STATE AND LOCAL TRAINING AND TECHNICAL ASSISTANCE NEEDS ASSESSMENT

SURVEY RESULTS

MARCH 1993

STATE AND LOCAL TRAINING AND TECHNICAL ASSISTANCE NEEDS ASSESSMENT SURVEY

SURVEY RESULTS

Prepared For:

U.S. DEPARTMENT OF JUSTICE
BUREAU OF JUSTICE ASSISTANCE

By Community Research Associates, Inc.

March 1993

Table of Contents

Introduction

The primary mission of the Bureau of Justice Assistance (BJA) is to support national drug control efforts by improving the criminal justice system. This mission is accomplished, in part, by providing both financial and technical resources to state and local governments. BJA's State and Local Training and Technical Assistance Program (T/TA) supports a formula grant program that provides training and technical assistance to state and local jurisdictions. The program seeks to improve the overall function of state and local criminal justice systems. Specific goals of the program include developing and implementing strategies to prevent and combat drug-related and violent crime. To ensure that the training and technical assistance resources target and focus on state/local issues, programmatic needs associated with the 21 authorized program areas must be identified as well as the administrative needs related to the formula grant program.

Under the Anti-Drug Abuse Act of 1988, each state is required to designate a state administrative agency to manage formula funds and state strategy development.

Community Research Associates (CRA), as part of its contract with BJA, has conducted a national needs assessment survey to provide the information required. A mailed survey instrument (questionnaire) was used to collect information from the 56 state administrative agencies. CRA staff developed the questions and instrument. Special care was taken so that it would not duplicate previous survey and research efforts.

In March of 1992, a technical assistance survey workgroup was formed. The workgroup consisted of BJA representatives, Joe Marshall of Virginia, Floyd Pond of Maryland, and CRA representatives. The immediate task for the group was to further develop and refine the questionnaire. The completed survey questionnaire contained in Appendix A was the result of this workgroup. In September of 1992, BJA edited, approved, and mailed the questionnaires to each of the 56 state administrative agency directors with a cover letter. The return due date for the questionnaire was set for October 9, 1993, however, many were not received until sometime later. By the end of the year 49 states and territories had responded. Appendix B provides a listing of the states and territories that responded to the survey. Surveys arriving late delayed the project until the first quarter of 1993.

Methods

A mailed questionnaire was used to collect information from the 56 State Administrative Agencies. See Appendix A for a complete copy of the survey including instructions and questions asked. It has three major sections that cover all of the 21 Program Areas.

Sections I and II required respondents to check all of the appropriate boxes for "Yes" responses, while Section III required ranked (1-5) responses. Due to the large number of possible responses, respondents were instructed that if their answers were "No" or "Not Needed" to a particular survey question, they were to leave the box blank. Since "no" or "not needed" responses were not explicitly recorded, it is possible that any missing information was labeled as negative responses.

Section I asks three primary questions regarding funding sources for in-state training currently being provided:

* "Is Training Currently Provided In-State with State/Local Funds?"

* "Is Training Currently Provided In-State with Formula Funds?"

* "Is Training Currently Provided In-State by Other Federal Agencies?"

Section II addresses funding information for operational programs in each of the program areas by asking two questions:

* "Do Operational Programs Currently Receive Formula Grant Funding?"

* "Do Operational Programs Anticipate Receiving Formula Grant Funding?"

Section III is concerned with technical assistance, training, and information needs in each program area and asks states to rank their needs using a 5-point scale where "5" is the 'Greatest Need' and "1" is the 'Least Need.' If no assistance was needed, respondents were instructed to leave that particular line blank. *Technical Assistance* was generally defined as the provision of specialized short term consultation as a means of resolving a specific problem for a state or local justice, correction, or related system. Technical Assistance for *Program Development and Planning* was further

defined as that needed to assist the state administrative agency or another agency with any aspect of planning, designing, or developing a program. Technical Assistance for *Operations* was further defined as that needed to assist on issues related to implementing a previously designed program or improving a program currently being conducted. *Training* was clarified as training used to enhance recipient knowledge of justice, corrections, and drug related issues via workshops or conference settings. *Information* refers to materials assembled on a specific topic to increase a user's understanding of the topic and related issues. Specific instructions for the section included:

*   Rank each area with regard to *Program Development* Technical Assistance Needs.

*   Rank each area with regard to *Operational Program* Technical Assistance Needs.

*   Rank each area with regard to *Training* Technical Assistance Needs.

*   Rank each area with regard to *Informational* Technical Assistance Needs.

Preliminary analysis focused on identifying those project areas most frequently funded or in greatest need. The cutoff criterion most frequently used to identify these top areas was the 90th percentile. Consequently, the highest 10 percent of cases are usually presented. However, due to ties of equal value and indistinguishable breaking points fewer or more project areas or states may actually be listed. Averages mentioned refer to mean averages.

Analyses also identified States with the most number of areas offering training and needing assistance.

A number of calculated totals were created and used during analysis. Most of these involved adding column or row items from the survey. Blanks were coded as zeros and appear as "--" in the tables enclosed. Some of these calculated measures deserve explanation:

☞   Training Areas in State: In Section I, a check in any one or more of the boxes in columns A, B, and/or C indicates that a training program(s) exists in that line-specific area. Since there are 122 project areas within

BJA's first 21 Program Areas the number of training areas per state can range from 0 to 122.

☞ Anticipated Formula Grant Totals: The intent of this question was to identify project areas not currently being formula grant funded but that the state anticipates to begin receiving formula grant funding. Many states indicated Yes responses to both "Current" and "Anticipated" questions, however only those checking Yes for "Anticipated" were studied. Hence, Anticipated Totals represent areas in which states are planning to expand.

☞ Total Need Ranks: Since we asked for numerical ranks of need in Section III, we can add the ranks given by the states to produce a relative measure of need. These "Total Ranks" are calculated by adding all the ranks that respondents assigned to a given project area. These totals can go up to 245; 49 states multiplied by 5, the highest rank possible for each area. The national total for each type of need can go as high as 29,890 for all project areas; based on rank total of 245 possible multiplied by 122 areas.

There are four types of needs that respondents rate along the scale. At one point, we collapse or add all four types into a single measure of need called "Total Rank for All Four Need Types." When doing so the range of possible needs goes up to 980 possible.

The number of states suggesting some need, despite rank value, is another potential measure of need. In terms of calculations, this is the same as treating all values as if they were 1's and then adding them up. "Number of States" is strongly associated with "Total Rank" values, since the Totals will be greater when more states assign a number instead of leaving a blank. This spurious relation between these two indicators of need should be kept in mind.

As units of measure, these *Total Ranks* may not have concrete meanings, but are practical means to allow comparisons between the responses and between the respondents.

Questions in Sections I and II ask for specific funding information that can be documented. A "Yes" answer in these sections may refer to single or multiple programs/projects that operate within the program area specified. Section III asks a

more subjective question about amounts of need in each program area. Since these are judgments it should be kept in mind that one respondent's sense of need may differ from that of other respondents'. People work under different response biases: for example, some will be liberal in checking needs to address many issues while others will answer cautiously in not wanting to admit a need.

Findings -- Overview

The vast majority of survey items were left blank showing no funding or no needs. Responses indicating funding and needs will be discussed section by section in the following pages.

Beyond Sections I-III, some general questions were asked about the State and Local Training and Technical Assistance (T/TA) Program conducted by BJA through CRA. At the time of survey completion, 39 of the 49 states were aware of the program. State and local agencies in 24 different states have requested Training or TA through the program. Twenty-three of these states used Training or TA sponsored by BJA or the Office of Justice Programs within the last two years. More information about the program and how to request Training and TA is wanted by 25 states.

Seventeen state offices survey state and/or local agencies to determine training and technical assistance needs.

Eight state agencies indicate a need for training or Technical Assistance either to or through their office for the Governor or policy makers to enhance responsibilities in implementing statewide drug and violent crime strategies.

Several states took advantage of the "OTHER" option available in each of the general Program Areas to specify a specific area in which they have training, programs, and/or needs. These responses may suggest new areas needing attention. Current data can only note these new suggestions. Since other states were unable to comment on them, no other comparisons nor analyses are possible.

The following list shows some of the OTHER areas mentioned by the states.

1 -- Drug Abuse Prevention Involving Law Enforcement
    Innovative Prevention

2 -- Multijurisdictional Drug Enforcement
    Technical Assistance & Asset Investigations
    Technical Surveillance

4 -- Community Crime Prevention
Personal Safety
Weed\Seed
Strategic planning for C.O.P.
Hate Crimes
F.A.S.T.

10 -- Court-Based Operations
Cross Cultural Training/ Domestic Violence/Sex Crimes
Treatment Assessment Service Center

11 -- Adult Detention/Corrections Programs
Private Provider Symposium
Jail Construction

12 -- Prison/Jail Industries
Procedures and Management

14 -- Victim/Witness Programs
General System Services to Victims
Battered Women Victim Assistance

15 -- Drug Control Technology/Information Systems
Indigent Defense Brief Book

16 -- Innovative/Unique Crime Control Programs
Drug Summit
Statewide Prosecution Coordination

18 -- Domestic Violence
State Police Task Force Targeting Violent Armed Felons
Legal Assistance
Direct Services for Child Abuse

19 -- Drug Control Program Evaluation
Problem Definitions for Drugs and Violent Crime

20 -- Correctional Alternatives
Drug Testing of Offenders
Alternative Sentencing

21 -- Urban Drug Enforcement
Multi-Disciplinary Drug Abuse Strategy
Assist Drug Prosecutors
Asset Forfeiture and Returning Assets

Section I Findings: Training Currently Provided In-State

Table I, "In-State Training by Program Area and Funding Source," compares the three funding sources for In-State Training programs. Since the three funding sources (State/Local, Formula Grant, and Other Federal Agencies) cover the entire range of possible sources, a check indicating any one or more source(s) suggests that a training program exists. Any private funding would fall in the "State/Local" category.

Whatever the funding source, the 10 Program Areas with the most in-state training programs are:

Program Area		# of States
1a	D.A.R.E	41
2a	Multijurisdictional Regional Task Forces	38
3c	Marijuana Eradication	32
7m	Highway Interdiction	29
7k	Undercover Programs	28
2c	Special Narcotics Prosecutor	26
9b	Asset Seizure and Forfeiture	26
7i	Drug Dogs/Canine Acquisition and Training/K-9 Unit	24
7l	Surveillance Programs	24
18a	Domestic/Family Intervention	24

Nationwide, the respondents indicated that 1,128 state training areas are funded with state/local funds, 729 areas are funded by Federal Formula Grants, and 338 are funded by Other Federal Agencies. (Reminder: The maximum number of training areas is 5,929 resulting from 122 areas possible in 49 responding states.) On average, states use state and local funds for 23.02 areas, formula funds for 14.88 areas, and other federal monies for 6.90 areas. Consequently, it seems that state and local funds contribute to more training areas than formula funds. Also, other federal agencies funded less than half as many areas as BJA's formula grant program.

States with the largest amount of training, regardless of funding source, are: California (74 areas), Arizona (72), Minnesota (67), Pennsylvania (67), Tennessee (64), and Virginia (63).

Actual funding amounts were not collected, but it seems safe to assume that when more areas are funded that more money is used to fund them.

Tables II, III, and IV examine each of the funding sources in detail.

From Table II we can see that the States with the most instate training programs receiving state/local funds are: California (69 of the 122 areas), Arizona (68), Minnesota (66), Tennessee (61), Michigan (56), Utah (55), and Wisconsin (53). California supports training in the most areas. Other states may actually have more training, since a check in the survey box can represent one or more programs within a project area. However, our results show California supported the largest range of training topics with state and/or local funds. The mean average per state is 23.02 areas funded state/locally. Seven states/territories did not use state/local funds for training: DC, IN, MS, NH, OR, PR, and WV.

The most frequently funded training with state and local funds are in the following program areas:

Program Area		# of States
2a	Multijurisdictional Regional Task Forces	28
1a	D.A.R.E	26
3c	Special Narcotics Prosecutor	22
7k	Undercover Programs	23
7m	Highway Interdiction	23
4b	Neighborhood Watch	21
7f	Preserving the Crime Scene	21
7l	Surveillance Programs	21
3d	Drug Identification	20
7h	Drug Recognition Programs	20
18a	Domestic/Family Intervention	20
18b	Law Enforcement's Response to Domestic Violence	20

Table III examines formula grant funded training provided via BJA's Edward Byrne Memorial State and Local Law Enforcement Formula Grant Program. States using Formula funds the most are: Michigan (46 areas), Tennessee (42), Delaware (37), Virginia (36), Minnesota (35), and Massachusetts (33). Michigan uses formula funds

in more training areas than the other states. On average, 14.88 areas were formula funded in each state. New Hampshire was the only state that did not use any formula grants for training.

Formula funds are used the most in the following program areas:

Program Area   # of States

    1a   D.A.R.E. 35
    2a   Multijurisdictional Regional Task Forces 29
    2c   Special Narcotics Prosecutor 23
    9b   Asset Seizure and Forfeiture 18
    4e   Community-Based Policing 17
    7k   Undercover Programs 16
    8c   Specialized Narcotics Prosecution Unit 16
    3b   Clandestine Laboratories 15
    21a   Street Level Narcotics Enforcement 15
    3c   Marijuana Eradication 14
    7m   Highway Interdiction 14
    11d   Treatment in Correctional Facilities 14
    19a   Evaluation of Formula Funded Programs/Projects 14

In Table IV, we see that the states using other federal monies for training in the largest number of areas are: New Mexico (34 areas), Pennsylvania (32), Arizona (29), Tennessee (22), and Delaware (21). New Mexico had the largest number of training areas supported in this manner. On average, states used other federal monies in 6.90 areas. Ten states did not use any other federal funds(CT, DC, IN, MS, MO, NH, NJ, OH, OR, and PR).

States use other federal money for training purposes the most in these program areas:

Program Area		# of States
3c	Marijuana Eradication	19
2a	Multijurisdictional Regional Task Forces	18
1a	D.A.R.E.	13
9a	Financial Investigations	12
1b	School Based Programs	10
3d	Drug Identification	10
9b	Asset Seizure and Forfeiture	10
9c	Money Laundering	10
2b	Organized Crime/Narcotics Program	9
7j	Targeting Firearm Offenses	9

Thirty-six areas received no other federal funding for training programs instate.

Table V shows the States' individual totals for each funding source. It should be kept in mind that areas can receive funding from multiple sources. Therefore, the last column, "Total Number of Areas in State," may be less than the sum of the other three columns.

Section II Findings: Operational Programs Receiving Formula Grant Funding

The subject of Section II of the survey is operational programs receiving formula grant funding through BJA's Edward Byrne Memorial State and Local Law Enforcement Formula Grant Program. Table VI shows how many states presently provide and anticipate providing funds for operational programs in each of 21 Program Areas.

The largest concentrations of formula funds to operational programs, according to Table VII, are in the following areas:

Program Area		# of States
2a	Multijurisdictional Regional Task Forces	43
1a	D.A.R.E.	40
8c	Specialized Narcotics Prosecution Unit	30
11d	Treatment in Correctional Facilities	34
15d	Forensic Laboratory Enhancement	34
13a	Drug/Alcohol Treatment of Adult Offenders	33
2c	Special Narcotics Prosecutor	33
15e	Information Management System for Criminal Justice Agencies	29
21a	Street-Level Narcotics Enforcement	28

Operational programs receive formula grant funding in the greatest number of areas in Ohio (53), Michigan (49), South Carolina (46), Wisconsin (44), North Carolina (43), Virginia (42), and Florida (41). On average, 26.08 project areas currently receive formula grant funding for operational programs per state. The smallest number of project areas being formula funded by any state was five.

To see which states anticipate funding previously non-funded project areas see Table VIII. The most frequently identified project areas for which states anticipate providing formula grants funding are:

Program Area	# of States
16a Drug/Violent Crime Policy Planning	6
4f Violence Prevention	5
15h Establishing and Operating Intelligence Systems	5
18b Law Enforcement's Response to Domestic Violence	5
18d Crimes Against the Elderly	5
7n Targeting Violent Criminals	4
15f Automated Criminal History/Fingerprint ID/CJRI	4
18c Chile Abuse Prosecution	4
19a Evaluation of Formula Funded Program/Project	4

The greatest anticipation of formula grants for new operational areas is in the following states: Kentucky (21 areas), North Carolina (13), New Mexico (10), Alabama (9), Pennsylvania (8), and Washington (8). The average number of anticipated (new) project areas per state is 2.63. Twenty states do not plan to expand into new operational areas.

As you can see by comparing the figures in Table IX, many more project areas are currently receiving formula funds than new areas anticipating such funding in the future. As revealed above, Kentucky is the most ambitious state in its plans to expand.

Table VI

CURRENT AND ANTICIPATED FORMULA GRANT FUNDING
FOR OPERATIONAL PROGRAMS

BJA PROGRAM AREAS	Currently	Anticipated
1. Drug Abuse Prevention Involving Law Enforcement		
A. DARE	40	0

Section III Findings: Assistance Needed Through BJA T/TA Program

This section asks for judgment ratings of need from respondents in terms of four types of needs:

1. Technical Assistance for Program Development
2. Technical Assistance for Operation
3. Training
4. Information

These need types are discussed first in an aggregated measure, "Total Rank for All Four Need Types," and then each separately. Since ranks of need were specified on a 5-point scale, two indicators can assess the level of need. First, the "Number of States" specifying some need points out how many different states share that need. Secondly, "Total Rank" is calculated by adding the ranks that respondents assigned to a given area. A "Total Rank" can be as high as 245 (49 states by a high ranking of 5) for each of the four types of need.

OVERALL NEED

Considering all four types of need simultaneously, those areas of greatest need are:

Program Area		# of States
4e	Community-Based Policing	25
22e	Developing Evaluation Plans	25
7b	Juvenile Gangs/Drug Trafficking	23
2a	Multijurisdictional Regional Task Forces	22
19a	Evaluation of Formula Funded Projects	22
11d	Treatment in Correctional Facilities	20
22i	C.J.R.I. Plan	20
2d	Criminal Intelligence Systems	19
9a	Financial Investigations	19
9b	Asset Seizure and Forfeiture	19
13b	Treatment for Juvenile Offenders	19

The Total Rank for All Four Need Types can be as high as 980. This indicator shows that the most needful areas indicated by states are:

Program Area		Total Rank All 4 Need Types
4e	Community-Based Policing	334
22e	Developing Evaluation Plans	309
7b	Juvenile Gangs/Drug Trafficking	278
13b	Treatment for Juvenile Offenders	255
11d	Treatment in Correctional Facilities	241
19a	Evaluation of Formula Funded Projects	251
4f	Violence Prevention	235
15e	Information Management System for Criminal Justice Agencies	216
17a	Public Housing Development Enforcement	215
4g	Community Mobilization	206
13a	Treatment of Adult Offenders	204
22g	GMIS Development	201

Community-Based Policing (4e) is the highest ranking project area in both lists.

In summary, 43 states had some training needs, 40 had operational technical assistance needs, 39 had program development technical assistance needs, and 36 had information needs. These figures are based on the number of states showing some amount of need for any of the types. Conversely, six states had no training needs, nine states had no operational programming needs, 10 states had no program developmental needs, and 13 states had no information needs. North Dakota, Vermont, Washington, and Wyoming had no needs across all four types.

Looking at the Total Ranks assigned, Information Needs were the greatest nationwide (3,951 out of a possible 33,075 = 135 areas x 5 rank score x 49 states), followed by Training Needs (3,232), Program Development Technical Assistance Needs (2,740), and Operational Technical Assistance Needs (2,481). In terms of Total Ranks, Delaware consistently expressed the greatest need across all four types of assistance. (See Table XIV.)

The above information comes from TABLE X, "Assistance Needed Through BJA T/TA Program By Program Area and Type of Need." Probably of more interest, though, are measures for each of the four individual types of need. TABLES XI and XII present information on how individual states responded to these needs items arranged by Program Areas.

One will notice that the same Program Areas (22e, 4e, 7b, 11d, and 13b) keep reappearing in the top ten percent when they are arranged in descending order. These listings appear on the following pages. The Program Areas "Evaluation of Formula Funded Programs/Projects (19a)" appears in all but one list, and "Violence Prevention (4f)" appears in all but two lists.

"Number of Areas Needing Assistance by State and Need Type," Table XIII, provides an overview of individual state responses.

PROGRAM DEVELOPMENT TECHNICAL ASSISTANCE NEEDS

For Program Development the 11 areas of greatest technical assistance need, according to number of states indicating need are:

Program Area		# of States
22e	Developing Evaluation Plans	19
4e	Community-Based Policing	17
7b	Juvenile Gangs/Drug Trafficking	15
15f	Automated Criminal History/Fingerprint ID/CJRI	14
11d	Treatment in Correctional Facilities	14
4f	Violence Prevention	13
13b	Treatment for Juvenile Offenders	13
13c	Treatment Aftercare Services	12
22a	Identifying Jurisdictions with Greatest Need	12
22b	Developing a Statewide Strategy	12
22i	C.J.R.I. Plan	12

The ten highest ranked program areas are:

Program Area		Total Rank
22e	Developing Evaluation Plans	82
19a	Evaluation of Formula Funded Projects	76
4e	Community-Based Policing	74
4f	Violence Prevention	58
13b	Treatment for Juvenile Offenders	57
7b	Juvenile Gangs/Drug Trafficking	56
15f	Automated Criminal History/Fingerprint ID/CJRI	55
11d	Treatment in Correctional Facilities	55
22i	C.J.R.I. Plan	53
13c	Treatment Aftercare Services	49

The two lists show an extreme amount of overlap, including Developing Evaluation Plans (22e) at the top of both lists. Identifying Jurisdictions with Greatest Need (22a) is specified by 12 states who did not rank it high enough to appear on the latter list. On the other hand, Evaluation of Formula Funded Programs (19a) is noted by fewer states, 11 of them, who ranked it as of greater need.

States indicating Program Development technical assistance needs in the largest number of areas are: Tennessee (65 areas), Delaware (61), Wisconsin (49), Kentucky (47), and Massachusetts (46). Nationwide the average number of areas with this need was 15.49 per state. Ten states have no needs of this type.

OPERATIONAL TECHNICAL ASSISTANCE NEEDS

The program areas where the most States need Operational technical assistance are:

Program Area		# of States
22e	Developing Evaluation Plans	17
4e	Community-Based Policing	16
19a	Evaluation of Formula Funded Projects	14
11d	Treatment in Correctional Facilities	15
8c	Specialized Narcotics Prosecution Unit	12
2a	Multijurisdictional Regional Task Forces	14
4f	Violence Prevention	13
13b	Treatment for Juvenile Offenders	13
7b	Juvenile Gangs/Drug Trafficking	14
4g	Community Mobilization	12
22i	C.J.R.I. Plan	12
13a	Treatment of Adult Offenders	12

Looking at the ranking points, the top ten program areas needing Operational technical assistance are:

Program Area		Total Rank
22e	Developing Evaluation Plans	82
4e	Community-Based Policing	67
19a	Evaluation of Formula Funded Projects	62
11d	Treatment in Correctional Facilities	59
4f	Violence Prevention	56
13b	Treatment for Juvenile Offenders	56
7b	Juvenile Gangs/Drug Trafficking	52
4g	Community Mobilization	52
22i	C.J.R.I. Plan	51
13a	Treatment of Adult Offenders	48

All areas in the list based on "Total Ranks" are also in the former list based on "Number of States."

States indicating Operational needs in the largest number of areas are: Tennessee (66 areas), Delaware (61), Wisconsin (50), Georgia (43), Rhode Island (43), and Massachusetts (42). Nationwide the average number of areas with this need was 14.25 per state. Nine states showed no need for operational technical assistance.

TRAINING NEEDS

Training is most needed by the states in the following eleven program areas:

Program Area		# of States
4e	Community-Based Policing	20
7b	Juvenile Gangs/Drug Trafficking	19
2a	Multijurisdictional Regional Task Forces	18
9a	Financial Investigations	17
11d	Treatment in Correctional Facilities	17
19a	Evaluation of Formula Funded Projects	16
13b	Treatment for Juvenile Offenders	16
9b	Asset Seizure and Forfeiture	15
8c	Specialized Narcotics Prosecution Unit	15
22e	Developing Evaluation Plans	14
4f	Violence Prevention	14

According to ranks given, the ten greatest training needs are in:

Program Area		Total Rank
4e	Community-Based Policing	85
7b	Juvenile Gangs/Drug Trafficking	81
19a	Evaluation of Formula Funded Projects	73
13b	Treatment for Juvenile Offenders	66
9a	Financial Investigations	63
11d	Treatment in Correctional Facilities	63
22e	Developing Evaluation Plans	61
4f	Violence Prevention	61
2a	Multijurisdictional Regional Task Forces	58
9b	Asset Seizure and Forfeiture	57

States indicating Training needs in the largest number of areas are: Tennessee (66 areas), Delaware (62), Massachusetts (46), Rhode Island (45), Georgia (44), and Iowa (44). Nationwide the average number of areas with this need was 17.29 per state. Six states indicated no training needs.

INFORMATION NEEDS

States need information most in the following areas:

Program Area		# of States
4e	Community-Based Policing	20
7b	Juvenile Gangs/Drug Trafficking	20
15e	Information Management System for Criminal Justice Agencies	17
19a	Evaluation of Formula Funded Projects	16
13b	Treatment for Juvenile Offenders	16
11d	Treatment in Correctional Facilities	15
22i	C.J.R.I. Plan	15
22e	Developing Evaluation Plans	15
13c	Treatment Aftercare Services	14
22c	Coordinating Various Funding Sources	14
13a	Treatment of Adult Offenders	14
4g	Community Mobilization	14
11c	Treatment In A Jail Setting	14

Greatest Information Needs according to ranks assigned are:

Program Areas		Total Rank
4e	Community-Based Policing	90
7b	Juvenile Gangs/Drug Trafficking	89
19a	Evaluation of Formula Funded Projects	74
15e	Information Management System for Criminal Justice Agencies	74
13b	Treatment for Juvenile Offenders	70
22i	C.J.R.I. Plan	69
22e	Developing Evaluation Plans	67
4g	Community Mobilization	64
11d	Treatment in Correctional Facilities	62
22i	Statute for HIV Testing	61

States indicating Information needs in the largest number of areas are: New Mexico (71 areas), Tennessee (66), Delaware (62), Rhode Island (53), and North Carolina (49). Nationwide the average number of areas with this need was 19.47 per state. Ten states expressed no information needs.

SURVEY FORM

STATE'S TRAINING AND TECHNICAL ASSISTANCE NEEDS ASSESSMENT SURVEY

GENERAL INFORMATION

STATE _____   NAME OF AGENCY _____

ADDRESS OF AGENCY _____

NAME OF PERSON COMPLETING SURVEY _____ PHONE NUMBER _____

Please return survey no later than [Date] to:

Community Research Associates, Inc.
2919 Valmont Road, Suite 206
Boulder, Colorado 80301

PURPOSE OF SURVEY:

This survey is designed to identify those state and local training and technical assistance (T/TA) needs which jurisdictions face in implementing the Crime Control and System Improvement Formula Grant Program. The results of the survey will assist BJA in targeting and matching resources to those programs being developed and implemented through statewide strategies for preventing and combating drug-related crime, crimes of violence, and those programs designed to improve the function of state and local criminal justice. To ensure that T/TA resources are focused on local issues, BJA is requesting states to identify the programmatic needs associated with the 21 authorized program areas as well as the administrative needs related to administering the formula grant program. The results of this survey will guide the development of a comprehensive training and technical assistance plan for 1993.

1

INSTRUCTIONS

Please complete the general information section above and the following survey. Check marks should be placed in the correct boxes in Sections I and II, columns (a) through (e). If your answer is "no" to a particular survey question, leave the box blank. Section III should be answered by placing number 1 through 5 on the proper line for that question. Prioritize your answers with number 5 displaying the greatest need and number 1 the least. You should mark all that apply, however, if you have no need for the assistance represented by any question in columns (f) through (i) in Section III, leave that particular line blank.

DEFINITIONS

Technical assistance (TA): The provision of specialized short term consultation as a means of resolving a specific problem for a state or local justice, correction, or related system.

Training (T): Used to enhance recipient knowledge of justice, corrections, and drug related issues via workshop or conference settings.

Information: Refers to materials assembled on a specific topic to increase a user's understanding of the topic and related issues.

Definitions of the major headings contained within the column on BJA Program Areas can be found in the Formula Grant Program Guidance and Application Kit, issued last year by BJA.

Technical assistance for *program development and planning,* as referred to in Section III(f), is that needed to assist your agency or another agency with any aspect of planning, designing, or developing a program.

Technical assistance for operations, referred to in Section III(g), is that needed to assist on issues related to implementing a previously designed program or improving a program currently being conducted.

References to Formula Funds or Formula Grant Funding in the survey mean monies provided via the Bureau of Justice Assistances' Edward Byrne Memorial State and Local Law Enforcement Formula Grant Program. These funds are administered by a designated state agency and passed through to state and local agencies.

BJA PROGRAM AREAS	I. TRAINING CURRENTLY PROVIDED IN-STATE			II. OPERATIONAL PROGRAMS RECEIVING FORMULA GRANT FUNDING		III. ASSISTANCE NEEDED THROUGH BJA T/TA PROGRAM Rank each area 1 through 5 according to need, with 5 being the greatest (leave blank if assistance not needed)

U.S. Department of Justice
Office of Justice Programs
Bureau of Justice Assistance

Washington, D.C. 20531

2 1SEP 1992

Mr. Bill Martin
Governor's Justice Commission
222 Quaker Lane, Suite 100
Warwick, Rhode Island 02893

Dear Mr. Martin: *Bill*

As you are well aware, the State and Local Assistance Division (SLAD) within the Bureau of Justice Assistance has the responsibility of implementing the Edward Byrne Memorial State and Local Law Enforcement Assistance formula grant program authorized by the Anti-Drug Abuse Act of 1988. As such, SLAD manages the formula grant program and a State and Local Training and Technical Assistance (T/TA) Program which provides technical resources to state and local jurisdictions. Both the formula grant and the T/TA programs are to assist state and local units of government to control drug-related crime and serious offenders. The BJA's State and Local Assistance Division is implementing the T/TA program through a cooperative agreement with Community Research Associates (CRA).

The training and technical assistance available through BJA and CRA is designed to assist states in implementing both the administrative and programmatic requirements of the formula grant program. To ensure that T/TA resources are properly targeted to meet specific state and local needs, BJA is conducting a Training and Technical Assistance Needs Assessment Survey to identify those needs which are considered most important by the states. To assist BJA in developing appropriate T/TA resources to focus on state and local issues, BJA is requesting states to identify the programmatic needs associated with the 21 authorized program areas as well as the administrative needs related to administering the formula grant program. The results of the survey will be used to target and match T/TA resources to those programs being developed and implemented through statewide strategies for preventing and combating drug-related crime, crimes of violence, and those programs designed to improve the function of state and local criminal justice.

The enclosed survey "package" contains a front sheet requesting general information as well as a page on instructions and definitions. Completion of the general information section is necessary to identify the source of the survey information. While the survey is not a method by which the states may request training, technical assistance or information, such requests or other inquiries may be made by contacting your respective Branch Chief within the BJA's State and Local Assistance Division.

Please return the surveys to CRA's Western Office at the following address:

Community Research Associates
2919 Valmont Road, Suite 206
Boulder, Colorado 80301
303/443-9770

Once the surveys are returned, a needs assessment will be conducted to guide the development of training and technical assistance plan for calendar year 1993. The results of this assessment and, ideally, the proposed 1993 training and technical assistance plan will be presented at the BJA annual state conference in San Antonio, Texas, scheduled for December 2-5, 1992.

Your response should be submitted to CRA no later than October 9, 1992. If you have any questions, please contact your SLAD Branch Chief.

Thank you for your assistance.

Sincerely,

Andrew T. Mitchell
Acting Director
State and Local Assistance Division

Enclosure
