1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes the need for transparency and accountability in financial reporting.

2. Key Findings

The analysis reveals several areas where improvements are needed. Notably, there is a significant gap in the documentation of certain transactions, which could lead to discrepancies in the financial statements.

It is recommended that the organization implement a robust internal control system to ensure that all transactions are properly recorded and verified. This will help in identifying and preventing any potential errors or fraud.

3. Recommendations

Based on the findings, the following recommendations are proposed: (1) Enhance the training of staff involved in financial reporting to ensure they are up-to-date with the latest regulations and standards.

(2) Implement a digital accounting system that provides real-time data and analytics, reducing the risk of manual errors. (3) Conduct regular audits to ensure compliance with all applicable laws and regulations.

4. Conclusion

In conclusion, the findings of this study highlight the need for a more structured and transparent financial reporting process. By addressing the identified issues, the organization can improve its financial health and ensure long-term sustainability.

The report is prepared for the management's review and decision-making.

Dear Colleague:

The Office of Grants Management and Development is pleased to publish *Crime and Justice Trends in the District of Columbia*. This report presents a comprehensive overview of the activities and outcomes in the different stages through which people and cases are processed in the District of Columbia's adult and juvenile justice systems. It was funded by the U.S. Department of Justice's Office of Juvenile Justice and Delinquency Prevention and the Bureau of Justice Assistance.

Reducing crime and improving the justice system continue to be critical issues for the District. While there are success stories to report, the District is challenged to find more effective ways in which to prevent crime, enforce the law, and deliver justice. This report is designed to inform policy makers, planners, and practitioners working toward this goal. It is the only report of its kind in the District, and we hope it will serve as a valuable resource.

For additional copies of this report, please call the Office of Grants Management and Development at 202-727-6539.

Sincerely,

Sandra R. Manning
Director

Enclosure

INTRODUCTION

The District's criminal justice system is comprised of six basic organizational components: police, prosecution, defense, courts, corrections and parole. Together these components carry out the criminal justice process which involves detection of crime and apprehension of criminals, pretrial decisions and services, trial, sentencing and corrections or service of sentences. In carrying out these functions, the various criminal justice agencies involved participate in numerous information- and data-gathering activities. Their efforts to collect and analyze data play a vital role in monitoring and evaluating the District's criminal justice process and in examining trends that affect the system.

This report provides a statistical overview of activities and outcomes in the different stages through which people and cases are processed in the District's criminal justice system. Most of the data are current through 1994, the most recent year for which complete and official data are available for all of the agencies. In some cases, references are made to preliminary data for 1995. The data represent five- and 10-year trends and are presented in an order that parallels the actual flow of cases through the criminal justice system from reported offenses to corrections and parole. Information regarding juvenile justice trends is included as well as descriptions of the criminal and juvenile justice processes in the District.

While there is little statistical information available on domestic violence and gangs, this report includes special segments on these subjects. The domestic violence section discusses the recently enacted Mandatory Arrest Law and the efforts of the justice system to better handle cases of domestic violence. The section on gangs describes some of the role of gangs in District street crime, particularly among juveniles; and the efforts of the police and prison system to document and investigate gang-related activity. Each chapter presents a summary and discussion of findings which highlights major trends and issues.

The law enforcement section of this report includes information about reported crime in the District, adult arrests and characteristics of adult arrestees. Data pertaining to prosecutions and convictions by type of offense are presented in the section on courts. In the corrections section of this report, data on the average daily population of the District's correctional facilities and incarceration rates are given. The section on parole reports data for grants and revocations. The juvenile justice section of this report includes data for juvenile arrests, prosecutions and dispositions, juvenile drug use and a profile of juvenile arrestees. ♦

SUMMARY OF MAJOR TRENDS

Population Trends

The District's general population has been steadily declining. Since 1990:

- The District's population declined 5%
- This decline has been greatest for males between ages 15 and 29

It is projected that this demographic group – considered “at-risk” for committing serious crimes – will remain relatively stable over the next five years. This suggests that there will be little if any increase in the District's crime rate over the next five years.

Criminal Justice Costs

In fiscal year 1994, total government expenditures were 3.6 billion dollars, of which 968.8 million (27%) was earmarked for public safety and justice.

- Law enforcement accounts for the largest proportion of expenditures (39%)
- Corrections accounts for the next largest proportion of expenditures (38%)

Crime Trends

In the District as in the nation, reported crime has declined in recent years. Since 1990, reported crime is 4% lower. All violent crimes (except assault) and all property crime (except auto theft) decreased. More specifically, since 1990:

- Homicide decreased by 16%
- Rapes decreased by 18%
- Robbery decreased 21%
- Assault increased by 21%
- Burglary declined 17%
- Larceny declined 2%
- Auto theft increased by 2%

Homicide

In 1995, homicides decreased for the second consecutive year, representing the lowest number since 1988. Youth continue to represent the majority of homicide victims and assailants. In 1994:

- 51% of alleged assailants were ages 18 to 24
- 23% of victims were age 24 or younger

During the past five years, there were some shifts in patterns for motives. Between 1990 and 1994:

- Retaliation killings increased from 1% to 13%
- Drug-related killings decreased from 42% to 14%
- Robbery-related killings decreased from 13% to 9%

Arrest Patterns

Fewer arrests were made in 1994 than in any other year during the past five years. Since 1990:

- 10% less adults were arrested for Part I crimes
- 7% less adults were arrested for Part II crimes

More recently, from 1993 to 1994:

- Adult arrests have declined by 16%
- The majority of arrests for violent offenses were for aggravated assault
- The majority of arrests for property offenses were for larceny
- Of Part II offenses, the greatest proportion were for disorderly conduct and drug law violations

Drugs

Adult drug arrests have also declined significantly in recent years. Arrests for possession increased while arrests for trafficking decreased. From 1990 to 1994:

- Adult drug arrests declined 26%
- Arrests for trafficking increased from 57% of the total to 81%
- Arrests for possession decreased from 43% of the total to 19%

The drug of choice among adult arrestees continues to be cocaine accounting for 74% of sales and 68% of possession arrests in 1994.

Consistently over the past five years, about half of adult arrestees have tested positive for drug use. Most positive tests are for cocaine (41%).

Recidivism

While the District has not conducted any comprehensive studies of recidivism, there are some indicators such as parole violations and probation revocations in relation to prison population that offer some suggestions for recidivism patterns. While the overall number of prison admissions has declined in recent years, parole violators comprise an increasing proportion of new admissions. In 1994:

- Parole violators accounted for 36% of new admissions compared with 26% in 1990
- 55% of adults who had their parole revoked were returned to prison

In recent years, an increasing proportion of offenders have left probation and been incarcerated as the result of probation revocation.

- Probation revocations increased by 36% from 1990 to 1994
- 29% of offenders were removed from probation via revocation in 1994

Corrections

Shifts in the District's population and changes in law enforcement and corrections practices have had an impact on the number and type of persons sent to prison. The District's overall inmate population has declined in recent years. This decline has been driven principally by a reduction in admissions – both pretrial and sentenced. Within DOC, there have been numerous changes in policies and practices that have generated major population shifts among the various institutions. Populations at the jail, halfway houses, federal and out-of-state facilities have declined dramatically. However, these inmates have not left the system, but rather shifted to other facilities at Lorton. Hence, populations at Lorton reflect significant increases (28% from 1990 to 1994) in recent years. Specifically, this is due to the fact that:

- Fewer inmates are placed in halfway houses, Federal, and out-of-state facilities
- Women inmates are no longer placed out-of-state, but in DOC facilities
- DOC has had fewer releases

Juveniles

Unlike the national trends for juveniles, in the District there have been more dramatic decreases than are evident for the overall criminal justice population. From 1990 to 1994, juvenile arrests decreased by:

- 29% overall
- 37% for Part I crimes
- 23% for Part II crimes
- 5% for violent crimes
- 10% for homicides

There are some notable changes in patterns for juvenile drug use:

- Juvenile drug arrests declined 45% from 1990 to 1994
- 55% of juveniles tested positive for drug use in 1994, surpassing adults for the first time since testing began in 1986
- Juvenile use of marijuana escalated from 6% in 1990 to 52% in 1994
- PCP use escalated from 1% in 1990 to 17% in 1994 ♦

CRIMINAL JUSTICE COSTS

Total Government Expenditures

In fiscal year 1994, total expenditures for the District of Columbia were 3.6 billion dollars. Compared to 1990, expenditures increased 9%, not controlling for the rate of inflation. Between fiscal years 1993 and 1994, expenditures decreased by 6%. Twenty-seven (27) percent of the budget was earmarked for public safety and justice in 1994. This percentage is about equal to the proportion set aside in fiscal year 1990 when public safety

expenditures accounted for 26% of the overall budget. However, the proportion was slightly less in fiscal year 1993 when 24% was set aside for this purpose. In actual dollars, the budget has increased by 11% compared to fiscal year 1990 and 4% compared to fiscal year 1993. Expenditures for public safety and justice in 1994 comprised the largest proportion of total government expenditures in the past five fiscal years (Table 1, Figure 1).

FIGURE 1

D.C. GOVERNMENT PUBLIC SAFETY AND JUSTICE EXPENDITURES
1994

Public Safety and Justice Expenditures

Within the budget for public safety and justice in 1994, the largest portion was spent by the Metropolitan Police Department (MPD) (39%) followed by the Department of Corrections (DOC) (38%) (Table 2, Figure 2). The MPD budget increased by 3% from fiscal year 1993 to 1994 (\$241,211,000 to \$248,926,000). From 1990 to 1994, the MPD budget increased 4% (\$238,331,000 to \$248,926,000). In 1994, DOC's budget totaled \$240,501,000, which

unlike the MPD, had decreased by 3% from fiscal year 1993 expenditures, which were \$247,489,000. In 1994, DOC experienced a 5% decrease compared to fiscal year 1990 when expenditures were \$252,776,000. Compared to the past five years, 1994 was the first year in which the MPD budget surpassed the DOC budget.

All other budgets within the area of public safety increased between fiscal years 1993 and 1994, except for the Board of Parole, which experienced a 3% decrease.

FIGURE 2
D.C. GOVERNMENT CRIMINAL JUSTICE EXPENDITURES BY AGENCY
1994

Summary and Discussion

In 1994, total government expenditures had increased 9% from 1990 and decreased by 6% since 1993. Twenty-seven (27) percent (\$968,776,000) of the budget was earmarked for public safety and justice. Within the budget for public safety and justice, the largest portion

(39%) was spent by MPD, reflecting a 3% increase from 1993. The second largest amount of expenditures (\$240,501,000) was for the DOC, which experienced a 3% decrease from fiscal year 1993 to 1994. From fiscal years 1990 to 1994, 1994 was the first year the budget for MPD (\$248,926,000) surpassed the budget for DOC (\$240,501,000). ♦

THE DISTRICT'S CRIMINAL JUSTICE PROCESS

This section describes how individuals and cases are processed through the District's criminal justice system. The District's criminal justice system is comprised of five basic organizational components: law enforcement, prosecution, defense, courts, corrections and parole. These major components participate in a five-stage criminal justice process:

- Detection of crime and apprehension of offenders
- Pretrial decisions and services
- Trial
- Sentencing
- Corrections or service of sentence

There are six publicly financed District agencies that have statutory responsibilities for administering the criminal justice process: Metropolitan Police Department, Pretrial Services Agency, District of Columbia Superior Court, Office of the Corporation Counsel, Department of Corrections and the Board of Parole. Additionally, the Public Defender Service, an independent agency and the United States Attorney's Office are involved in the city's criminal justice system.

The criminal justice process begins with the police who must determine the validity of reported crimes and subsequently investigate, identify and possibly apprehend suspects. The police must then decide, based upon the facts of each case, the nature of the charges to be forwarded to the prosecutor for a determination of whether or not to prosecute and for what offenses.

At the next stage, the alleged offender's pretrial status must be determined based upon the recommendation of the Pretrial Services Agency. This occurs prior to arraignment in the case of alleged misdemeanors or presentment in the case of alleged felonies. Several factors are considered in the decision to release or detain a defendant. In reviewing a defendant's case, the pretrial examiner considers the defendant's ties

to family and community, employment status, residency, prior record of failure to appear in court, drug abuse, criminal history and other indicators of reliability.

In the case of arraignment, charges are presented, a plea is entered and a trial date may be set. In the case of presentment, the arrestee is informed of the charge, counsel is appointed (if necessary), pretrial status is determined and a date is set for a preliminary hearing (unless waived).

In felony proceedings, the pretrial stage involves a series of preliminary and Grand Jury hearings. The hearings are designed to ensure that the evidence and facts of the case presented are sufficient to establish probable cause for indictment. In a preliminary hearing, a judge determines from the evidence presented by the prosecutor if there is probable cause to believe that a crime has been committed. In a Grand Jury hearing, the prosecutor's evidence is reviewed and, if the evidence is sufficient, an indictment is issued. In a small percentage of cases, the Grand Jury can initiate an investigation, issue an indictment based on investigation findings and then issue an arrest warrant. The defendant indicted under these circumstances is then arraigned and subsequently stands trial.

The prosecutor remains the key participant throughout this stage of the criminal justice process and may use some discretion until Grand Jury indictment to dismiss the case for any number of reasons. In the District, the Office of the Corporation Counsel prosecutes juvenile cases, traffic cases, some misdemeanor cases and civil suits to which the District government is a party. The United States Attorney's Office handles the prosecution of all other criminal cases.

In felony prosecution, if probable cause is established at the preliminary hearing stage, the case is bound over to the Grand Jury. If the

Grand Jury indicts, the case then proceeds to arraignment, where a plea is entered. Before a defendant enters a plea or goes to trial, it is the obligation of the defense counsel to investigate the case and interview any witnesses. In the majority of cases, disposition is resolved by a plea of guilty to all or some of the charges indicated. If plea bargaining occurs, the prosecutor and defense counsel discuss whether the client can plead guilty to the given charges or lesser charges based on the defendant's prior criminal record and role in the crime. If a felony defendant pleads not guilty, a trial by either judge or jury takes place and a determination of guilt or innocence is made. If a defendant pleads guilty, or if a defendant is found guilty by a judge or jury, a conviction is established and a sentence is imposed.

Persons who have pled guilty or been convicted following trial are subsequently sentenced by the court. Sentencing options include incarceration, probation, a fine, placement in a halfway house, institutionalization or community service. If a person is sentenced to incarceration, a classification evaluation is conducted to determine the level of supervision and services he or she will need. The findings of this evaluation are the basis for deciding the facility in which the inmate's sentence will be served.

If not incarcerated, a person may be sentenced to probation for a maximum of five years. Conditions of probation include drug testing, alcohol treatment, employment and reporting to an assigned probation officer. Also, a person may be placed in a residential treatment facility for all or part of his probation. Violation of probation terms may result in probation extension or revocation. If probation is revoked, the probationer may then be incarcerated or placed in a halfway house. If a probationer adheres to the terms of his or her probation, probation may be terminated early.

Once the minimum sentence has been served, an inmate may be considered for parole. Parole eligibility is determined by a review of progress reports during incarceration, parole guidelines and personal interviews, as well as other factors that indicate the possibility of risk the inmate poses to the community. If parole is granted, an inmate may be released to a halfway house, a work-release program or directly into the community under parole supervision. ♦

LAW ENFORCEMENT

Overview

The Metropolitan Police Department (MPD) is primarily responsible for law enforcement in the District of Columbia. The department has both city and state law enforcement authority and is charged with a broad range of statutory and municipal law enforcement responsibilities.

In 1994, MPD had 4,176 sworn officers which represents a 3% decrease from MPD's 4,291 sworn officers in 1990. In 1995, MPD had 38% sworn officers which represents a 9% decrease from 1994.

MPD has the authority to hire more officers, but cannot fill vacant positions fast enough due to budgetary limitations and the exodus of officers who are retiring at a rate of approximately 30 per month.

In addition to the MPD, there are 23 other public law enforcement authorities operating in the District. These public agencies have police powers limited to specific geographical areas and include, among others: the U.S. Secret Service Uniformed Division with 106 sworn officers and 25 civilians; the Metrorail Transit Police, with 286 sworn officers and 103 civilians; U.S. Capitol Police with 1,036 sworn officers and 194 civilians; and the Smithsonian Police, with 572 sworn officers and 92 civilians.

Of all methods by which crimes are reported to the police, the most common way is by the victim's report. Law enforcement officers also may witness a crime in progress or uncover evidence of a crime while conducting patrol duties. A citizen other than the victim may also witness a crime and then report the crime to the authorities.

Not all crimes are reported to the police. The National Crime Victimization Survey conducted by the Bureau of Justice Statistics reported that in 1993 only 35% of the crimes described by victims were reported to the police. Some of

the reasons given by the victims for not reporting crimes were that they felt it was a private matter, police were inefficient, police would not be able to do anything, or they feared reprisal from the offender.

The Federal Bureau of Investigation (FBI) Uniform Crime Reporting Program collects information based on crimes reported to law enforcement authorities throughout the United States. These crimes focus primarily on the eight major offenses (homicide, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle, and arson) defined by the FBI as Crime Index Offenses, or Part I offenses.

These offenses are further divided into two groups: violent offenses, which include homicide, rape, robbery and aggravated assault; and property offenses, which include burglary, larceny, motor vehicle theft and arson (see Appendix A for definitions). In selecting the crimes to be included in the Crime Index, the FBI considers several factors. The seriousness of the crime and frequency of occurrence serve as indicators of the nation's crime experience.

While there are differences in criminal status for given crimes in different jurisdictions, all Crime Index offenses are fully defined and a single definition for each of the chosen offenses has been developed to ensure measurable crime data. In the future, the District and other jurisdictions will move toward implementation of the National Incidence Based Reporting System which will allow for more variables to be collected regarding the specific nature of individual crimes.

Part II offenses encompass all other crime classifications outside those defined as Part I offenses (see Appendix A for definitions). This category of offenses was devised and adopted in order that law enforcement, judicial and penal statistics might be uniformly compiled in terms of a single classification of offenses.

After a crime is reported, the police must determine the validity of the reported offense. Once validated, the police investigate and attempt to identify and apprehend a suspect. After an individual is taken into custody, the police decide, based on the facts of the case, which charges to impose and forward to the prosecutor.

This section of the report examines reported offense data, geographic patterns of crime, adult arrest data and characteristics of adult arrestees.

Reported Offenses

The population estimate for the District of Columbia for 1994 is 578,000. In 1994, there were 63,350 Crime Index offenses reported, of which 15,177 were for violent and 48,173 were for property crimes (Table 3, Figure 3).

A ten-year analysis shows that the number of reported offenses is 26% higher than in 1985. When the District's population is taken into account, the rate increased by 36% from 8,034 to 10,960 per 100,000 residents in 1994. In this time, the District experienced an 8% decline in population from 626,900 to 578,000.

During the past five years, however, the number of reported offenses has been declining. A five-year analysis shows that the number of reported offenses is 4% lower than in 1990 and the rate

increased by 1% per 100,000 residents (10,817 to 10,960). During this same period of time, the District experienced a 5% decline in population from 606,900 to 578,000 (Figure 4).

Violent Crime

Violent crime includes homicide, rape, robbery, and aggravated assault. During this five-year period, the number of reported violent offenses increased by 1% from 14,961 in 1990 to 15,177 in 1994; and the rate increased by 7% per 100,000 residents (2,465 to 2,626) (Table 3). With the exception of aggravated assault, all violent offenses reported to police have decreased since 1990:

- Homicides decreased in number by 16% (474 in 1990 to 399 in 1994), and the rate decreased by 12% (78 to 69 per 100,000 residents) (see Homicide Patterns)
- Rapes decreased in number by 18% (303 in 1990 to 249 in 1994), and the rate decreased 14% (50 to 43 per 100,000 residents)
- Robbery decreased in number by 14% (7,365 in 1990 to 6,391 in 1994) and the rate decreased by 10% (1,214 to 1,092 per 100,000 residents)
- Aggravated assaults increased in number by 21% (6,819 in 1990 to 8,218 in 1994), and the rate increased 27% (1,124 to 1,422 per 100,000 residents)

TABLE 3

REPORTED CRIME INDEX OFFENSES IN THE DISTRICT OF COLUMBIA
1985 - 1994

The following classifications are used in this and subsequent tables:

Crime Index Total equals the Violent Crime Total plus Property Crime Total.

Violent Crime Total equals the sum of homicide, forcible rape, robbery and aggravated assault.

Property Crime Total equals the sum of burglary, larceny/theft, motor vehicle theft and arson.

* Homicide includes murder and non-negligent manslaughter.

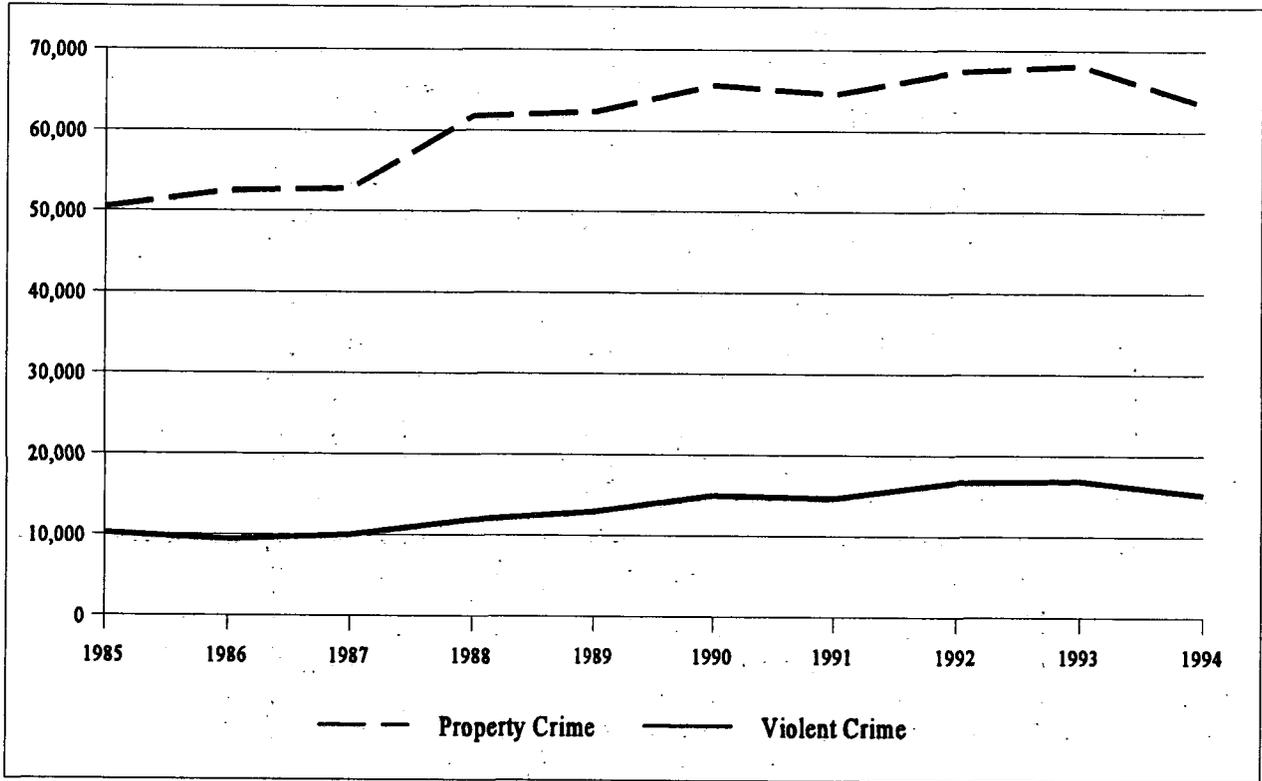

** Rate is calculated per 100,000 residents.

*** Figure derived using 1990 population estimate.

FIGURE 3
REPORTED CRIME INDEX OFFENSES IN THE DISTRICT OF COLUMBIA
1985 - 1994

Property Crime

Property crimes include burglary, larceny/theft, motor vehicle theft, and arson. During this five-year period, the number of reported property offenses decreased by 5% from 50,686 to 48,173 with a corresponding rate decrease of less than 1% per 100,000 residents (8,352 to 8,334) (Table 3). With the exception of motor vehicle theft, all reported property offenses have decreased since 1990:

- Burglary decreased from 12,035 (or 1,983 per 100,000) to 10,037 (or 1,737 per 100,000) resulting in a 17% decrease in number and a 12% decrease in rate

- Larceny decreased from 30,326 (or 4,997 per 100,000) to 29,673 (or 5,134 per 100,000) resulting in a 2% decrease in number and 3% increase in rate
- Motor vehicle thefts increased from 8,109 (or 1,336 per 100,000 residents) to 8,257 (or 1,429 per 100,000) resulting in a 2% increase in number and a 7% increase in rate

HATE CRIMES

In an effort to deter hate-motivated crimes, hate crimes legislation has been adopted by the U.S. Congress and more than 30 states. This legislation imposes extra penalties for crimes motivated by bigotry and hatred. Hate crimes can be distinguished from other types of violent crime by the number of perpetrators, the brutality involved and the apparent lack of gain from the offense.

In 1990, the federal Hate Crimes Statistics Act (HCSA) was adopted. This act calls for voluntary police compliance in recording and reporting hate crime data as a part of the FBI's Uniform Crime Reporting Program. HCSA includes data "about crimes that manifest evidence of prejudice based on race, religion, sexual orientation, or ethnicity. This includes where appropriate the crimes of murder, non-negligent manslaughter, forcible rape, aggravated assault, simple assault, intimidation, arson, and destruction, damage or vandalism of property."

In 1989, the District passed a broader version of the hate crimes legislation adopted by the U.S. Congress. D.C. Code 22-4001 defines a

'Bias-Related Crime' as a designated act (a criminal act) that demonstrates an accused's prejudice based on the actual or perceived race, color, religion, national origin, sex, age, marital status, personal appearance, sexual orientation, family responsibility, physical handicap, matriculation, or political affiliation of a victim of the designated act.

Some crimes that are classified as a hate crime are not reported to the FBI's Uniform Crime Reporting Program because the type of prejudice is not included in their definition (e.g. prejudice based on political affiliation). From 1990, when the District began collecting data, through 1994, there has been a total of 34 confirmed hate/bias-related crimes committed. These have been classified as follows:

- Racial (20)
- Anti-sexual orientation (10)
- Religious (2) and
- Ethnicity/national origin (2)

Reported Crime Relative to Other Cities

In a comparative analysis of reported crimes in U.S. cities with populations greater than 400,000, data indicate that the District's crime rate ranked 8th among 38 cities as of 1994 (Appendix C, Table A-1).

Geographic Patterns of Crime

The following figures can only be considered a rough comparison because of the sensitivity involved in calculating rates by ward.

Ward 2 continues to lead the District with the largest number of reported offenses and highest rate per 1,000 ward residents for both violent and property offenses (Table 4). In 1994, Ward 2 had 18,211 reported Crime Index offenses, with a corresponding rate of 223 per 1,000 residents. There were 2,950 violent offenses reported for a rate of 36 per 1,000 residents and 15,261 property offenses for a rate of 187 residents.

Ward 6 had the second highest rate of reported offenses with 113 per 1,000 residents and 7,990 reports. Ward 6 also ranked second in terms of property crime rate with 83 per 1,000 ward residents (or 5,896 reports); it ranked third (behind Wards 2 and 8) for reported violent offenses, with 30 per 1,000 residents and 2,094 reports.

Ward 3 continued to have the lowest number of reports (4,031) and rate (48 per 1,000 residents) for Crime Index offenses.

The incidence of reported Crime Index offenses in each of the District's census tracts is given in Appendix C, Table A-2.

Adult Arrests

There were fewer Part I and Part II arrests made in 1994 than during any other year in the past five years. A five-year analysis shows there were 10% fewer adults arrested for Part I offenses (9,453 to 8,524) and 7% fewer for Part II offenses (39,114 to 36,484) (Table 5, Table A-3, Figure 4). Compared to 1993, the number of adults arrested for Part I offenses decreased by 16% (from 10,150) and Part II arrests decreased by 3% (from 37,488). Overall, the percentage of adults arrested for Part I and Part II offenses in the total number of arrests has remained relatively consistent. In 1990 and in 1994, arrests for Part I offenses accounted for 19% of total arrests.

Of arrests for violent offenses in 1994, nearly 3 out of 4 adult arrests were for aggravated assault. Of arrests for property offenses, more than 50% were for larceny (Table 6). Of Part II offenses, the greatest proportion of arrests were for disorderly conduct (20%) and drug law violations (19%) (Appendix C, Table A-4).

TABLE 4
REPORTED CRIME INDEX OFFENSES BY WARD
1994

| Ward | | Population Estimates* | Crime Index Total | Violent Crime Total | Property Crime Total |

Drug Arrests

The total number of adult drug arrests in 1994 is 26% lower than in 1990 and 31% lower than the peak in 1991 (Table 7, Figure 5). Adults arrested for possession as a percent of all adult drug arrests has steadily increased since 1991, while those arrested for trafficking as a percent of all adult drug arrests has steadily decreased in the same period.

- In 1990, adults arrested for drug trafficking accounted for 57% of all adult drug arrests. In 1994, that proportion increased to 81%.
- In 1990, adults arrested for possession of drugs accounted for 43% of all adult drug arrests and decreased to 19% in 1994.

From 1993 to 1994, the number of adult arrests for drug sales decreased by 46% and the number of arrests for drug possession increased by 3%

(Appendix C, Table A-5). The majority of adult sales and possession charges were for opium or cocaine and their derivatives, which continue to be the drugs of choice and comprised 74% of sales arrests (919) and 68% of possession arrests (3,632) in 1994. Opium/cocaine possession and sales arrests were the lowest in five years. Of the 6,591 adults arrested for drug offenses in 1994, 69% (4,551) were charged in conjunction with either of the two drugs. By comparison, of the 8,849 adults arrested in 1990 for drug offenses, 81% (7,170) were charged relative to these two drugs.

Arrests for possession of marijuana have steadily increased and by 1994 were at the highest point in five years, comprising 28% (1,509) of adult drug arrests.

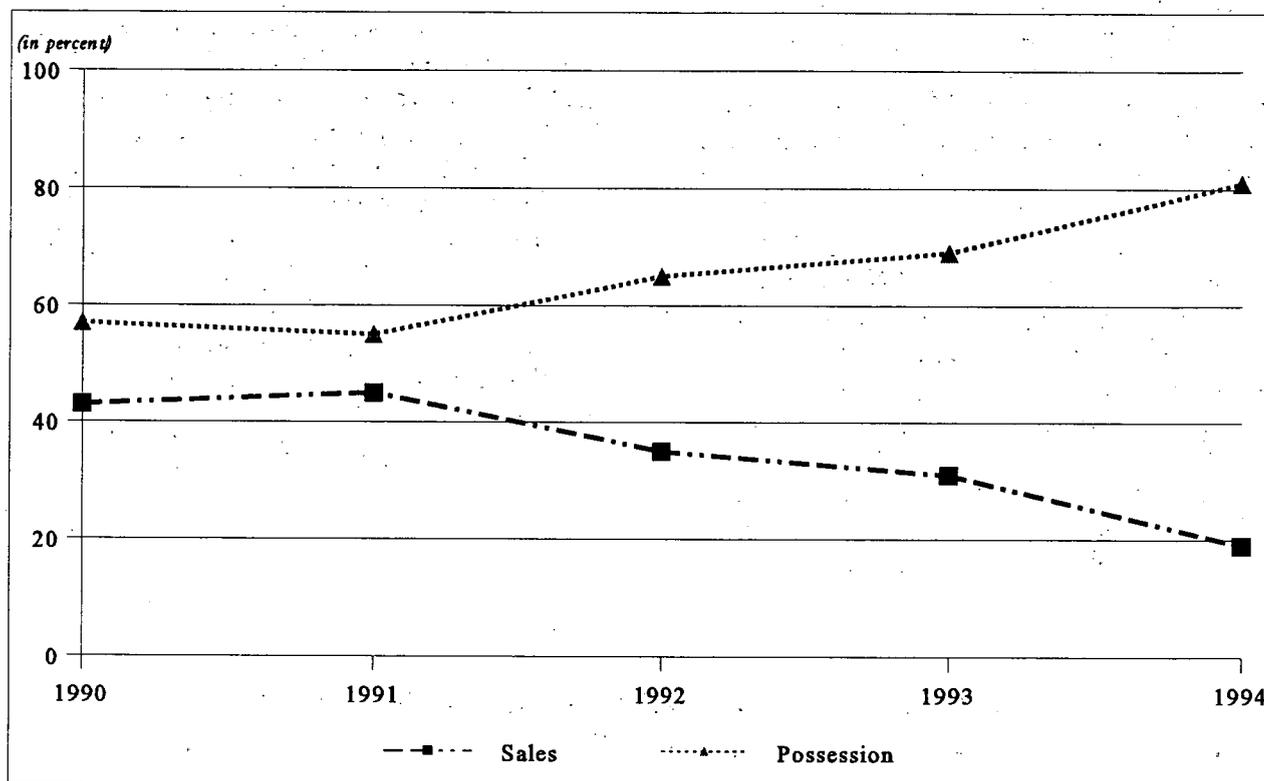

TABLE 7

PERCENT OF ADULT DRUG ARRESTS FOR SALES AND POSSESSION 1990 - 1994

| Year | Total Number of Drug Arrests | Percent Sales | Percent Possession |
|------|------------------------------|---------------|--------------------|
| 1990 | 8,849 | 43% | 57% |
| 1991 | 9,573 | 45% | 55% |
| 1992 | 7,309 | 35% | 65% |
| 1993 | 7,508 | 31% | 69% |
| 1994 | 6,591 | 19% | 81% |

FIGURE 5
ADULT DRUG ARRESTS
1990 - 1994

Characteristics of Adult Arrestees

Age and Sex

As is generally the case, persons arrested in 1994 were predominantly men younger than age 30 (Table 8). Men comprised 82% of the arrested population – 82% of arrests on Part I offenses, 81% of arrests on Part II offenses, and 87% of drug arrests. Fifty-two percent (23,193) were between the ages of 18 and 29. Of this age group, more than 1 in 4 were between 18 and 20 years of age.

Drug Use

The number of arrestees tested for the presence of illegal drugs by the Pretrial Services Agency

decreased by 3% since 1990 (Appendix C, Table A-6 and Figure 6). Consistently over the past five years, about half of adult arrestees have tested positive for drug use. There have been some fluctuations for particular drugs. In 1994:

- Cocaine use was detected among 41% of arrestees.
- Heroin use was detected among 10% of arrestees
- PCP use was detected among 11% of arrestees

FIGURE 6
ADULT DRUG TEST RESULTS
1990 - 1994

Patterns of Homicide

In 1995, there were 399 homicides, representing a decrease for the second consecutive year. Homicides decreased by 12% from 1993 to 1994, and 10% from 1994 to 1995. This is the lowest number of homicides in the District since 1988, when homicides skyrocketed to 369 after an epidemic of drug-related killings.

Assailants and Victims

As in the past, the vast majority of homicides involved youth as victims or killers.

In 1994, approximately 51% (166) of alleged homicide assailants were between the ages of 18 and 24 (Table 9). Of this age group, nearly 60% (98) were between 18 and 20 years of age.

Of those homicide victims in 1994 for whom age was determined (50% were unknown), 23% (92) were 24 or younger. Of this group, 40% (37) were between 18 and 20 years of age (Table 10).

Motives and Methods

From 1990 to 1994, some shifts took place in the prevalence of certain homicide motives (Table 11). For those homicides where a motive could be determined, the following changes occurred:

- Retaliation (non drug-related) as a motive for homicide increased from 1% in 1990 to 13% in 1994
- Drugs as a motive for homicide decreased from 42% in 1990 to 14% in 1994
- Robbery as a motive for homicide decreased from 13% in 1990 to 9% in 1994

Drug-related homicides steadily increased from the mid-1980s until peaking in 1988 (53%) and have steadily declined since then.

Guns are by far the weapon of choice in the District, accounting for 79% of homicides in 1994 (Table 12). The proportion of firearms used in homicides has remained stable since 1990, after a steady climb from 55% in 1986.

Unless registered before 1976, possession of handguns is illegal in the District. However, lack of such legislation in surrounding jurisdictions makes it easy to obtain firearms. In 1995, there were 2,135 confiscated firearms processed by MPD. Of those firearms processed, 702 were successfully traced to original owners by the Bureau of Alcohol, Tobacco and Firearms; 232 were sold in Maryland, 214 in Virginia, and 256 in other states. Historically, the majority of guns originated in Virginia.

Summary and Discussion

In the District as in the nation, reported crime also declined in recent years. A five-year analysis shows that the number of reported offenses is 4% lower than in 1990. However, when taking the District's decreased population into account, the rate increased by 1% from 10,817 to 10,960 per 100,000 residents in 1994. Between 1990 and 1994, the District experienced a 5% decline in population from 606,000 to 578,000 residents which contributed to the crime rate increase. In this same time period, the number of reported violent offenses increased by 1% and the rate decreased by 7%. The number of reported property offenses decreased by 5% with a corresponding rate decrease of less than 1%.

The only increase in violent offenses was for aggravated assault which increased 21% by number and 27% by rate. All reported property offenses decreased, with the exception of motor vehicle theft which increased by 2% numerically and 7% by rate.

There were fewer arrests made in 1994 than during any other year in the past five years for both Part I and Part II offenses. Compared to 1990, the number of arrests for Part I offenses decreased by 10%, arrests for Part II offenses decreased by 7%, and total arrests decreased by 7%.

Adult arrests for drug offenses peaked in 1991 and have steadily declined. Drug arrests in 1994 were 26% lower than in 1990.

In 1994, approximately 51% of all alleged homicide assailants were between the ages of 18 and 24. Of homicide victims, 23% were 24 or younger.

An argument was the most common motive (17%) for committing a homicide followed by drugs (14%). From 1990 to 1994, drugs as a reason for homicide declined from 42% to 14%. Retaliation (non drug-related) as a reason for homicide increased from 1% in 1990 to 13% in 1994.

Seventy-nine percent of alleged homicide assailants used a firearm.

The recent decline in crime can be in part attributed to various law enforcement, legislative and community efforts.

- Metropolitan Police Department (MPD) has had unprecedented levels of assistance from Federal law enforcement agencies
- Multi-agency task force efforts have been targeted toward hard-core criminals and gangs responsible for multiple murders
- Homicide detectives and prosecutors have been assigned to specific police districts
- Resident patrols continue to be active in neighborhoods

- The District enacted legislation in 1994 which made carrying an unlicensed firearm a felony with a maximum sentence of five years in prison
- MPD continues to implement and develop community policing efforts
- Truth in sentencing restrictions were imposed to allow minimum sentence reductions of no more than 15% for violent offenders

This discussion does not account for various demographic, economic and social components that would further explain crime trends. ♦

DOMESTIC VIOLENCE

In 1991, the District of Columbia enacted the Prevention of Domestic Violence Amendment Act, known as the Mandatory Arrest Law, requiring police officers to make arrests when there is probable cause to believe that an intrafamily offense has occurred. Part of this Act requires the police force to incorporate in its educational program for new law enforcement officers training in the nature, dimensions and causes of intrafamily offense, services and facilities available to the victim or perpetrator and techniques for handling an intrafamily offense. Prior to a new law enforcement officer's permanent appointment, he/she must have at least 20 hours of basic training in responding to an intrafamily offense. Any currently employed officer is required to participate in an eight-hour course designed to familiarize him/her with the dynamics of intrafamily offenses.

As a result of this legislation, the District of Columbia Superior Court (DCSC) has experienced yearly increases in caseloads. The increased caseload focuses attention on apparent failures in the justice system's response to domestic violence cases.

In an effort to improve interagency coordination in handling domestic violence cases and to seek collective solutions, the Domestic Violence Coordinating Council, with its various committees, was established. Reorganization of some criminal justice system components and enhancements of others was necessary to achieve the Council's goal. The underlying goal is to analyze the problem of domestic violence and to design an integrated, multiagency intervention that, over time, would reduce dramatically the incidence of domestic violence in the District. The Council's plan addresses the fact that large numbers of people are committing violent crimes daily against members of their own households and this criminal activity is largely being ignored in a system plagued by limited resources and, in some cases, limited understanding of the problem.

One of the Council's objectives is the creation of the Domestic Violence Project, a unified domestic violence court that processes both noncriminal and

criminal cases in which domestic violence is the underlying issue. The Domestic Violence Project is a comprehensive and realistic approach that considers all the circumstances between the parties upon disposition of the case – particularly the history of violence by the offender against the victim – and attempts to fashion a remedy to alter offender behavior and provide additional support and safety to every victim. Because of their complexity, domestic violence cases require a different response than other criminal cases.

The purpose for creating a unified case-processing system for domestic violence cases is to:

- Promote specialization among judges, prosecutors, defense attorneys and other system components
- Encourage the handling of each case in the manner most appropriate to the individual circumstances of the case
- Impose offender accountability through the imposition of a variety of sanctions, including jail and jail treatment, in appropriate cases
- Monitor treatment programs for those offenders who enter the system early in the cycle of violence
- Promote maximum allocation of scarce resources and
- Provide judicial review and monitoring of each case, upon disposition, through a coordinated approach to ensure that the judge who has the best understanding of the history between the involved parties will monitor the case

Processing domestic violence cases in a unified manner is a relatively new approach. The Domestic Violence Project was developed with input and cooperation from District Council representatives, including DCSC judges and administrators, governmental and nongovernmental agencies, advocacy groups, the community and the medical community. Their commitment to this effort is documented in a statement of intent signed by key representatives from these groups. ♦

**DISTRICT OF COLUMBIA DOMESTIC VIOLENCE PLAN
SIGNING CEREMONY
December 12, 1995**

Whereas domestic violence causes tremendous suffering among its victims, many of whom are children;

Whereas it is assumed that the most effective way to fight the systemic problem of domestic violence is through integrated interagency planning and cooperation;

Whereas we, who represent the criminal justice agencies, the court and the victim advocacy community have joined in partnership to lessen domestic violence in the District of Columbia;

Whereas we are apprised of the goals and recommendations set forth in the District of Columbia Domestic Violence Plan;

Whereas we recognize that the support of our agency or governmental entity is critical to the successful implementation of this Plan;

NOW THEREFORE, we, the undersigned, support the attached Domestic Violence Plan, dated December 12, 1995, as the Domestic Violence Plan for the District of Columbia and commit our respective branch, court, office, agency or service to its implementation and enforcement.

Honorable Marion S. Barry, Jr., Mayor
District of Columbia

Honorable Eugene N. Hamilton, Chief Judge
District of Columbia Superior Court

Honorable Eric H. Holder, Jr.
U.S. Attorney for the District of Columbia

Margaret A. Moore, Director
D.C. Department of Corrections

Charles F.C. Ruff, Esquire
Corporation Counsel

Chief Larry D. Soulsby
Chief of Police

Chief Robert Langston

COURT PROCESSING

Overview

After a person has been arrested and charged with a crime, the charge and any additional information about that individual are forwarded by the police to the prosecutor's office. In the District, the Office of the Corporation Counsel prosecutes juvenile cases, traffic cases, some misdemeanor cases and civil suits to which the District of Columbia Government is a party. The United States Attorney's Office handles the prosecution of all adult criminal cases. Persons who have pled guilty or been convicted following trial are subsequently sentenced by the District of Columbia Superior Court (DCSC). The DCSC is responsible for monitoring probation of adults and juveniles. This section of the report provides data for adult felony prosecutions, convictions and probation. Misdemeanor prosecution and conviction data were unavailable.

Prosecutions

In 1995, the largest number of prosecutions were for assaults and drug offenses which together comprised 47% of all felony prosecutions (Table 13). Between 1990 and 1995, assaults and weapons offenses as a percentage of all felony prosecutions increased.

- Assaults increased from 17% to 24% of felony prosecutions
- Weapons offenses increased from 2% to 9% of felony prosecutions

Homicide, robbery, and drug offenses as a percentage of all felony prosecutions steadily declined between 1990 and 1995:

- Homicide declined from 2% to 1% of felony offenses
- Robbery declined from 8% to 6% of felony prosecutions
- Drug offenses declined from 35% to 23% of felony prosecutions

In 1995, drug charges comprised 35% of felony prosecutions numbering 3,532, the smallest number of prosecutions in six years. There were 41% less drug prosecutions than in 1990 when prosecutions numbered 5,981 and 17% less than in 1994 when there were 4,272 drug prosecutions.

Convictions

In 1995, the largest number of convictions were for drug offenses (31%) (Table 14). Between 1990 and 1995, more adults were convicted of assault, burglary, and weapons offenses.

- Assault increased from 5% to 8% of felony convictions
- Burglary increased from 2% to 4% of felony convictions
- Weapons offenses increased from 4% to 14% of felony convictions

Fewer adults were convicted of drug offenses and motor vehicle theft in 1995 than previous years. In 1995, drug charges comprised 31% of felony convictions numbering 1,293, the smallest number of convictions in six years. There were 21% less drug convictions than in 1990 when convictions numbered 1,627 and 29% less than in 1994 when there were 1,824 drug convictions. Convictions for motor vehicle theft were 71% lower than in 1990 when there were 182 contrasted with 53 in 1995 and 13% less than in 1994 when there were 61.

Probation

Type of Supervision

Probation is a sentence imposed by the court upon a convicted offender requiring the offender to meet certain conditions of supervision in the community. A probation officer is normally responsible for enforcing parole conditions. Adults on probation are placed under active or inactive supervision, or intensive probation. Adults under active supervision are responsible for reporting to a probation officer and meeting

the conditions of their probation. When all conditions of probation have been met except for the completion of time to be served, they are placed on inactive supervision. Adults placed on intensive probation are required to have more contacts with their probation officer, subject to more conditions of supervision and are monitored more frequently.

Adults who are diverted can be placed under the supervision of the probation department or placed in community-based private programs (e.g., drug treatment). Individuals who are

diverted tend to have no prior convictions and their cases are diverted prior to a finding of guilt or innocence for the offense(s) with which they are charged. These individuals must successfully complete the required conditions set forth by the judge or go back to court for the charge(s) that were originally brought against them. If these individuals successfully complete the required conditions, the charges are dropped and do not appear on their criminal record.

At the end of 1994, a total of 10,783 persons were under the supervision of the court (Table 15):

- 8,220 adults were on active supervision
- 2,305 adults were on inactive supervision
- 153 adults were diverted
- 105 adults were placed on intensive probation

TABLE 16
ADULT PROBATION POPULATION
1990 - 1994

| Year | Probation Population, December 31 | Number on Probation Per 100,000 Adult Residents |
|------|--------------------------------------|--|
| 1990 | 8,782 | 1,793 |
| 1991 | 8,454 | 1,772 |
| 1992 | 8,091 | 1,714 |
| 1993 | 8,264 | 1,785 |
| 1994 | 8,325 | 1,846 |

* Figures include Active Supervision and Intensive Probation cases.
Source: *The District of Columbia Courts 1994, Annual Report.*
Prepared by: *National Council on Crime and Delinquency.*

As of December 31, 1994 there were 8,325 adults on active supervision and intensive probation (or 1,846 per 100,000 adult residents) (Table 16). This is 5% less numerically than in 1990 when there were 8,782 and an increase of 3% in the rate. Compared to 1993, the number of adults on probation increased by 1% numerically and increased 3% in the rate.

Cases Assigned and Removed

In 1994, there were 6,677 new cases assigned to probation and 6,616 cases removed (Table 17). The number of new cases assigned and cases removed continuously declined from 1990 to 1993 and then began to increase in 1994.

The largest decline was between 1992 and 1993:

- 8% less cases were assigned to probation
- 15% less cases were removed from probation

From 1993 to 1994:

- 2% more new cases were assigned
- 4% more cases were removed

Of all cases removed from probation in 1994 (Table 18):

- 42% were the result of sentence expiration
- 12% were terminated via successful completion of sentence
- 29% were probation revocations

Probation can be revoked if the offender commits a new offense while on probation or because he or she violates a technical condition of release. Technical conditions of release frequently include, but are not limited to, abstaining from drug use, avoiding contact with other criminals, maintaining steady employment and periodically reporting to a probation officer.

In recent years, fewer offenders have left probation as the result of sentence termination or successful completion of sentence and more as the result of probation revocation. From 1990 to 1994:

- Expirations decreased by 7%
- Terminations decreased by 60%
- Revocations increased by 36%

In any given year, more misdemeanor offenders were under probation supervision than felony offenders (Table 19). However, in the past five years, felony offenders on probation accounted for an increasing proportion of all probationers (27% in 1990 to 36% in 1994).

The rearrest rate for adult probationers increased slightly from 16% in 1990 to 18% in 1994 (Table 20).

Summary and Discussion

There were 12% less adult felony and misdemeanor prosecutions in 1995 than in 1990 and 14% less than in 1994.

Prosecutions for drug offenses were 41% lower in 1995 than in 1990 while prosecutions for assaults were 27% higher than in 1990. Between 1990 and 1995, prosecution for assaults and weapon offenses increased while prosecutions for homicide, robbery and drug offenses decreased.

Adult convictions for misdemeanor and felony offenses in 1995 were the fewest in six years.

There were 21% less felony convictions for drug offenses in 1995 than in 1990 and 29% less than in 1994. There were 71% less motor vehicle theft convictions in 1995 than in 1990 and 13% less than in 1994.

Excluding diverted or inactive cases, at the end of 1994, there were 8,325 adults on probation (or 1,846 on probation per 100,000 adult residents). There were 6,677 new cases assigned and 6,616 cases removed from probation. Of those cases removed, 29% had their probation revoked and 12% were terminated via successful completion of their probation conditions. ♦

CORRECTIONS

Overview

The District's Department of Corrections (DOC) is responsible for the administration and operation of the D.C. Detention Facility (jail) and various prisons, community correctional centers and alternative incarceration programs. The jail is located in the boundaries of the District and is primarily used to house men and women defendants awaiting trial and inmates with sentences of one year or less.

The majority of men with longer sentences are housed at minimum, medium and maximum security facilities in Lorton, Virginia, on a 3,000-acre site.

Correctional Population

On December 31, 1994, the population of District and Federal facilities numbered 10,950 – a decline of 8% from the 11,851 population in 1990, but an increase of 1% from year end 1993 (Table 21). This decrease is mostly attributable to a smaller number of inmates placed in halfway houses, Federal and out-of-state facilities.

- Halfway house populations declined 31% between 1992 and 1993

In 1993, DOC changed its policy regarding halfway house placements to address the high incidence of absconders (also referred to as "walk-aways").

- Inmates placed in out-of-state facilities declined dramatically from 1990 to 1994 (78%)

As a result of a policy adopted to recall all District inmates housed in out-of-state facilities, as of January 30, 1995, all out-of-state inmates were returned to the District's DOC.

- Federal prison inmates declined 72% between 1991 and 1992
- Placement in halfway houses declined 33% from 1990 to 1993, but began to rise again in 1994

One factor contributing to this decline is the transfer of women from Federal facilities to Lorton. Until 1991, women inmates were being placed in Federal facilities because DOC lacked local facilities to house them. After 1991, DOC built facilities specifically to house women at the Lorton complex.

Between 1990 and 1994, the number of jail inmates has generally declined and the number Lorton inmates has increased. From December 31, 1990 to December 31, 1994:

- The District's jail population declined by 9%
- The number of prisoners housed at Lorton increased by 28%

Incarceration Rates

The incarceration rate on December 31, 1994 for both jail and prison was 2,147 inmates per 100,000 adult residents (Table 22). This is 30% higher than in 1990 when the rate was 1,654 per 100,000 adult residents. Compared to 1993, there was a 4% increase, when the previous rate was 2,070 per 100,000 adult residents. Between year-end 1990 and 1994, the total jail and prison incarceration rate:

- Decreased 2% for jail inmates
- Increased 39% for prison inmates

Characteristics of Inmates

Sex and Race

The DOC inmate population is predominately black and male. From 1990 to 1994, male inmates far outnumbered females (Table A-7 and Table A-8). In 1994, males comprised 94% of all prison inmates and 91% of jail inmates.

Between 1990 and 1994, the female jail population declined (Table A-7 and Table A-8). Females accounted for 1 out of 10 jail inmates between 1992 and 1994, compared to 1 out of 4 jail inmates between 1990 and 1991. This decline was the result of DOC's efforts to divert females out of the jail facility and into housing facilities built specifically for women.

In 1994, black inmates comprised 97% (9,425) of all adults incarcerated in jail and prison, reflecting a proportion consistent with previous years.

Age

Between 1990 and 1994, the jail and prison experienced an aging of their populations.

Jail inmates (Table A-9):

- Age 20 or younger decreased from 12% to 2%
- Ages 41 to 50 increased from 9% to 20%

Prison inmates (Table A-10):

- Ages 21 to 25 decreased from 21% to 15%
- Ages 26 to 30 decreased from 25% to 19%
- Ages 41 to 50 increased from 11% to 20%

Offense

The proportion of jail prisoners incarcerated for a particular type of offense has remained relatively unchanged between 1990 and 1994, except for drug trafficking, assaults and weapons offenses (Table 23). Offenders in jail for drug trafficking peaked in 1991 at 40% and has continuously declined to 33% in 1994. There has been a slight increase in weapons offenses from 1% in 1990 to 4% in 1994 and in assaults from 7% in 1990 to 9% in 1994.

The highest proportion of inmates were in jail for violent offenses (36%). The most frequent crimes for which jail inmates were incarcerated were:

- Drug trafficking (33%)
- Robbery (13%)
- Homicide (10%)
- Assault (9%)

The type of offenses for which prison inmates were sentenced has varied between 1990 and 1994 (Table 24). The percent of prisoners serving a sentence for homicide increased from 7% to 14%; drug trafficking decreased steadily from 42% to 36%; and possession of drugs decreased from 7% to 1%. In 1994:

- 42% of inmates committed violent offenses
- 37% of inmates were serving a sentence for a drug offense

Admissions

The number of people entering jail and prison has continuously decreased from 7,977 in 1990 to 5,947 in 1994 (Table 25). Overall, there were 25% less people entering jail or prison in 1994 compared to 1990. Parole violators account for an increasing percentage of all jail and prison admissions. In 1990, parole violators returned to jail or prison accounted for 26% of all admissions and increased to 36% in 1994.

were 51% less inmates released from jail and prison in 1994 compared to 1990. In 1994:

- 6% were released as a result of sentence expiration
- 31% were released at court (charges dropped)
- 35% were released under court order
- 14% were released under the Emergency Powers Act (to control for overcrowding)

Releases

The number of inmates released from jail and prison has continuously declined from 9,199 in 1990 to 4,490 in 1994 (Table 26). Overall, there

Between 1993 and 1994, 50% less inmates were extradited, 53% less were transferred to other jurisdictions and 64% less were released to the U.S. Marshal.

Summary and Discussion

Shifts in the District's population and changes in law enforcement and corrections practices have had an impact on the number and type of persons sent to prison. The District's overall inmate population has declined in recent years. This decline has been driven principally by a reduction in admissions – both pretrial and sentenced – rather than more releases.

- From 1990 to 1994, 51% less inmates were released from jail or prison

On December 31, 1994, the population in District and Federal facilities numbered 10,950 – a decline of 8% from the 11,851 population in 1990, but an increase of 1% from year-end 1993.

Within DOC, there have been numerous changes in policies and practices that have generated major population shifts among the various institutions. Populations at the jail, halfway houses, Federal and out-of-state facilities have declined dramatically. However, these inmates have not left the system, but rather shifted to other facilities at Lorton. Hence, populations at Lorton reflect significant increases (28% from 1990 to 1994) in recent years. Specifically, this is due to the fact that:

- Fewer inmates are placed in halfway houses, Federal, and out-of-state facilities
- Women inmates are no longer placed out-of-state, but in DOC facilities
- DOC has had fewer releases

As of January 30, 1995, all out-of-state inmates were returned to the District's DOC. The number of inmates housed in Federal prisons decreased by 89% between 1990 and 1994; and during the same period of time, the number of inmates placed in halfway houses declined 31%.

Between 1990 and 1994, the jail and prison populations have been aging. There has been an increase in the percentage of inmates between 41 and 50 years of age.

Parole violations and probation revocations in relation to prison populations offer some indicator of recidivism patterns. While the overall number of admissions to prison have decreased in recent years, parole violators comprise an increasing proportion of new admissions (see following chapter).

- 36% of new prison admissions in 1994 were parole violators compared with 26% in 1990

In recent years, more offenders have left probation and been incarcerated as the result of probation revocation. From 1990 to 1994:

- Probation revocations increased by 36%
- 29% of offenders were removed from probation due to revocations ♦

PAROLE

Overview

The Board of Parole is an executive agency of the District of Columbia. The five board members include the chairperson, who is appointed by the Mayor. They are confirmed by the council. The Board is supported by approximately 100 employees under the direction of the chairperson.

Parole represents a bridge between incarceration and unconditional release. The board is responsible for determining whether or not offenders should be released on parole, establishing terms and conditions of release, supervising parolees in the community and determining whether to modify conditions of or revoke parole.

Adults on Parole

As of December 31, 1994, there were 6,574 adults on parole (or 1,458 per 100,000 adult residents) (Table 27). In general, the number of adults on parole has increased between 1990 and 1994.

- From 1990 to 1994, the number of adults on parole increased 23% (5,346 to 6,591) and the rate per 100,000 adult residents increase 34% (1,091 to 1,458)
- From 1993 to 1994, the number of adults on parole decreased less than 1% (6,574 to 6,574), and the rate increased 2% (1,424 to 1,458)

For each year, males far outnumbered females on parole supervision (Table 28). In 1994, males comprised 93% (6,114) of all adults on parole supervision. Similarly, blacks outnumbered whites on parole supervision (Table 29). In 1994, blacks comprised 97% (6,377) of all adults on parole supervision.

Of all adults entering parole, discretionary parole entries are the most common form of release from incarceration to parole (Table 30). Discretionary parole entries declined from 75% (2,467) in 1990 to 61% (2,051) of all adults entering parole in 1994. On the other hand, mandatory parole entries increased from 22% (716) in 1990 to 26% (873) in 1994.

Of all adults on parole at the end of 1994, 4,535 were on active supervision (69%) and 17% (1,125) had absconded (Table 31).

Of all adults leaving parole in 1994, 41% (1,403) had successfully completed their time on parole (Table 32). An estimated 55% (1,857) of adults had their parole revoked and were returned to incarceration. Of those returned to incarceration in 1994:

- 14% (471) were reincarcerated with a new sentence
- 16% (554) had their parole revoked for a non-criminal violation of parole
- 5% (158) were awaiting a revocation hearing
- 20% (674) had charges pending

| 1994 | 3,336 | 2,051 | 873 | 136 | 276 |

- Data not available.

a Discretionary parole entries are persons entering because of a Board of Parole decision.

b Mandatory parole entries are persons who were released from prison either as a result of a decision by the Parole Board or having reached the point in the service of their sentence at which time they must be released by law.

c Reinstatement entries are persons returned to parole supervision after 1) a revocation hearing in which no parole violation was sustained (proven), or 2) revocation of parole was not deemed appropriate by the Board of Parole.

d Consists of 'other' types of entries to parole such as: parole/reparole grants with administrative status, to consecutive sentences and to detainers.

Caseload

Inmates who are released from prison are placed in one of three parole units: General Supervision, Young Adult, or Special Supervision. The majority of parolees are placed under General Supervision. All parolees convicted under the Youth Rehabilitation Act (YRA) are placed in the Young Adult Unit. YRA applies to an individual younger than age 22 years of age who is convicted of a crime other than murder. Adults who fall within this age group but were not convicted under YRA can also be placed in this unit. The Special Supervision Unit is for parolees that require an intensive level of supervision. Inmates with mental health problems and, since 1993, sex offenders are placed in this unit.

As of December 31, 1995, the General Supervision Unit consisted of three sub-units with a total of 21 parole officers. The Young Adult and Special Supervision Unit each had five parole officers. When looking at the active population only, the average caseload for each unit was as follows:

- 195 parolees per parole officer in the General Supervision Unit
- 109 parolees per parole officer in the Young Adult Unit
- 63 parolees per parole officer in the Special Supervision Unit

The number of parole officers has remained relatively stable – at an average of 31 – over the years. However, the number of parolees on active supervision increased 26% between 1990 and 1994 (Table 31).

Summary and Discussion

On December 31, 1994, there were 6,574 adults on parole (or 1,458 adults per 100,000 adult residents). Males outnumbered females on parole supervision. Similarly, adults on parole were more likely to be black than white.

For each year, discretionary parole entries were the most common form of release from incarceration to parole. Of those on parole in 1994, 69% were on active supervision.

In 1994, an estimated 55% of all adults on parole had their parole revoked and were returned to incarceration. Fourteen percent were reincarcerated with a new sentence and 20% had charges pending.

As mentioned in the previous chapter, while overall prison admissions have declined recently, parole violators comprise an increasing proportion of prison admissions.

This can be attributed, at least in part, to the overwhelming parole caseload that makes it virtually impossible to adequately supervise parolees. The steady growth of parolees in recent years has not been matched with increases in the number of parole officers, which have remained the same for many years.

- District parole officers have caseloads as high as 195 parolees

Unlike other jurisdictions, District parole officers do not carry guns and do not have arresting authority. These factors seriously limit their ability to monitor and enforce parolees' compliance with conditions of parole. Furthermore, offenders on parole can feel little compulsion to comply with conditions of parole, and feel secure that their violations are as likely as not to go undetected. ♦

GANGS IN THE DISTRICT

The role of gangs and drugs cannot be underestimated in the climate of violence in urban areas and especially among youth. While the use of certain drugs may be declining, drug trafficking is still a prominent factor in the proliferation of violence among youth and is the basis upon which many local gangs are formed. District gangs may be more loosely organized and smaller than gangs long-established in other cities, but they have quickly become a primary concern for law enforcement and communities as gang-related killings and other crimes have become a common occurrence.

Until recently, District officials did not consider the city to have gangs. Given the understanding of gangs as structured organizations with symbols, colors, established rules and traditions, District "gangs" were previously classified as "crews" because they were loosely organized and did not engage in serious criminal activity. In the Federally-sponsored *1988 National Gang Survey*, the District responded as having no gang-related crime problem. And, it has only been in recent years that the term "gangs" has been used by public officials and the media to refer to organized youth-based crime groups in the District.

Criminal gangs are heavily involved in the drug trade and are becoming increasingly mobile as they expand their trafficking networks. Many gangs franchise drug sales by providing contacts and weight quantities of drugs to local gangs who handle the street-level sales. Criminal drug gangs actively recruit youth to work as carriers and street-level sellers and gradually involve them in gang activities.

In the District, the Metropolitan Police Department (MPD) operates a violent gang management information system in conjunction with the Department of Corrections (DOC). MPD's Violent Gang Task Force maintains a database on persons identified as involved in gang activities, characteristics of gangs and detailed information

on gang activities and movements. DOC receives and processes prisoners who are members of gangs and must be apprised of gang affiliations in order to properly place prisoners within the various DOC facilities. To this end, MPD and DOC have established an electronic data sharing system whereby MPD provides new data to DOC on offenders entering the correctional system and DOC provides updates to MPD of relevant information on gang members, person's visiting gang members, gang-related activities in prison and new rivalries that may transfer out of the institution and onto the streets once inmates are released. MPD and DOC also work closely with the Federal Bureau of Investigation and other Federal, state and local agencies to exchange information and coordinate anti-gang strategies and activities.

While it is obvious that criminal gangs present a substantial challenge to our criminal justice system, it is a difficult problem to quantify, largely because there is no standard definition for the term "gang." As a result, statistics regarding gang members and gang-related crimes are inconsistent. When referring to criminal gangs, DOC uses the term "security threat group" which is defined as "two or more inmates working in concert to promote violence, escapes, criminal activity and/or pose a substantial threat to the safety, security and orderly operation of the institution/system and the community."

The database is used not only to help identify, but also to validate gang membership. Identifying gang members throughout the criminal justice system involves using information from other agencies, court records, media reports, group photographs, known associations, criminal history and confidential informant, among other sources. Information such as gang symbolism, slang, tattoos, publications and clothing which is unique and specific to a certain group are used to identify individual members, suspected members and associates.

Persons identified as suspected gang members are investigated, and the information gathered during the investigation is applied to a formal validation process. Indicators of gang involvement are assigned a numerical weight. When suspects reach a pre-determined numerical score, they are validated as either gang members or associates. Validated members are identified as persons who function within the core group of members and have met all of the membership requirements of the group. Associates are defined as persons who, while not validated members of the gang, assist the gang in criminal activities.

There are an estimated 70 criminal gangs identified with ongoing criminal behavior in the District. Within these gangs, there are approximately 1,000 members. There exist at least an additional 100 loosely organized non-criminal gangs comprised mostly of juveniles.

Some non-criminal gangs begin to create an internal structure similar to criminal gangs. Within the structure of the criminal gang, there is a leader and each member is given a responsibility within the gang (e.g., money laundering, drug distribution, etc.). Once this internal structure and leader have been established and criminal activity has been documented, the gang is recognized as criminal. Some of the gangs identified in the Washington Metropolitan area gangs include:

- | | |
|-------------------|--------------------|
| P St. Crew | U of 58th Crew |
| R St. Crew | Lorton Morton Crew |
| 5 n O Crew | Newton St. Crew |
| LeDroit Crew | 1st & Seaton Crew |
| Lynch Mob | 1st & Kennedy Crew |
| Orange St. Crew | La Raza |
| 1st n O Crew | LA VIII |
| Ivy City Crew | Vatos Locos |
| Trinidad Mob | La Nueva |
| Brown Union | 22 Crips |
| Ninja Crew | Latin Kings |
| Edgewood Crew | Fuk Ching |
| New York Posse | 187 |
| Alabama Ave. Crew | Simple City |
| Montana Crew | |

Once a gang and gang members have been identified and validated, an assessment is made of the nature and degree of threat posed by the gang. Authorities also monitor gang activity through ongoing surveillance and information sharing. This forms the basis for the management strategies undertaken by MPD, DOC and other law enforcement agencies.

Only a small proportion of the population is responsible for the vast majority of serious criminal activity on the streets of the District and in the prison system. Once the gang tracking system becomes fully operational, it will provide significant support for anti-gang activities and will allow MPD and DOC to focus resources where they will have maximum impact on gang-related crime and violence. ♦

JUVENILE JUSTICE

The District's Juvenile Justice Process

Youth involved in delinquent or criminal activity may come to the attention of authorities by being apprehended at the scene of a crime or identified as suspects by witnesses. They also may be reported for incorrigibility or other status offenses by school personnel, family, neighbors or others. The police officer who apprehends a youth may elect to reprimand him if no further action is necessary. Diverting a youth involves referring him for additional services to the Commission of Social Services of the Department of Human Services (DHS). If the youth is to be referred to court, the Youth Division of the Metropolitan Police Department is notified.

The Youth Division first takes the youth for initial intake to the District of Columbia Superior Court (DCSC). Initial screenings are conducted by the Superior Court intake staff and involve a review of the youth's social and criminal history, family situation and circumstances pertaining to the charge. Based on this information, the youth is released to the custody of his parents or guardian pending an initial hearing the next day or is detained for an initial screening. Youth who are court-ordered to secure placement are required to undergo judicial review prior to release from detention.

After the initial screening, the probation officer assigned to the case reviews all information gathered during the initial screening, interviews the youth and the parents or guardians when possible and contacts pertinent members of the community who may provide additional information. The probation officer then delivers a recommendation on whether or not to petition the case to the Office of the Corporation Counsel and prepares a report to be presented at the new referrals hearing. The probation officer's report also provides recommendations for pretrial status, which may include pretrial detention, shelter care, community-based

placement or release to the custody of parents or guardians pending trial.

The Assistant Corporation Counsel (ACC) conducts a screening and investigation of all cases recommended to DCSC concerning juveniles. The results of these screenings and investigations are considered jointly with the recommendations of the DCSC's Social Services Division (SSD) before the final decision is made to file the petition with the court. The ACC reviews the detention decision made in cases of juveniles accused of committing serious crimes and can make a recommendation to waive Juvenile Branch jurisdiction and have the case continue through the adult criminal justice system.

Cases may be "no papered" if the SSD and the ACC determine that the case is not suitable for prosecution, whereby the case is closed and the youth is released without further court action. If the decision is made to file the petition, the case is forwarded for an initial hearing in the new referrals court. The ACC may file for a dismissal of petition papers at any time during the proceedings up to the trial.

The new referrals hearing is held before a judge for juveniles who have been detained pending an initial court appearance. This hearing involves a presentation of the petition and the substance of the charges to the youth, parents and the attorney; the response to the charges; and the court determination of probable cause indicating that the juvenile committed the offense. If the court determines that there was probable cause, the judge then sets the level of supervision or custody the youth will receive while awaiting a trial date. The judge reviews the recommendation of the SSD or DHS and the ACC and considers any previous court involvement in making his determination. If detention is warranted, the court specifies the level of detention or delegates that responsibility to DHS. Youth detained pending trial must be scheduled for trial within a 30-day

period. Youth detained pending trial may be placed in either secure or non-secure settings. Youth held in maximum security are placed at Oak Hill, a facility operated by DHS. Other alternatives include community-based group homes, therapeutic foster care and other community placements.

The initial hearing is held within ten days of their arrest for juveniles who are released to the custody of their parents or guardians. If probable cause is determined after a review of evidence by the hearing officer and the ACC, release conditions, a trial date and appointment of counsel are set.

When a case proceeds to trial, the case is heard before a judge. There is no right to jury trial for juveniles in the District of Columbia. If the allegations in the petition are determined to be true, the court orders preparation of an in-depth social summary prior to the disposition of the case. If the verdict is acquittal, the juvenile is free from any further supervision of the court.

The pre-disposition investigation is conducted by the SSD. This investigation is the basis for the social summary and may include physical and mental health examinations. The purpose of this investigation is to determine the circumstances influencing the juvenile's behavior in order to arrive at an appropriate disposition.

The judgment entered at the disposition includes the plea, the findings, the adjudication and the dispositional order. Juveniles who are identified by the court as significant probation risks are committed to the Youth Services Administration of DHS and are institutionalized or placed in alternative care.

If the court decides in favor of probation, the youth continues his involvement with the SSD, which provides counseling and supervision for the youth until the court requests a case review or immediate court release.

Juvenile Law Enforcement

There were 3,756 juveniles arrested in 1994 – 1,374 or 37% for Part I offenses and 2,382 or 63% for Part II offenses (Table 33, Figure 6). After nearly doubling between 1986 and 1987, when the police began including in arrest statistics juveniles released without being charged or referred to court, arrests peaked in 1988 (6,627) and then began to decline in 1989.

TABLE 33
JUVENILE ARRESTS FOR PART I AND PART II OFFENSES
1985 - 1994

| Year | Part I | Part II* | Total |

FIGURE 6
PART I AND PART II JUVENILE ARRESTS
1985 - 1994

From 1990 to 1994, juvenile arrests for Part I offenses decreased by 36% (2,144 to 1,374) and arrests for Part II offenses decreased by 23% (3,108 to 2,382) (Table 33). Compared to 1993, the number of juveniles arrested for Part I offenses decreased by 23% and Part II arrests decreased by 19%. The number of juveniles arrested for Part I and Part II offenses as a percentage of the total number of arrests has generally decreased in the past ten years. In 1985, Part I offenses accounted for 62% of total arrests; in 1990, 41%; and in 1994, 37%.

There were 717 juveniles arrested for violent offenses in 1994 (Table 34). This represents

13% less than in 1993. An estimated 55% of juvenile violent crime arrests were for aggravated assault.

There were 657 juvenile arrests for property crimes in 1994. This is 32% lower than in 1993. Of these, close to 70% of juvenile arrests were for motor vehicle theft.

Of Part II offenses, an estimated 25% of juveniles were arrested on drug charges, 20% for being a fugitive and 18% for disorderly conduct (Appendix C, Table A-4).

Juvenile Violent Crime

Compared to ten years ago, juvenile arrests for violent crime decreased by 27% (Table 34).

From 1993 to 1994, arrests for violent crime decreased by 13%. In greater detail:

- Homicide arrests increased by 464% from 11 in 1985 to 62 in 1994. They increased more than 100% from 30 in 1993
- Robbery arrests increased by 7% from 233 in 1985 to 250 in 1994. Compared to 1993, arrests for robbery increased by 5% from 237 to 250
- Assault arrests decreased by 24% (518 to 396) from 1985 to 1994. In 1994, arrests for assaults decreased by 25% from 1993 when arrests peaked at 528

JUVENILE CURFEW

The District's Juvenile Curfew Act (D.C. Act 11-90) was enacted in July 1995 in an effort to combat the increase in juvenile violence, gang activity and crime. Since that time, no juveniles have been arrested for violating it, though police pick up an average of one juvenile per night.

The curfew prohibits juveniles ages 16 and younger from being in public places from

11:00 p.m. to 6:00 a.m. on school nights and midnight to 6:00 a.m. on Friday and Saturday nights. The District currently operates one detention center to handle curfew violators.

Though the curfew is being enforced, it is being legally challenged by the American Civil Liberties Union on grounds that it violates constitutional rights. Arguments are scheduled to be heard in the spring of 1996.

TABLE 34
JUVENILE ARRESTS FOR CRIME INDEX OFFENSES
1985 - 1994

| Year | Crime Index Arrests | Violent Crime Arrests | Property Crime Arrests | Homicide | Rape | Robbery | Assault | Burglary | Larceny | Motor Vehicle Theft | Arson |

Prepared by: National Council on Crime and Delinquency

Juvenile Property Crime

Compared to 1985, juvenile arrests for property crime decreased 55% from 1,457 to 657 in 1994 (Table 34). The number of arrests steadily increased by 22% between 1985 and 1988 and then decreased by 63% from 1988 to 1994. In greater detail:

- Burglary arrests decreased 86% (374 to 52) between 1985 and 1994. However, in 1994 arrests for burglary increased by 6% from 49 in 1993
- Larceny arrests decreased 59% (343 to 141) from 1985 to 1994. Compared to 1993, the number of arrests decreased by 25% from 189 to 141
- Auto theft arrests decreased 36% (725 to 462) between 1985 and 1994. In 1994, arrests decreased 37% from 729 in 1993
- Arson arrests have decreased dramatically by 87% (15 to 12) from 1985 to 1994. Since 1990, arson arrests have remained at about 2

Juvenile Drug Arrests

Between 1990 and 1994, juvenile arrests for drug offenses generally declined (Table 35, Figure 7). The total number of juvenile drug arrests in 1994 is 45% lower than the 1,068 arrested in 1990. The majority (92%) continued to be arrests for sales rather than possession offenses.

The majority of juvenile drug arrests were for sale or possession of opium/cocaine derivatives (Appendix C, Table A-11). There were 357 arrests for opium/cocaine sales in 1994, comprising 66% of total arrests for sales offenses. Ninety-three percent of arrests for possession were also for opium and cocaine offenses.

TABLE 35

PERCENT OF JUVENILE DRUG ARRESTS FOR SALES AND POSSESSION*
1990 - 1994

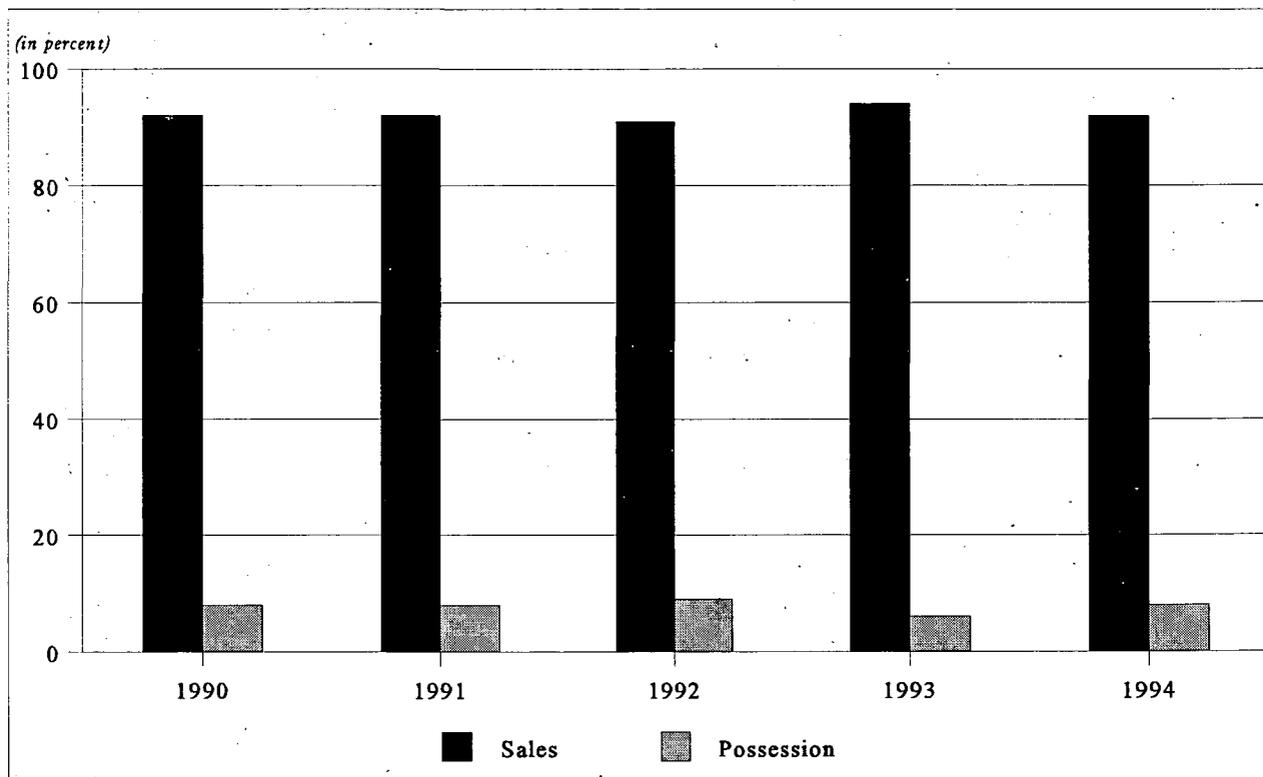

| Year | Total Number of Drug Arrests | Percent Sales | Percent Possession |
|------|------------------------------|---------------|--------------------|
| 1990 | 1,068 | 92% | 8% |
| 1991 | 935 | 92% | 8% |
| 1992 | 451 | 91% | 9% |
| 1993 | 781 | 94% | 6% |
| 1994 | 587 | 92% | 8% |

FIGURE 7
JUVENILE DRUG ARRESTS
1990 - 1994

Juvenile Drug Use

There were 3,184 drug tests administered to juvenile arrestees in 1994. This was 20% less than in 1990 and 2% less than in 1993 when there were 3,126 (Table 36, Figure 8). Unlike the steady proportion of adult arrestees testing positive for drug use, the number of juvenile arrestees testing positive has steadily and dramatically increased in recent years. In 1994, 55% of juveniles tested positive for drug use. This is an increase from 43% in 1993 and a substantial increase from 16% in 1990. For the first time since testing began in 1986, the proportion of juveniles testing positive for drug use surpassed adults, of whom 49% tested positive.

By far, the drug of choice among juveniles was marijuana (Table 36). In the past five years, juvenile use of marijuana has skyrocketed, steadily increasing from 6% testing positive in 1990 to 52% in 1994. Marijuana has outranked cocaine as the drug of choice since 1991, when 11% tested positive.

Cocaine was the drug of choice among juveniles when testing began between 1986 and 1990. Cocaine use peaked 1988 when crack cocaine was driving the drug trade, but has experienced a steady decline since then: 22% of juveniles tested positive for cocaine use in 1988 compared with 5% in 1994.

PCP use among juveniles has also increased significantly in recent years. After a dramatic fall from 27% testing positive in 1987 to 1% in 1990, PCP use has risen sharply to 17% in 1994.

Most of the drug use among juveniles is in the form of "blunts" – hollowed-out cigars filled with marijuana. The common practice of adding

PCP to marijuana in blunts may account for the tandem increases in use of these drugs.

Juvenile females are less prone than males to use drugs. An analysis of positive test results by sex shows that, in 1994, 23% of juvenile females and 57% of juvenile males tested positive for opium use. For marijuana, 7% of females and 18% of males tested positive (Appendix C, Table A-12).

Use of drugs among juveniles increases with age. Eighty-five percent of arrested juveniles between ages eight and 12 were drug-free. Of the 117 tested, 3% were positive for PCP use and 14% for marijuana use. Of juveniles ages 13 and 14, 9% were positive for PCP and 37% for marijuana use. Of juvenile ages 15 and 16, 16% were positive for PCP and 55% for marijuana use. Of those tested who were age 17, 23% tested positive for PCP and 61% for marijuana use (Appendix C, Table A-13).

Juvenile Prosecutions

In 1995, 2,613 juvenile cases were petitioned to the Office of the Corporation Counsel (Table 37). Among Part I offenses, petitions for motor vehicle theft were the most numerous, with 352 petitions which comprised 50% of Part I offenses. For Part II crimes, drug offenses accounted for 30% (570) of Part II petitions and simple assault accounted for 27% (507) in this category. There were 1,380 juvenile cases that were not petitioned. Of Part I cases not petitioned, 274 or 64% were for motor vehicle theft.

Juvenile Dispositions

There were 2,304 juveniles adjudicated in 1995 (Table 38), which was 12% less than in 1990. The outcome of juvenile adjudications are as follows:

- Guilty either by trial or plea decreased from 40% (1,063) in 1990 to 36% (824) in 1995
- Dismissals increased from 41% (1,084) in 1990 to 57% (1,305) in 1995
- Consent decrees decreased from 17% (443) in 1990 to 6% (135) in 1995

Juveniles who commit a status offense are referred to as persons in need of supervision (PINS). These status offenses are considered law

violations only if committed by a juvenile. Such behavior includes running away from home, truancy, underage drinking, ungovernability (beyond control of parents or custodians) and curfew violations.

In 1995, there were 185 PINS cases resolved, representing a 172% increase from 1990. The outcomes of resolved PINS cases are as follows:

- Guilty outcomes increased numerically, but decreased proportionally from 44% (30) in 1990 to 28% (52) in 1995
- Dismissals increased from 51% (35) in 1990 to 59% (110) in 1995
- Consent decrees increased from 4% (3) in 1990 to 12% (23) in 1995

TABLE 38

Juvenile Offender Profile

Age and Sex

Males constituted 81% of total juvenile arrests (79% of Part I arrests, 77% of Part II arrests and 96% of arrests on drug charges) (Table 39).

Youth ages 15 and 16 comprised 44% of the arrested juvenile population (41% for Part I and 46% of Part II assets). Juveniles ages 15 and 16 comprised the largest proportion arrested on drug charges with 281 or 48% followed by juveniles age 17 with 250 or 43%. Less than 1% age 12 or younger was arrested on drug charges.

Criminal History

Of all juvenile offenders in 1994 (3,189), 49% (1,548) were arrested for the first-time (Table 40). The age at arrest for first-time offenders in 1994 is as follows:

- 36% of females compared to 25% of males were ages 12 to 14
- 48% of females compared to 47% of males were ages 15 to 16
- 14% of females compared to 22% of males were age 17 or older

When comparing male and female offenders in 1994, males were more likely to have one or more prior arrests. Fifty-six percent (1,426) of males had a prior arrest compared to 34% (215) of females. Of those with prior arrests, about 1 out of 2 male (715) and 1 out of 4 female (52) offenders had three or more arrests.

The age at arrest for juveniles who had prior arrests is very similar to the age of first-time offenders. The age at arrest for rearrestees is as follows:

- 33% of females compared to 14% of males were ages 12 to 14
- 48% of females compared 55% of males were ages 15 to 16
- 19% of females compared to 30% of males were age 17 or older

Between 1990 and 1994, the percent of male offenders who had one or more prior arrests remained relatively stable. However, the percent of female offenders who had one or more prior arrests increased from 28% in 1990 to 34% in 1994.

TABLE 39

JUVENILE PART I, PART II and DRUG ARRESTS BY SEX AND AGE

| | Part I | Part II | Drugs* | Total |
|--------------|--------------|--------------|------------|--------------|
| Sex | | | | |

Prepared by: National Council on Crime and Delinquency.

Summary and Discussion

The District's patterns in crime do not mirror the national phenomena of separate and opposing trends for overall and juvenile crime. Nationally, from 1990 to 1994, the overall crime rate declined 3% and the overall murder rate declined very slightly (1%). The number of adults (older than age 25) arrested for homicide declined by 18% and young adults (ages 18 to 24) rose a mere (2%). For juveniles (ages 14 to 17), arrests increased by 22%.¹

In the same time period, the District's overall crime rate also declined (4%), violent crime stabilized; homicide declined by 16% and there were 26% less arrests. Unlike the national trends for juveniles, in the District there have been more dramatic decreases than are evident for the overall criminal justice population. Juvenile arrests decreased dramatically from 1990 to 1994 for overall crimes (37% for Part I and 23% for Part II), violent crimes (5%), as well as homicides (10%). These data stand in stark contrast to national trends.

Arrests of those younger than age 18 began to decline in 1989. There were 28% more juveniles arrested in 1990 than in 1994. There were 21% less juveniles arrested in 1994 than in 1993. Arrests for Part I offenses in 1994 were the lowest in ten years.

Of Part I violent offenses in 1994, the majority of juvenile arrests were for aggravated assault, comprising 55% of arrests in this category. Of Part II property offenses, the majority of juveniles were arrested for drug charges than any other offense, followed by those arrested on fugitive charges.

There were 13% less juveniles arrested for violent crimes in 1994 than in 1993. While arrests for robbery have increased since 1993, arrests for all other violent crimes have decreased. There were 32% less juvenile arrests for property crimes in 1994 than in 1993. Arrests for burglary and arson increased since 1993, but all other property crimes decreased.

In recent years, there have been some notable changes in patterns for juvenile drug use. Juvenile arrests for drug crimes were the lowest in five years – 45% less than in 1990 and 25% less than in 1993.

The percentage of youth testing positive for drug use was 55% in 1994, surpassing adults for the first time since testing began in 1986. This compares with 43% positive in 1993 and 16% positive in 1990. Juvenile use of marijuana escalated from 6% in 1990 to 52% in 1994. Marijuana replaced cocaine in 1991 by a narrow margin as the drug of choice among juveniles and has been the drug of choice for four years consecutively. PCP use also increased dramatically from 1% in 1990 to 17% in 1994.

Motor vehicle theft comprised 51% of juvenile prosecutions for Part I offenses. Drug offenses accounted for 31% of Part II offense prosecutions. Juvenile dispositions resulting in findings of guilt continued to decrease, declining 22% from 1990 to 1995. Conversely, juvenile delinquency cases ending in dismissal in 1995 were the highest in six years.

¹Crime in the United States – 1994, Uniform Crime Reports, Federal Bureau of Investigation.

PINS cases resolved in findings of guilt increased numerically, but not proportionally between 1990 and 1995. During this time, the number of cases found guilty increased from 30 to 52, but decreased relative to the total from 44% to 28%. PINS cases were more likely to be dismissed in 1995 than in 1990. Dismissals increased 214% during this time.

Forty-nine percent of all juvenile offenders in 1994 were arrested for the first time. Of those arrested for the first time, 36% of females were between the ages of 12 and 14 and 48% were between the ages of 15 and 16. Twenty-five (25)

percent of males were between the ages of 12 and 14 and 47% were between the ages of 15 and 16.

Males were more likely than females to have prior arrests. Fifty-six (56) percent of males compared to 34% of females had one or more prior arrests. Of those who had prior arrests, 33% of females were between the ages of 12 and 14 and 48% were between the ages of 15 and 16 when arrested. Approximately 55% of males were between the ages of 12 and 14 and 30% of males were 17 years or older when arrested. ◆

APPENDIX A

OFFENSE DEFINITIONS

Reported offense data throughout the United States focus primarily on the eight major offenses defined by the Federal Bureau of Investigation (FBI) as Crime Index offenses, or Part I offenses. These offenses are further divided into two groups: violent offenses, which include homicide, rape, robbery and aggravated assault; and property offenses, which include burglary, larceny, motor vehicle theft and arson. Part II offenses encompass all other crime classifications outside those defined as Part I offenses.

In selecting the crimes to be included in the Crime Index, the FBI considers several factors. The seriousness of the crime and frequency of occurrence serve as indicators of the nation's crime experience. While there are differences in criminal status for given crimes in different jurisdictions, all crime index offenses are fully defined and a single definition for each of the chosen offenses was developed to ensure measurable crime data. These categories of offenses were devised and adopted in order that law enforcement, judicial and penal statistics might be uniformly compiled in terms of a single classification of offenses.

Part I Offenses

1. **Murder and Non-Negligent Manslaughter**

All willful felonious homicides as distinguished from deaths caused by negligence and excluding attempts to kill, assaults to kill, suicides, accidental deaths, or justifiable homicides. Justifiable homicides are limited to:

- (1) the killing of a felon by a law enforcement officer in the line of duty; and
- (2) the killing of a person in the act of committing a felony by a private citizen.

Manslaughter by Negligence

Any death which the police investigation established was primarily attributable to gross negligence of some individual other than the victim. (While Manslaughter by Negligence is a Part I crime, it is not included in the Crime Index).

2. **Forcible Rape**

The carnal knowledge of a female forcibly and against her will in the categories of rape by force and attempts or assaults to rape. Excludes statutory offenses (no force used, victim under age of consent).

3. **Robbery**

Stealing or taking anything of value from the care, custody, or control of a person by force, violence or intimidation, such as strong-arm robbery, stickups, armed robbery, attempts or assaults to rob.

4. **Aggravated Assault**

Assault with intent to kill or for the purpose of inflicting severe bodily injury by shooting, cutting, stabbing, maiming, poisoning, scalding, or by the use of acids, explosives, or other means. Excludes simple assaults.

5. **Burglary**
Housebreaking or any breaking or unlawful entry of a structure with the intent to commit a felony or a theft. Includes attempted forcible entry.
6. **Larceny-theft**
The unlawful taking, carrying, leading or riding away of property from the possession or constructive possessions of another. Thefts of bicycles, automobile accessories, shoplifting, pocket-picking, or any stealing of property or article which is not taken by force and violence or by fraud. Excludes embezzlement, "con" games, forgery, worthless checks, etc.
7. **Motor Vehicle Theft**
Unlawful taking or attempted theft of a motor vehicle. A motor vehicle is self-propelled and travels on the surface rather than on rails. Specifically excluded from this category are motorboats, construction equipment, airplanes, and farming equipment.
8. **Arson**
Willful or malicious burning with or without intent to defraud. Includes attempts.

Part II Offenses

1. **Other Assaults (Simple)**
Assaults which are not of an aggravated nature and where no weapon is used.
2. **Forgery and Counterfeiting**
Making, altering, uttering or possessing, with intent to defraud, anything false which is made to appear true. Includes attempts.
3. **Fraud**
Fraudulent conversion and obtaining money or property by false pretenses. Includes bad checks, except forgeries and counterfeiting. Also includes larceny by bailee.
4. **Embezzlement**
Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.
5. **Stolen property: buying, receiving, possessing**
Buying, receiving, and possessing stolen property.
6. **Vandalism**
Willful or malicious destruction, injury, disfigurement, or defacement of property without consent of the owner or a person having custody or control.
7. **Weapon: carrying, possessing, etc.**
All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Include attempts.

8. **Prostitution and Commercialized Vice**
Sex offenses of a commercialized nature and attempts, such as prostituting, keeping a bawdy house, procuring or transporting women for immoral purposes.
9. **Sex Offenses**
(Except forcible rape, prostitution, and commercialized vice). Statutory rape, offenses against chastity, common decency, morals, and the like. Includes attempts.
10. **Drug Abuse Violations**
Offenses relating to narcotic drugs, such as unlawful possession, sale, use, growing, and manufacturing of narcotic drugs.
11. **Gambling**
Promoting, permitting, or engaging in illegal gambling.
12. **Offenses Against the Family and Children**
Nonsupport, neglect, desertion, or abuse of family and children.
13. **Driving Under the Influence**
Driving or operating any motor vehicle or common carrier while drunk or under the influence of liquor or narcotics.
14. **Liquor Laws**
State or local law violations, except "drunkenness" (class 23) and "driving under the influence" (class 21). Excludes federal violations.
15. **Drunkenness**
Drunkenness or intoxication.
16. **Disorderly Conduct**
Breach of the peace.
17. **Vagrancy**
Breach of the peace.
18. **All Other Offenses**
All violations of state or local laws, except classes 1-25 and traffic.
19. **Suspicion**
No specific offense, suspect released without formal charges being placed.
20. **Curfew and loitering laws**
Offenses relating to violation of local curfew or loitering ordinances where such laws exist.
21. **Runaway**
Limited to juveniles taken into protective custody under provisions of local statutes. ♦

APPENDIX B LEGAL TERMS

Accused – A person who has been charged with committing a crime but has not yet been tried.

Acquittal – A decision made by a judge or jury that the accused was not proven guilty of committing the crime.

Appeal – To take a case to a higher court for review or retrial.

Arraignment – The initial court hearing at which the accused is brought before a judge, told the charges against him/her, and asked to enter a plea of guilty or not guilty.

Arrest – To take a person suspected of committing a crime into legal custody so that he/she can be charged and tried for committing the crime.

Bail/Bond – The amount of money set by a judge which allows the accused to go free until the trial. The purpose of bail is to ensure that the accused presents him/herself at court. The type of bail the accused pays is referred to as bond (see personal recognizance).

Charge – An accusation made against the accused that he/she committed the crime.

Continuance – A delay or postponement of a court hearing to another date or time.

Conviction – A decision made by a judge or jury that the accused is guilty beyond a reasonable doubt of committing the crime for which he/she has been tried.

Court – An agency of the judicial branch of the government with constitutional authority to decide questions of law and disputes brought before it.

Defendant – A person who has been charged with committing a crime and is now on trial (see accused).

Defense Attorney – The lawyer for the defendant/accused.

Dismissal – A decision by a judge ending a criminal case before ordering a trial.

Disposition – The final outcome of a case.

Evidence – Testimony and objects presented in court by the prosecutor and the defense.

Felony – A serious crime punishable by one year or more in a prison and/or a fine. Felonies include crimes such as murder, rape, burglary, and robbery.

Grand Jury – A group of 23 D.C. citizens who hear evidence presented by the prosecutor and decide whether or not there is enough evidence to charge and try the accused.

Guilty – A decision of a judge or a jury in a criminal case that the accused committed the crime with which he/she was charged.

Guilty Plea – A statement by the accused that he/she committed the crime.

Indictment – A written accusation made by a Grand Jury charging a person with committing a crime.

Investigation – The gathering of evidence by police and prosecutors to prove the accused committed the crime.

Judge – In the District of Columbia, a person appointed by the President of the United States to preside over a court of law.

Jury – A group of citizens who hear the evidence presented in court and decide whether the accused is guilty or not guilty.

Misdemeanor – A crime that is less serious than a felony and is punishable by one year or less in jail and/or a fine. Misdemeanors include offenses such as petty theft, most traffic violations, and possession of marijuana.

Mistrial – A trial that ends when the jury cannot decide whether the accused is guilty or not guilty, or a legal procedure is violated.

Motion – An oral or written request to the judge asking the judge to make a decision or take a specific action.

Nolo Contendere – “I will not contest it;” a plea to a crime that does not admit guilt, but has the same result as a guilty plea.

Not Guilty Plea – A statement by the accused denying that he/she committed the crime.

Offender – A person who has been convicted of a crime.

Parole – The supervised release of an offender from jail or prison before the end of his/her sentence.

Papering – The decision made by the prosecutor concerning whether or not there is enough evidence to file charges against the accused.

Perjury – A lie told while a person is under oath to tell the truth.

Personal Recognizance – The written promise, made by the accused to the judge, that he/she will return to court when ordered to do so; a frequent form of pretrial release in criminal cases in D.C.

Plea – A defendant's formal answer in court denying or admitting that he/she committed a crime.

Plea Bargaining – An agreement between the prosecutor and the accused that the accused will plead guilty.

Preliminary Hearing – A hearing to determine if there is enough evidence to hold the accused for a Grand Jury hearing.

Presentence Report – A report by the Social Services Division of the D.C. Superior Court describing the past behavior, family circumstances, and personality of the accused, as well as specific information about the crime committed. This report helps the judge determine the sentence (see Victim Impact Statement).

Probable Cause – The amount of proof needed by the police, the prosecutors, and the judge to believe that a crime was committed and that the accused committed it.

Probation – A court sentence allowing the accused to go free under the supervision of a probation officer.

Prosecutor – In a criminal case, the lawyer representing the government and the victim; in D.C. an Assistant U.S. Attorney or an Assistant Corporation Counsel.

Public Defender – An attorney employed by the D.C. government to represent defendants who cannot afford to pay for a lawyer.

Restitution – An order from the judge that requires the offender to pay the victim for damaged or stolen property or medical costs.

Sentence – The accused's punishment after being convicted of a crime.

Status Hearings – Court hearings to make sure that both the prosecution and defense are ready for trial.

Subpoena – A written order requiring a person to appear at a certain time to give testimony about the crime.

Suspect – A person who is thought to have committed a crime and is under investigation, but who has not been arrested or charged.

Testimony – Statements made in court by witnesses who are under oath to tell the truth.

Trial – A court proceeding before a judge or a jury at which evidence is presented to decide whether or not the accused committed the crime.

Verdict – The decision of the judge or jury at the end of a trial that the accused is either guilty or not guilty of the crime.

Victim – An individual against whom a crime, or an attempted crime, was committed. The family or close friend of an individual who was murdered.

Victim Impact Statement – A form used by the judge at the time of sentencing that allows victims to describe the physical, emotional, and financial impact of the crime on their lives and families.

Witness – A person who has seen or knows something about the crime. The victim is usually a witness too.

Witness Conference – A discussion between the victim, witness and the attorney to prepare for trial. ♦

APPENDIX C TABLES

TABLE A-1

**CRIME RATES FOR U.S. CITIES WITH POPULATIONS GREATER THAN 400,000
1994**

| City | Population | Crime Index Total | Rate per 100,000 Residents |
|--------------------------------|----------------|-------------------|----------------------------|
| Atlanta, GA | 411,204 | 66,280 | 16,118.5 |
| Baltimore, MD | 739,180 | 92,783 | 12,552.2 |
| Kansas City, MO | 439,089 | 55,112 | 12,551.4 |
| Tucson, AZ | 441,402 | 54,093 | 12,254.8 |
| Oklahoma City, OK | 461,271 | 55,374 | 12,004.7 |
| Detroit, MI | 1,022,283 | 121,827 | 11,917.2 |
| Portland, OR | 463,072 | 54,715 | 11,815.7 |
| District of Columbia | 570,000 | 63,144 | 11,077.9 |
| Seattle, WA | 540,268 | 57,905 | 10,717.8 |
| New Orleans, LA | 493,990 | 49,842 | 10,089.7 |
| Nashville, TN | 521,301 | 52,469 | 10,065.0 |
| Phoenix, AZ | 1,076,108 | 108,131 | 10,048.3 |
| Memphis, TN | 628,375 | 61,393 | 9,770.1 |
| Albuquerque, NM | 416,917 | 40,500 | 9,714.2 |
| Charlotte-Mecklenburg, NC (1) | 527,121 | 51,057 | 9,686.0 |
| Jacksonville, FL | 685,776 | 65,997 | 9,623.7 |
| Boston, MA | 556,724 | 53,078 | 9,534.0 |
| Dallas, TX | 1,062,677 | 100,707 | 9,476.7 |
| Fort Worth, TX | 472,288 | 43,400 | 9,189.3 |
| San Antonio, TX | 999,900 | 87,679 | 8,768.8 |
| Columbus, OH | 647,860 | 56,343 | 8,696.8 |
| San Francisco, CA | 741,568 | 61,860 | 8,341.8 |
| Milwaukee, WI | 628,737 | 51,241 | 8,149.8 |
| Austin, TX | 511,676 | 40,632 | 7,941.0 |
| Los Angeles, CA | 3,550,381 | 278,351 | 7,840.0 |
| Las Vegas MPD Jurisdiction, NV | 752,577 | 58,161 | 7,728.2 |
| Long Beach, CA | 446,383 | 33,614 | 7,530.3 |
| Cleveland, OH | 506,230 | 37,745 | 7,456.1 |
| Houston, TX | 1,758,016 | 128,079 | 7,285.4 |
| New York, NY | 7,336,224 | 530,120 | 7,226.1 |
| El Paso, TX | 565,183 | 40,465 | 7,159.6 |
| Denver, CO | 511,085 | 35,434 | 6,933.1 |
| Honolulu, HI | 880,687 | 60,825 | 6,906.5 |
| San Diego, CA | 1,168,785 | 76,725 | 6,564.5 |
| Philadelphia, PA | 1,560,576 | 100,417 | 6,434.6 |
| Virginia Beach, VA | 427,471 | 21,228 | 4,966.0 |
| San Jose, CA | 815,235 | 36,559 | 4,484.5 |
| Chicago, IL (2) | 2,802,494 | NA | NA |

(1) The Charlotte, NC, Police Department and Mecklenburg County, NC, Police Department merged into one department in 1994.

(2) Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the Crime Index total category.
