ONE YEAR PROGRESS REPORT

During the period starting on 10/23/72, 12 months have been devoted to the SRO Program. As previously reported, Officer Tarin did not totally function in the role of the SRO. Other activity during the months of July and August involved some patrol work incorporated with requested programs from interested local citizens.

However, during these twelve months Officer Tarin continued his contact with the schools within the "Desert Sands Unified School District."

All schools within this district were equally contacted and the appropriate subjects given. Again much interest was directed toward Indio High School and Wilson and Jefferson Junior Highs.

It was felt that this is an area of prime interest, an area where the kids are impressionable and are willing to listen to what's going on.

Again the focus of the SRO was upon the Mexican-American students. As indicated in the three month report, there were no referrals from the schools by the SRO. Many times the matter is cleared up on a school-student basis. We feel that this disposition is popular with the school authority in that it allows for a solution within the school systems. We feel perhaps that the decision not to refer is the result of a more solid understanding among the school administrators and students (Mexican-American).

Another check of the ethnic balance within the school system reveals the figure to remain the same.

Mexican-American	52-8%
Negro	11-2%
Oriental	2-0%
American-Indian	1-0%
All others	39-0%

. The programs presented by the SRO remained the same and are as follows:

- 1. Officer Bill Program.
- 2. Bicycle Safety Program.
- 3. Pedestrian Safety Program.
- 4. Drug Program (slides and movies).
- 5. Public Relations (upper grades).
- 6. Shoplifting.
- 7. Narcotics.

Sessions with members of the Boys Club was the order of the day. Contact is made at the Boys Club with kids of all racial groups and ages. Sports participation of the SRO at the Boys Club is also done. This program has done much to bring the image of the Police Officer within scope.

There is no doubt that the presence of the SRO within the school has had lasting effect on those that listened.

As a result of this concentrated effort in a ticklish area, we feel that an important message has been brought to the Mexican-American student as well as the parents.

School officials have become more cognizant of the fact that with proper communication the language barrier can be broken, not only in speech but by attitude.

The SRO continued participating in school activities such as basketball games, school parties, special events and other school activities.

The Program has brought about a good response from the community through television, radio and other news sources and service organizations. As mentioned in a previous report, Channel 42 is a bilingual station through which we have reached the Mexican-American public.

During the year we have focused much attention toward our schools with primarily Mexican-American students. Indications are that through parent, school and child response, the programs presented to the Mexican-American student were very successful. Enclosed are breakdowns by school as to the year of activity and referrals. Each school shows no referrals which shows the success of the Program.

For the year the bilingual program was in effect, we show those crimes committed by Mexican-American juveniles within the community have decreased 27% which is slightly above our expectations. Assault type crimes committed by Mexican-American students show a 3% decrease from 10/23/72 to 10/23/73.

As a whole, this department felt that the Program as it was presented and the ability to do so through the grant equipment was fully successful.
