ACQUISITION

Crime in our nation continues to be utmost in the minds of all citizens. In response to their concern, law enforcement officials at the state and local levels are taking new and modern steps to combat and deter the criminal element in our society.

I feel that one of the most important weapons available to the law enforcement officer of today is a modern, efficient police records system. Police records, in the contemporary world, are essential to the effective administration of enforcement agencies; they benefit the individual officer as well as the chief or sheriff. Effective records keeping procedures can assist in solving as well as prosecuting criminal cases from minor offenses to the most serious unlawful acts.

Hand in hand with police records, law enforcement statistics now play a vital role in the planning and organization of modern police departments and sheriffs' offices. Without up-to-date data on criminal activities within his jurisdiction, the law enforcement administrator loses a valuable tool that would assist him in planning short-range tactical allocations of personnel and equipment as well as long-range programs to deal with broad crime problems.

Through this report, CRIME IN SOUTH CAROLINA, I feel that we are serving the needs of law enforcement as well as the citizens of our state. I believe that by informing the public, state and local governments and law enforcement agencies of the nature and extent of criminal activity in our state, we are taking a giant stride toward controlling and reducing crime.

My sincere thanks go to those police departments and sheriffs' offices whose cooperation, dedication and professionalism made this report possible.

Yours truly,  
*J.P. Strom*  
J.P. Strom, Chief  
S.C. Law Enforcement Division

INTRODUCTION

The South Carolina Uniform Crime Reporting Program is one of many steps taken in the establishment of an effective state-wide Criminal Justice Information and Communications System. This particular phase of the CJICS has brought about a state-wide uniform method of collecting crime data, producing a consolidated annual report concerning crime in South Carolina, and reporting state-wide crime information for individual departments as well as the Federal Bureau of Investigation.

NATIONAL UCR PROGRAM

The national Uniform Crime Reports (UCR) program, under the administration of the Federal Bureau of Investigation, is the outgrowth of a need for uniform and comprehensive study of crime statistics in the United States. The national UCR program was developed by a committee of the International Association of Chiefs of Police (IACP) in 1930. Today the IACP continues to serve in an advisory capacity to the FBI concerning the operation of the program. The publication, Crime in the United States, is the annual report by the FBI dealing with national crime statistics. During the last several years, the FBI has been encouraging and assisting individual states in the development of state operated programs of law enforcement statistics based on the national UCR program.

SOUTH CAROLINA UCR PROGRAM

South Carolina was one of the first states to implement an operational state UCR program. The South Carolina Law Enforcement Division is the agency administering the program. The information collected and the uniform classification under which it is collected is based directly upon the guidelines of the FBI and IACP.

Upon initiation of the South Carolina UCR program in July, 1973, SLED, in conjunction with the FBI, held workshops around the state to instruct or refresh the county and city law enforcement agencies on the scope of the program and the mechanics of completing the forms. Since that time SLED's five UCR field agents have been in continuous contact with the sheriff's offices and police departments around the state, assisting them in any way possible in order to facilitate collection of the crime data.

The data gathered under the UCR system are tallied by the local agencies from their offense reports and arrest reports. Sheriffs' offices and police departments report on a monthly basis the number of offenses known to them, as well as the age, sex, race and charge of persons arrested, breakdowns of crimes with property loss, and detailed information concerning all willful homicides. Information is gathered annually on police employee strength and the disposition of persons formally charged.

The data gathered under the South Carolina UCR program are verified for accuracy, recorded and filed. If there are discrepancies on any form, the agency concerned is contacted and adjustments made to insure the accuracy of the information.

## REPORTING AND CLASSIFICATION

While there is no doubt that crime in South Carolina is increasing, care should be exercised when viewing the number of offenses reported to the UCR program. It should be noted that methods of crime reporting have been improved and the total number of agencies reporting to the system has increased. Consequently, the volume of crime actually reported in the state has increased.

In reporting offenses to the Uniform Crime Reports program, the contributing agencies classify offenses according to standard definitions (given in a later section of this report) that are used throughout the nation. The UCR definitions are designed to insure that offenses with different titles under state and local law are appropriately counted under uniform categories. Furthermore, offenses are classified and counted under the UCR program without regard to the findings of courts or juries, since the statistics are gathered primarily to assist in identifying areas of concern to law enforcement officers, and are not meant to reflect the outcomes of inquests, hearings or trials.

## NEW COLLECTION PROCEDURES

After some months of experience with the standard UCR program, it has become apparent that a method of data collection more convenient and more accurate is available to the law enforcement agencies in South Carolina. The new method, a voluntary program offered as a service by SLED, will, when completely operational, fully replace the standard UCR forms that local agencies are now using. The procedure now being implemented utilizes a standard incident report (offense report) and booking report to be used in place of the offense and booking reports presently being used by local agencies. Copies of all incident and booking reports will be sent to the UCR section at SLED where they will be coded and entered into the computer. At the end of each month the computer will generate the UCR report for each local agency. In addition to the standard UCR returns, the monthly printout will include a count of all offenses investigated as well as non-offense responses (such as bank escorts, etc.), and for agencies desiring to divide their jurisdiction into two or more areas, a count of each type of crime within each location will be made available.

By offering this new program to law enforcement agencies, SLED hopes to alleviate some of the paperwork with which many departments are now burdened. An additional advantage of using standard incident and booking reports will be realized in the uniformity of the forms. Standardized reports will facilitate the exchange of information between law enforcement agencies within the state. The forms have also been included in the report writing classes taught at the South Carolina Criminal Justice Academy, thereby reducing the need for individual departments to train every new employee in the use of local offense reports and booking reports.

More than 100 local law enforcement agencies, city and county, large and small are now participating in the new collection procedure.

## OBJECTIVES

The fundamental objectives of the South Carolina UCR Program are:

- ( 1 ) Inform the governor, legislature, other governmental officials, and the public as to the nature of the crime problem in South Carolina—its magnitude and its trends.
- ( 2 ) Provide law enforcement administrators with criminal data for administrative and operational use.
- ( 3 ) Determine who commits crimes by age, sex and race in order to assist in finding the proper focus for crime prevention and enforcement.
- ( 4 ) Provide base data to measure the workload and effectiveness of South Carolina's criminal justice system.
- ( 5 ) Provide base data to measure the effects of prevention and deterrence programs.

## CRIME FACTORS

Data gathered under the Uniform Crime Reporting Program are submitted by the law enforcement agencies of South Carolina and project a state-wide view of crime. Awareness of the presence of certain crime factors, which may influence the resulting volume and type of statistics presented, is necessary if fair and equitable conclusions are to be drawn. These crime influencing factors are present, to some degree, in every community and their presence affects, in varying degrees, the crime experience of that community. Attempts at comparison of crime figures between communities should not be made without first considering the individual factors present in each community.

Crime, as an outgrowth of society, remains a social problem of grave concern and law enforcement agencies are limited in their role to its suppression and detection. As stated by the President's Commission of Law Enforcement and Administration of Criminal Justice in their report "The Challenge of Crime In A Free Society":

"But the fact that the police deal daily with crime does not mean that they have unlimited power to prevent it, or reduce it, or deter it. The police did not create and cannot resolve the social conditions that stimulate crime. They did not start and cannot stop the convulsive social changes that are taking place in America. They do not enact the laws that they are required to enforce, nor do they dispose of the criminals they arrest. The police are only one part of the criminal justice system; the criminal justice system is only one part of government; and the government is only one part of society. Insofar as crime is a social phenomenon, crime prevention is the responsibility of every part of society. The criminal process is limited to case by case operations, one criminal or one crime at a time."

Set forth below are some of the conditions which will, by type and volume, affect the crime that occurs from place to place.

Density and size of the community population and metropolitan area of which it is a part.

Composition of the population.

Economic status of the population.

Relative stability of the population, including commuters, seasonal, and other transients.

Climate, including seasonal weather conditions.

Policies of the prosecuting officials and the courts.

Attitude of the public toward law enforcement problems.

## CRIME INDEX OFFENSES

In the Uniform Crime Reports program there are seven important offenses that are used as an index of crime. The offense classifications are: murder and voluntary manslaughter, rape, robbery, aggravated assault, breaking or entering/burglary, larceny, and motor vehicle theft. The criteria used in determining whether a crime is used as an index offense are the seriousness of the crime and the frequency with which it occurs. Not all important offenses occur with enough regularity to be meaningful in an index. Law Enforcement agencies do not purport to know the total volume of crime, since there are many offenses committed which are never reported by the victims.

It should be noted that under the Uniform Crime Reports program an attempt to commit an offense is scored as though the crime was completed (except for attempted murder, which is scored as aggravated assault). The reason for scoring attempts is to show the extent of criminal activities, whether the acts were completely successful or not. The fact that a criminal was interrupted while attempting to commit a crime only indicates that some circumstance prevented completion.

## INDEX OFFENSE DEFINITIONS

The definitions given below apply to Uniform Crime Reporting categories and should not be confused with statutory definitions. These definitions are common to UCR programs all over the United States.

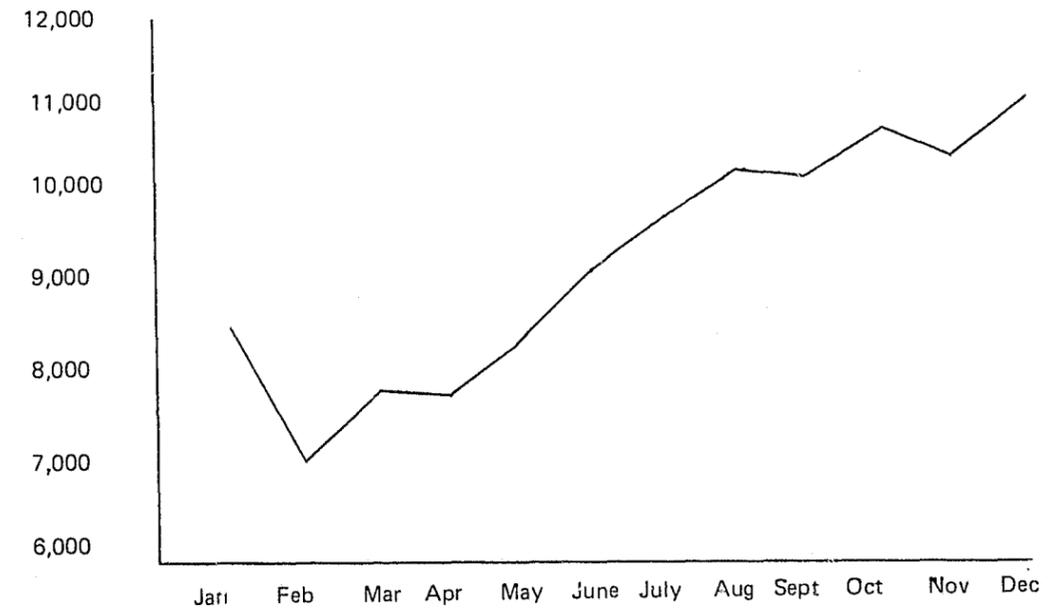

1. **MURDER** - The willful killing of a human being (includes voluntary or non-negligent manslaughter).
2. **RAPE** - The carnal knowledge of a female through the use or threat of force (does not include statutory rape).
3. **ROBBERY** - Unlawfully obtaining the property of another by force or the threat of force. Robbery occurs only in the presence of a victim.
4. **AGGRAVATED ASSAULT** - An unlawful attack upon a person for the purpose of inflicting severe bodily injury.
5. **BREAKING OR ENTERING/BURGLARY** - The unlawful entry of a structure to commit a felony or theft.
6. **LARCENY** - The unlawful taking of the property of another without the use of force or fraud.
7. **MOTOR VEHICLE THEFT** - The unlawful taking of a motor vehicle. Motor vehicle theft includes alleged joyrides.

NUMBER OF OFFENSES REPORTED

Offense Category	Number Of Offenses	Subcategory Distribution	Index Distribution
Murder	452		.4%

INDEX TOTALS

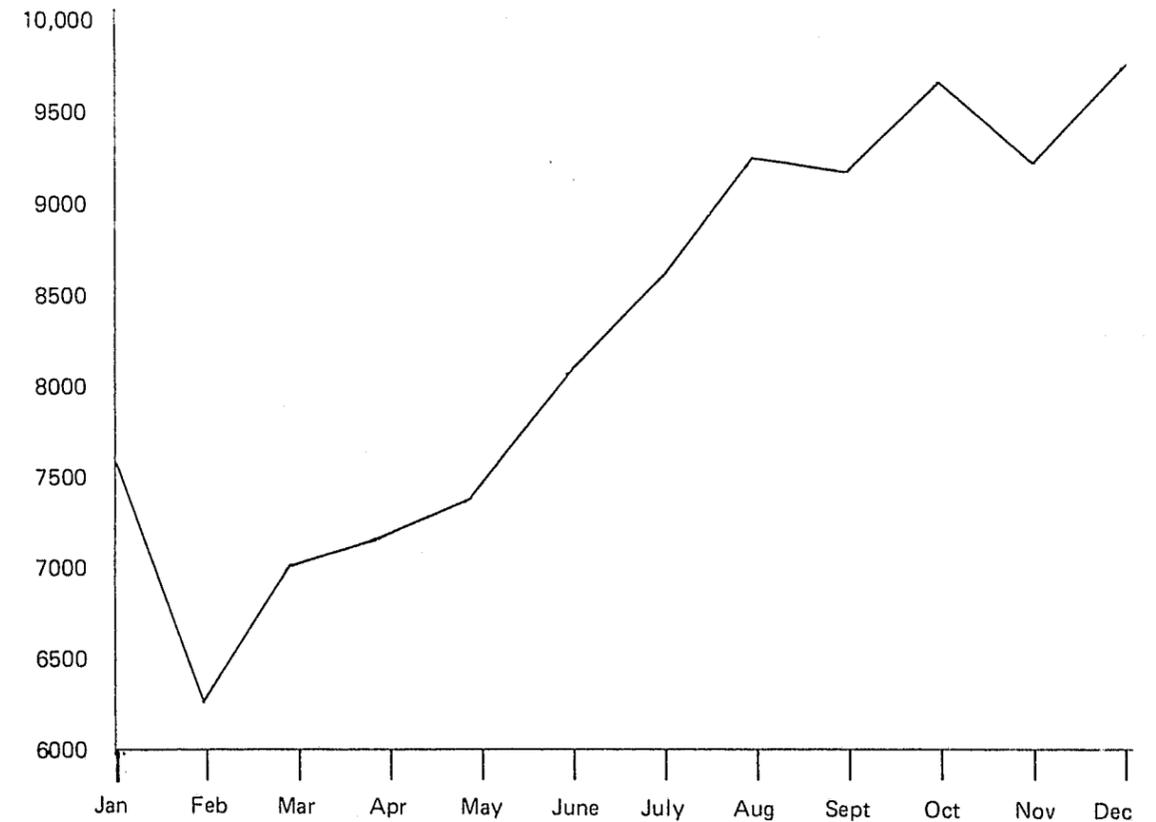

During 1974, there were 111,186 index crimes reported in South Carolina. Of these, 12,457 were violent crimes (murder, rape, robbery and aggravated assault) and 98,729 were property crimes (breaking or entering, larceny and motor vehicle theft). The month of February reflected the fewest index crimes (less than 7,100), while December showed the most (more than 11,000).

VIOLENT CRIMES  
1974

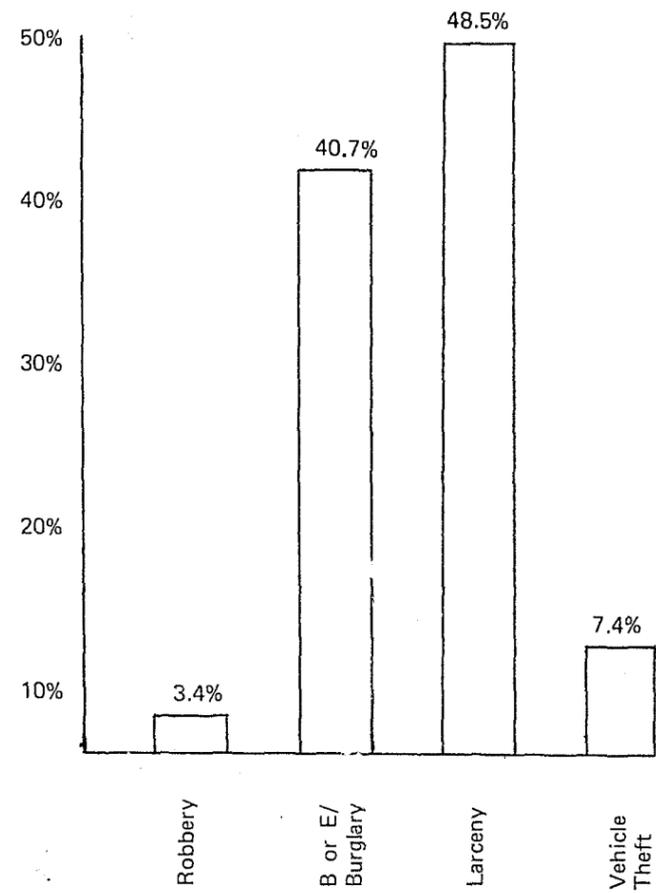

Violent crimes (murder, rape, robbery and aggravated assault) involve personal confrontations between the victims and the perpetrators, and because of the inherent violence or threats of violence, these offenses are generally looked upon as the more serious of the crimes. Violent crime showed a general increase during 1974. The month of February reflected the fewest violent crimes (less than 800), while the month of December reflected the most (more than 1300). There were 12,457 violent crimes reported.

PROPERTY CRIMES  
1974

During 1974, there was a general rise in the number of crimes against property. The graph on this page depicts the increase of the total volume of the offenses of breaking or entering, larceny and motor vehicle theft. The month of February showed the fewest property offenses (less than 6,300), while the month of December showed the most (more than 9,700). There were 98,729 property crimes reported.

DISTRIBUTION OF PROPERTY ORIENTED CRIMES

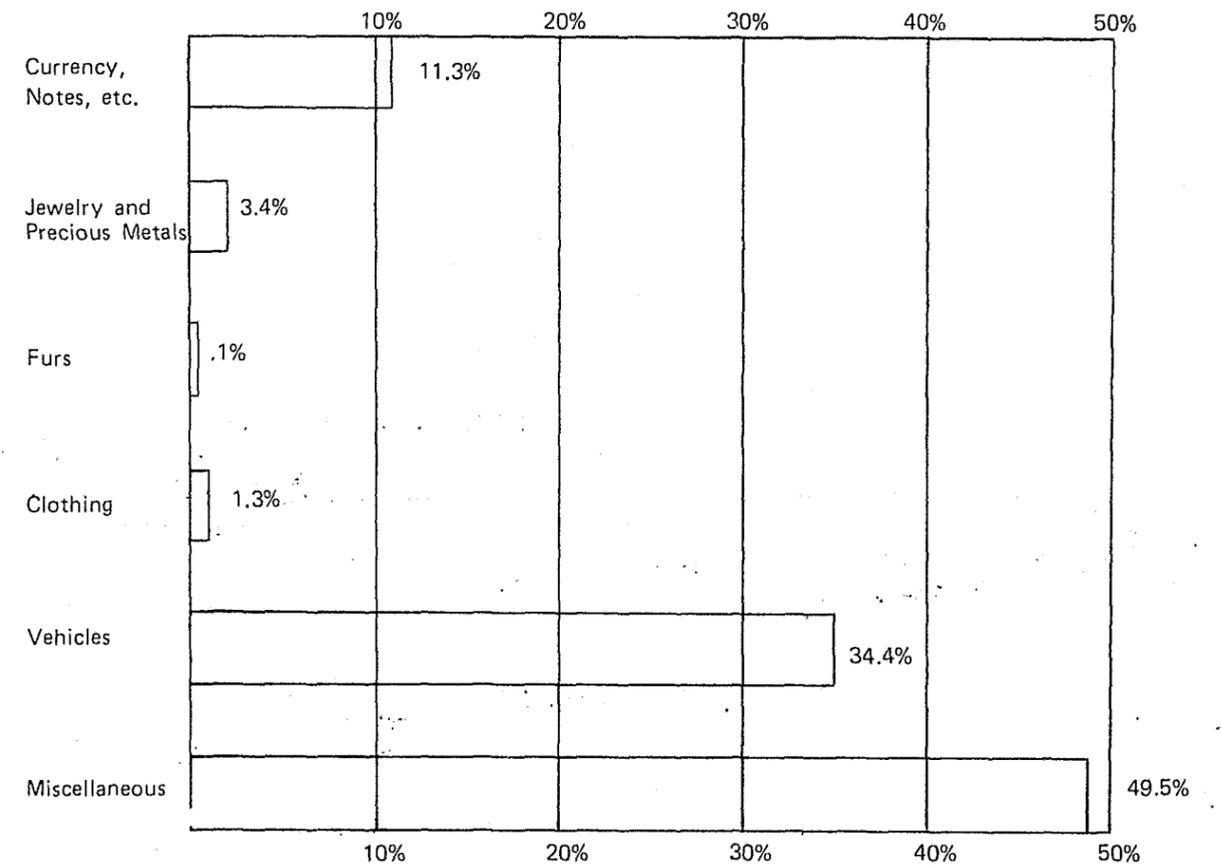

The graph above depicts the relative distributions of offenses in which the unlawful taking of property was the primary objective. Robbery, considered a violent crime, is included here.

Of the \$30,904,599 reported stolen during 1974, robbery accounted for 4.7 percent, breaking or entering 36.9 percent, larceny 23.6 percent and motor vehicle theft 34.7 percent.

STOLEN AND RECOVERED PROPERTY BY TYPE

Type	Value Stolen	Value Recovered	Percent Recovered
Currency	3,477,815	621,207	17.9
Jewelry	1,066,730	209,995	19.7
Furs	34,189	5,744	16.8
Clothing	389,173	103,944	26.7
Locally Stolen Vehicles	10,628,029	7,015,896	66.0
Miscellaneous	15,308,663	2,595,277	17.0
Total	30,904,599	10,552,063	34.1

STOLEN PROPERTY BY TYPE

## MURDER

The index offense of murder and nonnegligent manslaughter includes any willful killing of a human being except those classified as justifiable. In the UCR definition, justifiable homicides are specifically limited to the killing of an individual by a police officer in the line of duty or the killing of a felon by a private citizen. Also excluded from this category are accidental or negligent homicides and suicides. Attempts to commit murder are classified as aggravated assaults.

One offense is counted for each victim of a murder.

There were 452 murders reported to the South Carolina UCR program during 1974.

Murders accounted for 3.6 percent of the violent crimes and .4 percent of the total index offenses.

Firearms were used in 78.9 percent of the murders while cutting instruments were used in 12.6 percent, hands and feet in 3.1 percent and other weapons in 5.4 percent.

Males accounted for 78.3 percent of murder victims, while 60.8 percent of all victims were Negro. The age group of 20 to 24 years was the highest for murder victims, accounting for 15.9 percent.

Murders of one family member by another accounted for 32.8 percent of all murders, while killings by friends or acquaintances of the victims accounted for 49.0 percent.

The killing of persons during robberies accounted for 7.1 percent of all murders.

Alcohol was involved in 34.1 percent of all murders.

## MURDER VICTIMS BY AGE

Age	Number	Percent Distribution
1-4	4	.9
5-9	0	.0
10-14	10	2.2
15-19	33	7.3
20-24	72	15.9
25-29	67	14.8
30-34	45	10.0
35-39	57	12.6
40-44	39	8.6
45-49	34	7.5
50-54	29	6.4
55-59	35	7.8
60-64	13	2.9
65 And Over	10	2.2
Unknown	4	.9
Total	452	100.0%

## MURDER VICTIMS BY SEX

Sex	Number	Percent Distribution
Male	354	78.3%
Female	98	21.7%
Total	452	100.0%

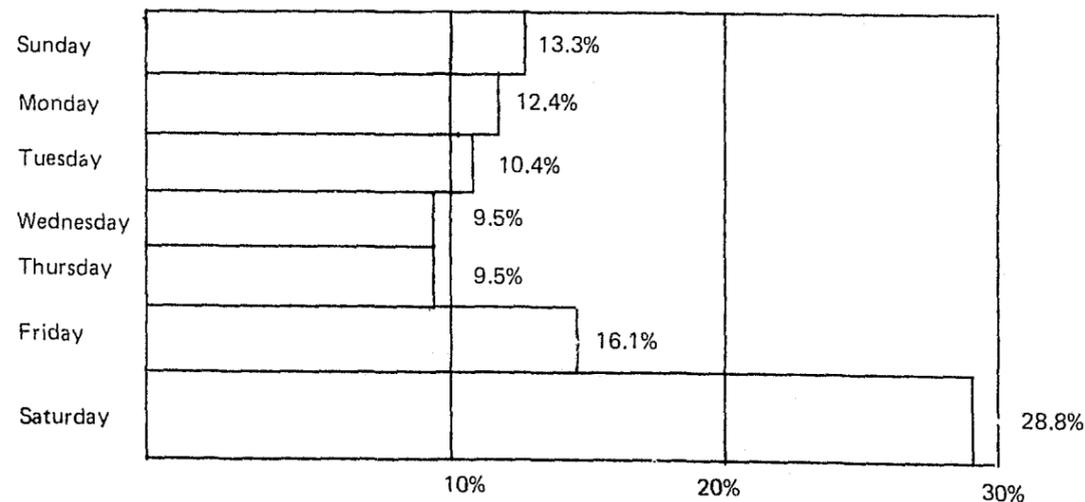

## MURDER VICTIMS BY RACE

Race	Number	Percent Distribution
Negro	275	60.8%
White	176	39.0%
Indian	1	.2%
Total	452	100.0%

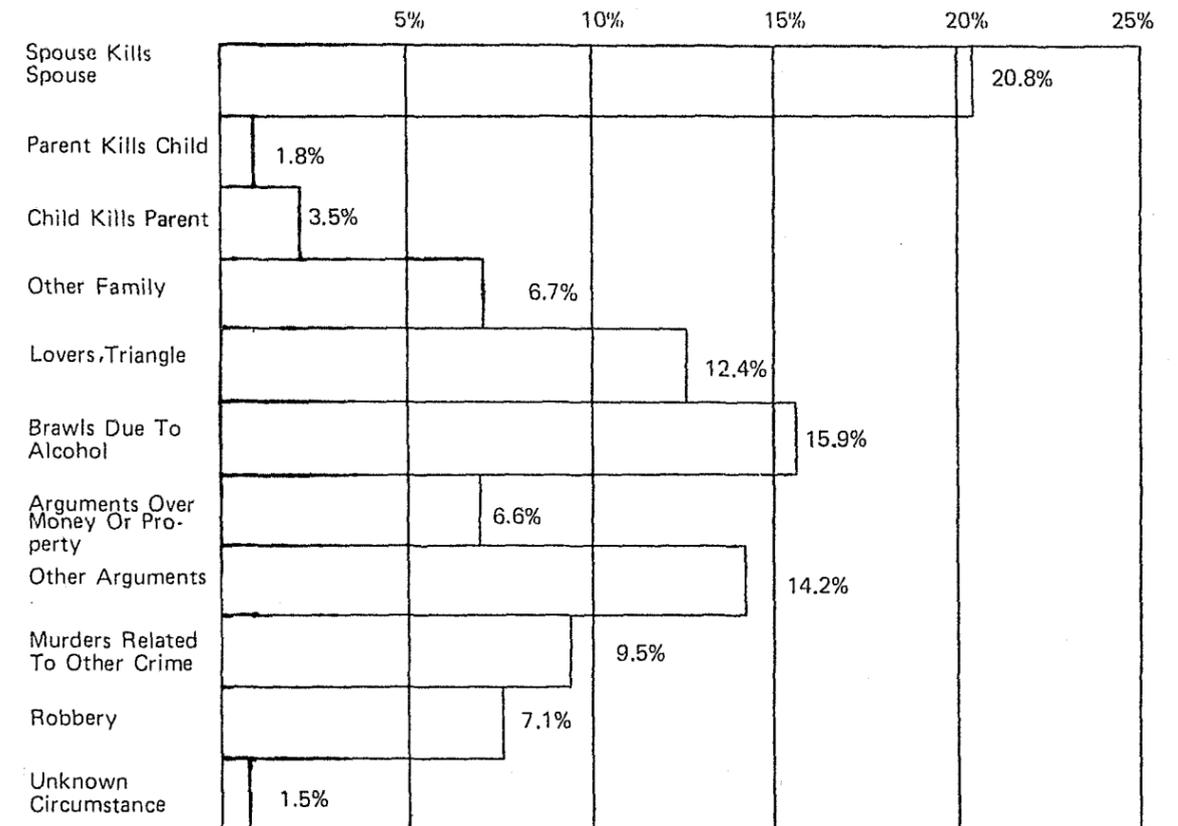

MURDER DISTRIBUTION BY WEAPON TYPE

Weapon	Number Of Offenses	Distribution
Handgun	264	58.4%
Shotgun	66	14.6%
Rifle	25	5.5%
Unknown Type Firearm	2	.4%
Knife Or Cutting Instr.	57	12.6%
Blunt Object	16	3.5%
Hands, Fist, Feet, etc.	14	3.1%
Other Weapons	8	1.8%
Total	452	100%

MURDER DISTRIBUTION BY DAY OF WEEK

MURDER BY CIRCUMSTANCE

DISTRIBUTION OF MURDERS INVOLVING ALCOHOL

(Excluding the Category of "Brawls Due To Alcohol")

Circumstances	Number of Offenses	Percent Involving Alcohol
Spouse Kills Spouse	94	21.3%
Parent Kills Child	8	25.0%
Child Kills Parent	16	12.5%
Other Family	30	36.7%
Lovers, Triangle	56	32.1%
Arguments Over Money Or Property	30	53.3%
Other Arguments	64	9.4%
Murders Related To Other Crimes	33	9.1%
Robbery	32	3.1%
Unknown Circumstance	7	42.8%

## RAPE

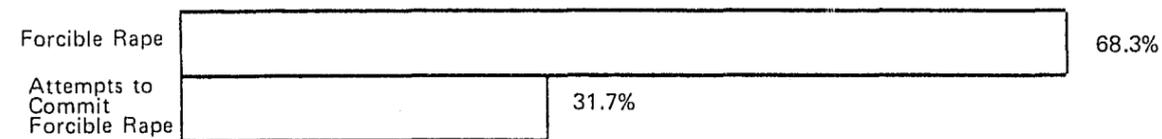

Forcible rape is the carnal knowledge of a female through the use or threat of force. Assaults or attempts to rape are included in this category. Statutory rape is not included.

One offense is counted for each victim of a rape.

Rape, under the UCR program, is divided into two categories: rape by force and attempted forcible rape.

Forcible rape accounted for 68.3 percent of all reported offenses in this category, while attempts to commit forcible rape accounted for 31.7 percent.

The highest number of rapes for a single month fell in September, accounting for 12.3 percent.

## ROBBERY

Robbery is a violent type of crime in which the element of personal confrontation is present. Robbery is defined as the unlawful taking of the property of another through the use or threat of force. Assaults to rob and attempts to rob are included. Both armed robberies, in which any weapon is used, and strong-arm robberies, in which no weapon is used, are counted.

One offense for each distinct operation of robbery is counted, regardless of the number of victims present.

A total of 3,434 robberies were reported in South Carolina during 1974.

Robberies accounted for 27.6 percent of all violent crimes and 3.1 percent of the total number of index offenses.

Armed robberies accounted for 71.2 percent of all robberies, while strong-arm robberies accounted for 28.8 percent.

Highway robberies (committed in streets, alleys, etc.) accounted for 33.5 percent of all robberies, while commercial houses (other than service stations, chain stores and banks) accounted for 20.9 percent of the robberies. Chain stores accounted for 15.5 percent of robbery victims.

Firearms were employed in 61.6 percent of all reported robberies, while hands and feet were used in 28.8 percent, cutting instruments in 5.8 percent and other dangerous weapons in 3.8 percent.

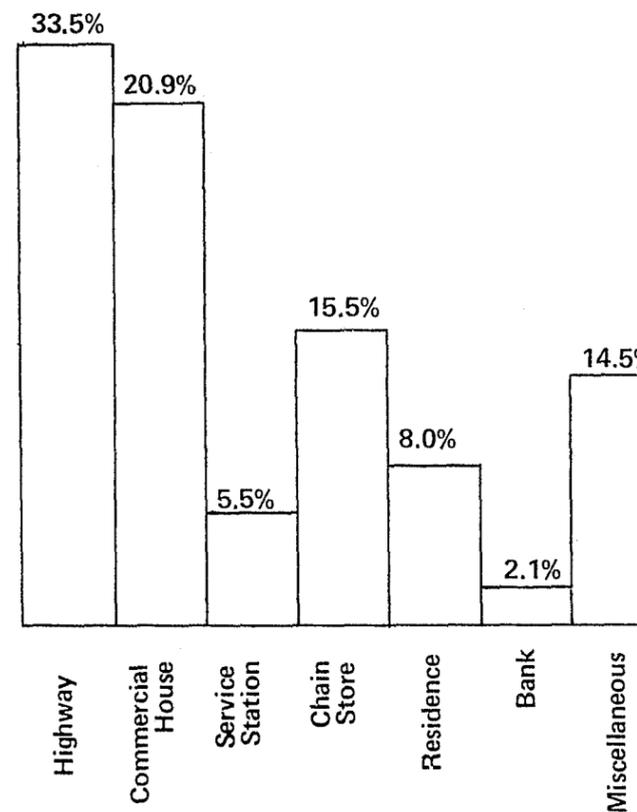

The month of December showed the highest number of robberies, with 473 offenses reported.

There were 32 deaths reported resulting from robberies.

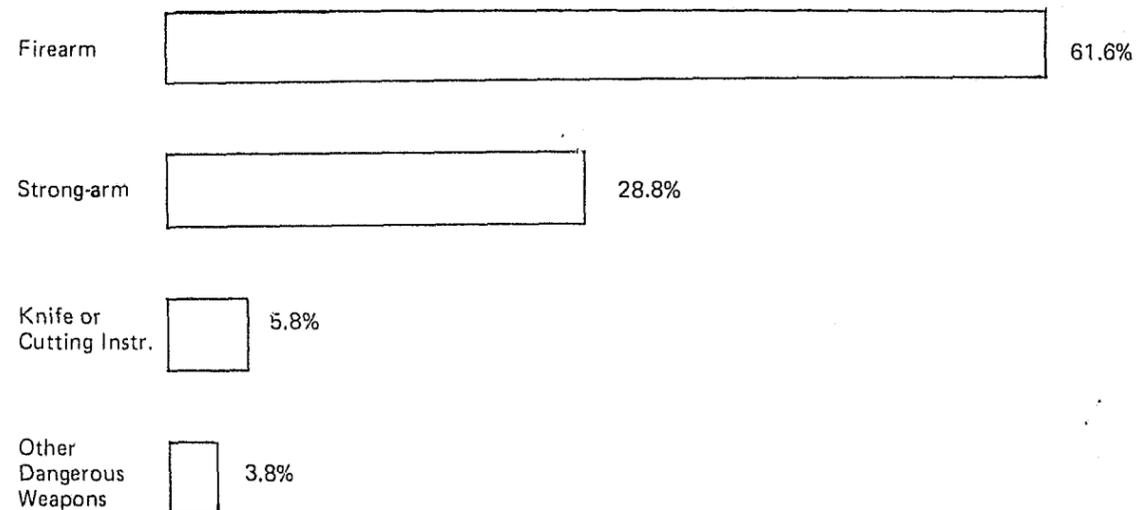

ROBBERY  
VALUES BY PREMISE

CLASSIFICATION	TOTAL VALUE
HIGHWAY	\$170,838
COMMERCIAL	314,065
SERVICE STATION	49,642
CHAIN STORE	168,086
RESIDENCE	116,015
BANK	489,766
MISCELLANEOUS	136,033
TOTAL	\$ 1,444,445

ROBBERY  
OFFENSE DISTRIBUTION BY PREMISE

OFFENSE DISTRIBUTION BY WEAPON

## AGGRAVATED ASSAULT

Aggravated assault is defined as an unlawful attack by one person upon another with the intent of inflicting severe bodily injury. Aggravated assaults are frequently accomplished with a weapon or other means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury result when a firearm, knife, or other weapon is used, which could cause serious personal injury. Attacks with hands or feet must result in serious personal injury or injuries requiring medical attention in order to be classified as aggravated assaults. Attempted murders are classified under this category.

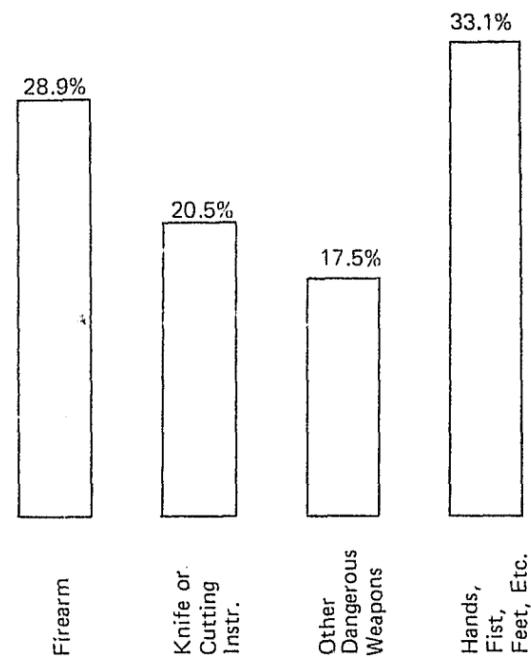

One offense is counted for each victim of an aggravated assault.

A total of 7,865 aggravated assaults were reported in South Carolina during 1974.

Aggravated assaults accounted for 63.1 percent of all violent crimes and 7.1 percent of the total number of index offenses.

Dangerous weapons were employed in 66.9 percent of all aggravated assaults, while hands or feet were used in 33.1 percent.

The month of November showed the highest number of aggravated assaults, accounting for 9.5 percent of the total.

## BREAKING OR ENTERING/BURGLARY

The category of breaking or entering/burglary includes any unlawful entry of a structure to commit a felony or theft. It is not necessary that force be used to gain entry in order for the offense to be classified as an unlawful entry. Neither is it necessary for a property loss to occur in an unlawful entry or break-in for the event to be classified under this category. Attempts to commit the above offenses are counted.

One offense is counted for each distinct operation of breaking or entering/burglary.

There were 41,551 offenses of breaking or entering/burglary reported in 1974.

Breaking or entering/burglary accounted for 42.1 percent of property crime and 37.4 percent of all index offenses.

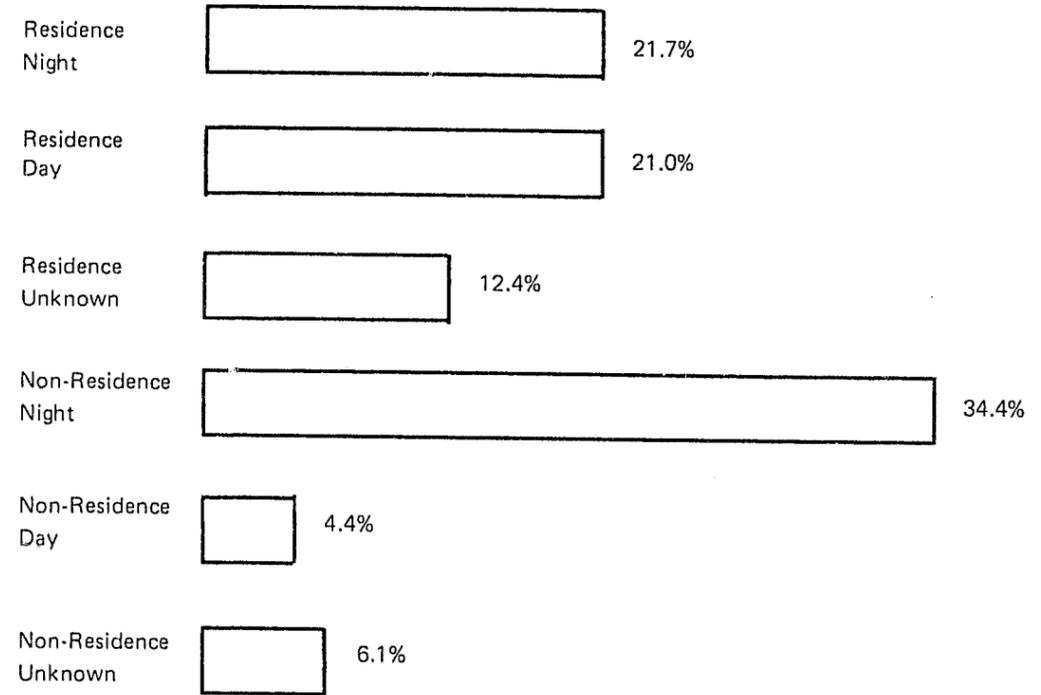

Of the three categories of breaking or entering/burglaries, forcible entry accounted for 83.2 percent of the total offenses, unlawful entry accounted for 9.4 percent and attempted forcible entry accounted for 7.4 percent.

In this category, residences accounted for 55.2 percent of the targets.

Night operations accounted for 56.1 percent of the offenses in this category, while 25.4 percent were committed during daylight hours and 18.5 percent were committed at undetermined times.

The month of December showed the largest number of reported offenses, accounting for 10.9 percent of the total.

BREAKING OR ENTERING/BURGLARY  
BREAKING OR ENTERING BY TIME AND PREMISE

LARCENY

Larceny is defined as the unlawful taking or stealing of property without the use of force, violence or fraud. It includes offenses such as shoplifting, pocket-picking, purse-snatching, thefts of items from vehicles or of vehicle parts and accessories, bicycle thefts and the like. Thefts from tents, campers, house boats and similar recreation vehicles are included under the larceny category. For purposes of Uniform Crime Reports, this category does not include embezzlement, fraud, unlawful conversions, forgery, worthless checks or similar offenses. Motor vehicle thefts are not included under larceny; they fall into a separate index category. Attempts to commit larcenies are included.

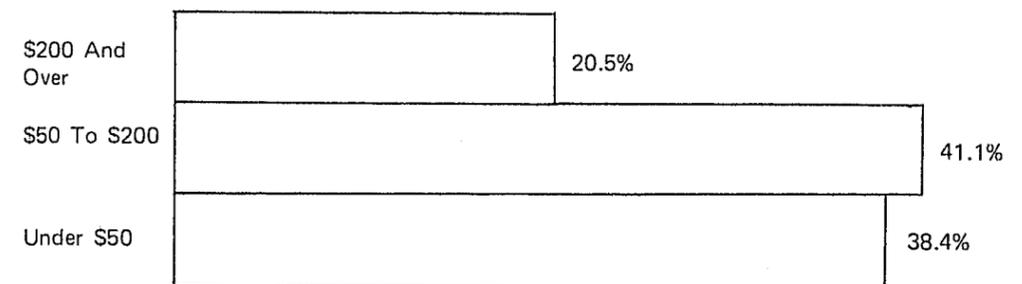

One offense of larceny is counted for each distinct operation.

A total of 49,593 offenses of larceny were reported in 1974.

Larceny accounted for 50.2 percent of property crimes and 44.6 percent of all index offenses.

Individual offenses of larceny in which property stolen amounted to \$200 or more accounted for 20.5 percent of this category, while offenses in which the value of property stolen was less than \$50 accounted for 38.4 percent.

The month of October showed the greatest number of larcenies reported, accounting for 9.6 percent of the total.

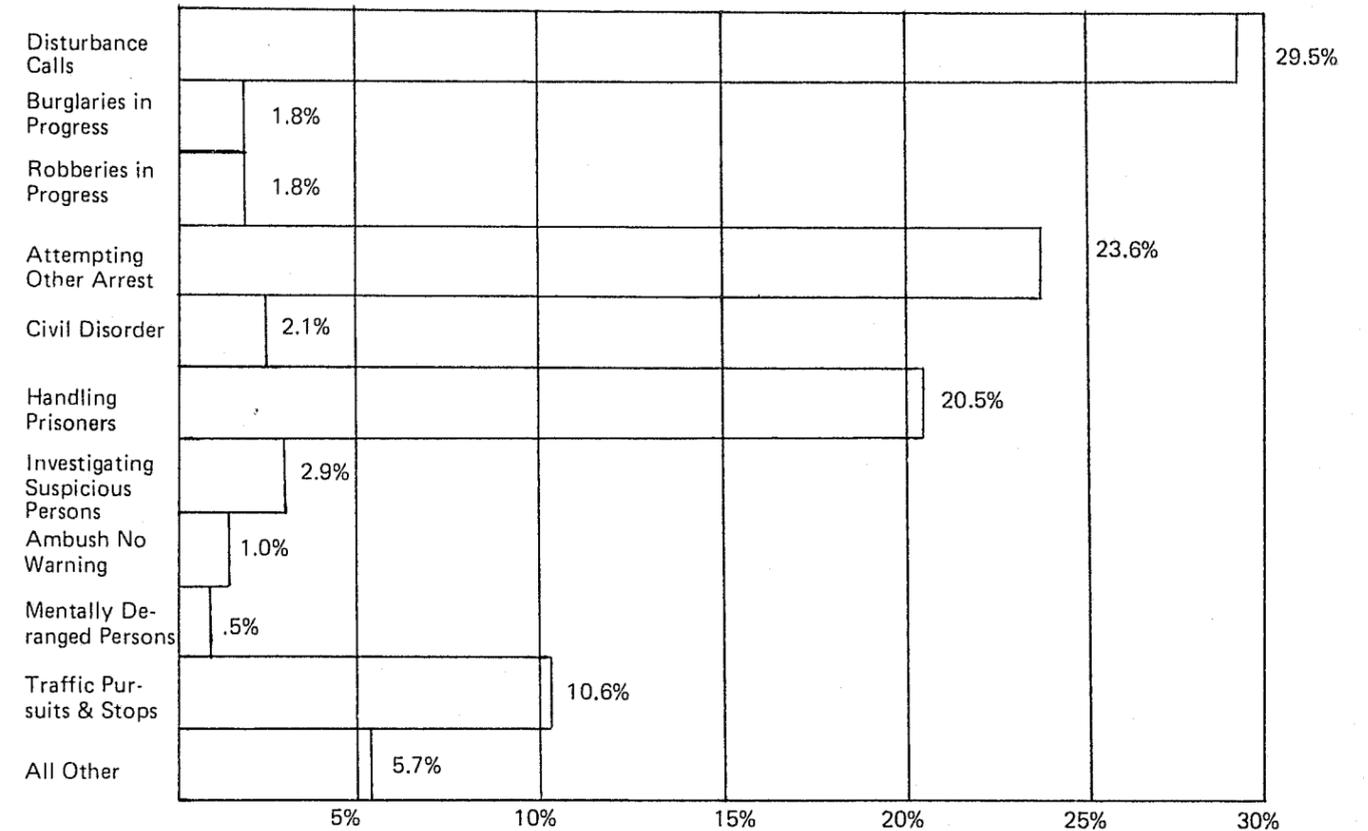

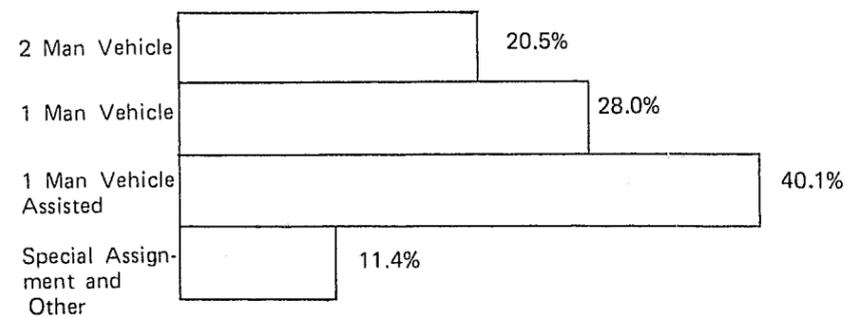

LAW ENFORCEMENT OFFICERS ASSAULTED BY ACTIVITY AND WEAPON TYPE

S. C. LAW ENFORCEMENT OFFICERS KILLED

There were seven law enforcement officers killed in South Carolina during 1974.

Of these officers, three were city policeman, one was a sheriff's deputy, one was a county policeman, one was a state highway patrolman and one a state wildlife officer.

Three officers were killed by shotguns and four by handguns.

The shortest distance between a victim officer and his assailant was two feet, and the greatest distance was ninety-two feet.

Experience in police work of the victim officers ranged from four months to twenty-six years.

**OFFICERS KILLED

**INDEX TOTALS BY COUNTY AND AGENCY**

The following tables reflect the total index offenses reported to the South Carolina Uniform Crime Reports Program during 1974. The totals are shown for each county and for each law enforcement agency within the county.

The county totals shown here are those used to compute the crime rates per 10,000 population given in the next section.

Listed in the last section of this report, under CONTRIBUTOR PARTICIPATION, are those municipal agencies whose index offenses are included in reports submitted by the local county law enforcement agencies.

## CRIME RATES

One of the most meaningful crime statistics is the crime rate. This rate, on the national level, is the number of offenses per 100,000 inhabitants. For purposes of this report, however, the rates have been calculated per 10,000 inhabitants. This rate can be calculated regardless of the number of inhabitants in your city or county. To compute rates, divide your area's population by 10,000 and divide the number of offenses in each class by that answer. The answer is the number of offenses in that class per 10,000 and is that area's crime rate for that offense.

### Example:

- Population for your jurisdiction: 75,000.
- Number of robberies for your jurisdiction for a year: 215

Divide 75,000 by 10,000 = 7.5

Divide 215 by 7.5 = 28.67

Your robbery rate: 28.67 per 10,000 inhabitants.

The number 7.5 can now be divided into your totals in any offense class to produce a crime rate for that offense.

## COUNTY CRIME RATES PER 10,000 POPULATION

The following tables reflect the crime rates per 10,000 population for each county in South Carolina. It should be understood that these rates apply to the total numbers of offenses reported by all law enforcement agencies within each county.

The populations shown reflect the figures prepared in a Federal-State Cooperative Program with the United States Bureau of Census, provisional July 1, 1974. The estimates were released by the South Carolina Division of Research and Statistical Services on February 3, 1975.

COUNTY CRIME RATES PER 10,000 POPULATION

County Population	Murder	Rape	Robbery	Aggravated Assault	Breaking or Entering	Larceny	Motor Vehicle Theft
Abbeville, 21,600	1.9	1.9	4.2	25.5	69.4	87.0	17.1

AGENCY PARTICIPATION

The tables on the following pages reflect the total participation in the South Carolina Uniform Crime Reports Program for 1974. The participation history is shown for each city and county law enforcement agency in the state.

The table below lists the participation by population groups. The percentages are based on the total number of months of coverage for the 250 law enforcement agencies or incorporated areas in South Carolina. The 250 agencies multiplied by twelve months means that the total coverage for the state would be 3,000 agency-months, if participation is 100 percent.

AGENCY-MONTH COVERAGE

Group	Number Of Offenses	Period (Months)	Prospective Coverage (Agency-Months)	Actual Coverage (Agency-Months)	Percent Coverage
Cities Over 50,000 Population	5	12	60	60	100%
Cities 25,000 To 50,000 Population	5	12	60	60	100%
Cities 5,000 To 25,000 Population	40	12	480	474	98.8%
Cities Under 5,000 Population	154	12	1,848	1,665	90.1%
County Law Enforcement Agencies	46	12	552	525	95.1%
STATE TOTAL	250	12	3,000	2,784	92.8%
