CONSTITUTIONAL AND STATUTORY PROVISIONS FOR THE JUDICIAL COUNCIL

The Judicial Council was originally provided for in Section 1a of Article VI of the State Constitution adopted November 2, 1926. This section was amended November 8, 1960. On November 8, 1966, a revised Article VI was adopted and the provisions of former Section 1a were amended and renumbered as Section 6, to read:

Sec. 6. The Judicial Council consists of the Chief Justice as chairman and one other judge of the Supreme Court, 3 judges of courts of appeal, 5 judges of superior courts, 3 judges of municipal courts, and 2 judges of justice courts. each appointed by the chairman for a 2-year term; 4 members of the State Bar appointed by its governing body for 2-year terms; and one member of each house of the Legislature appointed as provided by the house.

Council membership terminates if a member ceases to hold the position that qualified him for appointment. A vacancy shall be filled by the appointing power for the remainder of the term.

The council may appoint an Administrative Director of the Courts, who serves at its pleasure and performs functions delegated by the council or its chairman, other than adopting rules of court administration, practice and procedure.

To improve the administration of justice the council shall survey judicial business and make recommendations to the courts, make recommendations annually to the Governor and Legislature, adopt rules for court administration, practice and procedure, not inconsistent with statute, and perform other functions prescribed by statute.

The chairman shall seek to expedite judicial business and to equalize the work of judges; he may provide for the assignment of any judge to another court but only with the judge's consent if the court is of lower jurisdiction. A retired judge who consents may be assigned to any court.

Judges shall report to the chairman as he directs concerning the condition of judicial business in their courts. They shall cooperate with the council and hold court as assigned.

Other constitutional provisions dealing with the Judicial Council or its Chairman are found in Article VI, Sections 15 and 18(e), and in Article XXIV, Section 4. There are also a number of statutory provisions referring to the Judicial Council.* Rules of practice and procedure adopted by the Judicial Council are published commercially and by the State Printer as the California Rules of Court.

Statutory provisions are found in: Civil Code §§ 3259, 4001, 4363; Code Civ. Proc., §§ 75, 77, 1171, 1171, 170, 170(5)(6), 170.6, 170.8, 201a, 204b, 204d, 394, 575, 583, 901, 911, 1034, 1089, 1178; Evid. Code § 451; Gov. Code §§ 18004, 19141, 68070-72, 68110, 68150, 68500-12, 68540-48, 68551-52, 68701, 68841, 69508, 69752, 69796, 71042, 71180.4, 71601, 71601.3, 71610, 72274, 75002, 75003, 75028, 75060.6; Pen. Code §§ 553.9, 1029, 1053, 1235, 1239, 1241, 1246, 1247k, 1432.1, 1468, 1471, 1506, 1507; Prob. Code §§ 303, 1232; Pub. Util. Code § 25051; Veh. Code §§ 40513, 40600; Welf, & Inst. Code §§ 569, 570.

1971 REPORT OF THE JUDICIAL COUNCIL OF CALIFORNIA

INTRODUCTION

The Judicial Council in the discharge of its constitutional duty is required to survey the condition of business in the several courts and to report and make appropriate recommendations to the Governor and the Legislature at the commencement of each general session. (Cal. Const., Art. VI, Sec. 6.) This 1971 Judicial Council Report contains the Council's report and its recommendations to the 1971 General Session of the Legislature for amendment of certain laws relating to practice and procedure.

Continuing the practice commenced in the Nineteenth Biennial Report, the Annual Report of the Administrative Office of the Courts, which is the staff agency serving the Council, is also included. The annual report contains summaries of the continuing activities of the Judicial Council and its staff. It also includes detailed statistical data on the volume of business in all the courts for the fiscal year ending June 30, 1970.

PART ONE JUDICIAL COUNCIL REPORT

CHAPTER 1

PROCEDURE FOR TRANSFER OF CRIMINAL CASES

Under the Penal Code when a criminal case is pending in a superior court and the court finds that the defendant cannot obtain a fair and impartial trial in the county, upon application of the defendant the case must be transferred to "the proper court of some convenient county free from a like objection."¹ A similar provision authorizes the transfer of a case from a justice court to another judicial district² These statutes implement constitutional principles which have been held to require a transfer from a trial court when there is a "reasonable likelihood" that a fair and impartial trial cannot be held therein.³ Although there is no statutory provision of this kind relating to the municipal courts, the constitutional requirement undoubtedly applies.

The number of criminal cases being transferred to obtain a fair trial and avoid the effects of prejudicial pretrial publicity has greatly increased in recent years, undoubtedly as a result of the court decisions of the last few years.⁴ This increase has underscored the inadequacies of the existing statutory procedures governing the transfer of criminal cases.

Perhaps the most significant problem is the failure of the California statutes to provide an orderly system for determining where to transfer a case. Present law does not require prior consultation with a court before transferring a case to it, nor is there any requirement that an attempt be made to find a court that is not only free from prejudice but also whose calendar is relatively uncongested. Although in most cases as a matter of courtesy the transferring court has notified the receiving court before ordering the transfer, there have been instances where transfers were made to heavily congested courts without prior notice when there were other courts that could have more easily accepted the burden. In such instances the Chairman of the Judicial Council may thereafter receive urgent requests to provide judicial assistance to the receiving court to prevent its calendar from being completely disrupted.⁵

- Pen Code §§ 1033, 1035.
 Pen. Code §§ 1431.
 Fain v. Superior Court (1970) 2 Cal. 3d 46; Maine v. Superior Court (1968) 68 Cal. 2d 375. See Sheppard v. Maxwell (1966) 384 U.S. 333. The Standards relating to Fair Trial and Free Press adopted in 1968 by the American Bar Association recommend that a change of venue or continuance be granted whenever it is determined that because of the dissemination of potentially prejudicial there is a reasonable likelihood that a fair trial cannot be prejudicial material, there is a reasonable likelihood that a fair trial cannot be had. (Standard No. 3.2).

and. (Standard No. 3.2).
See cases cited n.3. See also People v. Tidwell (1970) 3 Cal. 3d 62; Smith v. Superior Court (1969) 276 Cal. App. 2d 145.
As a temporary measure the Judicial Council at its May 1970 meeting approved the publication in the A.G.C. Newsletter of a recommended procedure to provide prior

publication in the A.O.C. Newsletter of a recommended procedure to provide prior notification pending enactment or adoption of transfer procedures. Following is the procedure recommended in the Newsletter article: "The Judicial Council recommends that before transferring a case a court should contact the presiding or sole judge of the court to which it intends to order a transfer and advise him of the impending transfer. If the judge so con-tacted advises that there are special reasons why the transfer should not be made, the transferring court should notify the Chairman of the Judicial Council. This will give the Chairman an opportunity to suggest that the case be trans-ferred to another court if that he advisable or to provide some assistance to the "These procedures do not limit the discretion of the transferred case is tried. "These procedures do not limit the discretion of the transferring court de-termine where to send the case. The Judicial Council suggests, however, that they

be followed as a matter of courtesy to other courts and as an aid to the efficient administration of justice."

13

Present statutes governing transfers of criminal cases are also inadequate in that they do not cover municipal court transfers. Apparently such transfers have been made under the constitutional mandate, but the failure of the law to set forth any procedures has left a troublesome void.

The existing provisions of law also appear to be deficient and unfair . insofar as the costs of trying a transferred case are concerned. When a criminal case is transferred from a municipal or justice court in one county to a court in another county the law makes no provision for payment of costs by the county in which the case originated. As previously stated there is no legislation at all with regard to transfers from a municipal court, and Section 1431 of the Penal Code governing transfers from a justice court is silent with regard to costs.

Section 1039 of the Penal Code provides that when a case is transferred by a superior court "the costs accruing upon such removal and trial are a charge against the county in which the indictment or information was found." The trial "costs" reimbursable under this prowision, however, have been interpreted to include only such charges as costs and fees of jurors and witnesses, reporters' fees and expenses of the transcript and fees of assigned counsel. Salaries of the judge, court officials and attaches and the public defender are not reimbursable.⁶ Moreover, if a judge is assigned to aid the court to which a case is transferred the cost of the assigned judge must be paid by the county in which the trial is held and not the county in which the case originated. Thus, a substantial financial burden may be placed on a county to which such transfers are made.⁷

The limited reimbursement provision of Section 1039 may be contrasted with the broad provisions of Section 4700 of the Penal Code which provides for the reimbursement of all costs incurred by a county when an inmate of a state penal institution is tried for a crime committed in the institution or for an escape. These costs include a pro rata share of the salaries of the judge and court attaches, costs of legal representation and costs of maintaining and transporting the defendant.

Proposed Transfer Procedures

It is proposed that these defects in existing transfer procedures be remedied by the enactment of legislation and the adoption of court rules as follows:

- (1) The Penal Code would be amended to provide for the transfer of a criminal case pending in any trial court when there is a reasonable likelihood that a fair and impartial trial cannot be held in that court.8
- (2) Either party would be permitted to apply for a transfer. While existing provisions of the Penal Code permit such application by the defendant only, there may be occasions when pretrial pub-

licity or other causes prevent the state from obtaining a fair trial.⁹ The Standards adopted by the American Bar Association provide that a change of venue may be granted on motion of either the prosecution or the defense "except as federal or state constitutional provisions otherwise require." The quoted limitation was included in the Standard because the constitutions of some states contain a provision granting a right to trial by a jury of the county or vicinage where the offense occurred.¹⁰ In the states with such a constitutional provision the courts have divided as to whether a change of venue may be permitted without the defendant's consent.¹¹ The California Constitution contains no such provision expressly requiring trial in the county or the vicinage and despite an early California case to the contrary there appears to be no substantial question as to the validity of the proposed statute permitting a transfer on the request of the prosecution.12

- (3) The legislation would provide further that the Judicial Council shall adopt rules prescribing the procedure for transferring cases. This would permit a desirable flexibility of procedure and follow the trend toward use of Judicial Council rules to implement a statutory framework, as for example in the new Family Law.13
- (4) The proposed legislation would also add language similar to that of Section 4700 of the Penal Code to provide for reimbursement of all costs of the county to which a criminal case is transferred. Claim for such costs would be made on a form approved by the Judicial Council.¹⁴ In addition. Section 4700 of the Penal

See American Bar Association, Project on Minimum Standards for Criminal Justice, Standards Relating to Fair Trial and Free Press (1966) 124.

 Pa. 558.
- Pa. 558.
 ¹³ In People v. Powell (1891) 87 Cal. 348, the Court held that a statute authorizing a change of venue on application of the district attorney on the grounds that no fury could be obtained for the trial of the defendant in the county where the action was pending was unconstitutional. It was the Court's view that Art. I, § 7 of the State Constitution providing that the right to trial shall be secured to all and remain inviolate included the right to a trial by jury chosen from the county or vicinage of the offense. Although never expressly overruled by the Supreme Court, the Powell case has been impliedly repudiated by various cases permitting the trial of defendants in counting jurisdiction in such cases. (See begin being count, the Fowen case has been inpliedly lepulated by various cases oc-curred in accordance with legislation granting jurisdiction in such cases. (See People v. Richardson (1934) 138 Cal. App. 404, 406, citing People v. Prather (1901) 134 Cal. 386 and Bradford v. Glenn (1922) 188 Cal. 350; see also People v. York (1962) 207 Cal. App. 2d 880). The Richardson and York cases upheld the provision of the Penal Code (§ 4701, formerly § 787) granting jurisdiction to any county in the state to try a defendant charged with escaping from a state prison. In 1951 a provision very similar to that held unconstitutional in People v. Powell and deleted by the Legislature in 1905 was added to the Penal Code as Section 1033.5. Moreover, there is considerable authority that under the common law the prosecution had a right equal to that of the defendant to move for a change of venue in order to obtain an impartial trial (see n. 12, supra). It also appears that the framers of the U.S. Constitution did not assume that the right to jury trial included the right to a jury of the vicinage. A provision granting a right to be tried by a jury of the vicinage was rejected in favor of the present provision of the Sixth Amendment granting the defendant the right to a trial by an impartial jury "of the state and district where the crime shall have been committed" (see Williams v. Florida (1970) 399 U.S. 78, 93-97).

have been committed" (see Williams v. Florida (1970) 399 U.S. 78, 93-97).
** Clv. Code § 4001.
** It is proposed that the form contain provisions governing its preparation (by the court clerk), certification (by the judge) and submission to the auditor for forwarding to the county in which the case originated. Incorporation of these provisions in the form makes it unnecessary to include in the proposed legislation all the statutory detail now found in Pen. Code § 1039.1 (as amended 1970 Stats., Ch. 193).

⁴⁶ Ops. Cal. Atty. Gen. 40 (1955).
7 It may be noted that Code Civ. Proc. § 397 authorizing the transfer of civil cases when a fair and impartial trial cannot be had in the court in which the case is pending contains no provision for reimbursement of costs. It is probable, however, that such transfers are rare, and, of course, certain of the costs in a civil case are paid by the parties.
8 See note 3 surger, The "reasonable likelihood" standard was adopted by the Call.

Bee note 3, supra. The "reasonable likelihood" standard was adopted by the California Supreme Court in People v. Maine (1968) 68 Cal. 2d 375, and made applicable to all cases tried after the Maine decision became final.

15

JUDICIAL COUNCIL OF CALIFORNIA

Code and Section 15202 of the Government Code relating to reimbursement of costs by the state 15 would be amended to authorize reimbursement to the county which has been charged with the costs when a case is transferred.¹⁶

(5) In accordance with the proposed legislation, rules would be adopted by the Judicial Council governing such transfers. The proposed rules would follow substantially the provisions of Sections 1034-1038 of the Penal Code but would provide further that when a trial court determines that a criminal action must be transferred the court shall advise the Administrative Director of the Courts of the pending transfer. Upon being so advised the Director would suggest a court or courts which would not be unduly burdened by the trial of the case.

By reason of the collection and compilation of court statistics, the Administrative Director of the Courts is in a position to determine which courts would be able to assume the burden of a transferred case. His responsibility in the matter, however, would be strictly limited to suggesting a court which is not overly congested. He would act pursuant to authority delegated to him by the Judicial Council in order to expedite judicial business and equalize the workload of the judges, and his suggestion of a court would not represent a determination on his part concerning the holding of a fair and impartial trial. Occasionally it is possible that the transferring court will have reason to believe that the case should not be transferred to the court named by the Director, e.g., if it appears that similar prejudicial publicity has occurred there. For this reason under the proposed rule the trial court would retain full discretion to determine where to transfer the case and would not be limited to the court suggested by the Director.

It is proposed that the Administrative Director of the Courts rather than the Chairman of the Judicial Council be given authority regarding transfers since the Chairman is also Chief Justice and may at a future time be required to hear an appeal or other proceeding in the case and rule on issues relating to the transfer.

Recommendation

The following legislation and amendments to the California Rules of Court would implement the recommendations:

Legislation

An act to amend Section 15202 of the Government Code and to amend Sections 1431 and 4700 of, to add Chapter 6 (commencing with Section 1033) to Title 6 of Part II of, and to repeal Chapter 6 (commencing with Section 1033) of Title 6 of Part II of, the Penal Code, relating to change of venue in criminal cases.

The people of the State of California do enact as follows:

SECTION 1. Section 15202 of the Government Code is amended to read :

15202. A county in which is conducted a trial or trials of a person for the offense of homicide or which is responsible for the cost thereof may apply to the Director of Finance for reimbursement of the costs incurred by the county in excess of the amount of money derived by the county from a tax of ten cents (\$.10) on each one hundred dollars (\$100) on the property assessed for purposes of taxation within the county.

No reimbursement shall be made pursuant to this section if the county, in the opinion of the Director of Finance, has sufficient funds in its treasury, not allocated or committed for other purposes, which could be used to pay such costs.

SEC. 2. Chapter 6 (commencing with Section 1033) of Title 6 of Part II of the Penal Code is repealed.

SEC. 3. Chapter 6 (commencing with Section 1033) is added to Title 6 of Part II of the Penal Code, to read:

CHAPTER 6. CHANGE OF VENUE

1033. A criminal action pending in a trial court shall be transferred on application of a party when there is a reasonable likelihood that a fair and impartial trial cannot be had in the court in which the case is pending. The Judicial Council shall adopt rules governing such transfers.

1034. When a criminal action is pending in a trial court, the court may of its own motion, or on petition of any of the parties to the proceeding, order a change of venue to an adjoining judicial district in the same county or to an adjoining county, as the case may be, whenever it appears as a result of the exhaustion of all the jury panels called that it will be impossible to secure a jury to try the cause in the original judicial district or county.

1035. If the defendant is in custody and the case is transferred to a court in another county, the defendant shall be forthwith transferred by the sheriff of the county where he is imprisoned to the custody of the sheriff of the county to which the case is transferred.

1036. When a criminal action is transferred to another county pursuant to this chapter all costs incurred by the county receiving the case, which are not payable by the Department of Corrections pursuant to Section 4700 of this code, for the transfer, preparation and trial of the case, the guarding, keeping and transportation of the prisoner, any appeal or other proceeding relating to the case and the execution of the sentence shall be a charge against the county in which the case originated.

1037. Claim for such costs shall be made on a form approved by the Judicial Council and shall be forwarded to the treasurer and auditor of the county in which the case originated. The treasurer shall pay the amount of such costs out of the general fund of his county.

SEC. 4. Section 1431 of the Penal Code is amended to read:

1431. If the action or proceeding is in a justice court, a change of the place of trial may be had upon the filing of an affidavit at least seven days prior to the date set for trial of the action or proceeding, except in felony cases:

1. When it appears from the affidavit of the defendant that he has reason to believe, and does believe, that he cannot have a fair and

¹⁵ Section 1520? provides for reimbursement to a county for the costs of a homicide trial when the costs are in excess of ten cents on the local tax rate.
¹⁹ In addition, Section 1033.5 of the Penal Code authorizing the transfer of a superior court case because of the exhaustion of all jury panels would be renumbered as Section 1034 and extended to cover cases in the municipal and justice courts.

JUDICIAL COUNCIL OF CALIFORNIA

impartial trial before the judge about to try the case, by reason of the prejudice or bias of such judge, the cause must be transferred to another judge of the same or an adjoining judicial district.

2. When it appears from affidavits that defendant cannot have a fair and impartial trial, by reason of the prejudice of the citizens of the judicial district, the cause must be transferred to a judge of a judicial district where the same prejudice does not exist.

2. 2. When it appears from affidavits of the prosecution that such change will be for the convenience of the people and of the defendant and when the defendant and his attorney, if any, consent in writing, to such change, the cause must be transferred to a judge of another judicial district in the same county.

A copy of the affidavit must be served upon the other party to the action or proceeding at least six days prior to the date set for the trial of the action or proceeding.

Sec. 5. Section 4700 of the Penal Code is amended to read:

4700. Whenever a trial is had of any person under any of the provisions of Section 4530 of this code, whenever a hearing is had on the return of a writ of habeas corpus prosecuted by or on behalf of any prisoner in the state prison, whenever a prisoner in the state prison is tried for any crime committed therein, or whenever a prisoner transferred to a county correctional facility pursuant to Section 2910 or to a community correctional center pursuant to Section 6253 is prosecuted for a crime committed in such institution or for escape, and whenever a trial or hearing is had on the question of the insanity of any such prisoner, the county clerk of the a county where such trial or hearing is had incurring any costs in connection with such matter must make out a statement of all the costs incurred by the county for the investigation, and the preparation of the trial, and actual trial of such case, or of the hearing on the return of such writ, and all guarding and keeping of such prisoner, while away from the prison, the transportation of the prisoner to and from the prison (when such transportation was performed by the county), the costs of appeal, and of the execution of the sentence of such prisoner, properly certified to by a judge of the superior court of such county; which. The statement must be sent to the Department of Corrections for its approval;, and after such approval, said department must cause the amount of such costs to be paid out of the money appropriated for the support of the Department of Corrections, to the county treasurer of the county where such trial or hearing was had incurring such costs.

Recommended Amendments to California Rules of Court

Rules 840 to 844, inclusive, would be added to the California Rules of Court as follows:

Rule 840. Transfer of criminal cases

Rules 840 to 844, inclusive, shall govern the transfer of criminal cases pursuant to Section 1033 of the Penal Code.

Rule 841. Application and hearing

Application for the transfer of a criminal case shall be by affidavit filed with the court setting forth the facts upon which the application for transfer is made. A copy shall be served upon the adverse party at least one day prior to the hearing on the application. At the hearing counteraffidavits may be filed. At the request of the defendant the application shall be heard and determined in his absence when it appears that popular prejudice is so great as to endanger his personal safety.

Rule 842. Selection of court

When the court in which the action is pending determines that there is a reasonable likelihood that a fair and impartial trial cannot be had therein, it shall advise the Administrative Director of the Courts of the pending transfer. Upon being advised the Director shall, in order to expedite judicial business and equalize the work of the judges, suggest a court or courts that would not be unduly burdened by the trial of the case.

Rule 843. Order of transfer

The order of transfer shall be entered upon the minutes or the docket and the clerk shall immediately make out and transmit to the court to which the action is transferred a certified copy of the order of transfer record, pleadings and proceedings in the action including the undertakings for the appearance of the defendant and of the witnesses.

Rule 844. Proceedings in court receiving case

The court to which the action is transferred shall proceed as if the action had been commenced in such court. If it is necessary to have any of the original pleadings or other papers before such court, the court from which the action is transferred shall at any time upon application of the district attorney or the defendant, order such papers or pleadings to be transmitted by the clerk, a certified copy thereof being retained.

CHAPTER 2

SEALING OF CRIMINAL TRANSCRIPTS BEFORE TRIAL

In Craemer v. Superior Court (1968) 265 Cal.App.2d 216 the Court of Appeal held that a trial court may issue an order temporarily restricting public inspection of grand jury transcripts. In that case the trial court had, in effect, ordered a grand jury transcript to be permanently sealed from public inspection. The trial judge had also stated that he planned to seal all future transcripts to eliminate pretrial publicity by the press in criminal cases.

In a mandamus proceeding the petitioners (a reporter and the editor of a local newspaper) contended that although the Penal Code required the transcript to be withheld from the public before the defendants were taken into custody, thereafter the transcript must be open to public inspection.¹

The appellate court found that under California statutes grand jury transcripts were public records, and noted further that in the absence of a "contrary statute or countervailing public policy, the right to inspect public records must be freely allowed."² Since there is no statutory provision restricting public inspection of grand jury transcripts after a defendant is apprehended any such restriction must therefore be justified on the ground that it is required by a countervailing public policy.

The court held that since grand jury proceedings often contain criminal records, alleged confessions and other matters which may be prejudicial to the defendant, the court's duty to protect a defendant from prejudicial pretrial publicity is a countervailing public policy which justifies reasonable restrictions on the public inspection of grand jury transcripts. Any such restriction, however, must not permanently deny the right of public inspection of the grand jury records. The appellate court stated :

In our opinion a proper order can require that grand jury transcripts not be disclosed to any person (other than those specifically mentioned in Penal Code section 938.1) until a specified reasonable period of time after a copy thereof has been delivered to the defendant; provided that if the defendant, during such time, shall move the court that such transcript, or any portion thereof, not be available for public inspection pending trial, such time shall be extended subject to the court's ruling on such motion. With regard to multiple or unapprehended defendants, we recognize that problems will occasionally occur. These situations must be met as public policy and the justice of each case require.

It is suggested that the order we deem proper is too broad in the sense that it applies to all grand jury transcripts, and that each case should, on defendant's motion, be individually considered by the judge, who, if good cause exists, could then make an appropriate order. This argument ignores the realities of our practice. Often transcripts are prepared and made available to the public before the detendant is arraigned or has any knowledge of the transcript's content. The right of a defendant to a fair trial should not be left to the chance that he will have had an opportunity to secure a court order suppressing public inspection of a grand jury transcript.³

Under the authority of *Craemer* superior courts may adopt the procedures that case suggests for the temporary sealing of grand jury transcripts. The failure of a court to adopt such procedures, however, may result in prejudice to a defendant and require postponement or transfer of a trial or possibly appellate reversal of a conviction.

In order to determine whether the superior courts have revised their practices as a result of the *Craemer* case and to obtain the views of the judges as to the need for legislation relating to the sealing of transcripts, a questionnaire concerning this matter was sent to each superior court. Forty-four courts responded.

In answer to the question of whether legislation was needed to govern the sealing of grand jury transcripts the replies were almost equally divided. A number of courts were of the view that since the authority to seal the transcript had been upheld in *Craemer* there was no need for legislation. Moreover, it was felt by some judges that the instances where sealing is required are rare. Also in one or two counties the local press apparently cooperates to prevent any publicity concerning the transcript.

Some of the rural courts reported no need for legislation insofar as their courts were concerned because they have few, if any, indictments. One such court reported, for example, that there had been no indictments in the county for the past 20 years.

On the other hand, judges who supported the enactment of legislation cited the desirability of uniform guidelines and procedures among the counties. It was also suggested that legislation would better protect a defendant's rights and may reduce the time spent by the court on pretrial motions.

The replies of the courts with regard to their practices indicate that few courts have changed their policies since the Craemer case. Only 11 of the responding courts had sealed the grand jury transcript in at least one case.⁴ Of these 11 only three followed the practice of temporarily sealing the transcript in every case and only two others had sealed the record in more than two cases.

Although it could be argued that the very limited number of transcripts sealed indicates that there is little need for such sealing or any legislation providing for such sealing, it is more likely that the lack of activity of this nature indicates that few courts have taken the necessary precautions to avoid prejudicial publicity. Even assuming 3 At 227.

* Another county reported that there has been a voluntary practice on the part of the press not to attempt to examine any grand jury transcript until the trial.

¹Pen. Code § 938.1 provides in relevant part that after an indictment has been found the "county clerk shall not exhibit the transcript to any person other than the district attorney nor divulge any of its contents until after the defendant is in

district attorney nor divulge any of its contents until atter the derendant is in custody." ² Craemer v. Superior Court (1968) 265 Cal. App. 2d 216, 222. Subsequent to the de-cision in the Craemer case the Legislature revised the law relating to public records (Stats. 1968, Ch. 1473). The new law provides that nothing in it shall "be deemed in any manner to affect the status of judicial records as it existed immediately prior to the effective date" of the law (Gov. Code § 6260). The right to inspect public records is now provided by Gov. Code § 6253. Prior to the en-actment of the 1968 legislation this right was codified in Code Civ. Proc. § 1892 and Gov. Code § 1227.

21

JUDICIAL COUNCIL OF CALIFORNIA

that there is no need to seal the records in most cases, unless some system is established to provide for sealing the transcript in the exceptional case, a transcript may be inadvertently opened to the public before the defendant is aware of its contents or has an opportunity to request that the record be sealed. In order to insure privacy in the exceptional case it is recommended that all grand jury transcripts be sealed briefly to give the defendant an opportunity to examine the transcript and make whatever motion may be appropriate.

It is recommended therefore that legislation be enacted which would prohibit public inspection of a grand jury transcript until 10 days after its delivery to the defendant or his attorney. The court would be authorized to extend this period on motion of a party or on its own motion pending its determination as to whether all or part of the transcript should be sealed. If the court determined that there was a reasonable likelihood that release of any part of the transcript would prejudice a defendant's right to a fair and impartial trial, that part of the transcript would be sealed until the defendant's trial had been completed.

This legislation would provide a uniform procedure throughout the state and avoid the possibility of a trial court making an order that was too broad (as in the *Craemer* case) or, on the other hand, failing to protect the defendant's right to a fair trial.⁵

California is one of the few states that has rejected the traditional secrecy of grand jury transcripts. In most American jurisdictions the transcripts are not open to the public and the defendant is afforded very limited or no access at all to the transcript. Even with the proposed amendment California will remain one of the most liberal jurisdictions insofar as the right of the public to inspect such transcripts is concerned.⁶

Following is the proposed legislation.⁷

An act to amend Section 938.1 of the Penal Code, relating to grand jury transcripts.

The people of the State of California do enact as follows:

SECTION 1. Section 938.1 of the Penal Code is amended to read: 938.1 (a) If an indictment has been found or accusation presented against a defendant, such stenographic reporter shall certify and file with deliver to the county clerk an original transcription of his shorthand notes and a copy thereof and as many additional copies as there are defendants, other than fictitious defendants, regardless of the number of charges or fictitious defendants included in the same investigation. The reporter shall complete such certification and filing delivery within 10 days after the indictment has been found or the accusation presented unless the court for good cause makes an order extending the time. The time shall not be extended more than 20 days. The county clerk shall deliver file the original of the transcript so filed with him, deliver a copy of the transcript to the district attorney immediately upon his receipt thereof, shall retain one copy for use only by judges in proceedings relating to the indictment or accusation, and shall deliver a copy of such transcript upon to each such defendant or his attorney. If the copy of the testimony is not served as provided in this section the court shall on motion of the defendant continue the trial to such time as may be necessary to secure to the defendant receipt of a copy of such testimony 10 days before such trial. The county elerk shall not exhibit the transcript to any person other than the distriet attorney nor divulge any of its contents until after the defendant is in custody. If several criminal charges are investigated against a defendant on one investigation and thereafter separate indictments are returned or accusations presented upon said several charges, the delivery to such defendant or his attorney of one copy of the transcript of such investigation shall be a compliance with this section as to all of such indictments or accusations.

(b) The transcript shall not be open to the public nor its contents divulged until 10 days after its delivery to the defendant or his attorney. Thereafter the transcript shall be open to the public unless the court orders otherwise on its own motion or on motion of a party pending a determination as to whether all or part of the transcript should be sealed. If the court determines that there is a reasonable likelike like defendant's right to a fair and impartial trial, that part of the transcript shall be sealed until the defendant's trial has been completed.

⁴ Two of the replies to the questionnaire suggested that any rule for sealing grand jury transcripts should also be applied to transcripts of preliminary examinations. It does not appear, however, that this is necessary. In most cases, the preliminary examination is open to the public and sealing of the transcript would be futile. In those cases in which the public is excluded on defendant's demand pursuant to Pen. Code § 868 it is assumed that before the transcript is prepared the defendant's attorney could request that it not be made available to the public.

See American Bar Association, Project on Minimum Standards for Criminal Justice, Standards Relating to Discovery and Procedure Before Trial (Tentative Dratt, May 1969) at 64-66; Calkins, Grand Jury Secrecy (1965) 63 Mich.L.Rev. 455; Sherry, Grand Jury Minutes: The Unreasonable Rule of Secrecy (1962) 48 Va.L.Rev. 668.

Va.L.Rev. 668.
 ⁷ The bill also provides that the original of the transcript rather than a copy shall be retained by the court clerk for use by the judges. This will conform to the 1970 amendment to Pen. Code § 869 relative to transcripts of preliminary examinations (Stats. 1970, Ch. 1461).

CHAPTER 3

POSTCONVICTION REMEDIES

Applications for relief by persons confined in state prisons and in county jails, as well as in other public institutions of confinement, have burgeoned in recent years. The resulting problems for state and federal courts, in the light of new requirements imposed by the United States Supreme Court, have attracted nationwide attention.

In 1966 the Constitution Revision Commission proposed a simplification of California's judicial article which was accepted by the Legislature and adopted by the people.¹ This constitutional change, plus conforming statutory changes in 1967 and 1969,² have set the stage for the Judicial Council to take an in-depth look at the possibility of devising major improvements in our postconviction procedures.

After preliminary investigation by its committees and staff, the Council employed a research consultant to undertake a comprehensive background study of the problem.³ That study is published in this *Report* for the benefit of legislators, administrators, judges, lawyers and others who may be concerned with the subject. The consultant's study is, of course, only the first step in a long-range effort to solve a problem that has resisted the best efforts of many people throughout the country for a long time. The Council plans to continue its work through a special committee on the subject, and it will welcome the asistance and contributions of others in that work. It has not considered or approved any of its consultant's recommendations as yet and will welcome observations and comments from informed persons concerning those proposals, as well as other proposals for dealing with the problem. Comments and suggestions should be sent to:

¹ Proposed Revision of the California Constitution (1966); 1967 Judicial Council

Report, p. 65. The California Constitution confers original jurisdiction to issue writs of habeas corpus on every judge in every court from the superior court level to the Supreme Court level. (Cal. Const., Art. VI, Sec. 10.) If a postconviction procedure statute, as in Illinois, were to place jurisdiction primarily in the general trial court with an appeal to the higher courts, California's Constitution constitution devices a superior of the presented on every appeal. (Cal. Const., Art. requires a written decision to be prepared on every appeal. (Cal. Const., Art.

VI, Sec. 14.) *Cal. Stats. 1967, Ch. 17; Cal. Stats. 1969, Ch. 38. See 1970 Judicial Council Report, p. 63. * See consultant's study, infra:

A STUDY OF POSTCONVICTION **PROCEDURES IN CALIFORNIA***

* This study was prepared by Mr. Jack Leavitt, a member of the California bar, at the request of the Judicial Council to assist it in its study of the problems in the field of postconviction remedies. The opinions and recommendations con-tained in this study are entirely those of the author. Mr. Leavitt (B.A., 1951, Brooklyn College; LL.B., 1957 and M.A., 1958, Uni-versity of Illinois; LL.M., 1963, University of California at Berkeley) is also a member of the bar in Illinois. An experienced trial and appellate lawyer, he has written for The Hastings Law Journal, The California Law Review, The Stanford Law Review, Crime and Delinquency, The Trial Lawyer's Guide and other legal publications. He has also lectured at the John F. Kennedy School of Law and the San Francisco Law School. Law and the San Francisco Law School.

THE NATURE OF THE PROBLEM

To regain their freedom, more and more state prisoners have been making postconviction collateral attacks on the supposedly final judgments against them. Where only 89 state prisoners sought federal aid in 1940, over 12,000 filed petitions for relief in federal district courts in 1969, leading the Chief Justice of the United States to urge the states to develop adequate postconviction procedures for their own prisoners.1

Statistics for California show that in fiscal 1961-62, state prisoners filed 1,167 original proceedings for collateral criminal relief in all state courts; by fiscal 1968-69, in addition to 2,733 filings for direct criminal appeals, the statewide total of postconviction petitions from our approximately 27.000 prisoners had increased to 6.214.2 (As a parallel in 1968, federal district courts in California took final action on 1.015 habeas corpus petitions from California prisoners.)³

The impact of these postconviction petitions has led the California Judicial Council to seek ways of improving the present methods by which our courts deal with habeas corpus and similar procedures for collateral relief. The Council's present interest has focused on attempts by state prisoners—*i.e.*, convicted felons—to obtain their freedom or to modify the terms of their confinement, independent of any direct appeals they may have filed. While the rights of certain county prisoners (i.e., those who have been convicted and sentenced for misdemeanors) are peripherally involved, no attempt has been made to deal at the present time with writs sought by defendants awaiting trial (who allege, for example, that the jailer has denied them a clean shirt for a court appearance), or by persons institutionalized under the provisions of civil mental health statutes, or by individuals alleging unlawful private confinement (as is sometimes found in child custody matters).

¹Burger, Remarks on the State of the Federal Judiciary before the American Bar Association, August 10, 1970, 56 A.B.A.J. 929, 931 (1970). See also Burger, Remarks on State Criminal Cases in Federal Courts before the National Association of Attorneys General, February 6, 1970 (privately reproduced); Case v. Nebraska (1965) 381 U.S. 336, concurring opinions of Clark, J. and Brennan, J. For a discussion of this problem from the viewpoint of a federal Court of Appeals, see Peters v. Rutledge (5th Cir. 1968) 397 F.2d 731.
The literature on habeas corpus and postconviction problems is extensive. For a comprehensive, not-quite-persuasive and badly timed analysis of the problem, see Bator, Finality in Criminal Law and Federal Habeas Corpus for State Prisoners, 76 Harv.LRev. 441 (1963). For an excellent historical review, with reasoned evaluation, see Developments in the Law—Federal Habeas Corpus, 53 Harv.LRev. 1038-1280. A good short summary is found in Meador, Accommodating State Criminal Procedures and Federal Post-Conviction Review, 50 A.B.A.J. 928-931 (1964).
²For the fiscal year 1961-62 statistics, see the Annual Report of the Administrative Office of the California Courts, published Feb. 3, 1964, which gives those figures in comparison with those of 1962-63, published Jan. 5, 1970, pp. 77, 80, 148. Except for filings in superior court, the precise number of petitions for habeas corpus, Gene State Post-Conviction Rever, appear to be habeas corpus. See p. 81.
³See State Post-Conviction Remedies and A Uniform Rule of Federal Habeas Corpus for States for habeas corpus or similar postconviction relief is not distinguished from other original criminal proceedings. Virtually all of the tabulated filings, however, appear to be habeas corpus for set. (Ent 1970), p. 30. This work, scheduled to be published in the William and Mary L.Rev. (Ent 1970), gives comparative statistics for all federal courts and summarizes what the states are doing to provide postconviction mal insight into whether an apparently well-intentioned system really works in its detailed functioning.

As an independent consultant retained to make appropriate recommendations to the Council, I have sought answers through conferences with judges and administrative personnel in California and several other states, through research and through personal experience.⁴ What I quickly learned—in what seems like a naive revelation—is that the answers I received bore a direct relationship to the questions I asked. Whenever I shifted my perspective, I obtained different results, depending in large part on which of the following issues were raised :

1. How can we prevent prisoners from filing worthless applications? 2. How can we assure each prisoner a full and fair hearing for his grievances?

3. How can we lighten the present postconviction workload of our state courts?

4. How can we lighten the present postconviction workload of the federal courts?

5. How can we process a prisoner's grievances in such a way that, even if his claims are rejected, the record will show his constitutional rights were protected?

6. How can we establish day-to-day administrative procedures for postconviction claims while allowing our courts to continue having wide scope to grant extraordinary relief in extraordinary circumstances?

The question on which I ultimately settled as a guide was, of course, a compromise: How can we administratively manage a large volume of invalid postconviction claims to permit their prompt disposition on routine grounds, made of record, while we remain able to marshal all necessary judicial resources in deciding the arguably valid claims?

For reasons which form the body of this report, I have concluded that the problem, like a lingering illness, is incurable-but is manageable. Hesitantly optimistic, I view the solution in this way: The superior court, as a trial court having initial contact with a defendant. must take prophylactic measures to prevent the rise of grievances outside the written record. The Court of Appeal, with increased manpower, should bear the brunt of processing and evaluating the prisoners' petitions, partially through use of broadened appellate procedures. The Supreme Court should function as it customarily does in other litigation, granting a hearing only to those cases it considers worthy of decision by the state's highest court.

In trying to establish any workable system of postconviction remedies, we should recognize how difficult it is to create procedures which must satisfy conflicting-and often irreconcilable-legal values. Until

⁴ Much of my research embodies interviews with state and federal judges (ranging from a California justice court judge to a retired Associate Justice of the United States Supreme Court), court administrators, public and private attorneys and court clerks. Within California I discussed these matters in Los Angeles, San Francisco, Sacramento, Oakland, Richmond, San Rafael, Fairfield and El Cerrito. Outside California I conferred with judges or court administrators in New York, New Jersey and Illinois, (As might have been expected, my out-of-state discussions did not provide a readymade solution for California's problems. What I obtained, however, were sufficiently different shadings of opinion on mutually encountered difficulties to help me clarify the procedures I have ultimately recommended.)

Without the warm and vigorous cooperation I received from all these sources, this report could not have been written. While my thanks, perhaps, may take the form of recommendations with which they disagree. I have tried to record the many divergent views so that postconviction problems are tlearly delineated. When a workable solution is devised, the credit will be widely shared.

29

we have acknowledged an all-pervasive tension in the law, we cannot accept any answer as satisfactory, simply because the answer is likely to heighten the tensions in the areas where it has assumed away its premises.

We should remind ourselves at the outset that our system of criminal procedure thrusts a factfinding process into a framework of constitutional inhibitions. As a result, we routinely experience friction in deciding whether to grant relief to an accused criminal whose guilt seems clear but whose conviction was tainted by irregularities. Throughout our history, we have insisted it is far better to free ten guilty men (or 100, or 1.000, depending on the mathematician) rather than convict one innocent man. At the same time, we have clamored against the loopholes and technicalities which courts use to restore freedom to our most despised criminals. Try as we may, we have not yet reconciled our fear of crime and our desire for justice.

In the postconviction area, this conflict between guilt-in-fact and innocence-by-law takes on special significance. The persons seeking court relief are nearly always men in confinement and are the most likely individuals to have committed the crimes which led to their imprisonment. While they now press for a judicial penstroke to set them free, in the past they had either pleaded guilty to the charges against them or were convicted after a contested trial and, if they appealed, had the judgments of guilt affirmed by the higher courts. Judging by ordinary procedures, society has found them deserving of punishment.

Yet postconviction claims persist and multiply, causing substantive and administrative problems throughout the nation. What gives the petitioning prisoners their right to attention is the unique status of the help they seek. They insist-often crudely, illiterately and arrogantly---that the state government has unlawfully imprisoned them and that the price of their confinement is the destruction of constitutional guarantees dating back to the Magna Charta. "Free me," the prisoners invoke the name of the Great Writ most closely associated with personal liberty, "because habeas corpus prohibits my illegal detention." 5

Once we accept the postconviction concept as a proper judicial function, even though it is not part of constitutional due process,⁶ we should examine the changing boundaries in this field. Until fairly recently, the thumbnail description of habeas corpus relief held that:

... Its only office is to determine whether the particular judgment, order or process, the validity of which is attacked, is within the jurisdiction of the court or officer making or issuing it. The writ does not lie to correct errors and irregularities committed in the exercise of jurisdiction, but cognizance is taken only of such defects as render absolutely void the proceedings under which the petitioner is imprisoned.⁷

This simplistic view is no longer tenable. By paralleled but uneven processes, both the United States Supreme Court and the California Supreme Court have utilized the Great Writ as the ultimate corrective for constitutional errors occurring almost anywhere in our criminal procedures.⁸ The issue of jurisdiction has been displaced by that of fairness, since the writ:

. . . is not now and never has been a static. narrow, formalistic remedy: its scope has grown to achieve its grand purpose-the protection of individuals against erosion of their right to be free from wrongful restraints upon their liberty 9

In an attempt to preserve the wide-ranging scope of the writ while still regulating its frequency, the California Supreme Court has said many times that habeas corpus cannot serve as a substitute for appeal. Under this concept, the writ will not lie where the claimed errors could have been but were not raised on appeal-unless special circumstances excuse the failure to use appellate procedures.¹⁰

While couched in the negative, this position is bound to encourage litigants to use habeas in addition to or instead of an appeal (except where the appeal is equally attractive and available). If all other avenues were closed to a litigant, no one determined to protect his rights could be certain, in advance, that his case lacked the requisite special circumstances to impress the court. Only after the petition were filed could the validity of the collateral approach be determined. Rather than prevent cases from reaching the calendar, this rubric provides a justification for the courts, after examining the facts, to summarily dispose of many matters without a full opinion.

In a single recent volume of the California Reports, for example, habeas corpus was utilized to litigate the following issues before the Supreme Court: use of an invalid prior conviction in determining penalty ¹¹ and guilt: ¹² resolution of a jurisdictional dispute between the state's narcotics addicts' rehabilitation program and that of Synanon, a private organization; ¹³ disgualification of jurors because of their attitude towards the death penalty;14 validity of a condition of probation requiring the defendant to repay the county for court-appointed counsel's fees: 15 introduction of a codefendant's confession as

of the scope of the writ: "The authority to enforce obedience to the writ is nothing less than the power to release from imprisonment any person who in the opinion of the Court is unlawfully deprived of his liberty, and hence in effect to put an end to or to prevent any punishment which the Crown or its servants may attempt to inflict in opposition to the rules of law as interpreted by the judges. The judges therefore are in truth, though not in name, invested with the means of hampering or supervising the whole administrative action of the gov-ernment, and of at once putting a veto upon any proceeding not authorized by the letter of the law." JUDICIAL COUNCIL OF CALIFORNIA

it affected the defendant's right of confrontation; 16 reinstatement of dismissed misdemeanor complaints after an unsatisfactory plea bargain was set aside; ¹⁷ revocation of parole; ¹⁸ validity of a prior conviction; ¹⁹ propriety of an in-court identification after a police lineup; 20 constitutionality of restrictions against handbill distribution around a private shopping area;²¹ and the propriety of a trial court's holding an attorney in contempt.²² Surely if Volume 71 of the California Reports teaches anything to a litigant, the lesson is: When in doubt, apply for an extraordinary writ.

Only by creating subject matter barriers (like those prohibiting collateral attacks in state court, based on unconstitutional searches and seizures)²³ will the courts be able to lighten their calendars by discouraging prospective litigants from seeking help (assuming the litigants reject the "Why not take a chance anyway?" approach). To afford significant relief, this renunciation in advance would require the courts to choose popular objects of controversy as beyond their scope. (Rarely urged subjects are virtually self-eradicating.) Yet no matter how carefully drawn the exclusionary list may be, the courts would have to adopt a blinders philosophy of either optimistic certainty ("In area X, the judicial system is free of errors.'') 'or of indifference (''Although some injustice may occur, we are not prepared to correct it."). Neither philosophy allows rational deliberation about the merits of each case, which is the hallmark of the judicial function in our society.

For matters other than prisoner relief, the courts have available effective sanctions with which to control frivolous litigation. In the prisoner field, however, economic sanctions are fruitless because most prisoners are indigent, while sanctions like dismissal of an action for defects on the face of the petition present no greater penalty than the prisoner would endure if he failed to present his grievances. A possible means of setting controls on the substance of prisoners' petitions (and, in consequence, on the quantity of those documents which reach the courts) is for the Attorney General to follow up all blatantly false petitions with prosecutions for perjury. To the extent that systematic prosecutions are carried on, the courts' burdens will be directly increased by the number of such cases, while the exemplary effect may well be negligible. (How much of an additional sentence would be necessary to deter a prisoner serving an indeterminate term from seeking his immediate freedom through an over-embellished petition?) Perjury prosecutions might limit the writ-writing activities of individual prisoners (though their being convicted anew would open fresh channels for their postconviction skirmishing), but the likelihood of dramatic examples cutting the flow of applications from other prisoners seems small. Had punishment been a sufficient example to them in the past, they would not have committed the crimes whose consequences they are now resisting.

1071 REPORT TO THE GOVERNOR AND THE LEGISLATURE

31

HOW OFTEN IS JUDICIAL RELIEF GRANTED

By showing a willingness to correct unconstitutional criminal procedures, we are inviting claims of error from prisoners whose reasonable self-justification is that they are being unfairly punished. Assuming that we believe currently prevailing constitutional law will endure for an indefinite period (because of inertia, our respect for precedent. or the fact that scrupulous concern for individual rights reflects our highest ideals), we must measure the net total of judicial relief that answers this torrent of grievances.

On the federal level. Justice Tom Clark has said that if history is any guide 98 percent of prisoner petitions will be frivolous so that. because of sheer numbers, these applications can be given only cursory attention.²⁴ (At a time when the United States Supreme Court's overall calendar had some 2,000 cases annually, another justice estimated that if every case on an average list were actually considered at conference, it would receive only 33 seconds of discussion from each justice.)²⁵ Using Justice Clark's figures, at least one commentator has asked whether the seemingly unlawfully jailed 2 percent of petitioners should languish in prison because judges were too busy for them.²⁶

Based on his experiences in the Western District of Missouri, a federal judge has found reason to dispute the widely held view that postconviction applications rarely have merit:

I have yet to find a judge, state or federal, who is not surprised to learn that almost half of all postconviction motions properly processed by evidentiary hearings in one metropolitan state trial court during less than a year's time resulted in the granting of some form of relief to the petitioner. I have found that judges. both state or federal, who have actually conducted a number of postconviction evidentiary hearings are not as surprised as judges who have not had that experience. The assumption that only rarely will a case of merit be uncovered would seem to be placed in doubt by the first sampling reported by one Missouri trial court which is conscientiously making application of the principles of the tril-0gv.27

Of the approximately 6.200 postconviction petitions filed in California courts in fiscal 1968-69, roughly 5,300 were disposed of-i.e., denied-without either a formal hearing or a written opinion.28 While statewide statistics are unavailable to show how many of the remaining 900 petitions (673 in superior courts) were ultimately denied or granted, interviews with various judges indicated that few applications

Fay v. Noia (1963) 372 U.S. 391, 445, dissenting opinion. In Thomas v. Teets (9th Cir. 1953) 205 F.2d 236, where the court granted relief, it gave assurances that habeas corpus proceedings were not emptying state penitentiaries.

25 See Note 2.

produced the desired relief.²⁹ As one prisoner pointed out, "more men still escape from prison than gain freedom through writs of habeas corpus." 30

Even though we cannot overconfidently insist that the low measure of prisoner success proves their claims lack merit (since the judicial system under fire is also the one deciding whether its procedures are faulty), we can legitimately assert our respect for the integrity of California's administration of justice. Our substantive and procedural rules, while subject to abuse, provide full scope for the repair of constitutional infirmities. This being so, our objective in the postconviction field must remain qualitative, not quantitative. If, for example, the number of prisoners arguably deserving collateral relief would rise from Justice Clark's suggested 2 percent to a new level of 10 percent, the increase would attest to the failure of our judicial institutions. We could not have a viable system of justice if we routinely denied constitutional rights to, say, 10 percent of our convicted defendants.

The danger of our success, however, is that it can insulate us from a willingness to accept the possibility of error. Our arguably fault-ridden "2 percent" so seldom materializes in the here-and-now that we often view the rejection of 98 percent of claims as a waste of time. According to one federal district judge, writing in 1947, the Great Writ:

... is not a plaything of penitentiary inmates to accomplish temporary vacation visits to the federal courts, nor is it a convenient instrumentality for vexing courts with repetitious and unmeritorious pleas. . . . The last few years have seen the right to its use become a penitentiary "racket," ³¹

To illustrate his point, the district judge noted that in a ten-year period, 63 Alcatraz inmates filed 251 petitions, with a further breakdown revealing that 26 prisoners accounted for 167 petitions and that a single prisoner registered 16 successive petitions about his confinement. "Most of the recent Supreme Court pronouncements," observed the judge, "arise out of these petitions." ³² Yet if the judge's observations concerning successive applications are correct, we might be more troubled by those cases in which the courts had denied pleas for justice many times before continued attempts by hard-headed prisoners prompted the United States Supreme Court to articulate new constitutional guidelines. We should also wonder about the fact that sometimes. it appears, the prisoner whose case inspires black letter constitutional

MId. at 315.

doctrine cannot himself benefit from the principles as applied to his own case 33

DUE PROCESS AND RECORDMAKING

Due Process In Fact and In Appearance

Unlike the great classics of English literature, which we universally praise but never read, these petitions must be examined before they can be deemed valid or invalid. We cannot escape this obvious chore. Even though the judges' common reaction may be, "There's nothing there," what the prisoners say poorly may nevertheless contain a basis for relief. The reading of these allegations should be insightful rather than hostile because:

... the imaginative handling of a prisoner's first motion would in general do much to anticipate and avoid the problem of a hearing on a second or successive motion. The judge is not required to limit his decision on the first motion to the grounds narrowly alleged. or to deny the motion out of hand because the allegations are vague, conclusional or inartistically expressed. He is free to adopt any appropriate means for inquiry into the legality of the prisoner's detention in order to ascertain all possible grounds upon which the prisoner might claim to be entitled to relief. Certainly such an inquiry should be made if the judge grants a hearing on the first motion and allows the prisoner to be present. The disposition of all grounds for relief ascertained in this way may then be spread on the files and records of the case.³⁴

The prisoners' complaints will be aimed at the process of conviction or the terms of imprisonment, or both, and may include unintelligible rambling, broad statements of law culled from a storm of precedents, reargument of matters previously decided at trial or on appeal, requests for help in preparing petitions for relief (including demands for transcripts of earlier proceedings), complaints about the trial attorney's skills and services, invitations to long-term correspondence and the like. From this miscellany, the court will have to make an initial determination of what the prisoner is trying to do and whether he has any chance of success.

At this point-the moment after a claim is categorized-arises the problem of what to do with it for the record. The options are to grant or deny it summarily; to call for opposition from the Attorney General or other interested public official; to order a hearing for argument of legal issues; or to order a hearing (or a reference) for the development of evidentiary facts on which a legal decision will turn. To many

2-81244

To get a working idea of the time superior court judges actually spend on individual petitions for relief, I prepared a short questionnaire that went out to a small sample of counties, requesting data for June and July 1970. The results indicated a wide variation, from a low of 7 minutes off-bench time per petition to a high of 12 hours. On-bench time ranged from 0 to 60 minutes. Apparently each petition makes its own demands.
 Larsen, A Prisoner Looks At Writ-Writing, 56 Cal.L.Rev. 343 (1968).
 Goodman, Use and Abuse of the Writ of Habeas Corpus, address given at the 1947 Annual Conference of the 9th Circuit, 7 F.R.D. 313, 314, 316.

 ³¹ So, for example, it was said in Perkins, Cases and Materials on Criminal Law and Procedure 742 (1952) that Mooney v. Holohan 294 U.S. 103 "will stand out in history as a landmark in the law of habeas corpus because it suggested that any conviction in a case in which any agency of the government had deprived the convict of his constitutional right to due process of law, is in legal effect utterly vold." Mooney, who had alleged in his United States Supreme Court victory that the prosecution knowingly used perjured testimony against him, never established these claims in court. He was freed by a governor's pardon. See Williams, Due Process 91-111 (1960).
 ⁴⁴ Sanders v. United States (1963) 373 U.S. 1, 22-23. See also Lay, Post-Conviction Remedies and the Over-Burdened Judiciary: Solutions Ahead, 3 Creighton L.Rev. 5 (1960); Lay, Problems of Federal Habeas Corpus Involving State Prisoners, 45 F.R.D. 45.

35

judges, however, the real difficulty here festers in the subsidiary question:

How much judicial time and effort must be spent in rejecting a valueless petition?

Whatever answer ultimately satisfies us, we must make sure it takes into account the rendering of due process of law; the termination, as opposed to the shifting, of grievances; and the sensitivities of relationships between state and federal courts.

Because the due process question underlies all others, it deserves immediate attention. Without belaboring the subtleties or compiling a list of substantive rights, we can understand due process in these matters as an orderly proceeding before a fair and impartial tribunal in which the petitioner has an opportunity to present and enforce his constitutional rights. On a scale of values, we are faced with the principle that:

... There is no higher duty of a court, under our constitutional system, than the careful processing and adjudication of petitions for writs of habeas corpus, for it is in such proceedings that a person in custody charges that error, neglect or evil purpose have resulted in his unlawful confinement and that he is deprived of his freedom contrary to law.³⁵

The urgency of this language, however, is modified by the fact that a court may summarily dispose of a frivolous application without briefs or arguments.³⁰ As a result, due process may be served even when the mechanics of decision remain in the privacy of a judge's chambers. The petitioner's request for help may properly be turned away with nothing more than a postcard saying, "Petition Denied."

Yet when a denial occurs without an express rationale to support it, only the court which made the ruling can be sure of the internal steps that led to its decision. Depending on our respective prejudices, an outsider-whether he be the prisoner, a judge in a higher tribunal. or a member of the public at large-must use wishful speculation to fill in the gap between the petition's filing and its actual disposition, even though we customarily suppose, in the absence of evidence to the contrary, that official duties have been properly performed. Probably the court, as a responsible tribunal, carefully scrutinized the record, researched the applicable law, and came to the irresistible conclusion that the claim had no merit. But how are we to know? 37

³⁵ Harris v. Nelson (1969) 394 U.S. 286, 292. For a different view on the significance of habeas corpus, see Mr. Justice Darling, Scintillae Juris and Meditations in the Tea Room 124 (London, 1914, 6th ed.): "I would not be understood to mean that the people have been unwise in fighting for their charters, liberties, and settlements; yet the benefits they have most hardly obtained are, perhaps, not so valuable as is commonly supposed, and are never thoroughly enjoyed by any except the turbulent and litigious. The dissent of a dissenter makes, after all, but a small part of his life; a Quaker were little the worse for having to take an oath now and then; nor does a peaceful citizen often need habeas corpus. Many of those incidents of our Constitution which some represent as its foundations are in fact no more than luxuries of complaint, enjoyed by reason of the general content which prevails."
 ³⁶ Hernaudez v. Schneckloth (Dth Cir. 1970) 425 F.2d S9; but of. Thomas v. Teets (9th Cir. 1953) 205 F.2d 236. See also Carafas v. LaVallee (1968) 391 U.S. 234, which states that after a certificate of probable cause has been granted, a court demonstrates the basis for its action. Cf. Hurris v. Nelson (1969) 394 U.S. 286.
 ³⁷ See Larsen, A Prisoner Looks At Writ-Writing, 56 Cal. L.Rev, 343, 353 (1968) for a description of the "chaos" in the prisoners' legal world when a federal judge consistently denied petitions that were prepared according to a formula he had suggested in a published opinion.

To the extent that we can never know anything-especially, cynics insist, after we have received elaborate explanations-our ignorance in the postconviction field is a routine frailty. Conceivably we should endure it with passive faith in the correctness of the judicial decision against the prisoner. Unfortunately for this solution-which might be the best short answer to the postconviction problem-the rights at stake are too significant to fade away by guesswork. For the prisoners themselves, as evidenced by the number of successive petitions they file, and for many courts which receive the repeated requests for help, justice done in silence is a deficient procedure. The presumption of regularity often becomes subordinate to the suspicion that, for a prisoner, due process in fact should include the appearance of having done due process.

Should we, then, force a court system already overburdened with worthless petitions to further immerse itself in the postconviction process (to the detriment of other fields of judicial effort) by spawning a literature of denial? Must the courts endlessly work variations on the theme, "No merit"?

If we believe that the appearance of due process is a luxury, provided due process in fact was done, we may well also believe that a busy court need not, in effect, apologize for a correct decision. We would maintain our faith in our judicial process without constant demands for published proof of its virtue. In such an instance we would prefer getting on with the real job-deciding cases fairly-and leaving embittered speculations for disappointed prisoners and other brooders. On the other hand, we might argue that the only distinction between an arbitrary decision and a judicious one is the rationale behind the judgment. Take away the reasoning and we have nothing left but the exercise of power-and unresponsive power is the keystone of arbitrary action.

Termination or Shifting of Grievances

Since law in action rarely matches justice in repose, we might step away from the never-to-be resolved conflict between ideals and actuality by asking whether, on a different level, summary dismissals of prisoners' petitions yield practical results. We realize that a minimal time for decision-writing benefits the deciding courts. But what of higher courts? Does a summary decision in one place, like a superior court, terminate the postconviction litigation or just shift the battleground elsewhere, as the California Supreme Court or the United States. District Court?

Under the California Constitution and California practice, a petitioner may initially file his postconviction application with the superior court, the Court of Appeal or the Supreme Court.³⁸ The statutes which underlie habeas corpus procedure assume that the nex. step after filing will be ther the grant or denial of the writ itself, followed (if the writ is granted) by a return from the person having custody, a traverse, a hearing and, finally, a remand or discharge of the prisoner. Because issuance of the writ requires actual production of the prisoner in court, however, our courts have shifted to a procedural

³⁹ See Pen. Code §§ 1475, 1508; Witkin, Cal. Crim. Proc. 764-65 (1963). See the discussion at Notes 105-111 infra. Further references to B. E. Witkin's text will be to Witkin, Crim, Proc. The 1969 Supplement is in print and should also be referred to when the work is cited for the main text.

37

JUDICIAL COUNCIL OF CALIFORNIA

framework in which orders to show cause why the writ should not be granted have been substituted for the actual granting.³⁰ In effect the results are the same, but some statutory controls against abuse of the writ process are based on court compliance with now obsolete procedures.

If a petition is summarily denied, the petitioner is apparently free to continue filing his application with any appropriate court. (Res judicata does not bar reapplications for relief.)⁴⁰ The successive courts, in their turn, may continue to summarily reject the new petitions on the ground that no change in the facts or the law substantially affecting the petitioner's rights has been disclosed since the first petition was denied.41

If a petitioner obtained a grant of the writ, followed by a hearing in which he was remanded to prison, his subsequent activities are more restricted. He may not thereafter be discharged from custody by a court with the same general jurisdiction as the denying court, unless he shows a ground that did not exist in fact at the time the writ was issued. If he wishes to urge a point of law that had not been raised in his original petition or at the hearing, he must do so before a higher court,42

While a prisoner may not appeal a superior court's denial of his petition, he may reach the Court of Appeal by a direct petition under its constitutional jurisdiction. He may reach the Supreme Court either by a new petition under our highest court's constitutional jurisdiction or, if a Court of Appeal has heard and determined the matter, by applying for a hearing.48

(Choosing the suitable court for filing a petition often creates strategic difficulties for the prisoner. As a general policy, a reviewing court will not issue the writ unless the relief had previously been requested in a lower court or unusual circumstances are shown.⁴⁴ Yet after a higher court has affirmed a conviction on the merits, some lower court judges are hesitant to grant relief on a collateral point that would have the effect of reversing the judgment.)

Statistics will be helpful to show the flow of postconviction petitions. Of the approximately 6.200 applications filed in California courts in 1968-69, 3,814 were filed in superior court, 1,051 in the Court of Appeal and 1,349 in the Supreme Court.⁴⁵ While we cannot readily determine that the petitions rejected on a lower level are identical to those which later appeared in the higher courts, many judges have said that, "Sometimes all they change is the caption on the first page and file again a day after denial." The general view is that, once a prisoner files a petition, he will not be routed by a single judicial defeat but will work through available channels as long as he has the least hope of success.

45 See Note 2.

A court, therefore, which summarily rejects a petition without stating the basis for its decision may expect that another court will soon have to cover the same ground in dealing with the prisoner's renewed contentions. The new inquiry will necessarily be a repetitious effort, since nothing involved in the earlier decision will be known except the result. The original research and reasoning will be lost to everyone but the first court itself.

We must, consequently, ask ourselves to evaluate the postconviction workloads borne by our different courts. Is it more advisable to require the superior courts to publicly state their reasons for denying 3.020 petitions in 1968-69, or to have the Courts of Appeal reinvestigate as virginal applications the 1,051 petitions that reached them during the same period, or to ask the Supreme Court to start from scratch in processing its 1,349 applications for relief?

The Need to Make a Record

The promptings of judicial economy, as I see it, require that whichever court first takes action on a petition should memorialize its investigatory processes if there is a reasonable basis for believing the same facts or issues will be presented to another court for another appraisal.

Although the first court may complain that it will have to do paperwork for every petition, when possibly only one-third of that number will be filed again, we cannot predict which petitions will be so activated. The work saved at a higher level will justify a somewhat greater expenditure in the lower courts. What is more, when a court gives a prisoner a reason for its decision, there is a fair chance that the prisoner will accept the reason as valid and will not pursue his collateral remedies beyond the point of rational explanation. For those cases, the early statement of reasons may represent the ever-popular stitch in time. A later court would be free of many unmeritorious petitions. while the losing petitioners, though disappointed, would be reconciled to the weakness of their position.⁴⁶

FEDERAL-STATE RELATIONSHIPS

Federal Powers and State Remedies

Into this area of decision rendering and decision explaining fall the sensitive and intricate relationships between federal and state courts which have made the solution of postconviction problems a national issue of constitutional proportions. Beginning with the first Judiciary Act in the United States, in 1789, federal courts have had the specific power to issue writs of habeas corpus to inquire into the cause of a commitment.47 Though the power itself must originate in

⁴⁶ See Larsen, A Prisoner Looks at Writ-Writing, 56 Cal.L.Rev. 343, which states that by summary denials, courts seem to say that those in prison are presumptuous to think they are entitled to constitutional protections. In a full-day visit with the court administrator and a number of judges in New Jersey, the most consistent advice I received was to give a statement of reasons whenever a petition was denied. The New Jersey courts write brief or skeleton opinions, rather than the full opinions we use in California, but the widespread feeling was that a statement of why the petition was denied would help convince many prisoners their pleas were actually heard. Successive applications would then be eliminated. To the men with whom I discussed postconviction problems, the difficulties were no more serious than in any other field of law.
⁴⁷ Kaufman v. United States (1969) 394 U.S. 217; Carbo v. United States (1961) 364 U.S. 611; In re Neagle (1889) 135 U.S. 1.

39

written enactments, the meaning of habeas corpus may be taken from common law principles. In 1867, the writ was legislatively extended to benefit state prisoners and its scope was expanded to authorize relief when any person was restrained of his liberty in violation of the Constitution, laws or treaties of the United States.48 Allegations of unconstitutionality are still the key to state prisoner applications.

When petitioned for help, a federal district court ordinarily works to preserve state court prerogatives. The initial determination is whether or not the prisoner has exhausted his state remedies. If not, federal courts will generally refuse to proceed further and will leave the prisoner to seek state relief.⁴⁰

Waiver and Forfeiture in State Court

In checking on available state remedies, the federal court limits its inquiry to those remedies available at the time the prisoner sought help from the federal court and not to remedies that might have been available in the past.⁵⁰ Yet in many cases the state has provided a means for testing the prisoners' claims and would have determined the matter on the merits if they had made timely requests. Is it proper, then, for a federal court to intrude into local affairs when the person most directly affected by his confinement had failed to use routine mechanisms to obtain freedom? In response, the United States Supreme Court has said:

. . . A defendant by committing a procedural default may be debarred from challenging his conviction in the state courts even on federal constitutional grounds. But a forfeiture of remedies does not legitimize the unconstitutional conduct by which his conviction was procured.⁵¹

Forfeiture as a catchword is not enough. To see whether the earlier availability of state remedies should foreclose a prisoner from seeking federal relief, the federal court must decide whether he surrendered his rights by a constitutionally valid waiver or by a deliberate bypassing of orderly state court procedures.52 While valid waiver or deliberate bypassing ordinarily bars federal intervention, the federal court has no way of knowing from a silent record if this is what the state contends. When the California courts dismiss a case without

State contends. When the California courts dismiss a case without
** Ibid. In In re Neagle, supra, the Court said: "The enactments now found in the Revised Statutes of the United States on the subject of the writ of habeas corpus are the result of a long course of legislation forced upon Congress by the attempt of the States of the United States den the power of imprisonment over officers and other persons asserting rights under the Federal government or foreign government, which the States denied."
** See 28 U.S.C. § 2254(b); Revised Rules of the U.S. Supreme Court, Rule 31(5), effective July 31, 1970; Buffalo Chief v. South Dakota (8th Cir. 1970) 425 F.2d 271; Allen v. Perini (6th Cir. 1970) 424 F.2d 134; U.S. cw rel Sanders v. Maroney (3d Cir. 1968) 397 F.2d 267; Martinez v. Craven (9th Cir. 1968) 397 F.2d 250. But when a petitioner has raised his constitutional issues on appeal and has lost, he need not resort to the state's postconviction procedures. See Roberts v. LaVallee (1967) 389 U.S. 40; Wood v. Crouse (10th Cir. 1968) 389 F.2d 747; Application of Stecker (D.C.D.N.J. 1966) 271 F.Supp. 406. If state law has changed between the petitioner's appeal and his present application for relief, there is disagreement on whether he must reapply for relief in the state court. Compare U.S. ex rel Holmes v. Mancusi (2nd Cir. 1970) 423 F.2d 1137 with Ackley v. Noia (1963) 372 U.S. 391, 9 L.Ed, 2837, 862.
** Fay v. Noia (1963) 372 U.S. 391, 9 L.Ed, 24 S37, 862.
** Henry v. Mississippi (1965) 379 U.S. 443; Fay v. Noia (1963) 372 U.S. 391.

stated reasons, the federal courts have no adequate guidance from the tribunals whose judgments are being assailed.53

Under long-standing principles of federalism, if a state court judgment rests on independent, adequate state grounds, a federal court will decline to review the judgment even though federal questions have been included in the decision. But here we must distinguish between state substantive and procedural grounds. Where the state ground is substantive, the judgment will stand even if a federal court would have reached a different result as to the federal ground. In such instances, the federal court abstains from exercising jurisdiction to avoid giving advisory opinions.54

With respect to state procedural grounds, this justification does not apply. When a procedural default under state law bars a constitutional challenge to the conviction, the state is preventing implementation of a federal right. Accordingly, the issue of when and how a failure to comply with state procedural rules precludes a federal court from even considering the matter, is itself a federal question. Unless compliance with the state's procedural rule serves a legitimate state interest, a prisoner's procedural defaults do not prevent vindication of his federal rights.55

Before a federal court can know whether a California decision stemmed from substantive or from procedural compulsion, the public record must provide this information. The record must be a factual chronicle, since the federal court cannot resolve bypass or waiver issues simply by examining the facts recited and conclusions reached in a state appellate decision about the prisoner's claims.⁵⁶ Absent a proper record, the federal court should not assume the state court's judgment was insulated from review. Considering that the federal district courts in California took final action on 1,015 habeas corpus petitions in 1968-69, the lack of detailed information from the state courts has caused substantial difficulties in the pinning down of relatively simple facts and concepts.

Adequacy of State Factfinding

Along parallel lines, a federal district court (which must dispose of a petition "as law and justice require") 57 may presume that state procedures were correct in determining a factual issue on the merits. But this state-oriented presumption may be invoked only when a series of "ifs" are satisfied:

1. If the factfinding procedure was adequate to afford a full and fair hearing;

2. If the material facts were adequately developed;

3. If the state had jurisdiction over the subject matter and the petitioner :

4. If the petitioner, as an indigent, had state-appointed counsel at the state hearing:

5. If the petitioner received a full, fair and adequate hearing;

See Hutchinson v. Craven (9th Cir. 1969) 415 F.2d 278; Thomas v. Teets (9th Cir. 1953) 205 F.2d 236. ¹⁴ Henry v. Mississippi (1965) 379 U.S. 443.

 ¹⁷ 28 U.S.C. § 2243.

40

JUDICIAL COUNCIL OF CALIFORNIA

6. If the petitioner was not denied due process of law: and

7. If the factual determination was made on the merits and is fairly supported by the record.58

Federal Evidentiary Hearings

From the procedural viewpoint of the federal courts, a district court must conduct an evidentiary hearing on a petitioner's claims if the material facts were not adequately developed at a state court hearing.⁵⁹ From the more sensitive viewpoint of at least one state court. these standardo have different implications:

. . . It is obvious that the creation of the state right does not for close later use of the entire federal system and federal intervention. More probably the state remedy will merely procure our state district courts as masters and referees for the compilation of evidence for the federal district courts. Since denial of the writ in state court is not appealable, unsuccessful applicants will simply file new but identical applications in the federal district courts. This will enable federal district courts to exercise stronger and more direct supervision of our state system. . . . If the "superior authority of federal law" is to be asserted by one-man federal district courts, our state judicial system should not voluntarily be surrendered to the federal system for our judges to become mere referees, masters and law clerks in that procedure.⁶⁰

State Court Options

We must decide for ourselves whether the federal procedure is a threat to our state sovereignty, a useless burden on our court calendars or a welcome safeguard for our citizenry. The attitude brought to this work may be more important than the individual details of its administration.

In a summing up of present trends, we can recognize that, except for a knowing waiver or deliberate bypass of state remedies, whenever a prisoner makes an allegation of material fact which is outside the record and which, if true, would have constitutional consequences affecting his imprisonment, he is entitled to a federal evidentiary hearing to establish the truth of the allegations. Confronted with this federal rule, should the California courts also make themselves available to every deft pleader in state prison? We are not bound to do so:

... The United States Supreme Court has never reversed a state court's judgment denying post-conviction remedies and either directed the state court to take jurisidiction or released a primer

on the ground that the state court was compelled to accept jurisdiction.61

One legitimate way of resolving the federal-state problem is to remain placid and relabel the controversy as a purely federal problem. "Let the fellows across the street do what they want," state court judges have implied about their opposite numbers on the federal bench. "They will anyway." 62

By remaining only minimally active in the postconviction arena, the state courts can passively resist federal constitutional trends which they disapprove. Entirely within their responsibilities, the state courts can use as a potent weapon the logjam bound to occur on the federal dockets. The results of this inaction may range widely, from the possibility of pressure by the lower federal judiciary on the United States Supreme Court for a downgrading of its postconviction standards, to the more extreme possibility that federal courts will routinely release aggrieved state prisoners whenever they file petitions in proper form.

However attractive this quitclaim defiance may be, the California courts, I believe, must accept the realities of the federal system. Ultimately the federal courts, as the final arbiters of the United States Constitution, have greater power in this field than the state courts whose actions they review. As soon as this relationship is acknowledged, the state courts should adapt their functions to fit efficiently within the federal scheme, treating the duality of jurisdictions as an interlocking process for adjudicating organic law. Since an aggrieved petitioner has been arrested, tried and convicted by California courts, we should make sure the same courts provide him with access to his full range of federal constitutional rights. We can, of course, do less but would such a position really be an admirable part of our jurisprudence? I think not.

CATEGORIZING PRISONERS' CLAIMS

Having worked through these necessarily broad areas in trying to learn what postconviction policies are advisable for California courts, I would now like to summarize my general position before detailing the steps I believe we should take to implement the program on a routine basis.

Postconviction procedures, in my view, are an aweinspiring nuisance. They are largely unproductive of anything but paperwork and exasperation—yet they epitomize our libertarian spirit in a way that no formal eloquence or marbled architecture can equal. In processing these pleas for help, we are admitting that the sovereign state may be wrong and that its citizens deserve a chance to regain freedoms which were lost through judicial procedures. In an admittedly imperfect fashion, we are trying to keep a secular eye out for fallen sparrows.

From allegory to birdwatching, however, is a painful leap. Even though we accept the principles underlying postconviction relief, we

⁶¹ In re Shipp (1965) 62 Cal.2d 547, 554, fn. 2. Cf. Smith v. Bennett (1961) 365 U.S. 708, in which the Court did not consider an argument that the state must offer some type of postconviction remedy.
⁸² Even when the federal court accepts the state court's factual findings, the federal court should apply its own constitutional standards. Compare Imbler v. Craven (D.C.D.Cal. 1969) 298 F.Supp. 795, aff'd sub nom Imbler v. California (9th (D.C.D.Cal. 1969) 298 F.Supp. 795, aff'd sub nom Imbler v. California (9th Cir. 1970) 424 F.2d 631 with In re Imbler (1963) 60 Cal.2d 564. See also In re Imbler (1964) 61 Cal.2d 556; Imbler v. Oliver (9th Cir. 1968) 397 F.2d 277. According to Henderson v. Dutton (5th Cir. 1968) 397 F.2d 375, 378, the goal of the federal court is to make an "independent assessment of the record."

³⁰ 28 U.S.C. § 2254(d). See also Townsend v. Sain (1963) 372 U.S. 293.
⁵⁰ See Harris v. Nelson (1969) 394 U.S.' 286; Kaufman v. United States (1969) 394 U.S.' 217; Townsend v. Sain (1963) 372 U.S. 293; Hollingshead v. Wainwright (5th Cir. 1970) 423 F.2d 1059. As the Court said in Harris v. Nelson, supra at 300; "We do not assume that courts in the exercise of their discretion will pursue or authorize pursuit of all allegations presented to them. We are aware that confinement sometimes induces fantasy that has its base in the paranoia of prison rather than in fact. But where specific allegations before the court show reason to believe that the petitioner may, if the facts are fully developed, be able to demonstrate that he is confined illegally and is, therefore, entitled to relief, it is the duty of the court to provide the necessary facilities and procedures for an adequate inquiry. Obviously, in exercising this power, the court may utilize familiar procedures, as appropriate, whether these are found in the civil. or criminal rules or elsewhere in the 'usages and principles of law.'"
** State ex rel Barksdale v. Dees (1968) 252 La. 434, 211 So.2d 318.

JUDICIAL COUNCIL OF CALIFORNIA

have yet to find the manpower to carry out the job. With every level of our court system fighting against a heavy workload, we have no automatically available repository for postconviction litigation. All we can do is hope that by drawing distinct procedural lines we will be highlighting the meritorius cases, reducing the unnecessary waste and efficiently sorting out the unavoidable rubbish. When we reflect that there is no time limit for the presentation of habeas corpus claims 63 and no ordinary application of res judicata,⁰⁴ we should appreciate even more the benefits of uniform practices.

A convenient step in expediting postconviction procedures is to note that prisoners' allegations can be categorized in fairly standard ways. Virtually all claims will fall within the following framework:

1. The record shows conclusively that the allegations are true.

2. The record shows conclusively that the allegations are false.

3. The allegations are unintelligible, fatally vague, conclusionary or uncertain.

4. The allegations, even if taken as true, fail to state facts which entitle the petitioner to judicial relief.

5. The allegations are fatally inconsistent with previous statements of fact the petitioner has made and no sufficient explanation for this inconsistency has been given.

6. The allegations were, or should have been raised as factual matters at trial and, as a consequence of the verdict and judgment against him, the facts were conclusively resolved against the petitioner, expressly or by necessary implication.

7. The legal arguments now being presented were previously raised at trial, on appeal or on a prior application for collateral relief and were rejected there, and no change in the facts or the law has occurred since then.

8. The legal arguments now being presented could have been, but were not, raised at trial or on appeal and no sufficient explanation has been given to excuse the petitioner for this default.

9. The allegations now being presented deal with matters which ordinarily should have been raised at a much earlier time, and no sufficient explanation has been given to excuse the petitioner for this delay.65

10. The allegations, if taken as true, would entitle the petitioner to relief, but the facts are outside the record.

11. The legal arguments now being presented, either because of a retroactive change in the law or for other reasons, are prima facie persuasive in favor of a grant of relief.

These categories, which identify both valid and invalid habeas corpus grievances, provide guidelines with which a court may pursue

dismissed for staleness,

⁴¹ Sco Note 40,
 ⁴² Sco In re Jones (1968) 265 Cal.App.2d 376. See also In re Swain (1949) 34 Cal.2d 300.

arguably valid petitions and may use helpful labels to dismiss valueless ones.

Unless a court is acting arbitrarily, it should have a reason for summarily denying relief. Because that reason is predictable, a suitable checklist can be made to save the court from having to reformulate its concepts every time a new petition is filed. The court routinely will be able to categorize the petition under established headings with a minimum of effort and will thus help a reviewing court later pinpoint the same defects in the petition. For more complex cases, since the checklist will be a guide rather than a restraint, the first court would have complete flexibility to expand on its opinions. I therefore suggest that a rule of court along the following lines be adopted to facilitate this procedure:

Rule Grounds for summary denial of postconviction relief

An application for postconviction relief may be denied without a hearing if the court finds in writing that:

(1) The allegations, even if taken as true, fail to state facts which entitle the petitioner to relief; or

(2) The allegations were or should have been raised at trial, on appeal or on a prior application for postconviction relief and as a consequence were conclusively resolved against the petitioner, expressly or by necessary implication; or

(3) The allegations are shown conclusively to be false by the record: or

(4) The allegations are unintelligible or fatally uncertain; or

(5) The allegations are fatally inconsistent with previous statements of fact made to a court and no sufficient explanation for the inconsistency has been stated; or

(6) The legal issues presented were or should have been raised at trial, on appeal or on a prior application for postconviction relief and as a consequence were conclusively resolved against the petitioner, expressly or by necessary implication, under circumstances where no change in the applicable facts or law has since occurred; or

(7) Other good cause for denying the application has been shown to be present.

THE PROCESSING OF INDIVIDUAL COMPLAINTS

Since no checklist can substitute for the harsh analysis of a particular set of facts, we must examine the categories themselves to see what action would be most appropriate in each instance.

Where the Record Is Conclusive

For those matters in which the record shows conclusively that the petitioner's allegations are true or false, the court has its easiest job.66

See, e.g., In re Bushman (1970) 1 Cal.3d 767; In re Bennett (1969) 71 Cal.2d 117; In re Hayes (1969) 70 Cal.2d 604, 69 Cal.Rptr. 310; In re Boyce (1959) 51 Cal.2d 699. Although habeas corpus should be a speedy remedy, note that in In re Boyce, supra, where the Attorney General had recommended the writ issue, the improper sentencing occurred on November 27, 1957 and the decision granting relief was not rendered until March 10, 1959. Note the admonition of the U.S. Supreme Court in Conway v. California Adult Authority (1969) 396 U.S. 1030, 24 L.Ed.2d 295, saying that the Court felt im-posed upon because the state Attorney General railed to produce timely data from the prisoner's uncontroverted records, showing he was not entitled to the relief he sought. (As an Assistant Attorney General explained to me, "Conway's filed about 50 separate actions. We haven't got the staff to keep up with him.")

⁴⁵ In re Huddleston (1963) 71 Cal.2d 1031. See also Hawkins v. Bennett (8th Cir. 1970) 423 F.2d 948, where the time Interval between the alleged violation and the grant of a remedy was 44 years. In Alameda County, California, a 42-year period was recently reached. See "1921 Conviction Vacated," Oakland Tribune, March 28, 1970, p. 2, col. 4. Cf. Tilinois v. Allen (1970) 397 U.S. 337, 25 L.Ed.2d 353, separate opinion of Douglas, J., stating that a lapse of time is not necessarily a barrier to a challenge of constitutionality but that in an appropriate case a petition should be dismissed for stolenes.

45

JUDICIAL COUNCIL OF CALIFORNIA

In deciding the exact date a prisoner's sentence expires, for example, the court has little more to do than check the relevant data in the uncontroverted files.67 By utilizing California Rule of Court No. 60 and by informally requesting the Attorney General to expedite transmittal of the record, the court can ordinarily obtain all the information it needs for a summary ruling. The problem points directly to its own solution.

Where the Claim Is "Demurrable"

Flaws in Facts or Theories

More difficult to deal with are those categories in which the petitioner's claims would, by analogy to a civil case, be demurrable, either for stylistic or substantive reasons. The stylistic difficulties arise from a lack of precision. The prisoner does not come to the point in a way that can trigger court action. For reasons sometimes unconsciously carved into the petition (such as illiteracy or mental disturbance) or other times consciously but mistakenly heralded in capital letters (such as a panoply of constitutional issues at the expense of mundane narrative), the court realizes that the relevant details have yet to emerge. By contrast, the substantive difficulties arise because the details selected by the petitioner, though serious to him, do not justify court intervention. What the court might wonder in such a case is whether the petitioner would have a legitimate claim on the basis of other facts, unknown to the court and unappreciated by the petitioner.08 At this stage of the proceedings, however, curiosity is not an essential judicial trait.

In summarily denying relief, the court may well rely on precedent that:

. . . We are entitled to and we do require of a convicted defendant that he allege with particularity the facts upon which he would have a final judgment overturned and that he fully disclose his reasons for delaying the presentation of those facts. This procedural requirement does not place upon an indigent prisoner who seeks to raise questions of the denial of fundamental rights in propria persona any burden of complying with technicalities; it simply demands of him a measure of frankness in disclosing his factual situation.69

To uphold this argument, a court must assume that the facts relevant to a particular controversy have such marked characteristics that an illiterate or uneducated prisoner can isolate them at will from the universal, historical continuum. For that assumption to be valid, we would have to reject a good deal of contrary legal lore about the interdependence of fact and theory. In the words of one legal commentator:

The difference between theory and fact is one of degree of localization. What we call fact is theory tied closely to particular events: what we call theory is description of fact with less emphasis on the particular places and times of its happening. . . . The terms "fact" and "theory" both refer to meaning, and since meaning can never be completely localized, nor yet completely divorced from application, the distinction between them is one of degree. . . . The client can seldom state all of the relevant facts of his problem without prompting and questioning by the lawyer. The lawyer's fuller stock of legal ideas makes certain facts, which seem to have no significance to the layman, crucial to him; and the lawyer sees immediately that other facts, which the layman will dwell on in detail, are immaterial. . . . No fact is significant without theory; no theory is relevant without facts.⁷⁰

If we require prisoners, with or without the aid of jailhouse lawyers.⁷¹ to prepare their own legal documents in this most sophisticated area of criminal constitutional law, we should expect that some petitions will be inadequately drafted despite their potential validity. Otherwise, we are acknowledging, sub silentio, the superfluity of legal training.

Legal Advice and Assistance

Rather than dismiss an inadequately drawn petition out of hand, a conscientious judge might be tempted to explain where the deficiencies lie.⁷² In a court situation, at least, a trial judge is within the bounds of propriety when he gives helpful suggestions to a defendant groping for the proper means of expression.⁷³ But doing so routinely, in writing and at long distance would be an anomalous practice in our accusatorial system of justice. Even assuming that our courts had the time to provide adequate counseling, judges are most properly suited to the role of arbiters and not of advisors.⁷⁴ To keep a sense of fairness and perspective, they must remain somewhat aloof from the controversies they are asked to resolve.

The best ways we have to give prisoners insight into the need for relevant facts is to provide them with legal counsel or to develop simplified forms which affirmatively suggest the type of information our courts seek. Either method, though advantageous in many respects. has serious drawbacks.

The threshold problem in making lawyers available to prisoners is the actual availability of lawyers, especially since the Constitution does

⁷⁰ Morris, How Lawyers Think 31-32, 35-36 (1937; Swallow ed. 1962). See also Holmes, The Path of the Law, from Collected Legal Papers 168 (1920); "The reason why a lawyer does not mention that his client wore a white hat when he made a contract, while Mrs. Quickly would be sure to dwell upon it along with the parcel gilt goblet and the sea-coal fire, is that he foresees that the public force will act in the same way whatever his client had upon his head."
 ⁷¹ See Joinson v. Avery (1969) 393 U.S. 483; Gilmore v. Lynch (D.C.N.D.Cal. 1970)
 ⁷² See Merril v. State (Alaska Supreme Ct. 1969) 457 P.2d 231, which states that if the superior court decides no material issue of fact exists and that the petitioner is not entitled to postconviction relief, it may indicate to the parties its intention to dismiss the application and its reasons for so doing. The petitioner is the given is or entitled to replocate the theory of the proposed dismissal.

then given an opportunity to reply to the proposed dismissal.

JUDICIAL COUNCIL OF CALIFORNIA

not require appointment of counsel for collateral attacks on a state conviction.75

Though some states provide legal counsel through a statewide public defender's organization. California still has no such office.⁷⁶ Our public defenders are responsible to their respective counties and boards of supervisors and not to the state government. Our only source of lawyers for the predictable future will be volunteers in private practice. To expect our approximately 30,000 attorneys to absorb an additional 6,000 indigent cases a year is an unrealistic projection. We should still be able to depend on volunteers for those cases which have arguable merit, but cannot realistically hope for a corps of professional writ writers.77

Simplification of Forms

By modifying California's currently approved form for habeas corpus petitions, we might also give prisoners legal guidance in a more general way, without the immediate need for attorney consultations. As presently written, the Judicial Council form 78 requests the petitioner to "State concisely the grounds on which you base your allegation that the imprisonment or detention is illegal" and to "State concisely and in the same order the facts which support each of the grounds set out'' Nowhere does the form suggest what grounds and what facts will impress the court. Presumably, if a prisoner is bothered enough to feel his constitutional rights are being violated, he should know what is bothering him. Yet this presumption adopts the arguable proposition that relevant facts and theories are self-evident and, further, that prisoners will understand the printed form well enough to fill it out correctly.

In a recent survey, however, drawn from a national cross section that was asked to complete five basic application forms, pollsters found at least 13 percent of the adult population in the United States

⁷⁵ See Johnson v. Avery (1969) 393 U.S. 483; Hawkins v. Bennett (8th Cir. 1970) 423 F.2d 948; Anderson v. Heinze (9th Cir. 1958) 258 F.2d 479, which states that except under most unusual circumstances an attorney ought not to be appointed by a federal court to try finding something wrong with a state judgment. See People v. Gonzalez (1970) 7 Cal.App.3d 163.
 As a matter of policy, California will appoint postconviction counsel for indigents under sentence of death. See In re Hill (1969) 71 Cal.2d 997; Pen. Code

gents under sentence of death. See In re Hill (1969) 71 Cal.2d 997; Pen. Code § 1239.
⁷⁹ A Judicial Council proposal to establish a State Public Defender's Office to handle appellate matters for indigent criminal defendants falled of enactment in 1970. See Judicial Council, 1970 Report, p. 15 and Assembly Bill No. 497 (1970).
⁷⁹ See Comment, Right To Counsel in Criminal Post-Conviction Review Proceedings, 51 Cal.L.Rev, 970 (1963). See also Developments in the Law-Federal Habcas Corpus, 83 Harv, L.Rev, 1038, 1202 (1970); "In view of the advantages to the petitioner and the court of providing every habeas applicant with legal assistance, the Supreme Court should use its supervisory power over the lower federal courts to formulate a uniform rule requiring the appointment of counsel at an early state of every habeas proceeding. No other single change would do so much to raise the standard of procedural fairness to a level commensurate with the purpose of the collateral remedy." See also Larsen, A Prisoner Looks At Writ-IWriting, 56 Cal.L.Rev. 343 (1968).
Both Illinois (Ch. 38-Crim, Law & Proc.-Art, 122-4; Ill.Supp.Ct. Rule No. 615) and New Jersey (Court Rule 3:22-6) do provide free counsel to indigents in postconviction matters. In discussions with the court administrator in these states, I learned that the system appears to be working well. New Jersey has a regularly established statewide public defender, while Illinois only recently established statewide public defender, while Illinois only recently established statewide public defender New York, I learned that the your administrators from New York, I learned that the your administrators from New York, I learned that the your due court administrator administration of the buy appears to be working well would be buy appeared to the source administration of the buy appeared to the proceed the due to the due to the due to the proceed to be working well.

In discussions with court administrators from New York, I learned that they find the programs acceptable—not as satisfactory as lawyers would be, but an improvement over undiluted prisoner self-help. ¹⁸ Adopted effective Jan. 1, 1966. See Cal. Rules of Court, Rules 56.5 and 201(f).

afflicted with serious literacy problems that impair daily life.⁷⁰ That population percentage, said to be a conservative figure. "lacks the reading ability necessary for survival." Their plight was shown by the fact that 34 percent of the sample was unable to complete applications for Medicaid; 7 percent for a personal bank loan; 8 percent for a driver's license; 7 percent for a social security number; and 3 percent for welfare benefits. Since the most frequent literacy problems occurred among persons classified as poor, rural, southern, black, foreign-born or over 50, we can reasonably expect prisoners to have a roughly comparable failure rate. If nothing else, poverty will earn them a place in this scale.

Standardized forms, of course, are a necessary part of institutional administration. To keep prison practices uniform throughout the state, there should be some basic document used by all prisoners who wish to obtain similiar relief. My suggestion is that we reduce the "Facts" section of the standard petition to more precise persons, places and circumstances so that the petitioner will be given almost a skeleton outline for the narrative we demand from him. Under the "Facts" heading, for example, I would structure the printed questions this way (omitting, with only a small sense of loss, our precious legalism, "alleged"):

A. When were your rights violated?

- 1. Before your arrest? Yes: No:
- 2. During your arrest? Yes: No:
- 3. After your arrest but before trial? Yes: No:
- 4. During your trial? Yes: No:
- 5. During your imprisonment? Yes: No:
- B. Who violated your rights?
 - 1. The police? Yes: No:
 - 2. The district attorney? Yes: No:
 - 3. The trial judge? Yes: No:

4. Your own attorney? Yes: No:

- 5. The prison authorities? Yes: No:
- No: Who? 6. Someone else? Yes:
- C. You have just said that certain persons violated your rights. What is the name and address of each person who did this to you?
- D. What did each person do to violate your rights?
- E. When did each person violate your rights?
- F. When each person was violating your rights, what did you say or do to him?
- G. When did you realize for the first time that your rights were violated?
- H. How did you learn that your rights were violated?
- I. When you first learned that your rights were violated, what steps did you take to get help?
- J. After you learned your rights were violated, what was the date of the first step you took to get help?

The U.S. Adults Who Can't Read, San Francisco Chronicle, p. 2, col. 1, Sept. 12, 1970; 18.5 Million Can't Read Forms, Oakland Tribune, P. 1, col. 2, Sept. 12, 1970.

JUDICIAL COUNCIL OF CALIFORNIA

48

K. If anybody says you took too long in trying to get help, how can you explain the delay?

- L. Who else besides you knows the facts that shows your rights were violated? Give the full name and address of each person.
- M. As far as you know, what can each person you have just listed tell a court about the violation of your rights?
- N. Have you ever discussed these matters with the persons who violated your rights? Yes: No:

If so, where and when?

What did each of you say?

Simplified as these questions are, they fail to educate the prisoner on the necessary constitutional concepts into which his facts must fit. We might be tempted to catalogue the likely grounds for relief-e.g., "Did the district attorney make a promise to you that he later broke?"⁸⁰—but we could then reasonably expect that many prisoners will seize upon all our suggestions as appealingly relevant. Instead of helping to plot fictitious violations of constitutional rights, therefore, we must balance the difficulties an untutored prisoner might face against the possibility that other prisoners will use administrative fairness as a means of disrupting the judicial system.

A court, therefore, may summarily reject a petition in which the allegations are unintelligible, fatally vague, conclusionary or uncertain, or in which the allegations, even if taken as true, fail to state facts which entitle the petitioner to judicial relief.

Where the Prisoner Contradicts Himself

Missing Records and Multiplicity of Remedies

When an application for relief merits dismissal because the petitioner's current allegations fatally contradict his previous statements of fact, and no sufficient explanation has been given for the inconsistency, the court's difficulty lies in the absence from the record of all relevant statements.⁸¹

This lack of coordination and information retrieval stems from the fact that in California, with its 58 separate counties and its many penal institutions, a defendant has a wide range of potential remedies. Our stated position is that:

... Preservation of a defendant's constitutional rights lies not in multiple state remedies that will ordinarily produce the same result but in one effective state remedy plus an awareness on the part of all state officials that ultimate federal review is available. We expedite the availability of that federal remedy by the compilation of a full and adequate record and by insisting that one remedy is ordinarily enough.82

Nevertheless, the idealization of one remedy is contradicted by our actual practice, except for rare issues like objections to unlawful search and seizure. Following the pronouncement of a felony judgment

³³ In ro Sterling (1965) 63 Cal.2d 486, 489.

against him, a defendant may appeal directly to the Court of Appeal or, for good cause shown after time to appeal has expired, may ask that court for leave to file a late appeal; he may petition for a writ of coram nobis to vacate the judgment or set aside his guilty plea due to factual errors unknown to him or to the court; he may petition for a writ of mandamus to compel the trial court to set aside its judgment or order: he may petition for a writ of habeas corpus to free him from illegal restraint. As he chooses his remedy, he acquires a set of mandatory procedures:

1. An appeal or a motion for leave to file a late notice of appeal must be made in the appellate court having direct jurisdiction over the trial court where the judgment was rendered.83

2. A petition for coram nobis must be filed in the trial court where the conviction occurred, but if the judgment was affirmed on appeal, it must be filed in the appellate court which affirmed the judgment.84 3. A petition for mandamus must be filed in the appellate court having direct jurisdiction over the trial court where the judgment was rendered.85

4. A petition for habeas corpus must (apparently) be filed with the court having geographic jurisdiction over the place where the prisoner is confined, but if the prisoner has alleged facts which, if true, would entitle him to resentencing, that court must transfer the case to the court which rendered the judgment under attack.86 (The number of courts having primary jurisdiction over these petitions during the term of the prisoner's confinement will vary with the geographic location of each penal institution in which he was confined.)

These variations in where to file a petition for relief sometimes coincide with variations in the facts alleged from one petition to the next. Tracking down these inconsistencies when they occur would be a matchless way of letting the petitioner himself state the facts that will deny him relief. What is troublesome is the actual gathering of the relevant data.

True enough, the Judicial Council's postconviction form anticipates this difficulty by requiring the petitioner to describe all his previous applications about the same detention or restraint. Unfortunately, the accuracy of our uncoordinated filing system depends on the prisoners' memories and good will or on the case-by-case exertions of the Attorney General's office. We have no centralized data bank for this information. (Information of this nature is also relevant in a determination of whether the petitioner's application is identical to one that had already been denied, when no material changes in law or fact have taken place.)

Restructuring of Remedies

Computerization. To improve our knowledge of our own recorded materials, we might develop a statewide data bank that contained a

full history of the legal procedures each prisoner has engaged in. Doing so means that we will have to computerize information in a centralized location or by means of interlocking, complementary tielines. We would then have prompt access to all records about each prisoner, from the time of his arrest, through his trial and appeal, and including all his postconviction requests.⁸⁷

The inauguration of a statewide data bank for the single purpose of detecting inconsistencies (or unactionable similarities) in the postconviction petitions, however, would probably involve an expense disproportionate to the expected results. We need not set bear traps for field mice. If the computer processing can be related to other useful purposes, such as the work of the California Supreme Court, the Attorney General or the Department of Corrections, the budgetary outlay may well be advisable. Pending the availability of such a source of information, we are best advised. I believe, for the courts to ask the Attorney General's office to dredge up the inconsistencies in a prisoner's successive claims or, when appropriate, to grant an evidentiary hearing where the facts should emerge in a satisfactory way.

From an entirely different perspective, we should consider whether a restructuring of postconviction relief procedures would give us a presently lacking coordination and economy of effort. I believe it will.

Geographic Coordination. Of the four customary ways for a convicted defendant to challenge the judgment against him, three-i.e., appeal, coram nobis and mandamus-require that matters be processed in the courts that have geographic jurisdiction over the place of conviction. Only habeas corpus has required filing in the county where the person is confined, though there is no longer a constitutional or statutory command for this practice. Even then, the case must be transferred to the place of conviction when the possibility of resentencing exists.⁸⁸

A suspicion, no doubt, should arise that we would improve administrative coordination by arranging that all postconviction petitions from the same prisoner, relating to the same offense, should originally be filed in the same court. With that suspicion I am in full accord.

Since petitions for habeas corpus are the only documents customarily filed in the place of confinement, we should note how that procedure arose. Early in its history, habeas corpus was used as a means of forcing a jailer, who arguably had no right to confine a prisoner, to bring the prisoner into a court of competent jurisdiction. There the court would determine the jurisdiction of the court or officer who had called for the confinement. While the ultimate contention pitted the prisoner against the sentencing court or official, the more immediate struggle was between the prisoner who wished to appear in court and the jailer who often tried to prevent him from asserting these rights.⁸⁹ Until fairly recently, for example, prison officials used their supposed censorship powers to bottle up the petitions with which prisoners hoped to regain their freedom,⁹⁰ and we still have complaints that prison routine unconstitutionally deprives prisoners of their rightful access to the courts.⁹¹ By making the jailer himself a party to a habeas corpus proceeding, the prisoner was sure a court could enforce its decision through contempt decrees and fines-and jurisdiction over the jailer depended on where he was to be found.

Classically, the jailer would be the person in administrative charge of the penal institution in which the prisoner was confined.⁹² In my opinion, we no longer need such a restricted view to obtain habeas corpus jurisdiction over the person with actual custody of the prisoner.

By statute, California provides that, "The term of imprisonment fixed by the judgment in a criminal action commences to run only upon the actual delivery of the defendant into the custody of the Director of Corrections . . .'' ⁹³ As the chief administrative officer of the Department of Corrections (appointed by the Governor) and as a member of the Governor's Council.⁹⁴ the Director has statewide power and responsibilities. Naming him as the prime respondent in all postconviction litigation will not only achieve a uniform practice throughout the state, but will do so without creating any fictional custodians. Through his department, the Director of Corrections is the person having custody of the petitioner. (In those cases where the Director of Corrections does not have custody, such as matters dealing with incompetents, with child custody or with a prisoner who should have been-but was not-delivered to the Director of Corrections, the proper party can readily be named without warping the overall picture.)

Considering that another statewide officer, the Attorney General, ordinarily serves as legal counsel for the responding party,⁹⁵ we see that geographic considerations associated with the place of confinement have only fortuitous significance in our choosing the best location for a postconviction matter to be processed.

For the sake of uniformity and coordination. I therefore propose that habeas corpus petitions no longer be filed in the place of confinement. Instead, they should be filed in the court which was in a position to modify or set aside the original judgment, provided jurisdictional standards can be met.⁹⁶ That court would then decide the postconviction argument on its merits, but if the issues were best resolved in another court, would transfer the matter to the more appropriate jurisdiction. By channeling habeas corpus in this way we will also minimize or eliminate the differences in form we now encounter for our various ways of seeking similar relief.

 ⁴¹ The Judicial Conference of the State of New York, 270 Broadway, New York City, N.Y. has begun to operate a data bank to provide federal and state judges with prompt information about a petitioner's previous applications for postconviction relief. The important fact to note is that the system is an *index* and *not* a central file. When a judge receives an application for relief, he is expected to keep the index current by sending in a completed form which shows the action he took in dealing with it. Identification of prisoners is primarily based on their inmate identification number.

JUDICIAL COUNCIL OF CALIFORNIA

Title of Petition. Whether we retain different labels for our different postconviction procedures or group them all under the generic title Application for Postconviction Relief, we can establish harmony between the coexisting remedies. Perhaps the most convenient step at present is to retain the existing titles until their use atrophies through the gradual awareness of our new procedural format. In purposely paying little current attention to labels, we will avoid charges that we are suspending habeas corpus rights or destroying coram nobis remedies. Soon enough, the distinctions will blur into the most desirable procedure.

Where Issues Have Not Previously Been Raised or Are Not of Record

As we examine the several categories into which postconviction applications are divided, we come to our most nettlesome set of problems. Here we have those instances where relief might be denied because of the petitioner's failure to raise certain factual or legal issues at an earlier time.⁹⁷ Since matters not raised are usually not in the record. these cases are akin to ones where the petitioner has alleged facts outside the record which, if true, would entitle him to relief.98 Within this mixture of problems, we find prisoners complaining of wrongfully induced guilty pleas.99 ignorance of correct procedures during the trial or in preparation for an appeal,¹⁰⁰ misconduct by the district attorney,¹⁰¹ and derelictions of duty or incompetence by the defense attorney.¹⁰² A common thread running through these cases is that the prisoner is condemning a judge or an attorney for conduct that led to the prisoner's conviction. For postconviction purposes, we must find expeditious ways to make an adequate record of those events and conflicts that ordinarily would not surface before the court. The earlier we do so, the more likely we are to have a contemporaneous, undistorted record of what has gone on in the past.

From such a point of view we can see that a fundamental step in resolving California's postconviction problems is for the superior courts to take appropriate prophylactic measures. I believe that this burden must be placed at the trial level because, as shown in an unpublished report by a federal judge, the most frequently assigned grounds for nostconviction relief are:

- 1. Ineffective counsel.
- 2. Plea of guilty unlawfully induced.
- 3. Use of a coerced confession.

4. Use of evidence obtained through an unconstitutional search and seizure.

1071 REPORT TO THE GOVERNOR AND THE LEGISLATURE

53

5. Use of evidence obtained through an unlawful arrest.

- 6. Infringement of the privilege against self-incrimination.
- 7. Unconstitutional suppression of evidence.
- 8. Use of perjured testimony.
- 9. Denial of the right to appeal.
- 10. Double jeopardy.
- 11. Unconstitutional selection and impanelment of the jury.

These procedural and substantive snares can best be neutralized early in the criminal process. As a member of the United States Court of Appeals has advised other federal judges:

The best solution of post-conviction problems is the adherence to established legal principles in charging, arraigning, trying, and sentencing defendants in criminal cases. If this is done, collateral attacks on sentences should be subsequently reduced, and their disposition made less burdensome.¹⁰³

Because the adequacy of a postconviction record is only one factorand not necessarily the most significant one-in establishing judicial standards, no detailed trial court procedures will be enumerated here. While the temptation exists to make everything else subordinate to the issue at hand, we must remember that many phases of the judicial process should be designed to expedite and terminate litigation, rather than perpetuate collateral attacks.

THE PROPER ALLOCATION OF COURT RESOURCES

No matter how diligent and competent our superior courts are in carrying out their responsibilities, we can be sure that prisoners will still seek collateral relief. How are we to process those postconviction grievances?

Which Courts Now May Receive Petitions?

To briefly summarize existing California procedures, a defendant may file his initial petition for habeas corpus in the Supreme Court, the Court of Appeal for the district where he is imprisoned, or the superior court for the county where he is imprisoned, though the geographic limitations no longer have constitutional or statutory sanction. As a matter of general policy, the higher courts will usually refuse to entertain a petition that had not previously been presented to the superior court. In effect, therefore, the ordinary petitioner following the traditional approach must file his first application in the superior court with geographic jurisdiction over his place of confinement. That court, though the proper recipient of his complaints, must transfer the case to the superior court which rendered the judgment of conviction whenever the petitioner has alleged facts which, if true, would entitle him to resentencing. The court to which the case was transferred would then treat the petition on its merits.¹⁰⁴

JUDICIAL COUNCIL OF CALIFORNIA

Assuming the proposals I have made in this report were to be adopted, would our existing procedures efficiently carry them out? I think not. In my view, the postconviction process should be changed to assure flexibility in the use of judicial manpower, avoidance of unproductive duplication, uniformity of decisions based on similar facts and circumstances, and discretion over the time, place and manner of conducting evidentiary hearings.

Which Courts Need More Work?

At this juncture we must underscore a major precept: Nowhere in the California judicial system is there a work vacuum ready to be filled with additional legal or administrative burdens. Every court is busy! Choosing the tribunal best equipped to take charge of postconviction problems necessarily brings to mind the eloquence of an early American traveler who was tarred, feathered and run out of town on a rail: "If 'tweren't for the honor, I'd just as lief walk."

Habeas Corpus Jurisdiction

By the terms of the California Constitution, as amended in 1966, "The Supreme Court, courts of appeal, superior courts, and their judges have original jurisdiction in habeas corpus proceedings."¹⁰⁵ Unlike the repealed constitutional provisions, which contained specific geographical limitations on the habeas corpus powers of Court of Appeal justices (but not on the Courts of Appeal per se) and the superior courts, the Constitution no longer makes this restriction. The many adjudicated cases which pinpointed the place of a prisoner's confinement as the only place to file a petition, in reliance on those now obsolete provisions, are therefore no longer binding.

Geographic Limitations

By statute, only a minor geographical limitation has been placed on the courts. No such restriction is applied to the Supreme Court, which is given the express power to make a writ of habeas corpus returnable before the issuing judge or his court, before any Court of Appeal or appellate judge, or before any superior court or superior court judge.¹⁰⁶ No such restriction is applied to the superior court, as respects its own powers. The superior court or a judge may make a writ of habeas corpus returnable before the issuing judge or his court. No statutory mandate sets geographic limitations here (though one superior court has not been granted specific authority to make its writ returnable before another superior court).¹⁰⁷ No such restriction is applied to the Court of Appeal, as respects its own powers. The Court of Appeal or an appellate judge may make the writ returnable before the issuing judge or his court. No statutory mandate sets geographic limitations for that purpose (though one Court of Appeal has not been granted specific authority to make its writ returnable before another Court of Appeal),108

The only announced geographic restriction in the statute is the provision that a writ of habeas corpus issued by a Court of Appeal or an

appellate judge may also be made returnable "before any superior court or judge thereof located in that appellate district."109 By specifying courts and judges located in the particular appellate district, the statute impliedly prohibits the Court of Appeal from making the writ returnable in the superior courts of another district. Otherwise, the powers of the Court of Appeal are unaffected.

To the best of my knowledge, therefore, we no longer have authoritative precedent in California requiring geographic factors to determine initial habeas corpus jurisdiction. All we have is a narrow limitation on where the Court of Appeal can make its writ returnable.

Nongeographic Considerations

When we inquire about the existence of an independent rationale. other than constitutional or statutory precedent, to champion geographic considerations, we note that the bulk of decided cases announce the law without explaining its purpose.¹¹⁰ The most informative discussion of why a court's jurisdiction should be limited to those persons in actual custody within the county or district where the court is located, declares in connection with a child custody dispute:

. . . It is a matter of common knowledge that such has been the practice since the Constitution of 1849 was adopted. Furthermore, it is the only sound interpretation to be given the section. It is inconceivable that the electors would knowingly confer upon every judge of the fifty-eight counties the power to transport a citizen to a distant part of the state to show under what authority he is held in custody in another section. It is also inconceivable that this same power would have been conferred to summon a sheriff, or other peace officer, to a distant county to show by what authority he holds a prisoner in custody in his own county. We are satisfied, simply on the grounds of reason, that the jurisdiction in habeas corpus is limited to those persons in actual custody in the county where the superior court is sitting, though, of course, the process of the court in the exercise of this jurisdiction is statewide.111

Concern for the citizen being transported to a distant county is, perhaps, advisable in habeas corpus matters affecting child custody, though it seems overly solicitous as applied to a prisoner. Concern for the jailer seems misapplied if his own transportation is the issue, since the real custodian is the Director of Corrections, a statewide officer, who is ordinarily represented by the Attorney General, another statewide officer.112

Transportation of Prisoners

What is a valid concern, from the viewpoint of the People's security, is whether prisoners should routinely be transported long distances across the state in habeas corpus proceedings. Let us place this apprehensiveness in the perspective of our current procedures.

When a prisoner makes allegations of material facts outside the record which, if true, would entitle him to constitutional protection, he should be given a hearing on his claims.¹¹³ By analogy to constitutional standards that have been established for federal prisoners, he has no automatic right to personally attend or testify at the hearing. His application for habeas corpus relief may be entertained and determined without the need for his presence. But this exclusionary rule has its due process limits. When a prisoner's testimony would be material in support of a substantial claim, he may not be prevented from testifying in his own behalf.¹¹⁴

Transfers for Resentencing

A California prisoner with a constitutional grievance who has competent information about his claim thus has a right to appear in an appropriate court for a hearing on the merits of his petition. Under current California practice, if his allegations would entitle him to resentencing, no discretion exists as to the location of the appropriate court. The case (and therefore the prisoner) must be transferred to the court in which he was originally convicted and sentenced.115 Regardless of the needs of the parties, the convenience of witnesses or the ends of justice, which ordinarily are persuasive grounds for establishing venue, the petition cannot remain in the court where it was filed unless the court, by coincidence, had also been the place of conviction.

Knowledge of Sentencing Court

The stated rationale for this rule is that the sentencing court normally is the tribunal most familiar with the facts of the case, including the basis of sentencing and the prior convictions that may have affected the sentence.¹¹⁶ However compelling the rationale may first appear, it is based on arguable assumptions.

The first assumption is that the court which imposed the sentence knows more about the case than any other court. Perhaps it does. But if this is to be true, the knowledge in question must come from sources outside the record. Otherwise any court processing the basic documents would have all relevant data. To assume that the sentencing court will have this unrecorded knowledge is really to make the further assumption that it will not be the court as an institution but, rather, a particular judge who has the necessary knowledge. If, then, the same court (say, Department 100) receives the transferred case, we have no indication that the same judge will be presiding. Should we try to follow the judge himself, on the more speculative assumption that he will indefinitely retain personal knowledge of the case. we would be disrupting calendars in an uncontrollable number of judicial departments. Service on the criminal bench would harness a judge with neverending obligations. The potential benefit seems too doubtful to make these transfers mandatory.

Even if we could conveniently bring a case before a highly informed judge, we must make the still further assumption that he is not personally involved in the prisoner's complaint. If he is, he may be necessarv as a witness but not as the person presiding over the merit of the claim. Linking one hope to another, we may qualify the judge so far, but must then keep speculating that he will now do what he failed to do. in the past. Our most compelling reason for requiring his services is that he left an incomplete record. We have no present assurances that we will spell out in all necessary detail the factors that will now lead him to his new decision. Unfortunately, when a matter is obvious to an interested person, he often takes its characteristics so much for granted that he never makes things obvious to anyone else. A newly made, inadequate record, of course, will have the likely drawback of triggering yet another set of postconviction complaints.

Comity Between Equal Courts

Possibly the unstated rationale for the mandatory transfer rule is the question of whether it is seemly for one superior court to undo the work of another superior court. As a matter of comity, judges of equal rank respect each other's official actions. To avoid the friction that might arise if, say, judges in Solano County routinely overthrew the carefully wrought determinations of San Francisco judges, we have arranged that no such mishap can occur. San Francisco judges-all judges-will be given the chance to correct their own sentencing decisions.

Valid as this principle is in creating harmony between equals, it has no relevance to a situation in which the reviewing judge has a higher rank than the original judge. The basic principle of judicial review is that a lower court may be overruled by-and must defer to-a higher court. To satisfy principles of comity, we need only establish a reviewing court of sufficiently high rank in postconviction matters.

If, then, we return to the issue of prisoner security in transportation across the state, we should be able to distinguish that question from others that are now linked to it. We should not transport prisoners. as a routine matter just because we are searching for a judge with special knowledge about the case, nor should we do so when we have a higher court available to review the disputed decision.

How to Select a Hearing Court

In my opinion, the only way we can determine where a postconviction hearing should be held is on a case-by-case evaluation, rather than by general rules naming the place of confinement or the place of conviction. Casting aside geography or prior knowledge as the exclusive

59

JUDICIAL COUNCIL OF CALIFORNIA

criterion for choosing a hearing site, we should develop means of bringing out the following considerations:

1. Which court, if any, has sound policy reasons for holding a hearing?

2. Which court provides the most unbiased forum in which to conduct the proceedings?

3. Which court is most convenient to all parties, their witnesses and their attorneys?

4. Which court provides the necessary security to preserve the integrity of the proceedings and the safety of the participants?

5. Which court or other trier of fact, assuming all else is equal, can best conduct the hearing in light of its active calendar?

When the policies or integrity of a court have come under fire in a postconviction attack, that court may be the most appropriate tribunal to reevaluate its earlier position. Error come home to roost is often its own greatest corrective. Yet the importance of the result may act to cloud the court's impartial judgment because of our natural reaction to protest that we have decided important matters correctly. Only by a reasoned choice of forum can we minimize the stresses inherent in this type of problem. (As an example of court policy that comes under constitutional attack. I suggest jury selection procedures in this context. Resolution of that problem affects the court and the community to such an extent that a more detached forum may be necessary.)

When we consider what people are likely to have relevant knowledge about the validity of a conviction, we realize that a significant percentage of those involved will be judges, district attorneys, public defenders and private defense attorneys. By the very nature of their activities, the faults with which they are charged will be faults about which no record has been made-and thus will be the very reason the hearing was ordered. We cannot put their convenience on a more prominent plane than the petitioner's constitutional safeguards, but we should be able to make reasonable venue accommodations for all concerned.

While prisoner militancy must not be used as an excuse to deny a prisoner his rights, we should have options available to make sure that a dangerous prisoner-though we may soon allow him to be walking the streets-will have to state his case in a sufficiently secure courtroom. No automatic rule for transferring cases can provide this protection.

Assuming that all other factors are equal and that no rights will be infringed, we should also have flexibility in choosing a trial court, a referee or another trier of fact who can give a difficult case the time it deserves. The question is one of proper calendaring. We cannot enjoy its benefits if we decree that a particular jurisdiction is universally binding on all postconviction matters.

Propriety of the Court of Appeal

Problem by problem in this report. I have been marshalling my data --sometimes expressly, sometimes by implication-to identify the court which I believe should be the initial repository for postconviction peti-

tions. That court, in my opinion, is the Court of Appeal in the district where the petitioner was convicted.¹¹⁷ I urge adoption of a rule of court along the following lines to accomplish this purpose.

Rule Where postconviction relief should be sought

(a) An application for postconviction relief ¹¹⁸ shall be filed with the Clerk of the Court of Appeal for the appellate district in which the petitioner was sentenced or ordered to be confined.

(b) If an application for postconviction relief is filed in a court other than that specified in subdivision (a), the clerk shall forward it to the appropriate court for filing.

(c) Prior to acting upon an application for postconviction relief a Court of Appeal may refer the application to an appropriate superior court for a hearing and recommendation.

American Bar Association Standards

To overcome an immediate doubt about the appropriateness of an appellate court for this purpose, we should note that the American Bar Association Standards Relating to Post-Conviction Remedies comments :

In some jurisdictions, applications for habeas corpus must, or can, be submitted to an appellate court in the first instance. . . Although appellate tribunals are inappropriate forums to conduct factual inquiries, there is considerable merit in their serving as the original screen to separate those applications worthy of further consideration from those lacking in merit on the face. In actual practice, such a system can work only if the judges have adequate assistance, either from their law clerks or from the office of the clerk of the court. Appellate courts are more likely to have such assistance than trial courts. Once the preliminary determination to proceed has been made, the case can be transferred to an appropriate trial court, or perhaps to special commissioners or masters, for whatever hearings or inquiry [are] necessary.¹¹⁹

different states. For California, however, the Uniform Act would cause unacceptable (and un-necessary) difficulties. In states where the court of conviction is designated as the starting point for a postconviction process, that court must make written findings of fact and conclusions of law. The decision can then be appealed to a higher court for review. Since California Constitution Article VI, sec. 14, provides that higher court decisions determining causes "shall be in writing with the reasons stated," the appeal of each postconviction decision would require a written opin-ion. In my view, California's Courts of Appeal could not successfully handle the annual addition of 1,000 or more opinions, as would be expected of them under such a system. Unless we favor constitutional revisions with ramifications far beyond the postconviction issue, we cannot adopt the Uniform Act. ¹¹⁸ A definitional rule will be required to identify what is to be included, *e.g.*, habeas corpus, coram nobis, or other extraordinary relief.

corpus, coram nobis, or other extraordinary relief. ¹⁹ American Bar Association Standards Relating to Post-Conviction Remedies 29 (1968). See also *Lestwich v. Coiner* (4th Cir. 1970) 424 F.2d 157.

¹¹⁷ The Revised Uniform Post-Conviction Procedure Act (1966), as promutated by the National Conference of Commissioners on Uniform State Laws, provides that the convit of conviction (*i.e.*, the trial court) is the proper filling place for post-convintion applications. Many states have adopted the Uniform Act or a similar procedure. See, e.g., Merrill v. State (Alaska Supreme Ct. 1969) 457 P.2d 231 for a decision discussing the Uniform Act. See also State Post-Conviction Remedies and A Uniform Rule of Federal Habeas Corpus (Tentative Draft No. 2, May, 1970), scheduled to be published in the Fall, 1970 William and Mary Law Review; the article summarizes various types of postconviction procedures adopted by different states. different states.

Factual vs. Legal Questions

We may readily concede that a superior court located near the prisoner is often best able to render timely and effective relief, especially when the taking of evidence is required. This consideration has been a basis for appellate courts refusing to hear a matter unless an application has first been made to the local superior court or a good reason has been shown for that failure.¹²⁰

If nothing but factual questions were to be decided, the Court of Appeal would be ill equipped for the job. But, recognizing weaknesses wherever they may be found, the superior court as an institution has questionable suitability for the ultimate disposition of constitutional imbroglios. Each trial judge may be as well versed in the law and as perceptive as his appellate colleagues, but the rigors of the factfinding process and the time pressures on superior courts lessen the probability of far-ranging analysis and decisions at the trial level.

Of the approximately 6,200 postconviction petitions filed in fiscal year 1968-69, some 5,300 were summarily decided on purely legal grounds.¹²¹ Probably the bulk of these legal dismissals were for patent defects in the petitions, presumably clear to any court which received the request for help. Yet the rough spot in California's postconviction procedures has been caused by our willingness to let patent defects fall without comment.

On the appellate level, legal matters could be categorized and disposed of on the most appropriate basis: routine dismissals with stated reasons (however brief)¹²² for the routine rejections; well-considered dismissals or grants of relief for the sophisticated entanglements. As material factual issues arise, they could promptly be referred for hearing to a suitable trial court (chosen on the basis of all relevant considerations)¹²³ or to a specially appointed referee. Whether the superior court should act only as a referee making recommendations to the Court of Appeal or should actually determine the case on its merits is, I suspect, a question that should be decided after we have had some experience with the system. My inclination is to have all final determinations made by the Court of Appeal, but I realize that the need for prompt disposition of certain cases may justify superior court determinations. At this stage, we should not try to overconfine a remedy that is wisely meant to be extraordinary.

Like a master calendar judge, the Court of Appeal could efficiently control the disposition of evidentiary matters and discovery controversies ¹²⁴ whose inflow cannot be predicted. It could also exercise informed discretion on the related disputes about when an indigent prisoner is entitled to a transcript of prior proceedings.¹²⁵

1071 REPORT TO THE GOVERNOR AND THE LEGISLATURE

6I

Appellate Nature of Complaints

Those petitioners who complain about violations of their rights in the process of conviction are saying, in one form or another, that the trial judge failed to carry out his duties. Through deliberate purpose or in ignorance of the pressures operating on the defendant, the judge allegedly acted in a constitutionally improper manner. Complaints of this kind, it seems to me, are ripe for appellate notice. They attempt to raise the fundamental question of whether the trial was fair. Nothing in the subject matter of the complaints (assuming the facts are stipulated) makes a trial court the best judge of its own conduct.

Those petitioners who complain about violations of their rights in confinement are saying, in effect, that their status as prisoners still entitles them to due process of law and to equal or nearly equal protection of the laws.¹²⁶ Because the rights allegedly infringed are generally cut back by prison rules and regulations, these petitioners have set themselves at odds with the prison administrators who carry out the policies of the Department of Corrections. Asking that disputes of this nature, which can have statewide consequences, should be screened on the appellate level seems to be an efficient means of channeling the disputes to their proper slots. Assuming the facts are stipulated, the Court of Appeal may exercise jurisdiction to decide the case on its merits or, when the facts are controverted or different considerations appear, may transfer the litigation to the best available superior court for a referee's recommendation or for an actual decision. By adopting this procedure, we give the Court of Appeal venue for initial evaluation of petitions, but do not oust the superior court from its constitutional jurisdiction to issue writs of habeas corpus. At some point, perhaps, a conflict may arise if a prisoner initially seeks and actually obtains relief in superior court despite the Rule of Court granting preferential place of filing to the Court of Appeal. But in that event, unlikely though it is, the People have simple access to the Court of Appeal under statutory procedures and can routinely block the prisoner's discharge from custody until an appellate decision has been rendered.

Assistance for the Courts of Appeal

The targeting of the Court of Appeal does not mean that it should bear the full shock of the additional caseload with its present judicial. research, clerical or administrative personnel. Since the burdens contemplated in the recommended procedure will be continuing, more judges and staff attorneys will be essential.

By using his constitutional powers as Chairman of the Judicial Council, the Chief Justice of California can meet temporary overloads in the system by providing for the assignment of judges to other courts.127 Whenever necessary, the Chief Justice can designate—and has designated-superior court or retired judges to serve, in reality, as the writ-processing judges for the Court of Appeal. This system, which has been long operative in Los Angeles, allows expansion or re-

Gonzalez (1970) 7 Cal.App.3d 163.

63

JUDICIAL COUNCIL OF CALIFORNIA

trenchment of the available personnel to meet variances in caseloads. Since our crises tend to merge into chronic continuity, however, our only solution is to maintain an appellate bench at the full strength needed to meet the courts' inevitable burdens. I know of no way to make the burdens themselves vanish.

Other Advantages

Among the other long-range advantages to be gained by using the Court of Appeal for the initial processing of postconviction complaints are these:

Lessening of Duplication. By eliminating one level of postconviction processing (*i.e.*, the superior court), we avoid the duplication that results when a disappointed petitioner in the lower court now refiles his same application in a higher tribunal. By stating the reasons for a decision, we eliminate the need for the Supreme Court to undertake a complete review of the record of all cases presented to it, and allow the state's highest court to exercise discretion in choosing the matters it wishes to hear. The petition for hearing after a Court of Appeal decision can then be handled in conventional ways.

We also aid the federal courts in their determination as to the adequacy of the state court proceeding. (If we say that duplication of effort could best be avoided by refusing to allow a petitioner to file more than one application, we have simply revived the question of where he is to file it to obtain constitutionally adequate review. That place, I submit, should still be the Court of Appeal.)

Uniformity of Decisions. Because fewer tribunals will be deciding the cases, the results should be more uniform throughout the state. Even though there will be a turnover of individual judges, we will obtain beneficial continuity from the remaining judges and from the professional staff, each of whom should be familiar with the established guidelines and be able to transmit them to newly appointed personnel.

Access to All Records. Choosing the Court of Appeal in the district of conviction, we assure administrative access to the trial record, the record on appeal, and the record of all other applications for postconviction relief (except applications filed before our procedures have been reorganized). With all these documents at hand, we can soon discover if the petitioner has made inconsistent factual allegations in successive applications or whether his present requests have already been denied, without any intervening change in the facts or the law.

Uniform Procedures for Felons and Misdemeanants. Petitions for postconviction relief from persons who were convicted of offenses in municipal court can be processed in the same manner as petitions from persons convicted in superior court, thus establishing an integrated system of postconviction remedies for misdemeanants and felons.

Ease of Transferring Cases. Even though the Court of Appeal is statutorily prevented from making a writ of habeas corpus returnable in the superior court of another district, the geographic hurdle can be overcome by the use of orders to show cause, rather than actual issuance of the writ. This seems to be a satisfactory way to adjust procedures without having to amend the relevant statutes. If objections should arise, we can request the Supreme Court, in its administrative capacity, to effect the proposed transfers under its express authority. Eventually, after the procedures have been tested, we can attempt to have the statutes amended in accordance with our proven needs. (As a realistic political consideration, we should minimize statutory changes and rely on Rule of Court modifications instead. As long as we operate within statutory bounds, our court system should be able to make adjustments in legal remedies and procedures to perfect its own functions.)

Supervisory Control Over Superior Courts. To the degree that the superior court observes all necessary precautions to avoid postconviction snares, the work of the Court of Appeal will be lightened. To the extent that the superior court falls short in this respect, the Court of Appeal, in a supervisory role, can enforce compliance with the necessary procedures. By example, persuasion and direct instructions, the Court of Appeal can regulate the standards to be observed at the trial level. This uniform observance of proper guidelines will provide the greatest benefit in the administration of postconviction procedures.

More Bearable Delays. The careful processing of postconviction matters in the Court of Appeal may cause a delay in the disposition of all appellate matters. For that hard fact there can be no easy palliative. But if we must choose between one evil or another, I believe we are wiser in tolerating a delay at the appellate level, after the case has once been tried and the permanent record has been drawn, rather than at the trial level, where a day in court is the goal.

If the superior court is ordered to take all the strains of the postconviction burden, too many litigants will have to wait too long for an impartial decision on their claims. They deserve a first hearing as quickly as possible; they are entitled to an appeal in the ordinary course of the administration of justice. Waiting for an appeal may be painful, but the chance to prove one court was wrong may be more of a luxury than the chance to prove a case in the first instance. (The postconviction matters call for a second and sometimes a third or fourth review of a case that has once been decided. We allow this recycling because of the constitutional issues to be resolved.

BROADENED APPELLATE PROCEDURES

As an experiment in aid of its postconviction jurisdiction, the Judicial Council should consider using broadened appellate procedures to bring all potential errors to the court's attention in a single proceeding. At the present time, our courts declare that matters not part of the official record cannot be considered on appeal.¹²⁸ Even though the appellate court has been made aware of the alleged facts that would justify post conviction relief, the most effective step it can now take is to bifurcate a series of issues and discuss "appeal" matters separately from "habeas corpus" matters within a single opinion.¹²⁹

 ¹²⁸ People v. Floyd (1970) 1 Cal.3d 694; People v. Merriam (1967) 66 Cal.2d 390; Adams v. California (1897) 116 Cal. 495; People v. Mosqueda (1970) 5 Cal.App. 3d 540.
 ¹²⁹ See People v. Price (1969) 1 Cal.App.3d 982.

65

I suggest that a defendant on direct appeal be allowed (though not yet required) to request the consideration of matters not in the record.

We can encourage this change in appellate practice on the reasonable assumption that a prisoner with an arguably valid grievance will find some way of calling it to a court's attention. Sooner or later the complaint will surface. Instead of demanding a piecemeal presentation of appeal issues and postconviction issues, we are best advised to develop an all-inclusive technique. We should be able to resolve all constitutional disputes at the earliest possible time, with the least judicial waste and the least unjustifiable punishment.

An early benefit in blending postconviction questions into a direct appeal is that, unlike a petitioner, an appellant nearly always has an attorney to represent him. Through personal conferences or through the mails, the attorney can probe for actionable violations of the defendant's rights. Once he discovers an arguably meritorious issue outside the record, the attorney can develop a prima facie case showing the defendant's argument in its best light. Based on that data, the attorney can then petition the court for an evidentiary hearing or for the inclusion into the record of now-excluded matter. From this most favorable display of the defendant's position, the court can decide whether the factual allegations, if true, would merit relief. If so, the court can order an evidentiary hearing before a trial court or a referee to resolve the facts. If not, the court can summarily deny the request for additional evidence and articulate its denial as part of its definitive opinion on the direct appeal.

Because matters outside the formal record could be presented to the court relatively soon after the events themselves had occurred, we would avoid the problems caused by belated requests for postconviction relief. Ideally, this procedure will compel no more hearings than would be compelled by the postconviction petitions that are now being filed for habeas corpus relief. All that would change is the date on which the testimony is taken or the documents are incorporated into the record. The earlier we obtain evidence on allegations that have prima facie constitutional urgency, the earlier we can arrive at the truth and the merits of the claim.

If we allow this request for relief to be optional with the defendant, we will undoubtedly have variations in appellate practice from case to case. For the short run those variations should be welcome. Only after this procedure has been given a comparative performance test will we know whether to make its use mandatory—and thereby to impose a deliberate, knowing waiver on a defendant who refuses to take advantage of it—or else to abandon it as an unproductive intrusion into the court's time.

CONCLUSION

Summed up, what I recommend is that all applications for postconviction relief be directed to a single court—the Court of Appeal for the district where the conviction occurred. With the help of increased manpower as the need is manifested, with the authority that its appellate position guarantees, and with the centralized expertise that will be developed, the Court of Appeal should be the most suitable tribunal for this inescapable labor. Postconviction problems will remain with us for predictable future. We must indefinitely expect to endure crime, punishment and the possibility of error. In our concessions to the fallibilities of an otherwise exemplary judicial system, we are serving its virtues by acknowledging its faults. What we consider a waste of time in the processing of postconviction applications is really a tribute to the effectiveness of our everyday courtroom procedures. What we discover worthy in postconviction claims is a reemphasis of our traditional belief that unjustified harm to one of us is destructive to all of us. The irritating chores that fill a judge's day as he leafs through page after page of worthless complaints are the bricks that give shape to our ideals. In his hands lies the measure of our society. If someone is to be faulted for a cavalier attitude toward justice, let it be the prisoner and not the judge.

CHAPTER 1

GENERAL

A. DIRECTOR'S REPORT

The Judicial Council's legislative recommendations, reports and proposals described in the preceding sections of this report represent only a small fraction of the work undertaken by the Council and its staff. A number of other significant activities were carried on by the Council and its committees and staff, some of which are summarized in this section.

Institutes and Workshops

In 1970, five successful institutes and workshops for judges were organized by the Judicial Council. These programs were:

Institutes

- 1. Sentencing Institute for Superior Court Judges, Monterey, March 20-21, 1970
- 2. Institute for Juvenile Court Judges and Referees, Newport Beach, June 5-6, 1970
- 3. Institute for Municipal and Justice Court Judges, San Diego, October 30-31, 1970

Workshops

- 1. Workshop for Court of Appeal Justices, Newport Beach, June 19-20, 1970
- 2. Workshop for Presiding Judges of the Metropolitan Superior Courts, San Francisco, October 2, 1970

The Sentencing Institute for Superior Court Judges was the sixth annual program for judges assigned to hear criminal matters. Attended by 93 judges from throughout the state, the response to the institute program was uniformly enthusiastic: Featured in the program were both small and large group discussions of important aspects of a criminal court judge's responsibility including discussions of recent appellate decisions, sentencing standards and criteria, current state correctional rehabilitative and parole programs and policies, and roundtable discussions of common problems facing criminal court judges. The program also featured an exceptionally informative keynote speech by Supreme Court Justice Louis H. Burke on the topic, "The Courts and The Problem of Crime." Copies of the published Proceedings will be distributed to California judges and libraries.

The 1970 Institute for Juvenile Court Judges and Referees was also the sixth in a series of such programs, dating back to 1962. According to the judges and referees in attendance, the 1970 Institute was the most successful of those held to date. The program included informative panel discussions on the youthful drug offender, a topic of urgent importance, as well as discussions of recent appellate decisions affecting juvenile court procedure, appropriate dispositional standards and criteria and small group and panel discussions of problem areas in juve-

(73)

nile court procedure. Eighty-four judges and referees attended this program. The Proceedings are also to be published and distributed to those in attendance and to judges and referees newly assigned to hear juvenile court cases.

This year's Institute for Municipal and Justice Court Judges proved to be another successful program, bringing together 91 judges from throughout the state. The program included discussions of sentencing standards and criteria, problems resulting from mass arrests, mass trials and unruly defendants, analyses of significant legislation enacted in the 1970 legislative session, and small group discussions of problem areas in municipal and justice court procedures. Published proceedings will be distributed to all municipal and justice court judges early in 1971.

The 1970 Workshop for Court of Appeal Justices was mainly devoted to discussions of ways of resolving problems created by the ever increasing workload. Building upon the consensus of appropriate ways of coping with the rise in appeals and original proceedings arrived at in the preceding year's program, the 1970 Workshop featured discussions of the organization and use of staff in screening appeals and in other areas, appropriate structure of the appellate courts, and the role of appellate justices in screening appeals and in preparation of memorandum opinions. The workshop produced a resolution urging that funds be provided for additional staff attorneys for purposes of screening appeals and encouraging divisions which have not done so, to initiate screening procedures to select those appeals which are appropriate for summary dispositions. The workshop was attended by 38 of the state's 48 Court of Appeal justices.

Finally, presiding judges of the largest metropolitan superior courts, along with presiding judges of superior courts in counties in which there is a major correctional institution, met with Chief Justice Donald R. Wright in San Francisco, October 2, 1970 to discuss courtroom security and ways of improving judicial administration. The workshop, in part, grew out of the tragic events which had taken place in Marin County and the threats to personal security of judges in other parts of the state, and proved to be an invaluable forum. Appropriate suggestions to improve courtroom security were made and follow-up action is being initiated by the Administrative Office of the Courts. Nineteen presiding judges were in attendance.

Uniform Legal Forms

Six new legal forms for statewide use under California's new Jurisdiction and Service of Process Act were developed and approved by the Judicial Council in 1970. In addition, a new form of Writ of Execution was developed under a new state law governing executions and attachments. This work was undertaken with the cooperation and assistance of the Continuing Education of the Bar.

Uniform Superior Court Rules

Staff assistance was furnished by the Administrative Office of the Courts to aid the 23 superior courts comprising the Third Appellate District in developing a set of uniform local rules. The uniform rules are largely patterned on those developed at an earlier date for the superior courts of the Fifth Appellate District, which were also completed with the help of staff assistance provided by the Administrative Office of the Courts.

Study of California Lower Courts

Substantial progress was made in the past year on the study of the organization of California's municipal and justice courts which is being financed by a federal grant to the Judicial Council under the Highway Safety Act of 1966. The study, which is being conducted by the nationally known consulting firm of Booz, Allen & Hamilton, is under the general supervision of a full-time project director on the staff of the Administrative Office of the Courts. Policy guidance is being furnished by an advisory committee appointed by the Chief Justice. The fact gathering phase of the study commenced in the latter part of June 1970 and will be completed early in 1971. By the end of October 1970, 40 of the 58 counties had been visited, with the remaining counties scheduled for visits prior to the termination of the study. A final report and recommendations is scheduled to be submitted to the Judicial Council in 1971.

Judgeship Reports

During the 1970 legislative session, the Council was again called upon by the Legislature and the Governor's Office to prepare reports on the number of judgeships needed for courts seeking legislative approval for additional judges. There were a total of 24 reports prepared during the 1970 legislative session of which 14 involved municipal courts and 10 concerned superior courts.¹

A separate weighted statistical yardstick was employed for the municipal and superior courts and the reports also contained projections of future workload, based upon recent filing trends. The yardsticks were derived from studies of the amount of judicial time necessary to dispose of different types of filings, as verified by reports from representative superior and municipal courts throughout the state.

Study of Appellate Court Recordkeeping

A study of recordkeeping and operating procedures in the clerks' offices of the Courts of Appeal, undertaken at the request of the Department of Finance, was completed during 1970. The study was done by the nationally known management consulting firm of Ernst & Ernst under contract with the Judicial Council. Its recommendations were reviewed by a special advisory committee appointed by the Chief Justice under the Chairmanship of Presiding Justice Gerald Brown, Court of Appeal, Fourth Appellate District, Division One, San Diego.

75

JUDICIAL COUNCIL OF CALIFORNIA

The Judicial Council acted on the Committee's recommendations at its November 1970 meeting and approved the principle of a central authority responsible for coordinating the Court of Appeal Clerks' Offices. The authority will consist of the Chief Justice and the Administrative Presiding Justices of each of the five appellate districts.

Justice Court Manual

Federal funds were procured this year to finance the updating of the Justice Court Manual resulting from new 1969 and 1970 legislation and recent appellate docisions. Work began on this project during the latter part of the year.

B. SUMMARY OF 1970 LEGISLATIVE ACTION ON COUNCIL RECOMMENDATIONS AND OTHER SELECTED LEGISLATIVE MEASURES

The Judicial Council recommended four measures for enactment by the Legislature at its 1970 Regular Session. Two of these measures one dealing with the creation of an office of State Public Defender to handle indigent criminal appeals, and the other dealing with providing subordinate judicial personnel to assist municipal courts in handling traffic matters—were reported in the 1970 Judicial Council Report. The other two measures were added to the Judicial Council's legislative program following the printing of its annual report. Of these four measures, three received favorable action by the Legislature and the Governor; the State Public Defender proposal failed of enactment.

In addition to its sponsorship of these measures, the Judicial Council was concerned with a number of other legislative measures significantly affecting the judiciary and the administration of justice. This report, therefore, summarizes a selected number of other measures that were enacted in addition to reporting legislative action on measures sponsored by the Judicial Council.

In the material that follows, the Judicial Council measures are summarized chronologically in the order of their introduction. Thereafter, a selected number of Senate and Assembly measures of particular interest to the judiciary are summarized in similar fashion.

Senator Donald L .Grunsky and Assemblyman James A. Hayes were the legislative members of the Judicial Council at the time these measures were introduced, and they were responsible for handling most of the measures sponsored by the Judicial Council.

JUDICIAL COUNCIL MEASURES

Traffic Referees

Assembly Bill No. 270 was introduced by Assemblyman Fenton to effectuate the Judicial Council's recommendation to provide subordinate judicial personnel to assist municipal courts in handling traffic matters.² This measure adds Section 72400 et seq. to the Government Code to provide for the appointment, qualifications, salary and re-

²See 1970 Judicial Council Report 39-43.

ANNUAL REPORT OF THE ADMINISTRATIVE OFFICE

sponsibilities of traffic referees. Added Section 72400 authorizes municipal courts having three or more judges to appoint a traffic referee who must either be a member of the State Bar or have served as a judge of a justice court for five out of the eight years immediately preceding his appointment. Added Section 72404 provides that a traffic referee shall receive a salary equal to one-half the salary of a municipal court judge. Added Sections 72401, 72402 and 72403 specify in detail the authority of the traffic referee, generally authorizing him to fix bail. grant continuances, conduct arraignments, take pleas and set cases for trial, and, in addition, for infractions and those misdemeanors falling within the provisions of subdivision (b) of Vehicle Code Section 42001. to impose a fine on a guilty or no-contest plea not in excess of the applicable bail schedule. It also makes conforming adjustments in a number of other Government Code sections and permits a commissioner having the qualifications prescribed for a traffic referee to exercise the authority conferred upon a traffic referee.

The measure was amended once to restrict the appointment authority to those municipal courts having three or more judges rather than any municipal court as had been originally proposed and was enacted in its amended form.³

State Public Defender

Assembly Bill No. 497 was introduced by Assemblyman Hayes and would have effectuated the Judicial Council's proposal for the establishment of a State Public Defender's office to handle indigent criminal appeals.⁴ The measure would have added Section 68555 et seq. to the Government Code to authorize the Judicial Council to appoint a State Public Defender who would have been required to possess the qualifications of a Court of Appeal judge. His salary would have been set at \$35,000 per year. The measure authorized the State Public Defender to appoint deputies and organize the office to represent indigents in criminal appeals in our Courts of Appeal or Supreme Court, appeals to the U. S. Supreme Court, in writ cases where there is a constitutional right to counsel and in every proceeding where the indigent is under sentence of death. The measure also contemplated changes in the California Rules of Court to speed up the appellate process in criminal cases.

The measure received widespread support from the State Bar, the Los Angeles County Bar, the Attorney General, the California Association of Public Defenders and numerous other interested persons. The Assembly Committee on Criminal Procedure conducted an intensive study of the subject that resulted in a highly favorable committee report. The measure passed the Assembly following favorable recommendations by its policy and fiscal committees. The measure also was favorably reported by the Senate's policy and fiscal committees, following a single amendment to provide explicitly for funding of the new office, but it was defeated on the floor of the Senate following an expression of opposition from the Governor's office.

³Cal.Stats. 1970, Ch. 85. ⁴See 1970 Judicial Council Report 15-23.

79

JUDICIAL COUNCIL OF CALIFORNIA

Penalty Assessments

Assembly Bill No. 1589 was introduced by Assemblyman Haves to effectuate the Judicial Council's recommendations for clarifying the Penal Code and Vehicle Code provisions relating to the imposition and collection of penalty assessments. As introduced, this measure amended Ponal Code Section 13521 and Vehicle Code Section 42050 to clarify the language describing those offenses for which a penalty assessment is imposed. To achieve uniformity in the collection of special assessments. Vehicle Code Section 42006 also was amended to authorize the collection of the special night court penalty assessment under the same circumstances. The measure also was amended twice to accomplish two unrelated purposes. The measure was enacted in this amended form.5

Salary Approval Authority

Assembly Bill No. 1591 was introduced by Assemblyman Haves to amend Government Code Section 18004 to transfer from the Director of Finance to the Chairman of the Judicial Council the authority to approve the salaries of state judicial personnel exempt from civil service under Article XXIV of the Constitution.⁶ The measure was amended once to repeal Government Code Section 68500.1 requiring the Clerk of the Supreme Court to serve as Secretary to the Judicial Council. As thus amended, the measure was enacted.⁷

OTHER MEASURES

Oral Search Warrants

Senate Bill No. 306 was introduced by Senator Grunsky to amend Penal Code Sections 1526, 1528 and 1534 to provide a procedure for issuing duplicate original search warrants upon remote oral statements. In its amended form the measure authorizes a magistrate to accept in lieu of a written affidavit an oral statement under oath in justification of the issuance of a search warrant, which statement is required to be recorded and transcribed; the certified transcription is thereafter treated as an affidavit and is required to be filed with the court. It also permits the magistrate orally to authorize a peace officer to insert the magistrate's name on a duplicate original warrant which is thereafter treated as an original search warrant for all practical purposes. The measure also specifies procedural detail with respect to the filing of the duplicate original warrant and other matters relating to this new statutory procedure. The measure was enacted in this amended form.⁸

Felony Plea Bargaining

Senate Bill No. 621 was introduced by Senator Sherman to add Section 1192.5 to the Penal Code to specify the procedure to be followed in felony plea bargaining, requiring the court to inform the defendant of his right to withdraw his guilty or no-contest plea under specified

⁶ Cal.Stats. 1970, Ch. 1009.

⁷ Cal.Stats. 1970, Ch. 551.
⁸ Cal.Stats. 1970, Ch. 809.

circumstances, and repealing Section 1192.3 in conformity therewith. In an amended form, this measure was enacted.⁹

Appellate Remands

Senate Bill No. 859 was introduced by Senator Cologne to amend Penal Code Section 1260 specifically to authorize an appellate court to remand a cause to a trial court for such further proceedings as may be just under the circumstances, using language in accord generally with the federal procedure pursuant to Section 2106 of Title 28. United States Code. The measure was enacted without amendment.¹⁰

Search Warrant Service

Assembly Bill No. 139 was introduced by Assemblyman Murphy to amend Penal Code Section 1533 to permit search warrants to be served only between the hours of 7 a.m. and 10 p.m. unless the warrant contains a direction authorizing its service at any time of the day or night upon a showing of good cause therefor. In an amended form, the measure was enacted.11

Arraignments

Assembly Bill No. 2148 was introduced by Assemblyman Fenton to add Sections 72190.1 and 72706.1 to the Government Code to authorize commissioners in municipal courts to conduct arraignment proceedings if so directed by the presiding or sole judge of the municipal court. In an amended form, the measure was enacted.¹²

Contempts of Court

Assembly Bill No. 1596 was introduced by Assemblyman Hayes to add Section 1211.5 to the Code of Civil Procedure to specify the procedure to be followed in prosecutions for contempts of court presented pursuant to affidavits or statements of fact. In an amended form, the measure was enacted.¹⁸

Court Commissioners' Law Practice

Assembly Bill No. 1073 was introduced by Assemblyman Hayes to amend Government Code Sections 70142, 72190 and 72706 to prohibit court commissioners in superior and municipal courts from engaging in the private practice of law. In an amended form, the measure was enacted.14

C. CHANGES IN THE CALIFORNIA RULES OF COURT **DURING 1970**

During 1970 the Judicial Council substantially revised a number of appellate rules to implement recommendations made at a 1969 Court of Appeal Workshop for meeting the caseload crisis in those courts.¹⁵

81

JUDICIAL COUNCIL OF CALIFORNIA

The Judicial Council by rule also designated the Administrative Director of the California Courts to serve as Secretary to the Judicial Council and confirmed certain existing functions of the Administrative Office of the Courts. In addition, several changes were made in other appellate and trial court rules, as well as in the Judicial Council's recommended Standards of Judicial Administration, principally to expedite judicial proceedings.

Following is a summary of all the changes, most of which were effective either July 1, 1970 or January 1, 1971, as indicated below.

1. APPELLATE RULES AND STANDARDS

Additional Time for Filing a Cross Appeal

Rules 3 (superior court appeals) and 123 (municipal and justice court appeals) were amended effective January 1, 1971, to provide for an additional time in which any party may file a cross appeal in a civil case. The amendments will eliminate the need for a party to bring a so-called "protective appeal" when he wishes to preserve his right to object to the trial court's judgment if that judgment is attacked by another party on appeal. The amended rules in effect provide that when a timely notice of appeal has been filed by a party, any other party may bring a cross appeal within 20 days (10 days in municipal or justice court appeals) after the trial court clerk mails notice of the filing of the first appeal, or within the normal time otherwise prescribed for initiating an appeal, whichever period last expires.

Examination of Record on Petition for Hearing in Supreme Court

Rule 29(b), governing the instances in which the Supreme Court will examine the record on appeal for error on a petition for hearing, was amended effective July 1, 1970 to facilitate the disposition by memorandum opinion of Court of Appeal cases presenting no substantial legal issues. The amended rule provides that on petition for hearing after decision by a Court of Appeal, the Supreme Court will not examine the record for error unless the petition shows that substantial issues of law or fact were incorrectly stated or were not considered in the opinion by the Court of Appeal and that such issues were raised in the briefs and in a petition for rehearing in the Court of Appeal.

Use of Memorandum Opinions

New Section 6 was added to the Judicial Council's recommended Standards of Judicial Administration effective July 1, 1970 to specify the instances in which a Court of Appeal might appropriately dispose of a case by memorandum or other abbreviated form of opinion. Under this section such cases could include: (a) an appeal that is determined by a controlling statute which is not challenged for unconstitutionality and does not present any substantial question of interpretation or application, (b) an appeal that is determined by a controlling decision which does not require a reexamination or restatement of its principles or rules, and (c) an appeal raising factual issues that are determined by the substantial evidence rule.

Contents of Record on Appeal in Criminal Cases

Rule 33(b) was amended effective July 1, 1970 to authorize a criminal appellant to request that proceedings under Section 1538.5 of the Penal Code for return of property or for suppression of evidence be included in the reporter's transcript on appeal. The amendment eliminates the need for appellate courts to make formal orders augmenting the record to include Section 1538.5 proceedings, as well as eliminating the resultant delays.

Administrative Justices in Courts of Appeal

Rules 75 and 76 were added effective July 1, 1970 to provide for the designation of an Administrative Presiding Justice in multi-division Courts of Appeal. At the June 20–21, 1969 Courts of Appeal Workshop one of the participants' recommendations was that an administrative justice be designated in each Court of Appeal. The recommendation further provided that the presiding justice of one-division Courts of Appeal should perform this function and that in multidivision districts an administrative justice should be selected by the Chairman of the Judicial Council. Rule 75 effectuates that recommendation. Rule 76 specifies the duties of the Administrative Presiding Justice.

Payment of Fee on Civil Appeal from Municipal or Justice Court

Rule 130 was amended effective July 1, 1970 to conform the procedure for payment of filing fees on appeals from the lower trial courts with that on appeals from the superior court. The amended rule in effect provides that the filing fee will be payable to the superior court when the record on appeal is received from the municipal or justice court.

2. TRIAL COURT RULES AND STANDARDS

Notice of Hearing of Demurrer

Rules 202, 203 (superior courts), 502 and 503 (municipal courts) were amended effective January 1, 1971 generally to make the present noticed motion practice applicable to demurrers, and to require demurrers and motions to strike to be heard at the same time.

Setting Misdemeanor and Traffic Citation Cases for Arraignment and Trial

Rule 830 was added effective January 1, 1971 to allow municipal and justice court judges to authorize their clerks to set misdemeanor and traffic citation cases for arraignment and trial. For this purpose the Judicial Council has approved a standard legal form, Notice of Arraignment and Trial Date, for optional use by the courts. Use of this procedure and the form will avoid inconvenience to the public and save the judges' time by allowing defendants to make a single court appearance for arraignment and trial when they wish to plead not guilty, in place of the two or more appearances otherwise required.

Uniform Traffic Bail Schedule

Rule 850(b) setting forth the Judicial Council's Uniform Traffic Bail Schedule was amended effective January 1, 1971 to show the offenses for which a penalty assessment must be added to the fine. The amendment was made after the 1970 Legislature, at the Judicial Council's request, had amended Vehicle Code Section 42050 to clarify the application of penalty assessments.

Administrative Director of the California Courts

New Division V and Rules 990, 991 and 992 were added to Title Three, Miscellaneous Rules, effective November 23, 1970, to designate the Administrative Director of the California Courts to serve as Secretary to the Judicial Council. The new rules also confirm the existing functions of the Administrative Office of the Courts.

Joinder of Third Parties in Family Law Proceedings

Chapter 2.5, containing Rules 1250 through 1255 was added to Title Four, Special Rules for Trial Courts, Division I, Family Law Rules, effective November 23, 1970, to provide for the joinder of third parties in family law proceedings. The new rules provide that such joinder may be proposed upon noticed motion by the petitioner, the respondent, a person who has or claims custody of the minor children of the marriage, or a person served with a temporary restraining order affecting property in his possession or the custody of minor children of the marriage.

Form of Summons (Marriage)

Rule 1283 governing the form of summons that must be used in family law proceedings was amended effective July 1, 1970 to conform the proof of service provisions to California's new Jurisdiction and Service of Process Act.¹⁶

Duties of Presiding Judge

Subdivision (p) was added to Section 2 of the Judicial Council's recommended Standards of Judicial Administration effective July 1, 1970 to provide that the presiding judge or his appointee should, when appropriate, meet with members of the bench, bar or news media to "promote understanding of the principles of fair trial and free press." This subdivision was adopted by the Judicial Council as a result of approval of a "Joint Declaration Regarding News Coverage of Criminal Proceedings in California" by the Conference of California Judges, the State Bar and the California Freedom of Information Committee representing the news media.

Use of BAJI and CALJIC Pattern Jury Instructions

Section 5 of the Judicial Council's recommended Standards of Judicial Administration, at the request of the State Bar's Board of Governors, was amended to provide that in considering proposed jury instructions, a trial judge should give equal consideration to those submitted by the parties as well as to the pattern jury instructions contained in the latest edition of California Jury Instructions—Civil (BAJI) or California Jury Instructions—Criminal (CALJIC).

¹⁶ See F. Judicial Council Legal Forms, infra.

ANNUAL REPORT OF THE ADMINISTRATIVE OFFICE

83

D. JUDICIAL REDISTRICTING

There were 319 judicial districts in California at the end of both fiscal years 1968-69 and 1969-70. This was the first time in nine years that the total did not decline. The only districting change in 1969-70 occurred in Butte County where the Chico Justice Court District became a municipal court district on July 1, 1969.¹⁷ Reflecting this change, the number of districts served by municipal courts increased by 1 to 75 in 1969-70 while the number served by justice courts decreased by 1 to 244.

Table Å gives the total number of judicial districts as of June 30 for each year since the lower court reorganization ¹⁸ and the number served by justice courts and municipal courts.

TABLE A-CALIFORNIA JUDICIAL DISTRICTS As of June 30, 1953 Through 1969

Year	Tot r	Number of	Number of		
	judicial districts	justice courts	municipal courts		
1053 1054 1055 1056 1057 1058 1059 1059 1050 1052 1061 1062 1062 1064 1065 1066 1067 1068 1069 1069 1060 1060 1070 1070	400 400 395 395 393 890 874 374 374 371 370 365 361 370 365 361 349 338 328 328 319 319	349 348 342 341 335 329 312 307 307 298 298 298 298 298 298 298 298 298 298	51 52 53 54 58 61 62 67 69 72 73 73 73 73 73 73 73 73 73 73 73 73 73		

Since the reorganization of the lower courts the number of judicial districts in California has been reduced by 20 percent from a total of 400 in June 1953 to 319 in June 1970. Over the same period the number of justice court districts decreased by 30 percent from 349 to 244 while the number of municipal court districts increased by almost 50 percent from 51 to 75. These trends largely reflect two factors: (1) redistricting by local boards of supervisors resulting in the consolidation of separate justice court districts to form either municipal court of larger justice court districts and (2) the creation of municipal courts as district populations increase to the 40,000 constitutional limit for justice courts.

The Judicial Council completed districting surveys of Placer and Napa Counties in 1969–70 at the request of their boards of supervisors. The Council's report to the Placer County Board of Supervisors recommended that the justice court districts of Auburn, Foresthill, Lincoln, Loomis and Roseville be consolidated into a single municipal court district sitting at Auburn with sessions at Roseville and that the Colfax Justice Court District be consolidated into the proposed munic-

¹⁷ By an ordinance dated July 28, 1976 the Board of Supervisors of Butte County consolidated the Durham Justice Court District into the Chico Municipal Court District effective January 1, 1971.
 ³⁵ See Fourteenth Blennial Report (1953) 12-28,

JUDICIAL COUNCIL OF CALIFORNIA

ipal court district when workload justifies a second judgeship in the municipal court. It was further recommended that the Tahoe Justice Court District remain unchanged.

The Council's report to the Napa County Board of Supervisors recommended that the Napa Justice Court District with an estimated population of 65.000 be immediately declared a municipal court district as required by the California constitution ¹⁹ and that the justice court districts of Calistoga and St. Helena be consolidated into a single justice court district. The report further recommended a single countywide municipal court district at such time that the workload of such a court would require two judges.

E. JUSTICE COURT QUALIFYING EXAMINATIONS

The regular qualifying examination required by Judicial Council regulations to be given every six years to qualify layman candidates for election to the office of judge of the justice court was held on January 24, 1970 at 13 examination centers.²⁰ Of the 137 persons who took the examination, 62, or 45 percent, passed and 75, or 55 percent, failed. Residents of 30 counties qualified. The qualifying examination has been made more comprehensive since the last regular examination was given in 1964 when 61 percent of the applicants passed and 39 percent failed.21

Special qualifying examinations were given in five counties during fiscal year 1969-70 and the first half of fiscal year 1970-71.22 A total of 67 persons took these examinations of whom 41, or 61 percent, passed and 26, or 39 percent, failed. Twenty-nine counties were represented by the successful examinees.

No oral examinations were given during the above period. Oral examinations are required whenever there are more than three qualified candidates (both laymen and attorneys) for appointment to a vacancy in the office of judge of the justice court.²³

F. JUDICIAL COUNCIL LEGAL FORMS

Six new legal forms designed for statewide use in making service of process were approved by the Judicial Council effective July 1, 1970. In addition, the Judicial Council revised four previously approved forms to incorporate changes principally required by statutes enacted by the 1970 Legislature, and it also approved a new form of Writ of Execution for use under a new state law governing executions and attachments.24

²⁰ Cal. Const. Art. VI, § 5 ". . . there shall be a municipal court in each district of more than 40,000 residents."
 ²⁰ Gov. Code § 71601; Regulations Pertaining to Qualifying Examination for the Office of Judge of the Justice Court, Judicial Council Fourteenth Blennial Report

¹¹ See Judicial Council Twentleth Blennial Report (1965) 96. ²³ Special Examinations were given in Mendocino, San Bernardino, Siskiyou, Sutter and Tuolumne Counties.

Gov. Code §§ 71180.4, 71601.3, and see Judicial Council Twentieth Biennial Report (1965) 97, footnote 5.
 Cal. Stats. 1970, Ch. 1523, effective November 23, 1970.

In 1969 the Legislature had enacted a new Jurisdiction and Service of Process Act, authorizing several new methods of serving a summons, operative July 1, 1970.25 The new act was enacted as a result of recommendations jointly made by the Judicial Council and the State Bar, and it required the courts and attorneys to use new forms of summons beginning on that date.²⁶ The new forms, which were prepared in consultation with the State Bar staff and the California Legal Forms Committee, a statewide committee with representation from most of the statewide organizations interested in such forms, are: (1) Summons, (2) Instructions on Preparing Proof of Service. (3) Notice and Acknowledgment of Service. (4) Summons (Unlawful Detainer), (5) Summons (Joint Debtor) and (6) Summons (Marriage).

In addition to the new forms of summons, four legal forms previously approved by the Judicial Council effective November 10, 1969 were revised to incorporate various 1970 statutory changes: (1) Request to Enter Default, Declaration under CCP 585.5, Declaration of Mailing, Memorandum of Costs and Declaration of Non-Military Status, (2) Declaration for Undertaking of Attachment Against Resident Defendant(s), (3) Writ of Attachment and (4) Request for Dismissal.²⁷ The revised form of Request to Enter Default, etc., has been approved for statewide use effective January 1, 1971 because the principal legislation affecting it was effective as of that date.²⁸ The other three forms, as well as a new form of Writ of Execution, were approved effective November 23, 1970, the date when other 1970 legislative changes became effective. Under Rule 982 of the California Rules of Court all courts are required to use the revised forms commencing on January 1, 1971.29

The four revised forms include the following substantive changes:

(1) Request to Enter Default, Declaration Under CCP 585.5, Declaration of Mailing, Memorandum of Costs and Declaration of Non-Military Status: New form of Declaration Under CCP 585.5 has been added to facilitate compliance with the new law requiring every application for default under CCP 585(1) to include, or be accompanied by, an affidavit stating facts showing that the action is or is not subject to the venue provisions of CC 1812.10 (Unruh Act) or CC 2984.4 (Rees-Levering Act). (Stats. 1970. Ch. 725.) The form of Declaration of Mailing has been revised to state that a copy of the application for default was mailed, rather than was mailed by the plaintiff or his attorney, to each defendant's attorney of record, or if none, to such defendant at his last known address. (Stats. 1970, Ch. 105.)

(2) Declaration and Undertaking for Attachment Against Resident Defendant(s): The declaration regarding whether the action is based on a debt incurred for necessaries has been deleted, and the declaration regarding the defendant's bankruptcy has been amended, in conformity with amended CCP 538. In addition, a new form showing that the action was commenced in the proper

JUDICIAL COUNCIL OF CALIFORNIA

trial court has been added to facilitate compliance with the requirements of CC 1812 and 1812.10 (Unruh Act). (Stats. 1970, Ch. 1523.) The form of *Declaration and Undertaking by Sureties* has been revised to cover undertakings under, as well as over, \$2,000. (See CCP 1041 and 1057.)

(3) Writ of Attachment: This form is changed to call attention to amended CCP 538, which provides that no attachment may be issued when the amount claimed, exclusive of any interest and attorney's fees, is less than \$200. (Stats. 1970, Chs. 1319 and 1523.)

(4) Request for Dismissal: Appropriate provisions have been added for noting: (1) the type of action involved for purposes of later reporting the dismissal to the Judicial Council, and (2) if the dismissal was entered by the clerk as to less than all the defendants requested by the plaintiff, the names of the defendants against whom the dismissal was entered and the date of such entry.

Drafts of the new forms were prepared for the Judicial Council's consideration by the staff of the California Continuing Education of the Bar, which has agreed to develop a comprehensive system of court forms suitable for Judicial Council adoption for statewide use. Before these forms were submitted for Council approval, each form was studied and approved by the California Legal Forms Committee in consultation with the State Bar staff. This system of statewide review of each proposed form before Judicial Council approval has resulted in the design of forms that will accommodate the needs of both the courts and attorneys.

In the future, it is anticipated that the Continuing Education of the Bar will publish and maintain all Judicial Council approved forms in a loose-leaf CEB manual which will also contain annotations dealing with the source of each form, the statutes or rules that govern it, instructions on the use of each form and references to relevant discussions in CEB practice books and other reference works. The looseleaf format will then permit the courts and attorneys to reproduce each form by use of office copying machines for filing in any court of this state.

G. RECOMMENDATIONS REGARDING BRANCH COURT SESSIONS OF SUPERIOR COURTS

Subsection (c) of Government Code Section 69252 requires that, "The board of supervisors of counties seeking to establish or terminate branch court sessions [of superior courts] shall request the recommendations and advice of the Judicial Council before taking action."

Reports and recommendations regarding superior court branch court sessions were made at the request of the boards of supervisors of Alameda, Orange and Riverside Counties. In the case of Alameda the Council recommended the establishment of multi-department, fullservice branch operations in the City of Hayward as facilities at that location became available and as such operations were required by growth in court business. The report to the Orange County Board of Supervisors recommended that branch sessions conducted in the City of Fullerton be terminated, and the report to the Riverside County Board of Supervisors recommended against establishing branch sessions in the City of Palm Springs. The recommendations against branch sessions in those cities were based on the fact that such sessions would be expensive, inefficient and disruptive of overall court operations and that the needs of local residents would be adequately and conveniently served without such sessions.

CHAPTER 2

JUDICIAL STATISTICS

A. SUPREME COURT

1. SUMMARY OF FILINGS AND BUSINESS TRANSACTED

Total filings in the Supreme Court during 1969-70 in reaching the 3,400 level were only slightly above the previous year's 3,322 filings. Noteworthy in this year's filing figures are a 10 percent increase in petitions for hearing and more than an 8 percent decrease in criminal original proceedings.

The growth in petitions for hearing in the Supreme Court may be expected to continue as a reflection of the growing workload of the Courts of Appeal.

The 1969-70 Supreme Court filings included 1,319 original proceedings, 2,064 petitions for hearing and 17 criminal appeals. During the same period the court disposed of 2,064 petitions for hearing, 1,212 original proceedings, 114 appeals, 67 miscellaneous motions, 95 petitions for rehearing, 46 executive elemency applications and issued 1,174 orders, for a total of 4,772 transactions.

TABLE I-CALIFORNIA SUPREME COURT SUMMARY OF FILINGS

Fiscal Years 1959-60 Through 1969-70

Type of filing	1959- 60	1960- 61	1961- 62	1962- 63	1963- 64	1964- 65	1965- 66	1966- 67	1967- 68	1968- 69	1969- 70
Total filings	1,313	1,403	1,438	1,562	1,872	2,569	2,522	2,716	2,959	3,322	3,400
Appeals Civil Criminal	269 18	280 18	303 15	292 20	241 16	261 17	212 31	189 22	19 30	0 15	0 17
Original proceedings Civil	78 142	55 193	104 204	87 239	111 530	109 1,056	74 983	91 1,026	83 1,057	84 1,349	84 1,235
Manions to dismiss on clerk's certifi- cate	25	20	9	17	29	15	7	9	1	0	0
Petitions for hearing of cases previ- ously decided by the Courts of Appeal	783	837	803	907	945	1,111	1,205	1,379	1,769	1,874	2,064

The court disposed of 205 matters by written opinion in 1969-70. This figure was almost identical to the number in 1968-69, and compares to an annual average for the past 10 years of approximately 175 dispositions by written opinion.

2. APPEALS

Only death penalty appeals are filed directly in the Supreme Court.¹ Consequently, appeals disposed of by written opinion, other than death penalty cases, are those in which the Supreme Court granted a petition for hearing after decision by a Court of Appeal. In 1969-70 there were 114 appeals disposed of by written opinion, of which 65 were civil and 49 criminal appeals.

3. ORIGINAL PROCEEDINGS

Criminal original proceedings (chiefly writs of habeas corpus) filed in the Supreme Court dropped from a record high of 1,349 in 1968-69 to 1,235 in 1969-70. It is of interest to note that the approximately 1,000 filings of these matters in the Courts of Appeal also represented a decrease from a year earlier.

During 1969-70 the court disposed of 91 original proceedings (50 civil and 41 criminal) by written opinion, the highest number since the 97 such dispositions in 1935. One hundred and ten civil and 1,011 criminal original proceedings were disposed of without opinion.

TABLE II-CALIFORNIA SUPREME COURT BUSINESS TRANSACTED

Fiscal Years 1959-60 Through 1969-70

4. PETITIONS FOR HEARING

The 2,064 petitions for hearing on matters previously decided by the Courts of Appeal were 190 above the previous year. The greatest gain was in the category of civil original proceedings with 635 petitions for hearing filed for a gain of 178, or 39 percent. This increase corresponds to a 35 percent increase in civil original proceedings filed in the Courts of Appeal. It should be pointed out that some matters classified as civil original proceedings may involve writs of mandamus

¹ Filings of civil appeals in the Supreme Court have been eliminated as a result of a constitutional amendment adopted November 8, 1966. Cal. Const., Art. VI, §11 'states: "The Supreme Court has appellate jurisdiction when judgment of death has been pronounced. With that exception courts of appeal have appellate jurisdiction when superior courts have original jurisdiction and in other causes prescribed by statute."

^R Revised. Petitions for hearing on motions to dismiss appeals which were previously classified under miscellaneous motions are now included with appeals.

or prohibition which stem from criminal cases. (See section on Courts of Appeal filings of original proceedings.) While only slightly over 9 percent of the petitions for hearing were granted the 191 granted exceeded the previous year by 21 percent. In 34 instances the cases were transferred back to the Courts of Appeal.

The approximate proportion of petitions granted in the various categories were: civil appeals, 12 percent; criminal appeals, 5 percent; civil original proceedings, 9 percent; criminal original proceedings, 10 percent; and miscellaneous motions and applications, 18 percent. In the latter grouping 19 of the 27 petitions granted were on motions to recall the remittitur.

ANNUAL REPORT OF THE ADMINISTRATIVE OFFICE

B. COURTS OF APPEAL

1. SUMMARY OF ACTIVITY 1969-70

The over 8,000 filings in the Courts of Appeal in 1969-70 represented an increase of approximately 17 percent above the level of the previous year on both a weighted and an unweighted basis. The greatest increases were in criminal appeals (21%) and civil original proceedings (35%).

The courts disposed of nearly 8,000 appeals and original proceedings, a gain of 13 percent in dispositions but slightly less than the number of filings for the year.

The total number of appeals pending on June 30, 1970 was almost 4,000 or 8 percent more than on June 30, 1969. Included in the pending appeals were approximately 1,400 which were argued, calendared or ready for calendar and 2,600 appeals in various stages of preparation but short of readiness for calendar.

In 1969-70 the Courts of Appeal wrote 3,384 majority opinions, 236 more than the prior year. Included in these opinions were 225 "by the court" opinions, a large increase from the 57 in 1968-69. Judges assigned to the Courts of Appeal wrote 345 majority opinions. In addition to the majority opinions there was a total of 46 dissenting and 25 concurring opinions.

The 41 judges of the Courts of Appeal who served throughout the 1969-70 fiscal year wrote an average of 65 opinions per judge. This figure does not include "by the court" opinions but does include coneurring and dissenting opinions. The number of written opinions amounts to an average of 70 per judge, when "by the court" opinions are included.

The Courts of Appeal certified 61 percent of their opinions for nonpublication. This figure comprised one-half of the civil appeal opinions, three-quarters of the criminal appeal opinions and one-third of the opinions in original proceedings. The proportions of opinions that were not published were higher than in any prior year.

Fiscal Years 1959-60 Through 1969-70

JUDICIAL COUNCIL OF CALIFORNIA

The Courts of Appeal have had 48 authorized judges since November 10, 1969. The incoming workload during the year ending June 30, 1970 indicated a need for 59 judges. The 1970 Judicial Council Report (page 84) estimated that there would be a need for 58 judges in 1970-71, but a conservative new estimate now shows a probable need for 65 judges in 1970-71 and 71 judges in 1971-72.

Appeals

Filings of appeals in the Courts of Appeal during 1969-70 had the highest growth rate of any year in the past decade. The 4,543 appeals filed were 17 percent above the number in 1968-69, a figure far exceeding the growth rate of superior court filings and dispositions.

The nearly 2,000 civil appeals filed represented a 13 percent increase which is also the highest of the decade. Criminal appeals jumped 21 percent to over 2,550 and, while there were larger percentage gains in 1962-63 and 1965-66, the 442 additional filings is a record volume increase.

The Courts of Appeal by increasing their dispositions of appeals 10 percent to 4.834 in 1969-70 were almost able to keep pace with the 4.861 filings of appeals and motions to dismiss on clerk's certification.² The disposition by written opinion of 1,500 civil and 1,721 criminal appeals was 263 more than in the previous year and coincidentally was the same volume increase as in 1968-69.

Original Proceedings

Civil original proceedings (writs of mandamus, prohibition and administrative review) increased a dramatic 35 percent in 1969-70.³ The 2.172 filings for the year is more than double the number of such filings in 1966-67 and four times greater than in 1959-60. The total of civil original proceedings filed in 1969-70 consisted of 280 petitions for writs of review,⁴ 963 petitions under Sections 999a and 1538.5 of the Penal Code⁵ and 929 other writs of mandamus and prohibition, The figures for a year earlier were 313 writs of review, 597 petitions under Sections 999a and 1538.5 of the Penal Code, and 698 other writs.

The slightly over 1,000 criminal original proceedings (habeas corpus) filed in 1969-70 were below the prior year. Filings of these proceedings, after climbing 25 percent to 1,073 in 1967-68 appear to have leveled off.

The over 3,100 original proceedings disposed of were 19 percent higher than a year earlier, but the 221 (189 civil and 32 criminal) disposed of by written opinion were slightly lower than the previous year's record high of 245. Dispositions by written opinion amounted to 7 percent of the total dispositions of original proceedings in 1969-70, and compares to a 10-year annual average of 8 percent.

Included in civil original proceedings is a large number of petitions for writs of prohibition and mandamus which arise in criminal cases. However, the review proceedings provided are classified as civil proceedings.

 Chiefly roview of dispositions of the Workmen's Compensation Appeals Board.
 Section 1538.5 of the Penal Code became effective in November 1968 and provides for appellate review of orders on motions for return of property or suppression of evidence obtained in unreasonable search. The People, as well as defendants, may seek such review.

ANNUAL REPORT OF THE ADMINISTRATIVE OFFICE

Transfer of Municipal and Justice Court Appeals

During 1969-70 a record number of 50 (11 civil and 39 criminal) appeals from municipal and justice courts were certified to the Courts of Appeal after decision in a superior court. However, none of the appeals were ordered transferred to the Courts of Appeal during the period.

The following are cumulative figures from January 2, 1962, when the certification procedure was adopted, through June 30, 1970:

Transfers on Certification	Total	Civil	Criminal
Granted	- 66	21	45
Denied	- 157	48	109
Transfers on court's own motion	6	2	4

2. WEIGHTED CASELOADS 7

The weighted caseloads for the Courts of Appeal during 1969-70 increased 16.7 percent which is comparable to the 16.9 percent gain in filings. The comparative changes for each of the districts are as follows:

Percentage Change to 1969-70 from 1968-69

Appellate District	Weighted Caseload	Unweighted Caseload
State total	16.7	16.9
District I	12.2	
District II	12,2	20.6
District III	24.0	20.0
		-0,9
		16.6
District V	10.4	101

It can be seen from Table VII that in three of the districts the average workload per judge in terms of weighted units is 28 to 33 percent above the standard.

Based upon the total weighted incoming workload during 1969-70 there was a need for 59 judges. The workload for the previous year showed a need for 50 judges. The addition of three authorized judges. during 1969-70 resulted in the present total of 48 authorized judges. The gap between needed judges and authorized judges was partially narrowed by the temporary assignment of the equivalent of six judges. The increased use of timesaving "by the court" opinions in some of the appellate divisions also helped in meeting the demands of the incoming workload.

California Rules of Court, Rules 61-69.
 The Judicial Council utilizes a weighted caseload system which affords a more, precise measure of the workload of the Courts of Appeal than is provided by measuring total filings and transfers. The system gives recognition to the fact that the various types of cases filed in the Courts of Appeal require varying amounts of judicial effort. Civil appeals on the average require the greatest amount of court time and the system accordingly gives a civil appeal more weight than a criminal appeal and much more weight than an original proceeding. Included in the system is a standard weighted caseload of 1,200 units for an appeal at units, each civil original proceeding 2 units and each criminal original proceeding 1 unit.

³ Motions to dismiss on clerk's certification are not counted as appeals filed; however, most of these motions are granted and are included as appeals disposed of with-

CONTINUED 10F3

95

The 1969-70 weighted filings in the five appellate districts indicated a need for the following number of judges:

Judges Needed Based Upon 1969–70 Weighted Caseload (Standard Caseload—1,200 units)

(etallaura eusciona allese units)	
State total	58.8 judges
District I	16.0 judges
District II	
District III	
District IV	9.2 judges
District V	2.8 judges

Estimates based upon a trend figure of less than 10 percent (the 1969-70 figure was 17 percent) indicate that in 1970-71 there will be a need for 65 judges and in 1971-72, for 71 judges or 23 more than are now authorized.

3. BACKLOG

Appeals Pending ⁸

On June 30, 1970 there were nearly 4,000 appeals pending. This was 8 percent more than on the same date one year earlier. The average number of appeals pending per judge increased between the two dates from 82 (45 authorized judges) to 83 (48 authorized judges) in spite of the addition of three judges.

 Division with five authorized judges.

⁸ Appeals pending consist of all appeals that have been filed and not as yet decided.

Among the pending appeals were some 2,600 appeals (1,139 civil and 1,462 criminal) not ready to be heard.⁹ This was an increase of 22 percent in one year in the number of such appeals pending and a portent that the workload pressure on the courts will continue to grow.

Appeals Argued, Calendared, or Ready for Calendar

96

As of June 30, 1970 the 1,376 ready appeals which had not been decided were 164 less than the number on June 30, 1969. The reduction is attributable entirely to the Second Appellate District (Los Angeles), since all other districts experienced increases. In the Second District which had a drop of 288 ready pending appeals there were 158 "by the court" opinions and 194 opinions by assigned judges during 1969-70.

Considering the large number of unready appeals pending and the filings reported for early 1970-71, at the time this report is written, the backlog may be expected to increase during 1970-71. It is estimated that the full time of 48 authorized judges would be required for six months to dispose of the pending appeals which had been argued or calendared, or were ready for calendar on June 30, 1970.

ANNUAL REPORT OF THE ADMINISTRATIVE OFFICE

97

4. DELAY

While an examination of the number of matters pending in the Courts of Appeal is important to any analysis of the courts' workload and needs, even more significant to users of the courts is the overall time it takes to receive a decision on an appeal. Criminal appeals receive priority in calendaring and therefore the delay factor is shorter than for civil appeals. Table X indicates for each appellate division the median time interval in months between the filing of the notice of appeal and the filing of the opinion in a case, and from the time an appeal was ready for calendaring to the filing of the opinion. The time intervals shown are for the last quarter of the fiscal year ending June 30, 1970.

b Division with five authorized judges.

Civil Delay

The overall average time from the notice of appeal to the filing of the opinion in civil appeals varies from 14 to 23 months in the 13 divisions of the Courts of Appeal. In five divisions the overall time was less than 18 months and in eight divisions it was between 18 months and two years. Comparing these times with the last quarter of the previous year, three divisions reported no change, eight divisions less time and two divisions reported more time.

The interval between the time an appeal is ready for calendar and the filing of the opinion represents delay that is more directly attributable to congestion in the court. In seven of the 13 appellate divisions this interval for civil appeals ranged from 9 to 12 months, in five divisions, from 3 to 7 months and in only one division was it over 12 months.

Criminal Delay

In three appellate divisions the average overall time for criminal appeals was one year or less. In the remaining 10 divisions the overall time was between 13 and 17 months. Many of the divisions are relatively current in handling criminal appeals that are ready for calendar. The average time from closing brief to filing of the opinion was three months or less in eight divisions and four to six months in five divisions.

5. PUBLICATION OF OPINIONS

Under legislation enacted in 1963, publication of appellate court opinions is limited to those which the Supreme Court deems it expedient to publish.¹⁰ Pursuant to this statutory provision the Supreme Court adopted Rule 976 of the California Rules of Court, effective January 1, 1964, which requires publication of all Supreme Court opinions, but provides that opinions of a Court of Appeal or of an appellate department of the superior court are to be published if they involve a new and important issue of law, a change in an established principle of law, or a matter of general public interest. Under the provisions of the rule, a Court of Appeal opinion is published unless a majority of the court rendering the opinion certifies that it does not meet the standard for publication.

During 1969-70 the Courts of Appeal judges wrote 3,384 majority opinions with 2,054 or 61 percent certified for nonpublication. This is the highest percentage ever so certified. In previous years it varied from 50 to 55 percent. Eleven of the 13 divisions this year had at least 50 percent of their opinions certified for nonpublication.

The courts certified 50 percent of all the opinions in civil appeals for nonpublication. For criminal appeals the figure was 74 percent and original proceedings 33 percent. Comparative figures for 1968–69 were 43, 68 and 32 percent, respectively. The proportion of unpublished opinions varied from division to division as is shown in Table XI.

¹⁰ Cal.Stats. 1963, Ch. 1353; Gov. Code § 68895.

C. SUPERIOR COURTS

Filings and dispositions in the superior courts again rose to new record highs continuing a long-term trend in which these gross measures of court input and output have established new records in each successive year. The 1969-70 gain in filings amounted to 3 percent while dispositions rose by 1 percent. After eliminating dismissals of inactive cases for lack of prosecution ¹¹ the gain in dispositions totaled only 1.554. This amounted to an increase of only four-tenths of 1 percent, compared to the 3 percent gain in filings. Thus, the gap between filings and dispositions increased to 92,418 as the matters disposed of fell about 18 percent short of the number of new cases filed.

TABLE XII-CALIFORNIA SUPERIOR COURTS FILINGS AND DISPOSITIONS (EXCLUDING CIVIL CASES DISMISSED FOR LACK OF PROSECUTION)

Fiscal year	Filings	Dispositions (excluding dismissals for lack of prosecution)	Net difference between dispositions and filings	Dispositions as percent of filings

968-69	508,432	416,014		81.8

Fiscal Years 1959-60 Through 1969-70

R Revised.

That filings have exceeded dispositions each year, and generally by an increasing margin in recent years, is not itself a cause for concern since filings represent potential rather than actual workload. Many cases are abandoned without being dismissed, remaining inactive on court records but never becoming part of real workload or backlog. Moreover, there is a normal time lag between the filing of a case and its readiness for disposition and consequently the backlog tends to increase in times of rapidly increasing filings. Thus, despite an increasing spread between filings and dispositions, courts may be current in the sense that they are disposing of all cases ready for termination. An additional factor in 1969-70 was that filings for "dissolution of marriage" under the new Family Law Act increased markedly while dispositions necessarily lagged somewhat behind.

Despite these factors which help to explain the widening gap between filings and dispositions, the inability of the superior courts to increase dispositions by more than a fraction of the increased input of filings portends future problems of congestion and delay. Superior court filings per judge were greater than ever before and this business represented greater judicial workload than in earlier years. These developments clearly suggest that there is a general overall need for more judicial manpower in the superior courts.

1. FILINGS

Filinas in 1969-70

A record 508,432 superior court cases were filed in 1969-70, up by 14,801 from the previous high in 1968-69. The 1969-70 gain in filings amounted to 3 percent compared to a 5.6 increase in 1968-69 and an average gain of 4.6 percent in the years since 1959-60.

The number of filings per judge 12 is often used as a rough index of judicial workload,¹³ and the per judge average of 1,222 recorded in 1969-70 was the highest on record. Based on this record average, the gain in filings equaled the workload of 12 judges while the actual number of authorized judgeships increased by only 8. Stated differently, there was a 2 percent increase in judgeships while incoming business increased by 3 percent.

TABLE XIII-CALII , RNIA SUPERIOR COURTS TOTAL FILINGS

Fiscal Years 1959-60 Through 1969-70

		Increase in filings from preceding year		
Fiscal year	Filings	Amount	Percent	
1959-60 1960-81 1961-62 1962-63 1962-64 1962-65 1964-65 1965-66 1965-67 1967-68 1968-69 1969-70	329,539 362,259 375,809 373,190 390,649 416,338 436,895 446,500 467,560 R493,631 508,432	$\begin{array}{c} 22,7\bar{2}\bar{0}\\ 3,550\\ 17,381\\ 23,459\\ 19,689\\ 19,657\\ 10,605\\ 21,060\\ r_{2}6,071\\ 14,801\\ \end{array}$	8.9 1.0 6.3 5.0 4.7 2.4 4.7 85.8 3.0	

Revised.

Even more significant than the recent gains in total filings is the rapid shift that has occurred in the types of matters brought before the superior courts. Increases in filings have generally been greatest in the categories of proceedings which generate the greatest judicial workload. Thus, in 1969-70 the combined filings in the high workload categories of criminal, juvenile and personal injury cases accounted for $\overline{40}$ percent of total filings, in contrast to 34 percent only three years earlier. Small changes in the amount of incoming criminal, juvenile and personal injury business have a disproportionate effect on court operations because of the priority given criminal and juvenile matters, because each group generates a high proportion of contests and because criminal and personal injury matters account for nearly 90 percent of all jury trials. The net result of the change in the types of filings is that today the same number of filings represents a significantly greater judicial workload than in earlier years.

 "Per judge" analyses are based on the number of authorized judges as of the last day of the fiscal year. They are not adjusted for the services of commis-sloners or referees nor for absences or unfilled vacancies. Neither are adjust-ments made for judicial assistance given or received.
 ¹³ See Weighted Caseload infra. 13 See Weighted Caseload, infra.

101

مور مور دارا

¹¹ Under Cal. Code Civ. Proc. §§ 581a and 583 courts may dismiss old cases for lack of prosecution. From time to time individual courts may define their records by mak-ing such "housekeeping" dismissals. In 1969-70 these totaled 8,563 as against 4,982 in 1968-69. In the discussion that follows disposition figures exclude dis-missals for lack of prosecution.

Formerly "Divorce, separate maintenance and annulment."

Reported as a separate category starting in 1907-68.
 Eminent domain filings (parcels) are shown separately starting in 1965-66. In prior years they were included as part of "Other civil."

While incoming criminal and juvenile filings again increased to new record highs, the rate of growth was down substantially from the dramatic increases reported in the immediately preceding years. A record 72.048 criminal defendants were filed on in 1969-70 in the superior courts, 3,889 more than in 1968-69. The proportionate increase, which amounted to 5.7 percent, was down sharply from gains of 23.8 percent in 1968-69, 18.9 percent in 1967-68, 7.8 percent in 1966-67 and 13.1 percent in 1965-66. Most of the gain was reported by superior courts other than Los Angeles. Criminal filings in the Los Angeles court increased by about 2 percent in contrast to almost 10 percent for the balance of the state.

Under the amended provisions of Section 17 of the Penal Code which became effective in November 1969, the judicial workload of superior courts was somewhat reduced in 1970 by the disposition in municipal and justice courts of a number of criminal cases which previously would have been prosecuted through superior courts. Section 17 as amended provides that district attorneys may prosecute as misdemeanors those criminal offenses that are punishable as either felonies or misdemeanors, or alternatively that the magistrate with the consent of the defendant and prosecutor may dispose of these cases as misdemeanors at the time of the preliminary hearing. The Bureau of Criminal Statistics ¹⁴ of the Department of Justice estimates that in the first half of 1970 approximately 2,600 cases in which there were felony complaints were disposed of in municipal or justice courts

¹⁴ The California Bureau of Criminal Statistics is the source of all figures relative to felony-misdemeanors. The estimates are preliminary and should be treated as approximations.

ANNUAL REPORT OF THE ADMINISTRATIVE OFFICE

under the provisions of the amended section. Under the prior law superior courts would have had to dispose of these estimated 2,600 additional "felony" cases in the first half of 1970. Considering the nature of the offenses it is unlikely that any significant number of the defendants would have received more than a misdemeanor sentence even though they were prosecuted in the superior courts.

There appears to be wide variation among the counties in the extent to which cases filed as felonies are disposed of at the municipal or justice court level. Thus, the utilization of this provision of Section 17 in the first half of 1970 is estimated to have reduced felony filings in the following superior courts by the percent indicated :

Superior Court	Estimated percent reduction in felony filings in superior court January–June 1970
Alameda	-240%
Contra Costa	-13%
Sacramento	-19%
San Diego	-9304
San Francisco	-150/
San Joaquin	
Santa Clara	_160/
Los Angeles	

These variations seem to result primarily from the differing policies of local prosecutors.

The number of juvenile proceedings filed in superior courts (exclusive of traffc violations) continued to increase, rising to a record 74,666. This figure was up by a modest 1,054 or 1.4 percent over the previous year, compared to gains in the preceding four years of 11.7 percent, 13.6 percent, 4.0 percent and 7.1 percent, respectively. Many major metropolitan courts reported fewer juvenile filings, in contrast to gains in Los Angeles (+1,578 or 8%), Santa Clara (+658 or 20%), Contra Costa (+181 or 7%) and San Bernardino (+143 or 4%).

In 1969-70 there was a very significant jump in the number of personal injury, death and property damage filings, especially those involving motor vehicles. A new record high of 54,429 personal injury actions were filed, up by 5,875 or 12.1 percent from 1968-69 and representing by far the largest annual increase of personal injury filings on record. The 1969-70 increase in incoming personal injury business contrasts with virtual stability over the preceding four years when between 47,000 to 49,000 cases were filed annually. Cases involving motor vehicles accounted for over 85 percent of the gain in personal injury filings. The change in trend of incoming personal injury cases is expected to have considerable impact on court operations since these actions account for about 75 percent of civil jury trials and over 80 percent of the backlog of civil cases awaiting jury trial. Assuming that the judicial time required to dispose of personal injury cases remains constant and that no change occurs in their manner of disposition, the full time of about 125 judges 15 would be required for one year to dispose of the 54,429 new personal injury actions filed in 1969–70.

¹⁵ Based on a bench time day of 4¼ hours.

JUDICIAL COUNCIL OF CALIFORNIA

Filings of domestic relations proceedings jumped by 10,831 or 9 percent to an all-time record of 131,571.16 The largest part of this increase followed the January 1970 effective date of the Family Law Act.

Although filings in insanity and other infirmities had been declining moderately over the preceding five years they dropped by a dramatic 11,261 or 55.1 percent to a total of only 9,169 in 1969-70. The sharp decline largely reflects the effect of the Lanterman-Petris-Short Act that became effective July 1, 1969. The Act in part provides procedures for the voluntary treatment and care of most infirm persons in lieu of court intervention and judicial commitment. It also provides for conservatorship in lieu of commitment proceedings for infirm persons needing long-term care or treatment.

Filings of appeals from lower courts and habeas corpus continued to increase as in the past several years. Filings of appeals increased by 30.4 percent (+952) in 1969-70 to a new record of 4,084 and habeas corpus filings increased by 16.3 percent (+620) to a high of 4,434.

In addition to the decrease in insanity filings there were also decreases in eminent domain and in "other civil petitions." 17

Filings Since 1959-60

The growth of business in California superior courts has been rapid and sustained as shown by the long-term increase in filings. Total filings increased by 178,893 or 54 percent during the 10 years since 1959-60, a rate of growth substantially greater than the 29 percent increase in population or the 39 percent increase in authorized judges. The largest numerical increase during the 10 years was recorded in original civil litigation where filings rose by 54,484 or 56.7 percent with about onethird of the gain reflecting increased personal injury litigation and the balance increased "other civil" 18 filings. The next largest gain occurred in family law proceedings where filings rose by 46,950 or 55.5 percent, followed by gains of 41,502 and 33,177 in criminal and juvenile filings, respectively. During the decade criminal filings more than doubled (+135.9%) and juvenile filings rose by 80 percent. The largest percentage gains occurred in habeas corpus where filings rose by 415 percent (+3,573) and in appeals where filings were up by 175 percent (+2,600). The only decrease was recorded in insanity and other infirmities where filings dropped by 14,250 or 60.8 percent from 1959-60.

As previously noted, the highest workload categories account for a greater portion of today's filings than in earlier years so that the longterm increase in total filings is only a partial and imperfect index of the increased judicial workload. Original civil litigation, juvenile and criminal filings, the highest workload categories, made up 51 percent of total filings in 1959-60 as against 59 percent in 1969-70.

¹⁴ Effective January 1970 these matters were filed under the new Family Law Act. Previously such actions were classified as divorce, separate maintenance and annulment. The new Act provides for dissolution of marriage based on a show-ing of irreconcilable differences, as contrasted with the former provision for divorce based upon a showing of foult

ing of irreconcilable differences, as contrasted with the former provision for divorce based upon a showing of fault.
17 "Other civil petitions" includes such matters as adoption, reciprocal support, change of name, etc.
19 "Other civil" filings includes such matters as adoption, reciprocal support, etc., but as such special proceedings as adoption, reciprocal support, etc., but excludes family law proceedings (called "divorce, separate maintenance and annulment" prior to 1969-70), probate and personal injury. This category was called "civil actions not elsewhere classified." classified.

Much of the long-term increase in superior court filings reflects the increase in California population. However, population growth alone does not completely account for the increase in filings as can be seen if filings are related to a constant population base (filings per 100,000 population). Thus, in 1969-70 a total of 2,541 matters were filed in superior courts for each 100,000 population, 20 percent greater than the 2,116 filings per 100,000 population in 1959-60.

Judgeships and Filings Per Judge ¹⁹

As of June 30, 1970 the superior courts were authorized a total of 416 judgeships, 8 more than one year earlier. This represented an increase of 2 percent in judgeships compared to a 3 percent increase in filings. Reflecting the lower proportionate increase in judgeships, filings per judge rose to 1,222 from 1,210 in 1968-69. The current average of 1,222 filings per judge is the highest on record and compares to the previous record of 1,213 established in 1966-67 and an average of 1,159 for the 10 years beginning with 1959–60. The average number of filings per judge has been tending higher in recent years as can be seen from Table XV. In addition, as noted, the workload content of filings has increased. Thus, on the average, superior court judges were charged not only with disposing of a record amount of incoming filings, but filings which represented considerably greater judicial workload than in earlier years.

TABLE XV-CALIFORNIA SUPERIOR COURTS NUMBER OF JUDGESHIPS AND FILINGS PER JUDGESHIP

Fiscal Years 1959–60 Through 1969–7	Fiscal	Years	1959-60	Through	1969-70	1
-------------------------------------	--------	-------	---------	---------	---------	---

	Fiscal year	Number of authorized judgeships*	Total filings per judgeship
1959-60		300	1,098
1960-61		302	1,166
1961-62		332	1,072
1962-63		335	1,114
1963-64		346	1,146
1964-65		353	1,179
1965-66		361	1,207
1966-67		368	1,213
1967-68		394	1,187
1968-69		408	R1,210
1969-70		416	1,222

Based on authorised judgeships at end of fiscal year. See note 12 supra, with respect to "per judge" comparisons. Revised.

There is a marked variation among courts in their average filings per judge. Thus, while filings averaged 1,222 per judge on a statewide basis, the figures for individual courts ranged from highs of 1,799 and 1,506 in the 11-judge San Bernardino and the 4-judge Monterey courts, respectively, to lows of 28 and 45 in the 1-judge courts of Alpine and Sierra, respectively. In order to expedite business and equalize workload the Chief Justice as Chairman of the Judicial Council assigns judges from low workload courts to assist in heavy workload courts. For instance, in 1969-70 the judges of the Alpine and Sierra courts were assigned to assist other courts for a total of 161 and 107 days, respectively.

¹⁹ See n. 12 *supra*, regarding "per judge" comparisons.

104

2. **DISPOSITIONS**

Dispositions in 1969-70

A record 424,577 cases were terminated by California superior courts, marking the eighth successive year in which total dispositions rose to new highs. The gain of 5,135 or 1.2 percent was nominal, however, compared to the gains of 7.4 percent in 1968-69, 5.7 percent in 1967-68, 1.9 in 1966-67 and 3.2 in 1965-66. After eliminating "housekeeping dismissals" for lack of prosecution,²⁰ dispositions increased by only 1,554 or four-tenths of 1 percent and fell substantially short of the 14,801 or 3 percent increase in filings.

TABLE XVI-CALIFORNIA SUPERIOR COURTS DISPOSITIONS PER AUTHORIZED JUDGE .

Fiscal Years 1961-62 Through 1969-70

	1961-62	1962-63	1963-64	1964-65	1965-66	1966-67	1967-68	1968-69	1969-70
Number of authorized judges ^b . Total dispositions per judge	332 928	335 967	346 969	353 995	361 1,004	368 1,004	394 991	408 1,028	416 1,021
Dispositions per judge exclusive of civil cases dismissed for lack of prosecution	897	924	932	959	975	990	981	1,016	1,000

· Based on authorized judges. See note 16 supra, with respect to per judge comparisons. b At end of fiscal year

Judgeships increased proportionately more than dispositions, with the result that the average number of dispositions per judge declined. The 416 authorized judges disposed of an average of 1,021 cases or 7 less than the record average of 1,028 cases disposed of by the 408 judges in 1968-69. If active cases only are considered (eliminating dismissals for lack of prosecution), then the average of 1,000 such dispositions per judge was down by 16 from the all-time high established in 1968-69. As can be seen from Table XVI superior court judges have on the average increased their output considerably over the years. The 1969-70 average was the second highest since 1961-62, was up 12 percent from 1961-62 and was more than 4 percent greater than the average output for the seven years prior to 1968-69. The high level output of recent years also was comprised of cases requiring more judicial time than in the earlier years.

Increases or decreases in dispositions tend to follow the trend in filings, especially over the longer term and generally also from year to year. With certain exceptions this experience again held true of dispositions. Thus, substantial increases in dispositions of family law proceedings and criminal matters followed similar gains in filings, while dispositions of insanity proceedings dropped dramatically as did filings. However, dispositions of other civil matters were down somewhat while filings increased, and dispositions of personal injury cases increased only nominally in contrast to a 12 percent increase in filings.

See n. 11, supra, regarding dismissals for lack of prosecution. In the following discussion dispositions exclude dismissals for lack of prosecution.

ANNUAL REPORT OF THE ADMINISTRATIVE OFFICE

TABLE XVII-CALIFORNIA SUPERIOR COURTS DISPOSITIONS BY TYPE OF PROCEEDING

Fiscal Year 1969-70

			Change in dis	positions from:	
		1968	-69	1959	-60

Formerly "Divorce, separate maintenance and annulment,"

Scincily Divorce, separate maintenance and annulment."
 Reported as a separate category starting in 1967-68.
 Eminent domain dispositions (parcels) are shown separately starting in 1965-66. In prior years they were included as part of "Other civil."

Since trial precedence is given to most other types of cases coming before the superior courts, changes in the disposition of personal injury cases provide a sensitive index of the courts' ability to dispose of ready cases. Dispositions of personal injury cases totaled 37,175 statewide in 1969-70, up by only 175 cases or one-half of 1 percent from 1968-69, in contrast to a filing gain of 5,875 cases or 12 percent. The number of personal injury cases disposed of statewide has remained virtually unchanged at somewhat over 37,000 annually since 1966-67, in contrast to the years 1962-63 through 1966-67 when dispositions increased dramatically and posted new highs in each successive year.

The inclusion of the Los Angeles court in the statewide totals tends to obscure the more favorable trends in other courts. Thus, personal injury output in the Los Angeles court dropped by about 450 cases or nearly 3 percent in 1969-70, in contrast to a gain of about 600 cases or nearly 3 percent for the other superior courts. Similarly, personal injury dispositions in Los Angeles have declined each year since the record high posted in 1966-67, and the 1969-70 total of 15,449 was down by 1.772 or 10 percent from that year. In contrast, in 1969-70 the output of personal injury cases in the other superior courts reached a record of 21,726 cases, up by nearly 10 percent from 1966-67.

The trends noted above should be further explained. Commencing in early 1963, in courts exclusive of Los Angeles, personal injury dispositions began to increase fairly rapidly after a period of relative stability. The trend of rapidly increasing dispositions continued through 1965–66, and during this period dispositions rose by an average of more than 1,600 annually in these courts, posting new records each successive

÷.

year. This trend developed during a period when many of these courts were reporting notable success in increasing productivity and reducing civil backlog and delay by the use of certificates of readiness as a device for managing civil calendars.²¹ This device was abandoned by many courts in the last half of 1967 and while dispositions again rose by about 1,600 in these courts to a record of 21,424 in 1967-68, they have remained relatively constant at that level in both 1968-69 and 1969-70. The Los Angeles court introduced readiness procedures in stages and adopted them later than other courts. During the three full fiscal years that they were operative in Los Angeles (1964-65 through 1966-67) dispositions rose by 25 percent to a record high of 17,221 but since then have declined in each of the three succeeding years so that by 1969-70 personal injury dispositions had declined by 1.772 or 10 percent.

Dispositions Since 1959-60

Total dispositions in 1969-70 were up by 134,443 or 46.3 percent from 1959-60. Although this fell short of the 178,893 or 54.3 percent gain in filings, a substantial part of the difference represents abandoned and inactive cases. The largest numerical gains in dispositions, amounting to over 30,000 in each case, occurred in criminal, juvenile, family law and original civil litigation. The largest percentage increases were recorded in habeas corpus (+618%), appeals from lower courts (+130%), criminal (+129%) and juvenile (+75%). As with filings, the only decline was recorded in insanity proceedings where dispositions were down by 15,385 or 67.2 percent.

Manner of Disposition

The overwhelming majority of superior court cases are disposed of without a contested trial. Thus, 29.2 percent of all matters terminated in 1969-70 were disposed of prior to trial, another 62.4 percent followed an uncontested trial or hearing, with only the remaining 8.4

²¹ See Judicial Council Reports (1966) 28-37; (1967) 202-213.

percent requiring a contested trial.²² Although there has been an increase in the number of contests since comparable figures became available in 1967-68 there has been little change in the proportion of contests to total dispositions.

Criminal cases disposed of by submission on the record of the preliminary hearing are counted as "uncontested trials," a treatment that is necessary if figures for the Los Angeles court are to be included in the totals or used in intercourt comparisons. Such cases are not the equivalent of contested trials in the usual sense. Virtually all such submissions occur in the Los Angeles court (92% in 1969-70) and since they account for about a third of that court's total criminal dispositions this classification is necessary to permit meaningful comparisons.²³ For instance, exclusive of these submissions, both Los Angeles and the balance of the superior courts report that 14.1 percent of criminal dispositions were contested in 1969-70. On the other hand, if these submissions were included in contested dispositions we would incorrectly conclude that 46 percent of Los Angeles' criminal dispositions were contested as against only 17 percent for the balance of the state.

The 35,011 contested dispositions in 1969-70 were up by more than 2,500, or approximately 8 percent higher than in each of the two preceding years. The overall gain reflects an increase in contested criminal trials which more than offset declines in contested personal injury cases and contested juvenile hearings. The number and proportion of personal injury contested trials continued to decline as in recent years. There were 3,090 contested personal injury trials last year which represented 8.3 percent of personal injury dispositions. This total compares with 3.214 contests in 1968-69 and 3.741 in 1967-68 when contests represented 8.7 and 9.9 percent of dispositions, respectively, and contrasts with a 1964-65 record high of 4,256 contests, equal to 12.4 percent of personal injury dispositions in that year.

 ³¹Before-trial dispositions include transfers and dismissals (before start of trial), judgments by the cierk, summary judgments and pleas of guilty in criminal matters. Uncontested irlals are those in which evidence was not introduced by both sides. This category includes default judgments by a judge, stipulated judgments, compromise of minors' claims, and most hearings terminating probate, adoption and other special proceedings, and juvenile and competency matters unless the allegations are denied and evidence is introduced. To be counted as a contested disposition evidence must be introduced by both sides at a trial. Comparisons exclude dismissals for lack of prosecution.
 Data regarding submissions on the record of the preliminary hearing became available in 1967-68. In 1969-70 submissions totaled 11,422 in the state and 10,554 in Los Angeles, and in 1968-69 they totaled 10,674 for the state and 10,136 for Los Angeles.

^{10,136} for Los Angeles.

 Submissions on the record of the preliminary hearing are counted as after trial uncontested dispositions.

Table XXI shows the wide differences in the manner of disposition of various categories of proceedings. For instance, while only some 8 percent of all dispositions were contested, the rate varied from highs of 15.9 and 14.1 in "other civil complaints" and "criminal cases," respectively, to less than 2 percent in probate proceedings.

3. JURIES SWORN 24

For the first time in five years the superior courts swore more juries than a year earlier. The total of 7,703 juries sworn was up by 316 from 1968-69 and compares to a record of 7.933 juries sworn in 1964-65. The 1969-70 total was an increase of 4 percent, or 10 times the fourtenths of one percent gain in total dispositions (excluding dismissals

³⁴ Juries sworn is not the equivalent of cases disposed of by verdict since a single jury might try consolidated cases or settlements might occur following the swearing of a jury.

ANNUAL REPORT OF THE ADMINISTRATIVE OFFICE

TABLE XXII-CALIFORNIA SUPERIOR COURTS JURIES SWORN

Fiscal Years 1959-60 Through 1969-70

	_		1	j · I	1964-65	1965-66	1966-67	1967-68	1968-69	1969-70

Percent change	-3.7	-1.4	+2.9	+5.1	+9.7	-0.7	-2.5	-2.4	-1.4	+4.3

for lack of prosecution). The gain was due primarily to an increase of 555 in the number of juries sworn for criminal cases, which more than offset a drop of 293 in juries sworn for personal injury cases. While most major metropolitan superior courts reported an increase in the number of criminal juries, the drop in personal injury juries largely reflected declines in the Los Angeles, San Francisco and Santa Clara courts. There has been a downtrend in both the number and proportion of juries required for personal injury cases for several years, but the decline has been offset in part by an increase in the number of juries required for criminal cases.

Although only about 2 out of each 100 superior court dispositions require the swearing of a jury the rate varies substantially among the various categories of proceedings. For example, in 1969-70 about 1 in each 15 dispositions of criminal and personal injury cases involved the swearing of a jury, while at the other extreme almost 5,300 family law proceedings were disposed of for each jury sworn. Among other categories, one jury was sworn for about each 25 eminent domain cases (parcels) terminated, each 56 other civil complaints disposed of and each 1,078 terminations of probate and guardianship proceedings.

 Percentages may not equal total because of rounding.
 Formerly "Divorce, separate maintenance and annument." R Revised.

As noted, the number and proportion of juries sworn for personal injury cases has decreased over the years while the number sworn for criminal cases has increased. Thus, the 2,542 personal injury juries sworn in 1969-70 was the lowest number since these actions were separately reported and 1,100 less than in 1963-64. Personal injury juries sworn amounted to only 7 percent of dispositions. In contrast, in 1963-64 the 3,693 juries sworn for personal injury cases amounted to 12 percent of dispositions. Prior to 1965-66, one jury was required for about every eight personal injury cases disposed of. This proportion dropped fairly constantly in the years following and by 1969-70 about 15 personal injury cases were disposed of for each jury sworn. Had the old relationship of one jury to each eight personal injury dispositions prevailed, 2,105 additional juries would have been required for personal injury cases, requiring the full time of about 50 additional judges for such trials alone.

In contrast to personal injury cases, substantially greater numbers of juries are required for criminal proceedings than in prior years. In 1969-70 a record 4,235 criminal juries were sworn, up by 1,614 from 1963-64. Despite the gain in numbers the proportion of juries required for criminal proceedings has varied only slightly, going from 8 percent of dispositions in 1963-64 to 7 percent in 1969-70.

4. CONDITION OF CIVIL CALENDARS-METROPOLITAN COURTS

As of June 30, 1970 there were 18 superior courts with five or more authorized judges: Alameda, Contra Costa, Fresno, Kern, Los Angeles, Marin, Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Mateo, Santa Barbara, Santa Clara, Stanislaus and Ventura. The discussion of calendar conditions focuses on these courts since together they account for some 95 percent of civil backlog and about 85 percent of civil jury trials in California superior courts. In addition, problems of congestion and delay generally are most severe in the larger metropolitan courts. Although the courts are discussed as a group it should be noted that calendar conditions are peculiar to individual courts and that each may differ from others and from descriptive generalizations.

The Judicial Council uses the following indices to describe the condition of civil calendars: (1) the backlog of civil cases awaiting trial and (2) the elapsed time to the start of jury trial measured from (a) the filing of the complaint and (b) the filing of the at-issue memorandum. These indices are closely related and generally an increase or decrease in backlog forecasts a like change in the extent of delay to trial. Thus, when new pretrial rules became effective in September 1967 allowing cases to be placed on the active lists of many courts much earlier in the proceedings than theretofore, a rapid and substantial increase occurred in the backlog of cases statistically counted as "awaiting trial." Moreover, because cases were now placed on active lists earlier, the measurement of trial delay from at-issue memorandum also began to increase. Even though the statistical indices of backlog and delay increased dramatically as a result of the rule change it is unlikely that increases of the same magnitude occurred in the actual backlog of cases ready and awaiting trial or in the actual delay in the trial of trial-ready cases.

Backlog

Table XXIV shows the number of civil cases "awaiting trial" (cases on the civil active list) in the named courts as of June 30, for the years 1962 through 1970. Excluding Los Angeles, the total of 32,932 civil cases awaiting trial in these courts as of June 1970 was the highest on record, more than two and one-quarter times the total in 1965 when many courts were reporting notable success in reducing backlog by use of certificate of readiness techniques for managing trial calendars²⁵ and more than 80 percent greater than in 1962 prior to the adoption of those techniques. In the period since the rules were changed to restrict the use of certificates of readiness, civil backlog in these courts has increased by slightly more than 75 percent. Civil active lists have continued to increase each year since 1967, by 25, percent between June 1967 and 1968, and by 9 percent from June 1968 to 1969. Again between June 1969 and 1970 the list of civil cases awaiting trial in these courts increased by 7,268 cases or 28 percent. Most of the increase in total backlog both year-to-year and over the longer term consists of civil cases awaiting jury trial. Thus, between June 1969 and 1970 the increase in cases awaiting jury trial amounted to 4,230 or about 58 percent of the increase in total civil backlog.

As of June 30, 1970.

Since cases in which a jury is demanded lie at the heart of problems of civil congestion and delay in the superior courts it is revealing to note the nature of these cases. There were 20,327 civil cases awaiting jury trial in June 1970 in the courts under discussion, of which 16,022 or 79 percent were actions for personal injury, death and property damage. Personal injury cases involving motor vehicles accounted for

25 See Judicial Council Reports (1966) 28-37; (1967) 202-213.

an estimated 11.408 cases on the jury active list or more than 55 percent of the total backlog of civil cases awaiting jury trial in these courts. A jury is demanded in 93 percent of all personal injury cases that join the active list while, in contrast, in other civil actions a jury is demanded in only 28 percent of the cases. Even though there is a demand for a jury in virtually all personal injury cases joining the active list. only 9.5 percent of such cases are actually tried by a jury.²⁶ The great bulk are settled and dismissed prior to trial. The small number of jury trials relative to jury demands indicates that in a great number of personal injury cases, and despite their jury demands, attorneys neither anticipate nor desire that the matters be tried by a jury. Substantial numbers of cases in which a jury is demanded settle shortly before the prospective trial date and after having remained on active lists for a considerable length of time. Thus, in 1969-70 about 6,000 personal injury cases "awaiting jury trial" in these courts were settled sometime after the trial setting conference and after having remained on the active list in many courts a year or more before reaching a trial setting conference. Settlements that occurred after the trial setting conference accounted for about 40 percent of all settlements in these courts. Only about one out of every five cases set for trial at a trial setting conference actually went to a jury trial.

Table XXV converts the total civil backlog figures shown in Table XXIV to a "per authorized judge" basis.27 Increases in authorized judgeships in these courts in part offset the recent growth in civil backlog so that generally the number of cases awaiting trial per authorized judge increased proportionately less than total civil backlog. It should be noted that the per judge figures relate to the total number of authorized judges and do not reflect the number of judges who are actually available to dispose of civil proceedings.

Precautions must be taken in attempting to assess the true meaning of the recent rapid and sustained increase in statistical backlog. First, because the rule change allowed cases to join active lists much earlier in the proceeding, the current lists consist of a much larger proportion of nonready cases and therefore are not comparable to earlier lists that consisted of cases in which trial readiness had been certified. In comparing backlog figures it should be noted that so-called "active" lists contain substantial proportions of deadwood and nontrial ready cases and that the proportion probably increases as the backlog grows. Secondly, as indicated in the discussion of the backlog of personal injury cases, only a small proportion of "cases awaiting trial" will ever be disposed of by a contested trial. Thus, in 1969-70 only about 9.1 percent of personal injury cases "awaiting trial" were actually disposed of at a contested trial.²⁸ Despite these reservations the rapid and sustained increase in civil backlog in these courts must be viewed with concern, especially since the trend appears likely to continue at an accelerated rate and since the growth in backlog has occurred

The number of juries sworn for personal injury cases in 1969-70 as a percent of at-issue memoranda filed in 1968-69. Figures for the Fresno and San Bernardino courts are excluded.

See note 12 supra, regarding "per judge" comparisons.
 The number of contested trials of personal injury cases in 1969-70 as a percent of at-issue memoranda filed in 1968-69 in the courts being discussed.

As of June 30, 1970.

b Note that comparisons relate to the total number of judges authorized as of June 30 of each fiscal year and are not adjusted to reflect the number actually available to dispose of civil backlog. See note 18 supra, regarding "per judge" analysis.

despite record or nearly record output by the courts. The fact that backlog continues to increase in the face of record-high dispositions. suggests that the judicial manpower in the superior courts is not sufficient to meet the requirements of incoming workloads. It further suggests that backlog will continue to increase unless the courts develop and use the most efficient procedures and also secure added judicial manpower where necessary.

The following analysis attempts to forecast the workload potential of the June 30, 1970 backlog and to relate it to the judicial manpower available for its disposition. Based on the experience in 1969-70 relative to the June 1969 backlog, somewhat more than one out of every six cases "awaiting trial" (15.9%) in these courts on June 30, 1970, will actually result in a contested trial 29 of which somewhat less than half (7.6%) will be tried by a jury. On this basis the June 1970 civil backlog can be expected to produce about 2,500 jury trials and about 2,730 contested court trials.³⁰ Approximately 64 percent of the authorized judgeships in these courts or about 145 judges will be available to hear all civil proceedings ³¹ including the trial of cases. This equals an average of 17 jury trials and 19 court trials per available judge, or approximately 85 days of jury and 38 days of court trials ³²

32 See Weighted Caseload, infra.

114

²⁹ Exclusive of probate, family law and contested special proceedings. 30 Ibid.

¹This estimate is based on a 1970 study of the departmental assignment of judges in 13 superior courts with seven or more judges and includes the judgeships authorized by the 1970 Legislature.

for these judges. Given present conditions it appears unlikely that the available judges can dispose of such a heavy trial workload in 1970-71 and, in addition, hear all other civil nontrial proceedings. It would therefore appear that further substantial increases in backlog and delay can be expected. For comparison, in 1969-70 the judges in these courts, excluding those hearing criminal and juvenile matters, disposed of an average of 14 jury and 15 nonjury trials requiring approximately 100 trial days or 50 percent of the total time available to these judges. In contrast, the trial potential of the June 1970 backlog averages 123 trial days per judge, which is almost 25 percent greater than the actual per judge performance in 1969-70 and would equal over 60 percent of the total time available to these judges.

The Los Angeles Superior Court was omitted from the foregoing discussion because the substantially greater growth in that court's backlog tends to obscure the more favorable experience elsewhere. As of June 30, 1970 there were 41.019 civil cases awaiting trial in the Los Angeles court. This was a record backlog for the court, being more than four and one-half times that of June 1967 when the court was using a certificate of readiness system of calendar management and 72 percent greater than in 1962 prior to the court's adoption of such readiness procedures. As with the other courts, the backlog in Los Angeles has continued to increase each year since June 1967, and also as with other courts, there is no indication that the trend will slacken or reverse. Even after making allowances for differences in the relative trial readiness of cases on the active list, these facts point to the conclusion that despite a record output the Los Angeles court's judicial manpower has been inadequate to maintain active lists at earlier levels. The court has had no increase in its 134 authorized judgeships since November 1967, although the Judicial Council reported that the increasing workload would require an additional 11 judgeships in 1969-70 and an additional 10 judgeships in 1970-71 (for a total of 21 additional judgeships). Thus, the court operated with a deficit of 11 judges in 1969-70 and will continue to operate with a manpower shortage in 1970-71.88

Delay

Statistical or numerical descriptions of delay have limitations. First, the indices used to measure delay are generally based on the time to trial from the date of filing of various documents (complaint, at-issue memorandum, certificate of readiness, etc.) so that defining the intervals based on these dates as "delay" implies that the cases are ready and awaiting trial when these documents are filed. In fact, relatively few cases are trial ready at that time. Hence, the interval referred to as "delay" includes not only the time that courts need to get a ready case before an available department but also the substantial amount of time after such documents are filed that attorneys regularly require to prepare cases for trial. It is doubly misleading to describe these intervals as "court delay" or "delay in the courts" with the implication that the period being measured results from internal conditions which are controllable by the courts.

As of June 30, 1970.
 Prior to September 1967 medians were computed from the date memo-to-set was filed to trial date.
 For month of May.

Table XXVI shows the median interval in months from the filing of a complaint and from the filing of an at-issue memorandum to the start of trial as of June for 1967 through 1970 for superior courts with five or more judges.

The interval from at-issue memorandum measures the elapsed time to trial from the point at which attorneys request a trial date. Even though the measurement is taken from the time when a trial date is requested it is nevertheless an inflated and inaccurate measure of the delay chargeable to conditions in the courts because many memoranda are filed in cases that are not ready for trial and in which the attorneys neither desire nor anticipate an early trial date. Since such cases are included the index cannot be considered as measuring delay stemming from court conditions. In June 1970 this interval was lower than in June 1967 in only three of the courts being discussed (Contra Costa, Sacramento and San Mateo) and was up substantially in most of the other courts. In 12 of the 18 courts the median time from memorandum to trial was a year or more in June 1970, double the 6 courts that reported delay of this magnitude in June 1967. In June 1970 three courts reported a delay of two or more years from memorandum to trial (Los Angeles, Marin and San Francisco), in contrast to June 1967 when none reported a delay of that length.

Table XXVI also shows "total delay" or the median time to trial from the filing of an action. In 13 of the 18 courts this measure was higher in June 1970 than three years earlier and in many courts the rise was fairly substantial. In four of the courts (Los Angeles, Marin, Riverside and San Francisco) total delay approached or exceeded three

³⁵ The 1970 Legislature authorized 15 additional judgeships for the Los Angeles Superior Court effective November 23, 1970. Cal. Stats. 1970, Ch. 1102.

JUDICIAL COUNCIL OF CALIFORNIA

years in June 1970 in contrast to the one court (Marin) that reported such delay three years earlier. In most of the balance of these courts total delay ran about two years in June 1970.

5. CONDITION OF CRIMINAL CALENDARS-METROPOLITAN COURTS

This Report is the first to attempt an assessment of the condition of criminal calendars in metropolitan superior courts. Earlier reports have concentrated on civil calendar conditions because criminal cases take precedence and therefore an analysis of civil cases would tend to describe maximum backlog and delay conditions. In view of the increasing impact of criminal proceedings on superior court operations, however, and of the pressing need for their speedy disposition, more attention needs to be given to criminal calendars. Moreover, a more meaningful analysis of criminal calendar operations is now possible because in June 1967 a revision of monthly statistical reports to the Judicial Council was inaugurated with this purpose in mind. In addition the Bureau of Criminal Statistics of the California Department of Justice has been very helpful in furnishing detailed statistics on criminal cases to the Judicial Council.

This discussion of criminal calendar conditions concentrates generally on the 16 superior courts with six or more authorized judges as of June 30, 1970. Together these courts account for 90 percent of criminal filings and for 93 percent of criminal cases calendared for trial, It is generally in these larger courts that problems of congestion and delay are most acute. It must be recognized, of course, that each court's calendar is peculiar to it and thus, each may differ from any descriptive generalization. The Los Angeles Superior Court is discussed separately because inclusion of its very large figures would obscure trends in other courts. In addition, its calendar is importantly influenced by specialized procedures peculiar to that court.

Cases Calendared for Trial

Except for good cause, criminal cases in California superior courts must be dismissed if the defendant is not brought to trial within 60 days from the filing of the information or the finding of the indictment, unless the defendant waives his right to trial within the prescribed time.³⁴ Although a substantial number of defendants demand trial and waive time, the requirement of a speedy trial nevertheless tends to limit the number of criminal cases awaiting trial and thus, in contrast to the civil backlog, to limit the time that cases will remain awaiting trial. Table XXVI shows criminal cases calendared for trial as of June 30, from 1965 through 1970 in the specified courts.³⁵

Excluding Los Angeles, cases calendared for trial in these courts totaled 3,105 in June 1970, up by about 329 cases (+12%) from the year before and up more than three times the 1.014 cases awaiting trial

* As of June 30, 1970.

in June 1965. The rate of increase in cases calendared for trial far exceeded the growth in criminal filings in these courts. Since June 1965, cases on criminal trial calendars rose by 206 percent in these courts, or more than double the 95 percent increase in filings. Since a jury is demanded in the great majority of criminal cases, these criminal calendars to a great extent also represent jury trial calendars.

As with civil cases in a backlog, many criminal cases are calendared for trial where a trial is neither desired nor anticipated by the defendant, and cases against many such defendants will ultimately be disposed of by means short of trial. Exclusive of Los Angeles, close to 70 percent of the criminal cases disposed of in superior courts are terminated by a plea of guilty.³⁶ Based on 1969 figures from the Bureau of Criminal Statistics, 50 percent of all dispositions by pleas of guilty in superior courts, exclusive of Los Angeles, represent changes of plea made after defendants had pled not guilty at arraignment and had demanded a (jury) trial. Thus, of the 20,779 felony cases disposed of on pleas of guilty in 1969-70 in these courts, about 10,400 resulted from a change of plea made some time after the original not guilty plea at arraignment. Although figures are not available, it is known that many such changes of plea, perhaps most, occur shortly before the scheduled trial date. Additionally, many such guilty pleas are made to a lesser offense than originally charged as a result of plea negotiations between the prosecutor and defendant, concurred in by the court. Late changes of plea necessarily delay the disposition of these cases. a delay amounting in many instances to the delay that would have occurred had the case gone to jury trial (see Table XXX).

* Including certifications on pleas of guilty from lower courts.

119

 ³⁴ Cal. Pen. Code § 1382.
 ³⁵ The figures in Table XXVI are not precisely comparable from court to court and in several courts do not represent the total backlog of criminal cases awaiting trial because of calendaring differences. Most courts calendar cases for trial at the time of arraignment when a guilty plea is made. In others the case may not be calendared for trial until sometime later if a defendant waives his right to a speedy trial. In the latter courts the number of calendared cases under-states the actual number of criminal cases awaiting trial.

JUDICIAL COUNCIL OF CALIFORNIA

Though a trial is demanded in the first instance in a great number of criminal cases, relatively few are actually terminated by a trial.³⁷ Thus, the 3.552 trials in 1969-70 reported in courts other than Los Angeles amounted to only some 12 percent of all criminal dispositions. In contrast, some 15.600 defendants (about 50 percent of all defendants) demanded a trial in the first instance, indicating that only about one in four cases demanding a trial will actually be so terminated. Courts, prosecutors and defenders would be overwhelmed if a trial were held in each criminal case in which a demand is made. Thus, had there been trials for the 15.600 defendants in these courts who demanded them in 1969-70, the trial of such cases alone would have required the full time of about 226 judges for one year.³⁸ a figure which compares to the total of 282 then authorized judgeships in these courts.

Over 80 percent of the criminal cases tried in 1969-70 in superior courts exclusive of Los Angeles were tried by jury. Table XXVIII shows the ratio of juries sworn to criminal filings in the 16 superior courts with six or more judges.³⁹

Delav

Unless defendants consent, criminal cases must be dismissed if not brought to trial within 60 days after being filed in the superior court. Thus, where the time to disposition exceeds 60 days the excess is delay that defendants have sought or agreed to.40 In practice many defend-

" Unless otherwise indicated "trials" are exclusive of those on the transcript of the preliminary hearing. ¹² Bee Weighted Caseloads, in/ra. ¹³ The ratio for Los Angeles is not comparable with that for other courts for reasons

that will be discussed later.

⁴⁰ In the case of a trial, the time to disposition (verdict or judgment) will exceed the time to start of trial by the number of days required to try the case. If the sentence is considered as the point of disposition then this will exceed the time to start of trial by the number of trial days plus the number of days to sentencing.

ants plead not guilty at arraignment (50 percent in courts exclusive of Los Angeles), demand a jury trial and waive their right to a sneedy trial. The court is then under no legal responsibility regarding the time of trial. If the defendant is out on bail it is especially in his interest to delay rather than speed the date of trial. Given the congested trial calendars under which many courts and district attorneys labor it is not surprising that the statutory 60-day limit between filing and trial is exceeded in many cases. Thus, there were 2,124 criminal juries sworn in the courts listed in Table XXIX exclusive of Los Angeles and of this number 1.072 or 50 percent were sworn within the 60-day statutory limit while 1.052 or 50 percent exceeded this limit. There are wide differences among courts in the proportion of jury trials that commence more than 60 days from filing, ranging from a . low of 13.2 percent in Santa Clara 41 to highs of 76.5 and 73.1 percent in Alameda and Los Angeles, respectively;

The actual delay to disposition in cases where juries are sworn more than 60 days from filing can be seen from Table XXX.42 Thus, in the first half of 1970, the median delay in such cases ranged from lows of 79 days in Sacramento and 85 days in Kern and Santa Clara to a high of 186 days in San Francisco. Table XXX also shows the maximum delay in columns headed "Delay." The times shown are the minimum

Source: Bureau of Criminal Statistics, California Department of Justice. As of June 30, 1970.

In the case of a plea, judgment or verdict of guilty the time to disposition includes the period between such plea, judgment or verdict and the time to sentencing (approximately 21 days). Includes defendants certified on plea of guilty from lower courts.

d "Delay"; the minimum days from filing to disposition for the lengthiest 10 percent of cases. Data not shown where less than 15 defendants

ANNUAL REPORT OF THE ADMINISTRATIVE OFFICE

number of days to disposition for the 10 percent of cases that experienced the most extreme delay.43 Again such delay was at a maximum in San Francisco where the most delayed 10 percent of jury cases took a minimum of 377 days to disposition, more than three times the delay of 123 days encountered by such cases in Kern.

Los Angeles Superior Court

The Los Angeles Superior Court must be considered separately in any discussion of criminal proceedings since its criminal filings account for half the state's total and its inclusion with statewide figures would obscure the trends in other courts. More important, however, is the fact that felony filings in the Los Angeles court appear to include substantially more relatively minor offenses than is the case in other comparable courts.44

In 1969-70, 36,619 criminal defendants were filed on in the Los. Angeles Superior Court. This accounted for 51 percent of the statewide figure and for 20 percent of that court's total filings. In contrast, Los Angeles' population represented only 35 percent of the state's total while felony filings in comparable metropolitan courts 45 comprised only 12 percent of their total combined filings. Furthermore, in these courts 333 felony cases per 100,000 population were filed in 1969-70 as against a rate of 523 in Los Angeles.

The proportionately higher level of criminal filings in Los Angeles appears to result from the substantial number of relatively minor offenses prosecuted in the superior court, offenses which in other counties would be disposed of as misdemeanors in municipal or justice courts. Thus, in 1969 in Los Angeles 95 percent of defendants were held to answer in the superior court following felony preliminary hearings in municipal courts, in contrast to only 63 percent in other courts. Conversely, in other areas 37 percent of the defendants originally charged with felonies were disposed of as misdemeanants by the lower courts, while in Los Angeles the comparable figure was approximately 5 percent.46

A superior court, of course, cannot control the matters presented to it as felonies and the fact that many matters of a relatively minor nature come before a superior court reflects the policy of the prosecuting officers. Part of the Los Angeles difference appears to reflect the fact that, while most counties vest authority for the prosecution of public crimes in a single agency, in Los Angeles the district attorney handles felony complaints and the several city prosecutors handle misdemeanors. Thus, the matters tend to be filed and prosecuted as felonies in the superior court if the complaints contain any elements of a felony. Consequently, many matters which would be disposed of in municipal courts in other areas, reach the Los Angeles Superior Court where they are often disposed of by a misdemeanor sentence. In 1969, for example, 60 percent of the defendants convicted in the Los Angeles Superior Court received misdemeanor sentences, double the 30 percent rate for the balance of the state.47 Thus, the

"The ninetieth percentile range.

 Superior courts of Alameda, Sacramento, San Diego and San Francisco.

available data tend to indicate that in Los Angeles relatively minor offenses are prosecuted through the superior court as felonies. It also appears that the ultimate result in sentencing is the same as though the matters had been terminated at the municipal court level except that: (1) the disposition of such cases has been substantially delayed (see Table XXIX); (2) critically limited superior court resources have been expended on their adjudication; and (3) by preempting superior court resources that could be devoted to other matters these cases contribute to overall congestion and delay in the court. For example, 35 percent of the Los Angeles court's judicial positions 48 were required to dispose of criminal defendants, in contrast to 23 percent in comparable metropolitan courts.49

Traditionally, a large proportion of criminal cases in the Los Angeles Superior Court are disposed of on the record of the preliminary hearing. In 1969-70 such dispositions on the transcript, which are known locally as "slow pleas" (of guilty), accounted for 32 percent of all criminal dispositions in the Los Angeles Superior Court while in other courts such dispositions are insignificant. It is estimated that matters disposed of on records of the preliminary hearings required the full time of 15 superior court judges.50

6. WEIGHTED CASELOAD

Judicial workload of individual superior courts is measured according to a weighted caseload system approved for use by the Judicial Council in 1968.51 The system is based on weighting a court's filings in each category of proceedings, generally according to the average time on the bench required for their disposition. The average times used in the system are developed from data furnished by the courts based on their own experience. In order to keep the system valid in the light of changing conditions, a sample number of courts is queried periodically regarding the current time requirements for various proceedings. Based on this information the weights are reviewed and revised as necessary to reflect current experience. When revisions are indicated they are made annually prior to legislative sessions. Table XXXI shows the details of the computations used in determining 1969-70 weighting factors for each category of filings and lists the resultant unrounded weights in the right-hand column. In Table XXXII the left-hand column summarizes the computations detailed in Table XXXI and shows the workload weights rounded to the nearest five minutes applicable to each category of filings in 1969-70; the right-hand column lists 1968-69 weights.

Referring to Table XXXII, the weights assume, for example, that each domestic relations filing, including both those terminated and those not disposed of, resulted in an average expenditure of 15 minutes of a judge's time on the bench in 1969-70 and 20 minutes in 1968-69. Similarly, each filing as to a dependent child consumed an average of 35 minutes of bench time (including chamber time for probation matters) in 1969-70 and 25 minutes in 1968-69.

Percent assigned to criminal departments during the week of October 26, 1970 adjusted to exclude absences and to include judges sitting on assignment by the Chairman of the Judicial Council. "Judicial positions" includes authorized judges plus full-time commissioners and referees.

ANNUAL REPORT OF THE ADMINISTRATIVE OFFICE

D. MUNICIPAL COURTS

1. FILINGS

1969–70 Filings Up 8 Percent

The 75 municipal courts located in 25 counties of the state reported approximately 5.1 million nonparking cases ⁵² filed during 1969-70. This is the largest volume ever recorded in the municipal courts and reflects a gain of 8 percent or 366,400 cases over the volume reported.

* Changes were based on revised figures for 1968-69. * Not classified separately prior to 1986-67.

52 Throughout the municipal and justice court sections of this report "filings" and "cases" do not include parking violations unless otherwise indicated.

in 1968-69, when the first decline in 26 years had been recorded. The increase was the largest year to year gain of the past decade. Compared to the level of 10 years ago there were 57 percent more cases. filed in the municipal courts.

Municipal court judgeships rose to 337 with the authorization of 11 additional judges during the year. This increase of 3 percent over the number authorized in 1968-69 was less than half the percentage rise in filings. With filings outrunning the increase in judicial manpower, the average number of cases filed per judge rose to 15,072. This figure was not only 600 more than the 14,457 cases filed per judge in 1968-69 but was also the first increase in six years. The filings per judge rate is only an approximate index of the municipal court workload, however, since it does not take into consideration the varying amounts of time required to dispose of the various categories of proceedings. A better picture of the workload is provided by weighted units. which are discussed in a subsequent section. Filings per judge during the preceding 10 years ranged from a low of 14,457 to a high of 16,607:

Felony Preliminaries Up 14 Percent

Increases were reported in all categories of proceedings with new peak levels reported in most of the criminal categories. Approximately 115,100 of the municipal court filings were felony preliminary proceedings. This was a new record number of felony cases in the municipal courts and was about 14,100 or 14 percent more than in 1968–69. The percentage gain in felony preliminaries was the highest for all proceedings and apparently reflected the continuing emphasis on prosecutions of drug violations.53

About 460,200 of the cases filed in municipal court were nontraffic misdemeanors. This was a record high for such cases and constituted a rise of 7 percent or 31,000 cases over the preceding year. The amount of increase was almost twice the size of the previous high of the decade.

Of the nontraffic misdemeanor cases filed in the municipal courts approximately 250,000 cases or 54 percent involved charges other than intoxication. These more serious misdemeanor cases were up 9 percent from 1968-69. Intoxication contributed about 210,100 cases or 46 percent of the nontraffic misdemeanor filings. This figure was 5 percent higher than in 1968-69.

Traffic filings in municipal courts rose to about 3.9 million cases, establishing a new record for traffic cases in the municipal courts and representing a gain of 305,800 cases over the preceding year. This

ANNUAL REPORT OF THE ADMINISTRATIVE OFFICE

TABLE XXXV-CALIFORNIA MUNICIPAL COURTS WEIGHTED UNITS BY TYPE OF NONPARKING PROCEEDING

Fiscal Years 1968-69 and 1969-70

	Weight	ed units	Change from 1968-69		
Type of proceeding	1969-70	1968-69	Amount	Percent	
Total nonparking	21,790,361	20,291,840	1,498,521	7.4	
Criminal	$\begin{array}{c} 16,810,470\\ 8,717,661\\ 2,419,515\\ 6,298,146\\ 3,624,837\\ 420,266\\ 3,204,571\\ 4,467,972 \end{array}$	$\begin{array}{c} 15,461,227\\ 8,181,022\\ 2,310,799\\ 5,870,223\\ 3,329,223\\ 400,936\\ 2,928,317\\ 3,950,952 \end{array}$	$1,349,243 \\ 536,639 \\ 108,710 \\ 427,923 \\ 295,584 \\ 19,330 \\ 276,254 \\ 517,020 \\$	8.7 6.6 4.7 7.3 8.9 4.8 9.4 13.1	
Civil Small claims All other civil	4,979,891 1,310,821 3,669,070	4,830,613 1,273,168 3,557,445	149,278 37,653 111,625	$3.1 \\ 3.0 \\ 3.1$	

annual increment was the largest in the past 10 years and accounted for nearly 83 percent of the increase in municipal court filings during 1969-70. Interestingly, two courts, the Los Angeles Municipal Court and the Oakland-Piedmont Municipal Court, reported approximately three-quarters of the increase in traffic filings.54

Selected major traffic violations 55 which have been reported separately since July 1, 1966, rose by 5 percent to 191,200 in 1969-70, Although making up only 5 percent of the traffic cases filed in municipal courts, these more serious traffic violations accounted for about one-third of the traffic jury cases tried. Approximately 3.8 million of the traffic matters filed involved routine traffic violations, 9 percent more than the level in 1968-69.

Filings of small claims cases increased 3 percent to 286,000, the first rise in four years. The volume, however, was still 16 percent below the record peak of 1965-66. Other civil filings followed a similar pattern, rising by 3 percent to the 275,500 level. The rise in other civil filings was also the first increase in four years.

Weighted Units Up 7 Percent

Municipal court filings in 1969-70 constituted approximately 21.8 million weighted units.⁵⁶ This was a gain of 7 percent over 1968-69 and only slightly less than the percentage increase in total filings.

⁵⁴ Data received from the courts indicated that the Los Angeles court contributed about 180,800 and Oakland-Piedmont contributed about 38,100 of the additional traffic cases filed in municipal courts. The Los Angeles court, however, is cur-

w For a description of the weighted caseload system, see 1968 Judicial Council Report 103-106. The weighted raseload system, see 1968 Judicial Council Report 103-106. The weights for the courts in general and for the Los Angeles court applicable to 1968-69 and 1969-70 filings are listed below:

Type of Proceeding	State Less Los Angeles	L. A. Municipal Court
Selected major traffic violations		Court
Other traffic violations	14	9
Intoxication	1.8	1.2
Intoxication Other nontraffic middeman	2	2
		12
Felony preliminaries	36	48
		5
Other civil	15	10

5-81244

⁵⁸ Data published by the Bureau of Criminal Statistics indicates that drug violations made up about 40 percent of the criminal cases filed in superior court (after preliminary hearings in the municipal or justice courts) in calendar year 1969 and accounted for 93 percent of the increase over 1968.

Weighted units, however, gave a vastly different picture of the caseload in municipal courts from that depicted by filings, particularly in the two important categories of felony preliminaries and traffic violations. Felony preliminaries, which made up only 2 percent of the unweighted cases filed in municipal courts, were responsible for over 20 percent of the weighted units filed during the year. Moreover, felony preliminary cases accounted for more than one-third of the overall rise in the weighted caseload. On the other hand, traffic matters which accounted for 78 percent of the unweighted filings comprised only 40 percent of the weighted units. Moreover, traffic cases, while comprising 83 percent of the increase in cases filed, provided only 37 percent of the increase in weighted units. The proportion of total filings and weighted units each category of proceedings provided in 1969-70 are fisted below:

Tupe of proceeding	Percent of flings	Percent of weighted units
Total	100.0	100.0
Selected major traffic violations	3.8	11.1
Other traffic violations	73,9	28.9
Intoxication	4.1	1.9
Other nontraffic misdemeanors	4.9	14.7
Felony preliminaries		20,5
Small claims	5.6	6.0
Quher civil	5.4	16.8

Under the weighting system's standard of 60,000 weighted units per year for a judge, the 21.8 million weighted units filed in the municipal courts represented a caseload for 363 judicial positions. The gain of 1.5 million weighted units over the preceding year reflected work for 25 additional judicial positions. There were 358 judicial positions authorized in the municipal courts in 1969-70, of which 337 were judges and 21 were court commissioners.

TABLE XXXVI-CALIFORNIA MUNICIPAL COURTS DISPOSITIONS OF NONPARKING AND PARKING CASES PER JUDGE-EQUIVALENT

Changes were based on revised figures for 1965-69.
 Not classified separately prior to 1966-67.

2. **DISPOSITIONS**

1969-70 Dispositions Up 5 Percent

The 4.6 million cases disposed of in municipal courts were about 223,100 cases or 5 percent more than the number disposed of in 1968-69. In terms of judicial manpower, the cases were disposed of at an average rate of 12,811 cases per judge-equivalent. ⁵⁷

Dispositions increased in all categories of proceedings. Since dispositions generally parallel the trend in filings, the larger gains usually occurred in those proceedings where filings also gained the most. There were a few exceptions. The percent increase in traffic and felony preliminary dispositions did not equal the increase in filings in these categories, but the percentage gain in misdemeanor cases disposed of outstripped the percentage rise in filings.

The municipal courts disposed of 90.0 cases per 100 cases filed in 1969-70. There were, of course, some variations among the categories of proceedings, ranging from a low of 74.6 cases disposed of per 100 filed in small claims matters to a high of 100.9 in nontraffic misdemeanors exclusive of intoxication. The number of cases disposed of per 100 cases filed for each type of proceeding is given below:

Dispositions before trial Bail forfeitures Convicted or bound over after plea of guilty Judgments by clerk. Summary judgments Dispositions after trial Uncontested matters Contested matters Juvenile orders	4,156,962 2,402,238 598,613 1,052,514 100,937 2,660 416,401 204,157 188,928 23,316	205,043 51,920 89,589 06,418 -2,743 -141 18,052 6,914 10,495 643	5.2 17.8 0.7 -2.0 4.5 5.9 2.8	$1,303,459 \\520,400 \\345,684 \\413,306 \\22,539 \\1,530 \\180,910 \\33,460 \\134,238 \\13,212 \\$	45.7 27.7 136.7 64.7 28.7 135.4 70.8 70.8

Changes were based on revised figures for 1968-69.
 Perzentage changes were not computed because of the change in definition of uncontested and contested criminal proceedings on July 1, 1966 which made earlier figures unauitable for comparison. Prior to July 1, 1966 all criminal cases tried were considered as contested matters. Subsequently, only those criminal cases after both the prosecution and the defense introduced testimonial evidence (acclusive of cross-examination) with with east called by the other side) were classified as contested matters; all other criminal trials were counted as uncontested matters;

Dispositions Before Trial Also Up 5 Percent

Municipal courts disposed of about 4.2 million cases without trial, or 5 percent more than in the preceding year. Bail forfeitures accounted for 2.4 million or 58 percent of these cases, 51,900 more than in 1968-69. All but 44,100 of these bail forfeitures occurred in traffic matters. Pleas of guilty accounted for about 1.1 million of these cases, which was 66,400 or 7 percent more than in the preceding year. Approximately 26,300 or 40 percent of the increase occurred in nontraffic misdemeanor cases (other than intoxication) and 18,500 or 28 percent in selected major traffic violations. Pleas of guilty and bail forfeitures accounted for 83 percent of the before trial dispositions in municipal courts. At 18 percent, dismissals and transfers registered the highest percentage gain among the categories of before trial dispositions.

Uncontected Trials Up 4 Percent

Approximately 204,200 or 49 percent of the after trial dispositions in municipal courts in 1969-70 were uncontested matters, consisting of 74,500 criminal cases and 129,700 civil cases. The total was 4 percent more than in 1968-69. Felony preliminary hearings accounted for 54,500 or 73 percent of the uncontested 58 criminal matters heard and 27 percent of all uncontested cases disposed of in municipal courts. Of the uncontested civil matters tried about 90.100 or 69 percent involved small claims cases.

 For the purpose of establishing trend, contested figures for 1966-67 and subsequent years include uncontested criminal matters since all criminal trials, exclusive of juvenile cases, were considered as contested matters prior to the reporting change on July 1, 1966.
 R Revised.

Contested Trials Up 6 Percent

Approximately 188,900 contested cases were disposed of after trial in municipal courts, 6 percent more than in 1968-69. Although comprising only 4 percent of the total cases disposed of in municipal courts, contested matters represent the most time-consuming cases in municipal courts and provide an important measure of workload.

Data on contested matters as currently defined has been collected for only four years. As a result, for comparison with earlier data current figures were adjusted to include those criminal trials now reported as uncontested matters. The result indicates a gain in contested dispositions of 6 percent and a record volume of 263,400 contested cases disposed of, almost twice the 138,200 contested cases disposed of 10 years earlier. In terms of judicial manpower, this represented an average of 738 contested cases disposed of per judge-equivalent compared to 677 such dispositions 10 years ago.

Dispositions of contested matters increased in almost all categories of proceedings. Approximately 175,400 or 67 percent of these contested dispositions were criminal matters, representing a gain of 8,500 or 5 percent from the preceding year.

3. JURIES SWORN

Jury Trials Up 3 Percent

The 11,800 jury trials, as represented by juries sworn, were only slightly less than the all time record in municipal courts and 3 percent more than in 1968-69. This represented an average of 33 jury cases per judge-equivalent compared with 34 in the preceding year.

About 11,300 or 95 percent of the juries sworn were impaneled to try criminal cases, 6,800 for the trial of traffic matters and 4,400 for the trial of nontraffic misdemeanor cases, the latter being an 18 percent increase over the number tried in 1968-69.

[®] Since the reporting definitions used in collecting municipal court data require that criminal cases in which the defense does not introduce evidence be treated as uncontested, most felony preliminary hearings are counted as uncontested matters.

" Not classified separately prior to 1966-67.

In 1969-70 there were 6.6 juries sworn for every 100 cases tried in which juries were available (i.e., all cases except felony preliminary and small claims cases). Although the ratio of jury impanelment to total cases tried has remained relatively stable during the past 10 years, the 1969-70 rate was up considerably from the 6.1 percent rate experienced in 1959-60.

The ratio varied considerably, however, among the categories of proceedings. The rates in criminal cases fluctuated from 25.7 percent in selected major traffic filings to 4.9 percent in other traffic matters. In civil proceedings, only one jury was sworn for every 100 aftertrial dispositions.

JUSTICE COURTS E.

1. FILINGS

1969–70 Filings Increase 3 Percent

Approximately 928,600 nonparking cases were filed in justice courts. representing an increase of 29,300 cases or 3 percent over 1968-69. Despite a decline in the number of justice courts in the past decade, filings in 1969-70 were nevertheless 137,100 or 17 percent greater than the 1959-60 level.

At the end of the 1969-70 fiscal year there were 244 justice courts located in 53 counties of the state. The number of justice courts was one less than in the preceding year and 63 less than 1959-60. Only Orange, San Mateo, San Francisco, Santa Cruz and Ventura counties do not have justice courts.

• Not classified separately prior to 1965-67.

Felony Preliminaries Increase 15 Percent

Numerically, the largest increase over 1968-69 occurred in traffic filings. The 769,700 traffic cases reflected a gain of 31,900 cases or 4 percent over a year earlier. The largest percentage increase, however, occurred in felony preliminaries, where filings were 15 percent greater than a year ago. Although there were fewer intoxication and small claims filings compared to 1968-69, increases were recorded in all other categories.

Courts by Number of Filings

The number of cases filed in most justice courts is usually small since justice courts are generally located in the less populous areas of the state. In 1969-70 filings ranged from a low of 10 to a high of 19,834 per judge, with an average caseload of just over 3,800 cases since almost three-fourths of the justice courts in the state had less than 5,000 filings In comparison, municipal courts had an average caseload of 15,072 flings per judge. Four justice courts had caseloads of over 15,000 flings during the year: Maricopa-Taft with 19,834, Malibu with 18,897, San Gorgonio with 16,142 and Gilroy-Morgan Hill with 15,373. The caseload of justice courts in 1969-70 was distributed as follows:

Number of Nonparking Filings	Number of Courts	Percent of Courts
Less than 100	12	5
100-999	59	21
1,000-2,999	59	24
3,000-4,999		22
5,000-6,999 7,000-9,999	24	10
7,000–9,999 10,000–14,999	29	12
15,000 and over	11	4
	4	2
Total	244	100

2. DISPOSITIONS

Over 833,800 cases were disposed of by justice courts in 1969-70, an increase of nearly 32,100 or 4 percent over the preceding year. About 766,800 or over nine-tenths of the dispositions occurred before trial, 502,600 by bail forfeitures and 171,700 by pleas of guilty. Of the 67,000 dispositions after trial, only one-third were contested matters. The number of jury trials remained virtually unchanged from a year earlier.

TABLE XLV-CALIFORNIA JUSTICE COURTS FILINGS AND DISPOSITIONS OF NONPARKING PROCEEDINGS

Fiscal Year 1969-70

		Change to 1969-70 from:				
		1968	-69•	1959-60		
Type of disposition	1969-70	Amount	Percent	Amount	Percent	
Filings Total dispositions Dispositions before trial Ball forfeitures Dismissals and transfers Convicted or bound over after plea of guilty. Judgments by clerk. Dispositions after trial Uncontested matters. Juvenile orders. Juvenile orders. Jurie swora. Changes were based on revised figures for 1968-69.
 Percentage changes were not computed because of the change in definition of uncontested and contested criminal proceedings on July 1, 1966 which made earlier figures unsuitable for comparison. Prior to July 1, 1966 all criminal cases rice were considered as contested matters. Subsequently only those criminal cases after both the prosecution and the defense introduced testimonial evidence (exclusive of cross-examination of witnessee called by the other side) are classified as contested matters; all other criminal trials were counted as uncontested matters.

136

F. JUDICIAL ASSIGNMENTS AND ASSISTANCE

1. SUMMARY-NUMBER OF ASSIGNMENTS AND DAYS OF ASSIGNED ASSISTANCE

The California Constitution ⁵⁰ directs the Chairman of the Judicial Council to expedite the business of the courts and to equalize judicial workloads and authorizes him to assign judges to assist in courts other than their own for this purpose. The Chairman made 3.785 such assignments in 1969-70, 15 fewer than the all-time high established in 1968-69. The 1969-70 total was the second highest on record and almost 90 percent greater than the 2,001 assignments issued in 1959-60.

During the 10 years since 1959-60 the number of assignments to justice courts has more than doubled while assignments to municipal courts and superior courts were about 75 percent greater in each case. As in years past, about half of all assignments were to justice courts and overwhelmingly such assignments were for justice court judges to assist in other justice courts. The number of assignments is not a measure of the amount of assistance provided since an assignment may be for less than day or may cover many days. Table XLVII lists the total days of assigned assistance provided from all sources to trial

R Revised.

courts and Courts of Appeal from 1960-61 through 1969-70 and shows the amount and proportion furnished by retired judges.

The judge-days of assigned assistance given to courts has increased almost continuously since the early 1960's as have the number and proportion of days provided by retired judges. Courts received a total of 10,118.5 days of assistance, virtually unchanged from the record total of a year earlier and more than a third again greater than the number of days provided in 1960-61. Retired judges have increasingly provided such assistance. For the first time in 1969-70 this source accounted for more than half of the total days of assistance. Retired judges provided courts with 5,095.5 days of assistance compared to 4,500.5 days a year earlier and more than two and a half times the 1,967 days provided in 1960-61. Assistance provided by retired judges in 1969-70 amounted to the equivalent of nearly 25 full-time judges.

2. ASSISTANCE PROVIDED PARTICULAR COURTS BY ASSIGNED JUDGES

Courts of Appeal

Courts of Appeal received 1,325 days of assigned assistance, down by 31 percent from the 1,930.5 days received in 1968-69 and by 33 percent from the record high of 1,980 days received in 1967-68. An important factor contributing to the reduced assistance was the authorization of nine additional appellate court judgeships since November 1968, thus reducing the overall demand for assigned assistance. The days of assistance superior court judges gave to Courts of Appeal dropped by almost half from a total of 1,133.5 days in 1968-69 to 570 days in 1969-70, while the amount provided by retired judges declined relatively little. Retired judges provided nearly 60 percent of all assistance given Courts of Appeal in 1969-70 compared to about 40 percent a year earlier. Assistance provided the Courts of Appeal amounted to the equivalent of about six appellate justices.

Superior Courts

A new record of 5,259 days of assigned assistance were provided to superior courts, up by 290 days or 6 percent from the previous high in 1968-69. Superior courts received a net of 2,837 days of assistance after subtracting assistance superior court judges gave to Courts of Appeal (570 days) and municipal courts (34 days), and after eliminating the 1,818 days superior court judges assisted in superior courts other than their own, The net was up by 636 days from 1968-69 and was the highest on record. The increase in net as sistance primarily reflects the fact that superior court judges were required to give substantially less assistance to Courts of Appeal than in earlier years. Net days of assistance received by superior courts amounted to the equivalent of about 13 full-time judges. The Los Angeles court alone received 1.522 net days of assistance in 1969-70. up by 42 percent from 1968-69 and more than half the total days received by all superior courts. Retired judges provided 1,564 days of assistance to the Los Angeles court and 1,459 days to other superior courts,

Municipal Courts

A record 3,534.5 days of assigned assistance was provided to municipal courts in 1969-70, up by 305 days or nearly 10 percent from a year earlier. Net assistance given municipal courts after subtracting assistance given other courts and that given by one municipal court to another totaled 2,891.5 days. This was also a record high, up by 755 days from 1968-69. Net assistance received by municipal courts amounted to the equivalent of about 13 full-time judges in 1969-70. Justice court judges provided 1,792.5 days and retired judges gave 1.317.5 days to municipal courts in 1969-70.

3. ASSISTANCE BY COMMISSIONERS, REFEREES AND TEMPORARY JUDGES

Superior Courts

Some superior courts receive substantial amounts of judicial assistance from commissioners, referees and temporary judges and such assistance must be considered when analyzing workload or productivity of individual courts. Assistance received from these sources has increased substantially over the years and the record 21,684 days of such assistance received by superior courts in 1969–70 was up by 917.5 days or 4 percent from the previous high established in 1968–69 and more than double the 10,276 days provided in 1960–61. The assistance provided by juvenile court referees has more than tripled (+224%) since 1960–61 while assistance received from temporary judges more than doubled (+119%). Virtually all of the assistance from temporary judges is provided by court commissioners acting in that capacity.

In 1969-70 commissioners and referees provided assistance to superior courts equivalent to 100 full-time judges.

TABLE XLIX-CALIFORNIA SUPERIOR COURTS DAYS OF ASSISTANCE GIVEN BY COMMISSIONERS, REFEREES AND TEMPORARY JUDGES

Fiscal Year 1969-70

		Commis	sioners*		Lawyere
Court	Total days	As temporary judges	As commissioners	Refereesb	as temporary judges

Sonoma Fulare	310.0			310.0 114.0	
Ventura. Other courts	124.0			124.0 3.5	

Excludes jury commissioners.
 Does not include municipal and justice court judges serving as juvenile court referees.

Table XLIX lists the days of assistance given by commissioners and referees for courts receiving such assistance. In almost all cases commissioners perform functions which would otherwise require the time of judges. In some courts commissioners hear matters on stipulation and sign orders as temporary judges while in other courts they do not sign orders but prepare them for the signature of a judge.

Municipal Courts

Fourteen municipal courts in Los Angeles County received assistance from commissioners in 1969-70 compared to 12 in 1968-69. A total of 4,837 days of assistance was provided these courts by commissioners, about 300 more days than they received from this source a year earlier. The assistance thus provided amounted to the equivalent of more than 20 full-time municipal court judges in Los Angeles County. The Los Angeles Municipal Court alone received 2,360 days of assistance from commissioners or almost half of the 1969-70 total. The great bulk of the total time of commissioners is spent acting in the capacity of temporary judges.

A number of municipal courts, primarily in Los Angeles and Orange Counties, also received assistance from referees or attorneys acting as temporary judges. Attorneys served as temporary judges 817 days and assistance from referees totaled 369.5 days in 1969-70.

South Gate	154.0	85.0	69.0

· Excludes jury commissioners.

4. JUDICIAL EQUIVALENCE OF COMMISSIONERS AND REFEREES

In a number of cases throughout this report statistics are analyzed on a "per judge" basis. Such treatment reflects only the number of authorized judges and does not reflect assistance given or received through judicial assignment or through the use of commissioners, referces and temporary judges. As shown, these sources provide the courts with substantial assistance and in individual courts significantly increase the judicial manpower actually available. A valid assessment of workload or productivity in such courts requires that "per judge" figures be adjusted to reflect the actual judge and quasi-judicial manpower available.

See footnotes on following page.

ANNUAL REPORT OF THE ADMINISTRATIVE OFFICE

In order to permit meaningful comparisons of workload, full-time court commissioners and referees employed by courts were included with the authorized number of judges. This treatment assumes that these court officers were available to handle matters which would have otherwise required the full-time effort of an equivalent number of judges b The Judicial Council's approved system assigns the following weights to superior court filings:

	1969-70	1968-69
Probate	15	15
rouniy Law (formerly Divorce.		10
eleli	15	20
Eminent domain	110	130
rersonal in mrv. etc.	112	120
Other civil complainta.	. 05	65
Uther civil petitions	10	ĩõ
IDSAULTY, PLP.	10	15
JUVEIIIIE Gelihailenav	20	50
vuvenne dependency.	- 58	25
Griminal	195	90
Appeals	105	115
Habeas corpus	25	5

The values assigned to filings are based on estimates of the average judicial bench time involved per filing. These weights are designed to permit a more accurate evaluation of the workload potential in court filings but they do not purport to reflect the quality of judicial performance in any way. (The above criminal weights do not apply to the Los Angeles and San Diego Superior Courts. For criminal filings in Los Angeles a weight of 80 was used in 1968-69 and 100 in 1869-70. The weights applied to criminal filings in San Diego were 75 in 1968-69 and 110 in 1969-77.; The standard of 50,000 weighted units is the approximate amount of judicial bench time available in minutes 'jec 'For explanation, see footnote applicable to the court on Table 11. 4 A full-time juvenile court referees was added during the year. 4 Four full-time juvenile court referees were added during the year. 5 Four full-time juvenile court referees were added during the year. 6 Three full-time juvenile court referees were added during the year. 7 Four full-time juvenile court referees were added during the year. 7 Full-time juvenile court referees and one full-time to year. 7 Full-time juvenile court referees and an explanation of the year. 8 Revised.

TABLE 27-CALIFORNIA SUPERIOR COURTS TOTAL CASES AWAITING TRIAL As of June 30, 1969 and June 30, 1970

For a description of "judicial positions" see footnote a, Table 26. For a list of judgeships see Table 11.
 Cases awaiting trial include criminal and civil cases set for future trial and civil cases in which at-issue memoranda have been filed but no trial dates assigned.
 As of July 31, 1970. Information for June 30, 1970 was not available.
 INA—Information not available.
 R Revised.

Ventura: Ventura County___ Since July 1, 1066, only those felony cases disposed of after both the prosecution and the defense introduced testimonial evidence during the hearing (exclusive of cross-examination by witnesses called by the other side) are classified as contested matters. Felony cases in which only the prosecution introduced evidence are considered uncontested. Prior to July 1, 1966, all felony cases disposed of after bearing were classified as contested matters.
 For explanation, see footnote applicable to the item or court on Table 29.

See footnotes on following page.

In order to permit meaningful comparisons of workload, full-time court commissioners employed by courts were
included with the authorised number of judges. This treatment assumes that these court officers were available to
handle matters which would have otherwise required the full-time effort of an equivalent number of judges.
 The Judicial Council's approved system assigns the following weights to 1968-69 and 1969-70 municipal court
filings (filings in the Los Angeles court are weighted separately):

	Municipal courts excluding Los Angeles	Los Angeles Municipal Court
Felony preliminaries Intoxication Other misdemeanors	36 2 13	48 2 12
Selected major traffic violations Other traffic Small claims	14 1.8 4.5 15	9 1.2 5 10

The weights assigned are based on estimates of the average court time involved per filing and are designed to permit a more accurate evaluation of potential workload than filings alone. The weighting system does not purport to reflect the quality of judicial performance in any way. The weights are revised each year if necessary to reflect the most recent experience of the courts. The standard of 60,000 weighted units is the approximate amount of court time in minutes per judge per year. • For explanation, see footnote applicable to the court on Table 20. • A court commissioners was added during the year. • Court commissioners were increased from seven to ten.

R Revised.

Minus sign (--) indicates the court rendered more days of assistance than it received during the year through assignments by the Chairman of the Judicial Council under Section 6 of Article VI of the State Constitution. Each day monked in excess of three hours was reported as a full day with three hours or less as a half day. For explanation, are footnote applicable to the court on Table 29. Figures are incomplete as no reports were received on assistance in the Sonoma branch for the period of August through November 1098 and January through May 1969 and on the court as a whole for the period of January through November 1070. June 1970,
