses:
(Please use additional pages, if necessary.)

System name _____ Acronym _____
Developer _____
☐ Purchased ☐ Developed in-house ☐ Received from another agency

System name _____ Acronym _____
Developer _____
☐ Purchased ☐ Developed in-house ☐ Received from another agency

System name _____ Acronym _____
Developer _____
☐ Purchased ☐ Developed in-house ☐ Received from another agency

SECTION V — CONCLUSION

■ Please provide the following information about the person in your agency who is best qualified to provide **technical information** about the computer hardware and software system(s) your agency uses. This individual will be included as the contact person in the Automated Index of Criminal Justice Information Systems and should be the person who will be available to respond to inquiries from SEARCH staff and justice agencies.

Name _____ Title _____
Agency _____ Telephone _____
Street Address _____
City _____ State _____ ZIP _____

In the event that a question may arise during the processing of this survey, please provide the name and telephone number of the person who completed it.

Name _____ Telephone _____

■ Thank you for taking the time to complete this survey. The timely data you provided will help to ensure that the Automated Index will continue to be useful to the criminal justice community.

Survey of Criminal Justice Software Developers

The Automated Index of Criminal Justice Information Systems is used by criminal justice professionals to share their expertise about what works in information technology — an expertise vital to criminal justice professionals faced with system development decisions. To collect and disseminate this information for the benefit of criminal justice agencies, the Bureau of Justice Statistics, U.S. Department of Justice, established The National Clearinghouse for Criminal Justice Information Systems. For over 15 years, the Clearinghouse has documented public domain and proprietary automated information systems, promoted and facilitated the transfer of proven criminal justice information software, and operated the Automated Index of Criminal Justice Information Systems — a database containing information on automated systems and agencies.

The Automated Index is based on a national survey of hundreds of criminal justice agencies and software developers. Information obtained from software developers includes each system's hardware and operating system requirements, language used, product features, and agencies using the system, as well as support services provided by the system's developer, and contact information. Information obtained from agencies includes size and structure, computer hardware, operating systems, and local area networks. Specific agency functions that have been automated (e.g., warrants) are indicated, as well as the proprietary or public domain information systems used by each agency.

Information contained in the Automated Index is available to justice practitioners in three formats. Individuals may directly access the Index through the SEARCH-BBS, our electronic bulletin board (916/392-4640); telephone SEARCH (916/392-2550) and request a special search of the Index; or request a copy of the *Directory of Automated Criminal Justice Information Systems*, published by the Bureau of Justice Statistics. This is a five-volume series: Vol. I, *Corrections*; Vol. II, *Courts*; Vol. III, *Law Enforcement*; Vol. IV, *Probation and Parole*; and Vol. V, *Prosecution*. All volumes may be ordered from the National Criminal Justice Reference Service (800/732-3277).

This survey collects, for dissemination through the Automated Index, information on the types of automated system(s) you have developed. Knowledge of your systems could help agencies that are seeking to use technology to effectively manage their data. We would appreciate your taking 15 minutes to complete this survey. When you have completed this survey, please return it to SEARCH. If you have found it necessary to copy and/or insert additional pages, please be sure that a complete, stapled survey is included for each product described.

Please return this survey at your earliest convenience. Simply refold it so the return address shows and seal it with tape — no postage is necessary. If you have any questions regarding this survey, please contact Cheryl Moore at SEARCH (916) 392-2550.

Please submit a completed survey for each individual criminal justice-oriented product offered by your firm or agency. Where pages of the survey are common to two or more of the products you are describing, feel free to copy the completed pages and insert them in the appropriate product description. This will save you time and duplication of effort.

We ask that you do not list separately the individual modules that comprise an integral system unless each module can operate as a stand-alone package.

1. **Full Product Name** _____ **Acronym** *(if applicable)* _____

2. **Is this product comprised of stand-alone modules capable of functioning independently?**

   ☐ No

   ☐ Yes → **If yes, please list the modules**

   (use additional paper if necessary)

   A. _____

   B. _____

   C. _____

3. **Does this product function on a local area network?**

   ☐ No

   ☐ Yes → **If yes, please list the network(s)** _____

4. **Is this product shareware or in the public domain?**

   ☐ No

   ☐ Yes

5. **In what programming language(s) is this product written?**

   _____

6. **Is the software modifiable by the end user?**

   ☐ No

   ☐ Yes

7. **Please provide a short narrative of this software package, including pricing structure.**

_____

_____

_____

Which computers can be used to operate this product?

MANUFACTURER and MODEL	COMPUTER TYPE (Please check one) Main-Frame	Mini	Micro	OPERATING SYSTEM and VERSION
samples PC ompatibl			✓	MS-DOS 4.0
IBM 3090, 0	✓			MVS 2.1
. 1-1 22		✓		PRIMOS 20.2.7

9. Is the source code available to the end user?

- ☐ Yes, supplied with the product
- ☐ Yes, available to the end user, but not normally supplied with the product
- ☐ No, neither supplied nor available

10. What support services do you offer to users of this product?
(check all that apply)

- ☐ Demonstration Software
- ☐ Manual - Technical/Reference
- ☐ Manual - User's
- ☐ Programming Services
- ☐ Support - On-site
- ☐ Support - Telephone
- ☐ Support - 24-hour
- ☐ Training - Computer-assisted
- ☐ Training - Off-site
- ☐ Training - On-site
- ☐ Other *(please specify)* _____

11. What features does this product offer the end user? *Please list only functions which are a part of the application software, not additional capabilities which are a part of the operating system or language in which the system was developed.*

- ☐ Client Server
- ☐ Help - Context-sensitive
- ☐ Help - Online
- ☐ Import/export - From/to other programs
- ☐ Import/export - From/to other systems
- ☐ Input - Mouse or light pens
- ☐ Interface - Hot keys
- ☐ Interface - Icon-driven
- ☐ Interface - Menu-driven
- ☐ Interface - Pop-up windows
- ☐ Interface - Scroll fields
- ☐ Output - Color video
- ☐ Output - Graphic
- ☐ Record locking - field-level
- ☐ Record locking - file-level
- ☐ Record locking - record-level
- ☐ Reports - Ad hoc
- ☐ Reports - Query-by-example
- ☐ Reports - SQL
- ☐ Searches - Exact match
- ☐ Searches - Soundex
- ☐ Searches - Wildcard
- ☐ Security - Application-level
- ☐ Security - Data encryption
- ☐ Security - Log-in
- ☐ Other *(please specify)* _____

12. Does this product perform general administrative functions?

- ☐ No
- ☐ Yes → **If yes, please indicate which functions are served** ***(check all that apply)***:

- ☐ Accounting
- ☐ Budgeting
- ☐ Database Mgmt.
- ☐ Desktop Publishing
- ☐ Electronic Mail
- ☐ Graphics
- ☐ Payroll
- ☐ Personnel
- ☐ Planning
- ☐ Research/Statistics
- ☐ Scheduling
- ☐ Spreadsheets
- ☐ Training
- ☐ Word Processing
- ☐ Workload Analysis
- ☐ Other *(please specify)* _____

13. Which criminal justice discipline does this product *primarily* serve?
(select only one)

- ☐ Corrections
- ☐ Courts
- ☐ Law Enforcement
- ☐ Probation and Parole
- ☐ Prosecution
- ☐ Other *(please specify)* _____

14. Please advance to the specific criminal justice discipline identified in question 13 and check all the functions the product performs.

*U.S. G.P.O.:1993-342-471:80012

- One function of the Clearinghouse is to refer agencies interested in a product to other agencies that are using it in an operational setting. To facilitate this referral process, please list several agencies that use this software. (Use additional pages if necessary.)

1. Agency Name _____
   Contact Name _____
   Address _____
   Telephone _____

2. Agency Name _____
   Contact Name _____
   Address _____
   Telephone _____

3. Agency Name _____
   Contact Name _____
   Address _____
   Telephone _____

- Please provide the following information about the person in your company who is best qualified to provide technical information about your software products. This individual will be included as the contact person in the Automated Index of Criminal Justice Information Systems and should be the person who will be available to respond to inquiries from SEARCH staff and justice agencies.

Contact Person _____ Title _____

Developer/Agency Name _____

Address _____

City _____

State _____ ZIP _____ Telephone _____

- In the event that a question arises during the processing of this survey, please provide the name, title and telephone number of the person who completed this survey.

Name _____ Telephone _____

Thank you for taking the time to complete this survey. The timely data you provided will help to keep the criminal justice community informed about your company's products.

Update/Correction Notification Form

Date _____

☐ Our agency/system was not included in the *1993 Directory of Automated Criminal Justice Information Systems*. Please send the following questionnaire(s):

Agencies:

- ☐ Corrections
- ☐ Courts
- ☐ Law Enforcement
- ☐ Probation/Parole
- ☐ Prosecution

Vendors/Developers:

- ☐ System Survey

☐ Our entry is erroneous. I have attached a copy of our entry and have marked the changes.

Name _____

Job Title _____

Agency _____
