## INTRODUCTION

The Bureau of Prisons maintains abstracts of research conducted in federal correctional institutions. In August, 1976, 400 abstracts from the past five years were bound and made available to a limited circulation under the title Abstracts of Research - 1970-1975. A separately bound index to the abstracts is now being made available to libraries and correctional systems. The majority of the studies referenced in Abstracts of Research have not been published in journals and, therefore, have not been accessible to researchers outside the Federal Bureau of Prisons. The bound volume, Abstracts of Research, contains studies received by the Office of Research during the period January, 1970 - December, 1975. (A small number of studies conducted before 1970 are included when they are directly related to continuing research.)

This Index is organized into three sections according to subject matter, title, and author.

The author index lists authors (and co-authors) alphabetically with a cross reference to Title(s) and the index code number for each study.

The title index lists titles alphabetically with the name(s) of the principal author(s) and the index code number.

The subject index lists content categories alphabetically (e.g., alcoholism, recidivism, staff training) and provides a cross reference to the title index and the index code number.

The index code mentioned above consists of a three letter mnemonic symbol which indicates the institution in which the research was done, followed by the volume year, and the numerical series. For example, ALD 75 007 refers to Alderson Federal Correctional Institution, Volume year 1975, and 007 means that this is the 7th study reported at Alderson that volume year. A listing of the institutional mnemonic symbols and a brief description of each institution follows this introduction.

Copies of specific abstracts listed in this volume are available through the Federal Bureau of Prisons, Office of Research, 320 First Street, N. W., Washington, D. C. 20534. Please include the entire index number (ALD 75 007) when requesting an abstract.

Although the abstracts are made available through the auspices of the Federal Bureau of Prisons, opinions and statements expressed in the abstracts are the authors' and do not necessarily reflect the opinion or policy of the Bureau of Prisons.
