## INTRODUCTION

This directory provides a listing of available programs and services aimed at juvenile delinquency prevention, early intervention and status offenders. It is intended for use by the juvenile justice system, service provider agencies, schools, court-related programs and the general public.

Each listing contains general information about the agency, geographic area, type of clientele served, program service components, and specific admissions criteria. Information was provided voluntarily by agencies wishing to be included in this directory. The information printed is based on data provided by each individual agency.

Information presented in this directory is intended as an inventory of available programs in the State of Florida. Inclusion in this directory does not reflect an endorsement or recommendation of any program listed by either the state advisory committee, subgrantee, or other agencies involved with its development.

The directory does not assess the efficiency or quality of the programs or services provided. It is the responsibility of the user to determine the applicability of each program with respect to the needs of the client. In addition, frequent staff and program changes may render some of the enclosed data obsolete. The document may be reproduced in whole or in part provided the integrity of the material presented is maintained.

This project was funded through an award from the Governor's Juvenile Justice and Delinquency Prevention Advisory Committee with funds granted to the Department of Health and Rehabilitative Services from the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention.
