ABSTRACT

Seven case studies are presented to further research on juvenile problems and to clarify existing juvenile problems. These seven were all inmates of the same institution at the same time, and were selected case studies--neither the best nor the worst. They were all interviewed inside the penal institution. The first part asked each about the charges against him and also asked for a history of previous charges. The second part dealt with their home and family life, as well as their street life and/or gang activity. The last part tried to lead the youngsters into making a prediction about the future. No attempt was made to summarize this writing or to make generalizations from the seven cases studied. (Author/NG)

These seven case studies are presented to enable research on juvenile problems. These studies were done by Mr. Williams in an effort to clarify existing juvenile problems. These seven were all inmates of the same institution at the same time. They were selected case studies and were neither the best nor the worst.

The presentation of these studies have no meaning so for a criticism of a particular institution nor state. Rather it is hoped by the two author to provide useful factual study of some existing problems without journalistic fabrication or misrepresentation.

The students were all interviewed personally by Mr. Williams inside the penal institution named by the youngsters.

The first part asks each about the charges against him and also asked for a history of previous charges.

The second part dealt with home and family life of the youths. Since the counselor was known by the inmates and was not a threat to them it was an inducement to speak openly and frankly.

The street life and/or gang activity was queried for information relating to peer influence.
