ABOUT NTIS

The National Technical Information Service of the U. S. Department of Commerce is a central source for the public sale of Government-sponsored research, development and engineering reports and other analyses prepared by Federal agencies, their contractors or grantees. And, it is a central source for Federally generated machine processable data files.

NTIS ships 11,500 information products daily as one of the world's leading processors of specialty information. It supplies the public with approximately four million documents and microforms annually. The NTIS information collection exceeds 800,000 titles. All are available for sale. About 150,000 titles are in current shelf stock. Catalogs of special interest reports describe those most in demand.

NTIS is obligated by Title 15 of the U. S. Code to recover its cost from sales. The distribution of its information products and services is self-sustaining.

Timely and continuous reporting to subscribers is ensured by agreements between NTIS and several hundreds of Federal research sponsoring organizations. NTIS is the marketing coordinator for the latter, for their publications, technical inquiries and special analyses.

The public may quickly locate summaries of interest from among 500,000 Federally-sponsored research reports completed from 1964 to date, using the agency's NTISearch program which comprises On-Line Searches and this and many other Published Searches. Copies of the whole research reports are sold by NTIS in paper or microfiche:

The NTIS Bibliographic Data File on magnetic tape, which includes published and nonpublished abstracts, is available for lease. The computer products of other Federal agencies also are sold or leased.

Current summaries of new research reports and other specialized technical information in various categories of interest are published in weekly newsletters (Weekly Government Abstracts), which are indexed annually. An all-inclusive biweekly journal (Government Reports Announcements and Index) is published for librarians, technical information specialists and those requiring all the summaries categorized in a single volume and accompanying index.

A standing order microfiche service (SRIM) automatically provides subscribers with the full texts of research reports selected to satisfy individual requirements.

Other services, such as the coordination, packaging and marketing of unusual technical information for organizations may be specially designed, anytime.

About NTISearches

+ì

This Published Search was prepared by information specialists at NTIS from its on-line interactive bibliographic retrieval system comprising more than 500,000 document/data records. The Published Search and its companion, the On-Line Search, provide fast and complete access to these hundreds of thousands of technical reports on U. S. Government research, development, and analyses.

Most of these valuable reports are not otherwise available because NTIS is the only central source of research reports and other technical information from the vast Federal network of departments, bureaus, and agencies.

The NTISearch information collection covers Federally-sponsored research reports dating from 1964. And you can be sure the collection is kept up-to-date with the latest research findings. Each day more than 200 new research reports are added.

The system is automated but flexible, fast but accurate, complete but precise in subject fields. The Published Search is updated at regular intervals related to the rate at which new data in the subject field are acquired.

Should this Published Search not fully satisfy your special information needs you may wish to obtain a specially prepared On-Line Search. You may return this Published Search to NTIS for full credit toward purchase of a customized On-Line Search. Simply call the On-Line Search telephone number (703) 557-4640 to make the arrangements with an NTIS Information Specialist and to discuss directly your specific information reeds. Costs for the customized On-Line Search are as follows:

	Domestic Foreign
Up to 100 technical report summari	es \$100 \$125
101 to 200 technical report summar	
201 to 300 technical report summar	ies 150 190
301 to 400 technical report summar	ies 175 220
401 to 500 technical report summar	ies 200 250
More than 500 technical report sum	maries Negotiated

A complete list of current Published Searches (\$28 domestic, \$40 foreign, each for the first copy of any title; \$10 domestic, \$12.50 foreign, for each additional copy of the same title, ordered at the same time, and sent to the same address) is printed in the colored pages at the back of this NTISearch.

PRICES SUBJECT TO CHANGE

Price and Ordering Information

Please see the colored pages in the back of this search package for current paper copy and microfiche price lists, order forms, and complete ordering information. Prices for paper copy and microfiche cited with each technical report summary have been superseded for the most part. Most documents cited in this NTISearch are available directly from NTIS. In those instances when NTIS does not have the document in its information collection, the technical report summary notes the source from which the document may be obtained.

An Investigation of the Adoption of Technological Innovations by Law Enforcement Agencies: An Executive Summary

Arizona Univ., Tucson. Dept. of Management.*National Science Foundation, Washington, D.C. Div. of Policy Research and Analysis.

Final rept. AUTHOR: Tansik, David A. D3393G1 Fld: 5A, 70F, 70E GRAI7722 Jun 77 4p Grant: NSF-PRA76-15844 Monitor: NSF/PRA-7615844/2/7 See also PB-270 557,

Abstract: The document summarises a research project sponsored by the National Science Foundation. The research undertaken for the project was essentially a replication of a portion of a larger project by Richard Bingham, The Adoption of Innovations by Local Government. Bingham proposed and analyzed a number of hypotheses concerning the adoption of innovations by local government organizations and (1) community environment and specific demand factors: (2) organizational environment; and (3) organizational characteristics. Using these hypotheses, Bingham constructed a model. In general, Bingham found that the model rather accurately explained process innovation adoptions but not product adoptions.

An Investigation of the Adoption of Technological Innovations by Law Enforcement Agencies

Arizona Univ., Tucson. Dept. of Management.*National Science Foundation, Washington, D.C. Div. of Policy Research and Analysis.

Final rept. AUTHOR: Tansik, David A. D3401C4 Fld: 5A, 70F, 70E GRAI7722 Jun 77 130p Grant: NSF-PFA76-15844 Monitor: NSF/PRA-7615844/1/7 See also PB-247 193.

Abstract: The purpose of this project was to replicate, insofar as was practical, a portion of a larger project by Bichard Bingham, The Adoption of Innovation by Local Government. Bingham proposed and analyzed a number of hypotheses concerning the adoption of innovations by local government organizations and, (1) community environment and specific demand factors: (2) organizational environment; and (3) organizational characteristics. In general, the model Bingham constructed rather accurately explained process innovation adoptions but not product adoptions. The unpredictability of product innovations was felt to be due to a general lack of incentive for decision makers to adopt these products.

Token Economies in Rehabilitation: A Book of Readings

Wisconsin Univ.-Stout, Menomonie. Materials Development Center.*Social and Rehabilitation Service, Washington, D.C.

Special rept. AUTHOR: Esser, Thomas J.; Botterbusch, Karl F. D3314L4 Fld: 5J, 92B GRAI7721 Oct 75 136p Grant: SRS-12-55307 Monitor: SRS-12-55307-017

Abstract: In the past ten years behavior modification techniques have become widely used within the field of rehabilitation. Among these techniques is the token economy. Like all behavior modification techniques, the token economy is based on a system in which certain desired or acceptable specific behaviors are rewarded and undesirable behaviors are either ignored or punished. Usually the goal of a token economy is to teach the individual the work and living skills that he needs in order to 'make it' in the world outside the sheltered or correctional institution. mental hospital, Token workshop, economies are a system in which a client receives some tangible object (such as poker chips, punch mark on a card, stamp, etc.) for producing the desired response. The tokens are then kept by the individual and spent for goods and services. Token economies, thus, attempt to later provide the client with a wide variety of things that he desires, thereby motivating the client to change his or her behavior.

The Adult Furlough Center: Variables felated to Successful Parole

Hawaii Univ., Honolulu. Social Welfare Development and Research Center.*Hawaii Corrections Div., Honolulu. D3145D3 Fld: 5K, 92C, 91C GRAI7720 Sep 74 43p Rept No: 137 Monitor: 18 Prepared for Hawaii Corrections Div., Honolulu.

Abstract: The purpose of this study was to identify variables which are predictive of parole outcome. The population consisted of 92 men who had been residents of the Adult Furlough Center, a short-term pre-parole program. Data were collected from prison, Adult Furlough Center, and parole records. Data analyses were done using factorial and multiple regression techniques, and chi square statistics. It was found that the ability to maintain employment on parole was the single variable most predictive of parole success. The second most important variable was performance in the Adult Furlough Center program, in which one of the main goals was to establish employment prior to going on parole. These findings were consistent with those of studies done elsewhere. Additionally, it appears that the population studied is similar to other prison and parole populations in being characterized by employment problems.

Characteristics of Major Violators in Massachusetts: An Interim Report

Massachusetts Dept. of Correction, Boston. AUTHOR: Chayet, Ellen D3144A2 Fld: 5J, 5K, 92B, 92C, 91C GRAI7720 Oct 76 44p Monitor: 18

Abstract: The concept of the career criminal is achieving increased recognition as a qualitatively distinct issue in the criminal justice The Commonwealth of Massachusetts is currently embarking on a field. two-pronged effort - both prosecutorial and correctional - to impact career criminals. The Major Violators Division of the Office of the District Attorney for Suffolk County was funded as a court and police-based program to identify the career criminal (hereinafter referred to as Major Violator); to develop strategies for effectively prosecuting individuals so identified; and to ensure speedy and efficient case management. The immediate problem addressed by the present study is one of providing feedback to corrections planners in the early stages of operations to facilitate treatment program development based on sound analysis. Hence, this paper is concerned portion of the total design - a documentation of with one characteristics of the Major Violator cohort as they compare to Suffolk Superior Court commitments to MCI-Walpole during the program phase.

Proceedings of Symposium on Job Stress and the Police Officer: Identifying Stress Reduction Techniques, Held at Cincinnati, Ohio on May 8-9, 1975

National Inst. for Occupational Safety and Health, Cincinnati, Ohio. Div. of Biomedical and Behavioral Science. AUTHOR: Kroes, William H.: Hurrell, Joseph J. Jr D2884A2 Fld: 5J, 5I, 92B, 70D GRAI7717 Dec 75 255 Rept No: NIOSH-76/187 Monitor: 18

Abstract: A symposium was held in May, 1975 in Cincinnati, Ohio to assess psychological stress factors in policing and techniques for its remediation. Psychologists, psychiatrists, criminologists, police chiefs and patrol officers were among those presenting papers on key issues. Health statistics were offered showing police officers to have relatively high rates of stress-related digestive and circulatory disorders. Excessive numbers of suicides among police officers were also reported. A host of psychological stressors were identified of which conflicting job demands, negative public image, lack of court support and variable shift routines were among the more salient ones. Discussion was given to programs for stress reduction and alleviation in policing. These included participative management, individual and group counseling, biofeedback, and others.

Abstract: The overall scope of this study is to determine the extent to which diversion from the juvenile justice system is being realized. in the five communities studied whether such diversion can be attributed to the presence (and program components) of the youth services systems themselves or whether it results from factors extraneous to the systems (e.g., changes in juvenile court policy), the cost/benefits which are being realized; determine the extent and which the systems are providing youth with access to desirable to social roles and, conversely, reducing the incidence of juvenile delinquency, and are contributing to a reduction in both the negative labelling of youth and in youth-adult alienation; and to determine the extent to which the projects represent a systems effort in terms of their ability to effect changes in institutional practices, policies, and procedures which adversely affect youth and to mobilize the necessary Federal, state, and local resources to provide a coordinated delivery of services to youth.

National Inst. on Alcohol Abuse and Alcoholism, Rockville, Md.*Department of Justice, Washington, D.C.*Department of Transportation, Washington, D.C. D1342A2 Fld: 5K, 92C GRAI7706 1972 285p Rept No: DHEW/PUBL/HSM-73/9051, NIAAA/NCALI-76/30 Monitor: 18 Sponsored in part by Department of Justice, Washington, D.C. and Department of Transportation, Washington, D.C.

Abstract: Proceedings of the Interagency Conference on Alcohol Abuse and Alcoholism, part of a nationwide effort to develop coordinated approaches to alcohol-related problems at all levels of government, are presented. Discussions on the kinds of mechanisms needed and the ways of developing them were conducted. Specific topics of discussion in workshop groups included: (1) the violent and nonviolent alcohol-related offender; (2) the public inebriate; and (3) the drinking driver. Papers serving as take-off points for discussion and recommendations emanating from the workshops are provided.

Excretion of Adrenaline and Noradrenaline as Related to Real Life Stress and Psychopathy Karolinska Sjukhuset, Stockholm (Sweden). Lab. for Clinical Stress Research. (406 044) AUTHOR: Lidberg, L.; Levander, S. E.; Schalling, D.; Lidberg, Y. D1334H3 Fld: 5J, 6P, 57R, 57T, 92B GRAI7706 Sep 76 27p Rept No: 50 Monitor: 18

Abstract: Urinary excretion of adrenaline (A) and noradrenaline (NA) in a group of 24 arrested men was measured in three experimental sessions, two weeks, one week and immediately before court procedure. The first session represents a moderate laboratory stress, and the last a real life anticipatory stress, superimposed on the sustained real life stress of being arrested. There were no significant differences between the three sessions in either A or NA excretion. However, when personality measures of psychopathy were taken into account, there were significant and consistent differences in the pattern of A and NA excretion over the sessions between subgroups of subjects. Subjects high in psychopathy were predominantly A excreters, and did not react with an increase in either A or NA in the last, assumedly most stressful session. Subjects low in psychopathy showed a reversed pattern. These findings were interpreted in terms of theories relating catecholamine excretion to coping behavior, and to an approach-avoidance model of psychopathic hehavior.

Neutralization of Priscn Hostage Situations - A Model

Sam Houston State Univ Huntsville Tex Inst of Contemporary Corrections and the Behavioral Sciences (409860)

Masters thesis AUTHOR: Needham, James P. C7611G2 Fld: 5I, 5K, 70D, 92C GRAI7625 Aug 76 167p Monitor: 18

Abstract: This study explores hostage situations in general and prison hostage situations specificaly to determine those tactics and techniques which will enhance success in dealing with such situations. The study addresses such areas as mission refinement, emergency organization, emergency operation center, planning, tactical tasks, negotiation tasks, negotiator traits, command, communications, logistics, intelligence, news media relations, philosophy on use of force and suggestions for further study. The main sections of the study are as follows: (1) review of the literature, (2) review of field practices and (3) generalization. Included are the results of a thirty-one item guestionnaire administered to the fifty largest police departments in the United States and to the state department of corrections of each of the fifty states. Is There a Single Justification for Funishment

Army War Coll Carlisle Barracks PA (403 565)

Research paper AUTHOR: Eddins, Neil L. C7361B4 FLD: 5D, 5K d7622 4 Jan 72 12p MONITOR: 18 Distribution limitation now removed.

paper was prepared to meet a requirement at ABSTRACT: This Shippensburg State College. The task assigned was to develop a justification for or disprove any or all of the generally accepted theories of criminal punishment. This paper treats four of the generally accepted theories of punishment separately and examines the feasibility of each standing on its own as a means of maintaining law and order. After explaining the pros and cons of each of these theories of criminal punishment, it is concluded that to adopt a and order. single objective in an effort to clarify and improve criminal law would distort the system. Although a fair case can be made for each of the theories of punishment, none can stand alone to insure law and order. Just as there are different motives for criminal acts, there must be different objectives for preventing these acts. There is no single justification for imposing criminal punishment.

Management Information Service Report, Volume 8, Number 5. Vandalism

International City Management Association, Washington, D.C. Management Information Service.

Final rept. AUTHOR: Williams, Albert J. Jr C7C35G3 FLD: 5K, 92C GRAI7619 May 76 11p REPT NO: ICMA/18732/MIS-576/N MONITOR: 18 Paper copy available from International City Management Assoc., 1140 Connecticut Avenue, N.W., Washington, D.C., \$5.00.

ABSTRACT: In suburban and rural areas throughout the country, school system vandalism outranks all other assaults on private and public property, costing taxpayers over \$500,000,000 per year. Any solution to this problem must start with the question, "Why does a child or adult commit acts of vandalism." It is generally believed that if the answer to this question can be learned and special programs developed to offer assistance early on, the problem can be largely eradicated. Many communities throughout the country have implemented innovative and successful programs to stem the rising costs of vandalism, ranging the whole gamut of security measures--materials, deterrence, police procedures, community relations and institutional cooperation. This report begins with an examination of the present costs of vandalism and of several leading theories as to why vandalism is committed, but focuses primarily on actual programs planned or executed by various schools and other municipal agencies to control the problem.

An Inquiry into the Relationship Between Thoroughness of Police Investigation and Case Disposition

Rand Corp Santa Monica Calif (296600) AUTHOR: Petersilia, Joan C6993F2 FLD: 5D, 91C GRAI7619 Jan 76 25p REPT NO: P-5576 MONITOR: 18

ABSTRACT: The author found a significant difference in the thoroughness of police investigation and reporting in two selected jurisdictions that had contrasting filing policies. Strict filing standards apparently resulted in more thorough investigation. We expected to observe the impact of these differences in investigative thoroughness in all aspects of case disposition. Our hypothesis was more thorough investigations estigations would result in fewer that less plea bargaining, and more convictions. In fact our dismissals, sample did disclose a lower dismissal rate in the juriisdiction with more thorough investigations. As for case dispositions, the results were much less conclusive. In only one category of cases albeit the largest, did the sentences in Jurisdiction A consistently exceed those imposed in Jurisdiction B. No cases in A went to trial, and all of those that did in B resulted in convictions. Possibly a larger sample might disclose more significant patterns of differences between jurisdictions in the disposition of their cases. But the comparison would still entail the difficult task of weighting the different methodological difficulties of alternatives the sentence a nd controlling for all of the variables that affect court processing and disposition. She believes that the differences in dismissal rates disclosed in this study are important. Criminal justice officals should mindful of the level of investigative thoroughness be maintained in their jurisdiction. Of extreme interest and use is the analysis of the information police investigators routinely provide, or fail to provide prosecutors.

Eyewitness Testimony

Washington Univ., Seattle. Dept. of Psychology.*Urban Mass Transportation Administration, Washington, D.C. (367 783)

Final rept. AUTHOR: Loftus, Elizabeth F. C6962J4 FLD: 5J, 92B GRAI7618 Sep 75 22p PROJECT: UMTA-WA-11-0004 MONITOR: UMTA-WA-11-0004-75-1

ABSTRACT: The report deals with the following question: When a person has witnessed some unusual event such as a traffic accident, how can complete and accurate information best be obtained about that event. The research focuses specifically on the influence that questions asked subsequently to an event have (1) on the answers to those questions, (2) on the answers to subsequent questions, and (3) on the witness' memory for the incident he has experienced. A major conclusion is that questions asked subsequently to an event can contain new information which becomes integrated into the original memory, causing an alteration or a reconstruction of the witness' memory for that event. Some recommendations are given for how questions can be asked in as neutral a way as possible. In addition, other factors that are known to affect the accuracy and completeness of an eyewitness account are briefly outlined.

Dealing with Juvenile Delinquents on Probation: Volunteers' Views of Success

Kentucky Univ., Lexington. Social Welfare Research Inst.*Social and Rehabilitation Service, Washington, D.C.

Special rept. AUTHOR: Dillehay, Ronald C., Berns, Gregory T. C6953C2 FLD: 05J, 05K GRAI7618 Jun 73 37p REPT NO: Paper-11 CONTRACT: SRS-12-56016 MONITOR: SRS-12-56016-003

ABSTRACT: This study explored conceptions of success in treatment of juvenile delinquents held by volunteers serving as probation officers. Twenty-five volunteers participating in a program by a social service agency were interviewed about their experiences. They were asked for their views of success--how it should be defined, what its determinants are--and about the nature of success anticipated for their own juvenile case. Their responses were analyzed in terms of: (1) Normative, that is, dealing with adherence to rules and standards, (2) Interpersonal, referring to relationships with other people; or (3) Psychological, based on the probationer's values, attitudes, or abilities. Also studied were: Causal agents or determinants of success, the specific outcomes anticipated for the volunteer's own juvenile case, and some differences between male and female volunteers' views of successful probation.

The Adolescent Youths' Attitudes Toward Police, Their Concept of the Police Role and Implications for Police-Community Relations

Air Force Inst of Tech Wright-Patterson AFB Ohio (012200)

Master's thesis AUTHOR: Shiroyama, Brian Y. C6924H3 FLD: 5J, 5K, 92B, 92C GRAI7618 3 Dec 75 160p REPT NO: AFIT-CI-76-36 MONITOR: 18

а. 2 го

ABSTRACT: By using adolescent youth as a model, the first part of this thesis measures the gap between the police and youths by evaluating the youths' attitudes toward police and by examining disparity in the police role definition between the police officers' definitions and the youths' definitions of the role of the police. The second part of this thesis explores to what degree police officers are guilty of creating the gap and what is being done to bridge that gap. This thesis tries to show that the problems found in the police-community relationship are part of the problems of society in general, and that drastic changes are needed within society as well as within the police departments for a start in solving these problems.

ABSTRACT: A total of 339 delinquent and antisocial boys at Rockland State Hospital, New York, participated in a rehabilitation program whose basic components were: (1) programmed interaction therapy (PIT) in a two-person situation, (2) a less formally programmed group situation, (3) the sheltered workshop, (4) classroom education; and (5) transitional programs leading to placement. A PIT diagnostic interview helped in designing therapy for particular adjustment problems. Tempermental disorders were seen as reversible states, provided therapy dealt with the particular stress to which the individual was vulnerable and the specific reaction pattern he exhibited. Improvements in educational achievement or workshop performance followed improvement in the temperamental disorder being treated in PIT.

Psychological Deterrents to Nuclear Theft: A Preliminary Literature Review and Bibliography

National Bureau of Standards, Washington, D.C.*Defense Nuclear Agency, Washington, D.C. Intelligence and Security Directorate. (240 800)

Final rept. AUTHOR: Meguire, Patrick G., Kramer, Joel J. C6581G4 FLD: 15F, 05J, 05K, 74H, 46F*, 92B GRAI7613 Mar 76 51p* REPT NO: NBSIR-76-1007 MONITOR: 18 Sponsored in part by Defense Nuclear Agency, Washington, D.C. Intelligence and Security Directorate.

ABSTRACT: A review of the unclassified literature dealing with psychological deterrents was conducted for the Defense Nuclear Agency (DNA). Its purpose was to identify techniques that might be useful in DNA'S Forced-Entry Deterrent Systems (FEDS) Program for psychologically deterring nuclear weapon theft. The review indicates that while human psychological processes (sensory, perceptual, and cognitive) can be manipulated by various means, definitive empirical data are lacking which directly relate to deterring nuclear weapon theft. Behavioral impact research should be undertaken by DNA to (1) ascertain the deterrence values of the many techniques identified and (2) test the hypotheses implicit in the FEDS concept.

The Service-Related Experinece of Javenile Delinquents. X. Part I. The Significance of Histories of Juvenile Delinquency in Predicting Adjustment in Military Service. Part II. The Post-Service Records of Individuals with Histories of Juvenile Delinquency

Minnesota Univ Minneapolis Inst of Child Development (180950)

Final rept. AUTHOR: Roff, Merrill C6244D3 ELD: 5J, 5I, 92C GRAI7610 Jul 74 19p REPT NO: 74-12 CONTRACT: DADA17-69-C-9163 MONITOR: 18 See also Rept. no. 72-10, AD-748 443.

ABSTRACT: An overview of this entire set of studies indicated that the most effective predictor from juvenile deliquency data was confinement in a State or Federal Training School. Work on a coordinated project indicates that rejections from service for moral reasons were, with few exceptions, made only for confinement or parole status following the eighteenth birthday. This was found to be true for a large sample from the Korean War period and for a very recent sample born 1950-1951. Histories of juvenile deliquency, no matter how long or how serious, were in general disregarded. Post-service offense histories were obtained, also as part of a coordinated project, for the Korean War period sample and for an earlier Control sample (born 1915-1923). Follow-up was made of those rejected for moral reasons and of those who entered service. The largest satisfactory yield of those with a history of juvenile deliquency came from those who were non-confined as juveniles and who had a good service outcome. The experience for this group was not much worse than those for the Control group. At the other extreme were those who were confined as juveniles with a bad service outcome. These had post-service arrests 70-80% of the time. If they had trouble in service, they had trouble after.

Final rept. Sep 74-Aug 75. C611214 FLD: 05K, 05J, 92C*, 92B, 91C GRAI7608 Aug 75 79p* MONITOR: 18 Sponsored by Law Enforcement Assistance Administration, Washington, D.C., and California Office of Criminal Justice Planning, Sacramento. See also Volume 2, PB-249 607.

ABSTRACT: Rape precipitates profound personal crisis for most victims, crisis that can be either intensified, or alleviated, by the victims subsequent encounter with family, law enforcement officials, and service agencies. Fear of post-attack events and a general lack of information on available services are the major factors in the non-reporting of many rapes and the fact that persons other than the victim report the great many of known assaults. Recommendations are directed to all components of the criminal justice system and other groups having extensive interaction with rape victims. The report provides detailed analyses of over 350 interviews with sexual assault victims, criminal justice officials, medical and mental health professionals, and members of the Palo Alto community. The study's major findings and recommendations point up an urgent need to provide options and services that will enable the victim to gain control over her environment.

ABSTRACT: This monograph is a literature review and analysis of the effects on adolescent self-concept and subsequent behavior stemming from arrest or apprehension on a drug-use charge. It is addressed to the social issue of whether apprehension, in the respect that it labels the adolescent as deviant, may actually produce more deviant behavior as a result of the labeling.

Incendiarism: An Overview and an Appraisal

÷.

National Research Council Washington D C Committee on Fire Research (090620) AUTHOR: Kerr, James W. C577311 FLD: 13L, 15G, 92C, 91C GRAI7604 1975 15p MONITOR: 18 A Report on a Conference on Arson and Incendiarism, 29-30 Jul 75, Washington, D. C.

ABSTRACT: This report summarizes the conclusions reached by members of the Committee on Fire Research on the Commission on Sociotechnical Systems of the National Research Council and by experts in the field of arson and incendiarism who were in attendance at a Conference on Arson and Incendiarism held at the National Academy of Sciences on July 29-30, 1975. It was the firm conclusion of the Committee on Fire Research that a symposium on incendiarism should be held within the next 10 to 12 months at the National Academy of Sciences. The symposium should (1) review the state of the art of detection, investigation, and prevention of incendiarism; (2) stress the pursuit of knowledge in areas singled out in this report as deficient; (3) review action programs in related areas; and (4) emphasize behavioral interfaces with other segments of the problem. The Incidence and Nature of Runaway Behavior

Behavioral Research and Evaluation Corp., Boulder, Colo.*Department of Health, Education, and Welfare, Washington, D.C. Office of Social Services and Human Development.

Final rept. Jul 74-May 75 AUTHOR: Brennan, Tim, Blanchard, Fletcher, Huizinga, David, Elliott, Delbert C5322J2 FLD: 05K, 05J, 92C, 92B* GRA17523 30 May 75 614p* CONTRACT: HEW-0S-74-271 MONITOR: ASPE-75-022

ABSTRACT: The report represents a study to determine the feasibility of estimating the incidence of runaway youth. The study sample was located in the Denver and Northeast section of Colorado. The estimated incidence of runaway for episodes longer than 8 hours duration in the areas encompassed by this study are approximately 3.6% of the total youth population and 7.1% of the households with youth between the ages of 10-17. For episodes of 24 hours or longer these estimates are approximately 1.8% and 3.8% respectively. The study also includes feasibility issues of demographic, episodic, social-psychological and services data, and the development and testing of a questionnaire to be utilized in a national study on incidence.

Social Aspects of Gambling

Commission on the Review of the National Policy Toward Gambling, Washington, D.C.

Final rept. AUTHOR: Joyce, Kathleen M. C5181F1 FLD: 05K, 92C GRAI7521 1974 54p* REPT NO: NGC-75/05 MONITOR: 18

ABSTRACT: The discussion of gambling research is broken into three sections. The first deals with available public opinion data bearing generally on gambling attitudes, specific lottery attitudes, and gambling issues of concern to the public. The second section outlines some of the social aspects of gambling and discusses research that is qualitative in nature. The purpose of this section is to describe some of the social settings in which the gambler moves and some of the institutional qualities of gambling operations and societal responses to gambling. The third section discusses the scant body of available participation rates for different types of gambling in the United States.

Toward a Handbook for Naval Managers

Naval Postgraduate School Monterey Calif (251450)

Master's thesis AUTHOR: French, Dana Page Jr C5084E4 FLD: 5A, 5I, 15E, 74, 70D USGRDR7520 Jun 75 406p MONITOR: 18

ABSTRACT: The handbook condenses and extracts from the literature of management and the broad social sciences those concepts that are pertinent to Navy managers in the fleet in helping to solve their management problems. Each concept shows where additional information about it can be found through references to a reading list. The concepts are drawn from history, psychology, social psychology, sociology, political science, anthropology, economics, management, organization development, biology, philosophy, and the military. The problems are categorized as enlisted problems, officer problems, individual problems, unit problems, Navy problems, American problems, and human problems. Two additional chapters explain each social science and the differences between them and how to use the book.

ABSTRACT: Prison behavior can and should be analyzed in terms of the complex social and political system in which it occurs. Purposes of imprisonment, both manifest and latent, affect the psychological environment with the institution, as well as the frequency with which an institutional 'solution' is selected. Behavior which is largely the product of situational contingencies will appear abnormal or discrdered as a function of the pathology of the situation and the perspective of the observer.

ABSTRACT: The need for a more comprehensive approach to serving male problem youth in Arkansas led to a cooperative effort between the Arkansas Rehabilitation Service, Aldersgate Methodist Camp of Little Rock, and the Arkansas Rehabilitation and Training Center to establish 'camp challenge', a rugged three week camping program. This report details the specifics of developing the camp program and integrating it into a total rehabilitation program. Nineteen boys participated and all showed increased physical fitness, self-confidence, and positive personality change after the camping program. These results were obtained through questionnaires filled out by participants, parents, and rehabilitation counselors as well as physical fitness tests and behavior ratings.

ABSTRACT: The first study of this volume focuses on the police organization in an effort to determine whether or not assulted officers perceive their working environment differently than non-assaulted officers. Next, the relationship between police assaults and 31 environmental and police activity characteristics is examined for 46 cities using correlation and multiple regression analysis techniques. Following this, the results of a micro analysis of assaults on police in Austin, Texas are reported. This volume concludes with a comprehensive bibliography of literature which, although selected from many diverse fields, was found to be integrally related to the problem of police assaults.

First Year Santa Clara County Day Care Center Evaluation

American Justice Inst., Sacramento, Calif.*National Inst. of Law Enforcement and Criminal Justice, Washington, D.C. C4974B2 FLD: 05K, 91C, 92C USGRDR7518 1972 73p CONTRACT: LEAA-NI-72-09-0001 MONITOR: 18

ABSTRACT: The youths attended the center during the day for school and individual or group counseling, while continuing to live at home. Objectives of the program were to increase academic achievement, improve attitude and motivation toward education, decrease post-center truancy and recidivism, and improve the self-esteem of the individual. A group of 62 experimental and 43 control youth provides the base for analysis. In the first year of operation, cost, in terms of monthly expenditure per child, is the major negative aspect. Suggestions are given to solve this problem. The authors also suggest modifications in the program for the third year of operation.

Ex-Convict Motivation and Recovery Center (X-MARC)-Final Evaluation Report

American Justice Inst., Sacramento, Calif.

Final rept. AUTHOR: Berkowitz, Joyce C4921A1 FLD: 05K, 92C, 91C USGRDR7517 Aug 74 66p MONITOR: 18 See also PB-242 560. Prepared in cooperation with California Office of Criminal Justice Planning, Sacramento.

ABSTRACT: The X-Marc halfway house has demonstrated an ability to delay the occurrence of recidivism, even though its clients were considered to be the least likely to succeed in community life according to classification tests. The ex-convict motivation and recovery center is a residential facility that is designed to help parolees, ex-felons and probationers to adjust to community living and to reduce their rates of recidivism by providing a meaningful alternative to incarceration for those men and women who need a level of custody between incarceration and normal probation and parole, by establishing a living arrangement and environment conducive to the success of these men and women, and by establishing a better relationship between its clients, their probation efficers and the community. Demographic data was taken from project files and X-MARC clients were administered a questionnaire. The results are presented and analyzed in terms of resident recidivism, individual employment services provided for residents, resident assessments, and a cost-benefit analysis.

Arson, Vandalism and Violence: Law Enforcement Problems Affecting Fire Departments

Stanford Research Inst., Menlo Park, Calif.*National Inst. of Law Enforcement and Criminal Justice, Washington, D.C. (332 500) AUTHOR: Moll, Kendall D. C4854E2 FLD: 13B, 05D, 91C, 91G USGRDR7516 Mar 74 180p* GRANT: LEAA-NI-71-126G MONITOR: 18 Paper copy also available from GPO as SN-2700-00251.

ABSTRACT: Fire department problem data covering the period 1968 through 1971 were gathered by the use of questionnaires, field visits, and a review of relevant literature. Six major areas of violence were covered: building fires attributed to arson and suspected arson; false alarms; acts of physical violence against fire departments during riots and civil disorders; isolated acts of harassment directed against fire department personnel, equipment and facilities; and bomb threats and bomb incidents. The study dealt specifically with each of the areas of violent behavior, attempting to identify the major contributions to the problem, extent of the problems, and possible avenues for alleviation of the effects of violent behavior on fire departments. The author strongly suggests that greater interservice cooperation with the police is needed.

ABSTRACT: In July, 1974, a public opinion firm surveyed a representative sample of Maryland citizens on issues related to crime and the criminal justice system. The purpose of the study was to assist the Governor's Commission in formulating overall criminal justice improvement plans for the state, getting public reaction to those plans, and evaluating the impact of those plans once they are implemented. This document is a summary of the final report submitted to the Commission by the opinion survey firm. General categories of concern are fear of crime, police/law enforcement-related issues, court-related issues, corrections-related issues, standards and training for criminal justice agencies and personnel, capital punishment, and legalization of marijuana.

An Exemplary Project. Providence Educational Center

National Inst. of Law Enforcement and Criminal Justice, Washington, D.C.*Law Enforcement Assistance Administration, Washington, D.C. C4791H4 FLD: 05K, 92C USGRDR7515 1974 253p CONTRACT: J-LEAA-013-74 MCNITOR: 18 Paper copy also available from GPO as NS-027-000-00294-3.

ABSTRACT: The program of the Providence Education Center (PEC) in St. Louis, Mo., was designed to deal with young boys, 12 to 16 years old, were charged with stranger-to-stranger crimes and who had who histories of poor academic achievement and social failure. The basic premise underlying PEC's program is that the long term rehabilitation delinguents exhibiting these characteristics is contingent on the of development of those skills they need to experience success in school, in their family and social relationships, and on the job. PEC's program is comprised of three closely coordinated and functionally interrelated components. The educational component consists of an approach to providing instruction and remedial individualized assistance in reading, mathematics, and other academic subjects. The social sciences component performs diagnostic assessments, provides counseling to clients and families, and acts as liaison with juvenile court officials. The aftercare component is responsible for easing the transition back into the community after graduation. The purpose of this handbook is to provide the user with the information needed to develop a similar program in his or her community.

Additional Data Analysis and Evaluation of 'Project NewGate' and Other Prison College Programs

Marshall Kaplan, Gans and Kahn, San Francisco, Calif.*Department of Health, Education and Welfare, Washington, D.C. Office of the Assistant Secretary for Planning and Evaluation.

Final rept. May 74-Mar 75 AUTHOR: Haberfeld, Steven, Seashore, Marjorie J., Irwin, John C4784B1 FLD: 05I, 05K, 92C*, 92D USGRDR7515 Mar 75 133p* CONTRACT: HEW-0S-74-168 MONITOR: ASPE-75-016

ABSTRACT: The report presents additional data analysis from an evaluation study of the Office of Economic Opportunity funded Project NewGate which operated a prison college education program at five prisons across the country and four other (Non-NewGate models) prison college programs. The additional data analysis confirmed the findings of the original study vis-a-vis recidivism, achieving post-release stability, and in realizing life goals. The final report includes discussions of the following: evaluation of programs; success of participants after release; academic achievement of released prisoners; post-release success and program quality; and a summary of findings and implications for a model prison college program.

Concept of a Juvenile Delinguency Game

Research Analysis Corp Mclean Va (302750) AUTHOR: Olson, Howard C., Callaghan, Dian P. C4744G2 FLD: 5K, 5J USGRDR7515 Jun 69 18p MONITOR: 18

ABSTRACT: The paper deals with the concept of a Juvenile Delinquency Game -- the assumptions underlying the game, the system within which the juvenile operates, and the game format. The objective of such a game would be to achieve insight in 7 values held by the players and, on the basis of the insights, to change attitudes and to initiate changes in behavior. While the game concepts described center of juveniles, the game format should be adaptable to many social problem areas in which communication has failed or conflicts in values must be reconciled.

Policy Development Seminars, 1974. Volume 2. On the Role of the Police Executive, Held in Rochester, Michigan on June 12-13, 1974, on Corrections

Law Enforcement Assistance Administration, Washington, D.C. C4732E4 FLD: 05D, 05K, 92D, 92C, 91C USGRDR7514 1974 361p* MONITOR: 18 See also PB-241 434.

ABSTRACT: The document consists of the proceedings of two seminars, sponsored by LEAA, which were designed to promote iterface between authorities in various Criminal Justice fields to establish more effective policy positions. The first seminar in this volume, on national policy development on the role of the police executive, focused on the crucial organizational problems currently facing police executives and on the subject of the police chief and corruption. The second seminar, on corrections, was concerned with the potential uses of an applications technology satellite for NALECOM (National Law Enforcement Communications System), Arizona's use of NLETS (National Law Enforcement Telecommunications System), and with Law Enforcement uses of the Offender based statistical system.

ABSTRACT: Abstracts of studies on crimes and crime prevention are presented in this bibliography of Federally-funded research. The crimes include vandalism, murder, rape, pilferage, assault, fencing, and larceny. Crime prevention systems for homes, industry, and vehicles are also covered. Law enforcement studies not dealing directly with crime prevention have been excluded. Some of the studies deal with crime statistics and crime prevention through social services, as well as police planning and training to reduce crime. (Contains 134 abstracts). Social Evaluation and Impact Study of Santa Clara County Methadone Treatment and Rehabilitation Program

American Justice Inst., Sacramento, Calif.*National Inst. of Law Enforcement and Criminal Justice, Washington, D.C.

Final rept. C4665J1 FLD: 05D, 05K, 060 USGRDR7513 1972 74p GRANT: LEAA-72-DF-679 MONITOR: 18 See also PB-227 582.

ABSTRACT: The patients studied represented a cross-section of addicts in the county. The study populations was divided into two basic groups for study. The first consisted of 463 patients who entered the program from its inception in February of 1971 to June 30, 1972. This group of patients was divided two ways: (1) into those on and off the program at two years from their date of admission, and (2) by 'success' and 'failure' groups based on crime and earnings data. The purpose was to determine significant differences between and within these groups pre and post program based on the criterion measures of performance. The second study population consisted of all patients admitted when the on August evaluation staff began data collection 1. 3 1972. Recommendations for program improvement were in the areas of program the use of community workers, cooperation with the administration, Justice System (Especially Narcotic Law Enforcement Officers Criminal Courts), and intensified treatment. Tabular Data on the and the program are presented.

Shared Decision-Making as a Treatment Technique in Prison Management

Murton Foundation for Criminal Justice, Inc., Minneapolis, Minn.*Manpower Administration, Washington, D.C. Office of Research and Development.

Final rept. 15 Mar 74-15 Mar 75 AUTHOR: Murton, Thomas O., Baunach, Phyllis Jo C4655K3 FLD: 05K, 05A, 91C*, 70 USGRDR7513 10 Mar 75 267p* CONTRACT: DL-21-27-74-29 MONITOR: DLMA-21-27-74-29-4

ABSTRACT: An extensive review of the correctional literature relative to participatory management, and to a lesser extent educational and industrial literature, resulted in the development of distinct typologies of the decision-making models. To ascertain the current state of the art, mailer questionnaires were sent to all adult institutions known to have some form of council or committee structure. In addition, cn-site visits were conducted at several institutions including large and small; male, female, and coed; those having councils and other having committees; and representing various geographical regions of the United States. Interview schedules were completed with administrators, staff, and inmates were possible. Council members were interviewed and, when allowed, council meetings were observed.

Santa Clara County Pre-Delinquent Diversion Project - First Year. July 1, 1972 - June 30, 1973. Part I. Project Director's Report. Part II. Evaluator's Report

Santa Clara County Juvenile Probation Dept., San Jose, Calif.*Law Enforcement Assistance Administration, Washington, D.C. AUTHOR: Berkowitz, J., Nielsen, R. C4512F3 FLD: 05K, 92C, 91C USGRDR7511 30 Jun 73 252p MCNITOR: 18 Sponsored in part by Law Enforcement Assistance Administration, Washington, D.C.

ABSTRACT: The Santa Clara County Pre-Delinquent Diversion Program is an attempt to develop and coordinate community based alternatives to the juvenile justice system. The concept of diversion is implemented at the police level by twelve law enforcement jurisdictions, each of which has shaped a distinctive approach to the problem in consonance with the nature of both their police force and community. The objectives of the program were to reduce welfare and institutions Code Section 601 referrals to the Santa Clara County Juvenile Probation Department by 66 percent during fiscal year 1972-1973, and to create expanded and improved services appropriate to the needs of those juveniles diverted within the twelve participating law enforcement jurisdictions. A third objective was to demonstrate, test, and evaluate the predelinquent diversion program model.

Sex Crime Seminars for Police Officers. A Report

New Mexico Univ., Albuquerque. Criminal Justice Program.*National Inst. of Law Enforcement and Criminal Justice, Washington, D.C. AUTHOR: Riley, Jeffie L., Craig, Susan B. C4453A3 FLD: 05J, 92B, 92C USGRDR7510 18 Feb 74 52p REPT NO: CJF-74-3 GRANT: LEAA-73-NI-06-0002 MONITOR: 18

ABSTRACT: The document has information on seminars that provide training in personality dynamics, interviewing techniques, supportive counseling and referral processes. The program was designed at the request of the Albuquergue New Mexico Police Department to help field officers as well as the personnel of the New Sex Crimes Analysis Unit Public Expectations in being able to offer counseling and referral services to victims of sex crimes. In one session, a classification of rape assailant types based on personality patterns was presented, and the mode of operation for each category, i.e., the psychotic or legally insane, the neurotic, the latent homosexual, the inadequate male, was discussed. Subsequent sessions covered interview techniques, counseling, and referral. The questionnaires distributed to participants after each session and summaries of the responses are provided in the report.

Identification of Countermeasures for the Youth Crash Problem Related to Alcohol

Dunlap and Associates, Inc., Darien, Conn.*National Highway Traffic Safety Administration, Washington, D.C. (118 620)

Final rept. AUTHOR: Preusser, David F., Oates, John F. Jr, Orban, Marlene S. C4385F2 FLD: 05K, 05J, 13L, 92C, 85D USGRDR7509 Jan 75 240p REPT NO: ED-74-12 CONTRACT: DOT-HS-099-3-747 MONITOR: DOT-HS-801-344

ABSTRACT: Face-to-face interviews were conducted with male New York State drivers. These groups, each containing young and middle aged drivers were sampled as follows: (1) random sample of the general population of licensed drivers; (2) drivers recently involved in an 8 p.m. to 6 a.m. injury producing motor vehicle crash; and (3) drivers convicted on an alcohol driving offense. The results recently indicated that 14% of the young drivers in the general population as compared with only 5% of the middle aged drivers reported having had an alcohol related accident within the past 3 years. Driving after drinking was common among young people (about 3 times per month) and drinking frequency appeared consistent across young and middle aged driver populations. Young driver alcohol crash countermeasure and future research recommendations are made in the areas of driving restrictions, speeding statutes, public information and rehabilitation.

The concept of decentralizing police decision making ABSTRACT: authority to meet increasing demands on law enforcement services is featured in this NILECJ prescriptive package. A practical guide for police administrators and planners, this manual provides a method of organizing operations to improve police-community relations, increase crime control effectiveness, and enhance police jcb satisfaction. Chapter 1 is a summary of current knowledge about neighborhood team policing and a description of what the authors believe would be an ideal neighborhood team policing system. Chapter 2 describes the neighborhood team policing programs of several police departments. Subsequent chapters suggest procedures for planning and implementing team neighborhood policing, administering an ongoing program, providing training and education, and establishing lines of authority and methods of supervision of neighborhood teams. A practical approach for constructing a project budget is presented.

Pamily Crisis Intervention: From Concept to Implementation

City Univ. of New York.*National Inst. of Law Enforcement and Criminal Justice, Washington, D.C. (387 791) AUTHOR: Bard, M. C4234E1 FLD: 05K, 05J, 92C, 91C, 92B USGRDR7507 10 Dec 74 19p CONTRACT: LEAA-NI-70-068 MONITOR: 18

ABSTRACT: The intent of this monograph is to explain the concepts underlying crisis intervention training and present organizational and operational considerations for implementing such programs. The initial discussion focuses on two areas of operations which relate to this police function, interpersonal conflict management and crisis practice. Events during which crisis intervention theory and intervention by officers would be helpful include crime victimization, natural disasters, notification of death or injuries, accidents, psychotic reactions, and attempted suicides. The authors touch upon some of the subtle factors that may hinder efforts to implement a new approach in a traditional system and present recommendations which may be helpful in countering the destructive potential of ambivalence. Three models of implementation, based on the struction of police organizations, are presented.

Social Work Roles in Control-Oriented and Treatment-Oriented Correctional Settings

George Warren Brown School of Social Work St Louis Mo (406011)

Doctoral thesis AUTHOR: Reeves, Joseph C4081D1 FLD: 5K, 5I USGRDR7505 Jun 70 163p MONITOR: 18

ABSTRACT: The main objective was to scrutinize systematically a number of social work practices in the field of corrections. The study was limited to two aspects of short term confinement facilities for young adult males convicted primarily of military type offenses, within the U.S. Army correctional system. One aspect dealt with discriminating between control oriented and treatment oriented settings. The other was a determination of whether constellations of social work practice behaviors in one kind of setting were different from practice behavior patterns in the other kind of setting. Control involves custody, security, treatment and rehabilitation. Seven patterns of behaviors were developed.

The Law Encounter Severity Scale (LESS): A Criterion for Criminal Behavior and Recidivism

Rehabilitation Research Foundation, Elmore, Ala. Experimental Manpower Lab. for Corrections.*Manpower Administration, Washington, D.C. Office of Research and Development.

Technical rept. AUTHOR: Witherspoon, A. D., deValera, E. K., Jenkins, W. O. C3985A2 FLD: 5K, 5J, 92C, 92B, 91C USGRDR7503 Aug 73 17p REPT NO: RRF-9C8-31-73 CONTRACT: DL-21-01-73-38 MONITOR: DLMA-21-01-73-38-11

50

ABSTRACT: The Law Encounter Severity Scale (IESS) was developed by the EMLC (Experimental Manpower Laboratory for Corrections) to clarify the criteria for law-violating behavior and recidivism, focusing on legal judicial status and outcome. The 38 LESS items form a law and encounter continuum that ranges from no law encounters to felony conviction with a sentence of 20 years or more. The LESS is thus a comprehensive scale for all types of law encounters and applies equally well to adults, juveniles, parolees, and other groups. Ranking of items by severity provides a rough index of the various law violations to the criminal justice system. The LESS was used by the validate its behavioral assessment instruments in a EMLC to longitudinal follow-up study of prison releasees.

Continuation of Grant NSF-GT-31262. Prepared by Cornell Univ., Ithaca.
Dept. of Human Development and Family Studies.

ABSTRACT: The report deals with the causes and consequences of student alienation as they relate to educational institutions. Causes of alienation are linked to academic failure, disruption of the relations school and the community-family support systems, and between characteristics of the schools which militate against student participation in roles of responsibility or in student perception of personal success. Schools are estranged from their communities, particularly among the lower socio-economic groups. Increasing enrollments have resulted in depersonalization and isolation from schools which are consequently judged too large. Alienated students are more prone to delinquency and academic and social failure. Drug abuse is linked to alienation. These consequences place extreme stress on schools, families and communities. Recommendations are made for programs to increase community support for identification with school activities. Measures designed to reduce depersonalization in schools are offered. Methods of fostering interaction between school and community are suggested. Appendices to the report contain materials supporting the findings.

Experiment in the Streets. The Chicago Youth Development Project

Michigan Univ., Ann Arbor. Inst. for Social Research.*Manpower Administration, Washington, D.C. Office of Research and Development.

Final rept. AUTHOR: Gold, Martin, Mattick, Hans W. C3923K2 FLD: 5J, 92B, 91H USGRDR7502 Mar 74 373p CONTRACT: DL-D2-91-24-68-41 MONITOR: DLMA-91-24-68-41

ABSTRACT: A study of a streetwork and community organization project of the Chicago Boys Club from 1961-66 compares the effects of the program in two inner city areas with comparable control areas nearby, Sugh variables as delinquency rates, youth employment rates, school Attendance, and adults' satisfaction with their community are involved. It concludes that the project made little impact in these respects on the experimental neighborhoods; but that when boys' expectations of their eventual educational attainment were raised, their delinquency declined. Successful developments are discussed.

An Evaluation of Policy-Related Research. Reviews and Critical Discussions of Policy-Related Research in the Field of Police Protection

Mathematica, Inc., Bethesda, Md.*National Science Foundation, Washington, D.C. Research Applied to National Needs. (389 379)

Final rept. AUTHOR: Gass, Saul I., Dawson, John M. C3872B4 FLD: 5D, 5K, 91C* USGRDR7501 Oct 74 845p* CONTRACT: NSF-C808 MONITOR: 18

ABSTRACT: The report reviews a major body of policy-related research in the field of police protection. Research areas reviewed are police administration and management; police effectiveness and evaluation; crime prevention-architectural; crime prevention-crime statistics; police technology; resource allocation; patrol operations-patrol beat design; patrol operations-emergency response; patrol operations-traffic; personnel selection, evaluation and training; and police/community relations. The individual research reports are analyzed in terms of internal validity evaluation, and then each policy area is analyzed in terms of external validity evaluation concerns. Abstracts of 150 papers are included.

Factors Influencing Arrests for Alcohol-Related Traffic Violations

Dunlap and Associates, Inc., Darien, Conn.*National Highway Traffic Safety Administration, Washington, D.C. (118 620)

Final rept. Dec 73-Aug 74 AUTHOR: Oates, John F. Jr C3805B4 FLD: 5J, 5D, 92B*, 91C* USGRDR7426 Sep 74 250p* CONTRACT: DOT-HS-4-00837 MONITOR: DOT-HS-801-230

ABSTRACT: The report describes factors that were found to influence police officers' arrests of persons suspected of alcohol-related (A/R) traffic violations, and presents recommendations for treating these factors some that a higher level of enforcement might result. Conclusions and recommendations were derived from data obtained during a survey of eleven law enforcement agencies throughout the nation and from information elicited from 267 police patrolmen and 85 police supervisors. Additional data were obtained through interviews of prosecuting attorneys, judges, and other civic officials. Recommended actions for addressing these factors are made.

Law, Mental Discrders and the Juvenile Process. Volume III

Research Foundation of the Bar Association of the District of Columbia, Washington, *Social and Rehabilitation Service, Washington, D.C.

Final rept. AUTHOR: Dash, Samuel, Popkin, Alice Brandeis, Shorr, Walter, Lippert, Freda Jane C3804B3 FLD: 5J, 5D, 92B, 91C USGRDR7426 Dec 71 150p GRANT: SRS-80056 MONITOR: SRS-89-80056

ABSTRACT: A Child Guidance Clinic, part of a juvenile court, is discussed as a diagnostic center to which judges and probation officers may refer juvenile offenders who appear to be emotionally disturbed or mentally retarded. The Clinic examines these youngsters and makes written reports to the Court in regard to its findings and recommendations. After this is done, the Clinic seldom has further contact with the youngsters. This study seeks to explain why juvenile courts need the service of psychiatrists and psychologists, what kinds of services have been, and are now, provided, and what sorts of changes are considered desirable.

Applied Behavior Analysis and the Imprisoned Adult Felon. Project I: The Cellblock Token Economy

Rehabilitation Research Foundation, Elmore, Ala. Experimental Manpower Lab. for Corrections.*Manpower Administration, Washington, D.C. Office of Research and Development.

Final rept. AUTHOR: Milan, Micheal A., Wood, Larry F., Williams, Robert L., Rogers, Jerry G., Hampton, Lee R. C3803K2 FLD: 5J, 92B, 91C USGRDR7426 1 Oct 74 137p REPT NO: RRF-207-10-1-74 CONTRACT: DL-21-01-73-38 MONITOR: DLMA-21-01-73-38-13

ABSTRACT: The report provides a technical-level analysis, discussion, summary of five experiments in applied behavior analysis. and Experiment 1 examined the token prison economy as a basis for motivating inmate behavior; Experiment 2 examined the relationship magnitude of token reinforcement and level of inmate between performance: Experiment 3 introduced a 'License Procedure' to determine its effect upon the inmate participation in a leisure-time education program; Experiment 4 compared three formats for presenting programmed instruction material; and Experiment 5 examined the effectiveness of decreasing undersirable behavior by reinforcing incompatible opposites. All experiments were carried out at Draper Correctional Center, Elmore, Alabama, with a population of incarcerated, young adult felons. The report provides ample data in discussion of the results of experiments, and it includes a general discussion of the role of applied behavior analysis in the field of corrections.

Constitutional Protections of Convicted DWI Offenders Selected to Receive Special Sanctions--Alcohol Countermeasures Literature Review

National Safety Council, Chicago, Ill.*National Highway Traffic Safety Administration, Washington, D.C.

Final rept. Jun 73-Jun 74 AUTHOR: Little, Joseph W., Young, Gwynne, Selk, Sharon C3802E2 FLD: 5K, 5D, 91C, 92C USGRDR7426 Sep 74 38p CONTRACT: DOT-HS-371-3-786 MONITOR: DOT-HS-801-231

ABSTRACT: Many agencies concerned with the control of the drinking driver have desired to develop alternative sanctions to traditional criminal penalties to be imposed upon various categories of driving while intoxicated (DWI) offenders. A hypothetical legislative program has been used as a model that includes the following components: (1) all convicted DWI offenders be examined to diagnose the presence of aberrant drinking behavior, (2) normal drinking drivers are subjected to traditional criminal penalties and are required to participate in a DWI school, (3) all problem drinking drivers are subjected to legal penalties and are required to participate in a treatment program including drugs, (4) and all diagnosed as alcoholic are subjected to traditional criminal penalties and committed. Carefully drafted legislation is recommended.

Parole Decision-Making: Supplemental Report Thirteen. The Practical Application of a Severity Scale

National Council on Crime and Delinquency, Davis, Calif. Research Center.*Law Enforcement Assistance Administration, Washington, D.C. AUTHOR: Hoffman, Peter B., Beck, James L., DeGostin, Lucille K. C3795L4 FLD: 5K, 92C, 91C USGRDR7426 Jun 73 39p* GRANT: LEAA-NI-72-017-G MONITOR: 18 See also Supplemental Rept. no. 1, PB-236 565.

ABSTRACT: Two exercises are conducted with decision-makers in order to develop procedures for more consistent offense severity judgments. Hearing examiners and board members of the United States Board of Parole ranked offense descriptions from least to most severe. Agreement on severity ratings, among both examiners and members, was quite high, Differences between members' and examiners' ratings are examined and discussed. The categorization of offenses according to judged severity resulting from these exercises was incorported in guidelines for parole decision-making developed in order to provide a consistent paroling policy. Since these guidelines are presently in use in a pilot project of actual decision-making, the results found immediate application in a policy revision.

Parole Decision-Making: Supplemental Report Six. Inefficient Statistics

National Council on Crime and Delinquency, Davis, Calf. Research Center.*Law Enforcement Assistance Administration, Washington, D.C. AUTHOR: Wilkins, Leslie T. C3795K1 FLD: 5K, 92C, 91C USGRDR7426 Jun 73 44p* GRANT: LEAA-NI-72-018-G MONITOR: 18 See also Supplemental Rept. no. 7, PB-236 571.

ABSTRACT: A review is given of problems associated with constructing parole prediction tables for operational and research use and some alternative methods of prediction. Following a discussion of the need for accurate prediction tables for parole decision-making, the author focuses on possible improvements in prediction table building. Suggestions are made for coding data on offenders according to sequence of events, using the individual as his own control, and examining deviations from his norm. Suggestions are also made for processing data so that they no longer resemble the case files and the way the information was considered by the clinical decision-maker. The discussion then centers on new methods of statistical analysis, such as the use of probability statements and other kinds of predictions.

Parole Decision-Making: Supplemental Report Three. The Problem of Overlap in Experience Table Construction

National Council on Crime and Delinquency, Davis, Calif. Research Center.*Law Enforcement Assistance Administration, Washington, D.C. AUTHOR: Wilkins, Leslie T. C3795J2 FLD: 5K, 92C, 91C USGRDR7426 Jun 73 24p* GRANT: LEAA-NI-72-017-G MONITOR: 18 See also PB-213 919 and Supplemental Rept. no. 4, PB-236 568.

ABSTRACT: A review is made of methods and problems in the effective use of statistical information based on past behavior to predict future parole behavior. Many informational items concerning offenders, taken from case files, are seen to overlap and be correlated with one another. For example, auto thieves tend to be younger than offenders in general. Statisticians have invented procedures which take overlapping into account. When this is done it is typically found that only a few items appropriately weighted, may be expected to do the work, in prediction, of a much larger number. Various studies indicate that less sophisticated methods of combining the information may end up, in practice, as better than the more sophisticated techniques. This curious result suggests that the nature of the data may not satisfy the assumptions which are made in statistical theory.

Modeling, Behavior Change, and Rehabilitation

Missouri Univ., Columbia. Research Regional Rehabilitation Inst.*Social and Rehabilitation Service, Washington, D.C. AUTHOR: Bruch, Monroe A., Kunce, Joseph T., Thelen, Mark H., Akamatsu, T. John C3713D2 FLD: 51, 5J, 92D, 92B USGRDR7425 Jun 73 88p REPT NO: Research Ser-7 GRANT: SRS-15-55245 MONITOR: 18

ABSTRACT: Research findings on observational learning and imitation have considerable relevance to rehabilitation. The procedures developed in the laboratory and field situations can be readily adapted to many kinds of rehabilitation problems and to many settings. Specific applications to rehabilitation problems of the disabled and disadvantaged are such things as modifying academic achievement behavior, perceived client inadequacy, tolerance of pain, and health provide techniques that can management. Modeling tactics be effectively used in conjunction with more traditional learning approaches and with interpersonal, 'relationship,' approaches. The strategies may be elaborate, requiring the use of videotapes or films. or simple, requiring such things as client exposure to appropriate peer or rehabilitation staff models.

The Post-Prison Analysis of Criminal Behavior and Longitudinal Follow-up Evaluation of Institutional Treatment

Rehabilitation Research Foundation, Elmore, Ala. Experimental Manpower Lab. for Corrections.*Manpower Administration, Washington, D.C. Office of Research and Development.

Final technical rept. Oct 70-Jan 73 AUTHOR: Jenkins, W. O., Witherspoon, A. D., DeVine, M. D., deValera, E. K., Muller, J. B. C3712D2 FLD: 5K, 5J, 92A, 92B, 91C USGRDR7425 Feb 74 73p REPT NO: RRF-910-2-74 GRANT: DL-21-01-73-38 MONITOR: DLMA-21-01-73-38-5

ABSTRACT: The report describes an 18-month postrelease follow-up of 142 young male offenders released from Draper Correctional Center in Elmore, Alabama. The study had two objectives: the analysis of criminal behavior and the evaluation of institutional treatment programs. There were five study groups: (1) MDT trainees, (2) State Trade School trainees, (3) men who had participated in the EMLC's token economy study, (4) men who received both MDT training and token economy treatment, and (5) a control group who had received no institutional treatment. Information was gathered in a series of face-to -face interviews, using the EMLS's battery of behavioral assessment instruments. Environmental input was specifically assessed by the Environmental Deprivation Scale; behavioral patterns, by the Maladaptive Behavior Record and the Weekly Activity Record. These instruments were found to be predictive of law encounters and recidivism.

An Evaluation of Some Additional Factors Influencing the Effectiveness of Warning Letters

California State Dept. of Motor Vehicles, Sacramento. Research and Statistics Section.*Federal Highway Administration, Washington, D.C.

Final rept. AUTHOR: Epperson, William V., Harano, Richard M. C3695J1 FLD: 5J, 13L, 13E, 91B, 85D USGRDR7425 Jan 74 26p REPT NO: CAL-DMV-RSS-74-45 MONITOR: 18

ABSTRACT: The primary objectives of the study were to determine the effectiveness of two types of warning letters and an informational pamphlet in reducing the subsequent collision and conviction records of pre-negligent drivers. An additional study objective was to determine the effectiveness of a follow-up reinforcement letter sent to collision and conviction free drivers. The results six months subsequent to treatment showed no significant treatment effects on convictions, but a positive pamphlet effect on collisions. The follow-up reinforcement analysis for collision and conviction free drivers showed no significant treatment effects on collisions. On convictions, however, there was a main effect attributable to type of warning letter as well as an interaction between type of warning letter, pamphlet condition, and follow-up reinforcement.

An Evaluation of Youth Programs Conducted by the National Conference of Christians and Jews

Kramer (Leo), Inc., Washington, D.C.*Social and Rehabilitation Service, Washington, D.C. C3624K4 FLD: 5K, 92C USGRDR7424 Jan 72 52p MONITOR: 18

ABSTRACT: The final evaluation of four youth programs conducted by the National Conference of Christians and Jews, National Capital Area, is intended to describe and analyze the progress made in these programs since the last full year evaluation. The report suggests directions that might be explored by NCCJ as it strives to build upon the experiences gained over the past three years. The programs are: Student leaders and administrators program; career exposure program; dig-it; police-youth relations program. Funded by the United States Department of Health, Education and Welfare, the programs are fundamentally designed to build bridges between the disadvantaged youths of the area and other elements of the broader community with which they will come into contact as they grow into adulthood.

ž.

ABSTRACT: The report examines the effectiveness of the juvenile court's system for detecting and its legal philosophy for handling allegedly delinquent juveniles who may be emotionally disturbed. Studies of the May-December 1969 referrals to the Child Guidance Clinic of the District of Columbia Juvenile Court, an analysis of a sample of children not referred, and interviews with D.C. and other probation officers reveal: (1) There is no clear understanding of emotional disturbance or consistant program for its detection within the court: (2) most questions asked of the clinic are diagnostic and general and produce sterectyped and unimplementable reports: (3) the referral process does not detect much severe emotional disorder and organic pathology in the juvenile court population.

ABSTRACT: A project (1969-1972) tested the hypothesis that a comprehensive vocational rehabilitation program would foster the development of work and social adjustment and help to decrease delinquent behavior while the offender remained in his community. It was found that certain variables, such as greater vocational maturity, more intrinsic work values, better attitudes toward work, higher social class, and less truancy in school could be used to predict vocational rehabilitation sucess. There appears to be no significant differences in vocational adjustment, attitudes toward authority, self- esteem, or recidivism.

AESTRACT: The report presents a description of a volunteer probation ccunselor program involving the use of volunteer citizens in counseling relationships with youthful misdemeanant offenders. The program was conducted by the lincoln-lancaster, Netraska, Municipal Court. The report contains a description of the essential features of the program including selection of probationers and volunteers. The effectiveness of the program is assessed by three classes of criteria--behavior, personality, evaluative and psychosocial. Ferformances of high-risk youthful misdemeanant offenders who were assigned randomly to either routine probation programming or Volunteer Protation Counselors are compared. A sample of low-risk youthful misdemeanant offenders assigned to routine probation programming were also studied. The relationships between successful volunteers and probationers is examined. A model of the successful Volunteer Frobation Counselor (MOTEI-VCI) is developed and its scientific value assessed by comparing predictions generated by the MODEL-VOL with measures of successful relationships.

ABSTRACT: Covering the history and present status of extradition involving Indian governments, the document reviews treaties and extradition legislation currently in effect. An important section of the paper deals with Indian perceptions of extradition, which are quite different from those of the Non-Indian community. Court decisions and a sampling of legislative response to the problem lead inexorably to the conclusion that legislative clarity is a necessity. Legislative examples are appended to serve as discussion guides for possible future action. The appendix also includes suggested forms to be used in extradition procedures.

Factors Related to Drug Abuse in the Submarine Service. III. Characteristic Biographical Profiles and Selated Data

Naval Submarine Medical Research Lab Groton Conn (252220)

Medical research progress rept. no. 1 AUTHCR: Weybrew, Eenjamin B., Noddin, Frnest M. C2764D2 FID: 5J, 5I, 92C, 57I USGRFF7412 24 Sep 73 41F FEPI NO: NSMFI-764 FRCJFCT: MF51.524 TASK: MF51.524.C04 MCNITCF: 18 See also report dated 2 Feb 73, AD-763 401.

AESTFACI: Involving two drug abuse (DA) Samples (N#200 and 41), this study was designed to reexamine certain of the findings reported in earlier reports of this series and to investigate the relationships of selected sociological, personality and background factors to propensity for DA in the submarine service. Though the mechanisms are unknown, there appears to be a non-chance correlation between Submarine School output and incidence of DA during equal time segments. A gross estimate of the incidence of DA in the submarine service for FY71 was comparatively low, of the order of 25 per 1000 enlisted men across all submarine classes, but possibly slightly higher for men in attack class as compared to those in either fleet type or Fleet Ballistic Missile billets. (Modified author abstract)

Community Well-Being as a Factor in Urban Land Use Planning Georgia Inst. of Tech., Atlanta. Environmental Resources Center.

Completion rept. 1 Oct. 70-30 Jun 74 AUTHOR: James, I. Douglas, Brogan, Donna R., Laurent, Eugene A., Ealtimore, Henri Etta C2393J4 FID: 13B, 91* USGRDF7407 Jan 74 232p* REPT NC: FRC-0174 CONTFACT: DI-14-31-0001-3359 FFCJECI: CWBR-C-2064(3359) MONITOR: CWFR-C-2064(3359) (1)

AESIFACI: Many engineers, planners, sociologists, rsychologists, and architects recognize that the well-being of residents of an urban community may be profoundly affected by the designs used for transportation, drainage, communication and other urban facilities. A tetter understanding of how the well-being of reorle living in an urban community relates to the physical features of their residential environment is important both to planners who desire to minimize any adverse effects from their design and professionals rotential (primarily in mental health and law enforcement) who must deal with the problems symptomatic of a low level of well-being. While the establishment of causal relationships was beyond the scope of this study, the associations developed by regression analysis demonstrated that physical characteristics are roughly as important as social characteristics in explaining well-being problems. The primary relationship is that physical features that attract many outsiders accentuate well-being problems in a residential community while those that isclate a community minimize such problems. Vandalism and Passenger Security. A Study of Crime and Vandalism on Urban Mass Transit Systems in the United States and Canada

American Transit Association, Washington, D.C.

Final rept. AUTECF: Schnell, John E., Smith, Arthue J., Dimsdale, Karen R., Thrasher, Edward J. C2313D3 FLD: 5K, 91C*, 92C* USGFDE74C6 Sep 73 432p* FRCJECT: UMTA-DC-G6-0017 MCNITCF: DOT/UT-412

ABSIFACT: On the basis of data obtained from 37 U.S. transit systems, the range of the total number of criminal incidents on all U.S. transit systems in 1971 is estimated at approximately 33,000 to 39,000, and the range of total national transit vandalism costs at \$7.7 sillion to nearly \$10 million. The main components of vandalism costs are window breaking, damage to seats, damage to stationary facilities, and graffiti. Chapter IV of the study describes glazing, seating, and panelling materials that resist damage. Chapter V discusses devices and procedures for protecting passengers and employees, deterring criminals and vandals, keeping them under surveillance, and helping apprehend them after crimes are committed. VI describes programs and liaison efforts directed at Charter naintaining good relations with community and educational circles and involving them in the anti-vandalism effort. Chapter VII looks at relations between transit systems and institutions such as the police, the judiciary, educational authorities, and the mass media as factors in discouraging crime. The final Charter presents six case studies of rassenger attitudes in an attempt to assess the influence that fear of transit crime and vandalism exerts on passenger decisions concerning use of urtan mass transit facilities.

ABSTRACT: This report presents an evaluation of a halfway house designed to serve mena and women released from jail and prison to rrotation and parole in Santa Clara County, California. Results indicated that house residents, particularly those who stayed at least four weeks, were doing as well as other parolees to the Santa Clara County area on recidivism, although the follow-up was small at the time of the report. The progress of residents was felt to be particularly impressive in that they are a low resource group, who have very little outside support in the community. It appeared that House staff should be of even more assistance in job development and placement, but perhaps the singular most important contribution of the house to the parolee is in seeing that he or she does not live alone during the first months out of priscn, or during a critical life period while on parole or probation in the community. The document includes a copy of the questionnairs used in surveying the residents of the center and statistical information that was gathered. (Modified author abstract)

The Manhattan Court Exployment Project of the Vera Institute of Justice

Vera Inst. of Justice, New York.

Final rept. Nov 67-31 Dec 70 AUTHCR: Clgiati, Ennis J. C1905G1 FLD: 5K, 5J, 91C, 92B* USGRDE7324 1972 6Sp* CCNTFACT: DL-82-34-68-09 MCNITCR: DLMA-82-34-68-09-2

AESIFACT: In 1967, a project was set up to test whether a successful job coupled with counseling could change certain defendants life-styles within a three-month period after arrest, before trials were held. Working closely with the New York City courts, the District Attorney's office, and employers sympathetic to the idea of rehabilitation, the project obtained 90 day trial delays. During this period, project career developers found jobs for participants while counselors, themselves ex-offenders and ex-addicts, provided backup support. If defendants did well during the period, the project recommended that their cases be dismissed. Results of the experiment are reports.

Frevention and Control of Collective Viclence. Volume V. Guideline for Fatrol Personnel

Crerations Fesearch, Inc., Silver Spring, Md. (270 900) AUTHOR: Callahan, W. Thomas, Knoblauch, Richard L. C1902G3 FIE: 5K, 91C, 92C USGRER7324 Jun 73 47p* GRANT: LEAA-NI-71-097-G MONITOB: IEAA-NI-71-097-G-E Faper copy also available in set of 5 reports as PE-224 620-SET, FC\$9.00; single copy also available from GFC \$0.75 as stock no. 2700-002C3.

ABSTRACT: The monograph presents patrolmen with practical guidelines for their contribution to the planning, training, operations, and evaluation activities of rict control. Each of these topics is discussed in relation to the following: reasons for collective violence, potential locations, time considerations, participants, types of disturbances, and ways in which collective violence occur. Viable relationships between patrol officers and other personnel engaged in the prevention and control of violent disturbances are stressed. Because of their firsthand acquaintance with the problems of dealing with collective violence, it is suggested that patrol personnel be encouraged to 'provide a positive input to police planning and training needs'. Similarly, means by which 'patrol officers can provide personal evaluations of training, equipment, and procedures which the department has adopted for prevention and control of collective violence', are cutlined.

ABSTRACT: The report includes guidelines on the collection and dissemination of the essential information required for decision making before and during an episode of collective violence. The introductory chapter explains guideline basic propositions, the methods of preparation, and the specific information needed for the prevention and control of violence. Individual chapters cover the activities of planning, training, operations, and evaluation as they relate to the police chief's needs. Within each chapter, prevention and control guidelines are listed separately and futher broken into categories based upon six essential intelligence elements: the locations of collective violence, the reasons for outbreaks, time considerations, persons involved, types of events, and the ways in which collective violence occurs.

Prevention and Control of Collective Violence. Volume IV. Guidelines for the Fatrol Comander

Crerations Research, Inc., Silver Spring, Md. (270 900) AUTHCR: Callahan, W. Thomas, Knoblauch, Fichard L. C1902G2 FID: 5K, 91C, 92C USGRDF7324 Jun 73 55p* GRANI: LEAA-NI-71-097-G MCNITOF: LEAA-NI-71-097-G-D Faper copy also available in set of 5 reports as PE-224 620-Set, FC\$9.00; single copy also available from GPC \$0.85 as stock no. 2700-0200.

ABSTRACT: The monograph presents guidelines in the areas of planning, training, operations, and evaluation as applied to incidents of collective violence. Planning is divided into two categories--planning for prevention includes all the analyses and decisions necessary to prepare operations for reducing tension and interrupting potentially violent activities; planning for control is oriented toward preparing procedures for rapidly restoring order once violence has occurred. In the area of training, the report concentrates on the steps that the patrol commander should take to plan and provide training for preventive and control operations. The guidelines on operations for prevention cover the detection and reduction of tension and the forestalling of attempts to initiate violence. Operations for control include deployment, movement, and support of police officers to end violence.

AESTFACT: The monograph describes and analyzes conditions that lead to collective disorders in correctional facilities and suggests potential ways of alleviating those conditions. The development of tension management and organizational activism by correctional managers is suggested as preventives of disorders. The factors contributing to the Attica tragedy are analyzed and recommendations are offered for preventing similar occurrences. Behavioral science theory and empirical data on prison riots are used to examine sources of collective violence in correctional institutions. The provision of legal remedies to resolve inmate grievances is criticized as a potential means of precluding violence.

Final rept. AUTHOR: Costello, Janis C1725G4 FIE: 51, 57M, 91C USGRDR7322 Dec 72 107F CONTFACT: IFAA-NI-72-006 MCNITCR: 18

ABSTRACT: The paper presents a comprehensive state-of-the-art review of the use of behavior modification techniques in the field of corrections. It discusses and critiques a number of research projects in behavior modification. The author notes shortcomings in this type of research such as ill-defined program goals, inconsistent program implementation, and lack of adequate follow-up on persons released from the programs. He observes that behavior modification shows great promise for the future as an instrument of correctional change, provided the research efforts are rigorous in methodology and systematically replicated, and provided that knowledge gained through these studies is widely disseminated. Fortions of this document are not fully legible.

Delinquency and City Life

Temple Univ., Philadelphia, Fa. (346 350) AUTHCR: Ialli, Michael, Savitz, Leonard C1643I1 FID: 5J, 5K, S2D, S1C USGRDF7321 Jan 72 72p GFANT: LEAA-NI-70-027 MCNITCR: 18

AESTEACT: An interim report is made on the causes of delinguency among black boys in Philadelphia. The study, on-going and longitudinal, seeks to explain why some but not all boys in the most depressed urban areas, in the same social and economic circumstances, become delinguent. The findings of 532 interviews with the boys and their mothers are presented. The attitudes concerning family, education, aspirations, fear of crime, behavior changes, and self are measured. Juvenile Court records were used to establish arrest records. Dropping cut of school is seen to be a consequence of delinguency and not a cause.

ABSTFACT: The four papers in the moncorach discuss the responsibilities and problems facing the criminal justice field in the establishment of a valid classification system. Some prominent examples of typological analysis found in the criminological literature including the Gibbons' role career typology are reviewed. The importance of classification is discussed in terms of making decisions as to intervention programs, focusing on the interpersonal maturity level and the differential treatment programs which follow from it. The third paper presents evidence that the diversion of an offender can be maximized through the improvement of information systems to insure that decision-makers learn the consequences of their actions.

1970-71 Washtenaw County High School Survey on Drinking and Driving Michigan Univ., Ann Arbor. Highway Safety Pesearch Inst. (407 825)

Summary rept. AUTHCR: Wolfe, Arthur C., Charman, Marion M. C1193K4 FID: 5J, 13I, 13F, 85D, 92A, 92E USGRDR7315 Jun 72 38 FEFT NC: UM-ESFI-AI-72-3 CCNTFACT: FH-11-7535 MCNITOR: 18

ABSTRACT: The report summarizes the results of a questionnaire completed by 436 tenth, eleventh, and twelfth grade students in six Washtenaw County high schools during the 1970-71 school year. Content areas of the survey include: drivingexperience, driving record, driver education, exposure to drinking and driving information in school and on the mass media, radic listenership and newspaper readership, drinking and driving after drinking experience, role of alcohol in traffic accidents, effect of alcohol on driving ability, factors influencing how alcohol affects an individual, legal aspects of drunk driving, and demographic and tackground information on the respondent. The survey was carried out in order to obtain baseline information useful to the development and evaluation of the public information program for high school students being carried out by the Washtenaw Alcohol Safety Action Program.

The Impact of Criminal Court Sentencing Decisions and Structural Characteristics

Frandeis Univ., Waltham, Mass. (062 300)

Final rept. Jun 70-Jan 72 AUTHCP: Levin, Martin A. C1121C3 FLD: 5K, 91C, 92B USGRDF7314 Mar 73 81p CONIFACT: LEAA-NI-70-065-PG-19 MCNITCF: LEAA-NI-70-065-FG-19

APSTRACT: The report explores the impact of judges' sentencing practices, and courts' structural characteristics, on recidivism rates. It considers scre major problems of policy evaluation and how the evaluation requirements for applied social science differ from the requirements for pure social science. It describes a number of studies intended to determine the correlation between type of sentence and the probability of recidivism. Substantial attention is given to the methodological weaknesses of such studies. The work contrasts analytical evaluations of existing programs with those of controlled experimental programs.

See also Volume 2, FE-220-468.

AESIFACT: Judges of the Denver, Colcrade, County Court agreed to assign penalties of a fine, conventional probation, or rehabilitative protation according to a fixed schedule to 495 drivers convicted of a first offense of driving while intexicated. Judges' departures from the agreed schedule in large numbers of cases made it necessary to a introduce statistical controls in comparisons of subsequent records. In neither the criginal treatment groups nor the groups created by the judges' actual sentences were there found any significant diffences in subsequent crashes, moving viclations, points, DUI convictions or time first subsequent crash or moving violation. Those drivers tc sentenced to jail rather than to one of the three prescribed treatments also were found not to differ from the balance of the group in subsequent records. The research did not yield evidence that the types of sanction currently utilized in Denver produce measurable differential effect on driver behavior and highway safety. However, it was found that representation by a lawyer is powerfully effective obtaining a more favorable legal treatment for defendants accused in cf driving while intexicated.

Iwo Experimental Studies of Traffic Law, Volume II, The Effect of Court Appearance on Traffic Law Viclators

Geonet, Inc., Fockville, Md. (388 699)

Final rept. Jun 72-Feb 73 AUTHOF: Elumenthal, Murray, Ross, H. Laurence C103314 FLT: 5C, 92E4, 91C, 85D, 92C USGRDF7313 Feb 73 153F CCNTFACT: COT-HS-249-2-437 MCNITCF: COT-HS-800 826 Erepared in cooperation with Denver Univ., Colc. See also Volume 1, FE-220 467.

ABSTRACT: The study compared the effects on subsequent driving records of 5434 moving traffic violators not ordinarily required to appear in court, of a required court appearance vs. simpler and less costly alternatives. There were no differences in subsequent crashes, moving violations or moving violation points between required court and the standard clerk, mail-in or warning citation groups. However, the required court appearance group, on the average, recorded a subsequent moving violation or crash sooner than the other citation groups. When initial differences between the experimental groups were controlled statistically, a better record following court appearance was cocasionally found among certain subsamples, but the subsamples showing such benefits varied from one comparison to another and did not clearly support the experimental hypothesis of a teneficial effect of a required court appearance on subsequent driving records.

AESTRACT: The report is a combination of two studies analyzing changes over time in the behavior of addicts in a methadone maintenance treatment program operated by the Addiction Research and Treatment Corporation (ARTC) in the Beford-Stuyvesant area of New York City. The study on changes in the criminal behavior of heroin addicts under treatment examines closely the criminal behavior of the first 416 addicts admitted to the program before and during their addiction and for one year after they entered the AFIC program. The other heroin use and crime in a methadone maintenance program examines the medication patterns, methadone dosages and morphine detection among the first 765 patients accepted in the AFIC program. Modeling: An Approach to the Rehabilitation of Juvenile Offenders

Washington Univ., Seattle. Dept. of Psychology, (387 783)

Final rept. AUTHCE: Sarason, Irwin G., Ganzer, Victor J. CC713J1 FLD: 5K, 92C, 92C, 91C USGREF7310 Jun 71 166p GFANI: SFS-15-55303 MCNITCE: SRS-15-55303-0

ABSIFACT: The research (1966-1971) investigated the positive effects on juvenile delinguents of coportunities to observe prosocial models which they might then seek to imitate. The subjects, 192 male first offenders, were evenly divided among role-modeling groups, discussion groups, and control groups. Analyses of the short-term self report and staff behavior ratings indicated that both treatment conditions promoted more positive changes in the attitudes, self-concepts, and overt behavior of subjects than was true of control group subjects. In addition, fewer experimental group subjects reported engaging in further delinguent activities while on parole than did control group subjects.

Using Correctional Officers in Planned Change

Fennsylvania State Univ., University Fark. Div. cf ' Community Development.

Final rept. AUTHCB: Luffee, Lavid CO642G3 FLE: 5K, 91C*, 92E USGRDB7309 Cct 72 78p* GFANI: LFAA-NI-71-115 MCNITCB: 18

ABSTRACT: The project tests the hypothesis that the involvement of correctional officers in a research-oriented group dealing with the process of changing goals within the correctional institution will create a more flexible and constructive guard sub-culture. A group of seven correctional officers was brought together in a minimum security facility and given research tasks concerning various elements of the organization and goals of the prison community. This group technique did prove effective in developing a problem-solving milieu for correctional officers and an increased awareness on their part of the problems of individual inmates. It did not, however, prove an effective means of opening useful communication channels between the correctional officers and their superiors.

ABSIRACT: A 2-year demonstration project, to determine whether a short-term (30 days) summer camp experience could contribute to prevention of juvenile delinguency, found that camping induced positive attitudinal change and improved adjustment to school. The project involved 200 adolescent boys from varied social backgrounds who were selected on evidence of anti-social behavior and potential for dropping out of school. In addition, information was obtained from a group of nonproject campers and non-campers in order to evaluate their summer experiences for purposes of comparison. Actual program methodology emphasized group dynamics and sensitivity training in organized camping activities and staff-camper relations. Program evaluation formed around data collected before, during, and after camp sessions; camper self-report schemes and counselor observation sheets were analyzed to measure change. Statistical analysis of pre- and post-measures showed positive change in a camper's attitudes toward self, peer group, and authority.

Federal Cffenders Fehabilitation Program: A Future for Correctional Fehabilitation

Washington State Div. of Vocational Fehabilitation, Clympia.

Final rept. AUTHOR: Eell, Percy B., Matthews, Merlyn, Fulton, W. Scott CO491A3 FID: 5K USGFEB7307 Nov 69 306p GRANI: SES-RD-2079-G MCNITCF: SRS-RD-2079-G See also report dated sep 68, FB-208 717.

ABSTRACT: Results from 8 projects designed to gather common data on the rehabilitation of Federal offenders are reported. Four U. S. agencies--Eureau of Prisons, Probation Service, Board of Farole, and Behabilitation Services (RS) administration--collaborated in the research. Clients were assigned to experimental (623) and control (602) groups by random selection. The projects tested effectiveness of RS for offenders at various stages of the correctional process. Fersonality problems (attitudinal deviations) were studied as the crux of the matter. It was found that emergency services such as financial support must be given at once (to prevent recurrence of offenses), and the client and his family should be treated as a unit.

New Environments for the Incarcerated

Iaw Enforcement Assistance Administraticn, Washington, D.C. National Inst. of Iaw Enforcement and Criminal Justice. AUTHOR: Gilbert, A., Sommer, F., Ricci, K. C0483E1 FLD: 5K, 91C, 89B, 95D USGREF7307 Aug 72 33p MCNIICR: 18

AESIFACT: Research with laboratory rats has shown that certain environmental factors such as overpopulation can produce bizarre changes in behavicral patterns. Findings such as these have relevance in the field of institutional management. The pamphlet presents three articles dealing with the interrelationship between inmates and their rhysical and social environments. In the first, Alfred Gilbert reports on the result of his current study involving analyzation and evaluation of correctional institutions throughout the United States. He indicates that more flexibility in the arrangement of living space Robert Sommer thinks that research into such areas as is needed. crowding, privacy and sensory deprivation will reveal the connection tetween prison environment and the mental outlook and attitudes of Kenneth Ricci looks at the social use of space and explains inmates. why inmates dc not always use the facilities provided for them. From these studies, it can be seen that social as well as physical factors must be considered in the designing and operating of correctional institutions. (Author)

n in n Alio Maria 'Pledging the Police': A Study of Selected Aspects of Recruit Socialization in a Large, Urban Folice Department

California Univ Invine Graduate School of Administration (407000)

Technical rept. AUTHOR: Van Maanen, John CO033F4 FID: 51, 70D, 91C USGRDR7301 Jul 72 289p* FEFT NC: TR-9 CONTFACT: N00014-69-A-02CC-9001 FROJECT: NR-151-315 MCNITOR: 18

ABSTRACT: The report examines empirically and experientially the process of becoming a policeman. Specifically, the study documents attitude changes reported by police recruits as they moved through the series of experiences and adventures associated with their early careers. Questionnaires were administered longitudinally and cross-sectionally to police officers in a large, urban police department. The guestionnaires focused upon the motivation, commitment and satisfaction of patrolmen. Viewed through the 'expectancy theory' perspective, these attitudes represent linkages by which people connect themselves to their employing organization. (Author)

Interpersonal Dynamics in a Simulated Priscn Stanford Univ Calif Dept of Psychology (403110) Technical rept. AUTHOR: Faney, Craig, Banks, Curtis, Zimbardo, Philip C0011E3 FID: 5J, 56K, 92B, 91C USGREB7301 Cct 72 E4p* FEPT NC: CNR-TR-Z-09 CCNIFACT: N00014-67-A-0112-0041 FRCJECT: NR-171-814 MCNITCF: 18

ABSIBACT: Interpersonal dynamics in a prison environment were studied experimentally by designing a functional simulation of a prison in which subjects role-played prisoners and guards for an extended period of time. To assess the power of the social forces on the emergent behavior in this situation, alternative explanations in terms of pre-existing dispositions were eliminated through subject selection. Many of the subjects ceased distinguishing between prison role and their prior self-identities. When this occurred, a sample of normal, healthy American college students fractionated into a group of prison guards who seemed to derive pleasure from insulting, threatening, humiliating, and dehumanizing their peers-those who by chance selection had been assigned to the "prisoner" role. The typical prisoner syndrome was one of passivity, dependency depression, helplessness, and self-deprecation. (Author)

The Control of Shoplifting: Model Characteristics and Response Contingencies as Determinants of Eystander Intervention

Utah Univ., Salt Lake City. Dept. of Psychology. (403 324)

Final rept. 1 Jul 70-1 Oct 71 AUTHOR: Gelfand, Donald M., Hartmann, Donald P., Walder, Patrice, Fage, Erent A5455F1 FID: 5K, 56C, 91C, 92A USGREF7224 1 Oct 71 65p* FROJECT: LEAA-NI-70-065-FG-14 MONITOR: IFAA-NI-70-065-FG-14

MESIBACI: The purpose of the study was to investigate shoplifters and to observe bystander characteristics and other factors related to the reporting or non-reporting of shoplifting. Shoplifting incidents were staged in a low income area drug variety store. In each case the 'shoplifter' was the same young woman college student. In half the cases she wore conventional clothing and in the other half of the cases she wore 'hippie' garb. The shoplifting incident was staged so that only one shopper would be in the vicinity of and be able to see the incident. Observers were varied by age, sex, and socio-economic status. Incidents were video taped and subjects were interviewed about whether or not they saw the incident and why they did or did not report it. (Author)

Detection of Emotional Stress by Voice Analysis

Lecision Control Inc Eethesda Md (406505)

ŧ.

Final rept. AUTHCB: Fuller, Fred H. Jr A5272J1 FLD: 5J, 5K, 56K, 56C USGRDF7222 Sep 72 41p CONTFACT: DARIO5-71-C-0274 FRCJECT: IWI-C28-71 MCNITCB: IWI-CE-03E70

ABSIRACI: A study was performed to develop a methodology for determining emotional stress by voice analysis. Take recordings of 58 subject examinations for actual or staged criminal offenses were electronically processed. The result of this processing was a measure value for the ratio of the amplitudes of the 100+120 Hz to the 600-800 Hz ranges in each subject's spoken response. A methodology for assessing the measure values to determine the relative levels of stress in these responses was developed. A portable prototype voice analyzer was built which electronically processes a voice signal from either a tape recorder or microphone input. An interrogation and assessment protocol similar to the 'Zone of Comparison' technique used by many polygraph specialists was developed and used to assess the guilt or innocence of five subjects undergoing 'Zone of Comparison' tests. A 95% confidence level was achieved for four of the five subjects. (Author)

The Service-Related Experience of Juvenile Delirguents. VIII. A Replication of Some Earlier Findings on a Viet Nam War Period Sample. IX. A Freliminary Study of the Later Significance of Adolescent Drug Use

Minnesota Univ Minnearolis Inst of Child Levelopment (180950)

Annual rept. 1 Jul 71-30 Jun 72 AUTHCF: Fcff, Merrill F. A5202D1 FLD: 51, 60, 70D, 570 USGRDF7221 Jul 72 34p FEFT NC: 72-10, 72-11 CONTFACT: DALA17-69-C-9163 MCNITOR: 18 See also report dated Apr 70, AD-715 723.

ABSTRACT: A replication is made of earlier work on the service-related experience of individuals with histories of juvenile delinguency. A comparison is given of findings reported earlier on a Korean War sample with results from a current sample which is as close to the present as possible for most to have completed their military service. A preliminary analysis is also reported of preservice drug histories in relation to service-related outcome. Tabulations are given of specific drugs used, both for those rejected for service and for those in service. The relation of specific drugs to the educational level of the individuals is shown. Homosexuality in Frisons

Fennsylvania Priscn Society, Fhiladelphia.

Final rept. 15 May-14 Nov 71 AUTECP: Euffum, Peter C. A4884E2 FIT: 5J, 56K USGETR7217 Nov 71 54p CONTFACT: IFAA-NI-71-074 MONITOR: IFAA-NI-71-074 Faper copy available from GFC \$0.35 as stock no. 2700-0145.

ABSIFACT: The monograph is an outgrowth of a national conference on prison homosexuality held in Philadelphia in October, 1971. The report views the prison social organization and social climate as the context in which homosexuality occurs. The roles of anxiety, isolation, and deprivation in homosexual acts are noted. The character of the prison is not seen as the sole, nor in some cases even the major determinant of inmate behavior. Fre-institutional factors affecting sexual adjustment, including psychological disposition towards sex, is discussed. Comparisons are made of homosexuality by male and female inmates and by race of inmates as well.

A Comparison of Probation Officers and Volunteers

Colcrado Univ., Eculder. (088 400)

Final rept. AUTHOF: Hcwell, James Carltch A479211 FID: 5R, 56C, 70D USGRDF7216 25 Apr 72 211p GRANI: DI-91-06-70-38 MCNITOF: FLMA-91-06-70-38-1

ABSIFACT: The study compares the effectiveness of probation officers and volunteer adults as counselors of juveniles on probation. Forty juveniles counseled by volunteers were matched with 40 probationers counseled by probation officers. Subjects were matched in pairs on the basis of age, sex, status, offense history, ethnicity and length of time in the study. A theoretical framework was used to account for the effects of the two methods of counseling on the attitudes and behavior of the juveniles under study. The hypotheses that increased frequency of interaction will lead to increased mutual affection and identity of activities provided authoritarianism does not intervene, were weakly supported. Stronger positive correlations were observed when authoritarianism was high rather than low.

The Abortion Issue

Chio State Univ., Columbus. School of Social Work.

Special rept. AUTHOR: Eehling, John A., Blcom, Michael, Euckel, William L., Faigin, Elise, Fullilove, Deborah A2961E2 FIE: 5K, 5E, 56N, 56G USGRDF7121 18 Aug 71 102p FEFI NC: CSU-SSW-71-C8-18 Frepared on subcontract to Kirschner Associates, Inc., Washington, E.C. 20005.

ABSTRACT: The attitudes of persons who question the morality of abortion were studied. A majority was found to favor abortion law reform. No sub-group was found to be 100 per cent for or against reform. As the variety of views held on the morality of abortion stems from the variety of religious views on how and when human life begins, an analysis and classification of these views is provided. One form of 'middle ground' abortion law is suggested. In addition, the report is designed to provide factual background information for those involved in the abortion law reform dialog. (Author)

Convicted and Non-convicted Drivers--Values of Drive Indices

Foad Fesearch Lab., Crcwthcrne (England). (306 850) AUTECR: Quenault, S. W., Harvey, C. F. A2864F1 FID: 5J, 56K USGRER7120 1971 25p REFT NC: FFL-IR395

ABSTRACT: Drivers convicted of careless driving and drivers not so convicted were studied. It was shown that the subject data for the two groups were similar except that there was a higher proportion of drivers in the 46-50 year cld age range in the convicted group and this group also had a higher proportion of drivers driving more than 25,000 siles per year. As a group the convicted drivers stated they had heen involved in more than twice the number of accidents admitted to by the non-convicted group. As regards driving behaviour the group used their rear-view mirrors less than the convicted non-convicted group, gave fewer signals, showed more extremes of overtaking behaviour, drove at an average higher speed in the de-restricted zones, showed more larses, carried cut more unnecessary manceuvres and took more risks. These results imply consistency of cbservation and classification and the ability of the method of chservation of driver behaviour to show meaningful systematic differences in driver behaviour between classes of drivers. A Survey of Techniques Used to Reduce Vandlism and Delinguency in Schools

Fesearch Analysis Corp., McLean, Va. (302 750)

Client rept. AUTHCB: Clson, Howard C., Carpenter, Jan E. A1724H2 FID: 5K, 56C, 63 USGEDE7107 Jan 71 146p FEFI NC: FAC-CE-26 CCM*FACT: LEAA-NI-70-065-PG-7

ABSIRACT: The study reports on a survey on school vardalism problems in the public secondary schools of the United States in 1970. With the cooperation of hundreds of school administrators, information was gathered on the extent and nature of the school vandalism problem as well as on measures and techniques employed to contend with it. One of the products of the study was a profile of the school vandalism problem today. It also provides a compilation of opinions and suggestions of school administrators on ways of lessening the problem. Statistical analysis was performed when the raw data permitted pointing out correlations, characteristics, etc, pertaining to highand low- vandalism schools. The report is intended to serve as a tool and reference source for those trying to cope in practical terms with school vandalism, as well as for those involved in designing further experiments or studies on effective ways to reduce the magnitude of the problem.

The Service-Related Experience of Juvenile Delinguents. VII. The Belation Between Type of Juvenile Offense and Outcome in Service Minnesota Univ Minnearclis Inst of Child Tevelopment (180950) AUTHCR: Foff, Merrill A1365K4 FIE: SI, 70E, 56C USGRDF71C3 Apr 70 21p FEFT NC: Fept. no. 70-9 CONTFACT: DADA17-69-C-9163 See also AD-688 654.

ABSIFACT: Work reported earlier on the prognostic significance of various aspects of juvenile delinguency for adjustment in military was extended to cover type of offense. Results are presented service separately for persons with a history of juvenile confinement and rersons without a history of juvenile confinement. A survey was made of all the specific types of offenses which were shown in the delinquency records, based on the total sample of delinquents being studied. The nine categories of offenses with the greatest frequency Against Property; Minor Mischief; Major Auto; cf cccurrence were: Violation of Probation or Parole; Absenting or Running Away from Home OT Institution: Sex-Connected Offenses; Incorrigibility; Aggression Against Ferson; Robbery. Rejections for conduct reasons are tabled against these categories. Type of cutoome in service is shown by category for those who entered service. The most adverse offense categories in terms of service cutcome were the trio of Incorrigibility, Violation of Probation or Parole, and Absenting or Funning Away from Home, School, cr Training School. This statement holds for both the confined and non-confined groups. The least adverse categories in terms of service outcome were Minor Mischief and Sex-Connected Offenses. (Author)

THE 'TRUTH' ABOUT FALSE CONFESSIONS

Stanford Univ Calif Dept of Esychology (403110)

Technical rept. AUTHCE: Maslach, Christina A0215J3 FLD: 5J, 907 USGRDR7012 Apr 70 20p FEFI NC: CNR-TR-Z-01 CCN1FACT: N00014-67-A-0112-0041

ABSIFACI: One of the few experimental studies to focus upon variables which might play a role in police interrogation is Bem's 'false confession' research. He showed that subjects come to believe that their false statements are true when emitted in the presence of a discriminative truth stimulus. In an attempted replication, the present study sought evidence to support an alternative explanation of this finding, based upon decreased vigilance induced by the truth stimulus. (Author)

LAECRATOFY SIMULATION OF A POLICE COMMUNICATIONS SYSTEM UNDER STRESS Chic State Univ Columbus Disaster Research Center (387540) AUTHCR: Drabek, Thomas E. AC111B2 FID: 51, 17E, 907, 910 USGRDF7011 Mar 67 157p FEPT NC: Monc-D-2 GFANT: AF-AFCSF-572-65 FROJECT: AF-9779 TASK: 977901 MCNITCB: AFCSF-67-1540 Supersedes AD-621 192.

APSIFACT: The research objective of the study was to explore the utility of 'realistic simulation,' as a methodological technique, for the analysis of complex organizations. A laboratory simulate of the dispatching room and communication system of a metropolitan police department was constructed. The simulate involved three different sets of four police officers and 26 simulations subject to four experimental sessions, two hours in length. Three sessions involved routine police communications. Each of the last sessions presented a simulated disaster in an attempt to place the system under stress and test selected aspects of a theoretical framework regarding tc crganizational stress which had been concurrently developed. The provided experimental data obtained general support for the theoretical framework used and also indicated that the effort to subject the simulate to stress was successful. (Author)

FFACTIONS TO STRESS

** 4. C.

Hebrew Univ Jerusalem (Israel) Dept of Fsychology (400316) Final scientific rept. 1 Jan 67-1 Nov 69 AUTHOR: Kugelmass, Sol A002511 FID: 5J, 6S, 9C7 USGRDF7010 1 Nov 69 Sp CONTFACT: AF 61(052)-839 MONITOR: AFOSF-70-0790IR See also Final rept. dated 1 Jan 67, AD-647 467.

ABSIFACT: Consideration of the data of a series of experiments on Israeli Police trainees and criminal suspects suggests that differential psychophysiclogical reactivity of the GSR channel is not systematically reduced by stress within the range relevant to criminal interrogation. Further analysis of the criminal suspect data suggested that the detection rate could be raised through the combination of responses from the three polygraph channels (GSR, preathing, and Blood Fressure). This was particularly so for subjects having positive correlations between the different channel responsivities. In a most recent replication study using a different sample of criminal suspects somewhat different results were chtained with very low rates of detection in the breathing and blood pressure channel responses. analysis of this data is being undertaken. In still a Further different sample of criminal suspects a pattern of baseline heart-rate change was noted that seemed to be systematically related to the individual's GSR differential reactivity and detectibility. (Author)

THE STUDY OF MAN. HCW PCLICE CONFRONT DIASTER

Lenver Univ Colo Dept of Sociclogy (404291) AUTHOR: Drabek, Thomas F., Haas, J. Fugene 7104I4 FID: 5J, 907 USGRDR7004 1969 7p GRANT: AF-AFCSE-1307-67, AF-AFCSR-572-65 FROJECT: AF-9779 TASK: 977901 MCNITCR: AFCSE-69-3083TR Availability: Put. in Transaction, p33-38 May 69.

ABSTBACT: Group response to organizational stress was analyzed through the realistic simulation of a police communication system. Three teams of police communication officers participated in three, two hour laboratory sessions wherein they confronted normal demand loads. A simulated airplane crash was used to generate system overload in the final laboratory session. Hypotheses tested and supported were that as stress increases: (1) the rate of task performance will increase; (2) decisions will be made more rapidly; (3) personnel will increasingly limit themselves to tasks of highest priority; and (4) frequency of self-initiated contacts between organization will increase.

LESCFIFTCES: (*Police, Stress(Psychology)), (*Disasters, Simulation), Communication systems, Reaction(Fsychology), Decisior making, Aviation accidents

ISSUE SALIENCY ANE THE CORRESPONDENCE FETWEEN MEASURES OF ATTITUDE Maryland Univ College Park Dept of Psychology (400629)

Technical rept, AUTHOR: ward, Charles D., park, Gill D. 6744J4 FIT: 5J, 907 USGRER6923 Aug 69 15p* FFFT NC: TE-15 CONTFACT: Nonr-595(21) FRCJECT: NR-171-250 Fepcrt on Crcss-Cultural Investigation of Some Factors in Persuasion and Attitude Change. See also AE-682 540.

ABSIFACT: Several years ago a study reported that the correlation between attitude scores on Thurstone and semantic differential scales was greater when issue saliency was low than when issue saliency was high. The present study obtained the opposite results on two different issues using two different sets of attitude scales. The most parsimonious interpretation is that the low correlations in both studies were produced by a restricted range of scores on one or both scales. Contrary to the previous study's warning, the present results indicate that the semantic differential scale is no more vulnerable to changes in issue saliency than are other widely used measures of attitude. (Author)

LAECEATORY SIMULATION OF ORGINIZATIONAL STRESS

Tenver Univ Colc rept of Sociclogy (404291) AUTHOR: Drabek, Thomas E., Haas, J. Eugene 6402B1 FID: 5A, 5J, 918 USGRDR6918 1969 18p GRANI: AF-AFOSE-1307-67 FROJECT: AF-9779 TASK: 977901 **ECNITCE:** AFCSF-69-1736TR at the Annual Neetings of the American Sociological Fresented Association, Miami Beach, Fla., Sep 66. Frepared in cooperation with Colcrado Univ., Eculder. Availability: Pub. in American Scciolcgical Review, v34 n2 p223-228 Apr 69.

ABSIFACT: With a research focus on organizational stress, such as might be precipitated by natural disaster, an attempt was made to 'bridge the gap' between the field and laboratory through 'realistic simulation.' Three tears of police communication room personnel participated in each of the three simulations with normal system demands. The teams then confronted system stress through a simulated disaster. Among the most important changes in group structure which increased system capacity was the gradual emergence of a display mechanism whereby intra-team activity became more shared. (Author)

THE SFRVICE-BELATED EXPERIENCE OF JUVENILE DELINQUENTS. VI. THE FREICTIVE VALUE OF EDUCATION IN A SECOND DELINQUENT SAMPLE AND IN A NORMAL CONTECT GROUP

Minnescta Univ Minnearclis Inst of Child Levelopment (180950)

Annual rept. for fiscal year ending 30 Jun 69 AUTHCR: Boff, Merrill 6234A4 FID: 51, 5J, 907 USGEDR6915 Apr 69 23p FIFT NO: 69-8 CCNTFACT: DA-49-007-MD-2015 See also Fept. no. 5, AD-485 069.

ABSIFACT: The study is a replication of work described in the preceding report on the relationship between educational level and cutcome in service, for a group with a history of juvenile delinguency (N=367), and for a randomly selected cross section of the school population from the same area (N=522). These two samples were obtained in a second state, located in another part of the country from the Minnesota sample reported previously. Separate tables and graphs have presented the relation between educational level and (a) acceptance cr mcral rejection for service, and (b) outcome in the military services, comparing the two new samples with each other and with the Minnesota delinguent sample (N=2564). This study confirmed of the preceding report, which indicated that among results delinguents there was a consistent rise in the proportion of those service with an increase in educational level. successful in Minnescta is consistently one of the highest states in the country in terms of the proportion of its young men who pass the nationally administered Armed Forces Qualifying Test. The sample dealt with in the present paper comes from a second state which is among the poorest cne-third of the states in terms of the proportion rejected because of AFOT scores. Partly due to this educational differential, the low absolute values for the Minnesota delinguents did not differ too much from those for the randomly selected control group from the other In both states, both high school graduation and college state. attendance tended to cverride an earlier history of delinguency. Final scientific rept. AUTHCR: Erabek, Thomas E. 5415A1 FID: 5K USGRER6903 Nov 68 16p GFANT: AF-AFCSR-1307-67 FROJECT: AF-9779 IASK: 977901 NCNITOR: AFOSR-68-1677

ABSIFACT: A conceptual framework for the analysis of organizational stress was constructed. Additional theoretical work was completed on the pre-suppositions implicit in this and other organizational models. The stress framework was used to intensely analyze data collected at Chic State on three simulated police communication teams subjected to stress. These findings and the conceptual model were critically reviewed by seventeen organizational specialists at the Symposium on Crganizational Stress held at the University of Lenver in January, A summary of the proceedings is organized into three general 1968. headings: (1) theory, (2) method, and (3) future research needs. Following the Symposium, the conceptual model, theoretical discussion, and analysis of police team response to stress was revised. Simulation as a bridge between the laboratory and field is briefly discussed as are major problem areas related to organizational stress which require future empirical, methodological, and conceptual work. (Author)

ABSIFACI: The report summarizes the research undertaken from 1964 through 1967 as well as indicating the direction of new investigations that have been initiated. Chapter I describes the general research criginally projected, the initial thecretical model set forth, and the physical facilities of the laboratory being used. The pilot study, using ad hcc small groups, is reported on in the next chapter. The major laboratory research conducted during the four years is discussed in Chapter III. This involved a realistic simulation of an actual dispatching room. Chapter IV describes an experimental effort. pclice to test quantitatively in the laboratory some hypotheses drawn from a refined version of the original theoretical model used. The following chapter depicts an 'analogue' study conducted as a result of questions generated by the two major laboratory simulations. The last two charters of the report discuss the cross-cultural studies of communication initiated in an attempt to focus on interactional aspects of groups under stress, and the range of laboratory, experimental and field work projected for the future. THE STRUCTURE OF DISCONTENT: THE RELATIONSHIP EFIWFEN SOCIAL STRUCTURE, GRIEVANCE, AND SUFFORT FOF THE LOS ANGFLES FICT California uUniv., Los Argeles Inst. cf Government and Public Affairs. AUTHCF: Murphy, Raymond J., Watson, James H. FID: 5K 40.5334 USGFDR6801 1 Jun 67 116c CCNIFACT: OEO-666

ABSIFACT: While it is self-evident that considerable unrest must have heen present in the Negro ghetto to produce the violent riots of 1965, it is not nearly so obvious what kinds of persons participated in the violence nor which grievances they felt most acutely. It is the rurrose of this report to investigate the relationship between types and levels of discontent and support and participation in the riot. The research attempts to show that South Central los Angeles, home of the riot, consists of a wide variety of groups, and it indicates both the kinds of persons most aggrieved in the community and the effects of structural differentiation in the community on attitudes of despair and hostility. Evidence is presented on (1) the extent and level of types of grievance for the sample population, and their degree of participation and support for the rict; (2) the relationship between orievance and rict-related behavior and attitudes; and (3) an attempt to partition out the relative effects of structure and level of discontent on the propensity to favor and support (or legitimize) (Authcr) viclence.

IOS ANGELES FICT STUDY: THE GHETTC MERCHANI SURVEY

California Univ., Los Angeles. Inst. of Government and Public Affairs. AUTHCF: Faine, Walter J. 4053J2 FID: 5K USGETR6801 1 Jun 67 29p CONTEACT: OEC-666

ABSIFACT: In the Los Angeles ghetto, where the merchant is a member of an elite, better-educated group, resentments between merchants and customers abound. Many of these merchants were driven out by the 1965 riot; fcr cthers, particularly those giving heavy credit, the ghetto is no lenger a good place to do business. Apparently, many of them will leave the area. It must become a question of public policy as to whether these types of enterprises will be supported in some way, or perhaps Negro Eusinessmen will be encouraged to fill the gap. It is evident that a considerable propertien of merchants would choose to change certain of the conditions of ghetto life, by one or more means. It is striking that these are all grand, rather far-off goals which look good on paper, but never involve the merchant with any change in his personal attitudes toward Negroes, or his way of doing business, cr any fundamental change in the existing network of psychological alienaticn between Negro customer and white merchants. It is speculated that naming a distant qcal like "more education" is a way of not coming to grips with the reality of the poor relationships that now exist. The white merchant who gives traise to large nice-sounding programs of help for the Negro, does not see thegulf that exists between him and the Negro, man to man, person to person. (Author)

LOS ANGELES FIOT STUDY: RIOT PARTICIPATION

California Univ., Los Angeles. Inst. cf Government and Public Affairs, AUTHCH: Sears, David C., McConahay, John E. 4053E2 FID: 5K USGEDR6801 1 Jun 67 28p CCNTFACT: CEC-666

AESTFACT: Analysis of two samples, a random sample of the Curfew Zone and a sample of persons arrested for rict activity, suggests the following conclusions: (1) Up to 15% of the Negro adult population, cr as many as 34,000 persons, were aggressively active during the riot. These people were more than just spectators and were greater in number than the entire combat commitment of the United States in Vietnam at the end of 1964, (2) An additional 31% of the Negro adult population, or at least 64,000 persons, were active spectators to the disturbance. They were on the streets, close enough to see crowds of reople, and stores being looted and turned. It seews clear that they formed a permissive, if not actively supportive, audience for the The propertion in the crewds whe actively opposed the rioting. rioting was very small. (3) Previous estimates of the magnitude of carticipation have seriously underestimated the broad base of the riot. (4) The scale of the rioting, both geographically and in terms of the number of people involved, was such that most of the people in the Curfew Zone were touched personally by it. (5) The most active were young men. Young women were more active than men over 30, suggesting a substantial 'generation gap' in the Negro community. The ricture fortrayed by these data is one of widespread community involvement in the riot, though it does not rule out the possibility that certain acts were the work of a small minority. But it is emphasized that a majority of the area's inhabitants were involved in the incidents, at one level or another. Further, the data imply that the burning and looting of places of tusiress, if not the shooting and rock throwing, took place in open view of and with the passive consent (if not approval) of a majority of the Negro community. ICS ANGELES RICI STULY NEGRO ATTITUDES TOWARD THE BICT

California Univ., Los Angeles. Inst. of Government and Public Affairs. AUTHOR: Tomlinson, T. M., Sears, David C. 4053F3 FID: 5K USGEDR6801 1 Jun 67 38p CONTFACT: CEC-666

AESTRACT: Ncnviolent protest was one of the characteristics of the civil rights movement in its early phases. No such morality appears these data. The Negro respondents did not like the riot events, in but they did not profess moral outrage as did the white respondents. Nonviolence arrears to have lost its hold on Negroes as a protest form the face of continued frustration of aims, and it follows that the in ccuntry may expect increased rather than decreased civil disturbances. That more violence will come after the Ics Angeles rict is already a foregone conclusion. Many Negroes still maintain a poignant faith in the good will of white society, but that faith is being turned into despair as years pass with no material change in their lot. Out of despair, alternatives are tried which in better circumstances would never be considered. One of these alternatives is a riot, and it is a rock-bottom plea for help. The white society would do well to keep in mind that force will suppress the response, but not the motive and the conditions from which it comes. (Author)

INC WEEKS OF PACIAL CRISIS IN FICHMOND, CALIFORNIA

California Univ., Berkeley. Survey Research Center. (402 719) AUTHCR: Wenkert, Robert, Magney, John, Neel, Ann 4052D2 FID: 5K USGRER6801 Aug 67 239p FEPI NC: SEC-M21 GRANT: PES-MH-00970

PESIFACT: The sequence of events that actually occured are traced to provide a solid exposition of the major facts, and the accuracy of the stories that circulated is judged in the light of all the available evidence. The connections between the disparate events and between the crisis and the state of the community as a whole are exclored to suggest some of the more plausible reasons for the disarray in which Richmond found itself during those two weeks. It is concluded that fart of the viclence and most of the turnoil that marked race relations in Richmond were based on or supported by feelings about These feelings were manifest and latent injustices and inequities, among both whites and negroes. Coupled with visible and clear evidence of gross differences in life chances and life conditions, such feelings can easily be called out and provide a basis for much more severe discreter than was apparent in March of 1966. COMEATING SUEVERSIVELY MANIPULATED CIVIL DISTURBANCES

American Univ., Washington, D. C. Center for Fesearch in Social Systems. (401 694) AUTHCE: Jones, Adrian H., Molnar, Andrew S. 2842A4 FID: 15G, 5 TAE6701 Cot 66 82p CONTRACT: DA-49-092-ARC-77 MONITCE: 18

ABSIFACT: Civil disturbances have occurred throughout history in many areas of the world, especially during periods of rapid social, economic, and political change. Recent civil disturbances manipulated subvert existing governmental authority have added a new dimension tc to the problem of maintaining internal security. The participants in a subversively manipulated civil disturbance can be identified as: (1) the dissident groups; (2) the crowd; (3) the subversive manipulators; the internal security forces; and (5) the general population of (4) the community concerned. The principal protagonists are the internal security forces and the subversive manipulators. The civil disturbance consists of four identifiable phases: (1) the precrowd phase; (2) the crowd phase; (3) the civil disturbance phase; and (4) the post civil disturtance plase. During each of these phases the subversive ganipulators and the internal security forces are engaged characteristic forms of behavier in order to accomplish their 1n respective objectives. Each of the protagonists encounters problems in attempting to gain his objectives and employs specific methods and techniques in performing functions designed to solve the problems and the objectives. A systematic study of the patterns of attain development of civil disturbances and the tactics of the subversive manipulators is made to identify countermeasures for controlling the subversive manipulation of civil disturbances, (Author)

ACMINISTRATICN OF INVESTIGATIVE ACTIVITIES. A STUDY OF PACTORS FELATING TO CONTROL OF INVESTIGATORS

Michigan State Univ East Lansing (000000)

Master's thesis AUTHCR: Faughn, Jchn H. 1822L2 USGRDR6520 1965 2p CCNTFACT: AF33 608 1085

ABSTRACT: The study investigates factors relating to control of investigative personnel. The nature of investigative duties requires a considerable degree of both freedom of discretion and judgment on the part of the investigator. Much of his work is performed away from the office and out of sight of superiors. Contacts, out of necessity, maintained with criminal elements. Ecth temptation and are cpportunities for crime are cften presented. It is hypothesized that in view of the unique nature of investigative duties the most effective control will be achieved in an environment which emphasizes a positive approach to motivation of personnel. In this concept the goals of the individual and those of the organization are integrated into an over-all common objective. Control of investigators in this sense is not merely concerned with the restrictive aspect of control, that is, to keep an investigator from defecting cr corruption, but with achieving from the investigator cutstanding results.

LABCEATORY SIMULATION OF A POLICE COMMUNICATION SYSTEM UNDER STRESS

Chic State Univ Columbus (000000)

Dectoral thesis AUTHOR: Drabek, Thomas Edward 1792E4 USGRDR6521 1965 2F CONTFACT: AF AFCSF572 65 FROJECT: 9779 TASK: 977901 MCNIICR: AFOSR-65-1714

ABSIBACT: A laboratory simulate of the communication system of a metropolitan police organization was constructed to (1) analyze organizational stress, (2) explore the utility of realistic simulation as a technique for the analysis of complex organizations, and (3) test selected aspects of the theoretical framework by subjecting the constructed simulate to stress. The simulate involved 4 police officers and 26 simulators. It was found that the simulate behaved exactly as its real counterpart. The central hypothesis of the framework was supported, i.e., if there is organizational stress, then there will be change in organizational performance structure. (Author)

FSYCHCFATHY, NEUTORTICISM AND VEREAL CONDITIONING: A REPLICATION AND EXTENSION

Northwestern Univ Evanston III (CCOOOO) AUTHOR: Quay, Herbert C., Hunt, William A. 1522C2 USGRDR 1962 2p CONIFACT: N7CNR1228 11

ABSIFACT: In a previous paper (Johns and Quay, 1962) it was found that criminal offenders in the military service who had scored high on a factorially derived questionnaire for the measurement of Psychopathic Lelinquency failed to condition in a standard verbal conditioning raradigm when compared with a group of offenders who had scored high on a similarly derived scale for Neurotic Delinguency and with a group The results of this experiment were interpreted as controls. cf support for the hypothesis that the psychopathic individual is unresponsive sccial comparatively to reinforcement. This interpretation was in turn related to Cleckley's (1955) concept of Semantic Dementia. Raised, but unanswered, was the question of the relationship of poor conditionability in this group to manifest anxiety and extraversion. Ss for this study were all incarcerated in an institution for more serious offenders in the U.S. Navy. A sample 458 prisoners, almost the entire population of the facility, was of administered the Psychogathy and Neuroticism factor scales (Peterson, Quay and Tiffany, 1961) used in the previous study. Means were for the entire sample and one group was then identified who computed had scored above the mean on Psychogathy and below the mean on Neuroticism; another group was identified who had scored above the mean on Neurcticism and telow the mean on Fsychopathy.

UNITED STATES DEPARTMENT OF COMMERCE National Technical Information Service 5285 Port Royal Road Springfield, Virginia 22161

Dear Customer:

After January 1, 1977, NTIS began indicating a simple price code in bibliographic citations instead of a dollar price. The price codes indicated in NTISearches can be converted to dollar amounts using the price list given on the reverse of this page.

You will note the price list is divided into three sections:

Standard Priced Documents and Microfiche Exception Priced Documents and Microfiche Computer Products (Magnetic Tape)

As an example, if a citation indicates a price code A09 then the document is a standard priced item and will cost \$9.00.

Many citations will not include price codes for quite some time. We would, therefore, like to give you some guidelines to assist in determing the correct price for those citations <u>not</u> including a price code.

- If a paper copy price code is not indicated, find the page count in the citation and look up the corresponding page range in the Standard Price Schedule, then pay the price indicated.
- (2) If the paper copy price printed in the citation is higher than the price indicated in the Standard Price Schedule, then pay the price printed in the citation.
- (3) Most microfiche are available for \$3.00. If the microfiche price printed in the citation is higher than \$3.00, then pay the price printed in the citation.
- (4) For Computer Products (Magnetic Tape) contact NTIS for a price quote.

We hope this price list and guidelines for its use will be helpful during this interim period when both price codes and non-current prices appear in the on-line searches. If you have any questions, do not hesitate to telephone NTIS Customer Sales, (703) 557-4650.

Sincerely,

awdlefonder

A. W. Alexander Product Manager
