OUTLINE OF MODEL PLAN  
FOR  
FAMILY PLANNING INFORMATION INPUT

MAY, 1974

DIVISION OF CORRECTIONS

OUTLINE OF MODEL PLAN

FOR

FAMILY PLANNING INFORMATION INPUT

INTRODUCTION

(TO BE FILLED IN BY THE DIVISION OF  
PLANNING & EVALUATION)

II  
OBJECTIVE

FISCAL YEAR 1974-75

The objective of the Division of Corrections Family Planning Plan is to provide the approximately 4800 male and female inmates exiting from the system each year with adequate informational, counseling, treatment and/or referral services prior to their departure.

III  
JUSTIFICATION

A. BACKGROUND

1) Historical Review

For the past five years, the Division of Corrections has been actively seeking ways to provide direct services for its male and female clients in the area of Human Sexuality & Family Planning. This Division became aware of the need to do so, after extensive investigation of population profiles revealed that the majority of prison inmates came from backgrounds where the economic level of the household was at or below the poverty line, where unplanned (and often unwanted) offspring constituted the rule rather than the exception, where family unity suffered the highest rates of disintegration, and where opportunities to receive adequate sex education either through formal or informal channels was negligible. It was discovered that these conditions combined to create rampant ignorance and/or misunderstanding about human anatomy and reproductive processes, mature patterns of adult sexuality, responsible behaviors connected with wedlock and parenthood and technique and resource alternatives of planned parenthood.

In addition to the problem of naivete, which is a factor of disadvantagedness in and out of prison, the Division recognizes that the phenomenon of institutionalization itself, also places handicaps of a psycho-sexual nature upon all incarcerated persons regardless of sex or class distinctions. The pro-longed denial of legitimate sexual outlets, the disruption of marital and parental relationships, the over exposure to homo-sexual practices, and the prohibitions against working for personal financial solvency all contribute to the anxieties of individuals who are being released from the system.

2) Current Status

a. Educational Services

The Division has developed with the approval of the Division of Health and the Department of Education a twenty (20) hour instructional course in Human Sexuality and Family Planning. This course is on the verge of Division-wide implementation - and will be integrated in the Adult Basic Education Program of all major institutions. Hopefully, it will reach about 2000 male and female clients a year.

b. Clinical Services

All female inmates of a procreative age exiting from the system are given the following options:

90 day supply of birth control pills

Free diaphragm fitting

Free IUD insertion

The institutional medical team does the diagnostic, prescriptive, and clinical work. It is estimated that about 125 women accepted one of these three options in the last fiscal year.

c. Pharmaceutical Services

Many male inmates participating in the furlough program are given free condoms by the institution of their residence. These items are made available through local county Health Departments.

d) Informational Services

Many inmates within four months of exiting from the system participate in a pre-release orientation curriculum. One of the blocks of instruction of this curriculum focuses on the subject of Family Planning options and referral opportunities in the community.

B. NEEDS ASSESSMENT AND ANALYSIS

1. Mandates and policies relative to Family Planning that promote or hinder Family Planning Services within the Division.

- |                 |                |
|-----------------|----------------|
| a. Federal      | Not applicable |
| b. State        | See Appendix   |
| c. Departmental | See Appendix   |

NOTE: To our knowledge no policies hinder the provision of Family Planning Services within this Division.

2. Clients

a. Total number of Division Clients

10,811 inmates currently in system.

b. Estimated number requiring Family Planning Services

Approximately 10,400 males

Approximately 400 females

For reasons spelled out in the Justification we believe that almost all inmates in the system, by virtue of their disadvantagedness and/or their institutionalization, require one or more of the following: educational, counseling, clinical, pharmaceutical and/or informational and referral services sometime during their incarceration (and preferably within four (4) months of their release.)

C. CRITERIA FOR SELECTION

Various groups have been identified as needing different types of Family Planning Services. These are indicated below:

1) Educational - The approximately 3000 inmates (Male and Female) participating in the Adult Basic Education Curriculum at major institutions should be provided with a twenty (20) hour course in Human Sexuality and Family Planning at some time during their schooling.

2) The approximately 32,000 incidents of family visitation furloughs should be covered by the option of receiving free contraceptives prior to leaving the institution of residence.

3) The approximately 160 females exiting from the system each year should receive benefit of the counseling, examination, prescriptive, pharmaceutical and/or clinical options previously mentioned.

4) The approximately 3840 males exiting from the system each year should be given a short block of instruction (one to four hours) relating to Family Planning options and the services available in the community on a referral basis within four (4) months of actual release.

D. ESTIMATED NEED FOR SPECIALIZED FAMILY PLANNING SERVICES BY DISABILITY GROUP

Not applicable - above information should suffice.

3) Programs and Services

a) Kinds of Family Planning Services provided in the Division

See III,A, 2 Current Status

b) Number of clients receiving various kinds of Family Planning Services.

The only certain figures we have relating to females exiting from the system.

We know that 125 women last fiscal year accepted the option of receiving counseling, examination, prescription and pharmaceutical/clinical services in the area of Family Planning prior to release.

4) Staff

a) Number of staff currently providing Family Planning Services

b) One Science and one Social Studies teacher at each of ten major institutions (our Reception Center is being excluded from this category) have been delegated part time Family Planning instruction duties.  $2 \times 10 = 20$

One M.D. and three (3) R.N.'s at Florida Correctional Institution have consultative and clinical roles in providing services for exiting females.  $3 \times 1 = 3$

Current total 23

NOTE:

It is estimated that the Social Studies and Science teachers will spend about six (6) hours per week for twenty (20) weeks, two (2) times per year in the area of Human Sexuality and Family Planning Education.

$2 \times 10 \times 6 \times 20 \times 2 = 4800$  man hours

Relative to medical personnel involvement at F.C.I., a M.D./R.N. team spend an average of one half ( $\frac{1}{2}$ ) hour each, providing pelvic examinations, consultation, etc., with each exiting female = 160 man hours per year.

c) Number of staff potentially available for providing additional kinds of Family Planning Services.

One staff member at each of ten (10) major institutions, ten (10) road

prisons, five (5) Vocational Centers and twenty (20) Community Correctional Centers should be identified and trained to:

a) dispense contraceptives to individuals participating in furlough programs that include family visitation.

b) provide information and referral services (one to four hours instruction) to all inmates within four (4) months of exiting from the system

Potentially forty-five (45) additional personnel are available for facilitating Family Planning Services.

d) Number of staff requiring staff training if employed in the delivery of Family Planning Services.

The forty-five (45) additional staff members indicated in c) above

5) Facilities

a) Total number of facilities currently being used to provide Family Planning Services.

The below listed facilities are providing one or more of the previously identified services on a very un-even and non-directed basis.

Ten (10) major institutions

Twenty (20) Community Correctional Centers

b) Total number of facilities potentially available for providing Family Planning Services.

Ten (10) major institutions

Ten (10) road prisons

Five (5) training centers

Twenty (20) community correctional centers

c) Types of supplies or equipment necessary to fully utilize these facilities for Family Planning Services.

1) Misc. unidentified instructional supplies - video visuals, pamphlets, etc., to support informational referral services at:

Ten (10) major institutions

Ten (10) road prisons

Five (5) training centers

Twenty (20) community correctional centers

2) Classroom instructional aids to cover Human Sexuality and Family Planning Curriculum in the Adult Basic Education Programs at Cross City Correctional Institution and Lake City Correctional Institution (see appendix for suggested list).

3) Funds to cover sex education film distribution and repair - twenty (20) films will be rotated around ten (10) major institutions, two (2) times per year. (See appendix for film list)

6) Funding

a) Sources of funding for current Family Planning Services.

1) A title ten grant received indirectly through the Division of Health enabled this Division to procure materials, films, models, transparencies, tests, etc., to support a twenty (20) hour course in Human Sexuality and Family Planning at eight (8) major institutions. (See appendix for activities)

2) Various local Division of Health facilities have been providing contraceptives to D.C. Institutions requesting them.

3) Medical examinations and counseling services for exiting females has come out of D.C. General Revenue Budget (Medical). Pharmaceutical supplies have been provided by the Division of Health.

4) Teacher time in conducting Human Sexuality and Family Planning Curriculum has come out of D.C. General Revenue Budget (Educational.)

b) Identification of funding constraints to provide additional Family Planning Services.

Limited Educational and Medical Budgets in D.C. General Revenue. If the Division of Corrections is expected to expand its level of Family Planning Services then it should become eligible for outside reimbursement on the basis of the number of clients served in any and all areas previously noted.

7) Organizational Entities

a) Divisional responsibility and accountability for management and monitoring for insuring Family Planning Services.

Internalized within Division of Corrections. Supervisory and/or administration personnel who should be actively involved in Family Planning Services management activities are:

Medical Director

Educational Administrator

Inservice Training Director

Bureau Chief of Institutions

Bureau Chief of Community Families

Division Liaison Person

b) Referral procedures on Family Planning with regards to other H.R.S. Division, other Department in State Government, University System, voluntary associations and the private sector.

To our knowledge, D.C. only has a formalized system of referral with D.V.R. This relationship is not specifically targeted in on problems relating to Family Planning, but to the broad spectrum of vocational disabilities which may include the family size of individual clients.

8) Data Collection

a) Kinds of data currently collected on Family Planning Services.

- 1) Rough calibration of number of inmates participating in Human Sexuality and Family Planning Curriculum at major institutions.
- 2) Rough calibration of number of female inmates exiting from system receiving clinical pharmaceutical services.

b) Kinds of data necessary to plan for Family Planning Services but not collected.

- 1) Number of males who have wedded or common law wives who are indigent and need clinical services in the community.
- 2) Number of exiting males with a minimum of two (2) children who would like to receive subsidized vasectomies.
- 3) Number of pre-release orientation slots which should be prepared for exiting inmates from each facility.
- 4) Number of classroom slots available per year at major institutions in the area of Human Sexuality and Family Planning Training.
- 5) Number of furlough slots authorized each year where there will be a likelihood of sexual activity.

c) Existing evaluation Methodology

See 8 a) #1 and 2

9) Problem identification by priority of need.

- 1) Finding outside funding sources and/or outside personnel resources to assist Division in expanding current level of services.
- 2) To develop a more sophisticated data collection system on the specific Family Planning needs of inmates and their spouses.
- 3) To integrate the existing Human Sexuality and Family Planning course with the Division's Adult Basic Education Program.

4) To continue and possibly expand the delivery of in-house consultative, prescriptive pharmaceutical/clinical services for all females exiting from the system.

5) To develop a formalized and unilateral system of providing information and referral services to all male inmates exiting from the system within four (4) months of departure.

6) To provide a formalized and unilateral system of dispensing contraceptives to all inmates participating in furloughs where there is opportunity for sexual activity.

## APPROACH

### General Strategy

The general strategy is designed to assure the provision of services necessary to achieve the Family Planning objective(s). This will require the recognition of current levels of services as a basis for future expansion.

The forty-five (45) discrete correctional facilities in current operation (including ten (10) major institutions, twenty (20) community correctional centers, ten (10) road prisons and five (5) training centers) are considered the core of the system to provide Family Planning Services to the incarcerated adults of Florida. Throughout this network, the quantity, quality and range of Family Planning Services will be increased to approach maximum potential.

Expansion of Family Planning Services will be achieved by further developing uncommitted personnel resources within the Division of Corrections and by soliciting direct assistance from the Florida Division of Health at the State, regional and local levels in the areas of inservice training of staff, provision of pharmaceutical and educational supplies and reimbursement for correctional man hours spent in this endeavor.

Types of expanded services will range from formalized classroom instruction, to clinical or referral services as previously described.

Division wide coordination is recognized as the sine qua non of program expansion. The mechanisms for Division wide coordination (including adequate data collection and monitoring instruments) will be developed during fiscal year 74/75. It is expected that the respective Divisions of Health, and Planning and Evaluation

will play prominent roles in the development of these.

### EVALUATION & MONITORING STRATEGY

It is understood that monitoring and evaluation are essential prerequisites to receiving extra-divisional reimbursement for services performed. Therefore, a monitoring and evaluation strategy will be developed in Fiscal Year 74/75 to measure the progress of planned work activities delineated in the Division's Family Planning Plan.

Evaluative criteria will be developed to:

- 1) identify the types of Family Planning Service needs by incarcerated offenders.
- 2) establish case loads by facility site and types of service
- 3) assess the unit cost per type of service and delivery site
- 4) quantify and qualify duplications and lapses in service
- 5) assess staff and client perceptions of services rendered

An information collection system will be developed to effect the above with collaboration from the Division of Health and continued assistance from supervisory and administrative entities within the Division of Corrections. Personnel involved in the evaluation will be the Division's Medical Director, the Educational Administrator, the respective Bureau Chiefs for Institutions, and Community Correctional Facilities and the Division's Family Planning Liaison person.

Evaluative reports will be written by the Division's Liaison person will describe the progress of client service activities and provide recommendations, for future planning and funding requests.

### TRAINING STRATEGY

The strategy for meeting the Division of Corrections statewide training needs in the area of Family Planning will be directed toward D.C. personnel who are (or should be) providing pre-release orientation to inmates exiting from the system via major institutions, road prisons, training centers, and community correctional centers. The Division of Health will be contacted by the Division of Corrections Personnel Training Director to provide intensive instruction to one correctional counselor (or counterpart) from each of the previously listed forty-five (45) correctional facilities. Instruction will focus on the development of concepts and skills required to inform clients of contraceptive options and in establishing referral services between the client and the appropriate Family Planning agency in the community.

It is not deemed necessary to provide additional training to D.C. Medical or Educational personnel considering the existing level of their expertise. However, should the Division of Health disagree with this position, additional in-service training proposals will be entertained during Fiscal Year 74-75 and appropriate action steps will be taken.

### FUNDING STRATEGY

The major thrusts of the Divisions Funding Strategy will be to examine potential sources of funds in coordination with the including general revenue, social security trust funds, and reimbursement through Titles IVA and XVI. Formulae to precipitate funding will be developed with the Division of Health during Fiscal Year 74-75.

MANAGEMENT STRATEGY

Meetings of previously identified supervisory and administrative D.C. personnel and appropriate officials from outside agencies will be called quarterly to:

- 1) measure progress toward achievement
- 2) identify existing or potential problems which could prevent the accomplishment of the stated division objective
- 3) ensure effective implementation of necessary policy decisions.

**ACTION STEPS**

Action Step 1

OBJECTIVE

To design a comprehensive unitary Family Planning Service delivery system and expand the service delivery capability to meet the Division of Corrections Family Planning Program objective. These include the formalization of a Human Sexuality and Family Planning component in the Divisions Adult Basic Education program, the provision of counseling and clinical services to all exiting females, the provision of informational/referral services to all males within four (four) months of exiting from the system, and the distribution of contraceptive devices to all inmates requesting them prior to furloughs which will entail sexual activity.

	Activities	Accountability	Time Frame
<b>Activity 1.1</b>	<u>Educational Services</u>		
1.1.1	Develop administrative policy statement integrating the Human Sexuality and Family Planning course in the Adult Basic Education Curriculum of all major institutions (2000 students per year should be reached)	D.C.	
1.1.2	Expedite all necessary school schedule changes	D.C.	
1.1.3	Schedule distribution of Division of Health films to all major institutions	D.C.	
1.1.4	Develop monitoring instruments	D.C. & D.H.	
1.1.5	Monitor implementation progress	D.C.	
<b>Activity 1.2</b>	<u>Counseling/Clinical services for all exiting females</u>		
1.2.1	Develop administrative policy statement	D.C.	
1.2.2	Continue or expand upon current level of services (125 to 160 females should be reached)	D.C.	
1.2.3	Develop monitoring instruments	D.C.	

Activities	Accountability	Time Frame
Activity 1.2.4 Monitor progress in continuing or expanding level of services	D.C.	
1.3 <u>Informational/Referral Services for all exiting males</u>		
1.3.1 Identify persons to provide pre-release orientation in area of Family Planning at 45 correctional facilities throughout the state.	D.C.	
1.3.2 Provide inservice training to these staff in delivery of informational and referral services	D.C. & D.H.	
1.3.3 Develop monitoring instruments	D.C. & D.H.	
1.3.4 Monitor implementation progress	D.C.	
Activity 1.4 <u>Distribute contraceptives to furlough participants on conjugal type visits</u>		
1.4.1 Identify distribution centers through correctional facility net-work	D.C.	
1.4.2 Assess number of furlough participants in this category	D.C. & D.H.	
1.4.3 Procure bulk shipment of contraceptives from Division of Health	D.C. & D.H.	
1.4.4 Develop monitoring instruments	D.C. & D.H.	
1.4.5 Monitor implementation	D.C.	

Action Step 2      *Funding Development Fiscal Year 74/75*

OBJECTIVE

*To develop procedures for effectively utilizing multiple funding sources and to obtain approach allocation of all available funds to meet the Division's Objective.*

	<i>Activities</i>	<i>Accountability</i>	<i>Time Frame</i>
<i>Activity 2.1.</i>	<i>Identify available financial resources</i>	<i>D.C. &amp; D.H.</i>	
<i>2.2.</i>	<i>Develop the procedures for obtaining funds</i>	<i>D.C. &amp; D.H.</i>	
<i>2.3.</i>	<i>Identify the cost of implementing expanded programs</i>	<i>D.C. &amp; D.H.</i>	
<i>2.4.</i>	<i>Develop efficiency and effectiveness measures</i>	<i>D.C. &amp; D.H.</i>	

Action Step 3 Plan Development

OBJECTIVE

To prepare and obtain approval for Division-wide Family Planning plan for Fiscal Year 75/76.

	Activities	Accountability	Time Frame
Activity 3.1	Prepare a status report on the Division-wide family planning program to date.	D.C. & D.H.	
3.2	Prepare a problem analysis based on an assessment of the needs and resources with Division-wide family planning program.	D.C. & D.H.	
3.3	Develop quantifiable family program objectives	D.C. & D.H.	
3.4	Develop family planning program strategy	D.C. & D.H.	
3.5	Prepare description of Division-wide family planning program administrative structure and coordinative mechanisms to be utilized during Fiscal Year 75-76	D.C. & D.H.	
3.6	Develop funding strategy for Fiscal Year 75-76	D.C. & D.H.	
3.7	Determine methods for monitoring and evaluating the Division-wide program	D.C. & D.H.	

# Appendix

## DEPARTMENTAL FAMILY PLANNING POLICY

ISSUED BY SECRETARY ROBERTS ON JUNE 26, 1973

Chapter 381.382 Florida Statutes, mandates the State of Florida Department of Health and Rehabilitative Services to implement a comprehensive family planning program.

A comprehensive family planning program means that every client of the Department will have access to family planning services in order to have the opportunity to plan the occurrence of pregnancy if the client so desires.

The provision of family planning services is a Departmental responsibility involving all divisions. Services may be provided directly or through referral. Each division, making maximum utilization of its own resources, shall provide those family planning service components appropriate to its responsibility within the Department.

It shall be the policy of this Department that all applicants for or clients receiving services of the Department shall be advised of the availability of family planning services and that one or more of the following components of a comprehensive family planning program shall be provided to all eligible individuals requesting such services.

### 1. Information and Referral

Information pertaining to services which are designed to convey reproductive and contraceptive information needed for family planning shall be provided and referral to appropriate services will be made when requested.

### 2. Education and Counseling

The integration of family planning concepts, methods, and techniques into educational curricula and counseling services shall be provided.

### 3. Contraceptive Services

Contraceptive Services, which are consistent with state medical standards, shall be provided when desired by a client.

### 4. Follow-Up Services

The progress of clients who enter family planning services shall be followed from the date of entry to enable full participation until the client elects to terminate services. Reasons for client termination shall be identified and procedures established to facilitate directing clients back into the system to continue services when appropriate.

### 5. Ancillary Services

Support services necessary for patients to effectively utilize family planning programs shall be provided including child care, transportation, and related health or social services.

No client of the Department will be in any way coerced to accept family planning services, nor shall any client of the Department be denied any component of family planning services. The receipt of family planning services shall not be contingent upon the client's acceptance of any other service of the Department and the receipt of other services shall not be contingent upon the client's acceptance of family planning services.

APPENDIX F-III

DEPARTMENT OF HEALTH AND REHABILITATIVE SERVICES  
POLICY

FAMILY PLANNING FOR MINORS

Florida Statutes 381.382 states that it is the intent of the Legislature to make available to citizens of the state, of child-bearing age, comprehensive medical knowledge, assistance, and services relating to the planning of families and maternal health care. It further states that maternal health and contraceptive information and services of a non-surgical nature may be rendered to any minor by persons licensed to practice medicine under the provisions of Chapters 458 and 459, as well as by the Department of Health and Rehabilitative Services through its family planning program, provided the minor (1) is married, (2) is a parent, (3) is pregnant, (4) has the consent of a parent or legal guardian, or (5) may, in the opinion of the physician, suffer probable health hazards if such services are not provided.

Pursuant to this, it is the policy of the Department of Health and Rehabilitative Services that any minor who is not married, a parent, pregnant, or does not have the consent of the parent shall be counseled as to the deleterious effect of her activities. Every effort shall be made to have parental consent and involvement in her care. In those cases in which the patient refuses to have parental involvement, or for any other reasons the parents cannot be contacted, the physician shall certify that contraceptive information and services are necessary to the physical and mental well-being of the minor. He shall document the circumstances preventing parental consent.

Date

12/20/73

*O. J. Keller*

Oliver J. Keller, Secretary  
Department of Health and  
Rehabilitative Services

An historical synopsis of Family Planning instructional activities to the present time is given below:

1969-1970 - Mini course in Family Planning developed by F.C.I. Education Department for women inmates.

Course conducted periodically by Education Staff members.

Summer 1971

1. Division Educational personnel attended Family Planning Educators workshop conducted at F.A.M.U.
2. Participants of workshop make commitment for Division to develop a Human Sexuality & Family Planning Curriculum guide for use with male incarcerated offenders.
3. Instruction in Family Planning continued for female inmates at F.C.I.

Fiscal Year 1972

1. Tentative course outline and curriculum in Family Planning for male incarcerated offenders developed.

2. Outline approved by Department of Education and Division of Health.
3. Outline field tested at various institutions - complaint commonly registered that the Division of Family Planning instructors had inadequate instructional resources (films, charts, models, pamphlets, etc.) to support 20 hour block of instruction. These resources had been generally identified in the course outline.
4. Family Planning instruction for females continued at F.C.I.

January 1973

1. Prior to formalized, full scale implementation as the Family Planning instructional program for all D.C. inmates, Division of Health requested and gained permission to conduct orientation sessions for institutional staff members who would be in a position to promote instructional efforts at the various major institutions.

February 1973

1. Division of Health conducted orientation sessions at major institutions.
2. Full scale implementation of Family Planning Program initiated.

March 1973

1. D.C. Education Departments at major institutions formally report that quality of family planning instruction seriously handicapped by lack of instructional materials suggested in course outline.
2. Division of Health media center unable to get films, etc., to teachers when they were needed to support a particular topic in the curriculum. Cooperation with Division of Health excellent, supply and logistics problems insurmountable.
3. Division of Health contacted Division of Corrections to see if a portion of their federal educational training funds for family planning could be diverted to Division of Corrections for use in family planning instruction.

March 1973

1. Division of Corrections responded that they could use approximately \$17,000.00 for; 1) a teacher workshop to preview, screen and select the best of current instructional resources in the area of sex education, 2) for purchasing specific classroom resources such as models, charts, pamphlets, transparencies, etc., 3) for purchasing a centralized film library of particularly high quality films to be used on a rotated basis in all major institutions.

May 1973

1. Division of Health - formally accepts proposal of Division of Corrections to utilize federal funds for above mentioned purposes.

June 1973

1. Workshop held - instructional resources identified for purchase.

July & August 1973

1. Materials purchased for Division of Corrections by Division of Health.

August 1973

1. Classroom instructional materials sent to Division of Corrections and distributed to institutions.

September 1973

1. Division of Health informally advised that films originally purchased for Division of Corrections film library are purchased but won't be relinquished for exclusive use by Division of Corrections.

January 1974

1. Mr. Wainwright contacted Dr. Sowder and requested release of films.
2. Dr. Sowder advised Mr. Wainwright that films will be released.

February 1974

1. Received custody of twenty films relative to Human Sexuality and Family

Planning on permanent loan from the Division of Health. Films sent to Sumter Correctional Institution to design a plan of centralized distribution on a staggered basis.

April 1974

1. Sumter Correctional Institution sequencing films to intermesh with curriculum and to design control mechanisms for the circulation of films on a staggered basis to all major institutions.

January 23, 1974

Mr. Jim Barringer  
Division of Corrections  
Central Office  
1311 Winewood Boulevard  
Tallahassee, Florida 32304

Dear Mr. Barringer:

I am this date forwarding to you on indefinite loan prints of the following films, in accordance with the wishes of Secretary Keller and Mr. Louie Wainwright. The Q-number following each title is our catalog and print number designation. Since these films must remain on my inventory (see DHR Directive 11.03) I must require you to sign and return the attached custody receipts. If you would like copies of these receipts, I will be happy to furnish them to you.

In the interest of extending the useful life of the films, this office is charged with the maintenance and service of all Department films and we will recall your loaned films at least once each twelve months for inventory, inspection, maintenance, and repair; returning them to you within 5 working days. However, if a film suffers damage prior to our recall, please feel free to send it back to us at any time. If the damage is correctable, we will repair the film and return it at once.
