TO THE HONORABLE JOHN D. VANDERHOOF
GOVERNOR OF THE STATE OF COLORADO

and

MEMBERS OF THE GENERAL ASSEMBLY

GENTLEMEN:

As directed in Section 4(h), Article 23, Chapter 124, of the Colorado Revised Statutes, 1963, Amended, submitted herewith is the 1972-1973 Annual Report of the Colorado Law Enforcement Training Academy.

This report will include the activities which occurred during the 1972-1973 Fiscal Year. It also includes a breakdown on Budget and Expenditure Information for the Academy. However, the most important information contained in this report is the Curriculum and the number of students that have attended from the various departments throughout Colorado.

The theme and goal of the Colorado Law Enforcement Training Academy is "PROFESSIONALISM IN LAW ENFORCEMENT THROUGH EDUCATION AND TRAINING."

I am pleased to report that the Colorado Law Enforcement Training Academy has gained much ground during the Fiscal Year 1972-1973 towards the accomplishment of this goal and will endeavor to reach even higher goals in the following years to come.

Respectfully yours,

C. Wayne Keith

HISTORY

The Colorado Law Enforcement Training Academy was established by the Colorado Legislature in 1965. From that time to the present, the Academy has recorded a record growth in all areas of development. From a fledgling, part-time training program, located in temporary quarters, it has developed into a full time comprehensively programmed law enforcement training academy. The total number of classes have increased from a mere five in 1965 to a total of forty-five classes in the 1972-1973 Fiscal Year.

To adapt to this increase in class load, the Academy has added many facets to its program in the brief eight years of its existence. In 1969, the Academy took on a new look in the form of a completely new facility. This was quite a change from the 1940 Army type building in which it had been located. Three years later, in 1972, the Academy's driving track was in full operation. The track is utilized by the Academy to train all law enforcement officers in the techniques of safe pursuit driving. The permanent Staff at the Academy has also changed. The Staff currently consists of one Captain, one Lieutenant, one Sergeant and four Patrolmen.

When we add to these changes a total of one hundred fifty instructors, many of whom are classified as experts in their particular fields, and a curriculum that is second to none in the State of Colorado, we arrive at a rapidly maturing facility that is facing and handling the ever increasing challenges of effective law enforcement training.

ORGANIZATIONAL STRUCTURE

ORGANIZATIONAL STRUCTURE

The Colorado Law Enforcement Training Academy is a Division of the Department of Local Affairs, headed by Mr. Hugh H. C. Weed, Jr. The administrative body consists of a Superintendent, an Officer-in-Charge, and an Advisory Board, consisting of nine members. The success of the Academy can be directly correlated with the support given to it by its administrative body. Without the dedicated and enlightened guidance of the Advisory Board, the Colorado Law Enforcement Training Academy could never have reached its current high level of standards. The current membership is listed below:

As the early chilled grey of morning anxiously welcomes the warmth of the reddish dawn, and the average Coloradoan searches for an extra golden dream, an electronic chime reverberates through the darkened corridors at the Colorado Law Enforcement Training Academy, signaling the start of a new day. A reversion of the peaceful setting immediately takes place.

The time -- 6:00 a.m. Fluorescent bulbs shatter the darkness as the C.L.E.T.A. Basic Trainee quickly dresses, shaves, polishes brass, and shines leather gear in preparation of another day.

On this particular day, one senses an electricity of excitement charging the atmosphere; for this is graduation day, the climax of four challenging weeks of training.

The time -- 7:00 a.m. The breakfast hour begins. The C.L.E.T.A. student finishes breakfast early so that he may have one last chance to study his notes before the final examination.

The time -- 8:00 a.m. With hands that are slightly moist, the student works his way through a tough final examination. At 10:00 a.m. he breathes a sigh of relief, for he has made it. He has passed.

For the next thirty minutes bedlam prevails. The C.L.E.T.A. student rapidly dresses in his departmental uniform, while carefully insuring that each insignia is polished and in its proper place.

The time -- 10:30 a.m. It is now time for graduation.

The time -- 11:00 a.m. The Officer-in-Charge directs his attention towards the class and states, "Class 73-11, you are dismissed", and it is over.

The C.L.E.T.A. graduate leaves the academy with a feeling of accomplishment, for he has passed the test. He has endured the ten hours of class, seven days a week for four weeks. He has puzzled over the many intricacies of Colorado Criminal Law. He has watched 10 hours of training films, driven 60 miles on the pursuit driving track, fired 450 rounds of ammunition, investigated one mock crime scene, testified in one moot court, taken in excess of 218 hours of notes, and typed over 400 pages of reference data. The C.L.E.T.A. graduate worked for his diploma and the knowledge that accompanied it. He is now better prepared to face the challenges awaiting a person entering the profession of Law Enforcement.

DRIVING TRACK

PURSUIT DRIVING COURSE

In January of 1972, the pursuit driving course became operational and was integrated into the training program. Members of the Colorado State Patrol, municipal police departments, and county sheriff's offices logged 29,761 miles on the pursuit driving track for the fiscal year 1972-73.

The objective of the pursuit driving course is to train the student in the proper techniques of safe pursuit driving. The course was not designed to create "race track" drivers; but rather, to train law enforcement officers in the usage of four basic principles. Proper steering technique, correct lane positioning, throttle control and braking are the areas of most concern.

Proper steering is vital in any pursuit type situation. Therefore, this is the first principle taught to the academy trainee. The method utilized by the academy is the "threading technique". It is a smooth, positive type of steering which enables a driver to maintain maximum control of his vehicle under any condition.

The second principle taught to the trainee is correct positioning of a pursuit vehicle in a lane. Normally only one lane is available for the pursuit vehicle in everyday traffic situations. Therefore, the trainee driver is taught to use just one lane on the pursuit driving course. An average lane is twelve feet in width. By utilizing the entire twelve feet of a lane on a curve, a pursuit vehicle can change the arc of that curve so that it is negotiated safely at a faster speed.

Throttle control is also an important factor when travelling at pursuit speeds. The basic trainee spends many hours practicing proper throttle control on a variety of curves and lane changes. The establishment of a proper power train insures maximum control of the pursuit vehicle in high speed situations.

The final area of instruction is in the proper forms of braking. This includes when to brake and when not to brake. The basic trainee is taught to utilize the automatic braking effects of the pursuit vehicle's transmission. This saves his normal brakes for when positive braking action is actually required. He is also taught the hazardous effects of braking while travelling through a curve. The basic trainee is shown that the art of proper vehicle braking is a learned trait rather than an inherent one.

The importance of a pursuit driving program can only be measured by the safety it provides for the general public. Pursuit situations frequently occur on our highways and the safest emergency vehicle operator is the one who is best trained for this type of driving.
