FOREWORD

As we proceed into the 21st century, the foremost challenge of the law enforcement community is its continued success in the warfare against the escalating violent crime occurrences in the United States. Administered by the FBI since 1930, recent enhancements in the Uniform Crime Reporting (UCR) Program will provide law enforcement with more comprehensive data for use in meeting this challenge.

Since its inception, *Crime in the United States* has portrayed a steadily increasing number of law enforcement agencies voluntarily participating in the UCR Program. Federal law enforcement has now joined the UCR constituency, and its addition results in the UCR Program being the first central repository for law enforcement statistics at all levels of government—local, state, and Federal. In addition to the increasing number of participants in the Program, the National Incident-Based Reporting System (NIBRS), now being implemented across the country, will offer a wealth of crime information never before available. NIBRS will address almost all current criminal justice issues, providing decisionmakers with comprehensive, uniform data upon which to rely when developing crime resistance measures.

A recent and most important adjunct to the UCR Program is the collection of hate-related offenses. Concern that the degree of prejudice-motivated crimes in America during the 1980s had increased dramatically, Congress passed and the President signed the Hate Crime Statistics Act in 1990. Prior to the law's enactment, no national law enforcement clearinghouse was available to assess just how widespread these incidents had become. Undeniably, the lack of concrete statistics rendered it impossible to measure the volume of these offenses or to generate practical resolutions.

In January 1991, the UCR contributors commenced gathering information on crimes motivated by prejudice against a victim's race, religion, ethnic origin or sexual orientation. As in the past, the effective and efficient compilation of data will necessitate the continued cooperation of the more than 16,000 law enforcement contributors. Realizing that nationwide strategies rely upon the ability to identify and track crimes that are prompted by bias, the law enforcement community is offering its support and has committed resources to the successful implementation of the hate crime statistics program.

No single entity, however, can rectify the hate crime problem in our Nation. A campaign against such intolerable behavior requires the consolidated efforts of the law enforcement community, a myriad of human interests groups, and the general public. Only such collaborative effort will send an unambiguous message that any demeanor exhibiting prejudice will not be tolerated.

William S. Sessions
Director

CRIME FACTORS

Each year when *Crime in the United States* is published many entities—news media, tourism agencies, and others with an interest in crime in our Nation—compile rankings of cities and counties based on their Crime Index figures. This simplistic and incomplete analysis often creates improper perceptions which adversely affect cities and counties along with their residents. Assessing criminality and law enforcement's response from jurisdiction to jurisdiction must encompass many elements, some of which, while having significant impact, are not readily measurable nor applicable pervasively among all locales. Geographic and demographic factors specific to each jurisdiction must be considered and applied if crime assessment is to approach completeness and accuracy. There are several sources of information which may assist the responsible researcher. The U.S. Bureau of Census data, for example, can be utilized to better understand the makeup of a locale's population. The transience of the population, its racial and ethnic makeup, its age and sex structure, education levels, and prevalent family structure are all key factors in assessing and better understanding the crime issues.

The National League of Cities provides information regarding the economic and cultural makeup of cities and counties. Understanding a jurisdiction's industrial/economic base, its dependence upon neighboring jurisdictions, its transportation system, its dependence on nonresidents (such as tourists and convention attendees), proximity to military reservations, etc., all help in better gauging and interpreting the crime known to and reported by law enforcement. More detailed information can, of course, be obtained from the city or county chamber of commerce, planning/information office, or similar entity.

The strength (personnel and other resources) and the aggressiveness of the law enforcement agency are also key factors. While information pertaining to the number of sworn and civilian law enforcement employees can be found in this publication, assessment of the law enforcement emphases is, of course, much more difficult. For example, one city may report more crime than a comparable one, not because there is more crime, but rather because its law enforcement agency through proactive efforts, such as "sting operations," identify more offenses. Attitudes of the citizens toward crime and their crime reporting practices, especially concerning more minor offenses, have an impact on the volume of crimes known to police.

It is incumbent upon all data users to become as well educated as possible when attempting to categorize and quantify the nature and extent of crime in the United States and in any of the almost 16,000 jurisdictions represented by law enforcement contributors to this Program. This is only possible with careful study and analysis of the various unique conditions affecting each local law enforcement jurisdiction.

Historically, the causes and origins of crime have been the subjects of investigation by varied disciplines. Some factors which have been determined to affect the volume and type of crime occurring from place to place are:

- Population density and degree of urbanization with size of locality and its surrounding area.
- Variations in composition of the population, particularly youth concentration.
- Stability of population with respect to residents' mobility, commuting patterns, and transient factors.
- Modes of transportation and highway system.
- Economic conditions, including median income, destitution, and job availability.
- Cultural conditions, such as educational, recreational, and religious characteristics.
- Family conditions with respect to divorce and family cohesiveness.
- Climate.
- Effective strength of law enforcement agencies.
- Administrative and investigative emphases of law enforcement.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
- Attitudes of citizenry toward crime.
- Crime reporting practices of citizenry.

The Uniform Crime Reports give a nationwide view of crime based on statistics contributed by state and local law enforcement agencies. Population size is the only correlate of crime utilized in this publication. While the other factors listed above are of equal concern, no attempt is made to relate them to the data presented. *The reader is, therefore, cautioned against comparing statistical data of individual reporting units from cities, counties, states, or colleges and universities solely on the basis of their population coverage or student enrollment.*

SECTION I

SUMMARY OF THE UNIFORM CRIME REPORTING PROGRAM

The Uniform Crime Reporting (UCR) Program is a nationwide, cooperative statistical effort of approximately 16,000 city, county, and state law enforcement agencies voluntarily reporting data on crimes brought to their attention. Since 1930, the FBI has administered the Program and issued periodic assessments of the nature and type of crime in the Nation. While the Program's primary objective is to generate a reliable set of criminal statistics for use in law enforcement administration, operation, and management, its data have over the years become one of the country's leading social indicators. The American public looks to UCR for information on fluctuations in the level of crime, while criminologists, sociologists, legislators, municipal planners, the press, and other students of criminal justice use the statistics for varied research and planning purposes.

Historical Background

Recognizing a need for national crime statistics, the International Association of Chiefs of Police (IACP) formed the Committee on Uniform Crime Records in the 1920s to develop a system of uniform police statistics. Establishing offenses known to law enforcement as the appropriate measure, the Committee evaluated various crimes on the basis of their seriousness, frequency of occurrence, pervasiveness in all geographic areas of the country, and likelihood of being reported to law enforcement. After studying state criminal codes and making an evaluation of the recordkeeping practices in use, the Committee in 1929 completed a plan for crime reporting which became the foundation of the UCR Program.

Seven offenses were chosen to serve as an Index for gauging fluctuations in the overall volume and rate of crime. Known collectively as the Crime Index, these offenses included the violent crimes of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault and the property crimes of burglary, larceny-theft, and motor vehicle theft. By congressional mandate, arson was added as the eighth Index offense in 1979.

During the early planning of the Program, it was recognized that the differences among criminal codes precluded a mere aggregation of state statistics to arrive at a national total. Further, because of the variances in punishment for the same offenses in different state codes, no distinction between felony and misdemeanor crimes was possible. To avoid these problems and provide nationwide uniformity in crime reporting, standardized offense

definitions by which law enforcement agencies were to submit data, without regard for local statutes, were formulated. The definitions used by the Program are set forth in Appendix II of this publication.

In January, 1930, 400 cities representing 20 million inhabitants in 43 states began participating in the UCR Program. Congress enacted Title 28, Section 534, of the United States Code authorizing the Attorney General to gather crime information that same year. The Attorney General, in turn, designated the FBI to serve as the national clearinghouse for the data collected. Since that time, data based on uniform classifications and procedures for reporting have been obtained from the Nation's law enforcement agencies.

Advisory Groups

Providing vital links between local law enforcement and the FBI in the conduct of the UCR Program are the IACP and the National Sheriffs' Association (NSA). The IACP's Committee on Uniform Crime Records, as it has since the Program began, represents the thousands of police departments nationwide. The NSA's Committee on Uniform Crime Reporting, established in June, 1966, encourages sheriffs throughout the country to participate fully in the Program. Both committees serve in advisory capacities concerning the UCR Program's operation.

To function in an advisory capacity concerning UCR policy and provide suggestions on UCR data usage, a Data Providers Advisory Policy Board was established in August, 1988. The Board is comprised of 20 city, county, and state law enforcement executives, representing the four geographic regions of the Nation.

The Association of State Uniform Crime Reporting Programs and committees on UCR within individual state law enforcement associations are also active in promoting interest in the UCR Program. These organizations foster widespread and more intelligent use of uniform crime statistics and lend assistance to contributors when the needs arise.

Methods of Data Collection

The information compiled by UCR contributors is forwarded to the FBI either directly from the local law enforcement agency or through a state-level UCR Program. Agencies submitting directly to the FBI are provided continuing guidance and support on an individual basis.

State-level UCR Programs are very effective intermediaries between local contributors and the FBI. Many of the

42 state Programs have mandatory reporting requirements and collect data beyond the national UCR scope to address crime problems germane to their particular locales. In most cases, these agencies are also able to provide more direct and frequent service to participating law enforcement agencies, to make information more readily available for use at the state level, and to contribute to more streamlined operations at the national level.

With the development of a state UCR Program, the FBI ceases direct collection of data from individual law enforcement agencies within the state. Instead, information from local agencies is forwarded to the national Program through the state data collection agency.

The conditions under which these systems are developed ensure consistency and comparability in the data submitted to the national Program, as well as provide for regular and timely reporting of national crime data. These conditions are: (1) The state Program must conform to national Uniform Crime Reports' standards, definitions, and information requirements. The states are not, of course, prohibited from collecting other statistical data beyond the national requirements. (2) The state criminal justice agency must have a proven, effective, statewide Program and have instituted acceptable quality control procedures. (3) Coverage within the state by a state agency must be, at least, equal to that attained by the national Uniform Crime Reports. (4) The state agency must have adequate field staff assigned to conduct audits and to assist contributing agencies in record practices and crime reporting procedures. (5) The state agency must furnish to the FBI all of the detailed data regularly collected by the FBI in the form of duplicate returns, computer printouts, and/or magnetic tapes. (6) The state agency must have the proven capability (tested over a period of time) to supply all the statistical data required in time to meet national Uniform Crime Reports' publication deadlines.

To fulfill its responsibilities in connection with the UCR Program, the FBI continues to edit and review individual agency reports for both completeness and quality; has direct contact with individual contributors within the state when necessary in connection with crime reporting matters, coordinating such contact with the state agency; and upon request, conducts training programs within the state on law enforcement records and crime reporting procedures. Should circumstances develop whereby the state agency does not comply with the aforementioned requirements, the national Program may reinstitute a direct collection of Uniform Crime Reports from law enforcement agencies within the state.

Reporting Procedures

Based on records of all reports of crime received from victims, officers who discover infractions, or other sources, law enforcement agencies across the country tabulate the number of Crime Index or Part I offenses brought to their attention each month. Specifically, the crimes reported to

the FBI are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson.

Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from an agency's count. The number of "actual offenses known" is reported to the FBI regardless of whether anyone is arrested for the crime, stolen property is recovered, or prosecution is undertaken.

Another integral part of the monthly submission is the total number of actual Crime Index offenses cleared. Crimes are "cleared" in one of two ways: (1) at least one person is arrested, charged, and turned over to the court for prosecution; or (2) by exceptional means when some element beyond police control precludes the arrest of an offender. Law enforcement agencies also report the number of Index crime clearances which involve only offenders under the age of 18; the value of property stolen and recovered in connection with the offenses; and detailed information pertaining to criminal homicide and arson.

In addition to its primary collection on Crime Index (Part I) offenses, the UCR Program solicits monthly data on persons arrested for all crimes except traffic violations. The age, sex, and race of arrestees are reported by crime category, both Part I and Part II. Part II offenses include all crimes not classified as Part I.

Various data on law enforcement officers killed or assaulted are collected on a monthly basis. The number of full-time sworn and civilian personnel are reported annually, as of October 31.

Editing Procedures

Each report submitted to the UCR Program is thoroughly examined for arithmetical accuracy and for deviations which may indicate errors. To identify any unusual fluctuations in an agency's crime counts, monthly reports are compared with previous submissions of the agency and with those for similar agencies. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in the jurisdiction's geopolitical structure.

Data reliability is a high priority of the Program and noted deviations or arithmetical adjustments are brought to the attention of the state UCR Program or the submitting agency through correspondence. A standard procedure of the FBI is to study the monthly reports and to evaluate periodic trends prepared for individual reporting units. Any significant increase or decrease is made the subject of a special inquiry. When it is found that changes in crime reporting procedures or annexations are influencing the level of crime, the figures for specific crime categories, or if necessary, totals are excluded from trend tabulations.

To assist contributors in complying with UCR standards, the national Program provides training seminars and instructional materials in crime reporting procedures. Throughout the country, liaison with state Programs and

law enforcement personnel is maintained, and training sessions are held to explain the purpose of the Program, the rules of uniform classification and scoring, and the methods of assembling the information for reporting. When an individual agency has specific problems in compiling its crime statistics and remedial efforts are unsuccessful, FBI Headquarters' personnel may visit the contributor to aid in resolving the difficulties.

The *Uniform Crime Reporting Handbook*, which details procedures for classifying and scoring offenses, is supplied to all contributors as the basic resource document for preparing reports. Since a good records system is essential for accurate crime reporting, the FBI also furnishes the *Manual of Law Enforcement Records*.

To enhance communication among Program participants, the UCR "Newsletter" and State UCR Program "Bulletin" are utilized. They address Program policy, as well as present information and instructional material, and are produced as needed.

The final responsibility for data submissions rests with the individual contributing law enforcement agency. Although the Program makes every effort through its editing procedures, training practices, and correspondence to assure the validity of the data it receives, the statistics' accuracy depends primarily on the adherence of each contributor to the established standards of reporting. Deviations from these established standards which cannot be resolved by the national UCR Program may be brought to the attention of the Committee on Uniform Crime Records of the IACP or the Committee on Uniform Crime Reporting of the NSA.

Reporting Area

The presentation of statistics by reporting area facilitates analyzing local crime counts in conjunction with those for areas of similar geographical location or population size. Geographically, the United States is divisible by regions, divisions, and states. As discussed in Appendix III, further breakdowns rely on population figures and proximity to metropolitan areas.

A Metropolitan Statistical Area (MSA) is an integrated economic and social unit with a recognized large population nucleus. Each has a central city of at least 50,000 population or an urbanized area of at least 50,000. Contiguous counties which meet specified criteria of metropolitan character and integration, designated suburban counties in UCR, are included. Due to changes in the geographic compositions of MSAs, no year-to-year comparisons of data for those areas should be attempted.

"Other cities," most of which are incorporated, and rural counties are outside MSAs. As a general rule, sheriffs, county police, and state police report crimes committed within the limits of the counties but outside cities, while local police report crimes committed within the city limits.

Certain tables within this publication present statistics relative to "suburban" areas. A suburban area consists of

cities with fewer than 50,000 inhabitants together with counties which are within an MSA. In this context, the central city is, of course, excluded. The concept of suburban area is especially important in a study of this nature because of the particular crime conditions which exist in the communities surrounding the Nation's largest cities.

During 1990, law enforcement agencies active in the UCR Program represented approximately 239 million United States inhabitants, or 96 percent of the total population as established by the Bureau of the Census. The coverage amounted to 98 percent of the United States population living in MSAs, 93 percent of the population in "other cities," and 89 percent of the rural population.

Although most law enforcement agencies submit crime reports to the UCR Program, data are sometimes not received for complete annual periods. To be included in this publication's Tables 6, 7, 8, and 9, showing specific jurisdictional statistics, figures for all 12 months of the current year must have been received at the FBI prior to established publication deadlines. Other tabular presentations are aggregated as set forth in Appendix I. Unless consisting of estimates for the total United States population, each table in this publication shows the number of agencies reporting and the extent of population coverage.

Population Data

Current year population figures for the Nation, states, cities, counties, and geographic regions and divisions are Bureau of the Census 1990 decennial census counts and are subject to change. (See Appendix III.) The United States population showed virtually no change in 1990 from the 1989 estimate.

Offense Estimation

Tables 1 through 5 of this publication contain statistics for the entire United States. Because not all law enforcement agencies provide data for complete reporting periods, estimated crime counts are included in these presentations. Offense estimation occurs within each of three areas: Metropolitan Statistical Areas, "other cities," and rural counties. Using the known crime experiences of similar areas within a state, the estimates are computed by assigning the same proportional crime volumes to nonreporting agencies.

Unique estimation procedures were used to produce estimated 1985 through 1990 forcible rape figures for the State of Illinois. In mid-1984, gender-neutral sex offense legislation was passed in that state. As a result, forcible rape figures furnished by the state-level UCR Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Forcible rape totals are not shown in Tables 6, 7, 8, 9, and Appendix V, which present individual MSA, city, county, and university/college data for Illinois agencies. Since the data supplied were not comparable with those provided for other agencies across the country, the post-1984 forcible

rape figures have been estimated using national rates per 100,000 inhabitants within the eight population groups and assigning the forcible rape volumes proportionally.

Due to reporting problems at the state levels, no usable 1988 data were received for local law enforcement agencies in Florida and Kentucky. For Table 1 of this publication, 1988 offense totals for these two states were estimated. Previous valid annual totals, by population group, were updated for the states by applying percentage changes for each offense within each population group of the geographic division in which the state resides. The state totals were compiled from the sums of the population group estimates. Reporting recommenced for both states during 1989, and usable data have since been received.

Crime Trends

Showing fluctuations from year to year, trend statistics offer the data user an added perspective from which to study crime. Percent change tabulations in this publication are computed only for reporting units which have provided comparable data for the periods under consideration. Exclusions from trend computations are made when figures from a reporting agency are not received for comparable timeframes or when it is ascertained that unusual fluctuations are due to such variables as improved records procedures, annexations, etc.

Care should be exercised in any direct comparison between data in this publication and those in prior issues of *Crime in the United States*. Valid percent changes for 2, 5, and 10 years are presented in this book's tabular portions.

Redesign of UCR

While throughout the years the UCR Program remained virtually unchanged in terms of the data collected and disseminated, a broad utility had evolved for UCR by the 1980s. Recognizing the need for improved statistics, law enforcement called for a thorough evaluative study that would modernize the UCR Program. The FBI fully concurred with the need for an updated Program and lent its complete support, formulating a comprehensive three-phase redesign effort. The Bureau of Justice Statistics (BJS), the Department of Justice agency responsible for funding criminal justice information projects, agreed to underwrite the first two phases. Conducted by an independent contractor, these phases were structured to determine what, if any, changes should be made to the current Program. The third phase would involve implementation of the changes identified. Abt Associates Inc. of Cambridge, Massachusetts, overseen by the FBI, BJS, and a Steering Committee comprised of prestigious individuals representing a myriad of disciplines, commenced the first phase in 1982.

During the first phase, the historical evolution of the Program was examined. All aspects of the Program, including the objectives and intended user audience, data

items, reporting mechanisms, quality control, publications and user services, and relationships with other criminal justice data systems, were studied.

Early in 1984, a conference on the future of UCR, held in Elkridge, Maryland, launched the second phase of the study, which would examine potential futures for UCR and conclude with a set of recommended changes. Attendees at this conference reviewed work conducted during the first phase and discussed the potential changes that should be considered during phase two.

Findings from the evaluation's first phase and input on alternatives for the future were also major topics of discussion at the seventh National UCR Conference in July, 1984. Overlapping phases one and two was a survey of law enforcement agencies.

Phase two ended in early 1985 with the production of a draft "Blueprint for the Future of the Uniform Crime Reporting Program." The study's Steering Committee reviewed the draft report at a March, 1985, meeting and made various recommendations for revision. The Committee members, however, endorsed the report's concepts.

In April, 1985, the phase two recommendations were presented at the eighth National UCR Conference. While various considerations for the final report were set forth, the overall concept for the revised Program was unanimously approved. The joint IACP/NSA Committee on UCR also issued a resolution endorsing the Blueprint.

The final report, the "Blueprint for the Future of the Uniform Crime Reporting Program," was released in the summer of 1985. It specifically outlined recommendations for an expanded, improved UCR Program to meet informational needs into the next century. There were three recommended areas of enhancement to the UCR Program. First, reporting of offenses and arrests would be made by means of an incident-based system. Second, collection of data would be accomplished on two levels. Agencies in level one would report important details about those offenses comprising the current Crime Index, their victims, and arrestees. Law enforcement agencies covering populations of over 100,000 and a sampling of smaller agencies would be included in level two, which would collect expanded detail on all significant offenses. The third proposal involved introducing a quality assurance program.

One of the first actions taken by the FBI to begin implementation was to award a contract for the development of new offense definitions and data elements for the redesigned system. The work involved: (a) revision of the definitions of certain Index offenses; (b) identification of additional significant offenses to be reported; (c) refining definitions for both; and (d) development of data elements (incident details) for all UCR offenses in order to fulfill the requirements of incident-based reporting versus the current summary reporting.

Concurrent with the preparation of the data elements, the FBI studied the various state systems to select an

experimental site for implementation of the redesigned Program. In view of its long-standing incident-based Program and well-established staff dedicated solely to UCR, the South Carolina Law Enforcement Division (SLED) was chosen. The SLED agreed to adapt its existing system to meet the requirements of the redesigned Program and collect data on both offenses and arrests relating to the newly defined offenses.

To assist SLED in conducting the pilot project, offense definitions and data elements developed under the private contract were put at the staff's disposal. Also, the FBI's Technical Services Division developed "Automated Data Capture Specifications" for use in adapting the state's data processing procedures to incorporate the revised system. The BJS supplied funding to facilitate needed software revisions. Testing of the new Program was completed in late 1987.

Following the completion of the pilot project conducted by SLED, the FBI produced a draft set of guidelines for an enhanced UCR Program. Law enforcement executives from around the country were then invited to a conference in Orange Beach, Alabama, where the guidelines were presented for final review.

During the conference, three overall endorsements were passed without dissent. First, that there be established a new, incident-based national crime reporting system; second, that the FBI manage this Program; and third, that an Advisory Policy Board composed of law enforcement executives be formed to assist in the direction and implementation of the new Program.

Information about the redesigned UCR Program, called the National Incident-Based Reporting System or NIBRS, is contained in three documents produced subsequent to the Orange Beach Conference. Volume 1, *Data Collection Guidelines*, contains a system overview and descriptions of the offenses, offense codes, reports, data elements, and data values used in the system. Volume 2, *Data Submission Specifications*, is for the use of state and local systems personnel who are responsible for preparing magnetic tapes for submission to the FBI. Volume 3, *Approaches to Implementing an Incident-Based Reporting (IBR) System*, is for use by computer programmers, analysts, etc., responsible for developing a state or local IBR system which will meet NIBRS' reporting requirements.

NIBRS will collect data on each single incident and arrest within 22 crime categories. For each offense known to police within these categories, incident, victim, property, offender, and arrestee information will be gathered when available. The goal of the redesign is to modernize crime information by collecting data presently maintained in law enforcement records; the enhanced UCR Program is, therefore, a byproduct of current records systems. The integrity of UCR's long-running statistical series will, of course, be maintained.

It became apparent during the development of the prototype system that the level one and level two reporting

proposed in the "Blueprint" may not be the most practical approach. Many state and local law enforcement administrators indicated that the collection of data on all pertinent offenses could be handled with more ease than can the extraction of selected ones. While "Limited" participation, equivalent to the "Blueprint's" level one, will remain an option, it appears that most reporting jurisdictions, upon implementation, will go immediately to "Full" participation, meeting all NIBRS data submission requirements.

The implementation of NIBRS will be at a pace commensurate with the resources, abilities, and limitations of the contributing law enforcement agencies. The FBI was able to accept NIBRS data as of January, 1989, and three state-level UCR Programs (Alabama, North Dakota, and South Carolina) and one Federal agency (Department of the Interior) now supply data in the NIBRS format. An additional eight state agencies have submitted test tapes containing the expanded data. Twenty-five other Programs are in various stages of planning and development and are expected to be reporting to some degree by the end of 1991.

Recent Developments

FEDERAL CRIME REPORTING—In 1988, the U. S. Congress passed the Uniform Federal Crime Reporting Act, mandating Federal law enforcement participation in UCR effective January, 1989. The implementation of NIBRS, the redesigned UCR Program, at the Federal level is underway, and the Department of the Interior, which acted as the pilot agency for testing Federal participation requirements, is currently supplying data. The FBI has provided supplemental NIBRS guidelines for Federal law enforcement and is working closely with Federal agencies as they modify their records systems to accommodate NIBRS requirements. Data produced as a result of this Act should be of tremendous benefit to all levels of law enforcement, to the Executive and Legislative Branches, and to many other interests.

HATE CRIME STATISTICS—The Hate Crime Statistics Act, passed by the U. S. Congress and signed by the President in April, 1990, mandates a 5-year data collection of crimes motivated by religious, ethnic, racial, or sexual-orientation prejudice. On January 1, 1991, the collection commenced and the UCR Program has distributed hate crime *Data Collection Guidelines* and *Training Guides* to city, county, and state law enforcement agencies. Regional training sessions have been held across the Nation to assist state-level UCR Programs with implementation among their jurisdictions and to prepare state UCR personnel to train local law enforcement representatives within their respective states. Additional sessions are being held for local law enforcement, either in conjunction with their regular periodic UCR training or separately in FBI-sponsored seminars dealing solely with bias crime reporting. Plans are currently underway for a hate crime "resource book," which will draw together all the data now being maintained at the state and local levels concerning the

incidence of hate crimes. This publication will precede the FBI's first issuance of statistics gathered under the UCR hate crime collection.

LAW ENFORCEMENT OFFICERS KILLED AND ASSAULTED—The UCR collection of data on law enforcement officers killed and assaulted is being modified with the 1991 reporting year. Data on officers slayings are being expanded to include more information about the circumstances at the scene, the interaction between the victim and assailant, the weapons used, etc. As an addition to the Program, information on serious assaults is going to be solicited. Data identical to those collected on officers killed are going to be requested on all assaults resulting in injury and during which a firearm or knife was used. The assault information will be solicited from all levels of law

enforcement in a manner similar to the current practice concerning officers killed. Initial notification will, of course, be gleaned from the monthly reports on officers killed and assaulted submitted by all UCR contributors.

CAMPUS CRIME—In 1990, the Crime Awareness and Campus Security Act was enacted into law. The Act requires that eligible educational institutions maintain certain crime and arrest data in accordance with UCR definitions. While there is no mandate that the data be reported to be FBI, institutions are to begin collection on September 1, 1991, and in September, 1992, commence annual "security reports." The FBI is working with the Department of Education to assist with the implementation of the Act, supplying appropriate training materials and assistance.

CRIME CLOCK

every 10 seconds

one
LARCENY-THEFT
every 4 seconds

one
MOTOR VEHICLE THEFT
every 19 seconds

The crime clock should be viewed with care. Being the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

SECTION II

CRIME INDEX OFFENSES REPORTED

MURDER AND NONNEGLIGENT MANSLAUGHTER

DEFINITION

Murder and nonnegligent manslaughter, as defined in the Uniform Crime Reporting Program, is the willful (nonnegligent) killing of one human being by another.

The classification of this offense, as for all other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides; and attempts to murder or assaults to murder, which are scored as aggravated assaults.

TREND

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
1989	21,500	8.7
1990	23,438	9.4
<i>Percent change</i>	+9.0	+8.0

Volume

Reaching an all-time high during 1990, the total number of murders in the United States for the year was estimated at 23,438 or 1 percent of the violent crimes reported. More persons were murdered in July than any other month, while the fewest were killed during February.

Murder by Month, 1986-1990

[Percent of annual total]

Months	1986	1987	1988	1989	1990
January	7.7	7.7	8.2	8.1	7.9
February	7.0	7.9	7.2	7.1	7.0
March	8.3	8.2	7.7	7.8	8.0
April	8.0	7.6	7.7	7.9	7.4
May	8.2	8.6	7.8	7.8	8.1
June	8.3	7.8	7.7	8.2	8.4

September	9.1	8.3	8.9	8.8	9.2
October	8.3	8.8	8.9	8.9	8.8
November	8.0	8.3	8.2	8.5	7.6
December	8.4	9.1	9.2	8.7	8.8

When viewing the four regions of the Nation, the Southern States, the most populous, accounted for 43 percent of the murders. The Western States reported 20 percent; the Northeastern States, 19 percent; and the Midwestern States, 18 percent.

Trend

The murder volume was up 9 percent nationwide in 1990 over 1989. The Nation's cities overall experienced an increase of 11 percent, with upward trends recorded in all population groupings. Of the cities, those with populations under 10,000 registered the greatest increase, 19 percent. Suburban counties recorded a 5-percent rise, and the rural counties registered a 4-percent increase.

All regions experienced more murders during 1990 than in 1989. The number of murders was up 11 percent in the West; 10 percent in both the Northeast and South; and 4 percent in the Midwest.

The accompanying chart reveals a 14-percent rise nationally in the murder counts from 1986 to 1990. The 10-year trend showed the 1990 total 4 percent above the 1981 level.

Rate

A murder rate of 9 per 100,000 inhabitants was registered nationwide in 1990. Two-, 5-, and 10-year trends showed the 1990 rate was 8 percent higher than in 1989 and 9 percent above the 1986 rate but 4 percent below the 1981 rate.

On a regional basis, the South averaged 12 murders per 100,000 people; both the West and the Northeast, 9 per 100,000; and the Midwest, 7 per 100,000. Compared to 1989, murder rates in 1990 increased 10 percent in both the West and Northeast; 9 percent in the South; and 6 percent in the Midwest.

The Nation's metropolitan areas reported a 1990 murder rate of 11 victims per 100,000 inhabitants. In the rural counties, the rate was 6 per 100,000, and in cities outside metropolitan areas, the rate was 5 per 100,000.

Nature

Supplemental data provided by contributing agencies recorded information for 20,045 of the estimated 23,438 murders in 1990. Submitted monthly, the data consist of the age, sex, and race of both victims and offenders; the types of weapons used; the relationships of victims to the offenders; and the circumstances surrounding the murders.

Based on this information, 78 percent of the murder victims in 1990 were males; and 90 percent were persons 18 years of age or older. Forty-nine percent were aged 20 through 34 years. Considering victims for whom race was known, an average of 49 of every 100 were black, 49 were white, and the remainder were persons of other races.

¹Does not include unknown ages.

Data based on incidents involving one victim and one offender showed that in 1990, 93 percent of the black murder victims were slain by black offenders, and 86 percent of the white murder victims were killed by white

offenders. Likewise, males were most often slain by males (85 percent in single victim/single offender situations). These same data showed, however, that 9 of every 10 female victims were murdered by males.

As in previous years, firearms were the weapons used in approximately 3 of every 5 murders committed in the United States. Of those murders for which weapons were reported, 50 percent were by handguns, 6 percent by shotguns, and 4 percent by rifles. Other or unknown types of firearms accounted for another 5 percent of the total murders. Among the remaining weapons, cutting or stabbing instruments were employed in 17 percent of the murders; blunt objects (clubs, hammers, etc.) in 5 percent; other dangerous weapons, such as poison, explosives, etc., in 8 percent; and personal weapons (hands, fists, feet, etc.) in the remainder.

Over half the murder victims in 1990 were related to (14 percent) or acquainted with (37 percent) their assailants. Fourteen percent of the victims were murdered by strangers, while the relationships among victims and offenders were unknown for 35 percent of the murders. Among all female murder victims in 1990, 30 percent were slain by husbands or boyfriends. Four percent of the male victims were killed by wives or girlfriends.

Arguments resulted in 34 percent of the murders during the year. Twenty-one percent occurred as a result of felonious activities such as robbery, arson, etc., while another 1 percent were suspected to have been the result of some felonious activity. Four percent of the murders were committed during brawls while offenders were under the influence of alcohol or narcotics. The table on the following page shows murder circumstances for the past 5 years.

¹Because of rounding, percentages may not add to totals.

²Includes murders committed during brawls while offender was under the influence of alcohol and/or narcotics.

Clearances

The clearance rate for murder continued to be higher than for any other Crime Index offense. Law enforcement agencies nationwide were successful in clearing 67 percent of the murders occurring in their jurisdictions during 1990. Seventy-six percent of murders in rural counties, 68 percent of those in suburban counties, and 66 percent of those in the Nation's cities were cleared. Cities with populations under 10,000 reported the most successful clearance rate, 78 percent.

Geographically, the South, the most populous region, registered the highest murder clearance rate, 70 percent. Sixty-six percent of murders in the West and 65 percent in both the Midwest and Northeast were cleared.

Persons under 18 years of age accounted for 8 percent of the willful killings cleared by law enforcement nationally, as well as in the Nation's cities during 1990. This proportion of juvenile involvement was lower than for any other Index offense. Seven percent of the suburban county and 5 percent of the rural county clearances involved only persons in this young-age group.

Persons Arrested

Fifty-two percent of all murder arrestees in 1990 were under 25 years of age. The 18- to 24-year age group accounted for 38 percent of the total.

Ninety percent of those arrested were male and 10 percent, female. Blacks comprised 55 percent of the total arrestees for murder in 1990. Whites made up 44 percent, and the remainder were of other races.

Compared to the 1989 level, the 1990 murder arrest total increased 11 percent. Arrests of persons aged 18 and over increased 9 percent, and those of younger persons were up 26 percent. During the same 2-year period, male arrests increased 13 percent, while female arrests were down 3 percent.

Long-term trends indicate the 1990 murder arrest total was 23 percent above the 1986 level and 10 percent higher than the 1981 figure.

FORCIBLE RAPE

DEFINITION

Forcible rape, as defined in the Program, is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are excluded.

TREND

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
1989	94,504	38.1
1990	102,555	41.2
<i>Percent change</i>	+8.5	+8.1

Volume

During 1990, there were an estimated 102,555 forcible rapes in the Nation. Rape offenses comprised 6 percent of the total violent crimes. Geographically, the Southern States, the region with the largest population, accounted for 38 percent of the forcible rapes reported to law enforcement. Following were the Midwest with 25 percent, the West with 23 percent, and the Northeast with 14 percent.

Monthly totals showed the greatest number of forcible rapes were reported during the summer, with July recording the highest frequency. The lowest total was registered in February.

Forcible Rape by Month, 1986-1990

[Percent of annual total]

Months	1986	1987	1988	1989	1990
January	7.1	7.2	7.4	7.4	7.6
February	6.7	6.8	7.3	6.3	6.7
March	7.9	8.1	8.0	7.7	7.9
April	8.1	8.2	8.0	8.3	8.1
May	8.8	8.9	9.0	8.6	9.1
June	9.2	9.3	8.7	8.9	9.0
July	9.8	9.7	9.9	10.0	9.6
August	10.2	9.8	9.8	9.5	9.4
September	9.1	8.9	9.0	8.8	9.1
October	8.4	8.1	8.4	8.9	8.4
November	7.8	7.7	7.6	8.3	7.7
December	7.0	7.3	6.8	7.3	7.4

Trend

Compared to the previous year, the 1990 forcible rape volume increased 9 percent nationwide. In the cities collectively, the total was also up 9 percent. The rural counties recorded a 7-percent increase and the suburban counties, a 10-percent rise. City trends ranged from a 4-percent increase in cities with populations of 1 million or more to a 14-percent increase in cities with under 10,000 inhabitants.

Geographically, all four regions reported higher forcible rape volumes in 1990 than in 1989. The increases were 11 percent in the Southern States, 8 percent in both the Midwestern and Western States, and 2 percent in the Northeastern States.

National trends for 5 and 10 years show that the forcible rape total rose 12 percent over 1986 and 24 percent above 1981.

Rate

By Uniform Crime Reporting definition, the victims of forcible rape are always female. In 1990, an estimated 80 of every 100,000 females in the country were reported rape

victims, an increase of 8 percent from the 1989 rate. Since 1986, the female forcible rape rate has risen 10 percent.

Female forcible rape rates for 1990 showed there were 89 victims per 100,000 females in MSAs, 64 per 100,000 females in cities outside metropolitan areas, and 44 per 100,000 females in rural counties.

Regionally, the highest female rape rate was in the Southern States, which recorded 88 victims per 100,000 females. Following were the Western States with a rate of 87, the Midwestern States with 83, and the Northeastern States with 56.

Nature

Of all reported forcible rapes during 1990, 84 percent were rapes by force. The remainder were attempts or assaults to commit forcible rape. A 10-percent increase was registered in the number of rapes by force, and a 1-percent increase for attempts to commit rape.

Clearances

Nationwide, as well as in the cities and suburban counties, 53 percent of the forcible rapes reported to law enforcement were cleared by arrest or exceptional means in 1990. Rural county law enforcement agencies cleared 54 percent of the offenses brought to their attention.

Clearance rates for the regions ranged from 47 percent in the Midwestern States to 58 percent in the Southern States. In the Northeastern States, the clearance rate for forcible rape was 53 percent, and in the Western States, it was 50 percent.

Of the total clearances for forcible rape in the country as a whole, 12 percent involved only persons under 18 years of age. Rural counties recorded a 13-percent involvement of this age group, while 17 percent was recorded in suburban counties. In the Nation's cities, only persons under age 18 accounted for 11 percent of the forcible rape clearances.

Persons Arrested

The number of arrests for forcible rape rose 8 percent nationwide and in the Nation's cities and suburban counties from 1989 to 1990. Arrests for this offense rose 6 percent in the rural counties. For the 5-year period, 1986 to 1990, total forcible rape arrests increased 9 percent nationwide. Those of adults and of persons under 18 years of age increased 10 percent and 3 percent, respectively.

Of the forcible rape arrestees in 1990, 44 percent were persons under the age of 25, with 29 percent of the total being in the 18- to 24-year age group. Fifty-five percent of those arrested were white, 43 percent were black, and the remainder, other races.

ROBBERY

DEFINITION

Robbery is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

TREND

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
1989	578,326	233.0
1990	639,271	257.0
<i>Percent change</i>	+10.5	+10.3

Volume

Accounting for 4 percent of all Index crimes and 35 percent of the violent crimes in 1990, robbery was estimated at 639,271 offenses for the year. Robberies occurred most frequently in December and least often in April during 1990.

Robbery by Month, 1986-1990

[Percent of annual total]

Months	1986	1987	1988	1989	1990
January	8.7	8.9	8.6	8.8	8.7
February	7.7	8.1	7.9	7.4	7.3
March	8.2	8.2	8.0	8.0	8.1
April	7.6	7.5	7.3	7.3	7.2
May	7.7	7.5	7.6	7.6	7.7
June	8.0	7.6	7.6	7.6	7.8
July	8.4	8.3	8.4	8.4	8.5
August	9.3	8.7	8.7	8.6	8.8
September	8.6	8.5	8.7	8.6	8.6
October	8.7	8.8	9.1	9.2	8.9
November	8.3	8.5	9.0	9.0	8.7
December	9.0	9.2	9.2	9.3	9.6

Distribution figures for the regions showed that the most populous Southern States registered 32 percent of all reported robberies. Following were the Northeastern States with 28 percent, the Western States with 22 percent, and the Midwestern States with the remainder.

Trend

Nationally, the 1990 robbery volume was 11 percent higher than the 1989 level. In the Nation's cities overall, robbery jumped 12 percent, the greatest increase being in those with populations of 500,000-999,999, 19 percent. The suburban counties experienced a 6-percent increase, while the rural counties recorded the only decline, 1 percent.

Two-year trends show the number of robberies in 1990 was up in all four regions as compared to 1989. The increases were 9 percent in both the Northeast and the South, 11 percent in the Midwest, and 14 percent in the West.

The accompanying chart depicts the trend in the robbery volume, as well as the robbery rate, for the years 1986-1990. In 1990, the number of robbery offenses was 18 percent higher than in 1986 and 8 percent above the 1981 total.

Rate

The national robbery rate in 1990 was 257 per 100,000 people, 10 percent higher than in 1989. In metropolitan areas, the robbery rate was 322; in cities outside metropolitan areas, it was 63; and in the rural areas, it was 16. With 1,139 robberies per 100,000 inhabitants, the highest rate was recorded in cities with a million or more inhabitants.

A comparison of 1989 and 1990 regional rates per 100,000 inhabitants showed the rates of 199 in the Midwest and 263 in the West were each up 12 percent. The rates were 237 in the South and 353 in the Northeast, both up 9 percent from 1989.

Nature

In 1990, a total estimated national loss of \$501 million was due to robberies. The value of property stolen during robberies averaged \$783 per incident. Average dollar losses ranged from \$341 taken during robberies of convenience stores to \$3,244 per bank robbery. The impact of this violent crime on its victims cannot be measured in terms of monetary loss alone. While the object of a robbery is to obtain money or property, the crime always involves force or threat of force, and many victims suffer serious personal injury.

As in previous years, robberies on streets or highways accounted for more than half (56 percent) of the offenses in this category. Robberies of commercial and financial establishments accounted for an additional 22 percent, and those occurring at residences, 10 percent. The remainder were miscellaneous types. By type, all categories of robbery showed increases from 1989 to 1990. The increases ranged from 4 percent for convenience store robberies to 18 percent for bank robberies.

¹Because of rounding, percentages may not add to totals.

Clearances

Twenty-five percent of the robbery offenses reported to law enforcement were cleared during 1990. The highest robbery clearance rate—37 percent—was registered by rural county law enforcement agencies. Suburban county

agencies cleared 29 percent and those in cities, 24 percent. Regional robbery clearance percentages were 28 percent in the South, 27 percent in the West, 23 percent in the Northeast, and 20 percent in the Midwest.

Nationally and in cities, persons under the age of 18 were the offenders in 14 percent of all 1990 robbery clearances. This age group accounted for 17 percent of the suburban county clearances and 10 percent of the rural county clearances.

Persons Arrested

Arrests for robbery rose 11 percent nationwide during 1990 when compared to 1989. For the same 2-year period, increases in the number of persons arrested for robbery were 12 percent in the cities collectively and 5 percent in the suburban counties. In the rural counties, robbery arrests decreased 6 percent.

Sixty-two percent of all robbery arrestees in 1990 were under 25 years of age, and 92 percent were males. Sixty-one percent of those arrested were black, 38 percent were white, and the remainder were of other races.

The total number of robbery arrests was up 19 percent during the 5-year period, 1986-1990. For the same time-span, arrests of females for robbery jumped 27 percent, and male arrests increased 18 percent. Juvenile arrests rose 23 percent, and those of persons 18 years of age and older increased 18 percent.

AGGRAVATED ASSAULT

DEFINITION

Aggravated assault is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

TREND

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
1989	951,707	383.4
1990	1,054,863	424.1
<i>Percent change</i>	+10.8	+10.6

Volume

Totalling an estimated 1,054,863 offenses nationally, aggravated assaults in 1990 accounted for 58 percent of the violent crimes. Geographic distribution figures show that 38 percent of the aggravated assault volume was accounted for by the South, 25 percent by the West, 20 percent by the Midwest, and 18 percent by the Northeast.

The 1990 monthly figures show that the greatest number of aggravated assaults was recorded during July, while the lowest volume occurred in February.

Aggravated Assault by Month, 1986-1990

[Percent of annual total]

Months	1986	1987	1988	1989	1990
January	6.8	7.3	7.2	7.5	7.4
February	6.3	7.0	7.0	6.6	6.7
March	8.0	7.8	7.9	7.9	7.8
April	8.1	8.1	8.1	8.1	8.2
May	9.1	8.9	8.9	8.9	9.0
June	9.7	8.9	9.0	8.9	9.4
July	10.0	9.5	9.8	9.6	10.1
August	10.0	9.5	9.8	9.2	9.3

October	8.3	8.5	8.4	9.1	8.3
November	7.6	7.9	7.5	7.9	7.4
December	7.4	7.8	7.5	7.5	7.5

Trend

In 1990, aggravated assaults were up 11 percent nationwide. Upswings in volume were evident in all regions and population groups as well, 1990 versus 1989. All cities collectively recorded a 10-percent increase, with cities of populations from 50,000 to 99,999 recording the greatest rise, 17 percent. The suburban counties registered an 8-percent increase and the rural counties, a 9-percent rise for the 2-year period.

During the same time period, the South registered a 16-percent upswing in its aggravated assault volume, and the Midwest, a 12-percent rise. Increases of 7 and 5 percent were recorded in the West and Northeast, respectively.

Five- and 10-year trends show aggravated assaults up 26 percent above the 1986 level and 59 percent over the 1981 experience.

Rate

Up 11 percent above the 1989 rate, there were 424 reported victims of aggravated assault for every 100,000

people nationwide in 1990. The rate was 23 percent higher than in 1986 and 46 percent above the 1981 rate.

Higher than the national average, the rate in metropolitan areas was 478 per 100,000 in 1990. Cities outside metropolitan areas experienced a rate of 357, and rural counties, a rate of 163.

Regionally, the aggravated assault rates ranged from 491 per 100,000 people in the West to 346 per 100,000 in the Midwest. The rate in the South for 1990 was 472, and in the Northeast, 366. Aggravated assault rates rose in all geographic regions in 1990 over 1989. The increases were 16 percent in the South, 13 percent in the Midwest, 5 percent in the West, and 4 percent in the Northeast.

Nature

In 1990, 32 percent of the aggravated assaults were committed with blunt objects or other dangerous weapons. Of the remaining weapon categories, personal weapons such as hands, fists, and feet were used in 26 percent of the offenses; firearms in 23 percent; and knives or cutting instruments in the remainder.

Assaults with firearms showed the greatest increase from 1989 to 1990, 14 percent. Those committed with personal weapons and with knives or cutting instruments were each up 7 percent, and those involving blunt objects or other dangerous weapons increased 10 percent.

Aggravated Assault, Type of Weapons Used, 1990

[Percent distribution by region]

Region	Total all weapons ¹	Fire-arms	Knives or cutting instruments	Other weapons (clubs, blunt objects, etc.)	Personal weapons

¹Because of rounding, percentages may not add to totals.

Aggravated Assault by Month 1990

Variation from Monthly Average

Aggravated Assault

Percent Change from 1986

 Number of Offenses Known - Up 26%
 Rate per 100,000 Inhabitants - Up 23%

Clearances

During 1990, law enforcement agencies nationwide cleared 57 percent of the aggravated assaults reported. The cities collectively reported a 56-percent clearance rate, while the suburban and rural county law enforcement agencies cleared 61 and 64 percent, respectively. Among the city groupings, those with populations under 10,000 recorded the highest clearance rate, 66 percent.

Regional clearance percentages for aggravated assault were 61 percent in the Western States, 59 percent in the Southern States, 54 percent in the Northeastern States, and 53 percent in the Midwestern States.

Ten percent of the clearances reported nationally and in cities involved only persons under age 18. Persons in this age group were identified as the assailants in 11 percent of the suburban county clearances and 7 percent of those in rural counties.

Persons Arrested

The estimated 475,330 persons arrested for aggravated assault in 1990 represented two-thirds of all arrestees for violent crimes. Whites comprised 60 percent of the arrestees; blacks, 38 percent; and all other races, the remainder. Eighty-seven percent of the arrestees were males and 13 percent, females.

Total arrests, as well as arrests of adults, for aggravated assault were up 12 percent in 1990 from the 1989 total. During this 2-year period, arrests of persons under age 18 increased 16 percent. A comparison of 1986 and 1990 figures showed increases of 43 percent for total arrests, 49 percent for juvenile arrests, and 42 percent for adult arrests.

BURGLARY

DEFINITION

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary in this Program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

TREND

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
1989	3,168,170	1,276.3
1990	3,073,909	1,235.9
<i>Percent change</i>	-3.0	-3.2

Volume

An estimated 3,073,909 burglaries occurred in the United States during 1990. These offenses accounted for 21 percent of the total Crime Index and 24 percent of the property crimes.

Distribution figures for the regions showed that the highest burglary volume occurred in the most populous Southern States, accounting for 42 percent of the total. The Western States followed with 22 percent, the Midwestern States with 19 percent, and the Northeastern States with 17 percent.

As in previous years, more burglaries occurred in August than any other month. The lowest number was reported in February.

Burglary by Month, 1986-1990

[Percent of annual total]

Months	1986	1987	1988	1989	1990
January	8.4	8.4	8.4	8.8	8.8
February	7.5	7.8	7.8	7.3	7.5
March	8.3	8.3	8.1	8.2	8.1
April	7.9	7.6	7.5	7.7	7.8
May	8.1	8.0	8.1	8.4	8.1
June	8.1	8.0	8.0	8.3	7.9
July	8.9	8.8	8.8	9.2	8.9
August	9.0	9.1	9.3	9.3	9.0
September	8.5	8.4	8.6	8.6	8.3
October	8.4	8.4	8.5	8.5	8.5
November	8.1	8.4	8.4	8.1	8.3
December	8.8	8.8	8.5	7.8	8.7

Trend

Nationwide, the burglary volume decreased 3 percent in 1990 from the 1989 total. By population, decreases were registered in all city groupings with the greatest decline in cities of 250,000-499,999 in population, 7 percent.

Geographically, three of the four regions of the United States reported decreases in burglaries during 1990 as compared to 1989. The declines equaled 4 percent in the Western, Midwestern, and Southern States. The only increase in burglary volume occurred in the Northeastern States with a 1-percent rise.

Longer term trends show burglary down 5 percent from the 1986 volume and 19 percent below the 1981 level.

Rate

A burglary rate of 1,236 per 100,000 inhabitants was registered nationwide in 1990. The rate fell 3 percent from 1989 and was 25 percent below the 1981 rate. In 1990, for

every 100,000 in population, the rate was 1,356 in the metropolitan areas, 1,053 in the cities outside metropolitan areas, and 671 in the rural counties.

Regionally, the burglary rate was 1,498 in the Southern States, 1,304 in the Western States, 1,020 in the Northeastern States, and 983 in the Midwestern States. A comparison of 1989 and 1990 rates showed decreases of 6 percent in the West, 4 percent in the South, and 3 percent in the Midwest. A 1-percent increase was reported in the Northeast.

Nature

Two of every 3 burglaries in 1990 were residential in nature. Seventy percent of all burglaries involved forcible entry, 22 percent were unlawful entries (without force), and the remainder were forcible entry attempts. Offenses for which time of occurrence was reported were evenly divided between day and night.

Burglary victims suffered losses estimated at \$3.5 billion in 1990, and the average dollar loss per burglary was \$1,133. The average loss for residential offenses was \$1,143, while for nonresidential property, it was \$1,110.

Both residential and nonresidential burglaries showed declines from 1989 to 1990, 4 and 3 percent, respectively.

Clearances

Geographically, 14 percent of the burglaries brought to the attention of law enforcement agencies across the country were cleared in 1990. In the South, the clearance rate was 15 percent; in the West and Northeast, 13 percent; and in the Midwest, 12 percent.

Rural county law enforcement cleared 16 percent of the burglaries in their jurisdictions. Agencies in suburban counties cleared 14 percent, and in cities, 13 percent.

Adults were involved in 81 percent of all burglary offenses cleared, and only young people under 18 years of age were offenders in the remaining 19 percent. Similar to the national experience, persons under age 18 accounted for 19 percent of the burglary clearances in cities. Rural county law enforcement agencies reported 20 percent of their burglary clearances involved only juveniles, while suburban county agencies registered 21 percent. The highest degree of juvenile involvement was recorded in the Nation's smallest cities (under 10,000 in population) where young persons under 18 years of age accounted for 26 percent of the clearances.

Persons Arrested

In the UCR Program, several persons may be arrested in connection with the clearance of one crime, or the arrest of one individual may clear numerous offenses. The latter is often true in cases of burglary for which an estimated 432,600 arrests were made in 1990. Arrest trends between 1989 and 1990 show a 2-percent decrease in total burglary arrests. Arrests of persons under 18 years of age showed

virtually no change, while those for adults declined 3 percent. For the same 2-year time period, total burglary arrests declined 1 percent in cities, 6 percent in suburban counties, and 5 percent in the rural counties.

Ninety-one percent of the burglary arrestees during 1990 were males and 65 percent were under 25 years of age. Of the total burglary arrestees, whites accounted for 68 percent, blacks for 30 percent, and other races for the remainder.

LARCENY-THEFT

DEFINITION

Larceny-theft is the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence, or fraud occurs. In the Uniform Crime Reporting Program, this crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft is also excluded from this category inasmuch as it is a separate Crime Index offense.

TREND

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
1989	7,872,442	3,171.3
1990	7,945,670	3,194.8
<i>Percent change</i>	+ .9	+ .7

Volume

Estimated at nearly 8 million offenses during 1990, larceny-thefts comprised 55 percent of the Crime Index total and 63 percent of the property crimes. Similar to the experience in previous years, larceny-thefts were recorded most often during August and least frequently in February. When viewed geographically, the most populous Southern States recorded 37 percent of the larceny-theft total. The Western and Midwestern States each registered 23 percent; and the Northeastern States, 17 percent.

Larceny-Theft by Month, 1986-1990

[Percent of annual total]

Months	1986	1987	1988	1989	1990
January	7.8	7.6	7.6	8.0	8.2
February	7.2	7.5	7.5	7.2	7.4
March	8.3	8.3	8.2	8.2	8.2
April	8.2	8.0	7.8	8.0	7.9
May	8.4	8.2	8.3	8.6	8.3
June	8.6	8.5	8.5	8.7	8.3
July	9.1	9.1	9.0	9.2	8.9
August	9.3	9.2	9.5	9.5	9.1
September	8.4	8.4	8.5	8.3	8.2
October	8.5	8.6	8.7	8.6	8.7
November	7.9	8.1	8.2	8.0	8.1
December	8.3	8.4	8.3	7.7	8.4

Trend

Compared to 1989, the 1990 volume of larceny-thefts increased 1 percent in the Nation and less than 1 percent in all cities collectively. The suburban and rural counties showed increases of 2 percent and 3 percent, respectively.

Regionally, volume upswings of 2 percent were recorded in both the Midwestern and the Southern States. The Northeastern States showed a 1-percent increase, while the Western States registered a 1-percent decline.

The 5- and 10-year national trends indicated larceny was up 9 percent over the 1986 total and rose 10 percent above the 1981 level.

Rate

The 1990 larceny-theft rate was 3,195 per 100,000 United States inhabitants. The 1990 rate was 1 percent higher than in 1989, 6 percent above the 1986 level, and 2 percent above the 1981 level. The 1990 rate was 3,533 per 100,000 inhabitants of metropolitan areas; 3,559 per 100,000 population in cities outside metropolitan areas; and 1,024 per 100,000 people in the rural counties.

Regionally, the rates of 3,471 in the South and 3,024 in the Midwest were up 2 and 3 percent, respectively, over 1989 levels. The Northeast's 1990 rate of 2,598 per

100,000 inhabitants was up less than 1 percent, while the rate per 100,000 inhabitants in the West, 3,515, was 3 percent lower than the year before.

Nature

During 1990, the average value of property stolen due to larceny-theft was \$480, up from \$462 in 1989. When the average value was applied to the estimated number of larceny-thefts, the loss to victims nationally was \$3.8 billion for the year. This estimated dollar loss is considered conservative since many offenses in the larceny category, particularly if the value of the stolen goods is small, never come to law enforcement attention. Losses in 24 percent of the thefts reported to law enforcement in 1990 ranged from \$50 to \$200, while in 36 percent, they were over \$200.

Losses of goods and property reported stolen as a result of pocket-picking averaged \$355; purse-snatching, \$278; and shoplifting, \$115. Thefts from buildings resulted in an average loss of \$791; from motor vehicles, \$541; and from coin-operated machines, \$147. The average value loss due to thefts of motor vehicle accessories was \$319 and for thefts of bicycles, \$215.

Thefts of motor vehicle parts, accessories, and contents made up the largest portion of reported larcenies—37 percent. Also contributing to the high volume of thefts were shoplifting, accounting for 16 percent; thefts from buildings, 14 percent; and bicycle thefts, 6 percent. The remainder were distributed among pocket-picking, purse-snatching, thefts from coin-operated machines, and all other types of larceny-thefts. The accompanying table presents the distribution of larceny-theft by type and geographic region.

Larceny Analysis by Region, 1990

[Percent distribution]

	United States Total	North-eastern States	Mid-western States	Southern States	Western States
Total ¹	100.0	100.0	100.0	100.0	100.0

Larceny-Theft by Month 1990

Variation from Monthly Average

Larceny-Theft

Percent Change from 1986

○ Number of Offenses Known - Up 9%

□ Rate per 100,000 Inhabitants - Up 6%

Clearances

Twenty percent of the reported larceny-thefts were cleared nationwide during 1990. The cities collectively recorded a 21-percent clearance rate, with the highest rate, 25 percent, reported by law enforcement agencies in cities from 10,000 to 24,999 in population. Both the suburban and rural counties recorded 18-percent clearance rates.

In 1990, law enforcement agencies in the Western States cleared 22 percent of the larceny offenses brought to their attention. The clearance rates in the Southern and Midwestern States were 20 percent, and in the Northeast, 19 percent.

Twenty-two percent of the larceny-theft clearances nationally involved only offenders under 18 years of age. Twenty-three percent of those in the cities and in suburban counties and 18 percent of those in rural counties were accounted for by persons in this age group.

Persons Arrested

Between 1989 and 1990, the total number of persons arrested for larceny-theft increased 3 percent. Male arrests

were up 1 percent and those of females, up 6 percent. During this same period, adult arrests were up 2 percent, and those of persons under 18 years of age increased 4 percent.

Considering a longer timeframe, larceny-theft arrests rose 12 percent for the 5-year period, 1986-1990. Those of adults were up 16 percent, and of juveniles up 4 percent. During this 5-year timespan, male and female arrests rose 10 and 16 percent, respectively.

Larceny-thefts not only comprised the largest portion of Crime Index offenses reported to law enforcement, this offense accounted for 53 percent of the arrests for Index crimes and 70 percent of those for property crimes in 1990. Forty-four percent of the larceny arrests were of persons under 21 years of age, and 30 percent of the arrestees were under 18. Females, who were arrested for this offense more often than for any other in 1990, comprised 32 percent of all larceny-theft arrestees.

Whites accounted for 67 percent of the total larceny-theft arrestees, blacks for 30 percent, and all other races for the remainder.

Percent Distribution by Type of Theft

1990

MOTOR VEHICLE THEFT

DEFINITION

Defined as the theft or attempted theft of a motor vehicle, this offense category includes the stealing of automobiles, trucks, buses, motorcycles, motorscooters, snowmobiles, etc. The definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access.

TREND

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
1989	1,564,800	630.4
1990	1,635,907	657.8
<i>Percent change</i>	+4.5	+4.3

Volume

An estimated total of 1,635,907 thefts of motor vehicles occurred in the United States during 1990. These offenses comprised 13 percent of all property crimes. The regional distribution of motor vehicle thefts showed 31 percent of the volume was in the Southern States, 25 percent each in the Western and Northeastern States, and 18 percent in the Midwestern States.

The 1990 monthly figures show that the greatest numbers of motor vehicle thefts were recorded during the months of July, August, and October, while the lowest count was in February.

Motor Vehicle Theft by Month, 1986-1990

[Percent of annual total]

Months	1986	1987	1988	1989	1990
January	7.9	7.9	8.0	8.3	8.5
February	7.1	7.5	7.6	7.3	7.6
March	8.1	8.4	7.9	8.1	8.4
April	7.8	7.9	7.4	7.5	7.9
May	8.0	8.0	7.8	8.0	8.1
June	8.2	8.1	8.0	8.2	8.1
July	8.9	8.8	8.8	8.8	8.8
August	9.5	9.0	9.4	9.0	8.8
September	8.7	8.4	8.7	8.5	8.4
October	9.0	8.8	9.0	9.0	8.8
November	8.5	8.5	8.7	8.7	8.3
December	8.3	8.7	8.7	8.5	8.4

Trend

The number of motor vehicle thefts increased 5 percent nationally from 1989 to 1990. This upward trend was evident in all city population groupings with those having populations of 500,000 to 999,999 showing the largest increase, 11 percent. The rural counties showed an increase of 3 percent, while the suburban counties recorded a decline of less than 1 percent.

Geographically, all four regions experienced motor vehicle theft increases. The increases were 6 percent in the Northeastern Region, 5 percent in the Midwestern Region, 4 percent in the Southern Region, and 2 percent in the Western Region.

The accompanying chart shows that the volume of motor vehicle thefts in 1990 increased 34 percent over the 1986 volume.

Rate

The 1990 national motor vehicle theft rate—658 per 100,000 people—was 4 percent higher than the rate in

1989. The rate was 30 percent higher than in 1986 and 39 percent above the 1981 rate.

For every 100,000 inhabitants living in MSAs, there were 801 motor vehicle thefts reported in 1990. The rate in cities outside metropolitan areas (other cities) was 232 and in rural counties, 121. As in previous years, the highest rates were in the Nation's most heavily populated municipalities, indicating that this offense is primarily a large-city problem. For every 100,000 inhabitants in cities with populations over 250,000, the 1990 motor vehicle theft rate was 1,693. The Nation's smallest cities, those with fewer than 10,000 inhabitants, recorded a rate of 257 per 100,000.

Among the regions, the motor vehicle theft rates ranged from 818 per 100,000 people in the Northeastern States to 501 in the Midwestern States. The Western States' rate was 778 and the Southern States' rate, 598. All regions registered rate increases from 1989 to 1990. In both the Northeastern and Midwestern States, the increase was 6 percent; in the Southern States, 4 percent; and in the Western States, less than 1 percent.

An estimated average of 1 of every 119 registered motor vehicles was stolen nationwide during 1990. Regionally, this rate was greatest in the Northeast where 1 of every 82 motor vehicles registered was stolen. The other three regions reported lesser rates—1 per 105 in the West, 1 per 135 in the South, and 1 per 163 in the Midwest.

Nature

During 1990, the estimated value of motor vehicles stolen nationwide was over \$8 billion. At the time of theft, the average value per vehicle stolen was \$5,032.

Eighty percent of all motor vehicles reported stolen during the year were automobiles, 15 percent were trucks or buses, and the remainder were other types.

Motor Vehicle Theft, 1990

[Percent distribution by region]

Region	Total ¹	Autos	Trucks and buses	Other vehicles
Total	100.0	79.7	14.5	5.8
Northeastern States	100.0	92.7	4.4	2.9
Midwestern States	100.0	84.3	9.9	5.8

Western States	100.0	69.9	22.7	7.4

¹Because of rounding, percentages may not add to totals.

Motor Vehicle Theft by Month 1990

Variation from Monthly Average

Clearances

Law enforcement agencies nationwide cleared 15 percent of the motor vehicle thefts reported in their locales during 1990. Those in cities cleared 14 percent; those in suburban counties cleared 17 percent; and rural county agencies cleared 33 percent.

Regional clearance percentages for motor vehicle theft were 10 percent in the Northeastern States, 14 percent in the Western States, 16 percent in the Midwestern States, and 18 percent in the Southern States.

Persons in the under-18 age group accounted for 24 percent of the motor vehicle thefts cleared both nationally and in cities. They comprised 22 percent of the clearances in the suburban counties and 21 percent in the rural counties.

Persons Arrested

During 1990, males accounted for 90 percent of the persons arrested for motor vehicle theft. Fifty-nine percent

of the arrestees were white, 38 percent were black, and the remainder were of other races.

A large proportion of motor vehicle theft arrestees was accounted for by the younger segment of the population. In 1990, 62 percent of all persons arrested for this offense were under 21 years of age, and those under 18 comprised 43 percent of the total. Between 1989 and 1990, arrests of persons under age 18 rose 4 percent. Within this age range, arrests of males increased 3 percent, while those of females were up 10 percent.

Total motor vehicle theft arrests were down 1 percent and adult arrests declined 5 percent in 1990 from the previous year. Overall arrests for this offense were 35 percent higher in 1990 than in 1986 and 62 percent above the 1981 level.

ARSON

DEFINITION

Arson is defined by the Uniform Crime Reporting Program as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded.

Volume

A total of 102,874 arson offenses was reported by 12,695 law enforcement agencies across the country; these agencies furnished from 1 to 12 months of reports during 1990. Of these reporting agencies, 12,505 provided the detailed information—type of structure, estimated monetary value of the property damaged, etc.—from which the tables on the accompanying pages were tabulated. Further information regarding arson offenses and trends is presented in Tables 6 through 13 and arson clearances in Tables 20 through 23. Since only 9,043 agencies covering 72 percent of the United States population submitted reports for all 12 months of the year, the data user should be aware that, while conservative indicators, the figures do not represent the Nation's total arson experience.

Trend

The number of arson offenses reported nationally increased 3 percent in 1990 as compared to the 1989 total. Counts for the Nation's cities and suburban counties rose 2 and 6 percent, respectively, while the rural counties registered virtually no change.

Geographically, arson increases were experienced in the Northeast, 8 percent; and in the South and Midwest, 3 percent. A 1-percent decrease was recorded in the West.

By property type nationally, the number of arsons of structures rose 2 percent; of mobile property increased 8 percent; while arsons of all other property decreased 2 percent.

Caution is recommended when viewing arson trend information. The percent change figures may have been influenced by improved arson reporting procedures during the collection's relatively limited timespan. It is expected that year-to-year statistical comparability will improve as collection continues.

Arson Rate, Population Group, 1990

[9,043 agencies; 1990 population 179,278,000; rate per 100,000 inhabitants]

Group	Rate
Total	49.2
Total cities	57.1
Group I (cities 250,000 and over)	94.8
(cities 1,000,000 and over)	105.6
(cities 500,000 to 999,999)	80.9
(cities 250,000 to 499,999)	88.0
Group II (cities 100,000 to 249,999)	66.4
Group III (cities 50,000 to 99,999)	47.4
Group IV (cities 25,000 to 49,999)	35.7
Group V (cities 10,000 to 24,999)	27.2
Group VI (cities under 10,000)	25.5
Suburban counties	36.4
Rural counties	21.8
Suburban area	32.6

Rate

Since population coverage for arson data is lower than for the other Crime Index offenses, arson rates per 100,000 inhabitants are tabulated independently. Based only on figures from law enforcement agencies supplying 12 months of statistics for all Index crimes, including arson, the 1990 rates are shown in the accompanying table.

The rates ranged from 106 per 100,000 inhabitants in cities with populations over 1 million to 22 per 100,000 rural county inhabitants. The suburban counties and all cities collectively recorded rates of 36 and 57 per 100,000 inhabitants, respectively. Overall, the 1990 national arson rate was 49 per 100,000 population.

Regionally, the highest arson rate was registered in the Western States with 56 offenses per 100,000 population. Following were the Northeastern States with a rate of 48 per 100,000, the Southern States with 47 per 100,000, and the Midwestern States with 46 per 100,000.

Nature

As in previous years, structures were the most frequent targets of arsonists in 1990 and comprised 54 percent of the reported incidents. Twenty-seven percent of the arsons were directed at mobile property (motor vehicles, trailers, etc.), while other types of property (crops, timber, etc.) accounted for 19 percent.

Arson, Type of Property, 1990

[12,505 agencies; 1990 population 199,592,000]

Property classification	Number of offenses	Percent distribution ¹
Total	84,912	100.0
Total structure	46,216	54.4
Single occupancy residential	20,626	24.3
Other residential	8,168	9.6
Storage	4,443	5.2
Industrial/manufacturing	735	.9
Other commercial	5,106	6.0
Community/public	4,199	4.9
Other structure	2,939	3.5
Total mobile	22,939	27.0
Motor vehicles	21,329	25.1
Other mobile	1,610	1.9
Other	15,757	18.6

¹Because of rounding, percentages may not add to totals.

Residential property was involved in 62 percent of the structural arsons during the year, with 45 percent of such offenses directed at single-occupancy dwellings. Twenty percent of all targeted structural property was either uninhabited or abandoned at the time the arson occurred.

Motor vehicles comprised 93 percent of all mobile property at which arsons were directed.

Arson, Structures Not in Use, 1990

[12,505 agencies; 1990 population 199,592,000]

Type of structure	Number of offenses	Percent not in use
Total	46,216	19.6
Single occupancy residential	20,626	23.8
Other residential	8,168	13.9
Storage	4,443	23.6
Industrial/manufacturing	735	20.0
Other commercial	5,106	13.1
Community/public	4,199	9.6
Other structure	2,939	25.3

The monetary value of property damaged due to reported arsons averaged \$13,708 per incident in 1990. The overall average for all types of structures was \$22,717. While industrial/manufacturing property was the structural classification with the lowest reported number of offenses, it showed the highest average loss—\$73,703. Mobile properties averaged \$4,208 per incident, and other targets averaged \$1,115.

Arson, Monetary Value of Property Damaged, 1990

[12,505 agencies; 1990 population 199,592,000]

Property classification	Number of offenses	Average damage
Total	84,912	\$13,708

Clearances

The national 1990 arson clearance rate was 15 percent. Agencies in cities with fewer than 25,000 inhabitants showed the highest rate, clearing 24 percent of the arson offenses brought to their attention. Rural county law enforcement agencies cleared 21 percent; those in suburban counties, 18 percent; and in cities, 14 percent.

Regionally, the Southern States recorded a clearance rate of 21 percent; the Western States, 15 percent; and both the Midwestern and Northeastern States, 11 percent.

Thirty-eight percent of all 1990 arson clearances involved only young people under age 18, a higher percentage of juvenile involvement than for any other Index crime. Persons in this age group accounted for 36 percent

of structural arson clearances, 22 percent of the clearances for arsons of mobile property, and 56 percent of those of all other property.

Arson, Offenses Cleared by Arrest,¹ 1990

[12,505 agencies²; 1990 population 199,592,000]

Property classification	Number of offenses	Percent cleared by arrest
Total	84,912	17.7
Total structure	46,216	21.7
Single occupancy residential	20,626	21.8
Other residential	8,168	22.7
Storage	4,443	16.5
Industrial/manufacturing	735	14.7
Other commercial	5,106	16.0

Motor vehicles	21,329	8.8
Other mobile	1,610	17.0
Other	15,757	18.0

¹Includes offenses cleared by exceptional means.

²To be included in this table, it was necessary that arson clearances be reported by property classification.

By population grouping, juveniles were the offenders in 40 percent of the city arson clearances, 35 percent of those in suburban counties, and 21 percent of those in the rural counties.

The accompanying tables show clearance data only for those 12,505 law enforcement agencies which were able to furnish breakdowns by type for the structural and mobile classifications. As can be seen, the highest clearance rate (36 percent) was recorded for offenses in which community or public structures were involved, while the lowest rate (9 percent) was registered for motor vehicles.

¹Includes offenses cleared by exceptional means.

²To be included in this table, it was necessary that arson clearances be reported by property classification.

Persons Arrested

The estimated number of arrests for arson during 1990 totaled 19,100. Forty-four percent of the arrestees were under 18 years of age and 64 percent were under 25. Males comprised 87 percent of all arson arrestees. Seventy-five percent of those arrested were white, 2.1 percent were black, and the remainder were of other races.

Trends for 1989 versus 1990 show arson arrests increased 7 percent nationwide and in the suburban counties.

Rural county agencies experienced a 22-percent increase and the Nation's cities, a 6-percent rise.

Nationwide, arrests of both adults and juveniles increased from 1989 to 1990, 9 and 5 percent, respectively. During the same period, male arrests for arson were up 7 percent and female arrests, up 6 percent.

The 1990 arson arrest total for all ages was 3 percent higher than the 1986 level but 9 percent below the 1981 experience.

CRIME INDEX TABULATIONS

This Section's tabular portions present data on crime in the United States as a whole; geographic divisions; individual states; Metropolitan Statistical Areas; cities, towns, and counties; and college and university campuses. Also furnished in the following tables are national averages for the value of property stolen in connection with Crime Index offenses; further breakdowns by type for the robbery, burglary, larceny-theft, and arson classifications; and data on the type and value of property stolen and recovered.

Although the total number of crimes occurring throughout the Nation is unknown, information on those reported to law enforcement gives a reliable indication of criminal activity. In reviewing the tables in this report, it must be remembered, however, that many factors can cause the volume and type of crime to vary from place to place. Even though population, one of these factors, is used in computing crime rates, all communities are affected to some degree by seasonal or transient populations. Since counts of current, permanent population are used in their construction, crime rates do not account for short-term

population variables, such as an influx of day workers, tourists, shoppers, etc. A further discussion of various factors contributing to the amount of crime in a given area is shown on page v of this publication.

National data can serve as a guide for the law enforcement administrator in analyzing the local crime count, as well as the performance of the jurisdiction's law enforcement agency. The analysis, however, should not end with a comparison based on data presented in this publication. It is only through an appraisal of local conditions that a clear picture of the community crime problem or the effectiveness of the law enforcement operation is possible.

Note

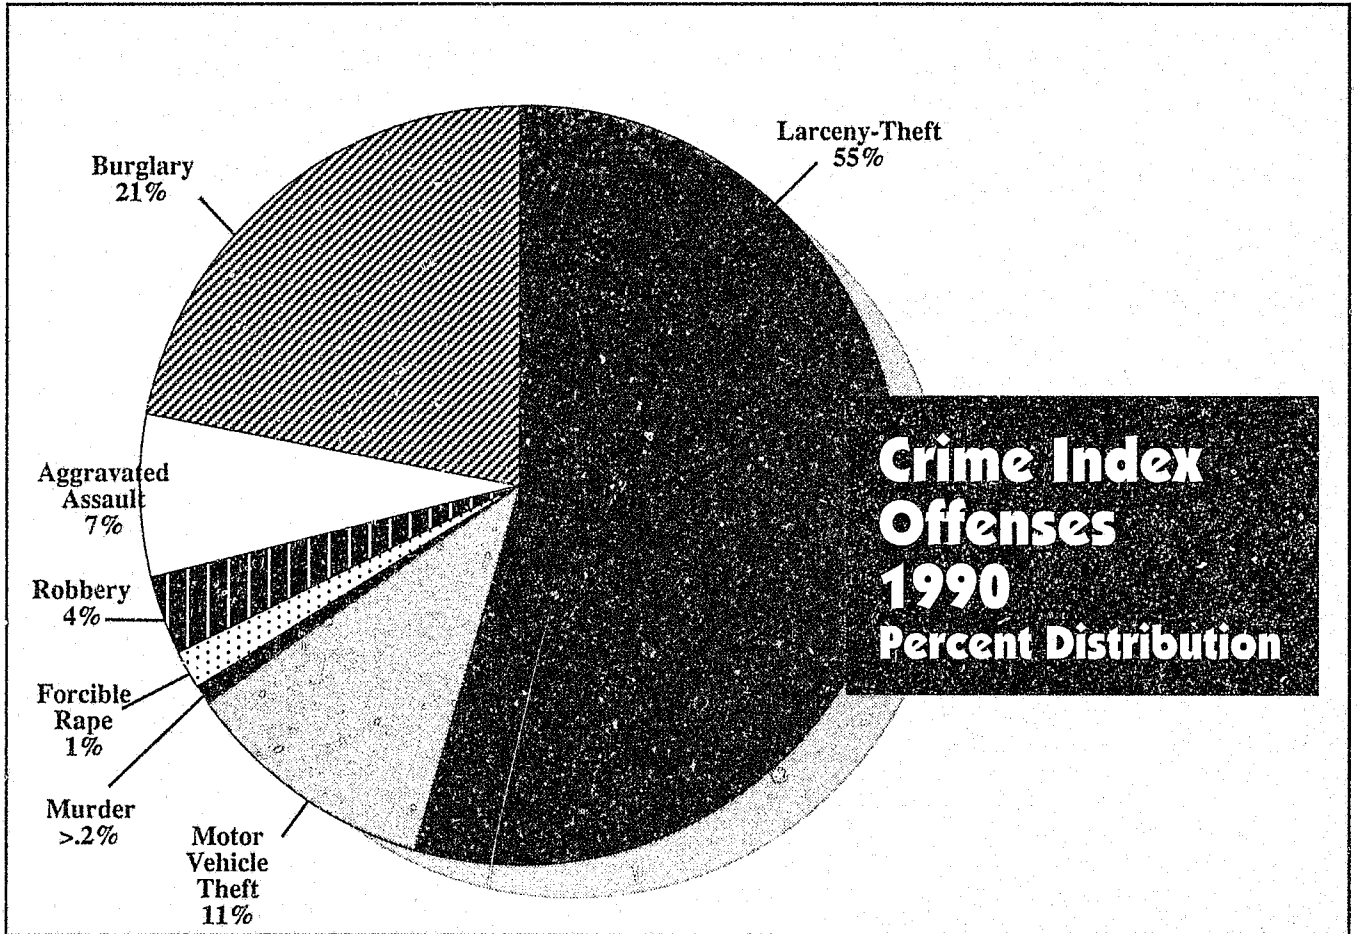

The collection of statistics on arson as a Crime Index offense began in 1979. However, 1990 annual figures are not available for inclusion in tables presenting statistics for the total United States. Arson totals reported by individual law enforcement agencies are displayed in Tables 6 through 9. Two-year arson trends are shown in Tables 10 through 13.

- Rate per 100,000 Inhabitants - Up 6%

Regional Violent and Property Crime Rates 1990

(per 100,000 inhabitants)

Crime Index Total

The Crime Index total rose 2 percent to 14.5 million offenses in 1990. Five- and 10-year percent changes showed the 1990 total was 10 percent above the 1986 level and 8 percent higher than in 1981.

From 1989 to 1990, overall violent crime showed an 11-percent increase. The number of property crimes increased less than 1 percent for the 2-year period.

The largest volume of Crime Index offenses occurred in the Southern States which accounted for 37 percent of the total. Following were the Western States with 23 percent, the Midwestern States with 21 percent, and the Northeastern States with 18 percent.

Crime rates relate the incidence of crime to population. In 1990, there were an estimated 5,820 Crime Index

offenses for each 100,000 in population nationwide. The violent crime rate was 732, and for property crime, it was 5,088 per 100,000.

Regionally, the Crime Index rates per 100,000 inhabitants ranged from 6,405 in the West to 5,102 in the Midwest. The South registered a rate of 6,334 per 100,000 inhabitants, and the Northeast, 5,193.

National estimates of volume and rate per 100,000 inhabitants for all Crime Index offenses covering the past decade are set forth in Table 1, "Index of Crime, United States, 1981-1990."

Table 2, "Index of Crime, United States, 1990," shows current year estimates for MSAs, rural counties, and cities and towns outside metropolitan areas (other cities). See Appendix III for the definitions of these community types.

¹Populations are Bureau of the Census provisional estimates as of July 1, except 1990 which are the decennial census counts and are subject to change.

²Because of rounding, the offenses may not add to totals.

³Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

⁴Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

All rates were calculated on the offenses before rounding.

Provided in Table 3, "Index of Crime, Regional Offense and Population Distribution, 1990," are data showing the geographical distribution of estimated Index crimes and population. When utilizing figures presented on a regional basis in this publication, the reader is cautioned to

consider each region's proportion of the total United States population. For example, although the Southern States accounted for the largest volume of Crime Index offenses in 1990, they also represented the greatest regional population.

¹Populations are Bureau of the Census provisional estimates as of July 1, 1989 and decennial census counts for 1990 and are subject to change.

²Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

³Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

⁴Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. The 1989 and 1990 forcible rape totals for Illinois were estimated using the national rate of forcible rapes when grouped by like agencies. See "Offense Estimation," page 3 for details.

⁵Population and offense data are not included in U.S. totals.

Offense totals are based on all reporting agencies and estimates for unreported areas.

¹Although arson data were included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

²Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

³Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

⁴Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. The 1990 forcible rape totals for Illinois were estimated using the national rate of forcible rapes when grouped by like agencies. Therefore, only the state total is shown. See "Offense Estimation," page 3 for details.

⁵A breakdown of the Bureau of the Census decennial census count for Puerto Rico was not available prior to printing this publication.

Table 6.—Number of Offenses Known to the Police, Cities and Towns 10,000 and over in Population, 1990

* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

City by State	Population	Crime Index total	Modified* Crime Index total	Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

Table 6.—Number of Offenses Known to the Police, Cities and Towns 10,000 and over in Population, 1990—Continued

City by State	Population	Crime Index total	Modified* Crime Index total	Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*
WYOMING—Continued											
Rock Springs	19,050	1,229	1,229	1	9	6	77	246	843	47
Sheridan	13,900	573	579	1	1	3	30	59	455	24	6

*Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape, Crime Index total, and Modified Crime Index total categories.

²Aggravated Assault figures are not comparable to prior years due to a change in reporting procedures.

³1990 figures are not comparable to prior years due to a change in reporting procedures.

Table 7.—Number of Offenses Known to the Police, Universities and Colleges, 1990

* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data.

University/College	Student enrollment ¹	Violent crime total	Violent Crime				Property crime total	Property Crime			
			Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault		Burglary	Larceny-theft	Motor vehicle theft	Arson*

¹The student enrollment figures provided by the United States Department of Education are for 1988, the most recent year available. The enrollment figure includes full-time and part-time students. See Appendix I for details.

²Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

³Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

⁴Student enrollment figures were not available.

⁵Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape and violent crime total categories.

NOTE: Caution should be exercised in making any inter-campus comparisons or ranking schools, as university/college crime statistics are affected by a variety of factors. These include: demographic characteristics of the surrounding community, ratio of male to female students, number of on-campus residents, accessibility of outside visitors, size of enrollment, etc.

Table 8.—Number of Offenses Known to the Police, Suburban Counties, 1990

[The data shown in this table do not reflect county totals but are the number of offenses reported by the sheriff's office, county police department, or state police.]
 * Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

County by State	Crime Index total	Modified* Crime Index total	Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

*Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape, Crime Index total, and Modified Crime Index total categories.

*Aggravated assault figures are not comparable to prior years due to a change in reporting procedures.

Table 9.—Number of Offenses Known to the Police, Rural Counties 25,000 and over in Population, 1990

[The data shown in this table do not reflect county totals but are the number of offenses reported by the sheriff's office, county police department, or state police.]
 * Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

County by State	Crime Index total	Modified* Crime Index total	Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

¹Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape, Crime Index total, and Modified Crime Index total categories.

²Larceny-theft figures are not comparable to prior years.

¹The number of agency reports used in arson trends is less than used in compiling trends for other Crime Index offenses. It is not necessary to report arsons by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

²Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

³Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

⁴Includes state police agencies with no county breakdown.

⁵Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups. Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

¹Suburban places are within Metropolitan Statistical Areas (MSAs) and include suburban city and county law enforcement agencies within the metropolitan area. Central cities are excluded. Nonsuburban places are outside MSAs.

²The number of agencies used in arson trends is less than used in compiling trends for other Crime Index offenses. It is not necessary to report arsons by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

³Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

⁴Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

¹The number of agency reports used in arson trends is less than used in compiling trends for the other Crime Index offenses. It is not necessary to report arsons by property classification to be included in this table.

²Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape categories.

Table 14.—Crime Rates, Offenses Known to the Police, Population Group, 1990

[1990 population. Rate: Number of crimes per 100,000 inhabitants]

Population group	Crime Index total	Modified Crime Index total ¹	Violent crime ²	Property crime ³	Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson ⁴

¹Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for the other seven Crime Index offenses. Independently tabulated arson rates appear on page 43 of this publication.

²Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

³Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

⁴Includes state police agencies with no county breakdown.

⁵Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Population figures were rounded to the nearest thousand. All rates were calculated on the population before rounding.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. See Appendix I for details.

¹Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for the other seven Crime Index offenses. Independently tabulated arson rates appear on page 43 of this publication.

²Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Population figures were rounded to the nearest thousand. All rates were calculated on the population before rounding.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. See Appendix I for details.

SECTION III

CRIME INDEX OFFENSES CLEARED

For UCR purposes, law enforcement agencies clear or solve an offense when at least one person is arrested, charged with the commission of the offense, and turned over to the court for prosecution. Several crimes may be cleared by the arrest of one person, while the arrest of many persons may clear only one offense. Law enforcement agencies may clear a crime by exceptional means when some element beyond law enforcement control precludes the placing of formal charges against the offender. Examples of circumstances allowing such clearances are the death of the offender (suicide, justifiably killed by police or private citizen, etc.); the victim's refusal to cooperate with prosecution after the offender has been identified; or the denial of extradition because the offender committed another crime and is being prosecuted in a different jurisdiction. In all exceptional clearance cases, law enforcement must have identified the offender, have enough evidence to support arrest, and know the offender's location.

Law enforcement agencies cleared 22 percent of the Crime Index offenses brought to their attention during 1990. Collectively, a 46-percent clearance rate for violent crimes was recorded. Among the violent offenses, the rates were 67 percent for murder, 53 percent for forcible rape, 25 percent for robbery, and 57 percent for aggravated assault. Clearances for crimes against persons (murder, forcible rape, and aggravated assault) are generally higher as more intense investigative efforts are often given these offenses and witnesses are frequently available to identify the perpetrators.

The overall property crime clearance rate was 18 percent. Fourteen percent of the burglaries, 20 percent of the larceny-thefts, and 15 percent of both motor vehicle thefts and arsons were cleared during the year. When considering the Modified Crime Index total which includes arson, the overall clearance rate remained the same, 22 percent.

The highest total Crime Index clearance rate geographically was registered in the West, with 23 percent. Following were the South with 22 percent, the Midwest with 21 percent, and the Northeast with 20 percent. For violent crime overall, the highest clearance rates were recorded in the South and the West, each with 49 percent. In the Midwest, the rate was 41 percent and in the Northeast, 40

percent. Property crime clearance rates were 19 percent in the West, 18 percent in both the South and Midwest, and 16 percent in the Northeast.

By community type, rural county and city law enforcement agencies showed clearances for 22 percent of the Crime Index offenses brought to their attention. Those in suburban counties cleared 21 percent. Of the population groups, cities with 10,000 to 24,999 inhabitants registered the highest total Crime Index and property crime clearance rates, 25 and 23 percent, respectively. The highest violent crime clearance rates were recorded in the rural counties and in cities with under 10,000 inhabitants, both with 61 percent.

Clearances Involving Only Persons under 18 Years of Age

Involvement of juveniles in crime can be measured by the number of crimes in which they have been identified as the offenders. Even though no physical arrest has been made, a clearance by arrest is recorded when an offender under 18 years of age is cited to appear in juvenile court or before other juvenile authorities. Since the juvenile clearance percentages shown in this publication indicate only those offenses where no adults were involved, they should be considered a slight underestimation of juvenile involvement in crime. Juveniles (persons under 18 years of age) accounted for 26 percent of the United States population, according to July 1, 1989, Bureau of the Census estimated population figures.

Nineteen percent of the Crime Index offenses cleared by law enforcement during 1990 involved only young people under age 18. Persons in this age group accounted for 11 percent of the violent crime clearances and 22 percent of those for property crimes. Murder showed the lowest percentage of juvenile involvement (8 percent), while the highest percentage was shown for arson (38 percent).

Geographically, the Midwestern States recorded the largest percentage of Crime Index offense involvement by the under-18 age group—21 percent. Juveniles alone were the offenders in 20 percent of the clearances in the Western States and 18 percent of those in both the Southern and Northeastern States.

¹Includes offenses cleared by exceptional means.

²The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. It is not necessary to report clearances by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

³Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

⁴Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

⁵Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

⁶Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

¹Includes offenses cleared by exceptional means.

²The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. It is not necessary to report clearances by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

³Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

⁴Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

⁵Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

¹Includes offenses cleared by exceptional means.

²The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. It is not necessary to report clearances by detailed property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

³Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

⁴Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

⁵Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities are also included in other city groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

SECTION IV

PERSONS ARRESTED

Primarily a gauge of law enforcement's response to crime, arrest counts also provide definitive data concerning the age, sex, and race of perpetrators. Arrest practices, policies, and enforcement emphases vary from place to place and even within a community from time to time as, for example, during a local police campaign against residential burglary. While the practices for certain unlawful conduct such as drunkenness, disorderly conduct, vagrancy, and related violations may differ among agencies, those for robbery, burglary, and other serious crime arrests are more likely to be uniform and consistent throughout all jurisdictions. The Program's procedures require that an arrest be counted on each separate occasion a person is taken into custody, notified, or cited. Annual arrest figures do not measure the number of individuals arrested since one person may be arrested several times during the year for the same or different offenses.

Nationwide, law enforcement agencies made an estimated 14 million arrests in 1990 for all criminal infractions except traffic violations. The highest arrest counts among the specific crime categories were for driving under the influence, 1.8 million; larceny-theft, 1.6 million; drug abuse violations, 1.1 million; and simple assault, 1 million.

When the arrest volume was related to the total United States population, the rate was 5,805 arrests per 100,000 inhabitants. Among the city population groupings, those with more than 250,000 inhabitants recorded the highest rate, 7,989, while those with populations from 10,000 to 24,999 recorded the lowest rate, 5,580. For suburban county agencies overall, the arrest rate was 4,419, and for rural county law enforcement, it was 3,636 per 100,000 inhabitants.

Regionally, the arrest rates per 100,000 population ranged from 5,133 in the Midwest to 6,404 in the West. The Northeast recorded an arrest rate of 5,454 and the South, 6,024.

Due to reporting problems at the state levels, arrest data for none of the law enforcement agencies in Georgia were available. Similarly, arrest data for New Hampshire agencies were not received in time to meet publication deadlines. Therefore, tables showing the age, sex, or race of persons arrested contain no Georgia and New Hampshire data. Georgia and New Hampshire arrest totals were estimated for inclusion in Table 24, "Total Estimated Arrests, United States, 1990."

Arrest Trends

The national total number of arrests for all offenses except traffic violations increased 4 percent in 1990 as compared to the 1989 volume. During the same time period, adult arrests were also up 4 percent, while those of

persons under 18 years of age showed a 5-percent rise. When considering only the eight Crime Index offenses, increases were recorded for arrests of persons of all ages, 4 percent; of adults, 3 percent; and of juveniles, 5 percent. Overall violent crime arrests were up 12 percent and property crime arrests, 1 percent.

Two-year trends in total arrests for city agencies showed a 4-percent rise, 1990 over 1989. Suburban county arrests were up 4 percent and rural county arrests, 6 percent.

Over the 5-year period beginning in 1986, total arrests for all offenses were up 19 percent, with adult arrests up 21 percent and those of persons under 18 years of age up 8 percent. Total Crime Index arrests increased 15 percent; those of adults rose 18 percent and of juveniles under 18 years of age, 8 percent. During the same years, 1986-1990, total violent crime arrests increased 34 percent, and property crime arrests were up 10 percent.

For the decade, 1981-1990, arrests for all offenses were up 31 percent; Crime Index arrests, 20 percent; violent crime arrests, 45 percent; and property crime arrests, 13 percent.

The 1990 drug abuse violation arrest total was down 14 percent from the 1989 level, 35 percent higher than in 1986, and 70 percent higher than in 1981. The types of drugs involved in violations resulting in arrests during 1990 are shown by geographic region in the accompanying table.

Arrests for Drug Abuse Violations, 1990

¹ Because of rounding, percentages may not add to totals.

Age

Five percent of all persons arrested nationally in 1990 were under the age of 15; 16 percent were under 18; 30 percent were under 21; and 46 percent were under 25. Persons in the under-25 age group accounted for 47 percent of arrests in the cities, 41 percent of those in the suburban counties, and 40 percent of those in the rural counties.

Age distribution figures for persons arrested for Crime Index offenses showed 28 percent were under the age of 18; 43 percent, under 21; and 57 percent, under 25. The under-25 age group was also responsible for 47 percent of the violent crime arrests and 60 percent of property crime arrests in 1990.

Larceny-theft was the offense resulting in the most arrests of persons under age 18, while adults were most often arrested for driving under the influence.

Sex

Eighty-two percent of the persons arrested in the Nation during 1990 were males. They accounted for 78 percent of Index crime arrests, 89 percent of those for violent crimes, and 75 percent of the property crime arrests. Men were most often arrested for driving under the influence, which accounted for 13 percent of all male arrests.

As in past years, larceny-theft was the crime for which females were most often arrested. This single offense

accounted for 78 percent of arrests of women for Index crimes and 19 percent of all female arrests. Fifty-two percent of all female larceny-theft arrestees were under 25 years of age.

Two-year trends showed a 4-percent increase in the number of male arrests from 1989 to 1990 and a 6-percent rise in female arrests for the same period. Arrests of males were up 18 percent and those of females up 24 percent for the 5-year period from 1986 to 1990.

Race

Race distribution figures for the total number of arrests in the United States during 1990 showed 69 percent of the arrestees were white, 29 percent were black, and the remainder were of other races. Whites accounted for 64 percent of the Index crime arrests, 54 percent of the arrests for violent crimes, and 67 percent of those for property crimes.

Curfew and loitering law violations										
Runaways										

¹Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

²Because of rounding, the percentages may not add to total.

³Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

⁴Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

⁵Includes arson.

¹Does not include traffic arrests.

²Includes arson.

³Violent crime includes offenses of murder, forcible rape, robbery, and aggravated assault.

⁴Property crime includes offenses of burglary, larceny-theft, motor vehicle theft, and arson.

⁵Arrest data for 1990 were not available for the States of Georgia and New Hampshire. See page 177 for details.

NOTE: Direct comparisons of arrest totals listed in this table should not be made with prior years' issues.

¹ Includes all offenses except traffic and neglect cases.

² Because of rounding, the percentages may not add to total.

³ Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are included in other groups.

Law Enforcement Code of Ethics

As a Law Enforcement Officer, my fundamental duty is to serve mankind; to safeguard lives and property; to protect the innocent against deception, the weak against oppression or intimidation, and the peaceful against violence or disorder; and to respect the Constitutional rights of all men to liberty, equality and justice.

I will keep my private life unsullied as an example to all; maintain courageous calm in the face of danger, scorn, or ridicule; develop self-restraint; and be constantly mindful of the welfare of others. Honest in thought and deed in both my personal and official life, I will be exemplary in obeying the laws of the land and the regulations of my department. Whatever I see or hear of a confidential nature or that is confided to me in my official capacity will be kept ever secret unless revelation is necessary in the performance of my duty.

I will never act officiously or permit personal feelings, prejudices, animosities or friendships to influence my decisions. With no compromise for crime and with relentless prosecution of criminals, I will enforce the law courteously and appropriately without fear or favor, malice or ill will, never employing unnecessary force or violence and never accepting gratuities.

I recognize the badge of my office as a symbol of public faith, and I accept it as a public trust to be held so long as I am true to the ethics of the police service. I will constantly strive to achieve these objectives and ideals, dedicating myself before God to my chosen profession . . . law enforcement.

SECTION V

LAW ENFORCEMENT PERSONNEL

The Nation's law enforcement community employed an average of 2.2 full-time officers for every 1,000 inhabitants as of October 31, 1990. Considering full-time civilians, the overall law enforcement employee rate was 3.1 per 1,000 inhabitants according to 12,401 city, county, and state police agencies reporting in 1990. These agencies collectively offered law enforcement service to a population of over 233 million, employing 523,262 officers and 190,998 civilians.

Varying demographic and other jurisdictional characteristics greatly affect the requirements for law enforcement service from one locale to another. The needs of a community having a highly mobile or seasonal population, for example, may be very different from those of a city whose population is relatively stable. Similarly, a small community situated between two large cities may require a greater number of law enforcement personnel than a community of the same size which has no urban centers nearby.

The functions of law enforcement are also significantly diverse throughout the Nation. In certain areas, sheriffs' responsibilities are limited almost exclusively to civil functions and/or the administration of the county jail facilities. Likewise, the responsibilities of state police and highway patrol agencies vary from one jurisdiction to another.

In view of these differing service requirements and responsibilities, care should be used when attempting any comparison of law enforcement employee rates. The rates presented in the following tables represent national averages; they should be viewed as guides or indicators, not as recommended or desirable police strengths. Adequate personnel for a specific locale can be determined only after careful study and analysis of the various conditions affecting service requirements in that jurisdiction.

The law enforcement employee average for all cities nationwide in 1990 was 2.8 per 1,000 inhabitants. By population grouping, city law enforcement employee averages were lowest in those with populations from 25,000 to 49,999, 2.2 per 1,000 inhabitants. The Nation's smallest cities, those with fewer than 10,000 inhabitants, employed 3.2 employees per 1,000 population, while for the largest cities (over 250,000 population) the rate was 3.7 per 1,000.

Rural and suburban counties averaged full-time law enforcement employee rates of 3.8 and 3.4 per 1,000 population, respectively.

Regionally, the highest law enforcement employee rate was in the South with 3.1. The Northeast averaged 3.0; the Midwest, 2.6; and the West, 2.5.

Sworn Personnel

Rates based solely on sworn law enforcement personnel (excluding civilians) showed the national average for all cities was 2.2 officers per 1,000 inhabitants. By population grouping, the rates ranged from 1.7 for cities with populations of 25,000 to 99,999 to 2.8 in cities with 250,000 or more inhabitants. Suburban county law enforcement agencies averaged 2.2 officers per 1,000 population, while agencies in rural counties averaged 2.6.

Geographically, the highest rate of officers to population was recorded in the Northeastern and Southern States where there were 2.4 officers per 1,000 inhabitants. Following were the Midwestern States with 2.1 and the Western States with 1.8.

Males comprised 91 percent of all sworn employees nationally. Ninety-four percent of the officers in rural counties, 92 percent of those in cities, and 89 percent of those in suburban counties were males.

Civilian Employees

Civilians made up 27 percent of the total United States law enforcement employee force in 1990. They represented 22 percent of the police employees in cities, 33 percent of those in rural counties, and 34 percent of the suburban county law enforcement strength.

Law Enforcement Officers Killed and Assaulted

Sixty-five law enforcement officers were feloniously slain in the line of duty during 1990. The 1990 total was the lowest since the FBI started collecting such data in the 1960s. Accidents occurring while performing official duties claimed the lives of an additional 67 officers in 1990.

Extensive data on line-of-duty deaths and assaults on city, county, state, and Federal officers can be found in the Uniform Crime Reporting publication, *Law Enforcement Officers Killed and Assaulted*.

SECTION VI

APPENDIX I

TABLE METHODOLOGY

Designed to assist the reader, this appendix explains the construction of many tabular presentations in the book. The following key refers to the columnar headings used throughout the appendix.

- Key: A) Column 1 shows the table numbers. Included are Tables 1 through 64, *Crime in the United States - 1990*.
- B) Column 2 indicates the level of submission necessary for an agency's statistics to be included in a table.

- C) Column 3 explains how each table was constructed. Data adjustments, if any, are discussed along with various definitions of data aggregation.
- D) Column 4 contains general comments regarding the potential use and misuse of the statistics presented.

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
1	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1990 statistics are consistent with Table 2. Pre-1990 crime statistics may have been updated, and hence, may not be consistent with prior publications. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for each year. Population statistics represent July 1 provisional estimations for each year except 1990, which are Bureau of the Census decennial census data and are subject to possible adjustment (see App. III). Crime volume statistics are rounded to the nearest 10 for violent crime and the nearest 100 for property crime. Percent changes and rates are computed prior to rounding.	Represents an estimation of national reported crime activity from 1981 to 1990.
2	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1990).	Statistics are aggregated from individual state statistics as shown in Table 5. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent 1990, Bureau of the Census decennial census data. See Appendix III for UCR population breakdowns.	Represents an estimation of national reported crime activity in 1990.
3	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1990).	Regional offense distributions are computed from volume figures as shown in Table 4. Population distributions are based on 1990 Bureau of the Census decennial census data (see App. III).	Represents the 1990 geographical distribution of estimated Crime Index offenses and population.
4	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1990 statistics are aggregated from individual state statistics as shown in Table 5. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for 1989 and 1990. Population statistics represent July 1 provisional estimates for 1989 and decennial census data for 1990 (see App. III).	Represents an estimation of reported crime activity for Index offenses at the: 1. national level 2. regional level 3. division level 4. state level Any comparison of UCR statistics should take into consideration demographic differences.
5	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1990).	Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent 1990, Bureau of the Census decennial census counts (see App. III). Statistics under the heading "Area Actually Reporting" represent reported offense totals for agencies submitting 12 months of offense reports and estimated totals for agencies submitting less than 12 but more than 2 months of offense reports. The statistics under the heading "Estimated Totals" represent the above plus estimated offense totals for agencies having less than 3 months of offense reports.	Represents an estimation of reported crime activity for Index offenses at the state level. Any comparison of UCR statistics should take into consideration demographic differences.
6	All law enforcement agencies submitting complete reports for 12 months in 1990.	"Cities and Towns" are defined to be agencies in Population Groups I through V (App. III). The agency populations are 1990 Bureau of the Census decennial census counts (see App. III).	Represents reported crime activity of individual agencies in cities and towns 10,000 and over in population. Any comparison of UCR statistics should take into consideration demographic differences.
7	All university/college law enforcement agencies submitting complete reports for 12 months in 1990.	The 1988 student enrollment figures, which are provided by the U. S. Department of Education, are the most recent available. They include full- and part-time students. No adjustments to equate part-time enrollments into full-time equivalents have been made.	Represents reported crime from those individual university/college law enforcement agencies contributing to the UCR Program. These agencies are listed alphabetically by state. Any comparison of these UCR statistics should take into consideration size of enrollment, number of on-campus residents, plus other demographic differences.
8	All law enforcement agencies submitting complete reports for 12 months in 1990.	"Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III). Population estimates of suburban counties are 1990 Bureau of the Census decennial census counts (see App. III).	Represents crime reported to individual law enforcement agencies in suburban counties, i.e., the individual sheriff's office, county police department, highway patrol, and/or state police. These figures do not represent the county totals since they exclude city crime counts. Any comparison of UCR statistics should take into consideration demographic differences.

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
9	All law enforcement agencies submitting complete reports for 12 months in 1990.	"Rural Counties" are those outside MSAs and whose jurisdictions are not covered by city police agencies (App. III). Population classifications of rural counties are based on 1990 Bureau of the Census decennial census counts for individual agencies (See App. III).	Represents crime reported to individual rural county law enforcement agencies covering populations 25,000 and over, i.e., the individual sheriff's office, county police department, highway patrol, and/or state police. These figures do not represent the county totals since they exclude city crime counts. Any comparison of UCR statistics should take into consideration demographic differences.
10-13	All law enforcement agencies submitting complete reports for at least 6 common months in 1989 and 1990.	The 1990 crime trend statistics are 2-year comparisons based on 1990 reported crime activity. Only common reported months for individual agencies are included in 1990 trend calculations. Populations represent 1990 Bureau of the Census decennial census counts for individual agencies. See Appendix III for UCR population breakdowns. Note that "Suburban and Nonsuburban Cities" are all municipal agencies other than central cities in MSAs.	Slight decrease in national coverage for Table 13 due to editing procedure and lower submission rate.
14-17	All law enforcement agencies submitting complete reports for 12 months in 1990.	The 1990 crime rates are the ratios of the aggregated 1990 crime volumes and the aggregated 1990 populations of the contributing agencies. Population statistics represent 1990 Bureau of the Census decennial census counts for individual agencies. See Appendix III for UCR population breakdowns. Note that "Suburban and Nonsuburban Cities" are all municipal agencies other than central cities in MSAs.	The forcible rape figures furnished by the Illinois state-level UCR Program were not in accordance with national guidelines. For inclusion in these tables, the forcible rape figures were estimated by using the national rates for each population group applied to the population by group for Illinois agencies supplying all 12 months of data. Slight decrease in national coverage for Table 17 due to editing procedure and lower submission rate.
18, 19	All law enforcement agencies submitting complete reports for at least 6 months in 1990.	Offense total and value lost total are computed for all Index offense categories other than aggravated assault. Percent distribution is derived based on offense total of each Index offense. Trend statistics are derived based on agencies with at least 6 common months complete for 1989 and 1990.	Aggravated assault is excluded from Table 18. For UCR Program purposes, the taking of money or property in connection with an assault is reported as a robbery.
20-23	All law enforcement agencies submitting complete reports for at least 6 months in 1990.	The 1990 clearance rates are based on offense and clearance volume totals of the contributing agencies for 1990. Population statistics represent 1990 Bureau of the Census decennial census counts for individual agencies. See Appendix III for UCR population breakdowns.	
24	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1990).	The arrest totals presented are national estimates based on the arrest statistics of all law enforcement agencies in the UCR Program (including those submitting less than 12 months). The "Total Estimated Arrests" statistic is the sum of estimated arrest volumes for each of the 29 offenses. Each individual arrest total is the sum of the estimated volumes within each of the eight population groups (App. III). Each group's estimate is the reported volume (as shown in Table 26) divided by the percent of total group population reporting (according to 1990 Bureau of the Census decennial census counts; see App. III).	
25, 26	All law enforcement agencies submitting complete reports for 12 months in 1990.	The 1990 arrest rates are the ratios, per 100,000 inhabitants, of the aggregated 1990 reported arrest statistics and population. The population statistics represent 1990 Bureau of the Census decennial census counts for individual agencies. See Appendix III for UCR population classifications/geographical configuration.	
27, 28	All law enforcement agencies submitting complete reports for 12 months in 1981 and 1990.	The arrest trends are the percentage differences between 1981 and 1990 arrest volumes aggregated from all common agencies. Population statistics represent 1990 Bureau of the Census decennial census counts (see App. III).	
29, 30	All law enforcement agencies submitting complete reports for 12 months in 1986 and 1990.	The arrest trends are the percentage differences between 1986 and 1990 arrest volumes aggregated from common agencies. Population statistics represent 1990 Bureau of the Census decennial census counts (see App. III).	

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
31, 32	All law enforcement agencies submitting complete reports for 12 months in 1989 and 1990.	The arrest trends are 2-year comparisons between 1989 and 1990 arrest volumes aggregated from common agencies. Population statistics represent 1990 Bureau of the Census decennial census counts (see App. III).	
33-38	All law enforcement agencies submitting complete reports for 12 months in 1990.		Slight decrease in coverage for Table 38 due to editing procedure and lower submission of race data.
39, 40	All city law enforcement agencies submitting complete reports for 12 months in 1989 and 1990.	The 1990 city arrest trends represent the percentage differences between 1989 and 1990 arrest volumes aggregated from common city agencies. "City Agencies" are defined to be all agencies within Population Groups I-VI (App. III).	
41-44	All city law enforcement agencies submitting complete reports for 12 months in 1989 and 1990.	"City Agencies" are defined as agencies within Population Groups I-VI (App. III).	Slight decrease in coverage for Table 44 due to editing procedure and lower submission of race data.
45, 46	All suburban county law enforcement agencies submitting complete reports for 12 months in 1989 and 1990.	The 1990 suburban county arrest trends represent percentage differences between 1989 and 1990 volumes aggregated from contributing agencies. "Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III).	
47-50	All suburban county law enforcement agencies submitting complete reports for 12 months in 1990.	"Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III).	Slight decrease in coverage for Table 50 due to editing procedure and lower submission of race data.
51, 52	All rural county law enforcement agencies submitting complete reports for 12 months in 1989 and 1990.	The 1990 rural county arrest trends represent percentage differences between 1989 and 1990 volumes aggregated from contributing agencies. "Rural Counties" are defined as noncity agencies outside MSAs (App. III).	
53-56	All rural county law enforcement agencies submitting complete reports for 12 months in 1990.	"Rural Counties" are defined as noncity agencies outside MSAs (App. III).	Slight decrease in coverage for Table 56 due to editing procedure and lower submission of race data.
57, 58	All suburban area law enforcement agencies submitting complete reports for 12 months in 1989 and 1990.	The 1990 suburban area arrest trends represent percentage differences between 1989 and 1990 arrest volumes aggregated from contributing agencies. "Suburban Area" is defined as cities with fewer than 50,000 inhabitants and all counties within MSAs (App. III).	
59-62	All suburban area law enforcement agencies submitting complete reports for 12 months in 1990.	"Suburban Area" is defined as cities with fewer than 50,000 inhabitants and all counties within MSAs (App. III).	Slight decrease in coverage for Table 62 due to editing procedure and lower submission of race data.
63	All law enforcement agencies submitting complete reports for 12 months in 1990.	Arrest totals are aggregated for individual agencies within each state. Population figures represent 1990 Bureau of the Census decennial census counts (see App. III).	Any comparison of statistics should take into consideration variances in arrest practices, particularly for Part II crimes.
64	All law enforcement agencies submitting complete reports for 12 months in 1990.	Population statistics represent 1990 Bureau of the Census decennial census counts for individual agencies. See Appendix III for definitions of the population classifications presented.	Data furnished are based upon individual state age definitions for juveniles.

APPENDIX II

OFFENSES IN UNIFORM CRIME REPORTING

Offenses in Uniform Crime Reporting are divided into two groups, Part I and Part II. Information on the volume of Part I offenses known to law enforcement, those cleared by arrest or exceptional means, and the number of persons arrested is reported monthly. Only arrest data are reported for Part II offenses.

The Part I offenses are:

Criminal homicide.—a. Murder and nonnegligent manslaughter: the willful (nonnegligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, accidental deaths, and justifiable homicides are excluded. Justifiable homicides are limited to: (1) the killing of a felon by a law enforcement officer in the line of duty; and (2) the killing of a felon by a private citizen. b. Manslaughter by negligence: the killing of another person through gross negligence. Traffic fatalities are excluded. While manslaughter by negligence is a Part I crime, it is not included in the Crime Index.

Forcible rape.—The carnal knowledge of a female forcibly and against her will. Included are rapes by force and attempts or assaults to rape. Statutory offenses (no force used—victim under age of consent) are excluded.

Robbery.—The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Aggravated assault.—An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

Burglary—breaking or entering.—The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

Larceny—theft (except motor vehicle theft).—The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles or automobile accessories, shoplifting, pocket-picking, or the stealing of any property or article which is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, "con" games, forgery, worthless checks, etc., are excluded.

Motor vehicle theft.—The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on the surface and not on rails. Specifically excluded

from this category are motorboats, construction equipment, airplanes, and farming equipment.

Arson.—Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

The Part II offenses are:

Other assaults (simple).—Assaults and attempted assaults where no weapon is used and which do not result in serious or aggravated injury to the victim.

Forgery and counterfeiting.—Making, altering, uttering, or possessing, with intent to defraud, anything false in the semblance of that which is true. Attempts are included.

Fraud.—Fraudulent conversion and obtaining money or property by false pretenses. Included are confidence games and bad checks, except forgeries and counterfeiting.

Embezzlement.—Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

Stolen property; buying, receiving, possessing.—Buying, receiving, and possessing stolen property, including attempts.

Vandalism.—Willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or persons having custody or control.

Weapons; carrying, possessing, etc.—All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Included are attempts.

Prostitution and commercialized vice.—Sex offenses of a commercialized nature, such as prostitution, keeping a bawdy house, procuring, or transporting women for immoral purposes. Attempts are included.

Sex offenses (except forcible rape, prostitution, and commercialized vice).—Statutory rape and offenses against chastity, common decency, morals, and the like. Attempts are included.

Drug abuse violations.—State and local offenses relating to the unlawful possession, sale, use, growing, and manufacturing of narcotic drugs.

Gambling.—Promoting, permitting, or engaging in illegal gambling.

Offenses against the family and children.—Nonsupport, neglect, desertion, or abuse of family and children.

Driving under the influence.—Driving or operating any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

Liquor laws.—State or local liquor law violations, except “drunkenness” and “driving under the influence.” Federal violations are excluded.

Drunkenness.—Offenses relating to drunkenness or intoxication. Excluded is “driving under the influence.”

Disorderly conduct.—Breach of the peace.

Vagrancy.—Vagabondage, begging, loitering, etc.

All other offenses.—All violations of state or local laws, except those listed above and traffic offenses.

Suspicion.—No specific offense; suspect released without formal charges being placed.

Curfew and loitering laws (persons under age 18).—Offenses relating to violations of local curfew or loitering ordinances where such laws exist.

Runaways (persons under age 18).—Limited to juveniles taken into protective custody under provisions of local statutes.

APPENDIX III

UNIFORM CRIME REPORTING AREA DEFINITIONS

Community Types

Uniform Crime Reporting data are often presented using three community-type aggregations. These are Metropolitan Statistical Areas (MSAs), other cities, and rural counties.

The MSA concept was developed to facilitate the analysis and dissemination of uniform statistical information on metropolitan areas. The primary objective in establishing standard definitions of these areas was to make it possible for Federal agencies to utilize the same boundaries when publishing statistical data. Each MSA is an integrated economic and social unit with a recognized large population nucleus. Detailed criteria followed in establishing and defining MSAs can be found in the U. S. Department of Commerce publication, *State Metropolitan Area Data Book*, 1986 edition.

An MSA includes a central city of at least 50,000 population or an urbanized area of at least 50,000. The county containing the central city and contiguous counties having strong economic and social relationships to the central city and county are also included. Counties in MSAs are designated suburban in UCR. An MSA may cross state lines.

New England MSAs are comprised of cities and towns instead of counties. In this publication's tabular presentations, New England cities and towns are assigned to the proper MSA. Some counties, however, have both suburban and rural portions. Data for state police and sheriffs in those jurisdictions are included in statistics for the rural area.

MSAs made up approximately 77 percent of the total United States population in 1990. Some presentations in this book refer to "suburban area." A suburban area includes cities with less than 50,000 inhabitants in addition to counties (unincorporated areas) within the MSA. The central cities are, of course, excluded.

"Other cities," most of which are incorporated, are those outside MSAs. They comprised 9 percent of the 1990 population of the United States.

Rural counties, like "other cities," are outside MSAs. Covering areas not under the jurisdiction of city police departments, rural county law enforcement agencies offered service to 14 percent of the national population in 1990.

The following diagram illustrates the aforementioned discussion of the community types.

	MSA	NON-MSA
CITIES	CENTRAL CITIES 50,000 AND OVER	OTHER CITIES
	SUBURBAN CITIES	
COUNTIES (Unincorporated areas)	SUBURBAN COUNTIES	RURAL COUNTIES

Population Groups

The population group classifications used by the UCR Program are:

<i>Population Group</i>	<i>Political Label</i>	<i>Population Range</i>
I	City	250,000 and over
II	City	100,000 to 249,999
III	City	50,000 to 99,999
IV	City	25,000 to 49,999
V	City	10,000 to 24,999
VI	City ¹	Less than 10,000
VIII (Rural County)	County ²	N/A
IX (Suburban County)	County ²	N/A

¹ Includes universities and colleges to which no population is attributed.

² Includes state police to which no population is attributed.

The major source of UCR data is the individual law enforcement agency. The number of agencies included in each population group will vary slightly from year to year due to population growth, geopolitical consolidation, municipal incorporation, etc. Population figures for individual jurisdictions are estimated by the UCR Program in noncensus years. In this edition, the population counts are Bureau of the Census 1990 decennial census data, which are subject to possible adjustment for undercount or overcount. The U.S. Department of Commerce is considering whether to correct these and will publish corrected counts, if any, not later than July 15, 1991. Any changes will be updated for the 1991 edition of this publication.

The following table shows the number of UCR contributing agencies within each population group for 1990.

<i>Population Group</i>	<i>Number of Agencies</i>	<i>Population Covered</i>
I	64	45,267,636
II	133	19,345,880
III	345	23,516,653
IV	698	24,193,058
V	1,680	26,459,400
VI	7,553 ¹	25,096,423
VIII (Rural County)	3,692 ²	33,791,460
IX (Suburban County)	1,702 ²	51,039,363

Total

15,867	248,709,873
--------	-------------

¹ Includes universities and colleges to which no population is attributed.

² Includes state police to which no population is attributed.

Regions and Divisions

As shown in the accompanying map, the United States is comprised of four regions: the Northeastern States, the Midwestern States, the Southern States, and the Western States. These regions are further divided into nine divisions. The following table delineates the regional, divisional, and state configuration of the country.

NORTHEASTERN STATES

- | | |
|---------------|-----------------|
| New England | Middle Atlantic |
| Connecticut | New Jersey |
| Maine | New York |
| Massachusetts | Pennsylvania |
| New Hampshire | |
| Rhode Island | |
| Vermont | |

MIDWESTERN STATES

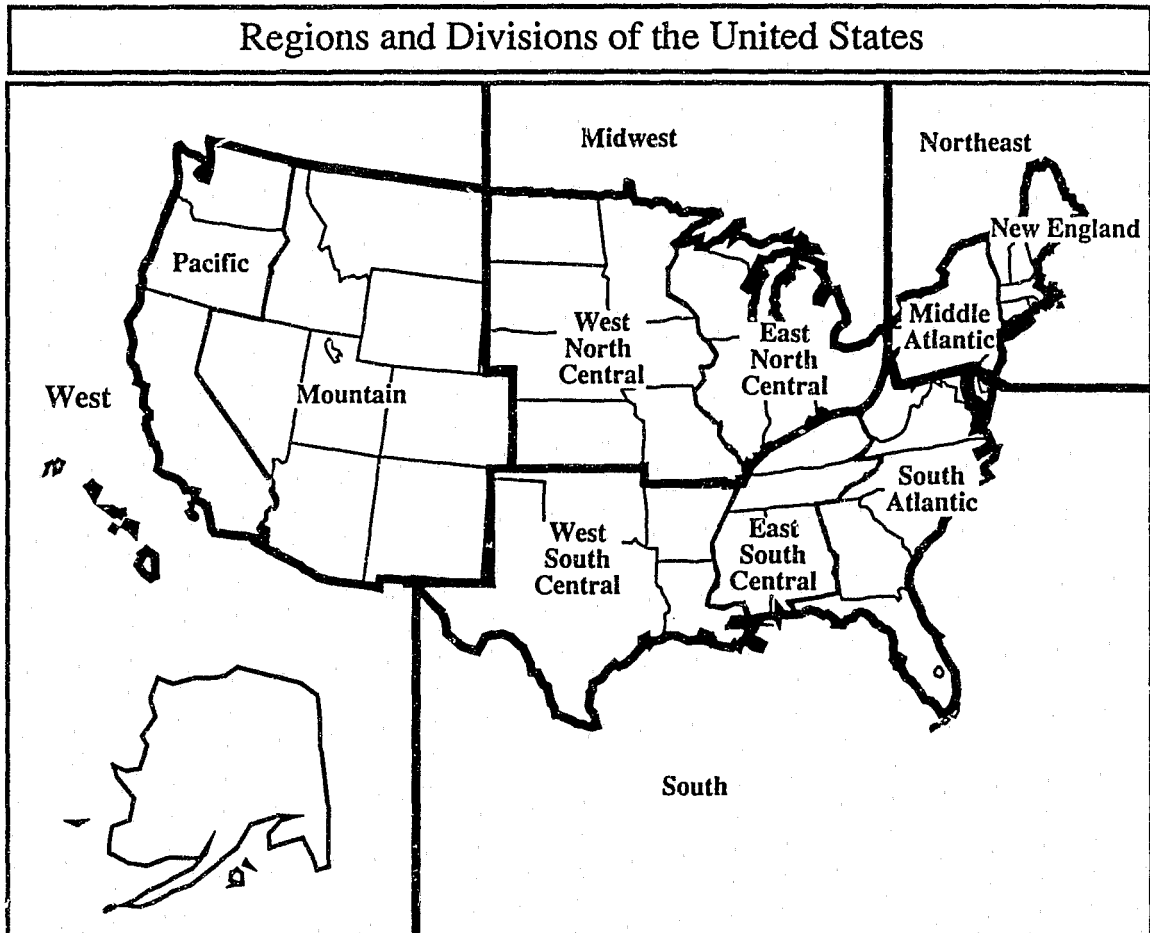

- | | |
|--------------------|--------------------|
| East North Central | West North Central |
| Illinois | Iowa |
| Indiana | Kansas |
| Michigan | Minnesota |
| Ohio | Missouri |
| Wisconsin | Nebraska |
| | North Dakota |
| | South Dakota |

SOUTHERN STATES

- | | |
|----------------------|--------------------|
| South Atlantic | East South Central |
| Delaware | Alabama |
| District of Columbia | Kentucky |
| Florida | Mississippi |
| Georgia | Tennessee |
| Maryland | West South Central |
| North Carolina | Arkansas |
| South Carolina | Louisiana |
| Virginia | Oklahoma |
| West Virginia | Texas |

WESTERN STATES

- | | |
|------------|------------|
| Mountain | Pacific |
| Arizona | Alaska |
| Colorado | California |
| Idaho | Hawaii |
| Montana | Oregon |
| Nevada | Washington |
| New Mexico | |
| Utah | |
| Wyoming | |

APPENDIX IV

INDEX OF CRIME, METROPOLITAN STATISTICAL AREAS, 1990

Metropolitan Statistical Area	Population	Crime Index total	Modified Crime Index total ¹	Violent crime ²	Property crime ³	Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson ⁴
Ablene, Tx. M.S.A.	119,655												
(Includes Taylor County.)

¹Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Arson data for individual cities are shown in Table 5.

²Violent crimes are offenses of murder, forcible rape, robbery and aggravated assault.

³Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

⁴Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore the figures were excluded from the forcible rape, violent crime, and Crime Index total categories.

⁵1990 figures are not comparable to prior years due to a change in reporting procedures.

⁶Aggravated assault figures are not comparable to prior years due to a change in reporting procedures.

⁷The 1990 Bureau of the Census decennial census counts for the individual Puerto Rico MSA's were not available prior to publication; therefore no population or data representing the rate per 100,000 inhabitants are shown.
