**Crime in Arkansas, 1997**, is a report on crime, based on summary information submitted by law enforcement agencies as a part of the Arkansas Uniform Crime Reporting (UCR) program.

While this document is a comprehensive report on crime, it must be understood that it includes only the number of arrests and incidents known and reported by law enforcement agencies. It does not include any data relating to prosecution, adjudication or correction. Likewise, it does not attempt to draw any conclusions about the cause of crime.

UCR data pertains to the number of criminal events in specific geographic areas, rather than the effectiveness of agencies. It should not be used to evaluate or directly compare one agency to another.

In 1997, the overall index crime in Arkansas increased less than 1%, with violent crime going up nearly 1% and property crime going up .5%. The total number of arrests in 1997 increased 4% compared to 1996.

If the statistics in this report tell us anything, it is that we must continue to enhance our efforts. To effectively fight crime, the entire criminal justice community needs more funding and assistance. A high priority must be placed on dealing with crime, beginning with an overall awareness of the problem. This report is presented as an aid in the process.

# **The Uniform Crime Reporting Program In Arkansas**

---

## **Background**

Development of a national Uniform Crime Reporting (UCR) program began more than 60 years ago. In 1930, Congress authorized the FBI to collect crime statistics from local police departments. All information came from reports that law enforcement agencies routinely compile for their own efficient administration. The underlying philosophy of UCR is oriented toward law enforcement statistics for use by law enforcement agencies.

In an effort to obtain a complete picture of crime on a national level, data is collected on certain offenses that become known to police. Originally, this overview was obtained by examining seven offenses that were selected because of their seriousness, frequency of occurrence, and likelihood of being reported to police. These offenses, which make up the Crime Index, are murder and non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, theft, and motor vehicle theft. By congressional mandate, arson was added as the eighth index offense in late 1978.

To provide nationwide uniformity in the reporting of data, a set of standard definitions were written for specific criminal acts. This standardization was necessary to overcome the variation in definitions from state to state. Reporting agencies are required to submit their data in accordance with the UCR definition of offenses. Because of the variance in punishment for the same offenses in different states, it is not possible to distinguish between felony or misdemeanor crimes in the UCR program.

In the 1970's, the FBI actively assisted individual states in the development of state-operated UCR programs compatible with the national system. With a state UCR program, data is more readily available for use by the state, and the FBI ceases collection of data directly from individual law enforcement agencies within the state. Instead, compiled information from all reporting agencies is forwarded to the national program by the state program. State programs also provide more direct and frequent contact with local agencies, assuring more completeness and quality of information provided by them.

On January 1, 1974, the Arkansas Crime Information Center began collecting monthly UCR data in our state. The following year, Act 742 of 1975 was approved, which included a section making the reporting of UCR data to ACIC mandatory for law enforcement agencies in Arkansas.

---

## **Purposes of the Arkansas UCR Program**

Information from the UCR program provides a picture of reported crime in Arkansas. It should be an important tool in making effective management studies and decisions.

While there are many purposes and objectives of the Arkansas UCR program, the primary goals are:

1. To collect, verify, and analyze information on crime reported by law enforcement agencies in Arkansas.
2. To provide data back to law enforcement administrators for use in operational planning and assessments.
3. To give an overview of crime, its magnitude and trends, and to provide this information to the Governor, the Legislature, and to the general public.
4. To develop base data and statistics for use in improving the efficiency, effectiveness, and performance of the Arkansas criminal justice system.
5. To provide the FBI with complete UCR data to be included in the national crime reports.

## **Reporting Procedures**

The Arkansas UCR program utilizes a "summary" reporting procedure. Law enforcement agencies are responsible for compiling their own crime figures and submitting them once a month to ACIC.

A good record-keeping system is necessary for the effective operation of any law enforcement agency. This record system is the source of statistics on crime. Agencies are furnished training in scoring and classifying offenses, in use of tally books, and in procedures for completing the reporting forms. ACIC will also make basic records, forms and technical assistance available to any agency.

On a monthly basis, law enforcement agencies report the number of offenses that become known to them during the month. This count is taken from the complaints received by the agency from victims, other sources or as discovered by officers. Whenever complaints of a crime are determined through investigation to be unfounded or false, they are eliminated from the count. The number of "actual offenses known" are reported to ACIC without regard to whether anyone is arrested for the crime, any stolen property is recovered, or any other restrictive consideration. Law enforcement agencies also report the total number of these crimes which they clear by either arrest or exceptional means. To supplement the offense information, data is reported on the value of property stolen and recovered, circumstances surrounding homicides, additional information concerning assaults on police officers and other pertinent information.

In addition to offense information, reports on the number of persons arrested on all criminal offenses are collected. These reports provide age, sex and race information, with the adult and juvenile arrests separate. Names of the individuals arrested are not included in the UCR program.

## **Arkansas Crime Index**

The Crime Index is used as a basic measurement of crime. It is the figure which is often publicized by the news media and which is widely used to assess the level of crime in a given location. Many of the figures presented in this report indicate the volume, fluctuations and distribution of crime in Arkansas on the basis of this Crime Index. The eight offenses making up the Crime Index are:

1. Murder
2. Forcible Rape
3. Robbery
4. Aggravated Assault
5. Burglary
6. Theft
7. Motor Vehicle Theft
8. Arson

These crimes were selected for use as an "index" due to their serious nature, their frequency of occurrence and the reliability of reporting from citizens to law enforcement agencies. The Crime Index is the total number of index crimes that come to the attention of law enforcement.

In reviewing crime index figures, the reader should keep in mind that there is currently no way of determining the total number of actual crimes committed. The Crime Index has been established to measure only the instances of crime which come to the attention of law enforcement agencies.

*Violent crime* refers to events such as murder, rape, and assault that may result in injury to a person. Robbery is also considered a violent crime because it involves the use or threat of force against a person.

*Property crimes* are unlawful acts with the intent of gaining property, but do not involve the use of threat or force against an individual. Theft, burglary, motor vehicle theft, and arson are examples of property crimes.

In UCR, an offense is considered to be *cleared* (solved) when at least one offender is arrested. The arrest of one person can clear several crimes, or several persons may be arrested in the process of clearing one crime. Offenses may also be cleared by exceptional means when the offender commits suicide; makes a dying declaration; confesses while in custody or serving time for another crime; is prosecuted in another jurisdiction for the same offense; when the victim refuses to prosecute or another jurisdiction refuses to extradite. When examining clearance data, keep in mind that not all crimes are cleared within the calendar year in which the offense occurs. Also note that the recovery of property stolen with regard to a specific offense does not, by itself, constitute a clearance for UCR purposes.

The *Crime Rate* is one of the most quoted crime statistics and is based on the number of Index Crime per 100,000 population.

## **Data Comparisons and Limitations of UCR**

While UCR is the best source of crime statistics available at the present time, it has been subject to much criticism during its history. Some of these criticisms may be valid. However, the criticism is softened when it is remembered that the program was developed to furnish information for use primarily by law enforcement agencies.

The obvious tendency with a publication of this kind is to make comparisons of data between jurisdictions, whether they be between agencies, or counties, or regions. Caution should be exercised for the many reasons which should be apparent as the reader continues through this publication. Comparisons may not be appropriate because of the great variety of factors which affect the extent and fluctuation of crime. Such factors are not taken into consideration in either raw data or crime rates. All crimes are considered "equal" in computing crime rates. One theft affects a crime rate the same as one murder.

The Uniform Crime Reporting program is designated to measure offenses reported and persons arrested. Difficulty will arise if this distinction is not kept uppermost in mind. Crime relates to events, but arrest relates to persons, and this is not a one-to-one correspondence. While UCR is the best information available, no claim is made that they represent "all crime".

## **Summary**

The information in this report portrays the most accurate and realistic assessment available on the crime situation in Arkansas. ACIC is grateful for the participation of the law enforcement agencies that contributed data each month, without which this publication would not be possible.

Individuals using these tabulations are again cautioned against drawing conclusions by making direct comparisons between agencies. Numerous factors affect the amount and type of crime from place to place. More valid use can be made of these figures by determining deviations from state averages or through comparisons with averages for similar population groups.

It is important to remember that crime is a social problem, and therefore, a concern of the entire community. The efforts of law enforcement are limited to factors within its control.

## **Metropolitan Crime 1997**

The six largest law enforcement jurisdictions in Arkansas, representing 20% of the state's population, accounted for 37% of the Index Crime for 1997. These agencies increased less than 1% in total Index Crime compared to 1996. The crime rate per 100,000 population is 8,794, compared to 4,736 for the entire state. The law enforcement agencies representing populations of more than 55,000 each are:

## **Contributing Agencies and Population Coverage**

For the year of 1997, 189 law enforcement agencies throughout the state contributed Uniform Crime Reports monthly and directly to the Arkansas Crime Information Center. Each month an average of 74 county sheriff's departments and 106 police departments participated. In addition, law enforcement agencies at eight universities and the state university medical center submitted data to the program. Uniform Crime Reports received from these agencies represent statistical data covering over 99% of the estimated Arkansas population.

**1997  
Crime Index Data**

## Murder

Murder is defined in Uniform Crime Reporting as the willful killing of another. The classification, as in all of the other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body.

Deaths caused by negligence, suicide, accident, or justifiable homicide are not included in the count for this offense classification. Attempts to kill or assaults to kill are counted as aggravated assaults and not as murder.

## Murder in 1997

There were 249 murders in Arkansas in 1997, an increase of 14% from 1996, and 3% lower than five years ago. There were 10 murders for every 100,000 population, with a clearance rate of 82%.

There were also four manslaughters and four justifiable homicides in the state.

Murder accounted for less than 1% of the total Crime Index and only 2% of the Violent Crime Index.

The state's six largest law enforcement jurisdictions (representing more than 55,000 people each) accounted for 33% of the murders.

The victims of murder were more likely to be male (71%) than female, and the most frequent age range was from age 18 through 24 (21%). There were 132 black victims and 116 white.

In 1997, 178 murders were committed by offenders that were known by their victims. The majority of offenders were black (53%), male (71%), and were between the ages of 18 and 24 (32%).

## **Weapons Used In Assaults Upon Officers**

## A Part of America Died. . .

Somebody killed a policeman today and a part of America died; a piece of our country he swore to protect will be buried with him at his side.

The suspect who shot him will stand up in court with counsel demanding his rights, while a young widowed mother must work for her kids and spend many, long, lonely nights.

The beat that he walked was a battlefield too, just as if he had gone off to war; though the flag of our nation won't fly half mast, to his name they will add a gold star.

Yep, somebody killed a Policeman today; in your town or in mine, while we slept in comfort behind our closed doors. . . a cop put his life on the line.

Now his ghost walks a beat on a dark city street, and he stands at each new rookie's side; he answered the call, to himself gave his all — and a part of America died.

1. The number in parentheses following an agency name indicates the number of months that data was reported. All other agencies contain 12 months of data.
  2. Crime rates for jurisdictions with less than 12 months of data have been annualized.
  3. The statewide crime rate is based on the population of agencies reporting. This is slightly less than 100%.
- \* This law enforcement agency has population in more than one county. Total county crime rate is adjusted accordingly.

## **Section 9**

## Glossary of Terms

---

**Actual Offense** - A violation of the law which has been confirmed to have happened by law enforcement personnel.

**Adult** - For Uniform Crime Reporting (UCR) purposes, a person 18 years of age or more (Arkansas Statutes define an adult the same as UCR).

**Aggravated Assault** - An unlawful attack by one person upon another for the purpose of inflicting severe bodily injury.

**All Other Offenses** - All violations of state or local laws not specifically covered in the Part II offenses, except traffic.

**Arrest Rate** - The number of arrests reported for each unit of population (per 100,000 in this publication). The arrest rate is computed by dividing the number of arrests in a particular category by the population and multiplying that answer by 100,000.

**Arson** - Any willful or malicious burning or attempting to burn, with or without attempt to defraud.

**Burglary** - The unlawful entry of a structure to commit a felony or theft.

**Classifying** - Determining the proper crime categories in which to report offenses for UCR based on the facts contained in the police investigation report.

**Clearance by Arrest** - An offense is considered cleared when at least one person involved in the commission of the offense has been (1) arrested, (2) charged, and (3) turned over for prosecution.

**Clearance by Exceptional Means** - An offense in which some element beyond law enforcement control prevents placing of formal charges against the offender, but the police have: (1) definitely established the identity of the offender, (2) enough information to support arrest, charge, and turn over to the court for prosecution, and (3) knowledge of the location of the offender so that he could be taken into custody.

**Clearance Rate** - The percentage of offenses cleared by arrest. This is computed by dividing the number of clearances in a particular offense category by the number of offenses reported in that category.

**Crime Factor** - Conditions which affect the amount and type of crime that occurs in a geographical location.

**Crime Index** - The total of eight major offenses chosen because of their seriousness and frequency with which they occur (Murder, Rape, Robbery, Aggravated Assault, Burglary, Theft, Motor Vehicle Theft, and Arson).

**Crime Rate** - The number of index offenses reported for each unit of population (per 100,000 in this publication). Crime rate is computed by dividing the number of index offenses by the population and multiplying that answer by 100,000.

**Gambling** - Promoting, permitting, or engaging in illegal gambling.

In UCR: (1) police report offenses which occur within their city, (2) county and state report offenses which take place in the county, (3) agencies report only those arrests made for offenses committed within their jurisdiction, and (4) the recovery of property is reported only by the jurisdiction from which it was stolen.
