Dear Colleague:

I am pleased to provide you with a copy of Wisconsin Crime and Arrests - 1992. This report is based upon monthly crime and arrest reports submitted by 323 law enforcement agencies throughout Wisconsin. We greatly appreciate the continued efforts of personnel from each of these agencies in collecting and reporting important crime and arrest information.

The first half of the report presents statewide information on crime and arrests together with individual sections on each Index crime. The second half of the report contains more detailed crime and arrest information for individual jurisdictions within the State, organized alphabetically by county.

Some of the most important findings are summarized at the beginning of the report (see page 3 - 1992 Crime and Arrest Facts at a Glance). These include a 2.2 percent decline in reported Index crimes, a decrease in adult arrests, and an increase in juvenile arrests.

If you have any suggestions for improving the report in future years, please let me know. Also, if your Department requires additional copies, please contact our office.

I hope this report meets your needs and you will find it useful. Please contact our office if you need other crime-related statistics throughout the year.

Sincerely,

JEROME D. LACKE
Executive Director

Crime and Arrests in Wisconsin - 1992

Introduction

This report, prepared by the Wisconsin Office of Justice Assistance, Statistical Analysis Center (SAC), presents data on crime and arrests in Wisconsin during 1992. From 1970 through 1981 the state Uniform Crime Reporting (UCR) Program, operated by the Crime Information Bureau of the Wisconsin Department of Justice (DOJ), collected, compiled, and reported crime and arrest data for Wisconsin. Beginning in 1971, DOJ also provided data to the national UCR system, a program of the Federal Bureau of Investigation (FBI). Effective December 31, 1981, the state program operated by DOJ was discontinued. The 1981 data collected by DOJ were transmitted directly to the FBI, and the 1981 Wisconsin Crime and Arrests report, prepared by SAC, was based for the most part on information provided to SAC by the FBI. In 1982 and again in 1983 Wisconsin law enforcement agencies transmitted their UCR data directly to the FBI, but in addition, provided copies of the principal offense and arrest forms to the Statistical Analysis Center. As of 1984, Wisconsin resumed its status as part of the national UCR system. Since 1984, Wisconsin law enforcement agencies have provided complete UCR data to SAC, which in turn, has transmitted the data to the FBI via computer tape.

The National UCR Program

The national Uniform Crime Reporting Program was initiated in 1930 by the International Association of Chiefs of Police (IACP). After soliciting input from law enforcement agencies throughout the country, an IACP committee developed uniform crime definitions and reporting procedures which could be used by law enforcement agencies in every state. The FBI was designated as the national clearinghouse for UCR data. The Committee on Uniform Crime Records of the IACP continues to serve the national program in an advisory capacity. In 1956, the National Sheriff's Association also established a Committee on Uniform Crime Reports to act as an advisory body to the program. The FBI regularly receives data on reported crime and arrests from law enforcement agencies throughout the country. The data are provided either by individual law enforcement agencies or by state UCR programs which collect and compile data for their states and convey the data to the FBI. From these data the FBI publishes its annual report, Crime in the United States.

The Wisconsin UCR Program

The FBI recognized the Wisconsin Council on Criminal Justice (WCCJ) as the administrator of the Wisconsin State Uniform Crime Reporting Program effective January 1, 1984. It should be noted that the WCCJ was changed to the Office of Justice Assistance as of October 1, 1987. As indicated above, the original Wisconsin UCR program, operated by DOJ, was discontinued in 1981. The program operated by DOJ from 1970 through 1981 required that all law enforcement agencies submit UCR data either directly or through the county sheriff's office. It also required that DOJ submit the prescribed data to the FBI. DOJ expanded the national UCR program's classifications to collect more detailed and appropriate data on Wisconsin crime and arrests. From the statewide UCR data, DOJ published its annual report Wisconsin Crime and Arrests, as well as quarterly, semi-annual, and other summary reports.

In November 1981, the WCCJ received a grant from the United States Department of Justice, Bureau of Justice Statistics, to develop Wisconsin's Statistical Analysis Center. The SAC was mandated by executive order to collect and analyze criminal justice data, produce statistical reports on crime and the justice system, and promote development of criminal justice information systems. From 1981 through 1983, SAC assumed a substantial number of the functions of the state UCR program to meet the information needs of state and local criminal justice decision-makers, elected officials and interested citizens. Since January 1984, Wisconsin has been recognized officially by the FBI as having a State UCR Program and is again part of the national system of state UCR programs.

Incident - Based Reporting (IBR)

For nearly sixty years the UCR Program remained virtually unchanged in terms of the amount and type of data collected and disseminated. By the 1980s it had become obvious that the nature of modern law enforcement record keeping had diminished the utility of the existing UCR system. As a result, the FBI initiated a thorough evaluation of the existing UCR system with the purpose of formulating a phased-in redesign effort to enable the UCR Program to meet the needs of law enforcement into the 21st century.

Based upon the recommendations of the redesign study, the FBI proceeded to develop a significantly revamped UCR system which includes the following elements:

- the addition of significant new offenses
- increased information on victims, offenders, arrestees, and characteristics of the offense
- improved quality control
- expanded user services

The major point of the revision is a change from a summary-based reporting program to an incident-based system in which information of each offense, offender, victim, and arrestee is linked by a common incident number.

Based upon the success of a pilot project in South Carolina, the FBI released the final data elements and offense specifications in July, 1988. At that time Wisconsin and other state programs began a careful implementation of the enhanced program. Several Wisconsin agencies began data submissions under the incident-based reporting format in 1991 and 1992.

Due to the increased reporting requirements of the new program, both the FBI and the Wisconsin UCR Program are encouraging a phased-in transition where law enforcement agencies will be able to adopt the new program as they acquire the necessary data processing capabilities. It is anticipated that Wisconsin will be operating a dual collection program for the next decade, with some departments reporting under summary-based guidelines, while others with automated records systems will make the transition to an IBR system.

Issues in Comparison of this Report with Earlier Reports

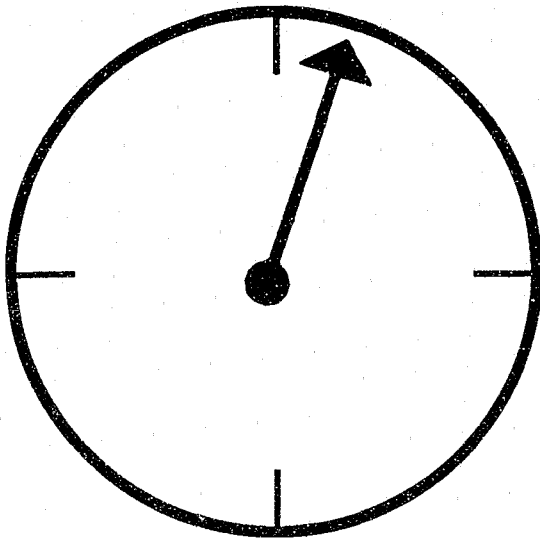

Care should be exercised in making comparisons of the data in this report with the data contained in previous annual reports. Adjustments may be required for the following reasons:

- Shifting of a law enforcement agency from one population category to another based on annual re-estimation of the jurisdiction's population.
- On occasion, the Federal Government designates an additional Wisconsin county as being included in a Standard Metropolitan Statistical Area (SMSA). This would shift a Sheriff's Office from the Rural Areas category to the Suburban Sheriffs' group. As an example, Pierce County was designated as being in an SMSA in 1992. Hence, the Pierce County Sheriff's Office moved from the Rural Areas category to the Suburban Sheriff's group. (See footnote 5 on page 15 for a listing of Suburban Sheriffs' Offices.)
- Populations are estimated for non-census years. Rates for 1992 are calculated using 1990 census data, updated with 1992 estimates published by the Demographic Services Center, Wisconsin Department of Administration.
- County totals shown in Tables 1-9 of this report are estimates which compensate for instances of missing data when appropriate.

¹ The crime clock should be viewed with caution. Since it is the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of Index Offense occurrence. This method of display does not imply a regularity in the commission of Index Offenses; rather it shows the ratios of crimes to fixed periods of time.

An Overview of 1991 and 1992 Crime and Arrests in Wisconsin

The following tables and maps present an overview of 1991 and 1992 crime and arrests in Wisconsin. Table 1 shows that reported Index Offenses have decreased by 2.2 percent from 1991. While reported violent offenses have increased by 0.2 percent from 1991, property offenses have decreased by 2.3 percent. The overall increase in violent offenses is due to increases in two of the four violent offenses. The largest increase involved forcible rape which increased by 4.7 percent, from 1,261 to 1,320. Robbery increased by 1.8 percent, from 5,902 to 6,009. However, murder decreased by 8.8 percent, from 240 to 219 and aggravated assault decreased by 1.9 percent, from 6,440 to 6,316. Also, violent offenses constituted only 6.4 percent of Index Offenses for Wisconsin during 1992.

Property crimes comprise the balance of the Crime Index. The overall decrease in reported property crimes from 1991 to 1992 was due to decreases in burglary and theft. Burglary decreased by 6.8 percent, from 37,271 to 34,729. Theft decreased by 1.7 percent, from 148,882 to 146,347. However, there were increases in motor vehicle theft and arson. While motor vehicle theft increased by 0.2 percent, from 21,624 to 21,672, arson increased by 10 percent, from 1,290 to 1,419.

The next three tables present a comparison of statewide arrests in 1991 and 1992. Adult arrests for total Index Offenses decreased by 4.2 percent, while juvenile arrests for total Index Offenses increased by 4.3 percent. Total arrests for Index Offenses, combining both adults and juveniles, decreased by 0.3 percent. Juvenile arrests constituted 47.1 percent of all arrests for Index Offenses in 1992, compared to 45 percent in 1991. Total adult arrests decreased by 1 percent, from 277,558 to 274,742, while total juvenile arrests increased by 7.3 percent, from 104,791 to 112,432. Total arrests for adults and juveniles combined increased by 1.3 percent from 382,349 in 1991 to 387,174 in 1992.

While juvenile arrests comprised 29 percent of all arrests for 1992, they comprised 47.1 percent of arrests for Index Offenses. Among the Index Offenses, juvenile arrests comprised 27.4 percent of all arrests for violent offenses and 49.8 percent of all arrests for property offenses.

Following the set of four tables are two maps showing rates of violent and property crime in each Wisconsin county for 1992. On each map, counties are ranked in four groups according to number of offenses per 100,000 population. The statewide rate, shown on each map, is based on the statewide number of offenses and population. This rate is within the fourth quartile for both maps because most of the highest crime rates are in those counties with largest populations.

An analysis of total Index Offenses, violent offenses, property offenses, and each separate offense appears in the following section of this report. The next section contains more detailed information on arrests for all UCR crime categories. Ten-year trends in offenses, offense rates, clearances, and arrest ratios are then presented, followed by data on law enforcement officers killed and assaulted. The final half of the book consists of a series of tables with individual agency data presented alphabetically by county. Tables include Index offenses, offense rates, clearance rates, property loss, arrests (both adult and juvenile), and law enforcement employees.

CRIME INDEX OFFENSES

Definition:¹ Crime Index Offenses are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft, and arson. Attempts are included (an attempted murder is classified as an aggravated assault).

1992 Summary Analysis

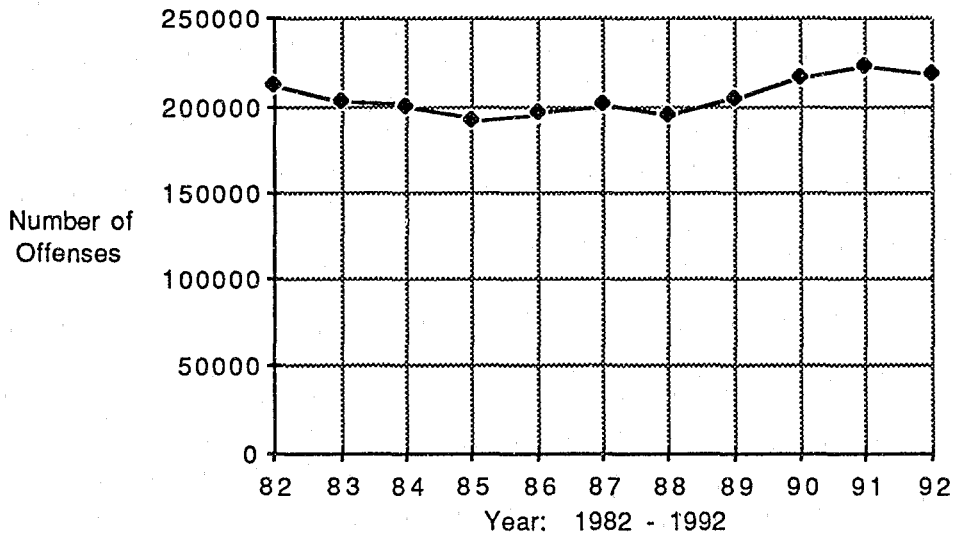

- There were an estimated 218,031 Crime Index Offenses reported during 1992, a 2.2 percent decrease from 1991.
- One Index Offense was reported approximately every two minutes, 24 seconds during 1992.
- The most frequent months for Crime Index Offenses were July (20,988) and August (20,787), the least frequent was February (15,784). These high and low months were the same as in 1991.
- The Crime Index Offense rate per 100,000 Wisconsin residents was 4,388.5 in 1992, a decrease of 3.1 percent from the 1991 rate of 4,530.2 per 100,000.
- The 1992 Crime Index Offense rate of 4,388.5 per 100,000 is approximately 22 percent less than the estimated 1992 rate of 5,649 per 100,000 residents for the nation.
- In terms of the population groupings of Wisconsin jurisdictions, the larger the population category, generally the higher the rate of Index Offenses.
- During 1992 total offense rates decreased for each population grouping of Wisconsin jurisdictions except cities under 10,000 residents and Suburban Sheriff Offices.
- Total Index Offenses have increased by 2.9 percent between 1982 and 1992.
- An estimated total of 67,308 persons were arrested for Index Offenses in 1992, a decrease of 0.3 percent. Of these, 53 percent were adults.
- Overall, 24.6 percent of Index Offenses were cleared in 1992. Clearance rates varied widely, however, from over 84.5 percent for murder to 16.6 percent for burglary. The overall 1992 clearance rate of 24.6 percent was somewhat more than the 1991 rate of 24.1 percent.

¹ All Index Offense definitions are those used by the National Uniform Crime Reporting Program.

Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides, which are the killings of felons by law enforcement officers in the line of duty or by private citizens during commission of the felony; and attempts to murder or assaults to murder, which are classified as aggravated assaults.

SEXUAL ASSAULT AND FORCIBLE RAPE

Definition: Sexual assault is sexual contact or sexual intercourse with another person without consent of that person. Sexual assault is proscribed under Wisconsin statutes, but is not part of the Federal Uniform Crime Reporting (UCR) Program. Forcible rape is part of the Crime Index and as such is reported as part of the Federal UCR Program. It is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are excluded.

Sexual Assault - 1992 Summary Analysis

Information on sexual assault is vital to an understanding of crime trends in Wisconsin. Rape is not a legally meaningful category in this state. However, rape is part of the Crime Index and information on rape is vital to the national UCR program. Furthermore, many years of information on rape are available for Wisconsin, and current information on rape is valuable for purposes of comparison. Jurisdiction-by-jurisdiction listings for rape appear in many of the tables in this publication. This listing of rapes will continue in future years as long as rape continues to be part of the Crime Index.

Following are some highlights of the sexual assault figures presented on the following five pages.

- There were 7,151 sexual assaults reported during 1992, a 4.4 percent increase from the estimated 1991 total of 6,852.
- Approximately 18 percent of all sexual assaults were rapes. For victims 16 and over, the proportion of rapes was much higher, almost 40 percent.
- Approximately 75 percent of all sexual assault victims were juveniles. Over 67 percent of all victims were 15 years old or less.
- Victim sex was 86 percent female, while offender sex was 95 percent male.
- Approximately 90 percent of all sexual assaults were committed by individuals who were known by the victim, while 10 percent were committed by strangers. For those sexual assaults that were rapes, over 78 percent were committed by persons known to the victims with 22 percent committed by strangers.

SEXUAL ASSAULT

Summary data on sexual assaults are presented in the following tables and graphs. In the tables below, sexual assaults are shown by degree for all victims, victims 15 and under, and for victims 16 and over. This is because the two most severe degrees of assault, first and second, may be so classified either by the nature of the assault or the age of the victim. Looking only at assaults of victims age 16 and over shows the distribution of assaults by degree based solely on the nature of the assault, not victim age. Most sexual assaults, even first and second degree assaults, are not rapes according to the Uniform Crime Reporting definition, and this also is shown in the table below.

The seriousness of sexual assaults are also defined, to some degree, by the offense categories used in the Uniform Crime Reporting - Incident-Based system. The more serious types include forcible rape (somewhat more broadly defined than the forcible rape definition on page 39), forcible sodomy, and sexual assault with an object. Remaining sexual assaults of a less serious nature include forcible fondling and statutory rape.

Graphs showing the age and sex of victims and offenders, and relationship between victim and offender, are presented on subsequent pages. Data are also presented on arrests, victim injury, and weapons used in the commission of sexual assaults.

Summary of Offense and Arrest Trends: 1982 - 1992

The following four tables present statewide data for each year from 1982 through 1992 on: (1) the number of Index Offenses, (2) offense rates for Index Offenses, (3) the ratio of arrests to offenses for Index Offenses, and (4) clearance rates for Index Offenses. Each table shows the percent change from 1982 to 1992.

The total number of known Index Offenses in Wisconsin declined from 1982 to 1985, rose in 1986 and 1987, decreased in 1988, increased from 1989 through 1991, and declined in 1992 (see graph, page 14). The number of Index Offenses increased by 2.9 percent for the decade, from 211,931 in 1982 to 218,031 in 1992. However, there was a 1.5 percent decrease in offense rates for the decade since the population of the state increased by about 4.5 percent during this period.

The number of violent offenses increased by 52.7 percent for the decade, from 9,077 in 1982 to 13,864 in 1992. However, the number of property offenses increased by only 0.6 percent for the decade, from 202,855 to 204,167. The contrasting patterns in property and violent crime are made clear in the graphs on pages 20 and 26.

Overall, arrest ratios have increased by 15.7 percent over the past decade, indicating that during this time arrests have increased more rapidly than offenses. However, in terms of specific offenses, this is not true of forcible rape, robbery, and motor vehicle theft. For these three offenses, arrests have increased less rapidly than offenses during the decade. It should be noted that these three offenses have increased dramatically in the past decade - forcible rape by 55.3 percent, robbery by 77.1, percent and motor vehicle theft by 150.2 percent.

The clearance rate for total Index Offenses has increased by nearly 16 percent since 1982. While, clearance rates for total violent crimes decreased slightly, clearance rates for total property crimes have increased. Among the violent crimes, clearance rates increased during the decade for murder, forcible rape, and aggravated assault. However, clearance rates for robbery have decreased. Among the property offenses, clearance rates have increased for theft while they have decreased for burglary, motor vehicle theft, and arson. It should be noted that the clearance rate for total Index Offenses has remained very stable since 1985.

Note: The numbers used in this section are taken from the four tables which follow.

Law Enforcement Officers Killed and Assaulted

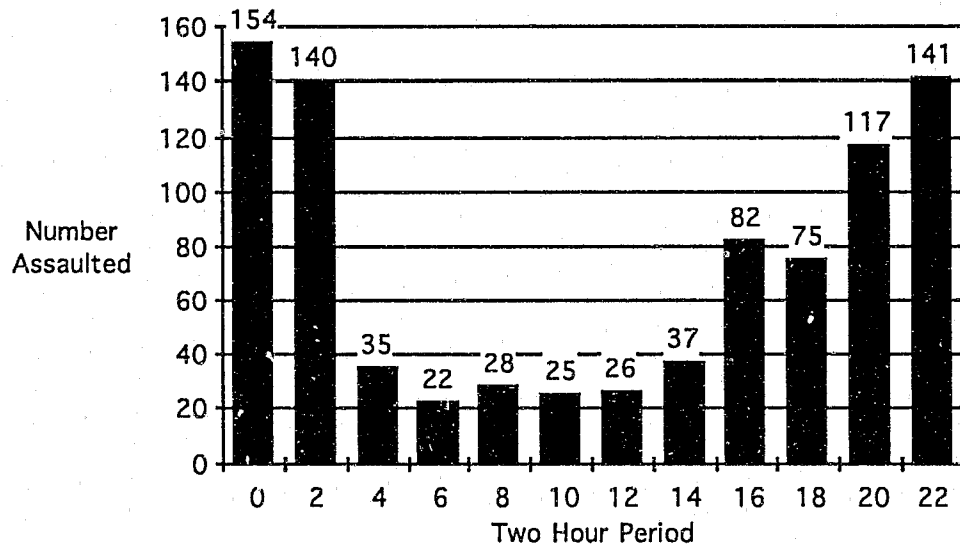

The following tables present statewide information on law enforcement officers killed or assaulted during 1992. During 1992, no Wisconsin law enforcement officers were killed while in the performance of their duty.

There were 882 reported assaults on police officers in 1992, a 12 percent decrease compared to the 1,002 reported assaults in 1991. Of the 882 reported assaults, 840 or 95.2 percent were cleared. Over 71 percent of assaults occurred during the nighttime hours from 6 p.m. through 4 a.m. Injuries resulted from 61 percent of 1992 assaults, a slight decrease compared to the 63.4 percent of 1991 assaults which resulted in an injury. Nearly 93 percent of assaults involved personal weapons (hands, feet or fists) rather than firearms, knives, or other dangerous weapons. In addition, this section shows both the type of assignment and type of activity when the assault occurred together with the number of assaults on law enforcement officers since 1984.

OFFICERS ASSAULTED - BY YEAR

The number of officers assaulted in Wisconsin has increased by 23.4 percent from 1984 (715 assaults) to 1992 (882 assaults). The sharp decrease of 12 percent in 1992 followed an increase of 8.7 percent in 1991.

Index Offenses by County and Law Enforcement Agency - 1992

Table 1. Number of Crime Index Offenses and Percent Change, 1991 - 1992

Table 1 shows Index Offenses for 1991 and 1992 and percent changes from 1991 to 1992 for each reporting jurisdiction. The four violent Index Offenses are totaled to equal violent crimes, and the four property Index Offenses are totaled to equal property crimes. The Crime Index is the sum of all eight offenses.

In Table 1 the number of months of data reported for each jurisdiction is listed. This information is vital to the interpretation of the table, since the data presented are the reported data at the jurisdiction level, even when fewer than 12 months of data were available. Twelve months of data were reported by 312 of the 323 law enforcement agencies. Six jurisdictions which began submitting UCR data in 1992 reported between 3 and 11 months of figures, three other agencies reported between 4 and 10 months of figures, and two agencies failed to report any data during 1992 (Bloomer in Chippewa County and Orfordville in Rock County).

Data for a jurisdiction which reported for fewer than 12 months in 1992 cannot be directly compared with that jurisdiction's 1991 data or with data for other jurisdictions. Thus, no percent changes are shown for these jurisdictions. However, an approximate comparison can be made using an estimate of the 12 months total. This estimate can be calculated by multiplying the available data by a correction factor which is obtained by dividing 12 by the number of months reported. (For example if nine months of data are available for an agency, the data can be estimated for 12 months by multiplying the data by 12/9 or 1.33.) However, the accuracy of this approximation diminishes when only a few months of data are available. It should be applied with great caution when less than six months of data are available. This method should also be applied with caution when the number of offenses involved is small. For example, if jurisdiction A had 72 thefts in nine months and prorated them to 96 ($12/9 \times 72 = 96$) thefts for the year, while jurisdiction B had three thefts in nine months and prorated them to four thefts for the year, the estimate for jurisdiction A would be more reliable because it had a higher number of offenses.

The percent change in the number of Index Offenses reported from 1991 to 1992 is shown in Table 1 for each jurisdiction for which it was possible to calculate the change. The percent change is calculated using the formula:

$$\frac{(\text{Offenses in 1992}) - (\text{Offenses in 1991})}{\text{Offenses in 1991}} \times 100 = \text{Percent Change}$$

If the number of offenses for 1991 was zero, no percent change was calculated since percent change cannot be calculated from a zero base. In addition, as stated above, no percent change was calculated for a jurisdiction unless 12 months of data were available for both 1991 and 1992.

Table 1 shows county totals for each offense and percent change from 1991 to 1992. For those counties in which not every jurisdiction reported 12 months of data for 1991 or 1992, the county totals shown are estimates. The estimated county totals were obtained by summing the estimated annual totals for each jurisdiction within the county. These estimated annual totals were obtained as described above, by multiplying the available data by a correction factor for jurisdictions with two months or more of 1992 data. When estimates are used for county totals, the totals are so labeled in Table 1 (e.g., the notation "(EST)" follows the total for Adams County).

In addition, there were fifteen new UCR reporters during 1992. These are Chetek PD (Barron County), Bayfield PD (Bayfield County), Black Earth, Dane, Maple Bluff, and Mazomanie PDs (Dane County), Boscobel PD (Grant County), Bangor and Campbell PDs (La Crosse County), South Wayne PD (LaFayette County), Amery and Osceola PDs (Polk County), Kohler PD (Sheboygan County), Hillsboro PD (Vernon County), and Pewaukee Town PD (Waukesha County). Also, for each of these agencies, only 1992 data are printed since comparable 1991 figures were not available.

At the end of Table 1, statewide totals of reported offenses in each category and estimates of the actual statewide totals are shown. The statewide estimates were obtained by summing the estimated offenses for each jurisdiction.

Table 2. Offense Rates per 100,000 Population for Index Offenses, 1992

Table 2 presents offense rates per 100,000 population for Index Offenses for each jurisdiction. The populations shown in this table are estimates published by the Demographic Services Center of the Wisconsin Department of Administration. The population shown for each county Sheriff's Office is the total population of the county minus the populations of any municipalities in the county for which UCR data were reported separately. The rates shown in Table 2 are derived by taking the number of reported offenses, shown in Table 1, dividing by the population of the jurisdiction, shown in Table 2, and multiplying by 100,000. These rates permit comparisons among jurisdictions of different sizes. Offense rates for agencies with no permanent residents (e.g., UW Campus agencies, State Patrol, or DNR) are not calculated.

As discussed in connection with Table 1, 12 months of data were available for the vast majority of jurisdictions. Since offense rates based on less than 12 months of data would be misleading, Table 2 presents rates only for those jurisdictions which reported 12 months of data. Agencies with less than 12 months are noted by an asterisk. The countywide and statewide rates shown in Table 2 are based on estimated numbers of offenses when necessary, as described in connection with Table 1.

It should be noted that offenses per 100,000 presented in Table 2 do not represent a projection of crime levels in various locales. Rather, these offense rates are used to enable one to compare jurisdictions of varying size. However, two points should be kept in mind when analyzing the offense rates in Table 2. First, offense rates for jurisdictions with large numbers of temporary residents (i.e., tourists), such as the Police Departments of Lake Delton, Minocqua, and Wisconsin Dells, are misleading since only permanent residents are included in offense rate calculations. Second, jurisdictions with a large proportion of non-residential crime targets such as the Town of Madison often show inflated crime rates.

Each year when Crime in Wisconsin is published many entities including news media, tourism agencies, and others with an interest in crime compile rankings of cities and counties based on their Crime Index numbers. This simplistic and incomplete analysis often creates improper perceptions which adversely affect cities and counties along with their residents. Assessing criminality and law enforcement's response from jurisdiction to jurisdiction must encompass many elements other than the number or rate of Index Crimes. The transience of the population, its racial and ethnic makeup, its age and sex structure, education levels, and prevalent family structure are all key factors in assessing and better understanding the crime issue. Attitudes of the citizens toward crime and their crime reporting practices, especially concerning more minor offenses, also have an impact on the volume of crimes known to the police. This report provides a statewide view of crime contributed by state and local law enforcement agencies. Population size is the only correlate of crime utilized in this publication. While the other factors noted above are of equal concern, no attempt is made to relate them to the crime data presented. The reader is, therefore, cautioned against comparing statistical data of individual reporting units from cities, counties, or colleges and universities solely on the basis of their population coverage.

Table 3. Total Clearance Rates for Index Offenses, 1992

Table 3 presents total clearance rates by offense and jurisdiction. In Table 3, the various clearance rates are the number of clearances, divided by the number of offenses and multiplied by 100. That is, clearances are presented as a percentage of reported offenses. Note that no clearance rate can be calculated for an offense category if there are no 1992 offenses reported, even though clearances may be reported from prior years. When no offenses have been reported, a blank appears in Table 3. When a clearance rate of zero is shown it means that at least one offense occurred, but that there were no clearances. Also, clearance rates greater than 100.0 percent are possible (e.g., the murder clearance rate of 133 percent for the Kenosha Police Department) when there are clearances of certain offenses which were reported in earlier years.

Since the clearance rate is the ratio of clearances to reported offenses, it is not particularly sensitive to the problems of missing data described above for Tables 1 and 2. It is reasonable to assume that this ratio would be fairly constant as long as the number of months of data available was reasonably large. Thus, clearance rates have been presented in Table 3 for all jurisdictions for which six months or more of clearance data were present. There were five jurisdictions reporting fewer than six months of data which were excluded from the table. An asterisk (*) is printed next to the name of each of these jurisdictions. Countywide and statewide rates shown in Table 3 are based on estimated clearances and offenses, calculated as described previously in connection with Table 1.

Table 4. Property Stolen, Recovered and Damaged by Arson, 1992

Table 4 shows the value of property stolen, recovered and damaged by arson for each county and law enforcement agency reporting UCR data. All values shown in Table 4 are reported data; no estimates are performed on partial or missing figures. The property figures include property stolen or recovered during 1992. In some instances (e.g., the West Salem PD in La Crosse County), property recovered during 1992 was stolen in a previous year.

Prior to the 1988 Annual Crime and Arrests Report, Table 4 presented the percentage of total clearances involving only juveniles. However, both because this measure minimized juvenile involvement in clearances and a relative lack of interest in these data, this table was replaced in the 1988 UCR report. However, juvenile clearance figures for individual agencies are available upon request.

Arrests by County and Law Enforcement Agency - 1992

Tables 5 through 8 present data on adults and juveniles arrested by Wisconsin law enforcement agencies during 1992. The tables present the total number of arrests, the total number of Part I and Part II arrests, and the number of arrests for each Part I and Part II offense separately, for each reporting agency. Information on adults is presented in Tables 5 and 7, information on juveniles in Tables 6 and 8.

As indicated in the introduction to this report, data are not available for all 12 months of 1992 for every reporting agency. In the following tables, as in Tables 1 through 4, the number of months of data available for each reporting agency is listed. Although only the known data are presented for each jurisdiction, an estimated yearly total can be calculated for any jurisdiction with less than 12 months of data reported. The estimated totals can be calculated by multiplying the number in the table by a correction factor which can be obtained by dividing 12 by the number of months of data reported. (Thus, if 11 months of data are presented for an agency, for example, the agency's figures should be multiplied by 12/11, or 1.09). As is the case in other tables, the more months of data reported, the more accurate will be the yearly estimates. Estimates based on a small number of months of reported data should be interpreted cautiously. This estimation procedure should also be applied with caution when the number of arrests is small.

The following tables show, for each county, county total arrests for each offense. For those counties in which not every jurisdiction reported 12 months of data for 1992, the county totals shown are estimates. These estimates were obtained as in Table 1, by calculating and summing the estimated annual total for each jurisdiction within the county. As in the previous table, when estimates are used for county totals, the notation "(EST)" follows the "County Total" label.

At the end of each table there are statewide totals of the reported arrests in each category and estimates of the actual statewide totals. The estimated totals were obtained by calculating the estimated yearly totals, as described above, for each reporting agency with less than 12 months of data and summing the estimates for these agencies and the reported figures for the other agencies.

These tables also contain population figures for each jurisdiction. Tables 5 and 7 contain adult population figures. Tables 6 and 8 contain juvenile population figures. These adult and juvenile figures were derived from the Department of Administration (DOA) population estimates, Official Population Estimates for 1992, using adult and juvenile population proportions provided in the 1991 census. The population figures presented for county sheriffs' offices are the county populations minus the populations of any municipalities in the county for which UCR data are reported separately. These figures can be used to calculate arrest rates for any of the jurisdictions in the State. The population of those jurisdictions which span two or more county borders are assigned to the county in which the majority of the population resides. Arrest rates are calculated by dividing the number of arrests by the relevant population and multiplying the result by 100,000. This rate per 100,000 is comparable across jurisdictions of varying sizes.

Table 9: Number of Full Time Law Enforcement
Employees in Wisconsin as of 31 October, 1992

The figures in this table come from a yearly survey conducted each fall by the Federal Bureau of Investigation. For every reporting agency, the table shows the number of full time sworn law enforcement employees (male and female), the number of civilian employees (male and female), and the total number of employees. In addition, the table lists the total population for each jurisdiction, together with both the number of law enforcement employees and the total number of employees per 1,000 population. It should be noted that figures for the number of officers per 1,000 population are absent for some agencies since no permanent resident population is assigned (e.g., UW Campus Security Agencies, DNR, State Patrol).

National averages for law enforcement agencies per 1000 residents in 1991 are as follows:*

Sworn :	2.2
Civilian :	<u>0.9</u>
Total :	3.1

In terms of Wisconsin averages, there were 2.2 sworn officers per 1000 residents, 0.7 civilians per 1000 residents, and 2.9 total employees per 1000 residents. These figures are very similar to those of previous years.

Glossary

ADULT: A person 18 years of age or older.

ARREST: Taking into physical or other legal custody for commission of an offense in the local reporting jurisdiction. An arrest has occurred when a law enforcement officer detains a person with the intention of seeking charges against them for a specific offense and a record is made of the detention (see p. 60, Uniform Crime Reporting Handbook). Arrests for all criminal offenses are scored. Arrests for ordinance violations are included. Arrests for traffic offenses, with the exception of driving under the influence of intoxicants, are not scored. Included are those persons released without having been formally charged. (See Juvenile Arrest.)

ARREST RATE: The number of arrests for a particular offense, or group of offenses, per 100,000 population. The formula is:

$$\frac{\text{Number of Arrests}}{\text{Population}} \times 100,000$$

Arrest rates per population unit are employed to remove the effects of differing sizes of law enforcement service areas, permitting the examination of arrest on an equalized population basis. "Per 100,000 population" is generally utilized to preclude rates for infrequently occurring arrests from being expressed as unmeaningfully small numbers.

CLEARANCE: An offense is cleared, or solved for crime reporting purposes, when at least one person is arrested, charged with commission of the offense and turned over to the court for prosecution. Provision is also made for clearance in certain "exceptional" situations (see p. 42, Uniform Crime Reporting Handbook.)

CLEARANCE RATE (TOTAL): The number of clearances divided by the total number of offenses, expressed as a percent. The formula is:

$$\frac{\text{Number of Clearances}}{\text{Number of Offenses}} \times 100\%$$

Offenses are reported as they become known to law enforcement agencies. Clearances are scored as they are made. Therefore, it is possible for the clearance rate to exceed 100 percent for a time period. Both clearances by arrest and exceptional clearances are included.

CRIME FACTORS: Historically, the causes and origins of crime have been the subjects of investigation by many disciplines. No definitive conclusions have yet been reached; many factors affect the volume and type of crime that occurs from place to place. Caution should, therefore, be exercised in comparing statistical data of individual communities or counties solely on the basis of their populations.

More appropriate use can be made of the statistics by relating the experience of a particular area to group averages, or by employing a ranking procedure, and encompassing both crime and other socioeconomic information.

CRIME INDEX: The total of eight serious offenses used as an indicator of crime. Crime Index offenses are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft and arson. The first four of these are referred to as violent crimes, and the latter four as property crimes. Definitions of each of these offenses are given in the section "Statewide Index Offenses and Arrests".

JUVENILE: A person 17 years of age or younger.

JUVENILE ARREST: For purposes of Uniform Crime Reporting, a juvenile should be counted as "arrested" when the circumstances are such that if he or she were an adult, an arrest would be tallied (see Uniform Crime Reporting Manual, p. 60). When a law enforcement officer places a juvenile in custody for a specific offense, including status offenses, an "arrest" is scored. Law enforcement contacts with juveniles where no offense has been committed are not scored as arrests. Juveniles taken into custody for their own protection, such as in neglect cases, are not scored as being arrested if they have not committed an offense. (See Arrest)

Under Wisconsin Law s. 48.19 (3), juveniles "taken into custody" to investigate an alleged violation are not considered "arrested". However, the UCR Program uses the term "arrest" for both adults and juveniles to describe apprehension. This report, based upon UCR data, also uses the term "arrest" in this latter sense.

JUVENILE CRIME: The only measure of juvenile crime available through Uniform Crime Reporting is the number of juvenile arrests (number, rate, and percentage of total arrests).

OFFENSE RATE: The number of known offenses per 100,000 population. The formula is:

$$\frac{\text{Number of Offenses}}{\text{Population}} \times 100,000$$

Offense rates per population unit are employed to remove the effect of differing sizes of law enforcement service areas, permitting the examination of reported crime on an equalized population basis. "Per 100,000 population" is generally utilized to preclude the rates for infrequently occurring offenses from being expressed as unmeaningfully small numbers.

More specific crime or victimization rate measures may also be utilized, such as residential burglaries per 100,000 residences, motor vehicle thefts per 100,000 registered vehicles, or forcible rapes per 100,000 females in typically victimized age groups.

PART I OFFENSES: The eight index crimes in addition to manslaughter by negligence.

PART II OFFENSES: All crime categories not already designated as Part I, excluding all traffic violations except Operating a Motor Vehicle While Intoxicated.

PERCENT CHANGE: The formula is:

$$\frac{\text{Value in Current Period} - \text{Value in Base Period}}{\text{Value in Base Period}} \times 100\%$$

POPULATION: Totals as well as juvenile and adult subtotals are based on Official Population Estimates for 1992, Demographic Services Center, Wisconsin Department of Administration.

STATUS OFFENSES: Offenses which are only offenses when they are committed by a juvenile. For purposes of the Wisconsin UCR Program, status offenses consist of curfew violations, runaways, and liquor law violations.

Appendix II

The Use of UCR Statistics by Local Agencies

A. INTRODUCTION

The graphs and tables which follow illustrate some of the potential uses of the UCR report. The examples in this report are drawn from special reports done for individual agencies during the past year. These special reports usually summarize UCR data for two to five years and are generally used for budgetary purposes or are included in the annual report of a law enforcement agency.

The various tables in the second half of the annual report contain various crime/arrest figures for all reporting jurisdictions together with statewide figures. In addition, offense rate figures for violent crime (page 21 of the 1992 Annual UCR Report) and property crime (page 27) allow law enforcement agencies to compare their crime rates with agencies of similar size throughout Wisconsin.

Several points should be noted with regard to the use of UCR figures --

1 - Crime and arrest figures from past years can be obtained from earlier UCR reports or by contacting Tom Eversen at the Wisconsin UCR Program in Madison (608) 266-7644. These figures are available as far back as 1969. However, specific crime and arrest details may not be consistent for each year.

2 - Numbers and percentage changes can vary widely over time either due to the relatively small numbers involved (e.g., murder or arson) or changes in state statutes (e.g., increase in the legal drinking age).

3 - Care should be taken when comparing the figures of one agency to those of another. For example, a large number of tourists (Lake Delton or Wisconsin Dells) can inflate the crime rate. Also, individual agency policies or increased enforcement of certain local ordinances (e.g., curfew laws) may affect the number of arrests.

Note: The jurisdiction tables from the 1992 Annual UCR Report are capitalized in bold (e.g., **TABLE 1**).

B. OFFENSES REPORTED

TABLE 1 in the 1992 Annual Report (pages 102 to 117) can be used to obtain two years of crime figures. Numbers from earlier years can be obtained from previous UCR reports.

Example 1 - Crime Totals (2 years)

Table A compares the number of Part I crimes reported to the Eau Claire Police Department during 1991 and 1992.

Table A: Index Crimes Reported, 1991 and 1992

<u>Index Offense</u>	<u>1991</u>	<u>1992</u>	<u>Percent Change</u>
VIOLENT CRIME	83	57	-31.3
Murder	0	0	-
Forcible Rape	2	2	-
Robbery	11	9	-18.2
Aggravated Assault	70	46	-34.3
PROPERTY CRIME	2,973	3029	+1.9
Burglary	546	510	-6.6
Theft	2,314	2,382	+2.9
Motor Vehicle Theft	84	98	+16.7
Arson	29	39	34.5
TOTAL CRIME	3,056	3,086	+1.0

Total reported Index crime increased by one percent in 1992. Declines in burglary and aggravated assault were outweighed by increases in theft, motor vehicle theft, and arson.

Example 2 - Crime Total (1992)

Table B shows the number of Index offenses (also known as Part I crimes) reported to the Rock County Sheriff's Office from 1988 through 1992. Again, figures for years prior to 1992 can be obtained either from earlier editions of the Annual Crime and Arrest Report or by contacting the Wisconsin UCR Program.

Table B: Index Offenses, 1988 - 1992

<u>Offense</u>	<u>1988</u>	<u>1989</u>	<u>1990</u>	<u>1991</u>	<u>1992</u>	<u>Percent Change 1988 to 1992</u>
VIOLENT CRIME	62	113	46	91	82	+32.2
Murder	1	0	1	0	0	-100.0
Forcible Rape	5	2	3	10	8	+60.0
Robbery	1	4	1	8	2	+100.0
Aggravated Assault	55	107	41	73	72	+30.9
PROPERTY CRIME	506	475	557	493	549	+8.5
Burglary	164	136	141	140	149	-9.1
Theft	315	308	386	323	363	+15.2
Motor Vehicle Theft	25	24	23	25	29	+16.0
Arson	2	7	7	5	8	+300.0
TOTAL INDEX	568	588	603	584	631	+11.1

Total Index crime increased by 11.1 percent during the five year period. There were increases in each Index crime except murder and burglary.

The large percentage changes in various offense categories underscore the need to present both percent figures and actual numbers. For example, the 15.2% increase in theft over the five year period may be more significant than the 100% increase in robbery during the same period.

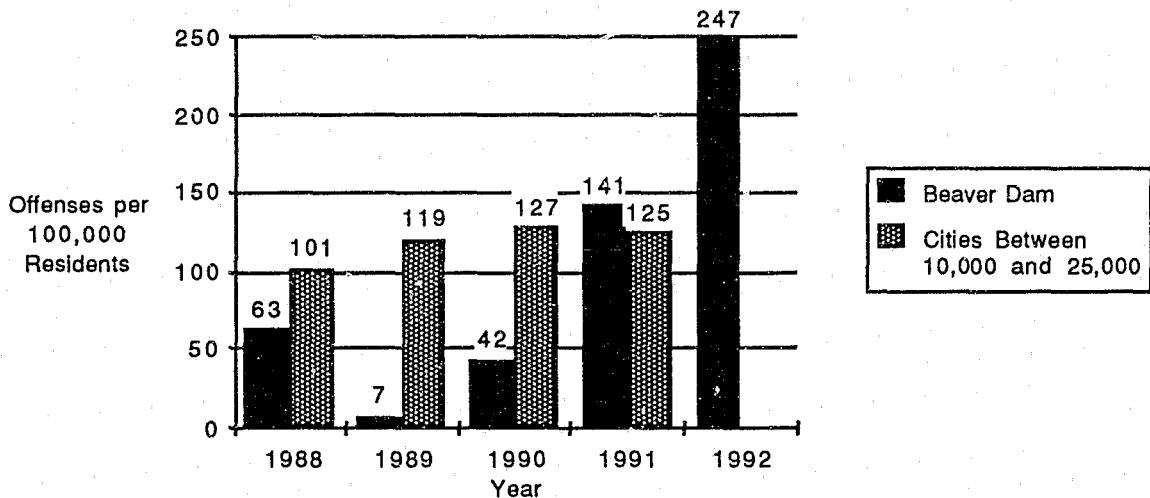

C. OFFENSE RATES

TABLE 2 in the 1992 Annual Report (pages 118 to 125) is used in order to obtain the offense rate per 100,000 residents for an agency. Crime rates per 100,000 are used to permit the comparison of jurisdictions with different population levels. Figures for categories of jurisdictions of similar size can be seen on pages 21 (Violent Crime) and page 27 (Property Crime) of the 1992 Annual Report.

Example 1 - Offense Rates (Violent Crime)

Graph 1 presents offense rates per 100,000 population for violent Index offenses. Rates are presented for the **Beaver Dam Police Department** and for all Wisconsin cities between 10,000 and 24,999 residents for purposes of comparison. The 1992 figures of comparable cities are not available at this time.

Graph 1: Violent Offense Rates

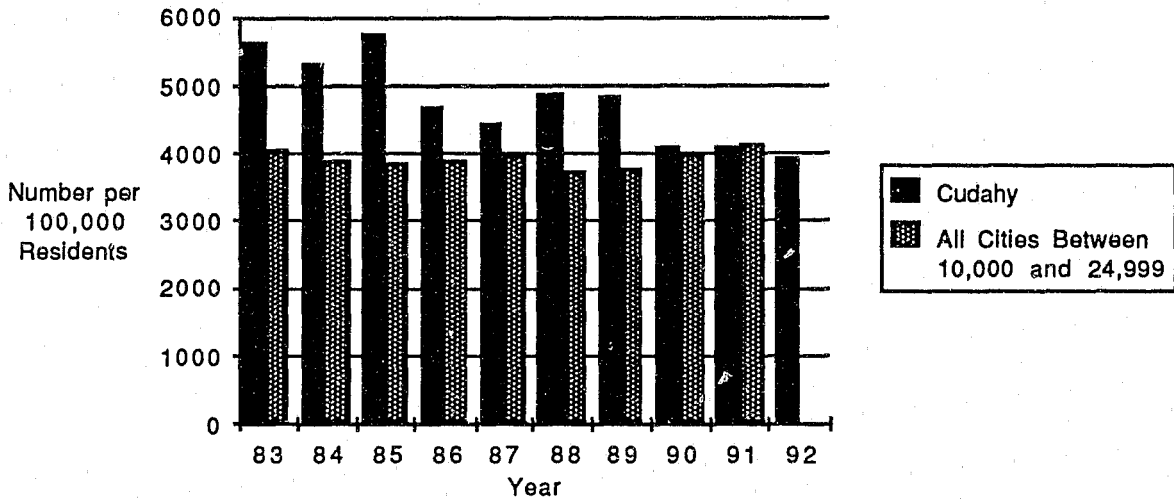

While the violent offense rates in Beaver Dam were much less than the average of other cities in Wisconsin of similar size from 1988 to 1990, they have increased sharply in the last two years.

Example 2 - Offense Rates (Property Crime)

Graph 3 presents similar information on property crime offense rates for the **Cudahy Police Department**. In this case, the property offense rates are shown for the past ten years and include the average rates for cities of comparable size.

Graph 3: Property Offense Rates

While the property offense rates in Cudahy were greater than the rate of similarly sized cities from 1983 to 1990, the difference steadily decreased until 1991 when Cudahy's rate was less than that of other similar Wisconsin cities. While the property crime rate for all Wisconsin cities between 10,000 and 24,999 decreased by 6.9 percent during the decade, Cudahy's property crime rate decreased by 30 percent during the ten years.

D. CLEARANCES

TABLE 3 (pages 126 to 133) in the 1992 Annual Report shows clearance rates for individual jurisdictions. It should be noted that clearance rates are usually lower in Sheriff's Offices than in Police Departments because of the relative isolation of many of the crime targets in more rural areas.

Example 1 - Clearance Rates

Information in Table C shows the clearance rates for the Kenosha Police Department for Total Index, Violent Index, and Property Index crimes for the past five years. Statewide clearance rates for 1992 are included for purposes of comparison.

Table C: Clearance Rates, 1988 - 1992

<u>Offense Category</u>	<u>1988</u>	<u>1989</u>	<u>1990</u>	<u>1991</u>	<u>1992</u>	<u>State - 1992</u>
Violent Index	52.6	54.6	58.8	62.2	59.9	54.0
Property Index	27.2	29.5	30.9	26.0	32.4	22.6
Total Index	28.4	30.8	32.3	27.8	34.5	24.6

Kenosha clearance rates have been greater than the corresponding Statewide clearance rates.

E. PROPERTY LOST AND RECOVERED

TABLE 4 (pages 134 to 141) in the 1992 Annual Report shows the total value of property stolen and recovered for each jurisdiction together with the total value of property lost in arson cases. More detailed information on the various types of property can be obtained from the State UCR Program. The percentage of property recovered often depends upon the type of property stolen. For example, certain property such as motor vehicles are much more likely to be recovered than either jewelry or currency.

Example 1 - Property Stolen and Recovered

Table D shows the value of property stolen and recovered in Holmen during 1992. As noted above, this more detailed property information can be obtained from the State UCR Program.

Table D: Property Stolen and Recovered - 1992

<u>Type of Property</u>	<u>Amount Stolen</u>	<u>Amount Recovered</u>	<u>Percent Recovered</u>
Jewelry & Precious Metals	\$ 4,219	\$ 3,380	80.1
Televisions, Stereos	2,659	2,240	84.2
Currency, Notes	1,261	92	7.3
Firearms	475	650	136.8*
Clothing and Furs	90	0	0.0
Consumable Goods	52	52	100.0
Office Equipment	20	20	100.0
Household Goods	20	20	100.0
All Other Property	<u>6,718</u>	<u>1,608</u>	<u>23.9</u>
Total Property	\$15,514	\$8,062	52.0

* Some of the property recovered in 1992 was stolen in a previous year.

The overall property recovery rate of 52% in 1992 is considerably more than both the estimated Statewide recovery rate of 35% in 1992 and the 37% recovery rate in Holmen during 1991. Also, the \$15,514 in property stolen during 1992 is about 11% more than the \$13,990 stolen in all of 1991.

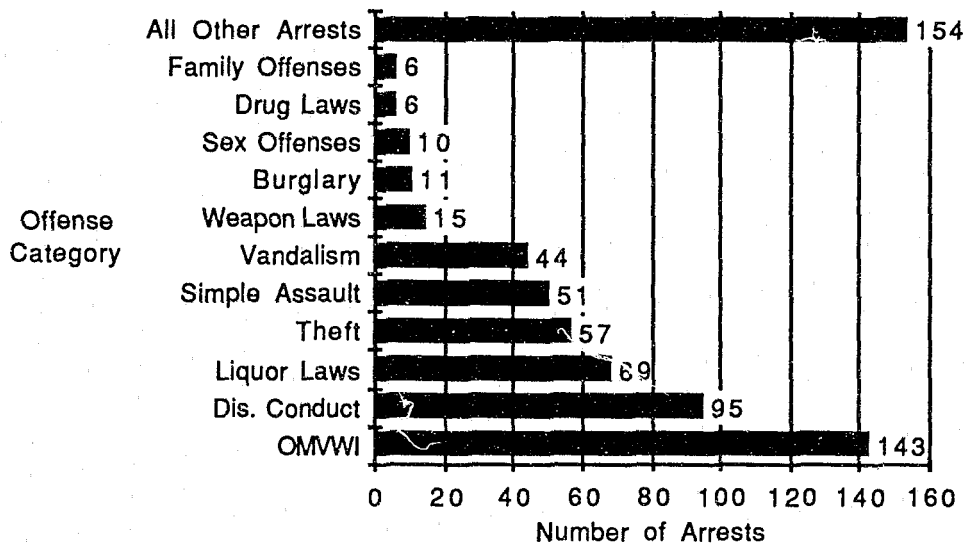

E. ARRESTS

Adult arrests are shown in TABLE 5 (pages 144 to 151) and TABLE 7 (pages 160 to 175) of the 1992 Annual Report. Juvenile arrest figures are shown in TABLE 6 (pages 152 to 159) and TABLE 8 (pages 176 to 191) of the 1992 Annual Report. TABLES 5 and 6 present arrest totals for all Part I Crimes (eight Index crimes plus negligent manslaughter) in addition to the number of total arrests and Part II arrests. TABLES 7 and 8 present arrest totals for each Part II offense together with more detailed totals on drug-related arrests.

Example 1 - Adult Arrests (1 year)

Graph 1 shows the number of adults arrested in 1992 by the Caledonia Police Department for the most common offense categories.

Graph 1: Adult Arrests - 1992

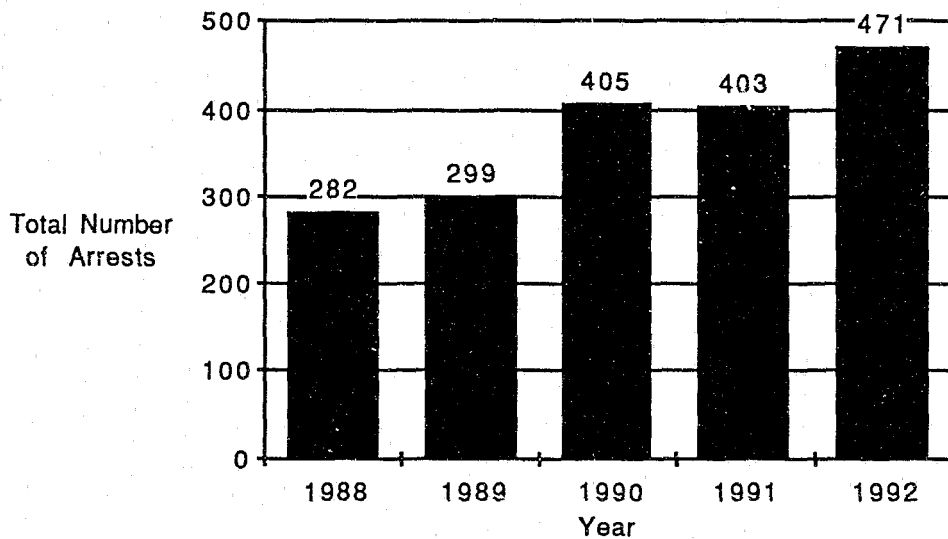

Total adult arrests increased by 17.2% from 564 in 1991 to 661 in 1992. While arrests for liquor law violations decreased from 90 to 69, there were increases in the number of adult arrests for theft (31 to 57), OMVWI (111 to 143), simple assault (41 to 51), and vandalism (14 to 44). The six adult drug arrests were each for possession - 1 cocaine and 5 marijuana.

Example 2 - Juvenile Arrests (5 years)

Graph 5 shows the total number of juvenile arrests made by the Chippewa Falls Police Department during each of the past five years.

Graph 5: Juvenile Arrests

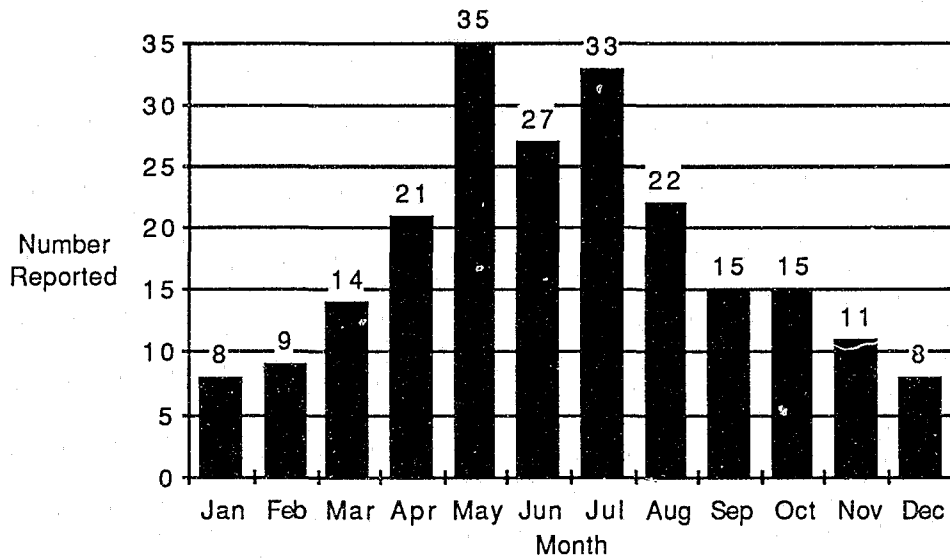

Total juvenile arrests have increased by 67% since 1987. There have been increases in arrests for runaway violations, disorderly conduct, vandalism, and "all other" offenses.

G. INDIVIDUAL CRIME ANALYSIS

Law enforcement agencies occasionally request more detailed information on specific UCR offense categories. The following graph shows the number of burglaries reported to the **Oneida County Sheriff's Office** for each month of 1992. While this level of detail is not published in the State UCR Report, it is available by contacting the Wisconsin UCR Program.

Graph 2: Burglaries - 1992

As in past years, reported burglaries were concentrated in the Spring and Summer months between April and August.

H. SUMMARY

These pages have presented examples of how figures from the Annual UCR Report can be used by individual agencies. Additional possibilities for analysis include more detailed breakdowns of burglary and theft targets, weapon usage in violent crime, drug arrest details (see **TABLES 7 and 8**), and law enforcement strength (see **TABLE 9** of the 1992 Annual Report). In addition, arrest rates (both adult and juvenile) can be obtained in the same way that offense rates are calculated in **TABLE 2**. Instructions for obtaining arrest and offense rates are presented in Appendix I (Glossary) of this report.

Also, the State UCR Program can provide graphical presentation of crime and arrest figures if an individual agency lacks the capability. In addition, various crime figures can be presented on either a county-wide or regional basis.
