INTRODUCTION

This report presents key workload and performance statistics for each United States court of appeals and each district court for fiscal years 1969 through 1974. Each page contains a "statistical profile" for a single court and reveals such things as:

- total workload in terms of cases filed, terminated and pending
- the rate of increase in new filings over recent years
- the workload versus judge power ratio and how it compares with prior years and other courts
- the court's management problems — such as achieving better utilization of jurors or avoiding delays of triable criminal defendants
- the size of "old case" inventories
- the median time it is taking to dispose of cases
- the court's disposition rate and how it measures up to national norms
- the court's numerical standing with respect to each workload or performance index

Wherever appropriate, workload figures are in "per judgeship" terms obtained simply by dividing the court's total caseload figures by its authorized judgeships. This computation yields a double advantage. First, individual judges can match their experience against judge performance averages in their own and other courts, for both current and past years. Secondly, given this common denominator, caseload in different size courts can be compared — court size becoming almost irrelevant in the comparison.

On the last page are judiciary-wide caseload and performance averages for district courts. A similar national profile for courts of appeals is located on the last page of the circuit court section. The figures on these two pages can be regarded generally as helpful "norms" of federal judicial work at this time. However, in fairness, these averages should not be used to evaluate courts in which there are abnormal local circumstances such as long-term judgeship vacancies, an unusual number of long or difficult cases in process, or a relatively high number of senior judges augmenting regular judgeship strength.

Those who are familiar with past issues of this report will note several changes in the format and content of the "statistical profiles." These changes were made as an effort to provide more detailed information about the workload conditions of each court and to speed the publication of this report.

EXPLANATION OF PROFILES FOR UNITED STATES DISTRICT COURTS					
OVERALL WORKLOAD STATISTICS	Filings		TOTAL NUMBER OF DISTRICT COURT CASES WHICH WERE	Filed during the fiscal year, including transfers.	
	Terminations			Terminated during the fiscal year	
	Pending			Pending at the end of the fiscal year	
	Percent Change in Total Filings—Current Year	Over Last Yr	Percentage change in total filings — current year over previous		
		Over Earlier Yrs	Percentage change in total filings — current year over two, three, four, and five years ago		
Number of Judgeships			Authorized Judgeships (Does not include senior judges).		
ACTIONS PER JUDGESHIP	FILINGS	Total	ALL FIGURES IN THIS SECTION ARE OBTAINED BY DIVIDING THE TOTAL STATISTICS FOR THE COURT BY THE NUMBER OF AUTHORIZED JUDGESHIPS	Total civil and criminal cases filed	
		Civil		Includes all civil cases filed	
		Criminal		Includes all criminal cases filed whether by indictment, information, or transfer.	
	Pending Cases	Total pending cases at the end of the fiscal year			
	Weighted Filings	This figure is a mathematical adjustment of filings which gives heavier count to cases known to be of a more difficult and time consuming nature.			
	Terminations	Included all terminated cases, civil & criminal, tried and not tried, disposed of during the fiscal year.			
	Trials Completed	Total trials completed, including evidentiary trials, hearings on temporary restraining orders and preliminary injunctions.			
	MEDIAN TIMES (MONTHS)	From Filing to Disposition		Criminal	For all criminal defendants and all civil cases except land condemnation, habeas corpus, deportation reviews and motion to vacate, terminated during the year whether by trial or other disposition, this figure shows the time interval in months for the middle (median) case. When the District had less than 25 terminations the median case was not computed.
Civil					
From Issue to Trial (Civil Only)		For civil cases, except land condemnation, going to a trial during profile years, this figure shows the time interval in months for the middle (median) case.			
OTHER		Number (and %) of Civil Cases Over 3 Years Old		Total number of civil cases, except land condemnation, pending three years or more as of the end of the fiscal year and the percentage these same cases represent of total civil pending caseload.	
	Triable Defendants in Criminal Cases Over 1 Yr. Old Number (and %)		This figure excludes defendants which, though pending more than 1 year, are not triable for reasons such as being fugitive or mentally incompetent. It also excludes defendants already tried but not yet sentenced.		
	Vacant Judgeship Mos.		Number of months during profile year that an authorized judgeship was not filled.		
	Juror Usage Index		The number of jurors available per jury trial day.		
	% of Jurors Not Serving		Percentage of juror attendance days in which juror did not serve on any actual trials.		

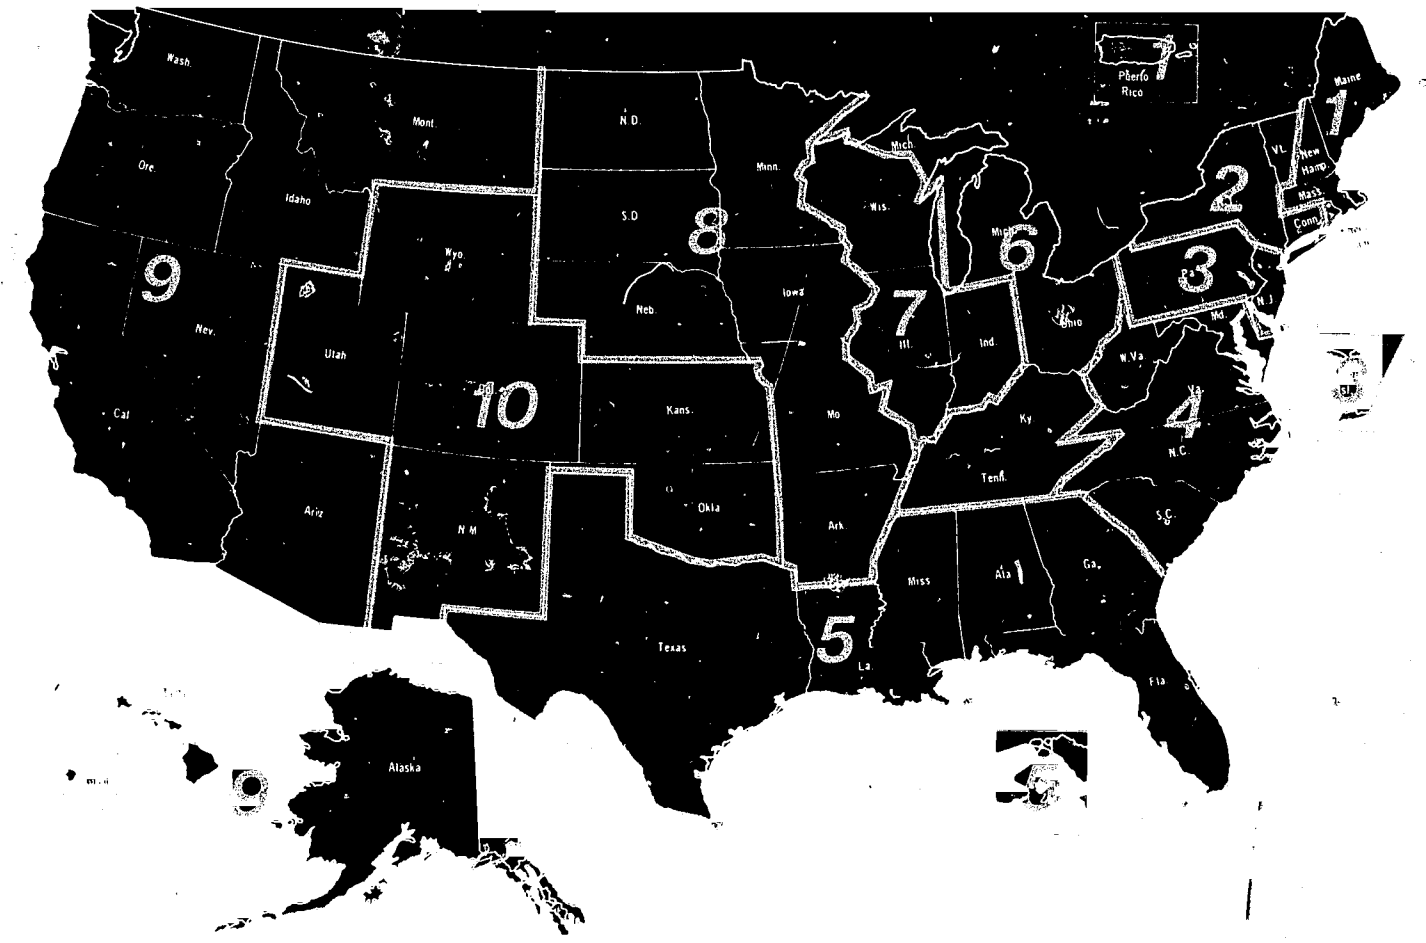

WHAT THE DISTRICT'S NUMERICAL STANDINGS MEAN

These show where a court's workload condition stands both in relation to other districts in the circuit and to all other districts in the country. All ninety-four districts have been mathematically arranged in a ranked order with respect to each of the indices of workload or performance found on the profile. For example, a given district — on a per judgeship basis — may have the nation's tenth highest number of filings but the 20th highest number of terminations and the 5th highest number of pending cases.

If there is a tie at a particular standing, then each of the tied courts receives the same standing designation. All "workload" statistics are ranked in descending order (highest value receives rank of 1) and all other statistics are ranked in ascending order (lowest value is ranked first). In some cases fewer than 94 courts were ranked because some of the "profile" indices are not available for all courts.

UNITED STATES COURTS OF APPEALS - NATIONAL STATISTICAL PROFILE

In order to provide a greater measure of uniformity in the presentation of judicial workload, the selection criteria for 1974 data was revised in respect to those cases considered terminated after oral hearing or submission. These criteria were the following:

1. filing of the complete record,
2. filing of briefs pursuant to Rule 28, Federal Rules of Appellate Procedure,
3. a reported date of either an oral hearing or submission, and
4. reported date of termination.

If a case reported terminated included the above data, it would be included in the "after hearing or submission" category. Any record deficient in any of the above would be included in the "without hearing or submission" group.
