Something that happens to some children these days is that adults or other youths try to force or trick them into doing something sexual. This includes trying to touch the child's private parts or trying to make you touch or make the child look at the other person's private parts. Children report that these kinds of things happen with people they know well or trust, like teachers or relatives.

In the past 12 months, has there been a time when an older person, like an adult, an older teenager, or a babysitter, deliberately touched or tried to touch your private parts or tried to make you touch or look at their private parts, when you didn't want to?
