ANALYSIS OF THE REPORT OF PROBATION SUPERVISION WORKLOAD

Monthly reports of Court Services Workload (J. C. 25's) submitted by Virginia courts with juvenile jurisdiction for fiscal year 1973-74 indicate that the total Probation Supervision Workload (Pre-hearing Studies, Probation Cases Under Supervision and Aftercare Under Supervision) increased from the 13,038 cases remaining at the end of fiscal year 1972-73 to 16,210 cases remaining at the end of fiscal year 1973-74. This represents a 24.3 percent increase in workload or 3,172 cases. The increase was a result of 33,710 cases being added during fiscal year 1974, of which 30,538 were completed.

When looking at the overall increase of 3,172 cases by Region, Richmond represents the largest portion with 1,596 cases or fifty percent of the total. Almost one-fourth (752 cases) of the probation cases were under supervision by Tidewater, Region I. Both Northern Virginia, Region III, and Valley, Region IV, each supervised approximately one-tenth of the increased workload which was 355 and 327 cases respectively. The lowest Regions for increases in supervision workload were Southwest Virginia with 125 cases or four percent of the total and Lynchburg, Region V, with seventeen cases which represents a negligible percentage of the increase at less than one percent.

When comparing 1972-73 to 1973-74 each Region shows an increase. The increase in number of cases under Juvenile Court jurisdiction at the close of the year ranges from a high of 35.4 percent for the Valley Region to a low of less than one percent for the Lynchburg Region. However, following close behind Valley is the Richmond Region with an increase of 34.6 percent. The remaining three Regions, Tidewater, Northern Virginia, and Southwest Virginia with percentage increases of 24.5, 20.0 and 14.4, respectively, combined with other Regions account for the overall increase in probation supervision workload of 24.3 percent.

PRE-HEARING STUDIES

During the Fiscal Year 1974 there were 16,546 Pre-hearing Studies added to the probation supervision workload of which 16,150 were completed. Of the overall workload increase, this accounts for 12.5 percent or 396 cases. However, when considering only Pre-hearing Studies it represents a 24.5 percent increase from 1,615 cases on July 1, 1973 to 2,011 studies carried forward on June 30, 1974.

In regard to Virginia's regional breakdown Tidewater, Region I, represents the largest portion of the net increase with 185 cases or 46.7 percent. Richmond, Region II, contributed the second largest portion of the net increase, 26.3 percent or 104 cases. The Valley, Region IV, and Northern Virginia, Region III, combined account for another 26.3 percent or 104 cases of the net increase with 61 (15.4 percent) and 43 (10.9 percent) cases, respectively. Lynchburg, Region V, had only five cases or 1.3 percent. The only region not representing a net increase was Southwest Virginia, Region VI, which completed two studies beyond the number added during the year.

As stated earlier, the six Regions together completed a total of 16,150 Pre-hearing Studies. Of these Region I, Tidewater handled the largest amount, 4,658 or 28.8 percent of the cases completed. Lynchburg's 3,207 completed cases represented 19.9 percent of the total, while Regions II, III, and IV completed 2,874 or 17.8 percent, 2,372 or 14.9 percent and 1,867 or 11.6 percent, respectively. The region contributing the smallest number of cases was Southwest Virginia, Region VI with 1,176 or 7.3 percent of the overall total.

PROBATION CASES UNDER SUPERVISION

Probation cases under supervision contribute the largest portion to the overall increase in probation workload - 2,061 cases or sixty-five percent. The 2,061 cases represent a 19.7 percent increase in probation cases under supervision, an increase from 10,467 at the beginning of the year to 12,528 cases at the year's end. Of the 2,061 case increase, 1,969 or 95.5 percent were Judicial and 92 or 4.5 percent were non-Judicial. The increase in workload is the result of 15,098 cases (12,458 Judicial, 2,640 non-Judicial) being added during fiscal 1974 and only 13,037 cases (10,489 Judicial, 2,548 non-Judicial) being completed during the same period.

For the fiscal year the overall view by Region shows that Richmond, Region II, makes up 65.4 percent or 1,348 of the total net increase in "Probation Cases Under Supervision." Of the remaining five Regions, four affect the net change by adding to the increase - Region I, Tidewater 392 cases or 19 percent; Region III, Northern Virginia, 241 or 11.7 percent; Region IV, Valley 142 or 6.9 percent, and Region VI, Southwest Virginia 31 or 1.5 percent. The only Region to decrease its cases carried forward was Lynchburg with a net change of minus 4.9 percent or 93 fewer cases.

During the fiscal year there were 13,037 cases completed by the six Regions within the Commonwealth. Regionally, Tidewater completed the highest portion of the probation cases - 3,467 or 26.6 percent. Following close at hand was Region II, Richmond, with 2,984 or 22.9 percent of the cases completed. Accounting for the remainder of the cases were Lynchburg, 17.7 percent; Northern Virginia, 15.1 percent; Southwest Virginia, 11.4 percent and Valley with 6.3 percent or 818 cases.

AFTERCARE UNDER SUPERVISION

Aftercare under supervision accounts for the second largest increase in the overall workload, 715 cases or 22.5 percent. This is a 75.8 percent increase in aftercare supervision workload over the previous 956 cases continued from fiscal 1972-73 to the 1,671 cases carried forward to fiscal 1973-74. The large increase can be attributed to the 1,970 cases added during fiscal 1974 and only 1,255 cases being completed during the same period.

Tidewater, Region I, was once again the leader in accumulating the largest portion of the increased workload by accounting for almost one-fourth of the cases. However, Richmond, Region II, and Valley, Region IV, were close behind Tidewater with increases of 144 cases or 20.1 percent and 124 cases or 17.3 percent, respectively. Lynchburg and Southwest Virginia accounted for 105 or 14.7 percent and 96 cases or 13.4 percent, respectively, of the total increase. It is significant to note that in the Southwest Region the carried forward workload for aftercare supervision increased one hundred percent for this fiscal year. The smallest percent (9.9) of the increase was found in Northern Virginia with 71 cases.

At the close of the fiscal year 1,255 aftercare cases had been completed of which 380 or 30.3 percent were from the Tidewater Region. Data on the other regions show Lynchburg and Richmond Regions completing on a percentage basis approximately the same amount of cases, 18.5 percent and 17.6 percent, respectively; likewise this occurred in the Fourth and Sixth Regions with a total completion of 10.7 percent and 10.0 percent, respectively. The remainder of the completed cases were for Northern Virginia which handled 163 cases or thirteen percent of the total.
