Sourcebook of Criminal Justice Statistics 2003, by Ann L. Pastore (and others)

NCJ 208756"

1. Criminal statistics--United States. 2. Criminal justice, administration of--United States--Statistics. 3. Corrections--United States--Statistics. I. Author. II. Title.

Foreword

Sourcebook's original goal was to be the most comprehensive single source of quality criminal justice statistical information in the United States. This volume - number 31 - and the Sourcebook website continue to fulfill that goal. Yet, while guiding principals stay constant, technology moves on. In 1973, printing Sourcebook was the only option. The revolution in the delivery of information brought about by the Internet was not even imagined.

In 2003 BJS commissioned the first prospective study of Sourcebook in its 30 -year history. This study took 18 months to look at Sourcebook's users, mission, and future. (You can read the executive summary of the study findings at the end of this volume.) BJS learned that the functions of a statistical compendium remain valid. However, for Sourcebook to preserve its success in a world dominated by the Internet, its essentials must be based on electronic technology and good human-computer interaction. In assessing the usability of the Sourcebook website, which now largely displays the printed volume online, the study concluded that many of the features of the printed document did not work well on the web. In addition, users demand new capacities that only the web can provide.

Based on study findings, the excellent staff at the Hindelang Criminal Justice Research Center have drawn a blueprint of improvements to the Sourcebook website. To bring the Sourcebook into the 21st century, they need to focus all of their resources on these improvements. While this volume will be the last printed edition, the Sourcebook will continue to be the most comprehensive single source of quality criminal justice statistical information in the United States via a vastly improved website designed to meet the needs of current and future users.

The focus of the new design will be to make finding information easier. A new search engine, enhanced searching features, and an improved index are priorities. Trend tables, freed from the confines of the printed page, will cover as much data as are available. More links to original data and documents will open to users all the details for evaluating and understanding information. Unlike the restriction to current tables on the existing site, the new site will add tables from past editions. In the future Sourcebook will apply new technologies to speed the release of data, no longer lagging behind the original sources.

I want to thank all of the people who participated in the Sourcebook study and the recent BJS customer survey. We have heard what you want and are taking steps to make that happen. We are very excited about the prospects. As the delivery mechanism changes to benefit our customers, the Sourcebook will continue to provide quality statistics.

Lawrence A. Greenfeld
Director
Bureau of Justice Statistics

## For your information

This is the 31 st annual Sourcebook of Criminal Justice Statistics. As in past editions, nationwide data of interest to the criminal justice community are brought together in a single volume.

The objective of Sourcebook is to compile information from a variety of sources and to make it accessible to a wide audience. Over the course of Sourcebook's history, technological developments have changed the manner in which statistical data were collected, stored, and analyzed. Over the more recent past, technological advances have changed how information is disseminated and how users research their areas of interest.

To better serve our users, a move to an allelectronic Sourcebook is being made and print editions will no longer be produced. The current website is being redesigned to make data retrieval easier and to include features that are not possible to include in a print edition because of the constraints of the page and the length of such documents. For example, individual data tables over time will be included, enhanced searching features will make finding relevant information easier, and more links to original data and documents will be provided.

At the same time, readers should be assured that the tables presented in this and past editions will be reflected on the website. Users will still be able to find the tables they require, plus additional useful references. Our hope is that the expanded Sourcebook website will improve and broaden our ability to meet the needs of current and future users.

Statistical information about crime and criminal justice in the United States is published by hundreds of public and private agencies, academic institutions, research organizations, public opinion polling firms, and other groups. All levels of government collect and disseminate such data.

In order to be included in Sourcebook, the data must meet two standards. First, the information must be national in scope or of nationwide relevance. Nearly all the data presented are nationwide in scope and, where possible, they are displayed by regions, States, and cities to increase their value for local decisionmakers and for comparative analyses. Data available for limited groups of cities, States, or jurisdictions are included if they pertain to a topic of major concern. Second, the data must be methodologically sound with respect to sampling procedures, data collection
methods, estimation procedures, and reliability of the information.

## Organization of the Sourcebook

This book is divided into six sections:

1 Characteristics of the criminal justice systems presents data on the number and types of criminal justice agencies and employees, criminal justice expenditures, and workload of agency personnel. It also includes tables that summarize, State by State, the statutory, regulatory, or administrative characteristics and practices of selected criminal justice agencies.

## 2 Public attitudes toward crime and

 criminal justice-related topics presents the results of nationwide public opinion polls on such matters as fear of victimization, the death penalty, gun control, drug use, and ratings of law enforcement and judicial system performance.
## 3 Nature and distribution of known

offenses presents data from several indicators of the extent of illegal activities. They include surveys of individuals and households that may have been victims of crime, self-report data on drug use or participation in other illegal activities, and law enforcement agency counts of offenses reported to them.

## 4 Characteristics and distribution of

 persons arrested includes tabulations of arrestees by age, sex, race, and area; proportions of known crimes cleared by arrests; and counts of illegal goods and assets seized.
## 5 Judicial processing of defendants

 presents data on the number of adults and juveniles processed through the courts and on the characteristics, dispositions, and sentences of defendants.6 Persons under correctional supervision presents data about persons on probation and parole, persons in local jails, population counts in State and Federal prisons, and characteristics of State and Federal prisoners. The section also includes data on offenders executed and offenders currently under sentence of death.

## Annotated sources and list of publishers

Publications from which tables have been selected for presentation in Sourcebook are described in annotations that precede the appendices. The annotations include standard bibliographic information, periodicity of publication, dates of tabular information appearing in the publication (many sources, even some annual reports, contain data for a number of years), a brief summary of the
publication's contents, and a list of Sourcebook tables taken from the sources. Addresses of the publishers follow the annotations.

## Explanatory appendices

For sources that use complex survey methods or that require a long list of definitions of terms, explanatory text is presented in the Sourcebook. These appendices add information or clarify the data presented, but readers should consult the original sources for more detailed explanations.

## Reliability of the data

Data in this book are no more reliable or complete than the sources from which they are taken. Responsibility for the quality of data is borne by the original source; responsibility for its selection and presentation rests with the Sourcebook staff.

## Reporting periods

The aim for each edition of the Sourcebook is to combine the most recent data available with earlier data to show trends. Unfortunately, many reports are based on data already several years old at the time of publication.

It is sometimes impossible or inappropriate to compare data from different sources. For example, data in one source may be expressed only in fiscal years whereas those in another are expressed only in calendar years. It is best to check a table's explanatory note to verify the precise periods covered by data presented. Readers should exercise caution when combining or comparing data from different sources or in examining data from the same source over time.

## Table preparation

Updating. For tables from annual data collections, such as the FBI's Crime in the United States and BJS's Criminal Victimization in the United States, updating involves replacing older with newer data, taking care to note any changes in methodology or reporting procedures that should be brought to the reader's attention.

For tables from nonannual and special publications (such as surveys, research reports, and public opinion polls), updating and expansion involves searches for new or more recent data. Sometimes, data from previous editions of the Sourcebook are retained, either alone or along with more recent data.

Bodies of tables. The bodies of most Sourcebook tables appear exactly as in the
original sources. This presentation is consistent with the Sourcebook's main function--to bring together data from diverse sources for presentation as originally published, rather than to transform or recompute the original data.

However, the Sourcebook staff has:
(a) constructed some tables based on printed narrative or machine-readable data from the source; and
(b) adapted some tables with only nonsubstantive changes from the source.

Notes. Sourcebook tables carry three types of explanatory and cautionary notes:
(1) Notes that follow tables and begin with "Note:" are written by the Sourcebook staff from information in the original source.
(2) Some are brief notes in parentheses "( )" just above the table body. Most of these notes repeat information from the source table, but a few are added by the Sourcebook staff.
(3) Some are footnotes reprinted as they appeared in the original source. Most of these footnotes are keyed to specific table entries or to variables that require explanation.

## A note on definitions of terms

Because the Sourcebook includes data from so many sources, similar or identical terms sometimes have different meanings when used in different sources. For example, the precise meaning of terms such as "case," "caseload," "rate," and "race/ethnicity," differs among sources. To clarity the meaning of terms as they are used by various sources, definitions are provided in notes on tables and in appendices to which table notes refer.

However, in a compilation such as this it is impossible to provide an exhaustive list of definitions and explanations for each table that will satisfy the needs of all readers. Users with strong interest in particular tables are advised to consult the original source for a fuller explanation of data collection procedures, data exclusions, definitions of terms, and other details.

## Cross-references to last year's edition

The table list (which follows the table of contents) indicates whether last year's edition contained exactly the same table or an equivalent table with data from an earlier year.

## Your input requested

Your critical comments and suggested changes will help us to improve future editions of the Sourcebook.

Please tell us about appropriate sources of criminal justice statistics you believe we have overlooked. Of special interest are sources of data--preferably, but not necessarily, national in scope--that have not been drawn upon for this edition.

It would help us to know for what purposes you have used the Sourcebook and how much it has helped in achieving those purposes.

A special page for your comments and suggestions appears at the end of the book, just after the index. Please use this selfmailer to give us the benefit of your comments and suggestions for a more useful Sourcebook.

## Guide to symbols used in tables

The following symbols have been used uniformly, unless otherwise noted in specific tables:

0 Represents the quantity zero or rounds to less than half the unit of measurement shown.

NA Data not separately enumerated, tabulated, or otherwise available.
X Figure not applicable because column heading, stub line, or other contingencies make an entry impossible or meaningless.

B Not computed because the base figure is too small from which to generate a derived figure that meets statistical standards for reliability or figure does not otherwise meet standards of precision set by the Source.
() Figure in parentheses is the base on which percentages or other statistics in the table column or row have been calculated. A lower case letter in parentheses in a table cell is a footnote entry.
-- No entry in original source; reason not differentiated in original source.
Y Indicates that the relevant attribute is present.
Where a different symbol meaning is used in order to maintain clarity within the context of a given table, this is noted for that particular table.

## Acknowledgments

Sourcebook has always been the result of the efforts of many people and this 31st edition is no different. The individuals who worked with us this year are thanked below. In addition, we would like to extend our gratitude, once again, to the more than 65 people that have been part of the project since the first edition, the many staffers at the Bureau of Justice Statistics with whom we have worked through the years, as well as the countless contributors who make it possible for us to present the array of criminal justice statistics included in each edition.

First, we would like to recognize the staff of the Utilization of Criminal Justice Statistics Project and the Hindelang Criminal Justice Research Center.

Marcy O'Connor, senior Editorial Assistant, has responsibilities that range from ordering sources to organizing requests for permission to reprint to checking revisions on final copies. She also maintains our library of source materials. Her dedication and willingness to help out with all aspects of production make her an indispensable member of our staff. Carol Jordan, longtime Editorial Assistant, retired from Sourcebook this year. We thank her for her good work and wish her the best as she enjoys her new freedom. We miss her, but are certain that she will maintain a connection to the project (and continue to share her travel photos with us).

The Utilization Project continues to benefit enormously from the bright and talented graduate students here at the School of Criminal Justice. Our research team for this edition has been Charlie Lanier, Jack Reed, Jamie Flexon, Rik Legault, Tom LeBel, and Lisa Sacco. It is our pleasure and good fortune to work along side these talented and dedicated individuals.

Congratulations to our most senior researcher, Charlie Lanier, who after many years of service to the Sourcebook project completed his doctoral degree in May 2004. Charlie has moved on to pursue a research career but his first post-graduate position is with the Hindelang Center and the School of Criminal Justice so he continues to be a frequent visitor and good friend to the project.

We are grateful for the support of Arleen deGonzague, Administrative Associate, and Andrea Downey, secretary, at the Hindelang Center. Through their quiet hard work and diligence they handle countless administrative tasks. For this, and for the problems they
solve that we don't even know about, they have our appreciation.

Thanks go to our sponsoring agency, the Bureau of Justice Statistics and, specifically, to Rhonda Keith, Tom Hester, and Marianne Zawitz for their ongoing assistance and guidance.

The Sourcebook staff relies on many individuals in State and Federal justice agencies, research centers, universities, and other organizations who produce criminal justice statistical information. These people assist us in many ways, including advising us of new sources of criminal justice data, providing prepublication copies of materials, and answering questions from our editorial team about terminology and data collection procedures. The importance their cooperation cannot be overstated.

This year, the following individuals were particularly helpful and we acknowledge their generous assistance: Gwendolyn Coleman and William R. Burchill Jr., Administrative Office of the United States Courts; Lloyd Johnston, Jerald Bachman, Patrick O'Malley, Ginger Maggio, and Adam Burke, the Monitoring the Future Project; Allan Sobol and David Richert, American Judicature Society; Lydia Saad, The Gallup Organization, Inc.; Vivian Faden, National Institute on Alcohol Abuse and Alcoholism; Sue Allison, Federal Bureau of Prisons; Patrick R. Gartin and Philip A. Jessar, Drug Enforcement Administration; Janie Pitcock, PRIDE Surveys; Bonnie Hughes, Harris Interactive, Inc.; Janice Windau, Bureau of Labor Statistics; Susan M. Kuzma, Office of the Pardon Attorney; Edgar N. Brown, Witness Immunity Unit; and Emily C. Spadoni, Office of the Solicitor General.

Finally, we wish to thank the many Sourcebook users for their support. All inquiries, suggestions, and comments are welcome; please fill out the evaluation form at the end of this book or contact the Editors at the Hindelang Criminal Justice Research Center, State University of New York, University at Albany, 135 Western Avenue, Albany, New York 12222, (518) 442-5608; or e-mail us at: asksb@albany.edu.

State, Federal, and private correctional facilities and staff 95
Private jails and correctional facilities 96
Federal Bureau of Prisons facilities and staff 97
Education programs in prisons and jails 100
Background checks for firearm transfers 101
Statutory provisions related to alcohol use and driving 102

## Section 2

Public attitudes toward crime and
criminal justice-related topics 105
Most important problems for country, government, and teenagers 106
Problems and fear in schools 109
Drug testing and locker searches in schools 111
Public confidence in institutions 112
Confidence in the criminal justice system 113
Confidence in the police 113
Confidence in the U.S. Supreme Court 115
Confidence in the government to protect citizens from terrorism 119
Ethics of various occupations, lawyers, and police 119
Police, performance and fairness 121
Police use of force, brutality 122
Racial profiling 126
Increased law enforcement powers 126
Approaches to lowering the crime rate 126
Fear of terrorism 127
Terrorism and civil liberties 127
Perceptions of crime and safety in neighborhoods and at home 127
Responses to concern about crime 132
Level of spending for the problems of crime and drugs 133
Progress coping with drugs 138
Fairness of criminal justice system 139
Rehabilitation 139
Severity of local courts 140
Treatment of juveniles who commit violent crime 143
Penalty for murder 143
Death penalty 144
Death penalty as a deterrent 148
Gun ownership and use 149
Gun control policies 151
Legalization of marijuana 157
High school seniors' attitudes:
Selected social problems 161
Performance of selected institutions 163 Performance of the police 164
Performance of the courts and justice system 165
Perceptions of the harmfulness of drug and alcohol use 167

Students' perceptions of availability of drugs 173
Students disapproving of drug use 174
High school seniors' attitudes toward
legalization of marijuana 177
College freshmen attitudes:
Legalization of marijuana 178
Abortion 178
The courts 179
Capital punishment 179
Homosexual relations 181
Gun control 181
Doctor-assisted suicide 181
Pornography 182
Homosexual relations 184
Abortion 185
Environment 186

## Section 3

Nature and distribution of known
offenses 187
Personal and property victimization 188
Violent and personal victimization 191
Victim-offender relationship in violent victimization 196
Weapon use in personal victimization 198
Self-protective measures employed by victims 199
Rate of property victimizations 200
Households experiencing crime 203
Characteristics of lone-offender victimizations 204
Characteristics of multiple-offender victimizations 205
Reporting and not reporting victimization to police 207
High school seniors:
Victimization experiences 211
Victimization experiences at school 217
Self-reported delinquency 222
Involvement in traffic violations 232
Involvement in traffic violations while under the influence of drugs 234
Involvement in traffic accidents 236
Students:
Reporting problem behaviors and delinquency 238
Delinquency and victimization experiences at school 240
Self-reported drug and alcohol use 244
College students' and young adults' selfreported drug and alcohol use 253
College students' experiences of binge drinking, violence, and harassment 258
Drug and alcohol use in the U.S. population 262
Drug and alcohol use among military personnel 264
Drug abuse-related emergency department episodes 267
Alcohol use and frequency of use 270
Alcohol and drugs as family problems 272
Drinking and driving 274
Fatalities in alcohol-related motor vehicle crashes 275
Offenses known to police 278

Violent and property crime in U.S. cities 290
Average loss incurred for selected offenses 297
Bias-motivated (hate) crimes 297
Offenses in Federal parks 300
Murders 301
Murder offenders and victims 303
Murder and other violence by intimate partners 311
Murders resulting from Sept. 11, 2001 terrorist attacks 312
Sniper attacks 313
Workplace violence 314
Suicide 316
Robberies 318
Aggravated assaults 319
Burglaries 319
Larceny-thefts 320
Motor vehicle thefts 321
Bank fraud and embezzlement investigations 321
Violations of Federal bank robbery statutes 322
Law enforcement officers killed and assaulted 324
Arson: fires, deaths, and property loss 335
Bombing incidents 337
Terrorist incidents 340
Criminal acts related to air transportation 342

## Section 4

Characteristics and distribution of persons
arrested 343
Number and rate of arrests, national estimates 344
Arrests in each State 348
Offense charged 353
Age of persons arrested 354
Sex of persons arrested 356
Race of persons arrested 358
Arrests in cities 361
Arrests in suburban areas 365
Arrests in rural counties 369
Arrest rates for violent crimes 373
Arrest rates for property crimes 374
Offenses cleared by arrest 375
Clearances from arrest of persons under 18 years of age 379
Juveniles taken into police custody 382
Alcohol-related arrests 383
Drug-related arrests 385
Drug and alcohol use by adult male arrestees 386
Arrests for Federal offenses 388
Drug seizures by Federal agencies 390
Seizures of marijuana operations and illegal drug laboratories 391
Arrests and assets seized by the Drug Enforcement Administration 392
Drug and property seizures by the U.S. Customs Service 394
Value of asset forfeitures by U.S. attorneys 396
Deportable aliens located and removed 396

## Section 5

Judicial processing of defendants 399
Requests for immunity by Federal prosecutors 400
Court-authorized interception of wire, oral, or electronic communications 400
Grand jury proceedings and cases filed and disposed of by U.S. attorneys 403
Cases filed, terminated, and pending in U.S. District Courts 405
Defendants detained by U.S. District Courts 412
Pretrial release and detention of defendants in U.S. District Courts 414
Defendants prosecuted, convicted, and sentenced in U.S. District Courts 418
Type and length of sentences imposed in
U.S. District Courts 420

Application of U.S. Sentencing Commission guidelines 432
Citizens and non-citizens sentenced under U.S. Sentencing Commission guidelines 439
Departures from U.S. Sentencing Commission guidelines 440
Dispositions and sentences of drug law violators in U.S. District Courts 441
Convictions resulting from arrests by the
Drug Enforcement Administration 444
Antitrust cases filed in U.S. District Courts 444
Length of time to disposition of cases in U.S. District Courts 445
Felony cases and convictions in State courts 449
Type of sentences imposed by State courts 451
Sentence lengths imposed by State courts 451
Felons sentenced to additional penalties by State courts 452
Length of time to sentencing in State courts 453
Felony defendants in large counties 453
Pretrial processing of felony defendants in large counties 455
Conviction and sentencing of felony defendants in large counties 457
Characteristics of juvenile offenders and case outcomes 459
Prisoner petitions filed in U.S. District Courts 461
Appeals filed, terminated, and pending in U.S. Courts of Appeals 462

Activities of the U.S. Supreme Court 464
Cases filed, disposed, and pending in the
U.S. Supreme Court 465

Writ of certiorari petitions to the U.S.
Supreme Court 466
Cases argued in the U.S. Supreme Court 467
Executive clemency applications 468
Arrests and convictions handled by the U.S.
Postal Inspection Service 469
Prosecutions and convictions for violations of immigration and nationality laws 470

Immigration offenders processed 472
Abuse of public office cases 473
Courts-martial cases of the U.S. armed forces 474

## Section 6

Persons under correctional supervision

## 477

Adults under correctional supervision 478 Adults on probation 480
Federal offenders under community supervision 481
Persons under supervision of the Federal Probation System 482
Federal probationers terminating supervision 484
Juveniles in residential custody facilities 485
Adults in prison and jail, trends 488
Jail inmates, number and confinement status 489
Jail inmates, characteristics 493
Jail inmates, offenses 494
Jail inmates, drug and alcohol use 496
Jail inmates with HIV 499
AIDS-related and other deaths among jail inmates 499
Prison population growth 500
Prisoners in State, Federal, and private correctional facilities 502
Prisoners in private facilities and local jails 504
Characteristics of prisoners 505
Prisoners possessing firearms during offense 506
Prisoners under age 18507
Female prisoners 508
Noncitizens in State and Federal prisons 509
Time served by State prisoners 510
Educational attainment and participation in education programs for prisoners, jail inmates, and probationers 511
Recidivism of State prisoners 513
Number and characteristics of Federal prisoners 517
Federal prisoners serving time for drug offenses 519
Time served by Federal prisoners 520
Immigration offenders in Federal prison 522
Bureau of Immigration and Customs
Enforcement detainees 522
Persons in drug and alcoholism treatment facilities 523
State sex offender registries 524
Military correctional facilities 525
Adults on parole 525
Offenders returning to Federal prison 527
Discharges from Federal supervised release and parole 528
Mental health treatment in prisons 530
Prisoners with HIV/AIDS 532
Deaths and AIDS-related deaths among sentenced prisoners 533
Trend data for murders, death sentences, and executions 535
Prisoners under sentence of death 535

Hispanic and female prisoners under sentence of death 538
State and Federal prisoners executed 539
Methods of execution in States 543
Annotated list of sources 545

Positioning Sourcebook of Criminal Justice Statistics for the 21st Century Executive Summary 637

Table list

For users who wish to compare data in this edition with that in the 2002 Sourcebook, the numbers for equivalent tables in the 2002 Sourcebook are shown in parentheses. Table numbers marked with an asterisk (*) contain identical data in the 2002 and 2003 editions; these tables have been repeated from 2002 to 2003, with possible changes in titles and notation for accuracy and consistency within this edition. The table numbers within parentheses and without asterisks are those for which the most recent data are presented in (generally) the same format as in the 2002 edition. Tables for which dashes (--) appear have no comparable table in the 2002 edition.

## Tables

Section 1
Characteristics of the criminal justice systems 1
1.1 Justice system direct and intergovernmental expenditures, by level of government, United States, fiscal years 1982-2001 (1.1) 2

2.75 High school seniors reporting positive attitudes toward the performance of the courts and the justice system in general, by sex, race, region, college plans, and illicit drug use, United States, 1991-2003 (2.73) 166
2.76 Students' perceptions of the harmfulness of alcohol and drug use, by grade level of respondent, 2002-2003 (2.74) 167
2.77 Teenagers' perceptions of the harmfulness of alcohol and drug use, United States, 2002 and 2003 (2.75) 167
2.78 Teenagers' perceptions of someone their age smoking, getting drunk, and using drugs, United States, $2004(-) 167$
2.79 High school seniors' perceptions of the harmfulness of drug use, alcohol use, and cigarette smoking, by type of drug and frequency of use, United States, 1980, 1990, and 1993-2003 (2.76) 168
2.80 Eighth and tenth graders' perceptions of the harmfulness of drug use, alcohol use, and cigarette smoking, by type of drug and frequency of use, United States, 1991, 1995, and 2000-2003 (2.77) 169
2.81 Young adults' perceptions of the harmfulness of drug use, alcohol use, and cigarette smoking, by type of drug, frequency of use, and age group, United States, 1991-2003 (2.78) 170
2.82 Respondents' perceptions of the harmfulness of selected drug use behaviors, by age group, United States, 2002 and 2003 (2.79) 172
2.83 High school seniors' perceptions of availability of drugs, by type of drug, United States, 1980, 1990, and 1993-2003 (2.80) 173
2.84 Eighth and tenth graders' perceptions of availability of drugs, by type of drug, United States, 1992, 1995, and 2000-2003 (2.81) 173
2.85 High school seniors disapproving of drug use, alcohol use, and cigarette smoking, by type of drug and frequency of use, United States, 1980, 1990, and 1993-2003 (2.82) 174
2.86 Eighth and tenth graders disapproving of drug use, alcohol use, and cigarette smoking, by type of drug and frequency of use, United States, 1991, 1995, and 2000-2003 (2.83) 175
2.87 High school seniors favoring prohibition of drug use, alcohol use, and cigarette smoking, by type of drug and place of use, United States, 1975-2003 (2.84) 176
2.88 High school seniors' attitudes toward the legalization of marijuana use, United States, 1975-2003 (2.85) 177
2.89 High school seniors' attitudes toward legalization of the sale of marijuana if the use of marijuana were legal, United States, 19752003 (2.86) 177
2.90 College freshmen reporting that marijuana should be legalized, by sex, United
States, 1969-2003 (2.87) 178
2.91 College freshmen reporting that abortion should be legal, by sex, United States, 1977-2003 (2.88) 178
2.92 College freshmen reporting there is too much concern in the courts for the rights of criminals, by sex, United States, 1969-83 and 1987-2003 (2.89) 179
2.93 College freshmen reporting that the death penalty should be abolished, by sex, United States, 1969, 1970, 1971, and 19782003 (2.90) 179
2.94 College freshmen reporting that homosexual relationships should be legally prohibited, by sex, United States, 1976-2003 (2.91) 181
2.95 College freshmen reporting that the Federal Government should do more to control the sale of handguns, by sex, United States, 1989-2003 (2.93) 181
2.96 Attitudes toward legalization of doctorassisted suicide, United States, selected years 1996-2004 (2.94) 181
2.97 Attitudes toward laws regulating the distribution of pornography, by demographic characteristics, United States, selected years 1987-2002 (2.97*) 182
2.98 Attitudes toward the legality of homosexual relations, United States, selected years 1977-2004 (2.98) 184
2.99 Attitudes toward the legality of homosexual relations, by demographic characteristics, United States, 2004 (2.99) 184
2.100 Attitudes toward the legality of abortion, United States, selected years 19752004 (2.100) 185
2.101 Attitudes toward the legality of abortion, by demographic characteristics, United States, 2004 (2.101) 185
2.102 Attitudes toward whether there should be stricter laws and regulations to protect the environment, United States, selected years 1992-2003 (--) 186

## Section 3

Nature and distribution of known offenses 187
3.1 Estimated average number, rate, and percent change in rate of personal and property victimization, by type of crime, United States, 2000-01 and 2002-03 (3.1) 188
3.2 Estimated number and rate of violent and property victimization, by type of crime, United States, 2002 and 2003 (3.2) 189
3.3 Estimated rate of criminal victimization and percent change in rate, by type of crime, United States, 1993, 1994, 19992003 (3.3) 190
3.4 Estimated rate (per 1,000 persons age 12 and older) of personal victimization, by type of crime and selected characteristics of victim, United States, 2003 (3.4) 191
3.5 Estimated number and rate (per 1,000 persons age 12 and older) of personal victimization, by type of crime and sex of victim, United States, 2002 (3.5) 192
3.6 Estimated rate (per 1,000 persons in each age group) of personal victimization, by type of crime and age of victim, United States, 2002 (3.7) 192
3.7 Estimated rate (per 1,000 persons in each age group) of personal victimization, by sex and age of victim, and type of crime, United States, 2002 (3.8) 193
3.8 Estimated number and rate (per 1,000 persons age 12 and older) of personal victimization, by type of crime and race of victim, United States, 2002 (3.9) 193
3.9 Estimated number and rate (per 1,000 persons age 12 and older) of personal victimization, by type of crime and ethnicity of victim, United States, $2002(3.10) 194$
3.10 Estimated number and rate (per 1,000 persons age 12 and older) of personal victimization, by type of crime, and sex and race of victim, United States, 2002 (3.13) 194
3.11 Estimated rate (per 1,000 persons in each age group) of personal victimization, by race and age of victim, and type of crime, United States, 2002 (3.14) 195
3.12 Estimated rate (per 1,000 persons age 12 and older) of personal victimization, by type of crime and annual household income of victim, United States, 2002 (3.15) 195
3.13 Estimated rate (per 1,000 persons age 12 and older) of personal victimization, by type of crime, size of population, and locality of residence, United States, 2002 (3.16) 196
3.14 Estimated number and percent distribution of violent victimization incidents, by type of crime and victim-offender relationship, United States, 2002 (3.17) 196
3.15 Estimated percent distribution of violent victimization, by type of crime and victimoffender relationship, United States, 2002 (3.18) 197
3.16 Victim-offender relationship in violent victimization, by type of crime and sex of victim, United States, 2003 (3.19) 197
3.17 Estimated percent distribution of violent victimization incidents, by type of crime, victim-offender relationship, and type of weapon used, United States, 2002 (3.20) 198
3.18 Estimated percent of violent victimizations in which victim took self-protective measures, by type of crime and victimoffender relationship, United States, 2002 (3.21) 199
3.19 Estimated percent distribution of selfprotective measures employed by victims of violent crime, by sex and race of victim, United States, 2002 (3.22) 199
3.20 Estimated percent distribution of violent victimizations in which self-protective measures were employed, by person taking measure, type of crime, and outcome of measure, United States, 2002 (3.23) 200
3.21 Estimated rate (per 1,000 households) of property victimization, by type of crime and characteristics of household, United States, 2003 (3.24) 200
3.22 Estimated number and rate (per 1,000 households) of property victimization, by type of crime and race of head of household, United States, 2002 (3.25) 201
3.23 Estimated number and rate (per 1,000 households) of property victimization, by type of crime and ethnicity of head of household, United States, 2002 (3.26) 201
3.24 Estimated rate (per 1,000 households) of property victimization, by type of crime and annual household income, United States, 2002 (3.27) 202
3.25 Estimated rate (per 1,000 households) of property victimization, by type of crime, size of population, and locality of residence, United States, 2002 (3.28) 202
3.26 Estimated rate (per 1,000 households) of property victimization, by locality of residence, race of head of household, and type of crime, United States, 2002 (3.29) 203
3.27 Estimated percent distribution of households experiencing crime, by type of crime, United States, 1994-2000, 2002, and 2003 (3.30) 203
3.28 Estimated percent distribution of violent victimizations by lone offenders, by type of crime and perceived age of offender, United States, 2002 (3.31) 204
3.29 Estimated percent distribution of violent victimizations by lone offenders, by type of crime and perceived race of offender, United States, 2002 (3.32) 204
3.30 Estimated percent distribution of violent victimizations by multiple offenders, by type of crime and perceived age of offenders, United States, 2002 (3.33) 205
3.31 Estimated percent distribution of violent victimizations by multiple offenders, by type of crime and perceived race of offenders, United States, 2002 (3.34) 205
3.32 Estimated percent distribution of personal and property incidents, by type of crime and place of occurrence, United States, 2002 (3.35) 206
3.33 Estimated percent distribution of personal and property victimization, by type of crime and whether or not reported to police, United States, 2002 (3.36) 207
3.34 Estimated percent distribution of reasons for reporting personal and property victimizations to police, by type of crime, United States, 2002 (3.37) 208
3.35 Estimated percent distribution of reasons for not reporting personal and property victimizations to police, by type of crime, United States, 2002 (3.38) 208
3.36 Estimated percent of violent victimizations reported to police, by selected victim and household characteristics, 1992-2000 (aggregate) (3.39*) 209
3.37 High school seniors reporting victimization experiences in last 12 months, by type of victimization, United States, 1991-2003 (3.40) 211
3.38 High school seniors reporting victimization experiences in last 12 months, by type of victimization and sex, United States, 1991-2003 (3.41) 212
3.39 High school seniors reporting victimization experiences in last 12 months, by type of victimization and race, United States, 1991-2003 (3.42) 214
3.40 High school seniors reporting victimization experiences at school in last 12 months, by type of victimization, United States, 1991-2003 (3.43) 217
3.41 High school seniors reporting victimization experiences at school in last 12 months, by type of victimization and sex, United States, 1991-2003 (3.44) 218
3.42 High school seniors reporting victimization experiences at school in last 12 months, by type of victimization and race, United States, 1991-2003 (3.45) 220
3.43 High school seniors reporting involvement in selected delinquent activities in last 12 months, United States, 1991-2003 (3.46) 222
3.44 High school seniors reporting involvement in selected delinquent activities in last 12 months, by sex, United States, 19912003 (3.47) 224
3.45 High school seniors reporting involvement in selected delinquent activities in last 12 months, by race, United States, 19912003 (3.48) 228
3.46 High school seniors reporting receiving traffic ticket or warning for a moving violation in last 12 months, United States, 19912003 (3.49) 232
3.47 High school seniors reporting receiving traffic ticket or warning for a moving violation in last 12 months, by sex, United States, 1991-2003 (3.50) 232
3.48 High school seniors reporting receiving traffic ticket or warning for a moving violation in last 12 months, by race, United States, 1991-2003 (3.51) 232
3.49 High school seniors reporting receiving traffic ticket or warning for a moving violation in last 12 months while under the influence of alcohol or drugs, by type of drug, United States, 1991-2003 (3.52) 234
3.50 High school seniors reporting receiving traffic ticket or warning for a moving violation in last 12 months while under the influence of alcohol or drugs, by type of drug and sex, United States, 1991-2003 (3.53) 234
3.51 Hign school seniors reporting receiving traffic ticket or warning for a moving violation in last 12 months while under the influence of alcohol or drugs, by type of drug and race, United States, 1991-2003 (3.54) 236
3.52 High school seniors reporting involvement in driving accidents in last 12 months, United States, 1991-2003 (3.55) 236
3.53 High school seniors reporting involvement in driving accidents while under the influence of alcohol or drugs in last 12 months, by type of drug, United States, 19912003 (3.56) 237
3.54 Students reporting problem behaviors, by grade level of respondent, 2002-2003 (3.57) 238
3.55 High school students reporting involvement in delinquent and risk-related behaviors, and drug, alcohol, and cigarette use, United States, selected years, 1991-2003 (3.58) 239
3.56 High school students reporting involvement in delinquent and risk-related behaviors, by sex, race, ethnicity, and grade level, United States, 2003 (3.59) 240
3.57 High school students reporting victimization experiences and involvement in delinquent activities on school property, by sex, race, ethnicity, and grade level, United States, 2003 (--) 240
3.58 Students reporting involvement in delinquent activities at school, by grade level of respondent, 2002-2003 (3.60) 241
3.59 Students reporting victimization experiences at school, by grade level of respondent, 2002-2003 (3.61) 241
3.60 Number and rate (per 1,000 students) of nonfatal violent crimes against students age 12 to 18 occurring at school, by type of crime and student characteristics, United States, 1995, 1999-2001 (3.62) 242
3.61 Students age 12 to 18 reporting victimization, bullying, hate-related behavior, and gangs at school, by student characteristics, United States, 2001 (3.63) 243
3.62 High school students reporting drug, alcohol, and cigarette use, by sex, race, ethnicity, and grade level, United States, 2003 (3.64) 244
3.63 Students reporting use of alcohol and drugs, by grade level of respondent and frequency of use, 2002-2003 (3.65) 245
3.64 Reported alcohol use and most recent use among students, by sex, college plans, region, and population density, United States, 2003 (3.66) 245
3.65 Reported use of any illicit drug and most recent use among students, by sex, college plans, region, and population density, United States, 2003 (3.67) 246
3.66 Reported use of any illicit drug in last 12 months among students, by sex, race, ethnicity, and college plans, United States, 1991-2003 and 1975-2003 (--) 247
3.67 Reported use of any illicit drug other than marijuana in last 12 months among students, by sex, race, ethnicity, and college plans, United States, 1991-2003 and 19752003 (--) 248
3.68 Reported drug and alcohol use in last 12 months among high school seniors, by type of drug, United States, 1991-2003 (3.68) 249
3.69 Reported drug use, alcohol use, and cigarette use in last 30 days among high school seniors, by type of drug, United States, 1991-2003 (3.69) 250
3.70 Reported drug use and most recent use among students, by type of drug and grade level, United States, 1991-2003 (3.70) 251
3.71 Reported drug use, alcohol use, and cigarette use in last 12 months among college students, by type of drug, United States, 1988-2003 (3.71) 253
3.72 Reported drug use, alcohol use, and cigarette use in last 30 days among college students, by type of drug, United States, 1988-2003 (3.72) 254
3.73 Reported daily use in last 30 days of drugs, alcohol, and cigarettes among college students, by type of drug, United States, 1988-2003 (3.73) 254
3.74 Reported drug use, alcohol use, and cigarette use in last 12 months among young adults, by type of drug, United States, 19882003 (3.74) 255
3.75 Reported drug use, alcohol use, and cigarette use in last 30 days among young adults, by type of drug, United States, 19882003 (3.75) 256
3.76 Reported daily use within last 30 days of drugs, alcohol, and cigarettes among young adults, by type of drug, United States, 1988-2003 (3.76) 257
3.77 Reported drinking behaviors among college students, by sex, United States, 1993, 1997, 1999, and 2001 (3.77*) 258
3.78 Prevalence of binge drinking among college students, by selected characteristics, United States, 1993, 1997, 1999, and 2001 (3.78*) 258
3.79 Drinking behaviors among college students reporting alcohol consumption in past year, by sex, United States, 1993, 1997, 1999, and 2001 (3.79*) 259
3.80 Alcohol-related problems among college students, United States, 1993, 1997, 1999, and 2001 (3.80*) 259
3.81 Binge drinking among underage and legal age college students, by living arrangement, United States, 2001 (3.81*) 259
3.82 Alcohol-related effects experienced by underage college students, by living arrangement, United States, 2001 (3.82*) 260
3.83 College students and underage college students reporting alcohol use, by frequency of use, United States, 1998-2002 (3.83) 260
3.84 College students reporting drug use, by type of drug, United States, 1998-2002 (3.84) 261
3.85 College students reporting experiences of violence or harassment and involvement of alcohol or drugs before the experience, United States, 1995-2002 (3.85) 261
3.86 Estimated prevalence of drug use during lifetime, by type of drug and age group, United States, 2002 and 2003 (3.86) 262
3.87 Estimated prevalence of drug use during the last 12 months, by type of drug and age group, United States, 2002 and 2003 (3.87) 263
3.88 Estimated prevalence of drug use during the last 30 days, by type of drug and age group, United States, 2002 and 2003 (3.88) 263
3.89 Prevalence of any illicit drug use among military personnel, by branch of service and recency of use, United States, selected years 1980-2002 (--) 264
3.90 Prevalence of illicit drug use among military personnel, by branch of service, type of drug, and recency of use, United States, 2002 (--) 265
3.91 Prevalence of heavy alcohol use in the past 30 days among military personnel, by branch of service, United States, selected years 1980-2002 (--) 266
3.92 Drug abuse-related emergency department episodes, by patient and episode characteristics, United States, 1994-2002 (3.90*) 267
3.93 Type of drug mentioned in drug abuserelated emergency department episodes, by patient and episode characteristics, United States, 1999-2002 (3.91*) 268
3.94 Type and rate (per 100,000 population) of drug mentioned in drug abuse-related emergency department episodes, by patient characteristics, United States, 1999-2002 (3.92*) 269
3.95 Reported alcohol use, by sex, United States, selected years 1939-2004 (3.93) 270
3.96 Reported alcohol use, by demographic characteristics, United States, 2004 (3.94) 271
3.97 Respondents reporting whether they drink more than they should, by demographic characteristics, United States, 2004 (3.95) 271
3.98 Alcohol use and underage alcohol use in the last 30 days, by age group, level of use, and demographic characteristics, United States, 2002 and 2003 (3.96) 272
3.99 Respondents reporting whether drinking has ever been a source of family trouble, United States, selected years 1947-2004 (3.97) 272
3.100 Respondents reporting whether drinking has ever been a source of family trouble, by demographic characteristics, United States, 2004 (3.98) 273
3.101 Respondents reporting whether drug abuse has ever been a source of family trouble, by demographic characteristics, United States, $2003(-) 273$
3.102 Respondents reporting having driven a vehicle under the influence of alcohol or drugs during the last 12 months, by demographic characteristics, United States, 2002 and 2003 (3.99) 274
3.103 Total fatalities and fatalities in alcoholrelated motor vehicle crashes, by highest blood alcohol concentration level in the crash, United States, 1982-2002 (3.100) 275
3.104 Blood alcohol concentration level of motor vehicle drivers involved in fatal crashes, by age, United States, 1990-2002 (3.101) 276
3.105 Total fatalities and fatalities in alcoholrelated motor vehicle crashes, by highest blood alcohol concentration level in the crash and jurisdiction, 2002 (3.102) 277
3.106 Estimated number and rate (per 100,000 inhabitants) of offenses known to police, by offense, United States, 1960-2002 (3.103) 278
3.107 Estimated number and rate (per 100,000 inhabitants) of offenses known to police, by offense and extent of urbanization, 2002 (3.104) 279
3.108 Estimated number and rate (per 100,000 inhabitants) of offenses known to police, by offense, jurisdiction, and extent of urbanization, 2002 (3.105) 280
3.109 Offenses known to police, by offense and size of place, 2001 and 2002 (3.106) 288
3.110 Offenses known to police in cities over 100,000 population, 2001 and 2002 (3.110) 290
3.111 Number of offenses known to police and average loss incurred, by selected offenses and type of target, United States, 2002 (3.112) 297
3.112 Bias-motivated (hate) crimes known to police, by offense, United States, 2002 (3.113) 297
3.113 Bias motivations in hate crimes known to police, United States, 2002 (3.114) 298
3.114 Race of suspected offender in biasmotivated (hate) crimes known to police, by type of bias motivation, United States, 2002 (3.115) 299
3.115 Offenses in Federal parks known to park rangers and park police, by offense, 1975-2002 (3.116*) 300
3.116 Offenses in Federal parks known to park rangers and park police, and reported by other law enforcement agencies, by offense, 2002 ( $3.117^{*}$ ) 301
3.117 Percent distribution of murders and nonnegligent manslaughters known to police, by type of weapon used, United States, 1964-2002 (3.118) 301
3.118 Percent distribution of murders and nonnegligent manslaughters known to police, by type of weapon used and region, 2002 (3.119) 303
3.119 Murders and nonnegligent manslaughters known to police, by type of weapon used and age of victim, United States, 2002 (3.120) 303
3.120 Murders and nonnegligent manslaughters known to police, by victim-offender relationship and circumstances of the offense, United States, 2002 (3.121) 304
3.121 Percent distribution of murders and nonnegligent manslaughters known to police, by age of victim, United States, 1964, 1974, 1984, 1989-2002 (3.122) 306
3.122 Percent distribution of murders and nonnegligent manslaughters known to police, by sex of victim, United States, 19642002 (3.123) 307
3.123 Percent distribution of murders and nonnegligent manslaughters known to police, by race of victim, United States, 1964-2002 (3.124) 307
3.124 Murders and nonnegligent manslaughters known to police, by sex, race, and age of victim, United States, 2002 (3.125) 308
3.125 Rate (per 100,000 persons in each group) of murder and nonnegligent manslaughter victimization, by age, sex, and race of victim, United States, 1976-2002 (3.126) 308
3.126 Rate (per 100,000 persons in each group) of murder and nonnegligent manslaughter victimization, by age, sex, and race of victim, United States, 1976-2002 (3.127) 309
3.127 Estimated rate (per 100,000 persons in each group) of offenders committing murder and nonnegligent manslaughter, by age, sex, and race of offender, United States, 1976-2002 (3.128) 309
3.128 Estimated rate (per 100,000 persons in each group) of offenders committing murder and nonnegligent manslaughter, by age, sex, and race of offender, United States, 1976-2002 (3.129) 310
3.129 Murders and nonnegligent manslaughters known to police, by race and sex of victim and offender, United States, 2002 (3.130) 310
3.130 Percent distribution of U.S. population, and murder and nonnegligent man.slaughter victims and offenders, by age, sex, and race, United States, 1976-2002 (3.131) 311
3.131 Murders and nonnegligent manslaughters by intimates of the victims, by sex and race of victim, and victim-offender relationship, United States, 1976-2002 (3.132) 311
3.132 Estimated rate (per 1,000 persons age 12 and older) of nonfatal intimate partner violence and percent change in rate, by sex of victim, 1993-2001 (3.133*) 312
3.133 Murder and nonnegligent manslaughters resulting from the Sept. 11, 2001 terrorist attacks, by sex and race of victim, and location (3.134*) 312
3.134 Sniper-attack murder incidents, victims, and offenders, by type of firearm, 1982-2001 (--) 313
3.135 Workplace homicides, by victim characteristics, type of event, and selected occupation and industry, United States, 1992-2002 (3.135) 314
3.136 Suicide rate (per 100,000 persons in each age group), by age, United States, 1980, 1985, 1990-2002 (3.139) 316
3.137 Suicide rate (per 100,000 persons in each age group), by age, sex, and race, United States, 2002 (3.140) 316
3.138 Suicide rate (per 100,000 persons in each age group) for persons 15 to 24 years of age, by age and sex, United States, 1950, 1960, 1970, 1980, 1990, 1993-2002 (3.141) 317
3.139 Firearm suicide rate (per 100,000 persons in each age group), by age, United States, 1980, 1985, 1990-2002 (3.142) 317
3.140 Percent distribution of robberies known to police, by type of weapon used, United States, 1974-2002 (3.143) 318

3.153 Assaults on Federal officers, by extent of injury and type of weapon used, 19772002 (3.156) 325
3.154 Law enforcement officers killed, United States, 1972-2002 (3.157) 327
3.155 Law enforcement officers feloniously killed, by circumstances at scene of incident, United States, 1979-2002 (3.158) 328
3.156 Law enforcement officers feloniously killed, by circumstances at scene of incident and type of assignment, United States, 19932002 (aggregate) (3.159) 329
3.157 Law enforcement officers feloniously killed, by circumstances at scene of incident and type of assignment, United States, 2002 (3.160) 330
3.158 Percent distribution of law enforcement officers feloniously killed, by selected characteristics of officers, United States, 1984-2002 (3.161) 330
3.159 Law enforcement officers feloniously killed in Sept. 11, 2001 terrorist attacks, by selected characteristics of officers (3.162*) 331
3.160 Persons identified in the felonious killing of law enforcement officers, by demographic characteristics and prior record, United States, 1993-2002 (aggregate) and 2002 (3.163) 331
3.161 Persons identified in the felonious killing of law enforcement officers, by type of disposition, United States, 1991-2000 (aggregate) (3.164) 331
3.162 Law enforcement officers accidentally killed, by circumstances at scene of incident, United States, 1980-2002 (3.165) 332
3.163 Law enforcement officers assaulted, by circumstances at scene of incident and type of weapon, United States, 2002 (3.166) 333
3.164 Law enforcement officers assaulted, by circumstances at scene of incident and type of assignment, United States, 2002 (3.167) 334
3.165 Assaults on law enforcement officers and percent sustaining personal injury, by type of weapon used, 1980-2002 (3.168) 335
3.166 Estimated number of structure fires and intentionally set structure fires, and resulting civilian fire deaths and value of property damage, United States, 2002 (3.169) 335
3.167 Estimated number of intentionally set structure fires, and resulting civilian fire deaths and value of property damage, United States, 1977-2002 (3.170) 335
3.168 Arson offenses and average value of property damage, by type of target, 2002 (3.171) 336
3.169 Arson of structures and percent not in use, by type of structure, 2002 (3.172) 336
3.170 Bombing incidents known to police, by type of incident and device, value of property damage, and outcome of incident, United States, 1973-99 (3.173) 337
3.171 Bombing incidents known to police, by type of target and device, and value of property damage, United States, 1999 (3.174) 338
3.172 Bombing incidents known to police, by type of incident and device, and region and jurisdiction, 1999 (3.175) 339
3.173 Terrorist incidents and preventions, United States, 1980-2001 (3.176) 340
3.174 Terrorist incidents, by type of incident and region, United States, 1980-2001 (aggregate) (3.177) 340
3.175 U.S. citizen casualties resulting from international terrorism, by type of casualty, 1981-2003 (3.178) 341
3.176 Terrorist attacks against the United States internationally, by type of event, 1994-2003 (3.179) 341
3.177 Results of airline passenger screening, United States, 1977-2000 (3.180) 342

## Section 4 <br> Characteristics and distribution of persons arrested 343

4.1 Estimated number of arrests, by offense charged, United States, 2002 (4.1) 344
4.2 Arrest rates (per 100,000 inhabitants), by offense, 1971-2002 (4.2) 345
4.3 Number and rate (per 100,000 inhabitants) of arrests, by offense charged and size of place, 2002 (4.3) 346
4.4 Percent distribution of total U.S. population and persons arrested for all offenses, by age group, United States, 2002 (4.4) 347
4.5 Arrests, by offense charged, age group, and State, 2002 (4.5) 348
4.6 Arrests, by offense charged and age group, United States, 1993 and 2002 (4.6) 353
4.7 Arrests, by offense charged and age, United States, 2002 (4.7) 354
4.8 Arrests, by offense charged and sex, United States, 2002 (4.8) 356
4.9 Arrests, by offense charged, sex, and age group, United States, 2001 and 2002 (4.9) 357
4.10 Arrests, by offense charged, age group, and race, United States, 2002 (4.10) 358
4.11 Arrests in cities, by offense charged and sex, 2002 (4.11) 361
4.12 Arrests in cities, by offense charged, age group, and race, 2002 (4.12) 362
4.13 Arrests in suburban areas, by offense charged and sex, 2002 (4.13) 365
4.14 Arrests in suburban areas, by offense charged, age group, and race, 2002 (4.14) 366
4.15 Arrests in rural counties, by offense charged and sex, 2002 (4.15) 369
4.16 Arrests in rural counties, by offense charged, age group, and race, 2002 (4.16) 370
4.17 Arrest rates (per 100,000 inhabitants) for violent crimes, by offense charged and region, 1971-2002 (4.17) 373
4.18 Arrest rates (per 100,000 inhabitants) for property crimes, by offense charged and region, 1971-2002 (4.18) 374
4.19 Offenses known to police and percent cleared by arrest, by offense and population group, 2002 (4.19) 375
4.20 Offenses known to police and percent cleared by arrest, by type of offense, United States, 1971-2002 (4.20) 377
4.21 Percent of offenses known to police that were cleared by arrest, by extent of urbanization and type of offense, 1972-2002 (4.21) 378
4.22 Number of offenses known to police that were cleared by arrest and percent of clearances from arrest of persons under 18 years of age, by offense and population group, 2002 (4.22) 379
4.23 Percent of offenses known to police that were cleared by arrest of persons under 18 years of age, by type of offense, United States, 1972-2002 (4.23) 381
4.24 Arsons cleared by arrest and clearances by arrest of persons under 18 years of age, by type of target, United States, 2002 (4.24) 381
4.25 Juveniles taken into police custody, by method of disposition and population group, 2002 (4.25) 382
4.26 Percent distribution of juveniles taken into police custody, by method of disposition, United States, 1972-2002 (4.26) 383
4.27 Arrests for alcohol-related offenses and driving under the influence, United States, 1970-2002 (4.27) 383
4.28 Arrests for alcohol-related offenses, by offense and State, 2002 (4.28) 384
4.29 Percent distribution of arrests for drug abuse violations, by type of drug, United States, 1982-2002 (4.29) 385
4.30 Drug use by adult male arrestees in 43 U.S. cities and counties, by type of drug, 2000-2003 (4.30) 386
4.31 Adult male arrestees in 39 U.S. cities and counties reporting receiving drug or alcohol treatment ever and in past year, by type of treatment, 2003 (4.31) 387
4.32 Adult male arrestees in 43 U.S. cities and counties reporting binge drinking in past 30 days, 2000-2003 (4.32) 387
4.33 Persons arrested for Federal offenses, by offense, United States, fiscal year 2001 (4.33) 388
4.34 Persons arrested for Federal offenses, by Federal agency, United States, fiscal year 2001 (4.34) 389
4.35 Characteristics of persons arrested by Federal agencies, by offense, United States, fiscal year 2001 (4.35) 389
4.36 Federal drug seizures, by type of drug, fiscal years 1989-2003 (4.36) 390
4.37 Drug removals from the domestic market by the Drug Enforcement Administration, by type of drug, fiscal years 19782003 (4.37) 390
4.38 Number of marijuana plants eradicated and seized, arrests made, weapons seized, and value of assets seized, under the Drug Enforcement Administration's Domestic Cannabis Eradication/Suppression Program, by State, 2003 (4.38) 391

5.63 Juvenile court case outcomes, by characteristics of juvenile offenders and type of offense, United States, 2000 (5.63*) 460
5.64 Juvenile court case outcomes, by type of offense and race of juvenile offender, United States, 2000 ( $5.64^{*}$ ) 460
5.65 Petitions filed in U.S. District Courts by Federal and State prisoners, by type of petition, 1977-2003 (5.65) 461
5.66 Appeals commenced, terminated, and pending, and judgeships authorized in U.S. Courts of Appeals, 1982-2003 (5.67) 462
5.67 Appeals from U.S. District Courts filed in U.S. Courts of Appeals, by nature of suit or offense, 1980, 1985, 1990-2003 (5.68) 463
5.68 Activities of the U.S. Supreme Court, at conclusion of the October term, 1976-2002 (5.69) 464
5.69 Cases filed, disposed of, and pending in the U.S. Supreme Court, by method of filing, at conclusion of the October term, 19762002 (5.70) 465
5.70 Petitions for review on writ of certiorari to the U.S. Supreme Court filed, terminated, and pending, by circuit and nature of proceeding, fiscal year 2003 (5.71) 466
5.71 U.S. Supreme Court cases argued and decided on merits, at conclusion of the October term, 1982-2002 (5.72) 467
5.72 Executive clemency applications for Federal offenses received, disposed of, and pending in the Office of the U.S. Pardon Attorney, fiscal years 1953-2003 (5.73) 468
5.73 Arrests and convictions handled by the
U.S. Postal Inspection Service, fiscal years 1981-2003 (5.74) 469
5.74 Arrests and convictions handled by the U.S. Postal Inspection Service, by type of offense, fiscal year 2003 (5.75) 469
5.75 Prosecutions for violations of U.S. immigration and naturalization laws, by type of case and disposition, and aggregate fines and imprisonment imposed, fiscal years 1990, 1993-2003 (5.76) 470
5.76 Convictions for violations of U.S. immigration and naturalization laws, by offense, fiscal years 1990-2003 (5.77) 471
5.77 Immigration offenders investigated, charged in U.S. District Courts, and admitted to Federal prison, United States, 1985$2000\left(5.78^{*}\right) 472$
5.78 Nationality of suspects in matters referred to U.S. attorneys for immigration offenses, United States, 2000 (5.79*) 472
5.79 Persons indicted, awaiting trial on December 31, and convicted of offenses involving abuse of public office, by level of government, 1973-2002 (5.80) 473
5.80 U.S. Army personnel tried in general, special, and summary courts-martial, and discharges approved, by conviction status, United States, fiscal years 1997-2003 (5.81) 474
5.81 U.S. Navy and Marine Corps personnel tried in general, special, and summary courts-martial, and discharges approved, by conviction status, United States, fiscal years 1997-2003 (5.82) 474
5.82 U.S. Air Force personnel tried in general, special, and summary courtsmartial, and discharges approved, by conviction status, United States, fiscal years 1997-2003 (5.83) 475
5.83 U.S. Coast Guard personnel tried in general, special, and summary courtsmartial, and discharges approved, by conviction status, United States, fiscal years 1997-2003 (5.84) 475

## Section 6

Persons under correctional supervision 477
6.1 Adults on probation, in jail or prison, and on parole, United States, 1980-2003 (6.1) 478
6.2 Adults under correctional supervision, by type of supervision, region, and jurisdiction, 2003 (6.2) 479
6.3 Adults on probation under State and Federal jurisdiction, by region and jurisdiction, 2003 (6.3) 480
6.4 Federal offenders under community supervision, by offense, United States, fiscal year 2001 (6.4) 481
6.5 Persons received for supervision by the Federal Probation System, by type of supervision, 1975-2003 (6.5) 482
6.6 Movement of persons under supervision of the Federal Probation System, fiscal year 2003 (6.6) 483
6.7 Persons under supervision of the Federal Probation System and authorized probation officers, United States, 1975-2003 (6.7) 483
6.8 Federal probation terminations, by outcome and offense, United States, fiscal year 2001 (6.8) 484
6.9 Number and rate (per 100,000 juveniles age 10 through upper age of jurisdiction) of juveniles in public and private residential custody facilities, by State, 1997, 1999, and 2001 (--) 485
6.10 Juveniles in public and private residential custody facilities, by race, ethnicity, and offense, United States, on Oct. 24, 2001 (6.9) 486
6.11 Juveniles in public and private residential custody facilities, by age and sex, United States, on Oct. 24, 2001 (6.10) 486
6.12 Juveniles in public and private residential custody facilities, by sex, race, ethnicity, and State, on Oct. 24, 2001 (6.11) 487
6.13 Number and rate (per 100,000 residents) of persons in State and Federal prisons and local jails, United States, 1985, 1990-2003 (6.12) 488
6.14 Number of jail inmates, average daily population, and rated capacity, by legal status and sex, United States, 1983-2003 (6.13) 489
6.15 Persons under jail supervision, by confinement status and type of program, United States, 1995-2003 (6.14) 490
6.16 Jail inmates, by confinement status, region, and jurisdiction, June 30, 1999 (6.15*) 491
6.17 Jail inmates, by sex, race, Hispanic origin, and conviction status, United States, 1990-2003 (6.16) 492
6.18 Characteristics of jail inmates, by conviction status, United States, 1983, 1989, 1996, and 2002 (--) 493
6.19 Most serious current offense of jail inmates, by conviction status, United States, 1983, 1989, 1996, and 2002 (--) 494
6.20 Most serious current offense of jail inmates, by sex, race, and Hispanic origin, United States, 2002 (--) 495
6.21 Percent of jail inmates reporting drug use, by type of drug and frequency of use, United States, 1996 and 2002 (--) 496
6.22 Percent of jail inmates reporting alcohol use, by sex, race, Hispanic origin, and most serious offense, United States, 1996 and 2002 (--) 496
6.23 Family background of jail inmates while growing up, United States, 1996 and 2002 (--) 496
6.24 Jail inmates, by sex, race, Hispanic origin, region, and jurisdiction, June 30, 1999 (6.17*) 497
6.25 Jails and jail inmates in Indian country, by selected characteristics, United States, midyear 1998-2002 (6.19) 498
6.26 Jail inmates known to be positive for the human immunodeficiency virus (HIV), by region and State, June 30, 1993 and 1999 (6.20*) 499
6.27 Deaths and AIDS-related deaths among local jail inmates, by region and State, July 1, 1998 to June 30, 1999 (6.21*) 499
6.28 Number and rate (per 100,000 resident population in each group) of sentenced prisoners under jurisdiction of State and Federal correctional authorities on December 31, by sex, United States, 1925-2003 (6.22) 500
6.29 Rate (per 100,000 resident population) of sentenced prisoners under jurisdiction of State and Federal correctional authorities on December 31, by region and jurisdiction, 1980, 1984-2003 (6.23) 501
6.30 Prisoners under jurisdiction of State and Federal correctional authorities, by region and jurisdiction, Dec. 31, 2002 and 2003 (6.24) 502
6.31 Prisoners in Federal, State, and private adult correctional facilities, by type of facility and sex of prisoner, United States, June 30, 1995 and 2000 (6.25*) 503
6.32 State and Federal prisoners housed in private facilities and local jails, by jurisdiction, on Dec. 31, 2002 and 2003 (6.26) 504
6.33 Rate (per 100,000 U.S. resident population in each group) of sentenced prisoners under jurisdiction of State and Federal correctional authorities, by sex, race, Hispanic origin, and age group, United States, 2003 (6.27) 505
6.34 Prisoners in Federal, State, and private adult correctional facilities, by race and Hispanic origin of prisoner, and region, United States, June 30, 2000 (6.28*) 505
6.35 State and Federal prisoners reporting prior possession of firearms, by type of firearm, United States, 1997 (6.29*) 506
6.36 State and Federal prisoners reporting possession of firearms during current offense, by type of offense, United States, 1991 and 1997 (6.30*) 506
6.37 State and Federal prisoners reporting possession of firearms during current offense, by offense, United States, 1997 (6.31*) 506
6.38 Source of firearms possessed by State prisoners during current offense, United States, 1991 and 1997 (6.32*) 506
6.39 Prisoners under age 18 in State prisons, by sex, United States, midyear 1990, 1995, and 1999-2003 (--) 507
6.40 Prisoners under age 18 in State and private adult correctional facilities, by type of facility, security level, and region, United States, June 30, 2000 (6.33*) 507
6.41 Female prisoners under jurisdiction of State and Federal correctional authorities, by region and jurisdiction, on Dec. 31, 1990, 1995, 2000-2003 (6.34) 508
6.42 Noncitizens in State and Federal prisons, United States, at midyear 1998-2003 (--) 509
6.43 Mean maximum sentence, mean time served, and percent of sentence served for violent offenders, by State, 1993, 1996, and 1999 (6.37*) 510
6.44 Mean sentence length and mean time served for first releases from State prison, by offense, United States, 1990 and 1999 (6.38*) 511
6.45 Educational attainment for those in State and Federal prisons, in local jails, on probation, and in the general population, United States, selected years (6.39*) 511
6.46 Participation in education programs for those in State and Federal prisons, in local jails, and on probation, by type of program, United States, selected years $\left(6.40^{*}\right) 512$
6.47 Characteristics of prisoners released in 1994 from prisons in 15 States (6.41*) 513
6.48 Recidivism rates of prisoners released in 1994 from prisons in 15 States, by amount of time after release recidivism occurred and outcome (6.42*) 513
6.49 Recidivism rates of prisoners released in 1994 from prisons in 15 States, by selected prisoner characteristics (6.43*) 514
6.50 Recidivism rates of prisoners released in 1994 from prisons in 15 States, by most serious offense for which released (6.44*) 515
6.51 Rearrest rates of prisoners released in 1994 from prisons in 15 States, by most serious offense for which released and charge at rearrest $\left(6.45^{*}\right) 516$
6.52 Recidivism rates of State prisoners released in 1983 and 1994, by offense type (6.46*) 516
6.53 Characteristics of Federal prisoners, United States, yearend 1995, 1999-2003 (6.47) 517
6.54 Characteristics of Federal prisoners, by type of facility, United States, yearend 2003 (6.49) 518
6.55 Security level of facilities housing Federal prisoners, by sex and race of prisoner United States, yearend 2002 (6.51*) 518
6.56 Type of commitment offense among Federal prisoners, by sex and race of prisoner, United States, yearend 2003 (6.53) 519
6.57 Federal prison population, and number and percent sentenced for drug offenses, United States, 1970-2004 (6.54) 519
6.58 Time served to first release by Federal prisoners, by offense, United States, fiscal year 2001 (6.55) 520
6.59 Mean time served to first release by Federal prisoners, by offense and characteristics, United States, fiscal year 2001 (6.56) 521
6.60 Immigration offenders in Federal prison and average time to be served, United States, 1985-2000 (6.57*) 522
6.61 Detainees under Bureau of Immigration and Customs Enforcement (ICE) jurisdiction, by type of facility, Dec. 31, 1995, 2000-2003 (6.58) 522
6.62 Drug and alcoholism treatment facilities and clients in treatment, by type of care received and jurisdiction, on Mar. 29, 2002 (6.59) 523
6.63 Offenders in State sex offender registries, by State, 1998 and 2001 (6.60*) 524
6.64 Prisoners under jurisdiction of U.S. military authorities, by branch of service, Dec. 31, 1996-2003 (6.61) 525
6.65 Rate (per 100,000 adult residents) of adults on parole, United States, 1981-2003 (6.62) 525
6.66 Adults on parole under State and Federal jurisdiction, by region and jurisdiction, 2003 (6.63) 526
6.67 Percent of State parole discharges successfully completing supervision, by method of release from prison, United States, 1990-99 (6.65*) 527
6.68 Offenders returning to Federal prison within 3 years of release, United States, 1986-97 (6.67*) 527
6.69 Offenders returning to Federal prison within 3 years of release, by demographic characteristics, conviction offense, and type of release, United States, 1986-97 (aggregate) ( $6.68^{*}$ ) 527
6.70 Federal supervised release terminations, by outcome and offense, United States, tiscal year 2001 (6.69) 528
6.71 Federal parole terminations, by outcome and offense, United States, fiscal year 2001 (6.70) 529
6.72 State correctional facilities providing mental health screening and treatment, by region and State, June 30, $2000\left(6.71^{*}\right) 530$
6.73 Prisoners receiving mental health treatment in State correctional facilities, by region and State, June 30, 2000 (6.72*) 531
6.74 State and Federal prisoners known to be positive for the human immunodeficiency virus (HIV) and confirmed AIDS cases, by region and jurisdiction, 1995-2001 (6.73) 532
6.75 State and Federal prisoners known to be positive for the human immunodeficiency virus (HIV), by sex, region, and jurisdiction, 2001 (6.74) 533
6.76 Number and rate (per 100,000 prisoners) of deaths among State and Federal prisoners, by cause of death, United States, 2001 (--) 533
6.77 Number and rate (per 100,000 prisoners) of AIDS-related deaths among State and Federal prisoners, United States, 1991-2001 (--) 533
6.78 Number and rate (per 100,000 prisoners) of deaths and AIDS-related deaths among State prisoners, by region and State, 1995 and 2001 (6.75) 534
6.79 Number of murders and nonnegligent manslaughters, persons under death sentence, executions, and other death sentence dispositions, United States, 19722003 (6.76) 535
6.80 Prisoners under sentence of death, by race, ethnicity, and jurisdiction, on Apr. 1, 2004 (6.77) 535
6.81 Prisoners under sentence of death, by demographic characteristics, prior felony conviction history, and legal status, United States, on Dec. 31, 1996-2003 (6.78) 536
6.82 Prisoners under sentence of death, by race, region, and jurisdiction, on Dec. 31, 2002 and 2003 (6.79) 537
6.83 Hispanic and female prisoners under sentence of death, by State, 2002 and 2003 (6.80) 538
6.84 Prisoners executed, by jurisdiction, 1930-Dec. 31, 2003 (aggregate) (6.81) 539
6.85 Prisoners executed under civil authority, by region and jurisdiction, 19302003 (6.82) 540
6.86 Prisoners executed under civi authority, by race and offense, United States, 1930-98 (6.83) 542
6.87 Methods of execution in States authorizing the death penalty, by State, 2003 (6.84) 543

## Section 1

## Characteristics of the criminal justice systems

The administrative aspects of law enforcement, judicial, and correctional systems are featured in this section. Financial, budgetary, and employment data for local, State, and Federal levels provide both detailed information and a glimpse of the complex organizational and structural components of various agencies within the criminal justice systems. In addition, selected statutory provisions regarding alcohol use and driving are included.

The section begins with data from surveys of justice system governmental employment and financial expenditures, prepared for the Bureau of Justice Statistics (BJS) by the U.S. Census Bureau. These tables provide extensive information on criminal justice system total and per capita expenditures at the Federal, State, and local levels relating to police protection, judicial and legal services, and correctional activities. In addition, budgetary figures are shown for Federal criminal justice agencies, including Federal funding for drug control programs and the Edward Byrne law enforcement assistance program. The number of persons employed by police departments, judicial and correctional systems, as well as related payroll data are presented for Federal, State, and local levels of government and for each individual State.

The second portion of the section contains information on law enforcement agencies and police personnel from two BJS-sponsored programs: the 2000 Census of State and Local Law Enforcement Agencies and the 2000 Law Enforcement Management and Administrative Statistics (LEMAS) survey. Tables from the 2000 census program display by-State listings of the number of agencies and employees for State, local, sheriffs, and special police agencies. The LEMAS survey tables provide aggregate-level data for local law enforcement agencies and sheriffs' offices. These include statistics on a variety of topics such as the number of agencies and employees, the number of officers assigned to respond to calls for service, demographics of sworn officers, educational and training requirements, salaries and operating budgets, firearms and nonlethal weapons authorized by police and sheriffs' departments, and presence of community policing and school resource units. New this year are tables presenting data on demographics, salaries, and operating expenditures for State law enforcement agencies. Tables showing the proportion of female and minority officers employed in large law enforcement agencies and a table listing police departments operated by Indian tribes also are featured.

Next, surveys conducted by the International City/County Management Association provide aggregate-level data on police salaries, employment, and administrative expenditures for several levels of municipal government, including per capita and average expenditures for police department personnel. This section also includes counts of fulltime police employees and officers, collected through the FBI's Uniform Crime Reporting Program. The following set of tables lists Federal agencies with law enforcement authority and characteristics of officers employed by these agencies, including staff and budget information for the Drug Enforcement Administration. Trend data on workload, staffing, and budget are presented for the U.S. Marshals Service.

The next segment of the section addresses the courts and the judiciary. Information on judges in Federal courts includes current salaries and detailed demographic data on appointees to Federal district and appellate court judgeships, dating back to President Johnson's administration. Workload data for the Federal judiciary include a 21-year trend on the number of criminal cases filed in each judicial district as well as trend data on duties performed by Federal magistrate judges. The BJS-sponsored National Survey of Prosecutors provides information on budgets and personnel of prosecutors' offices as well as on the utilization of DNA evidence in felony cases processed in State courts. Next are tables showing salaries, term lengths, and selection and retention processes for those holding judicial office in each State. Other tables in this segment include data on jury utilization, juror fee schedules, and trend data for various types of investigative reports filed by Federal probation officers.

Concluding this section is information focusing on incarceration. Included are data on the number of jail facilities, jail capacities and occupation levels, and the number and characteristics of jail personnel. Featured in this edition are results from the BJS-sponsored 2000 Census of State and Federal Correctional Facilities, including selected characteristics of Federal, State, and private correctional facilities in the United States. Following this are tables focusing on Federal prisons, including demographic characteristics of correctional officers and staff, and the number and location of facilities operated by the Federal Bureau of Prisons. A table reporting on educational programs in State, Federal, and private prisons, as well as local jails, also is included here. Next, information is presented from BJS' Firearm Inquiry Statistics program on applications and rejections for firearms transfers. The final tables in the section describe State statutes on alcohol use and driving, and blood alcohol concentration tests in fatal automobile accidents.

| 2001 | $167,113^{\text {c }}$ | $30,443^{\text {c }}$ | NA | 63,372 | 83,377 | NA | NA |

Note: These data were collected from government documents and from the annual surveys of government finances and employment conducted by the U.S. Census Bureau. Justice data are extracted from these sources by the Census Bureau for the U.S. Department of Justice, Bureau of Justice Statistics. The Federal Government, all State governments, and a sample of county, municipal, and township governments were included in the surveys. Since not all local governments were included in the surveys, these data are subject to sampling variation. Duplicative transactions between levels of government are excluded from the total for all governments, the State and local total, and the local total. Such intergovernmental expenditure consists of payments from one government to another and eventually will show up as a direct expenditure of a recipient government. The fiscal year tor the Federal Government begins October 1 and ends September 30 ; see Appendix 1 for fiscal year beginning and end dates for States and local jurisdictions. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK. For survey methodology and definitions of terms, see Appendix 1.
a Detail may not add to total because of rounding.
${ }^{\text {b }}$ Data for local governments are estimates subject to sampling variation.
${ }^{\text {c }}$ Beginning in 1998, expenditure data for the Federal Government are taken directly from the Budget of the United States Government rather than from U.S. Census Bureau compilations. Therefore, the "1otal all governments" and "Federal" categories are not directly. comparable to prior years.

Note: See Note, table 1.1. Duplicative transactions between levels of government are excluded from the total for all governments, the State and local total, and the local fotal. Such intergovernmental expenditure consists of payments from one government to another and eventually will show up as a direct expenditure of a recipient government. The State government total for 1980 and 1981 includes a residual "other" category not displayed separately. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK. For survey methodology and definitions of terms, see Appendix 1.
${ }^{a}$ Detail may not add to total because of rounding
${ }^{6}$ Beginning in 1998, expenditure data for the Federal government are taken directly from the Budget of the United States Government rather than from U.S. Census Bureau compilations. Therefore, the "all governments" and "Federal" categories are not directly comparable to prior years.
${ }^{c}$ Data for local governments are estimates subject to sampling variation.

Note: See Note, table 1.1. For survey methodology and definitions of terms, see Appendix 1.
${ }^{3}$ Data for local governments are estimates subject to sampling variation
${ }^{6}$ The total category for each criminal justice activity, and for the total justice system, excludes duplicative intergovernmental expenditure amounts. This was done to avoid the arificial inflation that would result if an intergovernmental expenditure of a government were tabulated and then counted again when the recipient government(s) expended that amount. The intergovernmental expenditure categories are not totaled for this reason.

Note: See Note, table 1.1. For survey methodology and definitions of terms, see Appendix 1.
${ }^{\text {a }}$ Detail may not add to total because of rounding.
${ }^{\text {b }}$ Data for local governments are estimates subject to sampling variation.
${ }^{\text {c }}$ Beginning in 1998, expenditure data for the Federal Government are taken directly from the Budget of the United States Government rather than from U.S. Census Bureau compilations. Therefore, the "total all governments" and "Federal" categories are not directly comparable to prior years.

Table 1.6
Direct expenditures for State and local justice system activities
By type of activity and level of government, fiscal year 2000--Continued

| (Dollar amounts in thousands) |  |  |  |  |  |  |
| :---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  |  |  |  |  |  |  |

${ }^{\text {a }}$ Data for local governments are estimates subject to sampling variation.
${ }^{\text {b }}$ Includes outlays of States and all types of local governments including independent school districts and special districts, which are not displayed separately. The "local, total" categories, which include these districts, will not equal the sum of the "counties" and "municipalities" categories.

Note: See Note, table 1.1. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK. For survey methodology and definitions of terms, see Appendix 1.
${ }^{a}$ Detail may not add to total because of rounding.
${ }^{\text {b }}$ Population figures are for July 1 of each year from the U.S. Census Bureau, Current Population Reports. They are consistent with the 1980 and 1990 decennial enumerations. They do not include adjustments for census coverage errors. They may differ from population data taken from previous Justice Expenditure and Employment Extracts reports because those tables were developed when only preliminary estimates were available.

Note: These data are from the budget submitted by the President to Congress in 2004. The "budget authority" (actual or estimated) is the authority becoming available during the year to enter into financial obligations that will result in immediate or future outlays of Government funds. Spending is divided into two categories: discretionary spending and mandatory (direct) spending. Discretionary spending is controtled through the annual appropriations process and includes items such as funding for salaries and other operating expenses of Government agencies. Mandatory spending is controlled by authorizing legistation; the major entitlement programs such as Social Security. Medicare and Medicaid payments, unemployment insurance benefits, and farm price supports are examples of mandatory spending because payments for these programs are authorized in permanent laws. (Source Analytical Perspectives, Fiscal Year 2005, pp. 392, 393.) The negative figures appearing in the table represent Governmental receipts and collections such as court fines, customs duties, certain licensing fees, and various other collections from the public. These figures are deducted from the gross budget authority.
${ }^{\text {a }}$ Detail may not add to total because of rounding
${ }^{\text {b }}$ Includes Drug Enforcement Administration, Federal Bureau of
Investigation, Department of Homeland Security, Financial Crimes Enforcement Network, and interagency crime and drug enforcement programs.
${ }^{c}$ Department of Homeland Security.
${ }^{d}$ Internal Revenue Service.
${ }^{9}$ Federal prison system and detention trustee program.

Note: The Office of Justice Programs (OJP) is comprised of five program bureaus, six program offices, and a number of administrative support offices. The mission of OJP is to provide Federal leadership in developing the Nation's capacity to prevent and control crime, administer justice, and assist crime victims. OJJP develops, operates, and evaluates a wide range of innovative criminal and juvenile justice programs (including research and statistical programs) through partnerships with other Federal, State, and local agencies as well as national and community-based organizations. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK
${ }^{\text {a }}$ Detail may not add to total because of rounding.
includes effect of Gramm-Rudman-Hollings reductions.
${ }^{\text {chappropriations. }}$
${ }^{\text {d }}$ Includes rescission per Public Law 106-554.
${ }^{\text {e }}$ Reflects the total program level, which includes unused carryover earmarked by Congress for addition to appropriated amount.
${ }^{\text {f }}$ Includes $\$ 150$ million supplemental appropriation tor the Police Hiring Program
${ }^{9}$ Includes rescission per Public Law 106-113.
${ }^{h}$ A program to aid State and local law enforcement agencies in the exchange of intelligence information.

This previously was part of the Regional Information Sharing System.
Represents amount deposited in previous year.
${ }^{k}$ Collections totaled $\$ 985.2$ million, however, an obligation limitation of $\$ 500$ million was placed on total collections.
'Collections totaled $\$ 777$ million, however, an obligation limitation of $\$ 537.5$ million was placed on total availability.
mPreviously funded OJP programs may still be operational for either of the following reasons: (1) the program may be operating on funds appropriated in prior fiscal years; (2) the program may be subsumed under another program that is currently funded.
"A program authorized to provide funds, equipment, intelligence information, and/or personnel to a requesting State in the event of a law enforcement emergency.
${ }^{\circ}$ Funds transferred from the Office of National Drug Control Policy.
${ }^{\mathrm{P}}$ Refers to an appropriation to be allocated to States housing Mariel Cuban refugees in State correctional facilities.

Note: "Demand reduction" refers to programs and research related to a The data presented represent the following types of budget drug abuse treatment and prevention that are designed to reduce the demand for drugs. "Supply reduction" refers to a wide scope of law enforcement-related activities designed to reduce the supply of drugs. The fiscal year 2005 national drug control budget reflects a
restatement of reporting for 1996-2004 to reflect the removal of the authority: 1996-1999, "actual"; 2000-2003, "final" budget authority enacted in the prior year; 2004, current year "enacted"; and 2005, "requested" for the budget year under Byrne Grant program. The Byme program funding was removed from the drug control budget because States have discretion to use the funds in any of 29 specified purpose areas, many of which are not drug related (e.g., crime victim assistance). The effect of this restatement removes approximately $\$ 400$ to $\$ 500$ million per year from the Federal drug control budget. Also, the restatement includes the addition of the National Highway Traffic Safety Administration's Drug Impaired Driving program, which trains law enforcement officers and prosecutors in detecting and prosecuting drug-impaired drivers. (Source, pp. 4, 5.) Data for years prior to 2005 have been recalcu* lated by the Source to reflect these changes and therefore will differ from previous editions of SOURCEBOOK.

Note: The U.S. Department of Justice, Bureau of Justice Assistance (BJA), through the Edward Byrne Mernorial State and Local Law Enforcement Assistance Program, provides funds to State and local jurisdictions for the purposes of crime prevention and control, and improving criminal justice systems. Emphasis is placed on violent and drug-related crime, serious offenders, and the enforcement of State and local laws that establish offenses similar to those in the Federal Controlled Substances Act. Grants may provide support for personnel, equipment, training, technical assistance, and information systems for more widespread apprehension, prosecution, adjudication, detention, and rehabilitation of persons who violate such laws, and assistance to the victims of such crimes (other than compensation).
BJA makes program funds available through two types of grant programs: discretionar and formula. Discretionary funds are awarded directly to public and private agencies and private nonprofit organizations; formula funds are awarded to the States, which then make subawards to State and local units of government as well as to agencies and organizations. The above data reflect awards under the formula grant program and the minimum percentage that is required to be passed to local jurisdictions. (Source, 2002, pp. 1, 3.) The exceptions are Puerto Rico, the Virgin Isiands, Guam, American Samoa, and the Northern Marianas; in these jurisdictions Byrne formula awards are retained and managed at the "State" level.

Note: See Note, table 1.1. The U.S. Census Bureau changed the reference month for employment and payroll data from October to March after the 1995 data collection. Data for 1995 and previous years refer to the month of October. No data were collected during the period of transition, consequently, there are no 1996 employment and payroll data. Beginning in 1997, employment and payroll data are for the month of March. Some data have been revised by the Source and may differ from previous editions of SOURCE BOOK. For survey methodology and definitions of terms, see Appendix 1.
a Detail may not add to total because of rounding.

Note: See Notes, tables 1.1 and 1.18. For survey methodology and definitions of terms, see Appendix 1.

Data for local governments are estimates subject to sampling variation.
Includes employment of States and all types of local governments including independent school districts and special districts, which are not displayed separately. The "local, total" categories, which include these districts, will not equal the sum of the "counties" and "municipalities" categories.

Justice system employment of independent school districts and special districts (primarily for special police forces) are not available.

State and local law enforcement agencies and employees
By type of agency, United States, 2000

| Type of agency | Number of agencies | Number of employees |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Full-time |  |  | Part-time |  |  |
|  |  | Total | Sworn | Nonsworn | Total | Sworn | Nonsworn |
| Total | 17,784 | 1,019,496 | 708,022 | 311,474 | 99,731 | 42,803 | 56,928 |
| Local police | 12,666 | 565,915 | 440,920 | 124,995 | 62,110 | 27,323 | 34,787 |
| Sherift | 3,070 | 293,823 | 164,711 | 129,112 | 22,737 | 10,300 | 12,437 |
| Primary State | 49 | 87,028 | 56,348 | 30,680 | 817 | 95 | 722 |
| Special jurisdiction | 1,376 | 69,650 | 43,413 | 26,237 | 13,583 | 4,667 | 8,916 |
| Texas constable | 623 | 3,080 | 2,630 | 450 | 484 | 418 | 66 |

Note: These data are from the 2000 Census of State and Local Law Entorcement Agencies. The data were collected for the U.S. Department of Justice, Bureau of Justice Statistics and the Office of Community Oriented Policing Services by the U.S. Census Bureau. The 2000 Census included all State and local agencies employing at least one full-time sworn officer (or the equivalent in part-time officers) with general arrest powers. The pay period that incluced June 30,2000 was the reference date for all data. The final database includes responses from 12,666 general purpose local police departments, 3,070 sheriffs' offices, 49 primary State police depart ments, 1,376 special jurisdiction police agencies, and the 623 county constable offices in Texas. Hawaii does not have a State police agency; the Hawaii Department of Public Satety primarily provides court support services.

A local police department was defined as a general purpose police department operated by a municipal, county, tribal, or regional (multijurisdiction) government. A State police department was defined as the general purpose police agency operated by the State. Included among special police agencies are both State and local agencies policing special geographic jurisdictions such as airports, parks, transit systems, public schools, colleges and universities, and public housing. Also included are agencies with special enforcement responsibilities such as those pertaining to natural resource conservation or alcoholic beverage control and special investigative units such as those operated by prosecutors' offices. Texas constables are elected otficials who are responsible for providing services tor the justice, county, and district courts. About half of constable offices also performed law enforcement functions. Of the approximately 760 county constable oftices in Texas, 623 employed sworn personnel as of June 2000.

| Less than 2,500 | 5,297 | 41.8 | 18,007 | 4.1 | 2,373 | 1.9 |

Note: These data are from the 2000 Law Enforcement Management and Administrative Statistics (LEMAS) survey and were collected for the U.S. Department of Justice, Bureau of Justice Statistics and the Office of Community Oriented Policing Services by the U.S. Census Bureau. The LEMAS survey collects data from a nationalily representative sample of publicly funded State and local law enforcement agencies in the United States. A total of 881 State and local law enforcement agencies with 100 or more sworn officers were included in the survey. For agencies with fewer than 100 sworn officers, a nationally representative sample was drawn. A stratified random sample based on type of agency (local police or sheriff), size of population served, and number of sworn personnel was used. A total of 2,985 agencies responded to the survey yieiding a $97.4 \%$ response rate. The final database includes responses from 1,975 locat police departments, 961 sheriffs' offices, and the 49 primary State police agencies. Hawaii does not have a State police agency. These data, however, exclude State and local law enforcement agencies that serve special jurisdictional areas or have limited enforcement responsibilities. Data from agencies with fewer than 100 sworn personnel were derived from a sample and therefore are subject to sampling variation. The reference date for the survey was June $30,2000$.

A "local police" department was defined as a general purpose police department operated by a municipal, county, tribal, or regional (multijurisdiction) government. "Sheriffs" offices included were those operated by county or independent city governments. A "State police* department was defined as the general purpose police agency operated by the State. "Sworn" employees are those with general arrest powers.

Note: See Note, table 1.33. These data are from the 1990 and 2000 Law Enforcement Management and Administrative Statistics (LEMAS) surveys sponsored by the U.S. Department of Justice, Bureau of Justice Statistics. Population data are from the U.S. Census Bureau decennial censuses. These data include the 62 cities that had a population of a least 250,000 in both the 1990 and 2000 decennial censuses. In mos cases, the data represent a city and the local police department that serves it

Table 1.56

${ }^{\text {a }}$ The officer-to-resident ratios used to measure minority representation were calculated by dividing the percent of an agency's full-time sworn personnel who were members of a racial or ethnic group by the percentage in the population served who belong to that group. In some
instances, this resulted in a value greater than 1 (that is, the group was over-represented).

Table 1.59
Full-time personnel, sworn officers, officers assigned to respond to calls, officers per
100,000 residents, and percent change in full-time personnel in State law enforcemen
agencies

| Agency | Full-time personnel |  |  | Officers assigned to respond to calls |  | State population ${ }^{\text {a }}$ | $\begin{aligned} & \text { Otficers per } \\ & 100,000 \\ & \text { residents }^{\text {b }} \end{aligned}$ | Percent change in number of full-time personnel, 1996 to 2000 |  |  |

| Wyoming Highway Patrol | 15,800,000 | 53,469 | 106,757 | 32 |

Note: See Note, table 1.33. Budget data are for the calendar or fiscal year that included June 30, 2000. Capital expenditures such as equipment purchases and construction costs are not included. Computation of per employee expenditure includes all agency employees with a weight of .5 assigned to part-time employees. Computation of per officer expenditure includes all sworn agency employees with a weight of .5 assigned to part-time officers.
Computation of per resident expenditure is based on State population. In some cases, data are estimates provided by the agency.

Management and Administrative Statistics, 2000: Data for Individual State and Local Agencies with 100 or More Officers, NCJ 203350 (Washington, DC: U.S. Department of Justice, 2004), p. 245. Table adapted by SOURCEBOOK staff.

Number and rate (per 1,000 residents and per 100 square miles) of full-time sworn personnel, service population, and reservation land area in the $\mathbf{2 0}$ largest tribally operated law enforcement agencies

United States, 2000

|  |  |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: |

Note: See Note, table 1.27. Land area data are from the U.S. Census Bureau 2000 Census and include reservation land only.
${ }^{\mathrm{a}}$ The service population is the total number of enrolied tribal members and members from other tribes who live on or near the reservation and are eligible to use the tribe's Bureau of Indian Affairsfunded services. The service population probably underestimates the population served by tribally operated law enforcement agencies because many agencies serve non-Indian residents and other persons using roads, stores, casinos, and other public places on tribal land.
${ }^{6}$ Reservation land consists of less than 1 square mile.
 Agencies.
Personnel data for this agency are from the 1999 Law Enforcement Management and Administrative Statistics (LEMAS) survey.

Note: These data were collected through a mail survey conducted by the International City/County Management Association in January 2003. Of the 3,215 municipalities surveyed, 1,645 returned the questionnaires for a response rate of $51 \%$. The term "cities" refers to cities, villages, towns, townships, and boroughs. For definitions of terms, a list of States in regions, and detail of survey response rates, see Appendix 2.
${ }^{\text {a }}$ Includes uniformed and civilian/nonunitormed personnel.

Note: These data are collected annually by the FBI Uniform Crime Reporting Program. "Fulltime law entorcement employees" includes both law entorcement officers and civilian employees. Law enforcement officers include all "fult-time, sworn personnel with full arrest powers." This excludes persons performing guard or protection duties (e.g., school crossing guards) who are not paid from police funds. "Civilian employees" includes persons such as clerks, radio dispatchers, meter attendants, stenographers, and mechanics. Persons not paid from police funds are excluded. Employees on leave with pay also are excluded. (U.S. Department of Justice, Federal Bureau of Investigation, Uniform Crime Reporting Handbook (Washington, DC: USGPO, 1984), pp. 71, 72.) These data are for employees who were on the payroll on Oct. 31, 2002. For a list of States in geographic divisions, see Appendix 3.
${ }^{\text {a }}$ Includes civilians.
${ }^{\text {b }}$ Includes law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area; excludes all metropolitan agencies associated with a central city. The agencies associated with suburban areas also will appear in other groups within this table.
${ }^{c}$ Includes both suburban and rural counties.
Source: U.S. Department of Justice, Federal Bureau of Investigation, Crime in the United States, 2002 (Washington, DC: USGPO, 2003), p. 324.

By geographic division and population group, on Oct. 31, 2002

Table 1.68
Full-time law enforcement employees
By sex and population group, on Oct. 31, 2002

| (2002 estimated population) |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Population group |

ancludes law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area; excludes all metropolitan agencies associated with a central city. The agencies associated with suburban areas also will appear in other groups within this table.

Table 1.69
Entrance and maximum salaries, and mean number of years to reach maximum
salary, for police officers in cities with populations of $\mathbf{1 0 , 0 0 0}$ or more

By population group, geographic division, and metro status, United States, as of Jan. 1, 2003

Note: See Note, table 1.64. The "entrance salary" refers to the annual salary paid during the first 12 months of employment with the department as a sworn police officer (excluding uniform allowance, holiday pay, hazard pay, or other additional compensation). The "maximum salary" refers to the highest annual salary paid to uniformed personnel who do not hold any promotional rank (excluding uniform allowance, holiday pay, hazard pay, or any other additional compensation). The mean is calculated by dividing the total number of salaries into the total amount paid in salaries. The median is the salary that marks the point below which and above which $50 \%$ of all the salaries fall. When there is an even number of observations, the mean of the two middle observations is reported. The first quartile salary is the salary below which $25 \%$ of all salaries fall; the third quartile salary is the salary below which $75 \%$ of all the salaries fall. For definitions of terms, a list of States in regions, and detail of survey response rates, see Appendix 2.

| Council-manager | 161 | 45,586 | 43,260 |
| Town meeting | 5 | 38,629 | 35,443 |

Note: These data are from a survey of local government officiats conducted by the Interna tional City/County Management Association beginning in July 2003. Of the 8,050 cities surveyed, 4,172 returned the questionnaires for a response rate of $52 \%$. The mean salary level is calculated by dividing the total number of salaries into the total amount paid in salaries. The median salary level is the salary that marks the point below which and above which $50 \%$ of all salaries fall. When there is an even number of observations, the mean of the two middie observations is reported. Classifications having less than three cities reporting are excluded by the Source because meaningful statistics cannot be computed. Therefore, the number reporting in subcategories does not always add to the total reporting. The term "cities" refers to cities, villages, towns, townships, and boroughs. For definitions of terms, a list of States in regions, and detail of survey response rates, see Appendix 2.

Note: The U.S. Marshals Service (USMS) is a law enforcement agency performing duties for the Executive Branch of the Federal Government. The agency executes all warrants issued by the Federal courts, conducts fugitive investigations, and maintains custody of ail Federal pretrial detainees. In addition, the USMS is responsible for prisoner processing and detention, transportation and production of prisoners, prolection of Federal judiciary, Federal witness security, the execution of court orders, and management of related Federal Government seizures. Further responsibilities include escorting missile convoys, suppressing prisoner disturbances in Federal prisons, and arresting dangerous fugitives.
"Prisoners received" is the number of prisoners taken into USMS custody. "Prisoner productions is the number of prisoners presented for appearance at all judicial proceedings, meetings with attomeys, transported for medical care, transferred between sub-offices, and transferred between detention facilities. "Prisoners in custody" is the number of prisoners remanded into USMS custody at month end, averaged over a 12 -month period. "Inter-district prisoner trips" is the total number of trips assigned to each district. These trips include movements by commercial airlines, chartered aircraft, and various modes of ground transportation. "Felony warrants received" includes felony warrants issued by Federal courts for escape, bond default, probation or parole violations, DEA fugitive warrants, and warrants generated by other Federal agencies without arrest powers. "Felony warrants closed" is the number of USMS arrests plus the number of arrests by other agencies, and dismissals in felony cases. "Process served" is the number of Federal or private court orders attempted or successtully served by the USMS in person or by mail. "Seized properties received" is the number of properties that were administratively seized by the USMS or seized by other Federal agencies and referred to the USMS for custody and disposal, as well as properties seized pursuant to judicial forfeiture actions. Judicial forfeiture actions are those in which the property is seized, held for custody, and disposed of by the USMS. These properties include real property, personal property, vehicles, jewelry, and cash, etc. (Source 2000, pp. 107. 108.)

Note: The U.S. attorney is the highest ranking law enforcement official in each of the 94 Federal judicial districts. Each U.S. attorney, under the direction of the U.S. Attorney General, is responsible for establishing law enforcement priorities, and for carrying out the prosecution and litigation activities within their respective districts. Each U.S. attorney also is the chief litigator representing the United States in civil judicial proceedings in the district. U.S. attorneys direct and supervise the work of the assistant U.S. attorneys and staff of the district's offices.
${ }^{\text {a }}$ These data represent full-time equivalent employees.
${ }^{6}$ Total hours U.S. attorneys devoted to court-related activities including criminal and civil trials, special hearings, grand jury proceedings, witness preparation, and court travel time.

Note: These data were compiled from a variety of sources. Primarily used were questionnaires completed by judicial nominees for the U.S. Senate Judiciary Committee, transcripts of the confirmation hearings conducted by the Committee, and personal interviews. In addition, an investigation was made of various biographical directories including The American Bench (Sacramento: R.B. Forster), Martindale-Hubbell Law Directory (Summit, NJ : Martindale-Hubbell, Inc.), national and regional editions of Who's Who, The Judicial Staff Directory, and tocal newspaper articles.

Law firms are categorized according to the number of partners/associates: 25 or more associates for a large firm, 5 to 24 associates for a medium firm, and 4 or less for a small firm. Percent subtotals for occupational experience sum to more than 100 because some appointees have had both judicial and prosecutorial experience.

The American Bar Association's (ABA) ratings are assigned to candidates after investigation and evaluation by the ABA's Standing Committee on Federal Judiciary, which considers prospective Federal judicial nominees only upon referral by the U.S. Attorney General or at the request of the U.S. Senate. The ABA's Committee evaluation is directed primarily to professional qualifications--competence, integrity, and judicial temperament. Factors including intellectual capacity, judgment, writing and analytical ability, industry, knowledge of the law, and professional experience are assessed. Prior to President George H.W. Bush's administration, the ABA's Standing Committee on

Federal Judiciary utilized four ratings: exceptionally well qualified, well qualified, qualified, and not qualified. Starting with that administration, the ABA Standing Committee on Federal Judiciary dropped its "exceptionally well qualified" rating and "well qualified" became the highest rating. Nominees who previously woutd have been rated "exceptionally well qualified" and nominees who woutd have been rated "well qualified" now receive the same rating. The "exceptionally well qualified" and "well qualified" categories have been combined for all administrations' appointees, and therefore figures prior to President George H.W. Bush's administration may differ from previous editions of SOURCEBOOK. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK.
${ }^{\text {a }}$ Percents may not add to 100 because of rounding.
${ }^{\mathrm{b}}$ No ABA rating was requested for one Johnson appointee.

Note: The Federal Magistrates Act (28 U.S.C. 636(b)) provides the author- ${ }^{c}$ Prior to 2000, data do not include status conferences; beginning ity under which magistrate judges assist courts in the performance of "additional duties." This authority was both broadened and clarified by Public Law 94-577, Oct. 21, 1976, and by new procedural rules governing most habeas corpus proceedings in the district courts, effective Feb. 1, 1977. The changes make clear the ability of the parties of a civil case to consent to have the case referred to a magistrate for trial as a special matter; the changes also empower magistrates to conduct evidentiary hearings in prisoner petition cases. Additionally, the role of magistrates in providing pretrial assistance to district judges in both dispositive and non-dispositive matters has been clarified. A magistrate's authority to conduct arraignments following indictment in a criminal case is provided under Rule 10 of the Federal Rules of Criminal Procedure in 86 Districts. Data for 1990 are reported for the 12 -month period ending June 30. Beginning in 1997, data are reported for the Federal fiscal year, which is the 12 -month period ending September 30 . Some data have been revised by the Source and will differ from previous editions of SOURCEBOOK.
${ }^{3}$ Data for 1990 include material witness hearings only; data for 1997-2003 include material witness hearings and attorney appointment hearings.
${ }^{\text {b }}$ Prior to 2000, data include contested motions only; beginning in 2000 , data include both contested and uncontested motions.

|  | prosecutors' offices |

Note: The 2001 National Survey of Prosecutors (NSP), sponsored by the U.S. Department of Justice, Bureau of Justice Statistics, was a census of the 2,341 chief prosecutors in the United States that handled felony cases in State courts of general jurisdiction. In 2001, there were 2,341 prosecutorial districts in the Nation, each with one chief prosecutor. The National Opinion Fesearch Center (NORC) conducted the data collection for the NSP in May and June 2001 through mailed questionnaires. After the initial mailings, an extensive followup was required to obtain a returned survey from each of the prosecutors' offices. Overall, 2,243 or $96 \%$ of the 2,341 prosecutors' offices nationwide responded to the 2001 NSP. Data from the remaining 98 prosecutors' offices were retrieved from a secondary source (such as via the Internet or by contacting a different county office), or imputed from existing data.
a Detail may not add to $100 \%$ because of rounding

Note: The salaries reported refer to associate justices of the highest courts, associate judges of intermediate appellate courts, and judges of general juristiction trial courts. Where possible, the data presented are actual salaries. In jurisdictions where some judges receive supplements, the salary figures are the most representative available: the base salary, the midpoint of a range between the lowest and highest supplemented salaries, or the median. National averages for the highest courts and general trial courts are based on figures for the 50 States and the District of Columbia. For intermediate appellate courts, the average is based on the 39 States that have such courts.

Table 1.91
Method of selection and length of initial and retention terms of the highest appellate
court justices

By State, as of June 2004--Continued

Note: These data were compiled through a survey of State statutes; they were then verified by personnel of the American Judicature Society.
"Initial selection" is defined as the constitutional or statutory method by which judges are selected for a full term of office. "Retention" refers to the method used to select judges for subsequent terms of office. "Partisan election" refers to elections in which the judicial candidates' names appear on the ballot with their respective party labels; "nonpartisan election" refers to elections in which no party labels are attached to judicial candidates' names on the ballot. Caution should be used when interpreting partisan and nompartisan designations as definitions may vary. "Retention election" refers to an election in which a judge runs unopposed on the ballot and the electorate votes solely on the question of the judge's continuation in office. In a retention election, the judge must win a majority of the vote in order to serve a full term, except in llinois which requires $60 \%$ and New Mexico which requires $57 \%$. "Nominating commission" is a merit selection procedure that refers to the nonpartisan body, composed of lawyers and nonlawyers. which actively recruits, screens, and nominates prospective judicial candi dates to the executive for appointment. The nominating commission method of selection was established by executive order in Delaware, Maryland, and Massachusetts and by constitutional or statutory authority in all other jurisdictions. Readers should consult State Constitutions for special provisions and procedures related to issues of premature vacancy (e.g., death, resignation) and other circumstances.
${ }^{a}$ In States that use nominating commissions, selection requirements may vary. The governor may make the appointment solely, with senate confirmation, or with legislative confirmation.
${ }^{6}$ Initial appointment is made by the President of the United States and confirmed by the Senate. At expiration of term, judge's performance is reviewed by the commission. Those found "well qualified" are automatically reappointed. For those found "qualified," the President may nominate for an additional term, subject to Senate confirmation. If the President does not wish to reappoint the judge, the District of Columbia Nomination Commission compiles a new list of candidates.
${ }^{c}$ Although party affiliation of judicial candidates appears on ballots, judicial primaries are open and candidates generally do not solicit party support. This gives judicial elections a nompartisan character.
${ }^{d}$ The highest State court is named the Court of Appeals.
${ }^{\theta}$ Party affiliations of judicial candidates are not listed on the general election ballot so the election is technically nonpartisan. However, candidates are nominated at party conventions.
Subject to approval of an elected five-member executive councit.
${ }^{9}$ Party affiliations of judicial candidates are not listed on the general election ballot, so the election is technically nonpartisan. However, candidates run in partisan primary elections.
${ }^{\text {h }}$ Oklahoma and Texas have two courts of final jurisdiction: the supreme court, which has final civil jurisdiction; and the court of criminal appeals, which has final criminal jurisdiction. The selection process is the same for both.
The Judicial Merit Selection Commission screens and then recommends a list of judicia! candidates to the legislature. The legislature votes only on the list submitted by the commission. If all candidates on the list are rejected, the process begins again with the commission.

Table 1.93
Method of selection and length of initial and retention terms of general jurisdiction
court judges

By State and name of court, as of June 2004--Continued

Note: See Note, table 1.91. Courts of general jurisdiction are defined as having unlimited civil and criminal jurisdiction (Larry C. Berkson, "Judicial Selection in the United States: A Special Report," Judicature 64 (October 1980) p. 178).
${ }^{\text {a }}$ In States that use nominating commissions, appointment procedures may vary. The governor may make the appointment solely, with senate confirmation, or with legislative confirmation.
${ }^{\text {b }}$ Counties with populations less than 250,000 select and retain superior court judges in nonpartisan elections for 4 -year terms.
${ }^{c}$ Local electors can choose either nonpartisan elections or gubernatorial appointment.
dudge must be elected to a full term on a nonpartisan ballot at the next general election. If the election is not contested, the incumbent's name does not appear on the ballot.
${ }^{\text {e }}$ Initial appointment is made by the President of the United States and confirmed by the Senate. At expiration of term, judge's performance is reviewed by the commission. Those found "well qualified" are automatically reappointed. For those found "qualified," the President may nominate for an additional term, subject to Senate confirmation. If the President does not wish to reappoint the judge, the District of Columbia Nomination Commission compiles a new list of candidates.
'Voters in each circuit may opt for merit selection and retention of circuit court judges.
${ }^{9}$ Circuit court associate judges are appointed by the circuit judges in each circuit for 4 -year terms, as provided by supreme court rule.
In Vanderburgh County initial selection and retention are by nonpartisan election.
${ }^{\text {'A A nominating commission is used for the superior court judges of Lake and St. Joseph Counties, In }}$
Allen and Vanderburgh Counties the election is nonpartisan.
${ }^{j}$ In Lake and St. Joseph Counties each appointed judge serves until the next general election but not less than 2 years.
Konpartisan elections are used in Allen and Vanderburgh Counties. Retention elections are used in Lake and St. Joseph Counties.
${ }^{\prime}$ Seventeen of 31 districts use a nominating commission for district judge selection; the remaining 14 select district judges in partisan elections.
${ }^{m}$ Fourteen of 31 districts use partisan elections.
${ }^{n}$ Although party affiliation of judicial candidates appears on ballots, judicial primaries are open and candidates generally do not solicit party support. This gives judicial elections a nonpartisan character. ${ }^{\text {o }}$ Nominating commissions are used for selecting circuit court judges in Jackson, Clay, Platte, and St. Louis Counties.
${ }^{\mathrm{P}}$ An associate circuit court judge's term is 4 years; also in counties that use nominating commissions, the appointed judge serves unti the next general election but not less than 1 year.
${ }^{9}$ Retention elections are used in Jackson, Clay, Platte, and St. Louis Counties.
'Subject to approval by an elected five-member executive council. ${ }^{\text {s }}$ Party affiliations of judicial candidates are not listed on the general election ballot, so the election is technically nonpartisan. However, candidates run in partisan primary elections.
${ }^{t}$ The Judicial Merit Selection Commission screens and then recommends a list of judicial candidates to the legislature. The legislature votes on the list submitted by the commission. If all candidates on the list are rejected, the process begins again with the commission.

Note: In this table, 1977 data are for 94 District Courts; 1978 through 1982 data are for 95 District Courts; and 1983 through 2003 data are for 94 District Courts. Data for 1977-87 are reported for the 12 -month period ending June 30. Beginning in 1988, data are reported for the Federal fiscal year, which is the 12-month period ending September 30. Data for 1988-91 have been revised by the Source and may differ from previous editions of SOURCEBOOK.

Petit jurors determine questions of fact, in any civil or criminal action, through hearing the evidence presented at trial. The "Juror Usage Index" is the average number of jurors on hand for each ury trial day; it is calculated by dividing the total number of available jurors by the total number of jury trial days
${ }^{\text {a }}$ Percents may not add to 100 because of rounding. ${ }^{\text {b Each juror is counted for each day serving, traveling }}$ or waiting at the courthouse to serve
c Includes jurors in travel status.

| Mississippi | 15.00 |  |  |

Note: Daily juror fees are set by statute and do not include any mileage payments to jurors.
${ }^{\text {a }}$ May be raised to $\$ 50.00$ per day after 30 days of service upon discretion of the judge ${ }^{\mathrm{b}}$ Hall-day rate
${ }^{c}$ Anchorage provides $\$ 5.00$ half-day rate for the first day, then $\$ 12.50$ per half-day thereafter.
No fee for first day (discretionary); $\$ 12.00$ per day thereafter.
${ }^{\ominus} \$ 20.00$ per day while actually serving (sworn).
No fee for first day; $\$ 15.00$ per day thereatter.
${ }^{9}$ No fee for first 3 days; $\$ 50.00$ per day thereafter. Expenses for unemployed available.
Employers must pay employees for first 3 days while serving.
${ }^{h}$ No fee for first 5 days; $\$ 50.00$ per day thereafter. Expenses for unemployed available.
Employers must pay employees for first 5 days while serving.
No fee for first day; $\$ 20.00$ per day thereafter.
No fee for first day; $\$ 30.00$ per day thereafter.
${ }^{k}$ If employer pays salary or wages of person on jury duty, there is no fee paid for 3 days; then $\$ 30.00$ per day thereafter. If individual is not employed or employer does not pay salary, fee is $\$ 15.00$ per day for first 3 days; then $\$ 30.00$ per day thereafter.
Fees vary among counties.
$\$ 40.00$ per day while actually serving (sworn)
${ }^{n}$ Provided as an expense; not reported as income
${ }^{\circ}$ Child care expenses available.
\$ $\$ 25.00$ per day while actually serving (sworn).
$\$ \$ 15.00$ per day while actually serving (sworn). $\$ 30.00$ per day after 5 days of service. $\$ 9.00$ per day if not sworn.
' $\$ 5.00$ for first 3 days; $\$ 40.00$ per day thereafter.
$\$ 5.15$ per hour, established by minimum wage law.
If employer has more than 10 employees, must pay at least $\$ 40.00$ per day for the first 3 days. After 3 days, the court must pay $\$ 40.00$ per day. If juror is not employed or if employer has less than 10 employees, court must pay $\$ 40.00$ per day from day 1
${ }^{\mathrm{u}} \$ 30.00$ per day after 5 days of service.
${ }^{v}$ County commission shall fix the compensation not to exceed $\$ 40.00$. After 10 days of actual service, compensation to be one and a half times the daily rate--minimum of $\$ 15.00$.
Maximurn may be set by county not to exceed twice the daily rate for service of less than 10 days.
${ }^{w} \$ 9.00$ for first 3 days; $\$ 25.00$ per day thereafter.
${ }^{x^{\$}} \$ 50.00$ maximum per day while actually serving (sworn)
${ }^{\$ 30.00}$ maximum per day while actually serving (sworn)
${ }^{2} \$ 18.50$ for first day; $\$ 49.00$ per day thereafter.
${ }^{\text {aa }}$ May be raised to $\$ 50.00$ per day atter 4 days of service upon discretion of the judge.

| Wyoming | 22 | 1,198 | 84 | 2.4 | 3.4 |

Note: These data are from the 1999 Census of Jails conducted for the U.S. Department of Justice, Bureau of Justice Statistics by the U.S. Census Bureau. The 1999 census included all locally administered jails that held inmates beyond arraignment (usually more than 72 hours) and were staffed by municipal or county employees. Excluded from the census were physically separate temporary holding facilities, such as drunk tanks and police lockups, that do not hold persons after they are formally charged in court. Also excluded were Connecticut, Delaware, Hawaii, Rhode Island, and Vermont because these jurisdictions have State-operated integrated jail/prison systems. Alaska also was excluded for this reason, however, 15 independently operated jails in Alaska were included. For additional information on the Census of Jails, see Appendix 4.
${ }^{\text {a }}$ Rated capacity is the number of beds or inmates assigned by a rating official to facilities within each jurisdiction.
${ }^{\mathrm{b}}$ The number of inmates divided by rated capacity times 100.
c Inmate-to-staff ratios were calculated by dividing the number of confined inmates by the number of employees on June 30, 1999.

Note: See Notes, tables 1.98 and 1.99. For additional information on the Census of Jails,
see Appendix 4.

Source: U.S. Department of Justice, Bureau of Justice Statistics, Census of Jails, 1999, NCJ 186633 (Washington, DC: U.S. Department of Justice, 2001), p. 27.
ancludes American Indians, Alaska Natives, Asians, Native Hawaiians, and other Pacific Islanders.
${ }^{\text {b }}$ National and State estimates were calculated using a ratio adjustment based on the total estimated staff by occupation to the reported number of inmates by race, and rounding the estimate to the nearest 100 whole number.

Note: These data are from the 2000 Census of State and Federal Adult Correctional Facilities sponsored by the U.S. Department of Justice, Bureau of Justice Statistics. Facilities were included in the census if they were staffed with Federal, State, local, or private employees; housed primarily State or Federal prisoners; were physically, functionally, and administratively separate from other facilities; and were operational on June 30, 2000. Also included were 264 private facilities under contract to State governments or the Federal Bureau of Prisons to house prisoners. Facilities included were prisons and prison farms; reception, diagnostic, and classification centers; road camps; forestry and conservation camps; youthful offender facili ties (except those in California); vocational training facilities; drug and alcohol treatment facilities; and State-operated local detention facilities in Alaska, Connecticut, Delaware, Hawaii, Rhode Island, and Vermont. Excluded from the census were jails and other local regional detention facilities; private facilities not exclusively for State or Federal prisoners; facilities for the military, the Immigration and Naturalization Service, the Bureau of Indian Affairs, and the U.S. Marshals Service; and correctional hospital wards not operated by correctional authorities. The "private" facilities included in the census are those with $50 \%$ or more of their inmates held for State or Fecieral
authorities. Private facilities with more than $50 \%$ of their inmates held for local authorities were classified as jails and excluded from the census.

Correctional facilities were classitied as "community-based" if $50 \%$ or more of the residents were regularly permitted to leave, unaccompanied, to work or study. These included halfway houses, restitution centers, and prerelease, work release, and study centers. Facilities in which less than $50 \%$ of the prisoners regularly left the facility unaccompanied were classified as "confinement" institutions.
${ }^{\text {a }}$ The classification of Federal facilities changed between 1995 and 2000. The 1995 count was adjusted by the Source to reflect the administrative merging of 38 camp facilities with 36 confinement facilities and the reclassification of 12 facilities as private. ${ }^{\mathrm{b}}$ Includes facilities with the security designations super maximum, close, and high.
${ }^{c}$ Based on average daily population, July 1, 1999 to June 30, 2000.

Table 1.110
Estimated number of applications and rejections for firearm transfers

| United States, 1999-2003 |  |  |  |  |  |
| :--- | ---: | :---: | :---: | :---: | :---: |
|  |  | Applications |  |  |  |
|  | Received | Rejected | Percent rejected |  |  |
| 1999 | $8,621,000$ | 204,000 | $2.4 \%$ |  |  |
| 2000 | $7,699,000$ | 153,000 | 2.0 |  |  |
| 2001 | $7,958,000$ | 151,000 | 1.9 |  |  |
| 2002 | $7,806,000$ | 136,000 | 1.7 |  |  |
| 2003 | $7,831,000$ | 126,000 | 1.6 |  |  |

Note: The Brady Handgun Violence Prevention Act (the Brady Act) mandates criminal history background checks on persons applying to purchase firearms from federally ticensed firearm dealers (Federal Firearm Licensees or FFLs). The permanent provisions of the Brady Act became effective on Nov. 30, 1998. The act established the National Instant Criminal Background Check System (NICS) and requires a background check by the Federal Bureau of Investigation (FBI) or a State point of contact on all persons applying to receive a handgun or long gun from a FFL. When a background check produces evidence of factors that disqual ify an applicant from owning a firearm, the application is rejected. The Bureau of Justice Statistics began the Firearm Inquiry Statistics (FIST) program in 1995 to collect information on background checks conducted by State and local agencies. These data combine FIST estimates of the number of checks and rejections done by State and local agencies and the FBI number of actual transactions and rejections reported by the NICS operations reports. Counts of applications received and rejected are rounded.

Note: These data were collected through a review of the statutory provisions of the 50 States, the District of Columbia, and Puerto Rico.
In the table, " S " indicates that such a provision is provided expressly by statute. A blank indicates that no statutory or case law provisions exist. "Pretiminary breath test" laws refer to a breath test given by a law enforcement officer to a suspected drunk driver prior to an arrest for a drunk driving offense. These results are used, along with other evidence, by the officer to determine if there is probable cause to arrest the driver. "Administrative per se" laws allow State driver licensing agencies to either suspend or revoke a driver's license based on the specified blood alcohol concentration (BAC) or on other criteria related to alcohol or drug use and driving. Such action is independent of licensing action resulting from a criminal conviction for a drunk driving offense. The evidentiary weight given to BAC levels generally falls into one of two categories. "Illegal per se" laws make it a criminal offense to operate a motor vehicle at or above the specified alcohol concentration level in either the blood, breath, or urine. Under these laws, the specified fevel is considered conclusive evidence of intoxication in a court of law.
"Presumption" indicates that the specified level of alcohol concentration in a driver's blood, breath, or urine creates a presumption of intoxication in a court of law. Statutory provisions of several jurisdictions treat the 0.10 level as both presumptive and illegal per se evidence of driving under the influence. This appears to be the result of States having adopted one of the standards without amending statutes that had previously authorized. the other standard. In such cases, the actual statutes should be consulted for clarification. "Open container law" refers to laws prohibiting the possession of open containers of alcoholic beverages.in the passenger compart ment of a motor vehicle. "Anti-consumption law" refers to laws prohibiting the consumption of alcoholic beverages in the passenger compartment of a motor vehicle. "Dram shop law" reters to laws that provide that a person who serves alcoholic beverages to an intoxicated individual may be liable for damages and injuries caused in a motor vehicle accident.

In all jurisdictions, use of a controlied substance or use of a controlled substance in conjunction with alcohol also constitutes the basis for a driving while intoxicated charge. Most jurisdictions have established more stringent BAC levels for operators of commercial motor vehicles, as well as juvenile motor vehicle operators. Statutes should be consulted for the full text and meaning of specific provisions.

By State, as of Jan. 1, 2002--Continued
${ }^{\text {a Applies to drivers only. }}$
${ }^{6}$ Adopted via case law decisions.
${ }^{\text {c }}$ Case taw has been modified by statute
${ }^{\text {d Applies only to persons age } 21 \text { and older. }}$
${ }^{e}$ Applies only to the actions of intoxicated minors
'The lower number is driving while impaired; the higher is driving while under the influence.
${ }^{9} 0.07$ if the driver has a previous violation of driving under the influence at 0.10 or greater.
${ }^{\text {h }}$ This State has a statute that places a monetary limit on the amount of damages that can be awarded in dram shop liability actions.
${ }^{\text {B }}$ Constitutes conclusive evidence of a driving while intoxicated offense.
i Constitutes prima facie evidence of driving while under the influence.
${ }^{k}$ Applies only to the actions of intoxicated minors or persons known to be habitually addicted to alcohol.
'Competent evidence of driving while intoxicated.
${ }^{\text {mimited application. }}$
nApplies only to drunk driving offenses that are related to either an injury or death.
${ }^{\circ}$ Has both prima facie and presumptive evidence laws with blood alcohol concentration at this level.
${ }^{\mathrm{P}}$ Provided the driver has an alcohol concentration of 0.04 or more. ${ }^{9}$ Alternative before driving while intoxicated criminal adjudication licensing action by the courts.
${ }^{\text {r }}$ The statute appears to have limited actions to those committed by minors.
${ }^{5}$ An alcohol concentration equal to or greater than 0.07 but less than 0.10 constitutes prima facie evidence of driving while under the influence.
'Appears to be limited to persons operating "common carriers."
${ }^{4}$ Constitutes prima facie evidence of impairment.
${ }^{\text {Applies specifically to the actions of intoxicated minors, but the law does }}$ not foreclose developing case law as to other types of dram shop action.
wThe lower number is driving white impaired; the higher is prima facie evidence of driving under the influence.
${ }^{\times}$Not less than 0.08 constitutes being under the influence of intoxicating liquor.
YThis blood alcohol level is an inference of driving while intoxicated ${ }^{2}$ Possible via case law. Applies to actions of intoxicated minors.
${ }^{\text {aa }}$ For a first offense, an alcohol concentration of 0.10 or more; for a subsequent offense, an alcohol concentration of 0.08 or more.
${ }^{\mathrm{ab}} \mathrm{Or}$ under the influence of alcohol.
${ }^{\mathrm{ac}}$ First and second offense 0.10 ; third offense 0.08 ; subsequent offenses 0.02 .
${ }^{\text {ad }} 0.10$ is prima facie evidence for first and second offenses. 0.08 is prima facie evidence for third and subsequent offenses.
${ }^{\text {ae }}$ Liability limited to the actions of persons who are under 21 years old.

## Section 2

## Public attitudes toward crime and criminal justice-related topics

Each year numerous public opinion surveys in the United States focus on criminal justice topics. These surveys are conducted by polling and research organizations as part of general social surveys or specifically for public and private organizations. Other surveys are conducted by government agencies or commissions concerned with specific problems. Selected populations such as high school seniors, college students, or parents often are the focus of these efforts. Results from a wide variety of opinion polls, examining attitudes toward many criminal justice issues, are presented in this section.

Initially addressed are public perceptions of important problems and issues such as crime and violence, and problems facing teens. Featured in this series are questions focusing on school-related concerns including the problems faced by schools, students' perceptions of safety, fear of victimization at school, and parents' and teenagers' perceptions of drug testing and locker searches in school.

The next series of tables relates to the confidence people express in numerous institutions including the criminal justice system, as a whole, and in the police and the U.S. Supreme Court, specifically. Ratings of the honesty and ethical standards of lawyers and police are presented, as are various meas: ures of police performance and behavior (e.g., racial profiling, officers striking a citizen, and increased law enforcement powers).

Perceptions of terrorism and the level of crime in the country and in the respondent's own area are the topics of the next set of tables. Questions about the public's fear of future terrorist attacks and measures that may be needed to curb terrorism are included. Respondents' feelings of safety walking alone at night and fears concerning specific types of victimization also are displayed in this section. Reports of whether respondents engaged in selected behaviors, such as buying a gun for protection, or carrying mace or pepper spray, because of their concern over crime are included. Several tables cover public attitudes concerning the fairness of the criminal justice system in its treatment of the accused and juveniles, and attitudes concerning measures to reduce the crime and drug problems (e.g., level of spending and the severity of courts).

The focus of the section then shifts to public attitudes toward capital punishment. There are many tables on perceptions about the death penalty generally and as a penalty for people convicted of murder. Also explored are attitudes toward the death penalty for selected groups such as women, the mentally retarded, and juveniles; rationales given by respondents for favoring and opposing the death penalty; and beliefs about the deterrent effect of the death penalty.

Many public opinion surveys have examined firearms and gun control issues, and the next series of tables presents attitudes on these topics. Tables report on the prevalence of gun ownership, including trend data spanning 4 decades, attitudes toward numerous gun control measures, and legislation covering the sale and possession of firearms.

Attitudes about the legalization of marijuana, both prescribed and general use, and the harmfuiness of drug use have been examined among several populations, including the general public, teenagers, high school seniors, and young adults. This segment of the section presents a large number of tables drawn from the results of several student surveys including the Monitoring the Future Project and PRIDE Surveys. Included are students' attitudes about selected social problems, such as the availability and harmfulness of both alcohol and drug use. High school seniors are surveyed annually on their attitudes and beliefs about social problems, crime and violence, the performance of police and the courts, harmfulness of drug and alcohol use and cigarette smoking, perceptions of the availability of drugs, and the legalization of marijuana. Attitudes of eighth and tenth graders toward alcohol and drug use and cigarette smoking, and perceptions of the availability of drugs also are included. Data from annual surveys of college freshmen mirror many of the issues explored among high school students, and further ask about legalization of marijuana and abortion, the rights of criminal defendants, the death penalty, and gun control. The section concludes with presentations of public attitudes on doctor-assisted suicide, the distribution of pornography, environmental protection laws, and the legality of homosexual relations and abortion.

When available, survey results are displayed by demographic characteristics of respon-dents-age, sex, race, income, and occupa-tion-enabling comparisons across social dimensions. Some questions have been asked repeatedly over time and, whenever possible, these trends are presented.

Readers should be aware that many factors, including slight differences in the wording of survey questions, may have significant effects on responses. In addition, the margin of error for survey results, presented in Appendix 5 , may vary slightly between surveys. Thus, attention to the exact wording of questions and the appropriate estimate of error always should accompany comparisons.

Note: Exact wording of response categories varies across surveys. Multiple responses are possible; the Source records up to three problems per respondent. Some problems mentioned by a small percentage of respondents are not included in the table. Sample sizes vary from year to year; the data for 2004 are based on telephone interviews with a randomly selected national sample of 1,000 adults, 18 years of age and older, conducted June 3-6, 2004. For a discussion of public opinion survey sampling procedures, see Appendix 5.

Note: The issues mentioned are spontaneous, unprompted replies by the respondents. The numbers indicate the percent of respondents who mentioned the item as one of the top two issues for the government to address. Some issues mentioned by a relatively small percentage of respondents have been omitted. Sample sizes vary a relatively small percentage or respondents have been omited. Sample sizes
from year to year; the data for 2004 are based on telephone interviews with a randomly selected national sample of 1,020 aduts, 18 years of age and older, conducted Feb. 9 -16, 2004. For a discussion of public opinion survey sampling procedures, see Appendix 5.

Table 2.3
Teenagers' attitudes toward the most important problem facing people their age
United States, selected years 1999-2004 ${ }^{\text {a }}$

| Question: "What is the most important problem facing people your age--that is, the thing |
| :--- | :---: | :---: | :---: | :---: | :---: |
| which concerns you the most?" |

Note: These data are from telephone interviews of nationwide samples of teenagers, ages 12 to 17 . The surveys were conducted for the National Center on Addiction and Substance Abuse at Columbia University. Randomly generated telephone numbers were pre-screened to determine if a teen in the appropriate age range resided there. Subsequent calls were made to conduct the actual interviews. For the 1999 survey, 2,000 teens were interviewed during May and June. For the 2000 survey, 1,000 teens were interviewed during October and November. For the 2002 survey, 1,000 teens were interviewed between December 2001 and February 2002. For the 2003 survey, 1,987 teens were interviewed between April and July. For the 2004 survey, 1,000 teens were interviewed in April and May.
${ }^{\text {a }}$ Percents may not add to 100 because of multiple responses.

Note: These data are from a survey of 6th through 12th grade students conducted between August 2002 and June 2003 by PRIDE Surveys. Participating schools are sent the PRIDE questionnaire with explicit instructions for administering the anonymous, self-report survey. Schools that administer the PRIDE questionnaire do so voluntarily or in compliance with a school district or State request. For the 2002-2003 academic year, survey results are based on students from 24 States. The following States participated in the 2002-2003 PRIDE survey: Alabama, Arkansas, Colorado, Georgia, Illinois, Indiana, Kentucky, Louisiana, Massachusetts, Michigan, Mississippi, New Jersey, New Mexico, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, Tennessee, Texas, Virginia, Washington, West Virginia, and Wisconsin. To prevent any one State from having a disproportionate influence on the summary results, random samples of students were drawn from those States where disproportionately large numbers of students were surveyed. Therefore, no State comprises more than $10 \%$ of the sample. The results presented are based on a sample consisting of 109.919 students drawn from the total number of students who completed the PRIDE questionnaire.

Note: These data are from the School Crime Supplement (SCS) to the National Crime Victimization Survey (NCVS). The NCVS is a continuous survey of a representative sample of households in the United States conducted for the U.S. Department of Justice, Bureau of Justice Statistics by the U.S. Census Bureau. The SCS is an additional questionnaire fielded with the 1995, 1999, and 2001 NCVS and was administered to a nationally representative sample of students 12 to 18 years of age. Eligible respondents were asked the supplementa SCS questions only atter completing the NCVS interview. Persons eligible for the SCS we those NCVS respondents who were enrolted in grades 6 through 12 at a school leading to d high school diploma and had attended school at any time during the 6 months preceding the interview. A total of 9,728 students participated in the 1995 SCS, 8,398 in the 1999 SCS, and 8,374 in the 2001 SCS. The data presented are survey estimates and therefore are subject to sampling variation.

Beginning with the 2001 data, two changes were made to the SCS. First, in 1995 and 1999, "at school" was defined as in the school building, on the school grounds, or on a school bus. In 2001, "at school" was defined as in the school building, on school property, on a school bus, or going to and from school. The 1995 and 1999 estimates for "fear of attack at school" have been recalculated by the Source to combine fear of attack at school and fear of attack going to and from school and are now consistent with the 2001 estimates. Second, in 1995 and 1999, students were asked if they avoided places or were fearful because they thought someone would "attack or harm" them. In 2001, the language was changed to "attack or threaten to attack" them.
${ }^{\text {a }}$ Includes students who reported that they sometimes or most of the time feared being victimized in this way.
'includes the entrance into the school, any hallways or stairs in the school, parts of the school cafeteria, any school restrooms, and other places inside the school building.

Table 2.16
Reported confidence in the U.S. Government to protect citizens from terrorist attack
United States, 2002, 2003, and 2004
Question: "How much confidence do you have in the U.S. government to protect its citizens from future terrorist attacks--a great deal, a fair amount, not very much, or none a all?"

|  | Great <br> deal | Fair <br> amount | Not very <br> much | None <br> at a! |
| :--- | :--- | :---: | :---: | :---: |
| March 2002 | $24 \%$ | $58 \%$ | $15 \%$ | $2 \%$ |
| May 2002 | 22 | 54 | 18 | 5 |
| June 2002 | 27 | 49 | 17 | 5 |
| September 2002 | 24 | 56 | 16 | 3 |
| February 2003 | 29 | 53 | 14 | 4 |
| August 2003 | 23 | 53 | 19 | 5 |
| January 2004 | 31 | 50 | 15 | 4 |

Note: Sample sizes vary from year to year; the data for 2004 are based on telephone interviews with a randomly selected national sample of 1,029 adults, 18 years of age and older, conducted Jan. 2-5, 2004. The "don't know/refused" category has been omitted; therefore percents may not sum to 100 . For a discussion of public opinion survey sampling procedures, see Appendix 5.

Table 2.26
Respondents' attitudes toward racial profiling

By race and ethnicity, United States, 2004
Questions: "It has been reported that some police officers or security guards stop people of certain racial or ethnic groups because these officials believe that these groups are more likely than others to commit certain types of crimes. For each of the foliowing situations, please say if you think this practice, known as 'racial profiling.' is widespread, or not? How about . . ."
"Do you think it is ever justified for police to use racial or ethnic profiling when . . or is it never justified?*
(Percent responding yes, widespread or yes, justified)

|  | Yes, racial protiling <br> is widespread | Yes, racial profiling <br> is justified |
| :--- | :--- | :--- |
| When motorists are stopped |  |  |
| on roads and highways |  |  |$\quad 31 \%$

Note: These data are based on telephone interviews with a randomly selected national sample of 2,250 adults, 18 years of age and older, conducted June 9-30; 2004, including oversamples of black and Hispanic respondents that are weighted to reflect their proportions in the general population. For a discussion of public opinion survey sampling procedures, see Appendix 5.

Table 2.27
Respondents favoring increased law enforcement powers

## United States, 2001-2004

Question: "Here are some increased powers of investigation that law enforcement agencie might use when dealing with people suspected of terrorist activity, which would also affect our civil liberties. For each, please say if you would favor or oppose it."

| Percent responding "favor* to: | 2001 | 2002 | 2003 | 2004 |
| :---: | :---: | :---: | :---: | :---: |
| Expanded under-cover activities to penetrate groups under suspicion | 93\% | 88\% | 81\% | 80\% |
| Stronger document and physical security checks for travelers | 93 | 89 | 84 | 84 |
| Stronger document and physical security checks for access to government and private office buildings | 92 | 89 | 82 | 85 |
| Use of facial-recognition technology to scan for suspected terrorists at various locations and public events | 86 | 81 | 77 | 80 |
| Issuance of a secure I.D. technique for persons to access government and business computer systems, to avoid disruptions | 84 | 78 | 75 | 76 |
| Closer monitoring of banking and credit card transactions, to trace funding sources | 81 | 72 | 67 | 64 |
| Adoption of a national I.D. system for all U.S. citizens | 68 | 59 | 64 | 56 |
| Expanded camera surveillance on streets and in public places | 63 | 58 | 61 | 61 |
| Law enforcement monitoring of Internet discussions in chat rooms and other forums | 63 | 55 | 54 | 50 |
| Expanded government monitoring of cell phones and e-mail, to intercept communications | 54 | 44 | 44 | 36 |

Note: Sample sizes vary from year to year; the data for 2004 are based on telephone interviews with a randomly selected national sample of 1,020 adults, 18 years of age and older, conducted Feb. $9-16,2004$. For a discussion of public opinion survey sampling procedures, see Appendix 5.

Table 2.28
Attitudes toward approaches to lowering the crime rate in the United States
United States, selected years 1989-2003 ${ }^{\text {a }}$
Question: "Which of the following approaches to lowering the crime rate in the United States comes closer to your own view - do you think more money and effort should go to attacking the social and economic problems that lead to crime through better education and job training or more money and effort should go to deterring crime by improving law enforcement with more prisons, police, and judges?"

|  | Attack <br> social problems | More law <br> enforcement | Don't know/ <br> refused |
| :--- | :---: | :---: | :---: |
| 1989 | $61 \%$ | $32 \%$ | $7 \%$ |
| 1990 | 57 | 36 | 2 |
| March 1992 | 64 | 27 | 9 |
| August 1992 | 67 | 25 | 8 |
| February 1994 | 57 | 39 | 4 |
| August 1994 | 51 | 42 | 7 |
| 2000 | 68 | 27 | 5 |
| 2003 | 69 | 29 | 2 |

Note: See Note, table 2.13. In years prior to 2000, the question wording was: "To lower the crime rate in the United States, some people think additional money and effort should go to attacking the social and economic problems that lead to crime through better education and job training. Others feel more money and effort should go to deterring crime by improving law enforcement with more prisons, police, and judges. Which comes closer to your view?" For a discussion of public opinion survey sampling procedures, see Appendix 5.
${ }^{\text {a }}$ Percents may not add to 100 because of rounding.

Table 2.29
Respondents reporting fear that they or someone in their family will become a vict/m of terrorism

United States, 2002. 2003, and 2004
Question: "How worried are you that you or someone in your family will become a victim of terrorism--very worried, somewhat worried, not too worried, or not worried at all?"

|  | Very <br> worried | Somewhat <br> worried | Not too <br> worried | Not worried <br> at all |
| :--- | :---: | :---: | :---: | :---: |
| March 2002 | $12 \%$ | $33 \%$ | $32 \%$ | $23 \%$ |
| April 2002 | 8 | 27 | 39 | 25 |
| May 2002 | 9 | 31 | 37 | 22 |
| September 2002 | 8 | 30 | 37 | 25 |
| January 2003 | 8 | 31 | 36 | 25 |
| February 2003 | 8 | 28 | 33 | 31 |
| March 2003 | 8 | 30 | 38 | 24 |
| August 2003 | 11 | 30 | 33 | 26 |
| December 2003 | 9 | 28 | 38 | 25 |
| January 2004 | 5 | 23 | 42 | 30 |
| February 2004 | 10 | 30 | 36 | 24 |

Note: Sample sizes vary from year to year; the data for February 2004 are based on telephone interviews with a randomly selected national sample of 1,002 adults, 18 years of age and older, conducted Feb. $9 \cdot 12,2004$. The "don't know/refused" category and a volunteered category that includes respondents who reported that they already know a victim have been omitted; therefore percents may not sum to 100 . For a discussion of public opinion survey sampling procedures, see Appendix 5.

By demographic characteristics, United States, selected years 1985-2002
Question: "We are faced with many problems in this country, none of which can be solved easily or inexpensively. I'm going to name some of these problems, and for each one l'd like you to tell me whether you think we're spending too much money on it, too little
money, or about the right amount. First (dealing with drug addiction) are we spending too much, too little, or about the right amount on (dealing with drug addiction)?"

Table 2.55
Reported reasons for favoring the death penalty for persons convicted of murder

United States, 1991, 2000, 2001, and 2003
Question: "Why do you favor the death penalty for persons convicted of murder?"

| Reason for tavoring | 1991 | 2000 | 2001 | 2003 |
| :--- | :---: | :---: | :---: | :---: |
| An eye for an eye/they took a life/fits the crime | $40 \%$ | $40 \%$ | $48 \%$ | $37 \%$ |
| Save taxpayers money/cost associated with prison | 12 | 12 | 20 | 11 |
| Deterrent for potential crimes/set an example | 8 | 8 | 10 | 11 |
| Depends on the type of crime they commit | 6 | 6 | 6 | 4 |
| Fair punishment | 6 | 6 | 1 | 3 |
| They deserve it | 5 | 5 | 6 | 13 |
| They will repeat their crime/keep them from |  |  |  |  |
| $\quad$ repeating it | 4 | 4 | 6 | 7 |
| Biblical reasons | 3 | 3 | 3 | 5 |
| Serve justice | 2 | 3 | 1 | 4 |
| Don't believe they can be rehabilitated | 1 | 1 | 2 | 2 |
| If there's no doubt the person committed the crime | NA | NA | 2 | 3 |
| Would help/benefit families of victims | NA | NA | 1 | 2 |
| Supportbelieve in death penalty | NA | NA | 6 | 2 |
| Life sentences don't always mean life in prison | NA | NA | 2 | 1 |
| Relieves prison overcrowding | NA | NA | 2 | 1 |
| Other | 10 | 10 | 3 | 4 |
| No opinion | 3 | 3 | 1 | 2 |

Note: See Note, table 2.51. This question was asked only of the respondents who answered "yes, in favor" to the question presented in table 2.51. Percents may add to more than 100 because up to two responses were recorded from each respondent. For a discussion of public opinion survey sampling procedures, see Appendix 5.

Table 2.56
Reported reasons for opposing the death penalty for persons convicted of murder
United States, 1991 and 2003
Question: "Why do you oppose the death penalty for persons convicted of murder?"

| Reason for opposing | 1991 | 2003 |
| :--- | :---: | :---: |
| Wrong to take a life | $41 \%$ | $46 \%$ |
| Punishment should be left to God/religious belief | 17 | 13 |
| Person may be wrongly convicted | 11 | 25 |
| Does not deter people from committing murder | 7 | 4 |
| Possibility of rehabilitation | 6 | 5 |
| Unfair application of death penalty | 6 | 4 |
| Need to pay/suffer longer/think about their crime | NA | 5 |
| Depends on the circumstances | NA | 4 |
| Other | 16 | 3 |
| No opinion | 6 | 4 |

Note: See Notes, tables 2.51 and 2.55. This question was asked only of the respondents who answered "no, not in favor" to the question presented in table 2.51. For a discussion of public opinion survey sampling procedures, see Appendix 5.

Note: These data are from a series of nationwide surveys of high school seniors conducted by the Monitoring the Future Project at the University of Michigan's Institute for Social Research from 1975 through 2003. The survey design is a multistage random sample of high school seniors in public and private schools throughout the continental United States. All percentages reported are based on weighted cases; the Ns that are shown in the tables refer to the number of weighted cases

Response categories were "never," "seldom," "sometimes," and "often." Readers interested in responses to this question for 1975 through 1990 should consult previous editions of SOURCEBOOK. For survey methodology and definitions of terms, see Appendix 6.

| None | 90.7 | 92.9 | 91.9 | 94.1 | 91.8 | 90.5 | 89.1 | 86.8 | 84.3 | 85.4 | 82.3 | 77.1 | 69.1 |
| Marijuana only | 85.4 | 89.6 | 91.1 | 91.5 | 90.9 | 91.9 | 85.7 | 82.3 | 82.8 | 85.8 | 85.2 | 77.0 | 71.7 |
| Few pills | 86.6 | 89.4 | 90.7 | 95.6 | 92.6 | 91.0 | 88.3 | 84.6 | 84.3 | 79.1 | 83.1 | 77.8 | 67.4 |
| More pills | 84.8 | 90.6 | 87.4 | 89.5 | 84.1 | 87.4 | 81.0 | 83.3 | 75.6 | 79.9 | 73.8 | 69.7 | 66.7 |

Note: See Note, table 2.70. Data are given for those who identify themselves as white or Caucasian and those who identify themselves as black or Atrican-American; data are not given for the other ethnic categories because each of these groups constitutes a small portion of the sample in any given year and therefore would yield unreliable estimates (Source, 2000, p.10). "College plans" distinguishes those seniors who expect to graduate from a 4-year college from those who expect to receive some college training or none. The four drug use categories are mutually exclusive and are based on an index of seriousness of involvement. The "pills" category indicates use of any of a number of drugs including some that usually are not taken in pill form. Respondents indicating the use of one or more of a number of illicit drugs (other than marijuana) but who had not used any one class of them on three or more occasions and did not use heroin at all fall into the "few pills" category. Respondents indicating such use on three or more occasions and who did not use heroin at all fall into the "more pills" category. Respondents reporting heroin use were included in a separate category that is not presented here due to the small number of respondents indicating such use. (Source, 2000, pp. 9, 14.)

Response categories were "never," "seldom," "sometimes," and "often." Readers inter ested in responses to this question for 1975 through 1990 should consult previous editions of SOURCEBOOK. For survey methodology and definitions of terms, see Appendix 6.

| Have five or more drinks once or twice each weekend | 35.9 | 47.1 | 48.3 | 46.5 | 45.2 | 49.5 | 43.0 | 42.8 | 43.1 | 42.7 | 43.6 | 42.2 | 43.5 |
| Smoke one or more packs of cigarettes per day | 63.7 | 68.2 | 69.5 | 67.6 | 65.6 | 68.2 | 68.7 | 70.8 | 70.8 | 73.1 | 73.3 | 74.2 | 72.1 |
| Take steroids | NA | 69.9 | 69.1 | 66.1 | 66.4 | 67.6 | 67.2 | 68.1 | 62.1 | 57.9 | 58.9 | 57.1 | 55.0 |

Note: These data are from a series of nationwide surveys of high school seniors conducted by the University of Michigan's Institute for Social Research for the National Institute on Drug Abuse from 1975 through 2003. The survey design is a multistage random sample of high school seniors in public and private schools. Depending on the survey year, approximately $65 \%$ of the schools initially invited to participate'agreed to do so. Completed questionnaires were obtained from approximately $83 \%$ of all sampled students in participating schools each year. Beginning in 1991, eighth and tenth grade students also were included in the survey. All percentages reported are based on weighted cases; the Ns that are shown in the tables also refer to the number of weighted cases. Readers interested in responses to this question for 1975 through 1979, 1981 through 1989, 1991, and 1992 should consult previous editions of SOURCEBOOK. For survey methodology and definitions of terms, see Appendix 6.
${ }^{\text {a }}$ Answer alternatives were: (1) no risk, (2) slight risk, (3) moderate risk, (4) great risk, and (5) can't say, drug unfamiliar.

| Four or five drinks |  |  |  |  |  |  |  |  |
| Five or more drinks once or twice a week | 42.3 | 41.7 | 38.2 | 38.5 | 33.2 | 31.9 | 44.5 | 43.9 |
| Cigarettes |  |  |  |  |  |  |  |  |
| Smoke one or more packs per day | 71.1 | 71.4 | 63.1 | 64.2 | 65.2 | 65.7 | 73.3 | 73.4 |

Note: These data are from the 2002 and 2003 National Survey on Drug Use and Health
(NSDUH). The NSDUH is an annual survey of the civilian, noninstitutionalized population of the United States age 12 and older, and is sponsored by the U.S. Department of Health and Human Services, Substance Abuse and Mental Health Services Administration. Prior to 2002, the survey was called the National Household Survey on Drug Abuse (NHSDA). Due to methodological changes beginning with the 2002 NSDUH, estimates from the 2002 and 2003 surveys should not be compared with estimates from 2001 and eartier NHSDAs. For the 2002 NSDUH, a response rate of $78.9 \%$ yielded 68,126 completed interviews. For the 2003 NSDUH, a response rate of $77.4 \%$ yielded 67,784 completed interviews. For information on survey methodology, see Appendix 7.
${ }^{a}$ Answer alternatives to the question were "no risk," "slight risk," "moderate risk," and "great risk."

Note: See Note, table 2.79. Readers interested in responses to this question for 1975 through 1979, 1981 through 1989, 1991, and 1992 should consult previous editions of SOURCEBOOK. For survey methodology and definitions of terms, see Appendix 6.

Source: Lloyd D. Johnston et al., Monitoring the Future National Survey Results on Drug Use, 1975-2003, Vol. 1, Secondary School Students (Bethesda, MD: U.S. Department of Health and Human Services, 2004), p. 365. Table adapted by SOURCEBOOK staff.
${ }^{a}$ Answer alternatives were: (1) probably impossible, (2) very difficult, (3) fairly difficult, (4) fairly easy, and (5) very easy.
$\mathrm{b}_{\text {in }}$ 2001, the question text was changed from "other psychedelics" to "other hallucinogens and "shrooms" was added to the list of examples. These changes likely explain the increase in the 2001 result.

Table 2.90
College freshmen reporting that marijuana should be legalized
By sex, United States, 1969-2003
(Percent indicating "agree strongly" or "agree somewhat")

Note: These figures are taken from the Cooperative Institutional Research Program Fresh man Survey, which is conducted annually by the Higher Education Research Institute (HERI) at the University of California, Los Angeles. The survey covers a wide range of student characteristics including demographic and background information, high school activities, college plans, values, attitudes, and beliefs. Each fall, the HERI surveys approximately 300,000 full-time students entering the freshman classes from a nationally representative sample of colleges and universities in the United States. Both 2-year and 4-year institutions were included in the data for 1969-99. Beginning in 2000, the survey includes only 4-year colleges and universities (baccalaureate institutions). Inclusion of 2-year institutions was discontinued due to declining participation rates and increased need for data adjustment. In order to facilitate comparisons over time, 2-year institutions were removed from the sample and data for years prior to 2000 were recalculated by the Source. The data presented include only 4-year (baccalaureate-granting) institutions for all years and therefore will differ from previous editions of SOURCEBOOK.

From 1966 to 1970 , approximately $15 \%$ of the Nation's institutions of higher education were selected by sampling procedures to participate in the program. Beginning in 1971, a stratified sample was selected from all institutions that have entering freshman classes and that respond to the U.S. Department of Education's Higher Education General Information Survey. An institution is considered eligible if it was operating at the time of the survey and if it had a full-time freshman class of at least 25 students. The data presented are weighted estimates of all first-time, fuli-time students entering 4 -year institutions in the fall of each year. Published reports on trends over 35 years or reports on individual annual survey results can be obtained by writing to the Higher Education Research Institute, 3005 Moore Hall, UCLA, Los Angeles, CA 90095-1521.

Response categories were "agree strongly," "agree somewhat," "disagree somewhat," and "disagree strongly." The text or format of the questions or responses may differ slightly in different years.

## Nature and distribution of known offenses

Data presented in this section describe the type and extent of criminal activity in the United States. The level of crime is measured through officially recorded data, victimization surveys, and self-reports of criminal involvement. It is well documented that many crimes are not reported to the police. Therefore, surveys of the population and selected subgroups have been used to augment the data provided through official law enforcement records. Two methods have been most commonly used: (1) surveys of household members to determine the rate of criminal victimization, characteristics of victims, and perceived characteristics of offenders; and (2) self-report surveys of the general population, or particular subgroups, to determine the proportion and characteristics of persons who have committed criminal offenses.

The section begins with information from the National Crime Victimization Survey (NCVS), which is an annual national probability survey of households in the United States sponsored by the Bureau of Justice Statistics. Information is provided on the extent and nature of completed and attempted crimes, frequency of occurrence, characteristics of victims and offenders, victim-offender relationships, the circumstances surrounding criminal incidents, and reasons for reporting or not reporting crimes to the police.

The next set of tables is based on data from the Monitoring the Future Project at the University of Michigan's Institute for Social Research. This project conducts annual nationwide surveys of secondary school students' experiences of victimization and involvement in delinquent activity occurring at school and elsewhere. These data include student involvement in traffic violations and crashes while under the influence of alcohol or drugs. Also shown are figures on the prevalence and frequency of drug and alcohol use among eighth and tenth graders, high school seniors, college students, and young adults in the United States. Use of marijuana, hashish, inhalants, hallucinogens (LSD, PCP), cocaine and crack, heroin, stimulants, sedatives, tranquilizers, alcohol, steroids, and cigarettes is examined. This segment also incorporates self-report data collected by PRIDE Surveys on students' (grades 6 through 12) victimization experiences, involvement with delinquent behavior, and alcohol and drug use. The Youth Risk Behavior Surveillance System, a nationwide survey of youth conducted by the Centers for Disease Control and Prevention (CDC), is the source of information for high school students' involvement in a wide scope of risk-related behaviors including fighting
and weapons possession at school. These tables are followed by reports of violent crime, bullying, hate-related behavior, and gangs at school, from data jointly collected by the U.S. Departments of Education and Justice. A series of tables present statistics on the prevalence of binge drinking on college campuses, associated violence, and other alcohol-related problems.

Section 3 also covers the prevalence of drug and alcohol use among the Nation's population age 12 and older from the National Survey on Drug Use and Health. Figures for various types of drugs are presented as well as reported problems associated with drug and alcohol use. The next series of tables present data from U.S. Department of Defense surveys measuring illicit drug use among U.S. military personnel. These data include branch of military, type of drug, and recency of use. Also included are data from the Drug Abuse Warning Network (DAWN) focusing on drug abuse-related emergency department episodes. Results of public opinion surveys by The Gallup Organization, asking about alcohol use and related problems, are shown. Information on alcohol-related driving behavior, including involvement in motor vehicle crashes and associated fatalities completes this segment.

The final part of Section 3 incorporates numerous tables displaying statistics on officially recorded crime. The Federal Bureau of Investigation collects information on crimes known to the police through its ongoing Uniform Crime Reporting (UCR) Program. The number and rate of offenses known to police are tabulated by State and for large U.S. cities for the eight Index crimes: murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson. Tables displaying information on biasmotivated (hate) crimes and offenses occurring in Federal parks are included. The next set of tables provides details about murder victims and offenders based on the Federal Bureau of Investigation's Supplementary Homicide Reports, followed by two tables focusing on violence between intimate partners. Data on homicides and other violent crimes occurring in the workplace and rates of suicide for various subgroups of the population are shown, as is information on the civilians and law enforcement officers killed as a result of the terrorist attacks on Sept. 11,200 . New this year is a table displaying trend data on sniper attacks in the U.S.

Trend tables on robbery, assault, burglary, larceny-theft, and motor vehicle theft present more than 25 years of UCR data. Information on financial institution fraud and Federal bank robberies is provided in this section as are numerous tabulations for the number of
law enforcement officers assaulted and killed in the United States. These include detailed data on the circumstances of the incidents.

Section 3 concludes with information on arson, dollar losses due to incendiary or suspicious fires, bombing incidents, information on terrorist incidents and casualties resulting from terrorism, and the results of airline passenger screening.

| \$50 to \$249 | 5,055,100 | 4,603,610 | 46.4 | 41.0 | -11.6 |
| \$250 or more | 3,176,160 | 3,323,300 | 29.1 | 29.6 | 1.6 |
| Attempted | 539,490 | 467,140 | 5.0 | 4.2 | -15.9 |

Note: The National Crime Victimization Survey (NCVS) is conducted annually for the U.S. Department of Justice, Bureau of Justice Statistics by the U.S. Census Bureau. These estimates are based on data derived from a continuous survey of a representative sample of housing units in the United States. For the 2003 survey, approximately 149,040 residents in 83,660 housing units were interviewed. Response rates were $92 \%$ of eligible housing units and $86 \%$ of eligible individuals in interviewed households. For the 2002 survey, approximately 76,050 residents in 42,340 housing units were interviewed. Response rates were $92 \%$ of eligible housing units and $87 \%$ of eligible individuals in interviewed households. For the 2001 survey, approximately 79,950 residents in 43,680 housing units were interviewed. Response rates were $93 \%$ of eligible housing units and $89 \%$ of individuals in interviewed households. For the 2000 survey, approximately 159,420 residents in 86,800 housing units were interviewed. Response rates were $93 \%$ of eligible housing units and $90 \%$ of individuals in interviewed households. In 2000, the total U.S. population age 12 and older was $226,804,610$; in 2001, it was 229,215,290; in 2002 it was 231,589,260; and in 2003 it was $239,305,990$. The total number of households in the United States in 2000 was 108,352,960; in 2001, it was 109,568,450; in 2002 it was $110,323,840$; and in 2003 it was $114,136,930$. Readers should note that the NCVS is based on interviews with victims and therefore cannot measure murder.
"Since 1995, the NCVS has undergone sample reductions because of the escalating costs of data collection. At the same time, the rate of violence has continued to decline. The combination of the two--fewer survey respondents and less crime--has resulted in a diminished ability to detect statistically significant year-to-year changes in rates" (Source, p. 3). Presentation of 2-year averages for counts and rates permits over time comparisons that are more reliable. For survey methodology and definitions of terms, see Appendix 8.
${ }^{a}$ Detail may not add to total because of rounding.
${ }^{\mathrm{b}}$ Percent change was calculated using unrounded rates. ${ }^{\text {c }}$ Does not include murder or manslaughter.
Inctudes pocket picking, purse snatching, and attempted purse snatching.
${ }^{\mathrm{e}}$ includes thetts with unknown losses.

| Purse snatching/pocket picking | 0.4 | 0.3 | 0.3 | 0.3 | 0.2 | 0.2 | 0.2 | 0.1 | 0.1 |
| Property crime | 21.1 | 19.9 | 19.0 | 17.7 | 16.0 | 14.9 | 13.6 | 12.5 | 12.7 |
| Household burglary | 4.6 | 4.1 | 4.0 | 3.7 | 3.3 | 2.9 | 2.7 | 2.4 | 2.6 |
| Motor vehicle theft | 1.7 | 1.5 | 1.2 | 1.2 | 1.0 | 0.9 | 0.8 | 0.8 | 0.8 |
| Theft | 16.9 | 16.1 | 15.4 | 14.1 | 12.8 | 12.1 | 10.9 | 9.9 | 10.0 |
| Intimate partner violence ${ }^{\text {c }}$ | 0.8 | 0.7 | 0.6 | 0.7 | 0.7 | 0.5 | 0.5 | 0.4 | 0.3 |
| Violence by strangers or household burglary ${ }^{\text {d }}$ | 7.9 | 7.2 | 6.7 | 6.2 | 5.4 | 4.9 | 4.5 | 3.9 | 3.9 |
| Vandalism ${ }^{\text {b }}$ | 9.0 | 8.0 | 7.9 | 7.4 | 6.5 | 6.2 | 5.7 | 4.9 | 5.1 |
| Households experiencing crime | 25,103,670 | 23,794,200 | 23,036,300 | 21,749,300 | 20,063,900 | 18,985,700 | 17,580,900 | 16,080,430 | 16,749,820 |
| Total households | 100,544,570 | 101,481,000 | 102,675,000 | 103,967,400 | 105,301,700 | 107,138,300 | 108,331,600 | 110,323,840 | 114,136,930 |

Note: These data are from the U.S. Department of Justice, Bureau of Justice Statistics' National Crime Victimization Survey (NCVS). The data reflect the number and percent of households in the United States victimized during a given year. A household is counted only once for each type of crime, regardless of how often the household or household member was victimized during the year. For example, if a particular household was burglarized twice and a member of that household was robbed once during the year, it is counted once for households victimized by burglary, once for households victimized by robbery, and once for the overall measure of households experiencing crime. The NCVS measures crime for which the victim can be interviewed and therefore does not include murder. For survey methodology and definitions of terms, see Appendix 8.
${ }^{2}$ Subcategories may not add to total because of overlap in households experiencing various types of crime.
${ }^{b}$ Vandalism is not included in totals.
${ }^{\text {a }}$ These crimes also are included in overall violent crimes. Intimate partners include current and former spouses, boytriends, and girtriends.
athese crimes also are included in overall violent or property crimes.

Note: These data are from a series of nationwide surveys of high school seniors conducted from 1975 through 2003 by the Monitoring the Future Project at the University of Michigan's Institute for Social Research. The survey design is a multistage random sample of high school seniors in public and private schools throughout the continental United States. All percentages reported are based on weighted cases; the
Ns that are shown in the tables also refer to the number of weighted cases. Readers interested in responses to this question for 1976 through 1990 should consult previous editions of SOURCEBOOK. For survey methodology and definitions of terms, see Appendix 6.

Note: See Note, table 3.37. Data are given for those who identify themselves as white or Caucasian and those who identify themselves as black or African-American; data are not given for the other ethnic categories because these groups comprise a small percentage of the sample in any given year (Source, 2000, p. 10). Readers interested in responses to this question for 1976 through 1990 should consult previous editions of SOURCEBOOK. For survey methodology and definitions of terms, see Appendix 6.

Note: These data are from a survey of 6th through 12th grade students conducted between August 2002 and June 2003 by PRIDE Surveys. Participating schools are sent the PRIDE questionnaire with explicit instructions for administering the anonymous, selt-report survey. Schools that administer the PRIDE questionnaire do so voluntarily or in compliance with a school district or State request. For the 2002-2003 academic year, survey results are based on students from 24 States. The following States participated in the 2002-2003 PRIDE survey: Alabama, Arkansas, Colorado, Georgia, Illinois, Indiana, Kentucky, Louisiana, Massachusetts, Michigan, Mississippi, New Jersey, New Mexico, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, Tennessee, Texas, Virginia, Washington, West Virginia, and Wisconsin. To prevent any one State from having a disproportionate influence on the
summary results, random samples of students were drawn from those States where disproportionately large numbers of students were surveyed. Therefore, no State comprises more than $10 \%$ of the sample. The results presented are based on a sample consisting of 109,919 students drawn from the total number of students who completed the PRIDE questionnaire.

Note: These data are from the National Crime Victimization Survey (NCVS) conducted for the U.S. Department of Justice. Bureau of Justice Statistics by the U.S. Census Bureau. The data presented are estimates based on a continuous survey of a representative sample of households in the United States and therefore are subject to sampling variation. "At school" is detined as in the school building, on school property, or going to and from school. For more information on the NCVS, see Note, table 3.1 and Appendix 8.
${ }^{\text {a }}$ Numbers are rounded to the nearest 100 ; due to rounding or missing cases, detail may not add to total.

${ }^{\text {c Includes rape, sexual assault, robbery, and aggravated assault. Serious violent crimes also are }}$ included in violent crimes
${ }^{d}$ Estimate is based on fewer than 10 cases.

Note: These data are from the School Crime Supplement (SCS) to the National Crime Victimization Survey (NCVS). The NCVS is a continuous survey of a representative sample of households in the United States conducted for the U.S. Department of Justice, Bureau of Justice Statistics by the U.S. Census Bureau. The SCS is an additional questionnaire fielded with the 2001 NCVS and was administered to a nationally representative sample of 8,374 students 12 to 18 years of age. Eligible respondents were asked the supplemental SCS questions only after completing the NCVS interview. Persons eligible for the SCS were those NCVS respondents who were enrolted in grades 6 through 12 at a school leading to a high school diploma and had attended school at any time during the 6 months preceding the interview. "At school" includes in the school building on school property, on a school bus, or going to and from school. These data are not directly comparable to data presented in table 3.60 because those data are derived from the larger NCVS dataset rather than the SCS. The data presented are survey estimates and therefore are subject to sampling variation.
${ }^{a}$ Total victimization is a combination of violent victimization and theft. If the student reported an incident of either, he or she is counted as having experienced "total" victimization. If the student reported having experienced both, he or she is counted once under "total" victimization.
includes rape, sexual assault, robbery, and aggravated and simple assault
${ }^{c}$ Includes rape, sexual assault, robbery, and aggravated assault. Serious violent crimes also are included in violent crimes
${ }^{d}$ No cases of this type occurred in the data

Note: These data are from a series of nationwide surveys of high school seniors conducted by the University of Michigan's Institute for Social Research for the National Institute on Drug Abuse from 1975 through 2003. The survey design is a multistage random sample of high school seniors in public and private schools. Depending on the survey year, approximately $65 \%$ of the schools initially invited to participate agreed to do so. Completed questionnaires were obtained from approximately $83 \%$ of all sampled students in participating schools each year. Beginning in 1991, eighth and tenth grade students also were included in the survey. All percentages reported are based on weighted cases; the Ns that are shown in the tables also refer to the approximate number (i.e., rounded to the
nearest hundred) of weighted cases. The number of respondents for 2003 were approximately 16,500 for eighth graders, 15,800 for tenth graders, and 14,600 for twelth graders, excluding cases with missing data. For survey methodology and definitions of terms, see Appendix 6.

| Other SMSA | 22.2 | 41.2 | 54.3 | 16.2 | 32.4 | 42.7 | 9.5 | 19.8 | 26.7 |
| Non-SMSA | 24.7 | 43.0 | 49.6 | 18.1 | 33.5 | 37.6 | 11.7 | 22.1 | 22.4 |

Note: See Note, table 3.64. For twelfth graders, use of "any illicit drug" includes any use of marijuana, LSD, other hallucinogens, crack, other cocaine, or heroin, or any use of other narcotics, amphetamines, barbitu rates, or tranquilizers not under a doctor's orders. For eighth and tenth graders, the use of other narcotics and barbiturates is excluded, because these younger respondents appear to overreport use (perhaps because they include the use of nonprescription drugs in their answers). For survey methodology and definitions of terms, see Appendix 6.

Note: See Note, table 3.64. For twelth graders, use of "any illicit drug" includes any use of marijuana, LSD, other hallucinogens, crack, other cocaine, or heroin, or any use of other narcotics, amphetamines, barbiturates, or tranquilizers not under a doctor's orders. For eighth and tenth graders, the use of other narcotics and barbiturates is excluded, because these younger respondents appear to overreport use (perhaps because they include the use of nonprescription drugs in their answers) (Source, p. 452). For survey methodology and definitions of terms, see Appendix 6.
${ }^{2}$ To derive percentages for each racial/ethnic subgroup, data for the specified year and the previous year are combined to increase subgroup sample sizes and provide more stable estimates.

Note: See Note, table 3.64. Data for the categories "inhalants" and "hallucinogens" are underestimated because some users of amyl and butyl nitrites, and PCP fail to report in these drug categories. Since 1979, the survey addresses this issue by asking specific questions about amyl and butyl nitrites (inhalants) and PCP (a hallucinogen) on one survey alternate form. The results of this survey are used to adjust for underreporting in these drug categories. "Crack" is a highly potent and addictive form of cocaine. "Other cocaine" refers to noncrack forms of this drug. Readers interested in responses to this question for 1975 through 1990 should consult previous editions of SOURCEBOOK. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK. For survey methodology and definitions of terms, see Appendix 6.
${ }^{\text {a }}$ Data based on five questionnaire forms in 1991-98; $N$ is five-sixths of $N$ indicated. Beginning in 1999, data are based on three questionnaire forms; $N$ is one-half of $N$ indicated.
${ }^{\mathrm{b}}$ Adjusted for underreporting of amyl and butyl nitrites.
${ }^{c}$ Data based on a single questionnaire form; $N$ is one-sixth of $N$ indicated.
${ }^{G}$ In 2001, the question text was changed on half of the questionnaire forms. The 2001 data are based on the changed forms only; $N$ is one-half of $N$ indicated. Beginning in 2002, all forms include the revised wording and data are based on all six forms.
${ }^{9}$ Adjusted for underreporting of PCP.
${ }^{1}$ Data based on a single questionnaire form; $N$ is one-sixth of $N$ indicated. Beginning in 2002, data are based on two forms; $N$ is one-third of $N$ indicated.
${ }^{9}$ Data based on four questionnaire forms beginning in 1991; $N$ is two-thirds of $N$ indicated.
${ }^{\text {h}}$ Beginning in 1995, the heroin question was changed in half of the questionnaire forms. Separate questions were asked for use with injection and without injection. Data presented here represent the combined data from all forms.
'Only drug use that was not under a doctor's orders is included here. In 2002, the question text was changed on half of the questionnaire forms. The list of examples of narcotics other than heroin was updated by replacing "Talwin," "laudanum," and "paregoric" with "Vicodin," "OxyContin," and "Percocet." The 2002 data are based on the changed forms only; $N$ is one-half of $N$ indicated. Beginning in 2003, all forms include the revised wording and data are based on all six forms.
${ }^{k}$ Data based on two questionnaire forms; $N$ is one-third of $N$ indicated.
'Sedatives data are a combination of barbiturate and methaqualone data. Beginning in 1991, six forms of barbiturate data are adjusted by one form of methaqualone data.
${ }^{m}$ Data based on a single questionnaire form; $N$ is one sixth of $N$ indicated.
"Data based on six questionnaire forms in 1991 and 1992. In 1993, the question was changed slightly in three of six forms to indicate that a "drink" meant "more than a few sips." The 1993 data are based on the changed forms only; $N$ is one-half of $N$ indicated. Beginning in 1994, all forms include the revised wording and data are based on all six forms.
${ }^{\circ}$ Data based on two questionnaire forms; N is one-third of N indicated.

Note: See Notes, tables 3.64 and 3.68 . Approximate weighted Ns range from 15,100 to 18,600 for the eighth grade surveys, 13,600 to 17,000 tor the tenth grade surveys, and 12,800 to 16,300 for the twelfth grade surveys. For survey methodology and definitions of terms, see Appendix 6.
${ }^{3}$ Inhalants are unadjusted for underreporting of amyl and butyl nitrites; hallucinogens are unadjusted for underreporting of PCP.
For twelfth graders, data based on five questionnaire forms in 1991-98; $\mathbf{N}$ is five-sixths of $N$ indicated. Beginning in 1999, data are based on three of six questionnaire forms; $N$ is one-half of $N$ indicated.
In 2001, the question text was changed on half of the questionnaire forms. The 2001 data are based on the changed forms only; N is one-half of N indicated Beginning in 2002, all forms include the revised wording and data are based on all six forms.
${ }^{d}$ Data based on one of two forms in 1996; $N$ is one-half of $N$ indicated. In 1997-2001, data are based on one-third of N indicated due to changes on the questionnaire forms. Beginning in 2002, data are based on two four forms; $N$ is one-half of $N$ indicated.
${ }^{6}$ For twelfth graders, data based on one questionnaire form in 1996-2001; N is one-sixth of N indicated. Beginning in 2002, data are based on two questionnaire forms; $N$ is one-third of $N$ indicated
'Only drug use that was not under a doctor's orders is included here
${ }^{9}$ Data based on one of four questionnaire forms; $N$ is one-third of $N$ indicated.
'Data based on two of six questionnaire forms; $N$ is one-third of $N$ indicated.

Note: See Note, table 3.64. These data are from a followup survey of respondents 1 to 4 years past high school who are presently enrolled in college. Included are those registered as full-time students in March of the year in question and who report that they are enrolled in a 2- or 4-year college. Those individuals previously in college and those who have already completed college are excluded. The approximate $N$ for each year is as follows; 1988, 1,310; 1989, 1,300; 1990 . 1,$400 ; 1991.1,410 ; 1992,1,490 ; 1993,1,490 ; 1994,1,410 ; 1995,1,450 ; 1996,1,450 ; 1997$, 1,480; 1998, 1,440; 1999, 1,440; 2000, 1,350; 2001, 1,340; 2002, 1,260; 2003, 1,270. Readers interested in responses to this question for 1980 through 1987 should consult previous editions of SOURCEBOOK. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK.

Since 1982, new questions were introduced on the use of controlled and non-controlled stimu lants in order to exclude over-the-counter amphetamines, which were believed to have been inflating the statistic for earlier years. Figures presented for "stimulants" are based on the data obtained from these new questions. For survey methodology and definitions of terms, see Appen dix 6.
${ }^{\text {a }}$ This drug was asked about in four of the five questionnaire forms in 1988 and 1989, in five of the six questionnaire forms in 1990-98, and in three of the six questionnaire forms beginning in 1999.

In 2001, the question text was changed on half of the questionnaire forms. The 2001 data are based on the changed forms only. Beginning in 2002, all forms include the revised wording.
${ }^{\text {c }}$ This drug was asked about in two of the five questionnaire forms in 1989, in two of the six questionnaire forms in 1990-2001, and in three of the six questionnaire forms beginning in 2002.
This drug was asked about in two of the five questionnaire forms in 1988 and 1989, in all six questionnaire forms in 1990-2001, and in five of the six questionnaire forms beginning in 2002.
${ }^{\text {e }}$ Only drug use that was not under a doctor's orders is included here. ${ }^{\prime}$ In 2002, the question text was changed on half of the questionnaire forms. The list of examples of narcotics other than heroin was updated by replacing "Tatwin,"
"laudanum," and "paregoric" with "Vicodin," "OxyContin," and "Percocet." The 2002 data are based on the changed forms only; $N$ is one-half of $N$ indicated. Beginning in 2003, all forms include the revised wording and data are based on all six forms. ${ }^{9}$ This drug was asked about in two of the six questionnaire forms.
$\mathrm{h}_{\text {!n }} 1993$ and 1994, the question was changed slightly in half of the questionnaire forms to indicate that a "drink" meant "more than a few sips." Data for 1993 and 1994 are from the revised and unrevised forms combined. Beginning in 1995, all forms include the revised wording.

| Occasional binge drinking ${ }^{\text {e }}$ | 24.3 | 22.2 | 21.9 | 21.6 |
| Male | 26.8 | 25.3 | 24.9 | 23.4 |
| Female | 21.9 | 19.4 | 19.2 | 20.0 |
| Frequent binge drinking ${ }^{1}$ | 19.7 | 21.0 | 22.6 | 22.8 |
| Male | 22.4 | 23.2 | 25.3 | 25.2 |
| Female | 17.1 | 18.9 | 20.3 | 20.9 |

Note: These data are from the 1993, 1997, 1999, and 2001 Coliege Alcohol Studies, conducted by the Harvard School of Public Health. The colleges and universities in the study were selected from the American Council on Education's list of accredited 4-year colleges and universities, using probability sampling proportionate to the size of the institu ion. This resulted in the inclusion of a cross-section of institutions in terms of type, size, and location. Random samples of full-time undergraduate students were provided from each college participating in the study. In each of the study years, students were mailed questionnaires asking about their drinking behaviors in the previous year, month, and 2-week period before completion of the questionnaire. The data presented are from 119 colleges that participated in all four surveys. The inclusion criteria for data analysis differed from previous survey years, i.e., six schools were reintroduced that had participated in earlier surveys but had been excluded from previous analyses. Therefore, data presented for 1993, 1997, and 1999 have been revised by the Source and may differ from previous editions of SOURCEBOOK

Table 3.83
College students and underage college students reporting alcohol use
By frequency of use, United States, 1998-2002

|  | College students' alcohol use |  |  | Underage college students' alcohol use |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | In past year | $\begin{aligned} & \text { In past } \\ & 30 \text { days } \end{aligned}$ | Binge drinking ${ }^{\text {a }}$ | In past year | In past 30 days |
| 1998 | 85.2\% | 73.1\% | 45.6\% | 83.3\% | 70.4\% |
| 1999 | 85.1 | 73.2 | 46.8 | 83.4 | 70.7 |
| 2000 | 84.1 | 72.1 | 46.5 | 82.2 | 69.1 |
| 2001 | 85.3 | 74.4 | 49.7 | 83.6 | 71.8 |
| 2002 | 85.2 | 73.4 | 47.7 | 82.2 | 70.3 |

Note: These data are from the Core Alcohol and Drug Survey, a series of surveys of college students conducted by the Core Institute, Southern llinois University at Carbondale. These data are from samples of 2-and 4-year colleges and universities in the United States. The 1998 survey included 30,965 students from 64 colleges; the 1999 survey, 65,033 students from 157 colleges; the 2000 survey, 55,026 students from 132 colleges; the 2001 survey, 54,444 students from 131 colleges; and the 2002 survey, 54,367 students from 125 colleges. Only institutions employing random sampling techniques to collect data representative of their campuses are included. Comparisons across years should be undertaken with caution because participating institutions varied from year to year.
${ }^{\text {a }}$ "Binge" drinking is defined as five or more drinks on the same occasion at least once during the 2 weeks prior to the survey.

Note: These data are from the 2002 and 2003 National Survey on ${ }^{a}$ Includes use at least once of marijuana or hashish, cocaine Drug Use and Health (NSDUH). The NSDUH is an annual survey of (including crack), heroin, hallucinogens (including LSD, PCP, the civilian, noninstitutionalized population of the United States age 12 and older, and is sponsored by the U.S. Department of Health and Human Services, Substance Abuse and Mental Health Services Administration. Prior to 2002, the survey was called the National Household Survey on Drug Abuse (NHSDA). Due to methodological changes beginning with the 2002 NSDUH, estimates from the 2002 and 2003 surveys should not be compared with estimates from 2001 and earlier NHSDAs. For the 2002 NSDUH, a response rate of $78.9 \%$ yielded 68.126 completed interviews. For the 2003 NSDUH, a response rate of $77.4 \%$ yielded 67,784 completed interviews. For information on survey methodology, see Appendix 7.
and ecstasy), inhalants, or any prescription-type psychotherapeutic used nonmedically.
${ }^{\text {b }}$ Includes nonmedical use of any prescription-type pain reliever, stimulant, sedative, or tranquilizer; does not include over-the-counter drugs.
${ }^{\text {I }}$ Includes use at least once of any of these listed drugs, regardless of marijuana/hashish use; marijuana/hashish users who also have used any of the other listed drugs are included.

| Past 30 days | 14.5 | 11.9 | 4.5 | 2.1 | 1.2 | 1.0 | 1.2 | 1.0 |
| Past 12 months | 23.4 | 16.4 | 7.2 | 3.8 | 2.3 | 2.5 | 2.4 | 1.8 |

Note: These data are from a series of eight surveys sponsored by the U.S. Department of Defense. All military personnel who were on active duty at the time of data collection for each survey year were included in the sampling frames, except for recruits, academy cadets, and persons who were absent without leave, incarcerated, or undergoing a permanent change of station. The final sample for the 2002 survey consisted of 12,756 military personnel $(3,269$ Army, 3,625 Navy, 3,008 Marine Corps, and 2,854 Air Force) who completed anonymous selfadministered questionnaires. Participants were selected to represent males and females in all pay grades of the active force throughout the world. Data primarily were collected from participants in group sessions at military installations or by mail for those not attending the sessions. The overall response rate for 2002 was $55.6 \%$. The data were weighted to represent all activeduty personnel.
"Any illicit drug use" was defined as nonmedical use of marijuana/hashish, phencyclidine (PCP), LSD or other hallucinogens, cocaine, amphetamines or other stimulants, tranquilizers or other depressants, barbiturates or other sedatives, heroin or other opiates, analgesics or other narcotics, inhalants, designer drugs, and gamma hydroxybutyrate (GHB)

Note: See Note, table 3.89. "Heavy alcohol use" was defined as consumption of five or more drinks on the same occasion at least once a week in the past 30 days. The method for comput ing drinking leveis (including heavy alcohol use) was revised in 1998. Heavy alcohol use estimates made after 1995 take into account 32-and 40-ounce containers. Estimates for heavy alcohol use prior to 1998 did not take into account 40-ounce containers therefore the 1998 and 2002 estimates are not directly comparable to previous years.

Note: These data were collected through the Drug Abuse Warning Network (DAWN)
sponsored by the Substance Abuse and Mental Health Services Administration. The data are
weighted estimates representing all drug abuse-related emergency department episodes from a stratified random sample of non-Federal, shor-stay hospitals with 24-hour emergency
departments in the 48 contiguous States, the District of Columbia, and 21 metropolitan areas.
These data are estimates derived from a sample and therefore subject to sampling variation.
Some data have been revised by the Source and may differ from previous editions of
SOURCEBOOK. For information on methodology, estimation procedures, and data
limitations, see Appendix 9.
${ }^{\text {a }}$ Includes American Indians, Alaska Natives, Asians, Native Hawaiians, other Pacific Islanders, and other racial/ethnic groups.

Note: See Note, table 3.92. For 1999, there were an estimated total of 554,570 episodes involv- a Includes American Indians, Alaska Natives, Asians, Native Hawaiians, other Pacific ing 1,013,688 drug mentions; for 2000, an estimated total of 601,392 episodes involving $1,098,915$ drug mentions; for 2001, an estimated total of 638,345 episodes involving $1,165,148$ drug mentions; and for 2002, an estimated total of 670,307 episodes involving 1,209,938 drug mentions. A "drug mention" refers to a substance that was mentioned during a drug-related emergency department episode. In addition to alcohol-in-combination, up to four substances may be reported for each emergency department drug abuse episode; thus, the total number of mentions exceeds the total number of episodes. It should be noted that a particular drug mentioned may or may not be the confirmed "cause" of the episode in multiple-drug abuse Islanders, and other racial/ethnic groups.

${ }^{\text {a }}$ "Binge" alcohol use is defined as drinking five or more drinks on the same occasion on at least 1 day in the past 30 days. "Occasion" means at the same time or within a couple hours of each other. Heavy alcohol use is defined as
drinking five or more drinks on the same occasion on each of 5 or more days in the past 30 days; all heavy alcohol users are also "binge" alcohol users.

Note: These data are based on information from two of the National Highway Traffic Safety Administration's data systems: the Fatality Analysis Reporting System (FARS) and the National Automotive Sampling System - General Estimates System (GES). FARS contains data from a census of fatal traffic crashes occurring in the 50 States, the District of Columbia, and Puerto Rico. FARS data include crashes involving motor vehicles traveling on a trafficway customarily open to the public and resulting in the death of a vehicle occupant or a nonmotorist within 30 days of the crash. GES data are obtained from a nationally representative probability sample selected from all police-reported crashes. To be eligible for the GES sample, a police accident report must be completed and the crash must involve at least one motor vehicle traveling on a trafficway, and result in property damage, injury, or death.

A fatal crash is defined as alcohol-related or alcohol-involved if either a driver or a normotorist (usually a pedestrian) had a measurable or
estimated blood alcohol concentration (BAC) of 0.01 or more grams per deciliter. BAC values are estimated by the Source when alcohol test results are unknown.

Beginning in 2001, the Source changed the BAC categories. The " 0.01 to 0.09 " category was changed to " 0.01 to 0.07 " and the " 0.10 or more category was changed to "0.08 or more." The data for 1982-2000 were revised to reflect these new categories. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK.

Note: These data were compiled by the Federal Bureau of Investigation through the Uniform Crime Reporting (UCR) Program. On a monthly basis, law enforcement agencies (police, sherifts, and State police) report the number of offenses that become known to them in the following crime categories: murder and nonnegligent manslaughter, forcible rape, robbery aggravaled assault, burglary, larceny-theft, motor vehicle theft, and arson. A count of these crimes, which are known as Part I offenses, is taken from records of all complaints of crime received by law enforcement agencies from victims or other sources and/or from officers who discovered the offenses. Whenever complaints of crime are determined through investi gation to be unfounded or false, they are eliminated from an agency's count (Source, 2002, p. 442).

The UCR Program uses seven crime categories to establish a "crime index. " Crime index offenses include murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft; the "Total Crime Index" is a simple sum of the index offenses. Arson was designated as a Part I Index offense in October 1978; data collection began in 1979. However, due to the incompleteness of arson reporting by police, arson data are not displayed nor are they included in the Total Crime Index of the offenses known to the police.

The figures in this table are subject to updating by the UCR Program and therefore may differ from previous editions of SOURCEBOOK. The number of agencies reporting and populations represented may vary from year to year. This table and tables 3.107 and 3.108 present data from alt law enforcement agencies in the UCR Program, including those submitting less than 12 months of data. Estimates for nonreporting areas are included and are based on agencies reporting.

Note: See Note, table 3.106. These figures are aggregated from individual State statistics presented in table 3.108. These data include estimated offense totals for agencies submitting less than 12 months of offense reports (Source, p. 449). Complete data for 2002 were not available for llinois and Kentucky; crime counts tor these States were estimated by the Source. For definitions of offenses and areas, see Appendix 3.
${ }^{\text {a }}$ Populations are U.S. Census Bureau 2002 provisional estimates as of July 1, 2002 and are subject to change.
${ }^{\mathrm{b}}$ Violent crimes are offenses of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
${ }^{c}$ The percentage representing "area actually reporting" is based on the population covered by law enforcement agencies providing 3 or more months of crime reports to the FBl.

Note: See Note, table 3.106. These data represent all law enforcement agencies submitting complete reports for at least 6 common months in 2001 and 2002 (Source, p. 450). Forcible rape figures furnished by the State-level Uniform Crime Reporting (UCR) Program administered by the Delaware State Bureau of Investigation for 2001 and the Illinois Department of State Police for 2001 and 2002 were not in accordance with national UCR guidelines and were excluded by the Source from the forcible rape, violent crime, and Total Crime Index categories. Complete data were not available for illinois and Kentucky for 2001 and 2002. Crime counts for these States were estimated by the Source. For definitions of offenses, and suburban and rural areas, see Appendix 3.
${ }^{a}$ Violent crimes are offenses of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault.
${ }^{6}$ Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft Data are not included for the property crime of arson.
${ }^{\text {c }}$ The murders and nonnegligent manslaughters that occurred as a result of the events of Sept. 11, 2001 are not included in this table.
${ }^{\text {a }}$ Less than $0.1 \%$.
${ }^{\mathrm{e}}$ Includes State police agencies with no county breakdown.
includes law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area; excludes all metropolitan agencies associated with a central city. The agencies associated with suburban areas also will appear in other groups within this table.

Note: See Note, table 3.106. Arson is shown only if 12 months of arson data were received. The Total Crime Index is the sum of the Crime Index offenses, not including arson. Cities are included in the table if the population was 100,000 or more in either of the years presented. Complete data were not available for llinois and Kentucky for 2001 and 2002. For definitions of offenses, see Appendix 3.
${ }^{\text {a }}$ Figures not reported for 2001.
${ }^{\mathrm{b}}$ Forcible rape figures furnished by the State-level Uniform Crime Reporting (UCR) program administered by the llinois Department of State Police were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape and Total Crime Index categories.
${ }^{\text {c }}$ Due to reporting changes, annexations, and/or incomplete data, 2002 figures are not comparable to earlier years.

Due to reporting changes, annexations, and/or incomplete data, 2001 and 2002 figures are not comparable to earlier years.
${ }^{e}$ Due to reporting changes, annexations, and/or incomplete data, 2001 figures are not comparable to earlier years.
'The population for the city of Mobile, AL includes 55,864 inhabitants from the jurisdiction of the Mobile County Sheriff's Department.
${ }^{9}$ Figures not reported for 2002.
${ }^{4}$ The murder and nonnegligent manslaughter figure includes 2,823 deaths reported as a result of the events of Sept. 11, 2001.

| Motor vehicle theft | 1,039,490 | 2.2 | 100.0 | 6,701 |

Note: See Note, table 3.106. "Commercial house" refers to nonresidential structures, with the exception of gas stations, convenience stores, and banking-type institutions. "Loss" refers to property taken during the commission of the offense only. All offenses, including those that involve no loss of property, were used in compiling "average loss." These data are based on law enforcement agencies submitting complete reports for at least 6 months in 2002 (Source, p. 451). Complete data were not available for llinois and Kentucky; crime counts for these States were estimated by the Source. For definitions of offenses, see Appendix 3.
${ }^{\text {a }}$ Percent change calculations are based only on agencies submitting 6 or more common months of data for both 2001 and 2002. As a result, direct comparisons should not be made with similar data presented in previous editions of SOURCEBOOK.
${ }^{\mathrm{b}}$ Because of rounding, percents may not add to total.
${ }^{\text {c }}$ The murders and nonnegligent manslaughters that occurred as a result of the events of Sept. 11, 2001 are not included in the figures used to calculate percent change.
${ }^{d}$ Less than 0.1\%.

| Destruction/damage/ vandalism | 2,347 | 2,642 | 927 |
| Other ${ }^{\text {d }}$ | 16 | 16 | 16 |
| Other ${ }^{\text {d }}$ | 49 | 49 | 61 |

Note: These data reflect the number of bias-motivated offenses reported to the Federal Bureau of Investigation's (FBi) Uniform Crime Reporting Program. In accordance with the Hate Crime Statistics Act of 1990, the FBI defines a crime motivated by blas against race, religion, ethnic/national origin, disability, or sexual orientation as a bias-motivated or hate crime. For 2002, a total of 12,073 law enforcement agencies in 49 States and the District of Columbia participated in the Hate Crime Data Collection Program. Hawaii did not participate. These figures include data from law enforcement agencies submitting less than 12 months of data to the FBI (Source, pp. 3, 23). Data from this source have been updated by the FBI and may differ from those reported in Crime in the United States, 2002.
${ }^{a}$ May include persons, businesses, institutions, or society as a whole.
"Known offender" does not imply that the identity of the suspect is known, rather that an attribute of the suspect has been identified, distinguishing him/her from an unknown offender.
'The actual number of known offenders is 7,314 . Some offenders, however, committed more than one offense per incident and are counted more than once. Therefore subcategories will not add to total.
${ }^{\mathrm{d}}$ Includes offenses other than those listed that are collected as part of the National IncidentBased Reporting System.

Note: The National Park Service is responsible for the administration of 384 park areas that are owned by the Federal Government. Three urban park areas are policed by the U.S. Park Police; other park areas are policed by the U.S. Park Rangers. In some park areas law enforcement responsibilities are shared with other police agencies, e.g., State police, sherifl departments, and city/town police. These data exclude offenses handled by other agencies. The offense categories listed above are the Uniform Crime Reporting Program Part I offenses; see Appendix 3 for detinitions. Note, however, that prior to 1994 these offenses were not counted in the Federal Bureau of Investigation's figures. In 1975, the "Human Kindness Day" activities held in Washington, DC accounted for approximately 500 robbery incidents. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK.
${ }^{\text {a }}$ Includes negligent and nonnegligent manslaughter. ${ }^{6}$ Includes attempts.
${ }^{\text {c Included }}$ in tabulations as a Part 1 offense beginning in 1981.
Source: Table provided to SOURCEBOOK staff by the U.S. Department of the Interior, National Park Service.

| 2002 | 14,054 | 100 | 67 | 13 | 5 | 8 | 2 | 6 |

Note: See Note, table 3.106. In trend tables "constructed" or "adapted" by SOURCEBOOK staff from Crime in the United States, the data are from the first year in which the data are reported. It should be noted that the number of agencies reporting and the populations represented vary from year to year.

The Uniform Crime Reporting Program requests that supplementary information be transmitted to the FBI when a murder or nonnegligent manslaughter has been committed. The actual number of offenses presented in the tables displaying characteristics of murders and nonnegligent manslaughters known to the police may differ from figures in other tables that reflect data from only the initial report of the offense. For example, supplementary data were provided by contributing agencies for 14,054 of the estimated total of 16,204 murders and nonnegligent manslaughters in 2002 (Source, 2002, pp. 19, 20).

For information on States supplying incomplete data for selected years, see Appendix 3.
${ }^{\text {a }}$ Because of rounding, percents may not add to total.
tincludes beatings, strangulations, and "pushed."
${ }^{\text {c }}$ includes poison, explosives, fire, narcotics, and asphyxiation.
${ }^{\text {d}}$ Beginning in 1991, this category includes drownings.
${ }^{e}$ The murders and nonnegligent manslaughters that occurred as a result of the events of Sept. 11, 2001 are not included in this table.

Note: See Notes, tables 3.106 and 3.117. Law enforcement agencies are requested to describe the circumstances of murders and nonnegligent manslaughters. These descriptions are categorized by the Unitorm Crime Reporting Program. These data include murder and nonnegligent manslaughter victims for which supplementary homicide data were received. "Felony type" refers to killings that occur in conjunction with the commission of another felony, such as robbery or burglary.
${ }^{\text {a }}$ Column headers refer to victims.

Note: These data are from the Federal Bureau of Investigation's (FBI) Supplementary Homicide Reports (SHR), a component of the Uniform Crime Reporting Program. SHRs are incident-based reports, rather than the monthly aggregates that comprise the FBI Crime index. Not all agencies that report aggregate offense data to the FBt also submit supplemental homicide data. On average, about $91 \%$ of homicides reported to the FBI are included in the SHR database. To account for homicides for which SHR data were not available, the victim-based analyses include SHR data that have been weighted to match national and State estimates prepared by the FBI. Rates are calcuiated from U.S

Census Bureau, Current Populations Reports. Deaths resulting from the events of Sept. 11, 2001 are not included in any of the analyses that generated these tables. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK.

Table 3.132
Estimated rate (per 1,000 persons age 12 and older) of nonfatal intimate
partner violence and percent change in rate
By sex of victim, 1993-2001

| Sex of victim | Nonfatal intimate victimizations per 1,000 persons |  |  |  |  |  |  |  |  | Percent change 1993 to 2001 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1993 | 1994 | 1995 | 1996 | 1997 | 1998 | 1999 | 2000 | 2001 |  |
| Total | 5.8 | 5.5 | 4.9 | 4.7 | 4.3 | 4.8 | 3.5 | 2.8 | 3.0 | -48.4\% |
| Male | 1.6 | 1.7 | 1.1 | 1.4 | 1.0 | 1.5 | 1.1 | 0.8 | 0.9 | -41.8 |
| Female | 9.8 | 9.1 | 8.5 | 7.8 | 7.5 | 7.8 | 5.8 | 4.7 | 5.0 | -49.3 |

Note: These data are from the U.S. Department of Justice, Bureau of Justice Statistics' National Crime Victimization Survey (NCVS). Nonfatal violence includes rape, sexual assault, robbery, aggravated assault, and simple assault. These data do not include fatal violence. "Intimate partners" include current or former spouses, boyfriends, or girlifiends. Percent
changes are based on unrounded rates. For survey methodology and defini-
tions of terms, see Appendix 8.

Table 3.133
Murder and nonnegligent manslaughters resulting from the Sept. 11, 2001 terrorist attacks

By sex and race of victim, and location

| Race of victim | Total | Sex of victim |  |  |

| Other | 1 | 1 | 0 | $x$ |

Note: The Uniform Crime Reporting (UCR) Program is limited in its ability to report the offenses committed on Sept. 11, 2001. For the most part, the data associated with the events of Sept. 11, 2001 are not included in tables from Crime in the United States, 2001. The number of deaths is so great that combining these figures with traditional crime statistics would distort many types of measurements based on UCR data. Though the deaths resulting from these events may not meet the traditional definition of criminal homicide, the UCR program has classified those deaths for the purposes of presenting these data as murder and nonnegligent manslaughter. (Source: pp. iii, 302, 303).

Note: These data are from the Federal Bureau of Investigation's Supplementary Homicide
Reports (SHR), which are comprised of additional data submitted by participating law enforcement agencies for the offenses of murder and nonnegligent manslaughter only.
"Sniper attack" is an available designation on the SHR reporting form. However, the
Source cautions that there is no uniform definition of sniper attacks for law enforcement
agencies to follow. Reporting agencies are required to select only one circumstance. If a sniper attack occurred in conjunction with another offense type such as a gangland killing or romantic triangle, the agency may have selected one of these designations. The above data include only those incidents in which sniper attack was designated by the reporting agency, the victim was killed, and the weapon reported on the SHR form was a firearm. (Source, p. 315.)
${ }^{\text {a }}$ Includes only offenders for whom age, sex and/or race was reported by law enforcement.
${ }^{b}$ In 2001, one incident involved more than one weapon type.

By victim characteristics, type of event, and selected occupation and industry.
United States, 1992-2002 ${ }^{\text {a }}$--Continued
Note: These data were coilected through the Census of Fatal Occupational Injuries conducted annually by the Bureau of Labor Statistics in cooperation with numerous Federal, State, and ocal agencies. Data were compiled from various Federal, State, and local administrative sources including death certificates, workers' compensation reports and claims, medical examiner reports, police reports, news reports, and reports to various regulatory agencies. The Census of Fatal Occupational Injuries, therefore, includes data for all fatal work injuries, whether they are covered by the Occupational Satety and Health Administration (OSHA), another Federal or State agency, or are outside the scope of regulatory coverage Federal agencies participating in the census include OSHA, the Employment Standards Administration, the Mine Safety and Health Administration, the Federal Aviation Administra tion, the Federal Rairoad Administration, the Department of Energy, and the U.S. Coast Guard. State and local agencies participating in the census include State and local police departments; State vital statistics registrars; State departments of health, labor, and industries; State farm bureaus; and local coroners and medical examiners. Multiple sources were used because studies have shown that no single source captures all job-related fa tatities. Source documents were matched so that each fatality is counted only once. To ensure that a fatality was work related, information was verified from two or more independent source documents or from a source document and a followup questionnaire.
${ }^{\text {a }}$ Detail may not add to total because of the omission of miscellaneous categories .
${ }^{0}$ The workplace homicides that occurred as a result of the events of Sept. 11, 2001 are not included in this table.
${ }^{\text {c Data for }} 2002$ are preliminary.
May include volunteers and other workers receiving compensation.
${ }^{\mathrm{e}}$ Includes paid and unpaid family workers, and may include owners of incorporated businesses or members of partnerships.
${ }^{\text {t}}$ No data reported or data did not meet publication criteria specified by the Source.
${ }^{9}$ Persons identified as Hispanic may be of any race; therefore detail will not add to total. hincludes fatalities to workers employed by government agencies regardiess of industry.

Note: These data are based on information from all death certificates filed in the 50 States and the District of Columbia. The mortality data files are maintained by the National Center for Health Statistics at the Centers for Disease Control and Prevention. Rates for decennial years were calculated using U.S. Census Bureau decennial census counts; population estimates produced by the Census Bureau were used for noncensus years.

Suicide rates for ages under 10 years have been omitted because of low incidence. A category including cases where the age is unknown also has been omitted; this category also comprises a small number of cases each year. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK.

| U.S. Postal Inspection Service | 39 | 24 | 25 | 31 | 27 | 25 | 24 | 12 | 13 | 15 | 19 | 8 |

Note: These data include law enforcement officers killed or assaulted in the line of duty who were employed by the U.S. Departments of the Interior, Justice, Treasury, and the newly established U.S. Department of Homeland Security; the U.S. Capitol Police; and the U.S. Postal Inspection Service. Within these 6 Federal departments are 13 agencies, bureaus, or services, that employ the majority of the personnel responsible for protecting government officials, and enforcing and investigating violations of Federal laws. The Federal Bureau of Investigation's Uniform Crime Reporting Program annually contacts these departments and requests information on officers who were killed or assautted in the line of duty. All assaults and threats of assault are included in the analysis even if no injury to an officer resulted, as are assaults that resulted in the death of an officer (Source, 2002, p. 87).

Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK.
${ }^{\text {c }}$ Data reported by the Immigration and Naturalization Service include the Border Patrol Division only.
${ }^{d}$ Data for 2002 are based only on victim officers who discharged their service weapons.
e In accordance with the Homeland Security Act, the Bureau of Alcohol, Tobacco, Firearms and Explosives, formerly the Bureau of Alcohol, Tobacco and Firearms, was moved from the U.S. Department of the Treasury to the DOJ.

Source: U.S. Department of Justice, Federal Bureau of Investigation, Law Enforcement Officers Killed and Assaulted, 1992, p. 73; 1994, p. 79; 1996, p. 79; 1999, p. 89; 2001, p. 100; 2002, p. 91; FBI Uniform Crime Reports (Washington, DC: U.S. Department of Justice). Table adapted by SOURCEBOOK staff.
${ }^{\text {a }}$ Deaths of two Federal officers resulting from the events of Sept. 11, 2001 are not included.
${ }^{\text {b }}$ The U.S. Department of Homeland Security (DHS) was established as a result of the Homeland Security Act of 2002. The U.S. Bureau o Immigration and Customs Enforcement, formerly the Immigration and Naturalization Service, was moved from the U.S. Department of Justice (DOJ) to DHS. The U.S. Customs Service and the U.S. Secre Service were moved from the U.S. Department of the Treasury to the DHS.

Note: See Note, table 3.152. Beginning in 1984, data include assaults on officers of the U.S. Capitol Police. Data for this agency are not available for years prior to 1984. Beginning in 1991, assault statistics from the Bureau of Prisons, Executive Office for United States Attorneys, and the judicial branch were no longer collected. Therefore, data from 1991 and beyond are not directly comparable with preceding years. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK.
${ }^{2}$ Does not include 1988 data from the Bureau of Prisons where 23 officers were assautted with weapons and 123 without weapons.
${ }^{\mathrm{b}}$ No reports concerning assaults on Bureau of Indian Affairs officers were received for 1991 and 1995. The data for 1991 do not include 96 National Park Service victim officers and 4 Immigration and Naturalization Service victim officers for whom type of weapon was not reported.

Note: These data are from the Federal Bureau of Investigation's (FBI) Uniform Crime Reporting (UCR) Program. Federal, State, and local law enforcement agencies participating in the UCR Program submit data on any sworn officer killed feloniously or accidentally in the line of duty within their jurisdictions. FBI field divisions and legal attaché offices also report such incidents occurring in the United States and its territories, as well as those in which a United States law enforcement officer dies while assigned to duties in another country (Source, 2002, p. 5). Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK.
${ }^{\text {a }}$ Does not include the deaths of 72 law enforcement officers resulting from the events of Sept. 11, 2001.

| 2002 | 28.4 | 12.2 | 29.8 | 17.1 | 25.7 |

Note: These data are based on agencies reporting assaults to the Federal Bureau of Investigation's Uniform Crime Reporting Program; the number of agencies reporting and percent of total population represented vary from year to year. Data for 2002 are based on 9,987 agencies covering approximately $75 \%$ of the total population. Data for previous years are from agencies covering from $63 \%$ to $85 \%$ of the total population. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK.

Table 3.166
Estimated number of structure fires and intentionally set structure fires, and resulting civilian fire deaths and value of property damage

United States, 2002

|  | Structure fires |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | Estimated <br> number <br> of fires | Estimated <br> number of <br> civilian <br> fire <br> deaths | Estimated <br> value of <br> property damage <br> (in thousands) |  |
| Total, all fires in structures | 519,000 | 2,775 | $\$ 8,742,000$ |  |
| Total, intentionally set structure fires | 44,500 | 350 | 919,000 |  |

Note: These data are weighted estimates from an annual survey of fire departments conducted by the National Fire Protection Association (NFPA). All U.S. fire departments that protect communities of 100,000 population or more are included in the sample. For depart ments that protect communities of less than 100,000 population, the sample is stratified by community size. A total of 3,460 fire depantments responded to the 2002 survey. Readers are advised to consult the Source for more detailed information on methodology and weighting procedures.
"Civilians" inctude anyone other than a fire fighter. "Property damage" includes all forms of direct loss to contents, structure, machinery, etc., but does not include indirect losses, such as interruption of business or temporary shelter provisions. (Source, p.33.)

Note: Arson was designated as a Part I Index Offense in October 1978; data collection began in 1979. In 2002, 12,454 law enforcement agencies reported 74,921 arson offenses to the Uniform Crime Reporting Program. The data presented above are from 12,414 agencies that furnished detailed reports such as type of structure and estimated value of property damage. Readers should be aware that these data do not represent the Nation's total arson experi ence (Source, p. 57). For a definition of arson, see Appendix 3.
${ }^{\text {a }}$ Because of rounding, percents may not add to total.

Note: Prior to 1988, detailed information concerning bombing incidents occur ring in the United States, Puerto Rico, Guam, and the Virgin Islands was gathered by the Federal Bureau of Investigation's (FBI) Uniform Crime Reporting Program. Since 1988, the FBI Bomb Data Center has collected these data. Reports of bombing incidents are gathered from State and local public safety agencies, the U.S. Postal Inspection Service, Military Explosive Ordnance Disposal units, and the Bureau of Alcohol, Tobacco and Firearms.

Bombing incidents refer to actual and attempted detonations of explosive or incendiary devices in violation of a State, local, or Federal law. Prior to 1990. these tabulations excluded threats to bomb, hoax bomb devices, accidental explosions, recoveries of explosive or incendiary devices, and such misdemeanor offenses as the illegal use of fireworks. Beginning in 1990, only bomb threats and such violations as the illegal use of fireworks were excluded from the tabulations.

These figures include $\$ 100,000,000$ in property damage, 518 persons injured, and 168 deaths resulting from the bombing of the Alfred P. Murrah Federal building in Oklahoma City on Apr. 19, 1995.
${ }^{g}$ Includes 63 incidents involving combination devices.
"Includes 39 incidents involving combination devices.

Table 3.173
Terrorist incidents and preventions
United States, 1980-2001

Terrorist incidents

Note: See Note, table 3.173.
Note: A terrorist incident is a violent act, or an act dangerous to human life, in violation of the criminal laws of the United States or of any State, to intimidate or coerce a government, the civilian population, or any segment thereof, in furtherance of political or social objectives. A terrorism prevention is a documented instance in which a violent act by a known or suspected terrorist group or individual with the means and a proven propensity for violence is successfully interdicted through investigative activity. (Source, p. iv.) A suspected terrorist incident is a potential act of terrorism in which responsibility for the act cannot be attributed at the time to a known or suspected terrorist group or individual. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK.

Source: U.S. Department of Justice, Federal Bureau of Investigation, Terrorism 2000/2001 [Online]. Available: http://www.fbi.gov/publications/terror/terror2000_2001.pdt [Sept. 14, 2004], p. 10. Table adapted by SOURCEBOOK staff.
${ }^{\text {a }}$ Includes detonated and undetonated devices, tear gas, pipebombs, letterbombs, and firebombs.
${ }^{\text {b }}$ Includes the aircraft attacks of Sept. 11, 2001, which are counted by the Source as a single terrorist incident
${ }^{c}$ These figures sum to 484 because although designated as a single act of terrorism, the aircraft attacks of Sept. 11, 2001 have been designated as one terrorist incident in the Northeast and one terrorist incident in the South. Similarly, although the anthrax mailings that occurred from September through November 2001 have been categorized as a single act of terrorism, the incidents have been designated as one terrorist incident in the North east and one terrorist incident in the South.

Note: Terrorism is defined as premeditated, politically motivated violence perpetrated against noncombatant targets by subnational groups or clandestine agents, usually intended to influence an audience. International terrorism involves citizens or territory of more than one country. (Source, 2003, p. xii.) Most attacks that have occurred during Operation Iraqi Freedom and Operation Enduring Freedom do not meet this definition of international terrorism because they were directed at military forces on duty. Only those incidents directed against civilians and unarmed military personnel while off duty are considered terrorist attacks. (Source, 2003, p. 2.) Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK.
${ }^{a}$ The bombing of the World Trade Center in New York City on Feb. 26, 1993 accounts for this increase.
${ }^{\text {b }}$ The bombing of the AI Khubar U.S. military housing complex near Dhahran, Saudi Arabia on June 25, 1996 accounts for this increase.
${ }^{\mathrm{c}}$ These figures may not include complete counts of persons killed and wounded in the Sept. 11, 2001 terrorist attacks and are subject to revision.

Note: Screening consists of "the systematic examination of persons and property using weapons-detecting procedures or facilities (electronic or physical search) for the purpose of detecting weapons and dangerous articles and to prevent their unauthorized introduction into sterile areas or aboard aircraft." (Source, 1993, p. 42.) Some data have been revised by the Source and may differ from previous editions of SOURCE. 800K.
${ }^{\text {ap }}$ Prior to 1992, the weapons category "other" included items such as starter pistols, flare pistols, and BB guns. Beginning in 1992, this category was expanded to include stunning devices, chemical agents, martial arts equipment, knives, bludgeons, and certain other designated items, and renamed "other dangerous articles." Reporting of this category was discontinued by the Source in 1996 due to inconsistent reporting
${ }^{6}$ From 1992 to 1994, the method of counting "explosive/incendiary devices" was revised. Individual items were counted rather than packages (i.e., one box of firecrackers counted as 20 firecrackers; one box of ammunition counted as 50 carridges). Reporting of this category was discontinued by the Source in 1996 due to inconsistent reporting

## Section 4

## Characteristics and distribution of persons arrested

This section features arrest data from the Uniform Crime Reporting (UCR) Program, the Federal Bureau of Investigation's ongoing nationwide data collection program. Information on criminal offenses known to, and arrests made by, law enforcement agencies across the country are reported to the UCR Program. These data represent the most comprehensive source of arrest information currently available due to a consistently high participation rate by law enforcement agencies. Detailed data on total arrests for each of the Part I and Part II UCR offenses are presented. These tables include arrests in cities, suburban areas, and rural counties, and are displayed by age, sex, and race of arrestees. By-State counts of arrests are shown for the eight Index offenses: murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson. These figures are provided for the total population and for persons under age 18. In addition, tables displaying trends spanning over 30 years show arrest rates for the eight Index crimes, as well as rates of violent and property crime indices by geographic region.

Offenses cleared by arrest and the proportion of Index crimes cleared by arrest are included in the next part of the section. Tables show trends in clearance by arrest for the last 31 years, and clearances displayed by population size, geographic region, and for persons under 18 years of age (including arson). Additionally, there is information on juveniles taken into police custody and the manner of handling of juvenile detainees. The final UCR tables presented in this section display 31-year trends and by-State counts of alcohol-related arrests.

These tables are followed by information from the National Institute of Justicesponsored Arrestee Drug Abuse Monitoring (ADAM) Program, which collects data on the prevalence of drug use among adult arrestees processed at booking facilities throughout the United States. These data report the prevalence of arrestee drug use for 43 participating U.S. cities and counties. Additional tables from the ADAM Program provide information on arrestees reporting receiving drug treatment and the percent reporting recent binge alcohol use. Next, the number of Federal arrests by offense type and arresting agency are displayed in tables from the Bureau of Justice Statistics-sponsored Federal Justice Statistics Program. Information on characteristics of persons arrested by Federal agencies also is presented.

Included in the last segment of this section are data from the Federal-wide Drug Seizure System, which provide counts of drugs seized by Federal agencies. A series of tables, some of which provide more than 25 years of data, present the activities of the Drug Enforcement Administration (DEA), including information on drugs removed from the domestic market, seizures of domestically cultivated marijuana, seizures of illegal drug laboratories, arrests made by the DEA and characteristics of persons arrested, and the type and value of assets seized. Drug and property seizures made by the former U.S. Customs Service also are presented. Finally, information on the law enforcement activities of the U.S. Citizenship and Immigration Services, formerly the Immigration and Naturalization Service, is shown, including data on the number of deportable aliens located and removed from the United States.

Table 4.1
Estimated number of arrests ${ }^{\text {a }}$
By offense charged, United States, 2002

| Aggravated assault | 472,290 |
| Burglary | 288,291 |
| Larceny-theft | 1,160,085 |
| Motor vehicle theft | 148,943 |
| Arson | 16,635 |
| Violent crime ${ }^{\text {c }}$ | 620,510 |
| Property crime ${ }^{\text {d }}$ | 1,613,954 |
| Total Crime Index ${ }^{\text {e }}$ | 2,234,464 |
| Other assauts | 1,288,682 |
| Forgery and counterfeiting | 115,735 |
| Fraud | 337.404 |
| Embezzlement | 18,552 |
| Stoten property; buying, receiving, possessing | 126,422 |
| Vandalism | 276,697 |
| Weapons; carrying, possessing, etc. | 164,446 |
| Prostitution and commercialized vice | 79,733 |
| Sex offenses (except forcible rape and prostitution) | 95,066 |
| Drug abuse violations | 1,538,813 |
| Gambling | 10,506 |
| Offenses against family and children | 140,286 |
| Driving under the influence | 1,461,746 |
| Liquor laws | 653,819 |
| Drunkenness | 572,735 |
| Disorderly conduct | 669,938 |
| Vagrancy | 27,295 |
| All other offenses (except traftic) | 3,662,159 |
| Suspicion (not included in total) | 8,899 |
| Curfew and loitering law violations | 141,252 |
| Runaways | 125,688 |

Note: These data were compiled by the Federal Bureau of Investigation through the Uniform Crime Reporting (UCR) Program. On a monthly basis, law enforcement agencies report the number of offenses that become known to them in the following crime categories: murder and nonnegligent manslaughter, manslaughter by negligence, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson. All of these crime categories except manslaughter by negligence, are used to establish a crime index. The "Total Crime Index" is a simple sum of the index offenses. Arson was designated a Part I Index offense in October 1978. Data collection began in 1979. Unlike the tables from Crime in the United States presented in Section 3, arrest statistics for the crime of arson are complete and appear in the "Total Crime Index" and "Property crime" total.

Arrest statistics are compiled as part of this monthly data collection effort. Participating law enforcement agencies are instructed to count one arrest each time a person is taken into custody, notified, or cited for criminal infractions other than traffic violations. Annual arrest figures do not measure the number of individuals taken into custody because one person may be arrested several times during the year for the same type of offense or for different offenses. A juvenile is counted as a person arrested when he/she commits an act that would be a criminal offense if committed by an adult. Two offense categories, "curfew and loitering" and "runaway," are tabulated only for juveniles. Violations of local juvenile acts other than runaway and curfew and loitering law violations are included in the "all other offenses" classification (U.S. Department of Justice, Federal Bureau of Investigation, Uniform Crime Reporting Handbook (Washington, DC: USGPO, 1984), p. 60).

Data in this table are estimates based on arrest statistics for all law enforcement agencies in the Unitorm Crime Reporting Program, including those submitting reports for less than 12 months in 2002 (Source, p. 451). Because of reporting problems at the State level, only limited arrest data were provided by Illinois, Kentucky, Nevada, and South Carolina and no arrest data were available from the District of Columbia. Complete arrest data for New York City also were not available. Arrest totals for these States, New York City, and the District of Columbia were estimated by the Source for inclusion in the above table. Subsequent tables, displaying detailed breakoowns of persons arrested, contain limited or no data for these States. New York City, and the District of Columbia (Source, p. 444).

For definitions of offenses, see Appendix 3.
${ }^{\text {a }}$ Data are based on all reporting agencies and estimates for unreported areas.
${ }^{\mathrm{b}}$ Because of rounding, figures may not add to total. Total does not include suspicion. ${ }^{c}$ Violent crimes are offenses of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assautt.
${ }^{\mathrm{d}}$ Property crimes are offenses of burglary, tarceny-theff, motor vehicle theft, and arson. ${ }^{\text {e }}$ Includes arson.

Note: See Note, table 4.1. The number of agencies reporting and the popula tions represented vary from year to year. Due to National Incident-Based Reporting System conversion efforts beginning in 1991, complete arrest data were not available for a small number of States for certain years. See Appendix 3 for a list of States omitted. Arson was designated an Index property crime in October 1978. Data collection began in 1979. For definitions of offenses, see Appendix 3.

Note: See Note, table 4.1. This table presents data from all law enforcement agencies submilting complete reports for 12 months in 2002 (Source, p. 451). Population figures are estimates calculated from U.S. Census Bureau data. For definitions of offenses, suburban areas, and rural counties, see Appendix 3.
${ }^{\text {c }}$ Does not include suspicion.
${ }^{\text {d }}$ Violent crimes are offenses of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault.
${ }^{\text {a }}$ Includes only suburban county law enforcement agencies.
${ }^{\mathrm{b}}$ includes law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area; excludes all metropolitan agencies associated with a central city. The agencies associated with suburban areas also will appear in other groups within this table.

Table 4.4
Percent distribution of total U.S. population and persons arrested for all offenses

| By age group, United States, 2002 |  |  |

Note: See Note, table 4.1. "An offense is 'cleared by arrest' or solved for crime reporting purposes when at least one person is: (1) arrested; (2) charged with the commission of the offense; and (3) turned over to the court for prosecution. "The prosecution can follow arrest, court summons, or police notice. An offense is also counted as cleared by arrest if any of the following "exceptional" conditions pertain: (1) suicide of the offender; (2) double murder; (3) deathbed confession; (4) offender killed by police or citizen; (5) contession by offender already in custody or serving a sentence; (6) an offender prose cuted in another jurisdiction for a different offense and that jurisdiction does not release offender to first jurisdiction; (7) extradition denied; (8) victim refuses to cooperate in prosecution; (9) warrant is outstanding for felon but before arrest the offender dies of natural causes or as a result of an accident, or is killed in the commission of another offense; or, (10) handling of a juvenile offender either orally or by written notice to parents in instances involving minor offenses where no referral to juvenile court is made as a matter of publicly accepted police policy. (U.S. Department of Justice, Federal Bureat of Investigation, Uniform Crime Reporting Handbook (Washington, DC: USGPO, 1984), pp. 41, 42.) It should be noted that the arrest of one person can clear several crimes or several persons may be arrested to clear one crime.

Arson was designated an Index property crime in October 1978. Due to the incompleteness of arson reporting by police for offenses known, arson data are not included in
this table. This table presents data from all law enforcement agencies submitting complete reports for at least 6 months in 2002 (Source, p. 451). Population figures are estimates calculated from U.S. Census Bureau data. For definitions of offenses, city and suburban areas, and rural counties, see Appendix 3
a fncludes offenses cleared by exceptional means.
Violent crimes are offenses of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault.
${ }^{\text {c Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. }}$ Data are not included for the property crime of arson.
${ }^{\text {I }}$ Includes law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistica Area; excludes all metropolitan agencies associated with a central city. The agencies associated with suburban areas also will appear in other groups within this table.

Note: See Notes, tables 4.1, 4.2, and 4.19. This table presents data from all law enforcemen
agencies submitting complete reports for 12 months or fewer in 1971-80 and at least 6 months in 1981-2002. For definitions of offenses, see Appendix 3.
${ }^{\text {a }}$ Includes offenses cleared by exceptional means.
Violent crimes are offenses of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault.
${ }^{\text {c }}$ Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

Note: These data are compiled from the Federal Bureau of Investigation's (FBI) Uniform Crime
Reporting Program. The data presented in this table differ from those presented in the U.S.
Department of Justice, Federal Bureau of Investigation, Crime in the United States, 2002
(Washington, DC: USGPO, 2003) because this table includes data processed by the FBI after
the cutoff date for that publication. According to the Source, in many States where drunkenness
and/or vagrancy are not treated as criminal actions, these categories are not permissible causes of arrest. In one respect, these data may be considered conservative estimates of alcoholrelated arrests. The FBI classifies arrests by a single offense, using a hierarchical rule. Consequently, crimes committed while intoxicated are categorized under the primary offense. On the other hand, "criving under the influence" includes impairment due to any type of drug; it is not limited to impairment due to alcohol. Data for 2002 were not available for Florida.

Source: Table adapted by SOURCEBOOK staff from table provided by the U.S. Department of Health and Human Services, National Institute on Alcohol Abuse and Alcoholism.

Note: These data are from the Arrestee Drug Abuse Monitoring (ADAM) program sponsored by the U.S. Department of Justice, National Institute of Justice. ADAM data are collected in booking facilities in participating counties throughout the United States. Each quarter, trained local ADAM staff obtain voluntary and anonymous urine specimens and confidential interviews from a new sample of arrestees. ADAM data are collected on a county-wide basis, however, the primary city in each county is used as the identifier. Readers should note that for a small number of counties estimates are based on data from only one or two data collection quarters. Readers are encouraged to consult the original Source for information on year-to-year variation in number of data collection quarters completed and arrestees interviewed. For methodology and survey sampling information, see Appendix 10.
${ }^{\mathrm{a}}$ Includes cocaine, marijuana, methamphetamine, opiates, and phencyclidine (PCP).
Includes either crack or powder cocaine.

Note: The Federal-wide Drug Seizure System (FDSS) contains information about drug seizures made within the jurisdiction of the United States by the Drug Enforcement Admin istration, Federal Bureau of Investigation, U.S. Customs Service, and U.S. Border Patrol as well as maritime seizures made by the U.S. Coast Guard. Drug seizures made by other Federal agencies are included in the FDSS database when custody of the drug evidence was transferred to one of these five agencies.

Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK.
${ }^{\text {a }}$ Figures are rounded to the nearest pound.

Note: These data were collected by the Drug Enforcement Administration (DEA) in conjunction with the Domestic Cannabis Eradication/Suppression Program. This program is a joint Federal and State effort in which the DEA contributes funding, training, equipment, investigative, and aircraft resources to the participating States in the effort to eradicate domestically cuitivated marijuana.
${ }^{a}$ May include tended ditchweed; see footnote $b$.
bitchweed is a type of marijuana that grows wild.

Note: The data presented for 1975 and 1976 coincide with the former Federal fiscal year, the period July 1 to June 30 . The transition quarter refers to the period July 1,1976 to Sept. 30, 1976. The Federal fiscal year is now October 1 to September 30. Beginning in fiscal year 1995, the data include all incidents in which the U.S. Customs Service participated with other Federai, State, or local enforcement agencies. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK
acategory changed to "opiates" in fiscal year 2000; previously, opiates were included with "other drugs."
${ }^{\text {b Includes amphetamines, barbiturates, LSD, and other drugs. Khat and methamphetamine }}$ were added in fiscal year 2000.

| 2002 | $322,246,408$ |

Note: The U.S. attorney is the highest ranking law enforcement official in each of the 94 Federal judicial districts. Each U.S. attorney, under the direction of the U.S. Attorney General, is responsible for establishing law enforcement priorities, and for carrying out the prosecution and litigation activities within their respective districts. Each U.S. attorney also is the chief litigator representing the United States in civil judicial proceedings in the district. U.S. attorneys direct and supervise the work of the assistant U.S. attorneys and staff of the district's offices
U.S. attorneys' offices utilize both criminal and civil asset forfeiture laws to strip away, through court proceedings, property that was either used for or derived from criminal activity such as narcotics violations, money laundering, racketeering, and fraud as well as property used to facilitate the commission of certain crimes (Source, Fiscal Year 2002, p. 36). These data represent the combined value of forfeited cash and property.
${ }^{\text {a }}$ Beginning in fiscal year 2001, data reflect changes resulting from the Civil Asset Forfeiture Reform Act (CAFRA) of 2000, which requires numerous procedural modifications goveming criminal and civil asset forfeiture. See the Source, Fiscal Year 2002, for details.

## Page 398 intentionally blank.

## Section 5

## Judicial processing of defendants

This section presents a wide range of statistics on judicial activity for Federal, State, and military courts detailing the judicial processing of adult and juvenile defendants in the United States. The section begins with information on requests for immunity by Federal prosecutors. Court orders for interception of wire, oral, or electronic communications and subsequent arrests and convictions are then presented. Activities of U.S. attorneys follow, including the number of grand jury proceedings, criminal cases handled, and offenses involved.

Activities of the Federal courts are the focus of the next portion of Section 5. Detailed data from the Administrative Office of the United States Courts show criminal cases filed, terminated, and pending in U.S. District Courts, and include trend tables that present these case processing activities over time. Tables also display specific offenses (e.g., weapons and immigration violations, fraud, embezzlement), as well as offense level (e.g., felony, class A misdemeanor).

Information on pretrial detention for Federal defendants follows. Several tables feature information on the number of defendants detained, the length of detention, and detention-related costs incurred by each Federal judicial circuit and district.

The Bureau of Justice Statistics' (BJS) Federal Justice Statistics Program also provides detailed data on the U.S. District Courts, including figures on Federal defendants released or detained prior to trial. Data are displayed by offense type, defendant characteristics, and outcome of pretrial release. information on the processing of cases in district courts includes the disposition of cases, number of defendants convicted, method of conviction, and type of sentences imposed. Demographic characteristics of defendants sentenced, data on specific offenses, type of disposition, and length of prison sentences also are included in the sentencing data.

Application of U.S. Sentencing Commission guidelines in Federal district courts is the focus of the next segment. These tables enumerate offenders sentenced, offense types, demographic characteristics of defendants (including level of education and status of citizenship), type and length of sentences imposed, fines and restitution ordered, and sentences that depart from the guidelines. Also, a table showing fines and restitution ordered for organizations sentenced in U.S. District Courts is included. A detailed breakdown of defendants charged with and sentenced for violation of Federal drug laws, as
well as convictions resulting from arrests by the Drug Enforcement Administration is among the information presented. Counts of antitrust cases filed, length of civil and criminal trials, and amount of time from filing to final disposition of cases in U.S. District Courts concludes this series of tables.

The National Judicial Reporting Program sponsored by BJS is the source of extensive information on judicial activity in State courts shown in the next group of tables. This dataset provides counts of felony convictions and sentences in State courts by offense type, demographic characteristics of defendants, method of conviction, and the type and length of sentences imposed. Information also is presented on defendants sentenced to additional penalties and the length of time from arrest to sentencing for felony cases.

Next are tables from BJS' State Court Processing Statistics Program, which pertain to the processing of felony defendants in the 75 largest counties in the United States. These data inform those interested in judicial processing in large urban areas. A series of tables focusing on juvenile courts and the processing of juvenile defendants follows. Included is information on the characteristics of juvenile offenders and the outcomes of cases.

Section 5 also includes a trend table with more than 25 years of data for types of prisoner petitions filed in U.S. District Courts by State and Federal prisoners. The number of appeals filed in U.S. Courts of Appeal is presented. Tables on the activities of the U.S. Supreme Court show data on cases filed and types of dispositions. Next is a trend table with 50 years of data on requests for executive clemency. Criminal matters handled by the U.S. Postal Inspection Service, processing of immigration law violators, and cases involving abuse of public office during the last quarter century are the topics of tables that appear at the end of this segment.

Data on activity in U.S. military courts conclude this section. Specifically, these tables detail military courts-martial cases for all branches of the U.S. armed forces. Tables provide trend data on general, special, and summary courts-martial, and type of discharge, for each branch of the U.S. military and the Coast Guard.

| 1994 | 1,717 | 1,262 | 74 | 3,279 | 2,225 | 68 |
| 1995 | 1,520 | 1,182 | 78 | 2,776 | 1.987 | 72 |
| 1996 | 1,493 | 1,135 | 76 | 2.806 | 2,066 | 74 |
| 1997 | 1,502 | 1,108 | 74 | 2,737 | 1,953 | 71 |
| 1998 | 1,340 | 1,017 | 76 | 2,300 | 1,616 | 70 |
| 1999 | 1,196 | 908 | 76 | 2,059 | 1.444 | 70 |
| 2000 | 1,206 | 955 | 79 | 2,164 | 1,584 | 73 |
| 2001 | 1,132 | 929 | 82 | 1,986 | 1,558 | 78 |
| 2002 | 901 | 717 | 80 | 1.546 | 1,084 | 70 |
| 2003 | 913 | 743 | 81 | 1,613 | 1,175 | 73 |

Note: These data reflect requests received from Federal prosecutors under 18 U.S.C. 6001-6005, the statute that governs the granting of use immunity. 18 U.S.C. 6003 requires all Federal prosecuting attorneys to receive authorization from the U.S. Attorney General (or representative) before seeking a court order for witness immunity. It should be noted that in some cases in which the authorization is obtained, the prosecutor may decide not to seek the immunity order from the courts. Therefore, the number of witnesses actually granted immunity is probably lower than the data in the table indicate. It should also be noted that data for 1973 and 1974 include a total of 11 requests and 27 witnesses, and 7 requests and 11 witnesses, respectively, falling under an older statute, 18 U.S.C. 2514 , which was repealed. "Criminal Division" includes the Criminal Division of the U.S. Department of Justice and the U.S. attorneys. Other requests, not pertaining to the Criminal Division, come from the remaining divisions of the U.S. Department of Justice (e.g., Antitrust, Tax, Civil Division, Civil Rights, and Environment and Natural Resources), as well as from the other Federal agencies (e.g., Federal Trade Commission, Securities and Exchange Commission, and Department of the Army) and from Congress, all of which may request immunity for witnesses. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK.

Source: Table constructed by SOURCEBOOK statt from data provided by the U.S. Department of Justice, Criminal Division.

| 2003 | 578 | 864 |

Note: The Director of the Administrative Office of the United States Courts is required, in accordance with provisions of 18 U.S.C. 2519(1), to transmit to Congress a report regarding applications for orders authorizing or approving the interception of wire, oral, or electronic communications. This report is required to contain information about the number of such orders and any extensions granted. Every State and Federal judge is required to file a written report on each application made. This report is required to contain information on the grants and denials, name of applicant, offense under investigation, type and location of device, and duration of authorized intercept. Prosecuting officials who have applied for intercept orders are required to file reports containing information on the cost of the intercepts; the number of days the device was in operation; the total number of intercepts; the number of incriminating intercepts recorded; whether encryption was encountered in the course of the intercept; and the results of the intercepts in terms of the number of arrests, trials, convictions, and motions to suppress evidence obtained through the use of intercepts. Forty-seven jurisdictions (the Federal Government, the District of Columbia, the Virgin Islands, and 44 States) had statutes authorizing the interception of wire, oral, or electronic communications during 2003; 24 of these jurisdictions had court-authorized orders for interception during 2003 (Source, 2003, pp. 6, 7).

Note: See Note, table 5.2. Arrests, trials, and convictions resulting from the interceptions of wire, oral, and electronic communication do not always occur within the same year as the implementation of the court order. This table presents arrest and conviction data for the year court-authorized interception began and subsequent years. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK.

Note: The U.S. attorney is the highest ranking law enforcement official in each of the 94 Federal judicial districts. Each U.S. attorney, under the direction of the U.S. Attorney General, is responsible for establishing law enforcement priorities, and for carrying out the prosecution and litigation activities within their respective districts. Each U.S. attorney also is the chief litigator representing the United States in civil judicial proceedings in the district. U.S. attorneys direct and supervise the work of the assistant U.S. attorneys and staff of the district's offices.
${ }^{\text {a }}$ Includes cases filed and terminated by U.S. attorneys in U.S. District Courts only; excludes filings and terminations in magistrate courts and appellate courts.

| 1977 | 19,794 | 40,000 | 1,589 | 44,233 | 17,150 | 2002 | 49,696 | 66,452 | 548 | 60,991 | 55,705 |
| 1978 | 17,150 | 34,624 | 1,359 | 37,286 | 15,847 | 2003 | 55,518 | 70,092 | 550 | 65,628 | 60,532 |
| 1979 | 15,847 | 31,536 | 1,152 | 33,411 | 15,124 |  |  |  |  |  |  |

Note: Two reporting changes were made during fiscal year 1976. Beginning Oct. 1, 1975, all minor offenses (offenses involving penalties that do not exceed 1 year imprisonment or a fine of more than $\$ 1,000$ ), with the exception of most petty offenses (offenses involving penalties that do not exceed 6 months incarceration and/or a fine of not more than $\$ 500$ ), are included. Minor offenses are generally disposed of by magistrate judges and, in past years, most of these minor offenses would not have been counted in the workload of the district courts. Second, when the Federal Government's motion to dismiss an original indictment or information is granted, the superseding indictment or information does not become a new case as in the years prior to 1976, but remains the same case. (An indictment is the charging document of the grand jury, and an information is the charging document of the U.S. attorney.) Data for 1955-91 are reported for the 12 -month period ending June 30. Beginning in 1992, data are reported for the Federal fiscal year, which is the 12 -month period ending September 30 . These data were taken from the first year they were reported and do not refiect revisions made in subsequent years. Therefore, these data may differ from figures presented in table 5.8 .
"Received by transfer" includes defendants transferred by Rule 20, Federal Rules of Criminal Procedure, which provides that defendants who (1) are arrested or held in a district other than that in which an indictment or information is pending against them or in which the warrant for their arrest was issued and (2) state in writing that they wish to
plead guilty or nolo contendere, may consent to disposition of the case in the district in which they are arrested or are held, subject to the approval of the U.S. attorney for both districts.
${ }^{\text {a }}$ includes reopens.

Note: See Note, table 5.9. These data exclude transfers. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK.
${ }^{\text {a }}$ |ncludes escape from custody, aiding or abetting an escape, failure to appear in court, and bail jumping.
${ }^{\text {B }}$ The data for years prior to 2001 include cases removed from State courts under provisions of the Civil Rights Act, 28 U.S.C. 1443.
${ }^{\text {c }}$ Includes obstructing mail, mailing nonmailable material, and other postal regulations.
${ }^{\text {d In 2003, a change in coding caused some cases that previously would have been }}$ classified as homicide cases to be reported as aggravated assault cases; therefore, the data for 2003 and thereafter are not comparable to previous years.

## Table 5.13

## Federal defendants released or detained prior to trial in U.S. District Courts

## By offense, United States, fiscal year 2001--Continued

Note: These data are from the U.S. Department of Justice, Bureau of Justice Statistics Federal Justice Statistics Program database. Sources of information include the Executive Office for U.S. Attorneys, the Administrative Otfice of the United States Courts, the U.S. Sentencing Commission, the U.S. Marshals Service, the Drug Enforcement Administration, and the Federal Bureau of Prisons. The Administrative Office of the United States Courts also maintains data collected by the Federal Pretrial Services Agency (PSA), the U.S. Courts of Appeals, and the Federal probation and supervision service.

Tables presenting pretrial release and detention information were created from the PSA data files. The data describe 68,214 defendants who terminated pretrial services during fiscal year 2001 and whose cases were filed by complaint, indictment, or information. "Released" defendants includes some defendants who also were detained prior to trial; "detained" defendants includes some defendants who also were released prior to trial. Total includes defendants for whom release status data were unavailable. For methodology and definitions of terms, see Appendix 11.

Includes deposit bond, surety bond, and collateral bond
${ }^{\text {b Held under }} 18$ U.S.C. 3142 pending deportation, action on prior pretrial release, or probation or parole review.
${ }^{\text {c Includes }} 138$ defendants for whom offense category could not be determined, 98 of whom were released, 63 of whom were detained.
${ }^{d}$ Includes only violent sex offenses.
${ }^{9}$ Excludes tax fraud
${ }^{\dagger}$ Excludes transportation of stolen property.
${ }^{9}$ Excludes fraudulent property offenses; includes destruction of property and trespass. ${ }^{h}$ Includes offenses with unclassifiable offense type.

Note: See Note, table 5.13. Data describe defendants whose pretrial services were terminated in fiscal year 2001. A defendant with more than one type of violation appears in more than one column. A detendant with more than one of the same type of violation appears only once in that column. Therefore, the sum of individual violations exceeds the total. Not all violations resulted in revocation. For methodology and definitions of terms, see Appendix 11.
${ }^{\text {a }}$ Includes defendants for whom offense category or characteristics could not be determined.

Note: See Note, table 5.13. These data were created by matching the Administrative Office of the United States Courts master data files with the U.S. Sentencing Commission monitoring system files (which are limited to defendants sentenced under the Federal sentencing guidelines) and the Federal Pretrial Services Agency's data files. Offenders were classified by the most serious offense charged. For methodology and definitions of terms, see Appendix 11.
${ }^{a}$ Percents may not add to 100 because of rounding.
${ }^{\text {b }}$ Includes defendants for whom offense category could not be determined.
${ }^{\mathrm{c}}$ Includes offenders for whom these characteristics could not be determined. ${ }^{d}$ For some defendants, prior adult convictions are lirnited to those used in calculating sentences under the Federal sentencing guidelines (see Source, p. 62).

Note: See Notes, tables 5.13 and 5.18. By definition, corporations are excluded from data displaying offender characteristics but included in the data tor "all offenders." Offenders are classified by the most serious offense of conviction. Life sentences and indeterminate sentences are included. These percentages reflect the percent of convicted persons having a particular characteristic who were incarcerated. For example, $83 \%$ of all convicted males were incarcerated and $94.2 \%$ of males convicted of a violent offense were incarcerated. For methodology and definitions of terms, see Appendix 11.
${ }^{\text {a }}$ Includes corporations and offenders for whom offense or characteristics were unknown.
${ }^{\text {b }}$ For some offenders, prior adult convictions are limited to those used in calculating sentences under the Federal sentencing guidelines (see Source, p. 75).

By type and length of sentence, 1945-2003-Continued

Note: See Notes, tables 5.9 and 5.22. Data for 1945-91 are reported for the 12-month period ending June 30 . Beginning in 1992, data are reported for the Federal fiscal year, which is the 12 -month period ending September 30

Prior to 1977, the periods reported for lengths of sentences to imprisonment were 1 year and 1 day and under, over 1 year and 1 day to 3 years, 3 to 5 years, and 5 years and over. Beginning in 1977, the periods reported for lengths of sentences to imprisonment are 1 through 12 months, 13 through 35 months, 36 through 59 months, and 60 months and over. Beginning in 1991, two of the periods reported for lengths of sentences to imprisonment changed. The period 36 through 59 months changed to 36 through 60 months, and the period 60 months and over changed to over 60 months.
a includes sentences of more than 6 months that are to be followed by a term of probation (mixed sentences). Beginning in 1991, includes sentences of at least 1 month that may be followed by a term of probation.
${ }^{6}$ Prior to 1989, total includes Youth Corrections Act and youthful offender sentences not separately enumerated. From 1979-85, total includes Federal Juvenile Delinquency Act sentences not separately enumerated. Beginning in 1991, total includes life sentences, death sentences, and cases with either no sentence, a suspended sentence, a sealed sentence, deportation, or imprisonment of 4 days or less
"A "split sentence" is a sentence on a one-count indictment of 6 months or less in a jailtype institution followed by a term of probation, 18 U.S.C. 3651 approved Aug. 23, 1958 (72 Stat. 834). Included are mixed sentences involving confinement for 6 months or less on one count to be followed by a term of probation on one or more counts. For 1959-62 split sentences were included in prison terms of 1 year and 1 day and under (see Note). 18 U.S.C. 4205B(1) and (2)
${ }^{e}$ From 1945-60, "other" was included with sentences of probation. From 1986-90, "other" included deportation, suspended sentences, imprisonment for 4 days or less, time already served, remitted and suspended fines, and life sentences. Beginning in 1991, "other" includes supervised releases, probation of 4 days or less, suspended sentences, sealed sentences, and no sentence.
'From 1977-90, split sentences. Youth Corrections Act and youthful offender sentences, and life sentences were not included in computing average sentence. Beginning in 1991 deportation, suspended sentences, sealed sentences, imprisonment of 4 days or less, no sentence, life sentences, and death sentences were not included in computing average sentence.
${ }^{9}$ From 1986-90, split sentences, indeterminate sentences, and Youth Corrections Act and youthful offender sentences were not included in computing average sentences. Beginning in 1991, supervised releases, probation of 4 days or less, suspended sentences, sealed sentences, and no sentence were not included in computing the average sentence.

Table 5.24
Defendants disposed of in U.S. District Courts
By offense and type of disposition, fiscal year 2003--Continued

Note: Data include defendants in all felony and class A misdemeanor cases, but include only those petty offense defendants whose cases were assigned to district court judges. Detendants charged in two or more cases that were terminated during the year are reported only once. Data exclude 733 transiers and 1,323 terminations for defendants charged in more than one case during the year.
${ }^{\text {a }}$ Includes escape from custody, aiding and abetting an escape, failure to appear in court, and bail jumping.
${ }^{\circ}$ Includes obstructing mail, mailing nonmailable material, and other postal regulations.

Note: The sentencing reform provisions of the Comprehensive Crime Control Act, Public Law No. 98-473 (1984), created the U.S. Sentencing Commission. The Commission's primary function is to develop and monitor sentencing policies and practices for the Federal courts. On Apr. 13, 1987, the Commission submitted initial Sentencing Guidelines and Policy Statements to Congress. The guidelines became effective on Nov. 1, 1987, and apply to all offenses committed on or after that date. These data are derived from the U.S. Sentencing Commission's fiscal year 2002 Offender Dataset, which includes information on 64,366 cases sentenced under the Sentencing Reform Act (guideline cases) during fiscal year 2002 (Oct. 1, 2001 through Sept. 30, 2002) for which data were received by the Commission as of Apr. 28, 2004. Given the nature of the data file and reporting requirements, the following types of cases are not included in the data presented here: cases initiated but for which no convictions were obtained, defendants convicted for whom no sentences were yet issued, defendants sentenced but for whom no data were submitted to the Commission, and cases not sentenced under the Sentencing Reform Act (non-guideline cases).

A case or defendant is defined as a single sentencing event for a single defendant (even if multiple indictments or multiple convictions are consolidated for sentencing).

Multiple detendants in a single sentencing event are treated as separate cases. If an individual defendant is sentenced more than once during the fiscal year, each sentencing event is identified as a separate case. (Source, p. A-4.)

Of the 64,366 guideline cases, some were excluded due to missing information. For sex, 587 cases were excluded due to one or both of the following conditions: missing primary offense category, 393; and missing gender information, 327. For race and ethnicity, 1,929 cases were excluded due to one or both of the following conditions: missing primary offense category, 393; and missing race or ethnicity information, 1,860 .

Under drug offenses, "communication facility" refers to the use of a device, such as a telephone, in a drug trafficking offense.
${ }^{\text {a }}$ Includes both black and white Hispanics.
Includes Native Americans, Alaskan Natives, Asians, and Pacific Islanders.

Note: See Note, table 5.26. Of the 64,366 guideline cases, 1,706 cases were excluded Source: U.S. Sentencing Commission, 2002 Sourcebook of Federal Sentencing Statistics due to one or both of the following conditions: missing primary offense category, 393; and missing information on type of economic sanction for cases in which orders were
made, 1,475. A total of 16,433 cases were used to calculate amount of payments
ordered. This differs from the 16,441 cases in which fines and/or restitution were
ordered due to the excluston of 8 cases in which the amount of fine and/or restitution was not specified. Fine information includes either fines and/or costs of supervision.

Table 5.36
Sentences within and departing from U.S. Sentencing Commission guidelines in U.S.
District Courts

By primary offense, fiscal year 2002

Note: See Note, table 5.26. A case is determined to involve no departure if the sentence imposed is
within the guideline range. If a sentence imposed by the court falls outside the guideline range, the
court provides reasons for the departure. (Source, p. A-2.) Of the 64,366 guideline cases, 5,943
cases were excluded due to one or both of the following conditions: missing offense type, 393; or missing/inapplicable departure information, 5,682 .
${ }^{\text {a }}$ Cases departed downward based on a motion by the Government for a reduced sentence due to the defendant's substantial assistance to authorities.

Table 5.38
Defendants sentenced for violation of drug laws in U.S. District Courts

By type and length of sentence, 1945-2003--Continued

Note: See Notes, tables 5.9 and 5.22. Data for 1945-91 are reported for the 12-month period ending June 30. Beginning in 1992, data are reported for the Federal fiscal year, which is the 12 -month period ending September 30 . Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK.
${ }^{a}$ includes sentences of more than 6 months that are to be followed by a term of probation (mixed sentences). Beginning in 1991, includes sentences of at least 1 month that may be followed by a term of probation.
${ }^{0}$ From 1978-88, "other" includes split sentences, indeterminate sentences, and Youth Corrections Act and youthful offender sentences. In 1989 and 1990, the category includes split sentences and indeterminate sentences. Beginning in 1991, "other" includes deportation, suspended and sealed sentences, imprisonment of 4 days or less, and no sentence.
${ }^{c}$ Includes supervised release, probation of 4 days or less, suspended sentences, sealed sentences, and no sentence.
${ }^{\text {d }}$ From 1978-90, split sentences, Youth Corrections Act and youthful offender sentences, and life sentences are not included in computing average sentence. Beginning in 1991, life sentences, death sentences, deportation, suspended and sealed sentences, imprisonment of 4 days or less, and no sentence also are not included in computing average sentence.
${ }^{6}$ From 1986-90, split sentences, indeterminate sentences, and Youth Corrections Act and youthful offender sentences are not included in computing average sentence. Beginning in 1991, supervised release, probation of 4 days or less, suspended sentences, sealed sentences, and no sentence also are not included in computing the average sentence. Includes one death sentence.

Note: These data are from the National Judicial Reporting Program (NJRP), a biennial survey of State felony courts. Data were collected for the U.S. Department of Justice, Bureau of Justice Statistics by the U.S. Census Bureau. The 2000 NJRP survey was based on a sample of 344 counties selected to be nationally representative. The sample included the District of Columbia and at least one county from every State except, by chance, Delaware. Montana, and Wyoming. Only offenses that State penal codes define as felonies are included. Excluded are Federal courts and State or local courts that did not adjudicate adult felony cases. Data specifying the conviction offense were available for the estimated total of 924,700 convicted felons. These data are estimates derived from a sample and therefore are subject to sampling variation.

For survey sampling procedures and definitions of terms, see Appendix 12
${ }^{\text {a }}$ Detail may not add to total because of rounding.
${ }^{\mathrm{b}}$ In a small number of cases where it was unclear whether the offense was murder or manslaughter, the case was classified under nonnegligent manslaughter.
${ }^{c}$ Includes offenses such as negligent manslaughter and kidnaping.
${ }^{d}$ When vehicle theft could not be distinguished from other theft, the case was coded as other theft. This results in a conservative estimate of vehicle thefts.
${ }^{6}$ Composed of nonviolent offenses such as receiving stolen property and vandalism.

| Drug offenses | 100 | 67 | 38 | 29 | 33 |
| Possession | 100 | 64 | 33 | 31 | 36 |
| Trafficking | 100 | 69 | 41 | 28 | 31 |
| Weapons offenses | 100 | 70 | 41 | 29 | 30 |
| Other offenses ${ }^{\text {c }}$ | 100 | 66 | 32 | 34 | 34 |

Note: See Note, table 5.44. Data on sentence type were available for 919,387 of th estimated total of 924,700 convicted felons. For persons receiving a combination of sentences, the sentence designation came from the most serious penalty imposed--prison being the most serious, followed by jail, then probation. "Prison" includes sentences to death. Felons receiving a sentence other than incarceration or probation are included in "probation." For survey sampling procedures and definitions of terms, see Appendix 12.

| Other offenses ${ }^{\text {c }}$ | 27 | 10 | 7 | 6 | 9 |

Note: See Note, table 5.44. Additional penalties are penalties imposed in addition to the primary penalty of jail, prison, or probation. Examples of penalties in the category "other" are community control, house arrest, work release, drug testing, and loss of driver's ficense. Where the data indicated affirmatively that a particular additional penalty was imposed, the case was coded accordingly. Where the data did not indicate affirmatively or negatively, the case was treated as not having an additional penalty. These procedures provide a conservative estimate of the prevalence of additional penalties. Persons receiving more than one type of additional penalty appear under more than one penalty heading. For survey sampling procedures and definitions of terms, see Appendix 12 .

| Other public-order | 1,617 | 3.0 |

Note: These data were collected by the Pretrial Services Resource Center for the U.S. Department of Justice, Bureau of Justice Statistics as part of the State Court Processing Statistics program. The data are based on 40 of the 75 most populous counties in the United States and a sample of 14,877 felony cases collected from the 40 sampled counties. These cases represent the estimated 54,590 felony cases filed in the 75 counties in May 2000, and the felony defendants involved in these cases. The sample was designed and selected by the U.S. Census Bureau. These data are estimates derived from a sample and therefore are subject to sampling variation.

Data for the specific arrest charge were available for all cases. For methodology, definitions of terms, and crimes within offense categories, see Appendix 13

Note: See Note, table 5.51. Data were collected for up to 1 year; misconduct and rearrests occurring after the end of the 1-year study period are not included in the table. Data on the court appearance record for the current case were available for $99 \%$ of cases involving a defendant released prior to case disposition. All defendants who failed to appear in court and were not returned to the court during the 1 -year study period are counted as fugitives. Some of these detendants may have been returned to the court at a later date Rearrest data were available for $97 \%$ of released defendants. information on rearrests occurring in jurisdictions other than the one granting the pretrial release was not always available. For methodology, definitions of terms, and crimes within offense categories, see Appendix 13.

Detail may not add to total because of rounding.
Misconduct includes failure to appear in court, rearrest for a new offense, or a technical violation of release conditions that resulted in the revocation of pretrial release.

| 17 years and older | 19.4 | 15.3 | 17.2 | 29.0 | 22.0 |

Note: These data were collected by the National Center for Juvenile Justice (NCJJ) for the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention. The data are gathered from courts with juvenife jurisdiction in participating States. Information reported is based on national estimates of delinquency cases disposed by juvenile courts in the United States during $2000(\mathrm{~N}=1,657,533)$. The final sample included data reported by 1,991 jurisdictions in 35 States covering $71 \%$ of the Nation's youth population. These data were derived from a nonprobability sample of courts; therefore statistical confidence in the estimates cannot be determined. A case disposed refers to a definite action having been taken as the result of a referral to juvenile court, i.e., a plan of treatment was selected or initiated. These data files were developed by NCJJ and originally analyzed for the Juvenile Court Statistics series. For methodology, definitions of terms, and offenses within categories, see Appendix 14.
${ }^{a}$ Percents may not add to 100 because of rounding.
${ }^{\text {b }}$ Includes persons having origin in any of the original peoples of North America, the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands. Nearly all Hispanics were included in the "white" racial category.

Note: Petitions by Federal prisoners are suits brought against the Federal
Government. Petitions by State prisoners are those petitions in which the State or its representative(s) is (are) named as the defendant(s). "Habeas corpus" is a writ utilized to bring a party before a court. In this case, the government must ensure that an individual's imprisonment conforms with the law. "Mandamus" is a writ issued by a superior court to an inferior court or to a public official, directing that a specified action be taken. Prisoners file mandamus petitions in order to compel a government official to perform a duty owed to the prisoner. "Civil rights" petitions are a means to seek relief from constitutional deprivations. Data for 1977-91 are reported for the 12 -month period ending June 30. Beginning in 1992, data are reported for the Federal fiscal year, which is the 12 -month period ending September 30 . Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK
${ }^{\text {a }}$ Includes 7 motions to vacate sentence

Note: These data include criminal and civil appeals from U.S. District Courts, bankruptcy appeals, appeals from administrative agencies, and original proceedings. Three-judge panels represent full panels and hear appeal arguments. Data on the number of judges and cases filed in the Federal Circuit are excluded. Data for 1982-87 are reported for the 12-month period ending June 30. Beginning in 1988, data are reported for the Federal fiscal year, which is the 12 -month period ending September 30 . Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK.

See notes on next page.

Note: See Note, table 5.65. These data exclude bankruptcy appeals, appeals from administrative agencies, and original proceedings, and therefore will differ from figures presented in table 5.66. "Private cases" brought in U.S. District Courts include suits wherein litigation is between States and/or private citizens. "Prisoner petitions" included in this category are those filed by State prisoners naming a State or its representative(s) as the defendant(s). "Diversity of citizenship" refers to lawsuits between residents of different States. Since 1987, totals include reopened, remanded, and reinstated appeals as well as original appeals. Data for 1980 and 1985-91 are reported for the 12-month period ending June 30. Beginning in 1992, data are reported for the Federal fiscal year, which is the 12-month period ending September 30.
${ }^{\text {a }}$ Includes tort actions; forfeiture and penalty; securities, commodities, and exchange; and tax suits.
${ }^{\mathrm{b}}$ Includes death sentence cases.
${ }^{c}$ Collection of data for this category began on Jan. 1. 1997; therefore reported data are for 9 months.

Includes labor suits.
${ }^{\text {I }}$ Includes real property actions
Includes sex offenses, bribery, gambling, lottery, kidnaping, escape, perjury, drunk driving/traffic, other miscellaneous general offenses, and Federal statutes such as agricultural acts and antitrust violations.

| Note: "Original" refers to those cases that were on the Supreme Court docket previously and were disposed of, but that subsequently were reinstated. For all cases other than "original" ones, a docket filing fee must be "paid." If the petitioner is indigent, the docket filing fee is waived and the case is filed "in forma pauperis." |  |  |  |  | Source: Administrative Office of the United States Courts, Annual Report of the Director, 1981, p. | Administrative appeals | 2 | 3 | 0 | 2 | 0 | 3 |  |  |  |  |  |  |  |

Note: "Writ of certiorari" is an order by the appellate court that is used when the court has discretion on whether to hear an appeal. If the appellate court grants the writ, it has the effect of ordering the lower court to certify the record and send it up to the higher court, which will then hear the appeal. "U.S. civil" filings involve suits against the Federal Government brought in U.S. District Courts. "Private civil" filings involve suits wherein litigation is between States and/or private citizens. "Administrative appeals" include applications for enforcement or petitions for review of orders of an administrative board or agency. Data for the U.S. Court of Appeats for the Federal circuit are not included in the above table. For a list of U.S. District Courts in each circuit, see table 5.11 .

Note: These data represent actions taken during the annual terms of the U.S. Supreme Court. "Amicus" refers to a party who is not involved directly in the suit, but who demonstrates an interest in the case by filing a supportive brief. "Decided on merits" refers to a reassessment and resolution of the substantive issues presented in the case, and does not involve active participation of the litigants through the filing of written and oral arguments. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK.
${ }^{\text {a }}$ Includes cases summarily affirmed, reversed, or vacated on the In Forma Pauperis Docket
${ }^{6}$ Percent is based on the total cases in which the Government participated
${ }^{\text {I }}$ Includes cases in which the Government filed briefs as amicus curiae but did not participate in the argument.
${ }^{d}$ Includes 43 cases that were vacated and remanded for further consideration.
${ }^{e}$ Includes 66 cases that were vacated and remanded for further consideration. includes 17 cases that were vacated and remanded and 1 case that was remanded for further consideration.

Note: Article II. Section 2 of the U.S. Constitution authorizes the President to grant executive clemency for Federal criminal offenses. The U.S. Pardon Attorney, in consultation with the Attorney General's office, receives and reviews all petitions for executive clemency, initiates the necessary investigations, and prepares the recommendations of the Attorney General to the President. Clemency may be a reprieve, remission of fine or restitution, commutation, or pardon. A "pardon," which is generally considered only after sentence completion, restores basic civil rights and may aid in the reinstatement of professional or trade licenses that may have been lost as a result of the conviction. A "commutation" is a reduction of sentence. Commutations include remission of fines. Petitions denied also include those that are closed administratively. Cases in which multiple forms of relief were granted are counted in only one category. The figures presented in this table do not include clemency actions on draft resisters, or military deserters and absentees during the Vietnam war era. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK.
${ }^{\text {a }}$ In inaugural years, these figures are for the outgoing Administration.
In addition to the six commutations. President Clinton granted one reprieve of an execution date during fiscal year 2000.
${ }^{\boldsymbol{c}}$ In addition to the 40 commutations, President Clinton granted 1 reprieve of an execution date during fiscal year 2001.

Note: The U.S. Postal Inspection Service is the law enforcement agency of the U.S. Postal Service. Responsibilities include enforcing over 200 statutes related to crime against the mail, the Postal Service, Postal Service employees, and customers. The Office of Inspector General (OIG), established in 1996, is an independent agency within the Postal Service. The OIG's main responsibilities are to prevent and detect fraud, waste, program abuse and mismanagement; promote efficiency of operations; and conduct investigations of revenue and cost containment issues. The Postal Inspection Service continues to be primarily concerned with the security and integrity of the mail, postal employees, and their environments; and conducts investigations relating to these responsibilities. Data for 1997 to 2000 include the activities of both the Postal Inspection Service and the OIG.

Arrests and convictions include joint investigations with other Federal law entorcement agencies. Convictions reported in a given year may be the result of arrests made during a previous year.

| Workers' Compensation fraud |  |  |
| Revenue investigations | 1,453 | 1,387 |
| Mail fraud | 6,269 | 5,456 |

Note: See Note, table 5.73. Internal crimes are those involving employees of the U.S. Postal Service and external crimes are those committed by individuals or groups outside the organization. Narcotics cases include both employees and non-employees selling narcotics on postal property. Miscellaneous internal crimes include theft of postal property and sabotage of equipment. Assault includes threats and assaults against on-duty postal employees. Miscellaneous external crimes include counterfeit and contraband postage, money order offenses, vandalism, and arson. Pornography/obscenity includes mating of child pornography, obscenity, or sexually-oriented advertisements. Controlled substances include narcotics, steroids, drug-related proceeds, and drug paraphernalia. Miscellaneous prohibited mailings include hazardous material, firearms and weapons, intoxicants, extortion, and false documents.

The Revenue and Asset Protection Program (RAPP) was established in 1995 and combines portions of the audit and criminal investigation activities. The objective of RAPP is to give priority to the protection of postal revenue and assets. Activities include reviewing internal controls, examining unfavorable trends and significant variations in activity, and pursuing information received through financial audits, customer complaints, and anonymous tips.

| 1997 | 9,366 | 8,472 | 7,300 |
| 1998 | 14,144 | 12,879 | 9,762 |
| 1999 | 15,539 | 14,729 | 11,857 |
| 2000 | 16,495 | 15,613 | 13,151 |

Note: These data are from the U.S. Department of Justice, Bureau of Justice Statistics' (BJS) Federal Justice Statistics Program, a database comprised of information from various Federal agencies. Immigration offenses are defined according to the BJS filing offense classification procedure followed by the Administrative Office of the United States Courts. The category is composed largely of the following offense types: smuggling, transporting, and harboring aliens; unlawful entry and reentry of aliens; and misuse of visa and other documents. (Source, p. 8.) The data presented are for offenders for whom an immigration offense was the most serious offense.

Note: Questionnaires are sent annually to the U.S. attorneys' offices in each of the Federal judicial districts eliciting data concerning indictments and convictions during the year as well as prosecutions awaiting trial on December 31 of each year. Response rates for the 94 Federal judicial districts are consistently high, yielding an average response rate of $97 \%$. These data cover persons elected or appointed to office and career (staff) government employees; "others involved" include individuals who hold no official position, but who participated in an offense aimed at corrupting another's public office. "Abuse of public office" includes offenses such as traud, extortion, bribery, conflict of interest, election ballot fraud, and campaign finance offenses. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK.

The 1983 figures were reviewed to attempt to identify the reason for the substantial increase in prosecutions of Federal officials. The explanation appeared to be two-fold there had been a greater focus on Federal corruption nationwide, and there appeared to have been more consistent reporting of lower-level employees who abused their office. cases that may have been overlooked in the past. For reference, the U.S. attorneys' offices were told: "For purposes of this questionnaire, a public corruption case includes any case involving abuse of office by a public employee. We are not excluding low-level employees or minor crimes, but rather focusing on the job-relatedness of the offense and whether the offense involves abuse of the public trust placed in the employee."

Note: Courts-martial have exclusive jurisdiction over military offenses and acts or omissions that violate local criminal law, foreign or domestic, for any persons subject to the Uniform Code of Military Justice (UCMJ). The data presented are for violations of the UCMJ, including acts violating civilian criminal codes that were tried by courts-martial. "General courts-martial" consist of a military judge and not less than five members (jurors), or by request of the accused, the case may be heard by a military judge alone. General courts-martial have jurisdiction to try any person subject to the UCMJ and adjudge any punishment authorized in the Rules for Courts-Martial (RCM) including the death penalty. "Special courts-martial" consist of not less than three members and also may include a military judge. Special courts-martial have jurisdiction to try persons for noncapital offenses and adjudge any punishment except death, dishonorable discharge, dismissal, confinement for more than 1 year, hard labor without confinement for more than 3 months, forfeiture of pay exceeding two-thirds pay per month, or forfeiture exceeding 1 year. "Summary courts-martial" consist of one commissioned officer and the maximum penalty that can be adjudged is continement for 30 days, torfeiture of two-thirds of 1 month's pay, and reduction to the lowest pay grade.

A "dishonorable discharge" may be adjudged only by general courts-martial and applies to enlisted persons and noncommissioned warrant officers convicted of offenses usually recognized in civilian jurisdictions as felonies, or offenses of a military nature requiring severe punishment. A "dismissal" may be adjudged only by general courts-martial and applies to commissioned officers, warrant officers, cadets, and midshipmen. A "bad-conduct discharge" (BCD) applies only to enlisted persons and may be adjudged by general or special courts-martial. It is less severe than a dishonorable discharge and is designed as punishment for bad conduct, rather than for serious offenses of a military or civilian nature. A BCD also can be applied to persons convicted repeatedly of minor offenses and whose punitive separation appears necessary by the courts-martial. ## Section 6

## Persons under correctional supervision

Inmates in local jails, prisoners in State and Federal correctional facilities, and persons on probation and parole are the focus of this section. In addition, data are provided on prisoners under sentence of death and those executed. Much of the material in this section is from the following Bureau of Justice Statistics (BJS)-sponsored data collection programs: the Census of Jails (conducted every 5 years), the Annual Survey of Jails (conducted in non-census years), the Survey of Inmates in Local Jails, the National Prisoner Statistics Program, the Annual Probation and Parole Surveys, the Federal Justice Statistics Program, and the Census of State and Federal Adult Correctional Facilities.

Opening the section are trend tables presenting a view of U.S. correctional populations over time, including numbers of jail inmates, prisoners, probationers, and parolees. These tables are followed by detailed enumerations of adults under Federal and State probation supervision. The number of entries and exits for State and Federal probation supervision are displayed by region and State, and the percent change in the population during the year is calculated. A set of tables provides information specific to persons under Federal community supervision, such as the number under supervision, the number of probation officers, and offenders terminating supervision by type of offense.

Data from the most recent Census of Juveniles in Residential Placement are presented. The census, sponsored by the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention, provides counts of juvenile detainees by race, ethnicity, sex, age, type of offense, and jurisdiction. A new table comparing the 2001 detainee counts in each State with by-State counts from the previous two censuses, 1997 and 1999, is included.

Next in this section are trend tables, covering varying years between 1983 and 2003, on the size of the population in jails and prisons. These tables are followed by more detailed data on jail inmates including the number, sex, and race of jail inmates; confinement status; conviction status; legal status; jails and jail inmates in Indian country; the prevalence of HIV in jail populations; and deaths occurring in jails. Featured this year are data from the latest (2002) Survey of Inmates in Local Jails. These tables display the characteristics of jail inmates, most serious offense, percent reporting drug and alcohol use, and family background while growing up.

The next portion of Section 6 contains several trend tables on prison populations, starting with tables that display the number and rate of sentenced male and female prisoners in State and Federal institutions back to 1925. A 24-year trend table displaying the rates of sentenced prisoners, by region and State is included, as is a table that compares the Federal and State prison populations for 2002 and 2003. This is followed by data from BJS' 2000 Census of State and Federal Adult Correctional Facilities. These tables display the number of prisoners in Federal, State, and private adult correctional facilities by type of facility and selected prisoner characteristics. Also from the 2000 census is a table showing the number of prisoners under age 18 in adult correctional facilities by type of facility, security level, and region. New this year is a trend table covering selected years between 1990 and 2003, that provides counts of prisoners under age 18 in State prisons.

What follows is a series of tables presenting data on a variety of topics from recent BJS reports. Statistics on firearm possession and usage by State and Federal prisoners, the number of female prisoners under jurisdiction of State and Federal correctional authorities, the number of noncitizens in State and Federal prisons, educational attainment of jail inmates and prisoners, and participation in education programs are part of this sequence. There also are recent data on length of sentences for prisoners in State prisons and a long-term study of recidivism in 15 States, which presents recidivism data by demographic characteristics and offense category.

The Federal Bureau of Prisons provides extensive data on Federal prisoners, including prisoner characteristics, commitment offense, type of facility, security level, and the proportion of Federal prisoners incarcerated for drug offenses. Other data show time served to first release by offense type and selected Federal prisoner demographics. Also presented are BJS data on the number of immigration offenders in Federal prison, the number of detainees under U.S. Immigration and Customs Enforcement jurisdiction, the number of registered sex offenders in each State, and a trend table showing counts of prisoners under jurisdiction of military authorities.

Next are tables dealing with post-release supervision. These include the number and rate of persons on parole, movement of the parole population, persons successfully discharged from parole supervision, and persons returned to Federal prison for either a supervision violation or conviction for a new offense.

Information focusing on medical issues in correctional facilities follows. These data include mental health screenings and types of mental health treatment in State prisons. A series of tables also features information on the prevalence of HIV and AIDS among the State and Federal prisoner populations, a new table showing the decline of AIDSrelated prisoner deaths, and total prisoner deaths by cause of death.

The final portion of Section 6 presents numerous tables on State and Federal prisoners sentenced to death, movement of prisoners on death row, and persons executed or otherwise removed from death row. Selected characteristics of prisoners with death sentences (e.g., race, ethnicity, sex, age, education) are included in many of these tables. Tables on methods of execution employed by States authorizing the death penalty and executions carried out in the U.S. dating back to 1930 conclude the section.

## United States, 1980-2003

| 2003 | 6,889,800 | 4,073,987 | 691,301 | 1,387,269 ${ }^{\text {e }}$ | 774,588 |
| Percent change |  |  |  |  |  |
| 2002 to 2003 | 1.9\% | 1.2\% | 3.9\% | 2.3\% | 3.1\% |

Note: Counts for probation, prison, and parole populations are for December 31 of each year; jail population counts are for June 30 of each year. Counts of adults held in jail facilities for 1993 and 1994 were estimated and rounded to the nearest 100. Data for jail and prison are for inmates under custody and include those held in private facilities. Totals for 1998-2003 exclude probationers held in jail or prison. These data have been revised by the Source based on the most recently reported counts and may differ from previous editions of SOURCEBOOK. For information on methodology and explanatory notes, see Appendix 15.
${ }^{\text {a }}$ Because a small number of individuals may have multiple correctional statuses, the totals are rounded to the nearest 100
${ }^{6}$ Estimated.
${ }^{\text {c }}$ Includes an unknown number of persons supervised outside jail facilities.
${ }^{\text {d }}$ Coverage of probation agencies was expanded. For counts based on the same reporting agencies, use $3,266,837$ in 1997 (to compare with 1996); $3,417,613$ in 1998 (to compare with 1997); and 3,772,773 in 1999 (to compare with 1998).
${ }^{9}$ As of June 30, 2003.

Note: These data are from the U.S. Department of Justice, Bureau of Justice Statistics' Federal Justice Statistics Program database. Sources of information include the Executive Office for U.S. Attorneys, the Administrative Office of the United States Courts (AO), the U.S. Sentencing Commission, the U.S. Marshals Service, the Drug Enforcement Administration, the Federal Bureau of Prisons, the Federal Pretrial Services Agency, and the Federal probation and supervision service.

Data on probation, parole, and supervision are from the Federal Probation Supervision Information System maintained by the AO. Only records with offenders under active supervision as of the end of fiscal year 2001 were selected. Corporate defendants were excluded. Total includes 209 felony offenders whose offense category could not be determined. For methodology and definitions of terms, see Appendix 11.
${ }^{\text {a Percents may not add to }} 100$ because of rounding.
${ }^{\text {b }}$ Under the Federal Sentencing Reform Act, supervised release replaces parole for Federal offenders sentenced on or after Nov. 1, 1987
${ }^{c}$ Less than $0.05 \%$.
dincludes only violent sex offenses.
${ }^{\theta}$ Excludes tax fraud.
${ }^{\mathrm{f}}$ Excludes transportation of stolen property.
${ }^{9}$ Excludes fraudulent property offenses; includes destruction of property and trespass.
hincludes misdemeanors, petty offenses, and unknown offense level

Note: Persons under supervision of the Federal Probation System include persons placed on probation-either by U.S. District Courts, U.S. magistrate judges, or at the request of U.S. attomeys (pretrial diversion/deferred prosecution)--and Federal offenders released from confinement on parole, supervised release, or mandatory release
Data for 1975-90 represent persons who began supervision in the 12 -month period prior to June 30 of the year noted. Beginning in 1991, data are reported for the Federal fiscal year, which is the 12 -month' period ending September 30. Some data have been revised by the Source and may differ rom previous editions of SOURCEBOOK. The Canal Zone, Guam, and the Virgin Islands began reporting data in 1977
"Supervised release" refers to a specified term of post-release supervision enacted in November 1987 under the Federal Sentencing Guidelines.
"Pretrial diversion" was called "deferred prosecution" in years prior to 1977.
"Special parole" refers to a specified period of parole attached to a term of mprisonment at sentencing. This provision is applicable to violations of certain drug laws (see Drug Abuse Prevention and Control Act of 1970, Public Law 91-513, Oct. 27, 1970, 84 Stat. 1260).
"Bureau of Prisons custody" was added in fiscal year 2001 and includes persons completing incarceration under the jurisdiction of the Federal Bureau of Prisons but who may be in halfway houses or other facilities and supervised by probation officers (Source, 2001, p. 31).
${ }^{\text {a }}$ Percents may not add to 100 because of rounding.
Beginning in fiscal year 2001, this category includes "special parole."

Note: See Note, table 6.4. Only records with one or more terminations of active ${ }^{c}$ includes only violent sex offenses
supervision during fiscal year 2001 were selected. Each termination was counted separately. Technical violations and terminations for new crimes are shown only if supervision terminated with incarceration or removal from active supervision for reason of a violation. The data exclude corporate offenders Total includes 53 felony offenders whose offense category could not be determined. For methodology and definitions of terms, see Appendix 11.
${ }^{a}$ Supervision terminated with incarceration or removal to inactive status for viotation of supervision conditions other than charges for new offenses.
${ }^{6}$ Supervision terminated with incarceration or removal to inactive status after arrest for a "major" or "minor" offense.
${ }^{\text {c }}$ includes oniy violent sex offenses
Excludes tax fraud.
${ }^{e}$ Excludes transportation of stolen property.
'Excludes fraudulent property offenses; includes destruction of property and trespass.
${ }^{9}$ Includes misdemeanors, petty offenses, and unknown-offense level.

Note: These data are from the Census of Juveniles in Residential Placement, conducted bienni-
ally by the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention. Public and private facilities, secure and nonsecure, that hold alleged or adjudicated juvenile delinquents or status offenders are asked to provide information on each juvenile in residence on a specified reference date. Facilities are asked to include all juveniles under 21 years of age assigned a bed in the residential facility on the reference date as a result of being charged or court adjudicated for an offense. The reference date for the 1997 census was October 29 and the facility response rate was $96 \%$; for the 1999 census it was October 27 and $100 \%$; and for the 2001 census it was October 24 and $89 \%$.
${ }^{\text {a }}$ Detail may not add to total because of rounding.
${ }^{6}$ Totats include 3,401 juveniles in 1997, 2,645 juveniles in 1999, and 2,435 juveniles in 2001 in private facilities for whom the State where the offense was committed was not reported; and 174 juveniles in 1999 and 194 juveniles in 2001 in tribal facilities.

Note: See Note, table 6.9.
${ }^{\text {a }}$ Detail may not add to total because of rounding
${ }^{\text {b }}$ Includes criminal homicide, violent sexual assault, robbery, and aggravated assault.
${ }^{c}$ Includes burglary, theft, auto theft, and arson.
${ }^{d}$ Status offenses include running away, underage drinking, truancy, curfew violations, and other offenses that are illegal for juveniles but not adults. Care should be exercised when interpreting status offense data because States differ in what they classify as an adjudicable status offense.

Note: Data for 1983, 1988, 1993, and 1999 are from the National Jail Census. Data for 1984-87, 1989-92, 1994-98, and 20002003 are from the Annual Survey of Jails taken during noncensus years. Both the censuses and the surveys are conducted for the U.S. Department of Justice, Bureau of Justice Statistics by the U.S. Census Bureau. The data from the annual surveys are estimates and therefore are subject to sampling variation. A jail is defined as a locally administered confinement facility that holds inmates beyond arraignment, usually for more than 48 hours, and is administered and staffed by municipal or county employees. Excluded from the censuses and surveys were temporary holding facilities, such as physically separate drunk tanks and police lockups, and other holding facilities that did not hold persons after they were formally charged in court. Also excluded for all years were Connecticut, Delaware, Hawaii, Rhode Island, and Vermont because these States have integrated jail-prison systems. Alaska also was excluded as an integrated system; however, beginning in 1988, locally operated jails in Alaska are included. For methodology and survey sampling procedures, see Appendix 4.
${ }^{2}$ Data for years prior to 1994 include an unknown number of persons who were under jail supervision but not confined. Begin ning in 1994, data are based on the number of inmates held in jail facilities.
${ }^{\text {b }}$ Juveniles are persons defined by State statute as being under a certain age, usually 18, and subject initially to juvenile court authority even if tried as adults in criminal court. In 1994, the definition was changed to include all persons under age 18. ${ }^{\text {c }}$ The average daily population is the sum of the number of inmates in a jail each day for a year, divided by the number of days in the year.
${ }^{d}$ Rated capacity is the number of beds or inmates assigned by a rating official to facilities within each jurisdiction.
${ }^{0}$ The number of inmates divided by rated capacity times 100. Prior to 1994, this ratio may include some inmates not in physical custody, but under the jurisdiction of a local jail, such as inmates on electronic monitoring, under house arrest, or in day reporting or other community supervision programs. Beginning in 1994, the ratio includes only those held in jail.
${ }^{\dagger}$ Detailed data for 1 -day counts are estimated and rounded to the nearest 100 .

| Wyoming | 1,084 | 225 | 1,005 | 31 | 48 |

Note: These data are from the 1999 Census of Jails conducted for the U.S. Department of Justice, Bureau of Justice Statistics by the U.S. Census Bureau. The 1999 census included all locally administered jails that held inmates beyond arraignment (usually more than 72 hours) and were staffed by municipal or county employees. Excluded from the census were physically separate temporary holding facilities, such as drunk tanks and police lockups, that do not hold persons after they are formally charged in court. Also excluded were Connecticut, Delaware, Hawaii, Rhode Island, and Vermont because these jurisdictions have State-operated integrated jail/prison systems. Alaska also was excluded for this reason, however, 15 independently operated jails in Alaska were included. For additional information on the Census of Jails, see Appendix 4.
a tncludes persons confined in jail facilities and those under community supervision.
${ }^{\mathrm{b}}$ Based on U.S. Census Bureau estimates of the U.S. resident population for July 1, 1999.
Includes all persons in community-based programs run by jail authorities (e.g., electronic monitoring, house arrest, community service, day reporting, pretrial supervision, and other alternative work programs)
${ }^{d}$ During the weekend prior to June 30,1999 . Includes all persons who serve their sentences of confinement only on weekends (e.g., Friday to Sunday).

Table 9; 2002, Bulletin NCJ 198877, p. 8, Table 10; 2003, Bulletin NCJ 203947, p. 8 , Table 10 (Washington, DC: U.S. Department of Justice). Table adapted by SOURCEBOOK staff.

Table 6.18
Characteristics of jail inmates
By conviction status, United States, 1983, 1989, 1996, and 2002

|  |  |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  |  |  |

Note: These data are from the Survey of Inmates in Local Jails conducted for the U.S. Department of Justice, Bureau of Justice Statistics by the U.S. Census Bureau in 1983, 1989, 1996, and 2002 . For the 2002 survey, a nationally representative sample of 6,982 inmates in 417 local jails were interviewed between January and April 2002. A jail is defined as a locally operated correctional facility that confines a person before or after adjudication. Inmates sentenced to jail usually have a sentence of 1 year or less, but jails also incarcerate persons in a wide variety of other categories. Jails may also house inmates awaiting transter to other correctional or mental health facilities, those awaiting trials or sentencing, and those being held in protective custody, for contempt, or as court witnesses. These data are estimates derived from a sample and therefore subject to sampling variation. For information on methodology and survey sampling procedures, see Appendix 4.
${ }^{\mathrm{a}}$ Includes inmates with a prior conviction, but no new conviction for the current charge.
${ }^{\mathrm{b}}$ Excludes $0.3 \%$ of inmates in 1996 and 2002 who did not specify a race.
${ }^{\text {c }}$ Prior to 1996, category includes Asians, Pacific Islanders, American Indians, Alaska Natives, and other racial groups. After 1996, category includes inmates specifying more than one race. ${ }^{d}$ Beginning with the 1996 survey, inmates with less than a high school diploma were asked specifically it they had a GED. Those reporting that they had a GED or high school equivalency certificate were classitied as high school graduates. Prior to the 1996 survey, GED was a volunteered response.

Note: These data are from the Survey of Jails in Indian Country (SJIC) sponsored by the U.S. Department of Justice, Bureau of Justice Statistics (BJS). The SJIC was initiated in 1998 as a component of the Annual Survey of Jails, a sample survey of the Nation's local jails also sponsored by BJS. Data were collected by mail questionnaires and through followup phone calls and facsimiles. The SJIC included all confinement faciilities, detention centers, jails, and other correctional facilities located in Indian country and operated by tribal authorities or by the Bureau of Indian Affairs. Special jail facilities such as medical, treatment, or release centers; halfway houses; and work farms also are included. "Indian country" is a statutory term that includes all lands within an Indian reservation, dependent Indian communities, and Indian trust allotments. Tribal authority to imprison Indian offenders is limited by statute to 1 year per offense.
${ }^{\text {a }}$ Some facilities did not report complete data for conviction status or offense, therefore, these categories may not add to total in custody.
IIncludes driving while intoxicated and driving while under the influence of drugs or alcohol.

| Wyoming | 1 | 0.2 | 21 | 2.2 |

Note: These data were collected by the U.S. Department of Justice, Bureau of Justice Statistics through the 1993 and 1999 Census of Jails. The 1999 Census of Jails included 3,365 locally administered confinement facilities that held inmates beyond arraignment and were staffed by municipal or county employees. The census also included 47 jails that were privately operated under contract to local governments. Excluded from the census were temporary holding facilities, such as drunk tanks and police lockups, that do not hold persons after being formally charged in court (usually within 72 hours of arrest). Also excluded were State-operated facilities in Connecticut, Delaware, Hawaii, Rhode Island, and Vermont, which have integrated jail-prison systems.
${ }^{\text {a }}$ Based on the number of inmates held in local jails on June 30, excluding those that did not report the number of HIV/AIDS cases.
${ }^{\text {b }}$ The District of Columbia jail, part of an integrated system, was included in the 1999 Census. Other district facilities were excluded.

Note: Prison population data are compiled by a yearend census of prisoners in State and Federal institutions. Data for 1925 through 1939 include sentenced prisoners in State and Federal prisons and reformatories whether committed for felonies or misdemeanors. Data for 1940 through 1970 include all adult felons serving sentences in State and Federal institutions. Since 1971, the census has included all adults or youthful offenders sentenced to a State or Federal correctional institution with maximum sentences of over 1 year.

Beginning on Dec. 31, 1978, a distinction was made between prisoners "in custody" and prisoners "under jurisdiction." As defined in a 1978 report (U.S. Department of Justice, Bureau of Justice Statistics, Prisoners in State and Federal Institutions on December 31, 1978, NPS Bulletin SD-NPS-PSF-6 (Washington, DC; USGPO, 1980)), "in custody" refers to the direct physical control and responsibility for the body of a confined person. "Under jurisdiction" is defined as follows: A State or Federal prison system has jurisdiction over a person if it retains the legal power to incarcerate the person in one of its own prisons. Juris diction is not determined by the prisoner's physical location; jurisdiction is determined by the legal authority to hold the prisoner. Examples of prisoners under the jurisdiction of a given system, but not in its custody, are those housed in local jails, in other States, or in hospitals (including mental health facilities) outside the correctional system; prisoners on work release, furtough, or bail; and State prisoners held in Federal prisons or vice versa. Both custody and jurisdiction figures are shown for 1977 to facilitate year-to-year comparison. The rates for the period
before 1980 are based on the civilian poputation. The civilian population represents the resident population less the armed forces stationed in the United States. Since 1980, the rates are based on the total resident population provided by the U.S. Census Bureau. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK. For information on methodology and definitions of terms. see Appendix 15.
${ }^{a}$ Custody counts.
${ }^{b}$ Jurisdiction counts
${ }^{c}$ Rates have been revised and are now based on population estimates from the 2000 decennial census.
${ }^{\text {d }}$ Preliminary; subject to revision.

Note: These data are from the 2000 Census of State and Federal Adult Correctional Facilities sponsored by the U.S. Department of Justice, Bureau of Justice Statistics. Facilities were included in the census if they were staffed with Federal, State, local, or private employees; housed primarily State or Federal prisoners; were physically, functionally, and administratively separate from other facilities; and were operational on June 30, 2000. Atso included were 264 private tacilities under contract to State governments or the Federal Bureau of Prisons to house prisoners. Facilities included were prisons and prison farms; reception, diagnostic, and classification centers; road camps; forestry and conservation camps; youthful offender facilities (except those in California); vocational training facilities; drug and alcohol treatment facilities; and State-operated local detention facilities in Alaska, Connecticut, Delaware, Hawaii, Rhode Island, and Vermont. Excluded from the census were fails and other local regional detention facilities; private facilities not exclusively for State or Federal prisoners; facilities for the military, the Immigration and Naturalization Service, the Bureau
of Indian Affairs, and the U.S. Marshals Service; and correctional hospital wards not operated by correctional authorities. The "private" facilities included in the census are those with $50 \%$ or more of their inmates held for State or Federal authorities. Private facilities with more than $50 \%$ of their inmates held for local authorities were classified as jails and excluded from the census.

Correctional facilities were classified as "communitybased" if $50 \%$ or more of the residents were regularly permitted to leave, unaccompanied, to work or study. These included halfway houses, restitution centers, and prerelease, work release, and study centers. Facilities in which less than $50 \%$ of the prisoners regularly left the facility unaccompanied were classified as "confinement" institutions.

Note: Data for State prisoners are from the 1997 Survey of Inmates in State Correctional Facilities (SISCF), conducted by the U.S. Census Bureau for the U.S. Department of Justice, Bureau of Justice Statistics (BJS). Data for Federal prisoners are from the 1997 Survey of Inmates in Federal Correctional Facilities (SIFCF), conducted by the U.S. Census Bureau for BJS and the Federal Bureau of Prisons. From June through October 1997, prisoners were interviewed about their current offenses and sentences, criminal histories, family and personal backgrounds, gun possession and use, prior drug and alcohol use and treatment, educational programs, and other services provided while in prison. Similar surveys of State prisoners were conducted in 1974, 1979, 1986, and 1991; Federal prisoners were surveyed for the first time in 1991. The samples for the 1997 surveys were taken from a universe of 1,409 State prisons and 127 Federal prisons enumerated in the 1995 Census of State and Federal Adult Correctional Facilities or opened between completion of the census and June 30, 1996. The sample design for both surveys was a stratified two-stage selection process; first selecting prisons, and second, selecting prisoners in those prisons. A total of 14,285 interviews were completed for the State survey, and 4,041 for the Federal survey, for overall response rates of $92.5 \%$ and $90.2 \%$ respectively.

Detail does not add to total with firearms because prisoners may have possessed more than one firearm.

Note: These data are from the Violent Offender Incarceration and Truth-in-Sentencing Incentive
Grant Program. The data include only offenders with a sentence of more than 1 year that have been released for the first time on the current sentence. Excludes persons released from prison by transfer, appeal, or detainer, as wefl as escapees and deceased prisoners. "Truth-in-
sentencing States" include the 29 States and the District of Columbia that had adopted the
Federal truth-in-sentencing standard by yearend 2000. This standard requires that Part I violent offenders (defined as the Federal Bureau of Investigation's Uniform Crime Reporting Program
offenses of murder and nonnegligent manslaughter, rape, robbery, and aggravated assault) serve
not less than $85 \%$ of their prison sentence before becoming eligible for release. The result of
truth-in-sentencing practices has been to reduce discretionary release of offenders by parole
boards in favor of mandatory release according to statutory provisions.
${ }^{2}$ Violent offenders include those serving sentences for murder and nonnegligent manslaughter, rape, robbery, and aggravated assault.
${ }^{b}$ Excludes sentences of life or death.
${ }^{\mathrm{c}}$ Based on States that reported both mean maximum sentence and mean time served.
${ }^{d}$ These States met Federal truth-in-sentencing standards. The District of Columbia is excluded.
${ }^{6}$ Not calculated by the Source.

Note: These data are from a recidivism study conducted by the U.S. Department of Justice, Bureau of Justice Statistics. The data represent 272,111 prisoners released in 1994 from prisons in 15 States: Arizona, California, Delaware, Florida, Illinois, Maryland, Michigan, Minnesota, New Jersey, New York, North Carolina, Ohio, Oregon, Texas, and Virginia. The 272.111 are an estimated two-thirds of all prisoners released during 1994 in the United States with sentences greater than 1 year. The data presented are based on weighted estimates from a sample of 33,796 prisoners meeting four selection criteria: 1) a RAP sheet was found for the prisoner in the State criminal history repository, 2) the released prisoner was alive during the 3 -year followup period, 3) the prisoner's total maximum sentence length was greater than 1 year (missing sentences were treated as greater than 1 year), and 4) the prisoner's 1994 release was not recorded by the State department of corrections as a release to custody/detainer/warrant, absent without leave, escape, transfer, administrative release, or release on appeal. The sample cases were tracked for 3 years from the date of release from prison. Any rearrest, reconviction, or reimprisonment occurring after the 3 -year followup period was not included.
${ }^{\text {a }}$ Calculation of sentence length and time served is based on "first releases" only and excludes Michigan (which reported minimum sentence) and Ohio (which did not report data to identify "first releases").
${ }^{5}$ Excludes credited jail time.
${ }^{\text {C }}$ Does not include the arrest, conviction, or prison sentence for which prisoners were released in 1994.

Table 6.49
Recidivism rates of prisoners released in 1994 from prisons in 15 States
By selected prisoner characteristics

| Prisoner characteristics | Percent of all released prisoners | Percent of released prisoners who, within 3 years, were: |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Rearrested | Reconvicted ${ }^{\text {a }}$ | Returned to prison with new prison sentence ${ }^{\text {b }}$ | Returned to prison with or without a new prison sentence ${ }^{c}$ |
| Total | 100\% | 67.5\% | 46.9\% | 25.4\% | 51.8\% |
| Sex |  |  |  |  |  |
| Male | 91.3 | 68.4 | 47.6 | 26.2 | 53.0 |
| Female | 8.7 | 57.6 | 39.9 | 17.3 | 39.4 |
| Race |  |  |  |  |  |
| White | 50.4 | 62.7 | 43.3 | 22.6 | 49.9 |
| Black | 48.5 | 72.9 | 51.1 | 28.5 | 54.2 |
| Other | 1.1 | 55.2 | 34.2 | 13.3 | 49.5 |
| Ethnicity |  |  |  |  |  |
| Hispanic | 24.5 | 64.6 | 43.9 | 24.7 | 51.9 |
| Non-Hispanic | 75.5 | 71.4 | 50.7 | 26.8 | 57.3 |
| Age at release |  |  |  |  |  |
| 17 years and younger | 0.3 | 82.1 | 55.7 | 38.6 | 56.6 |
| 18 to 24 years | 21.0 | 75.4 | 52.0 | 30.2 | 52.6 |
| 25 to 29 years | 22.8 | 70.5 | 50.1 | 26.9 | 52.5 |
| 30 to 34 years | 22.7 | 68.8 | 48.8 | 25.9 | 54.8 |
| 35 to 39 years | 16.2 | 66.2 | 46.3 | 24.0 | 52.0 |
| 40 to 44 years | 9.4 | 58.4 | 38.0 | 18.3 | 50.0 |
| 45 years and oider | 7.6 | 45.3 | 29.7 | 16.9 | 40.9 |

Note: See Note, table 6.47. Of 272,111 released prisoners, data on sex were reported for $100 \%$, race for $97.6 \%$, Hispanic origin for $81.9 \%$, and age at release for $99.9 \%$.
${ }^{\text {a }}$ Because of missing data, prisoners released in Ohio were excluded from the calculation of percent reconvicted
${ }^{\text {b }}$ Includes new sentences to State or Federal prisons but not to local jails. Because of missing data, prisoners released in Ohio and Virginia were excluded from the calculation of percent returned to prison with new sentence.
${ }^{\text {c }}$ Includes both prisoners with new sentences to State or Federal prisons plus prisoners returned for technical violations. Because of missing data, prisoners released in Arizona, Delaware, Maryland, New Jersey, Ohio, and Virginia were excluded from the calculation, of percent returned to prison with or without a new prison sentence. New York State custody records did not always distinguish prison returns from jail returns. Consequently, some persons received in New York jails were probably mistakenly classified as prison returns. Also, California, with a relatively high return-to-prison rate, affects the overall rate of $51.8 \%$. When California is excluded, the return-to-prison rate falls to $40.1 \%$.

Note: See Note, table 6.4. These data are from the Federal Bureau of Prisons data files. Prisoners and the length of their sentences are classified according to the offense associ ated with the longest single sentence actually imposed. Prisoners serving consecutive sentences may have total imposed sentences exceeding the longest single sentence length. Accordingly, the time actually served may exceed the longest single imposed sentence. "Time served" is the number of months from the prisoner's arrival into jurisdiction of the Bureau of Prisons until first release from prison, plus any jail time served and credited. The total reported for "all offenses" includes prisoners whose offense category could not be determined. These data exclude prisoners who left Federal prison by extraordinary means, such as death, sentence commutation, and treaty transfer: 4,375 prisoners in fiscal year 2001. For methodology and definitions of terms, see Appendix 11.
${ }^{\text {a }}$ Includes only violent sex offenses.

## ${ }^{6}$ Excludes tax fraud.

${ }^{\mathrm{c}}$ Excludes transportation of stolen property.
${ }^{0}$ Excludes fraudulent property offenses; includes destruction of property and trespass.
${ }^{e}$ Offenses not classifiable or not a violation of the U.S. Code.

Immigration offenders in Federal prison and average time to be served

| United States, 1985-2000 |  |  |
| :--- | :---: | :---: |
|  | Immigration offenders in Federal prison |  |
|  |  | Average time to <br> be served (in months) |
| 1985 | 1,593 | NA |
| 1986 | 1,799 | 3.6 |
| 1987 | 1,667 | 3.6 |
| 1988 | 1.631 | 4.1 |
| 1989 | 1,729 | 3.7 |
| 1990 | 1,673 | 3.6 |
| 1991 | 1,667 | 4.6 |
| 1992 | 1,654 | 5.4 |
| 1993 | 2,198 | 7.3 |
| 1994 | 2,486 | 9.5 |
| 1995 | 3,420 | 11.0 |
| 1996 | 4,476 | 13.9 |
| 1997 | 5,454 | 15.1 |
| 1998 | 7,430 | 16.5 |
| 1999 | 10,156 | 20.0 |
| 2000 | 13,676 | 20.6 |

Note: These data are from the U.S. Department of Justice, Bureau of Justice Statistics' (BJS) Federal Justice Statistics Program, a database comprised of information from various Federal agencies. Immigration offenses are defined according to the BJS filing offense classification procedure followed by the Administrative Office of the United States Courts. The category is composed largely of the following offense types: smuggling, transporting, and harboring aliens; unlawful entry and reentry of aliens; and misuse of visa and other documents. (Source, p. 8.) The data presented are for offenders for whom an immigration offense was the most serious offense.
${ }^{\text {a }}$ Estimates of time to be served are subject to change. Once committed to the Federal Bureau of Prisons, the term an offender is required to serve may be adjusted for reasons such as assistance to Federal prosecutors and appellate review.

Note: These data are from the National Survey of Substance Abuse Treatment Services (N-SSATS), which
is conducted annually by the Substance Abuse and Mental Health Services Administration. The survey includes both public and private treatment facilities in the 50 States, the District of Columbia, and U.S. terriories and protectorates. The reference date for the 2002 N-SSATS was Mar. 29, 2002. A total of 15,459 facilities were eligible for the 2002 survey; data were received for 14,756 facilities for a response rate of $95.5 \%$. After exclusion of responding facilities deemed out of the scope of the survey focus, there were 13,720 eligible respondents for the 2002 N -SSATS. "Clients in treatment" include hospital inpatient and residential clients receiving treatment (and not discharged) on the survey reference date, and outpatient clients enrolled on the reference date who received a substance abuse treatment service during the month prior to the survey.
${ }^{\text {a }}$ Data for facilities operated by Federal agencies are included in the States in which the facilities are located.

Note: In March 1998, the U.S. Department of Justice, Bureau of Justice Statistics (BJS) established the National Sex Offender Registry Assistance Program (NSOR-AP). As part of BJS' National Criminal History Improvement Program, NSOR-AP assists States in meeting the requirements of the Wetterling Act as amended by Megan's Law and the Pam Lychner Act. The program also provides assistance to allow States to participate in the Federal Bureau of Investigation's permanent National Sex Offender Registry. Readers should be aware that several factors in each State's authorizing legislation significantly influence the size of a State's registry. Among these factors are the number of different offenses requiring registration, the date that triggers the registration mandate, and the duration of the registration requirement.
${ }^{\text {a }}$ Number includes more than just registered offenders (for example, never registered but required to do so, offenders in jail, registered but not in compliance).
${ }^{\text {D }}$ At the time the survey was conducted in 1998, Connecticut did not have a centralized sex offender registry.
${ }^{\text {c }}$ The 2001 count is not included due to a superior court injunction against the Sex Offender Registry Board, prohibiting registration without first providing the offender a hearing. At the time of the survey, Massachusetts estimated that about 17,000 sex offenders would be qualified to register.
${ }^{d}$ Also includes offenders who must register for certain violent offenses.

Note: See Note, table 6.3. Parole is a period of conditional supervised release following a prison term. Prisoners may be released to parole either by a parole board decision or by mandatory conditional release. Rates were calculated using U.S. Census Bureau population figures for the number of adutt residents. For information on methodology and definitions of terms, see Appendix 15.
${ }^{\text {a }}$ Due to reporting changes in New Jersey and other jurisdictions, the 1997 rate is not directly comparable to prior years.

| 1994 | 26,845 | 4,992 | 18.6 |

Note: These data are from the U.S. Department of Justice, Bureau of Justice Statistics' Federal Justice Statistics Program, which is a database constructed from source files provided by the Executive Office for United States Attorneys, the Administrative Office of the United States Courts, the United States Sentencing Commission, and the Federal Bureau of Prisons. This study counts the number of Federal prisoners who returned to Federal prison after first release from a U.S. district court commitment. "First retums to prison" include all first releases who were returned for any reason, including those who entered Federal prison as the result of a supervision violation or conviction for a new offense. Federal prisoners who, after first release from a Federal prison, subsequently entered a State prison or local jail were not included in this analysis. Federal offenders released during 1994 represent the final cohort included in the above data. By ending with the 1994 cohort, offenders could be tracked for at least 3 years following release.

Note: These data are from the 2000 Census of State and Federal Adult Correctional Facilities, the sixth in a series of facility censuses, sponsored by the U.S. Department of Justice, Bureau of Justice Statistics. The universe of facilities was developed using the 1995 census and updated to identify new facilities and facilities that had closed since June 30, 1995. Facilities identified for the 2000 census include 84 Federal facilities, 1,295 State facilities, 22 acilities under State and local authority, 3 facilities operated by the-District of Columbia, and 264 private facilities, in operation on June 30, 2000. Adult correctional facilities include: prisons and penitentiaries; boot camps; prison farms; reception, diagnostic, and classification centers; road camps; forestry and conservation camps; youthful offender facilities (except those in
California); vocational training facilities; prison hospitals; drug and alcohol treatment facilities; and State-operated local detention facilities (in Alaska, Connecticut, Delaware, Hawaii, Rhode Island, and Vermont). Data were collected from all facilities resulting in a response rate of $100 \%$.

The data presented are from 1,295 State-operated facilities, 22 facilities under joint State and local authority, 3 facilities operated by the District of Columbia, and 238 private facilities with more than $50 \%$ of their prisoners held for State authorities. All 84 Federal facilities and 26 privately operated facilities holding at least $50 \%$ of their prisoners for Federal authorities were excluded because data for prisoners receiving mental health treatment in these facilities were not available.

Note: These data were collected by the U.S. Department of Justice, Bureau of Justice Statistics through the National Prisoner Statistics (NPS) program. The NPS program provides yearend data for the prisoner populations of the 50 States, the District of Columbia, and the Federal Bureau of Prisons. These data represent the custody population, which includes only those prisoners housed in a jurisdiction's facilities. Indiana did not report the number of HIV/AIDS cases for 1995-2001. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK.
${ }^{\text {a }}$ Percentages are based on custody counts, except for New Mexico. In 2000 and 2001, New Mexico's percentages are based on its yearend jurisdiction count.
$\mathrm{b}_{5}, 754$ confirmed AIDS cases are based on reported data. The estimated total number of confirmed AIDS cases is 6,286 ; this includes estimates tor the following States not reporting these data for 2001: Delaware, Georgia, Louisiana, Michigan, and New Mexico. Estimates were based on the most recent data available. ${ }^{\text {c }}$ At yearend 2001, responsibility for housing District of Columbia sentenced prisoners was transferred to the Federal Bureau of Prisons.

Note: The NAACP Legal Defense and Educational Fund, Inc. collects data on persons on death row. As of Apr. 1, 2004, 38 States, the Federal Government, and the United States military had capital punishment laws; 37 States, the Federal Government, and the United States military had at least 1 prisoner under sentence of death.
${ }^{\text {a }}$ Detail will not add to total because prisoners sentenced to death in more than one State are listed in the respective State totals, but each prisoner is counted only once for the national total.
${ }^{\text {b Total includes one prisoner in Oregon whose race/ethnicity was unknown. }}$

Note: Thirty-eight States and the Federal Government had death penalty statutes in effect at yearend 1996-2003. Percents are based on those cases for which data were reported. The U.S. military also has a death penalty provision, but the Bureau of Justice Statistics does not collect data for persons under military death sentence.
${ }^{\text {a Percents may not add to } 100 \text { because of rounding. }}$
The youngest person under sentence of death in 1996 was a black male in Nevada born in May 1979 and sentenced to death in June 1996; in 1997, a black male in Alabama born in November 1979 and sentenced to death in October 1997; in 1998, a black male in Alabama born in July 1980 and sentenced to death in December 1998; in 1999, a black male in Texas born in December 1981 and sentenced to death in November 1999; in 2000, a white male in Arizona born in April 1982 and sentenced to death in October 2000; in 2001, a black male in North Carolina born in December 1982 and sentenced to death in November 2001; in 2002 and 2003, a white male in Texas, born in April 1984 and sentenced to death in August 2002. The oldest person under sentence of death during the years 1996 to 2003 was a white male in Arizona born in September 1915 and sentenced to death in June 1983.

Note: See Note, table 6.81. The method of execution of Federal prisoners is tethal injection, pursuant to 28 CFR Part 26. For offenses under the Violent Crime Control and Law Enforcement Act of 1994, the method is that of the State in which the conviction took place, pursuant to 18 USC 3596.
${ }^{a}$ Authorizes more than one method of execution.
${ }^{\text {b }}$ Arizona authorizes lethal injection for persons whose capital sentence was received after Nov. 15, 1992; for those who were sentenced before that date, the condemned prisoner may select lethal injection or lethal gas
${ }^{c}$ Delaware authorizes lethal injection for those whose capital offense occurred after June 13, 1986; for those whose offense occurred before that date, the condemned prisoner may select lethal injection or hanging.
${ }^{d}$ Arkansas authorizes lethal injection for those whose capital offense occurred on or after July 4, 1983; for those whose offense occurred before that date, the condemned prisoner may select lethal injection or electrocution.
${ }^{6}$ New Hampshire authorizes hanging only if lethal injection cannot be given.
${ }^{\text {f }}$ Oklahoma authorizes electrocution if lethal injection is ever held unconstitutional and firing squad if both lethal injection and electrocution are held unconstitutional.
${ }^{9}$ Kentucky authorizes lethal injection for persons whose capital sentence was received on or after Mar. 31, 1998; for those sentenced before that date, the condemned prisoner may select lethal injection or electrocution.
Wyoming authorizes lethal gas if lethal injection is ever held unconstitutional.
Tennessee authorizes lethal injection for those whose capital offense occurred after Dec. 31, 1998; for those whose offense occurred before that date, the condemned prisoner may select lethat injection or electrocution.

Administrative Office of the United States Courts
Judicial Business of the United States Courts: 2003 Annual Report of the Director
(Annual. Washington: USGPO, 2004. 400 pages, 130 tables, 9 figures, 1 appendix.)

Presents data for fiscal 2003 and trend data for 1994-2003. SOURCEBOOK tables 1.84 1.94, 1.95, 1.97, 5.8-5.12, 5.22-5.25, 5.37, 5.38, 5.41-5.43, 5.65-5.70, 6.5-6.7.

This report is divided into three sections. The first section presents summary information on the business of the Federal judiciary, including caseload trends for the appellate, district, and bankruptcy courts; the probation and pretrial services system; and other components of the Federal judiciary. The second and third sections present supplemental tables and detailed statistical tables presenting data on civil and criminal cases filed, terminated, and pending in U.S. district and appellate courts. Dispositions of criminal cases, length of civil and criminal trials, number of prisoner petitions, and juror utilization are tabulated. Information also is provided for U.S. magistrate judges, U.S. Bankruptcy Courts, the U.S. Supreme Court, the U.S. Court of International Trade, the U.S. Court of Federal Claims, and the Federal Probation System.

## 2003 Federal Court Management Statistics

(Annual. Washington: Administrative Office of the United States Courts, 2004. 167 pages, 135 tables.)

Presents data for fiscal 1998-2003.
SOURCEBOOK table 1.83.
This report presents workload and performance statistics on both civil and criminal matters for each of the U.S. Courts of Appeals and each of the 94 U.S. District Courts. Data
for the former include appeals filed, terminated, and pending; number of judgeships; types of appeals; number of opinions; median time from filing to disposition; and other matters pertaining to the appellate courts. Data for the U.S. District Courts include cases filed, terminated, and pending; actions per judgeship; median time from filing to disposition; a juror usage index; and other matters related to activities in U.S. District Courts. As part of the profile, each court is ranked on various dimensions. Two tables presenting a national profile for all U.S.
Courts of Appeals and all U.S: District Courts on workload and performance measures also are included.

## 2003 Wiretap Report

(Annual. Washington: Administrative Office of the United States Courts, 2004. 232 pages, 13 tables, 3 figures, 1 appendix.)

Presents data for 2003 and trend data for 1993-2003. SOURCEBOOK tables 5.2-5.5.

This report details the applications for orders authorizing or approving the interception of wire, oral, or electronic communications, as required by Title 18, United States Code, Section 2519(1). Included are descriptions of the reporting requirements of the statute, regulations for filing reports, and summaries of the reports submitted by judges and prosecuting officials. The tables in the body of the report present data on grants, denials, and authorized length of intercept orders; offenses for which court intercept orders were granted; types of surveillance used; average costs of electronic surveillance; arrests and convictions resulting from electronic surveillance; and a summary of authorized intercepts from 1993 through 2003. The appendix tables contain detailed data from reports filed by Federal and State judges and prosecuting officials on court-authorized electronic surveillance activities during 2003 and on arrests, trials, and convictions as a result of intercepts installed during previous years.

## American Judicature Society

## Judicial Selection in the United States: A Compendium of Provisions

(Periodic. 2nd edition. Chicago: American Judicature Society, 1993. 194 pages, 15 tables.)

Presents data for 1993. SOURCEBOOK tables 1.91-1.93.

This is the last published resource describing the methods by which judges are selected in the 50 States and the District of Columbia. The book begins with a historical review of
judicial selection in the United States and a narrative summary of current practice. A survey of State statutes provides data for 1992 or from the most recent statutory updates available. Data are presented on the selection and retention process for State supreme court justices; intermediate appellate court judges; and general, limited, and special jurisdiction trial court judges. Current provisions for selecting judges through commission plans, partisan elections, and nonpartisan elections also are presented. The book concludes with a State-by-State presentation of relevant statutory citations and a summary of their texts.

Bray, Robert M. et al.

## 2002 Department of Defense Survey of Health Related Behaviors Among Military Personnel

(Periodic. [Online]. Available:
http://www.tricare.osd.mil/main/news/ 2002wwfinalreport.pdf [July 30, 2004]. 347 pages, 84 tables, 4 figures, 8 appendices.)

Presents data for 2002 and trend data for 1980-2002. SOURCEBOOK tables 3.89-3.91.

This report presents results of a survey focusing on health-related behaviors of active-duty military personnel. The survey is the eighth in a series of such surveys sponsored by the U.S. Department of Defense. The findings include detailed estimates of the prevalence of alcohol, ilicit drug, and tobacco use as well as the negative effects of alcohol use. Estimates for health behaviors pertaining to fitness and cardiovascular disease reduction, injuries and injury prevention, and sexually transmitted disease reduction are reported. Also included are assessments of the mental health of military personnel, including stress, anxiety, and depression; military job satisfaction; gambling; oral health; and gender-specific health issues. A detailed description of the survey methodology is included and the appendices cover sample design and weighting, estimation procedures, and other technical issues related to measurement and analysis.

DeVoe, Jill F. et al.

## Indicators of School Crime and Safety: 2003

(Annual. NCES 2004-004/NCJ 201257. Washington: U.S. Departments of Education and Justice, 2003. 164 pages, 52 tables, 35 figures, 2 appendices.)

Presents data for 1992-2002. SOURCEBOOK tables 2.6, 3.60, 3.61.

This report presents data from multiple data sources. Included are data from the School Survey on Crime and Safety and the National Schools and Staffing Survey, conducted by the National Center for Education Statistics (NCES). The National SchoolBased Youth Risk Behavior Survey from the Centers for Disease Control and Prevention (CDC), the National Crime Victimization Survey from the Bureau of Justice Statistics (BJS), and the School Crime Supplement jointly produced by the NCES and BJS, also contribute data used in this report. This edition also presents data from the School Associated Violent Death Study developed by CDC in conjunction with BJS and the U.S. Department of Education; the Supplementary Homicide Reports, part of the Uniform Crime Reporting Program administered by the Federal Bureau of Investigation; and the Webbased Injury Statistics Query and Reporting System, from CDC's National Center for Health Statistics.

The report is comprised of five sections. The first section presents data on homicides and suicides of students at school and away from school. The second section deals with nonfatal victimization of students, including the prevalence of being victimized at school, being threatened or injured with a weapon, physical fights on school property, and students being bullied at school. The third section displays data on crimes reported to police by public schools and serious disciplinary actions taken by public schools. The fourth section provides information on nonfatal victimization of teachers at school, including reported threats and physical attacks. Information on the school environment is presented in the last section. This includes data on prevalence of students carrying weapons on school property, students' perceptions of safety at school and avoiding places in school, students' reports of gangs or hate-related behavior at school, principals' reports of discipline problems at school, and the prevalence of alcohol and marijuana availability and use at school. The appendices include technical notes on the data sources and a glossary of terms used in the report.

Executive Office of the President, Office of Management and Budget

## The Budget of the United States Government, Fiscal Year 2005

(Annual. [CD-ROM]. Washington: USGPO, 2004.)

Presents data for fiscal 2003-2009 and trend data for fiscal 1946-2004. SOURCEBOOK table 1.12.

This CD-ROM includes six files that comprise the primary sections of the budget. The first, entitled Budget of the United States

Government, Fiscal Year 2005 contains the budget message of the President, information on the President's budget and management priorities, and budget overviews organized by agency. The second presents a Budget Appendix, which includes detailed budget estimates by agency. The third, entitled Historical Tables provides data on budget receipts, outlays, surpluses or deficits, Federal debt, and Federal employment from 1940. Next, is a Program Assessment Rating Tool Summary File showing key performance measures for each agency. The fifth file, Analytical Perspectives, highlights specific subject areas and provides other significant presentations of budget data that place the budget in perspective including economic and accounting analyses; information on Federal receipts and collections; analyses of Federal spending; detailed information on Federal borrowing and debt; baseline or current services estimates; and other technical presentations. Finally, Analytical Perspectives CD-ROM Tables that do not appear in the printed budget document are shown here. Also included are numerous additional files and spreadsheets for other topics and selected data tables. Included among the spreadsheets are figures on economic assumptions and Federal aid to State and local governments. Among the various additional files are discussions of the budget system and concepts, and Federal borrowing and debt.

Executive Office of the President, Office of National Drug Control Policy

## National Drug Control Strategy: FY 2005 Budget Summary

(Annual. Washington: Executive Office of the President, 2004. 115 pages, 45 tables, 1 figure.)

Presents data for fiscal 2005 and trend data for fiscal 1996-2005. SOURCEBOOK tables 1.14, 1.15.

This report presents detailed information on the budget and objectives of the National Drug Control Strategy developed by the Office of National Drug Control Policy. The Executive Summary highlights major drug control initiatives and Federal funding priorities for fiscal year 2005. The next section includes overview tables showing breakdowns of Federal drug control funding by function and agency. Section three presents detailed agency-by-agency summaries of specific drug control programs, agency budgets organized by strategic goals, program accomplishments, and tables presenting fiscal 2003 final, fiscal 2004 enacted, and fiscal 2005 requested budget authorities.

The Gallup Organization, Inc.

## The Gallup Poll

(Princeton, NJ: The Gallup Organization, Periodicity, contents, and dates of data presented: See below. Available:
http://www.gallup.com/.)
SOURCEBOOK tables 2.1, 2.10-2.14,
2.16-2.21, 2.26, 2.28, 2.29, 2.33, 2.34, 2.37,
2.39, 2.40, 2.44, 2.45, 2.48, 2.49, 2.51-2.60,
2.63-2.65, 2.67, 2.69, 2.96, 2.98-2.101,
3.95-3.97, 3.99-3.101.)

The results of public opinion research conducted by The Gallup Organization, Inc. are released daily by The Gallup Poll News Service. Topics examined include business and the economy, politics and elections, social issues and policy, and lifestyles. Also available through Gallup's weekly release, Gallup Poll On Demand, are additional analyses on finance, government and public affairs, healthcare, religion and values, and education and youth. A brief note on sample size, sampling tolerance, and survey dates is included in each release.

Goldman, Sheldon; Elliot Slotnick; Gerard Gryski; Gary Zuk; and Sara Schiavoni
"W. Bush Remaking the Judiciary: Like Father Like Son?"
(Judicature 86 (May-June 2003), pp. 282 '309. 28 pages, 7 tables.)

Presents data for 1977-2002. SOURCEBOOK tables 1.81, 1.82.

This article reports the results of research on judgeship appointments to Federal district and appeals courts. Background characteristics of judges appointed by President George W. Bush during his presidency are compared with those appointed by Presidents Carter, Reagan, Bush, and Clinton. Recent appointees are highlighted and data comparing traditional and nontraditional appointees during the current Bush administration are provided.

Grunbaum, Jo Anne et al.
"Youth Risk Behavior Surveillance--United States, 2003"
(CDC Surveillance Summaries. Morbidity and Mortality Weekly Report 53 No. SS-2.
Washington: USGPO, May 21, 2004. 96 pages, 66 tables, 8 figures.)

Presents data for 2003. SOURCEBOOK tables 3.55-3.57, 3.62.

This report presents the results of the 20 national school-based survey conducted part of the Youth Risk Behavior Surveillance

System by the U.S. Department of Health and Human Services, Centers for Disease Control and Prevention. Data on the prevalence and incidence of numerous health risk behaviors among high school students are presented. These include students reporting use of safety belts; use of bicycle helmets; riding with a driver who had been drinking; driving after drinking; carrying a weapon; engaging in physical fights; dating violence; school-related violence; thoughts and attempts of suicide; tobacco, alcohol, and drug use; and risk-related sexual behaviors. Other topics covered are students' dietary behaviors and physical activities.

Harris Interactive, Inc.

## The Harris Poll

(New York: Harris Interactive Inc. Periodicity, contents, and dates of data presented: See below.)

SOURCEBOOK tables 2.2, 2.9, 2.22, 2.27.
The Harris Poll is a weekly news release of public opinion research conducted by Harris Interactive, Inc. The releases deal with a variety of topics including confidence in selected institutions, Presidential job performance, foreign affairs, business and finance, as well as numerous current political and social issues. A brief note on sample size and survey dates is included in each release.

Johnston, Lloyd D.; Patrick M. O'Malley; Jerald G. Bachman; and John E.
Schulenberg
Monitoring the Future National Survey Results on Drug Use, 1975-2003
(Annual. Bethesda, MD: U.S. Department of Health and Human Services, 2004.)

Presents data for 2003 and trend data for 1975-2003. SOURCEBOOK tables
2.79-2.81, 2.83-2.89, 3.64-3.76.

This two-volume report presents the results of the 29th national survey of drug use and related attitudes among American high school seniors, the 13th such survey of 8th and 10th grade students, and a followup survey of young adults, including college students. Volume I contains the results from the secondary school samples of 8 th, 10th, and 12th graders. The results from college students and young adults are reported in Volume II. Two major topics treated in the report are trends in drug use among American high school students since 1975 and prevalence of drug use among American high school seniors. Also reported are data on school grade at first use, intensity of "high" pro-
duced by drug use, attitudes and beliefs among seniors about various types of drug use, and their perceptions of certain relevant aspects of the social environment, such as parental disapproval of drug use or availability of drugs. Beginning in 1986, data on prevalence and trends in drug use among young adults who have completed high school also are presented.

Karter, Michael J., Jr.
Fire Loss in the United States During 2002
(Annual. Quincy, MA: National Fire Protection Association, 2003. 35 pages, 15 tables, 5 figures.)

Presents data for 2002 and trend data for 1977-2002. SOURCEBOOK tables 3.166, 3.167 .

This report presents the results of the annual National Fire Experience Survey conducted from 1977 to 2002 by the National Fire Protection Association. Data are displayed on fire incidence, deaths, injuries, and property loss, by fire type (structural, vehicular, and arson), property use, community size, and geographic region. Also presented are data on the number of fire department responses to fires and other incidents, and a section on the survey methodology.

Moulder, Evelina R.
"Police and Fire Personnel, Salaries, and Expenditures for 2003 "
(Annual. In The Municipal Year Book 2004, pp. 123-176. Washington: International City/County Management Association, 2004. 54 pages, 17 tables, 1 figure.)

Presents data for 2003 and a trend figure for 1993-2003. SOURCEBOOK tables 1.64, 1.65, 1.69.

This article presents data gathered through a mail survey sent to all municipalities with populations of 10,000 or more in the United States. This annual survey, conducted by the International City/County Management Association, collects data on personnel, salaries, and expenditures for police and fire departments in 2003 as well as minimum staffing requirements for fire departments and fire apparatus. A table presenting detailed data for each of the 1,645 cities responding to the survey is included.
"Salaries of County Officials, 2003"
(Annual. In The Municipal Year Book 2004, pp. 102-122. Washington: International

City/County Management Association, 2004.
21 pages, 4 tables, 1 figure.)
Presents data for 2003. SOURCEBOOK table 1.71.

This article presents data collected from the 2003 survey of salaries of local government officials conducted by the International City/County Management Association. Salaries are presented by job title, county size, region, county type, and form of government. The survey gathers information on 25 positions; among the positions included are the county manager, chief administrative officer, clerk, chief financial officer, treasurer, risk manager, health officer, engineer, chief law enforcement official, fire chief, superintendent of parks, chief librarian, and the directors of human resources, planning, purchasing, parks and recreation, economic development, public works, human services, public safety, and information services.
"Salaries of Municipal Officials, 2003"
(Annual. In The Municipal Year Book 2004, pp. 79-101. Washington: International City/County Management Association, 2004. 23 pages, 6 tables, 1 figure.)

## Presents data for 2003. SOURCEBOOK

 table 1.70.This article presents data collected from the 2003 survey of salaries of local government officials conducted by the International City/County Management Association. Salaries of municipal officials are presented by job title, city size, region, city type, and form of government. Average salaries of 23 positions are presented: the city manager, chief administrative officer, primary assistant chief administrative officer, clerk, chief financial officer, health officer, treasurer, engineer, chief law enforcement official, fire chief, superintendent of parks, risk manager, chief librarian, and the directors of public safety, public works, economic development, planning, human resources, human services, parks and recreation, information services, recreation, and purchasing.

National Center on Addiction and Substance Abuse at Columbia University
National Survey of American Attitudes on Substance Abuse VIII: Teens and Parents
(Annual. [Online]. Available: http://www. casacolumbia.org/pdshopprov/files/2003 Teen_Survey_8_19_03.pdf [Mar. 1, 2004].)

Presents data for 2003. SOURCEBOOK tables 2.7, 2.8, 2.77.

This report presents the results of surveys of teenagers and parents of teens. The teen survey covers a wide variety of topics including type of school attended, parental status at home (single parent, both parents, stepparent, etc.), family and leisure activities problems facing teens, tobacco and alcohol use of parents and close friends, teens' own tobacco and alcohol use, drug-free environments at school, harmfulness of drug use and availability of drugs, and several items focusing on the impact of stress, boredom, and the availability of spending money on the risk of teen substance abuse. The survey of parents of teens covers similar topics from a parental perspective, including parental perceptions of problems faced by teens, the quality of their teens' education, school safety, and a number of questions about drug-free schools and drug testing in school. Also included are several questions on parental perceptions of the harmfulness of drugs, parental influence over teen drug use, and parents' confidence in ability to detect their teens' drug use and to respond effectively.

## National Survey of American Attitudes on Substance Abuse IX: Teen Dating Practices and Sexual Activity

(Annual. [Online]. Available: http://www. casacolumbia.org/pdshopprov/files/august 2004_casa_teen_survey.pdf [Aug. 31, 2004].)

Presents data for 2004. SOURCEBOOK tables 2.3, 2.78.

This report presents the results of surveys of teenagers and parents of teens. The teen survey covers a wide variety of topics including type of school attended, parental status at home (single parent, both parents, stepparent, etc.), family and religious activities, nature and extent of internet activity, problems facing teens, tobacco and alcohol use of parents and close friends, teens' own tobacco and alcohol use, drug-free environments at school, availability of drugs generally and at teen parties, and several items focusing on school-related issues and extent of dating activity. The survey of parents of teens covers similar topics from a parental perspective, including parental perceptions of problems faced by teens and school safety, and a number of questions about drug-free schools. Also included are several questions on parental perceptions of teens' dating practices, sexual activity, and drug use, including access to prescription drugs and parents' confidence in ability to detect their teens' drug use.

National Center for State Courts

## Survey of Judicial Salaries

(Biannual. Vol. 28, No. 2. Williamsburg, VA:
National Center for State Courts, 2004. 16 pages, 6 tables, 1 figure.)

Presents data for 2003. SOURCEBOOK table 1.90 .

This report presents judicial salaries for State appellate and general jurisdiction trial courts as well as courts of special and limited jurisdiction, such as probate and family court. A profile for each State shows salary information for chief justices and associate justices of courts of last resort, judges of intermediate appellate and general trial courts, and State court administrators. Salaries for judges or magistrates of courts of limited and special jurisdiction are included, as is the date of the State's last salary adjustment for judicial personnel. Two tables highlight the States that reported salary increases in 2003 for general jurisdiction judges and for intermediate appellate judges. Salary information that accounts for differences in cost of living is provided for general jurisdiction trial court judges, allowing for a direct comparison of salaries across all 50 States. This edition also includes a special section on recalling senior and retired judges to service.

## National Opinion Research Center

General Social Surveys, 1972-2002
(Periodic. Storrs, CT: The Roper Center for Public Opinion Research, University of Connecticut, distributors. Contents: See below.)

Presents data for 1972-78, 1980, 1982-91, 1993, 1994, 1996, 1998, 2000, and 2002. SOURCEBOOK tables 2.15, 2.23-2.25, 2.38, 2.41-2.43, 2.47, 2.50, 2.61, 2.62, 2.66, 2.68, 2.97.

This cumulative data file merges all 24 General Social Surveys into a single machinereadable data file with each survey year as a subfile. Interviews were conducted by the National Opinion Research Center during February, March, and April of 1972-78, 1980, 1982-91, 1993, 1994, 1996, 1998, 2000, and 2002. The data are derived from a national probability sample of English-speaking adults, 18 years of age and older, living in non-institutional arrangements in the United States. Survey questions relate to a variety of social issues, including politics, abortion, religion, homosexuality, crime, law enforcement, guns, and capital punishment. A comprehensive codebook entitled General Social Surveys, 1972-2002: Cumulative Codebook is published by The Roper Center for Public Opinion Research. Survey
methodology and the data program are explained in detail in the codebook.

The Pew Research Center for the People \& the Press

## The 2004 Political Landscape: Evenly Divided and Increasingly Polarized

(Special. Washington: The Pew Research Center for the People \& the Press, 2003. 152 pages, 14 tables, 9 figures.)

Presents data for 2003. SOURCEBOOK tables 2.30-2.32, 2.46, 2.102.

This report presents results from a nationwide survey of adults, 18 years of age and older, conducted in 2003. The survey examined issues related to parties and politics, including party affiliation and early voting intentions. Trend data showing party identification dating back to the 1930 s and a discussion of key swing voting groups are included. Numerous topics focusing on political values and attitudes are examined. Included are respondents' attitudes on several foreign policy items (e.g., global engagement, military strength), international threats, and patriotism. Attitudes about success and poverty, including personal empowerment and efficacy; government responsibility (e.g., providing a safety net for the needy); and social and political attitudes about race are discussed. Data on cynicism toward politics and government, trust, and participation in the political process are presented. Public attitudes toward business, government regulation, and labor are shown next. The final sections cover respondents' attitudes about religion, civil liberties, immigration, technology, and the environment. A discussion of survey methodology, the questionnaires, and results from the October News Interest Index also are included.

Rose, Lowell C. and Alec M. Gallup
"The 35th Annual Phi Delta Kappa/Gallup Poll of the Public's Attitudes Toward the Public Schools"
(Annual. Phi Delta Kappan (September 2003), pp. 41-56. 16 pages, 43 tables, 13 figures.)

Presents data for 2003 and data for selected years 1983-2003. SOURCEBOOK table 2.4.

This article presents the results of an annual public opinion survey on attitudes toward public schools. Data are provided on a variety of topics including improving the public schools, biggest problems facing local schools, grading the schools, public versu nonpublic schools, school choice, school vouchers, teachers' salaries, academic
achievement gaps, standardized testing, and school size. A major focus of the 2003 poll is the Federal No Child Left Behind Act passed in 2002, which increases the Federal Government's role in State and local education. Summary charts addressing policy implications are included in this edition. A brief explanation of the composition of the sample and the research procedure also is provided.

Sax, Linda J.; Alexander W. Astin; Jennifer A. Lindholm; William S. Korn; Victor B. Saenz; and Kathryn M. Mahoney

## The American Freshman: National Norms for Fall 2003

(Annual. Higher Education Research Institute. Los Angeles: University of California, 2003. 184 pages, 5 tables, 10 figures, 6 appendices.)

Presents data for 2003 and trend data for 1966-2003. SOURCEBOOK tables 2.90-2.95.

This report presents the results of a national survey of students attending colleges and universities as first-time, full-time freshmen in fall 2003. The survey examines social issues and activism, professional interests and goals, economic concerns and their effect on college choice, lifetime goals such as social and financial success, activities during high school, and attitudes toward a variety of political and social issues. These data are based on the responses of 276,449 students at 413 of the Nation's 4-year colleges and universities. A discussion of survey methodology, the data collection instruments, and a list of participating colleges and universities are included.
U.S. Department of Health and Human Services, Substance Abuse and Mental Health Services Administration

## Emergency Department Trends from the Drug Abuse Warning Network, Final Estimates 1995-2002

(Annual. Drug Abuse Warning Network Series: D-24. Rockville, MD: U.S. Department of Health and Human Services, 2003. 620 pages, 309 tables, 18 figures, 6 appendices.)

Presents data for 2002 and trend data for 1995-2002. SOURCEBOOK tables 3.92-3.94.

This report presents annual and semi-annual estimates of drug abuse-related emergency department episodes for 1995-2002. The data were compiled by the Substance Abuse and Mental Health Services Administration through the Drug Abuse Warning Network
(DAWN). National estimates of the number of hospital emergency department episodes directly related to use of illegal drugs or the nonmedical use of legal drugs are presented. Estimates are provided for demographic and episodic characteristics as well as type of drug involved. Detailed breakdowns are presented for numerous drugs including cocaine/crack, heroin, marijuana/hashish, amphetamines, methamphetamine, ecstasy, LSD, PCP, and inhalants. These data also are presented for 21 large U.S. metropolitan areas. The appendices include a detailed discussion of the DAWN methodology, revisions to the measurement of race and ethnicity, and error sources in the DAWN data. Also included is a glossary of terms, the Multum license agreement, and a copy of the DAWN emergency department report form.

## National Survey of Substance Abuse Treatment Services (N-SSATS): 2002

(Annual. Rockville, MD: U.S. Department of Health and Human Services, 2003. 147 pages, 69 tables, 7 figures, 3 appendices.)

Presents data for 2002 and trend data for 1996-2002. SOURCEBOOK table 6.62.

This report presents data from national censuses of substance abuse treatment facilities in the 50 States, the District of Columbia, and the U.S. Territories. These data were collected through the National Survey of Substance Abuse Treatment Services (N-SSATS) administered by the Substance Abuse and Mental Health Services Administration. Detailed data are presented on trends in facility characteristics including number of facilities, facilities dispensing methadone, facility ownership, programs for special populations, and managed care. Information also is presented on facility characteristics including type of care offered, type of services provided, programs for special groups (e.g., adolescents and HIV patients), type of payment accepted, and funding sources. Data for clients include number of clients broken down by type of care received and substance problem treated. The final chapter displays detailed facility and client data for the 50 States and the other jurisdictions included in the survey. The appendices include a copy of the questionnaire sent to facilities, item response rates for the 2002 survey, and background information for the N-SSATS.

## Results from the 2003 National Survey on Drug Use and Health: National Findings

(Annual. Rockville, MD: U.S. Department of Health and Human Services, 2004. 254 pages, 57 figures, 84 tables, 7 appendices.)

Presents data for 2002 and 2003 and trend data for 1965-2002. SOURCEBOOK tables 2.82, 3.86-3.88, 3.98, 3.102.

This report presents findings from the 2002 and 2003 National Surveys on Drug Use and Health (NSDUH), including national estimates of rates of drug use, numbers of users, and numerous other measures of substance use and related problems in the U.S. population. The data are presented in nine chapters that focus on the following topics: use of illicit drugs, atcohol, and tobacco broken down by several key characteristics such as demographics, employment status, and frequency of use; trends in initiation of substance use; youth prevention-related issues including perceptions of risk and attitudes about school; substance dependence, abuse, and treatment; and the prevalence and treatment of mental health problems. The technical appendices include a description of the survey, statistical methods and measurement information, key NSDUH definitions, a listing of other data sources, references, sample size and population tables, and detailed prevalence tables.
U.S. Department of Homeland Security, Office of Immigration Statistics
2003 Yearbook of Immigration Statistics
(Annual. Washington: USGPO, 2004
[Online]. Available: http://uscis.gov/graphics/ shared/aboutus/statistics/2003yearbook.pdf [Oct. 7, 2004]. 195 pages, 60 tables, 12 figures, 4 appendices.)

Presents data for fiscal 2003 and trend data for 1820-2003. SOURCEBOOK tables 4.46, 4.47, 5.75, 5.76.

This report presents data on immigrants applying for legal status in the United States and law enforcement activities involving locating and removing deportable aliens. The report is divided into eight chapters and a glossary. The first two chapters provide an introduction to the report and highlights from the 2003 data. Chapters three through seven are each devoted to one of the five legal status categories available to immigrants. Chapter three provides detailed data on aliens granted lawful permanent residence (i.e., green-card recipients) and includes a brief discussion of preferential statuses and numeric limitations imposed. Chapters four and five are devoted to refugees and asylees seeking legal status because of persecution abroad. The next chapter includes information on persons coming to the U.S. as temporary admissions. These include nonimmigrants such as tourists, students, and businesspersons; and parolees, which are persons who initially appear inadmissible but are granted temporary admission for a
special circumstance such as medical need. Chapter seven shows detailed data on persons becoming U.S. citizens through the naturalization process. Chapter eight focuses on the enforcement activities of the Department of Homeland Security to prevent iliegal entry into the U.S. and to apprehend and remove deportable aliens. Included is a discussion of border patrol activities, investigations of immigration law violations, and the removal process. The appendices include the fiscal 2003 immigration limits, a description of the data sources, and geographic definitions.
U.S. Department of Justice, Bureau of Justice Assistance

## Edward Byrne Memorial State and Local Law Enforcement Assistance Program Brief: Fiscal Year 2002

(Annual. Washington: U.S. Department of Justice, 2002. 7 pages, 1 table.)

Presents data for fiscal 2002. SOURCEBOOK table 1.16.

This report describes the Edward Byrne Memorial State and Local Law Enforcement Assistance Program. The program provides funds to States and units of local government to improve the functioning of criminal justice systems and enhance drug control efforts. The legislatively authorized program purposes are discussed, including the types of activities and projects to which jurisdictions may allocate the formula grant funds. Brief discussions of procedures for allocating the fiscal 2002 funds as well as the legislatively mandated evaluation activities also are included. Finally, a table presenting the dollar amount of formula grant funds allocated to each State and the percentage to be passed through to local jurisdictions is provided.
U.S. Department of Justice, Bureau of Justice Statistics

## Background Checks for Firearm Transfers, 2003

(Annual. Bulletin NCJ 204428. Washington: U.S. Department of Justice, September 2004. 15 pages, 11 tables, 2 appendices.)

Presents data for 2003 and trend data for 1994-2003. SOURCEBOOK tables 1.110 , 1.111.

This report provides information on background checks for firearm transfers conducted by State and local agencies or the Federal Bureau of Investigation through the National Instant Criminal Background Check System (NICS). The data include national
estimates of the total number of applications received and rejected, the reasons for rejection, and estimates of applications and rejections for each type of approval system. Also provided is information about appeals of rejected applications and arrest of persons denied (for falsified applications or outstanding warrant). Provisions of the Federal Gun Control Act and the Brady Act are discussed, and an overview of the national firearm check system is included. Also provided is a table that presents major changes in State laws related to firearms sales from 1999 to 2003. Detailed information for the Bureau of Justice Statistics-sponsored Firearm Inquiry Statistics Program, which collects the data for background checks conducted by State and local agencies, is included. The appendices detail the methodology, type of agency responsible for background checks by type of firearm, and a by-State listing of the State and local agencies conducting background checks.

## Capital Punishment, 2003

(Annual. Bulletin NCJ 206627. Washington: U.S. Department of Justice, November 2004. 12 pages, 11 tables, 4 figures.)

Presents data for 2003 and trend data for 1930-2003. SOURCEBOOK tables 6.79, 6.81-6.84, 6.87.

This bulletin presents data on prisoners sentenced to death, current methods of execution, and recent changes in capital punishment legislation. Prisoner information includes sex, race, ethnicity, age, education, marital status, and criminal history. The number of executions occurring in each jurisdiction since 1930 is presented. Data on prisoners removed from death row by means other than execution also are included.

## Census of Jails, 1999

(Periodic. NCJ 186633. Washington: U.S. Department of Justice, September 2001. 48 pages, 50 tables, 1 figure.)

Presents data for 1999 and trend data for selected years 1983-99. SOURCEBOOK tables 1.98-1.101, 1.105, 6.16, 6.24.

This report presents results from the 1999 Census of Jails sponsored by the U.S. Department of Justice, Bureau of Justice Statistics. Detailed data are presented for jail facility characteristics, staff and correctional officers, jail programs and procedures, and persons under jurisdiction of jail authorities on June 30, 1999. The facility data include number of jails, number of jail jurisdictions, rated capacity, occupied capacity, jails under court order or consent decree, and size of jails. Information focusing on staff and correctional officers includes occupational
category and demographic characteristics (sex, race, Hispanic origin). Data for jail programs and procedures include mental hea delivery systems; screening policies for tuberculosis; testing policies for HIV; suicide prevention procedures; and jails offering work, educational, and counseling programs. Data presented for jail inmates include number of persons under jail supervision, inmates confined in facilities, and number under community supervision. Also shown are inmate demographic characteristics, conviction status, new admissions, HIV cases, suspected tuberculosis cases, and inmate deaths.

## Census of State and Federal Correctional Facilities, 2000

(Periodic. NCJ 198272. Washington: U.S. Department of Justice, 2003. 19 pages, 30 tables.)

Presents data for 2000 and selected data for 1995. SOURCEBOOK tables 1.102-1.104, 6.31, 6.34, 6.40.

This report presents results from the 2000 Census of State and Federal Adult Correctional Facilities sponsored by the U.S. Department of Justice, Bureau of Justice Statistics. The census is conducted approximately every 5 years and includes all adult correctional institutions operated by Stateand Federal authorities along with privat facilities operating under contract to govern ment authorities. The census collects information on facilities, prisoners, and staff. Earlier censuses were conducted in 1974, 1979, 1984, 1990, and 1995. Facility information includes the number and type of correctional facilities nationwide, facility operators, average daily populations, rated capacities, and facility size and age. Also included are the number of facilities offering work, education, and counseling programs, and the number of boot camp programs. Data on prisoners include the number of prisoners under custody; sex, race, and Hispanic origin breakdowns; security levels; deaths in correctional facilities; and counts of special populations including prisoners under age 18 and noncitizens in custody. Staff data include number of employees by occupational category and facility type, as well as sex, race, and Hispanic origin breakdowns. Other topics covered include assaults and other prisoner violations, prisoner-to-employee ratios, and facilities under court order. Comparisons are made, when possible, with findings from the 1995 census.

## Census of State and Local Law Enforcement Agencies, 2000

(Periodic. Bulletin NCJ 194066. Washing U.S. Department of Justice, October 2002 15 pages, 16 tables, 8 figures.)

Presents data for 2000 and trend data for 1992, 1996, and 2000. SOURCEBOOK tables 1.27-1.32.

This report presents data from the 2000 Census of State and Local Law Enforcement Agencies sponsored by the U.S. Depariment of Justice, Bureau of Justice Statistics and the Office of Community Oriented Policing Services. The 2000 census included all fulltime law enforcement agencies that employed at least one full-time sworn officer with general arrest powers, or the equivalent in part-time officers. Data are presented on the number of agencies and the number of full- and part-time employees, both sworn and nonsworn for local police agencies, sheriffs' offices, State police agencies, and special jurisdiction agencies (e.g., college and university police, State capitol police, etc.). The employee and agency counts are presented by State, and the Nation's largest local agencies, sheriffs' offices, and special jurisdiction agencies are separately listed according to the number of full-time officers employed. Data also are presented on selected areas of duty, i.e., patrol, investigation, jail operation, and court operation.

## Compendium of Federal Justice Statistics, 2001

(Annual. NCJ 201627. Washington: U.S. Department of Justice, 2003. 123 pages, 53 tables, 31 figures.)

Presents data for fiscal 2001. SOURCEBOOK tables 4.33-4.35, 4.41, 5.13-5.21, 6.4, $6.8,6.58,6.59,6.70,6.71$.

This report presents detailed information on the processing of cases in the Federal criminal justice system during fiscal 2001. The data are from the Federal Justice Statistics Program database, which is constructed from files provided by the Executive Office for U.S. Attorneys, the Administrative Office of the United States Courts, the Federal Pretrial Services Agency, the U.S. Marshals Service, the Drug Enforcement Administration, the U.S. Sentencing Commission, the Federal probation and supervision service, and the Federal Bureau of Prisons. Information is provided on arrests for Federal offenses by offense category, arresting agency, and arrestee demographics; prosecutorial decisionmaking by U.S. attorneys; type and outcome of pretrial release or detention; disposition of cases; type and length of sentences imposed; and appeals processed. In addition, detailed data are provided for persons under Federal correctional supervision. These tables include number of persons under community supervision; outcomes of probation, parole, and supervised
release; number and characteristics of Federal prisoners; and time served by released Federal prisoners. A description of the methodology and a glossary of terms are included.

## Correctional Populations in the United States, 1998 Statistical Tables

(Periodic. NCJ 192929. Washington: U.S. Department of Justice [Online]. Available: http://www.ojp.usdoj.gov/bis/abstract/ cpusst.htm [Aug. 10, 2004]. 88 tables.)

Presents data for 1998 and trend data for 1930-98. SOURCEBOOK table 6.86.

This set of tables presents data on persons under supervision of all major components of the correctional system including persons under probation and parole supervision; persons confined in jails, State and Federal prisons, and military correctional facilities; and persons under sentence of death. The data include jurisdiction-level counts of prisoners, probationers, and parolees, by sex, race, Hispanic origin, admission type, release type, and sentence length. Data are also provided on persons under jail jurisdiction in the Nation, as well as the 25 largest jail jurisdictions. Jail information includes the number of inmates by sex, race, Hispanic origin, juvenile status, and conviction status, and the total jail capacity and percent occupied at midyear. The tables also include data on characteristics of prisoners under sentence of death, reported separately for those who entered prison and those who were removed from under a death sentence during the year. Finally, the tables include detailed data on correctional facilities operated by the U.S. military and characteristics of persons confined under military authority at yearend. Copies of the questionnaires used to collect the data and detailed jurisdictional notes are included.

## Crime and the Nation's Households, 2003

(Periodic. Bulletin NCJ 206348. Washington: U.S. Department of Justice, October 2004. 4 pages, 5 tables, 2 figures.)

Presents data for 2003 and trend data for 1994-2003. SOURCEBOOK table 3.27.

This bulletin presents data from the National Crime Victimization Survey (NCVS) on the impact of crime on households in the United States. Data are presented on the number and percent of households experiencing violent crime, including rape, sexual assault, robbery, and assault; purse snatching/ pocket picking; property crime, including burglary, motor vehicle theft, and theft; intimate
partner violence; and vandalism. The data are displayed by race of household head, size of household, place of residence, and region. A brief methodology section describes the households-experiencingcrime indicators.

## Criminal Victimization, 2003

(Annual. NCJ 205455. Washington: U.S. Department of Justice, September 2004. 12 pages, 10 tables, 14 figures.)

Presents data for 2003 and trend data for 1993-2003. SOURCEBOOK tables 3.1-3.4, 3.16, 3.21.

This report presents information on criminal victimization in the United States from the National Crime Victimization Survey (NCVS). The NCVS collects data on nonfatal crimes against persons age 12 and older, reported and nonreported to the police. Data presented include levels and rates of victimization for the personal crimes of rape, sexual assault, robbery, assault, and personal theft, and the property crimes of household burglary, motor vehicle theft, and theft. Violent crime rates are presented for several victim characteristics including age, sex, race, and income. Property crime rates are presented for characteristics of household. This report also includes a comparison of 2-year average annual rates for personal and property crimes, which facilitates comparisons of statistically significant year-to-year changes.

## Criminal Victimization in the United States, 2002 Statistical Tables

(Annual. NCJ 200561. Washington: U.S. Department of Justice [Online]. Available: http://www.ojp.usdoj.gov/bjs/pub/pdf/ cvus02.pdf [Mar. 3, 2004]. 113 tables.)

Presents data for 2002. SOURCEBOOK tables 3.5-3.15, 3.17-3.20, 3.22-3.26, 3.28-3.35.

This set of tables presents data on criminal victimization in the United States during 2002 and is part of an ongoing series prepared from the National Crime Victimization Survey (NCVS) program. The 2002 NCVS collected data from a nationally representative sample of approximately 76,050 persons in 42,000 households. The NCVS gathers information on personal victimization including rape, sexual assault, robbery, assault, and purse snatching and pocket picking. Also gathered are data on property crimes including burglary, motor vehicle theft, and theft. The statistical tables are divided into six sections: demography of victims, victims and offenders, geography, the crime event,
victims and the criminal justice system, and series victimizations. Also included is a detailed discussion of the survey methodology and a glossary of terms used in the tables.

## Education and Correctional Populations

(Special. Special Report NCJ 195670. Washington: U.S. Department of Justice, January 2003. 12 pages, 16 tables.)

Presents data for 1997 and other selected years. SOURCEBOOK tables 1.109, 6.45, 6.46 .

This special report presents data from several U.S. Department of Justice, Bureau of Justice Statistics surveys of prisoners, jail inmates, and probationers; the Bureau of Labor Statistics' Current Population Survey; and the National Center for Educational Statistics' National Adult Literacy Survey. The report compares educational attainment of State and Federal prisoners, local jail inmates, and persons on probation to that of the general population. Educational attainment is presented for various demographic groups (e.g., sex, race, ethnicity, age, citizenship, and military service), as well as for other social and economic factors. Data comparing dropping out of school for those in local jails and the general population also are discussed. Additionally, data describing the availability of educational programs for those housed in State and Federal prisons and in local jails, and their participation in educational and vocational programs since incarceration are presented.

## Federal Law Enforcement Officers, 2002

(Periodic. Bulletin NCJ 199995. Washington: U.S. Department of Justice, August 2003. 17 pages, 10 tables, 4 figures.)

Presents data for 2002. SOURCEBOOK tables 1.72-1.75.

This bulletin presents data provided by Federal agencies in response to a survey conducted by the U.S. Department of Justice, Bureau of Justice Statistics. The report presents information on full-time Federal law enforcement personnel with Federal arrest authority who were authorized to carry firearms in the performance of their duties. Data are presented on the number of Federal officers employed by each agency; sex, race, and ethnicity breakdowns of Federal officers; the major States of employment for agencies employing 750 or more officers; and the number of Federal officers per 100,000 residents in each State. Assaults on Federal officers in selected large agencies are reported, as are data on Federal officers stationed in the U.S. Territories. Also included are a table listing the primary States of employment for
officers of eight large Federal agencies and the website addresses for numerous Federal law enforcement agencies.

The survey was conducted prior to the enactment of legislation creating the Department of Homeland Security. However, the report includes a discussion of changes to Federal law enforcement resulting from the Homeland Security Act of 2002.

## Felony Defendants in Large Urban Counties, 2000

(Biennial. NCJ 202021. Washington: U.S. Department of Justice, 2003. 46 pages, 43 tables, 22 figures, 1 appendix.)

Presents data for 2000. SOURCEBOOK tables 5.51-5.60.

This report presents data on the processing of felony defendants in the State courts of the 75 most populous counties in the United States. The data are from the State Court Processing Statistics (SCPS) program (formerly the National Pretrial Reporting Program) sponsored by the U.S. Department of Justice, Bureau of Justice Statistics. Information from the 2000 SCPS is presented on demographic characteristics, arrest charge, criminal history, pretrial release and detention, adjudication outcome, and sentencing of felony defendants in the 75 largest counties. A methodology section describes the SCPS program sampling and provides definitions of offenses and related terms used in the report.

## Felony Sentences in State Courts, 2000

(Biennial. Bulletin NCJ 198821. Washington: U.S. Department of Justice, June 2003. 12 pages, 12 tables, 3 figures.)

Presents data for 2000 and trend data for selected years 1992-2000. SOURCEBOOK tables 5.44-5.50.

This bulletin presents data on felony sentences imposed by State courts. The data are from the National Judicial Reporting Program administered by the U.S. Department of Justice, Bureau of Justice Statistics. The results are based on case processing in a nationally representative sample of 344 counties. Information presented includes number of felony convictions and types of sentences imposed by State courts. Data on sentence length, estimated time to be served, and demographic characteristics of persons convicted of felonies are included. Processing information including method of conviction (jury, bench, plea) and average time between arrest and sentencing is presented, as is information on the imposition of additional penalties (e.g., restitution, treatment, etc.) by State courts.

## Firearm Use by Offenders

(Special. Special Report NCJ 189369. Wasb ington: U.S. Department of Justice, Nover ber 2001. 15 pages, 17 tables.)

Presents data for 1991 and 1997. SOURCEBOOK tables 6.35-6.38.

This report presents data from surveys of inmates in State and Federal correctional facilities conducted by the U.S. Census Bureau for the U.S. Department of Justice, Bureau of Justice Statistics and the Federal Bureau of Prisons. The report provides highlights from the surveys regarding firearm use by offenders, detailed tables, survey sampling and statistical methodology, and firearm definitions. Data presented include the possession, use, source, and types of firearms used by offenders during their current offense, and selected characteristics of these offenders such as age, sex, ethnicity, family background, criminal history, prior sentences, and type of current offense.

## HIV in Prisons, 2001

(Annual. Bulletin NCJ 202293. Washington: U.S. Department of Justice, January 2004. 8 pages, 6 tables, 2 figures.)

Presents data for 2001 and trend data for 1991-2001. SOURCEBOOK tables 6.74-6.78.

This report presents information on HIV infection and AIDS cases in State and Federal prisons. The data include the number of prisoners known to be HIV positive and confirmed AIDS cases for the 50 States, the District of Columbia, and the Federal Bureau of Prisons. Number and rate of total prisoner deaths and AIDS-related deaths also are presented for each State, the Federal prison system, and the District of Columbia for selected years. The incidence of AIDS cases and related deaths among prisoners is compared to the general U.S. population. A methodology section discusses the sources of data for the information provided.

## Immigration Offenders in the Federal Criminal Justice System, 2000

(Special. Special Report NCJ 191745. Washington: U.S. Department of Justice, August 2002. 11 pages, 19 tables, 10 figures.)

Presents data for 2000 and trend data for 1985-2000. SOURCEBOOK tables 5.77, 5.78, 6.60.

This report presents information on offenders charged with immigration offenses. The data are from the U.S. Department of Justice, Bureau of Justice Statistics' Federal Justic

Statistics Program. Included are trend data on the number of offenders investigated, charged, and sent to Federal prison for immigration offenses. The nationality of suspects investigated, type of immigration offense, demographic characteristics, and criminal history of offenders is presented. Also included are data on sentence types and average time to be served for those convicted of immigration offenses. Finally, selected information for noncitizens in the Federal criminal justice system is shown, including number of noncitizens charged, type of offense (primarily drugs or immigration offenses), and the number of noncitizens in Federal prisons.

## Intimate Partner Violence, 1993-2001

(Periodic. Crime Data Brief NCJ 197838. Washington: U.S. Department of Justice, February 2003. 2 pages, 3 tables, 1 figure.)

Presents data for 1993-2001. SOURCEBOOK table 3.132.

This data brief presents information on nonlethal victimizations perpetrated by intimate partners. The data are from the Bureau of Justice Statistics' National Crime Victimization Survey. Offenses included are rape, sexual assault, robbery, aggravated assault, and simple assault. Information is presented for female and male victims. Also included is a table presenting the number of murder victims killed by intimate partners; these data are from the Federal Bureau of Investigations' Supplementary Homicide Reports.

## Jails in Indian Country, 2002

(Annual. Bulletin NCJ 198997. Washington: U.S. Department of Justice, November 2003. 12 pages, 7 tables, 1 figure.)

Presents data for 2002 and trend data for 1998, 2000-2002. SOURCEBOOK table 6.25.

This report presents data from the fifth Survey of Jails in Indian Country, a data collection effort initiated in 1998 by the U.S. Department of Justice, Bureau of Justice Statistics. Summary tables present aggregate data for all Indian country jails surveyed in 2001 and 2002, and selected data from the 1998 and 2000 surveys. These data include number of adult and juvenile inmates, type of supervision, inmate movements, and staff characteristics. Facility characteristics include rated capacities, percent occupied, jails operating above $150 \%$ of capacity, the 10 largest jails, and facilities under court order or consent decree. An additional set of tables lists the jail facilities surveyed and provides detailed data for each.

## Justice Expenditure and Employment Statistics

(Annual. Washington: U.S. Department of Justice. Contents: See below. Available: http://www.ojp.usdoj.gov/bjs/ eande.htm.)

Presents data for 2001 and trend data for 1982-2001. SOURCEBOOK tables 1.1-1.11, 1.17-1.26.

These tables display detailed criminal justice expenditure and employment data for 2001 and national trend data for 1982 to 2001. The data were compiled from existing data sources and from annual surveys of government finances and employment conducted by the U.S. Census Bureau. Detailed data are presented for Federal, State, and local governments on three categories of criminal justice activities: police protection; judicial, including courts, legal services, prosecution, and public defense; and corrections. The data include national and by-State expenditures by governments for criminal justicerelated activities and number of personnel employed for these functions. Selected data are shown for counties with populations of 500,000 or more and cities with populations of 300,000 or more. Also available is supporting text material providing a description of the methodology; definitions of concepts, categories, and terms; differences affecting comparability over time; and information about the relative standard errors associated with the survey estimates.

## Law Enforcement Management and Administrative Statistics, 2000: Data for Individual State and Local Agencies with 100 or More Officers

(Special. NCJ 203350. Washington: U.S.
Department of Justice, 2004. 272 pages, 40 tables, 4 figures, 1 appendix.)

Presents data for 2000. SOURCEBOOK tables 1.59-1.62.

This monograph presents data from the 2000 Law Enforcement Management and Administrative Statistics (LEMAS) program of the U.S. Department of Justice, Bureau of Justice Statistics. The 2000 LEMAS survey was mailed to all State and local law enforcement agencies that reported employing 100 or more sworn officers in a 1996 Bureau of Justice Statistics census of State and local law enforcement agencies. In addition, a sample of agencies with fewer than 100 officers received a slightly abbreviated version of the questionnaire. This report presents data for 804 agencies with 100 or more full-time officers and 35 or more full-time officers whose regularly assigned duties included responding to calls for service. This includes 49 State
police agencies, 32 county police departments, 501 municipal police departments, and 222 sheriffs' offices. Detailed data are presented on personnel including full- and part-time, and sworn and civilian employees; expenditures and pay; community policing; operations; equipment; computers and information systems; and agency policies and programs. A copy of the survey questionnaire is included.

## Local Police Departments 2000

(Periodic. NCJ 196002. Washington: U.S. Department of Justice, 2003. 28 pages, 59 tables, 24 figures.)

Presents data for 2000 and trend data for 1990, 1997, 1999, and 2000. SOURCEBOOK tables 1.33, 1.35, 1.37, 1.39, 1.41, $1.43,1.45,1.47,1.49,1.51,1.53$.

This report presents data from the 2000 Law Enforcement Management and Administrative Statistics (LEMAS) survey sponsored by the U.S. Department of Justice, Bureau of Justice Statistics and the Office of Community Oriented Policing Services. The data represent the nearly 13,000 local police departments operated by municipal, county, or tribal governments. Information presented includes number and type of personnel, budgets and salary levels, operations, community policing initiatives, equipment, use of computer and information systems, and written policies and procedures.

## Mental Health Treatment in State Prisons, 2000

(Special. Special Report NCJ 188215. Washington: U.S. Department of Justice, July 2001. 8 pages, 8 tables, 1 appendix.)

Presents data for 2000. SOURCEBOOK tables 6.72, 6.73.

This special report presents data on mental health services and treatment in State prisons. The data are from the 2000 Census of State and Federal Adult Correctional Facilities, sponsored by the U.S. Department of Justice, Bureau of Justice Statistics. Information is provided on mental health screening for prisoners, the number of prisoners receiving mental health treatment, and type of treatment provided (e.g., 24-hour mental health care, therapy/counseling, psychotropic medications). Data are provided by type of facility (e.g., confinement or community-based, public or private, male or female only prisoner populations, population size, and security level), and are broken down by State and region.

## Offenders Returning to Federal Prison, 1986-97

(Special. Special Report NCJ 182991. Washington: U.S. Department of Justice, September 2000. 10 pages, 7 tables, 5 figures.)

Presents data for 1986-97. SOURCEBOOK tables 6.68, 6.69.

This report presents data on Federal offenders returning to prison within 3 years of release. The data include the number of Federal prison releases and the number and percent of offenders returned to prison from 1986 to 1997. The data are displayed by offense type, demographic characteristics, reason for return to prison, and time served prior to release. Returns of offenders sentenced before and after implementation of Federal sentencing guidelines are compared. A methodology section describes the data sources and the study.

## Police Departments in Large Cities, 1990-2000

(Special. Special Report NCJ 175703. Washington: U.S. Department of Justice, May 2002. 16 pages, 28 tables, 5 figures.)

Presents data for 1990 and 2000. SOURCEBOOK tables 1.55-1.58.

This report presents data from the 1990 and 2000 Law Enforcement Management and Administrative Statistics (LEMAS) surveys sponsored by the U.S. Department of Justice, Bureau of Justice Statistics and the Federal Bureau of Investigation's (FBI) Uniform Crime Reporting Program (UCR). Data are included for police departments in 62 cities with populations of 250,000 or more residents in both of the survey years. Information is provided on police department staffing levels including minority and female employment in police departments, officer education and training requirements, operating budgets, officer salaries and special pay, types of special units operated, drug enforcement activities, sidearm and armor policies, types of vehicles operated, and computerization of information systems. FBI Crime Index data are compared with police employment levels from the LEMAS surveys for each of the 62 cities included in the report.

Prison and Jail Inmates at Midyear 2003
(Annual. Bulletin NCJ 203947. Washington: U.S. Department of Justice, May 2004. 14 pages, 14 tables, 2 figures.)

Presents data for 2003 and trend data for 1990-2003. SOURCEBOOK tables 6.14, $6.15,6.17,6.39,6.42$.

This bulletin presents data from the 2003 National Prisoner Statistics program and the 2003 Annual Survey of Jails as well as trend data from both programs. Information presented includes the number of prisoners held in State and Federal prisons and in local jails, prisoners under jurisdiction of State and Federal correctional authorities, changes in the number of prisoners under jurisdiction of State and Federal correctional authorities, prisoners admitted to and released from State and Federal jurisdiction, prisoners held in private facilities, the number of State prisoners under age 18 , and the number of noncitizens held in State and Federal prisons. Data for local jails include jail population trends, capacity figures, characteristics of jail inmates, confinement status, type of supervision program, and figures for the 50 largest jail jurisdictions. A brief discussion of the two data sources is included:

## Prisoners in 2003

(Annual. Bulletin NCJ 205335. Washington: U.S. Department of Justice, November 2004. 12 pages, 12 tables.)

Presents data for 2003 and trend data for 1995-2003. SOURCEBOOK tables 6.13, $6.28-6.30,6.32,6.33,6.41,6.61,6.64$.

This report presents data on prisoners under the jurisdiction of State and Federal adult correctional authorities. The total number of prisoners, prisoners sentenced to more than 1 year, and rates of incarceration are presented for each State, the Federal prison system, and four geographic regions. Changes in the number of sentenced prisoners from 1995 to 2003 also are shown for the States, regions, and the Federal prison system. Data are provided for prisoners under military jurisdiction, State and Federal prisoners held in private facilities and local jails, prisoners in custody in the U.S. Territories, and State and Federal prison capacities. Also shown are incarceration rates by sex, race, Hispanic origin, and age of prisoners. The number of Immigration and Customs Enforcement (ICE) detainees also is provided along with facility type for 1995, 2002, and 2003. The methodology section discusses the data collection programs and variations among jurisdictions in reported data.

## Probation and Parole in the United States, 2003

(Annual. Bulletin NCJ 205336. Washington: U.S. Department of Justice, July 2004. 8 pages, 9 tables.)

Presents data for 2003 and trend data for 1995-2003. SOURCEBOOK tables 6.1-6.3, 6.65, 6.66.

This bulletin presents data from the Annual Probation and Parole Surveys conducted by the U.S. Department of Justice, Bureau of Justice Statistics. Included are counts of sons under probation and parole supervisio in each State, the District of Columbia, and the Federal system. Data from the most recent survey, the 2003 survey, show probation and parole counts for Jan. 1 and Dec. 31, 2003, entries to and exits from supervision during 2003, and rates of persons under each type of community supervision per 100,000 adult residents. Also shown are data on characteristics of adulis on probation and parole, including demographic characteristics, offense type, and supervision status. The top 10 States are ranked according to those with the largest community corrections populations, the largest percent increase, and the highest and lowest rates of persons under community supervision. Figures also are provided for the total number of persons under correctional supervision in the United States, i.e., probation, jail, prison, and parole populations combined.

## Profile of Jail Inmates, 2002

(Special. Special Report NCJ 201932. Washington: U.S. Department of Justice, July 2004. 12 pages, 19 tables.)

Presents data for 2002 and selected data for 1996. SOURCEBOOK tables 6.18-6.23.

This special report presents data from the 2002 Survey of Inmates in Local Jails sponsored by the U.S. Department of Justice, Bureau of Justice Statistics. Interviews were conducted from a nationally representative sample of over 6,900 inmates in 417 jails. Inmates provided extensive information on current offenses and sentences, conviction status, time served, criminal history, drug and alcohol use and treatment, family background, and individual characteristics including demographic and employment history data. Inmates also reported on experiences of physical or sexual abuse prior to admission to jail and whether they had been under a restraining order prior to admission.

## Prosecutors in State Courts, 2001

(Periodic. Bulletin NCJ 193441. Washington: U.S. Department of Justice, May 2002. 12 pages, 14 tables, 2 figures.)

Presents data for 2001. SOURCEBOOK tables 1.85-1.88.

This bulletin presents data from the 2001 National Survey of Prosecutors (NSP) sponsored by the U.S. Department of Justice, Bureau of Justice Statistics. The 2001 NSP was a census of all chief prosecutors that tried felony cases in State courts of gener jurisdiction. The report presents data on
staffing and budget in prosecutors' offices; annual salary and length of service for chief prosecutors; types of felony, non-felony, and computer-related crimes prosecuted; criminal cases closed and percent convicted; proceedings against juveniles in criminal court; work-related threats and assaults received by members of prosecutors' offices; security measures used for protection; use of DNA evidence; and community-related activities engaged in by prosecutors' offices. A comparison of staffing and budget in prosecutors' offices for 1992, 1994, 1996, and 2001 also is provided. A methodology section discusses respondent selection, data collection, survey response, and data imputation. An appendix table provides a by-State listing of the number, title, areas of jurisdiction, and manner of selection of chief prosecutors.

## Recidivism of Prisoners Released in 1994

(Special. Special Report NCJ 193427. Washington: U.S. Department of Justice, June 2002. 16 pages, 13 tables, 1 figure.)

Presents data for prisoners released in 1994. SOURCEBOOK tables 6.47-6.52.

This special report presents data from a U.S. Department of Justice, Bureau of Justice Statistics study on recidivism of prisoners who were released from prison in 1994 in 15 States. The study tracked prisoners who had been sentenced to more than 1 year of incarceration, and examined their recidivism for a period of 3 years after their release in 1994, using four measures: rearrest, reconviction, resentence to prison, and return to prison with or without a new sentence. Highlights of the study are presented, along with a profile of released prisoners, the number and type of both in-State and out-of-State rearrest charges, and States in which out-of-State rearrests occurred. Also shown are recidivism rates at different time periods after release and by various characteristics, including prisoner sex, race, ethnicity, and age; most serious offense for which prisoners were released; charge at rearrest; number of prior arrests; and the amount of time served before first release. The report includes a comparison of recidivism rates of prisoners released in 1994 with those from an earlier study involving prisoners released in 1983. A methodology section discusses the data sources, sampling methodology, and definitions of offenses examined in the study.

## Reporting Crime to the Police, 1992-2000

(Special. Special Report NCJ 195710. Washington: U.S. Department of Justice, March 2003. 8 pages, 9 tables, 3 figures.)

Presents data for 1992-2000. SOURCEBOOK table 3.36 .

This special report presents estimates of the number and percent of crimes reported to the police. The data are from the National Crime Victimization Survey sponsored by the U.S. Department of Justice, Bureau of Justice Statistics. Estimates of violent and property crimes reported to the police for 2000 are presented, and reporting of violent crime is examined in more detail for the years 1992-2000. Tables showing percentages of violent crimes reported to police are broken down by numerous victim characteristics including sex, race, age, Hispanic origin, income, and others. Also included are percentages of violent victimizations reported to police based on whether injury resulted, the presence of a weapon, victim-offender relationship, and several offender characteristics. Finally, reasons for reporting and not reporting violence to the police, and factors associated with reporting to police are discussed.

## Sheriffs' Offices 2000

(Periodic. NCJ 196534. Washington: U.S. Department of Justice, 2003. 28 pages, 59 tables, 24 figures.)

Presents data for 2000 and trend data for 1990, 1997, 1999, and 2000. SOURCEBOOK tables 1.34, 1.36, 1.38, 1.40, 1.42, $1.44,1.46,1.48,1.50,1.52,1.54$.

This report presents data from the 2000 Law Enforcement Management and Administrative Statistics (LEMAS) survey sponsored by the U.S. Department of Justice, Bureau of Justice Statistics and the Office of Community Oriented Policing Services. The data represent more than 3,000 sheriffs' offices operated by county or independent city governments. Information presented includes number and type of personnel, budgets and salary levels, operations, community policing initiatives, equipment, use of computers and information systems, and written policies and procedures.

## State Court Prosecutors in Small Districts, 2001

(Special. Special Report NCJ 196020. Washington: U.S. Department of Justice, January 2003. 10 pages, 13 tables, 3 figures.)

Presents data for 2001. SOURCEBOOK table 1.89.

This report presents data from the 2001 National Survey of Prosecutors (NSP) sponsored by the U.S. Department of Justice, Bureau of Justice Statistics. The 2001 NSP was a census of ali chief prosecutors that tried felony cases in State courts of general jurisdiction. This special report focuses on full-time prosecutors' offices that served
districts with populations under 250,000. Data are presented on staff size and budget for prosecutors' offices; annual salary for chief prosecutors; types of cases handled, including felony, non-felony, and computerrelated crime; criminal cases closed and percent convicted; proceedings against juveniles in criminal court; work-related threats and assaults received by members of prosecutors' offices; security measures used for protection; use of DNA evidence; and community-related activities engaged in by prosecutors' offices. Also provided are selected data for offices with part-time chief prosecutors. A methodology section discusses respondent selection, data collection, survey response, and data imputation.

## Summary of State Sex Offender Registries, 2001

(Special. Fact Sheet NCJ 192265. Washington: U.S. Department of Justice, March 2002 12 pages, 4 tables.)

Presents data for 1998 and 2001. SOURCEBOOK table 6.63.

This report provides information on sex offender registries (SOR) in the 50 States and the District of Columbia. Included is information on the organizational location of each State's registry, e.g., the State police, the department of public safety, the attorney general, or the department of corrections. The number of offenders registered for 1998 and 2001 in each State is included. The extent of each State's SOR automation and DNA sample collection is discussed. Finally, detailed information is presented on community notification by law enforcement agencies and the extent to which this is carried out through posting of offender-specific information on the Internet.

## Trends in State Parole, 1990-2000

(Special. Special Report NCJ 184735. Washington: U.S. Department of Justice, October 2001. 15 pages, 22 tables, 4 figures.)

Presents trend data for 1990-2000.
SOURCEBOOK tables 6.43, 6.44, 6.67.
This report presents information on trends in State parole populations since 1990. Changes in sentencing policies that have resulted in States moving away from discretionary release by parole boards to mandatory release are discussed. The effects of the Federal truth-in-sentencing standard requiring violent offenders to serve not less than $85 \%$ of their sentence before release are examined for the States that have adopted this standard. The report compares discretionary and mandatory releases to parole with the type of discharge from parole
supervision. Data are presented on the success and failure rates of offenders on parole by criminal history, sentence length, time served in prison, and offense distribution. The report also profiles specific characteristics and needs of offenders reentering the community, including drug and alcohol use history, homelessness, and mental health status.

## Tribal Law Enforcement, 2000

(Special. Fact Sheet NCJ 197936. Washington: U.S. Department of Justice, January 2003. 4 pages, 6 tables, 1 figure.)

Presents data for 2000. SOURCEBOOK table 1.63.

This fact sheet presents data from the 2000 Census of State and Local Law Enforcement Agencies sponsored by the U.S. Department of Justice, Bureau of Justice Statistics. The report presents information on tribaliy operated law enforcement agencies, full-time sworn personnel, and violent and nonviolent crime reported by law enforcement agencies in Indian country. Also included are data on full-time community policing and school resource officers in tribally operated law enforcement agencies.
U.S. Department of Justice, Criminal Division
"Report to Congress on the Activities and Operations of the Public Integrity Section for 2002"
(Annual. Washington: U.S. Department of Justice, 2004. Mimeographed. 43 pages, 3 tables.)

Presents data for 1983-2002. SOURCEBOOK table 5.79.

This report was compiled by the Public Integrity Section of the U.S. Department of Justice. The report is divided into three sections. Part one discusses the operational responsibilities of the Public Integrity Section including litigation matters, special priorities, and legal and technical assistance provided to other agencies. The second section describes each case prosecuted by the Section during 2002. Part three presents nationwide data on the number of Federal, State, and local public officials and others involved who were indicted, convicted, and awaiting trial for each year from 1983 to 2002. Additionally, the number of convictions of individuals involved in abuse of public office is reported by judicial district.
U.S. Department of Justice, Executive Office for United States Attorneys

## United States Attorneys' Annual Statistical Report: Fiscal Year 2002

(Annual. Washington: U.S. Department of Justice, 2004. 146 pages, 29 tables, 32 figures.)

Presents data for fiscal 2002 and trend data for fiscal 1993-2002. SOURCEBOOK tables $1.79,4.45,5.6,5.7$.

This annual publication is comprised of graphs, tables, and commentary summarizing the civil and criminal caseloads in U.S. attorneys' offices. Section I provides an overview of U.S. attorneys' offices, including staffing and organization. Section II presents data on criminal prosecutions by U.S. attorneys and includes a discussion of priority criminal prosecution areas such as terrorism, firearms, narcotics, corporate fraud, and civil rights. The third section presents information on U.S. attorneys' asset forfeiture litigation. Section IV presents data on civil litigation by U.S. attorneys, including caseloads and types of civil litigation such as bankruptcy and defensive civil litigation. Section $\vee$ presents data on criminal and civil appeals, including post-sentencing motions. The final section describes the reconciliation of Federal case processing data, which is a Federal effort to simplify data classification and increase consistency in data processing across different Federal agencies. Detailed statistical tables present data for each of the U.S. District Courts.
U.S. Department of Justice, Federal Bureau of Investigation
"Bank Crime Statisțics, Federally Insured Financial Institutions, January 1, 2002December 31, 2002"
(Annual. Washington: U.S. Department of Justice, 2003. Mimeographed. 16 pages, 27 tables.)

Presents data for 2002. SOURCEBOOK tables 3.149-3.151.

This report presents data on crime involving Federally insured financial institutions. Information is provided on violations of Federal bank robbery statutes including extortion and violations involving armored carriers. The data are broken down by characteristics of the banking institutions, offenders, property loss and recovery, community characteristics, deaths, injuries sustained, hostages taken, and State and region of occurrence.

## 1999 Bombing Incidents

(Annual. FBI Bomb Data Center General Information Bulletin 99-1. Washington: U.S. Department of Justice, 2003.27 pages, 18 tables, 10 figures.)

Presents data for 1999 and trend data for 1989-99. SOURCEBOOK tables 3.170-3.172.

This report provides information on bombing incidents reported to the Federal Bureau of Investigation's Bomb Data Center. Data on actual, attempted, and accidental bombing incidents are presented by type of device and resulting property damage, injuries, and deaths. Bombing incidents by State and region are listed and data are presented on types of explosives and devices, type of target, and time of occurrence. Information is provided on improvised devices, hoaxes, and on the apparent motivations of those involved in hoaxes and bombing incidents.

## Crime in the United States, 2002

(Annual. FBI Uniform Crime Reports. Washington: USGPO, 2003. 470 pages, 139 tables (estimated), 26 figures, 7 appendices.)

Presents data for 2002 and trend data for 1982-2002. SOURCEBOOK tables
1.66-1.68, 3.106-3.111, 3.117-3.124, 3.129,
3.134, 3.140-3.146, 3.168, 3.169, 4.1-4.27, 4.29.

This report begins with a summary of the Uniform Crime Reporting (UCR) Program including a discussion of the redesign of the UCR and recent data collection developments. The next section presents data on Crime Index offenses reported to the police. Each of the eight index offenses (murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson) is discussed in terms of number of offenses known to the police, 5 -year trends, and characteristics of offenses. Also included is a brief section on hate crime. Detailed tabulations present each of the index offenses by State, metropolitan statistical areas, cities and towns over 10,000 population, and suburban and rural counties. Index offenses occurring on college and university cam'puses also are included.

Section three presents tables on Crime Index offenses cleared by arrest. Data on offenses known to the police and percent cleared by arrest, and percent cleared by arrest of persons under 18 years of age are displayed. The fourth section focuses on
arrests and includes the number and rate of persons arrested for Part I and Part II offenses. Arrest data are displayed by sex, age, and race for total number of arrests, arrests in cities, arrests in suburban areas and counties, and arrests in rural counties. Total arrests and arrests of persons under age 18 for both Part I and Part Il offenses are shown for each State. Aggregate data for police disposition of juveniles taken into custody also are included.

Section five presents two special reports. The first, focusing on bank robbery in the United States from 1990-2001, examines data from three FBI databases-the UCR, the National Incident-Based Reporting System (NIBRS), and the Bank Crime Statistics in order to assess the convergence of these three sources. A second special report includes information concerning reported sniper attacks from 1982-2001 and is based on data from the FBl's Supplementary Homicide Reports. Section six is devoted to information on law enforcement personnel. The number of law enforcement employees and officers broken down by sex is shown for each State. Also included are tables showing the number of law enforcement employees and officers for U.S. cities, colleges and universities, and suburban and rural counties. The appendices include a discussion of the methodology, definitions of UCR offenses and reporting areas, a discussion of the Nation's two crime measures, a directory of State UCR programs, a national UCR program directory, and a publications list.

## Financial Institution Fraud and Failure Report, Fiscal Year 2003

(Annual. Washington: U.S. Department of Justice, 2003. 51 pages, 21 tables, 11 figures.)

Presents data for fiscal 2003 and trend data for fiscal 1999-2003. SOURCEBOOK table 3.148 .

This report presents information on financial institution fraud and failure matters handled by the Federal Bureau of Investigation's (FBI) Financial Institution Fraud Unit. Detailed data are presented on the number of failed financial institutions, the number of failure and fraud investigations pending, cases resulting in indictments and convictions, and types of subjects convicted (e.g., bank employee, bank officer, company or corporation). Also included are data on doliar amounts recovered and received from restitutions and fines. Information on seizures and forfeitures is presented. These data are broken down by type of financial institution (i.e., savings and loans, banks, credit unions) and FBI field office.

## Hate Crime Statistics 2002

(Annual. FBI Uniform Crime Reports. Washington: U.S. Department of Justice, 2003. 142 pages, 14 tables, 1 appendix.)

Presents data for 2002. SOURCEBOOK tables 3.112-3.114.

These data were collected by the Federal Bureau of Investigation through the Uniform Crime Reporting Program. The report presents information on bias-motivated (hate) crimes known to police. Data are presented on the number of incidents, offenses, victims, and offenders involved in hate crimes. The data include the type of bias motivation, offense type, and location of incidents. Detailed tables present the number of biasrelated offenses in each State, county, and participating police agency as well as information about agencies reporting no incidents of hate crime. Bias-related offenses occurring at universities and colleges also are included. Information concerning the number of quarters each agency contributed to the national hate crime program is reported.

## Law Enforcement Officers Killed and Assaulted, 2002

(Annual. FBI Uniform Crime Reports. Washington: U.S. Department of Justice, 2003. 102 pages, 70 tables, 5 figures.)

Presents data for 2002 and trend data for 1991-2002. SOURCEBOOK tables 3.152-3.158, 3.160-3.165.

This report contains detailed information including tables, graphs, and descriptive summaries on law enforcement officers feloniously killed and assaulted in the line of duty. Data on officers killed are presented by State and agency; geographic region; population group; circumstances at the scene of the incident; type of assignment; type of weapon and size of ammunition used in the offense; location of the fatal wound; use of body armor; distance between the officer and offender; and the month, day, and time of the attack. Profiles of the victim officers are presented as well as profiles and dispositions of known assailants.

Information also is provided on law enforcement officers accidentally killed. These data are broken down by geographic region, State, several incident and officer characteristics, and circumstances at the scene of the incident.

Data on officers assaulted are presented by geographic region, population group, type of weapon, circumstances at the scene of the incident, type of assignment, percent receiving personal injury, time of day, and percent of cases cleared.

The report presents data on assaults on Federal officers from six sectors of the U.S. Government: the Department of the Interior, the Department of Justice, the Department of the Treasury, the newly established Department of Homeland Security, the U.S. Capitol Police, and the U.S. Postal Inspection Service. This section begins with departmental summaries of incidents involving assaults on Federal officers that occurred during 2002. Data are presented on the number of victim officers and known assailants, officers killed or injured, type of weapon, type of activity in which the officer was engaged at the time of the incident, disposition of known assailants, and geographic region.

## Terrorism 2000/2001

(Annual. Washington: U.S. Department of Justice, 2004 [Online]. Available: http://www.fbi.gov/publications/terror/ terror2000_2001.pdf [Sept. 14, 2004]. 39 pages, 8 figures, 3 appendices.)

Presents data for 2000 and 2001 and trend data for 1980-2001. SOURCEBOOK tables 3.173, 3.174.

This report presents an overview of terrorist incidents and preventions taking place in the United States and its territories, and FBI investigations into terrorism acts involving U.S. interests around the worid. Descriptions of incidents occurring in the United States during 2000 and 2001 are included. The report contains a review of the September 11th terrorist attacks, a discussion of trends in animal rights and environmental extremism, and a review of the USA PATRIOT Act. The appendix provides a chronological summary of terrorist incidents in the U.S. from 1990 to 2001, and figures presenting the number of casualties of terrorism and terrorist activities by region from 1980 through 2001.

## U.S. Department of Justice, Federal Bureau of Prisons

## State of the Bureau 2003

(Annual. Washington: U.S. Department of Justice, 2004. 60 pages, 3 tables.)

## Presents data for 2003. SOURCEBOOK

 table 1.106.This report presents information on the correctional institutions operated by the Federal Bureau of Prisons (BOP). Bureau accomplishments for fiscal year 2003 and strategic planning objectives for fiscal year 2004 are reviewed. Brief descriptions of the central and regional offices are provided. Information for each BOP institution, such as location, telephone and fax numbers, security
level, average population, and number of staff is included. Also listed is contact information for the Bureau's 28 regional Community Corrections Management Offices. The report concludes with summary statistical data on prisoners committed to BOP custody and BOP personnel.
U.S. Department of Justice, National Institute of Justice

## Drug and Alcohol Use and Related Matters Among Arrestees 2003

(Annual. Washington: U.S. Department of Justice, 2004. 33 pages, 28 tables.)

Presents data for 2003. SOURCEBOOK tables 4.30-4.32.

This report presents data on drug use among adult arrestees in 39 U.S. cities and counties. The data are from the Arrestee Drug Abuse Monitoring (ADAM) program, sponsored by the U.S. Department of Justice, National Institute of Justice. Data are based on voluntary urinalysis testing and interviews from samples of arrestees. Information is presented on the use of marijuana, cocaine, methamphetamine, opiates, and PCP. Self-reported patterns of drug-related behaviors such as frequency of use, drug acquisition, failed attempts to purchase drugs, and heavy drinking are included. Also included are estimates of drug, alcohol, and mental health treatment participation.
U.S. Department of Justice, U.S. Marshals Service
FY 2000 Annual Report of the United States Marshals Service
(Annual. Washington: U.S. Department of Justice, 2001. 148 pages, 108 tables, 12 figures.)

Presents data for fiscal 1999 and 2000 and trend data for fiscal 1985-2000. SOURCEBOOK tables 1.77, 1.78.

This report presents data on the missions, workload, operations, resources, and productivity of the U.S. Marshals Service (USMS). Data are shown for the agency as a whole and separately for each district. USMS duties include fugitive investigations, prisoner processing and detention, prisoner production and transportation, protection of the judiciary, witness security, execution of court orders, government seizures, and special operations and analysis. Sections with national data trends, data definitions and sources, staffing allocations, and organizational references also are included.

## U.S. Department of State

## Patterns of Global Terrorism: 2003

(Annual. Washington: U.S. Department of State, 2004. 197 pages, 9 figures, 7 appendices.)

Presents data for 2003 and trend data for 1982-2003. SOURCEBOOK tables 3.175 , 3.176.

This report includes graphs, narrative descriptions, and comments on incidents of international terrorism and politically inspired violence. Information is presented on types of incidents, victims, and terrorist groups
Overviews of counter-terrorist activities and cooperation with the United States' antiterrorism efforts are provided for numerous countries in eight regions of the world. A discussion of countries engaging in Statesponsored terrorism also is included. The appendices present a chronology of significant terrorist incidents in 2003, detailed background information on organizations that engage in terrorism, U.S. programs and policies, the U.S. military's counterterrorism campaign in 2003, a discussion of countering terrorism on the economic front, and a statistical review of international terrorist incidents.

## U.S. Department of Transportation, Federal

 Aviation Administration
## Annual Report to Congress on Civil Aviation Security, January 1, 1995-December 31, 1995

(Annual. Washington: U.S. Department of Transportation, 1996. 20 pages, 2 tables, 1 figure.)

Presents data for 1995 and trend data for 1991-95. SOURCEBOOK table 3.177.

This report contains data on threats against civil aviation, both foreign and domestic, including hijackings, airport bombings, bomb threats, and security incidents. Also presented are data on passenger screening activities and summaries of other ongoing preventive measures. This report covers the 1995 calendar year and provides detailed descriptions of criminal acts against civil aviation committed during that period.
U.S. Department of Transportation, Federal Highway Administration

## Highway Statistics 2002

(Annual. Washington: U.S. Department of Transportation, 2003.174 pages, 103 tables, 3 figures.)

Presents data for 2002. SOURCEBOOK table 3.147.

This report presents information on highw transportation in three general areas: highway use, including the ownership and operation of motor vehicles; highway finance, including the receipts and expenditures for highways by public agencies; and highway function--the extent, characteristics, and performance of public highways, roads, and streets in the Nation. Detailed statistical data are provided on motor fuel use and taxation; motor vehicle ownership; driver licensing; highway-use revenues; State highway finance; highway mileage, performance, and characteristics; Federal aid for highways; highway finance data for local governments; and motor vehicle-related fatalities and injuries. Selected international highway data also are included.
U.S. Department of Transportation, National Highway Traffic Safety Administration
Digest of State Alcohol-Highway Safety Related Legislation, Current as of January 1, 2002
(Annual. Washington: U.S. Department of Transportation, 2002. 577 pages, 2 tables, 2 appendices.)

Presents data for 2002. SOURCEBOOK tables 1.112, 1.113.

This 20th edition of the digest provides a detailed description of the various statutory provisions related to alcohol use and highway safety. The data were collected through an examination of statutory codes of the 50 States, the District of Columbia, American Samoa, Guam, Puerto Rico, and the Virgin Islands. Statutory provisions are examined in the following areas: blood alcohol concentration (BAC) levels as evidence in court, preliminary breath test and implied consent laws, chemical tests authorized under implied consent laws, provisions related to adjudication of driving while intoxicated charges, sanctions for refusal to submit to a BAC test, sanctions following a conviction for driving while intoxicated-related offenses, laws requiring a blood alcohol concentration test on persons killed in traffic crashes, minimum legal drinking age, liability of owners of drinking establishments for serving alcohol to intoxicated patrons and to minors, open container laws, and anti-consumption laws. The appendices present the Uniform Vehicle Code and the Millennium DUI Prevention Act.

## Traffic Safety Facts 2002

(Annual. Washington: U.S. Department of Transportation, 2004. 202 pages, 126 tables, 30 figures, 3 appendices.)

Presents data for 2002 and trend data for 1966-2002. SOURCEBOOK tables 3.103-3.105.

This report is based on information from two of the National Highway Traffic Safety Administration's data systems: the Fatality Analysis Reporting System and the National Automotive Sampling System - General Estimates System. Trend information on number and types of motor vehicle crashes, fatalities, characteristics of persons killed, characteristics of incidents, and alcohol involvement is provided. Detailed information on the time, location, circumstances, and alcohol involvement for motor vehicle crashes occurring in 2002 is included. Statistics on drivers, passengers, and pedestrians involved in crashes also are presented. Finally, fatal crash and fatality statistics are tabulated for the 50 States, the District of Columbia, and Puerto Rico.

## U.S. Postal Inspection Service

## 2003 Annual Report of Investigations of the United States Postal Inspection Service

(Annual. Washington: U.S. Postal Inspection Service, 2004. 76 pages, 6 tables, 3 figures.)

Presents data for fiscal 2003 and trend figures for 1999-2003. SOURCEBOOK tables 5.73, 5.74.

This report presents information on the investigative and security-related activities of the U.S. Postal Inspection Service. Data are provided on investigations of crimes under the jurisdiction of the agency including: mail fraud and dangerous mailings, e.g., mail bombs and biohazardous materials; child exploitation; interdiction of drugs and related trafficking; and asset forfeiture and money laundering. Other offense investigations covered are mail theft, identity theft, violent crimes against postal employees, and threats to Postal Service revenue and finances. The report summarizes laws pertaining to the Inspection Service's most important areas of jurisdiction. A special insert describing Postal Inspector's continuing efforts to investigate and deter Workers' Compensation fraud is included. The next section deals with safety and security including safeguarding employees, facilities, and the U.S. mail. Additional topics include management of intelligence information, emergency preparedness and homeland security, consumer education, fraud prevention,
legislative action, strategic planning, safety of international mail products, and forensic and technical services. The Inspection Service's fiscal 2003 goals, objectives, and results are reviewed and goals, objectives, and targets for fiscal 2004 are listed.

## U.S. Sentencing Commission

## 2002 Sourcebook of Federal Sentencing Statistics

(Annual. Washington: U.S. Sentencing Commission, 2004. 220 pages, 536 tables (estimated), 13 figures, 2 appendices.)

Presents data for fiscal 2002. SOURCEBOOK tables 5.26-5.36, 5.39.

This publication presents detailed information on the application of Federal sentencing guidelines for fiscal year 2002. The information is presented in nine sections. Section one contains data on the reporting characteristics of the 94 district courts represented in the report. The second section presents data on demographic characteristics and offenses of defendants sentenced according to the Federal sentencing guidelines. Section three contains data on the type and length of sentences imposed in Federal courts. In sections four and five, detailed information is presented on the applications of and departures from the guideline ranges. Section six focuses on drug guideline offenses, including breakdowns by drug type, offender characteristics, and offense-related variables. Sections seven and eight contain data on the sentencing of immigration cases and organizations, respectively. The final section provides detailed information on appeais of cases processed under the sentencing guidelines. The appendices include a description of variables and supplemental tables providing detailed sentencing statistics by judicial district.

Wechsler, Henry; Jae Eun Lee; Meichun Kuo; Mark Seibring; Toben F. Nelson; and Hang Lee
"Trends in College Binge Drinking During a Period of Increased Prevention Efforts"
(Journal of American College Health, Vol. 50 (March 2002), pp. 203-217. 15 pages, 10 tables [Online]. Available: http://www.hsph. harvard.edu/cas/Documents/trends/Trends. pdf [Dec. 14, 2004].)

Presents data for 1993, 1997, 1999, and 2001. SOURCEBOOK tables 3.77-3.80.

This article reports the results of four national surveys of college students on drinking practices and related behaviors. The data are from the Harvard School of Public Health's

Coilege Alcohol Studies conducted in 1993, 1997, 1999, and 2001. Tables are presented on patterns of alcohol use and drinking styles of college students, and the prevalence of binge drinking by student and college characteristics. The prevalence of alcohol-related problems experienced by college students, the effects of binge drinking on non-binge drinkers in campus housing settings, and the prevalence of heavy drinking at on- and offcampus venues also are presented. The article concludes with tables providing information on college students' exposure to alcohol-related education and consequences imposed by colleges.

Wechsler, Henry; Jae Eun Lee; Toben F. Nelson; and Meichun Kuo
"Underage College Students' Drinking Behavior, Access to Alcohol, and the Influence of Deterrence Policies"
(Journal of American College Health, Vol. 50 (March 2002), pp. 223-236. 14 pages, 9 tables [Online]. Available: http://www.hsph. harvard.edu/cas/Documents/underminimum/ DrinkingBehavior.pdf [Dec. 14, 2004].)

Presents data for 1993, 1997, 1999, and 2001. SOURCEBOOK tables 3.81, 3.82.

This article presents results from the Harvard School of Public Health's College Alcohol Studies, a series of four national surveys of college students examining drinking practices and related behaviors. Estimates are provided for the number of underage college students consuming alcohol and their patterns of use and drinking styles. Tables are presented on secondhand effects of alcohol use for college students residing in campus housing, the types of venues in which college students report drinking alcohol, and underage students' reports of sources and accessibility to alcohol. Information also is provided on the prevalence of educational awareness campaigns launched by colleges, exposure to college-imposed sanctions for drinking alcohol, underage students' perceptions of the likelihood and consequences of being caught drinking alcohol, and the effects of laws and policies targeting underage drinking on the number of underage binge drinkers in the study.

Justice Expenditure and Employment
Data Survey methodology and definitions of terms

Note: The following information has been excerpted from U.S. Department of Justice, Bureau of Justice Statistics, 2001 Justice Expenditure and Employment Extracts, NCJ 202792 [Online]; and Trends in Justice Expenditure and Employment [Online]. Available: http:// www.ojp.usdoj.gov/bjs/eande.htm.

## Historical overview

The Bureau of Justice Statistics (BJS) began the collection of justice expenditure and employment data with fiscal 1971, using a special sample drawn by the U.S. Census Bureau especially for this purpose. The annual Survey of Criminal Justice Expenditure and Employment (CJEE Survey) provided comparable trend data from 1971 to 1979. That survey was the source of detailed, comprehensive statistics on the justice activities of the Federal, State, and local governments. Each annual survey resulted in a preliminary report or BJS Bulletin, a publication of detailed tabulations of national and State-local estimates, as well as individual government data, a volume displaying trends since 1971, and additional data accessible on magnetic tape.

In 1980, BJS discontinued the CJEE Survey for budgetary reasons following the collection of 1979 data. The cancellation of the CJEE Survey left a gap in national criminal justice statistics, which the CJEE Extracts series is designed to fill, albeit on a limited basis. Instead of presenting data based on a separate survey, the CJEE Extracts contains justice expenditure and employment data from the Census Bu reau's annual sample surveys of government finances and public employment.

Those Census Bureau surveys traditionally have provided limited data on the justice sectors of police protection (from 1902) and corrections (from 1954), with slightly more data being collected for State governments and the largest local governments. Beginning with 1982 these surveys began collecting "judicial and legal services" data as a separate category, allowing estimation of total justice expenditure and employment from the Census Bureau surveys, using the criminal justice data from the Census Bureau's annual
government finance and employment surveys.

Special surveys in 1985, 1988, and 1990 collected CJEE Survey data that are comparable to data for 1971 to 1979. The current Extracts methodology produces considerably less detailed information than is available from those special CJEE Surveys. Another significant difference, which is not as noticeable, relates to the comparability of the CJEE Extracts variables to the variables in those CJEE Surveys. In many instances, variables of the same name are not comparable between the two programs. While great care was taken to adjust the source data to maximize comparability with the CJEE Survey data, some differences remain.

In making trend comparisons, users should limit their analysis to one of the two sources: long-term trends for 1971-79, 1985, 1988, and 1990 from the CJEE Survey series; or more recent trends from 1980 using the CJEE Extracts data.

## Sample design

The CJEE Extracts data are assembled from data collected through the Census Bureau's annual surveys of government finances and public employment. The samples of local governments for those surveys are drawn from the most recent available Quinquennial Census of Governments. The samples consist of all large local general purpose governments above a certain population threshold (certainty units) plus a sample below the certainty level. The samples also include certain independent school districts and special districts, for which justice data are not collected. For detailed information about the sample for any given year, contact askbjs@ojp.usdoj.gov.

## Survey period

The Federal Government expenditure data are for the fiscal year, which ends on September 30 of the year indicated; for example, 2001 data are for the period Oct. 1, 2000 to Sept. 30, 2001.

The State expenditure data presented cover fiscal years ending June 30 for all States except four whose fiscal years ended as follows: New York, March 31; Texas, August 31; and Alabama and Michigan, September 30 of the year indicated. For local governments, the fiscal years reported are those that closed between July 1 and June 30. Most municipalities and counties end their fiscal years on December 31 or June 30. Thus, some local jurisdictions that ended their fiscal year on December 31 are included in the spreadsheets for the following year. The fiscal years reported for the District
of Columbia ended on September 30 of the year indicated.

Some agencies operate on a different fiscal year basis from the parent government. In such instances, figures included are for the agency's fiscal year that ended within the parent government's regular fiscal year.

The employment data are for the month of October for years prior to 1997. Beginning in 1997, employment data are for the month of March.

## Data collection

The CJEE Extracts data are from a special compilation of data and sources available from the Census Bureau's regular surveys of government finances and public employment. The recurrent surveys of government finances and public employment provide data on expenditure and employment, by function of the Federal, State, and local governments (counties, cities, townships, independent school districts, and special districts). The data collection procedures of these surveys for the expenditure and employment data are described below.

## Annual Government Finances Survey

Federal Government financial data were obtained from actual data presented in the Budget of the United States Government for each fiscal year displayed. The methodology for collecting the Federal financial data was changed in 1998. Previously the Census Bureau performed an extensive compilation of the Federal budget data for the purpose of bringing it in line with Census Bureau definitions. Beginning in 1998, the data were taken directly from the Budget of the United States Government using definitions of justice functions contained in the budget. The Census Bureau had included justice expenditures of nonjustice agencies. However, most of this expenditure is coded under other-thanjustice functions in the Federal budget.

State finance statistics as well as those for large counties and cities were compiled by Census Bureau representatives from official reports and records, with the advice of State and local officers and employees. The data were compiled from State government audits, budgets, and other financial reports, either in printed or electronic format. The compilation generally involved recasting the State financial records into the classification categories used for reporting by the Census Bureau.

The initial local government data collection phase used two methods to obtain data: mail canvass and central collection from State sources. In about 30 States, all or part of the
data for local governments were obtained from cooperative arrangements between the Census Bureau and a State government agency. These usually involved a data collection effort carried out to meet the needs of both agencies--the State agency for purposes of audit, oversight, or information, and the Census Bureau for statistical purposes. Data for the balance of local governments in the annual surveys were obtained via mail questionnaires sent directly to county, municipal, township, special district, and school district governments.

The mail canvass involved the use of detailed Census Bureau schedules with related reporting instructions. Census Bureau examiners reviewed the mail reports and used extensive correspondence to supplement and verify incomplete and questionable information.

As with mail canvass questionnaires, centrally collected financial data sometimes needed supplementation for such items as debt, assets, or particular functional expenditures or revenue items. Census Bureau staff obtained these supplementary data from special tabulations in other State offices, printed reports, secondary sources, or from mail requests directly to the county, municipal, or township governments.

Through these efforts, expenditure information was obtained for the Federal Government, all State governments, and all large county and city governments.

## Annual Public Employment Survey

Federal Government civilian employment data were obtained from records maintained by the U.S. Office of Personnel Management. These records did not provide the information necessary to compute Federal full-time equivalent employment.

State government data were collected through a mail survey of all State departments, agencies, and institutions. In approximately half of the States employment data are collected centrally for the State government. In some cases additional mail supplementation is necessary. As with the Finance Survey these States change from year to year. A sample of local governments also was surveyed by mail questionnaire. State agencies and local governments that did not respond by the close of the request period received followup requests. Second request mail consisted of post card reminders. Third request mail was a second mailing of the original request with a survey form. Mail returned to the Census Bureau because of address problems was readdressed and remailed. In addition, large
governments that had not responded for several years were contacted by telephone to identify the appropriate office or individual to receive and complete forms.

After extensive nonresponse followup, useable replies were received from more than $70 \%$ of the sample canvassed for the 1993 Survey of Public Employment, and similar response levels were achieved in other years.

## Data review and adjustments

Once the data are collected, intensive computer editing of the data at various stages of processing minimizes errors that may be introduced during processing in the annual finance and employment survey programs. For the mail portion of the surveys, figures reported by government officials are generally accepted as being substantially correct. In some cases varying interpretations of the instructions or deficiencies in the responding governments' records may make it difficult for officials to render complete and accurate reports for their governments.

These difficulties are handled by: careful definition of terms and detailed instructions in difficult cases; supplemental correspondence and telephone followup to officials; and intense examination of data collected through verification of internal consistency and comparison with previous reports and other sources of data.

The data extracted from the regular Census Bureau programs for the CJEE Extracts received additional examination. After compilation for the general finance survey a special reviewer examined in detail the expenditure data for State governments and large local governments, and investigated special data compilation problems in order to adjust the data as needed. The local government expenditure and employment estimates were reviewed, potential problems investigated, and data were revised, where necessary. Data for each of the States and large counties and cities displayed individually in the CJEE Extracts tables and spreadsheets were scrutinized and compared to prior years' data. A separate computer edit was then performed. Where possible, both expenditure and employment data were adjusted to correct errors, reclassify activities, and narrow differences with the CJEE Surveys. Specific procedures included referring to alternate sources of data, estimating missing data, and refining data through proration (for example, sheriff offices, where some employees perform police functions, others perform judicial functions (bailiffs), and others perform corrections (jail) functions).

## Data limitations

The survey sample for the local government CJEE Extracts justice expenditure and employment estimates was not designed specifically to produce data on these activities. Thus, the sampling variability, or "standard error," for the justice sectors is apt to be larger than for the major categories in the Census Bureau's regular surveys and for the same functions in the CJEE Survey series. The "standard error" is a measurement of variation among the estimates from all possible samples, of which this is one, having the same size and selected using the same sampling design. Estimates derived from the different samples would vary from each other (and also from a complete census using the same data collection procedures). The standard error, therefore, measures the precision with which an estimate from one of these samples approximates the average result of all the possible samples.

Interval estimates with a prescribed confidence level can be calculated for each statistic by using the sample estimate and the standard error as estimated from the sample. For example, a $90 \%$ confidence interval can be constructed by adding 1.6 times the estimated standard error to the estimate and subtracting 1.6 times the estimated standard error from the estimate. If intervals were constructed in such a manner for all possible samples of the same design and size, about $90 \%$ of them would include the complete enumeration statistic.

In reviewing the sample-based estimates, bear in mind that, because State government figures are not subject to sampling variation, the State-local aggregates shown for individual States are more reliable (on a relative standard error basis) than the local government estimates they include. Conversely, the sampling variability for smaller components, such as type of local government detail, is likely to be greater than that for the State and local total estimates. Because the national estimates of local government expenditure and employment are based on summations of individual State data, they are more reliabie than the State-area data.

The data also are subject to possible inaccuracies in classification, response, and processing. Every effort was made to keep such errors to a minimum through care in examining, editing, and tabulating the data submitted by government officials. Followup procedures were used extensively to clarify inadequate and inconsistent survey returns.

Readers should be generally cautious in comparing governments because differences among States and local governments in functional responsibilities, governmental structure, degree of urbanization, and population density can affect the comparability of expenditure and employment data. For example, some State governments directly administer certain activities that elsewhere are undertaken by local governments, with or without fiscal aid, and the same variation in the division of responsibilities exists for counties and cities.

## Data differing from other publications

The CJEE Extracts data differ in some cases from the Census Bureau's annual finance and employment survey data because of the more extensive review procedures used for this special compilation, the refinements of the data involved, and certain definitional differences. The CJEE Extracts trend data for 1985, 1988, and 1990 also differ from those published by BJS in its CJEE Survey series. Those CJEE Survey data should be used in trend analyses with other CJEE Survey data.for 1971-79. The 1985, 1988, and 1990 CJEE Extracts data should be used in trend analyses only with other CJEE Extracts data.

## Definitions of terms and concepts

Following is a glossary of terms and concepts used in the CJEE Extracts program and comments regarding their limitations. These definitions are based largely on those used in the Census Bureau's governmental finances and employment statistics program.

Federal Government--the term Federal encompasses all activities of the United States Government other than employment of the Armed Forces. District of Columbia data are excluded from this category and included with data for municipalities.

State governments--this category refers to the governments of the 50 States that constitute the United States.

Local governments--the Census Bureau classifies local governments by five major types: county, municipality, township, independent school district, and special district.

Population--the "resident population" data used are for July 1 of each year from the U.S. Census Bureau, Current Population Reports. They are consistent with the 1980 and 1990 decennial enumerations and they do not include adjustments for census coverage errors. They are the most current estimates available when the tables were assembled. The data in the trend tables may differ from population
data used in single year tables earlier in this series and in other sources that used estimates available at the time they were prepared.

## Governmental expenditure

Expenditure--all amounts of money paid out (net of recoveries and any correcting transactions) other than for retirement of debt (including interest), investment in securities, extensions of loans, or agency transactions. It includes oniy external cash payments and excludes any intragovernmental transfers and noncash transactions, such as the provision of meals or housing of employees. It also includes any payments financed from borrowing, fund balances, intergovernmental revenue, and other current revenue. In several instances, two or more governments share the expense of maintaining a court or a justice agency. In these cases, the allowable direct expenditure amount is reported for each government in the appropriate category.

When a government pays pensions directly to retired employees from appropriated funds, such payments are included as expenditure of the government concerned. However, State and local government contributions to retirement systems they operate are not included in expenditure data because many governments make lump-sum contributions to plans covering all government employees and cannot report separately for justice employees. Neither in governments' basic accounting records (from which criminal justice expenditure figures are drawn) nor in the records of their general-coverage employee benefit systems is there usually any breakdown of amounts contributed in terms of the various agencies or functions involved. Nor has an adequate procedure for calculating the proportion of such contributions allocable to justice employees been developed because of the wide variation in the coverage of various plans, employee status requirements, benefit rates, and so forth. Expenditure is divided into major categories by character and object as follows:

Direct expenditure--is all expenditure except that classified as intergovernmental and is further divided into two categories:

Direct current-includes salaries, wages, fees, commissions, and the purchase of supplies, materials, and contractual services.

Capital outlay-includes expenditure for the three object categories of construction, equipment, and purchase of land and existing structures.

Data are presented separately in the CJEE Extracts program for State construction of correctional institutions; the "other" category
in those tables includes equipment and the purchase of land and existing structures.

Construction--production of fixed works and structures as well as additions, replacements, and major alterations thereto undertaken either on a contract basis by private contractors or through force account construction by the employees of the government. Included are the planning and designing of specific projects; grading, landscaping, and other site improvement; and providing equipment and facilities that are integral parts of the structure.

Expenditure for interest on general debt, assistance and subsidies, and insurance benefits are not applied to specific functions because they are not ordinarily available on a functional basis from government financial reports. In instances where bonded or mortgaged general indebtedness is identified for specific purposes, the interest payments are aggregated with other interest expenditures, which makes reliable and consistent breakouts of such data over a long period of time impossible.

## Intergovernmental expendi-

 ture--comprises payments from one government to another, including grants-in-aid, shared revenues, fiscal assistance, and amounts for services performed by one government for another on a reimbursable or cost-sharing basis (for example, payments by one government to another for boarding prisoners). It excludes amounts paid to other governments for purchase of commodities, property, or utility services; any tax imposed and paid as such; and employer contributions for social insurance (for example, contributions to the Federal Government for old-age, survivors', disability, and health insurance and local government payments to State-operated retirement systems on behalf of their employees).Total expenditure-is direct and intergovernmental expenditure of a government or type of government. In the expenditure tables, certain totals have been adjusted to exclude duplicative intergovernmental expenditure amounts. For example, money paid by a State government to a county government within that State is reported by the State government as an intergovernmental expenditure and by the county government as a direct expenditure when the money is spent (for salaries, wages, equipment, and so forth). Therefore, to arrive at a combined State-local government total that does not duplicate these transactions, intergovernmental expenditure amounts are deducted from the State-local total because those amounts also are reflected in the direct expenditure of the recipient government. The same treatment is used for intergovernmental payments between counties and municipalities within the same State when
computing local totals. Totals reported for "all governments" also are adjusted to exclude duplicative intergovernmental expenditure involving the Federal Government.

## Governmental employment

Employment and employees refer to all persons gainfully employed by and performing services for a government. Employees include all persons paid for personal services performed, including persons paid from federally funded programs, paid elected officials, persons in a paid-leave status, and persons paid on a "per meeting," annual, semiannual, or quarterly basis. Unpaid officials, pensioners, persons whose work is performed on a fee basis, and contractors and their employees are excluded from the count of employees.

This definition includes two classes:
Full-time employees--include those persons whose hours of work represent full-time employment in their employer government during the pay period including October 12 for 1980-95. Generally, it includes full-time temporary or seasonal workers employed during that pay period. Beginning in 1997, the reference month changed from October to March.

Part-time employees--are those persons who work less than the standard number of hours for full-time work in their employer government and persons paid by more than one government.

Full-time equivalent employment-is a statistical measure that estimates the total workforce accounting for the less than full-time employment of part-time employees. Prior to 1986, the formula for computing full-time equivalent (FTE) employment was payroll-based; specifically, it was calculated by dividing the total payroll amount (full-time plus part-time) by the full-time payroll amount and multiplying the resulting quotient by the number of full-time employees. Beginning in 1986, it is computed by dividing the part-time hours paid by the standard number of hours for full-time employees in the particular government and then adding the resulting quotient to the number of full-time employees. In both formulae, the calculation is performed separately at the individual function type for each respondent government. Consequently, summaries by State, type of government, and function are aggregates of individual calculations.

The formula was changed because the previously used payroll-based formula necessarily assumed that there is little or no difference between average wage rates for full-time and part-time workers--however, this is seldom the case. Part-time pay scales are generally below those for full-time workers,
thus resulting in an understatement of full-time equivalent employment. The understatement was estimated at between $2.8 \%$ and $3.8 \%$ at the national level. The previously used payroll-based methodology may also produce a "trend bias" if the rate of change in part-time employment is different from that in full-time employment. Users should keep in mind the expected understatement of FTE in years prior to 1986 when making trend comparisons.

October/March payrolls--represent gross payrolls for the 1-month period of October or March and comprise the gross payroll before deductions. It includes all salaries, wages, fees, or commissions paid to employees during the pay period including October 12 for 1980-95. Beginning in 1997, the reference month changed from October to March. Payroll amounts reported for a period other than 1 month were converted to represent 1-month amounts.

## Governmental functions

General government functions include all activities other than those classed as public utilities (water supply, electric power, gas supply, and transit systems), liquor stores (dispensaries operated by 17 State governments and by local governments of 6 States, as of 1992), and insurance trust systems (no employment data are associated with insurance trusts). All government functions include the latter.

Justice--is the combined functions of police protection, judicial and legal services, and corrections as defined below. As noted below, it consistently includes civil justice functions as well as criminal justice functions where criminal functions cannot be segregated in available source documents.

Police protection--is the function of enforcing the law, preserving order and traffic safety, and apprehending those who violate the law, whether these activities are performed by a police department, a sheriffs' department, or a special police force maintained by an agency whose primary responsibility is outside the justice system but that has a police force to perform these activities in its specialized area (geographic or functional). This category includes: regular police services; police patrols and communications; crime prevention activities; temporary lockups and "holding tanks"; traffic safety and engineering (but not highway planning and engineering); vehicular inspection and licensing; buildings used exclusively for police purposes; the maintenance of buildings used for police purposes; medical examiners and coroners; law enforcement activities of sheriffs' offices; and unsworn school crossing guards, parking meter
readers, and animal wardens, if employed by a police agency.

Private security police are outside the scope of the survey.

The special police forces included in the data are only those that are part of a general purpose government. Special police forces that are part of independent school districts or special districts are not included in the data because these districts are not general purpose governments.

Police protection employment data are further divided between sworn employees, which represent persons with the power of arrest, and nonsworn employees, which are all others.

In most States, sheriffs' departments are multifunctional agencies providing police protection, judicial, and/or correctional services. In order to allocate expenditure and employment data to the proper activity, the data for sheriffs' departments are prorated, resulting in differences from other police reporting programs such as BJS's Law Enforcement Management and Administrative Statistics program and the FBI's Uniform Crime Reporting program, which report the numbers of employees in law enforcement agencies regardless of functions performed.

Short-term custody and detention are considered part of the police protection function. Data for lockups or "tanks" holding prisoners less than 48 hours are included in the police protection category. Data for institutions with authority to hold prisoners 48 hours or more are included in the corrections category.

## Judicial and legal services--

covers all civil and criminal activities associated with courts, including prosecution and public defense.

The "judicial and legal services" category in the CJEE Extracts series includes the following court functions covered as a separate category in the periodic CJEE Survey: civil and criminal functions of courts at all levels of legal jurisdiction-appellate (last resort and intermediate), general jurisdiction, and limited jurisdiction; activities associated with courts, such as law libraries, grand juries, petit juries, and medical and social service activities (except probation, which is classified as corrections where separately identifiable); court reporters, judicial councils, bailiffs, "register of wills," and similar probate functions; and court ("civil") activities of sheriffs' offices in some jurisdictions.

Also included in the "judicial and legal" category are all civil and criminal justice activities of prosecution and legal service agencies. It includes the following prosecution and legal service activities covered as a separate category in the periodic CJEE Survey: attorneys general, district attorneys, State's attorneys, and their variously named equivalents; corporation counsels, solicitors, and legal departments with various names including those providing legal advice to the chief executives and subordinate departmental officers, representation of the government in law suits and the prosecution of accused violators of criminal law; and various investigative agencies having full arrest powers and attached to offices of attorneys general, district attorneys, or their variously named equivalents.

These activities are included whether performed by one office or several because in some jurisdictions a single office provides all legal services, whereas in others a prosecutor's office handles only criminal matters and a separate attorney's office performs all civil legal services.

Also included in the "judicial and legal" category are the civil and criminal justice activities of public defenders, other agencies that provide legal counsel and representation in either criminal or civil proceedings, and other government programs that pay the fees of court-appointed counsel. It includes the following public defense activities covered as a separate category in the periodic CJEE Survey: court-paid fees to individually retained counsel; fees paid by the court to court-appointed counsel; government contributions to private legal aid societies and bar associationsponsored programs; and activities of an established public defender office or program.

This category excludes monetary judgments and claims or other payments of a government as a defendant in judicial or administrative proceedings, and legal units of noncriminal justice agencies, whose functions may be performed by a legal service department in other jurisdictions (such as a county counsel).

Corrections-is that function of government involving the confinement and rehabilitation of adults and juveniles convicted of offenses against the law and the confinement of persons suspected of a crime and awaiting adjudication.

Corrections direct expenditure for State governments is further divided into two subcategories: correctional institutions and other corrections.

Correctional institutions are any facilities for the confinement and correction of convicted adults or juveniles adjudicated delinquent or in need of supervision and for the detention of those adults and juveniles accused of a crime and awaiting trial or hearing. (Data for lockups or "tanks" holding prisoners less than 48 hours are included in the police protection category.)

Correctional institutions include: prisons and penitentiaries; reformatories; jails; houses of correction; other variously named correctional institutions, such as correctional farms, workhouses, industrial schools, and training schools; institutions and facilities exclusively for the confinement of the criminally insane; institutions and facilities for the examination, evaluation, classification, and assignment of inmates; and facilities for the confinement, treatment, and rehabilitation of drug addicts and alcoholics, if the institution is administered by a correctional agency.

When an institution maintains a prison industry or agricultural program, data on the cost of production or the value of prison labor used by agencies of the same government, if identifiable, are excluded (and classified as expenditure for the function using the product or services). Expenditure for the manufacture, production, sale, and distribution of goods produced for sale or use outside the government is included under this heading. It excludes the costs of maintaining prisoners in institutions of other governments, which are classified as an intergovernmental expenditure for which the "institutions" vs. "other corrections" distinctions are not applied.

Other corrections consists of all noninstitutional correctional activities including: parole boards and programs; pardon boards; nonresidential resettlement or halfway houses for those not in need of institutionalization; probation activities and programs, even if administered by a court; and correctional administration not directly connectable to institutions. Payments to another government for boarding prisoners are classified as "intergovernmental expenditure" for which the "institutions" and "other corrections" distinctions discussed above are not applied. In practice, intergovernmental payments of this type are difficult to detect for insignificant amounts between local government and for miscellaneous items that cannot be directly related to institutional care.

## Appendix 2

The Municipal Year Book 2004 Definitions of terms and survey response rates

Note: This information was excerpted from International City/County Management Association, The Municipal Year Book 2004 (Washington, DC: International City/County Management Association, 2004), pp. xi-xiii, $79,102,123$; and information provided by the International City/County Management Association. Non-substantive editorial adaptations have been made.

## Regions

Northeast--the New England and Mid-
Atlantic Divisions;
North Central--the East and West
North Central Divisions;
South--the South Atlantic, and the East and West South Central Divisions;

West--the Mountain and Pacific Coast Divisions.

## Geographic divisions

New England--Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont;

Mid-Atlantic--New Jersey, New York, and Pennsylvania;

East North Central--Illinois, Indiana, Michigan, Ohio, and Wisconsin;

West North Central--lowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota;

South Atlantic--Delaware, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, West Virginia, and the District of Columbia;

East South Central--Alabama, Kentucky, Mississippi, and Tennessee;

West South Central--Arkansas, Louisiana, Oklahoma, and Texas;

Mountain--Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, and Wyoming;

Pacific Coast--Alaska, California, Hawaii, Oregon, and Washington.

## Metro status

To be classified by the U.S. Office of Management and Budget (OMB) as a Metropolitan Statistical Area (MSA), an area must include either at least one city with a population of 50,000 or more or a U.S. Census Bureau-defined urbanized area of at least 50,000 and a total metropolitan population of at least 100,000 (75,000 in New England).

The OMB further groups metropolitan areas of $1,000,000$ or more population into consolidated metropolitan statistical areas (CMSAs) and primary metropolitan statistical areas (PMSAs).

Central cities--The core cities of an MSA having a population of at least 25,000 and meeting two commuting requirements: at least $50 \%$ of the employed residents of the city must work within the city and there must be at least 75 jobs for each 100 residents who are employed. Cities between 15,000 and 25,000 population may also be considered central cities if they are at least onethird the size of the MSA's largest city and meet the two commuting requirements.

Suburban cities--The other cities, towns, and incorporated places in an MSA.

Independent cities--The incorporated places not located within an MSA.

## County types

Metro--Counties located within an MSA.

Nonmetro--Counties located outside the boundaries of an MSA.

## Forms of government

Mayor-council--An elected council or board serves as the legislative body. The head of government is the chief elected official, who is generally elected separately from the council and has significant administrative authority.

Many cities with a mayor-council form of government have a city administrator who is appointed by the elected representatives (council) and/or the chief elected official, and who is responsible to the elected officials. Appointed city administrators in mayorcouncil governments have limited administrative authority--they often do not directly appoint department heads or other key city personnel and their responsibility for budget preparation and administration, although significant, is subordinate to that of the elected officials.

Council-manager--An elected council or board and chief elected official (e.g., the mayor) are responsible for making policy. A professional administrator appointed by the council or board has full responsibility for the day-to-day operations of the government.

Commission--An elected commission performs both legislative and executive functions, generally with departmental administration divided among the commissioners.

Town meeting--All qualified voters of a municipality meet to set policy and elect officials to carry out the policies they have established.

Representative town meeting--Voters select a large number of citizens to represent them at the town meeting(s). All citizens may attend and participate in the meeting(s), but only representatives may vote.

For counties, forms of government shown in table 1.71 relate to the structural organizations of the legislative and executive branches of counties. There are three basic forms of county government:

Commission--A governing board that shares the administrative and; to an extent, legislative responsibilities with several independently elected functional officials

Council-manager/administrator--An administrator is appointed by, and responsible to, the elected council to carry out directives.

Council-elected executive--Two branches of government: the executive and the legislative. The independently elected executive is considered the formal head of the county.
annual local governments surveys. In July 2003, paper surveys were mailed to all municipal and county governments with populations of 2,500 or more and to those under 2,500 that are recognized by ICMA as having a council-manager form of government or as providing for an appointed general management (chief administrative officer) position. The mail survey gave the Web site address for the online version and provided a unique identification number for each local government. After allowing time for local governments to respond, ICMA mailed a second paper survey to those that had not responded to the first mailing or had not submitted the online version.

## Survey format

This is the third year the International City/County Management Association (ICMA) has offered an online version of the

Table. Survey response rates for 2003

|  | Police and fire |  |  | Municipal officials |  |  | County officials |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## Appendix 3

Crime in the United States Definitions of terms

Note: The following information has been excerpted from U.S. Department of Justice, Federal Bureau of Investigation, Crime in the United States, 2002 (Washington, DC: USGPO, 2003), pp. 442-444, 448, 454-457. Non-substantive editorial adaptations have been made. See U.S. Department of Justice, Federal Bureau of Investigation, Uniform Crime Reporting Handbook (Washington, DC: USGPO, 1984) for further definitions and information on classification and counting rules.

## Population definitions

For purposes of statistical presentation, the cities and counties in the United States are divided into groups based on population size. The population group classifications used by the Uniform Crime Reporting (UCR) Program are shown in Table 1.

Table 1. Population group, political label, and population coverage

| Population group | Political label | Population coverage |
| :---: | :---: | :---: |
| I | City | 250,000 and over |
| II | City | 100,000 to 249,999 |
| III | City | 50,000 to 99,999 |
| IV | City | 25,000 to 49,999 |
| V | City | 10,000 to 24,999 |
| VI | City ${ }^{\text {a }}$ | Less than 10,000 |
| VIII <br> (Rural | County ${ }^{\text {b }}$ | NA |
| county) |  |  |
| IX (Suburban county) | County ${ }^{\text {b }}$ | NA |
| ${ }^{\text {a }}$ Includes universities and colleges to which no population is attributed. |  |  |
| ${ }^{\mathrm{b}}$ Includes State police to which no population is attributed. |  |  |

## Metropolitan Statistical Area

(MSA)--This includes a central city of at least 50,000 people or an urbanized area of at least 50,000. The county containing the central city and other contiguous counties having strong economic and social ties to the central city and county also are included. Counties in an MSA are designated "suburban" for UCR purposes. An MSA may cross State lines. Due to changes in the geographic composition of MSAs, no year-to-year comparisons of
data for those areas should be attempted. New England MSAs are comprised of cities and towns instead of counties. For purposes of tabular presentation, the UCR Program assigns New England cities and towns to the proper MSAs. Some counties, however, have both suburban and rural portions. Data for State police and sheriffs in those jurisdictions are included in statistics for the rural areas. MSAs made up approximately $80 \%$ of the total U.S. population in 2002.

Rural counties--Rural counties are those outside MSAs and are comprised of mostly unincorporated areas. Law enforcement agencies in rural counties cover areas that are not under the jurisdiction of city police departments. Rural county law enforcement agencies served $12 \%$ of the national population in 2002.

Suburban areas--These areas consist of cities with populations of less than 50,000 as well as unincorporated areas within an MSA, and exclude central cities. Suburban areas can, therefore, be divided into suburban cities and suburban counties.

Other cities--Other cities are urban places outside MSAs; most of these areas are incorporated. These cities comprised 8\% of the 2002 national population.

As a general rule, sheriffs, county police, and State police report on crimes committed within the limits of counties, but outside cities; local police report on crimes committed within city limits.

The major source of UCR data is the individual law enforcement agency. The number of agencies included in each population group will vary slightly from year to year due to population growth, geopolitical consolidation, municipal incorporation, etc. Each year, population figures for individual jurisdictions are estimated by the UCR Program. For the 2002 edition of Crime in the United States, the UCR Program obtained current population estimates from the U.S. Census Bureau to estimate 2002 population counts for all contributing law enforcement agencies. The Census Bureau provided revised 2001 State and national population estimates and provisional 2002 State and national population estimates. Using these census data, the national UCR Program updated the 2001 Census Bureau city and county estimates and calculated the 2002 State growth rates. The UCR Program updated population figures for individual jurisdictions by applying the 2002 State growth rates to the updated 2001 Census Bureau data.

Table 2. Population group and number of contributing agencies

| Population group | Number of <br> agencies |
| :--- | :---: |
| I | 71 |
| II | 171 |
| III | 423 |
| IV | 803 |
| V | 1,867 |
| VI | $8,735^{\mathrm{a}}$ |
| VIII (Rural county) | $3,437^{\mathrm{b}}$ |
| IX (Suburban county) | $1,817^{\mathrm{b}}$ |
| Total |  |

${ }^{\text {a }}$ includes universities and colleges to which no population is attributed.
${ }^{\text {b }}$ Includes State police to which no population is attributed.

## Regions and divisions

The United States is divided into four regions; these regions are further divided into nine divisions. The following is a list of States within divisions and regions.

## Northeast:

New England--Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont.

Middle Atlantic--New Jersey, New York, Pennsylvania.

## Midwest

East North Central--Illinois, Indiana, Michigan, Ohio, Wisconsin.

West North Central--Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota.

## South:

South Atlantic--Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, West Virginia.

East South Central--Alabama, Kentucky, Mississippi, Tennessee.

West South Central--Arkansas, Louisiana, Oklahoma, Texas.

## West:

Mountain--Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, Wyoming.

Pacific--Alaska, California, Hawaii, Oregon, Washington.

## The Crime Index, Part I, and Part II offenses

## The Crime Index

The following offenses and attempts to commit these offenses are used in compiling the Crime Index: (1) murder and nonnegligent manslaughter, (2) forcible rape, (3) robbery, (4) aggravated assault, (5) burglary,
(6) larceny-theft, (7) motor vehicle theft, and (8) arson. Arson was added as the eighth index offense in October 1978. (Manslaughter by negligence and simple or minor assaults are not included in the Crime Index.) Offenses in the UCR Program are divided into two groups, Part I and Part II. Information on the volume of Part I offenses known to law enforcement, those cleared by arrest or exceptional means, and the number of persons arrested is reported monthly. Only arrest data are reported for Part ll offenses.

## Part I offenses

Criminal homicide--a. Murder and nonnegligent manslaughter: the wilful (nonnegligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, accidental deaths, and justifiable homicides are excluded. Justifiable homicides are limited to: (1) the killing of a felon by a law enforcement officer in the line of duty and (2) the killing of a felon, during commission of a felony, by a private citizen. b. Manslaughter by negligence: the killing of another person through gross negligence. Traffic fatalities are excluded. While manslaughter by negligence is a Part I crime, it is not included in the Crime Index.

Forcible rape--The carnal knowledge of a female forcibly and against her will. Included are rapes by force and attempts or assaults to rape. Statutory offenses (no force used--victim under age of consent) are excluded.

Robbery-The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Aggravated assault--An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assautts are excluded.

Burglary--breaking or entering--
The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

Larceny-theft (except motor vehicle theft)--The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles or automobile accessories, shoplifting, pocket-picking, or the stealing of any property or article that is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, "con" games, forgery, worthless checks, etc., are excluded.

Motor vehicle theft-The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on the surface and not on rails. Specifically excluded from this category are motorboats, construction equipment, airplanes, and farming equipment.

Arson--Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

## Part II offenses

Other assaults (simple)--Assaults and attempted assaults where no weapon is used and that do not result in serious or aggravated injury to the victim.

Forgery and counterfeiting--Making, altering, uttering, or possessing, with intent to defraud, anything false in the semblance of that which is true. Attempts are included.

Fraud--Fraudulent conversion and obtaining money or property by false pretenses. Included are confidence games and bad checks, except forgeries and counterfeiting.

Embezzlement--Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

Stolen property; buying, receiving, possessing--Buying, receiving, and possessing stolen property, including attempts.

Vandalism--Wilful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or persons having custody or control. Attempts are included.

Weapons; carrying, possessing, etc.--All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Attempts are included.

Prostitution and commercialized vice--Sex offenses of a commercialized nature, such as prostitution, keeping a bawdy house, and procuring or transporting women for immoral purposes. Attempts are included.

Sex offenses (except forcible rape, prostitution, and commercialized vice)-Statutory rape and offenses against chastity, common decency, morals, and the like. Attempts are included.

Drug abuse violations--State and local offenses relating to the unlawful possession, sale, use, growing, and manufacturing of narcotic drugs. The following drug categories are specified: opium or cocaine and their derivatives (morphine, heroin, codeine); marijuana; synthetic narcotics--manufactured narcotics that can cause addiction (demerol, methadone); and dangerous non-narcotic drugs (barbiturates, benzedrine).

Gambling--Promoting, permitting, or engaging in illegal gambling.

Offenses against the family and children--Nonsupport, neglect, desertion, 0 abuse of family and children. Attempts are included.

Driving under the influence--Driving or operating any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

Liquor laws--State or local liquor law violations, except "drunkenness" and "driving under the influence." Federal violations are excluded.

Drunkenness--Offenses relating to drunkenness or intoxication. Excluded is "driving under the influence."

Disorderly conduct--Breach of the peace.

Vagrancy--Begging, loitering, etc. Includes prosecutions under the charge of suspicious person.

All other offenses--All violations of State or local laws, except those listed above and traffic offenses.

Suspicion--No specific offense; suspect released without formal charges being placed.

Curfew and loitering laws (persons under age 18)--Offenses relating to violations of local curfew or loitering ordinances where such laws exist.

Runaways (persons under age 18)--Limited to juveniles taken into protective custody under provisions of local statutes.

## Offense estimation

Not all law enforcement agencies provide data for complete reporting periods. The UCR Program generates estimated crime counts for agencies with incomplete reporting. These estimated counts are used to generate offense totals for Metropolitan Statistical Areas (MSAs), cities outside MSAs, and rural counties. Using the known crime experiences of similar areas within a State, the national UCR Program computes estimates by assigning the same proportional crime volumes to nonreporting agencies. The size of agency; type of jurisdiction, e.g., police department versus sheriff's office; and geographic location are considered in the estimation process.

Various circumstances require the national Program to estimate certain State offense totals. For example, some States do not provide forcible rape figures in accordance with UCR guidelines; reporting problems at the State level have, at times, resulted in little or no usable data; and the conversion of summary reporting to National Incident-Based Reporting System (NIBRS) has contributed to the need for unique estimation procedures.

The Illinois (1985 to 2002), Michigan (1993) and Minnesota (1993) State UCR Program. were unable to provide forcible rape figures in accordance with UCR guidelines. The rape
totals were estimated using national rates per 100,000 inhabitants within the eight population groups and assigning the forcible rape volumes proportionally to each State. The Delaware State UCR program was unable to provide 1998 forcible rape figures in accordance with UCR guidelines; the 1998 forcible rape total was estimated by reducing the number of reported offenses by the proportion of male forcible rape victims statewide.

In recent years, a number of States have been involved in the NIBRS conversion process. During the conversion process, little or no data were available from law enforcement agencies in these States. The following is a summary of States providing either incomplete data or no data for certain years, either due to NIBRS conversion or due to other reporting problems:

1988: Florida, Kentucky
1991: lowa
1993: Illinois, Kansas
1994: Illinois, Kansas, Montana
1995: lilinois, Kansas, Montana
1996: Florida, llinois, Kansas, Kentucky, Montana
1997: Illinois, Kansas, Kentucky, Montana, New Hampshire, Vermont
1998: Illinois, Kansas, Kentucky, Montana, New Hampshire, Wisconsin
1999: Illinois, Kansas, Kentucky, Maine, Montana, New Hampshire
2000: Illinois, Kansas, Kentucky, Montana
2001: Illinois, Kentucky
2002: Illinois, Kentucky
State totals were estimated using procedures based on data availability specific to each State, and the population group and geographic division to which the State belongs.

Table 3. Total U.S. population, $1960-2002^{\text {a }}$

|  | Population |
| :--- | :--- |
| 1960 | $179,323,175$ |
| 1961 | $182,992,000$ |
| 1962 | $185,771,000$ |
| 1963 | $188,483,000$ |
| 1964 | $191,141,000$ |

1966 195,576,000
1967 197,457,000
1968 199,399,000
1969 201,385,000
1970 203,235,298
1971 206,212,000
1972 208,230,000
1973 . 209,851,000
1974 211,392,000
1975 213,124,000
1976 214,659,000
1977 216,332,000
1978 218,059,000
1979 220,099,000
$1980 \quad$ 225,349,264
$1981 \quad 229,146,000$
1982 231,534,000
1983 233,981,000
1984 236,158,000
1985 238,740,000
1986 241,077,000
1987 243,400,000
$1988 \quad 245,807,000$
1989 248,239,000
1990 248,709,873
1991 252,177,000
1992 255,082,000
1993 257,908,000
1994 260,341,000
1995 262,755,000
1996 265,284,000
1997 267,637,000
1998 270,296,000
1999 272,691,000
2000 281,421,906
2001 284,796,887
2002 288,368,698
${ }^{2}$ Population figures are U.S. Census Bureau provisional estimates as of July 1 for each year except 1960, 1970, 1980, 1990, and 2000, which are the decennial census counts.

## Appendix 4

Census of Jails, Annual Survey of Jails, and Survey of Inmates in Local Jails Methodology and survey sampling procedures

Note: The following information was excerpted from U.S. Department of Justice, Bureau of Justice Statistics, Prison and Jail Inmates at Midyear 2003, Bulletin NCJ 203947 (Washington, DC: U.S. Department of Justice, May 2004), pp. 11, 12; Census of Jails, 1999, NCJ 186633 (Washington, DC: U.S. Department of Justice, 2001), p. 11; Profile of Jail Inmates, 2002, Special Report NCJ 201932 (Washington, DC: U.S. Department of Justice, July 2004), pp. 11, 12; Jails and Jail Inmates 1993-94, Bulletin NCJ-151651 (Washington, DC: U.S. Department of Justice, April 1995), pp. 14-16; and information provided by the U.S. Department of Justice, Bureau of Justice Statistics. Non-substantive editorial adaptations have been made.

## Methodology

## Census of Jails

The Census of Jails, previously known as the National Jail Census, is taken every 5 to 6 years and is conducted for the U.S. Department of Justice, Bureau of Justice Statistics (BJS) by the U.S. Census Bureau. Data are presented for censuses conducted in 1983, 1988, 1993, and 1999. Questionnaires were mailed to all locally administered jails in the Nation. The number of jails included in the three previous censuses and the response rates are: 1983, 3,358 jails with $99 \%$ responding; 1988, 3,316 jails with $100 \%$ responding; and $1993,3,304$ jails with $90 \%$ responding.

The most recent census, conducted in 1999, included all locally administered confinement facilities that hold inmates beyond arraignment (usually more than 72 hours) and are staffed by municipal or county employees. The census also included 47 jails that were privately operated under contract to local governments, 42 regional jails, and 11 facilities maintained by the Federal Bureau of Prisons and functioning as jails.

Excluded from the census were physically separate temporary holding facilities, such as drunk tanks and police lockups, that do not hold persons after being formally charged in court (usually within 72 hours of
arrest). Also excluded were State-operated facilities in Alaska, Connecticut, Delaware, Hawaii, Rhode Island, and Vermont, which have combined jail-prison systems. However, 15 independently operated jails in Alaska were included.

The mailout used for the census was derived from a facility list maintained by the U.S. Census Bureau for BJS, correctional association directories, and other secondary sources. Census questionnaires were mailed to 3,160 jail jurisdictions on June 25, 1999. In addition to a paper form, BJS offered respondents in large jurisdictions an electronic version via the Internet, which allowed them to complete and submit their questionnaire online. Six jurisdictions were added to the initial mailout, and 82 were deleted, resulting in a total of 3,084 jail jurisdictions.

Extensive followup, in the form of mail and fax reminders and repeated telephone contacts, resulted in a nearly $100 \%$ response rate for the following critical data items: sex of inmates held; number of inmates on June 30, 1999; male and female inmates under age 18; male and female inmates age 18 and older; jail rated capacity; number of jail deaths during the preceding 12 months; and total number of staff.

Of the 3,084 jurisdictions in the final universe, 251 provided information on critical data items only. Data from six jurisdictions that did not respond to any items on the questionnaire were imputed based on previous survey and census reports.

## Estimation procedures

Because there was nonresponse and incomplete data on census items other than the seven critical items, national totals had to be estimated. The following procedures were used to estimate totals when data were incomplete:

1. Each item was assessed for coverage and internal consistency. To estimate totals, extreme values were examined and verified by checking other census information and originally submitted forms. Detailed categories also were checked to determine if they summed to the reported totals.
2. To provide national and State total estimates of staff, item values were summed and then multiplied by a nonresponse adjustment factor (NAF). The NAF was a ratio of the total number of inmates in all jails to the number of inmates in jails that reported valid staff data.
3. All estimates were rounded to the nearest 100.
4. All rates, ratios, and percentage distributions were based on reported data only.

## Annual Survey of Jails

In each of the years between the full censuses, a sample survey of jails is conducted to estimate baseline characteristics of the Nation's jails and inmates housed in the jails. Data from the Annual Survey of Jails are presented for 1984-87, 1989-92, 1994-98, and 2000-2003. The reference date for each of these surveys was June 30, except 1990 and 2001 when the reference date was June 29, and 1991 and 1996 when it was June 28. All surveys prior to the 1994 survey were based on all jails in jurisdictions with 100 or more jail inmates and a stratified random sample of jurisdictions with an average daily population of less than 100 inmates. For 1984, 1,164 jails in 893 jurisdictions were included; in 1985, 1,142 jails in 874 jurisdictions were included; in 1986, 1,137 jails in 868 jurisdictions were included; in 1987, 1,135 jails in 866 jurisdictions were included; in 1989, 1, 128 jails in 809 jurisdictions were included; in 1990, 1,135 jails in 804 jurisdictions were included; in 1991, 1,124 jails in 799 jurisdictions were included; and in 1992, 1,113 jails in 795 jurisdictions were included.

A new sample of jail jurisdictions was selected for the 1994-98 surveys using information from the 1993 Census of Jails. A new samp was again selected and used for the 200 d 2003 surveys based on information from the 1999 Census of Jails. A jurisdiction is a county (parish in Louisiana) or municipal government that administers one or more local jails. The sample included all 940 jail facilities in 878 jurisdictions. All 55 multijurisdiction jails (jails operated jointly by two or more jurisdictions) were selected with certainty.

Jails in 356 other jurisdictions were automatically included in the sample if the jail held juveniles and had an average daily population of 250 or more inmates on June 30, 1999 or if they held only adults and had an average daily population of 500 or more.

The remaining jurisdictions were stratified into two groups: jurisdictions with jails holding at least one juvenile on June 30, 1999, and jurisdictions with jails holding adults only. Using stratified probability sampling, 467 jurisdictions were then selected from 10 strata based on the average daily population in the 1999 jail census.

Data were obtained by mailed and web-based survey questionnaires. After followup phone calls, the response rate for the 2003 survey was $100 \%$ for critical items such as rated capacity, average daily population, and number of inmates confined.

## Sampling error

Survey estimates have an associated sampling error because jurisdictions with smaller average daily populations were sampled for the survey. Estimates based on the sample survey may differ from the results of conducting a complete census. Different samples could yield somewhat different results. Standard error is a measure of the variation among the estimates from all possible samples, stating the precision with which an estimate from a particular sample approximates the average of all possible samples. The estimated relative sampling error for the total number of persons held in the custody of jail authorities of 691,301 , was $0.51 \%$. Readers interested in standard error estimates should consult the Source (Source, Prison and Jail Inmates at Midyear 2003, p. 14).

## Measures of population

Two measures of jail inmate population are used: the average daily population for the year ending June 30 and the inmate count on June 30 of each year. The average daily population balances out any extraordinary events that may render atypical the inmate count on June 30 . The June 30 count provides data on characteristics of inmates, such as race, Hispanic origin, and age, that may not be available on an annual basis.

In 1995 the Annual Survey of Jails obtained, for the first time, separate counts of the total number of offenders under jail jurisdiction, those held in jail facilities, and those supervised outside of jail facilities. Previous surveys and censuses included a small but unknown number of offenders under community supervision. To estimate the percent change from 1994 to 1995 in the jail population, the 1995 survey included a count of inmates held at midyear 1994.

In the 1996 survey the number of persons supervised outside a jail facility included for the first time persons under drug, alcohol, mental health, or other medical treatment. Comparison with 1995 estimates should exclude these persons.

## Juveniles

In annual jail surveys beginning in 1994 and in the 1999 jail census, jail authorities were asked to report the number of inmates under age 18. Of the 9,458 persons under age 18 being held in jail on June 30, 1999, $91 \%$ were identified as juveniles tried or scheduled to be tried as adults.

Most, but not all, States defined a juvenile as a person under age 18 who is subject to juvenile court jurisdiction. Exceptions usually depend on offense severity or an offender's adjudication history.

Statutes and judicial practices sometimes allow youths to be held in adult jails. Often juveniles accused of acts that are crimes for adults may be held in jails or police lockups, given certain conditions: separation by sight and sound from the general population and detention for a limited time (typically less than 6 hours).

## Survey of Inmates in Local Jails

The 2002 Survey of Inmates in Local Jails was conducted for BJS by the U.S. Census Bureau. Similar surveys of jail inmates were conducted in 1972, 1978, 1983, 1989, and 1996. Interviews for the 2002 survey were conducted from January through April 2002.

## Sample design

The sample for the 2002 survey was selected from a universe of 3,365 jails that were enumerated in the 1999 Census of Jails. The sample design was a stratified two-stage selection where jails were selected in the first stage and inmates to be interviewed were selected in the second stage. In the first stage, six separate strata were formed based on the size of the male, female, and juvenile populations. In two strata all jails were selected--those jails housing only females and those with more than 1,000 males or more than 50 females or both. In the remaining four strata a systematic sample of jails was selected. Each jail within a stratum had an equal probability of selection. Overall, 465 jails were selected. Interviews were conducted in 417; 39 jails refused or were excluded for administrative reasons, and 9 were closed or had no inmates to survey.

In the second sampling stage, interviewers from the U.S. Census Bureau visited each selected facility and systematically selected a sample of male and female inmates using predetermined procedures. A total of 6,982 inmates were interviewed, and 768 refused to participate, for a second stage nonresponse of $9.9 \%$.

Interviews were about 1 hour long and used computer-assisted personal interviewing (CAPI). With CAPI, computers provide the interviewer questions, including followup questions tailored to preceding answers. Before the interview, inmates were told verbally and in writing that participation was voluntary and that all information provided would be held in confidence.

Based on the completed interviews, estimates for the entire jail population were developed using weighting factors derived from the original probability of selection in the sample. These factors were adjusted for variable rates of nonresponse across strata and inmate characteristics. Further adjustments were made to conform the survey estimates to counts of jail inmates obtained from the 1999 Census of Jails and the 2001 Annual Survey of Jails.

## Accuracy of the survey estimates

The accuracy of the estimates from the 2002 Survey of Inmates in Local Jails depends on two types of error: sampling and measurement. Sampling error is variation that occurs by chance because a sample rather than a complete enumeration of the population was conducted. Sampling error is measured by estimated standard error and varies by the size of the estimate and the size of the base population. Measurement error can be attributed to many sources, such as nonresponse, differences in the interpretation of questions among inmates, recall difficulties, and data processing errors. In any survey the full extent of the measurement error is never known.

## Appendix 5

## Public opinion survey sampling procedures

Note: The sampling procedures of six public opinion surveys or survey organizations are presented in this appendix: The Gallup Poll, the Phi Delta Kappa/Gallup Education Poll, the Harris Poll, the National Opinion Research Center, The Pew Research Center for the People \& the Press, and the Youth Risk Behavior Surveillance System.

## GALLUP POLL

Information on The Gallup Organization's survey sampling procedures was excerpted from The Gallup Organization, Inc. [Online]. Available: http://www.gallup.com [Dec. 1, 2004]. Non-substantive editorial adaptations have been made.

The Gallup Organization's public opinion polling methods are based on the fundamental sampling principle of equal probability of selection. This principle states that if every member of a population has an equal probability of being selected into a sample, the sample will be representative of the population.

Gallup polls prior to the mid-1980s were based on in-person interviewing among a national probability sample of interviewing areas throughout the United States. Readers interested in a discussion of the survey methodology and sampling for the in-person interviews should consult previous editions of SOURCEBOOK. By 1986, a sufficient proportion of American households had at least one telephone, making telephone interviewing a viable and substantially less expensive alternative to the in-person method.

For most Gallup polls (with the exception of specialized polls), the target population is referred to as "national adults." Specifically, the target population is the civilian, noninstitutionalized population, age 18 and older, living in households with telephones within the continental United States. College students living on campus, armed forces personnel living on military bases, prisoners, hospital patients, and others living in group institutions are not represented in Gallup's sampling frame.

The sampling methodology involves random generation of phone numbers derived from a listing of all household telephone numbers in the continental United States. This process starts with a computerized list of all tele-
phone exchanges in the U.S. and estimates of the number of residential households for each exchange. The random digit dialing (RDD) procedure creates computergenerated phone numbers for each exchange and generates samples of telephone numbers from those lists. In essence, this procedure creates a list of all possible household phone numbers in the U.S. and then selects a subset of numbers from that list for inclusion in the sample. The RDD procedure is utilized to avoid bias from exclusion of unlisted residential phone numbers.

The typical sample size for Gallup polls designed to represent the national adult population is 1,000 respondents. There is some gain in sampling accuracy resulting from increasing sample sizes. However, once the survey sample reaches a certain threshold (i.e., 600-700), there are fewer and fewer accuracy gains derived from increasing the sample size. Gallup polls and other major polling organizations use sample sizes between 1,000 and 1,500 because they provide a solid balance of accuracy against the increased economic cost of larger samples. With a sample size of 1,000 national adults, (derived using careful random selection procedures), the results are estimated to be accurate within a margin of error of plus or minus 3 percentage points.

Systematic procedures are in place to maintain the integrity of the sample. If there is no answer or the line is busy, the number is stored in the computer and redialed a few hours later or on subsequent nights of the survey period. Procedures are utilized to assure that the within-household selection process is random in households that include more than one adult. One method involves asking for the adult with the latest birthday; if that adult is not home the number is stored for a call back. These procedures are standard methods for reducing the sample bias that would otherwise result from underrepresentation of persons who are difficult to find at home.

Most interviews are conducted by telephone from regional interviewing centers around the country. Trained interviewers use computer assisted telephone interviewing (CATI) technology, which displays the survey questions on a computer monitor and allows questionnaires to be tailored to specific responses given by the individual being interviewed. In most polls, once interviewing has been completed, the data are carefully checked and weighted before analysis begins. The weighting process is a statistical procedure by which the sample is checked against known population parameters to correct for any possible sampling biases on the basis of demographic variables such as age, gender, race, education, or region of the country.

For certain survey items, Gallup uses a split sample technique to measure the impact of different question wordings. One-half (approximately 500 respondents) of a g sample is randomly selected and is administered one wording of a question, while the other half is administered another wording. This allows Gallup to compare the impact of differences in question wording.

The four regions of the country as reported in Gallup public opinion survey results are:

East--Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Maryland, Delaware, West Virginia, District of Columbia;

Midwest--Ohio, Michigan, Indiana, Illinois, Wisconsin, Minnesota, lowa, Missouri, North Dakota, South Dakota, Nebraska, Kansas;

South--Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, Texas; and

West--Montana, Arizona, Colorado, Idaho, Wyoming, Utah, Nevada, New Mexico, California, Oregon, Washington, Hawaii, Alaska.

Urbanization--Central cities have populations of 50,000 and above. Suburbs constitute the fringe and inciude populations of 2,500 to 49,999 . Rural areas are thos that have populations of under 2,500 .

Race, ethnicity--Nonwhite is comprised of individuals who report themselves as any combination of the following classifications: Hispanic, American Indian, other Indian, Asian, and black. Black and Hispanic are subcategories of nonwhite. However, due to variation in respondent reporting, the category white may also include some Hispanics.

## Sampling error

All sample surveys are subject to sampling error, that is, the extent to which the results may differ from those that would be obtained if the entire population surveyed had been interviewed. The size of sampling errors depends largely on the number of interviews.

The following table may be used in estimating sampling error. The computed allowances have taken into account the effect of the sample design upon sampling error. They may be interpreted as indicating the range (plus or minus the figure shown) within which the results of repeated samplings in the same time period could be expected to vary, $95 \%$ of the time, assuming the samesampling procedure, the same interviewe and the same questionnaire.

Recommended allowance for sampling error (plus or minus) at $95 \%$ confidence level

## Percent-

| ages | Sample size |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | ---: | :---: |
| near | 1,000 | 750 | 600 | 400 | 200 | 100 |  |
| 10 | 2 | 3 | 3 | 4 | 5 | 7 |  |
| 20 | 3 | 4 | 4 | 5 | 7 | 9 |  |
| 30 | 4 | 4 | 4 | 6 | 8 | 10 |  |
| 40 | 4 | 4 | 5 | 6 | 8 | 11 |  |
| 50 | 4 | 4 | 5 | 6 | 8 | 11 |  |
| 60 | 4 | 4 | 5 | 6 | 8 | 11 |  |
| 70 | 4 | 4 | 4 | 6 | 8 | 10 |  |
| 80 | 3 | 4 | 4 | 5 | 7 | 9 |  |
| 90 | 2 | 3 | 3 | 4 | 5 | 7 |  |

The table would be used in the following manner: Assume a reported percentage is 33 for a group that includes 1,000 respondents. Proceed to row "Percentages near 30" in the table and then to the column headed,
" 1,000 ." The figure in this cell is four, which means that at the $95 \%$ confidence level, the $33 \%$ result obtained in the sample is subject to a sampling error of plus or minus four points.

## PHI DELTA KAPPA/GALLUP POLL

Information on the Phi Delta Kappa/Gallup Poll was excerpted from George Gallup, Jr., The Gallup Report, Report No. 276, p. 41; and Report No. 288, p. 41 (Princeton, NJ: The Gallup Poll); Stanley M. Elam, "The 22nd Annual Gallup Poll of the Public's Attitudes Toward the Public Schools," Phi Delta
Kappan (September 1990), p. 54; Stanley M. Elam, Lowell C. Rose, and Alec M.

Gallup, "The 23rd Annual Gallup Poll of the Public's Attitudes Toward the Public Schools," Phi Delta Kappan (September 1991), p. 56; "The 24th Annual Gallup/Phi Delta Kappa Poll of the Public's Attitudes Toward the Public Schools," Phi Delta Kappan (September 1992), p. 52; "The 25th Annual Phi Delta Kappa/Gallup Poll of the Public's Attitudes Toward the Public
Schools," Phi Delta Kappan (October 1993), p. 152; "The 26th Annual Phi Delta Kappa/Gallup Poll of the Public's Attitudes Toward the Public Schools," Phi Delta Kappan (September 1994), p. 56; Stanley M. Elam and Lowell C. Rose, "The 27th Annual Phi Delta Kappa/Gallup Poll of the Public's Attitudes Toward the Public Schools," Phi
Delta Kappan (September 1995), p. 56; Stanley M. Elam, Lowell C. Rose, and Alec M. Gallup, "The 28th Annual Phi Delta Kappa/Gallup Poll of the Public's Attitudes Toward the Public Schools," Phi Delta Kappan (September 1996), p. 58; Lowell C. Rose, Alec M. Gallup, and Stanley M. Elam, "The 29th Annual Phi Delta Kappa/ Gallup Poll of the Public's Attitudes Toward the Public Schools," Phi Delta Kappa [Online]. Available: http://www.pdkintl.org/ kappan/kpol197.htm [Dec. 31, 1997]; Lowell C. Rose and Alec M. Gallup, "The 30th Annual Phi Delta Kappa/Gallup Poll of the

Public's Attitudes Toward the Public Schools," Phi Delta Kappa [Online]. Available: http://www.pdkintl.org/kappan/ kp9809-a.htm [Jan. 5, 1999]; Lowell C. Rose and Alec M. Gallup, "The 31st Annual Phi Delta Kappa/Gallup Poll of the Public's Attitudes Toward the Public Schools," Phi Delta Kappan (September 1999), pp. 55, 56; "The 32nd Annual Phi Delta Kappa/Gallup Poll of the Public's Attitudes Toward the Public Schools," Phi Delta Kappan (September 2000), pp. 57, 58; "The 33rd Annual Phi Delta Kappa/Gallup Poll of the Public's Attitudes Toward the Public Schools," Phi Delta Kappan (September 2001), pp. 57, 58; "The 34th Annual Phi Delta Kappa/Gallup Poll of the Public's Attitudes Toward the Public Schools," Phi Delta Kappan (September 2002), pp. 56, 57; and "The 35th Annual Phi Delta Kappa/Gallup Poll of the Public's Attitudes Toward the Public Schools," Phi Delta Kappan (September 2003), p. 52.

The Phi Delta Kappa/Gallup polls are modified probability samples of adults, 18 years of age and older, living in the United States.

Sample sizes and survey dates for Phi Delta Kappa/Gallup polls

|  | Sample <br> size | Survey <br> dates |
| :--- | :---: | :--- |
| 1988 | NA | Apr. 8-10 |
| 1989 | NA | May 5-7; June 9-11 |
| 1990 | 1,594 | Apr. 6-18; May 4-22 |
| 1991 | 1,500 | May 3-17 |
| 1992 | 1,306 | Apr. 23-May 14 |
| 1993 | 1,306 | May 21-June 9 |
| 1994 | 1,326 | May 10-June 8 |
| 1995 | 1,311 | May 25-June 15 |
| 1996 | 1,329 | May 2-22 |
| 1997 | 1,517 | June 3-22 |
| 1998 | 1,151 | June 5-23 |
| 1999 | 1,103 | May 18-June 11 |
| 2000 | 1,093 | June 5-29 |
| 2001 | 1,108 | May 23-June 6 |
| 2002 | 1,000 | June 5-26 |
| 2003 | 1,011 | May 28-June 18 |

Prior to the 1993 survey, data collection was done through personal, in-home interviewing of the civilian population (excluding persons in institutions such as prisons and hospitals). Beginning with the 1993 survey, the data col lection design utilized the Gallup Organization's standard national telephone sample, i.e., an unclustered, directory-assisted, random-digit telephone sample, based on a proportionate stratified sampling design. Random-digit samples are used to avoid listing bias. Numerous studies have shown that households with unlisted telephone numbers are different in important ways from listed households. "Unlistedness" is due to household mobility or to customer requests to prevent publication of the telephone number. To avoid this source of bias, a random-digit procedure designed to provide representation of
both listed and unlisted (including not-yetlisted) numbers was used.

Telephone numbers for the continental United States were stratified into four regions of the country and, within each region, further stratified into three size-of-community strata. Only working banks of telephone numbers were selected. Eliminating nonworking banks from the sample increased the likelihood that any sample telephone number would be associated with a residence. This method generates a sample of telephone numbers that is representative of all telephone households within the continental United States.

Within each contacted household, an interview was sought with the household member who had the most recent birthday. This method of respondent selection provides an excellent approximation of statistical randomness in that it gives all members of the household an opportunity to be selected.

Up to three calls were made to each selected telephone number to complete an interview. The time of day and the day of the week for callbacks were varied so as to maximize the chances of finding a respondent at home. All intenviews were conducted on weekends or weekday evenings in order to contact potential respondents among the working population.

The final sample was weighted so that the distribution of the sample matched current estimates from the U.S. Census Bureau's Current Population Survey for the adult population living in telephone households in the continental United States.

For further information on the survey sampling procedures see Lowell C. Rose and Alec M. Gallup, "The 35th Annual Phi Delta Kappa/Gallup Poll of the Public's Attitudes Toward the Public Schools," Phi Delta Kappan (September 2003), p. 52.

## HARRIS POLL

Information on the Harris Poll survey sampling procedures was provided to SOURCEBOOK staff by Harris Interactive, Inc., formerly Louis Harris and Associates, Inc.; similar procedures used in earlier surveys are described in Louis Harris and Associates,
Inc., The Harris Yearbook of Public Opinion 1970: A Compendium of Current American Attitudes (New York: Louis Harris and Associates, Inc., 1971), pp. 511-514.

Harris Poll surveys are based on a national sample of the civilian population of the continental United States. Alaska and Hawaii are not represented in the sample, nor are persons in prisons, hospitals, or religious and educational institutions. The sample is based
on census information on the population of each State in the country, and on the population living in standard metropolitan areas and in the rest of the country. These population figures are updated by intercensal estimates produced annually by the U.S. Census Bureau, and sample locations are selected biennially to reflect changes in the country's demographic profile.

National samples are stratified in two dimensions--geographic region and metropolitan (and non-metropolitan) residence. Stratification insures that the samples will reflect, within $1 \%$, the actual proportions of those living in the country in different regions and metropolitan (and non-metropolitan) areas. Within each stratum the selection of the ultimate sampling unit is achieved through a series of steps, a process that is technically called multi-stage unclustered sampling. Each sampling unit yields one interview. First States, then counties, and then minor civil divisions (cities, towns, townships) are selected with probability proportional to census estimates of their respective household populations.

The Harris Poll survey has four of these national samples, and they are used in rotation from study to study. The specific sample locations in one study generally are adjacent to those used in the next study. For most surveys covering the entire country, more than one national sample may be employed. Harris Poll surveys of nationwide samples usually include approximately 1,250 respondents.

All interviews prior to 1978 were conducted in person, in the homes of respondents. At each household the respondent was chosen by means of a random selection pattern, geared to the number of adults of each sex who live in the household. Interviews lasted approximately 1 hour. Almost all interviews conducted as of 1978 have been telephone interviews. Respondents are selected on the basis of random digit dialing. When the completed interviews are received in New York, a subsample of the respondents are recontacted to verify that the data have been accurately recorded. Questionnaires are edited and coded in the New York office. The Harris sampling procedure is designed to produce a national cross-section that accurately reflects the actual population of the country 18 years of age and older living in private households. This means that the results of a survey among a national sample can be projected as representative of the country's civilian population 18 years of age and older.

Harris Poll survey national results are reported for the East, Midwest, South, and West regions of the country, defined as follows:

East--Maine, New Hampshire, Vermont, New York, Massachusetts, Rhode Island, Connecticut, Pennsylvania, Maryland, New Jersey, Delaware, West Virginia;

Midwest--North Dakota, South Dakota, Nebraska, Kansas, Minnesota, Iowa, Missouri, Wisconsin, Illinois, Michigan, Indiana, Ohio;

South--Kentucky, Virginia, Tennessee, North Carolina, South Carolina, Georgia, Alabama, Mississippi, Florida, Louisiana, Arkansas, Oklahoma, Texas; and

West--Washington, Oregon, California, Idaho, Nevada, Utah, Arizona, Montana, Wyoming, Colorado, New Mexico.

Sampling error
The results of the surveys are subject to sampling error, i.e., the difference between the results obtained from the sample and those that would be obtained by surveying the entire population. The size of a possible sampling error varies to some extent with the size of the sample and with the percentage giving a particular answer. The following table sets forth the range of error in samples of different sizes and at different percentages of response.

For example, if the response for a sample size of 1,200 is $30 \%$, in 95 cases out of 100 the response in the population will be between $27 \%$ and $33 \%$. This error accounts only for sampling error. Survey research also is susceptible to other errors, such as data handling and interview recording.

Recommended allowance for sampling error (plus or minus) at $95 \%$ confidence level:

| Response |  | Sample size |  |  |  |  |
| :--- | ---: | :---: | :---: | :---: | :---: | ---: |
| percent | 1,600 | 1,200 | 900 | 500 | 250 | 100 |
| $10(90)$ | 2 | 2 | 2 | 3 | 5 | 7 |
| $20(80)$ | 2 | 3 | 3 | 4 | 6 | 10 |
| $30(70)$ | 3 | 3 | 4 | 5 | 7 | 11 |
| $40(60)$ | 3 | 3 | 4 | 5 | 7 | 12 |
| 50 | 3 | 3 | 4 | 5 | 8 | 12 |

## NATIONAL OPINION RESEARCH CENTER

Information on the survey procedures employed by the National Opinion Research Center was excerpted from the National Opinion Research Center, General Social Surveys, 1972-2002: Cumulative Codebook (Chicago: National Opinion Research Center, University of Chicago, 2003), pp. v, vi, 61, 1288, 1289, 1299, 1525, 1526.

The National Opinion Research Center (NORC) maintains a national probability sample. The General Social Surveys (GSS) are interviews administered to the NORC national samples using a standard questionnaire. They have been conducted during February, March, and April from 1972 to

1978, 1980, 1982 to $1991,1993,1994$, 1996, 1998, 2000, and 2002.
Completed interviews for General Soci
veys, 1972-2002

|  | Completed interviews |
| :---: | :---: |
| Total | 43,698 |
| 1972 | 1,613 |
| 1973 | 1,504 |
| 1974 | 1,484 |
| 1975 | 1,490 |
| 1976 | 1,499 |
| 1977 | 1,530 |
| 1978 | 1,532 |
| 1980 | 1,468 |
| 1982 | 1,860 |
| 1983 | 1,599 |
| 1984 | 1,473 |
| 1985 | 1,534 |
| 1986 | 1,470 |
| 1987 | 1,819 |
| 1988 | 1,481 |
| 1989 | 1,537 |
| 1990 | 1,372 |
| 1991 | 1,517 |
| 1993 | 1,606 |
| 1994 | 2,992 |
| 1996 | 2,904 |
| 1998 | 2,832 |
| 2000 | 2,817 |
| 2002 | 2,765 |

Note: The figure for 1982 includes an oversample of 354 black respondents; the fipur for 1987 includes an oversample of 35 black respondents.

Sampling frames are based on 1970 census information for surveys conducted in 1972-78, 1980, and 1982. For all interviews conducted from 1984-91, the national sampling frame was based on 1980 census intormation. A split sample transition design was used in the 1983 survey; one-half of the sample was drawn from the 1970 frame and one-half from the 1980 frame. Again in 1993, a split sample transition design was employed for the 1993 survey to measure the effect of switching from the 1980 sample frame to the 1990 sample frame. Half the sample was drawn from each frame. Beginning in 1994, the 1990 sample frame has been used. Since 1973, the median length of the interview has been about one and a half hours. This study employed standard field procedures for national surveys, including interviewer hiring and training by area supervisors in interviewing locations when necessary.

Each survey is an independently drawn sample of English-speaking persons 18 years of age and older, living in non-institutional arrangements within the United States. Alaska and Hawaii are not included in sa ples drawn from the 1970 sampling fra but are represented in one-half of the surveys and all those conducted from

1984-2002. Block quota sampling was used in the 1972, 1973, and 1974 surveys and for half of the 1975 and 1976 surveys. Full probability sampling was employed in half of the 1975 and 1976 surveys and in all of the surveys conducted subsequent to 1976.

The sample is a multi-stage area probability sample to the block or segment level. At the block level, quota sampling is used with quotas based on sex, age, and employment status. The cost of the quota samples is substantially less than the cost of a full probability sample of the same size, but there is, of course, the chance of sample biases mainly due to not-at-homes, which are not controlled by the quotas. However, in order to reduce this bias, the interviewers are given instructions to canvass and interview only after $3: 00 \mathrm{p} . \mathrm{m}$. on weekdays or during the weekend or holidays. The first stage of sample selection includes selection of the Primary Sampling Units (PSUs). The PSUs employed are Standard Metropolitan Statistical Areas (SMSAs) or nonmetropolitan counties selected in NORC's Master Sample. These SMSAs and counties were stratified by region, age, and race before selection. The units of selection of the second stage were block groups ( BGs ) and enumeration districts (EDs). These BGs and EDs were stratified according to race and income of the residents. The third stage of selection was that of blocks, which were selected with probabilities proportional to size. In places without block statistics, measures of size for the blocks were obtained by field counting. The average cluster size is five respondents per cluster.

The quotas call for approximately equal numbers of males and females with the exact proportion in each segment determined by the 1970 census tract data. For women, the additional requirement is imposed that there be the proper proportion of employed and unemployed females in the location. Again, these quotas are based on the 1970 census tract data. For males, the added requirement is that there be the proper proportion of males over and under age 35 in the location. Past experience suggests that, for most purposes, this quota sample of 1,500 could be considered as having about the same efficiency as a simple random sample of 1,000 cases.

The 1975 and 1976 studies were conducted with a traditional sample design, one-half full probability and one-half block quota. The sample was divided into two parts for several reasons: (1) to provide data for possibly interesting methodological comparisons; and (2) on the chance that there are some differences over time, that it would be possible to assign these differences to either shifts in sample designs, or changes in response patterns. Having allowed for the appearance of
all items in the transitional sample design, the GSS then switched to a full probability sample beginning with the 1977 survey.

## Rotation

Since its inception, the GSS has employed a rotation design under which most of its items appeared on two out of every three surveys. While this design proved to be useful for both monitoring change and augmenting the content of the GSS, it had the disadvantage of irregularly spacing the data and allowing gaps in the time series. This problem was particularly acute during 1978-82 because of the lack of funding for surveys in 1979 and 1981. At that juncture 4 -year gaps regularly appeared in the data and 6-year lapses existed for bivariate correlations between items from different rotations. Even with annual surveys 2 -year gaps and 3 -year intervals for bivariate correlations occur. To reduce this imbalance in the time series and reduce the length of intervals, in 1988 the rotation, across-time design previously used was changed to a split-ballot design. Under this design rotations 1,2 , and 3 occur across random sub-samples within each survey rather than across surveys (and years). Each sub-sample (known as ballots) consists of $1 / 3$ of the sample. Permanent items are not affected by this switch. They continue to appear for all cases on all surveys. Rotating items now appear on all surveys and are asked of two-thirds of respondents on each survey. Over a 3 -year cycle the same number of respondents are asked the "rotating" items as before $(3,000)$, but instead of coming in two segments of 1,500 each from two surveys, they appear in three segments of 1,000 each from three surveys.

The 1993 GSS was the last survey conducted according to this design. In 1994 two major innovations were introduced to the GSS.

First, the traditional core was substantially reduced to allow for the creation of minimodules (i.e., blocks of about 15 minutes devoted to some combination of small- to medium-sized supplements). The minimodules space provides greater flexibility to incorporate innovations and to include important items proposed by the social science community.

Second, a new biennial, split-sample design was used. The sample consists of two parallel sub-samples of approximately 1,500 cases each. The two sub-samples both contain the identical core. The A sample also contains a standard, topical module, the mini-modules, and an International Social Survey Program (ISSP) module (on women, work, and the family). The B sample has a second topical module, mini-modules, and an ISSP module (on the environment). In
effect, one can think of the A sample as representing a traditional GSS for 1994 and the B sample representing a traditional GSS for 1995. Rather than being fielded separately in two different years they are fielded together.

Beginning in 1996, and in subsequent evennumbered years, the same design described for 1994 was repeated. In addition, in 1994 only, a transitional design was utilized to calibrate any impact of deletions from the core.

Beginning in 2002, the GSS underwent a change in survey mode. In the past, the GSS was administered using a paper and pencil format. Starting in 2002, the GSS was conducted by computer-assisted personal interviewing (CAPI). In addition, the measurement of race was revised by the GSS in 2002. In the past, the GSS relied on interviewer perception to report the race of the respondent. Beginning in 2002, race is determined solely through self-report by the respondent.

Survey results are reported for four regional categories, with the States classified in the following way:

Northeast--Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont;

North Central--Illinois, Indiana, lowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Wisconsin;

South--Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia;

West--Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming.

## THE PEW RESEARCH CENTER FOR THE PEOPLE \& THE PRESS

Information on The Pew Center's 2003 Values Survey was excerpted from The Pew Research Center for the People \& the Press, The 2004 Political Landscape: Evenly Divided and Increasingly Polarized (Washington, DC: The Pew Research Center for the People \& the Press, 2003), p. 77.

Results are based on telephone interviews conducted under the direction of Princeton Survey Research Associates with a nationwide sample of 2,528 adults, 18 years of age and older, from July 14 to Aug. 5, 2003. Based on the total sample, one can say with $95 \%$ confidence that the error attributable to sampling and other random effects is plus or minus 2 percentage points.

Respondents who indicated they would prefer to complete the interview in Spanish, and

Spanish-speaking households in which no eligible English-speaking adult was available, were contacted by a Spanishspeaking interviewer.

The sample is a random digit sample of telephone numbers selected from telephone exchanges in the continental United States. The random digit aspect of the sample is used to avoid "listing" bias and provides representation of both listed and unlisted numbers (including not-yet-listed). The design of the sample ensures this representation by random generation of the last two digits of telephone numbers selected on the basis of area code, telephone exchange, and bank number.

The telephone exchanges were selected with probabilities proportional to their size. The first eight digits of the sampled telephone numbers (area code, telephone exchange, bank number) were selected to be proportionally stratified by county and by telephone exchange within county. That is, the number of telephone numbers randomly sampled from within a given county is proportional to that county's share of telephone numbers in the United States. Only working banks of telephone numbers are selected. A working bank is defined as 100 contiguous telephone numbers containing one or more residential listings.

At least 10 attempts were made to complete an interview at every sampled telephone number. The calls were staggered over times of the day and days of the week to maximize the chances of making a contact with a potential respondent. All interview breakoffs and refusals were recontacted at least once in order to attempt to convert them to completed interviews. In each contacted household, interviewers asked to speak with the "youngest male 18 or older who is at home." If there is no eligible male at home, interviewers asked to speak with "the oldest woman 18 or older who is at home." This systematic respondent selection technique has been shown empirically to produce samples that closely mirror the population in terms of age and gender.

Nonresponse in telephone interview surveys produces some known biases in surveyderived estimates because participation tends to vary for different subgroups of the population, and these subgroups are likely to vary also on questions of substantive interest. In order to compensate for these known biases, the sample data are weighted in analysis.

The demographic weighting parameters are derived from analysis of the most recently available U.S. Census Bureau's Current Population Survey (March 2002). This analysis produced population parameters for the
demographic characteristics of households with adults age 18 and older, which are then compared with the sample characteristics to construct sample weights. The analysis included only households in the continental United States that contain a telephone.

## YOUTH RISK BEHAVIOR SURVEILLANCE SYSTEM

Information on the Youth Risk Behavior Surveillance System was excerpted from Jo Anne Grunbaum et al., "Youth Risk Behavior Surveillance--United States, 2003," CDC Surveillance Summaries, Morbidity and Mortality Weekly Report 53 SS-2 (Washington, DC: USGPO, May 21, 2004), pp. 1-3.

The Youth Risk Behavior Surveillance System (YRBSS) is conducted biennially by the U.S. Department of Health and Human Services, Centers for Disease Control and Prevention and monitors priority health risk behaviors among youth and young adults. The 2003 national school-based survey, a component of the YRBSS, employed a threestage cluster sample design to produce a nationally representative sample of students in grades 9 through 12. The first-stage sampling frame contained 1,262 primary sampling units (PSUs), consisting of large counties, subareas of large counties, or groups of smaller, adjacent counties. From the 1,262 PSUs, 57 were selected from 16 strata formed on the basis of the degree of urbanization and the percentage of black (non-Hispanic) and Hispanic students in the PSU. The PSUs were selected with probability proportional to school enrollment size. At the second sampling stage, 195 schools were selected with probability proportional to school enrollment size. To enable separate analysis of black and Hispanic students, schools with substantial numbers of black (non-Hispanic) and Hispanic students were sampled at higher rates than all other schools. The third stage of sampling consisted of randomly selecting one or two intact classes of a required subject (e.g., English or social studies) or a required period (e.g., second period) from grades 9 through 12 at each chosen school. All students in the selected classes were eligible to participate in the study.

The school response rate was $81 \%$ and the student response rate was $83 \%$, for an overall response rate of $67 \%$. A total of 15,240 questionnaires were completed in 158 schools. Of these, 26 questionnaires failed quality control and were excluded from the analysis resulting in 15,214 usable questionnaires.

Survey procedures were designed to protect students' privacy by allowing for anonymous and voluntary participation. Students completed the self-administered questionnaire
during one class period and recorded their responses directly on a computer-scannable booklet or answer sheet.

A weighting factor was applied to each stu dent record to adjust for nonresponse and for the varying probabilities of selection, including those resulting from the oversampling of black (non-Hispanic) and Hispanic students. Numbers of students in racial/ethnic groups other than white (non-Hispanic), black (nonHispanic), and Hispanic were too low for meaningful analysis. The weights were scaled so that the weighted count of students was equal to the total sample size and so that the weighted proportions of students in each grade matched national population proportions. The data are representative of students in grades 9 through 12 in public and private schools in the 50 States and the District of Columbia.

## Appendix 6

Monitoring the Future Survey
methodology and definitions of terms

Note: The following information was excerpted from Jerald G. Bachman, Lloyd D. Johnston, and Patrick M. O'Malley, Monitoring the Future 2000 (Ann Arbor, MI: Institute for Social Research, University of Michigan, 2001), pp. 2-11, 13, 14; Lloyd D. Johnston et al., Monitoring the Future National Survey Results on Drug Use, 1975-2003, Volumes I and II (Bethesda, MD: U.S. Department of Health and Human Services, 2004); and information provided by the Monitoring the Future Project. Non-substantive editorial adaptations have been made.

## Survey methodology

The research design involves annual data collections from high school seniors during the spring of each year, beginning with the class of 1975. Each data collection takes place in approximately 120 to 146 public and private high schools selected to provide an accurate cross-section of high school seniors throughout the coterminous United States.

Since 1986, the results of a followup survey of those young adults 1 to 10 years beyond high school have been presented. These results should accurately characterize approximately $85 \%$ of the young adults in the class cohorts 1 to 10 years beyond high school who are high school graduates. The high school dropout segment, missing from the senior year surveys, also is missing from the followup segments.

Also, since 1980, the results of followup surveys of those high school students who have continued on to college have been presented. The college sample is limited to the most typical one for college attendance: 1 to 4 years past high school, which corresponds to the modal ages of 19 to 22 years old. This age category should encompass approximately $70 \%$ to $75 \%$ of all students enrolled in college full-time.

## Sampling procedures

The procedure for securing a nationwide sample of high school seniors is a multistage one. Stage 1 is the selection of particular geographic areas, Stage 2 is the selection of one or more high schools in each area, and Stage 3 is the selection of seniors within each high school.

Stage 1: Geographic areas. The geographic areas used in this study are the
primary sampling units (PSUs) developed by the Sampling Section of the Survey Research Center (SRC) for use in the Center's nationwide interview studies. These consist of 74 primary areas throughout the coterminous United States--including the 12 largest metropolitan areas, which contain about $30 \%$ of the Nation's population. Of the 62 other primary areas, 10 are in the Northeast, 18 in the North Central area, 24 in the South, and 10 in the West. Because these same PSUs are used for personal interview studies by the SRC, local field representatives can be assigned to administer the data collections in practically all schools.

Stage 2: Schools. In the major metropolitan areas more than one high school is often included in the sampling design; in most other sampling areas a single high school is sampled. In all cases, the selections of high schools are made such that the probability of drawing a school is proportionate to the size of its senior class. The larger the senior class (according to recent records), the higher the selection probability assigned to the high school. When a sampled school is unwilling to participate, a replacement school as similar to it as possible is selected from the same geographic area.

Stage 3: Students. Within each selected school, up to 350 seniors may be included in the data collection. In schools with fewer than 350 seniors, the usual procedure is to include all of them in the data collection. In larger schools, a subset of seniors is selected either by randomly sampling classrooms or by some other random method that is convenient for the school and judged to be unbiased. Sample weights are assigned to each respondent so as to take account of variations in the sizes of samples from one school to another, as well as the (smaller) variations in selection probabilities occurring at the earlier stages of sampling.

## The three-stage sampling procedure

 described above yielded the number of participating schools and students indicated in Table 1.One limitation in the design is that it does not include in the target population those young men and women who drop out of high school before graduation (or before the last few months of the senior year, to be more precise). This excludes a relatively small proportion of each age cohort--between $15 \%$ and $20 \%$ of each age cohort nationally, according to the U.S. Census Bureau. This is not an unimportant segment, since certain behaviors such as illicit drug use and delinquency tend to be higher than average in this group. However, the addition of a representative sample of dropouts would increase the cost of the present research enormously, because of their dispersion and generally
higher level of resistance to being located and interviewed.

For the purposes of estimating characteristics of the entire age group, the omission of high school dropouts does introduce certain biases; however, their small proportion sets outer limits on the bias. For the purposes of estimating changes from one cohort of high school seniors to another, the omission of dropouts represents a problem only if different cohorts have considerably different proportions who drop out. The Source has no reason to expect dramatic changes in those rates for the foreseeable future, and recently published Census Bureau statistics indicate a great deal of stability in dropout rates since 1970.

Some may use the high school data to draw conclusions about changes for the entire age group. The Source does not encourage such extrapolation but suspects that the conclusions reached often would be valid, since over $80 \%$ of the age group is in the surveyed segment of the population and the Source expects that changes among those not in school are very likely to parallel the changes among those who are.

One other important feature of the base-year sampling procedures should be noted. All schools (except for half of the initial 1975 sample) are asked to participate in two data collections, thereby permitting replacement of half of the total sample of schools each year. One motivation for requesting that schools participate for 2 years is administrative efficiency; it is a costly and timeconsuming procedure to secure the cooperation of schools, and a 2 -year period of participation cuts down that effort substantially. Another important advantage is that whenever an appreciable shift in scores from one graduating class to the next is observed, it is possible to compare whether the shift might be attributable to some differences in the newly sampled schools. This is done simply by repeating the analysis using only the 60 or so schools that participated both years. Thus far, the half-sample approach has worked well; and examination of drug prevalence data from the "matched half-samples" shows that the half samples of repeat schools yielded drug prevalence trends that were virtually identical to trends based on all schools.

## Questionnaire administration

Questionnaire administration in each school is carried out by the local SRC representatives and their assistants, following standardized procedures detailed in a project instruction manual. The questionnaires are administered in classrooms during normal class periods whenever possible, although circumstances in some schools require the
use of larger group administrations. Teachers are not asked to do anything more than introduce the SRC staff members and (in most cases) remain in the classroom to help guarantee an orderly atmosphere for the survey. Teachers are urged to avoid walking around the room, so that students may feel free to write their answers without fear of being observed.

The actual process of completing the questionnaires is straightforward. Respondents are given sharpened pencils and asked to use them because the questionnaires are designed for automatic scanning. Most respondents can finish within a 45 -minute class period; for those who cannot, an effort is made to provide a few minutes of additional time.

## Content areas and questionnaire design

Drug use and related attitudes are the topics that receive the most extensive coverage in the Monitoring the Future Project; but the questionnaires also deal with a wide range of other subject areas, including attitudes about government, social institutions, race relations, changing roles for women, educational aspirations, occupational aims, and marital and family plans, as well as a variety of background and demographic factors. The list below provides an outline of the 20 general subject areas into which all items are categorized. Given this breadth of content, the study is not presented to respondents as a "drug use study," nor do they tend to view it as such.

## Measurement content areas

A. Drugs. Drug use and related attitudes and beliefs, drug availability and exposure, surrounding conditions and social meanings of drug use. Views of significant others regarding drugs.
B. Education. Educational lifestyle, values, experiences, and environments.
C. Work and leisure. Vocational values, meaning of work and leisure, work and leisure activities, preferences regarding occupational characteristics and type of work setting.
D. Sex roles and family. Values, attitudes, and expectations about marriage, family structure, sex roles, and sex discrimination.
E. Population concerns. Values and attitudes about overpopulation and birth control.
F. Conservation, materialism, equity, etc. Values, attitudes, and expectations related to conservation, pollution, materialism, equity, and the sharing of resources. Preferences regarding type of dwelling and urbanicity.
G. Religion. Religious affiliation, practices, and views.
H. Politics. Political affiliation, activities, and views.
I. Social change. Values, attitudes, and expectations about social change.
J. Social problems. Concern with various social problems facing the Nation and the world.
K. Major social institutions. Confidence in and commitment to various major social institutions (business, unions, branches of government, press, organized religion, military, etc.).
L. Military. Views about the armed services and the use of military force. Personal plans for military service.
M. Interpersonal relationships. Qualitative and quantitative characteristics of cross-age and peer relationships. Interpersonal conflict.
N. Race relations. Attitudes toward and experiences with other racial groups.
O. Concern for others. Concern for others; voluntary and charitable activities.
P. Happiness. Happiness and life satisfaction, overall and in specific life domains.
Q. Other personality variables. Attitudes about self (including self-esteem), locus of control, loneliness, risk-taking, trust in others, importance placed on various life goals, counter-culture orientation, hostility.
R. Background. Demographic and family background characteristics, living arrangements.

## S. Deviant behavior and victimization.

Delinquent behaviors, driving violations and accidents (including those under the influence of drugs), victimization experiences.
T. Health. Health habits, somatic symptoms, medical treatments.

Because many questions are needed to cover all of these topic areas, much of the questionnaire content was divided into five different questionnaire forms in 1976-88 and six different questionnaire forms for 1989 and beyond, which are distributed to participants in an ordered sequence that produces virtually identical subsamples. About onethird of each questionnaire form consists of key or "core" variables that are common to all forms. All demographic variables and some measures of drug use are included in this "core" set of measures. This use of the full sample for drug and demographic
measures provides a more accurate estimation on these dimensions and also makes it possible to link them statistically to all of the other measures that are included in a sin form only.

## Representativeness and validity

The samples for this study are intended to be representative of high school seniors throughout the 48 coterminous States. As previously mentioned, this definition of the sample excludes one important portion of the age cohort: those who have dropped out of high school before nearing the end of the senior year. But given the aim of representing high school seniors, it is useful to consider the extent to which the obtained samples of schools and students are likely to be representative of all seniors and the degree to which the data obtained are likely to be valid.

There are at least four ways in which survey data of this sort might fall short of being fully accurate. First, some sampled schools refuse to participate, which could introduce some bias. Second, the failure to obtain questionnaire data from $100 \%$ of the students sampled in participating schools also could introduce bias. Third, the answers provided by participating students are open to both conscious and unconscious distortions, which could reduce validity. Finally, limitations in sample size and/or design could place limits on the accuracy of estimates

## School participation

As noted in the description of the sampling design, schools are invited to participate in the study for a 2 -year period. With very few exceptions, each school that has participated for one data collection has agreed to participate for a second. Thus far, approximately $65 \%$ of the schools initially invited to participate have agreed to do so each year; for each school refusal, a similar school (in terms of size, geographic area, urbanicity, etc.) was recruited as a replacement. However, because securing high school cooperation has become more difficult in recent years, payment of schools as a means of increasing their incentive to participate was implemented in the 2003 survey.

The selection of replacement schools almost entirely removes problems of bias in region, urbanicity, and the like that might result from certain schools refusing to participate. Other potential biases are more subtle, however. For example, if it turned out that most schools with "drug problems" refused to participate, that could seriously bias the drug estimates derived from the sample. And if any other single factor was dominant in refusals, that also might suggest a soura serious bias. In fact, however, the reasons
for schools refusing to participate are varied and largely a function of happenstance events of the particular year. Thus, there is a fair amount of confidence that school refusals have not seriously biased the surveys.

## Student participation

Completed questionnaires are obtained from approximately 80 to $85 \%$ of all students sampled. The single most important reason that students are missed is that they are absent from class at the time of data collection, and in most cases it is not workable to schedule a special followup data collection for them.

Students with high rates of absenteeism also report above-average drug use. Therefore there is some degree of bias introduced by missing the absentees. That bias could be largely corrected through the use of special weighting; however, this course was not chosen because the bias in estimates (for drug use, where the potential effect was hypothesized to be the largest) was determined to be quite small and because the necessary weighting procedures would have introduced undesirable complications.

In addition to absenteeism, student nonparticipation occurs because of schedule conflicts with school trips and other activities that tend to be more frequent than usual during the final months of the senior year. Of course, some students refuse to complete or turn in a questionnaire. However, the proportion of explicit refusals amounts to less than $1.5 \%$ of the target sample for each grade.

## Research design for the surveys of lower grades

Beginning in 1991 the study was expanded to include nationally representative samples of eighth and tenth grade students. In general, the procedures used for the annual surveys of eighth and tenth grade students closely parallel those used for high school seniors, including the procedures for selecting schools and students, questionnaire administrations, and questionnaire formats. A major exception is that only two different questionnaire forms were used in 1991-96 and four forms were used beginning in 1997, rather than the six forms used with seniors. Identical forms are used for both eighth and tenth grades, and, for the most part, questionnaire content is drawn from the twelfth grade questionnaires. Thus, key demographic variables and measures of drug use and related attitudes and beliefs are generally identical for all three grades. Fewer questions about lifestyles and values are included in these forms than in the twelfth grade forms, in part because it is believed that many of these attitudes are more likely to be formed by twelfth grade, and therefore are best monitored there. For the national survey
of eighth graders, approximately 150 schools are sampled, and approximately 16,000 to 19,000 students are surveyed. For the tenth graders, approximately 130 schools are sampled, and approximately 14,000 to 17,000 students are surveyed. (See Table 2.)

## Research design for the followup surveys after high school

Beginning with the graduating class of 1976, a sample of each class is followed and surveyed by mail after high school graduation. From the approximately 15,000 to 17,000 seniors originally participating in a given class, a representative sample of 2,400 individuals was chosen for followup. In order to ensure sufficient numbers of drug users in the followup surveys, those fitting certain criteria of current drug use (that is, those reporting 20 or more uses of marijuana or use of any of the other illicit drugs in the previous 30 days) were selected with higher probability (by a factor of 3.0 ) than the remaining seniors. Differential weighting is used in all followup analyses to compensate for the differential sampling probabilities.

The 2,400 selected respondents from each class were randomly assigned to one of two matching groups of 1,200 each; one group was surveyed on even-numbered calendar years, and the other group was surveyed on odd-numbered years. This biennial procedure is intended to reduce respondent burden.

Until 2002, each respondent was followed for up to seven times; at the seventh followup, which would occur either 13 or 14 years after graduation, the respondents had reached the modal ages of 31 or 32 . Beginning in 2002, the seventh followup was discontinued, and each respondent was followed for up to six times, corresponding to the modal ages of 29 or 30 . Additional followups occur at modal ages 35, 40, and 45.

## Followup procedures

Using information provided by respondents at the time of the senior survey (name, address, phone number, and the name and address of someone who would always know how to reach them), students selected for the panels are contacted by mail. Newsletters are sent each year, and name and address corrections are requested. Questionnaires are sent by certified mail in the spring of each year. A check for $\$ 5.00$ made out to the respondent is attached to the front. Beginning with the class of 1992, the followup checks have been raised to $\$ 10.00$ to compensate for the effects of inflation over the life of the study. Reminder letters and post cards are sent at fixed intervals thereafter and finally, those not responding receive a
prompting phone call from the Survey
Research Center's phone interviewing facility in Ann Arbor, MI. If requested, a second copy of the questionnaire is sent.

## Panel retention rates

Retention rates in the biennial followups of all panel members ages 19 to 30 (corresponding to the first six followups) decline with the length of the followup interval. For the 5-year period from 1999 to 2003, the response rate in the first followup (corresponding to 1 to 2 years past high school) averaged $60 \%$; for the second through the sixth followups (corresponding to 3 to 12 years past high school) response rates averaged $54 \%$. Among the very long-term respondents--the 35 - and 40-year-olds--the retention rates remain good. Among the 35-year-old respondents surveyed from 1999 to 2003 (corresponding to 17 years past high school), the average response rate was $52 \%$. Among the 40-year-old respondents surveyed from 1999 (the first survey of this age group) to 2003, corresponding to a $22-$ year followup interval, the average retention rate was $59 \%$. Among 45-year-olds surveyed in 2003 , the retention rate was $59 \%$.

Since attrition is to a modest degree associated with drug use, corrections to the prevalence estimates are presented for the followup panels. These raise the prevalence estimates from what they would be uncorrected, but only slightly. It is believed that the resulting estimates are the most accurate obtainable, but still low for the age group as a whole due to the omission of dropouts and absentees from the population covered by the original panels.

## Validity of self-report data

Survey measures of delinquency and drug use depend upon respondents reporting what are, in many cases, illegal acts. Thus, a critical question is whether such self-reports are likely to be valid. Like most studies dealing with these areas, there is no direct, objective validation of the present measures; however, the considerable amount of inferential evidence that exists strongly suggests that the self-report questions produce largely valid data. A number of factors suggest a reasonable amount of confidence about the validity of the responses to what are presumably among the most sensitive questions in the study: a low nonresponse on the drug questions, a large proportion admitting to some illicit drug use, the consistency of findings across several years of the present study, strong evidence of construct validity (based on relationships observed between variables), a close match between these data and the findings from other studies using other methods, and the findings from
several methodological studies that have used objective validation methods.

## Accuracy of the sample

A sample survey never can provide the same level of accuracy as would be obtained if the entire target population were to participate in the survey--in the case of the present study, about 2.5 to 3.0 million seniors per year. But perfect accuracy of this sort would be extremely expensive and certainly not worthwhile considering that a high level of accuracy can be obtained by a carefully designed probability sample. The accuracy of the sample in this study is affected both by the size of the student sample and by the number of schools in which they are clustered. Virtually all estimates based on the total sample have confidence intervals of plus or minus 1.5 percentage points or smaller--sometimes considerably smaller.

## Interpreting racial differences

Data are given for the two largest racial subgroups in the population--those who identify themselves as white or Caucasian and those who identify themselves as black or AfricanAmerican. Data are not given for the other ethnic categories (American Indians, Asian Americans, Mexican Americans, Puerto Ricans, or other Latin Americans) since each of these groups comprises a small percentage of the sample in any given year, which means that their small Ns (in combination with their clustered groupings in a limited number of schools) would yield estimates that would be too unreliable. In fact, even black respondents--who constitute approximately $12 \%$ of each year's sample--are represented by only 269 to 425 respondents per year on any single questionnaire form. Further, because the sample is a stratified clustered sample, it yields less accuracy than would be yielded by a pure random sample of equal size. Therefore, because of the limited number of cases, the margin of sampling error around any statistic describing black respondents is larger than for most other subgroups described in this survey. There are factors in addition to unreliability, however, that could be misleading in the interpretation of racial differences. Given the importance that has been placed on various racial differences reported in the social science literature, the reader is cautioned to consider the various factors that could account for differences. These factors fall into three categories: differential representation in the sample, differential response tendencies, and the confounding of race with a number of other background and demographic characteristics.

Differential representation--A smaller segment of the black population than of the white population of high school age is
represented by the data contained here. Insofar as any characteristic is associated with being a school dropout or absentee, it is likely to be somewhat disproportionately underrepresented among blacks in the sample.

Differential response tendencies--In examining the full range of variables, certain racial differences in response tendencies were noted. First, the tendency to state agreement in response to agree-disagree questions is generally somewhat greater among blacks than among whites.

There also is a somewhat greater than average tendency for black respondents to select extreme answer categories on attitudinal scales. For example, even if the same proportion of blacks as whites felt positively (or negatively) about some subject, fewer whites are likely to say they feel very positively (or very negatively). In the process of interpreting racial differences, the reader should be aware that differences in responses to particular questions may be related to these more general tendencies.

A somewhat separate issue in response tendency is a respondent's willingness to answer particular questions. An exaggerated missing data rate for black males on the set of questions dealing with the respondent's own use of illicit drugs has been observed. Clearly, a respondent's willingness to be candid on such questions depends on his or her trust of the research process and of the researchers themselves. The reader is advised to consult the Source for exceptional levels of missing data when making comparisons on any variable in which candor is likely to be reduced by lower system trust. One bit of additional evidence related to trust in the research process is that higher proportions of blacks than whites indicated that if they had used marijuana or heroin they would not have been willing to report it in the survey.

Covariance with other factors--Some characteristics such as race are highly correlated with other variables--variables that may in fact explain some observed racial differences. Put another way, at the aggregate level one might observe a considerable racial difference on some characteristic, but once one controls for certain background characteristics such as socio-economic level or region of the country--that is, comparing the black respondents with whites who come from similar backgrounds--there may be no racial difference at all.

## Definitions of terms

Drug types--Definitions or identifiers used in survey forms include:

Marijuana--pot, grass or hashish;
Other psychedelics--mescaline,
peyote, psilocybin, PCP. In 2001, the question text was changed from "other psychedelics" to "other hallucinogens" and "shroorn" was added to the list of examples;

Amphetamines--uppers, pep pills, bennies, speed; Quaaludes--quads, methaqualone; Barbiturates-downers, goofballs, reds, yellows;

Heroin--smack, horse;
Other narcotics--methadone, opium, codeine, paregoric. In 2002, the list of examples of narcotics other than heroin was updated by replacing Talwin, laudanum, and paregoric with Vicodin, OxyContin, and Percocet.

Inhalants--glue, aerosols, laughing gas;
Tranquilizers--Librium, Valium, Miltown. In 2001, Miltown was replaced with Xanax.

Beginning with the 1979 survey, amyl and butyl nitrites were considered "other inhalants" for questions on one alternate survey form ( $N$ is one-fifth of total sample size in 1979-88 and $N$ is one-sixth of total sample size in 1989-2003). This change was made because not all users of this subclass of inhalants were reporting themselves as inhalant users. Hallucinogen use had been similarly underestimated because some users of the hallucinogenic drug PCP do not report themselves as users of hallucinogens--even though PCP was included as an example of a hallucinogenic drug in earlier surveys anon other questions. The alternate questi* naire form contained a special set of ques tions about PCP that provided other street names for it (e.g., angel dust). As a result of these definition changes, since 1979 data for drug use in these two drug classes have been adjusted for underreporting. For more information, see the Source.

Four-year college plans--Percentage distributions are given separately for (1) respondents who indicate that they "definitely will" or "probably will" graduate from a 4-year college program and (2) those who say that they "definitely won't" or "probably won't" graduate from a 4-year college program. Respondents not responding are omitted from both columns. A number of those who do not expect to complete a 4-year college program do expect to get some postsecondary education.

Illicit drug use: Lifetime--Percentage distributions are given separately for five mutually exclusive subgroups differentiated by their degree of involvement with illicit drugs. Eligibility for each category is defined below.

None--Includes respondents who indicated that they had not used marijuana at any time and did not report use of any of the following illicit drugs in their lifetime: LSD other psychedelics, cocaine, amphetam tranquilizers, methaqualone, barbiturate heroin, or other narcotics.

Marijuana only--Includes other respondents who indicated that they had used marijuana (or hashish) but had never used any of the other illicit drugs listed above.

Few pills--Includes respondents who indicated having used one or more of the above listed drugs (other than marijuana) but who had not used any one class of them on three or more occasions and who had not used heroin at all.

More pills--Includes respondents who had used any of the above listed drugs (other than marijuana) on three or more occasions but who had never used heroin.

Any heroin--Includes respondents who indicated having used heroin on one or more occasions in their lifetime.

Race--Percentage distributions are given separately for those describing themselves as "white or Caucasian" and "black or African-American." Comparable data for the other racial or ethnic groups (Mexican Americans, Asian Americans, American Indians, etc.) are not shown because of the low number of cases in each group. For tables in section 3 presenting use of alcohol and illicit drugs, the category Hispanic is added, which includes respondents who in 1975-1990 describe themselves as Mexican American or Chicano, or Puerto Rican or other Latin American. After 1990, this group includes respondents who describe themselves as Mexican American or Chicano, Cuban American, Puerto Rican American, or other Latin American. After 1994, the term Puerto Rican American was shortened to Puerto Rican.

Region--Percentage distributions are given separately for respondents living in each of four mutually exclusive regions of the country. The regional classifications are based on U.S. Census Bureau categories and are defined as follows:

Northeast--Census classifications of New England and Middle Atlantic States; includes Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, and Pennsylvania.

North Central--Census classifications of East North Central and West North Central States; includes Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, lowa, Missouri, North Dakota, South Dakota, Nebraska, and Kansas.

South--Census classifications of South Atlantic, East South Central, and West South Central States; includes Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, and Texas.

West--Census classifications of Mountain and Pacific States; includes Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, and California.

Sex--Percentage distributions are given separately for males and females. Respondents with missing data on the question asking the respondent's sex are omitted from both groupings.

Weighted number of cases ( N )--The number of cases is stated in terms of the weighted number of respondents rather than the actual number, since all percentages have been calculated using weighted cases. The actual number of respondents is about $15 \%$ higher than the weighted number for data collected in 1975, 1976, and 1977. For data collected in 1978 or later, the actual number of respondents is roughly equal to the weighted number. Weighting is used to improve the accuracy of estimates by correcting for unequal probabilities of selection that arise in the multi-stage sampling procedures. Table 3 presents the number of weighted cases for each subgroup of the high school seniors samples.

Table 1. Sample sizes and student response rates for high school seniors

Note: Data for 1990-2003 are based on six questionnaire forms; Ns for one-form questions
are approximately one-sixth of the total sample $N$.

## Appendix 7

National Survey on Drug Use and Health Survey methodology

Note: The following information was excerpted from U.S. Department of Health and Human Services, Substance Abuse and Mental Health Services Administration, Results from the 2003 National Survey on Drug Use and Health: Main Findings (Rockville, MD: U.S. Department of Health and Human Services, 2004), pp. 7, 87-95. Non-substantive editorial adaptations have been made.

## Survey methodology

The National Survey on Drug Use and Health (NSDUH) is an annual survey of the civilian, noninstitutionalized population of the United States age 12 and older and is sponsored by the U.S. Department of Health and Human Services, Substance Abuse and Mental Health Services Administration. Prior to 2002, the survey was called the National Household Survey on Drug Abuse (NHSDA). Because of improvements to the survey in 2002, the 2002 data constitute a new baseline for tracking trends in substance use and other measures. Therefore, estimates from the 2002 and 2003 NSDUHs should not be compared with estimates from the 2001 and earlier NHSDAs to assess changes in substance use over time.

NSDUH collects information from residents of households, noninstitutional group quarters (e.g., shelters, rooming/boarding houses, college dormitories, migratory worker camps), and civilians living on military bases. Persons excluded from the survey include homeless persons who do not use shelters, military personnel on active duty, and residents of institutional group quarters, such as jails, prisons, hospitals, and nursing homes. Since 1999, the NSDUH interview has been carried out using computer-assisted interviewing (CAI). Most of the questions are administered with audio computer-assisted selfinterviewing (ACASI). ACASI is designed to provide the respondent with a highly private and confidential means of responding to questions to increase the level of honest reporting of illicit drug use and other sensitive behaviors. Less sensitive items are administered by interviewers using computer-assisted personal interviewing (CAPI).

Nationally, 130,605 addresses were screened for the 2003 survey, and 67,784 completed interviews were obtained. The survey was conducted from January through December 2003. Weighted response rates for household screening and for interviewing were $90.72 \%$ and $77.39 \%$, respectively.

Although the design of the 2002 and 2003 NSDUHs is similar to the design of the 1999 through 2001 surveys, there are methodological differences that affect comparability of 2002 and 2003 estimates with estimates from prior surveys. In addition to the name change, each NSDUH respondent is now given an incentive payment of $\$ 30$. These changes, implemented as of the 2002 survey, resulted in substantial improvement in survey response rates. The changes also affected respondents' reporting of many critical items that are the basis of prevalence measures reported by the survey each year. Comparability also could be affected by improved data collection quality control procedures that were introduced beginning in 2001, and by incorporating new population data from the 2000 decennial census into NSDUH sample weighting procedures. Analyses of the effects of each of these factors on NSDUH estimates have shown that 2002 and 2003 data should not be compared with earlier NHSDA survey data.

The 2002 and 2003 surveys were part of a coordinated 5-year 50-State sample design with an independent, multistage area probability sample for each of the 50 States and the District of Columbia to facilitate Statelevel estimation. For the 5-year 50-State design, 8 States were designated as large sample States (California, Florida, Illinois, Michigan, New York, Ohio, Pennsylvania, and Texas) with samples large enough to support direct State estimates. For the 2003 survey, sample sizes in these States ranged from 3,541 to 3,711 . For the remaining 42 States and the District of Columbia, smaller, but adequate, samples were selected to support State estimates using small area estimation (SAE) techniques. Sample sizes in these States ranged from 856 to 964 in 2003.

States were first stratified into a total of 900 field interviewer (FI) regions (48 regions in each large sample State and 12 regions in each small sample State). These regions were contiguous geographic areas designed to yield the same number of interviews on average. Within FI regions, adjacent census blocks were combined to form the first-stage sampling units, called area segments. A total of 96 segments per FI region were selected with probability proportional to population size. Eight sample segments per FI region were fielded during the 2003 survey year.

These sampled segments were allocated equally into four separate samples, one for each 3-month period during the year, so that the survey is essentially continuous in the field. In each of these area segments, a listing of all addresses was made, from which a sample of 170,762 addresses was selected. Of the selected addresses, 143,485 were determined to be eligible sample units. In these sample units (which can be either households or units within group quarters), sample persons were randomly selected using an automated screening procedure programmed in a handheld computer carried by the interviewers. The number of sample units completing the screening was 130,605 . Youths age 12 to 17 and young adults age 18 to 25 were oversampled at this stage so that each State's sample was approximately equally distributed among three major age groups. Because of the larger sample size, there was no need to oversample racial/ethnic groups, as was done for NHSDAs prior to 1999. A total of 81,631 persons were selected nationwide. The final sample of 67,784 persons was representative of the U.S. general population age 12 and older.

The data collection method involves in-person interviews, incorporating procedures that would be likely to increase respondents' cooperation and willingness to report honestly about their illicit drug use behavior. Confidentiality is stressed in all written and oral communications with potential respondents. Respondents' names are not collected with the data and computer-assisted interviewing (CAI) methods, including audio computer-assisted self-interviewing (ACASI), are used to provide a private and confidential setting to complete the interview.

Introductory letters are sent to sampled addresses, followed by an interviewer visit. A 5-minute screening procedure conducted using a handheld computer involves listing all household members along with their basic demographic data. The computer uses the demographic data in a preprogrammed selection formula to select zero to two sample person(s), depending on the composition of the household. This selection process is designed to provide the necessary sample sizes for the specified population age groupings.

The interviewer requests the selected respondent to identify a private area in the home to conduct the interview away from other household members. The interview averages about 1 hour and includes a combination of CAPI and ACASI. The interview begins in CAPI mode with the FI reading the questions from the computer screen and entering the respondent's replies into the computer. The interview then transitions to the ACASI mode for the sensitive questions. In this mode, the respondent can read the questions silently on the computer screen and/or listen to the questions read through headphones and enter his or her
responses directly into the computer. At the conclusion of the ACASI section, the interview returns to the CAPI mode with the interviewer completing the questionnaire. All respondents who complete a full interview are given a $\$ 30$ cash payment.

Even though editing and consistency checks are done by the CAI program during the interview, additional, more complex, edits and consistency checks also are conducted. Cases are retained only if respondents provided data on lifetime use of cigarettes and at least nine other substances. An important aspect of subsequent editing routines involves assignment of codes when respondents legitimately were skipped out of questions that definitely did not apply to them (e.g., if respondents never used a drug of interest). For key drug use measures, the editing procedures identify inconsistencies between related variables. Inconsistencies in variables pertaining to the most recent period that respondents used a drug are edited by assigning an "indefinite" period of use (e.g., use at some point in the lifetime, which could mean use in the past 30 days or past 12 months). Inconsistencies in other key drug use variables are edited by assigning missing data codes. These inconsistencies then are resolved through statistical imputation procedures discussed below.

For some key variables that still have missing or ambiguous values after editing, statistical imputation is used to replace these values with appropriate response codes. For example, the response is ambiguous if the editing procedures assigned a respondent's most recent use of a drug to "use at some point in the lifetime," with no definite period within the lifetime. In this case, the imputation procedures assign a definite value for when the respondent last used the drug (e.g., in the past 30 days, more than 30 days ago but within the past 12 months, more than 12 months ago). Similarly, if the response is completely missing, the imputation procedures replace missing values with nonmissing ones.

In most cases, missing or ambiguous values are imputed using a methodology called predictive mean neighborhoods (PMN), which was developed specifically for the 1999 survey and used in all subsequent survey years. PMN is a combination of a model-assisted imputation methodology and a random nearest neighbor hotdeck procedure. Whenever feasible, the imputation of variables using PMN is multivariate, in which imputation is accomplished on several response variables at once. In general, hot-deck imputation replaces a missing or ambiguous value taken from a "similar" respondent who has
complete data. For random nearest neighbor hot-deck imputation, the missing or ambiguous value is replaced by a responding value from a donor randomly selected from a set of potential donors. Potential donors are those defined to be "close" to the unit with the missing or ambiguous value, according to a predefined function, called a distance metric. In the hot-deck stage of PMN, the set of candidate donors (the "neighborhood") consists of respondents with complete data who have a predicted mean close to that of the item nonrespondent. In particular, the neighborhood consists of either the set of the closest 30 respondents or the set of respondents with a predicted mean (or means) within $5 \%$ of the predicted mean(s) of the item nonrespondent, whichever set is smaller. If no respondents are available who have a predicted mean (or means) within $5 \%$ of the item nonrespondent, the respondent with the predicted mean(s) closest to that of the item nonrespondent is selected as the donor.

Although statistical imputation could not proceed separately within each State due to insufficient pools of donors, information about each respondent's State of residence was incorporated in the modeling and hotdeck steps. For most drugs, respondents were separated into three "State usage" categories as follows: respondents from States with high usage of a given drug were placed in one category, respondents from States with medium usage into another, and the remainder into a third category. This categorical "State rank" variable was used as one set of covariates in the imputation models. In addition, eligible donors for each item nonrespondent were restricted to be of the same State usage category (i.e., the same "State rank") as the nonrespondent.

The general approach to developing and calibrating analysis weights involved developing design-based weights, as the inverse of the selection probabilities of the households and persons. Adjustment factors, then were applied to the design-based weights to adjust for nonresponse, to poststratify to known population control totals, and to control for extreme weights when necessary. In view of the importance of State-level estimates with the 50-State design, it was necessary to control for a much larger number of known population totals. Several other modifications to the general weight adjustment strategy that had been used in past surveys also were implemented for the first time beginning with the 1999 CAI sample.

This general approach was used at several stages of the weight adjustment process, including (1) adjustment of household weights for nonresponse at the screener level, (2) poststratification of household weights to meet population controls for vari-
ous demographic groups by State, (3) adjustment of household weights for extremes, (4) poststratification of selected person weights, (5) adjustment of personweights for nonresponse at the questionnaire level, (6) poststratification of person weights, and (7) adjustment of person weights for extremes.

An important limitation of the NSDUH estimates of drug use prevalence is that they are designed to describe only the target population of the survey, i.e., the civilian noninstitutionalized population age 12 and older. Although this population includes almost $98 \%$ of the total U.S. population age 12 and older, it does exclude some important and unique subpopulations who may have very different drug-using patterns. The survey excludes active military personnel, who have been shown to have significantly lower rates of illicit drug use. Persons living in institutional group quarters, such as prisons and residential drug treatment centers, are not included in the NSDUH and have been shown in other surveys to have higher rates of illicit drug use. Also excluded are homeless persons not living in a shelter on the survey date, another population shown to have higher than average rates of illicit drug use.

Table 1. NSDUH sample sizes by demographic characteristics

|  | 2002 | 2003 |
| :---: | :---: | :---: |
| Total | 68,126 | 67,784 |
| Sex |  |  |
| Male | 32,767 | 32,611 |
| Female | 35,359 | 35,173 |
| Age group |  |  |
| 12 to 17 years | 23,645 | 22,665 |
| 18 to 25 years | 23,066 | 22,738 |
| 26 years and older | 21,415 | 22,381 |
| Race, ethnicity |  |  |
| White, non-Hispanic | 46,548 | 45,870 |
| Black, non-Hispanic | 8,278 | 8,153 |
| American Indian or Alaska Native | 921 | 845 |
| Native Hawaiian or other Pacific Islander | 273 | 252 |
| Asian | 1,890 | 2,048 |
| More than one race | 1,405 | 1,543 |
| Hispanic | 8,811 | 9,073 |

Note: These sample size figures are the unweighted number of completed interviews in the 2002 and 2003 National Surveys on Drug Use and Health.

## Appendix 8

## National Crime Victimization Survey

Survey methodology and definitions of terms

Note: This information was excerpted from U.S. Department of Justice, Bureau of Justice Statistics, Criminal Victimization in the United States, 2002 Statistical Tables, NC.J 200561 [Online]. Available: http://www.ojp.usdoj.gov/bjs/pub/pdf/ cvus02.pdf [Mar. 3, 2004]; Criminal Victimization, 2003, NCJ 205455 (Washington, DC: U.S. Department of Justice, September 2004), pp. 11, 12; and information provided by the U.S. Department of Justice, Bureau of Justice Statistics. Non-substantive editorial adaptations have been made.

## Survey methodology

The National Crime Victimization Survey (NCVS) collects data from residents living throughout the United States, including persons living in group quarters, such as dormitories, rooming houses, and religious group dwellings. Crew members of merchant vessels, Armed Forces personnel living in military barracks, and institutionalized persons, such as correctional facility inmates, were not included in the survey. Similarly, U.S. citizens residing abroad and foreign visitors to this country were excluded. With these exceptions, individuals age 12 and older living in units selected for the sample were eligible to be interviewed.

## Data collection

Each housing unit selected for the NCVS remains in the sample for 3 years, with each of seven interviews taking place at 6 month intervals. An NCVS interviewer's first contact with a housing unit selected for the survey is in person. The interviewer may then conduct subsequent interviews by telephone.

To elicit more accurate reporting of incidents, the NCVS uses the self-respondent method, which calls for the direct interviewing of each person 12 years and older in the household. An exception is made to use proxy interviewing instead of direct interviewing for the following three cases: 12and 13 -year-old persons when a knowledgeable household member insists they not be interviewed directly, incapacitated persons, and individuals absent from the household during the entire field-interviewing period. In the case of temporarily
absent household members and persons who are physically or mentally incapable of granting interviews, interviewers may accept other household members as proxy respondents, and in certain situations nonhousehold members may provide information for incapacitated persons.

Some interviews were assigned to Com-puter-Assisted Telephone Interviewing (CATI), a data collection method that involves interviewing from centralized facilities and using a computerized instrument. In the CATI-eligible part of the sample, all interviews are done by telephone whenever possible, except for the first interview, which is primarily conducted in person. The telephone interviews are conducted by CATI facilities in Hagerstown, MD and Tucson, AZ.

## Sample design and size

Survey estimates are derived from a stratified, multi-stage cluster sample. The primary sampling units (PSUs) comprising the first stage of the sample were counties, groups of counties, or large metropolitan areas. Large PSUs were included in the sample automatically and are considered to be self-representing (SR) since all of them were selected. The remaining PSUs, called non-self-representing (NSR) because only a subset of them was selected, were combined into strata by grouping PSUs with similar geographic and demographic characteristics, as determined by the 1990 census.

The initial 1990 design consisted of 93 SR PSUs and 152 NSR strata, with one PSU per stratum seiected with probability proportionate to population size. A sample reduction was done in October 1996, reducing the number of NSR PSUs by 42 to 110 . Therefore, the current NCVS sample consists of 93 SR and 110 NSR PSUs. The NCVS sample design continued use of both 1980-and 1990-based samples through 1997. Beginning in 1998 only the 1990-based sample remains.

In the second stage of sampling, each selected stratification PSU is divided into four nonoverlapping frames (unit, area, permit, and group quarters) from which the NCVS independently selects its sample. From each selected stratification PSU, clusters of approximately four housing units or housing unit equivalents are selected from each frame. For the unit and group quarter frames, addresses come from the 1990 census files. For the permit frame, addresses come from building permit data obtained from building permit offices. This ensures that units built after the 1990 census are included in the sample. For the area frame, sample blocks come from the 1990 census files. Then, addresses are listed and sampled in the field. A new sample, based on addresses drawn
from the 2000 census, will be phased in beginning in 2005.

In order to conduct field interviews, the sample is divided into six groups, or rotations, and each group of households is interviewed once every 6 months over a period of 3 years. The initial interview is used to bound the interviews (bounding establishes a timeframe to avoid duplication of crimes on subsequent interviews), but is not used to compute the annual estimates. Each rotation group is further divided into six panels. A different panel of households, corresponding to one-sixth of each rotation group, is interviewed each month during the 6 -month period. Because the survey is continuous, newly constructed housing units are selected as described, and assigned to rotation groups and panels for subsequent incorporation into the sample. A new rotation group enters the sample every 6 months, replacing a group phased out after being in the sample for 3 years.

For the 2002 survey, approximately 42,000 households and 76,050 persons age 12 and older were interviewed. The response rates were $92 \%$ of eligible households and $87 \%$ of eligible individuals. For the 2003 survey, approximately 83,660 households and 149,040 persons age 12 and older were interviewed. The response rates were $92 \%$ of eligible households and $86 \%$ of eligible individuals.

Race and ethnicity categories
In 1997 the Office of Management and Budget introduced new guidelines for the collection and reporting of race and ethnicity data in government surveys. These methodological changes were implemented for all demographic surveys as of Jan. 1, 2003. Individuals are now allowed to choose more than one racial category. In prior years they were asked to select a single primary race.

Beginning with the 2003 NCVS data, racial categories consist of the following: white only, black only, other race only (American Indian, Alaska Native, Asian, Pacific Islander if only one of these races is given), and two or more races (all persons of any race indicating two or more races). About $0.9 \%$ of persons in the NCVS sample and about $2.6 \%$ of victims of crimes of violence identified two or more races. Also, individuals are now asked whether they are of Hispanic ethnicity before being asked about their race, and are now asked directly if they are Spanish, Hispanic, or Latino.

## Collection year estimates

Beginning with data for 1996 (and 1995 data printed in selected reports), all NCVS estimates are now based on interviews conducted during the calendar year being estimated. This procedure is referred to as
"collection year" reporting. Previously, estimates were based on victimizations occurring during a given calendar year. This procedure is referred to as "data year" reporting. This change in the reporting procedure was undertaken in an effort to expedite publication of NCVS data. NCVS respondents are interviewed every 6 months and asked to recall any crime incidents that have occurred in the 6 months since the previous interview. For this reason, 6 months of data collection beyond the end of the calendar year were needed to gather information on all incidents occurring during a calendar year. Under the collection year procedure estimates for any given year will include some incidents that actually took place during the previous calendar year, and will exclude some incidents that would have been reported in interviews conducted in the following calendar year.

Data year estimates differ slightly from calendar year estimates. The differences will be greater during periods of changing crime rates and less during periods of stable rates.

## Series victimizations

A series victimization is defined as six or more similar but separate crimes that the victim is unable to recall individually or describe in detail to an interviewer. These series crimes have been excluded from the tables because victims were unable to provide details for each separate event.

## Estimation procedure

Annual collection year estimates of the levels and rates of victimization are derived by accumulating four quarterly estimates. The estimation procedure involves the application of a base weight to the data for each individual interviewed. Readers interested in detailed information on the estimation procedure should consult the original source.

## Accuracy of estimates

The accuracy of an estimate is a measure of its total error, that is, the sum of all the errors affecting the estimate: sampling error as well as nonsampling error.

The sample used for the NCVS is one of a large number of possible samples of equal size that could have been obtained by using the same sample design and selection procedures. Estimates derived from different samples would differ from one another due to sampling variability, or sampling error.

The standard error of a survey estimate is a measure of the variation among the estimates from all possible samples. Therefore, it is a measure of the precision (reliability)
with which a particular estimate approximates the average result of all possible samples. The estimate and its associated standard error may be used to construct a confidence interval. A confidence interval is a range of numbers that has a specified probabiity that the average of all possible samples, which is the true unknown value of interest in an unbiased design, is contained within the interval. About $68 \%$ of the time, the survey estimate will differ from the true average by less than one standard error. Only 10\% of the time will the difference be more than 1.6 standard errors, and just 1 time in 100 will it be greater than 2.5 standard errors. A 95\% confidence interval is the survey estimate plus or minus twice the standard error. Thus there is a $95 \%$ chance that a result based on a complete census would fall within the confidence interval.

In addition to sampling error, the estimates are subject to nonsampling error. While substantial care is taken in the NCVS to reduce the sources of nonsampling error throughout all the survey operations, by means of a quality assurance program, quality controls, operational controls, and error-correcting procedures, an unquantified amount of nonsampling error remains.

A major source of nonsampling error is related to the inability of respondents to recall in detail the crimes that occurred during the 6 months prior to the interview. Research based on interviews of victims obtained from police files indicates that assault is recalled with the least accuracy of any crime measured by the NCVS. This may be related to the tendency of victims to avoid reporting crimes committed by offenders who are not strangers, especially if they are relatives. In addition, among certain groups, crimes that contain elements of assault could be a part of everyday life, and are therefore forgotten or not considered important enough to mention to a survey interviewer. These recall problems may result in an understatement of the actual rate of assault.

Another source of nonsampling error is the inability of some respondents to recall the exact month a crime occurred, even though it was placed in the correct reference period. This error source is partially offset by interviewing monthly and using the estimation procedure mentioned earlier. Telescoping is another problem in which incidents that occurred before the reference period are placed within the period. The effect of telescoping is minimized by using the bounding procedure previously described. The interviewer is provided with a summary of the incidents reported in the preceding interview and, if a similar incident is reported, it can be determined whether or not it is a new one by discussing it with the victim. Events that occurred after the reference period are set
aside for inclusion with the data from the following interview.

Other sources of nonsampling error can resy from other types of response mistakes, inclu ing errors in reporting incidents as crimes, misclassification of crimes, systematic data errors introduced by the interviewer, and errors made in coding and processing the data Quality control and editing procedures were used to minimize the number of errors made by the respondents and the interviewers.

Since field representatives conducting the interviews usually reside in the area in which they interview, the race and ethnicity of the field representatives generally match that of the local population. Special efforts are made to further match field representatives and the people they interview in areas where English is not commonly spoken. About $90 \%$ of all NCVS field representatives are female.

Standard errors measure only those nonsampling errors arising from transient factors affecting individual responses completely at random (simple response variance); they do not reveal any systematic biases in the data. As calculated in the NCVS, the standard errors would partially measure nonsampling error arising from some of the above sources, such as transient memory errors, or accidental errors in recording or coding answers, for example.

## Definitions of terms

Age--The appropriate age category is determined by the respondent's age on the last day of the month before the interview.

Aggravated assault--Attack or attempted attack with a weapon, regardless of whether an injury occurred, and attack without a weapon when serious injury results.

With injury--An attack without a weapon when serious injury results, or an attack with a weapon involving any injury. Serious injury includes broken bones, lost teeth, internal injuries, loss of consciousness, and any unspecified injury requiring 2 or more days of hospitalization.

Threatened with a weapon--Threat or attempted attack by an offender armed with a gun, knife, or other object used as a weapon, not resulting in victim injury.

Annual household income--The total income of the household head and all members of the household for the 12 months preceding the interview. Includes wages, salaries, net income from businesses or farms, pensions, interest, dividends, rent, and any other form of monetary income.

Assault--An unlawful physical attack or threat of attack. Assaults may be classified as aggravated or simple. Rape, attempted rape, and sexual assaults are excluded from this category, as well as robbery and attempted robbery. The severity of assaults ranges from
minor threats to incidents that are nearly fatal.

Ethnicity--A classification based on Hispanic culture and origin, regardless of race.

Head of household--A classification that defines one and only one person in each housing unit as the head. Head of household implies that the person rents or owns (or is in the process of buying) the household unit. The head of household must be at least 18, unless all members of the household are under 18 , or the head is married to someone 18 or older.

Hispanic--Persons who describe themselves as Mexican-American, Chicano, Mexican, Mexicano, Puerto Rican, Cuban, Central American, South American, or from some other Spanish culture or origin, regardless of race.

Household--A person or group of people meeting either of the following criteria: (1) people whose usual place of residence is the same housing unit, even if they are temporarily absent; (2) people staying in a housing unit who have no usual place of residence elsewhere.

Household burglary--Unlawful or forcible entry or attempted entry of a residence. This crime usually, but not always, involves theft. The illegal entry may be by force, such as breaking a window or slashing a screen, or may be without force by entering through an unlocked door or an open window. If the person entering has no legal right to be present in the structure a burglary has occurred. The structure need not be the house itself for a burglary to take place; illegal entry of a garage, shed, or any other structure on the premises also constitutes household burglary. If breaking and entering occurs in a hotel or vacation residence, it is still classified as a burglary for the household whose member or members were staying there at the time the entry occurred.

Completed burglary--To successfully gain entry to a residence by a person who has no legal right to be present in the structure, by use of force, or without force.

Forcible entry--A form of completed burglary in which force is used to gain entry to a residence. Examples include breaking a window or slashing a screen.

Unlawful entry without force--A form of completed burglary committed by someone having no legal right to be on the premises, even though no force is used.

Attempted forcible entry-A form of burglary in which force is used in an attempt to gain entry.

Incident-A specific criminal act involving one or more victims and offenders. For example, if two people are robbed at the same time and place, this is classified as two robbery victimizations but only one robbery incident.

Marital status--Every person is assigned to one of the following classifications: (1) married, which includes persons in common-law unions and those who are currently living apart for reasons other than marital discord (employment, military service, etc.); (2) separated or divorced, which includes married persons who are legally separated and those who are not living together because of marital discord; (3) widowed; and (4) never married, which includes persons whose marriages have been annulled and those who are living together and not in a common-law union.

## Metropolitan Statistical Area

 (MSA)--Office of Management and Budget defines this as a population nucleus of 50,000 or more, generally consisting of a city and its immediate suburbs, along with adjacent communities having a high degree of economic and social integration with the nucleus. MSAs are designated by counties, the smallest geographic units for which a wide range of statistical data can be obtained. However, in New England, MSAs are designated by cities and towns since these subcounty units are of great local significance and considerable data are available for them. Currently, an area is defined as an MSA if it meets one of two standards: (1) a city has a population of at least 50,000 ; (2) the Census Bureau defines an urbanized area of at least 50,000 people with a total metropolitan population of at least 100,000 (or 75,000 in New England). The Census Bureau's definition of urbanized areas, data on commuting to work, and the strength of the economic and social ties between the surrounding counties and the central city determine which counties not containing a main city are included in an MSA. For New England, MSAs are determined by a core area and related cities and towns, not counties. A metropolitan statistical area may contain more than one city of 50,000 and may cross State lines. Within this general classification unit, there are three subclassifications: urban, suburban, and rural. They are defined as follows:Urban areas--The largest city or grouping of cities in a metropolitan statistical area.

Suburban areas--A county or group of counties containing a central city, plus any contiguous counties that are linked socially and economically to the central city. Suburban areas are categorized as those portions of metropolitan areas situated "outside central cities."

Rural areas--A place not located inside a metropolitan statistical area. This category includes a variety of localities ranging from sparsely populated rural areas to cities with populations less than 50,000 .

Motor vehicle--An automobile, truck, motorcycle, or any other motorized vehicle legally allowed on public roads and highways.

Motor vehicle theft--Stealing or unauthorized taking of a motor vehicle, including attempted thefts.

Completed motor vehicle theft-The successful taking of a vehicle by an unauthorized person.

Attempted motor vehicle theft--
The unsuccessful attempt by an unauthorized person to take a vehicle.

Non-Hispanic--Persons who report their culture or origin as something other than "Hispanic" as defined above. This distinction is made regardless of race.

Nonstranger--A classification of a crime victim's relationship to the offender. An offender who is either related to, well known to, or casually acquainted with the victim is a nonstranger. For crimes with more than one offender, if any of the offenders are nonstrangers, then the group of offenders as a whole is classified as nonstranger. This category only applies to crimes that involve contact between the victim and the offender; the distinction is not made for crimes of theft since victims of this offense rarely see the offenders.

Offender--The perpetrator of a crime; this term usually applies to crimes involving contact between the victim and the offender.

Offense--A crime. When referring to personal crimes, the term can be used to refer to both victimizations and incidents.

Personal crimes--Rape, sexual assault, personal robbery, assault, purse snatching and pocket picking. Includes both attempted and completed crimes.

Personal crimes of violence--Rape, sexual assault, robbery, or assault. Includes both attempted and completed crimes; does not include purse snatching and pocket picking. Murder is not measured by the NCVS because of the inability to question the victim.

Completed violence--The sum of all completed rapes, sexual assaults, robberies, and assaults.

Attempted/threatened violence-The unsuccessful attempt of rape, sexual assault, robbery, or assault. Includes attempted attacks or sexual assaults by means of verbal threats.

Property crimes--Burglary, motor vehicle theft, or theft. Includes both attempted and completed crimes.

Purse snatching/pocket picking--Theft or attempted theft of property or cash directly from the victim by stealth, without force or threat of force.

Race--Racial categories for the 2002 survey (and earlier years) are white, black, and other. The category "other" is composed mainly of Asians, Pacific Islanders, American Indians, Aleuts, and Eskimos. The race of the head of household is used in determining the race of the household for computing household crime demographics. See discussion above for changes to the racial categories beginning in 2003.

Rape--Forced sexual intercourse including both psychological coercion as well as physical force. Forced sexual intercourse means vaginal, anal, or oral penetration by the offender(s). This category also includes incidents involving penetration using a foreign object such as a bottle. Includes attempted rapes, male as well as female victims, and both heterosexual and homosexual rape. Attempted rape includes verbal threats of rape.

Rate of victimization--See "Victimization rate."

Robbery--Completed or attempted theft, directly from a person, of property or cash by force or threat of force, with or without a weapon, and with or without injury.

Completed/property taken--The successful taking of property from a person by force or threat of force, with or without a weapon, and with or without injury.

Completed with injury--The successful taking of property from a person, accompanied by an attack, either with or without a weapon, resulting in injury.

Completed without injury-The successful taking of property from a person by force or the threat of force, either with or without a weapon, but not resulting in injury.

Attempted to take property--
The attempt to take property from a person by force or threat of force without success, with or without a weapon, and with or without injury.

Attempted without injury-
The attempt to take property from a person by force or threat of force without success, with or without a weapon, but not resulting in injury.

Attempted with injury--The attempt to take property from a person without success, accompanied by an attack, either with or without a weapon, resulting in injury.

Sexual assault--A wide range of victimizations, separate from rape or attempted rape. Includes attacks or attempted attacks generally involving unwanted sexual contact between victim and offender. Sexual assaults may or may not involve force and include such things as grabbing or fondling. Sexual assault also includes verbal threats.

Simple assault--Attack without a weapon resulting either in no injury, minor injury (for example, bruises, black eyes, cuts, scratches, or swelling), or in undetermined injury requiring less than 2 days of hospitalization. Also includes attempted assault without a weapon.

With minor injury--An attack without a weapon resulting in such injuries as bruises, black eyes, cuts, or in undetermined injury requiring less than 2 days of hospitalization.

Without injury--An attempted assault without a weapon not resulting in injury.

Stranger--A classification of the victim's relationship to the offender for crimes involving direct contact between the two. Incidents are classified as involving strangers if the victim identifies the offender as a stranger, did not see or recognize the offender, or knew the offender only by sight. Crimes involving multiple offenders are classified as involving nonstrangers if any of the offenders was a nonstranger. Since victims of theft without contact rarely see the offender, no distinction is made between strangers and nonstrangers for this crime.

Tenure--The NCVS recognizes two forms of household tenancy: (1) owned, which includes dwellings that are mortgaged, and (2) rented, which includes rent-free quarters belonging to a party other than the occupants and situations where rental payments are in kind or in services.

Theft--Completed or attempted theft of property or cash without personal contact. Incidents involving theft of property from within the sample household would classify as theft if the offender has a legal right to be in the house (such as a maid, delivery person, or guest). If the offender has no legal right to be in the house, the incident would classify as a burglary.

Completed--To successfully take without permission property or cash without personal contact between the victim and offender.

Attempted--To unsuccessfully attempt to take property or cash without personal contact.

Victim--The recipient of a criminal act, usually used in relation to personal crimes, but also applicable to households.

Victimization--A crime as it affects one individual person or household. For personal crimes, the number of victimizations is equal to the number of victims involved. The number of victimizations may be greater than the number of incidents because more than one person may be victimized during an incident. Each crime against a household is assumed to involve a single victim, the affected household.

Victimization rate--A measure of the occurrence of victimizations among a specified population group. For personal crimes, this is based on the number of victimizations per 1,000 residents age 12 and older. For household crimes, the victimization rates are calculated using the number of incidents per 1,000 households.

Victimize--To commit a crime against a person or household.

## Appendix 9

## Drug Abuse Warning Network

Methodology, estimation procedures, and data limitations

This information was excerpted from U.S. Department of Health and Human Services, Substance Abuse and Mental Health Services Administration, Emergency Department Trends from the Drug Abuse Warning Network, Final Estimates 1995-2002, Drug Abuse Warning Network Series: D-24 (Rockville, MD: U.S. Department of Health and Human Services, 2003), pp. 34, 35, 117125, 129-134, T-3, T-5; and information provided by the U.S. Department of Health and Human Services, Substance Abuse and Mental Health Services Administration. Nonsubstantive editorial adaptations have been made.

## Methodology

These data were collected by the Substance Abuse and Mental Health Services Administration through the Drug Abuse Warning Network (DAWN). The data are weighted estimates representing all drug abuserelated emergency department episodes in the 48 contiguous States, the District of Columbia, and 21 metropolitan areas. For 2002, the sample consisted of 549 eligible hospitals; 437 sample hospitals provided data to DAWN. The table below details hospital participation in DAWN and the estimates of total drug-related episodes and drug mentions for 1994-2002.

|  | Hospitals |  |  | Estimated number |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Number <br> providing <br> data | Re- <br> sponse <br> rate |  | Drug- <br> related <br> episodes | Drug <br> mentions |  |
| 1994 | 488 | $76 \%$ | 518,880 | 899,600 |  |
| 1995 | 489 | 77 | 513,429 | 899,977 |  |
| 1996 | 452 | 74 |  | 513,841 | 906,078 |
| 1997 | 465 | 77 |  | 526,671 | 941,627 |
| 1998 | 471 | 79 |  | 542,250 | 981,286 |
| 1999 | 488 | 82 |  | 554,570 | $1,013,688$ |
| 2000 | 466 | 81 |  | 601,392 | $1,098,915$ |
| 2001 | 458 | 81 |  | 638,345 | $1,165,148$ |
| 2002 | 437 | 80 |  | 670,307 | $1,209,938$ |

Hospitals eligible for DAWN are non-
Federal, short-stay general surgical and medical hospitals in the coterminous United States that have a 24-hour emergency department. The American Hospital Association's (AHA) 1984 and 1985 Annual Surveys of Hospitals were used to obtain a sampling frame. Hospitals in the sampling frame were stratified according to several characteristics.

First, the sampling frame was divided into the 21 DAWN metropolitan areas and the remainder of the country (called the National Panel). Hospitals having 80,000 or more annual emergency department visits were assigned to a single stratum for selection with certainty. Then, the remaining hospitals in the 21 metropolitan areas were classified by location--inside or outside the central city, and by whether the hospital had an organized outpatient department and/or a chemical/alcohol inpatient unit--whether they had zero, one, or both types of units. Similarly, hospitals in the National Panel were classified by the presence/absence of such units. Total eligible hospitals in the original sample numbered 685.

The number of eligible sample facilities has not remained at the original 685 because some hospitals have closed or become ineligible since the sample was selected. To preserve the integrity of the sample, a sample maintenance procedure is employed to randomly select "newly eligible" hospitals from the AHA survey each year using the same selection probabilities. This procedure allows the sample to be kept up-to-date and representative of DAWN-eligible hospitals in the coterminous United States.

The national response rate was $80 \%$ in 2002; this rate is based on the number of eligible hospitals in the sample and the number actually responding. Data from the 21 oversampled metropolitan areas were pooled with data from the National Panel to produce the national estimates.

For the purpose of reporting to the DAWN system, drug abuse is defined as the nonmedical use of a substance for psychic effect, dependence, or suicide attempt/gesture. Nonmedical use includes: the use of prescription drugs in a manner inconsistent with accepted medical practice; the use of over-the-counter drugs contrary to approved labeling; or the use of any other substance (heroin, cocaine, marijuana/ hashish, glue, aerosols, etc.) for psychic effect, dependence, or suicide.

Within each facility participating in the DAWN system, a designated DAWN reporter, usually a member of the emergency department or medical records staff, is responsible for reviewing medical charts to identify drug abuse episodes, and recording and submitting data on each case. An episode report is submitted for each drug abuse patient who visits a DAWN emergency department and meets the following criteria: (1) the patient was treated in the hospital's emergency department; (2) the patient's presenting problem(s) was induced by or related to drug use, regardless of when the drug use occurred; (3) the case invoived the use of an illegal drug or the use of a legal
drug or other chemical substance for nonmedical purposes; and (4) the patient's reason for using the substance(s) included one of the following: dependence, suicide attempt or gesture, or psychic effects. Each report of a drug abuse episode includes demographic information about the patient and information about the circumstances of the episode. In addition to drug overdoses, reportable emergency department episodes may result from the chronic effects of habitual drug use or from unexpected reactions. Unexpected reactions include cases where the drug's effect was different than anticipated (e.g., caused hallucinations). DAWN cases do not include accidental ingestion or inhalation of a substance with no intent of abuse, or adverse reactions to prescription or over-the-counter medications taken as prescribed. Up to four different substances, in addition to alcohol-in-combination, can be specified for each episode. It should be noted that alcohol is reported to DAWN only when used in combination with a reportable substance. It also should be noted that episodes involving children under 6 years of age are not reported to DAWN.

A drug episode is defined as an emergency department visit that was induced by or related to the use of an illegal drug, or the nonmedical use of a legal drug or substance for persons age 6 and older. The number of emergency department episodes reported in DAWN is not equivalent to the number of individuals involved. One person may make repeated visits to an emergency department or to several emergency departments, thus producing a number of episodes. No patient identifiers are collected, therefore it is impossible to determine the number of individuals involved in the reported episodes.

A drug mention refers to a substance that was mentioned (recorded) during a drugrelated emergency department episode. In addition to alcohol-in-combination, up to four substances may be reported for each drugrelated episode; thus, the total number of mentions exceeds the total number of episodes. It should be noted that a particular drug mentioned may or may not be the sole or confirmed "cause" of the episode. Even when only one substance is reported for an episode, allowance still should be made for reportable drugs not mentioned or for other contributory factors.

## Estimation procedures

The national estimates of total emergency department drug episodes and drug mentions are obtained by adding the estimates from the 21 metropolitan areas and the estimate from the National Panel for each estimation category. The weights are calculated each quarter for each hospital in the sample and are the product of a
three-component model that considers (1) the base sampling weight calculated as the reciprocal of the sampling probability; (2) an adjustment for nonresponse, based either on complete nonparticipation or failure to provide data for all the reporting days in a given time period; and (3) a correction factor, applied within metropolitan areas, that adjusts the total number of emergency department visits among participating sample hospitals to the fotal for the population of hospitals as determined from the sampling frame.

## Revised estimates

DAWN estimates for 1994-2000 have been revised as a result of improvements in the coding and classification of drugs mentioned in emergency department visits. Revisions to estimates published previously are the result of a major change in the underlying method by which drugs are coded and classified in DAWN. DAWN relies on a detailed "drug vocabulary" to categorize the thousands of substances that are reported each year. The drug vocabulary is the language--the codes and terminology--that DAWN uses to record and classify drugs and other substances collected from emergency departments. It was necessary to implement substantial changes to the existing vocabulary to ensure that reported substances are accurately and consistently classified.

In 1999, an internal DAWN workgroup composed of DAWN staff and representatives from two DAWN contractors convened to evaluate the old DAWN drug vocabulary. The workgroup concluded that an externally maintained code set-one designed and maintained by subject matter experts apart from DAWN--would serve DAWN's needs better than a system developed and maintained in-house.

The drug terminology produced by Multum Information Services Inc., a private sector firm, provided a framework into which components that are unique to substance abuse and DAWN could be added. These include street names for illicit substances, metabolites commonly reported in DAWN mortality data, household products and other non-medicinal substances, and substances classified based on their route of administration as "inhalants."

In 2000, DAWN adopted the Multum Lexicon, a drug vocabulary and classification tool developed and maintained by Multum Information Services, Inc. Multum distributes the Lexicon (a complete database in Microsoft Access format) and regular updates through its website. DAWN uses only a fraction of the Multum Lexicon because DAWN case reports typically lack the most precise drug product information. For example,

DAWN case reports supply drug names, but not strength or dosage, so it is not feasible to code drugs at the level of detail supported by the Multum Lexicon. On the other hand, the specificity of drug information reported to DAWN varies depending on the detail available in the source documents, that is, emergency department medical records or death investigation files. The Multum Leixcon not only accommodates such variability but it provides a consistent method for aggregating very detailed information (such as brands) into consistent generic drug categories.

To accommodate DAWN data on substances that are not part of the Multum Leixcon, DAWN staff adopted the Multum Lexicon structure and designed a drug database that incorporates Multum Lexicon content for generic names, brand or trade names, and 3-level nested categories, and adds other DAWN reportable substances in a compatible structure.

The result of this combination of the Multum Lexicon and DAWN-specific substances is referred to as the DAWN Drug Reference Vocabulary. All drug entries in DAWN were translated into the new vocabulary. When possible, automated procedures were used to make this translation. When necessary, drug entries were assigned manually. All assignments were subjected to multiple, iterative layers of quality control. New DAWN data files, beginning with the 1994 data, were developed and revised estimates were produced. The revised estimates for total emergency department episodes deviate only slightly (no more than $0.08 \%$ in any year) from previously published estimates.

## Preliminary versus final estimates

Final estimates are produced once a year when all hospitals participating in DAWN have submitted their data for that year and when additional ancillary data used in estimation become available. The differences between preliminary and final estimates are due to several factors:
(1) Final estimates include data from a small number of late-reporting hospitals. Data from some late-reporting facilities are received for each time period. Therefore, later files will usually include more complete data (i.e., have a higher response rate).
(2) Additional hospitals are added to the sample and incorporated into the final estimates for a given year (not the preliminary estimates for that same year). Most of these hospitals are "newly eligible" because they became DAWN eligible sometime after the original sample was selected. The final DAWN estimates are produced after the most current AHA's Annual Survey of Hospitals file is received. This file was used initially
to establish a sampling frame for DAWN. Subsequently, the most current AHA file is used once a year to maintain the representativeness of the sample. Between the releases of the preliminary and final estimates, the use of the newer AHA survey can result in hospitals being added to the sample and incorporated into the final estimates.
(3) Data from the most current AHA file are used to produce the final weights.

## Data limitations

When producing estimates from any sample survey, two types of errors are possible-sampling and nonsampling errors. The sampling error of an estimate is the error caused by the selection of a sample instead of utilizing a census of hospitals. Sampling error is reduced by selecting a large sample or by using efficient sample design and estimation strategies such as stratification, optimal allocation, and ratio estimation. Nonsampling errors occur from nonresponse, difficulties in the interpretation of the collection form, coding errors, computerprocessing errors, errors in the sampling frame, and reporting errors. Many procedures are in place to minimize nonsampling errors such as data auditing and periodic retraining of data coilectors. Further, nonrespondent hospitals are identified for additional recruitment. Late reporters are assigned for priority data collection and respondents with changes in reporting are designated for followup.

It also is important to recognize that DAWN does not provide a complete picture of medical problems associated with drug use, but rather focuses on the impact that these problems have on hospital emergency departments in the United States. If a person is admitted to another part of the hospital for treatment, treated in a physician's office, or treated at a drug treatment center, the episode is not included in DAWN.

## Appendix 10

Arrestee Drug Abuse Monitoring
Methodology and survey sampling information

Note: The following information was excerpted from U.S. Department of Justice, National Institute of Justice, 2000 Arrestee Drug Abuse Monitoring: Annual Report,
NCJ 193013, pp. 3, 4, 9-15; Preliminary
Data on Drug Use and Related Matters
Among Adult Arrestees and Juvenile Detainees, 2002, p. 1 and Table 1; Drug and Alcohol Use and Related Matters Among Arrestees 2003, p. 3 and Table 1 (Washington, DC: U.S. Department of Justice); and information provided by the U.S. Department of Justice, National Institute of Justice. Non-substantive editorial adaptations have been made.

## Methodology

The Arrestee Drug Abuse Monitoring (ADAM) program measures the extent of drug and alcohol use and drug involvement among persons arrested and booked as adults in selected city and county detention facilities operated by local police and sheriffs' departments. The data are collected in booking facilities in participating city/county areas. The participating counties, i.e., ADAM sites, are selected according to a standard protocol involving numerous site requirements. For example, each ADAM site must provide access to all booking facilities in the jurisdiction so that every booked arrestee has some probability of being included in the sample. In addition, the site must provide case flow information for each booking facility so that a sampling plan can be established. Sites also must provide access to interview rooms that ensure confidentiality.

Data collection occurs at each ADAM site by trained civilian interview teams who are not law enforcement officials or booking facility staff. Arrestees are approached usually on the same day but always within 48 hours of their arrest and asked to participate in the study. The interviewers conduct personal interviews that are approximately 30 minutes in length. After the interview, each arrestee is asked to provide a urine sample, which is analyzed to detect drug use. The interviews and the urine specimens are kept anonymous and confidential, and all participation is voluntary. At most sites, more than $80 \%$ of the individuals approached agree to participate and, of those, more than $80 \%$ agree to provide urine specimens.

Data collection takes place four times a year at each site, once each calendar quarter. Data collection periods are generally two consecutive weeks each quarter. Data are collected from adult male and adult female arrestees. In the context of the ADAM study, "adult" refers to the facilities where the data are collected, not necessarily the age of the arrestee. Some arrestees who are less than 18 years of age are booked as adults because of the type of offense involved. Male and female arrestees may be booked in the same or in separate facilities, depending on the local jurisdiction. The adult male arrestees were selected through probabilitybased sampling and the data are weighted according to methods discussed below. However, female arrestees were selected through purposive sampling and the data are self-weighted. As a result, adult male and female data are not fully comparable within sites. Also, because the number of females arrested is much lower than the number of males, some ADAM sites do not interview female arrestees. Therefore, data for female arrestees are not shown in SOURCEBOOK.

Beginning with the 2000 data collection, a redesign of the ADAM program was fully implemented. A probability-based study design was adopted, catchment areas were redefined to make them uniform among the sites, and county-level and facility-level sampling plans were implemented to ensure that all arrestees have some probability of being included in the study.

ADAM sites typically are named for the largest city in the area. However, the catchment area has been broadened to encompass the entire county at all sites.

A sample of booking facilities is drawn at each site. The method varies depending on the number of booking facilities in a county. For counties having only one facility, all cases are drawn. Sites with two to five facilities are stratified by size and cases are sampled proportionate to the size of the facility. For sites having more than five, facilities are clustered by size and those in each cluster are sampled proportionate to size.

The method for selecting arrestees is uniform for all facilities. There is a target number of interviews to be completed each quarter at each site. A portion of arrestees are selected at the time of day when the volume of arrestees is high, others are randomly selected from arrests occurring during the rest of the 24 -hour period, and arrestees who cannot be interviewed because they were released early are represented through statistical imputation.

To ensure accurate weighting of cases to represent the entire arrestee population, data were collected on all arrests processed at each booking facility during the two-week interview period. The probability-based sampling of male arrestees and the application of weights result in statistically reliable estimates for the male arrestee population of the target counties.

The ADAM program uses EMIT (Enzyme Multiplied Immunoassay Testing) to screen for the presence of drugs in urine. EMIT tests have been shown to be one of the most consistently accurate drug testing methods, with greater than $95 \%$ accuracy and specificity for most drugs. Most urine specimens are collected the day of arrest but all are collected within 48 hours of arrest. Specimens are removed daily from the ADAM site facilities. The urine testing for ADAM focuses on the "NIDA-5" drugs, which are cocaine, marijuana, methamphetamine, opiates, and phencyclidine (PCP). These five substances comprise the panel of commonly used illegal drugs identified by the National Institute on Drug Abuse.

Table. ADAM sample sizes, male arrestee interviews, 2003

| Primary city | County catchment/ study area | Total interviews | Weighted number |
| :---: | :---: | :---: | :---: |
| Total |  | 22,666 | 180,455 |
| Albany, NY | Capital area | 450 | 2,799 |
| Albuquerque, NM | Bernalillo County | 535 | 3,265 |
| Anchorage, AK | Anchorage Borough | 322 | 943 |
| Atlanta, GA | Fulton and DeKalb Counties | 869 | 8,169 |
| Birmingham, AL | Jefferson County | 530 | 1,749 |
| Boston, MA | Suffolk County | 111 | 452 |
| Charlotte, NC | Charlotte-Metro | 599 | 3,754 |
| Chicago, IL | Cook County | 930 | 28,672 |
| Cleveland, OH | Cuyahoga County | 736 | 2,915 |
| Dallas, TX | Dallas County | 1,497 | 8,960 |
| Denver, CO | Denver County | 580 | 2,573 |
| Des Moines, IA | Polk County | 430 | 914 |
| Honolulu, HI | Oahu | 370 | 1,502 |
| Houston, TX | Harris County | 87 | 1,894 |
| Indianapolis, IN | Marion County | 498 | 6,842 |
| Las Vegas, NV | Clark County | 981 | 5,347 |
| Los Angeles, CA | Los Angeles | 349 | 957 |
| Miami, FL | Miami-Dade County | 294 | 3,244 |
| Minneapolis, MN | Hennepin County | 677 | 3,437 |
| New Orleans, LA | Orleans Parish | 522 | 7,505 |
| New York, NY | Manhattan | 730 | 10,529 |
| Oklahoma City, OK | Oklahoma County | 582 | 2,926 |
| Omaha, NE | Douglas County | 537 | 4,928 |
| Philadelphia, PA | County of Philadelphia | 684 | 1,919 |
| Phoenix, AZ | Maricopa County | 1,347 | 11,645 |
| Portland, OR | Multnomah County | 564 | 2,703 |
| Rio Arriba, NM | Rio Arriba County | 133 | 200 |
| Sacramento, CA | Sacramento County | 540 | 5,223 |
| Salt Lake City, UT | Salt Lake County | 631 | 2,844 |
| San Antonio, TX | Bexar County | 611 | 8,778 |
| San Diego, CA | San Diego County | 730 | 7,523 |
| San Jose, CA | Santa Clara County | 715 | 4,599 |
| Seattle, WA | King County | 731 | 4,758 |
| Spokane, WA | Spokane County | 372 | 2,006 |
| Tampa, FL | Hillsborough and Pinellas Counties | 801 | 6,310 |
| Tucson, AZ | Pima County | 447 | 2,657 |
| Tulsa, OK | Tulsa County | 695 | 3,664 |
| Washington, DC | Washington, DC | 358 | 1,148 |
| Woodbury, IA | Woodbury County | 91 | 202 |

Note: The number of sites participating in the ADAM program varies
from year to year.

## Appendix 11

Federal Justice Statistics Program Methodology and definitions of terms

Note: The following was excerpted from U.S. Department of Justice, Bureau of Justice Statistics, Compendium of Federal Justice Statistics, 2001, NCJ 201627 (Washington, DC: U.S. Department of Justice, 2003), pp. 109-123. Non-substantive editorial adaptations have been made.

## Methodology

The data are from the Bureau of Justice Statistics' (BJS) Federal Justice Statistics Program database. The database is constructed from source files provided by the Executive Office for U.S. Attorneys, the Administrative Office of the United States Courts (AO), the United States Sentencing Commission, the U.S. Marshals Service, the Drug Enforcement Administration, and the Federal Bureau of Prisons. The AO also maintains data collected by the Federal Pretrial Services Agency, the U.S. Courts of Appeals, and the Federal probation and supervision service.

Some records in the Federal Justice Statistics database are matched according to a statistically weighted combination of names, other personal identifiers, dates of court appearances, types of offenses, and other relevant information contained in the files. Using the matched data files, it is possible to combine information about two or more stages of the processing of a criminal matter or case, from the prosecutor's decision of whether to file a criminal case, through adjudication, and, if the defendant is convicted, through prison and/or supervised release. Unless otherwise noted, cases have been selected according to some event that occurred during the 2001 Federal fiscal year (Oct. 1, 2000 through Sept. 30, 2001).

The unit of analysis is a combination of a person (or corporation) and a matter or case. For example, if a single person is involved in three different criminal cases during the time period specified in the table, he or she is counted three times in the tabulation. Similarly, if a single criminal case involves a corporate defendant and four individual defendants, it is counted five times in the tabulation.

The unit of analysis for incarceration, probation, parole, or other supervised release is a person entering custody or supervision, or a person leaving custody or supervision. For example, a person convicted in two con-
current cases and committed once to the custody of the Federal Bureau of Prisons in the indicated time period is counted as one admission to a term of incarceration. A person who terminates probation twice in the indicated time period, such as with a violation and again after reinstatement, is counted as two terminations of probation.

Generally, the tables include both individual and organizational defendants. Organizational defendants are not included in tables describing defendants under pretrial release and detention, defendants sentenced to incarceration, and offenders under postconviction supervision. Juvenile offenders are included in the reported statistics.

The offense classifications in the tables are based on the classification system used by the AO. Specific offenses in the AO classification are combined to form the BJS categories in the tables. These categories are designed to be as consistent as possible with BJS publications on State criminal justice systems. Offense categories for tables focusing on prisoners are based on combinations of offense designations used by the Bureau of Prisons. They are similar to the BJS categories used in the other tables but may not be directly comparable.

Where more than one offense is charged or adjudicated, the most serious offense, the one that may or did result in the most severe sentence, is used to classify the offense. In tables focusing on prisoners, the data are classified according to the conviction offense having the longest sentence imposed, or if equal sentences were imposed or there was no imprisonment, to the offense carrying the highest $A O$ offense severity code. The offense description may change as a case goes through the criminal justice process. Tables indicate whether charged or adjudicated offenses are used.

The availability of particular items of information is affected by the data source. Data on prosecutors' decisions prior to court filing are provided for cases investigated by U.S. attorneys, but not for those handled by other litigating divisions of the U.S. Department of Justice. Criminal Division cases enter the database once they are filed in U.S. District Court, however. Many items of social and demographic information come from presentence investigation records, supervision records, or sentencing records, and are available only for arrested defendants who were convicted and/or began serving a sentence involving supervised release. This particularly affects sex, race, ethnicity, and prior record information.

Time served in prison is the number of months from a prisoner's arrival into jurisdiction of the Bureau of Prisons until first
release from prison, plus any jail time served and credited. The calculation is the same as that currently used by the Bureau of Prisons. Because other publications may include different groups of prisoners, calculate time served differently, or use a different offense classification, these data may differ from estimates of time served in previous publications by the Bureau of Prisons or in publications based on other data sources.

These data are designed to permit the user to make valid comparisons within each table and to compare percentages (but not raw totals) across tables. The total number of subjects/defendants that is based on records linked between two files is generally less than the total number of records in either source file. Accordingly, comparisons of absolute numbers across two or more tables, or between these data and other data sources, are not necessarily valid.

In addition, readers should note that offender characteristics, classifications of lengths of prior sentences of incarceration, and time served differ from the 1993 and prior years' Federal justice compendia. Therefore, comparisons of these elements with the 1993 compendium or compendia prior to 1993 should not be attempted.

## Definitions of terms

Agriculture--Violation of Federal statutes on agriculture and conservation, for example, violations of the Agricultural Acts, Insecticide Act, and Packers and Stockyards Act; also violation of laws concerning plant quarantine and the handiing of animals pertaining to research.

Antitrust--Violation of Federal antitrust statutes, which aim to protect trade and commerce from unlawful restraints, price fixing, monopolies, and discrimination in pricing or in furnishing services or facilities.

Arson--Willfully or maliciously setting, or attempting to set, fire to any property within the special maritime and territorial jurisdiction of the United States.

Assault--Intentionally inflicting, attempting, or threatening to inflict bodily injury to another person; applies to anyone within the special maritime and territorial jurisdiction of the United States or to any Government official, foreign official, official guest, internationally protected person, or any officer or employee of the United States designated in 18 U.S.C. 1114; also certain violations of the Fair Housing Act of 1968.

Bail--The sum of money promised as a condition of release, to be paid if a released defendant defaults.

Bribery--Offering or promising anything of value with intent to unlawfully influence a public official, bank employee, officer or employee of the Government, witness, or any common carrier as well as soliciting or
accepting such an offer. Soliciting or receiving anything of value in consideration of aiding a person to obtain employment in the U.S. Government. Receiving or soliciting any remuneration, directly or indirectly, in cash or in kind in return for purchasing, ordering, leasing, or recommending to purchase any good, service, or facility.

Burglary--Breaking and entering into another's property with intent to steal within the special maritime and territorial jurisdiction of the United States; includes breaking and entering into any official bank, credit union, savings and loan institution, post office, vessel or steamboat assigned to the use of mail service, or personal property of the United States, or breaking the seal or lock of any carrier facility containing interstate or foreign shipments of freight or express.

Civil rights--Violations of civil liberties such as the personal, natural rights guaranteed and protected by the U.S. Constitution. Includes the Civil Rights Acts, such as those enacted after the Civil War, and more recently in 1957 and 1964.

Collateral bond--An agreement made by a defendant as a condition of pretrial release that requires the defendant to post property valued at the full bail amount as an assurance of his or her intention to appear at trial.

Communication--Violations covering areas of communication such as the Communications Act of 1934 (including wiretapping and wire interception). A communication is ordinarily considered to be a deliberate interchange of thoughts or opinions between two or more persons.

Conditional release--Release from detention contingent on any combination of restrictions that are deemed necessary to guarantee a defendant's appearance at trial or the safety of the community.

Conspiracy--An agreement by two or more persons to commit or to effect the commission of an unlawful act or to use unlawful means to accomplish an act that is not in itself unlawful; also any overt act in furtherance of the agreement. A person charged with conspiracy is classified under the substantive offense alleged.

Counterfeiting--Falsely making, forging, or altering any obligation or security of the United States, foreign obligation or security, coin or bar stamped at any mint in the United States, money order issued by the U.S. Postal Service, domestic or foreign stamp, or seal of any department or agency of the United States. Passing, selling, attempting to pass or sell, or bringing into the United States any of the above falsely made articles. Making, selling, or possessing any plates or stones used for printing counterfeit obligations or securities of the United States, foreign obligations or securities, Government transportation requests, or postal stamps; or knowingly and intentionally trafficking in
falsified labels affixed to phonorecords, motion pictures, or audio visual works.

Customs laws--Violations regarding taxes that are payable upon goods and merchandise imported or exported. Includes the duty, toll, tribute, or tariff payable upon merchandise exported or imported.

Deposit bond--An agreement made by a defendant as a condition of release that requires the defendant to post a fraction of the bail before he or she is released.

Detention--The legally authorized confinement of persons after arrest, whether before or during prosecution. Only those persons held 2 or more days are classified as detained.

Drug offenses--Manufacture, import, export, distribution, or dispensing of a controlled substance (or counterfeit substance), or the possession of a controlled substance (or counterfeit substance) with intent to manufacture, import, export, distribute, or dispense. Also using any communication facility that causes or facilitates a felony under title 21. Also furnishing of fraudulent or false information concerning prescriptions as well as any other unspecified drug-related offense.

Embezzlement--Fraudulently appropriating property by a person to whom such property has been lawfully entrusted. Includes offenses committed by bank officers or employees; officers or employees of the U.S. Postal Service; officers of lending, credit, or insurance institutions; any officer or employee of a corporation or association engaged in commerce as a common carrier; court officers of the U.S. courts; or officers or employees of the United States. Stealing from employment and training funds, programs receiving Federal funds, and Indian tribal organizations; or selling, conveying, or disposing of any money, property, records, or thing of value to the United States or any department thereof without authority.

Escape--Departing or attempting to depart from the custody of a correctional institution; a judicial, correctional, or law enforcement officer; or a hospital where one is committed for drug abuse and drug dependency problems. Knowingly advising, aiding, assisting, or procuring the escape or attempted escape of any person from a correctional facility, an officer, or the abovementioned hospital as well as concealing an escapee. Providing or attempting to provide to an inmate in prison a prohibited object or making, possessing, obtaining, or attempting to make or obtain a prohibited object. Instigating, assisting, attempting to cause, or causing any mutiny or riot at any Federal penal, detention, or correctional facility or conveying into any of these institutions any dangerous instrumentalities.

Explosives--Violations of Federal law involving importation, manufacture, distribution, and storage of explosive material. Includes unlawful receipt, possession, or
transportation of explosives without a license, where prohibited by law, or using explosives during commission of a felony. Also includes violations relating to dealing stolen explosives, using mail or other form of communication to threaten an individual with explosives, and possessing explosive materials at an airport.

Failure to appear--Willful absence from any court appointment.

Felony--A criminal offense punishable by death or imprisonment for a term exceeding 1 year.

Financial conditions--Monetary conditions upon which release of a defendant before trial is contingent. Includes deposit bond, surety bond, and collateral bond (see individual definitions).

Food and drug--Violations of the Federal Food, Drug, and Cosmetic Act, such as regulations for clean and sanitary movement of animals, adulteration or misbranding of any food or drug, failure to transmit information about prescription drugs, and intent to defraud and distribute adulterated material.

Forgery--Falsely and with intent to defraud, making or materially altering, or possessing with intent to pass off as genuine any U.S. Postal Service money order; postmarking stamp or impression; obligation or security of the United States; foreign obligation, security, or bank note; contractor's bond, bid, or public record; seal of a court or any department or agency of the Government; the șignature of a judge or court officer; ships' papers; documents on entry vessels; deed; power of attorney; customs matters; coin or bar; and so forth. Also making, possessing, selling, or printing plates or stones for counterfeiting obligations or securities.

Fraud--Unlawfully depriving a person of his or her property or legal rights through intentional misrepresentation of fact or deceit other than forgery or counterfeiting. Includes violations of statutes pertaining to lending and credit institutions, the U.S. Postal Service, interstate wire, radio, television, computer, credit card, veterans benefits, allotments, bankruptcy, marketing agreements, commodity credit, the Securities and Exchange Commission, railroad retirement, unemployment, Social Security, food stamps, false personation, citizenship, passports, conspiracy, and claims and statements, excluding tax fraud. Excludes fraud involving tax violations that are shown in a separate category under "public-order, other offenses."

Gambling--Transporting, manufacturing, selling, possessing, or using any gambling device in the District of Columbia or any possession of the United States or within Indian country or the special maritime and territorial jurisdiction of the United States. Also transporting gambling devices in the jurisdiction of the United States, (except under authority of the Federal Trade

Commission or any State that has a law providing for their exemption from these provisions), transmitting wagering information in interstate or foreign commerce, interstate transporting of wagering paraphernalia, importing or transporting lottery tickets, or mailing lottery tickets or related matter.

Hispanic--Ethnic category based on classification by reporting agency. Hispanic persons may be of any race.

Immigration--Offenses involving illegal entrance into the United States, illegally reentering after being deported, willfully failing to deport when so ordered, willfully remaining beyond days allowed on conditional permit, or falsely representing oneself as a citizen of the United States. Includes violations relating to agricultural workers and to limitations on immigrant status. Also bringing in or harboring any aliens not duly admitted by an immigration officer.

Incarceration--Any sentence of confinement, including prison, jail, and other residential placements.

Kidnaping--Unlawfully seizing any person, for ransom or reward, except in the case of a minor by a parent. Includes receiving, possessing, or disposing of any money or other property that has been delivered as ransom or reward in connection with a kidnaping as well as conspiring to kidnap. Includes kidnaping or attempting to kidnap any Government official, the President of the United States, the President-elect, the Vice President, any foreign official, any official guest, or any internationally protected person.

Larceny--Taking and carrying away with intent to steal any personal property of another. Stealing, possessing, converting to one's own use, or illegally selling or disposing of anything of value to the United States or any of its departments or agencies. Stealing anything of value from a bank, the U.S. Postal Service, or any interstate or foreign shipments by carrier. Receiving or possessing stolen property or pirate property. Stealing or obtaining by fraud any funds, assets, or property that belongs to or is entrusted to the custody of an Indian tribal organization. Excludes the transportation of stolen property.

Liquor--Violations of Internal Revenue Service laws on liquor as well as violations of liquor laws not cited under these laws, such as dispensing or unlawfully possessing intoxicants in Indian country; transporting intoxicating liquors into any State, territory, district, or possession where sale is prohibited; shipping packages containing unmarked and unlabeled intoxicants; shipping liquor by C.O.D.; knowingly delivering a liquor shipment to someone other than to whom it has been consigned; and violating in any way the Federal Alcohol Administration Act.

Mailing or transportation of obscene materials--Knowingly using the mail for mailing obscene or crime-inciting matter. Also
transporting for sale or distribution, importing, or transporting any obscene matter in interstate or foreign commerce.

Migratory birds--Taking, killing, or possessing migratory birds, or any part, nest, or egg thereof, in violation of Federal regulations or the transportation laws of the State, territory, or district from which the bird was taken. Misuse or nonuse of a migratory-bird hunting and conservation stamp.

Misdemeanor--A criminal offense punishable by a jail term not exceeding 1 year and any offenses specifically defined as a misdemeanor by the Administrative Office of the United States Courts for the purposes of data collection. (Includes offenses previously called minor offenses that were reclassified under the Federal Magistrates Act of 1979.)

Mixed sentence--A sentence requiring the convicted offender to serve a term of incarceration, followed by a term of probation. Unless otherwise noted, offenders receiving mixed sentences are included in both incarceration and probation categories.

Most serious offense--The offense with the greatest potential sentence. For Federal prisoners, the offense with the longest term of incarceration actually imposed.

Motor vehicle theft--Interstate or foreign transporting, receiving, concealing, storing, bartering, selling, or disposing of any stolen motor vehicle or aircraft.

Murder--The unlawful killing of a human being with malice aforethought, either expressed or implied. Nonnegligent manslaughter is the unlawful killing of a human being without malice; includes committing or attempting to commit murder (first or second degree) or voluntary manslaughter within the special maritime and territorial jurisdiction of the United States. Killing or attempting to kill any Government official, the President of the United States, the President-elect, the Vice President, any officers and employees of the United States, any foreign officials, any official guests, or any internationally protected persons. As applied to the owner or charterer of any steamboat or vessel, knowingly and willfully causing or allowing fraud, neglect, misconduct, or violation of any law resulting in loss of life.

National defense--Violations of the national defense laws of the Military Selective Service Act, the Defense Production Act of 1950, the Economic Stabilization Act of 1970 (which includes prices, rents, and wages), the Subversive Activities Control Act, alien registration, treason (including espionage, sabotage, sedition, and the Smith Act of 1940), also violations relating to energy facilities, curfew and restricted areas, exportation of war materials, trading with an enemy, illegal use of uniform, and any other violations of the Federal statutes concerning national defense.

Negligent manslaughter--Causing the death of another, within the special maritime and territorial jurisdiction of the United States
by wanton or reckless disregard for human life. Also negligent manslaughter of any Government official, the President of the United States, the President-elect, the Vice President, any officers and employees of the United States, any foreign officials, any official guests, or any internationally protected persons. Also includes misconduct, negligence, or inattention to duties by ship officers on a steamboat or vessel resulting in death to any person.

Nolo contendere--Defendant's plea in a criminal case indicating that he or she will not contest charges, but not admitting or denying guilt.

Nonviolent sex offenses--Transporting, coercing, or enticing any individual (including minors) to go from one place to another in interstate or foreign commerce, in the District of Columbia, or in any territory or possession of the United States with the intent and purpose to engage in prostitution, or any sexual activity for which any person can be charged with a criminal offense.

Offense--Violation of U.S. criminal law. Where more than one offense is charged, the offense with the greatest potential sentence is reported.

Other property offenses--Offenses that involve the destruction of property moving in interstate or foreign commerce in the possession of a common or contract carrier. The malicious destruction of Government property, or injury to U.S. postal property such as mailboxes or mailbags. Trespassing on timber and Government lands also is included.

Other public-order offenses-Violations of laws pertaining to bigamy; disorderly conduct on the U.S. Capitol grounds; civil disorder; and travel to incite riot. Included in "public-order, non-regulatory offenses."

Perjury--Making any false material declarations under oath in any proceeding before or ancillary to any court or grand jury of the United States. Includes knowingly or willfully giving false evidence or swearing to false statements under oath, or by any means procuring or instigating any person to commit perjury. Also includes any officers and employees of the Government listed under 13 U.S.C. 21-25 who willfully or knowingly furnish or cause to be furnished any false information or statement.

Personal recognizance--Pretrial release condition in which the defendant promises to appear at trial and no financial conditions are required to be met

Pretrial release--The release of a defendant from custody, for all or part of the time, before or during prosecution. The defendant may be released either on personal recognizance, unsecured bond, or on financial conditions. Includes defendants released within 2 days after arrest and defendants who were initially detained but
subsequently released after raising bail or having release conditions changed at a subsequent hearing.

Property offenses, fraudulent-Property offenses involving the elements of deceit or intentional misrepresentation. Specifically includes embezzlement, fraud (excluding tax fraud), forgery, and counterfeiting.

Property offenses, non-fraudulent-Offenses against property: burglary, larceny, motor vehicle theft, arson, transportation of stolen property, and other property offenses (destruction of property and trespassing). These offenses are termed "non-fraudulent" only for the purpose of distinguishing them from the category "property offenses, fraudulent," above.

## Public-order, non-regulatory

offenses--Offenses concerning weapons; immigration; tax law violations (tax fraud); bribery; perjury; national defense; escape; racketeering and extortion; gambling; liquor; mailing or transporting of obscene materials; traffic; migratory birds; conspiracy, aiding and abetting, and jurisdictional offenses; and "other public-order offenses." These offenses are termed "non-regulatory" only for the purpose of distinguishing them from the category "public-order, regulatory offenses," below.

Public-order, regulatory offenses-Violations of regulatory laws and regulations in agriculture, antitrust, labor, food and drug, motor carrier, and other regulatory offenses that are not specifically listed in the category-"public-order, non-regulatory offenses" above.

Racketeering and extortion--
Racketeering is demanding, soliciting, or receiving anything of value from the owner, proprietor, or other person having a financial interest in a business, by means of a threat or promise, either expressed or implied. Extortion is the obtaining of money or property from another, without his or her consent, induced by the wrongful use of force or fear. Includes using interstate or foreign commerce or any facility in interstate or foreign commerce to aid racketeering enterprises such as arson, bribery, gambling, liquor, narcotics, prostitution, and extortionate credit transactions; obtaining property or money from another, with his or her consent induced by actual or threatened force; violence, blackmail, or committing unlawful interference with employment or business; transmitting by interstate commerce or through the mail any threat to injure the property, the person, or the reputation of the addressee or of another; or kidnaping any person with intent to extort.

Robbery--Taking anything of value from the person or presence of another by force or intimidation, within the special maritime and territorial jurisdiction of the United States. Includes robbery of bank property, U.S. postal property, or personal property of
the United States. Assaulting or putting the life of any person in jeopardy by the use of a dangerous weapon while committing or attempting to commit such robbery.

Sexual abuse--Rape, assault with intent to commit rape, and carnal knowledge of a female under 16 who is not one's wife, within the territorial and special maritime jurisdiction of the United States. Also includes cases of sexual abuse, including abuse of a minor and abuse in Federal prisons.

Supervised release--Under the Sentencing Reform Act of 1984, a form of postimprisonment supervision to be imposed by the court as a part of the sentence of imprisonment at the time of initial sentencing Unlike parole, a term of supervised release does not replace a portion of the sentence of imprisonment, but rather is an order of supervision in addition to any term of imprisonment imposed by the court.

Surety bond--An agreement by the defendant as a condition of release that requires a third party (usually a bail bondsman) to promise to pay the full bail amount in the event that the defendant fails to appear.

Tax law violations--Tax fraud offenses such as income tax evasion and fraud; counterfeiting any stamps with intent to defraud the collection or payment of tax; willfully failing to collect or pay tax; failure to obey summons to produce any papers concerning taxes; failing to furnish receipts for employees of tax withheld; failing to furnish information relating to certain trusts, annuity, and bond purchase plans; putting fraudulent or false statements on tax returns; and not obtaining a license for a business that makes a profit from foreign items. Also included are violations of excise and wagering tax laws and other laws from the Internal Revenue Service code.

Technical violation--Failure to comply with conditions of pretrial release, probation, or parole, excluding alleged new criminal activity. May result in revocation of release status. Examples of conditions that may be imposed and then violated include remaining within a specified jurisdiction, or appearing at specified intervals for drug tests.

Threats against the President-Knowingly and willfully depositing in the mail, at any post office, or by any letter carrier a letter, paper, writing, print, missive, or document containing any threat to take the life of or to inflict bodily harm upon the President, Vice President, or any other officer in order of succession to the Presidency. Knowingly and willfully making such threats in any way to the above-named people.

Traffic offenses--Driving while intoxicated or any moving or parking violation on Federal lands.

Trafficking--Knowingly and intentionally importing or exporting any controlled substance in schedules I-V (as defined by 21 U.S.C. 812). Manufacturing, distributing,
dispensing, selling, or possessing with intent to manufacture, distribute, or sell a controlled substance or a counterfeit substance. Exporting any controlled substance in sct ules $\mathrm{I}-\mathrm{V}$. Manufacturing or distributing a co trolled substance in schedule I or II for purposes of unlawful importation. Making or distributing any punch, die, plate, stone, or any other thing designed to reproduce the label on any drug or container or removing or obliterating the label or symbol of any drug or container. Knowingly opening, maintaining, or managing any place for the purpose of manufacturing, distributing, or using any controlled substance.

Transportation--Violations of Federal statutes relating to the Motor Carrier Act, which regulate (routes, rates) motor carriers of freight and passengers in interstate commerce.

Transportation of stolen property-Transporting, selling, or receiving stolen goods, stolen securities, stolen moneys, stolen cattle, fraudulent State tax stamps, or articles used in counterfeiting if the above articles or goods involve or constitute interstate or foreign commerce.

Unsecured bond--An agreement by the defendant as a condition of release in which the defendant agrees to pay full bond amount in the event of nonappearance at trial, but is not required to post security as a condition of release.

Violation (of pretrial release, probation or parole)--Allegation of either a new crim or a technical violation while on pretrial release, probation, or parole.

Violent offenses--Threatening, attempting, or actually using physical force against a person. Includes murder and nonnegligent manslaughter, negligent manslaughter, assault, robbery, sexual abuse, kidnaping, and threats against the President. (See specific offenses.)

Weapons--Violations of any of the provisions of 18 U.S.C. 922,923 concerning the manufacturing, importing, possessing, receiving, and licensing of firearms and ammunition. Manufacturing, selling, possessing, or transporting (within any territory or possession of the United States, within Indian country, or within the special maritime and territorial jurisdiction of the United-- .States) any switchblade knife; or making, receiving, possessing, or transporting a firearm not registered in the National Firearms Registration Transfer Record. Engaging in importing, manufacturing, or dealing in firearms it not registered with the secretary in the Internal Revenue Service District in which the business is conducted, or not having paid a special occupational tax. This code covers cases where in a crime-of-violence- or drug-trafficking-enhanced punishment is handed down when committed with a deadly weapon.

## Appendix 12

## National Judicial Reporting Program

Survey sampling procedures and definitions of terms

Note: The following information has been excerpted from U.S. Department of Justice, Bureau of Justice Statistics, Felony Sen-
tences in State Courts, 1998, Bulletin NCJ 190103, pp. 12, 13; 2000, Bulletin NCJ 198821, pp. 11, 12 (Washington, DC: U.S. Department of Justice). Non-substantive editorial adaptations have been made.

## Survey sampling procedures

A sample of 300 counties was drawn for the 1988 National Judicial Reporting Program (NJRP) survey. With little exception, these same 300 counties were the source of NJRP data for 3 subsequent NJRP surveys (1990, 1992, 1994). For the 1996 NJRP survey a new sample was drawn, consisting of 344 counties. The 344 counties included 98 that had been in the NJRP sample in the 4 previous surveys (1988, 1990, 1992, 1994) and 246 that had never been part of an NJRP sample. The 98 consisted of 80 counties selected by chance alone; plus 18 of the Nation's largest counties selected not by chance but (given their large 1995 population size) with certainty. The same 344 counties were used for the 1998 and 2000 NJRP surveys.

The 2000 survey used a two-stage, stratified cluster sampling design. In the first stage the Nation's 3,195 counties or county equivalents were divided into 14 strata. Each county was assigned to one stratum by meeting the conditions for that stratum.

The stratum to which a county was assigned depended on three criteria:

1. Whether the county was among the Nation's 75 largest according to 1995 resident population,
2. Ease of data collection (in a State where data collection is generally not costly; one where data collection is generally moderately costly; one where data collection is generally very costly),
3. The size of the county's 1995 resident population.

The largest 75 counties in the United States (as defined by 1995 resident population) were separated from the Nation's 3,195 counties or county equivalents. Each State was then assigned a "cost-factor" that reflected the overall ease or method of collecting their data. Next, counties in each
"cost-factor" group were separated into categories based on the size of their 1995 population. This resulted in 13 strata from which a sample of 325 counties was drawn. The 14th stratum consisted of the 19 counties with the largest populations in 1995; every county in this stratum was selected.

The final sample included 344 counties: 45 out of the 75 largest counties and 299 out of the remaining 3,120 counties. Because the 75 largest counties account for a disproportionately large amount of serious crime in the Nation, they were given a greater chance of being selected than the remaining counties. None of the counties refused to participate.

At the second stage of sampling, a systematic sample of felons sentenced for murder or nonnegligent manslaughter, sexual assault (including rape), robbery, aggravated assault, burglary, felony larceny/motor vehicle theft, fraud/forgery/embezzlement, drug trafficking, drug possession, weapons offenses, and other offenses was selected from each county's official records. The total sample numbered 429,471 cases. Of these, 272,889 cases were in the 75 largest counties.

Rates at which cases were sampled varied by how the data were submitted, by stratum, and by crime type. Among counties in States that submitted electronic data, all cases were typically included regardless of the offense type. Among counties in States that either submitted electronic data that required manual processing time or had data from jurisdictions that were collected manually (on-site), a sample of the cases was taken.

The survey targeted and recorded initial sentences imposed in 2000. If a sentence was imposed on one date and then modified at a later date, the revision was ignored. The survey recorded sentences that were actually executed and excluded suspended sentences. If a prison sentence was initially imposed but immediately suspended in its entirety, the case was coded as probation because that was the actual sentence.

Because the year of conviction was not a defining characteristic, some cases in the sample involved persons convicted before 2000 , but not sentenced until 2000 .

In 34 counties it was impractical to target sentences imposed in 2000. Cases sampled from these counties were all sentenced in 1999.

The 2000 conviction data that were submitted by four Illinois counties were very different from prior years' NJRP data files as well as other court data sources. Consequently, the conviction data submitted by these
counties for the 1998 NJRP survey were used in place of the 2000 data.

In 2000, Missouri was unable to provide data for seven counties in the sample. These counties were replaced with seven others in the same respective strata.

The second stage weights for two sampled counties from Florida were adjusted to account for less than a full year of reporting.

Based on these sampling methods, an estimated total of 924,700 persons were convicted of a felony in State courts in 2000.

## Sources of data

For $61 \%$ of the 344 counties sampled for the 2000 survey, NJRP data were obtained directly from the State courts. Sources of data from other counties included sentencing commissions, statistical agencies, departments of public safety, probation departments, State police departments, and departments of corrections. Individual-level NJRP records were obtained either electronically ( $83 \%$ of the counties) or manually ( $17 \%$ of the counties). Electronic methods of data submission included: diskettes, magnetic tape, and Internet transmission. Manual methods included photocopies of official documents, survey questionnaires completed by court officials, and on-site collections. All data were collected by the U.S. Census Bureau.

## Sampling error

NJRP data were obtained from a sample and not from a complete enumeration. Consequently, they are subject to sampling error. A standard error, which is a measure of sampling error, is associated with each number reported. In general, if the difference between two numbers is at least twice the standard error of that difference, there is at least $95 \%$ confidence that the two numbers do in fact differ; that is, the apparent difference is not simply the result of surveying a sample rather than the entire population.

National estimates of the number of convictions for individual crime categories and for the aggregate total had a coefficient of variation of $3.6 \%$. Standard errors did not take into account missing data, which are substantial for certain tables.

## Crime definitions

Before the sample was drawn, each felon sentenced in the sampled counties in 2000 was placed into 1 of the 11 offense categories identified above. If the felon was convicted of more than one felony offense, the offense category was the most serious offense. The hierarchy from most to least
serious offense was murder, sexual assault, robbery, aggravated assault, burglary, drug trafficking, weapons, forgery/fraud/embezzlement, larceny/motor vehicle theft, drug possession, and all other felonies. The hierarchy was determined from an analysis of two factors that reflect how seriously the justice system treats different offenses: the sentence length imposed and the time actually served in prison before release. In general, the higher the offense is in the hierarchy, the more serious it is in terms of the two factors. Sample selection procedures gave each sentenced felon a single chance to be in the sample. However, felons who appeared in court on more than 1 day for different offenses and received a sentence at each reappearance had more than a single chance.

At the data analysis stage, cases were aggregated according to their offense designation at time of sampling, with the single exception of "other violent." "Other violent" is a category shown in the tables, but it was not a category at sampling. The "other violent" category was formed from the sampling category "other felonies." That is, after sampling, sampled cases designated "other felonies" were coded either "violent," "nonviolent," or "not ascertained," based on data available. Cases coded "not ascertained" were rare. For data analysís purposes, cases coded "other violent" were removed from the "other felonies" category and shown separately in the tables. The offense categories shown in the tables are defined as follows:

Murder and nonnegligent manslaughter--Murder is (1) intentionally causing the death of another person without extreme provocation or legal justification or (2) causing the death of another while committing or attempting to commit another crime. Nonnegligent (or voluntary) manslaughter is intentionally and without legal justification causing the death of another when acting under extreme provocation. The combined category of murder and nonnegligent manslaughter excludes involuntary or negligent manslaughter, conspiracies to commit murder, solicitation of murder, and attempted murder.

Rape and sexual assault--Rape includes forcible intercourse (vaginal, anal, or oral) with a female or male. Includes forcible sodomy or penetration with a foreign object (sometimes called "deviate sexual assault"); excludes statutory rape or any other nonforcible sexual acts with a minor or with someone unable to give legal or factual consent. Includes attempts. Other sexual assault includes (1) forcible or violent sexual acts not involving intercourse with an adult or minor, (2) nonforcible sexual acts with a minor (such as statutory rape or incest with a minor), and (3) nonforcible sexual acts with someone unable to give legal or factual
consent because of mental or physical defect or intoxication. Includes attempts.

Robbery--The unlawful taking of property that is in the immediate possession of another, by force or the threat of force. Includes forcible purse snatching but excludes nonforcible purse snatching, which is classified as larceny/theft. Includes attempts.

Aggravated assault--(1) Intentionally and without legal justification causing serious bodily injury, with or without a deadly weapon or (2) using a deadly or dangerous weapon to threaten, attempt, or cause bodily injury, regardless of the degree of injury, if any. Includes attempted murder, aggravated battery, felonious assault, and assault with a deadly weapon.

Other violent--Violent offenses excluding murder and nonnegligent manslaughter, rape and sexual assault, robbery, and aggravated assault. Includes offenses such as kidnaping, extortion, and negligent manslaughter. Includes attempts.

Burglary--The unlawful entry of a fixed structure used for regular residence, industry, or business, with or without the use of force, to commit a felony or theft. Includes attempts.

Larceny--The unlawful taking of property other than a motor vehicle from the possession of another, by stealth, without force or deceit. Includes pocket picking, nonforcible purse snatching, shoplifting, and thefts from motor vehicles. Excludes receiving and/or reselling stolen property (fencing) and thefts through fraud or deceit. Includes attempts.

Motor vehicle theft--The unlawful taking of a self-propelled road vehicle owned by another. Includes the theft of automobiles, trucks, and motorcycles but excludes the theft of boats, aircraft, or farm equipment (which is classified as larceny/theft). Also includes receiving, possessing, stripping, transporting, and reselling stolen vehicles and unauthorized use of a vehicle (joyriding). Includes attempts.

Fraud, forgery, and embezzle-ment--Using deceit or intentional misrepresentation to unlawfully deprive a person of his or her property or legal rights. Includes offenses such as check fraud, confidence games, counterfeiting, and credit card fraud. Includes attempts.

Drug possession--Includes possession of an illegal drug, but excludes possession with intent to sell. Includes attempts.

Drug trafficking--Includes manufacturing, distributing, selling, smuggling, and possession with intent to sell. Includes attempts.

Weapons offenses--The unlawful sale, distribution, manufacture, alteration, transportation, possession, or use of a deadly or dangerous weapon or accessory.

Other offenses--All felony offenses not listed above. Includes receiving stolen property, driving while intoxicated or other traffic
offenses, bribery, obstructing justice, escaping from custody, family offenses (such as child neglect, contributing to the delinqueay of a minor, nonpayment of child suppor and nonviolent sexual offenses (such aspornography offenses, pimping, prostitution). Includes attempts.

## Appendix 13

## State Court Processing Statistics

Methodology, definitions of terms, and crimes within offense categories

Note: The following information has been excerpted from U.S. Department of Justice, Bureau of Justice Statistics, Felony Defendants in Large Urban Counties, 2000, NCJ 202021 (Washington, DC: U.S. Department of Justice, 2003), pp. 1, 37, 38. Non-substantive editorial adaptations have been made.

## Methodology

Since 1988, the Bureau of Justice Statistics has sponsored a biennial data collection on the processing of felony defendants in the State courts of the Nation's 75 most populous counties. Previously known as the National Pretrial Reporting Program, this data collection series was renamed the State Court Processing Statistics (SCPS) program in 1994 to better reflect the wide range of data elements collected. The SCPS program collects data on the demographic characteristics, criminal history, pretrial processing, adjudication, and sentencing of felony defendants. The SCPS data do not include Federal defendants.

In 2000, the 75 largest counties accounted for about $37 \%$ of the Nation's population, $49 \%$ of all reported serious violent crimes, and $39 \%$ of all reported serious property crimes.

The sample was designed and selected by the U.S. Census Bureau. It is a two-stage stratified sample with 40 of the 75 most populous counties selected at the first stage, and a systematic sample of State court felony filings (defendants) within each county selected at the second stage.

The 40 counties were divided into 4 firststage strata based on court filing information. Ten counties were included in the sample with certainty because of their large number of court filings. The remaining counties were allocated to the three noncertainty strata based on the variance of felony court dispositions.

The second-stage sampling was designed to represent all defendants who had felony cases filed with the court during the month of May 2000. The participating jurisdictions provided data for every felony case filed on selected days during that month. The number of days selected depended on the
stage-one stratum in which the county had been placed. Each jurisdiction provided 5, 10 , or 20 randomly selected business days' filings for May 2000. Data from jurisdictions that were not required to provide a full month of filings were weighted to represent the full month.

Data on 14,877 sample felony cases were collected from the 40 sampled jurisdictions. These cases represented the estimated 54,590 cases filed during the month of May 2000 in the 75 most populous counties. A small number of cases ( 162 weighted) were omitted from analysis as they could not be classified into one of the four major crime categories (violent, property, drug, publicorder).

Data were collected from the following counties: Alabama (Jefferson); Arizona (Maricopa, Pima); California (Alameda, Contra Costa, Los Angeles, Orange, Riverside, San Bernardino, San Diego, San Mateo, Santa Clara); Connecticut (New Haven); Florida (Broward, Miami-Dade, Palm Beach, Pinellas); Georgia (Fulton); Hawaii (Honolulu); Illinois (Cook); Indiana (Marion); Maryland (Baltimore, Montgomery); Michigan (Macomb, Wayne); New Jersey (Essex); New York (Bronx, Kings, Nassau, Westchester); Ohio (Franklin); Pennsylvania (Philadelphia); Tennessee (Shelby); Texas (Dallas, El Paso, Harris, Tarrant, Travis); Utah (Salt Lake City); and Virginia (Fairfax).

## Definitions of terms

## Terms relating to pretrial release

Released defendant--Any defendant who was released from custody prior to the disposition of his or her case by the court. Includes defendants who were detained for some period of time before being released and defendants who were returned to custody after being released because of a violation of the conditions of pretrial release.

Detained defendant--Any defendant who remained in custody from the time of arrest until the disposition of his or her case by the court.

Failure to appear--A court issues a bench warrant for a defendant's arrest because he or she has missed a scheduled court appearance.

Types of financial release
Full cash bond--The defendant posts the full bail amount in cash with the court. If the defendant makes all court appearances, the cash is returned. If the defendant fails to appear in court, the bond is forfeited.

Deposit bond--The defendant deposits a percentage (usually $10 \%$ ) of the full bail amount with the court. This percentage of the bail is returned after the disposition of the
case, but the court often retains a small portion for administrative costs. If the defendant fails to appear in court, he or she is liable to the court for the full amount of the bail.

Surety bond--A bail bond company signs a promissory note to the court for the full bail amount and charges the defendant a fee for the service (usually $10 \%$ of the full bail amount). If the defendant fails to appear, the bond company is liable to the court for the full bail amount. Frequently the bond company requires the defendant to post collateral in addition to the fee.

Property bond--Also known as collateral bond, involves an agreement made by a defendant as a condition of pretrial release requiring that property valued at the full bail amount be posted as an assurance of his or her appearance in court. If the defendant fails to appear in court, the property is forfeited.

## Types of nonfinancial release

Unsecured bond--The defendant pays no money to the court but is liable for the full amount of bail should he or she fail to appear in court.

Release on recognizance--The court releases the defendant on a signed agreement that he or she will appear in court as required. This category also includes citation releases in which arrestees are released pending their first court appearance on a written order issued by law enforcement or jail personnel.

Conditional release--Defendants are released under specified conditions. If monitoring or supervision is required, this usually is done by a pretrial services agency. In some cases, such as those involving a thirdparty custodian or drug monitoring and treatment, another agency may be involved in the supervision of the defendant. Conditional release sometimes includes an unsecured bond.

## Other type of release

Emergency release--Defendants are released in response to a court order placing limits on a jail's population.

## Offense categories

Felony offenses were classified into 16 categories. These were further divided into the four major crime categories of violent, property, drug, and public-order offenses. The following offense categories contain a representative summary of most of the crimes contained in each category; however, these lists are not meant to be exhaustive. All offenses, except murder, include attempts and conspiracies to commit.

Murder--Includes homicide, nonnegligent manslaughter, and voluntary homicide. Does not include attempted murder (which is classified as felony assault), negligent homicide, involuntary homicide, or vehicular manslaughter (which are classified as "other violent offenses").

Rape--Includes forcible intercourse, sodomy, or penetration with a foreign object. Does not include statutory rape or nonforcible acts with a minor or someone unable to give legal consent, nonviolent sexual offenses, or commercialized sex offenses.

Robbery--Includes the unlawful taking of anything of value by force or threat of force. This classification includes armed, unarmed, and aggravated robbery, carjacking, armed burglary, and armed mugging.

Assault--Includes aggravated assault, aggravated battery, attempted murder, assault with a deadly weapon, felony assault or battery on a law enforcement officer, and other felony assaults. Does not include extortion, coercion, or intimidation.

Other violent offenses--Includes vehicular manslaughter, involuntary manslaughter, negligent or reckless homicide, nonviolent or nonforcible sexual assault, kidnaping, unlawful imprisonment, child or spouse abuse, cruelty to a child, reckless endangerment, hit and run with bodily injury, intimidation, and extortion.

## Property offenses

Burglary--Includes any type of entry into a residence, industry, or business with or without the use of force with the intent to commit a felony or theft. Does not include possession of burglary tools, trespassing, or unlawful entry where the intent is not known.

Larceny/theft--Includes grand theft, grand larceny, and any other felony theft, including burglary from an automobile, theft of rental property, and mail theft. Does not include motor vehicle theft, receiving or buying stolen property, fraud, forgery, or deceit.

Motor vehicle theft--Includes auto theft, conversion of an automobile, receiving and transferring an automobile, unauthorized use of a vehicle, possession of a stolen vehicle, larceny or taking of an automobile.

Forgery--Includes forging a driver's license, forging official seals, notes, money orders, credit or access cards or names of such cards or any other documents with fraudulent intent, uttering a forged instrument, counterfeiting, and forgery.

Fraud--Includes possession and passing of worthless checks or money orders, possession of false documents or identi-
fication, embezzelment, obtaining money by false pretenses, credit card fraud, welfare fraud, Medicare fraud, insurance claim fraud, fraud, swindling, stealing a thing of value by deceit, larceny by check.

Other property offenses--Includes receiving or buying stolen property, arson, reckless burning, damage to property, criminal mischief, vandalism, criminal trespassing, possession of burglary tools, and unlawful entry.

## Drug offenses

Drug trafficking--Includes trafficking, sales, distribution, possession with intent to distribute or sell, manufacturing, and smuggling of controlled substances. Does not include possession of controlled substances.

Other drug offenses--Includes possession of controlled substances, prescription violations, possession of drug paraphernalia, and other drug law violations.

Public-order offenses

Weapons--Includes the unlawful sale, distribution, manufacture, alteration, transportation, possession, or use of a deadly weapon or accessory.

Driving-related--Includes driving under the influence of drugs or alcohol, driving with a suspended or revoked license, or any other felony in the motor vehicle code.

Other public-order offenses--Includes flight/escape, parole or probation violations, prison contraband, habitual offender, obstruction of justice, rioting, libel, slander, treason, perjury, prostitution, pandering, bribery, and tax law violations.

## Appendix 14

Juvenile Court Statistics Methodology, definitions of terms, and offenses within categories

This information was excerpted from A. Stahl, T. Finnegan, and W. Kang, "Easy Access to Juvenile Court Statistics: 19852000 " [Online]. Washington, DC: U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention, 2002. Available: http://ojidp.ncjrs.org/ojstatbb/ ezajcs/ [Apr. 15, 2003]; and Charles Puzzanchera et al., Juvenile Court Statistics 1998, NCJ 193696 (Washington, DC: U.S. Department of Justice, 2003), pp. 59, 60. Non-substantive editorial adaptations have been made.

## Methodology

These data are national estimates of juvenile delinquency cases handled in 2000 by U.S. courts with juvenile jurisdiction. The estimates are derived from data provided to the National Center for Juvenile Justice's National Juvenile Court Data Archive by State and country agencies responsible for collecting and/or disseminating information on the processing of youth in juvenile courts.

Courts with juvenile jurisdiction also may handle other matters, including status offenses, i.e., behaviors that are considered an offense only when committed by a juvenile (e.g., running away from home), traffic violations, child support, adoption, and child abuse and neglect. However, the data presented in this edition of SOURCEBOOK focus on the courts' handling of juveniles charged with criminal law violations. These data are not the result of a uniform data collection effort. They are hot derived from a complete census of juvenile courts or obtained from a probability sample of courts. These national estimates are developed using compatible information from courts that are able to provide data to the Archive. Data collection is an ongoing process and estimates for previous years are updated as more detailed case-level data are provided to the Archive.

The Archive collects data in two forms: courtlevel aggregate statistics and detailed caselevel data. Court-level aggregate statistics are either abstracted from the annual reports of State and local courts or are contributed directly to the Archive. These data typically are counts of the delinquency and status offense cases handled by courts in a defined time period (calendar or fiscal year). Case-
level data are usually generated by the automated client-tracking systems or casereporting systems managed by juvenile courts or other juvenile justice agencies. These systems provide detailed data on the characteristics of each delinquency and status offense case handled by courts.

The structure and content of each data set is examined in order to design an automated restructuring procedure that will transform each jurisdiction's data into a common caselevel format. The aggregation of these standardized case-level data files constitutes the national case-level database. The compiled data from jurisdictions that contribute only court-level statistics constitute the national court-level database. Together, these two multi-jurisdiction databases are used to generate national estimates of delinquency and status offense cases. Although juvenile courts with jurisdiction over more than $98 \%$ of the U.S. juvenile population contribute either case-level data or court-level aggregate statistics to the Archive, not all of this information can be used to generate the national estimates. To be used, the data must be in a compatible unit of count (i.e., case disposed), the data source must demonstrate a pattern of consistent reporting over time (at least 2 years), and the data file contributed must represent a complete count of cases disposed in a jurisdiction during a given year.

The national estimate of $1,657,533$ total delinquency cases processed in 2000 was generated by data received from the follow: ing two sources:
(1) Detailed case-level data describing 969,757 delinquency cases that met the criteria for inclusion in the development of national estimates.
(2) Compatible court-level aggregate statistics on an additional 108,245 delinquency cases reported from jurisdictions that were unable to provide detailed case-level data.

In all, compatible case-level data and courtlevel statistics on delinquency cases were received from 1,991 jurisdictions containing $71 \%$ of the Nation's youth population at risk in 2000.

A multivariate weighting procedure is employed that adjusts for a number of factors related to juvenile court caseloads, e.g., the court's jurisdictional responsibilities (upper age); the size and demographic composition of the community; the age, sex, and race profile of the youth involved in juvenile court cases; and the offenses charged against the youth. The basic assumption underlying the estimation procedure is that similar legal and demographic factors shape the volume and characteristics of cases in
reporting and nonreporting counties of comparable size and features.

The unit of count is a case disposed by a court with juvenile jurisdiction. A case represents a youth processed by a juvenile court on a new referral regardless of the number of charges contained in that referral. A youth charged with four burglaries in a single referral represents a single case, whereas a youth referred to court for three burglaries and referred again the following week on another burglary charge represents two cases, even if the court eventually merges the two referrals for efficient processing.

The offense coded was the most serious offense for which the youth was referred to court. Attempts to commit an offense were included under that offense category except attempted murder, which was included in the aggravated assault category.

The term disposed means that a definite action has been taken or that a plan of treatment has been selected or initiated. It does not necessarily mean that the case is closed or terminated in the sense that all contact between the court and the youth has ceased.

## Definitions of terms

Adjudicated--Judicially determined (judged) to be a delinquent.

Delinquent act/offense--An act committed by a juvenile for which an adult could be prosecuted in a criminal court, but when committed by a juvenile is within the jurisdiction of the juvenile court.

Detention--The placement of a youth in a restrictive facility between referral to court intake and case disposition.

Dismissed--Cases dismissed (including those warned, counseled, and released) with no further action anticipated. Among cases handled informally, some cases may be dismissed by the juvenile court because the matter is being handled in another court.

Juvenile--Youth at or below the upper age of juvenile court jurisdiction. See Upper age of jurisdiction and Youth population at risk.

Nonpetitioned cases--Informally handled cases that duly authorized court personnel screen for adjustment without the filing of a formal petition. Such personnel include judges, referees, probation officers, other officers of the court, and/or an agency statutorily designated to conduct petition screening for the juvenile court.

Petitioned cases--Formally handled cases that appear on the official court calendar in response to the filing of a petition or other legal instrument requesting the court to adjudicate the youth delinquent or to waive (transfer) the youth to criminal court for processing as an adult.

Placement out-of-home--Cases in which youth were placed in a residential facility for delinquents, or were otherwise removed from their homes and placed elsewhere.

Probation--Cases in which youth were placed on informal/voluntary or formal/courtordered probation or supervision.

Race--The race of the youth referred as determined by the youth or by court personnel.

White--A person having origins in any of the original peoples of Europe, North Africa, or the Middle East. (Nearly all Hispanics were included in the white racial category.)

Black--A person having origins in any of the black racial groups of Africa.

Other--A person having origins in any of the original peoples of North America, the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands.

Transfer/waiver--Cases that were waived or transferred to criminal court as the result of a waiver or transfer hearing in juvenile court. Cases are included in this category only if the transfer resulted from judicial actions alone. Some cases can be transferred to criminal court through the actions of prosecutors. However, these data report judicial waivers only. Excluded are cases that were transferred to criminal court under concurrent jurisdiction provisions.

Upper age of jurisdiction--The oldest age at which a juvenile court has original jurisdiction over an individual for lawviolating behavior. For the time period covered by these data in 3 States (Connecticut, New York, and North Carolina) the upper age of jurisdiction was 15, in 10 States (Georgia, llinois, Louisiana, Massachusetts, Michigan, Missouri, New Hampshire, South Carolina, Texas, and Wisconsin) the upper age of jurisdiction was 16 , and in the remaining 37 States and the District of Columbia the upper age of jurisdiction was 17. It must be noted that in most States there are exceptions to the age criteria that place or permit youth at or below the State's upper age of jurisdiction to be under the original jurisdiction of the adult criminal court. For example, in most States if a youth of a certain age is charged with one of a defined list of what are commonly labeled "excluded offenses," the case must originate in the adult criminal court. In addition, in a number of States, the district attorney is given the discretion of filing certain cases either in the juvenile or in the criminal court. Therefore, while the upper age of jurisdiction is commonly recognized in all States, there are numerous exceptions to this age criterion.

Youth population at risk--For delinquency and status offense matters, this is the number of children from age 10 through the upper age of jurisdiction. In all States the upper age of jurisdiction is defined by statute. In most States individuals are
considered adults when they reach their 18th birthday. Therefore, for these States, the delinquency and status offense youth population at risk would equal the number of children who are 10 through 17 years of age living within the geographical area serviced by the court.

## Offenses within categories

Crimes against persons--This category includes criminal homicide, forcible rape, robbery, aggravated assault, simple assault, and other person offenses defined below.

Criminal homicide--Causing the death of another person without legal justification or excuse. Criminal homicide is a summary category, not a single codified offense. The term, in law, embraces all homicides where the perpetrator intentionally killed someone without legal justification, or accidentally killed someone as a consequence of reckless or grossly negligent conduct. It includes all conduct encompassed by the terms murder, nonnegligent (voluntary) manslaughter, negligent (involuntary) manslaughter, and vehicular manslaughter. The term is broader than the Crime Index category used in the Federal Bureau of Investigation's Uniform Crime Reports (UCR) in which murder and nonnegligent manslaughter does not include negligent manslaughter or vehicular manslaughter.

Forcible rape--Sexual intercourse or attempted sexual intercourse with a female against her will by force or threat of force. The term is used in the same sense as in the UCR Crime Index. (Some States have enacted gender-neutral rape or sexual assault statutes that prohibit forced sexual penetration of either sex. Data reported by these States do not distinguish between forcible rape of females as defined above and other sexual assaults.) Other violent sex offenses are included in the "other offenses against persons" category.

Robbery--Unlawful taking or attempted taking of property that is in the immediate possession of another by force or the threat of force. The term is used in the same sense as in the UCR Crime Index and includes forcible purse snatching.

Assault--Unlawful intentional inflicting, or attempted or threatened inflicting, of injury upon the person of another.

## Aggravated assault-

Unlawful intentional inflicting of serious bodily injury, or unlawful threat or attempt to inflict bodily injury or death, by means of a deadly or dangerous weapon with or without actual infliction of any injury. The term is used in the same sense as in the UCR Crime Index. It includes conduct included under the statutory names aggravated assault and battery, aggravated battery, assault with intent to kill, assault with intent to commit murder or
manslaughter, atrocious assault, attempted murder, felonious assault, and assault with a deadly weapon.

Simple assault--Unlawiu intentional inflicting, or attempted or threatened inflicting, of less than serious bodily injury without a deadly or dangerous weapon. The term is used in the same sense as in UCR reporting. Simple assault is often not distinctly named in statutes since it consists of all assaults not explicitly named and defined as serious. Unspecified assaults are included in the "other offenses against persons" category.

Other offenses against
persons--This category includes kidnaping, violent sex acts other than forcible rape (e.g., incest, sodomy), custody interference, unlawful restraint, false imprisonment, reckless endangerment, harassment, and attempts to commit any such acts.

Crimes against property--This category includes burglary, larceny, motor vehicle theft, arson, vandalism, stolen property offenses, trespassing, and other property offenses defined below.

Burglary--Unlawful entry or attempted entry of any fixed structure, vehicle, or vessel used for regular residence, industry, or business, with or without force, with intent to commit a felony or larceny. The term is used in the same sense as in the UCR Crime Index.

Larceny--Unlawful taking or attempted taking of property (other than motor vehicle) from the possession of another, by stealth, without force and without deceit, with intent to permanently deprive the owner of the property. This term is used in the same sense as in the UCR Crime Index. It includes shoplifting and purse snatching without force.

Motor vehicle theft--Unlawful taking, or attempted taking, of a self-propelled road vehicle owned by another, with the intent to deprive the owner of it permanently or temporarily. The term is used in the same sense as in the UCR Crime Index. It includes joyriding or unauthorized use of a motor vehicle as well as grand theft auto.

Arson--Intentional damaging or destruction by means of fire or explosion of the property of another without the owner's consent, or of any property with intent to defraud, or attempting the above acts. This term is used in the same sense as in the UCR Crime Index.

Vandalism--Destroying or damaging, or attempting to destroy or damage, the property of another without the owner's consent, or public property, except by burning.

Stolen property offenses-Unlawful and knowing receipt, purchase, or possession of stolen property, or attempting any of the above. The term is used in the same sense as the UCR category stolen property; buying, receiving, possessing.

Trespassing--Unlawful entry or attempted entry of the property of another with the intent to commit a misdemeanor, other than larceny, or without intent to commit a crime.

Other property offenses--This category includes extortion and all fraud offenses, such as forgery, counterfeiting, embezzlement, check or credit card fraud, and attempts to commit any such offenses.

Drug law violations--Unlawful sale, purchase, distribution, manufacture, cultivation, transport, possession, or use of a controlled or prohibited substance or drug, or drug paraphernalia, or attempts to commit these acts. Sniffing of glue, paint, gasoline, and other inhalants also are included; therefore, the term is broader than the UCR category drug abuse violations.

Offenses against public order-This category includes weapons offenses, nonviolent sex offenses, nonstatus liquor law violations, disorderly conduct, obstruction of justice, and other offenses against public order as defined below.

Weapons offenses--Uniawful sale, distribution, manufacture, alteration, transportation, possession, or use of a deadly or dangerous weapon, or accessory, or attempt to commit any of these acts. The term is used in the same sense as the UCR category weapons; carrying, possessing, etc.

Sex offenses--All offenses having a sexual element, not involving violence. The term combines the meaning of the UCR categories prostitution and commercialized vice and sex offenses. It includes offenses such as statutory rape, indecent exposure, prostitution, solicitation, pimping, lewdness, fornication, and adultery.

Liquor law violations, not sta-
tus--Being in a public place while intoxicated through consumption of alcohol, or intake of a controlled substance or drug. It includes public intoxication, drunkenness, and other liquor law violations. It does not include driving under the influence. The term is used in the same sense as the UCR category of the same name. (Some States treat public drunkenness of juveniles as a status offense, rather than delinquency and therefore would not be included in the data presented. Where a person who is publicly intoxicated performs acts that cause a disturbance, he or she may be charged with disorderly conduct.)

Disorderly conduct--Unlawful interruption of the peace, quiet, or order of a community, including offenses such as disturbing the peace, vagrancy, loitering, unlawful assembly, and riot.

Obstruction of justice--This category includes intentionally obstructing court or law enforcement efforts in the administration of justice, acting in a way calculated to lessen the authority or dignity of the court, failing to obey the lawful order of a court, and violations of probation or parole other than technical violations, which do not consist of
the commission of a crime or are not prosecuted as such. It includes contempt, perjury, obstructing justice, bribing witnesses, failure to report a crime, and nonviolent resisting arrest.

Other offenses against public order--This category includes other offenses against government administration or regulation, e.g., escape from confinement, bribery, gambling, fish and game violations, hitchhiking, health violations, false fire alarms, and immigration violations.

## Appendix 15

## Correctional Populations in the United

States Survey methodology, definitions of terms, and jurisdictional explanatory notes

Note: The following information has been excerpted from U.S. Department of Justice, Bureau of Justice Statistics, Correctional Populations in the United States, 1997, NCJ 177613 (Washington, DC: U.S. Department of Justice, 2000); Prisoners in 2003, Bulletin NCJ 205335 (Washington, DC: U.S. Department of Justice, November 2004), pp. 10-12; and Probation and Parole in the United States, 2003, Bulletin NCJ 205336 (Washington, DC: U.S. Department of Justice, July 2004), pp. 7, 8. Non-substantive editorial adaptations have been made.

## Survey methodology for prisoner data

The Bureau of Justice Statistics (BJS), with the U.S. Census Bureau as collection agent, obtains yearend and midyear counts of prisoners from departments of correction in the 50 States and the Federal Bureau of Prisons through the National Prisoner Statistics (NPS) program. In an effort to collect comparable data from all jurisdictions, NPS distinguishes prisoners in custody from those under jurisdiction. To have custody of a prisoner, a State must hold that person in one of its facilities. To have jurisdiction means that a State has legal authority over the prisoner. Prisoners under a State's jurisdiction may be in the custody of a local jail, another State's prison, or other correctional facility. Some States are unable to provide both custody and jurisdiction counts.

Excluded from NPS counts are persons confined in locally administered continement facilities who are under the jurisdiction of local authorities. NPS counts include all prisoners in State-operated facilities in Alaska, Connecticut, Delaware, Hawaii, Rhode Island, and Vermont, which have combined jail-prison systems.

As of Dec. 31, 2001, the transfer of responsibility for sentenced felons from the District of Columbia to the Federal Bureau of Prisons was completed. The District of Columbia no longer operates a prison system and has been excluded from NPS.

In each jurisdiction, the questionnaire was completed by a central agency reporting for institutions within the correctional system.

This procedure was also used by the Federal Bureau of Prisons in supplying data on Federal institutions. Because the information was derived from a complete enumeration rather than a survey, the statistical data are not affected by sampling error. Response errors were held to a minimum by means of a systematic telephone followup and, where necessary, other control procedures. Thus, the yearend counts are generally considered reliable. Because of the absence of standardized administrative and record keeping practices from State to State, the data for admissions and releases are not always entirely comparable across jurisdictions.

Many States revise the yearend number reported for the previous year. Those revisions are made in the total, not the detail. For example, the number of blacks, whites, and members of other races for 1996 were not changed by a State in 1997 to equal its revised 1996 total.

## National Prisoner Statistics category definitions

Jurisdiction population--Includes all prisoners under jurisdiction of State correctional authorities on December 31 regardless of location. Does not include other jurisdictions' prisoners (for example, prisoners from other States, pretrial detainees) merely housed in prisons.

Custody population--Includes all prisoners in the State's custody, that is, housed in State correctional facilities on December 31. Does not include State prisoners housed outside State prison facilities; does include other jurisdictions' prisoners (for example, prisoners from other States, the courts, local jails) housed in the State's facilities.

## Admissions

New court commitments-Includes all prisoners who were admitted with new sentences, that is, these prisoners were not readmitted for any sentences for which they had already served some prison time. This category includes probation violators entering prison for the first time on the probated offenses. Does not include parole violators with new sentences.

Parole violators with new sentences-Includes all parolees returned with new sentences.

Other conditional release violators with new sentences--Includes all individuals on conditional release (other than parole) who are returned with new sentences, for example, returns from supervised mandatory release, from shock probation, etc.

Parole violators only, no new sentences--Includes all parolees returned only for formal revocations of parole that
were not accompanied by new sentences. If the parole was not formally revoked, that is, the parolee was held only temporarily per ing a hearing, no admission occurred for purposes.

Other conditional release violators only, no new sentences--Same as above, substituting conditional release violator for parole violator.

Transfers from other jurisdictions-Includes all prisoners transferred from another jurisdiction to a State's jurisdiction to continue sentences already in force. Does not include admissions if State does not acquire jurisdiction. Does not include movements from prison to prison within State.

Absent without leave (AWOL) returns, with or without new sentences--Includes all returns from AWOL, that is, failures to return from authorized temporary absences such as work furlough, study release, mercy furlough, or other authorized temporary absence.

Escapee returns, with or without new sentences--Includes all returns from escape, that is, unlawful departures from a State correctional facility or from the custody of State correctional personnel.

Returns from appeal/bond--Includes all prisoners reinstated to correctional jurisdiction from long-term jurisdictional absences on appeal or bond. Does not include returns from short-term movements (less than 30 days) to court (that is, where the State retains jurisdiction).

Other admissions--Includes all oth admissions not covered by the above categories.

## Releases

Unconditional--An unconditional release occurs only if the released prisoner cannot be imprisoned for any sentence for which he/she was in prison.

Expirations of sentence--Includes all prisoners whose maximum court sentences minus credits have been served.

Commutation-Includes all prisoners whose maximum sentences have been changed (lowered) to time served to allow immediate unconditional release.

Other unconditional release--Includes all other unconditional releases not covered by the above categories.

Conditional--A conditional release occurs if the released prisoner, upon violating the conditions of release, can be imprisoned again for any of the sentences for which he/she was in prison.

Probation--Includes all prisoners who have been placed under probation supervision and conditionally released; includes all shock probation (split sentence) releases.

Supervised mandatory release-Includes all prisoners who must, by law, bf conditionally released. This type of releas may also be called mandatory conditional release.

Parole--Includes all prisoners conditionally released to parole.

Other conditional release--includes all other conditional releases not covered by the above categories.

Death:
Execution--Self-explanatory.
Acquired immune deficiency syndrome (AIDS)--The immediate cause of death in AIDS mortalities may be Pneumocystis Carinii Pneumonia, Kaposi's Sarcoma, or other diseases related to HIV infection.

Iliness/natural causes--Selfexplanatory. AIDS-related deaths not included in this category.

Suicide--Self-explanatory.
Accidental injury to self--includes all prisoners who accidentally cause their own deaths (for example, a fall from a ladder, mishandling electrical equipment).

Caused by another--Includes all prisoners whose deaths were caused accidentally or intentionally by another prisoner or prison personnel.

Other deaths--Includes all other deaths not covered by the above categories.

## Race

Classification by race often depends on the reporting program and the State. A few States reported two categories: white and nonwhite. A tew others categorized Hispanic offenders as belonging to "other race." The number of persons with certain racial backgrounds were sometimes estimated.

White--Persons having origin in any of the original peoples of Europe, North Africa, or the Middle East.

Black--Persons having origin in any of the black racial groups of Africa.

American Indian or Alaska Native-Persons having origin in any of the original peoples of North America, who maintain cultural identification through tribal affiliation or community recognition.

Asian or Pacific Islander--Persons having origin in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands. This area includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa.

Other--Any other race not covered by the above categories.

Not known--Any prisoner whose racial origin is unknown by the reporting jurisdiction.

## Ethnic origin

A person of Hispanic origin may be of any race; however, a few States treat the ethnic category as a racial one. Reporting officials
usually rely on self-definition, but some States classify according to surname.

Hispanic--Persons of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race.

Not Hispanic--Persons not covered by the above category.

Not known--Any prisoner whose ethnic origin is unknown by the reporting jurisdiction.

## Explanatory notes for 2003 prisoner data

Alaska--Prisons and jails form one integrated system. All NPS data include jail and prison populations. Counts exclude individuals in electronic and special monitoring programs.

Arizona--Population counts are based on custody data. Counts exclude 174 sentenced prisoners housed in contracted local jails who were awaiting transfer to the Department of Corrections.

California--Population counts include felons and civil addicts who are temporarily absent, such as in court, jail, or hospital.

Colorado--Population counts include 247 male and 8 female prisoners in the Youthful Offender System.

Connecticut--Prisons and jails form one integrated system. All NPS data include jail and prison populations.

Delaware--Prisons and jails form one integrated system. All NPS data include jail and prison populations. Jurisdiction counts exclude prisoners housed in other State's facilities.

District of Columbia--The District of Columbia is no longer counted as a prison system because the 1997 Revitalization Act transferred responsibility for housing sentenced felons to the Federal Bureau of Prisons. For comparisons with previous years, jurisdiction and custody counts in the District of Columbia were 2,692 on Dec. 31, 2001 and 3,241 on Dec. 31, 2002.

Federal--Custody counts include prisoners housed in privately operated secure facilities under contract with the Federal Bureau of Prisons or with a State or local government that has an intergovernmental agreement. Custody counts exclude offenders housed under home confinement.

Florida--Population counts for Dec. 31, 2002 are based on custody data, including prisoners in privately operated facilities and are not comparable to 2003 data.

Georgia--Population counts are based on custody data, including prisoners in privately operated facilities.

Hawaii--Prisons and jails form one integrated system. All NPS data include jail and prison populations.

Illinois--Population counts are based on jurisdiction data. Counts of prisoners with a sentence of more than 1 year include an
undetermined number with a sentence of 1 year.
lowa--Population counts are based on custody data. Counts of prisoners with a sentence of more than 1 year include an undetermined number with a sentence of 1 year or less.

Kansas--Population counts of prisoners with a sentence of more than 1 year include an undetermined number with a sentence of 1 year or less.

Louisiana--Counts are as of Dec. 29, 2003. Population counts include 15,173 males and 1,376 females housed in local jails as a result of a partnership with the Louisiana Sheriffs' Association and local authorities.

Massachusetts--By law, offenders may be sentenced to terms of up to $21 / 2$ years in locally operated jails. Such offenders are included in counts and rates for local jails. About 6,200 prisoners with sentences of more than 1 year were held in local jails in 2003.

Michigan--Jurisdiction counts exclude 42 prisoners held in local jails.

Montana--Counts include 263 prisoners under intensive supervision in the community.

Nevada--Population counts are as of Jan. 1, 2004.

New Jersey--Population counts of prisoners with a sentence of more than 1 year include an undetermined number with a sentence of 1 year.

Ohio--Population counts of prisoners with a sentence of more than 1 year include an undetermined number with a sentence of 1 year or less.

Oklahoma--Population counts of prisoners with a sentence of more than 1 year include an undetermined number with a sentence of 1 year. The female count dropped significantly because the Department of Corrections bought a private prison.

Oregon--Prisoners with less than a 1 year maximum sentence remain under the control of local counties.

Rhode Island--Prisons and jails form one integrated system. All NPS data include jail and prison populations.

South Carolina--Population counts include 66 prisoners either unsentenced or under other confinement status.

Tennessee--Population counts of prisoners with a sentence of more than 1 year include an undetermined number with a sentence of 1 year.

Texas--Jurisdiction counts include prisoners serving time in a pre-parole transfer or intermediary sanctions facility, substance abuse felony punishment facility, temporary releases to counties, and paper-ready prisoners in local jails.

Vermont--Prisons and jails form one integrated system. All NPS data include jail and prison populations.

Washington--A recently revised law allows increasing numbers of prisoners with sentences of less than 1 year to be housed in prison.

## Capital punishment explanatory notes

The data reported for capital punishment may differ from data collected by other organizations. The differences occur for the following reasons:
(1) Prisoners under sentence of death are initially added to the National Prisoner Statistics (NPS) counts when they enter correctional facilities rather than when judges pronounce sentence.
(2) Following the year when prisoners are first counted, their admissions or releases as a result of court order are attributed to the year for the sentence or court order. For example, a prisoner sentenced in November 1995 entering prison custody in January 1996 would be counted as an admission in the 1996 report; the 1997 report would count him or her as being under sentence of death at yearend 1995. Similarly, a prisoner whose sentence is overturned in 1994 but who remains in the count until 1996 when the court's decision is reported would be subtracted from the 1994 and 1995 counts.
(3) NPS counts of persons under sentence of death are always for the last day of a calendar year and will differ from more recent counts.

## Survey methodology for probation and parole data

These data are based on yearend counts of persons on probation and parole and entries and exits occurring during the calendar year. The data were collected by the U.S. Department of Justice, Bureau of Justice Statistics through standard questionnaires mailed to the Nation's probation and parole agencies.

Counts of probationers include only adults who have been placed under the supervision of a probation agency as part of a court order, regardless of whether convicted. Both active and inactive supervision cases are included. The data exclude juveniles and persons on bench, court, or summary probation who have not been placed under the supervision of a probation agency.

Counts of parolees include only adults who have been conditionally released to parole supervision, whether by a parole board decision or by mandatory conditional release. Both active and inactive supervision cases are included. Parolees sentenced to incarceration regardless of sentence length are included. The data excluded juveniles. For both probation and parole counts the following provisions apply:
(1) For interstate compacts, counts include a State's probationers and parolees sent to another State for supervision, but exclude probationers and parolees supervised for another State.
(2) For entries, individuals entering into the probation or parole system more than once during the year are counted as multiple entries.
(3) For exits, individuals exiting from the probation or parole system more than once during the year are counted as multiple exits.

## 2003 probation and parole data

The 2003 Probation and Parole Surveys provide a count of the total persons supervised in the community on Jan. 1 and Dec. 31, 2003, and a count of the number entering and leaving supervision during the year. These surveys cover all 50 States, the District of Columbia, and the Federal system.

Data for the Federal system are from the Administrative Office of the United States Courts as provided to the BJS Federal Justice Statistics Program.

Because many States update their population counts, the Jan. 1, 2003 numbers may differ from those previously published for Dec. 31, 2002.

The 2003 Annual Probation Survey was sent to 469 respondents--34 central State reporters, the District of Columbia, the Federal system, and 433 separate State, county, or court agencies. States with multiple reporters were Alabama (3), Arizona (2), Colorado (9), Florida (43), Georgia (5), Idaho (2), Kentucky (3), Michigan (128), Missouri (2), Montana (4), New Mexico (2), Ohio (187), Oklahoma (3), Tennessee (3), Washington (35), and West Virginia (2). One local agency in Ohio did not provide data. For this agency, the Dec. 31, 2002 population count was used as the Jan. 1, 2003 and Dec. 31, 2003 counts.

Since 1997, the probation survey coverage has been expanded to include 186 additional agencies previously excluded from the survey. At yearend 2003, 193,607 probationers were under the supervision of these agencies. For year-to-year comparisons, use total counts based on the same reporting agencies--3,266,837 in 1997 to compare with the final 1996 counts; $3,417,613$ in 1998 to compare with final 1997; and $3,772,773$ in 1999 to compare with final 1998.

Entries to probation supervision were estimated by the Source for nonreporting agencies in recent years. Reported entries for 2003 were 1,918,470.

The 2003 Annual Parole Survey was sent to 54 respondents- 52 central reporters, the California Youth Authority, and 1 munic agency. States with multiple reporters Alabama (2) and California (2).

Federal parole as defined here includes supervised release, parole, military parole, special parole, and mandatory release.

## Total correctional population

To estimate the total correctional population in tables 6.1 and 6.2, the four correctional populations are assumed to contain individuals with only one status at a time. This assumption may not be valid. Multiple correctional statuses may occur because (1) probation and parole agencies are not always notified of new arrests, jail entries, or prison admissions; (2) absconders on agency caseloads in one jurisdiction may actually be incarcerated in another jurisdiction; and (3) individuals may be admitted to jail or prison before formal revocation hearings by a probation or parole agency.

By adding the number of persons on probation, on parole, in jail, and in prison, some persons may be counted more than once; consequently, the sum will be a slight overestimate of the total number of persons under correctional supervision at any one time.

## Military corrections data

In 1994 the U.S. Department of Defense Corrections Council established an annual military confinement report. The council, comprised of representatives from each branch of military service, adopted a standardized questionnaire with a common set of definitions. BJS obtains yearend counts of persons in the custody of U.S. military authorities from these reports. The annual confinement report provides yearend counts of persons held in U.S. military confinement facilities inside and outside the continental United States, by branch of service, sex, race, and Hispanic origin, conviction status and sentence length, and offense. The confinement report also includes the number of facilities and their design and rated capacities.

## Sourcebook of Criminal Justice Statistics 2003 <br> NCJ 208756

## Dear Sourcebook reader:

Please help us improve future editions of the Sourcebook of Criminal Justice Statistics by answering the following questions. This form is a self-mailing piece; please fold as indicated on the other side, stamp, and mail, or you may fax this form to Rhonda Keith at 202-354-4113. General comments and queries may be sent via e-mail to askbjs@ojp.usdoj.gov. Thank you!

1. For what purpose did you consult the Sourcebook? $\qquad$
2. Was Sourcebook adequate for that purpose?

| $\square$ Quite adequate $\quad \square$ Adequate $\quad \square$ Somewhat adequate $\quad \square$ Not adequate $\quad \square$ Quite inadequate |  |
| :--- | :--- |
| a. Specifically, what helped or hindered your achieving that purpose? |  |

$\qquad$
$\qquad$
3. On about how many separate occasions have you consulted the Sourcebook?
4. Can you point out specific table notes that are not clear or additional terms that need to be defined? $\qquad$
5. Are there sources of data of strong interest to you included in the Sourcebook, but that you were not aware of before consulting the Sourcebook? (Please specity sources.)
$\qquad$
$\qquad$
6. To achieve your purpose, was it necessary for you to consult the original sources of the data? For what reason? $\qquad$
7. Are there data from other primary sources that you would suggest including in future Sourcebooks? $\qquad$
8. In addition to this print edition of Sourcebook, have you had occasion to use:
$\square$ Sourcebook CD-ROM version $\square$ Sourcebook Online Web site (http://www.albany.edu/sourcebook/)
9. Would you be willing to pay nominal fees (\$15 or less each) for both the printed and CD-ROM versions of Sourcebook?
-Yes
$\square$ No, printed version only
$\square$ No, CD-ROM version only
$\square$ No, I'd rely on Sourcebook Online
10. With which type of organization are you associated (or what areas interest you the most)?

| $\square$ Courts | $\square$ Juvenile services | $\square$ Religious | $\square$ Academic (student) |

## Positioning Sourcebook of Criminal Justice Statistics for the 21st Century Executive Summary

Carol A. Hert
Syracuse University
October 28, 2004

Over the last several years, the maturing of Web technologies, Federal mandates for increased efficiency and effectiveness in information dissemination, and the public's changing perceptions of the role of information in their lives have influenced the dissemination activities of Federal agencies. It was in this climate that the current project was developed and undertaken. The project reported here had the goal of providing an integrated look at Sourcebook of Criminal Justice Statistics (hereafter referred to as Sourcebook): its users, mission, its future in light of current and emergent technologies and the information environment.

The project consisted of three research activities. These were:

- A preliminary assessment of the state of knowledge about users of Sourcebook developed using document analysis, site visits, and focus groups (Section two of the report).
- Usability studies to examine user behavior with a range of criminal justice statistical websites (Section three).
- A Delphi study to determine points of consensus on the future mission of Sourcebook and on the related requirements for achieving that mission (Section four).

These methodologies, findings, and specific recommendations of the three activities are summarized in separate sections of this report. The rationales for the three activities and their relationships are provided in an introductory section. Finally, a synthesis of findings across the three activities and resultant recommendations appears in the concluding section (Section five).

## Key findings and recommendations from

 each project activityEach project activity resulted in a set of findings and recommendations. These are summarized here.

## The User Assessment Activity

The goal of the user assessment was to provide a baseline picture of what was currently known about users of Sourcebook
in order to determine what further user studies should be done. Findings are not detailed here (but are in Section two), given their role in supporting further work. The knowledge of existing usage of Sourcebook in its current manifestation and the Delphi preliminary results led the researcher to recommend the following user research strategies. Their intent was not to further document existing usage but to look towards how users and usage might change as Sourcebook moves into the future. Two views of Sourcebook were expressed. The first supports Sourcebook's role as a set of pre-aggregated tables. The second considers Sourcebook within the larger information environment.

## Sourcebook as set of pre-aggregated tables

Critical to its function as the access point for pre-aggregated tables is assuring that the
"right" pre-aggregated tables are available. The current Sourcebook has an established rigorous procedure for determining which tables should be included. This procedure, combined with an analysis of usage of the tables in the online version and an exploration of possible redundancy of tables (because they exist in other sources) can indicate which tables are important to provide in pre-aggregated format, as well as how to identify new ones and monitor that list in the future.

The researcher recommends that SUNY Albany continue monthly listings of the top 100 tables accessed online (with titles and section listings) so that the comparisons made in this document can be extended. In addition, a list of pages not accessed during the month should be tabulated.

## Sourcebook in the Criminal Justice Statistical Information Landscape

Sourcebook is one component of the system of criminal justice statistical information that includes the creators and users of the information, the information and its presentation containers, the technologies available to create, disseminate and use it, and the surrounding socio-political landscape. To understand users and uses of Sourcebook, particularly as they might be changing in the future, therefore involves investigations beyond Sourcebook.

One challenge to understanding user behavior in relationship to Sourcebook, and criminal justice statistical information more generally, is that users change and adapt as rapidly as the tools they use. Thus, looking at user behavior in association with one tool (such as Sourcebook) in one instantiation at a particular moment in time provides limited guidance in developing an understanding of
users that can be utilized for a long period of time. A strategy that can mitigate this situation is to shift the focus to understanding user behavior on particular tasks without unduly constraining the information strategies and sources users employ. This approach provides a more generalized picture of those strategies and the desired characteristics of sources enabling a researcher to make recommendations about the types of features and services a source could provide to facilitate user information seeking. This approach provided information that complements that of the Delphi study, by providing future-oriented information grounded in current behaviors. The researcher designed a study to meet the requirements above. The study addressed the following questions: When engaged in specific criminal justice statistical information tasks, how do people use the primary criminal justice statistical sources? What features and services of these sources facilitate or hinder the resolution of those tasks? The study and its results are described in Section three of the report.

## The Usability Study

The analysis yielded three types of findings from the usability study:

- Generalized patterns of behavior for each site for each task performed on that site. Findings generalized across all tasks, tools, users.
- Usability problems identified for Sourcebook with recommendations for their resolution. The generalized patterns for each site are not reported here but are in Section three.

## Generalized findings

The findings generalized across tasks, tools, and users do not indicate that users tailor their behavior to the specific website they are using. They:

- Perform word matching activities.
- Don't modify their search engine behavior to the search engine or collection being used.
- Have difficulty using pdf files.

A fourth general finding is that the mismatch between search engine boundaries and site boundaries caused problems for users. In addition to the findings that reflect general Web behavior, some of the findings are more specifically related to compendia and statistical information. These were:

- Among the study participants, the tasks did not present situations where their domain knowledge was lacking.
- The organization of information by criminal justice system (most noticeable on Sourcebook) was rarely used or caused difficulties in some of the tasks.
- Predictability of presentation of criminal justice statistical information was used to facilitate retrieval.
- Searching for information about geographic entities is challenging, as people want to search by the name of the entity rather than type of entity.

These findings incorporated with others from the usability study led to a set of summary recommendations from the usability study and follow the section on specific recommendations related to usability for Sourcebook.

Usability problems identified for Sourcebook with recommendations for their resolution

Because of this project's focus on Sourcebook of Criminal Justice Statistics, the researcher reframed the usability findings specific to Sourcebook from the perspective of usability problems and their resolution. The usability problems identified for Sourcebook Online were:

- The introductory text isn't helpful in working on the tasks. All the information on content is below the fold.
- Users felt that Sourcebook had the feel of "just taking the print version and putting it online."
- There was an unclear organization of contents and tables within sections. People realized both listings weren't alphabetical and couldn't find another structure it represented to help them use the organization.
- The search syntax doesn't map to other search engines and every user of search engine got it wrong at least once (and many, multiple times).
- When you have invalid search syntax, you get a message saying to check link for search rules but it is not linked to that page. A user has to go back to search first and find the rules on that page.
- Some people thought the pdf and excel files for each table actually represented different tables and would look at both.
- No way to get to earlier years (mentioned when someone wanted to use the strategy of looking for the same table in a different year).
- The multiple search options (what component of Sourcebook was being searched) didn't seem to be clear to people. People input a search without considering where the search would be executed.
- Options for searching across sections (via search of index or table titles) were not obvious leading people to attempt to
navigate by section (which was challenging for the juvenile task).
- All available options for accessing data are not clear on a section's introductory screen (contents and tables listings are below fold, and sometimes the search option is below the fold as well).
- There were comments on the data lag from UCR and BJS.
- URL includes "1995" appeared to some as representing the 1995 data.
- Many tables in pdf versions have footnotes to Appendices which people wanted to be directly linked.
- The indexing doesn't always follow standard practice reducing the indexing's ability to get people to the correct content. For example, using the term "death penalty" leads to three terms that have "see" references rather than "see also" references. Even better indexing practice would be to use an entry such as "death penalty-public opinion" (indicating a subset of the available information on the death penalty) with a link directly to the set of relevant tables.
- Searching the index resulted in very long listings of entries of a different format from search listings in the table section. Search option on index page should be at the top of the screen.
- The pdf files of the full sections were rarely used.

The following recommendations address these problems in two tiers of recommendations with tier one representing problems that are most easily resolved.

## Tier One Recommendations

1. Provide navigational options at top or left side of screens. These would include search option, access to index, and section links. Usability testing is suggested to see if users locate links and understand functionality to be found via the links.
2. Information on how to use the search engine should be available on the search page and also when the user gets error messages. A no-click option to get the information would be best.
3. Current text appearing on homepage as introductory information should be relocated - some may be appropriate to add to the existing "about Sourcebook" section, other information might go to a "how to use Sourcebook" section which provides information on downloading, searching, etc. Usability testing is suggested to determine what content should appear under what link and what the link label should be. Card sorting techniques may be a useful approach for both components of usability testing.
4. Instead of using file names for files (e.g., table346.wk1), provide links that say

Table 3.46 pdf file format, Table 3.46 spreadsheet format.
5. Remove "1995" from main Sourcebook URL.
6. Provide links to appendices and sources from within a table.
7. Reorganize listings of table titles and section headings.
8. Consider ongoing provision of pdfs of file sections. Monitor their usage.
9. Provide additional years of data online.
10. Conduct usability tests to determine structure of search result entries.

## Tier Two Recommendations

These recommendations may require more extensive usability testing/research than Tier One recommendations or might need to be considered in the context of a shift away from pdf formats to HTML or XML markup strategies. In addition, many of the recommendations, while arising from the usability studies, are not recommendations for specific usability changes.

1. Examine indexing practice. Monitor usage of the index and search to determine the extent to which an index is used.
2. Reorganize listings of table titles and section headings.
3. Enhance access to earlier years of data by direct linking from within a table its earlier iterations).
4. Enhance access to related information by inclusion of links to related tables from within a given table.
5. Work with BJS and other data providers to address issues of harmonization and currency of data.

Summary recommendations from the usability study

The findings of the usability studies point to the extent to which the Web and the standard approaches to web design currently shape user behavior. The dominant results of the usability study indicate that users don't use criminal justice statistical websites differently then they might use any other website: they perform word recognition tasks and don't tailor their behavior to the specific content or features of a given website. Pdf files represent special problems and equivalent boundaries for content and search engines help. This implies the baseline for any redesign of a website. It is recommended that:

- The extent to which user terminology matches agency/expert terminology be investigated. The extent to which users can find the terms they are looking fo the context of few non-relevant term the better they are at finding information.

User terminology should be identified and strategies for mapping it to the more specific expert terminology developed.

- Pdf file usage needs to be further investigated. For those who are printing, pdfs provide a useful printing format. However for activities involving finding information within a document or using a document online, they represent significant challenges.
- Where possible, search engines should be indexing the content of the site they are associated with. Larger sites may benefit from allowing users to choose to search specific components of the site but should not over-partition the contents (as is the case at the moment on Sourcebook). In all cases, there should be an explanatory note indicating the contents the engine is searching and the depth of indexing of entities (such as to the table title level or document title level).

In terms of the findings related to the usage of Web-based criminal justice statistical information, it is recommended that:

- The effort involved in organizing content by the criminal justice system should be investigated. If it is not helpful online, it may not be a reasonable use of resources. In any event, access will be enhanced by a topical index.
- The topical index might include names of geographic entities with pointers to appropriate data. If this is too cumbersome, entries could be added for geographic names with a note indicating how to access relevant data (e.g., by topic with subdivision by geographic entity). If possible, the associated search engine should incorporate the names of geographic entities.
- Since predictability of presentation was useful to some study participants, one strategy to consider would be the making of links among the documents for all years of a publication.

## The Delphi Study

The final result of the Delphi study was a mission statement for Sourcebook of Criminal Justice Statistics and an associated set of requirements considered essential or complementary to attaining that mission. The final mission statement follows:

Final Mission Statement for the Sourcebook of Criminal Justice Statistics as Generated by the Delphi

Sourcebook serves, and is marketed, as the definitive source of criminal justice statistical (CJS) information at the Federal, State, and local level for criminal justice
practitioners, researchers, policy makers, and statisticians.

Sourcebook is a tool that promotes and champions the statistics and their producers. It provides data in a variety of ways (i.e., tables, chart, graphics) with associated metadata and explanations, and links to source data.

Sourcebook links to relevant criminal justice sites, commentary, and analysis. It also provides access to downloadable data sets. It is able to present both the detailed view of CJS information as well as a big picture of the range and nature of that information (partially by linking to new data sources as they become available). It provides a snapshot of CJS information at a moment in time, as well as remaining current. Its information enables historical and other comparative analyses (i.e., geographic, etc.).

If possible, Sourcebook is provided in English and other languages, has online tutorial functions, and provides a suite of data analysis tools.

Sourcebook should not be privatized.
Due to its length, the set of requirements is not presented here but can be found in Table 4.3 .5 of the full report.

The findings lead to a set of recommendations concerning the positioning of Sourcebook of Criminal Justice Statistics in the coming years. These are:

- Sourcebook should continue to provide vetted, quality information. Sourcebook is playing a key role in "setting the bar" for quality information in the domain of criminal justice statistics, particularly for information that is produced outside of the Federal statistical agencies. Sophisticated procedures are currently in place at the University at Albany to assure the quality; these should be maintained.
- Sourcebook should continue to identify new sources of information and incorporate them when they meet appropriate quality standards. Numerous participants commented on new fields of endeavor that are important to be represented in Sourcebook. The field of criminal justice will continue to change, and Sourcebook will need to continually reflect those changes. This might mean that the current organization of Sourcebook will change to reflect changes in the organization of the field.
- Sourcebook should expand its efforts at attaining feedback from users and soliciting their input. If Sourcebook is to retain its premier status more attention needs to be given to understanding its users and their needs for criminal justice statistics.
- Sourcebook should exploit the technological opportunities of the Web. In the short term, Sourcebook should start providing links to source materials, linking technical information directly to appropriate tables, and link to relevant criminal justice sites. It might be appropriate for Sourcebook to include a "reference shelf" section that would provide links to sources, commentary, indexes, etc. As a second tier of activities, it should explore the technical options available for transforming statistical presentations (such as tables to graphics) or provide such additional presentations "manually." Having a robust search engine is also a concern. Also at the second tier, it should assess technologies for enabling users direct access to data to perform unique manipulations. This effort would need to occur in the context of Sourcebooks important role as a vetted source of the most important information. In the longer term, ongoing efforts need to be in place to stay abreast of, and incorporate new technological advances.
- Technological advances need to occur with attention to usability and other user concerns. Delphi participants indicated attention to usability, indexing, and terminology issues as critical requirements for attaining the mission of Sourcebook.
- Sourcebook should develop a mechanism for providing an archive of past Sourcebooks and enabling reoccurring tables to be linked from one Sourcebook to the next.

## Integrated findings and final general recommendations

The final section of the report brings together the findings of the study into an integrated picture and presents recommendations for action. Integration of the findings from the multiple project activities involved 1) identifying agreements in findings among all study activities, 2) assessing the meaning of findings which were the result of one study, and 3) considering conflicting findings. The findings are:

- There is still a recognized need for the functions of a statistical compendium.
o However, only a small number of tables in online Sourcebook receive large usage.
o There is a desire on the part of users for new features that take advantage of technological advances.
- Usage of compendia in the web environment is impacted by the behavior of web users, general usability issues, and the lag of data from original sources.
- Information media have different "affordances" resulting in a lack of direct

## Keeping current on criminal justice issues

For the most recent list of Bureau of Justice Statistics reports or ordering instructions for printed copies, visit http://www.ojp.usdoj.gov/bjs. Download BJS reports at no cost.

To register for the free National Criminal Justice Reference Service (NCJRS) bimonthly catalog by mail, please call 1-800-851-3420 The specialist will send you a registration packet.

## JUSTSTATS

Get e-mail notification of the latest statistical releases from BJS, the FBI, and the Office of Juvenile Justice and Delinquency Prevention through JUSTSTATS. To learn how to subscribe, see http://www.ojp.usdoj.gov/bjs/juststats.htm

## JUSTINFO

For a biweekly electronic newsletter about all the publications, funding opportunities, and other announcements for the Office of Justice Programs, subscribe to JUSTINFO.

To learn how to subscribe, see http://virlib.ncjrs.org/JUSTINFO.asp
