## ACKNOWLEDGMENTS

The Department of Juvenile Justice wishes to acknowledge the contributions made by the following parties in the production of this report:

Vicki Dritsos, Scott Boudet, Abbas Darabi, Steven Walters-Chapman, Julia Blankenship, Paula Polhill, Carlos Martinez, Tony Dewees for authoring sections of this report and computer programming.

The Department of Corrections for supplying information to make the recidivism analysis of this document more complete.

Tom Scott, Nathan Epps, Liz Cass, Jacquelyn Thomas, Jenease McCree, Sharon Jenkins, Karen Turner and Cindy McNeely for their expert proofing, editing and guidance.

John Trott for technical assistance with data from the Florida Assessment Classification and Tracking System (FACTS).

Tim Sadberry for his analysis of program expenditure data and interpretation of SAMAS runs.

John Buckley and Debbie McAlpin for their continuing management information systems application and programming support.

Ted Tollett for his thoughtful, continuing support and encouragement.

Calvin Ross, Woodrow Harper, George Hinchliffe and David Smith for their commitment to integrity and quality and their belief in the department's responsibility to produce this document.

O.B. Stander and Pamala Dulin from the Associated Marine Institutes; Chris Card and JoAnn Harrell from the Florida Network; Roberta Rubin and Pat Fried from Eckerd Family Youth Alternatives; and other contracted providers who worked with outcome evaluation staff and shared data from their respective data systems.

The juvenile justice staff for providing data, interpretation, information and comments; the many juvenile justice administrative management staff who were called upon to supply information and to review products, for their tolerance and prompt response; and the direct service staff and contractual providers for their help with supplying and interpreting information.

The Florida Legislature for their wisdom in creating the Juvenile Justice Outcome Report through legislation and for their continued interest in outcome evaluation and quality assurance.

## **EXECUTIVE SUMMARY**

### **DJJ OUTCOME EVALUATION REPORT FOR FY 1993-94**

The Department of Juvenile Justice (DJJ) Bureau of Research and Data assessed the results of the services the department provided or purchased during FY 1993-94. There were more than 300,000 service initiations in delinquency programs during the year. This process of assessing the results of our programs is known as outcome evaluation. The status report which presents this outcome assessment is unique in the nation, first, for its focus on following up on outcomes for clients and, second, for its comprehensive scope. This outcome evaluation system was established under a far-reaching mandate by the Florida Legislature in 1986. No other state is able to provide as complete a picture of results across such a broad spectrum of services offered, though a number of states are moving in this direction.

This is the second time the Department of Juvenile Justice has prepared the Outcome Evaluation Report. The Department continues to make progress in both measuring outcomes and in supplying more of the outcome information. For each of the 16 separate program groupings or components in three general areas (CINS/FINS, Prevention and Diversion, and Juvenile Justice programs), the report examines two major outcomes: successful program completion and subsequent involvement with the juvenile or criminal justice systems. Each of these components are defined according to the nature and intent of the services provided by a particular program. Where programs address similar concerns, similar outcomes are measured to provide comparisons. For many programs, additional program-specific outcomes are also measured.

The scope of the outcome evaluation effort is enormous. There are 16 major program components, which can be broken down into individual programs, presented in this volume. If all of the individual programs, at all of the facilities, in each of the 15 districts are counted separately, both descriptive and outcome information for more than 275 program sites are provided in this report.

The information reported here comes from a variety of sources. Most important is the HRS Client Information System (CIS), which currently provides a unified database for most DJJ programs. Without such a system, the kind of follow-up required for outcome evaluation would not be possible. In addition, outcome data come from several microcomputer-based information systems and from manual systems. Some of the information on contracted programs comes from annual reports produced by providers. Information from over 25 such reports was incorporated into this year's outcome report. Follow-up information on subsequent placement on adult probation or in prison was obtained through the cooperation of the Florida Department of Corrections.

This FY 1993-94 report describes programs and the progress they have made toward realizing their intended outcomes for the youth they served. It contains background information on outcome evaluation, the array of delinquency programs and a statistical description of the

population that enters the system through Intake. The introduction (Chapter I) is where the statistical description of the population that enters the system through Intake can be found.

Following the introduction is individual evaluations for each of the 16 program components which provided services within three program areas in FY 1993-94:

Children in Need of Services/Families in Need of Services (CINS/FINS)  
Prevention and Diversion Services  
Juvenile Justice Programs

The report addresses two additional questions: What are our programs doing for children and youth over time? What can we do to improve both outcome results for our clients and the knowledge base needed to produce information about the results?

A general recommendation is made for each program component. In addition for some programs, more specific recommendations at the level of individual programs or providers are included. In certain cases, we have identified questions to be addressed.

Regular monitoring of performance for each program component improves and expands each year, and we are able to provide a more complete picture of our programs.

## Definitions of Recommendation Categories

Each recommendation points to a general course of action to be completed or initiated during FY 1994-95. The recommendations are explained below:

**PROGRAM EXPANSION** - Indicated when there is a need to provide services to more clients or to other areas of service after program effectiveness has been demonstrated and the need clearly established.

**PROGRAM IMPROVEMENT** - Indicated when evaluation results show that changes in operations or additional resources are needed to implement the program as intended.

This recommendation is also made when further development of a measurement system to determine program effectiveness is needed.

**PROGRAM MODIFICATION** - Indicated when there are problems with the design of the program which require change before the program can be effective. A recommendation for program modification may indicate a need for a major restructuring of the program.

Program modification can also be recommended when combining a successful program with another would allow for a more efficient deployment of resources or improve the second program. In addition, because many of the functions of DJJ programs are mandated by state or federal law, a program modification recommendation must sometimes substitute for a recommendation to eliminate a program.

**PROGRAM MAINTENANCE** - Indicated when services are shown to be effective without expansion, improvements or modification; also indicated when a program is new and information is as yet insufficient to determine effectiveness.

**PROGRAM ELIMINATION** - Indicated when a program has clearly demonstrated its ineffectiveness or when program dollars could be channeled to services which are more effective.

Within the program component structure of this report, recommendations to eliminate programs are often best targeted toward specific programs or contracts, rather than the entire program component.

Under each of these broad recommendations, more specific courses of action are often recommended. For example, not only do we recommend program improvement, but we also describe the particular improvements that are needed.

## **A Brief Description of the Population Served**

This chapter is a brief description of the population served by juvenile justice programs for FY 1993-94 and previous years. This chapter describes the population of youth received by race, gender and type of offense charges. The number of youth served in the juvenile justice system represent approximately 121 per 1,000 youth between the ages of 10-17. The number of cases received during FY 1993-94 was 156,286, as compared to 141,013 in FY 1992-93. There has been a 115.1 percent increase in cases received since FY 1982-83, compared to a 10.3 percent increase in the age 10-17 population. Of the 156,286 cases received during 1993-94, 89,847 (57.5 percent) were handled non-judicially, 59,147 (37.8 percent) were handled judicially, while 7,292 (4.7 percent) had not yet been disposed. A total of 26,206 were diverted through JASP (Juvenile Alternative Services Program) both judicially and non-judicially, and 27,371 cases were referred to Community Control. Commitments to delinquency commitment programs resulted in 8,168 cases.

The most serious offense is selected from all charges for each case and it alone is used in the summary tables. The categories of most serious offense charged against youth in FY 1993-94 were summarized as follows: Felony - 62,904 (40.2 percent); Misdemeanor - 76,540 (49 percent); and "Other Delinquency Offense" - 16,482 (10.8 percent). The "other delinquency offense" category includes referrals for prosecutions previously deferred (25.5 percent), non-law violations of community control and furlough (34.8 percent), cases reopened (20.9 percent), transfers from another county (9.2 percent), contempt of court (6.5 percent), and interstate compact cases, violations of local ordinances, felony traffic, and other traffic (totaling 3.1 percent).

The felony category of 62,904 cases received consists of burglary (33.6 percent), auto theft (13.1 percent), aggravated assault/battery (12.8 percent), felony drug or felony marijuana (6.7 percent), grand theft (6.5 percent), armed robbery or other robbery (6.2 percent), sexual battery or other felony sex offense (2.6 percent), concealed firearm (2.1 percent), all other felony charges including attempted murder or murder/manslaughter, arson, dealing in stolen property, forgery/uttering, escape, resisting arrest with violence, and shooting/throwing deadly missile (9.2 percent), and "other" felony (7.2 percent).

The misdemeanor category of 76,540 cases received consists of shoplifting (28.9 percent), assault/battery (20.6 percent), trespassing (9.9 percent), petit theft (8.2 percent), vandalism (6.3 percent), misdemeanor marijuana or other misdemeanor drug offense (5.7 percent), loitering/prowling (3.6 percent), possession of alcohol or other alcohol related offenses (3.4 percent), disorderly conduct (3.4 percent), other misdemeanor offenses including prostitution, misdemeanor sex, dealing in stolen property less than \$100, concealed weapon, violation of game laws, resisting arrest without violence, and unauthorized use of a motor vehicle (4.8 percent), and "other" misdemeanor (5.2 percent).

The number of individual youth received during FY 1993-94 was 93,141. These are the youth who accounted for the 156,286 cases. The largest age group of youth referred were 17 years old (22.3 percent), followed by 16 year olds (20.5 percent), 15 year olds (17.6 percent), 14 years old (13.6 percent), 13 years old (9.1 percent), and 18+ years old (6.4 percent). Those under 13 years old made up 10.5 percent of the youth referred. The race of youth were 59.1 percent white, 39.2 percent black and 0.7 percent other. The gender was 75.4 percent male and 24.6 percent female. The race by gender groups were white males (44.5 percent), black males (28.7 percent),

white females (15.0 percent), black females (10.6 percent) and other male and other female (0.5 percent) with 0.7 percent being unknown.

The programs or services which are grouped by CINS/FINS, Prevention/Diversion, and Juvenile Justice programs, as summarized below:

### **Chapter 1 - CINS/FINS (Children in Need of Services/Families in Need of Services)**

This statewide program for status offenders was initiated in 1975. Each district contracts separately for services, and under a separate contract at the state level, the Florida Network of Youth and Family Services provides coordination, training, public awareness, a hotline, a central data system, and quality assurance. Services at the district level include:

- temporary residential care
- non-residential and family counseling services
- prevention/outreach services

Service centers operate in all districts and are funded by both state funds and private donations. Every center provides a shelter, and most provide individual, group and family counseling. Referrals come from HRS, law enforcement, other social service agencies, and families. All shelters accept walk-ins.

CINS/FINS services were provided to 17,486 youth in FY 1993-94, with 9,207 (52.7 percent) in residential care and 8,143 (46.6 percent) in a non-residential setting, with 0.7 percent not reported. Over half of the youth served were white males and females, average age 14 years, who had very little prior involvement with dependency or delinquency (97.1 percent). Most referrals were for the status offenses of "beyond control" and "runaway" for youth who were mainly living at home. The average length of stay for residential care for FY 1993-94 was 7.4 days, a reported increase of 32.6 percent from the previous fiscal year.

The success in reunifying youth with their families is reflected by the over 80 percent reunification rate for all types of services, which is the primary goal for CINS/FINS services. Over 80 percent of a sample of youth that had received services were still in their homes six months following services. A satisfaction survey completed by both youth and parents indicated a high level of overall satisfaction with services provided.

With the addition of more centralized intake facilities throughout the state, along with more complete data collection processes, CINS/FINS services should continue to be a successful way to serve its intended population and maintain youth with their families.

1994 Report Recommendation - Program Improvement.

## **Chapter 2 - Hurricane Island Outward Bound**

This contracted program was initiated in 1983. Located in Titusville, the program serves youth from Hillsborough, Pinellas, Polk, Osceola, Brevard, Orange, Seminole and Volusia counties. Services include out-of-home placement for status offenders. The program provides rehabilitation through a strict physical regimen to instill self-discipline and confidence. An 18-day wilderness course, a 10-day intensive follow-up with clients and families, and completion of a community service project are required.

This program served 143 youth in FY 1993-94, the great majority of whom were 15 year old white males. Black youth decreased from 8.4 percent in FY 1992-93 to 2.8 percent, although the number of Hispanic youth served continues to rise. Only slightly more than 50 percent of youth were at the appropriate grade level, with 42 percent having failed at least one year in school.

Only 76 percent successfully completed the program in FY 1993-94, as compared 85.4 percent in FY 92-93 and 90 percent in FY 1991-92. However, nearly 90 percent of youth, in FY 1993-94, had no further delinquency referrals in the year following services.

1994 Report Recommendation - Program Improvement.

## **Chapter 3 - P.A.C.E. (Practical and Cultural Education) Center for Girls**

Initiated in 1985, this contracted program provides non-residential educational and supportive social services to females aged 12 to 18 in Duval, Dade, Broward, Manatee, Orange, Leon and Escambia Counties. Most of the girls are status offenders and the remainder are referred for delinquency, dependency or as school dropouts. Services include:

- individual treatment plans containing short and long term educational, social and personal goals
- group and individual counseling
- accredited school program which includes remedial, high school credit, G.E.D., and college preparation courses
- life management classes
- community service projects

P.A.C.E. programs served 491 youth in FY 1993-94, a significant increase because of the introduction of six new sites in the state (Dade, Broward, Manatee, Orange, Leon and Escambia). Youth served were all females, 57 percent white and averaged 16 years age.

Of the programs reporting, 68 percent of the students completed all requirements of the program and were discharged favorably, and 61 percent improved their academic functioning intended to lead to the completion of their high school education. This is an increase in academic improvement from the previous year, even though six of the seven sites were in their first year of operation. P.A.C.E. centers continue to be a cost effective and highly successful program for young women who, for a variety of reasons, were not succeeding in regular school settings.

1994 Report Recommendation - Program Expansion.

#### **Chapter 4 - Intensive Learning Alternatives Program (ILAP - District 6)**

This is a joint program with the Hillsborough County School system that was initiated in 1977. "Back to Basics" education is provided in middle school classrooms limited to 18 students. Counselors provide group counseling, social skills education, and work with families. This program operates in 22 middle schools in Hillsborough county.

ILAP served 968 youth in FY 1993-94, with an average age of 14 years old, with the majority (55.5 percent) being males. Nearly two-thirds had repeated one or more grades and had also not received any reported dependency or delinquency involvement. The extent of minority involvement in the program has increased from 26 percent in FY 1988-89 to 41 percent this year.

An average of 7.1 field or home contacts per youth were made by counselors this year, including contacts outside the school setting. This represented a decrease of 3.2 contacts from the previous fiscal year. Slightly over half of the students completed the program, with the remaining students either being "partially successful" or transferred to alternative educational settings. Both delinquency and abuse referrals were reduced for these youth, as were academic problems such as absenteeism and suspensions. Delinquency referrals were reduced by 54.1 percent, and referrals for abuse or neglect were reduced by 76.9 percent compared to the year prior to admission to the program. Grade point averages rose from 1.3 to 2.1 on a four point scale. This performance shows a need for this type of program to be expanded outside of Hillsborough county.

1994 Report Recommendation - Program Expansion.

#### **Chapter 5 - Juvenile Alternative Services Program (JASP)**

Begun as a pilot project in 1979 and expanded statewide in 1981, JASP services are contracted to provide alternatives to handling juvenile offenders judicially. Youth receive individual plans, developed and supervised by a counselor. The plan includes service goals (such as community services or restitution) and treatment goals (such as individual or family counseling). If a youth does not fulfill a plan, the state attorney decides whether or not to seek a petition for court action.

JASP served 49,899 cases during FY 1993-94. The population was 63 percent white and 70 percent male, the majority being between 14 and 17 years old. The average length of services was nearly 3 months.

The utilization and disposition of JASP cases varies greatly by district. In some districts a relatively large percentage are placed judicially on JASP. In District 5, 10.7 percent were judicially placed, which is considerably higher than the statewide average of 4 percent. In other areas JASP is seldom utilized, as in District 12, with 5.5 percent of all cases disposed placed on JASP (statewide average for utilization being 17.3 percent). Statewide, only 65.3 percent successfully completed the program, a figure which continues to decrease, but the readjudication rate continues to be low, with 13.2 percent in FY 1993-94 being readjudicated in the year following services. The data show that JASP continues to be a viable alternative to judicial court placements if used properly as a diversion option.

1994 Report Recommendation - Program Improvement.

## **Chapter 6 - Eckerd Wilderness Camp Program**

These programs provide services to emotionally disturbed youth in an outdoor environment. There are five camps in Florida serving 50-60 youth each. Each camp is divided into grouped units of approximately 12 campers. An individual treatment plan is developed for each youth. As they accomplish the goals outlined in their individual treatment plan, they are moved from small therapy groups to transition groups. During the transitional phase youth are prepared to return to their families. Youth who successfully complete the program receive aftercare services.

This program served 529 youth in FY 1993-94, with the typical client being a 14 year old white male who had previously been living with one parent. Over 50 percent of admitted youth had previous delinquency adjudications. The average length of time spent in the program was 13.2 months.

Nearly 80 percent of the youth successfully completed the program and showed improved academic, psychological and social functioning. Less than 10 percent of youth released were placed in programs of equal or greater restrictiveness levels. These appear to be effective treatment programs.

1994 Report Recommendation - Program Maintenance.

## **Chapter 7 - Delinquency Intake**

This statewide program is state operated. The program receives all delinquency cases from law enforcement, makes assessments and recommends judicial or non-judicial handling to the state attorney. Intake counselors prepare pre-disposition reports and recommendations of sanctions or services; carry out preliminary screenings for alcohol, drug abuse or mental health problems; conduct suicide risk assessments; and perform detention screenings.

The Delinquency Intake System received 156,286 cases on 93,141 individual youth in FY 1993-94. This represents a 10.6 percent increase in the number of cases received from the previous fiscal year.

Slightly over 58 percent of cases disposed were handled judicially, with 37.8 percent handled non-judicially and the remaining 4.1 percent being sent to adult court. When examining Intake's recommendations versus state attorney and court action, the largest discrepancy was in youth being sent to adult court. Intake recommended such action for 0.8 percent of youth, while state attorneys recommended 5.4 percent. The number of cases received continues to grow in Florida, and although the number recommended for non-judicial handling continues to rise, so does the number being sent to adult court. The Intake process is part of the Case Management program and all costs and outcomes for Intake should be understood as a part of this service.

1994 Report Recommendation - Program Maintenance.

## **Chapter 8 - Home Detention**

This statewide, agency-operated program was implemented in 1974. The program is intended to provide structured home supervision for youth charged with delinquent acts who would otherwise be placed in secure detention.

In FY 1993-94, 15,845 youth were served by 144 counselors. This is a ratio of 7.6 clients per counselor, slightly higher than the recommended number of 7 clients per counselor. Males represented 83 percent of the clients, and minorities represented 50 percent. This proportion of minorities in home detention is higher than the Intake percentage of 39 percent minorities, but is comparable to the secure detention percentage of 52 percent.

Over 18 percent of youth served by home detention were returned to secure detention in FY 1993-94. Of this 18 percent, 2.7 percent were returned for failing to appear for court hearings and 3.7 percent were charged with a new law violation. Escambia county had the highest rate of return at 24.4 percent, while Duval county had the lowest with 2.7 percent. Home detention continues to be a more cost effective method of supervising youth than placing them in a secure setting while the clients await court action.

1994 Report Recommendation - Program Expansion.

## **Chapter 9 - Secure Detention**

This program operates 20 regional detention centers statewide. All are state operated. Secure detention has been a state responsibility since 1973. Secure detention provides custodial care to ensure public safety and guarantee youth detained are available for scheduled court hearings.

There were 35,499 admissions to secure detention in FY 1993-94. The total number served was 42,297, with 19,304 releases. The average age was 15.8 years with black youth comprising 52.3 percent of the population and males representing 83.2 percent. The average time spent in the program was 12.6 days. While the program continues to be over-utilized state-wide, the centers remain understaffed.

There were only 37 escapes from secure detention in FY 1993-94, which is less than 1 percent of the youth served. The number of client on client assaults and client on staff assaults decreased from the previous fiscal year. This program continues to offer a safe, secure setting for youth who have met criteria for admission.

1994 Report Recommendation - Program Expansion.

## **Chapter 10 - Community Control**

These probation type services are provided to delinquent youth under supervision in the community and as an alternative to commitment. This program served 33,533 youth for an average of 8.3 months in FY 1993-94. The youth served consisted of 81 percent males and 60 percent white youth. They averaged 16.6 years of age. Of those released, 80 percent successfully completed the program. District 15 had the lowest successful completion

percentage with 58.6 percent, while District 10 had the highest with 87.3 percent. The 20 percent unsuccessful either violated their community control, received a new law violation, were sent to the adult system, or absconded.

Statewide, only 19 percent of youth were readjudicated in the year following their release. Almost 10 percent were recommitted to juvenile justice or placed in the adult system in the year following their release. This program is part of the Case Management system and all costs and figures should be understood as part of this service until expenditures are broken out separately in the information system.

1994 Report Recommendation - Program Maintenance.

### **Chapter 11 - CREST Services**

Operated in District 3 on a contractual basis, this program was initiated in 1973. The CREST program provides supplemental individual family and group counseling to clients on Community Control. Counseling costs are kept low by the use of University of Florida graduate student interns.

This program served 270 clients in FY 1993-94. The clients were 50 percent black, 81 percent male and averaged 15.2 years of age. These clients received individual, group and family counseling as part of their services.

According to the CREST annual report, of 80 clients tracked in the year following their release, 13.7 percent were charged with a new law violation and 11 percent were committed. In response to a survey, 88 percent of the clients served found CREST services worthwhile. The Jesness Inventory instrument indicated that nearly all clients felt they had a better outlook on life and experienced positive change. Because of the type of services offered and positive results CREST appears to be serving its clients effectively.

1994 Report Recommendation - Program Expansion.

### **Chapter 12 - Non-residential Community-Based Commitment Programs (Level 2)**

This category of commitment programs allows youth to remain in their own homes while participating in a structured program during the day or being subject to intense supervision. There are four programs: Associated Marine Institutes (AMI), a contracted program available at 17 sites; the now closed, Treatment Alternatives for Youth (TRY) Centers, a department operated program which was available at three sites; Special Intensive Groups (SIG), a counseling program, department-operated statewide; and Intensive Non-residential Work Programs.

In level 2 programs, there were 3,474 committed youth served during 1993-94, with an average daily population of 564.5. The average age of youth served was 16 years old. Males comprised 86 percent of the population and blacks 52.8 percent. Seventy percent of youth were admitted as

first commitments and youth averaged 2.8 prior felony adjudications. Fifty percent of youth released successfully completed their programs, with 16.8 percent unsuccessful. The remainder were either transferred or released for other reasons. The overall readjudication rate for youth one year following their release was 30.2 percent. Statewide, 8.7 percent of clients absconded from their programs during the year.

1994 Report Recommendation - Program Improvement.

### **Chapter 13 - Low Risk Residential Community-Based Commitment Programs (Level 4)**

There are a variety of low risk residential, community-based commitment programs, both agency-operated and contracted. They are located throughout the state. They serve delinquent youth committed by the courts who do not need a moderate risk residential program or the more restrictive institutional placement of a training school or serious offender program. Low risk residential programs are designed primarily for first commitment placements, although some with prior placements are also included.

The programs in this category are:

- Short-Term Offender Program (STOP) Camps
- Short-Term Elective Programs (STEP) Family Group Homes
- Group Treatment Homes
- Wilderness Camp

In level 4 programs, there were 1,693 committed youth served during 1993-94, with an average daily population of 251.6. The average age of youth served was 15.7 years old. Males comprised 92 percent and minorities 48.8 percent of the population. The average length of stay varied from 1 to 4 months, with a statewide average of 1.9 months. Sixty-eight percent of youth were admitted as a first commitment and each youth averaged 3.0 prior felony adjudications. Transfers accounted for 14.8 percent of all admissions.

Eighty percent of youth released had successfully completed their programs, with 8.9 percent unsuccessful. The remainder were either transferred or released for other reasons. The overall readjudication rate for youth one year following their release was 54.3 percent. Statewide, 7.9 percent of clients absconded from level 4 programs during the year.

1994 Report Recommendation - Program Maintenance.

## **Chapter 14 Moderate Risk Residential Community-Based Commitment Programs (Level 6)**

There are a variety of moderate risk residential, community-based commitment programs, both agency-operated and contracted, located throughout the state. They serve delinquent youth committed by the courts who do not need the more restrictive institutional placement of a training school or serious offender program. These programs were initiated in different years, beginning in 1968 with the first halfway house. The programs in this category are:

- Halfway Houses
- Short-Term Adolescent Rehabilitation Treatment (START) Centers
- Eckerd Youth Challenge North
- Crossroads Wilderness Institute
- Youth Environmental Services
- ATC Dual Diagnosis

In level 6 programs, there were 4,555 committed youth served during 1993-94, with an average daily population of 954.4. The average age of youth served was 16.2 years old. Males comprised 88 percent and minorities made up 52.2 percent of the population. The average length of stay varied from 3 to 4.5 months, with a statewide average of 3.7 months. Forty percent of youth were admitted as first commitments, and each youth averaged 4.7 prior felony adjudications. Recommitments totaled 34.4 percent and transfers accounted for 24.7 percent of all admissions.

Fifty five percent of youth released had successfully completed their programs, and 6.3 percent were unsuccessful. The remainder were either transferred or released for other reasons. The overall readjudication rate for youth one year following their release was 40.8 percent. Statewide, 6.7 percent of clients absconded from level 6 programs during the year, while 15 percent escaped. An escape is a criminal offense, legally defined as being absent from the program with the intention of not returning.

1994 Report Recommendation - Program Improvement.

## **Chapter 15 High Risk Residential Programs (Level 8)**

These programs operate to serve the most serious and chronic offenders statewide. They are a mixture of department-run and contracted programs. They include:

- Arthur G. Dozier Training School
- Eckerd Youth Development Center (Training School)
- Intensive Halfway Houses
- Florida Environmental Institute (FEI)
- Florida Augustus Secure Care Unit (FASCU)
- Palm Beach Youth Center (PBYC)
- Hillsborough Alternative Residential Program (HARP)
- Hillsborough SHOP

- Green Oaks SHOP
- The Center for Drug Free Living
- Broward Control Treatment Center (BCTC)
- Elaine Gordon Treatment Center
- Boot Camps

All of these programs provide residential care for serious offenders at the highest level of security. Through a variety of treatment modalities which assist personal development and self-awareness, these programs attempt to reduce delinquent acts and increase self-sufficiency.

In level 8 programs, there were 1,551 committed youth served during 1993-94, with an average daily population of 540.3. The average age of youth served was 16.5 years old. Males comprised 96.1 percent and minorities made up 64.3 percent of the population. The average length of stay varied from 3 months to 27 months, with a statewide average of 5.1 months. Twenty-one percent of youth were admitted as first commitments, and each youth averaged 8.2 prior felony adjudications. Recommitments totaled 58.4 percent and transfers accounted for 20.1 percent of all admissions.

Sixty percent of youth released successfully completed their programs, with 8.8 percent unsuccessful. The remainder were either transferred or released for other reasons. The overall readjudication rate for youth one year following their release was 37.6 percent. Statewide, 5 percent of clients escaped from level 8 programs during the year. An escape is a criminal offense, legally defined as being absent from the program with the intention of not returning. An abscond is an unexcused absence, but without the intention of not returning.

1994 Report Recommendation - Program Maintenance.

## Chapter 16 - Post-Placement Services

Post-Placement Services are designed to assist the adjustment of youth returning to the community from moderate to high risk residential programs. FEI, PBYC, FASCU, SCMI and Eckerd Youth Challenge all offer their own post placement services for youth who are released from those residential programs. AMI also offers their own intensive aftercare service known as SAFE. Other post-placement services are: (1) **Reentry**, which is designed only for youth returning from training schools and those who appear to require the intensive services that this component has to offer. (2) **Post-Commitment Community Control**, for which youth can be designated by the judge at the disposition hearing or at any time before the youth is released from their commitment program. (3) **Furlough**, whose clients have been committed by the circuit court to the department and are later released from a residential or non-residential commitment program.

In post-placement services, there were 3,222 youth served during FY 1993-94. Youth served had an average age of 16.6 years. Eighty-nine percent were male, and 60 percent were black. The average time spent in post-placement service was 4.4 months. Statewide, 53.3 percent of youth successfully completed their post-placement service, the 18.4 percent defined as unsuccessful being either recommitted or sent to the adult system. The remainder were either transferred or released for other reasons. There were 183 youth who absconded from their programs during the year, which represents 5.7 percent. The readjudication rate within one year following services

for reentry/aftercare was 38.6 percent. Post-commitment community control and furlough readjudications were 23.1 percent and 21.4 percent respectively. Because of the growing number of post-placement programs and the services provided by each, these services should continue to expand and improve.

1994 Report Recommendation - Program Maintenance.

## A DESCRIPTION OF THE POPULATION SERVED

There were an estimated 1,292,421 youth, aged 10-17, in Florida, as of April 1994.<sup>1</sup> This is considered the population "at risk" for juvenile justice programs. The Client Information System (CIS) recorded a total of 156,286 delinquency cases referred to the system through Intake for an alleged offense in FY 1993-94. This figure and the charts which are referred to in the remainder of this chapter came from ad hoc runs on the February 15, 1995 extract of the Delinquency and Dependency Referral (DDR) system portion of CIS. The total number of delinquency cases received represents 120.9 cases per 1,000 youth of the population at risk (age 10-17). This figure does not include youth who were served in the school-based prevention programs because they do not enter the service system through Intake.

Due to the length of time it takes to process and serve a youth in the juvenile justice system 7,292 of the 156,286 cases received in FY 1993-94 were not disposed of at the time of this extract. Of the 148,994 intake cases which were disposed in FY 1993-94, 89,847 were handled non-judicially and 59,147 were handled judicially. A total of 26,206 cases were disposed to JASP for diversion (this includes cases handled non-judicially and some judicial JASP cases) and 27,731 cases were disposed to Community Control. In FY 1993-94, 8,168 cases resulted in commitment to delinquency commitment programs.<sup>2</sup>

Table I-4 provides a breakdown of delinquency cases received by category of most serious charge (felony, misdemeanor and other delinquency). Table I-4 shows that for 49.0 percent of cases the most serious charge was a misdemeanor, for 40.2 percent the most serious charge was a felony, and for 10.8 percent it was "other delinquency" in FY 1993-94. These tables also provide historical data, dating back to FY 1982-83. The Florida population aged 10-17 increased by 10.3 percent over the twelve year period and the total number of delinquency cases received by HRS Intake during FY 1993-94 was 115.1 percent greater than the number received in FY 1982-83. There was a 107.6 percent increase in felony cases, a 101.2 percent increase in misdemeanor cases and a 289.1 percent increase in other delinquency cases received over the twelve year period.

Source: CIS (delinquency referral records received during FY 1993-94; extract date - February 15, 1995)

Tables I-6 and I-7 provide a breakdown of felony and misdemeanor cases by the most serious charge. The most frequent felony charge was burglary, which represented 21,137 cases or 33.6 percent of all felony cases in FY 1993-94. This was followed by auto theft (13.1 percent; 8,209 cases), and aggravated assault/battery (12.8 percent; 8,068 cases). In 161 cases the most serious charge was murder or manslaughter (representing less than one percent of the felony cases) and there were 275 cases where the most serious charge was attempted murder. There were 1,298 cases (2.1 percent of the total felonies) for which a concealed firearm was the most serious offense. In 2.6 percent of the cases the charge was sexual battery (941 cases) or other felony sex offense (677 cases). In 7.2 percent of cases the most serious charge was felony violation of non-marijuana drug laws (3,621 cases) or felony marijuana (928 cases). A total of 6.2 percent of the cases involved armed robbery (1,700 cases) or other robbery (2,196 cases).

The largest percentage increase since FY 1982-83 was for attempted murder, which grew from 13 cases to 275 in FY 1993-94, for an increase of 2,015.4 percent. Murder and manslaughter grew by 133.3 percent. The number of drug felony cases (excluding marijuana) grew by 636.0 percent. Felony marijuana cases increased by 121.5 percent since FY 1982-83. The number of auto theft cases increased by 363.5 percent in the twelve years. Concealed firearm cases were 321.4 percent higher than FY 1982-83. The number of armed robbery cases increased by 164.8 percent since FY 1982-83. Other robbery cases increased by 184.5 percent over the twelve year period, although they were down 6 percent from FY 1992-93. Sexual battery cases increased by 77.9 percent since FY 1982-83, but were down 4.8 percent since the previous fiscal year, while other felony sex offenses increased by 284.7 percent since FY 1982-83. Aggravated assault cases increased by 200.4 percent over the twelve year period. Shooting or throwing a deadly missile offenses increased by 159.9 percent since FY 1982-83, but was down slightly from last year.

Source: CIS (delinquency referral records received during FY 1993-94; extract date - February 15, 1995)

The most frequent misdemeanor charge was shoplifting, which represented 22,156 cases or 28.9 percent of all misdemeanor cases. This was followed by misdemeanor assault/battery (20.6 percent; 15,793 cases), trespassing (9.9 percent; 7,609 cases), and petty larceny (8.2 percent; 6,305 cases). There were 4,805 cases (6.3 percent of the total) for which vandalism was the most serious charge, 2,770 loitering and prowling cases (3.6 percent), 2,459 possession of alcohol cases (3.2 percent), and 2,620 disorderly conduct cases (3.4 percent of total cases).

Tables I-8 through I-9 provide demographic data on the number of individual youth whose delinquency referrals were received from FY 1982-83 through FY 1993-94. Table I-8 shows the largest number of youth referred, during FY 1993-94, were 17 year olds (22.3 percent), followed by 16 year olds (20.5 percent) and 15 year olds (17.6 percent). Of the total, 13.7 percent were 14 and 9.1 percent were 13 years old. Only 10.5 percent were under 13, with most of these youth in the 10-12 age range.

Table I-9 indicates that the vast majority of youth were male (73.6 percent) and it shows that 59.5 percent of youth received were white, 39.3 were black and 0.5 percent were other. The relative percentage of black youth has been steadily increasing since FY 1982-83, when black youth comprised only 22.8 percent of the total youth received.

The description presented here is representative of Intake, the point of entry into the juvenile justice system. Similar data are presented in each of the separate program component chapters. The

composition of the groups of youth served and the reasons for services are frequently very different across the programs which make up the continuum of services available for juveniles in Florida.

## CINS/FINS Services

### 1. CINS/FINS SERVICES

#### Program Description

*(continued from previous page)*

CINS/FINS Service Centers operate in all districts, although every service is not yet provided by each center. Each district contract is based on a statewide model contract and includes specific admission criteria, procedures, and service objectives. Typically, youth are referred by HRS, law enforcement, schools, parents, or other social service agencies. All centers accept walk-ins.

Although each district contracts separately for CINS/FINS Services, the Florida Network of Youth and Family Services provides coordination, training, public awareness and quality assurance for the programs statewide. Each program is a member agency of the Florida Network. In FY 1993-94, the Florida Network had 18 CINS/FINS member agencies operating 24 residential centers and at least four centers offering only non-residential services. The Florida Network maintains centralized data collection for service providers through an automated system which was established in 1988.

CINS/FINS served 17,486 clients in FY 1993-94 - 9,207 in residential and 8,143 in non-residential facilities (136 did not have service type reported). The vast majority (97 percent) of Florida Network clients were non-HRS/Juvenile Justice clients.

During FY 1993-94, the Department of HRS and the Florida Network worked together to continue the implementation of the Centralized Intake system statewide. This system will transfer all intake responsibility from the delinquency Intake offices to the Florida Network agencies. The goal is to prevent CINS/FINS youth from entering the delinquency or dependency systems. Centralized Intake began in FY 1990-91 in District 4A. In FY 1991-92 Centralized Intake services were implemented in Districts 5, 6, 7A and 10. State budget shortfalls forced delays in implementation of Centralized Intake during the first nine months of FY 1991-92. However, by the fourth quarter the implementation of Centralized Intake was back on schedule in districts 8B, 11A and 14. In this fiscal year, Districts 1, 2A and 12 were funded and began Centralized Intake Services. It is the intent of the Department and the Florida Network to complete the funding of these services for every district and subdistrict by FY 1994-95.

### **Population Profile**

The Florida Network CINS/FINS Services Centers reported serving a total of 17,486 youth during FY 1993-94 in residential and non-residential services. See Table 1-1. Of the 39,678 youth who received some type of service during the year, 49.7 percent were served through telephone crisis counseling; approximately 23.2 percent were served in residential care; 20.5 percent received non-residential services; and the remaining 6.6 percent represent calls made to the Network's 1-800-RUNAWAY Hotline. These numbers reflect all clients served by Network member agencies regardless of the funding source. The high percentage of crisis calls is a function of the increases in the Centralized Intake Service component. There was a six percent increase in Residential services and a nine percent increase in Non-residential services over FY 1992-93.

**TABLE 1-1:**  
**CINS/FINS SERVICES**

Source: Florida Network of Youth & Family Services Aggregate Client & Provider Information July 1993-June 1994

Table 1-2 presents the population profile for youth receiving either residential or non-residential services. Gender and race were reported for 14,624 of the clients (83.5% of the total). Of those reporting, slightly under 55 percent were female and 45 percent were male. The racial/ethnic composition of the reported population served was 69.6 percent white, 21.0 percent black, 6.4 percent Hispanic and 1.9 percent American Indian and Asian. The average age was 14 years with 58.7 percent of those served between 14 and 17 years of age and 24.5 percent of those youth served between 10 and 13 years of age. This represents an eight month drop in the average age of the youth served and a near doubling of the youth served between the ages of 10-13.

**TABLE 1-2:**

\*Note: The aggregate total does not equal the sum of the residential clients plus non-residential clients due to not being able to identify 136 of the clients in the Not Reported/Unknown category as residential or non-residential.

Table 1-3 shows the reasons for referral for youth receiving residential or non-residential services. Almost 48 percent were referred for being beyond control, 22.5 percent were runaways and it is notable that 2.1 percent were reported as throwaway. Throwaway youth are youth who families refuse to accept responsibility for them any longer.

**TABLE 1-3:  
CINS/FINS SERVICES  
REASON FOR REFERRAL FOR YOUTH SERVED IN  
RESIDENTIAL OR NON-RESIDENTIAL SERVICES**

REASON FOR REFERRAL	AGGREGATE		RESIDENTIAL		NON-RESIDENTIAL	
	N	%	N	%	N	%

Table 1-5 displays the living arrangements for youth at the time of referral to CINS/FINS Services. In FY 1993-94, 62.2 percent were living in their own homes at the time of referral. Out of home placements accounted for 4.9 percent of those referred. Slightly over four percent of the youth were living with a relative, 5.4 percent were living with friends and the remaining were on the street or their living arrangement was unknown. Slightly over 70 percent of the youth served by the Florida Network were from within the state of Florida.

\*Note: The aggregate total does not equal the sum of the residential clients plus non-residential clients due to not being able to identify 136 of the clients in the Not Reported/Unknown category as residential or non-residential.

The Florida Network programs provided residential care for 9,207 youth with an average length of stay of 7.4 days for a total of 68,132 days of residential care, a 32.6 percent increase from 1992-93. Another 8,143 clients received non-residential services only.

### Outcome Measurements

#### Outcome 1

#### **CINS/FINS SERVICES WILL REUNITE YOUTH WITH THEIR FAMILIES.**

**Definition:** Reunification reflects the number of youth receiving CINS/FINS services who were returned to their families upon completion of services.

- 80.6 percent of all clients served by the Florida Network agencies, that reported a placement at termination, were returned home.
- 75.7 percent of youth receiving residential services and reporting a placement at termination were returned home.
- 87.8 percent of youth receiving non-residential services and reporting a placement upon termination remained with their families.

Reunification is a goal of CINS/FINS Services just as it is for other out of home placements. For all clients served by the Florida Network, 85.1 percent reported a placement at termination of services and of these 80.6 percent (12,000 of 14,883) returned home (see Table 1-7). Over 19 percent (2,883 of 14,883) with a placement termination, were placed outside the home or remained outside of the home. While reunification is the primary goal of CINS/FINS Services, consideration must be given in each case to the appropriate placement of youth upon termination. Youth are also placed with relatives, HRS care or other residential treatment and independent living arrangements.

**TABLE 1-7:  
CINS/FINS SERVICES  
LIVING ARRANGEMENT AT TIME OF TERMINATION**

RESOLUTION	AGGREGATE		RESIDENTIAL		NON-RESIDENTIAL	
	N	%	N	%	N	%
Family	12,000	68.6	6,660	72.3	5,294	65.0
No Family	2,883	16.5	2,140	23.2	738	9.1
Not Reported	2,603	14.9	407	4.4	2,111	25.9
<b>TOTAL*</b>	<b>17,486</b>	<b>100.0</b>	<b>9,207</b>	<b>100.0</b>	<b>6,032</b>	<b>100.0</b>

*Source: Florida Network of Youth & Family Services Aggregate Client & Provider Information July 1993-June 1994*

*\*Note: The aggregate total does not equal the sum of the residential clients plus non-residential clients due to not being able to identify 136 of the clients in the Not Reported/Unknown category as residential or non-residential.*

### **Outcome 2**

**CINS/FINS YOUTH (AT RISK OF RUNNING AWAY) WILL BE MAINTAINED IN THEIR OWN HOMES OR OTHER APPROPRIATE PLACEMENT FOR SIX MONTHS FOLLOWING PROVISION OF CINS/FINS SERVICES.**

**Definition:** Providers conduct an annual telephone survey to ascertain the placement of a sample of youth at six months after services.

In 1993-94 the Florida Network of Youth and Family Services surveyed 2,336 youth who had received services. The sample of youth represents approximately 13.3 percent of those terminated from services between July 1, 1993 and June 30, 1994. The living arrangements reported by those located indicated 88.1 percent were living at home or in another appropriate placement. Over seventy (71.5) percent did not report requiring additional service upon termination.

### **Outcome 3**

**CLIENTS WILL REPORT SATISFACTION WITH SERVICES.**

**Definition:** Four client satisfaction scales were used to measure this outcome, which focused on attitudes of both parents and youth toward the counseling received, care by staff and the general program. All four scales were designed so that an average score of 1.0 indicated clients were dissatisfied; 2.0 indicated they were somewhat dissatisfied, 3.0 that

clients were ambivalent about services, 4.0 indicated clients were satisfied and 5.0 indicated that clients were very satisfied.

- Mean scale scores for the various services ranged from 3.88 to 4.39, indicating that both parents and youth were satisfied with services.

Parents and youth participating in residential and non-residential programs were administered client satisfaction scales. Approximately 4,000 responses were received. Mean scale scores indicate that both parents and youth were more than satisfied with services.

The lowest mean scale score (3.88) was measuring satisfaction of residential clients and the highest mean scale score (4.39) was measuring satisfaction of parents with non-residential services. Non-residential client mean scale scores measure 4.17 and the parents of residential clients recorded a mean scale score of 4.0.

A comparison to the mean scale scores from the previous years shows that client satisfaction has steadily increased:

FY 1989-90 mean range: 3.7 to 4.0  
FY 1990-91 mean range: 3.8 to 4.3  
FY 1991-92 mean range: 4.0 to 4.4  
FY 1992-93 mean range: 3.9 to 4.4  
FY 1993-94 mean range: 3.9 to 4.4

### **Program Costs**

Total HRS/Juvenile Justice expenditures for CINS/FINS Services in FY 1993-94 were \$15,148,858, representing an increase of 15.8 percent from FY 1992-93. Funding was provided through state general revenue dollars. General revenue expenditures by district are shown in Table 1-8. Additional funds were secured from local governments, social services agencies, private donations, and the Department of Education for the operation of service centers and the Florida Network. Generally, the funding from HRS covers 54 percent of the actual costs for providing these services. Funding from governmental sources (federal, state, and local) accounted for 77.4 percent of the total funding of CINS/FINS services. Since the number of clients served reported by the Florida Network includes all clients served, regardless of funding source, it is impossible at this time to determine actual program cost for juvenile justice clients.

The Florida Network has continued to be very successful in raising money and in getting services donated from the private sector. Donated resources in FY 1993-94 include over \$100,000 for state office training and conference center and \$20,000 for the Juvenile Justice Forum. Donated public service announcement productions and other public awareness materials, valued at over a half a million dollars, have continued to be aired by the Florida Cable Television Association and various local television stations during FY 1993-94. Twenty thousand dollars was donated by the Florida Telephone Association for the 1-800 Hotline.

### Program Effectiveness

CINS/FINS Service Centers were available to all districts in FY 1993-94. The service centers varied in size and function, with 23 funded runaway shelters and 5 non-residential centers. Programs provided services to reunite the youth and families and to maintain youth in their homes. The Florida Network providers placed 80.6 percent of the youth with their families at the termination of CINS/FINS Services.

A follow-up study of a sample consisting of 2,336 client families terminated during the study period, indicated that, at six months to one year after release from CINS/FINS programs, 88.1 percent of the youth located were living at home or in another appropriate placement.

The CINS/FINS Services program has continued its transition during FY 1993-94 with three additional Florida Network service centers assuming Centralized Intake. Progress has been made in implementing the full continuum of services. Centralized Intake will be fully operational in January 1995 in all districts.

**TABLE 1-R**

**RECOMMENDATION UPDATE**

Recommendation in 1993 Outcome Evaluation	Progress in FY 1993-94	1994 Report Recommendation
<p><b>Program Improvement</b></p> <p>The Florida Network should be encouraged to continue its own quality assurance process and to increase its compatibility with the statewide quality assurance program currently being implemented.</p> <p>Improvement should be sought in the areas of outreach, family intervention and restoration, independent living and increased involvement with schools.</p>	<p>In FY 1993-94, the implementation of CINS/FINS services continued.</p> <p>An ongoing, cooperative working relationship continued between the Department and the Florida Network.</p>	<p><b>Program Improvement</b></p> <p>The Florida Network should continue to work cooperatively with the new Department of Juvenile Justice on the statewide quality assurance process designed by the Department.</p> <p>The Florida Network should be encouraged to continue its own data collection, public awareness training, technical assistance, program development and research.</p> <p>Continued improvements should be made in all program service delivery areas.</p>

## CINS/FINS Services

### 2. HURRICANE ISLAND OUTWARD BOUND

#### Program Description

Hurricane Island Outward Bound provides an out-of-home program for status offenders, or "Children in Need of Services/Families in Need of Services" (CINS/FINS). Youth meeting the program's criteria have been consistently absent from school without authorization, have been beyond the control of his/her parents or guardians or have run away from home. An adjudication is not a prerequisite for placement, however, a referral must be initiated by department staff or an agent of the department.

The Hurricane Island program is designed to rehabilitate status offenders by providing a strict physical regimen to instill self-discipline and confidence. Services consist of an 18-day wilderness course, a ten-day intensive follow-up with clients and their families, and completion of a community service project. Reality therapy is the technique most used in treatment. During the follow-up period, contracts are developed with the youth and their families to establish new patterns of behavior. Parents must attend at least one parent meeting and a contracting session. They must also provide transportation to and from the program site. A minimum of six home contacts are required while the youth is in the program.

In the 1993-94 contract year, the Outward Bound CINS/FINS program operated 14 courses, averaging 10 students per course, for a total of 143 participants. Both males and females, 13 to 18 years of age, from Districts IV, V and VII were accepted into the program, located in Titusville.

#### Population Profile

Table 2-1 shows demographic information for FY 1990-91, FY 1991-92, FY 1992-93 and FY 1993-94. Demographic data indicates that, based on the proportion of black youth in the CINS/FINS Intake population, black youth continue to be under-represented in the Hurricane Island Outward Bound population. The percentage of black youth decreased sharply from 8.4 percent in FY 1992-93 to 2.8 percent in FY 1993-94. Sixteen youth, or 11.2 percent, were Hispanic, reflecting a rate increase (for the second consecutive year) from the FY 1992-93 rate of 9.9 percent. Forty-eight participants, or 33.6 percent, were female and 95, or 66.4 percent, were male. The gender ratio is the same as it was the previous year.

### Client History

The majority of Hurricane Island Outward Bound clients were referred for reasons relating to running away, truancy or being beyond parental control. Although Hurricane Island Outward Bound keeps no data on specific reasons for referral, most of the youth have multiple problems relating to behavior, school, levels of maturity, academic achievement, and difficulties within their families. Of the 143 youth served by the program in the 1993-94 contract year, 82 (57.3 percent) were at the appropriate grade level. Over 42 percent of participants had failed at least one year in school. Over 94 percent of the youth attended public school, while 3.5 percent were enrolled in alternative schools and 2.1 percent attended private schools prior to participating in Hurricane Island Outward Bound.

## Outcome Measurement

### Outcome 1

#### **HURRICANE ISLAND OUTWARD BOUND PARTICIPANTS WILL SUCCESSFULLY COMPLETE THE PROGRAM.**

**Definition:** Successful completion means completing an 18-day wilderness course, a 10-day intensive follow-up period and a community service project as documented by the service provider.

- Of 143 youth beginning the course, 34 (23.8 percent) were removed from the wilderness component of the program prior to completion. There were no youth removed from the community follow-up component. The successful completion rate for the wilderness component for FY 1993-94 was 76.2 percent.

The percentage successfully completing the wilderness phase in FY 1993-94 (76.2) is lower than the 85.4 percent who completed the program in FY 1992-93 and the 90.0 percent who completed in FY 1991-92. The 34 youth were removed from the program this reporting period for the following reasons:

Runaway	18
Behavioral	12
Medical	4

### Outcome 2

#### **STATUS OFFENDERS WHO COMPLETE THE PROGRAM WILL NOT BE RE-REFERRED FOR A STATUS OR DELINQUENCY OFFENSE DURING THE YEAR FOLLOWING PROGRAM COMPLETION.**

**Definition:** Recidivism is defined as the rate at which clients who have completed the program are re-involved with the juvenile justice system. Re-involvement in this case can be equated to clients being charged with a new offense after program completion. Data were obtained from a contractor-conducted follow-up study of participants who successfully completed the program in FY 1992-93. The clients that successfully completed the program in FY 1992-93 were used for the recidivism study to allow for a full year of follow-up.

- Over 87 percent of the 111 youth successfully completing the program in FY 1992-93 had no further involvement with the juvenile judicial system by the end of FY 1993-94.

Table 2-2 provides data on the monthly intervals during which the fourteen youth recidivated. The type of re-involvement varied. All of the fourteen were charged with delinquent acts, which included technical violation of Community Control (6), trespassing (3), burglary (2), grand larceny (1), assault and/or battery (1), misdemeanor possession of marijuana (1), for a 12.6 percent recidivism rate into the juvenile justice system. It should be noted that this rate does not include recidivism into the adult system and is not comparable to other recidivism rates in this report.

**TABLE 2-2:  
HURRICANE ISLAND OUTWARD BOUND  
RECIDIVISM RATES FOR CLIENTS WHO HAD SUCCESSFULLY  
COMPLETED THE PROGRAM DURING FY 1992-93**

RECIDIVISM BY MONTHLY INTERVALS	NUMBER	PERCENT
1-3 months	5	4.5
4-6 months	5	4.5
7-9 months	1	0.9
10-12 months	3	2.7
No recidivism in first year	97	87.4
<b>TOTAL</b>	<b>111</b>	<b>100.0</b>

*Source: Hurricane Island Outward Bound School Review Report, August 1994*

### **Program Cost**

A total of \$353,658 from general revenue funds was expended for the Hurricane Island Outward Bound status offender program in FY 1993-94 which was the same as was funded in FY 1992-93.

### **Program Effectiveness**

Hurricane Island Outward Bound provides an alternative short-term placement for status offenders who need to be out of their homes until a family crisis can be resolved or the youth learns more appropriate ways of behaving. The 76.2 percent successful completion rate for FY 1993-94 was lower than the previous year (85.4 percent). This completion rate represents a decline for the third consecutive year. For those clients who completed the program during FY 1992-93 (to allow for a full year of follow-up) had a success rate relative to recidivism (no involvement with the juvenile justice system) of 87.4 percent. Both outcomes continue to indicate measures of program success, both in the short and long term but their continued decline should be examined. A continued effort is needed to identify minority youth in the status offender population who could benefit from participation in this program.

**TABLE 2-R**  
**HURRICANE ISLAND OUTWARD BOUND**  
**RECOMMENDATION UPDATE**

Recommendation in 1993 Outcome Evaluation	Progress in FY 1993-94	1994 Report Recommendation
<p><b>Program Maintenance</b></p> <p>This program has an over 85% successful completion rate and should be maintained.</p>	<p>The program had a 76.2 percent successful completion rate which was lower than last year's 85.4 percent.</p> <p>The success rate relative to recidivism was 87.4 percent.</p>	<p><b>Program Improvement</b></p> <p>The FY 1993-94 outcomes continue to indicate measures of program success in both the short and long term, but the fact that these measures have experienced 3 consecutive years of decline needs to be examined.</p> <p>Efforts need to continue to identify minority youth in the status offender population who would benefit from participation in this program so that there can be an increase in the number of minority youth served.</p>

### 3. PRACTICAL AND CULTURAL EDUCATION (PACE) CENTER FOR GIRLS

#### Program Description

The PACE Centers for Girls are non-residential programs which serve female status offenders, delinquents and dependents ages 12-18 years. The program aims to prevent juvenile delinquency, status offenses, school dropouts, foster care placements and teen pregnancies. Emphasis is placed on helping young women strengthen family

relationships, improve personal and academic functioning and obtain a high school diploma. Referrals to the program are made by parents, public school personnel, HRS counselors and juvenile judges.

PACE staff prepare individual treatment plans which contain short and long-term educational, social and personal goals. Progress is documented weekly. Program participants are required to pursue completion of a high school diploma. The PACE accredited high school program includes remedial, high school credit, GED and college preparation classes. Treatment services include a five-part Life Management component comprised of classes in Independent Living, Art/Drama, Parenting, Health/Physical Education and Career Development. Individual, group and family counseling services are also provided.

Each PACE student is eligible for graduation or transition after they successfully complete their individual treatment goals which typically consist of (a) advancing at least one grade level or earning the required credits for a high school diploma or equivalency; (b) participation in at least two community service projects (c) successful completion of life skills classes (d) and maintenance of at least 87% attendance rate; (e) advancement to an appropriate level within the system. The criteria noted above is the standard expectation, however, each student has an individualized treatment plan that outlines specific goals and objectives. Favorable termination is dependent upon completion of the individual and academic goals which are tailored to the unique needs of each student. Eligibility for graduation is also contingent upon the student's agreement to participate in a placement plan. Placement plans include mainstreaming back to one's home school; enrollment in an appropriate academic or vocational training program; and/or gainful employment. Community involvement may range from volunteering at a nursing home to participating in a city wide clean up campaign. Students who successfully complete PACE leave the program with either a high school diploma, a job or plans for further education. Follow up services are offered to students for a period of three years following termination. Follow up services are usually available to all students whether they successfully or unsuccessfully completed the program.

PACE, Inc. expanded in 1989 to include a chapter in Bradenton which serves Manatee county, a chapter in Orlando in 1991 serving Orange and Seminole counties, and chapters in Miami and Fort Lauderdale in 1992, which serve Dade and Broward counties respectively. Since 1993, two new chapters in Tallahassee and Pensacola serve Leon and Escambia counties.

### Population Profile

Table 3-1 provides data on the age and race of PACE students admitted during FY 1993-94 in the five counties with PACE centers. The number of students served by PACE during the fiscal year increased to 491 as compared to a total of 166 during FY 1992-93, due to the creation of the new centers. The average length of stay for FY 1993-94 was 6 months which is slightly lower than the 6.8 months for FY 1992-93.

**TABLE 3-1:

## Outcome Measurement

### Outcome 1

**PACE PARTICIPANTS WILL BE DISCHARGED FAVORABLY FROM THE PROGRAM.**

**Definition:** Favorable discharge is dependent upon completion of the individual academic and treatment goals which are tailored to the unique needs of each student. Individual academic and treatment goals typically consist of (a) advancing at least one grade level or earning the required credits for a high school diploma or equivalency; (b) participation in at least two community service projects; (c) successful completion of life skills classes; (d) and, maintenance of at least 87% attendance rate; (e) advancement to an appropriate level within the system.

- The statewide average for favorable discharge in FY 1993-94 was 68.1 percent. The number favorably discharged by program was: Broward, 72.7 percent; Dade, 85 percent; Duval, 71.0 percent; Manatee, 50 percent and Orange, 58 percent. Leon and Escambia did not report a favorable discharge rates as they were open for only six months.

The average favorable discharge rate of 68.1 percent is down 10 percent from the previous year. The 32 percent regarded as unsuccessful releases from the program were for reasons that include: lack of attendance, runaway, incompatible behavior, and incarceration. Table 3-2 shows the yearend statistical overview.

**TABLE 3-2:  
PACE CENTER FOR GIRLS  
YEAREND STATISTICAL OVERVIEW FOR FY 1993-94**

	BROWARD	DADE	DUVAL	MANATEE	ORANGE	LEON	ESCAMBIA

*Source: PACE Center for Girls, adhoc report, April 7, 1995*

*\* New chapters did not report terminations.*

*\*\* Duval PACE offers middle school courses and GED curriculum where no credit is assigned.*

*\*\*\* Dade PACE offers middle school courses where no credit is assigned.*

## **Outcome 2**

### **PACE PARTICIPANTS WILL IMPROVE THEIR ACADEMIC FUNCTIONING DURING PARTICIPATION IN THE PROGRAM.**

**Definition:** Academic functioning is related to the achievement of a high school diploma (GED or high school credit).

- Over 61 percent of the students improved their academic functioning while at PACE.

**TABLE 3-3:  
PACE CENTER FOR GIRLS  
STATUS AT END OF 1993-94 SCHOOL YEAR**

STATUS	PERCENT				
	BROWARD (N = 51)	DADE (N = 67)	DUVAL (N = 136)	MANATEE (N = 68)	ORANGE (N = 80)
Graduated or G.E.D.	33.3	0.0	26.0	0.0	2.0
Promoted	0.0	0.0	0.0	24.4	0.0
Mainstreamed	45.5	70.4	33.0	51.3	35.0
Dropped Out	15.2	7.4	20.0	0.0	0.0
Other	6.0	22.2	21.0	24.3	63.0
<b>TOTAL</b>	100.0	100.0	100.0	100.0	100.0

*Source: PACE Center for Girls, adhoc report, April 7, 1995*

*Note: Leon and Escambia PACE had only been open for six months*

There was an increase in the percentage of students improving their academic functioning while in the PACE program during the 1993-94 school year. Over 61.6 percent of the releases in FY 1993-94 earned a diploma, were promoted or were mainstreamed while at PACE compared to 37.5 percent during FY 1992-93.

### **Program Cost**

The PACE Center for Girls, during FY 1993-94, expended \$571,047 in general revenue funds awarded by HRS for the operation of its program. PACE also received part of its funding from federal and local funds, the United Way and private donations.

### **Program Effectiveness**

The P.A.C.E. Center for Girls performed favorably during FY 1993-94 in working with troubled females, demonstrating positive performance for the third consecutive year. During FY 1993-94 the total served increased from a total of 166 in FY 1992-93 to 571 in FY 1993-94. The capacities for each of the programs are: Duval (Jacksonville)-60; Orange (Orlando)-40; Manatee (Bradenton)-40; Dade (Miami) 30; Broward (Fort Lauderdale) 30; Leon (Tallahassee) 30; Escambia (Pensacola) 20..

During FY 1994-95, the department should consider expanding the program to other districts.

**TABLE 3-R**  
**PRACTICAL AND CULTURAL EDUCATION CENTER FOR GIRLS (PACE)**  
**RECOMMENDATION UPDATE**

Recommendation in 1993 Outcome Evaluation	Progress in FY 1993-94	1994 Report Recommendation
<p><b>Program Expansion</b></p> <p>The Department should expand the PACE programs by two programs a year until each district has at least one program.</p>	<p>The Department has added two new PACE programs this year, one each in Districts 1 and 2.</p>	<p><b>Program Expansion</b></p> <p>The Department should continue to add two new PACE programs per year until each district has at least one program.</p> <p>Codes for "other" reason for referral, "other" referral source and "other" end of school year status should be more discrete. Percentages in these areas are too high and do not provide meaningful information.</p> <p>There should be a requirement that all PACE programs provide outcome data.</p>

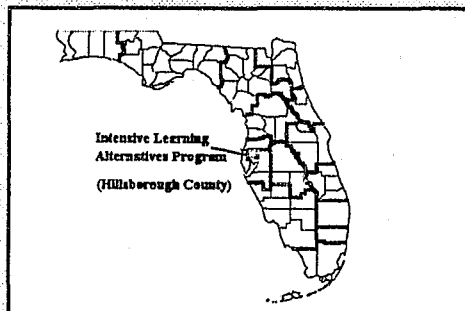

## Prevention and Diversion Services

### 4. INTENSIVE LEARNING ALTERNATIVES PROGRAM (ILAP)

#### Program Description

The Intensive Learning Alternatives Program (ILAP) is designed to reduce the number of delinquency, status offense and dependency referrals, and to improve school attendance and performance among participants. This program is an interagency joint venture between HRS and the Hillsborough County School System.

ILAP is a "back to basics" program for junior high school students. Classroom size is limited to 18 students with teachers individualizing instruction. A counselor provides group counseling and social skills education and works with individual students and their families. Students remain in the program until improvement is noted, but no longer than one school year. Both the student and parent agree to participation in the program.

Students are selected for ILAP primarily through the Dean's Office with ILAP teacher and counselor input. Students who are disruptive, disinterested or unsuccessful are eligible for the program. These are typically students with multiple problems but who fall through the cracks in qualifying for existing special education programs.

Students are usually failing, do not attend school regularly, present behavior problems or have family problems which inhibit academic performance.

ILAP served 22 out of 26 middle schools in Hillsborough County during the 1993-94 school year. During this fiscal year, ILAP expanded to three units at five of the 22 schools. Two units were at five schools. Each class had its own teacher but shared an HRS counselor. The total number of ILAP classes in 1993-94 was 33.

Funding for ILAP comes from two sources: HRS and the Hillsborough County School System. The school system contracts with HRS to hire and supervise the 22 counselors and one secretary. HRS provides partial funding for the counselors and funding for a supervisor. The school system also uses alternative education funding for teachers' salaries, instructional materials and other school-related expenses. This program is an excellent example of an interagency joint venture.

## Population Profile

The total number served by ILAP was 968 students. As part of this study, records were checked to determine whether students in the program had ever been found to be delinquent or dependent; 61.3 percent had no such record while 38.7 percent had an active or inactive dependency or delinquency case. However, this underestimates how many youth have been involved with HRS. Youth could have received intake services and may not have been counted. Approximately one-third have been found to be delinquent or dependent. Table 4-1 provides population profile data on the students served by ILAP during FY 1993-94.

**TABLE 4-1:  
INTENSIVE LEARNING ALTERNATIVES PROGRAM (ILAP)  
POPULATION PROFILE FOR FY 1993-94**

<b>TOTAL SERVED</b>	968
---------------------	-----

<b>AVERAGE AGE</b>	14.1
--------------------	------

<b>AVERAGE GRADE LEVEL</b>	7.8
----------------------------	-----

	<b>NUMBER</b>	<b>PERCENT</b>
<b>REPEATED 1 OR MORE GRADES</b>	604	62.4

<b>SEX</b>	<b>NUMBER</b>	<b>PERCENT</b>
FEMALE	431	44.5
MALE	537	55.5
<b>TOTAL</b>	968	100.0

<b>RACE</b>	<b>NUMBER</b>	<b>PERCENT</b>
WHITE	567	58.6
MINORITY	401	41.4
<b>TOTAL</b>	968	100.0

*Source: Intensive Learning Alternatives Program, Summary of Statistics for the 1993-94 School Year*

*\* Minority includes Black, Hispanic, Asian and Native American.*

Referrals for law violations during the previous year numbered 344. There were 273 dependency referrals. Most students' involvement in the program related to school problems; i.e., suspensions, absences and dean referrals for misbehavior. In the year prior to placement in ILAP, the participating students had a combined total of 3,150 discipline referrals, for an average of 3.3 per client, were absent 26,937 days during the year, for an average of 28 days, and had a combined total of 998 suspensions, for an average of slightly over 1 per client. Their school history reflected their need for an alternative to the regular classroom.

Demographic characteristics of ILAP students have remained stable. The average age remained the same as FY 1992-93 at 14.1 years, and the average grade level remained the same as FY 1992-93 at 7.8 in FY 1993-94. The percent who had repeated one or more grades dropped from 62 percent in FY 1990-91 to 58.0 percent in FY 1991-92, stayed the same in FY 1992-93, then increased to 62.4 percent in FY 1993-94. There is a trend toward an increasing percentage of ILAP participants being minority students: 26 percent minority in 1988-89, 28 percent minority in 1989-90, 31 percent minority in 1990-91, 33 percent in 1991-92, almost 35 percent in 1992-93 and 41 percent in 1993-94. Minority students are over-represented, according to their percentage in the population (minority students make up 20.7 percent of the population of youth in Hillsborough County in the 10-17 age group). However, their dropout rate has traditionally been higher than that of whites. The dropout rate for males has also been traditionally higher than that of females. Over-representation to an even greater extent for both minorities and males might be a reasonable expectation.

### **Program Data**

A student's length of stay in ILAP varied from a single, nine-week grading period to a full school year. An average length of stay has not been calculated. Students return to the regular classroom setting as soon as it is appropriate.

One of the important features of ILAP is the counselor involvement with students and their families outside the educational setting. According to the "ILAP Summary of Statistics for 1993-94 School Year," a total of 6,848 field or home contacts were made during the year. This represented an average of 7.1 contacts per ILAP student and includes contacts with the student away from school and with their parents at home or at school. This compares to 8,350 field visits last year or an average of 10.3 visits per student. This amounts to 3.2 fewer visits per student than during the previous year.

### **Outcome Measurement**

Aggregate information on ILAP students reported at the end of each nine-week grading period and information in the "ILAP Summary of Statistics for 1993-94 School Year" were used in assessing the achievement of the following outcomes.

#### **Outcome 1**

#### **ILAP PARTICIPANTS WILL SUCCESSFULLY COMPLETE THE PROGRAM.**

**Definition:** "Successful" completion of the program indicates the student has met all goals established. "Partially successful" indicates the student has met some of the goals. Students not meeting any goals are designated as "unsuccessful."

- Of the 968 students enrolled in FY 1993-94, 495 completed the program successfully, a successful completion rate of 51.1 percent. Over 19 percent were partially successful (190 students).

- The remaining students were transferred to other alternative education programs (.8 percent or 8 students), were released before a determination could be made (4.3 percent or 42 students), or, failed to meet the criteria for successful program completion (24.1 percent or 233 students).

During the 1986-87 and 1987-88 school years, ILAP only classified students as "successful" or "unsuccessful." In the 1988-89 school year the school board requested that the program report on those who were "partially successful" or who met some of the goals. Thus the number of "successful" students fell in 1988-89 since the students now were divided into two categories instead of one. The percentage of successful students has been relatively stable from school year 1988-89 to the present, ranging from 51.1 to 60 percent.

#### **Outcome 2**

**ILAP PARTICIPANTS WILL NOT BE REFERRED FOR ABUSE OR NEGLECT, OR INCUR DELINQUENCY REFERRALS DURING THE PROGRAM.**

**Definition:** Information on the ILAP students in the school year prior to entering the program was collected by the program. This included the history of referrals for law violations and dependency referrals. The program continued to track referrals during program participation. The program has set an expected reduction of 50 percent. Information was obtained from the "ILAP Summary of Statistics for 1993-94 School Year."

- Delinquency referrals were reduced by 54.1 percent.
- Referrals for abuse or neglect were reduced 76.9 percent.

Table 4-2 contains comparisons related to program objectives.

**TABLE 4-2:**  
**INTENSIVE LEARNING ALTERNATIVES PROGRAM**  
**SUMMARY OF ILAP STATISTICS REFLECTING EFFECTIVENESS**  
**IN ACHIEVING OUTCOME RELATED GOALS FOR FY 1993-94**

<b>PROBLEM AREAS</b>	<b>1992-93 REGULAR CLASSROOM</b>	<b>1993-94 ILAP CLASSROOM</b>	<b>1993-94 PERCENT REDUCTION</b>	<b>1992-93 PERCENT REDUCTION</b>	<b>PROGRAM OBJECTIVE: PERCENT REDUCTION</b>
Delinquency Referrals	344	158	54.1	58.3	50.0
Status Offense Referrals	4	6	-50.0	27.3	N/A
Abuse/Neglect Referrals	269	57	78.8	80.9	50.0
Absences	26,837	17,560	34.6	41.9	50.0
Suspensions	998	770	22.8	32.6	25.0
Suspension Days	3,559	2,967	16.6	36.7	--
Discipline Referrals	3,150	1,989	36.9	46.3	50.0

*Source: Intensive Learning Alternatives Program, Summary of Statistics for the 1993-94 School Year*

*\*Note - This data was obtained from the HRS Client Information System (CIS).*

The reduction in referrals to HRS was substantial. Delinquency referrals were reduced by 54.1 percent (from 344 referrals prior to ILAP to 158 referrals during ILAP participation). Dependency referrals were reduced by 78.8 percent (from 269 referrals prior to ILAP to 57 referrals during ILAP participation).

Status offense referrals have been reported for the second consecutive year. They were not reported during FY 1991-92, therefore, an analysis cannot be made between FY 1992-93 and FY 1993-94 comparison statistics, and FY 1991-92 and FY 1992-93 comparison statistics.

### **Outcome 3**

#### **SCHOOL ATTENDANCE AND PERFORMANCE AMONG ILAP PARTICIPANTS WILL IMPROVE.**

**Definition:** The program reported pre-program and during-program comparisons on school attendance, suspensions, dean referrals, and grade point averages in the "ILAP Summary of Statistics for 1993-94 School Year." The program has set a goal of reducing absences and discipline referrals by 50 percent and suspensions by 25 percent.

- There was a 34.6 percent reduction in the number of absences for the 1993-94 school year as compared to the 1992-93 school year.
- There was a 22.8 percent reduction in the number of suspensions.
- There was a 36.9 percent reduction in the number of discipline referrals.
- Grade point averages rose from 1.3 to 2.1 on a 4 point scale.

ILAP was able to alter students' behaviors and reduce the problems that led to their referral to the program. Table 4-2 summarizes the changes made. Substantial reductions in all problem areas were shown. Grade point averages rose from 1.3 (D average) to 2.1 (C average).

There is no information available to determine whether changes are short-lived, only occurring while the student participates in ILAP, or if the changes have a longer-lasting effect on the student's behavior in school as well as academic performance and on future involvement with the dependency or delinquency programs. This data would be very useful.

In previous years, standardized achievement test scores in reading and math have been reported. Hillsborough County no longer requires such tests for these students; therefore, this information is no longer available.

### **Program Cost**

Expenditures for ILAP in Hillsborough County amounted to \$783,591<sup>1</sup> from general revenue and contract funding.

### **Program Effectiveness**

The Intensive Learning Alternatives Program (ILAP) has continued to demonstrate a substantial positive effect on participants in the program. ILAP represents an interagency partnership where HRS works with the school system of Hillsborough County to affect behaviors that are problems for the school system as well as behaviors that require HRS intervention. Excellent documentation is provided on the effects of the program.

HRS intervention was substantially reduced while students were in the program. Delinquency referrals were down a remarkable 54.1 percent from the year prior to ILAP, and dependency referrals were down 78.8 percent. Reductions were also seen in school absences (34.6 percent), school suspensions (22.8 percent) and discipline referrals (36.9 percent). Grade point averages rose from 1.3 (D average) to 2.1 (C average).

Status offense referrals were reported in the ILAP report for the second consecutive year. The number of status offense referrals reported during ILAP participation were small (6 referrals).

This program provides excellent documentation of the effects of the program on student behavior and HRS involvement in the short term. A follow-up procedure should be devised whereby students leaving the program are tracked for one year to see if the number of absences, discipline referrals, etc. remains lower. A special study which tracks a cohort of students for three to five years would also be helpful. The size of the program indicates that an extra staff person would probably be needed to conduct this study.

At the present time, individual client information is not computerized to allow for sophisticated statistical analysis. If the program continues to expand, consideration should be given to developing a database to retain client information. Analysis could then be done on such things as the relationship between length of stay in the program, the frequency of contact with the counselor, and the student's success in the program.

This program has demonstrated consistent success in lowering the amount of HRS involvement with those who participate. The Department would do well to consider initiating the establishment of programs in other school systems around the state. A program such as ILAP seems an excellent choice to become part of the initiative on "Full-Service Schools." Full-service schools will co-locate HRS services (such as Food Stamps, AFDC) in the schools. ILAP counselors would be a further extension of services.

In preparation for a Legislative Budget Request to expand services, research should be conducted to look at school-based programs that serve the same population as ILAP but do not use delinquency counselors. The impact of these programs on delinquency referrals should be determined. Such research would ascertain whether the use of this program model is pivotal in achieving reductions in such referrals. The federally funded Juvenile Justice and Delinquency Prevention Programs have school-based programs which could be compared to ILAP.

In conclusion, ILAP is an effective program that is able to demonstrate its impact on delinquency and dependency referrals and problem school behavior, as well as grade point average. It is worthy of being expanded to other school systems and should be considered for inclusion in the initiative to establish full-service schools.

#### NOTES

*1 Source: JJP FY 1993-94 Expenditures by Program Component Report for outcome evaluation purposes. It should be noted that the Hillsborough County school system also provides money for this program.*

**TABLE 4-R**

**RECOMMENDATION UPDATE**

Recommendation in 1993 Outcome Evaluation	Progress in FY 1993-94	1994 Report Recommendation
<p><b>Program Expansion</b></p> <p>This program continues to be one of the most successful and should be replicated in other locations.</p> <p>Research is needed in two critical areas:</p> <p>1) The role of the counselor in the success of this program.</p> <p>2) The effectiveness of the program in changing behavior after students leave the program. At present there is no follow-up on the students success rates.</p>	<p>There were no significant changes in the way the program was run, however discussion to expand the program is underway.</p>	<p><b>Program Expansion</b></p> <p>This program continues to be one of the most successful and should be replicated in other locations.</p> <p>Standardized pre- and post-testing should be re-established.</p>

## Prevention and Diversion Services

### 5. JUVENILE ALTERNATIVE SERVICES PROGRAM (JASP)

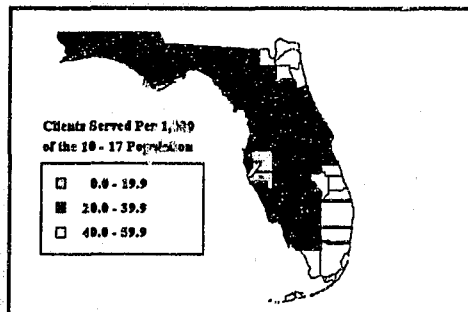

#### Program Description

The Juvenile Alternative Services Program (JASP) is an alternative to handling juvenile offenders judicially by providing diversion and dispositional alternatives to Community Control. JASP began in 1979 as a pilot project in three districts and was expanded statewide in 1981. The JASP caseload is primarily generated through referrals from Delinquency Intake, and consists of youth

identified for diversion. Intake makes recommendations for JASP placement, but the state attorney has the final authority to determine if a case can be referred for nonjudicial handling. Although the intent of the program is diversion from judicial dispositions, judicial dispositions to JASP do occur statewide.

Individual plans are designed for youth referred to the programs. These include service goals, such as community service and restitution, and/or treatment goals such as individual or family counseling. Program counselors either provide services or oversee the completion of the plan. If youth fulfill the plan, court action is averted; if not, the state attorney decides whether or not to file a petition seeking court action.

The JASP program is operated by providers on a contractual basis with HRS. Program funding is through state general revenue funds.

#### Population Profile

JASP served 49,899 cases during FY 1993-94. The Client Information System (CIS/Demographic Provider file) recorded 29,962 youth terminated from JASP programs during FY 1993-94, which is up slightly from the 28,063 terminated last year. CIS/Demographic Provider file data were used for the demographic analysis (Tables 5-1A through 5-1D) to maintain a uniform base for comparing JASP youth with youth served in other programs.

White youth made up 62.5 percent of the JASP population, blacks 36.1 percent and others 1.3 percent. Males comprised 70.6 percent of the statewide population and females comprised 29.3 percent.

### **Program Data**

An examination of the percentage of delinquency cases handled at Intake that were referred for JASP services in FY 1993-94 shows that statewide, 17.3 percent of the 149,623 delinquency cases disposed at Intake were placed in JASP, as compared to 21.0 percent placed on Community Control (Table 5-3). This is lower than the 19.2 percent placed in JASP last year. As was true last year, there appears to be a wide variation among districts in terms of the percentage of cases handled through JASP, with a range from 5.5 percent in District 12 to 29.2 percent in District 3. This variation is directly affected by the policy of the local state attorney and/or court towards the utilization of JASP. Some of the youth handled judicially and placed on Community Control supervision could be served effectively by JASP.

**TABLE 5-3:  
JUVENILE ALTERNATIVE SERVICES PROGRAM (JASP)  
STATEWIDE INTAKE CASE DISPOSALS TO COMMUNITY CONTROL AND JASP  
FOR FY 1993-94**

DISTRICT	# OF CASES DISPOSED AT INTAKE	COMMUNITY CONTROL PLACEMENTS		JUDICIAL JASP PLACEMENTS		NON-JUDICIAL JASP PLACEMENTS	
		#	%	#	%	#	%
1	5,378	992	18.4	388	7.2	801	14.9
2	5,769	1,098	19.0	480	8.3	1,016	17.6
3	4,032	885	21.9	330	8.2	847	21.0

13	5,290	1,220	23.1	258	4.9	925	17.5
14	7,887	1,977	25.1	84	1.1	974	12.3
15	3,370	551	16.4	283	8.4	518	15.4
OUT OF STATE	2,308	326	14.1	52	2.3	140	6.1
UNKNOWN	12	0	0.0	0	0.0	1	8.3
STATEWIDE	149,623	31,365	21.0	5,935	4.0	19,890	13.3

*Source: CIS/DDR, February 1995 extract*

Statewide, 58.2 percent of all delinquency case dispositions were handled judicially in FY 1993-94, while 37.7 percent were handled non-judicially. This is down from last year's 60.4 percent of all delinquency case dispositions being handled judicially.

### Outcome Measurement

#### Outcome 1

#### **JASP CLIENTS WILL SUCCESSFULLY COMPLETE THE PROGRAM.**

**Definition:** A successful completion is defined as a client who, upon completion of the program, has a termination status of terminated, sanctions/services completed successfully. The model contract states that 80 percent of youth will successfully complete the program.

- **65.3 percent of youth referred to JASP successfully completed the program.**

Table 5-4 indicates that 65.3 percent of youth were successfully released from JASP. This is down slightly from last year's 66.8 percent but this may be due to the data being extracted from CIS/Demographic Provider file instead of the JASP Client Exit Forms.

**TABLE 5-4:

#### **Outcome 2**

**JASP CLIENTS WILL HAVE NO SUBSEQUENT OFFENSES WITHIN ONE YEAR FOLLOWING SUCCESSFUL PROGRAM COMPLETION.**

**Definition:** Many measures can be utilized as indications of recidivism, all related to subsequent law violations. A number of such measures are presented below. Re-referrals indicate that youth have been charged with another delinquent offense, but a subsequent referral is not necessarily evidence that the youth committed the offense charged. Determination of whether a subsequent law violation occurred is more accurately measured in Juvenile Justice data systems by whether there was an adjudication (or adjudication withheld) for one or more delinquent offenses following release. Such a finding by the court is a clearer measure than a subsequent referral. Adult felony convictions, for which youth were placed on adult probation or sentenced to adult prison, are also reported. A combined juvenile and adult felony conviction rate is also presented, as is a total of all juvenile adjudications and adult felony convictions. The operational definition of recidivism is, finally, the number of youth released from a program between January 1 and June 30 of 1993 who had been recommitted to Juvenile Justice, placed on adult probation or sent to prison within one year following release.

**TABLE 5-5A:**

*Source: CIS/Provider/TP1, OE Extract, FY 1993-94 (clients released between January and June 1993) and the Department of Corrections' FY 1993-94 probation and prison extract.*

As seen in Table 5-5, there were 10,160 youth released from JASP during the period between January and June of 1993 for whom one year had expired since their date of termination. The total number of releases includes only youth whose status upon release was terminated, sanctions/services completed successfully. Statewide, 13.2 percent were readjudicated and the recidivism rate was 3.3 percent.

### Program Cost

The total cost of the JASP program statewide during FY 1993-94 was \$5,186,564, with a statewide cost of \$103.90 per case served. Table 5-6 gives a district specific breakdown of the costs.

**TABLE 5-6:**

### **Program Effectiveness**

The JASP program appears to be effective in diverting clients from judicial handling within the delinquency system. Those cases assigned to JASP resulted in a 65.3 percent successful program completion rate. The program also appears to be effective in preventing subsequent law violations, with 86.8 percent of youth having no subsequent delinquency adjudication within a year of service termination.

The implementation of this program varies greatly across the state, providing little opportunity to compare the results without a more detailed look at how different Juvenile Justice staff, state attorneys, and judges use the program. In many districts, JASP is being used as a judicial disposition, which contravenes the original intent of the program. Several variables, such as the local state attorney's petition filing criteria, could impact on this finding as that office has the final approval of referrals to the JASP program. This variance may influence the effectiveness of the service. There is also a question of whether some cases could be handled simply through parental sanctions or counseling at initial intake.

Clearly defined admission criteria need to be established in order for the program to function optimally. This might be done as a district-by-district process, with a statewide consensus emerging from the process. If district criteria are different, this information should be available. Without such information it is not possible to compare results meaningfully across districts.

Given the above, it is recommended that a study be undertaken to look in depth at the characteristics of clients served by JASP and compare these to the characteristics of clients with cases closed at Intake and Community Control clients. Outcomes for similar subsets of these groups can be compared. This would require a study which is beyond the scope of the annual outcome evaluation. Annual statewide meetings are bringing together all JASP providers and allow headquarters staff to uniformly address all problems that have arisen in the 14 years since the beginning of the program. Among problems addressed are reporting procedures and issues regarding cost per case.

**TABLE 5-R  
JASP  
RECOMMENDATION UPDATE**

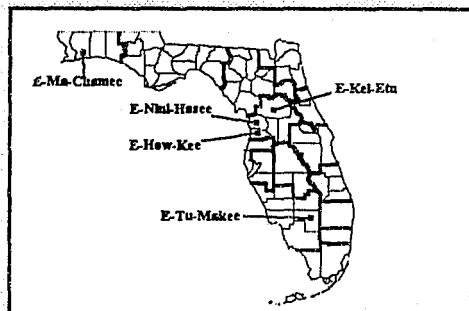

Recommendation in 1993 Outcome Evaluation	Progress in FY 1993-94	1994 Report Recommendation
<p><b>Program Improvement</b></p> <p>The Department should determine if first time misdemeanants are better served in civil citation and community arbitration. The success of youth in the JASP program should be compared to the success of youth in other programs to determine which program achieves the more positive outcomes.</p>	<p>During FY 1992-93 an audit of the JASP program was conducted by the Auditor General's Office. The report following this audit was released May 1994. Pursuant to recommendations made in the report, a work group consisting of Department district representatives was developed to identify clients who should be served within the JASP program. In July 1994, the work group developed a generic description of the JASP client. The work group's description is seen as a starting point to further each district's communication with its local state attorney's office. As a result, a number of districts have working agreements with their state attorney concerning clients who are most appropriate for the JASP program.</p>	<p><b>Program Improvement</b></p> <p>The Department should continue to follow the recommendations of the Auditor General's Report, making corrections to the JASP program where appropriate.</p> <p>The Department should operationalize the model contract currently being drafted. This contract will provide consistency in achieving comparable outcomes statewide.</p> <p>An in-depth study should be undertaken to describe the characteristics of JASP clients.</p>

## Juvenile Justice Programs

### 6. ECKERD WILDERNESS CAMP PROGRAM

#### Program Description

The Eckerd Wilderness Camp Program provides services to emotionally and behaviorally disturbed youth in an outdoor environment. The program is designed to serve these youth a minimum of nine months. Camps may serve a maximum of 60 clients divided into groups of twelve campers assigned to a particular campsite. There are five camps in Florida for a total capacity of

300. Two hundred and forty of the 300 slots are paid through statewide contract funds. The remaining 60 slots are paid through individual payment, third party payments such as insurance, or district funds (including ADM PRTS funds). Sixteen of the 240 beds are specifically designated for special needs committed youth. These youth have been identified as special needs due to their very young age, offense history, and placement history. These 16 beds are available at all times whether there is a waiting list at a particular camp or not. Youth may be referred for placement by the district Case Review Committee/Service Assessment Team staffing for non-delinquent youth or the multidisciplinary commitment staffing for delinquent youth.

The treatment program requires the group to construct its own shelters, cut wood, repair equipment, provide its own recreation, maintain trails and do all things necessary for safe and responsible living. These activities are designed to provide objective discipline and aid in developing a sense of social responsibility. As youth accomplish the goals outlined in their individual treatment plans, they are moved from small therapy groups to transition groups. These transition groups provide greater privileges and more structured schooling. During this transitional phase, the youth are prepared to return to their families and community. All youth who successfully complete the program receive aftercare services. Program and aftercare staff are assigned to call, write and visit the youth on a regular basis after their discharge from the program.

#### Population Profile

The Eckerd Wilderness programs served a total of 529 youth during FY 1993-94. The typical youth entering an Eckerd Wilderness Camp Program was a fourteen year old white male. See Table 6-1. The youth spend approximately 13.2 months in the program.

**TABLE 6-1:

Weapon Related	1.7
Misdemeanor	20.5
Other Offense	10.2
<b>TOTAL</b>	<b>100.0</b>

*Source: Eckerd Family Youth Alternatives, Inc. Annual Descriptive Summary 1993-94*

Youth are referred to the Eckerd Wilderness programs through a variety of sources. Referrals come from caseworkers, mental health centers, school systems, physicians, private psychologists, psychiatrists, and families.

## Outcome Measurement

### Outcome 1

#### **YOUTH WILL SUCCESSFULLY COMPLETE THE PROGRAM.**

**Definition:** Cases considered successful are those reported by Eckerd as graduates.

- 79.7 percent (208) of the youth successfully completed the program. This is a 0.7 percentage point increase from the 79.0 percent who successfully completed the program during FY 1992-93.

**TABLE 6-4:  
ECKERD WILDERNESS CAMP PROGRAMS  
REASONS FOR DISCHARGE FOR FY 1993-94**

REASON FOR DISCHARGE	NUMBER	PERCENT
Completed treatment/Graduated	208	79.7
Withdrew	35	13.4
Administrative	18	6.9
<b>TOTAL</b>	<b>261</b>	<b>100.0</b>

*Source: Eckerd Family Youth Alternatives, Inc. Annual Descriptive Summary 1993-94*

### Outcome 2

#### **CLIENTS WILL SHOW AN INCREASE IN CLIENT FUNCTIONING LEVELS IN ACADEMIC, BEHAVIORAL, AND SOCIAL SKILLS.**

**Definition:** Standardized tests are administered to youth upon admission and within one month prior to discharge from the program. The Peabody Individual Achievement Test - Revised (PIAT-R) measures academic achievement and the Millon Adolescent Personality Inventory (MAPI) measures social and psychological functioning.

- Youth demonstrated a twelve month improvement on the Peabody Individual Achievement Test.

The program reports that prior to treatment these youth had fallen further behind their peers academically as they proceeded through school. The average camper is 1.5 years behind in grade level at the time of admission. Although the average length of stay for the program is 13.2 months, the program considers the over twelve month increase in grade level a positive outcome for these youth. For the second consecutive year the length of stay decreased and PIAT-R scores increased. See Table 6-5.

**TABLE 6-5:**  
**ECKERD WILDERNESS CAMP PROGRAMS**  
**PIAT-R PRE- AND POST- TEST RESULTS**  
**FOR FY 1993-94**

CAMP	Math		Reading Recognition		Reading Comp.		Spelling		General Info.		Total	
	Pre-test	Post-test	Pre-test	Post-test	Pre-test	Post-test	Pre-test	Post-test	Pre-test	Post-test	Pre-test	Post-test

*Source: Eckerd Family Youth Alternatives, Inc. Annual Descriptive Summary 1993-94*

*Note: An increase in scores from pre- to post- test indicates improvement in that area.*

- Youth showed improvement on all four of the subtests of the MAPI including self-concept, personal esteem, impulse control, and social conformity.

Table 6-6 indicates MAPI pre- and post- test results by camp.

**TABLE 6-6:**  
**ECKERD WILDERNESS CAMP PROGRAMS**  
**MAPI PRE- AND POST- TEST RESULTS**  
**FOR FY 1993-94**

CAMP	Self-concept		Personal Esteem		Impulse Control		Social Conform	
	Pre-test	Post-test	Pre-test	Post-test	Pre-test	Post-test	Pre-test	Post-test
E-How- Kee	59.9	47.7	60.6	51.0	68.7	50.4	66.0	51.3
E-Nini-Hassee	57.8	34.6	65.2	47.0	56.5	40.5	57.2	47.3
E-Ma-Chamee	54.6	37.7	59.4	49.2	54.1	32.9	52.0	35.2
E-Kel-Etu	55.5	34.1	51.8	40.7	69.7	44.8	62.6	43.5
E-Tu-Makee	51.3	42.8	59.0	44.2	62.3	55.6	55.9	53.3
STATEWIDE	55.8	39.4	59.2	46.4	62.3	44.8	58.7	46.1

*Source: Eckerd Family Youth Alternatives, Inc. Annual Descriptive Summary 1993-94*

*Note: A decrease in scores from pre- to post- test indicates improvement in that area. The scales measure the degree to which there is a problem within each trait. The higher the score, the greater the presence of a problem.*

### Outcome 3

**YOUTH WILL NOT REQUIRE PLACEMENT IN A PROGRAM OF EQUAL OR GREATER RESTRICTIVENESS THAN THE ECKERD WILDERNESS CAMP PROGRAM WITHIN TWELVE MONTHS OF SUCCESSFUL RELEASE FROM THE PROGRAM.**

**Definition:** Programs of equal or greater restrictiveness levels include secure or non-secure residential facilities. Data are obtained from aftercare counselors. The amount of time for follow-up was twelve months. Only those clients who had been out for a full twelve months after their graduation were included in the calculation for recidivism.

- 90.3 percent of the youth from Eckerd Wilderness Camp Programs were not placed in programs of equal or greater restrictiveness within 12 months of successful release. This is almost the same as the previous year's rate of 90.5 percent.

Table 6-7 shows the recidivism rates by camp.

**TABLE 6-7:  
ECKERD WILDERNESS CAMP PROGRAMS  
RECIDIVISM RATES FOR GRADUATES  
FOR CLIENTS RELEASED DURING FY 1992-93**

CAMP	PERCENT
E-How-Kee	15.5
E-Nini-Hassee	0.0
E-Ma-Chamee	10.7
E-Kel-Etu	4.7
E-Tu-Makee	20.0
STATEWIDE	9.7

*Source: Eckerd Family Youth Alternatives, Inc. Annual Descriptive Summary 1993-94.*

### **Program Cost**

The contracted amount for the Eckerd Wilderness Camp Program for FY 1993-94 was \$5,258,682.

### **Program Effectiveness**

The Eckerd Wilderness Camp Program reported a high rate of successful completions (79.7 percent) for youth exiting the program during FY 1993-94.

Youth have demonstrated academic gains and improved social and psychological functioning while attending the Eckerd Wilderness Camp Programs. Academic achievement, with over a twelve month increase in grade level, over an average length of stay of 13.2 months, is lower

than would be expected from a normative sample. However, because of the past history of academic difficulties, program staff consider the improvement favorable. Graduating youth continue to demonstrate improvement on the MAPI, which is a standardized measure of social and psychological functioning.

In addition to academic, social, and psychological improvement, the youth successfully completing the program show a low recidivism rate. Of the youth who successfully completed the program in FY 1992-93 (which allows for a full year of follow-up) only 9.7 percent of the youth had been placed in a facility as restrictive or more restrictive than Eckerd Wilderness Camp Programs during the twelve months after successful release. However, these recidivism rates are not comparable to recidivism rates for other delinquency services programs. It is recommended that the Department develop and maintain a data system to track Eckerd Camp clients. It is further recommended that subsequent delinquency referrals, adjudications and commitments be reported for these programs in the future.

**TABLE 6-R**  
**ECKERD WILDERNESS CAMP PROGRAMS**  
**RECOMMENDATION UPDATE**

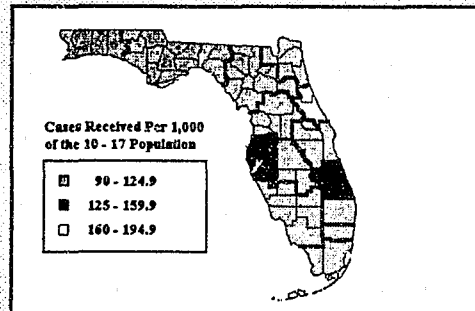

Recommendation in 1993 Outcome Evaluation	Progress in FY 1993-94	1994 Report Recommendation
<p><b>PROGRAM IMPROVEMENT</b></p> <p>Efforts should be made to maintain the Eckerd Wilderness Camp Programs as an alternative for emotionally and behaviorally disturbed youth.</p>	<p>Eckerd Family Youth Alternatives, Inc. has met the recommendation to maintain the quality of its programs. The quantity of youth accepted into, and successfully competing the program at all five wilderness locations has been attained.</p>	<p><b>PROGRAM MAINTENANCE</b></p> <p>Develop a numerical grading system for each category of the existing Eckerd Quality Assurance Program for each camp.</p> <p>Participate in the incorporation of the Department's quality assurance program.</p>

## Juvenile Justice Programs

### 7 DELINQUENCY INTAKE

#### Program Description

Under Chapter 39, Florida Statutes, Juvenile Justice has the responsibility for receiving all delinquency complaints for youth under age 18. Delinquency case managers (DCMs) perform intake duties and assess the cases on an individual basis to make recommendations to the state attorney for non-judicial handling or judicial handling (court action). Often, when the case manager recommends non-judicial handling, a structured diversionary program such as the Juvenile Alternative Services Program (JASP) is used to provide services to the client and the family.

If the case is handled judicially and the court adjudicates the youth or withholds adjudication, the case manager completes a predisposition report and recommends to the court sanctions and services for the youth and family. When cases are handled judicially, the case managers also complete preliminary screening for alcohol, drug abuse and mental health problems to determine which cases should be referred for further assessment by alcohol, drug abuse and mental health (ADM) providers.

Case managers also have a responsibility in the detention screening process. Each juvenile presented for detention requires screening by an Intake counselor to determine if the youth meets the criteria for placement in detention. This assessment of risk factors is completed prior to Intake making a decision to detain the youth. If the youth meets criteria but the case manager wants the youth released, the state attorney makes the final decision to release or place the youth in detention. A suicide risk assessment is also begun at detention screening, with referrals to mental health providers as needed.

In 1988, the legislature revised Chapter 39, F.S. by adding a statement of legislative intent, judicial detention criteria, risk assessment procedures and authorizing direct placement in home detention by Intake. The Legislature created a committee of representatives from the Florida Prosecuting Attorneys Association, the Conference of Circuit Court Judges, the Public Defenders Association and the Department. The result of this committee's work was the Risk Assessment Instrument (RAI) and the procedures associated with the use of the RAI. This instrument was implemented in late 1990. In the past four years, there have been a variety of provisions to the instrument in order to meet statutory requirements.

During FY 1991-92, the new Delinquency Case Management System was implemented statewide. This system combined the services of both Delinquency Intake, Community

Control and Furlough. The funding sources were also combined. This system provides a more complete service base as the same counselors may perform both intake and supervisory duties.

The cost data presented in this chapter covers not only the intake activities described here, but Community Control expenditures as well. This will be cross-referenced in the chapter on Community Control. Delinquency Intake is a program funded by the state's general revenue, for which all clients alleged to be delinquent are eligible.

### **Population Profile**

The Delinquency Intake system received 156,286 cases on 93,141 individual youths in FY 1993-94. This represents a 10.6 percent increase over the 141,340 cases received in FY 1992-93. District 11 (Dade) received the largest proportion of cases, with 14.5 percent, followed by District 7, with 12.2 percent. District 15 received the lowest percentage, with 2.5 percent of cases. When the number of cases received is looked at in terms of cases per 1,000 of the population aged 10-17, District 12 has the highest rate (184.5 per 1,000) and District 1 the lowest (92.8 per 1,000). Table 7-1 shows district rates in comparison to the state average. Cases rather than individual youth are described for some Intake components because they more directly reflect workload and Intake decision processes. The number of cases received is counted by unduplicating the number of referrals received on CIS by client identifier and the date the referral was received. The most serious offense for that particular case is selected as the reason for referral. If the same juvenile is referred for several offenses on the same date, these would be counted together as one case. If that juvenile is referred for one or more offenses on another date during the year, it would be counted as another case. Where more appropriate, individual youth counts were used to present demographic information at Intake.

Source: CIS (delinquency referral records received during FY 1993-94; extract date - February 1995)

*Note: The number of cases received is counted by unduplicating the number of referrals reported received on CIS by client identifier and date. If the same juvenile is referred for several offenses on the same date, these would be counted together as one case. If that juvenile is referred for one or more offenses on another date, it would be counted as another case. The number of youth is counted by unduplicating the number of referrals reported by client identifier choosing the last referral date in the fiscal year. If the same juvenile is referred for several offenses in the same fiscal year, these would be counted together as one youth.*

Demographic data were based on the 93,141 individual youth who had referrals received during the year. Youth from 15 to 16 years comprised 38.1 percent of the total youth who had cases received, with the 13-14 age group representing 22.7 percent and the 17+ age group representing 28.7 percent. Males represented 73.6 percent of the referral population. Tables 7-3 and 7-4 summarize the race and gender of the youth whose cases were received during FY 1993-94 at Intake. Whites represented 59.4 percent of the total, blacks represented 39.3 percent and other races represented 0.5 percent.

Source: CIS (delinquency referral records received during FY 1993-94; extract date - February 1995)

According to the Client Information System, 22.4 percent of all delinquency cases were for felony offenses against property and 26.3 percent of all the cases were for misdemeanors against property. Another 10.0 percent of all referrals were for felony offenses against persons and 11.3 percent were for misdemeanors against persons. These figures are all within one percentage point of the breakdowns for FY 1992-93.

Source: CIS (delinquency referral records received during FY 1993-94; extract date - February 1995)

In order to assess the system as a whole, it is important to determine to what extent the Intake counselor attempts to handle referrals non-judicially. Table 7-6 compares the percentages of cases recommended for non-judicial handling by Intake with those cases in which non-judicial action was taken by the state attorney, including a breakdown by district. An average of 42.2 percent of cases statewide were recommended for non-judicial handling by Intake and 38.1 percent had non-judicial action taken by the state attorney. In District 5, Intake recommended 38.8 percent and only 19.2 percent were handled non-judicially. In Districts 3, 4, 8, 10 and 13 a slightly larger portion of cases was handled non-judicially than was recommended by Intake. During the previous year (FY 1992-93), 44.1 percent were recommended for non-judicial handling and 39.6 percent were actually handled non-judicially. In FY 90-91, 45.7 percent were recommended for non-judicial handling and 41.6 percent actually handled non-judicially. The figures for FY 1989-90 were 42.0 percent recommended and 38.6 percent handled non-judicially.

Source: CIS (delinquency referral records disposed during FY 1993-94; extract date - February 1995)

Data on FY 1993-94 cases disposed indicates that 56.1 percent of cases were recommended by Intake staff to be handled judicially (petition), and 43.1 percent to be handled non-judicially (no petition). The state attorney's offices filed petitions on 55.7 percent of the cases (Table 7-7) and allowed for non-judicial handling for 38.9 percent of cases. The major difference was not in the numbers recommended for judicial handling but in the numbers recommended by Intake for adult court (0.8 percent) and the numbers actually sent to adult court by the state attorney (5.4 percent). In the end, 4.1 percent were actually handled in adult court.

**TABLE 7-7:**

### Program Cost

Total expenditures reported for the Delinquency Intake system in FY 1993-94 are included in a combination of the funding for Intake, Community Control, Furlough and Delinquency Case Management. The total amount was \$50,638,632 (See Table 7-9). This does not include diagnosis and evaluation funds administered by the Alcohol, Drug Abuse and Mental Health Program Office of the Department of Health and Rehabilitative Services.

**TABLE 7-9:

- \* Separate cost figures for Community Control and Delinquency Intake are not available because the two are combined in the Delinquency Case Management system.

### Program Effectiveness

The number of youth who enter the juvenile justice system continues to rise, as indicated by the rate per 1,000 of the population ages 10-17 rising from 112.0 to 120.9. There is notable variation in the rate per 1,000 of the population ages 10-17 across districts which does not appear to be related to either demographic characteristics or the seriousness of alleged offenses. Likewise, variation exists with regard to decisions made on judicial and non-judicial handling.

There appears to be a slight upward trend over the last few years in both the numbers of cases recommended by Intake for non-judicial handling and the numbers where the state attorney's action was non-judicial. This year the number handled non-judicially was lower than the numbers recommended by intake, but the number of cases transferred to adult court continues to be much higher than intake's recommendation. Work is still needed in this area, along with a

closer look at the wide variation across districts. While solutions require cooperative work with the courts and law enforcement, the Department could take the lead to assure that all cases which can be handled non-judicially are handled in this manner.

DELINQUENCY INTAKE  
RECOMMENDATION UPDATE**

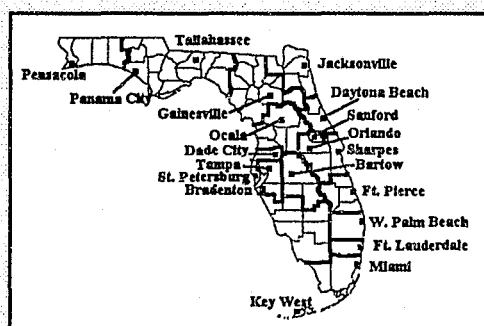

Recommendation in 1993 Outcome Evaluation	Progress in FY 1993-94	1994 Report Recommendation
<p><b>Program Maintenance</b></p> <p>Work should be continued on diversion practices. Concerns of public safety and appropriate placement of clients need to be addressed.</p>	<p>The 1994 Legislature created the Department of Juvenile Justice. As a result, all Intake procedures are being reviewed by the new department and studies are underway to combine Delinquency Intake and Post Placement Services into a new area called Case Management.</p>	<p><b>Program Maintenance</b></p> <p>Future Outcome Evaluation activities should focus on Delinquency Intake and Community Control as a function of Case Management. Expanding diversion opportunities and improving practices begun during the previous year should continue at the state and local level.</p> <p>The impact of planned improvements in assessments for youth served, by the Juvenile Assessment Centers being implemented, should be evaluated in the future.</p> <p>Intake and Community Control expenditures should be separated in the Juvenile Justice case management system.</p>

## Juvenile Justice Programs

### 8. HOME DETENTION

#### Program Description

**Home Detention** is the provision of short-term supervision while a youth is released to the custody of his/her parents, guardian, or custodian in a physically non-restrictive home environment under the supervision of a community youth leader (CYL) pending adjudication, disposition, or placement. Home detention provides a less restrictive alternative to secure detention for those youth who do not present a threat to the community or a substantial risk of not appearing at a subsequent court hearing. The intent is to maintain a 7:1 counselor to client ratio in order to provide intensive community based supervision. There is a home detention program attached to each of the 20 secure detention facilities as well as a program in Key West.

**Non-Secure Detention**, developed in FY 1991-92, is another alternative to placement in secure detention. In non-secure detention a youth is placed in a contracted residential home in the community. Youth are supervised by community youth leaders pending adjudication, disposition, or commitment placement. The department is committed to providing less restrictive alternatives to secure detention for those youth who do not present a threat to the community or a substantial risk of not appearing at a subsequent court hearing. The primary purpose of non-secure detention is to provide short term non-secure placement of youth who meet detention criteria. Youth meet criteria for non-secure detention as determined by their score on the risk assessment instrument. These youth present a lesser degree of risk to public safety than youth placed in secure detention. Although the youth may have a documented history of failure to appear in court, non-secure detention placement is intended to ensure the youth is available for scheduled court appearances.

#### Population Profile

The home detention program served 15,845 youth in 398,594 service days in FY 1993-94. This represents a 1 percent increase in youth served and service days from FY 1992-93 totals. Table 8-1 provides the client to counselor ratio, based on the number of community youth leader (CYL) positions and the average daily population, for the home detention programs in the state. Staff statewide averaged 7.7 active cases per counselor which is higher than the expected ratio of seven cases per counselor. The statewide ratio, along with the ratios for several programs, reflect proper program utilization. It should be understood that several programs are also using

staff to supervise youth in commitment pre-placement supervision status. These are youth who have been committed for a delinquent offense, but are at home awaiting a placement vacancy. More detailed information on where, and to what extent, this is happening is not available.

Client Information System (CIS) data were obtained for 9,833 youth released from home detention programs in FY 1993-94. Table 8-2 details the demographic information for home detention cases closed in FY 1993-94. The data indicate that 50.1 percent of the youth were black while 48.5 percent were white. The percent of black youth in home detention is more than that in the Intake population (39.3 percent), but comparable to the percentage in secure detention (52.3). Male youth comprised 83.1 percent of the total number served and females made up 16.6 percent.

## Outcome Measurement

### Outcome 1

#### **YOUTH PLACED IN HOME DETENTION WILL NOT ABSCOND OR BE PLACED IN SECURE DETENTION BEFORE THEIR SCHEDULED HEARING.**

**Definition:** The percentage of youth attending scheduled court hearings, not being returned to secure detention, and not charged with new law violations while on active home detention supervision measures this outcome. The Detention Superintendent's Monthly Report prepared by JJP staff provides the data for this measure.

- 12.3 percent of youth were returned to secure detention.
- 2.7 percent of youth were returned to secure detention for failure to appear in court.
- 3.7 percent of youth were returned to secure detention for being charged with a new law violation.

Table 8-3 shows that in most areas statewide the program appears to be achieving the expected outcomes. The percentages of the population returned to secure detention and failing to appear were about the same as for the preceding fiscal year (FY 1992-93), but the percentage charged with a new law violation increased by almost half.

**TABLE 8-3:  
HOME DETENTION  
PERCENTAGE OF CLIENTS SERVED BY OUTCOME  
FOR FY 1993-94**

\* The 58 clients served by the home detention program in Monroe County are not tracked and not included.

\*\* Source: Detention Population Count and Analysis Report for FY 1993-94

\*\*\* Source: Superintendent's Monthly Report for FY 1993-94

Seven of the twenty-one programs had returned to secure detention rates that exceeded the state average. Duval had an extremely low rate of only 2.7 percent returned to secure detention, while Escambia had the highest return rate at 24.4 percent. The home detention program in most counties had less than 3 percent of those served failing to appear in court. Only Orlando, Broward and Dade had failure to appear rates above the statewide average. The Palm Beach program had a very high percentage (8.3 percent) charged with new law violations, when compared to the percentages for other programs.

### Program Cost

Table 8-4 provides district and statewide expenditures for both the home detention and non-secure detention programs. The statewide expenditures for home detention of \$6,342,361 is less than last year's total of \$6,436,049.

### **Program Effectiveness**

The home detention program appears to provide a less restrictive, cost effective method of supervising youth that have been classified in need of detention. The low client to counselor ratio appears to indicate that the program is not being utilized to its fullest capacity. However, indications are that the program is being used to supervise committed delinquents who are awaiting placement. The program overall is effective in terms of its outcomes and is a good alternative to secure detention. The high number of failure to appear cases in Dade (District 11) needs to be looked into more fully to identify the cause of the unusually high rate. Attention also needs to be given to the home detention program in Palm Beach because of the relatively large percentage of new law violations. The high rate may be attributable to the type of youth considered for possible placement in home detention in that county.

**TABLE 8-R

RECOMMENDATION UPDATE**

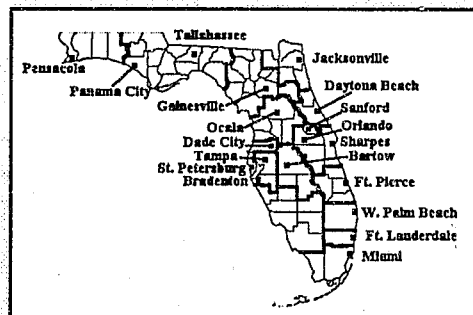

Recommendation in 1993 Outcome Evaluation	Progress in FY 1993-94	1994 Report Recommendation
<p><b>Program Improvement</b></p> <p>Placement of youth in more structured non-residential programs such as SIG as well as electronic monitoring may be beneficial.</p>	<p>The 1993-94 Legislative session authorized funding for an additional 254 home detention slots to alleviate secure detention over-utilization.</p>	<p><b>Program Expansion</b></p> <p>Additional funding should be requested for FY 1994-95 to provide additional units statewide, in order to reduce secure detention over-utilization.</p>

## Juvenile Justice Programs

### 9. SECURE DETENTION

#### Program Description

Detention services are operated for youth screened or ordered into secure custodial care pursuant to section 39.044, Florida Statutes. The purpose of the Secure Detention Program is to provide a safe and secure setting for youth requiring detention to protect public safety, and to ensure youth detained by intake or the court will be available for their scheduled court hearings.

There are 20 regional detention centers operated by the department. These centers operated with fixed bed capacities ranging from 27 (Pasco County) to 206 (Dade County). The total statewide capacity was 1,376 beds.

Secure detention centers offer a number of services to youth including: basic educational services, medical services, mental health crisis intervention and recreational activities. Eighteen of the state-operated Secure Detention Centers have been individually accredited by the American Correctional Association (ACA) and operate under policy requirements often more stringent than ACA standards. One center, the Southwest Florida Regional Detention Center in District 8 (Ft. Myers), has been designated as a regional training resource center for the ACA.

Youth are detained in secure detention based on statutory criteria outlined in section 39.044 (2), Florida Statutes. Basic to this decision is the use of the Detention Risk Assessment Instrument. If the youth meets the criteria and scores at a certain level on the risk assessment, the youth may be detained. If the Intake counselor or case manager determines that a child is eligible for detention based upon the results of the risk assessment instrument, but should be released or placed in a lower level of detention, e.g., home detention, he/she then contacts the state attorney, who may or may not grant the request.

Detention is only to be used when a youth:

- presents a substantial risk of inflicting bodily harm on others;
- presents a substantial risk of failing to appear in court;

- presents a history of committing a serious property offense prior to adjudication, disposition, or placement; or
- requests protection from imminent bodily harm.

Detention **cannot** be used for the following:

- to allow a parent to avoid his or her legal responsibility;
- to permit more convenient administrative access to the child;
- to facilitate further interrogation or investigation;
- due to a lack of more appropriate facilities; or
- for a youth alleged to be dependent or in need of services.

### **Population Profile**

In FY 1993-94 there was a total of 35,499 admissions to secure detention and an additional 5,608 transfers into the program from other secure detention centers, home detention or non-secure detention. These cases, along with the 1,190 cases active at the beginning of the year add up to a total of 42,297 cases served. This figure represents cases rather than individuals. Some youth had more than one admission during the year. Data from the Client Information System (CIS), on which all stays in detention are not reported, for FY 1993-94 show 19,304 clients were released from secure detention statewide. See Table 9-1. The average age was 15.8, with 15-17 year olds making up over two-thirds (67.1 percent) of the clients. Black youth represented 52.3 percent of the population, while whites comprised 46.5 percent. The percent of black youth in secure detention is larger than the percent in the Intake population (39.3 percent) and in the home detention population (50.1 percent). Females made up only 16.6 percent of the secure detention population.

*Source: CIS/DDR (cases disposed with interim placement of detention during FY 1993-94)*

Table 9-2 provides a breakdown of delinquency offenses by district for youth reported on CIS as admitted to detention during FY 1993-94. Felony offenses comprised 71.5 percent of the cases, while 13.6 percent were misdemeanor offenses, and 15.0 percent were for other delinquency offenses. These percentages are comparable to last year's figures.

Of the 19,304 clients reported released during FY 1993-94, 27.9 percent had no previous felony delinquency referral history, and 29.3 percent had no previous misdemeanor referral history prior to being screened into detention.

According to data compiled from the Superintendent's Monthly Report, a total of 115 of the youth admitted during FY 1993-94 were detained for contempt of court, as compared to 204 youth in the previous fiscal year, and 545 youth in FY 1991-92.

### **Program Data**

The average length of stay in secure detention during FY 1993-94 was 12.6 days. The statewide average daily population (ADP) was 1,457.9 during FY 1993-94, which is higher than the ADP of 1,274.1 in FY 1992-93.

The actual utilization of available beds varied widely between detention centers, from 152.9 percent for Hillsborough to 78.6 percent for Pinellas. Eleven of the 20 facilities were over-utilized with utilization rates exceeding 100 percent. Table 9-3 presents a comparison of the utilization rate and the level at which each facility is staffed. The statewide average of staffing was 93.4 percent, while seven of the eleven over-utilized centers were staffed at less than 90 percent.

### Outcome Measurement

#### **Outcome 1**

**YOUTH IN SECURE DETENTION WILL BE HELD IN A SECURE SETTING WITHOUT ESCAPING.**

**Definition:** Escapes occurring within the secure perimeters and ones which occur outside the secure perimeters are combined into one figure for this measurement.

- There were 37 escapes from secure detention during FY 1993-94.

The 37 escapes, as shown in Table 9-4, during FY 1993-94 is lower than the previous fiscal year total of 42. The 37 escapes account for less than one percent of youth served. Statewide, 16 of the 37 escapes were from within the secure perimeters of the detention centers while 21 occurred outside the secure perimeters of the facilities.

## Outcome 2

### YOUTH IN SECURE DETENTION WILL REMAIN SAFE DURING THEIR STAY.

Definition: Safety in secure detention is presently measured by client on client assaults.

- There were 1,229 client on client assaults reported for FY 1993-94.

Table 9-4 includes data on the number of client on client assaults by secure detention center during the fiscal year. An assault is reported when any injury occurs, even those which require minor first aid. The statewide total of assaults (1,229) is less than the previous year's total of 1,394, and the statewide rate of 2.9 assaults per 100 youth served is also lower than the preceding fiscal year's rate of 3.8 assaults per 100 youth served. The centers with the higher rates of client on client assaults per 100 youth were Marion (8.7), S. W. Florida (8.0) and Alachua (6.9). The centers with the lower rates for assaults per 100 served were Pasco (0.0 percent), Seminole (0.0 percent) and Pinellas (0.9 percent).

**TABLE 9-4:**

## Program Cost

Table 9-5 provides a cost comparison by district. The total expenditures of \$46,326,758 represented an increase of \$1,717,766 (or 3.9 percent) over FY 1992-93.

**TABLE 9-5:  
SECURE DETENTION

VOLUSIA	1,710,963	1,667	23,779
MARION	1,661,527	1,320	24,401
POLK	1,644,036	1,834	30,933
ST. LUCIE	2,008,241	1,118	18,146
<b>TOTAL</b>	<b>\$46,326,758</b>	<b>42,228</b>	<b>532,146</b>

*Source: SAMAS, FY 1993-94 and Detention Population Count and Analysis Report, FY 1993-94.*

Costs do not include educational expenditures covered by local school boards, but do include costs for any transportation, medical services, diagnostic evaluations, maintenance or food services which are purchased by the centers as well as staff. Comparisons of district level costs should be made with caution, as the costs of capital improvements are included in these figures.

## Program Effectiveness

The number of youth served in secure detention increased during FY 1993-94. Even though the number of fixed beds in 3 of the 20 facilities increased over the previous fiscal year, 11 of the 20 were over-utilized. The average length of stay (ALOS) in secure detention was 12.6 days in FY 1993-94 which was the same as the ALOS in FY 1992-93.

In terms of primary outcome measures, i.e., escapes and youth safety, secure detention appears to continue to be effective. There were less escapes statewide than in FY 1992-93; a rate of less than one per 1000 youth served was recorded for FY 1993-94. The rate of client on client assaults decreased from 3.8 in FY 1992-93 to 2.9 in FY 1993-94.

**TABLE 9-R**  
**SECURE DETENTION**  
**RECOMMENDATION UPDATE**

Recommendation in 1993 Outcome Evaluation	Progress in FY 1993-94	1994 Report Recommendation
<p><b>Program Maintenance</b></p> <p>Additional bed capacity is needed in the seven centers that were over-utilized.</p>	<p>The 1993-94 gun law legislation authorized funds to re-open previously closed modules in four detention centers, adding an additional 106 beds. Funding was also secured for 225 secure beds. These were allocated to nine centers with a utilization rate of over 100 percent and two centers with over 90 percent utilization.</p>	<p><b>Program Expansion</b></p> <p>Additional funding should be requested for additional facilities/beds, secure detention staffing, and transportation services to account for the expected growth in the juvenile population and to insure adequate staff at all centers.</p>

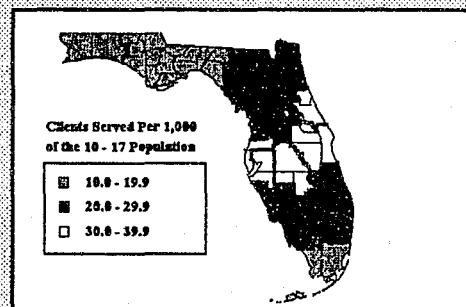

## Juvenile Justice Programs

### 10. COMMUNITY CONTROL

#### Program Description

The intent of the Community Control Program is to reduce the further incidence of juvenile delinquency by youth under community supervision. Youth enter either through the Delinquency Case Management System, or on recommendation of the state attorney, where judicial handling of their individual cases is recommended. The court decides that supervision in the community is an

appropriate alternative to placement in a commitment program. The program also serves youth who are returning to the community from a commitment program. Community Control is authorized by Chapter 39 of the Florida Statutes. The program is funded through a state general revenue appropriation. Implementation of the new Delinquency Case Management system began on a limited geographic basis during the 1990-91 fiscal year and the system has functioned statewide since FY 1991-92. The Case Management system incorporates the service functions of both Community Control and Delinquency Intake.

Community Control is an individualized program of supervision. Delinquency case managers provide supervision and supportive services to juvenile offenders who have been placed on Community Control by circuit court judges. Case Managers are also responsible for a youth's compliance with court-ordered sanctions (or penalties) that are consistent with the seriousness of the offense for which the youth was adjudicated or had adjudication withheld. Termination from Community Control must be approved by the court.

A description of Post-Commitment Community Control and the Furlough programs can be found in the chapter on Post Placement Services.

#### Population Profile

Statewide, the total youth served (beginning count and admissions) was 33,533. The Community Control caseload includes some youth who receive services through the AMI non-residential facility-based program and the TRY centers (see Chapter 12 for a description of these programs). The services they receive through AMI and TRY are in addition to Community Control services. Although in past years a manual reporting system has provided information on non-committed youth, this has been phased out and the FACTS database does not include non-committed youth. Therefore, separate counts by program (AMI and TRY) for non-committed youth are not available from the data system for FY 1993-94.

Demographic data, including age, sex and race, by district, are also shown in Table 10-1. The average age at termination of Community Control is 16.6 years. The average age of community control client's first delinquency referral is 14.1. Statewide, minorities made up 39.4 percent of cases on Community Control in FY 1993-94, which is down from the 42 percent in FY 1992-93. This is nearly equal to the 39.8 percent who came into the system through intake.

### Client History

Community Control serves adjudicated delinquents as well as delinquents whose adjudication was withheld, whom the courts feel can be served effectively in the community without being committed to more restrictive non-residential or residential programs.

## Program Data

As shown in Table 10-2, the average length of supervision for youth in Community Control during FY 1993-94 was 8.3 months, down from last year's 9.7 months.

## Outcome Measurement

### Outcome 1

#### **YOUTH WILL SUCCESSFULLY COMPLETE THE PROGRAM.**

**Definition:** Cases considered successful were those coded "honorable" or "required by law" terminations in CIS. Program policy states that completion of sanctions is necessary for successful completion.

- 79.9 percent of Community Control youth successfully completed the program.

Table 10-3 provides a breakdown by district of the percentage of successful completions for the fiscal year. The statewide successful completion rate was slightly less than last year's 82.1 percent. The rate varied across the districts, from 58.6 percent in District 15 to 87.3 percent in District 10.

Table 10-4 displays the termination reasons by type for each district. The most common reason for termination was honorable discharge, followed by "required by law," indicating that the period of Community Control supervision required by the court had ended, or the youth had turned 19.

## Outcome 2

**THERE WILL BE NO SUBSEQUENT LAW VIOLATIONS BY YOUTH WITHIN ONE YEAR OF RELEASE FROM THE PROGRAM.**

**Definition:** Many measures can be utilized as indications of recidivism, all related to subsequent law violations. A number of such measures are presented below. Re-referrals indicate that youth have been charged with another delinquent offense, but a subsequent referral is not necessarily evidence that the youth committed the offense charged. Determination of whether a subsequent law violation occurred is more accurately measured in Juvenile Justice data systems by whether there was an adjudication (or adjudication withheld) for one or more delinquent offenses following release. Such a finding by the court is a clearer measure than a subsequent referral. Adult felony convictions, for which youth were placed on adult probation or sentenced to adult prison, are also tabulated. A combined juvenile and adult felony conviction rate is also presented, as is a total of all juvenile adjudications and adult felony convictions. The operational definition of recidivism is, finally, the number of youth released from a program between January and June of 1993 who had been recommitted to Juvenile Justice, placed on adult probation or sent to prison within one year following release.

- 19.1 percent of Community Control releases were readjudicated during the year following release. This data includes follow-up into the adult Department of Corrections but does not include an adult misdemeanor conviction rate.

Table 10-5A represents the percentage of referrals which were received after a youth was released from a program. The total number of releases includes only youth whose termination status was: terminated, satisfactory adjustment; or, terminated, unsatisfactory adjustment. Youth released between January 1 and June 30, 1993 are included in this table. Tables 10-5B & 10-5C provide a comparison of readjudication and recidivism rates for the population studied.

Source: CIS/Provider/TP1, OE Extract, FY 1993-94 (clients released between January and June 1993) and the Department of Corrections' FY 1993-94 probation and prison extract.

The recidivism rate for Community Control is 9.9 percent, this includes youth who have been recommitted to Juvenile Justice, placed on adult probation or sent to prison within one year following release.

### **Program Cost**

The expenditures for Community Control supervision during FY 1993-94 were a part of the cost for Intake and Case Management, which are reported in Chapter 7. The three functions together cost \$50,638,632 in FY 1993-94. They are reported together because the same budget category is used for all three programs. Expenditures cannot be separated for each program component at this time.

### **Program Effectiveness**

Community Control appeared to achieve favorable results in FY 1993-94 on successful program completions, although there is some question about the criteria used and CIS coding used by some districts. Performance was slightly lower than the rates achieved in FY 1992-93. In Community Control, 79.9 percent of releases in FY 1993-94 successfully completed the program as compared to 82.1 percent in FY 1992-93.

Re-referrals, readjudications and recommitments are three follow-up measures provided. Over 19 percent were adjudicated for a new law violation during the year after supervision. The recidivism rate was 9.9 percent.

Some Community Control youth also receive AMI or TRY services. Identifying them is impossible unless data on noncommitted youth are entered in FACTS. The old manual tracking system no longer exists. Outcomes for these youth cannot be reported separately from the overall Community Control outcomes.

**TABLE 10-R**  
**COMMUNITY CONTROL**  
**RECOMMENDATION UPDATE**

Recommendation in 1993 Outcome Evaluation	Progress in FY 1993-94	1994 Report Recommendation
<p><b>Program Maintenance</b></p> <p>Program effective measures and cost data need to be collected in order for an accurate program assessment to be made. This assessment is essential since the data suggest that community control (and case management) are especially effective for the types of youth served.</p>	<p>The 1994 Legislature created the Department of Juvenile Justice. As a result, a new Management Information System will be developed that adequately tracks client information such as successful completion, and administrative data such as cost per client served etc.</p>	<p><b>Program Maintenance</b></p> <p>The Department should continue its efforts through the development of the Management Information System to comply with the 1993 Recommendations under the new Department's structure.</p> <p>Separate Intake, Community Control and Case Management expenditures in the Delinquency Case Management system.</p>

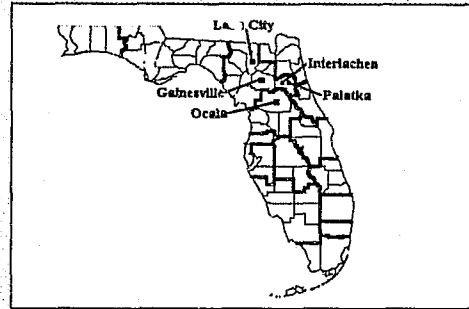

## Juvenile Justice Programs

### 11. CREST SERVICES, INC.

#### Program Description

The CREST (Counseling, Research and Education Specialist Teams, Inc.) program is intended to provide a low cost professional counseling resource to youth (ages 10-19) in community-based treatment in order to reduce the crime rate among such youth, prevent further involvement in the delinquency system, and enable them to function successfully in the community. Services are

provided under contract with CREST to youth in Alachua, Putnam, Columbia, and Marion counties (Districts 3 and 13). CREST Services, Inc. uses University of Florida interns in the graduate program for counselor education to provide counseling. The caseload is generated from referrals by Juvenile Justice case management counselors based on a youth's need for more support and supervision.

#### Client Profile

In FY 1993-94 CREST served 270 clients. Table 11-1 provides demographic information.

### **Outcome Measurement**

By May 31, 1994, 182 Community Control clients had completed the program. A total of 149 (81.9 percent) were rated by Crest, as successfully completing the program. Successful completion was not defined in the project's report.

#### **Outcome 1**

**CLIENTS REFERRED FROM COMMUNITY CONTROL WILL NOT BE ADJUDICATED FOR A NEW LAW VIOLATION WITHIN ONE YEAR AFTER LEAVING THE PROGRAM.**

**Definition:** Information was gathered on 80 Community Control clients from the HRS Client Information System and reported by the provider in the CREST Annual Report<sup>1</sup>. The CREST contract specified that 60 percent of clients referred by Community Control between July 1 and March 31 would not be adjudicated for a new law violation.

- 86.3 percent (69 clients) of the Community Control clients terminated between July 1, 1993 and March 31, 1994 were not charged with a new law violation during or after CREST treatment.

This exceeds contract requirements. It would be helpful to know how many were charged with a new law violation during treatment. Recidivism rates should also specify the length of time the clients were followed after program completion.

However, it should be noted that in an effort to evaluate the long term effects of treatment on recidivism, a sample of the FY 1992-93 caseload was followed through April 1994 by Project Crest. The sample consisted of 68 clients who were terminated between July 1, 1992 and March 31, 1993. Of the 68 clients, 56 (82.3 percent) had not been readjudicated for a new offense. Five of the 68 (7.4 percent) were committed during the follow-up period.

#### **Outcome 2**

### **COMMUNITY CONTROL CLIENTS SERVED BY CREST WILL NOT BE COMMITTED.**

**Definition:** Information was gathered from clients' records in the Client Information System (CIS) and reported in the CREST Annual Report. The CREST contract required no more than a 20 percent commitment rate among the Community Control clients.

Of the 80 Community Control clients who completed the program, 71 (88.8 percent) were not committed.

The 88.8 percent of youth that were not committed, exceeded contract requirements as written. The time period was not specified in the Project CREST Annual Report.

#### **Outcome 3**

### **CREST WILL BE PERCEIVED AS HELPFUL BY CLIENTS SERVED.**

**Definition:** A program-developed questionnaire was used to assess client perceptions of program effectiveness. The instrument contained 16 items, including opinions on counseling and self-reports on grades and school conduct. Sixty-nine questionnaires were returned. CREST contract requirements stated that at least 90 percent of clients served would perceive the program as helpful.

- 88.4 percent indicated that, overall, CREST counseling was worthwhile.

#### **Outcome 4**

### **A POSITIVE CHANGE IN ATTITUDE WILL BE DISPLAYED BY CLIENTS SUCCESSFULLY COMPLETING THE PROGRAM.**

**Definition:** A self-report instrument and the Jesness Inventory were utilized to assess positive attitudinal change among clients successfully completing the CREST program. Jesness Inventory results are based on pre- and post- measurements for 69 students. The

Jesness Inventory is an attitudinal measure designed for use with juvenile delinquents in measuring attitudes toward social values. It is composed of 11 subscales.

- Results obtained from the self-report instrument administered to CREST clients show that 99 percent feel they have a better outlook and 93 percent feel they appreciate the feelings of others better since CREST counseling.
- Change in a positive direction was observed on 7 of the 11 Jesness Inventory scales. The greatest degree of change was observed on the Asocial Index ( $p < .05$ ), the scale designed for the specific purpose of predicting future delinquent behavior.

According to the Jesness Inventory results reported by CREST, change scores are greatest for older clients (ages 17 and 18) and then younger clients (ages 15 and 16). Change scores by sex are stronger and more significant for boys than girls. Black clients usually have higher JI pre-test scores than white clients but change in a positive direction (lowered scores) has been greater among blacks on the asocial index which is the major scale design to predict future delinquency.

### **Program Cost**

The amount expended for CREST Services was \$92,620<sup>2</sup> in FY 1993-94. This is 14.3 percent higher than the \$81,003<sup>2</sup> expended in FY 1992-93. This represents an average of \$343 per case served which is up considerably from the \$263 per case served in FY 1992-93.

The cost of the Project CREST program is kept low by the use of interns from the University of Florida. Graduate-level students in counseling use CREST to obtain required internship credits.

### **Program Effectiveness**

CREST Services is an enhancement to the Community Control program in Districts 3 and 13. It operates at low cost and provides services that Community Control counselors would not be able to provide. The information available on this program has varied from year to year depending on the research studies conducted on the program by graduate students, as well as monitoring conducted by Juvenile Justice. Some standardization of data collection is still needed. The follow-up period needs to be standardized to one year from the date of discharge for each youth. Standardization would enable appropriate comparisons to be made with other Juvenile Justice programs. Nevertheless, the weight of the evidence continues to support the view that CREST is an effective, low-cost program. It has the added advantage of helping to prepare master's level counseling students for employment.

RECOMMENDATION UPDATE**

Recommendation in 1993 Outcome Evaluation	Progress in FY 1993-94	1994 Report Recommendation
<p><b>Program Maintenance</b></p> <p>This program has low recidivism and high suppression rates and should be maintained.</p> <p>A standard definition of successful completion needs to be developed.</p> <p>Consideration should be given to expanding this program to other districts where there are universities who could provide interns.</p>	<p>Clients continue to show high suppression and low recidivism rates.</p> <p>There is no progress in developing a standard definition of what constitutes successful completion.</p>	<p><b>Program Expansion</b></p> <p>This program is an excellent enhancement to community supervision that should be expanded.</p> <p>The definition of successful completion should be addressed in the Project Crest Annual Report.</p>

## **12. NON-RESIDENTIAL COMMUNITY-BASED COMMITMENT PROGRAMS**

### **Program Description**

Non-Residential Community-Based Commitment Programs provide structured and specialized treatment for youth in order to reduce the rate of future law violations and improve the functioning of the youth in the community. Use of these programs is intended to assist in the reduction of the inappropriate placement of youth in residential programs.

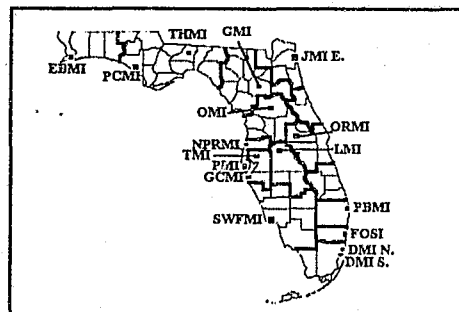

There are four main types of non-residential community-based commitment programs located around the state: Associated Marine Institutes, Inc. (AMI); Treatment Alternatives for Youth (TRY) Centers; Special Intensive Groups (SIG) and Intensive Non-Residential Work Programs. Broward Non-Residential Halfway House is also a level two program that is found in this chapter. Youth classified for this level of placement are minor offenders who are viewed as not representing a threat to public safety. Current charges or presenting offenses range from first and second degree misdemeanor offenses to property offenses classified as third degree felonies (e.g. resisting arrest without violence, criminal mischief, petit theft, auto theft, etc.). Patterns of offending are infrequent and non-violent, and are oriented toward property crimes rather than crimes against people.

Programs in the non-residential restrictiveness level are designed for committed youth who have no serious prior offending history. Youth may have had prior adjudications but may not have been committed. If a prior commitment exists, placement at this level may be appropriate if the commitment history is minor. In addition to their current offense and offending histories, youth assessed to be in need of non-residential placement are characterized by their amenability to supervision, guidance and direction by treatment staff. The youth live at home with their parents or guardians while participating in the program or have other acceptable living arrangements. They are usually responsive to program requirements, can follow schedules, keep appointments and meet reporting requirements imposed by treatment staff. They do not require the structured environment of a 24-hour supervision residential program.

Release from non-residential commitment programs is contingent upon the approval of the committing judge based on the recommendation of the program director or supervisor. The decision is based primarily upon the youth's successful completion of his or her performance contract.

**AMI.** AMI is a private, nonprofit organization contracting with HRS to provide specialized educational, vocational, and counseling services for delinquent youth. Seventeen Marine Institutes are operated within the state. Cities where the programs are located include Miami (two programs), Ft. Lauderdale, West Palm Beach, Lakeland, Orlando, Jacksonville, Gainesville,

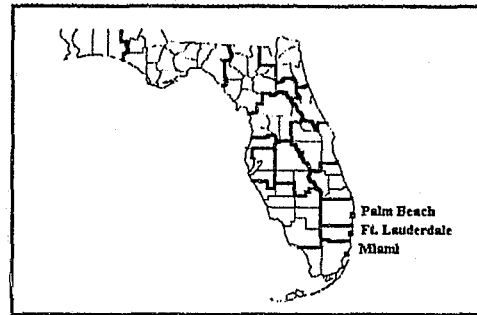

Tallahassee, Pensacola, Panama City, Ocala, New Port Richey, Tampa, St. Petersburg, Bradenton, and Ft. Myers. The Tallahassee and Lakeland Marine Institute opened during this fiscal year. The Gainesville, Ocala and Orlando Marine Institute offer enhanced services during the first 30 days of placement for ten youth. The facilities offer extended hours to these youth. During the evening hours until 9 p.m. the program will focus on enhancing daytime academics and other program courses. Week-end services will be provided from 8 a.m. through 5 p.m. and will include special outings related to training received during the weekday program. All successful terminations from these two programs will receive home follow-up services related to individual service goals for up to six months. AMI programs are budgeted for an average length of stay of six months.

The AMI co-educational programs provide educational and training services while allowing the participating youth to remain with their families. The vocational program provides the opportunity to develop a wide variety of occupational skills through classroom instruction and on-the-job training. Specific areas of vocational instruction include boat handling, seamanship, scuba diving, practical oceanography, marine mechanics, small engine repair and maintenance. Preparation for the General Educational Development (GED) testing program and basic academic and remedial classes are also provided at each institute. Overnight trips or cruises are conducted periodically for selected youth to practice skills learned in the classroom.

The program provides individualized counseling and instruction for each participant. In addition, AMI develops and maintains an active job placement program to assist participants in finding employment upon completion of the program. Youth who are physically able to participate may be admitted to the AMI program.

**TRY Centers.** TRY Centers are co-educational programs staffed by departmental employees and designed to serve 20 committed youth. The youth participating in TRY Center programs live at home while receiving intensive counseling (individual, family and group) and day treatment services. The budgeted length of stay is four months. TRY Centers are located in Districts 9, 10 and 11.

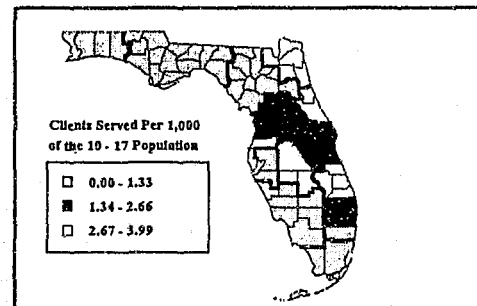

The TRY Center coordinates services to meet the individualized needs of youth served. A structured program of activities may include recreational activities, tutoring services, community services, volunteer services and other learning experiences. Each youth participates in educational or vocational programs during the day with local school boards providing instruction within the program. Close daily contact is made with the youth in community placements, whether at school or work.

In order to be admitted into this program, youth must have local home placements, preferably with parents or guardians, and their parents or guardians should also express a willingness to participate in scheduled family counseling services.

The 1994 Legislature discontinued funding for TRY Centers in FY 1994-95.

**SIG.** The SIG program is a commitment program for delinquent youth characterized by small counselor caseloads and frequent contacts in the youth's community. In order to meet contact requirements, SIG counselors supervise an average active caseload of eight to ten youth for a budgeted period of four months.

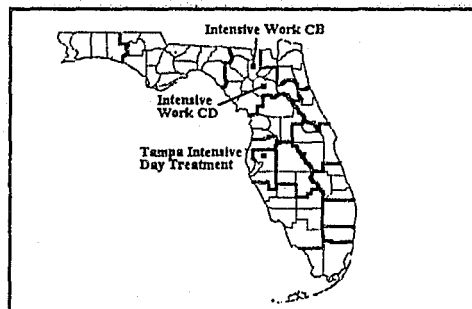

Treatment approaches used are a combination of group interaction and/or individual counseling sessions with the youth and family members. Counselors use the treatment approach best suited to the youth's needs and the circumstances (for example, geographic spread and individual needs) of the current active caseload.

Extensive and continuous contacts with the youth, parents and community resources are imperative to successful supervision. Counseling is provided on the job, in the home and other places in the community, and as a last resort, in the formal office setting. Contacts with family members, employers, friends, neighbors, educational and vocational instructors, and other people closely associated with the youth supplement personal contacts. Contacts help provide surveillance, gauge program progress, identify problem areas, discover deviation from conditions of supervision and provide general information concerning

activities and behavior. Parental involvement in these programs is actively encouraged. Emphasis in parent group discussions is on understanding the youth and maintaining behavioral changes after treatment is terminated. In addition, counselors seek to employ available community resources to assist the youth. Volunteers are sought by the counselor to supplement group and individual counseling and provide an additional source of support for the youth. Recreational activities planned by the counselor add another dimension of therapeutic intervention with the delinquent youth.

#### **Intensive Non-residential Work Programs.**

The intensive work non-residential programs are designed to provide educational and vocational services to youth between the ages of fourteen (14) and eighteen (18) who are considered low risk to public safety and have been committed to a non-residential level. Typically, the bed capacity ranges from ten to twenty-five beds. Youth are involved in vocational interest and aptitude assessment activities, employment counseling, vocational training, academics and counseling. Related services include pro-social skill and self-esteem building, independent living skills training, group counseling, and community and work projects. Although the anticipated length of stay is four to nine months, the youth's achievement determines the release date.

For a detailed program description of each level 2 program see the appendix at the end of this chapter.

### **Population Profile**

According to the Florida Assessment, Classification, and Tracking System (FACTS), 3,474 committed youth were served by Non-residential community-based commitment programs during FY 1993-94. The average daily population was 564.5. In addition, two of the

non-residential programs (TRY and AMI) also serve non-committed youth. The population profile for committed youth is shown in Table 12-1.

Source: Committed Youth Served, Average Daily Population and Number of Youth Released (CIS/FACTS Extract, February 1995, clients served during FY 1993-94); Average Length of Stay, Age, Sex, Race, Average Age at First Delinquency Referral, Average Age at Discharge and Total Released (CIS/FACTS, OE Extract, FY 1993-94, clients released during FY 1993-94).

The average length of stay for committed youth was 4.1 months (ALOS is based on 2,524 youth released which was derived from a more recent data extract). AMI youth averaged 5.3 months, youth in TRY Centers averaged 4.2 months and those in SIG averaged 2.1 months. The average age of the youth served at the time of their discharge were 16 years of age or older. Youth served in TRY Centers were four to five months younger than youth served in AMI and SIG respectively.

The majority of youth served in all programs were male. SIG served the largest percentage of females. Statewide, the racial composition of the non-residential community-based commitment programs consists of 46.2 percent whites and 53 percent minorities. TRY Centers, however, served a substantially higher percentage of blacks (82.7 percent) than whites (17.3 percent).

The average age at the time of their first delinquency referral for youth served in non-residential programs was 13.2 years. Youth in TRY Centers were the youngest with the average age of their first referral at 12.2 years. Youth in AMI averaged 13.2 years and youth in SIG averaged 13.4 years at the time of their first delinquency referral.

### **Client History**

Non-residential community-based programs are the first step into the commitment system for most youth. 70.2 percent of committed youth admitted to non-residential programs during FY 1993-94 were first commitments which is down 5 percentage points from last year (see Table 12-2). The percentages of first commitments for the three programs were similar. However, AMI served a slightly higher percentage of recommitted youth (13.8 percent) than SIG (12.5 percent) and TRY (9.3 percent). The highest percentage of transfers were served by TRY (17.3 percent) as compared to AMI (15.8 percent) and SIG (14.4 percent).

Data on committing offenses are presented in Table 12-3. Statewide, 41.9 percent of the youth were committed for property felonies and another 11.6 percent were committed for property misdemeanors. Those were the largest felony and misdemeanor categories. Crimes against persons accounted for 20.6 percent, with felonies accounting for 11.4 percent of that total.

Table 12-4 provides the average number of prior felony referrals and adjudications for each of the programs. A referral indicates that a youth has been charged with a delinquent offense, but is not necessarily evidence that the youth committed the offense charged. Determination of whether a law violation occurred is more accurately measured in Juvenile Justice data systems by whether there was an adjudication (or adjudication withheld) for the delinquent offense. Such a finding by the court is a clearer measure than a referral. Statewide, the average number of prior felony referrals for youth in non-residential community-based commitment programs was 5.4 with an average of 2.8 prior felony adjudications. Youth served in TRY Centers had the highest number of prior felony referrals (8.6), youth served in AMI Programs had an average of 6.1 prior felony referrals, while SIG had 5.4. TRY youth had the highest number of prior felony adjudications (4.0), followed by AMI Center youth (3.2) and SIG Program youth (3.1).

## Outcome Measurement

### Outcome 1

**YOUTH COMMITTED TO A NON-RESIDENTIAL COMMUNITY-BASED COMMITMENT PROGRAM WILL SUCCESSFULLY COMPLETE THE PROGRAM.**

**Definition:** Youth are released with an honorable direct discharge from Delinquency supervision, or are placed on post-commitment Community Control or Furlough status.

- 50.5 percent successfully completed the programs. Successful completion rates by program were: SIG, 54.7 percent; AMI, 49.4 percent; and, TRY, 24.0 percent.

Over fifty percent of the youth attending non-residential commitment programs successfully completed the program and were released with a direct discharge or placed on Furlough or Post-Commitment Community Control status (see Table 12-5). The remaining 49.5 percent were unsuccessful completions, transferred to an equally restrictive program, committed on a new charge, or were sent to the adult system. Successful completion rates for TRY Centers (24.0 percent) continue to fall below those of SIG (54.7 percent) and AMI (49.4 percent).

## Outcome 2

### **YOUTH RELEASED FROM NON-RESIDENTIAL COMMUNITY-BASED COMMITMENT PROGRAMS WILL HAVE NO SUBSEQUENT LAW VIOLATIONS WITHIN ONE YEAR OF RELEASE.**

**Definition:** Many measures can be utilized as indications of recidivism, all related to subsequent law violations. A number of such measures are presented below. Re-referrals indicate that youth have been charged with another delinquent offense, but a subsequent referral is not necessarily evidence that the youth committed the offense charged. Determination of whether a subsequent law violation occurred is more accurately measured in Juvenile Justice data systems by whether there was an adjudication (or adjudication withheld) for one or more delinquent offenses following release. Such a finding by the court is a clearer measure than a subsequent referral. Adult felony convictions, for which youth were placed on adult probation or sentenced to adult prison, are also tabulated. A combined juvenile and adult felony conviction rate is also presented, as is a total of all juvenile adjudications and adult felony convictions. The operational definition of recidivism is, finally, the number of youth released from a program between January and June of 1993 who had been recommitted to Juvenile Justice, placed on adult probation or sent to prison within one year following release.

- The statewide readjudication rate for non-residential programs is 30.2 percent. This data includes follow-up into the adult Department of Corrections but does not include an adult misdemeanor conviction rate. Readjudication rates by program are: SIG, 30.0 percent; TRY Centers, 27.8 percent; and, AMI, 27.9 percent. The statewide recidivism rate for non-residential programs is 21.2 percent, this includes youth who have been recommitted to Juvenile Justice, placed on adult probation or sent to prison within one year following release. Recidivism rates for TRY Centers are 27.8 percent; for AMI, 21.9 percent; and for SIG Centers, 21.4 percent.

Table 12-6A represents the percentage of referrals which were received after a youth was released from a program. The total number of releases includes youth who were actually physically released from a non-residential commitment program. Those who were transferred directly to the Department of Corrections or another Juvenile Justice program are not included. Only youth released between January and June 1993 are included in this table. Tables 12-6B & 12-6C provide a comparison of readjudication and recidivism rates for the population studied.

Source: CIS/FACTS/TP1, OE Extract, FY 1993-94 (clients released between January and June 1993) and the Department of Corrections' FY 1993-94 probation and prison extract.

Prior outcome evaluation reports contained calculations of suppression effects as measures to compare the numbers of referrals and adjudications after a subject had left a program to those from before. The exclusion of key factors such as subsequent adult arrests raises concerns about the utility of such data. These measures do not take into account the fact that youth may be in an aftercare or reentry program following release. In addition, youth released from commitment programs are more likely to be recommitted or go into the adult system for subsequent offenses. This would tend to decrease numbers of subsequent offenses, if only because they were in confinement during part of the follow-up period. Because of concerns related to validity and meaning of the data, suppression measures are no longer included in this report.

### **Outcome 3**

This is the second consecutive year in which the number of absconds and youth absconded has been collected for these level 2 programs. By statute, it is only possible to abscond from non-residential community-based commitment programs, not escape. Table 12-8 provides information on the number of youth served, number of absconds and number of youth absconded from non-residential community-based commitment programs. Statewide, 8.7 percent of the 3,476 youth served absconded during FY 1993-94.

## Program Cost

The non-residential community-based commitment programs represent an estimated total cost of \$9,403,261 (see Table 12-9). Expenditures reported in this chapter of the report do not include costs associated with youth on non-committed status in TRY programs.

**TABLE 12-9:

Note 1: AMI's total costs are for committed and non-committed youth, all other data is for committed youth.

Note 2: Expenditures in SAMAS could not be broken out from those attributed to Intensive Work CB.

Note 3: Expenditures for Tampa Intensive Day Treatment were not found in SAMAS.

Note 4: SAMAS does not report separately expenditures for Local Non-residential programs.

Costs associated with AMI and TRY which are facility-based include building, food, transportation, medical and other expenses not incurred by SIG. The costs for SIG are strictly counselor position costs.

AMI: The total cost for AMI non-residential services (excluding extended services offered at GOMI and OMI) was \$6,566,590.50.

TRY Centers: The total cost for TRY Centers was \$741,643.

SIG: SAMAS reports total cost figures for the SIG program of \$1,281,783 in FY 1993-94.

### **Program Effectiveness**

SIG and AMI have a higher successful completion rate than TRY (24.0 percent) with approximately half (54.7 percent in SIG and 49.4 percent in AMI) of the youth served successfully completing the programs.

The majority of youth are not transferred to more restrictive placements. Readjudication rates at one year after program completion are: SIG, 30.0 percent; TRY Centers, 27.8 percent; and, AMI, 27.9 percent. Recidivism rates for SIG are 21.4 percent; for AMI, 21.9 percent; and for TRY Centers, 27.8 percent.

AMI and TRY programs are considerably more expensive than SIG because the services offered are more comprehensive. AMI and TRY are day treatment facility-based programs which offer services extending beyond a normal school day. Youth complete academic requirements at the facility in addition to receiving vocational training and counseling services. Facility-based programs also pay building, food, transportation, medical and other expenses not incurred by SIG.

AMI and TRY programs also serve youth on non-committed status. However, no data system currently exists which tracks these youth separately from the general population of youth served in Community Control. The previously used manual tracking system no longer exists. Information on these youth needs to be entered into FACTS in order to report these outcomes separately from the overall Community Control outcomes. This would allow for a comparison of the effectiveness of AMI and TRY programs for committed versus non-committed youth.

**TABLE 12-R**  
**NON-RESIDENTIAL COMMITMENT PROGRAMS**  
**RECOMMENDATION UPDATE**

Recommendation in 1993 Outcome Evaluation	Progress in FY 1993-94	1994 Report Recommendation
<p><b>Program Improvement</b></p> <p>These programs should be improved. In order to do so the CIS system must be updated to track youth in AMI day treatment separately from youth in the AMI-SAFE program. The Department also needs to work with AMI and others involved to determine how best to separate and target the services for day treatment and SAFE youth.</p>	<p>The 1994 Legislature created the new Department of Juvenile Justice. As a result, the Department is seeking to develop a new management information system that will adequately track the legal status of youth served in day treatment.</p> <p>TRY Centers have been eliminated by the 1994 Legislature.</p>	<p><b>Program Improvement</b></p> <p>The Department of Juvenile Justice needs to develop a Management Information System in order to correctly track the status of youth.</p> <p>The new department should review the best practical use of day treatment programs.</p> <p>The Department needs to continue and finalize recommendations on improving the use of day treatment for delinquent youth.</p>

## **CHAPTER 12 APPENDIX**

**DISTRICT 1**  
**Special Intensive Group (SIG)**

**PROGRAM DESCRIPTION:**

**Address:** Juvenile Justice Center  
P. O. Box 8010  
Pensacola, Florida 32505

**Telephone:** (904) 444-8237  
SC 693-8237

**Fax:** (904) 444-2273  
SC 693-2273

**Restrictiveness Level:** 2

**Intended ALOS:** 120 days

**Capacity:** 8-10

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

Committed male and female youth ages 8-18. First and second degree misdemeanants are preferred, although some youth with third degree felonies are accepted. The program is limited to youth committed for crimes against property rather than crimes against persons.

**Services and Treatment Offered:**

In order to meet contact requirements, SIG counselors supervise an active caseload of 8-10 youth. The youth remain in their homes and are provided services by Juvenile Justice Program counselors. The small caseload promotes an awareness of the movements and habits of youth.

Treatment may combine group interaction and individual counseling and is based on the youth's needs as contained in the youth's Individual Performance Contract. Counselors supplement contact with youth through contacts with family members, employers, friends, neighbors, and vocational and educational instructors or others associated with the youth.

**DISTRICT 2**  
**Special Intensive Group (SIG)**

**PROGRAM DESCRIPTION:**

**Address:** 500 West 11th Street  
Panama City, Florida 32401

**Telephone:** (904) 872-7630  
SC 777-7630

**Fax:** (904) 747-5438  
SC 777-5438

**Restrictiveness Level:** 2

**Intended ALOS:** 120 days

**Capacity:** 16

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

Committed male and female youth ages 8-18. First and second degree misdemeanants are preferred, although some youth with third degree felonies are accepted. The program is limited to youth committed for crimes against property rather than crimes against persons.

**Services and Treatment Offered:**

In order to meet contact requirements, SIG counselors supervise an active caseload of 8-10 youth. The youth remain in their homes and are provided services by Juvenile Justice Program counselors. The small caseload promotes an awareness of the movements and habits of youth.

Treatment may combine group interaction and individual counseling and is based on the youth's needs as contained in the youth's Individual Performance Contract. Counselors supplement contact with youth through contacts with family members, employers, friends, neighbors, and vocational and educational instructors or others associated with the youth.

**DISTRICT 1**  
**Escambia Bay Marine Institute**

**PROGRAM DESCRIPTION:**

**Address:** 10605 Gulf Beach Highway  
Pensacola, Florida 32507

**Telephone:** (904) 492-0708  
**Fax:** (904) 492-7111

**Restrictiveness Level:** 2

**Intended ALOS:** 6 months

**Capacity:** 20

**Aftercare Services Provided?:** No

**Eligibility Criteria:**  
Committed youth requiring a low risk non-residential placement. This program is designed for 13-18 year-olds both male and female.

**Services and Treatment Offered:**  
AMI is a private, non-profit organization. Each institute utilizes a marine science environment to promote social rehabilitation and educational and vocational instruction. Youth in AMI programs participate in a core curriculum of oceanography and earth sciences, seamanship, marine mechanics, small engine repair, diving, aquatics, physical education, and academic and vocational education. Assisting youth in obtaining their GED or assistance in remedial education is also stressed. Youth successfully completing AMI are generally discharged from supervision or returned to aftercare under community control. The program is open to both males and females ages 13-18.

**DISTRICT 2**  
**Tallahassee Marine Institute**

**PROGRAM DESCRIPTION:**

**Address:** 2514 W. Tharpe Street  
Tallahassee, Florida 32303

**Telephone:** (904) 385-3191  
SC 291-1250

**Fax:** (904) 385-1452

**Restrictiveness Level:** 2

**Intended ALOS:** 3-5 months

**Capacity:** 15

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

Committed youth requiring a low risk non-residential placement. This program is designed for 13-18 year-olds both male and female. Executive director will consider youth who do not meet contract requirements.

**Services and Treatment Offered:**

The Associated Marine Institutes (AMI) is a private non-profit organization. Each institute utilizes a marine science environment. Clients participate in a core curriculum of oceanography and earth sciences, seamanship, marine mechanics, small engine repair, diving, aquatics, physical education, and academic and vocational education. Assisting youth in obtaining their GED or assistance in remedial education is also stressed. Youth successfully completing AMI are generally discharged from supervision or returned to aftercare under community control. The program is open to both males and females ages 13-18.

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

Committed youth requiring a low risk non-residential placement. This program is designed for 13-18 year-olds both male and female. Executive director will consider youth who do not meet contract requirements.

**Services and Treatment Offered:**

The Associated Marine Institutes (AMI) is a private non-profit organization. Each institute utilizes a marine science environment. Clients participate in a core curriculum of oceanography and earth sciences, seamanship, marine mechanics, small engine repair, diving, aquatics, physical education, and academic and vocational education. Assisting youth in obtaining their GED or assistance in remedial education is also stressed. Youth successfully completing AMI are generally discharged from supervision or returned to aftercare under community control. The program is open to both males and females ages 13-18.

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

This is a court ordered, non residential, co-educational program for committed youth between the ages of 13 and 18 years of age.

**Services and Treatment Offered:**

Community service activities, recreational activities, teen sessions, individual counseling, group counseling, psychotherapy, parenting skills, and family counseling are offered. Resource referrals are also provided.

**DISTRICT 3**  
**Intensive Work Program CB**

**PROGRAM DESCRIPTION:**

**Address:** 2649 U.S. Highway, 90 West  
Lake City, Florida 32055

**Telephone:** (904) 758-1504/1448  
SC 885-1444

**Fax:** (904) 758-1495

**Restrictiveness Level:** 2

**Eligibility Criteria:**

Committed male or female youth adjudicated for a felony or first degree misdemeanor. Previously committed clients or community control clients are accepted.

**Intended ALOS:** 3 months

**Capacity:** 20

**Aftercare Services Provided?:**

This is aftercare.

**Services and Treatment Offered:**

Clients receive individual, family, and group counseling as needed. Special groups about substance abuse, AIDS awareness, and life skills groups are also offered. The focus of the program, however, is work and intensive supervision of the clients. Counselors have face to face client interviews 4 to 5 times a week. Drug testing is required.

**DISTRICT 3**  
**Intensive Work Program CD**

**PROGRAM DESCRIPTION:**

**Address:** 1000 N.E. 16th Avenue  
Bldg. G  
Gainesville, Florida 32609

**Telephone:** (904) 955-5060  
SC 625-5060

**Fax:** (904) 955-3035  
SC 625-3035

**Restrictiveness Level:** 2

**Intended ALOS:** 2-3 months

**Capacity:** 30

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

Male and female committed youth ages 14-18 from the local area.

**Services and Treatment Offered:**

This is an intensive non-residential work program with individual and group counseling. The program emphasizes education, community work projects, employment and client supervision.

**DISTRICT 6**  
**Tampa Intensive Day Treatment**

**PROGRAM DESCRIPTION:**

**Address:** 3806 W. Martin Luther King  
Blvd.  
Tampa, Florida 33614

**Telephone:** (813) 875-5911

**Fax:** (813) 872-0606

**Restrictiveness Level:** 2

**Intended ALOS:** 9-12 months

**Capacity:** 40

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

Committed and non committed male or female youth age 11-16 who have been referred for delinquent acts and have learning disabilities or other handicaps.

**Services and Treatment Offered:**

This is a fairly long term (9-12 months) program emphasizing scholastic achievement for youths with learning disabilities. Clients are picked up at their homes and brought to an on site school. Youth attend classes until two p.m. and then they participate in community service work, special counseling, or cultural enrichment activities. Classes have low (8 to 1) staff to client ratios. Each class has a teacher, a teacher's aide, and one or two counselors.

**DISTRICT 8**  
**Lee Day Treatment**

**PROGRAM DESCRIPTION:**

**Address:** P.O. Box 61558  
Fort Myers, Florida 33906

**Telephone:** (813) 277-5029  
**Fax:** (813) 277-5028

**Restrictiveness Level:** 2

**Intended ALOS:** 6-8 months

**Capacity:** 20

**Aftercare Services Provided?:**  
This is an aftercare program.

**Eligibility Criteria:**  
Committed or community control males or females ages 12-18. Since this is day treatment, youth from the local area (Lee County) are preferred.

**Services and Treatment Offered:**  
This is one of the North American Family Institute programs. Positive peer group treatment modalities are emphasized. There are on-site teachers and vocational training is provided by the Lee County school system. Clients also participate in community service work such as graveyard cleanup, working at auctions, and the like. Life skills training and anger management is stressed in the program. Youth participate in OLE (Outward Learning Experience) that requires that youth plan, prepare, conduct, and evaluate a wilderness experience. There is an LPN on site, as well as, an EMT paramedic. Other medical services are available on an as needed basis.

**DISTRICT 11**  
**Broward Halfway House Non-Residential**

**PROGRAM DESCRIPTION:**

**Address:** 3090 N. Powerline Road  
Pompano Beach, FL 33069

**Telephone:** (305) 969-3525  
SC 423-3525  
**Fax:** (305) 969-3498  
SC 423-3498

**Restrictiveness Level:** 2

**Intended ALOS:** 3 months

**Capacity:** 25

**Aftercare Services Provided?:** No

**Eligibility Criteria:**  
Committed males ages 14-18 who are from the Broward County area.

**Services and Treatment Offered:**

This is a non-residential halfway house for the Broward County area. The program offers individual, family, and group counseling as well as substance abuse and general mental health counseling. Clients study for the GED and there are remedial classes as well. Guardian participation is encouraged. This resource was closed 12/14/94.

### 13. LOW RISK RESIDENTIAL COMMUNITY-BASED COMMITMENT PROGRAMS

#### Program Description

Residential community-based commitment programs provide structured environments for youth committed to the department and include appropriate levels of treatment, supervision, education and discipline. The programs are designed to address each youth's needs and ensure successful reentry into the community.

A variety of programs have been established which offer youth an array of services. While all provide residential services designed to meet individual needs, the programs can be very different. Eligibility criteria vary, limiting acceptance to specific age groups and types of offenses. Residential care is also provided in a variety of settings, such as in a family-like setting or a wilderness campsite. The emphasis of some programs is on individual, family and group counseling while others focus on building self-esteem and social skills through recreational and work activities. Length of stay in these programs also varies.

Performance contracting is used to clearly define requirements for release from delinquency commitment programs. The contract is negotiated when the youth enters the commitment program and release is dependent upon compliance with the agreement. This is designed to prepare youth for transition to their home community and ensures accountability for the youth and for the program.

Residential placement of all committed youth is coordinated and arranged by district commitment managers in the 15 districts. Ideally, a district commitment manager chairs a multi-disciplinary staffing for each youth being considered for commitment. If the district commitment manager decides to recommend the commitment of the youth during the staffing, the staffing committee recommends the most appropriate programs and restrictiveness levels for placement based on the assessed needs of the youth. Recommendations are presented to the judge and if the youth is committed, placement is facilitated, based on the court-ordered level of commitment.

Youth are placed on program waiting lists assigned by commitment managers. In order to expedite program placements, youth are considered for lower level commitment programs with judicial concurrence.

**Targeted Youth:** Youth classified for this level of placement are generally offenders whose most serious current charges or presenting offense is a first or second degree misdemeanor or a third degree felony. These offending patterns, in concert with a youth's assessed need for 24 hour per day supervision, may warrant service provision in a low risk residential placement.

These committed youth have usually performed unsuccessfully in prevention and diversion programs, have weak family and community support structures and could benefit from placement in a residential program.

Although this level is designed primarily for first commitment placements, offending histories of referrals may include one prior commitment for a third degree felony or a misdemeanor with an associated residential placement.

More serious first time commitments, such as second degree felony commitments, may also benefit from services provided by programs in the low risk residential level. These youth would represent cases wherein the offense was mitigated by the surrounding circumstances and deemed to not represent a moderate or high risk to public safety.

**Low Risk Residential Placement:** Placement resources in the low risk residential level include, but are not limited to, the following: Short Term Offender Programs (STOP), Family Group Homes (FGH), Group Treatment Homes (GTH), and Short Term Elective Programs (STEP). STOP camps and group treatment homes provide 24 hour awake supervision with length of stay varying from one to six months depending upon program type. For a detailed program description of each level 4 program see the appendix at the end of this chapter.

#### **Short-Term Offender Program (STOP Camps).**

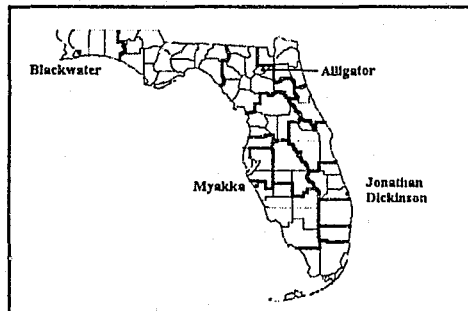

STOP camps consist of various campsites located in state parks and forests. Through a combination of rigorous outdoor work, counseling, recreation and educational activities, youth have an opportunity to change behavior patterns. Work projects are developed by either the Division of Forestry or the Department of Natural Resources. A

forester or park ranger is provided for the planning, site selection, technical instruction and coordination of various work projects. Projects include nature trail construction, controlled burning, improvement of timber stands, fence repair and construction, culvert cleaning, and general maintenance and support functions of the camp. The average length of stay is approximately 45 days.

Educational services are provided by the local school district at the campsite. Efforts are made to integrate the work project activities into the educational curriculum.

Four STOP Camps are located across the state. Blackwater STOP Camp is in District 1, Alligator Creek STOP Camp is in District 3, Myakka STOP Camp is in District 8, and the Jonathan Dickinson STOP Camp is in District 9. STOP Camp facilities house 18 committed delinquents.

Youth admitted to STOP Camps range from 14 to 18 years of age. First commitments and minor offenders such as second degree misdemeanors are preferred; however, recommitments and transfers from other programs are acceptable.

### **Short-Term Elective Program (STEP).**

STEP includes programs developed and managed by the Hurricane Island Outward Bound School of Rockland, Maine. The programs are located in District 4 (Yulee) and District 6 (Myakka City). They provide a stress-oriented short-term, (30 day) intensive residential program based on Outward Bound philosophy, reality therapy techniques and individual counseling for 486 youth (416 males, 70 females) annually.

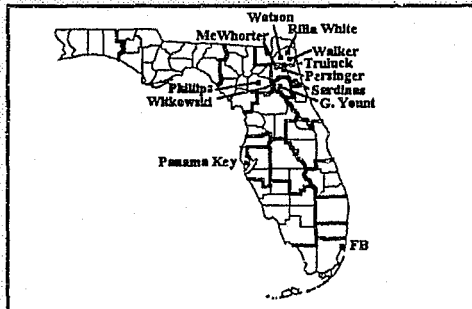

Any committed youth without a history of assaultive behavior can be admitted to STEP providing they meet the physical requirements. A medical examination to determine the youth's physical ability to participate in program activities is necessary before placement. STEP serves the older adolescent, age 14 to 17.

Each program is divided into two phases: an orientation phase and an Outward Bound course. The orientation phase is a preparation course which teaches camp craft, canoeing, cooking and first-aid skills in an instructional setting.

The second phase is a wilderness course designed to be a success oriented, stressful and challenging experience. The course includes a 350 mile canoe trip from the Atlantic Ocean to the Gulf of Mexico.

An 11 bed STEP base camp was funded as part of the Juvenile Justice Reform Act of 1990. This base camp became operational during FY 1991-92 and serves youth awaiting placement in STEP courses, youth who have experienced behavioral problems on courses, and youth who would otherwise be placed in detention centers awaiting STEP placements. This base camp serves youth at the north STEP program only.

**Family Group Homes.** Family Group Homes provide residential community-based delinquency services in the homes of trained families. The number of youth who receive services in a family group home ranges from one to six depending on the physical capacity of the individual home and the number of youth for which the group home parents are willing and able to provide appropriate care.

Family Group Homes operated in four districts in FY 1993-94. District 3 had 7 beds. District 4 had 13 beds. District 5 (St. Petersburg) had 8 beds and District 11 (Miami) had 6 beds.

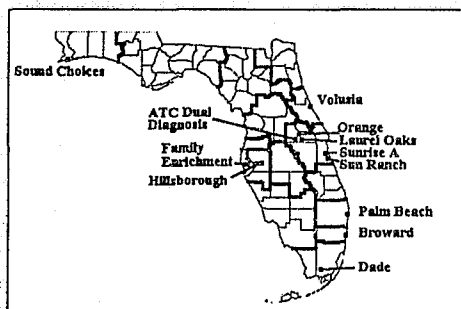

### (Family Group Homes continued)

Priority consideration for placement is given to youth 14 years of age and younger who have not been previously committed and who have not demonstrated habitual, serious or violent delinquent behavior. Children, regardless of age, who have demonstrated through placement in more restrictive programs that they can benefit from the Family Group Home program as a transitional reentry experience, may also be admitted to a Family Group Home.

A delinquency case manager is assigned to work with each youth in the program. A normative treatment model serves as the basic mode of counseling. The case manager provides group and/or individual counseling, and makes referrals to community resources to meet the youth's specialized needs. Individualized treatment plans are developed. Youth may attend public school, may work in the community and are encouraged to take part in extracurricular activities. The youth's parents are encouraged to be involved through visits to youth, interacting with group home parents, parent meetings and family counseling.

**Group Treatment Homes.** A Group Treatment Home is a seven-bed facility designed to provide committed youth with a treatment oriented, homelike atmosphere. Boys from 10 to 13 years of age are accepted for admission in most of the homes. Some younger or older children may be accepted based on individual needs. The Orange Group Treatment Home serves older boys, ages 15-

17 years. Committing offenses are reviewed on an individual basis. Because length of stay is 4 to 6 months, first degree misdemeanants, third degree felons, and in some instances first and second degree felons will be accepted.

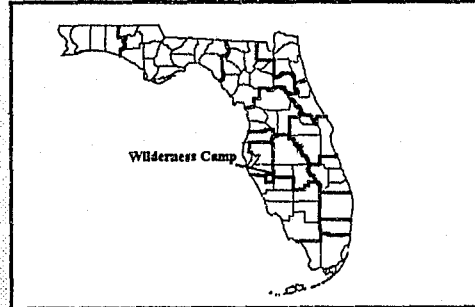

There are twelve group treatment homes located in Volusia, Hillsborough, Orange, Brevard, Pinellas, Palm Beach, Broward, Dade and Escambia Counties. Six of them (Orange, Hillsborough, Palm Beach, Broward, Dade and Volusia) are operated by the department and are budgeted to serve seven youth. The other 6 were contracted and varied in the number of beds.

Group sessions are conducted daily to discuss specific personal problems as well as to settle the day-to-day problems that arise within the home, school, and community environments. The youth attend public schools to receive academic instruction, work at community projects and participate in recreational activities to learn appropriate social behavior. Frequent educational and entertainment outings are planned to expose the youth to activities and experiences available in their own communities. The Group Treatment Home parents are expected to become closely involved with each child, both as parent substitutes and as counselors.

**Wilderness Camp.** The wilderness camp program is a 28 bed program serving males ranging in age from fourteen (14) to eighteen (18) years of age. The program consists of a stress-oriented, short-term (45 days) intensive residential program based on Outward Bound philosophy, reality therapy techniques and individual counseling for males. This community service oriented program provides

24 hour awake supervision to committed youth from districts 5, 6, 7, 8, 9, 10, 11, 14, and 15. Youth enter the program in groups of ten (10). Admissions are limited to non-aggressive males on their 1st or 2nd commitment for a 3rd degree felony property offense or transfers from a non-residential program. Youth must be able to work and exercise. Any youth who has a previous history of psychosis or psychotropic medication or is considered at risk for suicide will not be considered for admission. Youth who are committed to the Low Risk Residential Programs will be considered appropriate for placement in this program.

### Population Profile

A total of 1,693 youth were served in Low Risk Residential Community-Based Programs during FY 1993-94. This includes the beginning count on July 1, 1993, and those admitted during FY 1993-94. Almost a third, 33.1 percent, of those served were placed in STOP Camps. Table 13-1 presents age breakdowns, race, sex, total released, number of clients and cases served, number of youth discharged, average daily population, average length of stay, average age at first delinquency referral and average age at discharge.

Source: Committed Youth Served, Average Daily Population and Number of Youth Released (CIS/FACTS Extract, February 1995, clients served during FY 1993-94); Average Length of Stay, Age, Sex, Race, Average Age at First Delinquency Referral, Average Age at Discharge and Total Released (CIS/FACTS, OE Extract, FY 1993-94, clients released during FY 1993-94).

There were 1,469 youth discharged from these programs during FY 1993-94. The average length of stay in the programs varied from 1.0 month for STEP programs to 4.0 months for group treatment homes with a statewide average of 1.9 months (ALOS is based on 1,473 youth released which was derived from a more recent data extract). The average age at the time of discharge was 15.7 years for all low risk residential community-based programs combined. However, youth released from group treatment homes were one-and-a-half years younger than youth served in other programs.

Ninety-two percent of the youth released during FY 1993-94 were male. Racially, minorities accounted for 48.8 percent of the group and whites 50.9 percent. The average age at first delinquency referral is

significantly younger for youth released from group treatment homes. On average, these youth were only 11.6 years at the time of their first referral. The statewide average is 13.0 years.

### Client History

Committing offenses by program are shown in Table 13-2. The most frequent committing offense for youth was a property felony (41.9 percent). The second most frequent was "other delinquency" (15.7 percent). Property misdemeanors accounted for 12.6 percent of committing offenses. The remaining categories each accounted for less than 30 percent of the youth.

Source: CIS/FACTS/TP3, OE Extract, FY 1993-94 (clients released during FY 1993-94)

Table 13-3 provides the average number of prior felony referrals and adjudications for each of the programs. A referral indicates that a youth has been charged with a delinquent offense, but is not necessarily evidence that the youth committed the offense charged. Determination of whether a law violation occurred is more accurately measured in Juvenile Justice data systems by whether there was an adjudication (or adjudication withheld) for the delinquent offense. Such a finding by the court is a clearer measure than a referral. Statewide, the average number of prior felony referrals for youth in low risk community-based residential programs was 5.6 with an average of 3.0 prior felony adjudications. Youth served in group treatment homes had the highest number of prior felony referrals (8.2) and the highest number of prior felony adjudications (4.5). Youth served in family group homes had an average of 3.7 prior felony referrals and 1.9 prior felony adjudications. Youth served in STOP camps had an average of 5.0 prior felony referrals and 2.7 prior felony adjudications. Youth served in STEP programs had an average of 3.1 prior felony referrals and prior felony adjudications (1.5).

Table 13-4 summarizes information on the type of admission by program. First commitments accounted for 68.5 percent of the admissions to low risk community-based Residential programs. Group treatment homes served the highest percentage of recommitments (20.3 percent) compared with the state average of 16.5 percent. Transfers accounted for 14.8 percent of the admissions in each of the programs.

## Outcome Measurement

### Outcome 1

#### **YOUTH PLACED IN LOW RISK RESIDENTIAL COMMUNITY-BASED COMMITMENT PROGRAMS WILL SUCCESSFULLY COMPLETE THE PROGRAM.**

**Definition:** Successful completion means youth released to post-residential aftercare/reentry supervision, honorably discharged, or transferred to a program with a lower restrictiveness level. Unsuccessful releases include transfers to programs with a higher restrictiveness level, recommitments and transfers to the adult system. Transfers to programs that have an equal restrictiveness level are not coded as successful or unsuccessful. They are presented as a separate category of releases.

- The overall successful completion rate for low risk residential community-based programs is 80.5 percent. Successful program completion rates by program are: 76.0 percent for family group homes; 46.0 percent for group treatment homes; 93.0 percent for STEP programs; and, 91.8 percent for STOP camps.

Table 13-5 provides the successful completion rates, unsuccessful releases, and rates of transfer to equally restrictive programs for each program type. Statewide, 80.5 percent of youth released from low risk residential community-based programs were successful completions. Statewide, 8.9 percent terminated unsuccessfully and 1.8 percent were transferred to programs which were equally restrictive. Group treatment homes show the greatest divergence from the other programs with 25.7 percent terminated unsuccessfully.

## Outcome 2

### **YOUTH RELEASED FROM LOW RISK RESIDENTIAL COMMUNITY-BASED COMMITMENT PROGRAMS WILL HAVE NO SUBSEQUENT LAW VIOLATIONS WITHIN ONE YEAR OF RELEASE.**

**Definition:** Many measures can be utilized as indications of recidivism, all related to subsequent law violations. A number of such measures are presented below. Re-referrals indicate that youth have been charged with another delinquent offense, but a subsequent referral is not necessarily evidence that the youth committed the offense charged. Determination of whether a subsequent law violation occurred is more accurately measured in Juvenile Justice data systems by whether there was an adjudication (or adjudication withheld) for one or more delinquent offenses following release. Such a finding by the court is a clearer measure than a subsequent referral. Adult felony convictions, for which youth were placed on adult probation or sentenced to adult prison, are also tabulated. A combined juvenile and adult felony conviction rate is also presented, as is a total of all juvenile adjudications and adult felony convictions. The operational definition of recidivism is, finally, the number of youth released from a program between January and June of 1993 who had been recommitted to Juvenile Justice, placed on adult probation or sent to prison within one year following release.

- Approximately 54.3 percent of youth released from low risk residential community-based programs were readjudicated within one year of release. Readjudication rates by program type were: STOP camps, 53.7 percent; STEP, 48.3 percent; group treatment homes, 70.4 percent; and, family group homes, 58.3 percent. Recidivism rates by program type were: STOP camps, 38.4 percent; STEP, 35.8 percent; group treatment homes, 66.7 percent; and, family group homes, 45.8 percent.

Table 13-6A represents the percentage of referrals which were received after a youth was released from a program. The total number of releases includes youth who were actually physically released from a program and those who were transferred to a program that was in a lower restrictiveness level. Those who were transferred directly to the Department of Corrections or a Juvenile Justice program that is in an equal or higher restrictiveness level are not included. Only youth released between January and June 1993 are included in this table. Tables 13-6B & 13-6C provide a comparison of readjudication and recidivism rates for the population studied.

Source: CIS/FACTS/TP1, OE Extract, FY 1993-94 (clients released between January and June 1993) and the Department of Corrections' FY 1993-94 probation and prison extract.

Prior outcome evaluation reports contained calculations of suppression effects as measures to compare the numbers of referrals and adjudications after a subject had left a program to those from before. The exclusion of key factors such as subsequent adult arrests raises concerns about the utility of such data. These measures do not take into account the fact that youth may be in an aftercare or reentry program following release. In addition, youth released from commitment programs are more likely to be recommitted or go into the adult system for subsequent offenses. This would tend to decrease numbers of subsequent offenses, if only because they were in confinement during part of the follow-up period. Because of concerns related to validity and meaning of the data, suppression measures are no longer included in this report.

### **Outcome 3**

Previously, it was not possible to escape from low risk residential programs, only to abscond. During FY 1993-94, statutory changes were made, which made it possible for a youth who left any residential program, without permission, to be charged with escape. The data for this fiscal year, though, was still being recorded as absconds. Table 13-8 provides number of youth served, number of absconds and number of youth absconded from these programs. Low risk residential commitment programs served 1,693 youth during FY 1993-94. Almost eight percent of those youth absconded from these programs with 165 absconds.

## **Program Effectiveness**

Successful program completion, recidivism and seriousness of offending patterns are the key effectiveness measures used to assess the outcomes of community-based commitment programs.

The successful completion rate for low risk residential programs was 80.5 percent. Approximately 93 percent of the youth from STEP programs successfully completed the program. STOP camps successfully terminated 91.8 percent of youth. Family group homes report a successful completion rate of 76 percent and only 46 percent of youth released from group treatment homes terminated successfully.

The readjudication and recidivism rates for STOP camps were 53.7 percent and 38.4 percent within one year of release. Family group homes had readjudication and recidivism rates at 58.3 percent and 45.8 percent, respectively, while group treatment homes were 70.4 percent and 66.7 percent. STEP programs had the lowest readjudication and recidivism rates at 48.3 percent and 35.8 percent respectively.

While differences exist between the low risk residential community-based programs in terms of outcomes for youth served, it is probable that these differences emerge primarily because the programs are serving different groups of youth. The exact nature of the differences in their relationship to outcomes deserves further study.

**TABLE 13-R**  
**LOW RISK RESIDENTIAL COMMITMENT PROGRAMS**  
**RECOMMENDATION UPDATE**

Recommendation in 1993 Outcome Evaluation	Progress in FY 1993-94	1994 Report Recommendation
<p><b>Program Maintenance</b></p> <p>The new Department of Juvenile Justice should explore the procedures for placing youth in these different program types and consider if youth are being placed according to need.</p> <p>Further examination should be conducted into the placement of individuals in level four (Low Risk Residential). The high probability that an offender committed a felony as either their most serious prior or committing offense raises concerns about the appropriateness of assigning them to a minimum security facility.</p>	<p>Placement in low risk residential programs are currently based on assessments of risk to public safety and the needs of the offender.</p>	<p><b>Program Maintenance</b></p> <p>Placements should continue to be based primarily on the assessment of risk to public safety.</p>

## **CHAPTER 13 APPENDIX**

**DISTRICT 1**

**Capacity:** 24

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

Committed males 14-18 years old. Clients must be non-violent, in good health, and not on psychotropic medication.

**Services and Treatment Offered:**

Alligator Creek STOP Camp is a wilderness work camp located on forest lands adjacent to the state prison in Raiford. Youth in the program go to school each morning and work on individual academic studies. A Chapter One reading program is available for students whose literacy level is below the average for their age. In the afternoon youth perform various work projects, yard maintenance, furniture moves, and other projects. On the weekends youth clean the camp and participate in recreational activities or field trips.

**DISTRICT 8**  
**Myakka STOP Camp**

**PROGRAM DESCRIPTION:**

**Address:** 13220 State Road 72  
Sarasota, Florida 34241

**Telephone:** (813) 361-6526  
SC 549-6526

**Fax:** (813) 361-6296  
SC 549-6296

**Restrictiveness Level:** 4

**Intended ALOS:** 45 days

**Capacity:** 18

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

Committed males 14-18 years old. Clients must be non-violent, in good health, and not on psychotropic medication. First commitments and minor offenders are preferred, however, recommitments and transfers from other programs are accepted.

**Services and Treatment Offered:**

Myakka STOP Camp is located in Myakka State Park in Sarasota County. Behavioral changes are sought through a combination of outdoor work, counseling, recreational and educational programming. Projects include nature trail construction, controlled burning, fence repair and general maintenance. Educational services are provided by the Sarasota County School District at the campsite. Efforts are made to integrate the work project activities into the educational curriculum. Mental health and substance abuse overlay services are granted through a provider in the community.

**DISTRICT 9**  
**Jonathan Dickinson STOP Camp**

**PROGRAM DESCRIPTION:**

**Address:** 16450 Southeast Federal  
Highway  
Hobe Sound, Florida 33455

**Telephone:** (407) 546-3900  
SC 221-5630

**Fax:** (407) 546-3203

**Restrictiveness Level:** 4

**Intended ALOS:** 35 days

**Capacity:** 12

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

Females, ages 14-17, who have committed a second degree felony or less and can participate in a demanding 35 day wilderness program are accepted. Youth must not be afraid of water, must not pose a suicide risk, and must not be overtly aggressive. Youths with a pattern of assaultive behaviors are excluded.

**Services and Treatment Offered:**

The STEP program emphasizes self discipline, team building, and problem solving through wilderness expeditions. The program contains a demanding ropes course, physical exercises, environmental education, individual and group counseling, group initiatives, and community service. A base camp component is also available at the site for student participation. Students can earn school credit for their participation in the Outward Bound course.

**DISTRICT 6**  
**South Florida STEP**

**PROGRAM DESCRIPTION:**

**Address:** Route # 1, Box 569  
Myakka City, Florida 34251

**Telephone:** (813) 322-1500  
SC 552-7080

**Fax:** (813) 322-1422  
SC 552-7082

**Restrictiveness Level:** 4

**Intended ALOS:** 28 days

**Capacity:** 12

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

Males, ages 14-17, who have committed a second degree felony or less and can participate in a demanding 28 day wilderness program are accepted. Youth must not be afraid of water, must not pose a suicide risk, and must not be overtly aggressive. Youths with a pattern of aggressive behaviors are excluded.

**Services and Treatment Offered:**

The STEP program emphasizes self discipline, team building, and problem solving through wilderness expeditions. The program contains a demanding ropes course, physical exercises, environmental education, individual and group counseling, group initiatives, and community service. A base camp component is also available at the site for student participation. Students can earn school credit for their participation in the Outward Bound course.

**DISTRICT 6**  
**Wilderness Camp**

**PROGRAM DESCRIPTION:**

**Address:** Rt. 1 Box 569  
Myakka City, Florida 34251

**Telephone:** (813) 322-1500  
SC 552-7080

**Fax:** (813) 322-1422 (call first)  
SC 552-7082

**Restrictiveness Level:** 4

**Intended ALOS:** 3 months

**Capacity:** 28

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

Committed males ages 14-18. Clients must be able to work and exercise. Excluded are youth on psychotropic medication, youth diagnosed as psychotic, or assaultive youth. Prefer commitments for third degree felonies and clients on their first or second commitment, or transfers from non-residential program.

**Services and Treatment Offered:**

This is one of the Outward Bound wilderness camps with stress oriented experiential therapy. Youth receive individual, group, and reality therapy. Youth enter the program in groups of ten. There is 24 hour awake supervision. The camp emphasizes community service as a treatment modality.

## **14. MODERATE RISK RESIDENTIAL COMMUNITY-BASED COMMITMENT PROGRAMS**

### **Program Description**

Residential community-based commitment programs provide structured environments for youth committed to the department and includes appropriate levels of treatment, supervision, education and discipline. The programs are designed to address each youth's needs and ensure successful reentry into the community.

A variety of programs have been established which offer youth multiple services. While all provide residential services designed to meet individual needs, the programs can be very different. Eligibility criteria vary, limiting acceptance to specific age groups and types of offenses. Residential care is provided in urban settings such as ATC Dual Diagnosis Halfway House and rural settings such as wilderness campsites. The emphasis of some programs is on individual, family and group counseling while others focus on building self-esteem and social skills through recreational and work activities. The length of stay varies depending on the program type.

Performance contracting is used to clearly define requirements for release from delinquency commitment programs. The contract is negotiated when the youth enters the commitment program and release is dependent upon completion of the agreement. This is designed to prepare youth for transition to their home community and ensure accountability of the youth and of the program.

Residential placement of all committed youth is coordinated and arranged by district commitment managers in the 15 districts. Ideally, a district commitment manager chairs a multi-disciplinary staffing for each youth being considered for commitment. If the district commitment manager decides to recommend the commitment of youth during the staffing, the staffing committee recommends the most appropriate programs and restrictiveness levels for placement based on the assessed needs of the youth which is presented to the court. If the youth is committed, the judge then court orders the specific restrictiveness level. The Department is required to select a specific program within the restrictiveness level where the youth will be placed.

**Targeted Youth:** Youth classified for this level of placement represent a moderate risk to public safety. The majority of these youth have generally committed serious property offenses and their offending is characterized by frequent and repeated violations. A smaller number of these youth have committed more serious crimes against persons and may be appropriate for placement in programs of moderate risk rather than high risk, if commitment history so indicates.

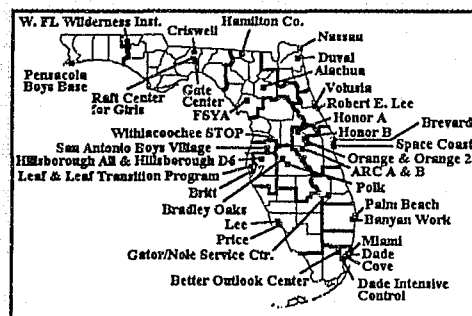

Youth placed in moderate risk programs may have had a prior placement in a lower restrictiveness level or may have at least one prior felony commitment. Committing offenses for

youth in the moderate risk level are generally second and third degree felonies. Youth with more serious committing offenses coupled with minor offending histories may be appropriate for placement. Youth with less serious committing offenses in concert with chronic offending histories may also be appropriate for placement in the moderate risk restrictiveness level.

Resources in this restrictiveness level are designed for youth who require close supervision but do not need placement in facilities that are staff or physically secure. Programs provide 24 hour awake supervision and include, but are not limited to, the following: Halfway Houses, START Centers, dual diagnosis programs, wilderness programs and Eckerd Challenge Programs. Also designated as moderate risk programs are local non-Juvenile Justice residential programs that serve committed delinquent youth, Eckerd Wilderness Camp Programs and ADM programs that serve committed youth. For a detailed description of each level 6 program see the appendix at the end of this chapter.

**Halfway Houses.** State operated and contracted Halfway Houses provide a structured, residential environment for 20-28 committed youth. There are 39 Halfway Houses located around the state. Two programs serve female offenders. Youth from 14 to 18 years of age who have been convicted of a felony or first degree misdemeanor can be placed in a Halfway

House following court commitment. The Florida School for Youth Achievement (which was closed and served its last clients at the beginning of FY 1993-94), San Antonio Boys Village, Gator/Nole Service Center, Dade Intensive Control and the Withlacoochee STOP program are now grouped with halfway houses.

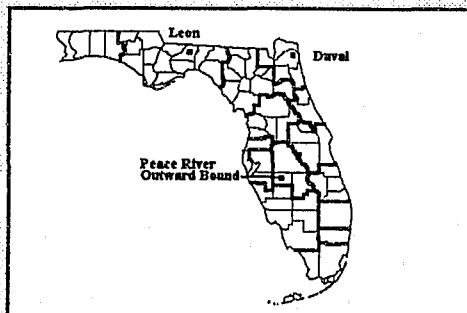

Each Halfway House program uses the resources available in the community to enhance its own services and give the residents an opportunity for interaction outside the confines of the Halfway House. Residents are involved in an intensive, responsibility oriented program geared toward helping them lead more socially acceptable lives. Individualized assessments are conducted and performance contracts written shortly after the youth enters the program. Resident meetings are conducted by group leaders. Clinical social workers, provide individual counseling to facilitate a more successful adjustment at home after release, as well as to improve peer relationships and social interaction skills.

**(Halfway Houses continued)**

Students may attend school at the facility, but placements at public schools, community colleges or vocational schools are encouraged and arranged when appropriate. Other residents may be employed in the community or involved in volunteer work projects.

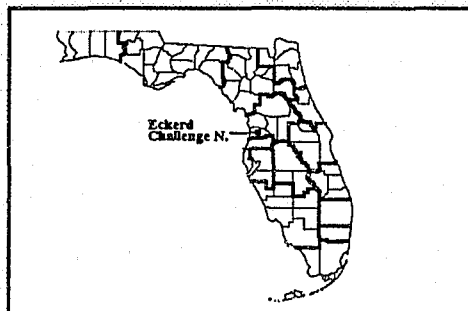

**Short-Term Adolescent Rehabilitation Treatment (START) Centers.** START Centers are residential programs for younger, committed juvenile offenders. The programs provide structured residential environments which offer opportunities for personal growth, social development and learning responsible behavior.

Three START Centers are currently in operation: Leon START Center in Tallahassee, Duval START Center in Jacksonville and Peace River Outward Bound (formally DeSoto START) in Arcadia. The Leon and Duval programs are operated by the department. Peace River Outward Bound is operated by Hurricane Outward Bound Inc. under contract with the Department. Each center houses approximately 24 youth. Youth 13 years of age or younger are preferred for placement at the Leon and Duval Centers. Immature 14 year olds may also be considered on a case-by-case basis. The youth must have been committed for a felony or first degree misdemeanor.

START Centers provide a variety of treatment activities through staff and peer interaction, individual and group counseling and a structured program of activities. An assessment is conducted following the youth's admission and is used to develop a performance contract. The youth participate in education programs conducted by the public school system, either in the START Center or in the community. Parental involvement is encouraged. Peace River Outward Bound provides a stress-oriented, short-term, intensive residential program based on the Outward Bound philosophy which operates in a wilderness setting.

**Eckerd Youth Challenge North Program.** The Eckerd Youth Challenge North Program is located in District 13 in Brooksville. The 30-bed site is located in an isolated, rural setting, designed to create a camp-like environment. Additionally, Challenge North operates a 30-slot reentry component. This program opened in October 1989.

The programs serve male delinquents, ages 14 years and older. The programs provide

**(Eckerd Youth Challenge North continued)**

opportunities for youth to take more effective control of their lives, to live within the law and to be successfully re-integrated in their home communities. The programs are committed to the following objectives:

- To provide a residential experience during which youth will engage in activities and receive services designed to strengthen self-esteem, pro-social behavior, basic academic skills and interpersonal problem-solving abilities.
- To provide an aftercare experience during which youth will be provided post-residential contact designed to reinforce benefits derived from the residential phase; to support youth as they apply newly acquired skills, attitudes and values in their communities; and to assist youth in identifying and acquiring needed community resources.

Overall, the Challenge Programs endorse seven primary strategies designed to rehabilitate and re-educate delinquent youth: (1) the development of positive quality relationships; (2) family involvement; (3) "Challenge" activities designed to be high-impact, high-interest and high-adventure; (4) discipline; (5) clinical services designed to meet individual needs; (6) education services; and (7) aftercare services.

**Crossroads Wilderness Institute.**  
Crossroads Wilderness Institute is a residential program operated by the Associated Marine Institutes, Inc. The program is located in an isolated rural setting in District 8. The Crossroads Program provides housing and 24-hour care for 30 committed youth.

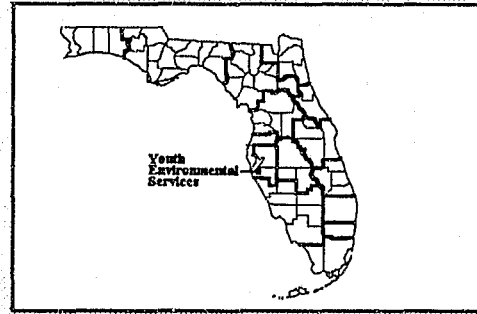

Admissions are restricted to committed youth who are 14 to 18 years of age and youth who are physically able to participate in program activities. Commitments for a felony offense are preferred although first degree misdemeanants are accepted when there is a history of prior offenses which resulted in residential commitment.

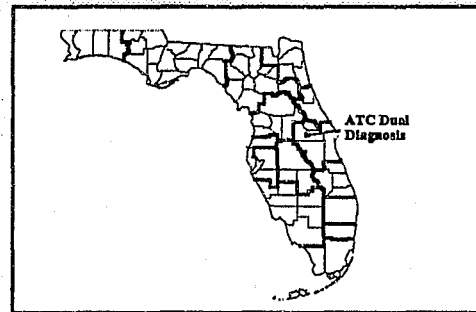

The youth are involved in a program of classroom instruction as well as participatory training in CPR, first aid, aquatics, seamanship, scuba diving and other related skills. Overnight trips help to reinforce skills learned in the classroom. Individualized treatment plans are developed through comprehensive assessments of the youth's needs. Specific behavioral, educational, and vocational objectives are prescribed. Through the structured program experiences and the counseling and case management activities of the program staff, participants are provided the opportunity to develop the skills and habits necessary to function in their home communities. Reentry services are provided to aid the youth in the transition to their home communities.

**Youth Environmental Services.** The Youth Environmental Services halfway house is a contracted program serving youth between the ages of 15 and 18. Youth are involved in work projects through ELAPP (Environmental Lands Acquisition and Protection Program). The program was created through an interlocal agreement in order to provide services for the maintenance and restoration

of property acquired through ELAPP. Youth spend 5 to 6 hours a day in a variety of work projects including land clearing, planting native vegetation, removing non-native vegetation, and maintenance. The length of stay is between 3 and 6 months, with aftercare being provided by the Department of Juvenile Justice reentry workers. Educational services are provided by the contract provider, Associated Marine Institute. The program is located in southern Hillsborough County on the Little Manatee River. Offense admission criteria is the same as any other moderate risk level residential program. Mature 14 years olds may be considered for admission based on mitigating or aggravating circumstances.

**ATC Dual Diagnosis -** The ATC Dual Diagnosis halfway house serves youth between the ages of 14 and 18 years of age, exhibiting substance abuse or mental health concerns, in addition to their delinquency issues. Services include individual, group and family counseling provided through wrap around ADM services. The program is located at Laurel Oaks Hospital in Orlando.

The length of stay is normally four months with aftercare services being provided by SAFE programs. Admissions is limited the catchment to District 7 youth only. Currentiy, Alcohol, Drug, and Mental Health Services funds 8 beds while the Department of Juvenile Justice funds 44 beds.

### Population Profile

A total of 4,555 youth were served in moderate risk residential community-based programs during FY 1993-94. Seventy percent of those served were placed in halfway houses. Table 14-1 presents age groupings, race, sex, number of youth released, number of youth served, number of cases served, average daily population, average length of stay, average age at first delinquency referral and average age at discharge for each program type.

Source: Committed Youth Served, Average Daily Population and Number of Youth Released (CIS/FACTS Extract, February 1995, clients served during FY 1993-94); Average Length of Stay, Age, Sex, Race, Average Age at First Delinquency Referral, Average Age at Discharge and Total Released (CIS/FACTS, OE Extract, FY 1993-94, clients released during FY 1993-94).

\*Note: Average Length of Stay could not be calculated for this program since there were no clients released.

The average length of stay for the youth who were released during FY 1993-94 was 3.7 months (ALOS is based on 2,990 youth released which was derived from a more recent data extract). Length of stay by program ranged from 3 months at START centers to 4.5 months at halfway houses and the Eckerd Challenge programs. At the time of release, youth served in moderate risk residential programs averaged 16.2 years of age. Youth served in Start Centers averaged 14.3 years of age at the time of discharge which is approximately two years younger than youth served in other moderate risk residential programs.

Youth served were primarily males (88.1 percent) with females accounting for only 11.9 percent of those released. Racially, the majority (52.2 percent) of the youth were minorities with whites making up only 47.8 percent. Blacks make up almost all of the minority category.

The average age at the time of their first delinquency referral for youth released from moderate risk residential programs during FY 1993-94 was 12.9 years. Youth released from Start centers were considerably younger than the state average at only 11.2 years at the time of their first referral.

### **Client History**

Table 14-2 indicates by program the percentages of committing offenses. The majority of youth were placed for felony property offenses (42.1 percent) followed by other felonies (21.0 percent) and felonies against persons (12.1 percent).

Source: CIS/FACTS/TP3, OE Extract, FY 1993-94 (clients released during FY 1993-94)

Table 14-3 shows the average number of prior felony referrals and the average number of prior felony adjudications for each program. A referral indicates that a youth has been charged with a delinquent offense, but is not necessarily evidence that the youth committed the offense charged. Determination of whether a law violation occurred is more accurately measured in Juvenile Justice data systems by whether there was an adjudication (or adjudication withheld) for the delinquent offense. Such a finding by the court is a clearer measure than a referral. Youth served in moderate risk residential programs had been referred an average of 8.7 times for felonies and had received an average of 4.7 felony adjudications. Only the most serious offense is counted on a single day. Criswell HWH had the highest average number of prior felony referrals and prior felony adjudications. Florida School for Youth Achievement had the lowest average number of prior felony referrals (4.1) and Lee HWH had the lowest average number of prior felony adjudications (1.3).

The percentage of the population by type of admission is shown in Table 14-4. Just under 41 percent of the youth were first commitments; 34.4 percent were recommitments; and 24.7 percent were transferred from another program. The District 11 local residential program had a first commitment rate of 100 percent but that was only for 1 youth. Two other local residential programs had the next highest first commitment rate. The Drug Alcohol Adolescent Rehabilitation Treatment (DAART) program had 70.0 percent first commitments and the Drug Residential FD program had 73.3 percent first commitments. As a whole the local residential programs in District 7 had the highest percentage of recommitments (80 percent). At the individual program level Youth Environmental Services had the highest percentage of recidivism (75.0 percent). ATC Dual Diagnosis had 0.0 percent recommitments and the highest percentage of transfers in (87.0 percent). The Leaf Transition Program does not serve recommitments and all of its clients are females who have transferred in from the Leaf HWH. Lee HWH, Youth Environmental Services, the District 7 and District 15 local residential programs all had 0.0 percent transfers in.

## **Outcome Measurement**

### **Outcome 1**

#### **YOUTH PLACED IN RESIDENTIAL COMMUNITY-BASED COMMITMENT PROGRAMS WILL SUCCESSFULLY COMPLETE THE PROGRAM.**

**Definition:** Successful completion means youth released to post-residential aftercare/reentry supervision, honorably discharged, or transferred to a less restrictive program as identified in the Commitment Programs Population Annual Summary. Unsuccessful releases include transfers to more restrictive placements, recommitments and transfers to the adult system. Youth transferred to equally restrictive programs are not counted as successful or unsuccessful.

Table 14-5 shows successful completion rates by program. Statewide, the moderate risk residential programs had a successful completion rate of 55.1 percent, a drop from 58.5 percent last year. The Leaf Transition Program had the highest successful completion rate at 100.0 percent (this could be misleading in light of the fact that there were only 5 clients released from this program). The statewide unsuccessful completion rate was 6.3 percent. The Criswell HWH had the highest unsuccessful completion rate at 66.7 percent (but only 3 clients were released). Most of the programs that had a much higher number of clients released had an unsuccessful completion rate of less than 20 percent. Statewide, 10.2 percent of the clients released were transferred to an equally restrictive program and the remaining 27.9 percent were released for other reasons. Orange HWH2 had the highest rate of transfers to an equally restrictive program at 47.4 percent.

Unsuccessful releases include transfers to more restrictive placements, recommitments and transfers to the adult system. Transfers to equally restrictive placements were counted neither as successful nor unsuccessful releases.

## Outcome 2

### **YOUTH RELEASED FROM MODERATE RISK RESIDENTIAL COMMUNITY-BASED COMMITMENT PROGRAMS WILL HAVE NO SUBSEQUENT LAW VIOLATIONS WITHIN ONE YEAR OF RELEASE.**

**Definition:** Many measures can be utilized as indications of recidivism, all related to subsequent law violations. A number of such measures are presented below. Re-referrals indicate that youth have been charged with another delinquent offense, but a subsequent referral is not necessarily evidence that the youth committed the offense charged. Determination of whether a subsequent law violation occurred is more accurately measured in Juvenile Justice data systems by whether there was an adjudication (or adjudication withheld) for one or more delinquent offenses following release. Such a finding by the court is a clearer measure than a subsequent referral. Adult felony convictions, for which youth were placed on adult probation or sentenced to adult prison, are also tabulated. A combined juvenile and adult felony conviction rate is also presented, as is a total of all juvenile adjudications and adult felony convictions. The operational definition of recidivism is, finally, the number of youth released from a program between January and June of 1993 who had been recommitted to Juvenile Justice, placed on adult probation or sent to prison within one year following release.

- Readjudication rates by program type were: START Centers, 51.1 percent; Eckerd Challenge North, 36.8 percent; Crossroads Wilderness Institute, 36.7 percent; Halfway Houses, 40.6 percent; and, for the local residential programs, 38.0 percent. Recidivism rates by program type were: START Centers, 44.3 percent; Eckerd Challenge North, 23.7 percent; Crossroads Wilderness Institute, 30.0 percent; Halfway Houses, 30.2 percent; and, for the local residential programs, 30.0 percent.

Table 14-6A represents the percentage of referrals which were received after a youth was released from a program. The total number of releases includes youth who were actually physically released from a program and those who were transferred to a program that was in a lower restrictiveness level. Those who were transferred directly to the Department of Corrections or a juvenile justice program that is in an equal or higher restrictiveness level are not included. Only youth released between January and June 1993 are included in this table. Tables 14-6B & 14-6C provide a comparison of readjudication and recidivism rates for the population studied.

*Source: CIS/FACTS/TP1, OE Extract, FY 1993-94 (clients released between January and June 1993) and the Department of Corrections' FY 1993-94 probation and prison extract.*

Prior outcome evaluation reports contained calculations of suppression effects as measures to compare the numbers of referrals and adjudications after a subject had left a program to those from before. The exclusion of key factors such as subsequent adult arrests raises concerns about the utility of such data. These measures do not take into account the fact that youth may be in an aftercare or reentry program following release. In addition, youth released from commitment programs are more likely to be recommitted or go into the adult system for subsequent offenses. This would tend to decrease numbers of subsequent offenses, if only because they were in confinement during part of the follow-up period. Because of concerns related to validity and meaning of the data, suppression measures are no longer included in this report.

### Outcome 3

This is the second year in which data has been collected regarding the number of escapes and youth escaped as well as the number of absconds and youth absconded. Table 14-8 shows that during FY 1993-94 a total of 306 youth absconded from moderate risk residential facilities totaling 410 absconds. During the same time period, 684 youth escaped from these programs, totaling 860 escapes.

Source: Total costs are reported from SAMAS for FY 1993-94.

Note 1: Expenditures for these programs were not found in SAMAS.

Note 2: Expenditures in SAMAS could not be broken out from those attributed to Leaf Halfway House.

Note 3: Expenditures in SAMAS could not be broken out from those attributed to Hillsborough D6 Halfway House.

Note 4: Expenditures in SAMAS could not be broken out from those attributed to Orange Halfway House.

Note 5: Space Coast Marine Inst. has residential and non-residential components. The contracted dollars are the same for both components.

Note 6: SAMAS does not report separately expenditures for Local Residential programs.

### **Program Cost**

Table 14-9 summarizes cost by program. The total general revenue expenditures for moderate risk residential community-based commitment programs, that could be extracted from SAMAS, amounted to \$27,148,239.

Total costs reported each year include the costs of renovations to facilities and other OCO expenditures. Therefore, although total costs reflect actual expenditures, they will vary from year to year.

### **Program Effectiveness**

Successful completion, rereferrals, readjudications, recommitments and seriousness of offending are key measures in assessing the effectiveness of the moderate risk residential community-based programs.

The statewide successful completion rate was 55.1 percent. However, the programs show a great deal of variability in terms of successful completion. The unsuccessful completion rate was 6.3 percent and the rate of transfers to an equally restrictive program was 10.2 percent.

Readjudication rates also varied by program type with 40.8 percent statewide readjudicated within one year of release. Overall, youth from START centers had the highest readjudication rate with just over 51 percent readjudicated on a new offense within one year of release. These youth are significantly younger than youth served in any of the other moderate risk residential programs. They averaged only 14.3 years old at the time of discharge. They were also the youngest at the time of their first referral to the juvenile system at only 11.5 years of age. It is possible that the differences in recidivism rates are more reflective of the clients served than on the type of services the clients received. These differences however should be explored through further study.

**TABLE 14-R**  
**MODERATE RISK RESIDENTIAL PROGRAMS**  
**RECOMMENDATION UPDATE**

Recommendation in 1993 Outcome Evaluation	Progress in FY 1993-94	1994 Report Recommendation
<p><b>Program Improvement</b></p> <p>Though all level six programs are performing as well or better than expected, it is of concern that actual recidivism rates are so high. The average recommitment or readjudication rate of 66 percent masks a wide range of variation in actual rates of 40 percent at Miami Halfway House and 85 percent at Duval Start. The Department should follow up on both high and low recidivism rates for level six programs using intensive program based evaluations to investigate contributing factors and innovative programmatic features.</p>	<p>Lack of bed spaces to house juvenile offenders was probably a significant factor contributing to the wide range of recidivism rates. Additional beds have been added during this year which should have a positive impact.</p>	<p><b>Program Improvement</b></p> <p>Quality assurance peer reviews should be followed up to ensure effectiveness of programs. Emphasis should be given to achieving measurable behavior changes and skill acquisition by youth during their stay in moderate risk programs.</p> <p>Improve security to reduce escapes and absconds.</p> <p>At higher restrictiveness levels, provide for admission criteria that allows for the transfer of youth to a higher level if the youth is too difficult for the moderate risk level.</p>

## **CHAPTER 14 APPENDIX**

**DISTRICT 1**  
**Pensacola Boys Base**

**PROGRAM DESCRIPTION:**

**Address:** Building 3780, Corry Station  
Pensacola, Florida 32511

**Telephone:** (904) 453-7490  
SC 697-7490

**Fax:** (904) 453-7494  
SC 697-7490

**Restrictiveness Level:** 6

**Intended ALOS:** 4-6 months

**Capacity:** 25

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

Committed males between the ages of 14-17  
First degree misdemeanants and felony offenses  
preferred.

**Services and Treatment Offered:**

This is a structured residential treatment  
program located on a Navy base. Youth  
participate in reality based individual and group  
therapy. Youth attend in-house school or obtain  
employment, and participate in community  
recreational activities.

**DISTRICT 2**  
**Regional Adolescent Female Treatment  
Center**

**PROGRAM DESCRIPTION:**

**Address:** DISC Village Incorporated  
P.O. Box 568  
Woodville, Florida 32362

**Telephone:** (904) 421-4115  
SC 277-4456/4861

**Fax:** (904) 421-4378

**Restrictiveness Level:** 6

**Intended ALOS:** 6 months

**Capacity:** 16

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

This is a moderate risk residential program for  
adolescent females ages 14-17. Youth on  
medication will be considered but they must be  
able to deal with the therapeutic environment.

**Services and Treatment Offered:**

The program is in a structured therapeutic  
community with individualized treatment plans  
including, family counseling, leadership skills,  
and drug and alcohol abuse issues. An on  
campus academic program is provided, as well  
as, an on staff psychologist. Progress and  
performance in the program is based on a daily  
point system.

**DISTRICT 2**  
**Gate Center Halfway House**

**PROGRAM DESCRIPTION:**

**Address:** P.O. Box 568  
Woodville, Florida 32362

**Telephone:** (904) 487-2277  
(904) 487-1717 (main #)

**Fax:** (904) 421-4378

**Restrictiveness Level:** 6

**Intended ALOS:** 6 months

**Capacity:** 16

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

Committed males ages 13-16 from the commitment service area (Districts 1 and 2).

**Services and Treatment Offered:**

Clients develop a treatment plan in conjunction with their counselors. Education is provided on site by the Wakulla County School System. Vocational counselors visit on a daily basis. There are weekly visits by a licensed psychiatrist and special needs are provided by a full time special needs counselor. Camping trips and intensive wilderness experiences are also a part of this program.

**DISTRICT 2**  
**Criswell Halfway House**

**PROGRAM DESCRIPTION:**

**Address:** 3240 Capital Circle  
Tallahassee, Florida 32310

**Telephone:** Program closed

**Restrictiveness Level:** 6

**Capacity:** 28

**Aftercare Services Provided?:** No

**Intended ALOS:**

Phase down for closing. 4/26/93. Bear Creek program starting 6/25/93

**Eligibility Criteria:**

Committed youth ages 14-18 convicted of a felony or first degree misdemeanor.

**Services and Treatment Offered:**

This is a structured residential program offering individual and group counseling, performance contracts, and community involvement. Vocational component and employment opportunities are available through the community.

**DISTRICT 3**  
**The Florida School for Youth Achievement**

**PROGRAM DESCRIPTION:**

**Address:** P.O. Box 2210  
Chiefland, Florida 32626

**Telephone:** (904) 493-6093  
SC 631-6093

**Fax:** (904) 486-5340  
SC 645-5340

**Restrictiveness Level:** 6

**Intended ALOS:** Program closed to new admissions Sept. 1, 1993

**Capacity:** 16

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

Committed females ages 12-18. Youths referred for felonies and first degree misdemeanors are preferred.

**Services and Treatment Offered:**

This was a contracted female halfway house offering specialized counseling services. The program was closed 11/23/93.

**DISTRICT 3**  
**Hamilton County Halfway House**

**PROGRAM DESCRIPTION:**

**Address:** 1000 Mitchell Street Extension  
Jasper, Florida 32052

**Telephone:** (904) 792-6400  
**Fax:** (904) 792-6401

**Restrictiveness Level:** 6

**Intended ALOS:** 6 months

**Capacity:** 24

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

Committed males ages 14-18.

**Services and Treatment Offered:**

Each halfway house program uses the resources available in the community to enhance its own services and give the residents an opportunity for interaction outside the confines of the halfway house. Residents are involved in an intensive, responsibility oriented program geared toward helping them lead more socially acceptable lives. Individualized assessments are conducted and performance contracts written shortly after the youth enter the program. Resident meetings are conducted by group leaders. These same staff, along with clinical social workers, provide individual counseling to facilitate a more successful adjustment at home after release, as well as, to improve peer relationships and social interactions.

**DISTRICT 3**  
**Alachua County Halfway House**

community or involved in volunteer work projects.

**PROGRAM DESCRIPTION:**

**Address:** 3430 N.E. 39th Avenue  
Gainesville, Florida 32609

**Telephone:** (904) 955-2160  
SC 625-2160

**Fax:** (904) 955-2383  
SC 625-2160

**Restrictiveness Level:** 6

**Intended ALOS:** 6 months

**Capacity:** 22

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

This is a program for 13-18 year old committed females. The girls have generally committed serious property crimes with frequent and repeated law violations. Some may have at least one prior felony conviction.

**Services and Treatment Offered:**

Each halfway house program uses the resources available in the community to enhance its own services and give the residents an opportunity for interaction outside the confines of the halfway house. Residents are involved in an intensive, responsibility oriented program geared toward helping them lead more socially acceptable lives. Individualized assessments are conducted and performance contracts written shortly after the youth enter the program. Resident meetings are conducted by group leaders. These same staff, along with clinical social workers, provide individual counseling to facilitate a more successful adjustment at home after release, as well as, to improve peer relationships and social interaction skills. Students attend school at the facility, but may also participate in community college or vocational school programs when appropriate. Other residents may be involved in the

**DISTRICT 4**

**Address:** 3036 Phillips Highway  
Jacksonville, Florida 32207

**Telephone:** (904) 348-2680  
**Fax:** (904) 348-2691  
SC 870-2691

**Restrictiveness Level:** 6

**Intended ALOS:** 90 days

**Capacity:** 28

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

Males ages 14-18. Youth committed for felonies and first degree misdemeanors are preferred.

**Services and Treatment Offered:**

Duval halfway house encourages the residents to participate in one on one counseling sessions. A mental health therapist is available. Residents attend school daily with teachers provided by the Duval County Public School System. A drug abuse counselor is also available through Gateway community services. Community activities are provided by the Recreational Therapist.

**DISTRICT 4**  
**Volusia Halfway House**

**PROGRAM DESCRIPTION:**

**Address:** 1047 Madison Avenue  
Daytona Beach, Florida 32114

**Telephone:** (904) 254-3724  
SC 380-3753  
**Fax:** (904) 238-4789

**Restrictiveness Level:** 6

**Intended ALOS:** 90 days

**Capacity:** 28

**Aftercare Services Provided?:** Yes

**Eligibility Criteria:**

Committed males age 14-18 from the NE CSA. Youths committed for felonies and first degree misdemeanors are preferred.

**Services and Treatment Offered:**

Each halfway house program uses the resources available in the community to enhance its own services and give the residents an opportunity for interaction outside the confines of the halfway house. Residents are involved in an intensive, responsibility oriented program geared toward helping them lead more socially acceptable lives. Individualized assessments are conducted and performance contracts written shortly after the youth enter the program. Resident meetings are conducted by group leaders. These same staff, along with clinical social workers, provide individual counseling to facilitate a more successful adjustment at home after release, as well as, to improve peer relationships and social interaction skills. Students attend school at the facility, but may also participate in community college or vocational school programs when appropriate. Other residents may be involved in the community or involved in volunteer work projects.

The youth are involved in a program of classroom instruction, as well as, training in CPR, first aid, aquatics, seamanship, scuba diving, and other related skills. Overnight trips help to reinforce skills learned in the classroom. Individualized treatment plans are developed through comprehensive assessments of the youth's needs. Specific behavioral, educational, and vocational objectives are prescribed. Through the structured program experiences clients are provided the training needed to function in their own communities. Reentry services are in place to aid in this transition.

**DISTRICT 11**  
**Dade Intensive Control Residential**

**PROGRAM DESCRIPTION:**

**Address:** 3300 N.W. 27th Avenue  
Miami, Florida 33142

**Telephone:** (305) 637-4529  
SC 461-4529

**Fax:** (305) 461-4669

**Restrictiveness Level:** 6

**Intended ALOS:** 6 months

**Capacity:** 16

**Aftercare Services Provided?:** Yes

**Eligibility Criteria:**

Committed males ages 14-18 if they are first time offenders. Second or third degree felons or misdemeanants are accepted.

**Services and Treatment Offered:**

The Dade Intensive Control Program offers a wide variety of services and treatments including, individual and group and family counseling, psychological evaluation and therapy, drug and alcohol treatment, vocational training, medical and dental treatment, pre-employment referrals, and Job Corps participation. Voluntary attendance at Saturday and Sunday religious services are also offered. Clients attend Miami Heat basketball games, and University of Miami football and basketball games. Clients are also taken to area parks and movies. A variety of sports activities are also offered at the facility itself.

**DISTRICT 3**  
**Eckerd Youth Challenge North**

**PROGRAM DESCRIPTION:**

**Address:** 201 Culbreath Road  
Brooksville, Florida 34602

**Telephone:** (904) 799-5621  
**Fax:** (904) 799-4457

**Restrictiveness Level:** 6

**Intended ALOS:** 4-6 months

**Capacity:** 30

**Aftercare Services Provided?:** Yes

**Eligibility Criteria:**

Committed youth 14-18 years of age who have been convicted of a felony, or have at least one prior commitment and residential placement. Youth are excluded if documented physical, learning, or emotional problems prevent educational and work program participation.

**Services and Treatment Offered:**

This is a 4-6 month residential program followed by a reentry program. It stresses group living, education, work service, recreation, and home and community relationship development.

**DISTRICT 15**  
**Gator Nole Residential Program**

**PROGRAM DESCRIPTION:**

**Address:** 117 Northeast 39th Boulevard  
Okeechobee, Florida 34972

**Telephone:** (813) 357-2000  
SC 721-7450

**Fax:** (813) 357-1944

**Restrictiveness Level:** 6

**Intended ALOS:**

Three and one half months.

**Capacity:** 30

**Aftercare Services Provided?:** Yes

**Eligibility Criteria:**

Committed males ages 14-18. Youths committed for a felony, or those that have at least one prior residential commitment are preferred. Youth with documented physical, learning, or emotional problems that prevent educational or -work participation are excluded.

**Services and Treatment Offered:**

This is a structured residential program for males from the East CSA. An average three months stay is followed by a reentry program. The program stresses group living, education, work, recreation, and home-community relationships.

**DISTRICT 8**  
**Peace River Outward Bound**

**PROGRAM DESCRIPTION:**

**Address:** 8806 S.W. Start Center Street  
Arcadia, Florida 33821

**Telephone:** (813) 993-4610  
SC 740-4610

**Fax:** (813) 993-4612  
SC 740-4612

**Restrictiveness Level:** 6

**Intended ALOS:** 3 months

**Capacity:** 24

**Eligibility Criteria:**

Male youth ages 13-15 who are first degree felons or misdemeanants who have not been previously committed.

**Services and Treatment Offered:**

This program is contracted with Hurricane Outward Bound, and is a combined residential and wilderness program. Peace River Outward Bound provides a variety of treatment activities through staff and peer interaction, individual and group counseling, and a structured activities program. Intake assessment is conducted and a performance contract is developed. Desoto County School System provides educational activities. Parental participation is encouraged. The program provides a stress oriented, short term, intensive residential program based on the Outward Bound philosophy.

**DISTRICT 6**  
**Youth Environmental Services**

**PROGRAM DESCRIPTION:**

**Address:** 301 7th Street East  
Bradenton, Florida 34208

**Telephone:** (813) 741-3102

**Fax:** (813) 741-3105

**Restrictiveness Level:** 6

**Intended ALOS:** 6-9 months

**Capacity:** 15

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

Committed males age 15-18 convicted of a third degree felony with prior commitments. Or, committed males with prior commitment and chronic problems and a history of assaultive behavior.

**Services and Treatment Offered:**

Youth receive family, group and individual counseling. Guardian participation is encouraged and youth sometimes obtain employment at selected community employment sites. There is an on-site school present and clients are offered remedial education, if they need it, and they are encouraged to obtain their GED diplomas.

**DISTRICT 1**  
**Drug and Alcohol Adolescent Rehabilitation Treatment**

**PROGRAM DESCRIPTION:**

**Address:** 1221 West Lakeview Avenue  
Pensacola, Florida 32501

**Telephone:** (904) 432-1222

**Fax:** (904) 433-1314

**Restrictiveness Level:** 6

**Intended ALOS:** 4-6 months

**Capacity:** 20

**Aftercare Services Provided?:** Yes

**Eligibility Criteria:**

Male and female youth ages 14-18 who are in need of treatment for substance abuse.

**Services and Treatment Offered:**

Individual, group, and family counseling, as well as, substance abuse counseling. Clients attend public schools and prepare for the GED. There are remedial or special classes offered. Guardian participation is encouraged. This program also contains a day treatment component for clients completing the residential phase.

**DISTRICT 7**  
**Grove Counseling Center**

**PROGRAM DESCRIPTION:**

**Address:** 580 Old Sanford-Oviedo Road  
Winter Springs, Florida 32708

**Telephone:** (407) 327-1765

**Fax:** (407) 327-2001

**Restrictiveness Level:** 6

**Eligibility Criteria:**

Male or female youth age 13-17 who have a primary diagnosis of substance abuse and are not assaultive. Non committed as well as committed clients are accepted based on a screening by the Commitment Manager.

**Intended ALOS:** 3-9 months

**Capacity:** 18

**Aftercare Services Provided?:** No

**Services and Treatment Offered:**

Clients receive individual, group and family counseling, as well as, intensive counseling for substance abuse. There is vocational education offered and an on-site school on the premises. Guardian participation is encouraged. Parents may be charged a fee based on ability to pay.

**DISTRICT 5**  
**Leaf Transition (Life Enhancement for Adolescent Females)**

**PROGRAM DESCRIPTION:**

**Address:** 1614 Palm Way  
Largo, FL 34640

**Telephone:** Disconnected

**Fax:** (813) 531-9340

**Restrictiveness Level:** 6

**Intended ALOS:** 3 months

**Capacity:** 14

**Aftercare Services Provided?:**

This is aftercare.

**Eligibility Criteria:**

Committed females ages 13-18 who have completed the LEAF residential program but are not yet ready to return home.

**Services and Treatment Offered:**

This is a residential transition program for girls leaving LEAF halfway house who are not yet ready to return to their homes. Clients receive individual, family, and group counseling as part of an ongoing mental health treatment modality. Guardian participation is encouraged. There is an on-site school

<p><b>DISTRICT 2</b> <b>West Florida Wilderness Institute</b></p>
-----------------------------------------------------------------------

**PROGRAM DESCRIPTION:**

**Address:** Rt. 2, Box 1789  
Ponce de Leon, Florida 32455

**Telephone:** (904) 548-5524  
SC 771-2020

**Fax:** (904) 548-5907

**Restrictiveness Level:** 6

**Intended ALOS:** 5-6 months

**Capacity:** 26

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

Committed males ages 14-18 from districts 1 and 2.

**Services and Treatment Offered:**

This is an Associated Marine Institute wilderness program. The program offers individual, group, and family counseling, as well as, mental health and substance abuse counseling. There is an on-site school and courses preparatory to the GED test. Vocational training is offered as well. guardian participation is encouraged.

## **15. HIGH RISK RESIDENTIAL PROGRAMS**

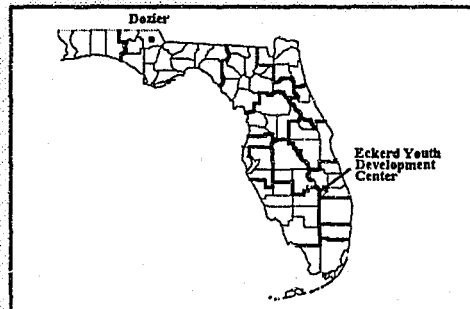

### **Program Description**

Level eight, high risk residential programs provide the most secure residential setting in the juvenile delinquency system for committed youth. Youth classified for this level of placement require close supervision in a structured residential setting that provides 24 hour per day secure custody, care and supervision. Placement in programs in this level is prompted by a concern for public safety that rules out placement in programs at lower restrictiveness levels or in the youth's home.

Admission criteria to most programs in this level is controlled by statute or the "Bobby M" consent decree. Youth assessed in need of placement in this level have been adjudicated and committed for major property offenses, felony assault offenses in the first, second and third degree categories and may have multiple prior commitments and residential placements. Most programs cannot admit transfers from a lower restrictiveness level without the youth receiving a new commitment. Length of stay in residential placement is long term (6-12 months) and intensive community supervision is provided following successful completion of residential placement.

Through a variety of treatment modalities which assist personal development and self-awareness, these programs attempt to reduce further delinquent acts and increase self-sufficiency. Placement resources in this level include training schools, the Florida Environmental Institute (FEI), Hillsborough Alternative Residential Program (HARP), Broward Control Treatment Center (BCTC), serious habitual offender programs (SHOP), Intensive Halfway Houses (IHWH) and Boot Camps. The Elaine Gordon Sex Offender Treatment Program is also included in this chapter.

**Training Schools.** Training Schools are institutions providing custodial care to male youth who require the highest level of security within the delinquency continuum. Two training schools, Arthur G. Dozier Training School and Eckerd Youth Development Center, provide custodial care to youth who have committed serious offenses. Both institutions have 24-hour staffing to ensure continuous supervision and care as well as counseling and treatment. The admission criteria for Dozier and Eckerd Youth Development Center are as follows:

- Male youth with any first or second degree felony adjudication;

**(Training Schools continued)**

- Male youth with any third degree adjudication and two or more previous felony commitments;
- Male youth adjudicated for a violent misdemeanor while in residential commitment status;
- Other male youth may be admitted under extraordinary circumstances when authorized by the PDJIP assistant secretary.

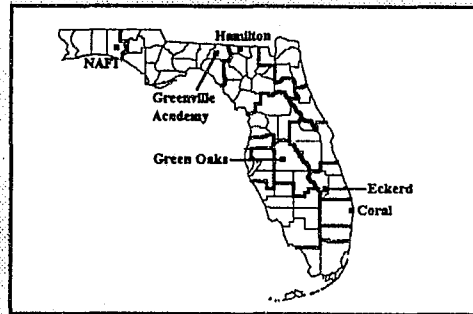

Both programs serve serious male juvenile offenders who meet training school admission criteria. Selected youth in these programs are placed in transitional cottages during the last part of their stay as preparation for return to the community.

As part of the agreement reached in the Bobby M. Consent Decree, both training schools have reduced their secure populations from over 500 each prior to the consent decree to a cap of 100 each. This cap was reached in December 1990 at Dozier and in March 1991 at EYDC. EYDC has an additional 30 beds in transitional cottages 'outside the fence' while Dozier has 28 additional beds.

**Arthur G. Dozier Training School.** This training school operates under an interdisciplinary team approach. This team consists of professionals from the Department of Health and Rehabilitative Services (Delinquency Services), the Department of Education (Washington County Schools) and Florida State University (Department of Psychology). This integrated approach was developed in order to ensure meaningful rehabilitation, education and treatment services for serious male juvenile offenders meeting training school admission criteria. Each youth is given a needs assessment and is evaluated by a multi-disciplinary team of professionals at the time of his admission. Subsequent to assessments and evaluations, the team meets with each student to finalize the youth's performance contract. Each youth is then placed in one of seven treatment units. During the youth's commitment, his treatment program is the focus and specific responsibility of the treatment team assigned to his unit. This team consists of a case manager, homelife staff (cottage parents), and an educational manager. A full range of educational, vocational and recreational programs is provided at Dozier.

**Eckerd Youth Development Center (EYDC).** EYDC has programmatic services similar to Dozier's. The educational component is contracted to the Washington County Schools. The academic curriculum includes a GED program for older male youths. Vocational skills are explored and several programs have been developed that range from auto mechanics to building maintenance to culinary arts classes. Day release programs are available where selected youth can work in the community and are paid minimum wage. Contracted psychologists are utilized for assessment and consultation and for planning therapeutic intervention with problem clients. A behavior management system has been designed at EYDC to reinforce cooperative living and interpersonal skills development. Close supervision by EYDC staff accentuates the secure custodial function of EYDC's program. An important component of the EYDC program is its reentry program to assist youth's readjustment upon return to the community.

**Intensive Halfway Houses.** An Intensive Halfway House program is a fifteen (15) to thirty (30) bed facility providing a continuum of services for youth classified as high risk to the public. Typically, the programs serve an all male population ranging in age from fourteen (14) through eighteen (18) years of age. The Intensive Halfway House provides protection of the public through the provision of treatment in a secure setting with the goal of preventing the youth from further penetration into the criminal justice system and alleviating or reducing the level of deviant behavior. Intensive halfway houses are the only level 8 programs that allow clients to be transferred from level 6.

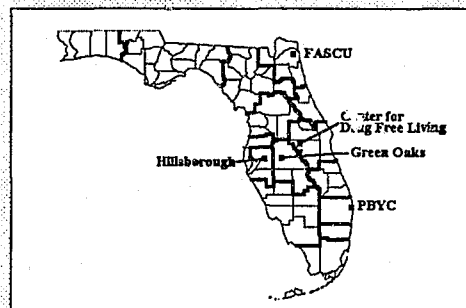

Therapeutic services are provided in a setting providing 24 hour a day custody, care and supervision. Consistent with the intentional therapeutic community concept, needs of youth are comprehensively assessed, individual performance contract goals are consistent with identified needs of youth, treatment services are carefully planned to address overall needs, and treatment strategies employ techniques which are based on control theory and structured learning theory. Control theory is utilized as a treatment mode in order to accomplish the program objectives. Structured learning (modeling, role playing, feedback and transfer of learning) is applied to skill training

Although the typical length of stay is six (6) to nine (9) months, release from the program is contingent upon the youth's achieving his goals. Prior to completion of residential services, transitional planning begins, arranging for the aftercare portion of the program, during which the youth will be continued in a community based aftercare program to provide services in the youth's home and community.

#### **Serious Habitual Offender Programs.**

**Florida Augustus Secure Care Unit (FASCU).** Operated by the National Center on Institutions and Alternatives of Alexandria, Virginia, the Florida Augustus Secure Care Unit is a serious offender program for male delinquent youth, ages 14-17 years, who meet the statutory criteria of "serious habitual offender." The program operates in two phases; nine months residential and nine months reentry - nonresidential. The program model is based on a "therapeutic community" model which combines intensive one-to-one therapeutic sessions with peer group counseling and family therapy.

The residential component of the program is located in a rural section of Duval County.

**(Serious Habitual Offender Programs continued)**

Primary goals of the residential phase include the development of individual, social, problem solving, and decision making skills; as well as the strengthening of family functions through regular family therapy. All program efforts are aimed at preparing each youth for successful reentry into the intensive supervision of the nonresidential phase.

Admission to the program is limited to the serious habitual offender youth of Duval County. The program opened in April 1990.

**Palm Beach Youth Center (PBYC).** Palm Beach Youth Center is a program of New Life Youth Services, Inc., a non-profit organization based in Cincinnati, Ohio. The program serves 30 male youth from Palm Beach County who meet the statutory criteria for serious habitual offenders. The average length of stay is nine months in each of the two phases.

The PBYC treatment program uses a combination of treatment philosophies, but the central approach is based on the concept of positive peer culture. It is basically an intensive group therapy approach, with group therapy held daily. Every other part of the program follows up on the treatment plans and commitments made in group therapy. Residents are taught to be caring and confrontive with each other and to be responsible for their peer community. The approach is a cognitive-behavioral one, focusing on changing habitual thinking patterns which have allowed the youth to justify harming others and himself. Social thinking problem areas which are emphasized include: learning to "own" their behaviors instead of blaming others, victim awareness and empathy for others, and the importance of self-discipline and mutual cooperation. These are the first steps in learning the skills necessary to hold down a job in the community and to be able to function in other social groups. Areas such as anger management, decision-making, planning and other life skills are taught regularly.

In addition to learning new social skills, a part of the rehabilitation process is making amends for having harmed others in the past. This is done partly through community service and following through on commitments, but also through being able to apologize to others and then to actually change harmful behavior to caring, helpful, responsible behavior toward others. After the youth completes the treatment phases at the center, he begins the aftercare phase in the community. A community services worker provides personalized assistance to help each youth establish a support system and obtain job and/or school placement, and also provides crisis intervention should any problems arise.

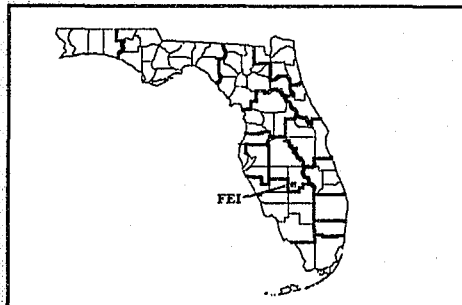

**Hillsborough SHOP.** This serious habitual offender program located in Seffner has been open since June 1993. It has a residential length of stay of 9 months and a non-residential length of stay of 9 months. Hillsborough SHOP serves SHO-eligible males, age 15-21, from Districts 5, 6, 8 and 14.

**Green Oaks SHOP.** This serious habitual offender program is located in Bartow and has been open since July 1993. It has a residential length of stay of 9 months and a non-residential length of stay of 9 months. Green Oaks SHOP serves SHO-eligible males, age 15-21, from Districts 5, 6, 8 and 14.

**The Center for Drug Free Living.** This program has been in operation since May 1993. It is located in Intercession City and has a 9 month residential and a 9 month non-residential length of stay for males, age 15-18, and serves the East Commitment Service Area.

**Florida Environmental Institute, Inc. (FEI).**

FEI is by the Associated Marine Institutes, Inc. FEI is funded by HRS to operate a highly structured three-phase program providing continuous case management for the most serious chronic youthful offenders. The youth served by FEI are ones who state's attorneys would otherwise recommend direct filing or waiving to the adult correctional system. The next step for all of these youth is the adult system. For this reason, the program is known to many as "last chance ranch." The youth served by FEI are males between the ages of 15 and 17 years who have histories of serious legal and social problems. These are youth who generally exhibit inadequate and undersocialized personalities. They usually have extremely poor self-images and lack adequate communication skills, complicated by serious education deficits. The program emphasizes an action-oriented, hands-on approach which develops desirable work habits, emphasizes immediate and fair discipline and develops employability and social skills in participating youth.

Phases I and II are the residential components of the program with services provided at FEI, a remote rural camp located in the Fisheating Creek Wilderness Area near Venus, Florida. One of the primary goals of these two phases is to help youth acquire good work habits and a basic understanding of the work ethic through successful participation in labor-intensive environmental work projects. The average length of stay for these two residential components is approximately one year.

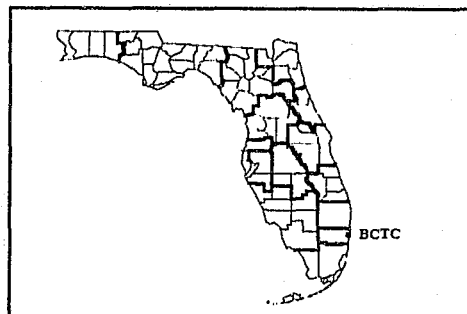

Phase III is the nonresidential or aftercare component of the program. Upon graduation from Phase II, each youth must return to his home community and be supervised by an FEI field advisor. The youth must maintain continuing satisfactory adjustment at home, begin working on a job, or be involved in vocational training or school. An inability to deal with the privileges of Phase III could result in the return of the offender to the residential portion of the serious offender program. The anticipated length of stay for the nonresidential phase is six months.

The admission criteria for FEI are as follows:

- Any male youth age 15 or older who have been committed for a capital, life, or first degree felony and have been referred through the State Attorney or adult court.

**Broward Control Treatment Center (BCTC).** BCTC is a residential treatment program for female delinquents who have committed serious offenses or are chronic law violators. The primary goal of the program is to provide the specific types and quality of services and support necessary to enable the individual resident to successfully function in the community as a responsible citizen.

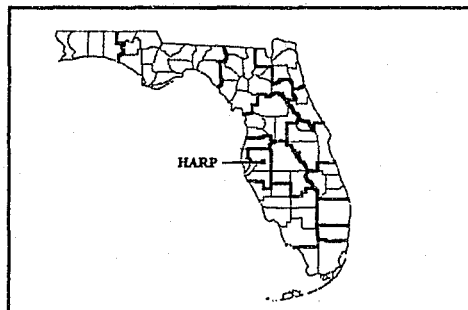

BCTC serves 20 females 14 years of age or older for a budgeted length of stay of six to nine months.

- In order to be admitted to BCTC the youth must be a female, 14 years of age or older who meets one or more of the following criteria:
- Is currently committed for a first degree felony or second degree felony.
- Has two or more prior commitments, at least one of which resulted in placement in a residential commitment program.
- Has been adjudicated for two or more delinquent acts that involved force capable of causing or that did cause life-threatening bodily injury.
- Has a history of four or more escapes from residential programs.

**The Hillsborough Alternative Residential Program (HARP).** HARP is a fifteen bed, staff secure residential treatment program for committed boys 13 to 19 years of age with mild to moderate mental retardation (i.e., 40-69 I.Q. range). The program is located in Hillsborough County and is contracted with the Agency for Community Treatment Services, Inc. (ACTS). Youth placed in the

program are assessed as needing a specialized residential placement and have demonstrated an inability to adjust in programs in lower restrictiveness levels. The program provides six to nine months of intensive treatment. It also serves boys found incompetent to stand trial due to retardation. These cases are not in the CIS/Florida Assessment, Classification and Tracking System but they do occupy commitment beds.

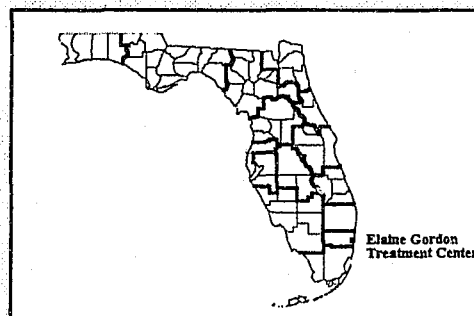

HARP is a holistic oriented treatment program for youth, specifically designed for the "multi-problem" student population. The treatment program model consists of a graduated, three-level hierarchy through which students move as they demonstrate a consistent

(JARP continued)

reduction in maladaptive behavior. As residents advance, they become eligible for expanded privileges and participation in community activities which help to prepare them for eventual return to their communities.

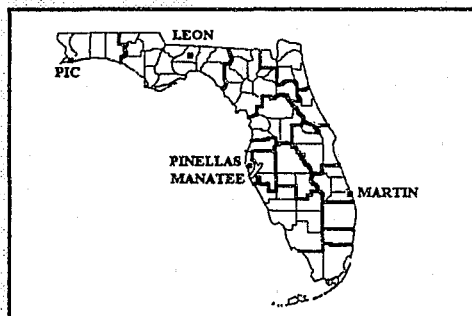

Program activities include: an on-site educational and vocational program, individual, group and family counseling, mental health overlay services, drug education and counseling, employment experiences, structured recreational and leisure activities, and medical services.

**The Elaine Gordon Treatment Center.** The Elaine Gordon Treatment Center provides a continuum of care for the evaluation and treatment of juvenile sex offenders. The purpose of treatment is to reduce the number of youth committing sex offenses and to prevent identified youth from entering the adult penal system or re-entering the juvenile delinquency system following release.

This program is located on the grounds of South Florida State Hospital. It is designed to treat non-psychotic youth who have been adjudicated delinquent and have committed a sexual offense. The sexual offenses include child molestation and rape. Youth may also be admitted to the program on the recommendation of the Case Review Committee without actually being adjudicated delinquent.

**Boot Camps.** Boot camps or "shock incarceration" programs offer a paramilitary approach to managing offenders by instilling self-discipline, structure, physical discipline, and order in a short and intense period of incarceration, followed by a critical period of intensive community supervision upon the offenders release. The paramilitary social environment is designed to provide consistency, structure, dependability, predictability, and fairness. Admission criteria is in statute. Boot camps generally provide four months of intensive discipline and rigorous physical training to thirty youth. Youth enter the boot camp in platoons of 15 youth.

**(Boot Camps continued)**

Boot camps provide an array of unique services that are designed to gain sufficient attention of the youth so negative, anti-social behaviors can be identified and extinguished as rapidly as possible. The programs create an austere, regimented environment that encourages the offender to grow socially, morally, physically, and academically. All boot camp programs are either physically or staff secure programs.

Release from level 8 programs is contingent upon the youth's completion of his/her performance contract. Agreement by the committing court may also be a factor in the youth's release.

**Population Profile**

One thousand, five hundred and seventy-one youth were served in high risk residential programs during FY 1993-94. There were 827 youth discharged during the fiscal year. Average length of stay was just over five months in the programs (ALOS is based on 1,241 youth released which was derived from a more recent data extract). The average age of youth at the time of discharge was 16.5 years. All youth were age 15 or over at the time of release. The high risk residential programs serve male delinquent youth with the exception of BCTC which is an all female program.

Statewide, almost 65 percent of the youth released from high risk residential programs were minorities. Hamilton IHHW, Elaine Gordon Treatment Center and Pinellas Boot Camp served a greater number of white youth (between 53.1 percent and 71.4 percent). Dozier Training School and Transitional Cottage, Eckerd Youth Development Center and Transitional Cottage, NAFI Intensive Halfway House, Greenville Academy, Green Oaks Intensive Halfway House, Eckerd Intensive Halfway House, Florida Augustus Secure Care Unit, Hillsborough SHOP, the Center for Drug Free Living, Hillsborough Alternative Residential Program, Florida Environmental Institute, Broward Control Treatment Center, PIC Boot Camp and Martin Boot Camp served a greater number of minorities (between 56.0 percent and 94.1 percent). Green Oaks SHOP, Palm Beach Youth Center, Leon Boot Camp and Manatee Boot Camp served approximately equal numbers of whites and minorities.

Source: Committed Youth Served, Average Daily Population and Number of Youth Released (CIS/FACTS Extract, February 1995, clients served during FY 1993-94); Average Length of Stay, Age, Sex, Race, Average Age at First Delinquency Referral, Average Age at Discharge and Total Released (CIS/FACTS, OE Extract, FY 1993-94, clients released during FY 1993-94).

Note: Youth from these programs are typically released to Post Placement Services. See the Post Placement Services chapter for more information on the non-residential aftercare components.

The average age of these youth at the time of their first delinquency referral was 12.4 years. These youth were younger at the time of their first referral than youth served in any of the other delinquency commitment programs.

Number of youth served, average daily population, number released, average length of stay, average age at discharge, age categories, sex, race, and average age at first delinquency referral are shown by program in Table 15-1.

### **Client History**

Data on committing offenses are presented in Table 15-2. Overall, property felonies made up 43.7 percent of the committing offenses, followed by personal felonies (24.9 percent) and other felonies (18.4 percent). Youth served in HARP had a higher incidence of property felonies than any other offense category.

Table 15-3 shows the average number of prior felony referrals and the average number of prior felony adjudications for each program. A referral indicates that a youth has been charged with a delinquent offense, but is not necessarily evidence that the youth committed the offense charged. Determination of whether a law violation occurred is more accurately measured in Juvenile Justice data systems by whether there was an adjudication (or adjudication withheld) for the delinquent offense. Such a finding by the court is a clearer measure than a referral. Youth served in high risk residential programs were referred an average of 14.3 times for felonies and received an average of 8.2 felony adjudications prior to their placement. Only the most serious offense is counted on a single day.

Table 15-4 summarizes information on the type of admission by program. Over 63 percent of the youth served in high risk residential programs were recommitments. First commitments accounted for 21.2 percent of youth served and 12.6 percent were transfers. Reccommitments ranged from a low of 0.0 percent (Elaine Gordon Treatment Center) to a high of 84.2 percent (EYDC). Youth admitted to Dozier TC and Eckerd TC are all transfers from "inside the fence" at the training schools. The lowest first commitment rate was for Greenville Academy 0.0 percent. Elaine Gordon Treatment Center had the highest percentage of first commitments (62.5 percent). Hamilton Intensive Halfway House had the highest rate of transfers served (57.1 percent).

\*Note: One (.4%) Dozier admission, which equals .1% of the high risk admissions statewide, was sentenced in adult court to Juvenile Justice and then placed in this program.

### Outcome Measurement

Outcome information for juvenile boot camps is not included in this report due to the limited number of releases during FY 1993-94. Outcome data on boot camps will be reported in a series of separate evaluations as mandated by F.S. Chapter 39.057 (9). For a detailed description of each level 8 program see the appendix at the end of this chapter.

#### Outcome 1

**IT IS EXPECTED THAT MOST OF THE YOUTH SERVED IN HIGH RISK RESIDENTIAL PROGRAMS WILL SUCCESSFULLY COMPLETE THE PROGRAM.**

**Definition:** For FEI, FASCU and PBYC, successful completion is based on transfer from the residential component to the non-residential component or aftercare/reentry program.

For all other level 8 programs, successful program completion is defined as release to furlough, aftercare, honorable discharge or transfer to a less restrictive program.

Overall, the successful completion rate for the high risk residential programs was 56.3 percent. Successful completion rates ranged from a low of 0.0 percent to a high of 100.0 percent. Almost eleven percent of completions were unsuccessful, 10.8 percent were transfers to equally restrictive programs. The remaining 21.4 percent were released for other reasons. See Table 15-5.

## Outcome 2

**IT IS EXPECTED THAT HIGH RISK RESIDENTIAL PROGRAMS WILL MAINTAIN COMMITTED YOUTH IN A SECURE SETTING.**

**Definition:** Maintaining youth in a secure setting is defined as the absence of escapes from the programs. Data was obtained from CIS/FACTS for clients released during FY 1993-94.

The number of escapes ranged from 0 to 10 with Dozier and Coral IHWI having the greatest number. Eight programs did not have any youth charged with escape.

### **Outcome 3**

**IT IS EXPECTED THAT YOUTH RELEASED FROM A HIGH RISK RESIDENTIAL PROGRAM WILL NOT HAVE SUBSEQUENT LAW VIOLATIONS WITHIN ONE YEAR AFTER RELEASE.**

**Definition:** Many measures can be utilized as indications of recidivism, all related to subsequent law violations. A number of such measures are presented below. Re-referrals indicate that youth have been charged with another delinquent offense, but a subsequent referral is not necessarily evidence that the youth committed the offense charged. Determination of whether a subsequent law violation occurred is more accurately measured in Juvenile Justice data systems by whether there was an adjudication (or adjudication withheld) for one or more delinquent offenses following release. Such a finding by the court is a clearer measure than a subsequent referral. Adult felony convictions, for which youth were placed on adult probation or sentenced to adult prison,

are also tabulated. A combined juvenile and adult felony conviction rate is also presented, as is a total of all juvenile adjudications and adult felony convictions. The operational definition of recidivism is, finally, the number of youth released from a program between January 1 and June 30 of 1993 who had been recommitted to Juvenile Justice, placed on adult probation or sent to prison within one year following release.

- Readjudication rates at one year were: EYDC Transitional Cottage, 60.0 percent; Elaine Gordon Treatment Center, 50.0; FASCU, 50.0 percent; BCTC, 40.0 percent; Dozier Transitional Cottage, 47.8 percent; EYDC, 39.3 percent; Green Oaks Intensive Halfway House, 33.3 percent; Dozier, 29.4 percent; FEI, 28.6 percent; PBYC, 25.0 percent; and HARP, 16.7 percent. Recidivism rates at one year were: FASCU, 50.0 percent; EYDC Transitional Cottage, 45.0 percent; Dozier Transitional Cottage, 39.1 percent; Green Oaks Intensive Halfway House, 33.3 percent; BCTC, 33.3 percent; EYDC, 28.6 percent; FEI, 28.6 percent; Dozier, 24.7 percent; HARP, 16.7 percent; Elaine Gordon Treatment Center, 0.0; and PBYC, 0.0 percent.

Table 15-7A represents the percentage of youth who received referrals after being released from a program. The total number of releases includes youth who were actually physically released from a program and those who were transferred to a program in a lower restrictiveness level. Youth who were transferred directly to the Department of Corrections or a juvenile justice program that is also in this high risk restrictiveness level are not included. Only youth released between January and June 1993 are included in this table. Tables 15-7B & 15-7C provide a comparison of readjudication and recidivism rates for the population studied.

Source: CIS/FACTS/TP1, OE Extract, FY 1993-94 (clients released between January and June 1993) and the Department of Corrections' FY 1993-94 probation and prison extract.

Recidivism rates for programs with small numbers should be interpreted with caution since the actions of one youth can drastically affect the percentages.

Prior outcome evaluation reports contained calculations of suppression effects as measures to compare the numbers of referrals and adjudications after a subject had left a program to those from before. The exclusion of key factors such as subsequent adult arrests raises concerns about the utility of such data. These measures do not take into account the fact that youth may be in an aftercare or reentry program following release. In addition, youth released from commitment programs are more likely to be recommitted or go into the adult system for subsequent offenses. This would tend to decrease numbers of subsequent offenses, if only because they were in confinement during part of the follow-up period. Because of concerns related to validity and meaning of the data, suppression measures are no longer included in this report.

### Program Cost

SAMAS expenditures for FY 1993-94 for the high risk residential programs totaled \$31,275,173 and are reported in Table 15-9.

**TABLE 15-9:**  
**HIGH RISK RESIDENTIAL PROGRAMS**  
**COST EXPENDITURES FOR FY 1993-94**

PROGRAM	TOTAL COST	# OF CASES SERVED	# OF RESIDENT DAYS	AVG. LENGTH OF STAY (IN DAYS)

<b>TOTAL</b>	<b>\$31,275,173</b>	<b>1,896</b>	<b>175,082</b>	<b>155.6</b>

Source: Total costs are reported from SAMAS for FY 1993-94.

Note 1: Expenditures for Dozier (inside the fence) and Dozier Transitional Cottage were not separated in SAMAS.

Note 2: Expenditures for Coral IHWH were not found in SAMAS.

Note 3: FEI has residential and non-residential components. The contracted dollars per day are the same for both components.

## **Program Effectiveness**

The outcome measures available for the high risk residential population are successful completion rates, and recidivism. It should be noted that, with the exception of EYDC and Dozier, recidivism rates and other outcome data are based on small numbers of youth. These figures should be interpreted with caution because they are subject to great fluctuation from year to year.

The successful completion rate for high risk residential programs was 56.3 percent and ranged from a low of 0.0 percent (which 6 programs had) to a high of 100.0 percent for the Elaine Gordon Treatment Center.

Statewide, 37.6 percent of youth released from high risk residential programs were readjudicated within a year and the recidivism rate was 29.2 percent.

In order to better assess the impact of the programs, testing and reporting in the areas of academic and behavioral changes need to be implemented for all program participants or, at least, a representative sample. This information coupled with recidivism data would provide a more complete assessment of the immediate as well as the long-range impact of the high risk residential programs. Eckerd Family Youth Alternatives has explored the availability of standardized tests to measure both academic achievement and changes in personality, behavior, and self-concept. They currently administer the Millon Adolescent Personality Inventory (MAPI) to measure changes in personality, behavior and self concept. The Wide Range Achievement Test (WRAT-R) is given to measure academic progress.

**TABLE 15-R**  
**HIGH RISK RESIDENTIAL PROGRAMS**  
**RECOMMENDATION UPDATE**

Recommendation in 1993 Outcome Evaluation	Progress in FY 1993-94	1994 Report Recommendation
<p><b>Program Maintenance</b></p> <p>Though the training schools are designed to serve the most serious chronic offenders, it appears that Eckerd serves youth with longer histories of delinquency than does Dozier. Since the programs serve two distinct geographic areas, a comparison should be made of the delinquency history of these clients to determine how a youth's residence determines their placement.</p>	<p>Programs from the previous year continue in placing, admitting and serving youth based on assessments of the risk to public safety and the needs of youth.</p>	<p><b>Program Maintenance</b></p> <p>Additional outcome measures for education progress should be included as determined by standard pre- and post-testing.</p> <p>Provide for admission criteria to this restrictiveness level, that allows for the transfer of youth in from a lower restrictiveness level (level 6) if the youth is too difficult to handle.</p>

## **CHAPTER 15 APPENDIX**

**DISTRICT 1**  
**Private Industry Council Boot Camp**

**PROGRAM DESCRIPTION:**

**Address:** Plaza Office Building  
3300 North Pace, Suite 501  
Pensacola, FL 32505

**Telephone:** (904) 432-4594  
**Fax:** (904) 434-1119

**Restrictiveness Level:** 8

**Intended ALOS:** 6 months

**Capacity:** 30

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

"A child may be placed in a boot camp program if he is at least 14 years of age but less than 18 years of age at the time of adjudication and has been committed to the Department for (a) a capital, life, first degree, or second degree felony; or (b) a third degree felony with two or more prior felony adjudications, of which one or more resulted in residential commitment as defined in s. 39.01(61)" FS 39

**Services and Treatment Offered:**

Boot camps emphasize paramilitary training and bearing, physical and mental discipline, and prosocial activities. Trained drill instructors provide an initial verbal conformation to establish what is expected of youth. The goal of Boot Camps, however, is not to break down or demean the client. Youth wear uniforms while in residence. Services at the boot camps are provided in a closed setting, with providers coming to the facility to provide the necessary service. The staff are Sheriff deputies who are certified as correctional officers, and they are trained in special techniques of handling maladaptive behavior. Physical fitness is provided by recreation, exercise, and work programs designed to ensure age appropriate activities. Health and hygiene skills are developed through maintenance of personal grooming and cleanliness, as well as cleanliness of the living environment. Victim empathy is developed as a means of assisting youth in developing compassion and awareness of the results of their actions. This program is now closed.

**DISTRICT 2**  
**Leon County Boot Camp**

**PROGRAM DESCRIPTION:**

**Address:** 2829 Municipal Way  
Tallahassee, Florida 32304

**Telephone:** (904) 921-5800  
**Fax:** (904) 921-3747

**Restrictiveness Level:** 8

**Intended ALOS:**  
8 months with 3 months aftercare

**Capacity:** 30

**Aftercare Services Provided?:** Yes

**Eligibility Criteria:**

"A child may be placed in a boot camp program if he is at least 14 years of age but less than 18 years of age at the time of adjudication and has been committed to the Department for (a) a capital, life, first degree, or second degree felony; or (b) a third degree felony with two or more prior felony adjudications, of which one or more resulted in residential commitment as defined in s. 39.01(61)" FS 39.

**Halfway House**

halfway houses and there is an on call back up plan for use in emergencies or staff shortages.

**PROGRAM DESCRIPTION:**

**Address:** 286 Gene Hurley  
DeFuniak Springs, Florida 32433

**Telephone:** (904) 892-7044

**Fax:** (904) 892-9065

**Restrictiveness Level:** 8

**Intended ALOS:** 6 months

**Capacity:** 15

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

Committed males ages 14-18 who were adjudicated for a second degree or higher felony, or a third degree felony with two prior commitments, or youth committed for one prior felony and one first degree misdemeanor, or youth committed for a third degree felony and two or more previous first degree misdemeanors.

**Services and Treatment Offered:**

The intensive halfway house program provides services for committed youth classified as high risks to public safety. Treatment modalities are therefore more restrictive and occur in a secure setting. Services include counseling in behavior management, individual, group, and family counseling, substance abuse counseling, family planning, and social skills development. Educational and vocational programs are in place. Physical fitness, health, and hygiene classes are ongoing. Guardian participation is encouraged with an emphasis on preservation of the family. There is a transitional phase in which youth are prepared for release to an aftercare program. Security is provided by an eight foot non razor wire fence. All doors and windows are provided with security hardware. Staff to client ratios are higher than in regular

**DISTRICT 1****North American Family Institute Serious  
Habitual Offender Program - SHOP****PROGRAM DESCRIPTION:**

**Address:** 286 Gene Hurley  
DeFuniak Springs, Florida 32433

**Telephone:** (904) 892-7044  
**Fax:** (904) 892-9065

**Restrictiveness Level:** 8

**Intended ALOS:**  
Nine month residential program.

**Capacity:** 25

**Aftercare Services Provided?:** No

There is a nine month non-residential component either through the SAFE program, or via other reentry programs.

**Eligibility Criteria:**

Committed male youth ages 15-21 who are referred by Judges from the Commitment Service Area. These clients must be eligible for the Serious Habitual Offender Program as established in a court order.

**Services and Treatment Offered:**

SHOP the Serious Habitual Offender Program is a 25 bed physically secure program for committed male youth. The program operates 24 hours a day, seven days a week providing a comprehensive treatment approach that includes programs and overlay services such as behavior management, individual and group counseling, independent living skills, physical fitness, and health and therapeutic community therapy. Experience therapy through wilderness experiences and ropes courses is stressed, but youth must be in the program a minimum of six months before they are allowed outside the fence. Educational services are provided by the County School System. There is a 9 month non residential aftercare program as well. At the present time youth are accepted statewide and aftercare is therefore limited to the spectrum of reentry services that are available in the particular community to which the client is being returned.

**DISTRICT 6****Hillsborough Serious Habitual Offender  
Program - SHOP****PROGRAM DESCRIPTION:**

**Address:** 6612 Starke Road  
Seffner, Florida 33584

**Telephone:** (813) 621-6051  
**Fax:** (813) 623-1773

**Restrictiveness Level:** 8

**Intended ALOS:** 6-9 months

**Capacity:** 25

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

Male youth age 14-18 who are committed and qualify as Serious Habitual Offenders (SHO) are accepted. SHO scores must be presented at the Commitment Management Staffing.

**Services and Treatment Offered:**

Diagnostic evaluation services are offered as well as appropriate treatment modalities, including substance abuse intervention, mental health services, and sexual dysfunction interventions and gang related behavior interventions. Prevocational and vocational services are provided as well as job training, job placement, and employability skills training. Case management services and educational services are offered including special education and pre GED literacy. Self sufficiency planning, independent living skills, parenting skills, recreational and leisure times activities, wilderness component and a family transitional service are provided.

**Intended ALOS:** 9 months

**Capacity:** 20

**Aftercare Services Provided?:** Yes

**Eligibility Criteria:**

Committed males age 14-18 from the Duval County area.

**Services and Treatment Offered:**

Services include psychological/psychiatric needs assessments, medical exams including bloodwork, academics, pre-vocational, industrial arts program, vocational program, social life skills, recreation/physical education, mental health overlay services, drug and substance abuse overlay services, clinical in-residence therapy for individual group and family behavior course modification curriculum, arts and crafts religious services, and an ROTC program.

**DISTRICT 8**  
**Florida Environmental Institute**

**PROGRAM DESCRIPTION:**

**Address:** P.O. Box 406  
Venus, Florida 33960

**Telephone:** (813) 699-3785  
**Fax:** (813) 699-3787

**Restrictiveness Level:** 8

**Intended ALOS:** 12 months

**Capacity:** 22

**Aftercare Services Provided?:** Yes

**Eligibility Criteria:**

Committed male youth 14-18 years of age. Prefer youth who have multiple repeat offenses against persons or property with violence. Youth need at least two prior commitments involving violence. Youth with no prior commitments require special approval for admission.

**Services and Treatment Offered:**

FEI operates a structured three phase program providing continuous case management for the most serious chronic youthful offenders. The program emphasizes an action oriented, hands-on approach which develops desirable work habits, emphasizes immediate and fair discipline and develops employability and social skills in participating youth.

**DISTRICT 2**  
**Greenville Academy**

**PROGRAM DESCRIPTION:**

**Address:** Route 2, Box 283  
Greenville, Florida 32331

**Telephone:** (904) 948-2228  
**Fax:** (904) 948-3281

**Restrictiveness Level:** 8

**Intended ALOS:** 9 months

**Capacity:** 20

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

Committed males ages 14-18 who were adjudicated for a second degree or higher felony, or a third degree felony with two prior commitments, or youth committed for one prior felony and one first degree misdemeanor, or youth committed for a third degree felony and two or more previous first degree misdemeanors. Typically, youth with a history of assaultive behaviors are preferred.

**Services and Treatment Offered:**

The intensive halfway house program provides services for committed youth classified as high risks to public safety. Treatment modalities are therefore more restrictive and occur in a secure setting. Services include counseling in behavior management, individual, group, and family counseling, substance abuse counseling, family planning, and social skills development. Educational and vocational programs are in place. Physical fitness, health, and hygiene classes are ongoing. Guardian participation is encouraged with an emphasis on preservation of the family. There is a transitional phase in which youth are prepared for release to an aftercare program. Security is provided by an eight foot non razor wire fence. All doors and windows are provided with security hardware. Staff to client ratios are higher than in regular halfway houses and there is an on call back up plan for use in emergencies or staff shortages.

**DISTRICT 6**  
**Hillsborough Alternative Residential  
Program**

**PROGRAM DESCRIPTION:**

**Address:** 6612 Stark Road  
Seffner, Florida 33584

**Telephone:** (813) 621-6051  
**Fax:** (813) 623-1773

**Restrictiveness Level:** 8

**Intended ALOS:** 9 months

**Capacity:** 15

**Aftercare Services Provided?:** No

**Eligibility Criteria:**

Committed males age 14-18 who are moderately to mildly mentally retarded and have a history of aggression are accepted. Clients are referred statewide through juvenile justice placement authorities.

**Services and Treatment Offered:**

Hillsborough Alternative Residential Program in a special statewide 15 bed halfway house for court committed males 12-18 years of age who are mildly to moderately mentally retarded. These clients are delinquents with documented aggressive behavior. The program has 24 hour awake supervision that provides clinical and pre vocational services that operate in conjunction with the Hillsborough County School System.

**DISTRICT 9**  
**Palm Beach Youth Center Residential**

**PROGRAM DESCRIPTION:**

**Address:** 1100 45th Street, Building B  
West Palm Beach, Florida 33407

**Telephone:** (407) 840-3152  
SC 264-3152  
**Fax:** (407) 840-3156  
SC 264-3156

**Restrictiveness Level:** 8

**Intended ALOS:** 9 months residential  
and 9 months aftercare.

**Capacity:** 18

**Aftercare Services Provided?:** Yes

**Eligibility Criteria:**

Committed males age 14-17 who are considered Serious Habitual Offenders. Due to the mandatory non-residential treatment all admissions must come from Palm Beach County.

**Services and Treatment Offered:**

This program uses a number of treatment modalities. Groups are offered in victim empathy, anger management, sex offenses, and critical thinking. In the later phases of the program, youth are assisted in obtaining employment. The money earned is divided into the client's account and a restitution account for the client's victims. Community service work is also completed. Family counseling is a major component of this program. Education is offered through the Palm Beach County School Board.

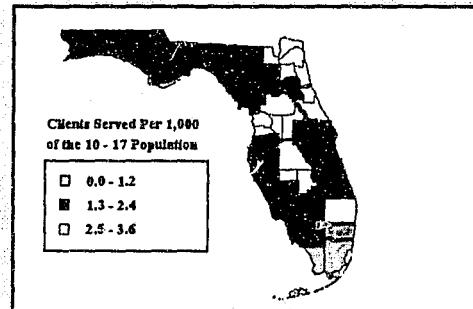

## Juvenile Justice Programs

### 16. POST-PLACEMENT SERVICES

#### Program Description

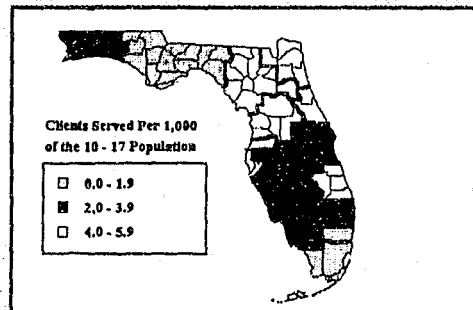

Post-placement services are provided to youth who have been released from residential and non-residential commitment programs. The different types of services include reentry, post-commitment community control, furlough and contracted non-residential aftercare.

**Reentry.** Reentry is a community-based commitment program which provides structured and specialized treatment for youth to reduce the rate of future law violations and improve the functioning of the youth in the community. The Reentry program is designed for serious offenders who have returned from training schools and other moderate-to-high risk residential commitment programs to the community.

#### Post-Commitment Community Control (PCCC).

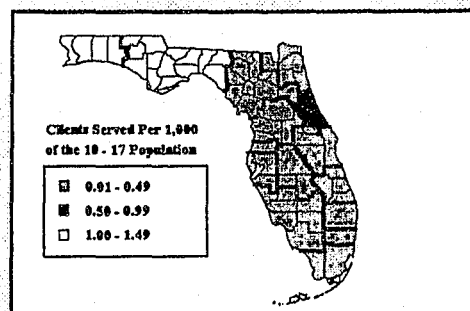

Post-Commitment Community Control is a status upon which the court has placed a youth on Community Control upon release from a commitment program. The court can impose Community Control at the disposition hearing or at any time before the youth is released from the commitment program. Supervision under PCCC is the same as the Community Control program. Termination from PCCC must be approved by the court.

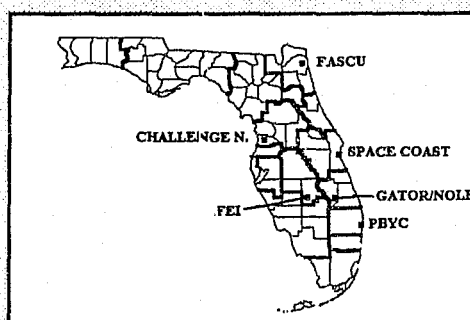

Youth with post-commitment community control sanctions are often served by Reentry and transferred to PCCC after substantial compliance with the Reentry program. Such transfers are typical where restitution is the court ordered sanction still outstanding.

**Furlough.** Furlough programs serve juvenile felons and misdemeanants who have been committed by the court to the department and are later released from a residential or nonresidential commitment program. Counseling and supportive services are provided to youth and their families while they are in a commitment program and after their release. Youth released on furlough

status are under the jurisdiction of the department. These youth must agree to the conditions of a furlough Agreement and sign it before they can be released from the commitment program. These conditions and an individualized case plan are the basis for supervision.

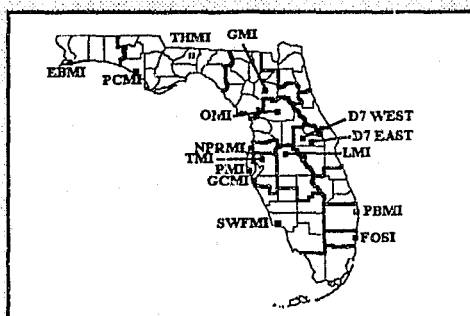

**Contracted Non-residential Aftercare Programs.** The contracted programs that provide non-residential aftercare are Florida Environmental Institute, Inc. (FEI), Space Coast Marine Institutes (SCMI), Eckerd Youth Challenge Programs (EYCP), Florida Augustus Secure Care Unit (FASCU) and Palm Beach Youth Center (PBYC). For a detailed description of each post-placement program see the appendix at the end of this chapter.

**SAFE Aftercares.** Intensive aftercare services provided by the Associated Marine Institutes to youth released primarily from high risk programs statewide. The SAFE program is a five step program of graduated intensity depending upon each youth's adjustment in the community. Initially, the youth is enrolled in one of the 15 Marine Institutes (level 2 day treatment programs)

located closest to the youth's home. The youth progresses through the required curriculum, gradually earning more and more privileges. The average length of stay under supervision is usually eight to twelve months as determined by the youth's ability to adjust in his family and community.

## Population Profile

According to the CIS/FACTS, approximately 3,222 committed youth were served in Reentry/Aftercare during FY 1993-94. Table 16-1 shows the number of youth served, average daily population, number of youth released, average length of stay, average age at discharge, sex, race, and average age at the time of the first delinquency referral for each reentry/aftercare program.

Source: Committed Youth Served, Average Daily Population and Number of Youth Released (CIS/FACTS Extract, February 1995, clients served during FY 1993-94); Average Length of Stay, Age, Sex, Race, Average Age at First Delinquency Referral, Average Age at Discharge and Total Released (CIS/FACTS, OE Extract, FY 1993-94, clients released during FY 1993-94).

There were 2,110 youth released from reentry/aftercare during FY 1993-94. The average length of supervision for these programs was 4.4 months (ALOS is based on 2,104 youth released which was derived from a more recent data extract). The average age of youth at the time of release was 16.6 years with 95 percent being age 16 or over at the time of release. Youth served in reentry/aftercare are primarily male (89.5 percent) with females accounting for only 10.5 percent. The majority of the youth (61.2 percent) are minorities and the average age of the youth at the time of their first delinquency referral was 12.8 years.

## Client History

Committing offenses by program type are shown in Table 16-2. These are the original offenses for which youth were committed to residential and non-residential programs. The most frequent original committing offense for youth served in reentry/aftercare was a property felony (43.6 percent). The second most frequent was a personal felony (15.7 percent). Other felonies accounted for 12.9 percent of committing offenses. The remaining categories together accounted for less than thirty percent of the youth served by post placement services.

The average number of prior felony referrals and adjudications are shown by program in Table 16-3. A referral indicates that a youth has been charged with a delinquent offense, but is not necessarily evidence that the youth committed the offense charged. Determination of whether a law violation occurred is more accurately measured in Juvenile Justice data systems by whether there was an adjudication (or adjudication withheld) for the delinquent offense. Such a finding by the court is a clearer measure than a referral. Statewide, youth served had 9.1 prior felony referrals and 5.1 prior felony adjudications prior to their placement in reentry/aftercare.

Table 16-4 summarizes information on the type of admission by program. Post-placement services are provided to youth who have been released from residential and non-residential commitment programs so the majority of admissions should be transfers. Transfers accounted for 88.1 percent of the admissions to the programs. First commitments accounted for 8.8 percent and recommitments made up 3.1 percent of the admissions to reentry/aftercare.

## Outcome Measurement

### Outcome 1

#### **YOUTH COMMITTED TO POST PLACEMENT SERVICES WILL SUCCESSFULLY COMPLETE THE PROGRAM.**

**Definition:** Successful release for youth served in Reentry, FEI, Space Coast Marine, Challenge and FASCU, is defined as an honorable direct discharge from Delinquency Services supervision, or placement on post-commitment community control or furlough status. Data were obtained from the Commitment Programs Population Annual Summary (January-June 1993). Successful completion for post-commitment community control and Furlough is defined by the codes "successful completion" and "required by law" in CIS/FACTS (January-June 1993).

- Statewide, 53.3 percent of youth released from reentry/aftercare successfully completed the program, 18.4 percent were unsuccessful, 6.3 percent were transferred to another equally restrictive program and 21.5 percent were released for other reasons.

Table 16-5A shows successful completions from reentry as well as successful completions for contracted aftercare programs. The overall successful completion rate for reentry/aftercare was 53.3 percent in FY 1993-94. Successful completion rates for reentry/aftercare ranged from zero percent [LCMI SAFE (non-residential), based on only 7 youth released] to 100.0 percent [Eckerd Boot Reentry, based on 5 youth released]. Percentages based on small numbers should be interpreted with caution because the actions of one youth can drastically effect the percentages. The 18.4 percent who were unsuccessful were recommitted to the department or sent to the adult system.

## **Outcome 2**

### **YOUTH RELEASED FROM POST PLACEMENT SERVICES WILL HAVE NO SUBSEQUENT LAW VIOLATIONS WITHIN ONE YEAR OF RELEASE.**

**Definition:** Many measures can be utilized as indications of recidivism, all related to subsequent law violations. A number of such measures are presented below. Re-referrals indicate that youth have been charged with another delinquent offense, but a subsequent referral is not necessarily evidence that the youth committed the offense charged. Determination of whether a subsequent law violation occurred is more accurately measured in Juvenile Justice data systems by whether there was an adjudication (or adjudication withheld) for one or more delinquent offenses following release. Such a finding by the court is a clearer measure than a subsequent referral. Adult felony convictions, for which youth were placed on adult probation or sentenced to adult prison, are also tabulated. A combined juvenile and adult felony conviction rate is also presented, as is a total of all juvenile adjudications and adult felony convictions. The operational definition of recidivism is, finally, the number of youth released from a program between January and June of 1993 who had been recommitted to Juvenile Justice, placed on adult probation or sent to prison within one year following release.

- 38.6 percent of the youth released from reentry/aftercare, 21.4 percent of the youth released from furlough, and 23.1 percent of the youth released from post-commitment community control were readjudicated for a subsequent offense within one year of release. Statewide, the average recidivism rate was 26.6 percent for reentry/aftercare, 15.3 percent for furlough and 17.5 percent for post-commitment community control.

Tables 16-6A, 16-7A and 16-8A represent the percentage of referrals which were received after a youth was released from a program. The total number of reentry/aftercare releases includes youth who were actually physically released from their reentry/aftercare commitment program. Those who were transferred directly to the Department of Corrections or another Juvenile Justice program are not included. For furlough and post-commitment community control, the total number of releases includes only youth whose termination status was terminated, satisfactory adjustment, or terminated, unsatisfactory adjustment. Only youth released between January and June 1993 are included in these tables. Readjudication and recidivism rates are presented for comparison in Tables 16-6B, 16-7B, 16-8B & 16-6C, 16-7C 16-8C.

### Outcome 3

Table 16-9 presents data concerning the number of absconds compiled for reentry/aftercare. By statute, it is not possible to escape from post-placement services, it is only possible to abscond. During FY 1993-94 there were 206 absconds from reentry/aftercare, involving 183 youth.

### **Program Cost**

The total cost of post placement services excluding costs for post-commitment community control and furlough for FY 1993-94 was \$6,424,436. The cost of post-commitment community control and furlough are part of case management costs and cannot be disaggregated. The cost for the aftercare components of Eckerd Challenge and DIC, are not accounted for separately from the costs for the residential components. Expenditures for FEI and Space Coast Marine Institute's aftercare components were calculated by taking half of the total expenditures for those programs since an equal amount is spent on the residential and aftercare components. This percentage was then multiplied by the total expenditures for residential and aftercare combined to provide the estimated expenditures for the residential component. The total expenditures minus the cost for the residential component provided the estimates for the aftercare components. Table 16-10 provides total cost for each post placement service.

### **Program Effectiveness**

The effectiveness of the post placement services can only be partially determined from the data currently available. Clients are older on the average, have already been in a training school or serious offender programs and are likely to have extensive prior records.

More than 53.3 percent of youth released from reentry/aftercare programs were successfully terminated. The successful completion rates for post-commitment community control and furlough were 62.0 percent and 76.6 percent, respectively. Unsuccessful releases were either recommitted to the department or referred to adult court.

Over thirty-eight (38.6) percent of the youth released from reentry/aftercare, 21.4 percent of the youth released from furlough, and 23.1 percent of the youth released from post-commitment community control were readjudicated for a subsequent offense within one year of release. Statewide, the recidivism rate, back into Juvenile Justice or the Department of Corrections, was 26.6 percent for reentry/aftercare, 15.3 percent for furlough and 17.5 percent for post-commitment community control.

Source: Total costs are reported from SAMAS.

\* The cost of post-commitment community control and furlough are part of Case Management costs and cannot be disaggregated. The total expenditures for Case Management for FY 1993-94 were \$50,638,632. This total includes Intake, Case Management Services, Community Control, Post Commitment Community Control and furlough expenditures. Post-commitment community control and furlough account for a small fraction of the total expenditures cited here.

Note 1: The expenditures for these program's non-residential components could not be disaggregated from the total expenditures attributed to each program.

Note 2: FEI and Space Coast Marine Institute have residential and non-residential components. The contracted dollars per day are the same for both components.

Note 3: Expenditures for these programs were not found in SAMAS.

Note 4: Expenditures in SAMAS for this reentry program could not be broken out from those attributed to Reentry D5.

**RECOMMENDATION UPDATE**

Recommendation in 1993 Outcome Evaluation	Progress in FY 1993-94	1994 Report Recommendation
<p><b>Program Maintenance</b></p> <p>The Department should work more closely with the local district staff and contractors to define and improve the array of aftercare services.</p>	<p>The 1994 Legislature created the Department of Juvenile Justice. As a result, a new Management Information System will be developed that adequately tracks client information, such as successful completion, and administrative data, such as cost per client served. Staff has continued to work closely with local district staff and contractors.</p>	<p><b>Program Maintenance</b></p> <p>The new Department should continue to work closely with the local districts and contractors to further improve the array of Post Placement services.</p>

## **CHAPTER 16 APPENDIX**

**DISTRICT 1**  
**Reentry**

**PROGRAM DESCRIPTION:**

**Address:** Juvenile Justice Center  
Post Office Box 8010  
Pensacola, Florida 32505

**Telephone:** (904) 444-8236  
SC 693-8236

**Fax:** (904) 444-2273  
SC 693-2273

**Restrictiveness Level:** 2

**Intended ALOS:** 120 days

**Capacity:** 56

**Eligibility Criteria:**

Youth from the two state training schools, as well as, any youth committed to any residential program who appear to require reentry services.

**Services and Treatment Offered:**

Reentry is a comprehensive program which is individualized to fit the needs of each youthful offender. It contains educational, vocational, counseling, recreational, and family service components. As a tracking program, it conducts multiple weekly face to face contacts (school checks, curfew checks, job checks, etc.) with each youth and with the youth's parents. It works in the community as an outreach program in the youth's neighborhood and home. Each counselor has an average active caseload of eight to ten youth under supervision and a transitional caseload of four youths who are about to be released from a residential facility.

Release from Reentry is contingent upon the recommendation of the Reentry counselor and supervisor, whose decision is based primarily upon the youth's completion of his or her performance contract.

**DISTRICT 2**  
**Reentry**

**PROGRAM DESCRIPTION:**

**Address:** 3333 West Pensacola  
Tallahassee, Florida 32304

**Telephone:** (904) 487-3289  
SC 277-3289

**Fax:** (904) 922-9615

**Restrictiveness Level:** 2

**Intended ALOS:** 120 days

**Capacity:** 36, comprising 5 groups of approximately 8 clients per group.

**Eligibility Criteria:**

Youth from the two state training schools, as well as, any youth committed to any residential program who appear to require reentry services.

**Services and Treatment Offered:**

Reentry is a comprehensive program which is individualized to fit the needs of each youthful offender. It contains educational, vocational, counseling, recreational, and family service components. As a tracking program, it conducts multiple weekly face to face contacts (school checks, curfew checks, job checks, etc.) with each youth and with the youth's parents. It works in the community as an outreach program in the youth's neighborhood and home. Each counselor has an average active caseload of eight to ten youth under supervision and a transitional caseload of four youths who are about to be released from a residential facility.

Release from Reentry is contingent upon the recommendation of the Reentry counselor and supervisor, whose decision is based primarily upon the youth's completion of his or her performance contract.

**PROGRAM DESCRIPTION:**

**Address:** 1600 N.W. 3rd. Avenue  
Miami, Florida 33136

**Telephone:** (305) 573-0019  
**Fax:** (305) 573-0016

**Restrictiveness Level:** 2

**Intended ALOS:** 120 days

**Capacity:** 72

**Eligibility Criteria:**

Youth from the two state training schools, as well as, any youth committed to any residential program who appear to require reentry services.

**Services and Treatment Offered:**

Reentry is a comprehensive program which is individualized to fit the needs of each youthful offender. It contains educational, vocational, counseling, recreational, and family service components. As a tracking program, it conducts multiple weekly face to face contact (school checks, curfew checks, job checks, etc.) with each youth and with the youth's parents. It works in the community as an outreach program in the youth's neighborhood and home. Each counselor has an average active caseload of eight to ten youth under supervision and a transitional caseload of four youths who are about to be released from a residential facility.

Release from Reentry is contingent upon the recommendation of the Reentry counselor and supervisor, whose decision is based primarily upon the youth's completion of his or her performance contract.

**DISTRICT 1**  
**Escambia Bay Marine Institute - SAFE**  
**Program**

**PROGRAM DESCRIPTION:**

**Address:** 121 East Government Street  
Pensacola Florida, 32590

**Telephone:** (904) 492-0708

**Restrictiveness Level:** 2

**Intended ALOS:** 3-6 months

**Capacity:** 20

**Aftercare Services Provided?:**  
This is aftercare

**Eligibility Criteria:**

Committed males or females age 14-18 who have completed a level 6 or 8 program and are in need of aftercare. Youth must reside at home with their guardian and be physically able to participate in this program.

**Services and Treatment Offered:**

Clients spend a total of 3-6 months in the program. Before entering, each youth begins to develop goals relevant to their individual needs that can be reasonably attained during their stay. This is called the transition plan and it is developed jointly with the residential program's counselors. When youth enter the safe program they report to the AMI for 3-4 weeks: during this time youth are placed in jobs or school. SAFE youth do not attend the AMI standard marine programs with Level 2 clients although they may draw from these resources for job or educational orientation. Following the initial three week phase, clients are closely monitored for curfew compliance and guardian participation is encouraged. There are weekly face to face visits at the clients home. Once youth are established in a productive pattern they are gradually weaned from the Marine Institute and they may be seen only once a month. Failure to perform will result in the youth's return to a residential program.

**Fax:** (904) 444-2273  
SC 693-2273

**Restrictiveness Level:** 2

**Eligibility Criteria:**

Committed males or females age 14-18 in need of aftercare. Prefer clients from the commitment service area.

**Intended ALOS:** 3 months

**Capacity:** 20

**Aftercare Services Provided?:**  
This is aftercare

**Services and Treatment Offered:**

Aftercare or reentry is a comprehensive program which is individualized to fit the needs of each youthful offender. It contains educational, vocational, counseling, recreational, and family service components. As a tracking program, it conducts multiple weekly face to face contacts (school checks, curfew checks, job checks, etc.) with each youth and with the youth's parents. It works in the community as an outreach program in the youth's neighborhood and home. Each counselor has an average active caseload of eight to ten youth under supervision and a transitional caseload of four youths who are about to be released from a residential facility.

Release from Re-entry is contingent upon the recommendation of the Re-entry counselor and supervisor, whose decision is based primarily upon the youth's completion of his or her performance contract.

**DISTRICT 3**
