ACKNOWLEDGMENTS

Reducing Prison Violence by More Effective Inmate Management: An Experimental Field Test of the Prisioner Management Classification (PMC) System has been deposited at the Data Resources Program of the National Institute of Justice, Sociometrics Corporation, for public distribution, by James Austin of the National Council on Crime and Delinquency. Data collection was funded by the National Institute of Justice under Award No. 87-IJ-CX-0014. Funding for the work done by the Data Resources Program to prepare the data for public use was provided by the U. S. Office of Justice Programs under Contract No. OJP-89-C-008 to Sociometrics Corporation.

Users of the data are strongly urged to inform the Data Resources Program of any errors or discrepancies. They are further urged to bring to the attention of the Data Resources Program all problems and difficulties encountered, particularly those that may prevent effective and convenient use of the data.

All manuscripts based on data made available through the Data Resources Program should acknowledge that fact as well as cite the data set (see suggested citation format, inside front cover). Users of these data are urged to follow some adaptation of the following statement.

The data used in this publication were made available by the Data Resources Program of the National Institute of Justice, Sociometrics Corporation, 170 State Street, Suite 260, Los Altos, CA 94022-2812. The study entitled Reducing prison violence by more effective inmate management: An experimental filed test of the Prisoner Management Classification (PMC) system was conducted by James Austin, National Council on Crime and Delinquency, 685 Market Street, Suite 620, San Francisco, CA 94105. Data collection was funded by the National Institute of Justice (Award No. 87-IJ-CX-0014). Funding support for preparing the revised documentation for public distribution was provided by a contract (OJP-89-C-008) between the U. S. Office of Justice Programs and Sociometrics Corporation. The original investigators, funding agency, and the Data Resources Program are not responsible for the analyses or interpretations presented here.

In order to provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about Data Resources Program participants' research activities, each user of these resources is requested to send a copy of each completed manuscript, thesis abstract, or reprint to the Data Resources Program of the National Institute of Justice, Sociometrics Corporation, 170 State Street, Suite 260, Los Altos, CA 94022-2812.

SUMMARY

This study examined the extent to which the Prisoner Classification Management (PMC) system improved prison operations and reduced violence between inmates. The PMC system classifies inmates into one of five categories: selective intervention -- situational (SI-S); selective intervention -- treatment (SI-T); casework control (CC); environmental structure (ES); and limit setting (LS).

Data were collected from records kept by the Research and Planning Section of Washington's Department of Corrections. Data included inmate characteristics (JU67W.DAT), work assignment records (JU68W.DAT), disciplinary records (JU69W.DAT), assignment records (JU70W.DAT), and housing assignment records (JU71W.DAT). Data were also collected from a long (JU72W.DAT) and short (JU73W.DAT) PMC questionnaire.

Checks for out-of-range values revealed that the data are free of detectable coding errors.

Study Identification

Reducing Prison Violence by More Effective Inmate Management: An Experimental Field Test of the Prisoner Management Classification (PMC) System

James Austin

National Council on Crime and Delinquency

Award No. 87-IJ-CX-0014

Key Words

Prison management, inmate violence, offender personality.

Purpose of the Study

In Washington, the state selected for this study, the legislature passed legislation that increased the likelihood and length of incarceration for persons convicted of violent crime. Because of longer sentences, violent offenders are increasing as a percentage of Washington's prison population. With more violent offenders in the prison population, concerns about the safety of inmates and prison staff emerge. The Prisoner Management Classification (PMC) system was adopted from an offender management system developed originally in the late 1970s for probation and parole. The PMC system classifies inmates into one of five categories: selective intervention -- situational (SI-S); selective intervention -- treatment (SI-T); casework control (CC); environmental structure (ES); and limit setting (LS). The PMC system (1) separates inmates according to their PMC classification, (2) employs PMC inmate management guidelines in each PMC-defined housing unit, and (3) uses PMC to determine appropriate placement in counseling and other institutional programs.

The purpose of this study was to measure the extent to which the PMC system improved overall operations of a prison facility and reduced the safety risk of inmates and staff. The investigator employed an experimental design in which inmates were randomly assigned to a corrections center using the PMC system or other prisons using traditional classification systems. The data address the following questions:

- (1) To what extent does the PMC reduce rates of assaults on staff and inmates?
- (2) To what extent does the PMC reduce rates of other serious misconduct?

- (3) To what extent does the PMC increase rates of inmate participation in work or vocational programs?
- (4) To what extent does the PMC increase staff job satisfaction, morale, and staff performance?

Methods

Sources of Information

Data were collected continuously during each sampled inmate's first six months of residence in the correctional facility. Data were extracted from records kept by the Research and Planning Section of Washington's Department of Corrections (DOC). The Research and Planning Section of the DOC maintained a comprehensive tracking system for all DOC inmates, including various inmate characteristics (JU67W.DAT), work assignment records (JU68W.DAT), disciplinary records (JU69W.DAT), assignment records (JU70W.DAT), and housing assignment records (JU71W.DAT). Data were also collected from a long (JU72W.DAT) and short (JU73W.DAT) version of the PMC questionnaire.

Sample

The Department of Corrections received approximately 200 admissions per month, with roughly 20% (40 cases) eligible for inclusion in the experiment. Sample sizes, however, varied across data files. File 1 (JU67) contains 500 cases. Files 2 through 7 (JU68-JU73) contain multiple records for some inmates, and as a result, contain more than 500 cases. Data within these files can be linked using the DOC variable.

Research Design

The investigator employed a research design with two stages: (1) Department of Corrections screening for eligibility for the study; and (2) random assignment of eligible participants to either the Clallam Bay Corrections Center (CBCC)¹ or to one of several control prisons.

Stage 1. The target group for the experiment comprised newly-admitted inmates classified as medium security by the Department of Correction's classification system. Inmates were coded "medium security" shortly after admission to the DOC. At that time, all inmates are classified into four security categories: maximum, close, medium, and minimum. This classification system relies upon "objective" measures of the inmate's offense severity; prior criminal history; family and social stability; and institutional conduct. These measures designate appropriate levels of institutional security. The classification system's function is to identify factors associated with risk of assaultive behavior, repeated involvement in prison misconduct, or escape. And these factors are used to determine facility assignments and the level of freedom of movement within a prison (e.g., mandatory security staff escort, required physical restraints during transferral to another facility, etc.).²

To be eligible for Stage Two of the experiment, the investigator established six criteria for randomization. Inmates had to be classified initially as medium-security³; could not have been selected for treatment in the

¹ The investigator notes that the experimental design did not control for the effects of the CBCC facility architecture. CBCC was a newly constructed 571-bed, medium-security prison. Because of the spatial characteristics of the prison, efficient allocation of inmates according to their PMC classification was possible. As a result, the observed differences between the experimental and control groups may have been a result of facility design or the net result of facility design and the PMC.

² The initial classification score is adjusted six months after admission to prison. Adjustment is made on the basis of responses to the Security Designation Review Form.

³ Despite the intention to include only medium-security inmates, 84 control and 9 experimental cases were classified as minimum-security prior to transfer to CBCC or other correctional facilities. This happened because some staff randomized cases *before* those cases were categorized in the DOC classification system.

state's Sex Offender Program; could not be psychotic; had to be sentenced to two to nine years; could not be developmentally disabled; and could not have medical needs CBCC was unequipped to handle.

Stage 2. Stage Two of the experiment involved random assignment of medium security inmates to either the Clallam Bay Corrections Center (CBCC) or other, control correctional facilities. The control inmates were identical to the experimental inmates except that they were housed in other facilities and managed by established procedures at those institutions.⁴

When inmates were declared eligible for the experiment, their names were sent weekly to the DOC research staff. The staff used a systematic randomization method in which a number between one and ten was assigned to each person on the list of eligibles. The first person was assigned "1," the second "2," and so forth. A random number (starter) was then generated. The eligibles who were positioned at the starter and its multiples were assigned to the experimental prison (CBCC). For example, if there were ten eligibles in a particular week and 4 was chosen as the starter, the cases were counted sequentially and those on "4" and its multiples became experimental cases. The counting proceeded until half of the eligibles for that week were assigned to the experimental group.

Once the inmate was assigned randomly to one of the two experimental conditions, inmates were placed in one of five Prisoner Management Classification (PMC) categories. Placement in the appropriate PMC category was determined by a 45-minute interview with the inmate.⁵ Interviews were conducted by a specially trained classification officer (see the Implementation of the PMC System section below for details about the training). The interview was conducted upon admission to the prison reception center or upon arrival at the prison. The questionnaire contained 45 attitudinal items that dealt with the inmate's attitudes about the present offense(s); criminal history (including juvenile criminal history); family relationships; relationships with staff and other inmates; current difficulties (psychological, sexual harassment, etc.); and future plans after release from prison. In addition to the 45 interview items, there were (1) 11 factual ratings of the inmate's social status and offense history, (2) eight behavior ratings based on the inmate's behavior during the interview itself, and (3) seven ratings of the interviewer's impressions of the inmate's problem areas. After the interview was complete, the classification officer had 10 minutes to score the rated items and reach a PMC decision. The five PMC groups were characterized according to criminal sophistication, attitudinal development, and institutional needs.

The PMC Categories. Categories 1 and 2 comprise Selective Intervention -- Situational (SI-S) and Selective Intervention -- Treatment (SI-T), respectively. Both the SI-S and SI-T groups are characterized by a generally positive, pro-social value structure and stable lifestyle. For the SI-S inmates, the criminal offense history is limited. The current offense is usually the first and is the result of an isolated and stressful life event. The criminal behavior is therefore at odds with the individual's usual, non-criminal value structure. SI-S inmates usually have no special programming or supervision needs and require minimal intervention by staff. SI-S inmates are low risks for assaults or escape. The SI-T group is different from the SI-S group because of the presence of one or more of the following: sexual offense history, serious drug or alcohol abuse, serious emotional disturbances, or assaultive offense history. SI-T inmates present chronic emotional or psychological problems that will continue without intervention. SI-T inmates function vocationally and

⁴ Equivalency between the two groups was tested by comparing the demographic variables on the DOC inmate tracking file and from the PMC interviews. The investigator compared the experimental and control group on race; age; minimum current sentence; violent offender status; commitment offense type; marital status; education; number of prior offenses; number of imprisonments; age of earliest court appearance; and time spent under probation or parole supervision. The first six variables were extracted from the DOC tracking file and the remaning variables from the PMC interviews. The investigator concluded that, based on these comparisons, the two groups were statistically equivalent.

⁵ Prisoners in the control group were classified according to PMC categories but were not *managed* according to PMC guidelines. This (1) facilitated comparisons between control and experimental groups according to the PMC classification, and (2) allowed the investigator to attribute observed differences in inmate behavior between the two groups to the implementation of the PMC system.

interpersonally, but the likelihood of continued criminal behavior is high unless emotional or psychological needs are handled appropriately before release. In general, both of these inmate types present the fewest problems, make good use of insight and reality-oriented counseling, and are more honest and reliable in their reporting than other PMC groups.

Category 3 includes the Casework/Control (CC) group. The CC individual is characterized by chronic instability that extends to relationships, residence, and vocational activities. This instability is often the result of an unstable and abusive childhood and, in adulthood, is manifested frequently in drug abuse, frequent changes in residence and employment, and attachment to others who are equally unstable. Emotional problems are evident and periods of depression may result in suicide attempts. The CC individual frequently encounters problems with other inmates and staff. Prison misconduct ranges from the trivial to the serious. Misconduct is often the result of chemical, emotional, or interpersonal problems.

Category 4 comprises the *Environmental Structure (ES)* group. The ES individual is characterized by a lack of social, vocational, and intellectual skills. Involvement in crime is generally impulsive and motivated by a desire to be accepted by others. The ES individual is difficult to work with because of his or her low intellectual and aptitude levels. Security problems within the ES group are related generally to their impulsiveness and exploitation by others. Intellectual deficits may result in a lack of understanding of institution rules and routines. The ES inmate is generally not insightful and may have difficulty approaching staff with prison problems. These inmates are seldom adept at dealing directly with prison problems or interpersonal conflicts. Misconduct by ES inmates occurs because of their unwillingness or inability to deal effectively with conflictual situations.

Category 5 contains the Limit Setting (LS) group. The LS individual is characterized best by a strong, well-developed criminal orientation and general lack of commitment to pro-social values. These individuals often appear motivated toward success in crime and have little interest in applying their skills to socially acceptable endeavors. Criminal histories are often lengthy and marked by numerous felonies and violent or aggressive offenses. Because of previous involvement in the criminal justice system, LS inmates are comfortable within correctional facilities. As a result, LS inmates are able to manipulate the (familiar) prison environment to meet their needs and desires.

Implementation of the PMC System. For the control group, minimal organizational change within the prisons were needed, since control inmates were not supervised, housed, or programmed according to PMC guidelines. The PMC assessment, however, had to be completed. The investigator decided to conduct the interview at the DOC Reception Center. PMC interviews increased the workload of the Reception Center Staff. To reduce Reception Center workload, the investigator examined the PMC interview to determine if a "short form" (which did not contain all questions but properly classified inmates according to the PMC system) could be used.

To develop a short form, the investigators conducted an analysis of 25 PMC interviews. Each PMC interview question was weighted one, two, or three -- the questions with the most predictive power given the higher weights. When all questions weighted one were excluded, the shortened PMC interview items produced the identical classification into the five PMC categories in 24 of 25 cases (96%). With this result, the investigator allowed staff to interview control group inmates using the "short form" that eliminated 20 of the original 56 questions (the 45 attitudinal items plus the 11 factual ratings of the inmate's social status and offense history). Interview time was reduced from 45 minutes to twenty.

To ensure further that the short form interview would maintain a high level of reliability, Reception Center staff initially conducted the interview on control and experimental group inmates with the short interview completed by the Reception Center staff and the standard PMC interview conducted later by Clallam Bay staff. This provided for an inter-rater reliability test of 36 identical questionnaire items as well as a test of

PMC reliability between the short and standard interview scoring system. The investigator found a poor level of inter-rater reliability in assessing the predictive power of items.⁶

In addition to checks for inter-rater reliability, the investigator took four steps to improve data quality. First, a retraining session was held for all Reception Center interviewers and Clallam Bay interviewers. The session focused on how to ask and rate each question on the regular interview. The session also focused on general interviewing methods. Second, the suggestion was made that the short version disrupted the "flow" of the interview. This raised the possibility that raters were reaching different conclusions on questions because inmates responded differently due to other questions asked during the interview. Because of this, the investigator discontinued the short version and Reception Center staff began to use the interview identical to the interview used on experimental inmates. Third, the National Council on Crime and Delinquency (NCCD) staff re-interviewed those control group inmates who had been interviewed on the short form.⁷ Fourth, the Reception Center interview schedule was moved to the second full week of the reception process to provide more time for background material to arrive.

At Clallam Bay, the impact of PMC on prison operations and organization was substantial. PMC affected many major aspects of prison operations, including housing, inmate supervision, and programming and case planning. As a result, organizing Clallam Bay required a strong administrative commitment to the PMC concepts (coupled with necessary training), operational changes, and supervisory oversight of staff to ensure that the concepts were implemented and correctly and consistently practiced. To this end, inmates were placed into one of three housing units. Unit A housed Casework Control (CC) inmates; Unit B housed both Environmental Structure (ES) and Selective Intervention (SI-S and SI-T) inmates; and Unit D housed Limit Setting (LS) inmates. Because of the limited space in the three PMC units, PMC-scored inmates were housed in a transition unit (Unit F) until vacancies emerged in their assigned PMC unit.

Familiarizing the Clallam Bay staff with the contours of the PMC system was necessary. Two training tracks were established. The first track was for counseling, program, and education staff (who would conduct and score the PMC interview and/or use PMC for programming and case planning decisions). This track was conducted by one of the two original developers of the PMC system and a NCCD trainer. Training comprised a five-day session which included information about the PMC's history and development. How to conduct the interview and use the PMC system for housing, unit supervision, and programming and case planning was also covered. The second training track was for all other staff and security staff responsible for supervision in the housing units. The second track was conducted by the other original developer of the PMC system and a NCCD trainer. Ten separate one-day training sessions were held. The sessions provided an overview of the PMC system and emphasized the use of the PMC for handling and supervising inmates in the housing units.

Once counselors, security staff, and educational staff completed their training, they were to consider an inmate's PMC type when making case management decisions. The PMC Case Handling Guide helped staff make the appropriate programming decisions and prepare written case plans for inmates. The guide also suggested the intervention approaches that work best relative to the designated PMC type. The security staff used the case handling guide to impose differential forms of supervision. The guide helped security staff responded effectively to disturbances in the unit as well as deal with inmates daily.⁸

⁶ The investigator analyzed the results of 104 experimental inmates. For the 36 identical questions, over one-third (37%) of the questions were scored differently (e.g., one, two, or three). Most reliability problems were on ratings of "attitude" questions (43% rated differently), although there were significant differences on ratings of "objective history" questions (25% rated differently). The investigator concluded that problems centered on hasty interviewing, absence of the pre-sentence investigation (PSI) report to admission, and staff turnover that reulted in untrained staff conducting some interviews.

⁷ The raw data contain responses from the re-interview session.

⁸ The security staff at Clallam Bay reported that although there were individual differences between inmates of the same PMC type, inmates took on distinct "personalities" consistent with PMC descriptions.

As all aspects of PMC became operational (interviewing, housing, programming and case planning, and supervision), an on-going internal training program was needed to educate new staff about PMC and its implementation. This was important at Clallam Bay because staff turnover was high. An internal training program was established two months after data collection began.

Response Rates

For Files 1-5, a report on response rates is inapplicable, since data were collected from prison records. For Files 6 and 7, the inmates were not allowed to refuse participation.

Dates of Data Collection

September, 1987 to September, 1988.

Summary of Contents

Special Characteristics of the Study

Randomization began in September 1987, and at the end of November 1987, only 50 experimental and 40 control inmates were included in the project (instead of the expected 60 in each group). The slow assignment process resulted from a smaller-than-expected number of inmates who met the criteria to be included in the project. Since the supply of eligibles was low and the demand to fill CBCC high, there were three weeks when all eligibles were assigned to CBCC. Under these circumstances, the investigator concluded that the potential was high for bias to exist between the two groups.

Corrective action, however, was taken by the National Council on Crime and Delinquency (NCCD) staff because of the close monitoring of the randomization process during these three months. To increase the number of cases eligible for random assignment, the criteria for eligibles were liberalized. The minimum length of sentence was reduced to 18 months from two years. This measure was instituted in December 1987, and by the end of January 1988, the experimental and control groups were compared again to check if the discrepancy had been eliminated. Discrepancies remained, however. Forty-three percent of the experimental group were classified as SI compared to 30% of the control group. Likewise, 2.4% of the experimental group was classified as ES compared to 12.7% of the control group.

The investigator further amended the randomization process to correct for the bias in the distribution of cases across PMC categories. Two steps were taken. First, a stratified sampling scheme was instituted which required that an equal number of inmates from each PMC type be sent to the experimental and control group. For example, if during a week ten inmates were classified as CC, five were sent to Clallam Bay and five to other correctional facilities, regardless of the number of vacant beds at the CBCC. Second, to reduce immediately the oversized proportions of SI and ES in the experimental and control group respectively, all SI inmates were sent to the control group and all ES inmates to the experimental group until the balance was restored. This required two months, and after two months, no significant differences in PMC classification existed between the two groups. Once differences were eliminated, the original method of randomization was reinstated.

Finally, the DOC variable is the unique identifier that links the seven data files.

Description of Variables

Files 1 through 5 contain outcome measures against which comparisons between the experimental and control group could be made. For each correctional facility, figures for 1986, 1987, and 1988 (36 months in total) were collected for the following items: number of staff-inmate assaults; number of inmate-inmate assaults; number of suicides and suicide attempts; number of escapes and escape attempts; number of "serious" disciplinary

incidents⁹; number of total staff; number of total security staff; number of inmates; number of security staff vacancies; rated capacity of the facility; number of staff transfers with reasons for such transfers; and number of inmates involved in education, vocation, and work programs. Demographic variables include date of birth, sex, and race.

Files 6 and 7 contain motivation behind the committed offense; prior offense severity; percentage of offenses while on drugs; attitude toward teachers; school performance; present feelings toward father/mother; whether or not the inmate was physically abused by his parents; the inmate's relationship with others; and family history. Demographic variables include date of birth, education, and marital status.

Presence of Common Scales

None.

Unit of Observation

The individual.

Geographic Coverage

Washington state.

Evaluation

Data Quality

Checks for out-of-range values revealed few coding errors. While six of the seven files contain missing values, only a few variables have more than 5% of cases with missing data.

Data Limitations

Prior research on prison classification did not include a control group against which to compare the experimental group. As a result, many external factors besides the treatment could explain the outcome. The investigator, however, used a control group that resembled the experimental group. The investigator was therefore able to isolate the effects of the PMC system on further acts of aggression against inmates and staff.

There was a problem with implementing PMC at Clallam Bay because PMC was only one of many organizational changes instituted at the opening of the new facility. Staff had to learn PMC along with many other procedures at the same time. As a result, some operational problems arose and needed to be worked out. Furthermore, differences between the experimental and control groups could have been due, in part, to characteristics of the CBCC other than the PMC program, such as the newness of the facility and its staff.

⁹ "Serious" infractions included: assault resulting in hospitalization; possession of weapons; possession of narcotics, intoxicants, or paraphernalia; possession of staff clothing; rioting; and inciting a riot.

DESCRIPTION OF MACHINE-READABLE FILES AND SUPPLEMENTARY DOCUMENTATION

Contents of Machine-Readable Files

Machine-readable Archive files are available in both mainframe and microcomputer formats. Unless otherwise requested, files formatted for a mainframe computer are provided on a 9-track tape at a density of 6250 bpi, in EBCDIC recording mode with IBM Standard Labels. Files formatted for a microcomputer are provided in ASCII format on low- or high-density, 5¼" or 3½" diskettes, at the user's request. A description of the contents of each file is given below.

File 1 (Inmate Characteristics Data File): Data for various inmate characteristics.

File 2 (Work Assignment Data File): Data for work assignments.

File 3 (Disciplinary Record Data File): Data for inmate's disciplinary records.

File 4 (Assignment Record Data File): Data for inmate case planning.

File 5 (Housing Assignment Data File): Data for inmate housing assignments.

File 6 (Long Interview Data File): Data from the long PMC questionnaire.

File 7 (Short Interview Data File): Data from the short PMC questionnaire.

Paper Documentation

Paper versions of the codebook and original data collection instrument are included.

Ordering Information

Machine-readable files and paper documentation can be ordered from the Data Resources Program of the National Institute of Justice, Sociometrics Corporation, 170 State Street, Suite 260, Los Altos, California 94022-2812.

DATA COMPLETENESS AND CONSISTENCY REPORT

This section presents information regarding the quality of the data in this Data Set. Tables n.1 and n.2 (where n=1 to 7 and is a reference to the file number) indicate the extent and location of out-of-range values. Tables n.3 and n.4 summarize the incidence of missing data. Tables n.5 provide information regarding the adherence to the logical relations between particular items. These checks are meant to be illustrative, and are not necessarily exhaustive.

File 1

Number of Cases:

500

Number of Variables:

14

Table 1.1. Distribution of Variables by Percentage of Out-of-Range Values.

Percentage of Cases With Out-of-Range Values	Correspon Number of		Number of Variables	Percentage of Variables
0%	-	0	12	85.7%
> 0% to 1%	1 to	5	1	7.1%
> 1% to 3%	6 to	15	0	0.0%
> 3% to 5%	16 to	25	0	0.0%
> 5% to 10%	26 to	50	1 1	7.1%
>10% to 100%	51 to	500	0	0.0%
Total			14	100.0%

Table 1.2. List of Variables With Out-of-Range Values.

Variable Name and Label		Out-of-Range Values	Number of Cases
OFFENSE	Type of offense	11,43,48,52,63,	1,1,3,17,1,
COUNTY	County of arrest	64,66,76,78 29,44	3,1,2,1 1,1

Table 1.3. Distribution of Variables by Percentage of Missing Values.

Percentage of Cases With Missing Values	Corresponding Number of Cases	Number of Variables	Percentage of Variables
0%	0	12	85.7%
> 0% to 1%	1 to 5	2	14.3%
> 1% to 100%	6 to 500	0	0.0%
Total		14	100.0%

Table 1.4. List of Variables With Over 5% Missing Values (26 Missing Values or More).

None.

Table 1.5. Report on Consistency Checks.

Number of Cases:

840

Number of Variables:

5

Table 2.1. Distribution of Variables by Percentage of Out-of-Range Values.

None.

Table 2.2. List of Variables With Out-of-Range Values.

None.

Table 2.3. Distribution of Variables by Percentage of Missing Values.

Percentage of Cases With Missing Values	Correspon Number of		Number of Variables	Percentage of Variables
0%		0	1	20.0%
> 0% to 1%	1 to	8	1	20.0%
> 1% to 3%	9 to	25	0	0.0%
> 3% to 5%	26 to	42	0	0.0%
> 5% to 10%	43 to	84	2	40.0%
>10% to 20%	85 to	168	1	20.0%
>20% to 100%	169 to	840	0	0.0%
Total			5	100.0%

Table 2.4. List of Variables With Over 5% Missing Values (43 Missing Values or More).

Variable Name and Label		Number of Cases
ASSIGN	Work assignment codes	91
BEGAN ENDED	Date work assignment began Date work assignment ended	78 78

Table 2.5. Report on Consistency Checks.

File 3

Number of Cases:

759

Number of Variables:

6

Table 3.1. Distribution of Variables by Percentage of Out-of-Range Values.

None.

Table 3.2. List of Variables With Out-of-Range Values.

None.

Table 3.3. Distribution of Variables by Percentage of Missing Values.

Percentage of Cases With Missing Values	Corresponding Number of Cases	Number of Variables	Percentage of Variables
0%	0	4	66.7%
> 0% to 1%	1 to 7	2	33.3%
> 1% to 100%	8 to 759	0	0.0%
Total		6	100.0%

Table 3.4. List of Variables With Over 5% Missing Values (38 Missing Values or More).

None.

Table 3.5. Report on Consistency Checks.

File 4

Number of Cases: Number of Variables: 724

Table 4.1. Distribution of Variables by Percentage of Out-of-Range Values.

Percentage of Cases With Out-of-Range Values	Corresponding Number of Cases	Number of Variables	Percentage of Variables
0%	0	4	80.0%
> 0% to 1%	1 to 7	1	20.0%
> 1% to 100%	8 to 724	0	0.0%
Total		5	100.0%

Table 4.2. List of Variables With Out-of-Range Values.

Variable Name and Label		Out-of-Range Values	Number of Cases	
EDUC	Education	11	1	

Table 4.3. Distribution of Variables by Percentage of Missing Values.

Percentage of Cases With Missing Values	Correspon Number of		Number of Variables	Percentage of Variables
0%		0	2	40.0%
> 0% to 1%	1 to	7	1	20.0%
> 1% to 3%	8 to	21	2	40.0%
> 3% to 100%	22 to	724	0	0.0%
Total .			5	100.0%

Table 4.4. List of Variables With Over 5% Missing Values (37 Missing Values or More).

Table 4.5. Report on Consistency Checks.

None.

File 5

Number of Cases:

1,384

Number of Variables:

5

Table 5.1. Distribution of Variables by Percentage of Out-of-Range Values.

Percentage of Cases With Out-of-Range Values	Corresponding Number of Cases	Number of Variables	Percentage of Variables
0% > 0% to 1%	0 1 to 13	4	80.0% 20.0%
> 1% to 100%	14 to 1,384	0	0.0%
Total		5	100.0%

Table 5.2. List of Variables With Out-of-Range Values.

Variable Name	and Label	Out-of-Range Values Number		
HOUSE	Housing custody code	101,708	1,2	

Table 5.3. Distribution of Variables by Percentage of Missing Values.

Percentage of Cases With Missing Values	Corresponding Number of	_	Number of Variables	Percentage of Variables
0%		0	3	60.0%
> 0% to 1%	1 to	13	1	20.0%
> 1% to 3%	14 to	41	1	20.0%
> 3% to 100%	42 to	1,384	0	0.0%
Fotal			5	100.0%

Table 5.4. List of Variables With Over 5% Missing Values (70 Missing Values or More).

None.

Table 5.5. Report on Consistency Checks.

None.

File 6

Number of Cases:

310

Number of Variables:

90

Table 6.1. Distribution of Variables by Percentage of Out-of-Range Values.

Percentage of Cases With Out-of-Range Values	Correspon Number of		Number of Variables	Percentage of Variables
0%		0	88	97.8%
> 0% to 1%	1 to	3	0	0.0%
> 1% to 3%	4 to	9	0	0.0%
> 3% to 5%	10 to	15	0	0.0%
> 5% to 10%	16 to	31	0	0.0%
>10% to 100%	32 to	310	2	2.2%
Total			90	100.0%

DINFRA

Dates of infraction

TYPE

Type of infraction

501 = Committing homicide.

502 = Assaulting any person.

503 = Extortion, blackmail, demanding or receiving money or anything of value in return for protection against others, or under threat of informing.

504 = Engaging in sexual acts with others, with the exception of conjugal visits authorized by the superintendent.

505 = Fighting with any person except in self-defense.

506 = Threatening another with bodily harm or with any offense against his/her person.

507 = Committing an act not otherwise proscribed by these regulations which constitutes a felony or misdemeanor under state or federal law.

508 = Throwing objects or material at staff members, institution visitors, or other inmates.

521 = Holding a person hostage.

525 = Violation of conditions of furlough.

550 = Escape or attempted escape.

551 = Lying to the disciplinary hearing committee or hearing officer.

552 = Lying to a staff member with the intention of causing an innocent person to be penalized or proceeded against.

553 = Intentionally or recklessly setting a fire.

554 = Intentionally or recklessly destroying or damaging state property, or the property of aother person in excess of five dollars.

555 = Stealing (theft) or knowing possession of stolen property.

556 = Refusing to submit to a body search when lawfully ordered to do so by a staff member.

- 557 = Refusing and/or failing to work or attend other regularly scheduled assignments.
- 558 = Intentionally interfering with a staff member in the performance of his/her duties.
- 559 = Gambling.
- 600 = Tampering with or blocking any locking device or seal.
- 601 = Possession or introduction of an explosive, poison, or any ammunition or components thereof.
- 602 = Possession or introduction of any gun, firearm, weapon, sharpened instrument, knife, or unauthorized tool or components thereof.
- 603 = Possession, introduction, transfer, or use of any narcotics, controlled substance, or related paraphernalia; possession, transfer, or use of any intoxicant or drug not prescribed or authorized for the inmate or for the inmate to whom transferred, if applicable, by the medical staff; or being intoxicated, or under the influence of an unauthorized drug, narcotic, controlled substance, or other intoxicant.
- 605 = Unauthorized possession of any officer's or staff's clothing.
- 607 = Refusing to submit to a urinanalysis ordered to do so by an authorized staff member.
- 608 = Refusing to submit to a breathalyzer or other standard sobriety test.
- 650 = Rioting.
- 651 = Inciting others to riot.
- 652 = Engaging in or inciting a prohibited group demonstration.
- 653 = Intentionally interfering with the taking of count.
- 654 = Counterfeiting, forging or unauthorized reproduction of any document, article of identification, money, security, or official paper.
- 655 = Making intoxicants, controlled substances, narcotics.
- 656 = Giving or offering any official or staff member or a volunteer a bribe or anything of value for a favor or unauthorized service.
- 657 = Four or more general infractions arising out of separate incidents, all of which occur within the previous six-month period, and which have been reported in writing.
- 658 = Intentional failure to perform according to an administrative action taken pursuant to WAC 137-28-050(2), or resisting post-hearing sanctions as provided for in WAC 137-28-105.

660 = Unauthorized possession of money or other negotiable instruments of five dollars or more.

661 = Performing or taking part in performing a marriage in the institution buildings or on the institutional grounds, except when such marriage was approved by the superintendent of the institution, which may, in appropriate cases, also be deemed a violation of a visitng rule that can subject an inmate to the sanction contained in WAC 137-28-105 (1)(d), as well as other sanctions available for serious infractions.

662 = Solicitation of goods and/or services for which the provider would expect payment when the inmate knows or should have known he/she has no funds available to pay for such goods or services.

700 = Attempting to commit or aiding another person to commit a serious infraction as enumerated in this rule, and such action shall be considered the same as commission of the offense itself.

701 = Commission of any general infraction as enumerated in WAC 137-28-025 or any local rule denominated as a general infraction in such a manner as likely to result in danger to life or limb or to create a risk to the orderly operation of the institution or the health and safety of its inmates, staff, or visitors shall be considered a serious infraction, provided there is substantial evidence which establishes there was such a danger.

CMC --- STRATEGIES FOR CASE SUPERVISION (Institution Version - 10/86)

The purpose of CMC is to provide the probation professional with an efficient and effective case management system. CMC includes procedures for developing individualized strategies for the quality supervision of adult offenders. This process is accomplished through the completion of the three system components: an assessment procedure, a supervision planning process, and supervision according to one of five distinct strategies, depending on individualized case needs.

This assessment instrument was developed in 1975 and has been tested and revised regularly. It has been standardized on an adult probation and parole population and meets or exceeds the highest standards of research and testing design. Therefore, certified instruction is required for its use. It is not to be used with juveniles nor for any other than its stated purpose.

CMC INSTRUCTIONS

There are four parts to the CMC assessment instrument. Whenever possible, the following sequence (A to D) should be followed.

- A. Attitude interview (45 items)
- B. Objective history (11 Items)
- C. Behavioral observations (8 items)
- D. Officer impressions of contributing factors (7 items)

The Attitude Section

nn One:

A SEMI-STRUCTURED INTERVIEW with suggested questions has been developed to elicit attitude information about the offense, the offender's background, and about present plans and problems. The average interview takes about forty-five minutes and the scoring about five minutes.

t'se a natural, open, conversational style of interviewing which is comfortable for both you and the probationer. If the probationer presents some important or interesting information requiring follow-up, feel free to do so before returning to the structured sequence. While stressing free-flowing communication, some structuring is required to insure the reliability and validity of the instrument. Therefore, make every effort to preserve the meaning of the questions when transposing them into your own words.

In the interview, each section is introduced by one or two open-ended questions which are intended to encourage discussion on a particular subject. If the information needed to score the items is not obtained from the open-ended questions, one or two specific questions are provided for each item. If those questions fail to elicit the needed information, continue to inquire with increasingly direct questions unless you see the word -STOP-. "-STOP-" means to discontinue inquiry (except to repeat or clarify a misunderstood question).

For some items, "a" and "b" questions are included. If the "b" question is asterished (1), always ask it unless the answer to the "a" makes the "b" questions meaningless (e.g., "no" to question 10a). If question "b" is not asterished, ask it if the needed information was not elicited from question "a".

Column Two:

THE ITEM OBJECTIVES AND RESPONSES are listed in column two, Many times the suggested questions will approach the item objective in an indirect manner in order to elicit the most valid response.

Numn Three:

CORING GUIDE is included to provide criteria and assistance in scoring ambiguous responses. When scoring, you must choose anily one alternative for each item. If you cannot choose an alternative, do not rate the item.

Unless otherwise instructed in Scoring Guide, consider information learned previously in the interview to score each item. Also, unless otherwise instructed, base scoring on general patterns of behavior and attitudes. The score should be based on the interviewer's interpretation of the information.

ATTITUDES ABOUT OFFENSE

Could you tell me about the most recent offense that got you into trouble?

QUESTIONS

- 1a. How did you get involved in this offense?
- 1b. (If denied) What did the police say that you did?

- How did you decide to commit the offense?
- 2b. Could you tell me more about the circumstances that led up to the offense?

 Looking back at the offense, what is your general feeling about it? -STOP-

RESPONSES

- Motivation for committing the offense
 - (a) emotional motivation (e.g., anger, sex offense, etc.)
 - (b) material (monetary) motivation
 - (c) both emotional and material motivation

- 2. Acceptance of responsibility for current offense
 - (a) admits committing the offense and doesn't attempt excuses
 - (b) admits committing the offense, but emphasizes excuses (e.g., drinking, influence by friends, family problems, etc.)
 - (c) denies committing the off-
- Expression of guilt about current offense
 - (a) expresses guilt feelings or spontaneous empathy toward victim
 - (b) expresses superficial or no guilt
 - (c) victimless crime

SCORING GUIDE

- 1. a. Possession of drugs for own use.
 - Assault (not for robbery).
 - b. Prostitution.
 - Cur theft (except for joy tident).
 - Selling drugs or stealing to support a habit.
 - c. Stealing from parents for revenge.
 - Stealing primarily for peer acceptance.
 - Man who won't pay alimon primarily because he's angr with his ex-wife.
- 2. a. Explains circumstances butakes responsibility.
 - b. Blames circumstances and do not take responsibility.
 - c. Offenders who deny any significant aspect of the offen: are scored "c" (e.g., the probationer admits that he helpe to fimmy a car window by denies responsibility for removing valuables because he friends removed them).
- 3. a. Offender must feel son personal shance and regrestion to in press the officer).
 - b. "I feel bad because now have a record."
 - "People are disappointed me." (Indicates some regr but not necessarily guilt.)
 - "I know it was wrong (Emphasis is on having do wrong, but not on feeli bad because one has do wrong.)
 - c. · Using drugs.
 - Sexual activities between or senting adults.

OFFENSE PATTERN

a to talk to you about your prior offenses. Have you been in trouble ? (If prior offenses, obtain a complete picture of probationer's offense style, including current offense, when scoring items 4 - 8.)

- 4a. What prior offenses are on your record? (Most recent first)
- *4b. Were you ever in trouble as a juvenile?
 (List on grid below)
- 4. Offense and severity
 - (a) no prior offenses (Skip items 5,6,7, and 8.)
 - (b) mainly misdemeanors
 - (c) no consistent pattern
 - (d) mainly felonies

- 4-8. Include juvenile and serious traffic offenses (e.g., drunk driving). Don't count dismissals for "not guilty".
- 4. b. Should not be used if offender has more than two felonies. (Use choice "c" or "d".)
 - d. Over 50% of offender's offenses are felonies.

Offense	(Item 4) Fel./Misd.	(tem 5) Assaultive?	Circumstances of Offense	(Item 6) Planned?	(Item 7) Chemicals?	(Item 8) Accomplices?
		·				
			•			

5a. Have you ever been armed or hurt someone during these offences?

Bild and once discourses designed

- 6a. How did you decide to commit the most recent of your prior offenses? (Discuss offenses Individu-
- 6b. Could you tell me more about the circumstances that led up to the offense?

ally until a clear pattern emerges.)

- Were you drinking or on drugs when you committed this offense? (Discuss each offense individually.)
 - Did you do the offense alone or with others? (Discuss each offense Individually.)

- 5. Was offender ever involved in an offense where he (she) was armed, assaultive, or threatened
 - (a) yes
 - (b) no
- 8. Offenses were generally
 - (a) planned
 - (b) no consistent pattern
 - (c) impulsive
- 7. Percent of offenses committed while drinking or on drugs
 - (a) never
 - (b) 50% or less
 - (c) over 50%
- 8. Offenses were generally committed
 - (a) alone
 - (b) no consistent pattern
 - (c) with accomplices

- 5-8 Use current and prior offense factors to score 5-8.
- factors.
 - a. Exhibitionist who drives around in a car looking for a girl to which to expose himself.
 - Person who decides to commit an offense, then drinks to build courage.
 - c. Exhibitionist who is driving to work, suddenly sees a girl, and pulls over and exposes himself.
 - Person gets drunk and into a bar fight.
- 7. Count offenses where there was any chemical use regardless of whether person was intoxicated or

SCHOOL ADJUSTMENT

No like to find out some things about your background. Let's begin with school. How did you like school?

- 9. What was your favorite subject in school? -STOP-
- 9. Favorite subject
 - (a) vocational
 - (b) academic
 - (c) gym
 - (d) no favorite subject

- 9. a. Score business courses as "a".
 - b. Score music or art as "b".

- 10a. Did you have a favorite teacher in high school?
- *10b. What did you like about him (her)?
- 10. Attitude toward teachers
 - (a) no favorité teacher
 - (b) teacher chosen because of certain qualities that the offender admired
 - (c) teacher chosen because of close personal relationship with the teacher
- 11. Offender's school performance
 - (a) no problems
 - (b) learning problems (difficulty performing schoolwork)
 - (c) lack of interest, behavior, or other problems

- 10. b. "She would help kids."
 - c. "She would help me."
- 11. a. Don't use for offender who didn't complete high school.
 - b For offender whose learning problems result from a lack of capacity (not just from lack of interest or behavioral problems). If offender has both a lack of capacity and behavioral problems, score "b". Lack of capacity takes precedence when scoring.

- 11a. How far did you go in school? *11b. Did you have any problems with
- *11b. Did you have any problems with schoolwork? (If offender did not graduate from high school, find they not.)

VOCATIONAL AND RESIDENTIAL ADJUSTMENT

Now I'd like to find out about your work history. What kinds of jobs have you had? (Use grid below to organize items 12 - 14.)

- 12. What is (was) your most recent job before coming into the institution? (Start with most recent job and go backwards until a clear pattern emerges.)
- 12. Primary vocation
 - (a) unskilled labor
 - (b) semi-skilled
 - (c) skilled labor or white collar
 - (d) no employment history (homemaker) (Skip 13 & 14)
 - (e) student or recent graduate (Skip 13 & 14)
- 12. a. Average person could do job without training.
 - Offender's been in the job market for over six months, but has no employment history. (Also score items 13 and 14.)
 - c. Rule out jobs requiring no training and/or experience.
 - d. For homemaker, use prior vocational history, if any. If none, check "d" and skip items 13 and 14.
 - e. Offender was recently (within 6 months) a student and hast't had the opportunity to establish an employment pattent, (Skip items 13 and 14.)

- 13a. How long did you work on your most recent job?
- 13b How long between that job and our previous job?
- 13. Percent of working life where offender was employed full time
 - (a) over 90%
 - (b) over 50% to 90%
 - (c) 50% or less

13. - "Working Life...", i.e. time period society would expect one to be working. Subtract time in school, institutions, etc.

- 14a. What was the reason for leaving your most recent job?
- 14b. Have you had any trouble getting jobs?
- 14. Primary vocational problem
 - (a) none (Can be used only if item 13 is scored "a".)
 - (b) problems due to lack of skills or capacity
 - (c) attitude or other problems
- 14. d. Don't use "a" if working less than 90%.
 - b. "skills", i.e., life skills
 - c. "Because of my drinking problem,"

(Itam 12) (Start with most recent) Jobs and Job Responsibilities		(Item 13a) Duration	(Item 14a) Reason for Leaving
	·		
(Item 13b) Unemployment Interval	>		
424 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1			
(Item 13b) Unemployment Interval	-		
(Item 13b) Unemployment Interval	>		
		1	

- 15a. Before coming here, where did you live?
- 15b. Did you move around much? (Deal with time period after offender turned 18.)
- 16a. Have you had any trouble supporting yourself or received welfare?
- 16b. (If applicable) How did you support yourself when you were unemployed?

- 15. Living stability background
 - (a) essentially stable living arrangements
 - (b) some unstable periods
 - (c) essentially unstable living arrangements
- 16. History of being self-supporting
 - (a) offender has usually been self-supporting
 - (b) offendor has had several periods where he (she) wasn't self-supporting
 - (c) offender has essentially not been self-supporting

- 15. Consider what is stable for the offender's age group.
- 16. Illegal activities and welfare are not counted as self-supporting. For offender who has not had the opportunity to support (her) himself (e.g., homemaker or person living with relatives), estimate the likelihood of (her) his being able to support (her) himself.

FAMILY ATTITUDES

Now of like to know about your childhood. Can you tall me what it was like?

- 17a. How do (did) you get along with your father?
- 17b. How do you feel about your father?
- 18a. If you did something wrong as a teanager, how did your father handle it?
- 18b. What kind of discipline did he use?
- 19a. How do (did) you get along with your mother?
- ow do you feel about your other?
- 20a. If you did something wrong as a teenager, how did your mother handle it?
- 20b. What kind of discipline did she use?
- 21a. Were you ever abused by either of your parents?
- 21b. Did either of them ever go overboard on the punishment? -STOP-
- 22a. How would your parents have described you as a child (before ou were a teenager)?

22b. Did both of your parents see you the same way?

- 17. Present feelings toward father
 - (a) close
 - (b) mixed or neutral
 - (c) hostile
- 1B. Type of discipline father used (during offender's teenage years)
 - (a) verbal or privilege withdrawal
 - (b) permissive (generally let offender do as he (she) pleased)
 - (c) physical
- 19. Present feelings toward mother
 - (a) close
 - (b) mixed or neutral
 - (c) hostile
- 20. Type of discipline mother used (during offender's teenage years)
 - (a) verbal or privilege withdrawal
 - (b) permissive (generally let offender do as he (she) pleased)
 - (c) physical
- 21. Was offender ever physically abused by a biological, step, or adoptive parent
 - (a) yes
 - (b) no
- 22. Parental view of offender (prior to adolescence)
 - (a) good child
 - (b) problem child
 - (c) parents differed

- 17. In multi-father families, use the person whom the offender identifies as father.
 - b. "We get along" (without implication of closeness).
- 18. If the offender didn't live with father or father figure during at least part of his (her) adolescent years, do not rate item 18.
 - b. "He always left it to Mom."
- 19. In multi-mother families, use the person whom the offender identifies as mother.
 - b. "We get along" (without implication of closeness).
- 20. If the offender didn't live with mother or mother figure during at least part of his (her) adolescent years, do not rate Item 20.
 - b. . "She always left it to Dad."
- 21. Item 21 should be based on facts described and not on whether the offender felt abused or not. Use state welfare standards,
- 22. a. No special problems.
 - "Like anybody else."
- b. "My parents were always complaining about me."
 - Seen as "strange kid,"

- 23. How would you describe yourif as a child (before you were a
 lenager)?
- 23. As a child, offender describes self as
 - (a) good child (normal or average)
 - (b) problem child

23. Accept what the offender says even if his (her) behavior does not match his (her) perception, (Examples from tent 22 also apply here.)

- 24a. How do you get along with your brothers and sisters?
- 24b. How do you feel about them?
- 24. General feelings toward tiblings
 - (a) close
 - (b) neutral or mixed
 - (c) hostile
 - (d) no siblings

- 24. Include half-siblings; exclude stepsiblings.
 - b. . "Like some, not others."

- Would you describe your early childhood (before you were a tennager) as happy or unhappy?
 STOP-
- 25. General attitude toward childhood
 - (a) happy
 - (b) not happy

25. Accept the offender's view.

- 26. If you could change anything about your childhood, what would you change?
- 26. Satisfaction with childhood
 - (a) basically satisfied (would change little)
 - (b) dissatisfied with material aspect
 - (c) dissatisfied with self, family, or emotional climate
- 26. c. "I should've gone to school."

- Can you describe your father's personality? (If answer is unclear, ask offender to describe another person he (she) knows well.)
- 27. Offender's description of 'per-
 - (a) multi-faceted
 - (b) superficial (e.g., "good", "bad", "nice", etc.)
- 27. The focus of this item is the complexity with which the offender views people. The ability to describe attributes, or explain the reasons for behavior, is being measured. "Superficial" indicates a lack of capacity to perceive depth in personality and not just an evasion of the question. One or two complex statements are sufficient for an "a" score.
 - a. . "Ambitious and honest,"
 - "Sensitive to others."
 - "Dad was strict because that is the way he was brought up."
 - b. "No-good drunk" (with no further elaboration).
 - · "Kind."
 - · "Don't know,"

INTERPERSONAL RELATIONS

Let's talk about your friends. Did you spend much time with them?

(Direct offender to pre-institution patterns.)

- What were your friends (associates) like?
- *28b. Have any of them been in trouble with the law? (If offender has no current associates, use prior associates.)
- 29a. How did you get along with your
- \$29b. How did they act towards you?

friends?

- 30a. Do you have a closest friend?
- *30b. What do you like best about him (her)? -STOP-
 - Are you satisfied with the way you get along with people?
 - 32. In general, do you tend to trust or to mistrust people? •STOP•
- 33a. Can you tell me about your relationship with women (men)?
- *33b. Did you generally go out with a lot of women (men) or date the same person for long periods?
 - 34. In your relationship with your wife/girlfriend (husband/boy-friend), who tended to make the decisions?

- 28. Offender's associates are
 - (a) essentially non-criminal
 - (b) mixed
 - (c) mostly criminal
- 29. In Interaction with friends, offender is
 - (a) used by others
 - (b) withdrawn
 - (c) other problems
 - (d) normal
- 30. Description of offender's relationship with his (her) closest friend
 - (a) talk (share feelings) or help each other
 - (b) do things together (less emphasis on talking or sharing factions)
- 31. Satisfaction with interpersonal relationships
 - (a) feels satisfied
 - (b) feels dissatisfied
- 32. General outlook toward others
 - (a) basically trusting
 - (b) mixed or complex view
 - (c) basically mistrusting
- 33. Offender's opposite sex relationship pattern generally is
 - (a) long term (over 6 months) or serious relationships
 - (b) short and long term relationships
 - (c) short term, less emotionally involved relationships, or little dating experience
- In opposite sex interactions, offender generally
 - (a) dominates
 - (b) is average or adequate
 - (c) is nonassertive or dominated

- 28. Don't count marijuana use (alone) as criminal.
 - a. Don't use "a" if offender committed offense(s) with accomplices.
- 29. This item should be based on officer's judgement of the quality of the offender's interactions. If the officer thinks the offender is used by friends even though the offender thinks he (she) gets along "ok", check choice "a".
- 30. u. "His character and personality."
 - · "We do things for each other."
 - . "We're like brothers."
 - b. "He's a hunter too."
 - A more action-oriented rela-
- 31. Accept the offender's statement.
- 32. b. A complex view of people (e.g., trusts in some situation: and not in others).

know them."

- .- "I trust people too much."
 "It takes awhile to get to
- 33. c. Short-term relationships with no solid commitments to per

sons of the opposite sex.

34. Officer's judgement. Do not accept the offender's response without exploring his (her) relationships or seeing how some specific decisions are made (e.g. who decides what to do or with whom to socialize; or who controls the money).

FEELINGS

I'd like to ask you about your feelings. Have you had any problems ling your feelings? (Direct offender primarily to pre-institution patterns)

- 35. Do you consider yourself to be a nervous person?
 -STOP-
- 36a. What kind of things got you depressed?
- 38b. What do you do when you're feeling depressed? (If denies, find out how he (she) keeps from getting depressed.)
- 37a. Have you ever thought seriously about hurting or killing yourself?
- 37b. (If offender says yes to above)
 Have you ever tried it?
- What did you do when you were angry with people?

 38b. Have you ever hurt anybody
- 38b. Have you ever hurt enybody when you were angry?
- 39a. Can you describe your personality?
- 39b. What do you like and what do you dislike about yourself?
 -STOP-

- 35. Does offender view self as a nervous (or anxious) person?
 - (a) yes
 - (b) no
- 36. What does offender do when feeling depressed?
 - (a) seeks someone to talk to, or tries to figure it out
 - (b) seeks an activity to distract self
 - (c) drinks or uses drugs
 - (d) isolates self
- 37. Self destructive behavior
 - (a) never seriously contemplated suicide
 - (b) has had definite thoughts of suicide
 - (c) has attempted it
- 38. In handling anger, offender
 - (a) is physically aggressive
 - (b) avoids expression to others or has trouble expressing anger appropriately
 - (c) responds appropriately
- 39. In describing self, offender
 - (a) emphasizes strength
 - (b) emphasizes inadequacy (offender tends to downgrade self)
 - (c) can't describe self

- 40. Openness in discussing feelings
 - (a) discusses as openly as able
 - (b) is evasive

- 35. Accept the offender's statement.
 - a. "I worry a lot."
 - · "I'm hyperactive."
- 36. b. "Forget about them."
 - · "Watch T.V."
 - d. "1 pray."
 - "I go to sleep."
- 37, c. Requires overt action which resulted in self-harm or clear intent toward suicide.
- 38. Based on all sources of reliable information (e.g., offense history) and not just on offender's statement. Physically aggressive problems should take precedence in scoring. If offender says, "I leave," find out if/how he (she) deals with the anger later.

 b. "I break things."
- 39. If the offender gives both positive and negative statements about (him) herself, choose the one emphasized most. If the positive and negative have equal emphasis, choose the first response given.
 - c. Choice "c" is designed to identify the offender who is incapable of showing insight or complexity into (him) herself; (e.g., "I'm okay." (and can't elaborate); "I'm nice"; "I get into too much trouble"; etc.
- 40. a. If the officer felt that the offender was fairly straightforward in talking about his (her) feelings,
 - b. If the officer thought the probationer was evasive.

pression of oftender's openness in discussing feelings.)

(No question asked. Rate your im-

PLANS AND PROBLEMS

- 41. Aside from your legal problems, what will be the biggest problem in your life when you are released?-STOP-
- 41. What does the offender view as his (her) most important problem area right now (excluding legal)?
 - (a) personal
 - (b) relationships
 - (c) vocational-educational (including employment)
 - (d) financial
 - (e) no big problems presently (Score item 42 as "a")

- 41. a. Score "a" if offender names several important problems.
 - · Drinking or drugs.
 - "Get my head together."
 - b. "Get things straightened out with my flancee."
 - "Try to get along better with my parents."

- 42. How do you expect this problem (from item 41) to work out?
- 42. Attitude toward solving problems
 - (a) optimistic; expects to succeed (Include 41.e.)
 - (b) unclear
 - (c) pessimistic; expects to fail
- 42. a. "O.K., because I've got a better paying job."
 - b. . "O.K., I hope."
 - "I'll be O.K. if I get a better paying job."
 - c. Offender is pessimistic about outcome or can't figure out a solution.

- 4 That goals do you have for the uture?
- *43b. What are your plans for achieving your goals? -STOP-
- 43. Future plans
 - (a) short-term goals (most goals can be fulfilled within about 6 months) or no goals
 - (b) unrealistic goals
 - (c) realistic, long-term goals (most goals are well developed and extend beyond 8 months)
- 43. a. "Just live day to day."

 Poorly developed goals with no plans for achieving them.
 - b. Strange, way out, or impossible to achieve goals.
 - c. Offender is able to, 1) set a goal within the realm of possibility and, 2) lists the steps necessary to achieve the goal.

- 44. (No question asked. Bate the item based on follow-through on jobs, education, training programs, treatment programs, atc., based on all sources.)
- 44. Offender usually sticks with, or completes, things he (she) begins
 - (a) yes
 - (b) no

44. Compare to the average offender

- 45a. How will being in the institution affect your life?
- 45b. What do you expect to get from being here? -STOP-
- 45. Offender's general expectations about supervision
 - (a) no effect
 - (b) monetary, counseling, or program help
 - (c) hopes institutionalization will teach him (her) a lesson
 - (d) negative expectations
 - (e) mixed or unclear expecta-

- 45. a. "No effect because now I'm back on the right track."
 - d. "No effect because I don't let anybody tell me what to do."

OBJECTIVE BACKGROUND ITEMS

Instructions: Ask direct questions to obtain the following information.

QUESTIONS

Legal History

46. Age of earliest court appearance:

- (a) 14 or younger
- (b) 15 17
- (c) 18 · 22
- (d) 23 or older

47. Number of prior offenses:

- (a) none
- (b) 1 · 3
- (c) 4 · 7
- (d) 8 or more

Number of commitments to state or federal correctional institutions for one year or longer:

- (a) none
- (b) 1
- (c) 2 or more

49. Time spent under probation or parole supervision:

- (a) none
- (b) 1 year or less
- (c) over 1 year; up to 3 years
- (d) over 3 years

SCORING GUIDE

46. Include juvenile offenses and serious traffic offenses (e.g., drunk driving, hit and run)

47. Exclude the offender's present offense in rating this item. Include juvenile and serious traffic offenses.

48. Include juvenile commitments. Include commitments of a year or longer even if time served was less than a year. Include current institutionalization (if committed for a year or more).

49. Include juvenile supervision.

Medical History

50. (Circle all applicable choices.)

- (a) frequent headaches, back or stomach problems
- (b) serious head injuries
- (c) prior psychiatric hospitalization
- (d) out-patient pyschotherapy
- (e) none of the above

50. a. Vague complaints not diagnosed by a physician

b. Skull fractures

Head injuries which required treatment (beyould X-ray)

d. Professional in-patient or out-patient drug/

	History		
51.	Highest grade completed:		
	(a) 9th or below		•
	(b) 10th to 12th		
	(c) high school graduate (exclude GED)		
	(d) some post high school training leading toward a degre	e	
52.	Did offender ever receive special aducation or remedia	1 <i>52</i> ,	Include special programs for learning deficiencies
	help in school?		(rather than behavior problems). Do not include
	(a) yes		linglish-as-a-second-language.
	(b) no		
Fam	oily History		
53.	Offender was raised primarily by:	53.	Choice "a" requires both natural parents in an intact
	(a) intact biological family		home until offender reached about 16 years of
	(b) other		age.
54.		54.	Includes step and adoptive parents.

IMPRESSIONS

Instructions: On the continuum below, rate the significance of each factor with regard to the offender on two (2) criteria:

1) Does the offender have a problem in this area? 2) Did (does) this problem contribute to the probationer's legal difficulties? In order for the factor to receive an "a" rating, the factor must have significance on both criteria. To receive an "e" rating, the factor must have significance on neither criterion. At least one item must be rated an "a", and at least one item must be rated an "e".

65. SOCIAL INADEQUACY

Socially inept. Unable to perceive the motives and concerns of others. Unable to survive in society and care for self.

(b) (c) (d) (e

Socially adept. Able to assert self and to perceive the motives and concerns of others. Able to survive in society and care for self.

Do not merely rate performa in social situations, Rate Al ITY,

66. VOCATIONAL INADEQUACY

Lacks the capacity to obtain and maintain relatively permanent and reasonably paying employment.

(b) (c) (d) (e

Has the capacity to obtain and maintain relatively permanent and reasonably paying employment.

Do not merely rate job formance, Rate CAPACITY.

67. CRIMINAL ORIENTATION

criminal behavior is an acceptable and common part of the offender's life and s/ne attempts to live off of crime ithout sustained attempts to make it in a pro-social way.

(b) (c) (d) (e)

Criminal behavior is not an acceptable nor common part of his/her life, nor does s/he attempt to live off of crime without trying to make it in a prosocial way.

Do not merely rate the quency of offenses, Rate V UES and ORIENTATION,

68. EMOTIONAL FACTORS

Emotional problems (e.g., chemical dependency, sex, fear, depression, low self-esteem, anxiety, self-destructiveness) contributed highly to the offense (pattern).

(b) (c) (d) (e) Emotional factors did not contribute significantly to the offense (pattern).

69. FAMILY HISTORY PROBLEMS

Parental family problems of childhood and adolescence contributed significantly to the offense (pattern).

(b) (c) (d)

Parental family problems of childhood and adolescence did not contribute significantly to the offense (pattern).

70. ISOLATED SITUATIONAL (TEMPORARY CIRCUMSTANCES)

Unusual or temporary circumstances in the offender's life, which are unlikely to be repeated, contributed significantly to the offense.

(b) (c) (d)

Offense is not a result of unusual or temporary circumstances (i.e., offense is part of a continuing pattern). Do not merely rate infreque of offenses. Rate Ol'ER PATTERN.

INTERPERSONAL MANIPULATION

Consciously uses, controls, and/or manipulates others to gain his/her own ends with little regard for the welfare of others,

) (b) (c) (d)

Misuse of others, manipulation, and control, did not contribute significantly to offense (pattern).

REDUCING PRISON VIOLENCE BY MORE EFFECTIVE INMATE MANAGEMENT: AN EXPERIMENTAL FIELD TEST OF THE PRISONER MANAGEMENT CLASSIFICATION (PMC) SYSTEM

CMC --- STRATEGIES FOR CASE SUPERVISION (Institution Version - 10/86)

The purpose of CMC is to provide the probation professional with an efficient and effective case management system. CMC includes procedures for developing individualized strategies for the quality supervision of adult offenders. This process is accomplished through the completion of the three system components: an assessment procedure, a supervision planning process, and supervision according to one of five distinct strategies, depending on individualized case needs.

This assessment instrument was developed in 1975 and has been tested and revised regularly. It has been standardized on an adult probation and parole population and meets or exceeds the highest standards of research and testing design. Therefore, certified instruction is required for its use. It is not to be used with juveniles nor for any other than its stated purpose.

CMC INSTRUCTIONS

There are four parts to the CMC assessment instrument. Whenever possible, the following sequence (A to D) should be followed.

- A. Attitude interview (45 items)
- B. Objective history (11 Items)
- C. Behavioral observations (8 items)
- D. Officer impressions of contributing factors (7 items)

The Attitude Section

1 One:

A Seall-STRUCTURED INTERVIEW with suggested questions has been developed to elicit attitude information about the offense, the offender's background, and about present plans and problems. The average interview takes about forty-five minutes and the scoring about five minutes.

Use a natural, open, conversational style of interviewing which is comfortable for both you and the probationer. If the probationer presents some important or interesting information requiring follow-up, feel free to do so before returning to the structured sequence. While stressing free-flowing communication, some structuring is required to insure the reliability and validity of the instrument. Therefore, make every effort to preserve the meaning of the questions when transposing them into your own words.

In the interview, each section is introduced by one or two open-ended questions which are intended to encourage discussion on a particular subject. If the information needed to score the items is not obtained from the open-ended questions, one or two specific questions are provided for each item. If those questions fail to elicit the needed information, continue to inquire with increasingly direct questions unless you see the word -STOP-. "-STOP-" means to discontinue inquiry (except to repeat or clarify a mis-unilerstood question).

For some items, "a" and "b" questions are included. If the "b" question is asterished (*), always ask it unless the answer to the "a" makes the "b" questions meaningless (e.g., "no" to question 10a). If question "b" is not asterished, ask it if the needed information was not elicited from question "a".

Column Two:

THE ITEM OBJECTIVES AND RESPONSES are listed in column two. Many times the suggested questions will approach the item objective in an indirect manner in order to elicit the most valid response.

on Three:

ORING GUIDE is included to provide criteria and assistance in scoring ambiguous responses. When scoring, you must choose only one alternative for each item. If you cannot choose an alternative, do not rate the item.

Unless otherwise instructed in Scoring Guide, consider information learned previously in the interview to score each item. Also, unless otherwise instructed, base scoring on general patterns of behavior and attitudes. The score should be based on the interviewer's interpretation of the information.

ATTITUDES ABOUT OFFENSE

Could you tell me about the most recent offense that got you into trouble?

QUESTIONS

- 1a. How did you get involved in this offense?
- 1b. (If denied) What did the police say that you did?

- 2a. blow did you decide to commit offense?
- 2b. Could you tell me more about the circumstances that led up to the offense?

RESPONSES

- Motivation for committing the offanse
 - (a) emotional motivation (e.g., anger, sex offense, etc.)
 - (b) material (monetary) motivation
 - (c) both emotional and material motivation

- 2. Acceptance of responsibility for current offense
 - (a) admits committing the offense and doesn't attempt excuses
 - (b) admits committing the offense, but emphasizes excuses (e.g., drinking, influence by friends, family problems, etc.)
 - (c) denies committing the offfense

SCORING GUIDE

- 1. a. Possession of drugs for own use.
 - Assault (not for robbery).
 - b. Prostitution.
 - Cur theft (except for joy riding).
 - Selling drugs or stealing to support a habit.
 - c. Stealing from parents for revenge.
 - Stealing primarily for peer acceptance.
 - Man who won't pay alimony primarily because he's angry with his ex-wife.
- 2. a. Explains circumstances but takes responsibility.
 - b. Blames circumstances and does not take responsibility.
 - c. Offenders who deny any significant aspect of the offense are scored "c" (e.g., the probationer admits that he helped to fimmy a car window but denies responsibility for removing valuables because his friends removed them).

OFFENSE PATTERN

I'd like to talk to you about your prior offenses. Have you been in trouble before? (If prior offenses, obtain a complete picture of probationer's offense stylluding current offense, when scoring items 4 - 8.)

- 4a. What prior offenses are on your record? (Most recent first)
- * 4b. Were you ever in trouble as a juvenile?
 (List on grid below)
- 4. Offense and severity
 - (a) no prior offenses (Skip isams 5,6,7, and 8.1
 - (b) mainly misdameanors
 - (c) no consistent pattern
 - (d) mainly felonies

- 4-8. Include juvenile and serious traffic offenses (e.g., drunk driving). Don't count dismissals for "not guilty".
- 4. b. Should not be used if offender has more than two felonics.

 (Use choice "c" or "d".)
 - d. Over 50% of offender's offenses are felonies.

Offense	(Item 4) Fel./Misd.	(Item 5) Assaultive?	Circumstances of Offense	(Item 6) Planned?	' (Item 7) Chemicals?	(Item 8) Accomplices?
				·		

- 5a. Have you ever been armed or hurt someone during these offenses?
- "Miles Bolid g. www. wayer also weekens compromessors
- 6a. How did you decide to commit the most recent of your prior offenses? (Discuss offenses Individually until a clear pattern emerges.)
- 6b. Could you tell me more about the circumstances that led up to the offense?

- 5. Was offender ever involved in an offense where he (she) was armed, assaultive, or threatened
 - (a) yes
 - (b) no
- 6. Offenses were generally
 - (a) planned
 - . (b) no consistent pattern
 - (c) impulsive

- 5-8 Use current and prior offense factors to score 5-8.
 - factors.
 - a. Exhibitionist who drives around in a car looking for a girl to which to expose himself.
 - Person who decides to comnit an offense, then drinks to build courage.
 - c. Exhibitionist who is driving to work, suddenly sees a girl, and pulls over and exposes himself.
 - Person gets drunk and into a bar fight.

- B. Did you do the offense alone or with others? (Discuss each of-
- 8. Offenses were generally committed
 - (a) alone
 - (b) no consistent pattern
 - (c) with accomplices

SCHOOL ADJUSTMENT

Now, I'd like to find out some things about your background. Let's begin with school?

- 10a. Did you have a favorite teacher in high school?
- 10b. What did you like about him (her)?
- 11a. How far did you go in school?

 11b. Did you have any problems with schoolwork? (If offender did not graduate from high school, find out why not.)

- 10. Attitude toward teachers
 - (a) no favorite teacher
 - (b) teacher chosen because of certain qualities that the offender admired
 - (c) teacher chosen because of close personal relationship with the teacher
- 11. Offender's school performance
 - (a) no problems
 - (b) learning problems (difficulty performing schoolwork)
 - (c) lack of interest, behavior, or other problems

- 10. b. "She would help kids."
 c. "She would help me."
- 11. a. Don't use for offender who didn't complete high school.
 - b For offender whose learning problems result from a lack of capacity (not just from lack of interest or behavioral problems). If offender has both a lack of capacity and behavioral problems, score "b". Lack of capacity takes precedence when scoring.

VOCATIONAL AND RESIDENTIAL ADJUSTMENT

Now I'd like to find out about your work history. What kinds of jobs have you had? (Use grid below to organize Items 12 - 14.)

- 12. What is (was) your most recent job before coming into the institution? (Start with most recent job and go backwards until a clear pattern emerges.)
- 12. Primary vocation
 - (a) unskilled labor
 - (b) semi-skilled
 - (c) skilled labor or white collar
 - (d) no employment history (homemaker) (Skip 13 & 14)
 - (e) student or recent graduate (Skip 13 & 14)
- 12. u. Average person could do job without training.
 - Offender's been in the job market for over six months, but has no employment history. (Also score items 13 and 14.)
 - c. Rule out jobs requiring no training and/or experience.
 - d. For homemaker, use prior vocational history, if any. If none, check "d" and skip items 13 and 14.
 - e. Offender was recently (within 6 months) a student and hasn't had the opportunity to establish on employment pattern, (Skip items 13 and 14.)

- 13a. How long did you work on your most recent job?
- 13b. How long between that job and our previous job?
- time
 (a) over 90%

offender

- (b) over 50% to 90%
- (c) 50% or less

13. - "Working Life...", i.e. time period society would expect one to be working. Subtract time in school, institutions, etc.

- 14a. What was the reason for leaving your most recent job?
- 14b. Have you had any trouble getting jobs?
- 14. Primary vocational problem
 - (a) none (Can be used only if item 13 is scored "a".)

13. Percent of working life where

was employed full

- (b) problems due to lack of skills or capacity
- (c) attitude or other problems
- 14. d. Don't use "a" if working less than 90%.
 - b. "skills", i.e., life skills
 - c. · "Because of my drinking problem,"

	(Item 12) (Start with most recent) Jobs and Job Responsibilities		(Item 13a) Duration	(Item 14a) Reason for Leaving
				,
	(Item 13b) Unemployment interval	>		
0	(Item 13b) Unemployment Interval	>		
	(Item 13b) Unemployment Interval	>		
				•

- 15a. Before coming here, where did you live?
- 15b. Did you move around much? (Deal with time period after affender turned 18.)
- 16a. Have you had any trouble supporting yourself or received welfare?
- 16b. (If applicable) How did you support yourself when you were unmployed?

- 15. Living stability background
 - (a) essentially stable living arrangements
 - (b) some unstable periods
 - (c) essentially unstable living arrangements
- 16. History of being self-supporting
 - (a) offender has usually been self-supporting
 - (b) offender has had several periods where he (she) wasn't self-supporting
 - (c) offender has essentially not been self-supporting

- 15. Consider what is stable for the offender's age group.
- 16. Illegal activities and welfare are not counted as self-supporting. For offender who has not had the opportunity to support (her) himself (e.g., homemaker or person living with relatives), estimate the likelihood of (her) his being able to support (her) himself.

FAMILY ATTITUDES

Now

e to know about your childhood. Can you tell me what it was like?

- 18a. If you did something wrong as a ternager, how did your father handle it?
- 18b. What kind of discipline did he use?
- 1B. Type of discipline father used (during offender's teenage years)
 - (a) verbal or privilege withdrawal
 - (b) permissive (generally let offender do as he (she) pleased)
 - (c) physical

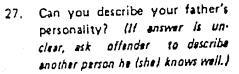

18. If the offender didn't live with father or father figure during at least part of his (her) adolescent years, do not rate item 18.
b. - "He always left it to \lambda lom."

- Na. Were you ever abused by either of your parents?
- 1b. Did either of them ever go overboard on the punishment? -STOP-
- 21. Was offender ever physically abused by a biological, step, or adoptive parent
 - (a) yes
 - (b) no

21. Item 21 should be based on facts described and not on whether the offender felt abused or not. Use state welfare standards.

- 24a. How do you get along with your brothers and sisters?
- 24b. How do you feel about them?
- 24. General feelings toward siblings
 - (a) close
 - (b) neutral or mixed
 - (c) hostile
 - (d) no siblings

- 24. Include half-siblings; exclude stepsiblings.
 - b. . "Like some, not others."

27. Offender's description of 'personality

- (a) multi-faceted
- (b) superficial (e.g., "good", "bad", "nice", etc.)

27. The focus of this item is the complexity with which the offender views people. The ability to describe attributes, or explain the reasons for behavior, is being measured. "Superficial" indicates u lack of capacity to perceive depth in personality and not just an evasion of the question. One or two complex statements are sufficient for an "a" score.

a. . "Ambitious and honest."

- "Sensitive to others."

"Dad was strict because that is the way he was brought up."

b. - "No-good drunk" (with no further elaboration).

- . "Kind."
- . "Don't know."

INTERPERSONAL RELATIONS

Let's talk about your friends. Did you spend much time with them? (Direct offender to pre-institution patterns.)

- 28a t were your friends (associates)
- *28b. Have any of them been in trouble with the law? (If offender has no current associates, use prior associates.)
- 2B. Offender's associates are
 (a) essentially non-criminal
 - (b) mixed
 - (c) mostly criminal

- 28. Don't count marijuana use (alone) as criminal.
 - a. Don't use "a" if offender committed offense(s) with accomplices.

- 29a. How did you get along with your friends?
- *29b. How did they act towards you?

30a. Do you have a closest friend?

(her)? -STOP-

*30b. What do you like best about him

- 29. In Interaction with friends, offunder is
 - (a) used by others
 - (b) withdrawn
 - (c) other problems
 - (d) normal
- 30. Description of offender's rela
 - friend
 (a) talk (share feelings) or help
 each other

tionship with his (her) dosest.

(b) do things together (less emphasis on talking or sharing facilities)

- 29. This item should be based on officer's judgement of the quality of the offender's interactions. If the officer thinks the offender is used by friends even though the offender thinks he (she) gets along "ok", check choice "a".
- 30. a. "His character and personality."
 - · "We do things for each other."
 - . "We're like brothers."
 - b. . "He's a hunter too."
 - A more action-oriented rela-

- 32. In general, do you tend to trust or to mistrust people? -STOP-
- 32. General outlook toward others
 - (a) basically trusting
 - (b) mixed or complex view
 - (c) basically mistrusting

- 32. b. A complex view of people (e.g., trusts in some simulation and not in others).
 - .- "I trust people too mucli.
 - "It takes awhile to get t know them."

Now, I'd like to ask you about your feelings. Have you had any problems ng your feelings? (Direct oflender primarily to pre-institution patterns)

- 36a. What kind of things got you depressed?
- 38b. What do you do when you're feeling depressed? (If denies, find out how he (she) keeps from getting depressed.)
- 38a. What did you do when you were anary with people?
- 38b. Have you ever hurt anybody when you were angry?
- 39a you describe your personal-
- 39b. What do you like and what do you dislike about yourself?
 -STOP-

40. (No question asked, Rate your impression of offender's openness in discussing feelings.)

- 36. What does offender do when feeling depressed?
 - (a) seeks someone to talk to, or tries to figure it out
 - (b) seeks an activity to distract self
 - (c) drinks or uses drugs
 - (d) isolates self
- 38. In handling anger, offender
 - (a) is physically aggressive
 - (b) avoids expression to others or has trouble expressing anger appropriately
 - (c) responds appropriately
- 39. In describing self, offender
