RELIGIOUS AFFILIATION OF UNDERCUSTODY POPULATION

NCJRS

JUN 21 1993

ACQUISITIONS

This report presents descriptive information on the religious affiliation of undercustody inmates. Data on age, gender, ethnic status, marital status and other variables is presented according to religious affiliation. The report is preceded by a summary of the main findings.

EXECUTIVE SUMMARY

1. Almost 90% of inmates under custody on July 1, 1991, were affiliated with an organized religion. Approximately 40% are Catholic, 30% Protestant, 16% Islam, 3% other faiths, and 11% were not specified or were unknown (See Table 1 p. 6).
2. Female inmates are more likely to be affiliated with Protestant faiths (40%) than male inmates (30%) and male inmates are more likely to be affiliated with Islamic faiths (17%) than female inmates (8%) (See Table 1, p. 6).
3. The average age of inmates under custody on July 1, 1991 was 31 years. Jewish and Greek Orthodox inmates tend to be somewhat older than the average, while Islamic and Rastafarian inmates are somewhat younger than the average (see Table 2 p. 7).
4. Sixty-two percent of Catholics are Hispanic, 25% white and 12% black. Protestant denominations are predominantly black (73%) with a sizeable percent of white inmates (13%) and Hispanic inmates (12%). Islamic and Rastafarian inmates are predominantly black (91% respectively) and Greek Orthodox inmates are largely white (90%). Fifty-three percent of Jewish inmates are white, 31% are black and 15% Hispanic (See Table 3A, p. 8).
5. Eight-nine percent of inmates are fluent in English. However, among Catholics, only three-quarters are fluent in English (See Table 5 p. 12).
6. Only a fifth of the inmates were legally wed at the time of their commitment while 60% were single, not previously married. Islamic inmates were the most likely to report never having been married (65%) and Greek Orthodox inmates the least likely not to have been married (48%) (See Table 6 p. 13).
7. Fifty-five percent of inmates have at least one child. Only among Buddhists and Hindus do a majority claim not to have at least one child. Rastafarians claim the most children of any of the inmates reporting religious affiliation. More than 27% of the Rastafarians claim at least three children compared to 17% of the overall inmate population who claim that many children (See Table 7 p. 14).
8. The average time to parole eligibility is approximately 14 months for the total population. Time to parole eligibility for each faith is similar to that for the total population except for the Buddhist/Hindu group who are slightly higher at an average of 16 months (See Table 9 p. 16).

INTRODUCTION

In recent months, the Division of Program Planning, Research and Evaluation has been asked to provide general information on the religious affiliation of undercustody inmates. A set of preliminary data tables were prepared which describe persons who affiliate with different religious faiths according to age, gender, ethnic status and other variables. After further review by staff in the Division of Family and Ministerial Services as well as in this unit, a decision was made that these data might be useful to clergymen and program services staff working in correctional facilities, to research investigators, and to the public. This brief report is the result.

Almost 90% of undercustody inmates are affiliated with an organized faith. Seventy percent are members of Christian faiths and 19% are affiliated with a wide range of other faiths including Islam, Buddhism, Judaism, Hinduism, Rastafarian and others.

The diversity of inmate religious affiliation is consistent with other evidence of the heterogeneity of the undercustody population in New York State correctional facilities. The undercustody population is heterogeneous on racial/ethnic status: approximately 17% are white, 50% are black, 32% Hispanic and 1% Native American, Asian or Oriental¹. Twelve percent of undercustody inmates are foreign born, and 10% are dominant in languages other than English.

Given population heterogeneity, information on variables such as age, marital status, number of children and language dominance of persons of each religious affiliation subgroup can assist staff in responding to the family and religious affiliation needs of inmates.

¹ For further information on characteristics of undercustody inmates, see "Comparison of Male and Female Inmates Under Department Custody December 31, 1990" (1991). Division of Program Planning, Research and Evaluation, New York State Department of Correctional Services, Albany, NY 12226.

Before moving into the report, a brief comment on the data is appropriate. The data on which the Division relies for inmate religious affiliation is collected at reception. The inmate is interviewed by classification staff and his or her religious affiliation is recorded against a list of recognized religions. The appropriate code for the inmate's response is then entered on the computerized inmate files accessed by the Division.

The religious affiliation of the inmate that is found in Department written records or on electronically maintained records is that which is claimed by the inmate. Inmate reported religious affiliation is not subject to verification by Department staff unlike other inmate supplied data (e.g., educational attainment). Inmates are permitted to make a change in religious affiliation during their incarceration and the updated religious affiliation is entered on computer files maintained by the Department. The religious affiliation status of inmates examined in this report is based on the most recent designation.

GENDER STATUS

Table 1 shows the distribution of religion by gender. Approximately 90% of the inmates claim to be members of some religion. Forty percent are Roman Catholic; 30% belong to various Christian and Protestant sects; 16% claim to be adherents of an Islamic faith; and 3% adhere to a variety of other faiths.

The most notable differences between males and females under custody is in the proportion considering themselves Protestant or Islamic. Forty percent of females are affiliated with a Protestant faith compared with 30% of males. Islam is reported as the religious persuasion of 17% of males and 8% of females.

AGE

Table 2 presents data on current age by religious affiliation. The average age of inmates under custody is 31.2 years. Jewish inmates and Greek Orthodox inmates are somewhat older (average age 35.6 years and 35.4 years, respectively) than the average for the total population. Inmates who identify themselves as Islamic or Rastafarian tend to be younger (28.9 years and 29.4 years, respectively) than the average for the total population.

ETHNIC STATUS

Tables 3A and 3B show religious variation by ethnicity. In Table 3A, the percentage figures show for each religious affiliation the percent of cases that fall into each ethnic status category. In Table 3B, percentage figures show for each ethnic status group the percent that fall into each religious affiliation.

Examination of the ethnic distribution within each religious affiliation (Table 3A) shows that among those of the Catholic faith a majority of inmates are Hispanic (62%) followed by white (25%) and black (12%). The Protestant denominations are predominantly black (73%) with the remaining inmates evenly divided among white (13%) and Hispanic (12%). Religious affiliations that are primarily drawn from a single ethnic group include Islam (91% black), Rastafarian (91% black) and Greek Orthodox (90% white). Among Jewish inmates approximately 53% are white, 31% are black and 15% are Hispanic. Buddhist and Hindu inmates are distributed among several ethnic categories including white (15%), black (31%), Hispanic (12%), Asian (19%) and other (20%).

The data in Table 3B show the percent of inmates in each racial/ethnic status category that affiliate with the various faiths. Briefly, among white inmates a substantial percent are Catholic (60%) followed by Protestant (24%) and then Jewish (5%). Among black inmates, 45% are Protestant, 30% Islamic and 10% Catholic. Among Hispanics 78% are Catholic, 12% Protestant and 4% Islam.

BIRTH COUNTRY

The region and country of the world in which inmates were born is presented in Table 4. The vast majority of inmates were born in the United States (43,224), mainly in New York State (35,263). However, 6,915 (12%) of undercustody inmates were foreign born.

With the exception of the Buddhist and Hindu group and the Rastafarian group, the majority of each faith is American born. Over half (54%) of the 358 Rastafarians were born in Caribbean nations, especially the island of Jamaica (138). Fifty-two percent of the 142 Buddhists and Hindus were also born outside the United States or one of its territories. The largest component is American-born (59) but the second largest component is of Asian birth (44).

LANGUAGE DOMINANCE

Eighty-nine percent of undercustody inmates speak English fluently (see Table 5). However, among Catholics, only 77% speak English fluently. More than a fifth claim to be Spanish dominant. Nearly six hundred Protestants claim to be Spanish dominant, although they represent only 3% of Protestant inmates.

MARITAL STATUS

Data on the marital status of inmates according to religious affiliation is presented in Table 6. The majority of undercustody inmates (59%) were single and never previously married as of the date they were committed to state prison. Only a fifth (20%) were legally wed at commitment, while another 11% were in common law relationships at commitment. The balance were either divorced (5%), separated (4%) or widowed (1%).

There is variation in the percentage of inmates of each religious affiliation with regard to marital status. Among inmates providing religious affiliation, Islamic inmates (65%) were most likely to report never having been married. Jewish inmates and Greek Orthodox inmates were least likely to report never having been married (49% and 47 % respectively). Catholics (54%), Rastafarians (57%) and Protestants (60%) were in the middle of the distribution with regard to their being single and not previously married.

NUMBER OF CHILDREN

More than half (55%) of the inmates report having at least one living child (see Table 7). Only among the small cohort of Buddhists and Hindus do more than half of the inmates report no children. Rastafarians (27%) are more likely than the total inmate group (17%) to report at least three living children.

FACILITY CLUSTERS

As this paper is being written, the Department is planning on clustering the correctional facilities throughout New York State. Table 8 presents the religious affiliation of the inmates by the proposed clusters. Table 8 discloses that the proportion of each faith's members in a cluster approximates that for the State as a whole.

TIME TO PAROLE ELIGIBILITY

Data on time to parole eligibility is shown in Table 9. Overall, the average undercustody inmate (excluding those past their parole eligibility date) has 14 months to serve before becoming eligible for parole. The median time is 13 months. The average for most faiths is similar to that for the population taken together. For the Buddhist/Hindu category the average time to parole eligibility is somewhat higher (16 months) than for other religious affiliations.
