# ► Source of Data

Florida Traffic  
Crash Facts 1994

The information contained in this Traffic Crash Data booklet is extracted from law enforcement agency long-form reports of traffic crashes. A law enforcement officer must submit a long-form crash report when investigating:

Motor vehicle crashes resulting in death or personal injury, or

Motor vehicle crashes in which one or more of the following conditions occur:

Leaving the scene involving damage to an attended vehicle or property (Section 316.061 (1), F.S.);

Driving while under the influence of alcoholic beverages, chemical substances, or controlled substances or with unlawful blood alcohol level (Section 316.193, F.S.).

An investigating officer *may* report other traffic crashes on the long-form. In particular, applicable statutes specify an officer's discretion to submit a long-form report in crashes where a vehicle is rendered inoperable to the degree that a wrecker is required to remove it from traffic.

Statutory revisions in 1983 and 1989 had the effect of reducing the number of non-injury crashes required to be reported to the Department. Any presentation of historical data that includes such crashes, such as total traffic crash counts, will reflect these changes. Data on traffic crashes involving death, injury, or other criteria for law enforcement long-form reports as outlined above are not affected.

Please note:

All 1992 data in this publication have been updated from preliminary figures published in the Department of Highway Safety and Motor Vehicles *Traffic Crash Data Book, 1992*. Figures from the 1992 publication should not be used for year-to-year comparisons.

# ► Definition of Terms

|Florida Traffic  
Crash Facts 1994

The following terms are defined as they apply to the crash data presented in this publication. These definitions may differ from legal or other uses of the same terms.

<b>Alcohol-related traffic crash-</b>	A crash involving a driver and/or pedestrian for whom alcohol use was reported (does not presume intoxication).
<b>Bicycle-</b>	A vehicle propelled solely by human power or a motorized bicycle propelled by a combination of human power and an electric helper motor rated at not more than 200 watts (this term does not include a vehicle with a seat height of no more than 25 inches from the ground when the seat is adjusted to its highest position, or a scooter or similar device).
<b>Bicyclist-</b>	The driver of a bicycle. A passenger on a bicycle is considered a vehicle passenger.
<b>Driver-</b>	Unless otherwise indicated, the operator of a motor vehicle or bicycle. Driver data typically exclude uninjured persons presumed to have been operating hit-and-run, phantom, or properly parked vehicles.
<b>Fatal traffic crash-</b>	A traffic crash that results in one or more fatalities within ninety days of occurrence.
<b>Moped-</b>	A motor-powered cycle with a pedal-activated motor and 2 brake horsepower maximum.
<b>Motor vehicle-</b>	Any motorized vehicle not operating on rails.
<b>Motorcycle-</b>	A motor vehicle, with a seat or saddle for the driver's use, traveling with no more than three wheels in contact with the ground, excluding a tractor or a moped.
<b>Motorcyclist-</b>	The driver of a motorcycle. A passenger on a motorcycle is considered a vehicle passenger.
<b>Traffic crash-</b>	A crash involving at least one motor vehicle on a trafficway that is open to the public. The term "crash" in this publication is equivalent to the term "accident" as used in previous editions and standard summary tables.
<b>Traffic fatality-</b>	The death of a person as a direct result of a traffic crash within ninety days of the crash occurrence.
<b>Vehicle occupant-</b>	Drivers and passengers of automobiles, vans, trucks, buses, and motor homes.
